APPLICATIONS REGISTERED WEEK ENDING 20/12/2018**

**Reference:** TP/2018/0678 CA

**Ward:** Harpenden West

**Received:** 15/12/2018

**Proposal:** The tree in question is a large Monterey Pine in the rear garden which has become problematic. It has become very lop-sided. Some branches fell off in the snows last year apparently. Others overhang a neighbour's new shed and fence. And the whole canopy is blocking the light not only from our garden but those of the neighbours on either side. (I think you may have discussed it when visiting our neighbours, Mr and Mrs Pope in No. 43 Tennyson Road.) I understand we are in a conservation area, though it looks from your website as if the tree in question is not covered by an individual TPO. What I am applying to do in the first instance is to cut it back to remove any potentially hazardous branches, and to remove some of the excessive density of branches overhanging No. 43. The neighbours have asked about the possibility of removing it altogether. At present we have an open mind about this, and would be grateful if you could also advise whether there would be any objection to doing so in the future. We have been told it is only 35 years old, in which case it seems to be growing very fast, and is already too large for a fairly small garden, half of which it overshadows and stops grass being grown.
