

**ST ALBANS DISTRICT COUNCIL TREE WORKS
APPLICATIONS REGISTERED WEEK ENDING 08/11/2018**

Reference: TP/2018/0597 CA

Ward: Harpenden West

Received: 02/11/2018

Proposal: FIVE DAY NOTICE We have a large Ash tree about 50 feet high located in the front hedge adjacent to a regularly used public footpath. The tree is adjacent to a large Holly tree and well established large Yew tree. The tree trunk base was until recently obstructed from view following the removal of a long standing shed. The tree trunk base has a large hollow (please see photos) and is clearly rotten inside where it has grown through an old iron fence. We estimate the rot extends to c60-70% of the internal trunk. The tree itself also grows to one side with several large and high branches running parallel to the public footpath and no branches to counter balance on the other. We estimate the general lean on the tree trunk to be around 30% in the direction of the large branches. The trunk base has a buttress opposite the centre of weight but the rotten hollow mostly cuts through this now (please see photos). We are seeking permission to fell this potentially dangerous tree.

**ST ALBANS DISTRICT COUNCIL TREE WORKS
APPLICATIONS REGISTERED WEEK ENDING 08/11/2018**

Reference: TP/2018/0598 CA

Ward: Clarence

Received: 03/11/2018

Proposal: Of the following trees, only the Lime (T5) is within the marked conservation Zone Boundary, the others are close to the boundary. Purple Acer (T1) at the rear of 130 Clarence Road which overhangs and overshadows 7a Sunderland Avenue's garden. This tree appears to have suffered previous fire or lightning damage and is in poor condition which we wish to remove it. Oak (T2) at the rear of the garden of 130 Clarence Road which overhangs and overshadows 7 & 7a Sunderland Avenue's gardens. It is very close to the copper beech (T3) and is only able to grow its canopy over the neighbouring gardens and has no canopy growth on the aspect facing the copper beech. The tree takes significant light from the properties and because of its abnormal growth, it is proposed to remove this tree to provide space to the mature copper beech behind. Copper Beech (T3 and T4 are mature trees and no works are proposed. Lime (T5) is healthy but has grown significantly and removes significant evening light from 7 Sunderland Avenue. It is proposed to reduce the height by 50% and reduce and shape the crown accordingly. This will not impact privacy from any neighbouring property and such reduction will not negatively impact the tree. Sycamore (T6) potentially in Conservation Area which overhangs gardens at 126, 128 and 130 Clarence and 5 Sunderland Avenue. It also removes the light from 5, 7 and 7a Sunderland. The tree is of poor condition and suffering from stunted growth possibly due to disease. It is proposed to remove this tree at the base.

**ST ALBANS DISTRICT COUNCIL TREE WORKS
APPLICATIONS REGISTERED WEEK ENDING 08/11/2018**

Reference: TP/2018/0600 CA

Ward: Harpenden West

Received: 05/11/2018

Proposal: Tree 1 (T1) Pine- situated at the entrance to the store car park . Limb failure present within the crown of the tree, 2 branches appear to have snapped but are still held on by the wood fibres. Remove 2 failed limbs identified on the site visit plus any other dead or dying limb. Crown raise to 5m Tree 2 + 3 (T2+3) Yew . Both trees show signs of minor deadwood throughout the crowns. Remove deadwood back to branch collars tree 4 (T4) Laurel Hedge. The hedge is significantly blocking the car park light. Reduce the height of the hedge by 1/2, 3 metres either side of the light. Tree 5 Group (T5) 2x Holly, Buddleia, Alder buckthorn. 1 x Mature Holly growing at 45 degrees towards the trolley bay and overhanging the car park. 1x Buddleia directly behind the Holly and growing in the same direction . 1x Semi Mature Holly on the opposite side of the trolley bay growing at 45 degrees into the next tree . 1x Semi Mature Alder Buckthorn overhanging the trolley bay and over the car park spaces . Remove all 4 trees to ground level. Tree 6 Group (T6) Sycamore, Laurel, various vegetation . All ground level vegetation within this group is obscuring the car park light making this ineffective. Remove vegetation to ground level to improve splay from the car park light. Tree 7 (T7) Cherry. Dying tree identified behind the car park warden hut . Remove to ground level. Tree 8 (T8) Acacia . Tree is growing very close to the entrance of the store, small amounts of the lower growth are starting to make contact with the roof. Lift tree adequately to maintain clearance from the store roof. T9 Yew hedge (not shown on plan). Cut back to boundary where it overhangs neighbour's property. Additional Works . Remaining boundary vegetation overhangs the car park and in places may hinder customers from accessing the boot of their vehicle . Lift all vegetation to give good height clearance over car park spaces
