

The Local Cycling and Walking Infrastructure Plan (LCWIP) for St Albans District is being drawn up by Hertfordshire County Council (HCC) in partnership with St Albans City and District Council. The LCWIP aims to make walking and cycling the natural choice for shorter journeys or part of longer journeys. A technical study identified key cycling and walking routes in the District where the potential demand is greatest and where changes will most benefit residents. A number of improvements were put forward and costed for 72 priority routes. Details can be found on the [HCC website](#).

Residents, businesses and community groups were asked to give their views on these proposals. The St Albans Local Cycling and Walking Infrastructure Plan consultation closed 20/03/2023.

The responses to the consultation are being considered and a proposed first iteration of the LCWIP is due to be considered for adoption by Councillors in St Albans City and District Council and Hertfordshire County Council in autumn 2023. As a living document the LCWIP will continue to be updated periodically over time.
