4. SW Herts JSP_Windridge Farm_Vision Document_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

## 224 - Redington Capital Limited & CALA Homes

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 13

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Redington Capital Limited and CALA Homes **object** to Part B (Site Allocations) which forms part of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

Redington Capital Limited and CALA Homes conclude that the site allocation selection process undertaken by the Council is unsound. They recommend that the site selection process should be completely reviewed, revised and the draft allocations re-assessed in a transparent and consistent approach particularly in applying the recommendations of the GBR.

In addition to the above, there are a number of other concerning questions regarding some of the Broad Location sites and other housing site allocations chosen by the Council, including:

- Site H2 (1,600 homes) - This is a site located within in the Green Belt (SA168 & 169) and is regarded to **strongly** meet the purposes of the Green Belt. The vast majority of the site is regarded as important in strategic role terms. It was **not recommended** within the Green Belt Review as an area for release. In addition, some of the housing allocation has been put on the higher-quality agricultural land. However, it has been included in the Local Plan. This site will only come forward as part of the Hemel Garden Communities Programme which relies on the neighbouring borough's draft Local Plan being made sound!

It is clear from the above that the Council has chosen to allocate site:

- In locations deemed to be of strong importance to the purposes of the Green Belt;
- That are not located within the most accessible and sustainable locations; and
- That are either undeliverable or their capacity has been grossly over-estimated.

This demonstrates that the site allocations strategy adopted by the Council needs to be fundamentally reviewed and revised.

This conclusion is further exacerbated when considering the Council has chosen to ignore other more accessible and sustainable sites in lower tier settlements, including Redington Capital Limited and CALA Homes' site (Land South of Chiswell Green Lane), which:

- Benefits from high levels of accessibility by public transport and to local services (as demonstrated in Section 7 below);
- Has less harm to the purposes of the Green Belt (as demonstrated in Section 1 above);
- Is available and deliverable at a density of development that has previously been supported by the Council's planning officers when recommending approval of application ref: 5/2022/0927 (as demonstrated in Section 7 below);
- Is supported by the Inspector when determining Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024; and
- Upheld by the SOS's decision.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council:

- Should be more realistic about its choice of housing sites to deliver its critical housing needs. Some of the current set of site allocations appear to have been included / inflated to "make up the numbers." We therefore strongly recommend that the site allocations are reviewed again and the Council should:
- Remove any sites that are undeliverable;
- Reduce the expected capacity of sites that are obviously constrained and will not therefore delivery the density suggested; and
- Provide evidence to justify all site inclusions and their estimate capacity.
- Include new broad location housing sites that:
- Are located in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and services or will not be used by the district's residents;
- Result in less harm to the purposes of the Green Belt; and
- Are available and deliverable.

Redington Capital Limited and CALA Homes recommends that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing and education land allocation in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

## 227 - National Grid

Submission Number: 227 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: National Grid (Avison Young) Name: National Grid

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Proposed development sites crossed or in close proximity to NGET assets: Following a review of the above Development Plan Document, we have identified that one or more proposed development sites are crossed or in close proximity to NGET assets. Details of the sites affecting NGET assets are provided below.

**H2 – East Hemel Hempstead (North) -** ZA ROUTE TWR (419 - 522): 400Kv Overhead Transmission Line route: ELSTREE - SUNDON 1

A plan showing details of the site locations and details of NGET assets is attached to this letter. Please note that this plan is illustrative only.

Without appropriate acknowledgement of the NGET assets present within the site, these policies should not be considered effective as they cannot be delivered as proposed; unencumbered by the constraints posed by the presence of NGET infrastructure.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We propose modifications to the above site allocations and/or policies to include wording to the following effect. We propose that these modifications are applied to each of the aforementioned site allocations affected by NGET assets.

**OS1 – Land to the North of Bricket Wood**
*The development will include a strategy forresponding to the NGET Overhead Transmission Cable present within the site,demonstrating how the NGET Design Guide and Principles have been applied at the masterplanning stage and how the impact of the assets has been reduced through good design."*

**248 - Historic England**

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 13

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**H2 - East Hemel Hempstead (North), HP2 7HT**

The site contains three Grade H listed buildings centred on Wood End Farmhouse. As a farm, these buildings have a direct association with the rural landscape. Further afield, the remains of Old Gorhambury, listed at Grade I, Gorhambury listed at grade H*, Bacons House scheduled

monument and Gorhambury Registered Park and Garden and a number of other grade H listed buildings lie to the east of the site. Any development of H2 has the potential to impact these heritage assets by affecting their settings.

We welcome the preparation of the HA. We broadly welcome the inclusion of criterion 17 and 18 in relation to heritage assets and Aubrey's Camp scheduled monument.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We recommend that criterion 17 would be further improved if amended to read:

*Through Masterplanning the layout and design of development should conserve and where appropriate enhance the significance of the Grade II Listed Wood End Farm Cottages, Grade II Listed Wood End Farmhouse, Grade II Listed Large Barn at Wood End Farm, and The Aubreys Camp Scheduled Monument; this should include the incorporation of appropriate set backs of development and creation of open spaces.*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 260 - Mr Gerald Eastwood

Submission Number: 260 Submission Date: 08/11/24 08:08

Respondent: Company/Organisation: Name: Mr Gerald Eastwood

Comment Number: 5

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

- Proposed West Redbourn (B3) and Hemel Garden Communities developments will completely remove the current green belt buffer between Redbourn and Hemel Hempstead (only 1km remaining). The whole purpose of the green belt is to prevent urban sprawl, these developments completely go against this policy. Even though the ARUP report commissioned by the council rejected the Hemel Garden Communities development due to coalescence, they have decided to proceed anyway – ignoring the findings. An explanation as to why "exceptional circumstances" exist that justify building on this greenbelt land has still not been provided.
- Have the West Redbourn (B3) site and the Hemel Garden Communities developments been considered together? We haven't seen evidence of this – especially when it comes to the greenbelt.
- Loss of arable land when government should be prioritising self-sufficient food chain. Also damaging to the chalk stream network.
- The West Redbourn (B3) site in particular is a complete abomination; even local housing associations have objected to it. The access proposed will create a huge increase of traffic volume throughout the village – making it lose its village identity and putting significant pressure on already over stretched services and road network.

### If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Employment Uses within Site Allocation Policy H3**

The Local Plan Part B – Local Plan Sites sets out the site allocation policies. This includes allocation H3 East Hemel Hempstead (Central). Within this policy, points 11 and 12 require that the southern 17ha of the site will include employment uses to deliver a Business, Research and Development Park and the remaining 36ha to the north of the site for uses such as logistics and mixed industrial uses.

***Locational Restrictions***

It is understood from discussions with SADC officers that in their view, a requirement to fix the spatial disposition of use classes set out within the policy wording is considered necessary to minimise the risk of logistics developments becoming the dominant development form within the site, and thus limit the ability to create an attractive gateway into the town from the M1 and St Albans and affect the site's perceived attractiveness for business and R&D.

We support the principle of requiring a mix of employment uses within policy H3 in order to deliver a range of employment at East Hemel (Central). We also support the addition of point 18 of H3 requiring *"A high quality gateway entrance along the A414 to Hemel Hempstead serving H3 and H4"* reflecting the Council's aspiration for this part of the site to contribute positively to one the key gateways into Hemel Hempstead.

However, it is considered that as currently drafted, the spatial limitations placed on different employment uses within the policy is overly restrictive and could result in masterplanning challenges and development forms that may adversely impact upon placemaking and sustainable construction and low carbon design solutions which reflect the physical characteristics of the site as well as its interface with surrounding places. The policy restriction on the location of these use is also generated by an assumption that they could not contribute positively to the creation of a gateway, which is not an inevitable conclusion provided that well-designed frontages, gateways and a landscape led masterplanning approach to edge treatments is adopted.

TCE are committed to ensure that a masterplan-led approach to the distribution, layout, form and phasing of employment uses in this location - including at the interfaces of the employment area with residential areas to the north and south - is secured to ensure that placemaking ambitions are realised across the three EHH allocations. As the masterplanning work is at an early stage, we suggest that more flexible wording around the location of different employment uses within H3 would allow for the optimum design solution to be secured for the employment area: reflecting its role as a 'integrator' between the northern and southern residential neighbourhoods (H2 and H4); accommodating the range of employment uses envisaged in a well-designed manner which also delivers on the wider placemaking objectives of HGC; and providing a high-quality gateway to Hemel Hempstead.

We therefore object to the locational specificity currently in clauses 11&12 of policy H3 for the reasons given above.

***Phasing Restriction***

We also suggest that flexibility be provided in policy around the timing of the provision of innovation hub relative to the delivery of other employment uses on site. Whilst TCE are committed to working with Herts IQ and other delivery agencies to support the creation of the innovation hub at an early stage, it is considered overly restrictive to require this to be provided in advance of other employment uses, for which a rapid response to market demands and occupier requirements will be needed if the quantum and mix of employment uses is to be realised within the plan period.

***Clarification of 'Education Opportunities'***

We also note the addition of the reference to 'education' within the Regulation 19 H3 policy wording and have sought clarification from officers as to what was intended through this addition.

We understand that the reference to 'opportunities for education' relates to the opportunity to support higher and further education initiatives within the wider employment offer at EHH (Central), rather than making education provision on site. As a result of this clarification, we have suggested minor clarifications to wording of clause 11.

Taking the points made above together, in order to make Site Allocation Policy H3 effective and thereby ensure soundness, the following adjustments to the policy wording are sought:

*"11. **The southern aA**pproximately 17 Hectares of the site will promote high density, higher skilled employment uses to deliver a Business, Research and Development Park and explore opportunities **related to support**for **higher and further**education **initiatives**. **Early**The first phase**s**of employment development will **include**provide an innovation hub prioritising space for start-up units in high quality buildings and units that provide grow on space for small businesses and support the growth of life science and agri-tech businesses.*

*12. The remaining approximately 36 Hectares* ***to the north of the site****will promote uses such as logistics and mixed industrial areas."*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**11 Policy LG2 (Support for Transformation of Hemel Hempstead)**

**Green Belt**

11.1 The Stage 2 GBR (2023) concludes that Sub-Areas SA-167, SA-168, SA169a, SA-169b, SA-170, SA-171 and SA-172 perform strongly against the NPPF Green Belt purposes. Of these Sub-Areas the GBR recommends that only SA-167, SA-169a and SA-169b should be taken forward for further consideration and there are still concerns raised regarding these Sub Areas in the GBR as set out below. We note that 169a is proposed for release in the Draft Local Plan but 168b is not proposed for release.

11.2 Sub-Areas (SA-168, SA-170, SA-171 and SA-172) form the Broad Locations North Hemel Hempstead and East Hemel Hempstead (North) and are also assessed as 'Important' in terms of their wider impact on the Green Belt.

11.3 Given that the two proposed Broad Locations at North Hemel Hempstead and East Hemel Hempstead (North) have not been recommended to be taken forward for further consideration SACDC and the Local Plan should not be proposing these areas for Green Belt release. **This should effectively remove these two Broad Locations along with their development assumptions which principally consist of a total of 3,100 dwellings.**

...

**Hemel Garden Communities Trajectory**

11.5 Policy LG2 states that "*the Hemel Garden Communities programme will deliver at least 4,300 new homes by 2041 and 5,500 homes in total by 2050, delivering this through a network of new garden communities to the north east and east of the town within St Albans District".*

11.6 Paragraph 75 of the NPPF states that: *"Strategic policies should include a trajectory illustrating the expected rate of housing delivery over the plan period, and all plans should consider whether it is appropriate to set out the anticipated rate of development for specific sites".*

11.7 The Draft Local Plan fails to include a housing trajectory for specific sites (including those in the Hemel Garden Communities) so that consultees can comment on the potential timing of housing delivery and the need for supporting infrastructure that needs to be delivered in close coordination for each site. This makes it rather difficult to comment on any delivery assumptions for particular sites when the Council has not considered this even though it has selected the sites as allocations.

11.8 However, the Draft Local Plan does include a high level housing trajectory (Table 3.2) and we have analysed this due to a lack of more detailed information presented by SACDC.

11.9 Furthermore, we seriously question what the Housing Trajectory is not only for the HGC sites in St Albans District but for those in Dacorum – this is not set out in the Local Plan and is clearly a critical missing piece of information for the overall Local Plan.

11.10 As the Lichfields 'From Start to Finish' evidence (Editions 1 -3) and the Letwin Review (2018) highlight, the delays with the delivery of large development proposals should not be underestimated as there will be many aspects of the housing trajectory that are beyond the immediate control of a local planning authority. We provide an analysis of this below.

**Development Lead in Times**

11.11 The trajectory is particularly unrealistic in terms of when it assumes that housing delivery will commence at the Hemel Garden Communities. The first delivery year assumed is 2029/30 with 100 dwellings. This is in four years from now.

11.12 In the recently published *'Start to Finish – How quickly do large-scale housing sites deliver"* 3rd Edition, September 2024 (Lichfields) (see Appendix B of these representations) provides an update on important research on the delivery of strategic sites across England. Its findings are that for sites of 2,000 dwellings or more (like Hemel Garden Communities) that it takes between 4 and 7.9 years from the validation of the first planning application to the first dwelling being delivered (see Table below).

*Figure 11.3: 'Start to Finish – How quickly do large-scale housing sites deliver" 3rd Edition, September 2024 (Lichfields)*

11.13 The Report updates the previous report on the average time taken from gaining outline permission to the completion of the first dwelling on site (see below). This indicates that it takes on average around 3 to 4.6 years from the grant of outline planning permission to deliver the first dwelling. It concludes that at the time of its granting, an outline permission will deliver limited housing in a five-year period.

*Figure 11.4: 'Start to Finish – How quickly do large-scale housing sites deliver"*3rd Edition, September 2024 (Lichfields)

11.14 As Policy LG2 (Support to Transformation of Hemel Hempstead) states all development in the HGC Programme Area must follow a planned and coordinated approach to growth and infrastructure and is expected to be in accordance with:

- *Local Plan Infrastructure Delivery Plans (IDPs)*
- *Hemel Garden Communities Spatial Vision*
- *HGC Framework Plan evidence base*
- *HGC Concept Plan*
- *HGC Local Plan Policies,*
- *Supporting SPDs and Design Codes.*

11.15 It requires that "Developers and promoters in the HGC Growth Areas must work together and closely with the Councils to secure a collaboration agreement which ensures an integrated and seamless approach across site boundaries. Critical infrastructure necessary to support development must be delivered ahead of occupation. Proposals must not prejudice or impede the provision of wider infrastructure required within the HGC Programme Area. Infrastructure, contributions and wider funding will be required to deliver on and offsite infrastructure, in accordance with the above documents."

11.16 Clearly the HGC is highly complex with many authorities and parties involved in the planning and delivery process. There is also rightly a commitment to working closely with the local communities as part of this process. All of this suggests that the Lichfields research is very much a 'best case scenario' in relation to the HGC Broad Locations.

11.17 **So, we ask, what is SACDC's assumption about each of the proposed four Broad Locations at Hemel Garden Communities (H1, H2, H3, H4) in terms of the following:**

- When will the Design Codes and SPDs will be prepared and approved?
- When will the pre-application process take place including consultation and engagement with relevant consultees and stakeholders?
- When will the preparatory site works, to be informed by site-specific survey recommendations and monitoring before commencement take place?
- When will an outline application be submitted and approved for each Broad Location?
- When will a full application will be submitted and approved?
- When will reserved matters applications be submitted and approved?
- There is reference in Policy LG3 (Hemel Garden Communities Growth Areas Place Principles) to the potential need to use Compulsory Purchase Orders (CPO) powers to ensure infrastructure is provided in a timely manner. What are the time estimates made for this in the housing trajectory?
- When will the S106 for each parcel is expected to be agreed?
- When will the pre-commencement conditions for each parcel be agreed by SACDC?
- What are SACDC's assumptions for the opening up works required for each of the sites and combined?
- What infrastructure is required to be funded and / or delivered prior to commencement for each of the broad locations?
- What is the planning approval process and timing for each piece of infrastructure?
- When will conditions be discharged?

11.18 SACDC needs to answer these questions so that a realistic housing trajectory can be prepared as the current version will lead to a shortfall in housing in the District over the first five years upon adoption. As a result, the borough will be subject to planning appeals due to a lack of

a five-year housing land supply. With the Local Plan still yet to be submitted to the Secretary of State there is still an opportunity for SACDC to allocate additional housing sites to ensure that the shortfall of anticipated delivery is addressed.

*Figure 11.6: Timeline for the delivery of strategic housing sites – Start to Finish Lichfields (2024)*

11.19 The additional and important benefit of this approach is that the SPDs and planning applications at Hemel are not 'rushed through' in hopes that the development will meet unrealistic commencement dates.

11.20 The report concludes that for schemes of 2,000+ dwellings the mean years from validation of the first planning application to the first dwelling being completed is 6.6 years.

11.21 Therefore, considering this research, RPC is concerned with the proposed housing trajectory, as it would not be realistic to rely on the Hemel Garden Communities development (over 4,300 dwellings) would deliver its first homes in year 6 since the adoption of the Local Plan.

*Figure 11.5: Overall lead-in times for sites of 100 dwellings or more, including time taken for outline consent size by size. Source: Lichfields report 'Start to Finish' (2024).*

11.22 Hemel Garden Communities is clearly a cross-boundary joint working project between SACDC, Dacorum, Herts County Council and others. The South West Hertfordshire Joint Strategic Plan is being prepared with Dacorum, Hertsmere, Three River and Watford Councils and there is no agreed timetable for taking this forward (as set out earlier in our representations). This complexity and cross-boundary working is likely to slow the process down even further so the assumptions above should be considered a 'best case' scenario.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Given that the two proposed Broad Locations at North Hemel Hempstead and East Hemel Hempstead (North) have not been recommended to be taken forward for further consideration SACDC and the Local Plan should not be proposing these areas for Green Belt release. **This should effectively remove these two Broad Locations along with their development assumptions which principally consist of a total of 3,100 dwellings.**

The trajectory is particularly unrealistic in terms of when it assumes that housing delivery will commence at the Hemel Garden Communities. The first delivery year assumed is 2029/30 with 100 dwellings.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

---

## 311 - BP Oil UK Ltd

Submission Number: 311 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: BP Oil UK Ltd Name:

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The draft allocation of primary interest to bp is H3, which includes the currently agricultural land located between Punchbowl Lane to the north, the M1 to the east, the A414 to the south and Green Lane (and the boundary of the site) to its west. This is because the allocation is immediately adjacent to the subject site. It is noted H3 proposes around 6,000 new jobs (point 21).

Whilst the majority of the development in allocations to H1-H4 inclusive is anticipated by the draft plan to be delivered by 2041, the draft Local Plan horizon, it identifies that some delivery is likely to
take place post-2041.

**Impacts on bp's operations**
It should be noted that bp does not object to the principle of major housing and employment designations. However, the effect of the allocations, if built out, will result in significantly greater levels of residents, works and visitors in closer proximity to the subject site.

This is the case both in the construction phase as the development and associated infrastructure works are built out, and once the allocated developments are operational. The health, safety and security of bp's workforce and the communities in which they operate is of critical importance to the business.

The draft Local Plan allocations H1-H4 inclusive may:
• increase the number of people in close proximity to a COMAH regulated site, particularly with development proposed for agricultural land to the east of the site

• limit bp's ability for any potential future expansion in relation to the site such as new fuel storage tanks and equipment
• potentially compromise the long-term viability of bp's operations from its Hemel Terminal site

bp do not object to the principles of the allocations relating to the HGC, however, we seek to highlight to SADC issues that need to be carefully considered as the draft plan progresses.

bp request that the importance of its Hemel Terminal is recognised and that draft site allocations H1-H4 are amended as required to ensure the continued safe and viable operation of its facility, both now and in the future.

We welcome a collaborative approach on the drafting of the policy wording with SADC officers/Members in order to achieve this objective.

We assume the views of the Health and Safety Executive (HSE) and the Environment Agency have been sought on the allocations - in particular given the subject site is regulated under the Control of Major Accident Hazards (COMAH) Regulations 2015 - and will be fully considered as the draft Local Plan moves forward. We also urge you to consider the views of the downstream oil team (energy security) at the Department for Energy Security and Net Zero.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To expand upon our objection if the policy is not revised as proposed.

## 323 - Diana Ngobi

Submission Number: 323 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: National Highways Name: Diana Ngobi

Comment Number: 4

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

The Hemel Garden Communities (HGC) Programme is a proposal to transform Hemel Hempstead through the regeneration of the existing town and delivery of new housing and infrastructure in St Albans City & District Council and Dacorum Borough Council areas. Within St Albans District, the HGC Growth Areas will deliver at least 4,300 new homes by 2041, with a further 1,200 homes by 2050, providing a total of 5,500 new homes. Further housing growth within the area north and east of Hemel Hempstead, Two Waters and Hemel Hempstead Town will be set out in Dacorum's Local Plan. We note that this has the potential to put pressures and traffic impacts on the SRN and its junctions.

We would also seek to understand if/how the Council plans to have an overarching monitor and manage policy which addresses the cumulative traffic impacts of this growth area and the collective impact on the SRN.

The HGC Transport Vision and Strategy document (TV&S) sets out a sustainable movement network approach for the long-term growth and transformation of Hemel Hempstead and wider routes. The approach ensures the HGC programme area can be developed as a successful, integrated, well-connected place. The site has ambitions to achieve a town-wide sustainable transport network with a target of 60% of all journeys starting, ending or within the HGC growth areas and 40% of all journeys starting, ending or within the existing town of Hemel Hempstead, to be undertaken by active and sustainable modes by 2050.

We support the local authority's proposals that considers sustainable transport measures, which manage down demand and reduce the need to travel. We are open to discussions surrounding the district's plan to safeguard land, design, fund, deliver and monitor a package of transport measures to enhance M1 Junction 8 (M1 J8) and surrounding area, in association with Hemel Garden Communities (HGC).

Physical highway improvements for the SRN should only be considered as a last resort. We note that there cannot be any presumption that such infrastructure will be funded through any future RIS (Road Investment Strategy). We strongly recommend that there is no reliance placed on RIS funding to realise capacity for growth in the Plan within the plan period.

<u>Housing and Employment Allocations:</u>

We note that the housing requirement over the plan period is 10,808 across 98 sites in the St Albans area. H2 - East Hemel Hempstead (North) site directly borders the M1 and will provide 1,600 residential units (indicative) in total (1,235 in plan period). The site is to the east of Hemel Hempstead, between the B487 to the north, the M1 to the east and Punchbowl Lane to the south. The site is adjacent to Hemel Hempstead and forms part of the wider Hemel Garden Communities programme.

The site aims to improve and enhance countryside access links including connections under the M1 motorway. These links will require close collaboration with both National Highways and our service partner when an application comes forwards.

Site H3 and H4 East Hemel Hempstead (Central and South) also form part of the Hemel Garden Communities programme and similarly borders the M1. The proposals include mention of land to the east of Junction 8, which will be safeguarded for access improvements associated with Junction 8 of the M1 motorway, in case it is required to come forward for junction improvements.

Site H3 is also classified as Employment Led Mixed Use (Enterprise Zone), approximately 17 hectares of the site will promote high density, higher skilled employment uses to deliver a Business, Research and Development Park and explore opportunities for education. National Highways will be interested in understanding how traffic impacts will be reduced and mitigated as work on this site progresses due to the proximity of the SRN.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

### 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 19

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraph 35 and 36 of the 2023 NPPF require that local plans be positively prepared to be considered sound. To do so its policies must set out a strategy to meet the assessed needs of the area.
HCC has a statutory duty to secure sufficient early years provision under the Childcare Acts 2006 and 2016. This includes, but is not limited to, provision within day nurseries for 0-2 year olds, school nursery classes for 3-4 year olds, and school wraparound care for 5-11 year olds. HCC must therefore ensure sufficiency for all three early years cohorts that tend to receive care in different types of settings.
The 2023 Spring Budget increased parents' access to entitlement for early years support for all children under 3 by September 2025 and sets an expectation that all parents should be able to expect wraparound care by September 2026. This means that the plan needs to make sufficient provision for all of these early years

cohorts (0-2, 3-4, and 5-11), with 0-2 being a particular area of need as these are often provided in private day nurseries rather than school settings.
The Regulation 19 draft plan includes childcare facilities within the list of land uses within some broad locations within the supporting text at Part A table 3.1. This follows engagement with HCC at Regulation 18 stage and is welcome. However, policy in Part B does not require that these be provided within the corresponding allocations themselves. While policy wording in Part B does include reference to early years provision within new primary schools for those sites that are delivering new primary schools, these only tend to provide care to 3-4 and 5-11 year olds and not 0-2 year olds. Therefore HCC does not have certainty that the strategy for sufficient early years for 0-2 year olds will be delivered.
Policy COM1 gives policy support to proposals delivering childcare for 0-2 year olds and nursery for 3-4 year olds. This is strongly welcomed. However this is not the only childcare cohort. As part of its statutory sufficiency duty HCC must also ensure sufficient wraparound care for 5-11 year olds. Similarly, policy strategic policy SP7 gives policy support to proposals including nursery provision, which could be taken that only proposals for provision for 3-4 year olds should be given policy weight (as this can refer only this is cohort in some contexts). Again while policy support is welcome, it should ensure that policy support is given to the full range of settings for different age groups.
To be considered positively prepared and therefore sound the local plan should therefore set out a strategy for childcare provision in the allocations in Part B and clarify policy support for all childcare cohorts in the policies at Part A. This representation suggests a modification that if agreed, or similar, would make the plan sound.

Paragraph 35 and 36 of the 2023 NPPF require that local plans be positively prepared to be considered sound. To do so they must set out a strategy to meet the area's objectively assessed needs.
Policy HOU3 sets out the LPA's policies in respect of specialist accommodation. This only provides policies for determining applications for older person's accommodation. It does not provide policies for determining applications for children's homes. Similarly, the allocations set out in Part B of the plan make no provision for the needs of the section of the community reliant on this form of housing. Children's homes are smaller units, usually indistinguishable in form from a standard residential dwelling, that provide accommodation for 1-5 children in care. They are a vital part of the care system in Hertfordshire, alongside fostering, adoption, and other more specialist forms of accommodation. Under the Children's

Act 1989 Hertfordshire County Council (HCC) has a statutory duty to provide accommodation to children in care. The 2024 draft consultation National Planning Policy Framework at paragraph 63 also makes clear that local plans should make provision for this group and at footnote 29 makes

clear that the local authority's sufficiency data should be considered suitable evidence of need. While it is expected that this local plan will be examined under the 2023 NPPF, this and HCC's statutory duties taken together mean the local plan ought to make
provision for this cohort.
Since the Regulation 18 consultation HCC is seeking for local plans to address this shortfall. There is currently a shortfall of children's home bed places in Hertfordshire for children in care. The 2024 South West Hertfordshire Housing Needs Assessment at paragraphs 10.83-10.88 shows that there is a need for 19¬39 beds at children's homes. Hertfordshire County Council only has access to 15 beds in St Albans. Countywide sufficiency data shows that it cannot accommodate all its children in care within its boundaries. It currently accommodates 89 children in care within other authorities in England, which is less desirable for children in care and expensive to commission, has a further 70 children or young people on the 'waiting placement' list, and an average of 4-5 new requests each day.
To be considered positively prepared and therefore sound the local plan should therefore make suitable provision for this section of the community within St Albans. This representation suggests modifications that if agreed, or similar, would make the plan sound.

To be considered sound the plan must be effective and therefore have a reasonable prospect of delivery.

The site allocations at Part B correctly requires proposals for development to include land and s106 contributions towards the delivery of several primary and secondary schools. This is necessary to satisfy the requirement of NPPF paragraph 99 and HCC strongly appreciates the support that the LPA have placed on sufficient education provision.

HCC's Guide to Developer Infrastructure Contributions and its technical appendices sets out how land and contributions need to be made to ensure that schools are deliverable. Proposals for sites providing schools need to make serviced land available to the County Council (at education values) and make a proportionate s106 contribution towards delivery in accordance with the CIL

regulations. Other sites will make a proportionate s106 contribution. These will be pooled to deliver schools when they are required to meet a cumulative need.

Policy in the Part B site allocations includes delivery of the following (or a similar form of words depending on the allocation):

A 3FE primary school, including Early Years provision, to serve the new community.

Or, in relation to secondary schools:

A site for, and appropriate contributions towards, an 8FE secondary school site within nearby Oaklands land ownership fronting onto Hatfield Road.

These examples' policy wording implicitly limits the deliverability of the schools:

1. It sets a hard target of the capacity of the school, which would limit the schools' ability to open in phases, which is necessary to align supply of places to demand as it builds up over time;
2. It implies in some allocations that schools sought to be developer-built, which is not the County Council's preferred method of school delivery; and
3. In some allocations policy seeks to allocate contributions towards secondary schools for which the land will not be delivered through a s106 process and will instead be delivered as an acquisition later in or following the plan period to meet a cumulative need. Tying the s106 contribution to these secondary schools therefore risks the delivery of other projects needed earlier in the plan period.

The County Council also has a responsibility to ensure sufficient post-16 education, and in Hertfordshire these are usually provided at secondary school 6th forms. The County Council's strategy for post-16 education therefore includes the delivery of 6th forms at new secondary schools and secondary school expansions. For completeness, policy should also refer to 6th form provision

as this has a similar relationship to new secondary education provision as early years does to new primary education provision, and the exclusion could therefore inadvertently give the impression that one does not have policy support.

HCC also supports the principle of the plan's support for secondary education in principle. However, since the publication of the Regulation 18 plan, the strategy for East St Albans has changed and the site is now only expected to deliver a 6FE school.

Therefore to be deliverable and therefore considered sound the plan should clarify the maximum capacity of schools, that schools in the first instance should not be developer-built, and that s106 contributions for individual sites should not be tied to school sites that are needed to meet a long term cumulative need. The local plan should also ensure that post-16 education has full support within new secondary schools.

Paragraph 35 and 36 of the 2023 NPPF require that local plans be justified to be considered sound. To do so its policies must be an appropriate strategy for the outcomes that they intend to secure.

Policy HOU3 includes policies against which applications for specialist housing for older people will be determined. Paragraph (c) states that 'In larger sites, it may be appropriate to co-locate specialist housing provision and develop an Integrated Community'. The Associated Retirement Community Operators, the professional body representing housing with care providers, defines Integrated Retirement Communities as a gold standard of housing with care, not as colocation of different types of specialist housing provision, such as housing with care and nursing homes. While HCC has no in-principle opposition to colocation it is not clear that this is indeed what the policy is intended to achieve.

There may be benefits to co-locating housing with care schemes (as opposed to other forms of specialist accommodation for older people) only on sites delivering a larger quantum of this form of specialist older person's accommodation. This may allow them to benefit from improved economies of scale and deliver improved communal facilities and services that smaller scheme would not be able to support themselves. Policy wording within the allocations at Part B, however, refers to delivery of discrete housing with care facilities of 70-80 units. This implies a requirement for separation. This is entirely appropriate for care homes, but there is no in principle reason why housing with care schemes cannot be co-located into a single larger scheme.

Therefore to deliver an appropriate strategy there needs to be clarity as to what the policy wording at HOU3 (c) is intended to achieve, and if there is no other rationale, the plan should clarify that HOU c and the allocations at Part B to permit multiple housing with care schemes to co-locate with each other rather than with other types of specialist accommodation for older people.

The county council recommends the below changes to policy as respects Hemel Garden Communities:
Part A LG2: The cost apportionment sentence (No.5, Page 26) in Strategy Policy HGC1 – Transformation of Hemel Hempstead of the DBC Local Plan to 2041 Pre-Submission Version for Approval is not in the corresponding SADC policy. For consistency, we suggest it is added into the SADC Policy LG2:
The methodology for infrastructure apportionment and cost sharing is set out in the Local Plans Infrastructure Delivery Plans (IDPs). Infrastructure, contributions and wider funding will be required to deliver on and off-site infrastructure, in accordance with the above documents.

Part B LG3: Suggest amending the text as at present working assumptions are that the Household Waste Recycling centre is to come forward separately from the district council provision.
Delivery of Key Projects including a Household Waste, a Recycling Centre, and Local Authorities Depot facilities to meet the needs of new and existing communities
Part B H1, H2, H3, H4: Suggest adding in the following text into each policy to ensure key transport schemes are included:

The provision of essential transport infrastructure, the detail of which will be identified through the HGC IDP, including mitigating the impact of traffic associated with the development; appropriate consideration of M1 Junction 8 improvements and access arrangements for wider Hemel Hempstead, the provision of appropriate financial contributions towards A414 bridge and wider highways network improvements and access arrangement for HGC and wider Hemel Hempstead, provision of appropriate public transport (services and infrastructure) serving the site; and provision of a comprehensive network for pedestrians and cyclists with good connectivity provided to adjoining areas, including a particular emphasis on improving linkages to Hemel Hempstead Station as a transport interchange

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Policy in allocations H1 and H2 should each include:
A childcare setting capable of providing 30 places including 0-2 year olds.
Policy in allocations H4 should each include:
A childcare setting capable of providing 50 places including 0-2 year olds.

In Part B allocations H1, H2, H4, B2, B4, B5, B6, B7 should include the following wording: A children's home to accommodate three children in care and one manager.

H1: A 3FE primary school site and contributions, including Early Years provision, to serve the new community and appropriate contributions towards secondary school provision, including post-16 education.
H2: A 3FE primary school site and contributions, including Early Years provision, to serve the new community.
An 8FE secondary school site and contributions to serve the new and existing communities, including post-16 education.
H4: One new 3FE and one new 2FE primary school site and contributions, including Early Years provision, to serve the new community, and appropriate contributions towards secondary school provision, including post-16 education.

H1: The 1,500 dwelling figure above includes [deleted text]140-160 self-contained housing with care units [deleted text], one 70- 80 bed nursing home and 6 supported living units for people with disabilities
H2: The 1,600 dwelling figure above includes [deleted text]140-160 self-contained housing with care units [deleted text], one 70- 80 bed nursing home and 6 supported living units for people with disabilities
H4: The 2,400 dwelling figure above includes [deleted text]210-240 self-contained housing with care units[deleted text], two 70- 80 bed nursing home and 9 supported living units for people with disabilities

Part B H1, H2, H3, H4: Suggest adding in the following text into each policy to ensure key transport schemes are included:
The provision of essential transport infrastructure, the detail of which will be identified through the HGC IDP, including mitigating the impact of traffic associated with the development; appropriate consideration of M1 Junction 8 improvements and access arrangements for wider Hemel Hempstead, the provision of appropriate financial contributions towards A414 bridge and wider

highways network improvements and access arrangement for HGC and wider Hemel Hempstead, provision of appropriate public transport (services and infrastructure) serving the site; and provision of a comprehensive network for
pedestrians and cyclists with good connectivity provided to adjoining areas, including a particular emphasis on improving linkages to Hemel Hempstead Station as a transport interchange

SITE ALLOCATIONS H1, H2, H3 & H4

Thank you for the opportunity to submit representations to the SADC Draft Local Plan Regulation 19.

This letter constitutes a joint response on behalf of the above land interests within the SADC portion of the Hemel Garden Communities (HGC) Growth Area, specifically the site allocations H1 – North Hemel Hempstead, H2 – East Hemel Hempstead (North), H3 – East Hemel Hempstead (Central), and H4 East Hemel Hempstead (South). These allocations are proposed to together deliver around 5,500 dwellings – half of the required homes in the designated Growth Area - and land for up to 6000 jobs.

In recognition of the significance of these allocations, in the period since the Local Plan Regulation 18 consultation the landowners have continued to work positively with HGC partners in progressing the ambitious transformation proposals, particularly in relation to furthering the understanding of the infrastructure and mitigation necessary at local plan stage to support the draft allocations and soundness of local plan policy.

While this understanding will continue to be developed and tested through the final stages of the Local Plan including at Examination and through SPD preparation (and in due course, realised through future Outline Planning Applications when detailed mitigation will be secured), we believe that the Local Plan has been informed by a strong evidence base, focused on matters relevant to growth at this scale and to a level of detail proportionate to local plan considerations.

This has resulted in a clear and robust policy framework. As such we can support the Local Plan and consider the overall principles, requirements and proportionality set out in its policies to be generally effective, insofar as they relate to these allocations.

LOCAL PLAN PART B – SITE ALLOCATIONS

We are supportive of the amendments made in Part B of the Local Plan relating to site allocations H1, H2, H3 and H4, recognising that they have been informed by the HGC evidence base, including the Framework Plan.

We are also supportive of the overall policy requirements for each of the HGC allocations. Whilst we have a number of detailed points of clarification within the site allocation policies which have been raised separately through individual representations, these comments are made in the interests of securing a clear and effective policy framework for each site.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 354 - Kitewood

Submission Number: 354 Submission Date: 14/11/24 09:00

Respondent: Company/Organisation: Name: Miss Sara Sweeney

On Behalf Of Company/Organisation: Name: Kitewood

Comment Number: 8

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Kitewood Estates Ltd ('Kitewood') welcome the opportunity to comment on the Draft Local Plan 2041 Regulation 19 ('the Reg 19 Local Plan') and the supporting documents that have been published for consultation.

We understand that following the consultation, all representations will be sent to the Planning Inspectorate along with the draft Local Plan to be Examined by a government-appointed Planning Inspector who will consider if any modification need to be made to the Local Plan before it can be adopted.

The Planning Inspector will assess whether the draft Local Plan has been prepared in accordance with legal and procedural requirements, and whether it is 'sound'.

This representation is therefore focused on matters relating to soundness.

**Kitewood Interest in the Draft Plan**

Kitewood is a development company and landowner of part of the proposed Hemel Garden Communities (HGC) Growth Area to the north and east of Hemel Hempstead. Our landholding falls wholly to the north within Dacorum Borough, and abuts the boundary with the St Albans City & District, adjacent to the Reg 19 Local Plan proposed allocation H1- north Hemel Hempstead.

HGC (including the proposed Growth Area) is a collaboration between Dacorum Borough Council, St Albans City and District Council, Hertfordshire County Council and Hemel Garden Communities, and is supported by the Hertfordshire Local Enterprise Partnership. The landowner group, of which Kitewood is part of, have continued to work positively with HGC partners in progressing the ambitious proposals for growth and transformation.

The HGC Growth Areas to the north and east of Hemel Hempstead are expected to extend beyond the Plan period and will deliver up to 11,000 new homes and 10,000 new jobs by 2050 across St Albans District and Dacorum Borough.

The HGC Growth Area is consistent with the government's strong aspiration to boost the delivery of new homes and infrastructure in a comprehensive manner. It is also aligned with the government's agenda to facilitate the delivery of New Towns.

The plan extract below from *Hemel Garden Communities Position Statement* dated July 2024 identifies the full extent of the north and east Hemel Hempstead Growth Area.

**Hemel Garden Communities Program Area extract from the *Hemel Garden Communities Position Statement***

***See 'Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024' attachment for figure***

The proposed HGC Growth Area is supported by a comprehensive and robust evidence base, including the Framework Plan 2024, HGC Framework Plan Story (July 2024) and HGC Technical Report (Sept 2024). Further evidence is also emerging to support the Local Plans and the future planning applications.

The publication of the St Albans District Draft Local Plan 2041 Regulation 19 for consultation and the Council's intention to submit the Plan for Examination is a significant milestone for the HGC Growth Area, and we commend the Council for their continued engagement with us, the other landowners and HGC partners.

Whilst Dacorum Borough Council are slightly behind St Albans City & District Council in terms of the consultation on their respective Pre-Submission Dacorum Local Plan to 2041 (Regulation 19) which will run until 17th December 2024, we are of the view that it would be beneficial for the Submitted Plans to be Examined together given the importance of the HGC Growth Area to both authorities.

In addition to these comments, joint landowner representations are also submitted to this consultation by David Lock Associates (DLA) on behalf of ourselves (Kitewood), The Crown Estate, Pigeon Investments Limited and Bloor Homes.

*Kitewood support of the Proposed Broad Location for growth identified at Hemel Hempstead and in particular the proposed site allocation **H1, H2, H3 and H4:***

- **H1 – North Hemel Hempstead**
- **H2 – East Hemel Hempstead (North)**
- **H3 – East Hemel Hempstead (Central)**
- H4 East Hemel Hempstead (South)

The Proposed Site Allocations H1, H2, H3 and H4 are identified on the Key Diagram, extract below.

**Reg 19 Local Plan Fig 1.2 Key Diagram extract of the Proposed Site Allocation H1, H2, H3, H4**

***See 'Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024' attachment for figure***

These allocations (H1, H2, H3 and H4) form part of the wider HGC Growth Area and they will together deliver around 5,500 dwellings, around half of the required homes in the designated Growth Area and land for up to 6,000 jobs.

The Local Plan Reg 19 proposed that 4,400 of the dwellings (around 75% of the total) will be delivered during the plan period.

Our comments relate to the need to ensure that a fully comprehensive approach is taken across all of these allocations (H1, H2, H3 and H4) and the wider HGC Growth Area to ensure the delivery of the cross-boundary infrastructure requirements, to ensure the draft Plan's *effectiveness*.

Our concerns about effectiveness of the Reg 19 Plan relate to the current lack of detail on how the infrastructure will be phased alongside the delivery of the development, and how this aligns with the delivery of the proposed north Hemel Hempstead allocation in Dacorum Borough to ensure the vision for the Hemel Garden Communities is realised and delivered without delay.

Our Comments principally relate to Policies LG1, SP1, SP8 and TRA1.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Our comments relate to the need to ensure that a fully comprehensive approach is taken across all of these allocations (H1, H2, H3 and H4) and the wider HGC Growth Area to ensure the delivery of the cross-boundary infrastructure requirements, to ensure the draft Plan's *effectiveness*.

Our concerns about effectiveness of the Reg 19 Plan relate to the current lack of detail on how the infrastructure will be phased alongside the delivery of the development, and how this aligns with the delivery of the proposed north Hemel Hempstead allocation in Dacorum Borough to ensure the vision for the Hemel Garden Communities is realised and delivered without delay.

*We consider that for the policy to be effective a joined-up approach is required by St Albans City & District and Dacorum Borough to ensure the infrastructure items that relate to the Growth Area that are set out in the Councils' respective Infrastructure Delivery Plans are fully aligned, and these accord with the HGC Infrastructure Delivery Plan.*

*We are of the view that further consideration should be given to the comprehensive infrastructure requirements to support the overall proposed overall HGC Growth Area, the delivery phasing across the authority boundaries and mechanism for appropriating cost.*

*We therefore consider that an updated St Albans City & District IDP is required to be published in advance of the Examination in Public to incorporate all of the relevant emerging evidence base.*

*Kitewood considers that further evidence is required to demonstrate cross-boundary co-operation and cumulative impact assessments on transport matters and further information is necessary in relation to the mechanisms that will ensure the sustainable growth of Hemel Hempstead during the plan period.*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Kitewood is a development company and landowner of part of the proposed Hemel Garden Communities (HGC) Growth Area to the north and east of Hemel Hempstead. Our landholding falls wholly to the north within Dacorum Borough, and abuts the boundary with the St Albans City & District, adjacent to the Reg 19 Local Plan proposed allocation H1- north Hemel Hempstead.

Kitewood considers that the *Draft Local Plan 2041 Regulation 19 is Legally compliant*, has been *Positively prepared*, is *Justified*, and is *consistent with national policy*.

However, we do not consider that Policies SP1, SP8 and TR1 are effective because all the evidence does not yet exist to demonstrate effective joint working on cross-boundary strategic matters.

***Kitewood therefore request participation in the forthcoming Examination in Public to discuss policy matters relating to the Proposed site allocations H1, H2, H3 and H4***

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**356 - Rachael Donovan**

Submission Number: 356 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Hertfordshire and West Essex ICB Name: Rachael Donovan

Comment Number: 21

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*Impact of specific proposed site allocations and committed sites on Primary Care Infrastructure*

- **H1 - North Hemel Hempstead - 1,500 dwellings (1,125 by 2041)**
- **H2 - East Hemel Hempstead (North) – 1,600 dwellings (1,235 by 2041)**
- **H4 - East Hemel Hempstead (South) – 2,400 dwellings (1,940 by 2041)**

This is the St Albans District element of the cross-border Hemel Garden Community development, which is expected to deliver 10,500 units in total. 5,500 of these will be in St Albans District and 5,000 in Dacorum Borough.

Such unprecedented level of growth cannot be absorbed by the existing estate and options for an on-site medical centre in both North Hemel Hempstead and East Hemel Hempstead (North) need to be reserved, with the location of a new facility dependent on which of these strategic sites come forward first.

## H3 - East Hemel Hempstead (Central), HP2 7LF

### 111 - Cllr. David Mitchell

Submission Number: 111 Submission Date: 06/11/24 16:01

Respondent: Company/Organisation: Name: Cllr. David Mitchell

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Hemel Garden Communities (HGC) programme is at a very early stage in its concept. 11,000 new houses is a huge project yet there is no substantial evidence to show it is viable and deliverable. It is all on greenbelt land NOT recommended by the ARUP green belt review for development. The land is in the Chiltern Hills and the northern parts are adjacent to the National Landscape which should be protected. It is high quality agricultural land, grade 2 and 3a, which should be reserved for our food security. HGC is not served well by public transport. The four closest rail stations are all several miles away and the bus services are currently poor. The HGC programme is over-reliant on people walking and cycling, with little private parking being made available or new main roads being provided. This would require a huge modal shift which would be difficult to achieve in the time scale. In this respect, HGC a very risky social experiment.The HGC is a long way from the Hemel town centre so the development does not connect well with the rest of Hemel. Over a third of St Albans District's new housing is proposed at HGC which does not connect well with the rest of the District. The Nickey Line is enthusiastically being put forward as a significant cycle and footpath linking Hemel to Harpenden via Redbourn but currently this route is not fit for purpose. HGC might seem great on paper but the reality of building a new town onto to an existing new town is not good spatial planning.

The site at West Redbourn (B3) has no proper access. The proposed access points are from existing cul-de-sacs and country lanes, and traffic would have to travel across Redbourn Common. This would have a big impact on the existing community.

South of Harpenden Lane, Redbourn (LG4) is mostly a flood plain. This is noted but further work needs to done on the impact new development would have on the existing development. More work needs to be done on the affect development would have on the rare chalk stream that flow through Redbourn, i.e. the River Ver and the River Red.

The broad sites in the Local Plan are proposed on over 700 hectares of greenbelt in total, of which over 500 were not recommended by ARUP for consideration in their green belt review. Half of the SADC green belt sites are in the HGC area, which is a big loss of greenbelt in one area. If HGC goes ahead it would be urban sprawl and lead to coalesence between Redbourn and Hemel

Hempstead. It has been asserted that the chosen green belt sites meet the 'exceptional circumstances' criteria for building on the green belt by dint of the need for housing and by building next to existing settlements. However this has not been demonstrated in a way that overcomes all the problems with the HGC programme and the intinsic difficulties of the sites in Redbourn village. The draft Local Plan cannot be considered legal and sound.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

HGC and West Redbourn should not be included in the Local Plan. If they are, much more work needs to be done on the Infrastructure Delivery Plan. A site at NE Redbourn owned by the Lawes Agricultural Trust should be considered instead as it would integrate with Redbourn village much better.

Generally, development should be spread more evenly around the District as this would better meet the needs of St Albans District residents. The lack of public transport and inadequate roads has to be resolved. Maybe the Nickey Line could be a tram line?

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

I am very familiar with the draft Local Plan and have a good working knowledge of planning issues in general. I could add a lot of local knowledge to proceedings particularly the area of the Hemel Gardens Community programme and the sites in Redbourn Village. I am well informed about the District as a whole.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 115 - Mr Geoffrey Coates

Submission Number: 115 Submission Date: 07/11/24 00:58

Respondent: Company/Organisation: Name: Mr Geoffrey Coates

Comment Number: 6

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

St Albans District Council have failed in their duty to cooperate with Redbourn Parish Council. The Parish Council have passed a Local Plan at referendum. The level of building within Redbourn Parish as a whole, and particularly at Hemel Garden Communities, is inconsistent with the policies in that document.

The Parish Council moreover commissioned a professional planning consultant (Troy Planning) to report on the proposals at Reg 18; SADC have given no meaningful consideration to the points raised in that report, despite it clearly warning that the Plan as it stands is incompatible with the NPPF and that the scale of development proposed in Redbourn Parish is unsustainable. SADC has not engaged with the substance of this report.

It is far from clear that SADC have adequately cooperated with Dacorum in drawing up the Hemel Garden Communities plans. Responsibility for provision of key services does not seem clear, despite HGC being fundamentally an extension of Hemel Hempstead conurbation into St Albans District.

Hemel Garden Communities proposals H1 and H2, and the contiguous industrial estate H3, epitomise the failings I have identified elsewhere in my commentary. They make extensive use of Green Belt land without fulfulling due process in seeking its declassification--namely, to establish the exceptional circumstances which would permit that, and to demonstrate that all urban sites (not merely brownfield sites) have been duly considered. The sites they propose for development are identified in SADC's Green Belt Review as the most significant for maintaining the integrity of the Green Belt and its aims.

The proposals at these lcoations are not consistent with a duty to consider climate change as they are inherently car dependent and offer no credible mitigation for that situation.

The proposals at these lcations are inconsistent with traffic policy, notably TRA1, requiring that development not have an adverse effect on traffic flow and safety. No modelling has been offered for the likely impact upon B487 traffic, only a vague expression of faith in the arrival of a modal shift in travel on an unprecedented scale.

Moreover the impact on biodiversity has not been properly evaluated, despite Redbourn being the site of a globally significant chalk stream and a breeding ground for Red Kites, Great Crested Newts and other rare species.

Sewage outflow has polluted our River Ver for more days this year than it hasn't, yet the additional wastewater evolved by this development has not been properly considered. It seems unavoidable that pumping will resume at Friars Wash to feed the demand of 4000 new homes, threatening the water table and with it the very existence of the chalk stream.

On all these grounds, Hemel Garden Communities H1 and H2 (and associated industrial estate H3) are perhaps the least suitable sites for development not only in this Draft Plan but from the entire call for sites. This proposal is a pipe dream conceived in the offices of the Planning Department without practical knowledge of the sites on the ground. It has become the pet project of the department and a coterie of city centre councillors, who see it as a means to displace feasible development from their own wards, and it has been sacralised in those circles to the extent that it requires someone outwith the structures of SADC to point out that the emperor's new clothes are threadbare. Public objection at Reg 18 has been simply ignored in an attempt to push through a Local Plan--any Local Plan--before a new NPPF comes into force.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The removal of proposals H1, H2 and H3 is the only sound way to mitigate the damage of this ill-conceived chimera of a development.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

As stated, SADC have marginalised the voices of residents, treating Reg 18 as a PR opportunity for this Plan and not meaningfully engaging with feedback. Attending the hearing may go some way to restoring the proper role of the citizenry at the heart of planning decision-making.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**193 - Catesby Estates PLC**

Submission Number: 193 Submission Date: 07/11/24 15:55
Respondent: Company/Organisation: LDA Design Name: Mr Matthew Gibson-King
On Behalf Of Company/Organisation: Catesby Estates PLC Name:

Comment Number: 8

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Hemel Garden Communities (HGC)**

The allocation of four housing and employment sites on the northern and eastern edge of Hemel Hempstead is a significant extension to the town that will deliver much needed housing in both Dacorum Borough and St Albans district, it is however inconsistent with the provision of sustainable development for St Albans. Allocating sites on the urban edge of Hemel Hempstead will contribute numerically to the housing requirements of St Albans but it does not align with the Local Plans strategic objectives to '*Prioritise and enable the safe and attractive use of active and sustainable means of transport and reduce the need for people to travel'*and '*Promote adaptation to and mitigation of the Climate Emergency'*by reducing carbon emissions. Nor does the allocation of these sites align with the LCWIP[13] long-term objectives of Climate and Sustainability, Clean Air and Healthy Lifestyles. These allocations will introduce more vehicles onto the A414 between Hemel, St Albans and Watford. Increasing congestion and increasing pollution.

In additional, a raft of highways improvement schemes[14] are identified to enable more effective travel by public transport and it is highlighted that there is no way to 'continuously travel by public transport' along the A414 corridor. It is acknowledged that this contributes to increased car use within the District. If the allocations at Hemel Hempstead are detrimental to the strategy of the draft Local Plan, then a more effective strategy would be to allocate sites to the south of St Albans that will generate contributions to the funding of upgrades to the A414/ North Orbital Road, or to the delivery of the Hertfordshire Essex Rapid Transit (HERT)[15] which is planned along the A414.

Furthermore, the allocation of sites in the south of St Albans could contribute to delivering the improvements to walking and cycling infrastructure identified in the LCWIP which would encourage the use of sustainable modes of transport between Hemel Hempstead and St Albans. The improvements identified in the LCWIP include a long-term aspiration for a segregated cycle route along Hemel Hempstead Road and traffic calming measures along King Harry Lane to provide a safer active travel route. These schemes could be part funded through developer contributions from additional sites allocations in the south of St Albans.

The Hemel Garden Communities are located within the 12.6km Recreational Zone of Influence (ZOI) for the Chilterns Beechwoods SAC which is considered within the Delivery Statement and Local Plan policy LG3 – Hemel Garden Communities Growth Areas Place Principles. The Green Network Vision sets out the creation of significant amounts of SANG and green spaces, and we support the delivery of multifunctional green infrastructure provision to facilitate this.

There is however a potential delivery issue associated with SANG at the HGC. The Council is legally required not to issue decisions within the recreational ZOI until appropriate mitigation is secured through a Mitigation Strategy. It is identified in the Habitats Regulations Assessment[16] that '*whilst not all allocations have a SANG strategy identified, those without a SANG solution in place are not to be occupied until at least year 6 of the Local Plan. The Council has confirmed that they are confident that appropriate SANG solutions will be delivered for all of the relevant sites within the Local Plan'*. If insufficient SANG is identified for all the allocations, then the Council will not legally be able to issue decision on applications submitted at HGC.

Another potential delivery issue is the boundary review of the Chilterns National Landscape[17] that is currently being undertaken by Natural England. Although there are no formal timeframes set out for the review, it is expected that a variation order is to be sought from the Secretary of State in Winter 2025. This could have implications for the housing numbers that can be delivered at the HGC as well as setting back the delivery as the impact of the allocations on the National Landscape are factored into the proposals.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

## 227 - National Grid

Submission Number: 227 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: National Grid (Avison Young) Name: National Grid

Comment Number: 3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Proposed development sites crossed or in close proximity to NGET assets: Following a review of the above Development Plan Document, we have identified that one or more proposed development sites are crossed or in close proximity to NGET assets. Details of the sites affecting NGET assets are provided below.

**H3 – East Hemel Hempstead (Central) -** ZA ROUTE TWR (419 - 522): 400Kv Overhead Transmission Line route: ELSTREE - SUNDON 1

A plan showing details of the site locations and details of NGET assets is attached to this letter. Please note that this plan is illustrative only.

Without appropriate acknowledgement of the NGET assets present within the site, these policies should not be considered effective as they cannot be delivered as proposed; unencumbered by the constraints posed by the presence of NGET infrastructure.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We propose modifications to the above site allocations and/or policies to include wording to the following effect. We propose that these modifications are applied to each of the aforementioned site allocations affected by NGET assets.

**OS1 – Land to the North of Bricket Wood**

*The development will include a strategy forresponding to the NGET Overhead Transmission Cable present within the site,demonstrating how the NGET Design Guide and Principles have been applied at the masterplanning stage and how the impact of the assets has been reduced through good design."*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 248 - Historic England

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 14

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**H3 — East Hemel Hempstead (Central), HP2 7LF**

The proposed site includes the Grade H listed Breakspear House, the setting of which has already been compromised by the construction of Junction 8 of the M1 motorway, directly adjacent to it. Further afield, the remains of Old Gorhambury, listed at Grade I, Gorhambury listed at grade H*, Bacons House scheduled monument and Gorhambury Registered Park and Garden and a number of other grade H listed buildings lie to the east of the site. Any development of the site has the potential to impact these heritage assets by affecting their settings.

We welcome the preparation of the HA. We broadly welcome the inclusion of criterion 20 in relation to heritage assets.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected,*

*where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We recommend that criterion 20 would be further improved if amended to read:

*Through Masterplanning, the layout and design of development should conserve and where appropriate enhance thesignificance of Grade II Listed Breakspear, Grade II Gorhambury Registered Park and Garden and Grade II * Listed Gorhambury mansion; this should include the incorporation of appropriate set backs of development and creation of open spaces.*

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

- Proposed West Redbourn (B3) and Hemel Garden Communities developments will completely remove the current green belt buffer between Redbourn and Hemel Hempstead (only 1km remaining). The whole purpose of the green belt is to prevent urban sprawl, these developments completely go against this policy. Even though the ARUP report commissioned by the council rejected the Hemel Garden Communities development due to coalescence, they have decided to proceed anyway – ignoring the findings. An explanation as to why "exceptional circumstances" exist that justify building on this greenbelt land has still not been provided.
- Have the West Redbourn (B3) site and the Hemel Garden Communities developments been considered together? We haven't seen evidence of this – especially when it comes to the greenbelt.
- Loss of arable land when government should be prioritising self-sufficient food chain. Also damaging to the chalk stream network.
- The West Redbourn (B3) site in particular is a complete abomination; even local housing associations have objected to it. The access proposed will create a huge increase of traffic volume throughout the village – making it lose its village identity and putting significant pressure on already over stretched services and road network.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Point 1:** A revised Gypsy and Traveller Accommodation Assessment (GTAA) has been produced for St Albans District Council by ORS consultants (September 2024). This shows a need for 80 pitches for households that meet the planning definition over the 2024-2041 Plan period, with 44 of these pitches required in the first five years (2024-2029). There is also a need for 7 plots for travelling show people, all within the first five years.

However, despite paragraphs 9 and 10 in the Planning Policy for Traveller Sites, Policy HOU6 does not set pitch/plot targets for the Plan period or a supply of sites for the first 5 years, years 6-10 or years 11-15.

As a result, the policy is unsound because it is not positively prepared or consistent with national policy. Dacorum recognises that the GTAA is very recent and St Albans Council has not been able to take it into account before submitting the Local Plan for public examination. Nevertheless, this matter needs to be rectified through the examination process.

**Point 2.** We also consider that Policy HOU6 is unsound, as it is not justified or effective, for the reasons explained below.

Dacorum is concerned that the only proposed new sites are both at East Hemel Hempstead, involving two sites for “up to 15-20 pitches”. This wording is not effective it means “up to 20 pitches”.

Furthermore, we consider that the proposed sites are too large, based on the advice in paragraphs 4.7 and 4.8 of the ‘Designing Gypsy and Traveller sites: good practice guide’ (2008) that sites should not normally have more than 15 pitches. Although that document was withdrawn in 2015, there is no further evidence more up to date in terms of design guidance for England.

The area close to the proposed new sites already has 62 pitches:

- Dacorum: 30 pitches at Three Cherry Trees Lane in Hemel Hempstead.

- St Albans: 17 pitches at Tullochside (off the B487 Hemel Hempstead-Redbourn Road) and 15 pitches at Ver Meadows, Redbourn.

Our view is that the existing and proposed provision would result in an over-concentration of gypsy and traveller sites to the east and north east of Hemel Hempstead and the Redbourn area.

We are also concerned that the East Hemel Hempstead (Central) Broad Location does not offer a suitable residential environment for a a gypsy and traveller site, as this broad location is proposed for employment development.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We consider that the following modifications are necessary to make Policy HOU6 sound:

- The policy should set pitch/plot targets for the plan period and include a supply of sites for the first 5 years, years 6-10 and where possible years 11+, based on the evidence in the Gypsy and Traveller Accommodation Assessment. This is necessary for the policy to be justified, effective and consistent with national policy.
- The number of pitches proposed on the East Hemel Hempstead (South and Central) Broad Location results in overconcentration in a particular area. At least one site should be deleted and the other, as a minimum, reduced in scale and not be located in close proximity to already established sites in the area. This is necessary for the policy to be justified and effective.
- Additional gypsy and traveller sites should be identified elsewhere in St Albans District, on strategic housing sites and/or in other locations, sufficient to deliver needs identified in the Gypsy and Traveller Accommodation Assessment. This is necessary for the policy to be justified and effective. It will also ensure clarity that St. Albans needs are being met in full within its administrative boundaries.

**Employment Uses within Site Allocation Policy H3**

The Local Plan Part B – Local Plan Sites sets out the site allocation policies. This includes allocation H3 East Hemel Hempstead (Central). Within this policy, points 11 and 12 require that the southern 17ha of the site will include employment uses to deliver a Business, Research and Development Park and the remaining 36ha to the north of the site for uses such as logistics and mixed industrial uses.

***Locational Restrictions***

It is understood from discussions with SADC officers that in their view, a requirement to fix the spatial disposition of use classes set out within the policy wording is considered necessary to minimise the risk of logistics developments becoming the dominant development form within the site, and thus limit the ability to create an attractive gateway into the town from the M1 and St Albans and affect the site's perceived attractiveness for business and R&D.

We support the principle of requiring a mix of employment uses within policy H3 in order to deliver a range of employment at East Hemel (Central). We also support the addition of point 18 of H3 requiring *"A high quality gateway entrance along the A414 to Hemel Hempstead serving H3 and H4"*reflecting the Council's aspiration for this part of the site to contribute positively to one the key gateways into Hemel Hempstead.

However, it is considered that as currently drafted, the spatial limitations placed on different employment uses within the policy is overly restrictive and could result in masterplanning challenges and development forms that may adversely impact upon placemaking and sustainable construction and low carbon design solutions which reflect the physical characteristics of the site as well as its interface with surrounding places. The policy restriction on the location of these use is also generated by an assumption that they could not contribute positively to the creation of a gateway, which is not an inevitable conclusion provided that well-designed frontages, gateways and a landscape led masterplanning approach to edge treatments is adopted.

TCE are committed to ensure that a masterplan-led approach to the distribution, layout, form and phasing of employment uses in this location - including at the interfaces of the employment area with residential areas to the north and south - is secured to ensure that placemaking ambitions are realised across the three EHH allocations. As the masterplanning work is at an early stage, we suggest that more flexible wording around the location of different employment uses within H3 would allow for the optimum design solution to be secured for the employment area: reflecting its role as a 'integrator' between the northern and southern residential neighbourhoods (H2 and H4); accommodating the range of employment uses envisaged in a well-designed manner which also delivers on the wider placemaking objectives of HGC; and providing a high-quality gateway to Hemel Hempstead.

We therefore object to the locational specificity currently in clauses 11&12 of policy H3 for the reasons given above.

***Phasing Restriction***

We also suggest that flexibility be provided in policy around the timing of the provision of innovation hub relative to the delivery of other employment uses on site. Whilst TCE are committed to working with Herts IQ and other delivery agencies to support the creation of the innovation hub at an early stage, it is considered overly restrictive to require this to be provided in advance of other employment uses, for which a rapid response to market demands and occupier requirements will be needed if the quantum and mix of employment uses is to be realised within the plan period.

***Clarification of 'Education Opportunities'***

We also note the addition of the reference to 'education' within the Regulation 19 H3 policy wording and have sought clarification from officers as to what was intended through this addition.

We understand that the reference to 'opportunities for education' relates to the opportunity to support higher and further education initiatives within the wider employment offer at EHH (Central), rather than making education provision on site. As a result of this clarification, we have suggested minor clarifications to wording of clause 11.

Taking the points made above together, in order to make Site Allocation Policy H3 effective and thereby ensure soundness, the following adjustments to the policy wording are sought:

*"11.* ***The southern a****Approximately 17 Hectares of the site will promote high density, higher skilled employment uses to deliver a Business, Research and Development Park and explore opportunities* ***related to support****for* ***higher and further****education* ***initiatives****.* ***Early****The first phase****s****of employment development will* ***include****provide an innovation hub prioritising space for start-up units in high quality buildings and units that provide grow on space for small businesses and support the growth of life science and agri-tech businesses.*

*12. The remaining approximately 36 Hectares* ***to the north of the site****will promote uses such as logistics and mixed industrial areas."*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Hemel Garden Communities Trajectory**

**...**

11.17 **So, we ask, what is SACDC's assumption about each of the proposed four Broad Locations at Hemel Garden Communities (H1, H2, H3, H4) in terms of the following:**

- When will the Design Codes and SPDs will be prepared and approved?
- When will the pre-application process take place including consultation and engagement with relevant consultees and stakeholders?
- When will the preparatory site works, to be informed by site-specific survey recommendations and monitoring before commencement take place?
- When will an outline application be submitted and approved for each Broad Location?
- When will a full application will be submitted and approved?
- When will reserved matters applications be submitted and approved?
- There is reference in Policy LG3 (Hemel Garden Communities Growth Areas Place Principles) to the potential need to use Compulsory Purchase Orders (CPO) powers to ensure infrastructure is provided in a timely manner. What are the time estimates made for this in the housing trajectory?
- When will the S106 for each parcel is expected to be agreed?
- When will the pre-commencement conditions for each parcel be agreed by SACDC?
- What are SACDC's assumptions for the opening up works required for each of the sites and combined?
- What infrastructure is required to be funded and / or delivered prior to commencement for each of the broad locations?
- What is the planning approval process and timing for each piece of infrastructure?
- When will conditions be discharged?

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

## 294 - Hemel Business Park Ltd

Submission Number: 294 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Alex Cole

On Behalf Of Company/Organisation: Hemel Business Park Ltd Name:

Comment Number: 3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

[Please see attachment for full submission]

**Allocation H3 - East Hemel Hempstead (Central)**

The delivery of land for the purposes of meeting need arising within St Albans' is therefore concentrated on a single site at East Hemel Hempstead. If this site does not come forward as envisaged, St Alban's will be unable not only to contribute to Dacorum's unmet need, but also to fulfil their own employment land requirements. It is considered that this strategy lacks flexibility and contingency, and is not sound in this regard. The fact that this site exceeds the employment need will count for nought if the site itself is not delivered.

Beyond the Plan's ability to deliver the quantitative need, attention should be made to the qualitative employment requirements. As set out in paragraph 5.6 of the Plan, St Albans has a high proportion of small businesses:

*Figures for 2022 [show] that out of 8,675 enterprises 91.4% were micro-businesses (employing up to 9 people), 7.1% were small businesses (employing 10 to 49 people), 1.2% were medium sized organisations (employing 50 –49) and just 0.4% were large organisations (employing 250 plus).*

Strategic employment sites, many of which promote large units for regionally and nationally significant occupiers, may not bring forward a sufficient range of premises **to accommodate St Albans'**smaller local businesses, for whose expansion and growth the Plan should be providing a suitable platform. Whilst allows states that 10% of any new development or redevelopment on site is required to contain units for Small Medium Enterprises and expansion / Grow-On units, it is not clear whether this will meet in full St Albans qualitative needs. It is also not clear that the concentration of land in a single area accommodates occupier requirements across the wider district. An approach that spreads development more widely is considered to be more justified in this regard.

Within the allocation policy, development across the 53ha site is apportioned as follows:

- Approximately 17ha of the site will promote high density, higher skilled employment uses to deliver a Business, Research and Development Park and explore opportunities for education; and
- Approximately 36ha to the north of the site will promote uses such as logistics and mixed industrial areas.

These figures do not square with the Site Viability Report prepared by BNP Paribas, dated September 2024, and published as part of the Regulation 19 evidence base, found the following capacity:

- Gross site: 58.40ha;
- Net site: 36.19ha;
- Industrial/logistics: 26.87ha; and
- Business/Research & Development Park: 9.32ha.

**The allocation also states that 'an overconcentration of low employment generating logistics uses will not be** permitted.'For the reasons stated above, the Radlett Aerodrome ought to be excluded from the local employment land supply, and East Hemel Hempstead (Central) is therefore the only allocated employment site in the local authority area. Placing restrictions on what kind of employment development will be permitted on site (especially for logistics, which has an identified requirement of c.22ha in the evidence base, by far the highest figure) is not a justified strategy.

Beyond concerns about restricting use, 17ha of the site has been set aside for office, and research & development (although the Site Viability Report found this to be only 9.32ha). Ambitious planning for high density, high skilled employment uses is to be supported, but this will not contribute to meeting the identified need of c.28.7ha identified in the **Hatch's September 2024 Employment Study.**

The site (and therefore the Plan as a whole) therefore puts forward a supply of 36ha to meet the 28.7ha requirement for B2/B8 Class uses as set out in the evidence base **–**and there is a clear policy restriction against logistics use. Further complicating the picture is the fact that the very recently prepared Site Viability Report relating to the allocation found that there was only 26.87ha for industrial and logistics development. This suggests that, far from an oversupply of land, the Plan could be short of its own requirement by c.1.83ha.

**Concluding comments on Employment Strategy**

**The Council's** strategy for delivering its employment requirements over the Plan period does not meet the test of soundness as set out in the NPPF for the following reasons:

The Plan fails to identify the total employment need within St Albans over the Plan, as a result of which any claim of delivery cannot be verified within the Plan itself. The Plan states there is surplus land to

meet unmet need elsewhere, but this is not quantified and a review of the evidence suggests that this could be an overestimate. This approach does not represent a positively prepared Plan as defined in national planning policy;

- The inclusion of the Strategic Rail Freight Interchange within the Local Plan for the purposes of meeting local employment requirements in in appropriate, and ought to be removed from the local supply;
- Supply is focussed on a single strategic site. If site delivery is frustrated, St Albans' allocated supply will consist only of a regionally and nationally significant Strategic Rail Interchange, which will not be sufficient to meet local market requirements within St Albans. This approach is neither justified nor effective, and additional sites should be identified for contingency;
- Qualitatively speaking, a single strategic site may not be able to meet the growth requirements of St Albans local economy, especially one that actively resists logistics uses. Smaller sites should be included in the supply pipeline to provide flexibility; and
- A lack of timeframe for the delivery of each site makes it unclear how much of the allocated land is expected to come forward with the Plan period.

Strategic Policy SP5, and Site Allocation Policy H3 should both be amended in order to address these concerns, and ensure that it is capable of meeting the test of soundness.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

[Please see attachment for full submission]

**Concluding comments on Employment Strategy**

**The Council's** strategy for delivering its employment requirements over the Plan period does not meet the test of soundness as set out in the NPPF for the following reasons:

The Plan fails to identify the total employment need within St Albans over the Plan, as a result of which any claim of delivery cannot be verified within the Plan itself. The Plan states there is surplus land to

meet unmet need elsewhere, but this is not quantified and a review of the evidence suggests that this could be an overestimate. This approach does not represent a positively prepared Plan as defined in national planning policy;

- The inclusion of the Strategic Rail Freight Interchange within the Local Plan for the purposes of meeting local employment requirements in in appropriate, and ought to be removed from the local supply;
- Supply is focussed on a single strategic site. If site delivery is frustrated, St Albans' allocated supply will consist only of a regionally and nationally significant Strategic Rail Interchange, which will not be sufficient to meet local market requirements within St Albans. This approach is neither justified nor effective, and additional sites should be identified for contingency;
- Qualitatively speaking, a single strategic site may not be able to meet the growth requirements of St Albans local economy, especially one that actively resists logistics uses. Smaller sites should be included in the supply pipeline to provide flexibility; and
- A lack of timeframe for the delivery of each site makes it unclear how much of the allocated land is expected to come forward with the Plan period.

Strategic Policy SP5, and Site Allocation Policy H3 should both be amended in order to address these concerns, and ensure that it is capable of meeting the test of soundness.

...

Evidently, the Plan requires significant alteration if it is to be found sound under examination, and this should include:

- A clearly stated employment land requirement;
- Clearly identify employment land supply (including the indicative hectarage of all proposed employment uses set against their requirements);
- Clear timeframes for site delivery;
- A greater range of employment sites in order to provide *inter* alia flexibility and contingency;
- Greater efficiency in the use of allocated land in order to ensure that this tenet of national planning policy is met; and
- The inclusion of a site allocation for Land at Appspond Lane to identify the site for employment development.

Making these changes are necessary if the Plan is to be considered sound, and capable of progression through examination to formal adoption.

**Allocation H3 - East Hemel Hempstead (Central)**

The delivery of land for the purposes of meeting need arising within St Albans' is therefore concentrated on a single site at East Hemel Hempstead. If this site does not come forward as envisaged, St Alban's will be unable not only to contribute to Dacorum's unmet need, but also to fulfil their own employment land requirements. It is considered that this strategy lacks flexibility and contingency, and is not sound in this regard. The fact that this site exceeds the employment need will count for nought if the site itself is not delivered.

Beyond the Plan's ability to deliver the quantitative need, attention should be made to the qualitative employment requirements. As set out in paragraph 5.6 of the Plan, St Albans has a high proportion of small businesses:

*Figures for 2022 [show] that out of 8,675 enterprises 91.4% were micro-businesses (employing up to 9 people), 7.1% were small businesses (employing 10 to 49 people), 1.2% were medium sized organisations (employing 50 –49) and just 0.4% were large organisations (employing 250 plus).*

Strategic employment sites, many of which promote large units for regionally and nationally significant occupiers, may not bring forward a sufficient range of premises **to accommodate St Albans'**smaller local businesses, for whose expansion and growth the Plan should be providing a suitable platform. Whilst allows states that 10% of any new development or redevelopment on site is required to contain units for Small Medium Enterprises and expansion / Grow-On units, it is not clear whether this will meet in full St Albans qualitative needs. It is also not clear that the concentration of land in a single area accommodates occupier requirements across the wider district. An approach that spreads development more widely is considered to be more justified in this regard.

Within the allocation policy, development across the 53ha site is apportioned as follows:

- Approximately 17ha of the site will promote high density, higher skilled employment uses to deliver a Business, Research and Development Park and explore opportunities for education; and
- Approximately 36ha to the north of the site will promote uses such as logistics and mixed industrial areas.

These figures do not square with the Site Viability Report prepared by BNP Paribas, dated September 2024, and published as part of the Regulation 19 evidence base, found the following capacity:

- Gross site: 58.40ha;
- Net site: 36.19ha;
- Industrial/logistics: 26.87ha; and
- Business/Research & Development Park: 9.32ha.

**The allocation also states that 'an overconcentration of low employment generating logistics uses will not be** permitted.'For the reasons stated above, the Radlett Aerodrome ought to be excluded from the local employment land supply, and East Hemel Hempstead (Central) is therefore the only allocated employment site in the local authority area. Placing restrictions on what kind of employment development will be permitted on site (especially for logistics, which has an identified requirement of c.22ha in the evidence base, by far the highest figure) is not a justified strategy.

Beyond concerns about restricting use, 17ha of the site has been set aside for office, and research & development (although the Site Viability Report found this to be only 9.32ha). Ambitious planning for high density, high skilled employment uses is to be supported, but this will not contribute to meeting the identified need of c.28.7ha identified in the **Hatch's September 2024 Employment Study.**

The site (and therefore the Plan as a whole) therefore puts forward a supply of 36ha to meet the 28.7ha requirement for B2/B8 Class uses as set out in the evidence base **–**and there is a clear policy restriction against logistics use. Further complicating the picture is the fact that the very recently prepared Site Viability Report relating to the allocation found that there was only 26.87ha for industrial and logistics development. This suggests that, far from an oversupply of land, the Plan could be short of its own requirement by c.1.83ha.

...

**Concluding comments on Employment Strategy**

**The Council's** strategy for delivering its employment requirements over the Plan period does not meet the test of soundness as set out in the NPPF for the following reasons:

- The Plan fails to identify the total employment need within St Albans over the Plan, as a result of which any claim of delivery cannot be verified within the Plan itself. The Plan states there is surplus land to meet unmet need elsewhere, but this is not quantified and a review of the evidence suggests that this could be an overestimate. This approach does not represent a positively prepared Plan as defined in national planning policy;
- The inclusion of the Strategic Rail Freight Interchange within the Local Plan for the purposes of meeting local employment requirements in in appropriate, and ought to be removed from the local supply;
- Supply is focussed on a single strategic site. If site delivery is frustrated, St Albans' allocated supply will consist only of a regionally and nationally significant Strategic Rail Interchange, which will not be sufficient to meet local market requirements within St Albans. This approach is neither justified nor effective, and additional sites should be identified for contingency;
- Qualitatively speaking, a single strategic site may not be able to meet the growth requirements of St Albans local economy, especially one that actively resists logistics uses. Smaller sites should be included in the supply pipeline to provide flexibility; and
- A lack of timeframe for the delivery of each site makes it unclear how much of the allocated land is expected to come forward with the Plan period.

Strategic Policy SP5, and Site Allocation Policy H3 should both be amended in order to address these concerns, and ensure that it is capable of meeting the test of soundness.

...

**Conclusion**

As set out above, the St Albans' Regulation 19 Draft Local Plan 2041 does not meet the tests of soundness, as set out in the NPPF, for the following reasons:

- **Positively prepared** – the Plan does not state its employment need at all, nor its supply in any detail. It is therefore not possible to establish whether it meets, as a minimum, the area's objectively assessed needs. The Plan also claims to have an oversupply of employment land that can contribute to neighbouring unmet need, but precise figures are not provided, an approach which lacks clarity. Further, a review of the relevant evidence suggests that the Plan's claim that it meets its need is subject to challenge.
- **Justified** – the chosen strategy for employment land delivery is to allocate a single strategic site. This leaves no space for contingency in the event that this site doesn't come forward, and the site itself may not provide enough land to delivery the necessary level of B2/B8 floorspace over the Plan period. Aside from the quantitative need, there are concerns that this site will not meet the qualitative requirements of the area, which is characterised by micro, small, and medium sized business. The allocation also resists logistics development, which throws into further doubt the Plan's ability to meet anticipated needs.
- **Effective** – the Plan seemingly puts forward no timelines for site deliveries, and it is therefore unclear whether or not the needs of the area can be met over the course of the Plan, this is particularly pertinent for employment need, which is principally tied to a single strategic allocation.
- **Consistent with national policy** – key requirements of national planning policy, such as the need to make effective use of land, are not met by the Plan's strategy, which has systematically reduced the capacity of a large number of residential allocations for reasons that appear to have little to do with the site's themselves. Rather, it appears that this has been driven by the desire to reduce the housing requirement (and consequently the supply) as much as possible.

Beyond concerns with the Plan's broad strategy, the details of the allocation at Smallford Works does not meet the test of soundness either:

- **Positively prepared** – the site will not be providing housing on the site. This reduces the Plan's overall housing supply figure, risking its ability to meet, as a minimum, its objectively assessed need for residential development. The Plan and its evidence base also seems to ignore the fact that delivering employment on the site would reduce the stock of employment land within St Albans, which would need to be addressed through appropriate allocation of replacement land. For reasons stated above, the allocation at Hemel Hempstead (Central) may be both quantitatively and qualitatively unable to accommodate this;
- **Justified** – the allocated use is inconsistent with representations previously submitted, clearly stating the site is being promoted for employment use and not residential development. In this, the Plan fails to account for clearly stated evidence regarding the site allocation;
- **Effective** – whilst allocating the site for development is wholly supported, a far more appropriate strategy for redeveloping the site would be to identify it for intensifying employment development consider its current status as an employment site in active use;
- **Consistent with national policy** – the principle of the site's allocation is consistent with relevant national policy, but the details are not: the proposed loss of employment floorspace without appropriate replacement, and the inefficient reduction of the site's developable capacity do not accord with central tenants of national planning policy.

Evidently, the Plan requires significant alteration if it is to be found sound under examination, and this should include:

- A clearly stated employment land requirement;
- Clearly identify employment land supply (including the indicative hectarage of all proposed employment uses set against their requirements);
- Clear timeframes for site delivery;
- A greater range of employment sites in order to provide *inter* alia flexibility and contingency;
- Greater efficiency in the use of allocated land in order to ensure that this tenet of national planning policy is met; and
- Alteration site allocation P3 (Smallford Works) to identify the site for intensifying employment development.

Making these changes are necessary if the Plan is to be considered sound, and capable of progression through examination to formal adoption.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

[Please see attachment for full submission]

Strategic Policy SP5, and Site Allocation Policy H3 should both be amended in order to address these concerns, and ensure that it is capable of meeting the test of soundness.

...

Evidently, the Plan requires significant alteration if it is to be found sound under examination, and this should include:

- A clearly stated employment land requirement;
- Clearly identify employment land supply (including the indicative hectarage of all proposed employment uses set against their requirements);

- Clear timeframes for site delivery;
- A greater range of employment sites in order to provide *inter* alia flexibility and contingency;
- Greater efficiency in the use of allocated land in order to ensure that this tenet of national planning policy is met; and
- Alteration site allocation P3 (Smallford Works) to identify the site for intensifying employment development.

Making these changes are necessary if the Plan is to be considered sound, and capable of progression through examination to formal adoption.

## 311 - BP Oil UK Ltd

Submission Number: 311 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: BP Oil UK Ltd Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The draft allocation of primary interest to bp is H3, which includes the currently agricultural land located between Punchbowl Lane to the north, the M1 to the east, the A414 to the south and Green Lane (and the boundary of the site) to its west. This is because the allocation is immediately adjacent to the subject site. It is noted H3 proposes around 6,000 new jobs (point 21).

Whilst the majority of the development in allocations to H1-H4 inclusive is anticipated by the draft plan to be delivered by 2041, the draft Local Plan horizon, it identifies that some delivery is likely to
take place post-2041.

**Impacts on bp's operations**
It should be noted that bp does not object to the principle of major housing and employment designations. However, the effect of the allocations, if built out, will result in significantly greater levels of residents, works and visitors in closer proximity to the subject site.

This is the case both in the construction phase as the development and associated infrastructure works are built out, and once the allocated developments are operational. The health, safety and security of bp's workforce and the communities in which they operate is of critical importance to the business.

The draft Local Plan allocations H1-H4 inclusive may:
• increase the number of people in close proximity to a COMAH regulated site, particularly with development proposed for agricultural land to the east of the site
• limit bp's ability for any potential future expansion in relation to the site such as new fuel storage tanks and equipment
• potentially compromise the long-term viability of bp's operations from its Hemel Terminal site

bp do not object to the principles of the allocations relating to the HGC, however, we seek to highlight to SADC issues that need to be carefully considered as the draft plan progresses.

bp request that the importance of its Hemel Terminal is recognised and that draft site allocations H1-H4 are amended as required to ensure the continued safe and viable operation of its facility, both now and in the future.

We welcome a collaborative approach on the drafting of the policy wording with SADC officers/Members in order to achieve this objective.

We assume the views of the Health and Safety Executive (HSE) and the Environment Agency have been sought on the allocations - in particular given the subject site is regulated under the Control of Major Accident Hazards (COMAH) Regulations 2015 - and will be fully considered as the draft Local Plan moves forward. We also urge you to consider the views of the downstream oil team (energy security) at the Department for Energy Security and Net Zero.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

1. 241107_SADC Reg 19 Rep Cover Letter_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To expand upon our objection if the policy is not revised as proposed.

---

### 323 - Diana Ngobi

Submission Number: 323 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: National Highways Name: Diana Ngobi

Comment Number: 5

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Hemel Garden Communities (HGC) Programme is a proposal to transform Hemel Hempstead through the regeneration of the existing town and delivery of new housing and infrastructure in St Albans City & District Council and Dacorum Borough Council areas. Within St Albans District, the HGC Growth Areas will deliver at least 4,300 new homes by 2041, with a further 1,200 homes by 2050, providing a total of 5,500 new homes. Further housing growth within the area north and east of Hemel Hempstead, Two Waters and Hemel Hempstead Town will be set out in Dacorum's Local Plan. We note that this has the potential to put pressures and traffic impacts on the SRN and its junctions.

We would also seek to understand if/how the Council plans to have an overarching monitor and manage policy which addresses the cumulative traffic impacts of this growth area and the collective impact on the SRN.

The HGC Transport Vision and Strategy document (TV&S) sets out a sustainable movement network approach for the long-term growth and transformation of Hemel Hempstead and wider routes. The approach ensures the HGC programme area can be developed as a successful, integrated, well-connected place. The site has ambitions to achieve a town-wide sustainable transport network with a target of 60% of all journeys starting, ending or within the HGC growth areas and 40% of all journeys starting, ending or within the existing town of Hemel Hempstead, to be undertaken by active and sustainable modes by 2050.

We support the local authority's proposals that considers sustainable transport measures, which manage down demand and reduce the need to travel. We are open to discussions surrounding the district's plan to safeguard land, design, fund, deliver and monitor a package of transport measures to enhance M1 Junction 8 (M1 J8) and surrounding area, in association with Hemel Garden Communities (HGC).

Physical highway improvements for the SRN should only be considered as a last resort. We note that there cannot be any presumption that such infrastructure will be funded through any future RIS (Road Investment Strategy). We strongly recommend that there is no reliance placed on RIS funding to realise capacity for growth in the Plan within the plan period.

Housing and Employment Allocations:

We note that the housing requirement over the plan period is 10,808 across 98 sites in the St Albans area. H2 - East Hemel Hempstead (North) site directly borders the M1 and will provide 1,600 residential units (indicative) in total (1,235 in plan period). The site is to the east of Hemel Hempstead, between the B487 to the north, the M1 to the east and Punchbowl Lane to the south. The site is adjacent to Hemel Hempstead and forms part of the wider Hemel Garden Communities programme.

The site aims to improve and enhance countryside access links including connections under the M1 motorway. These links will require close collaboration with both National Highways and our service partner when an application comes forwards.

Site H3 and H4 East Hemel Hempstead (Central and South) also form part of the Hemel Garden Communities programme and similarly borders the M1. The proposals include mention of land to the east of Junction 8, which will be safeguarded for access improvements associated with Junction 8 of the M1 motorway, in case it is required to come forward for junction improvements.

Site H3 is also classified as Employment Led Mixed Use (Enterprise Zone), approximately 17 hectares of the site will promote high density, higher skilled employment uses to deliver a Business, Research and Development Park and explore opportunities for education. National Highways will be interested in understanding how traffic impacts will be reduced and mitigated as work on this site progresses due to the proximity of the SRN.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

### 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 21

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraph 35 and 36 of the 2023 NPPF require that local plans be effective to be considered sound. This means they must deal with cross-boundary matters.
It is an agreed principle that the Hemel Garden Communities (HGC) programme should deliver a new recycling centre. The HCC Local Authority Collected Waste Spatial Strategy (WSS) provides an assessment of desirable waste management facilities required in Hertfordshire over the period to 2031 and beyond. The WSS identifies that the existing Hemel Hempstead recycling centre is highly unsuitable, as the condition of the centre is very poor, the centre lacks sufficient capacity for a variety of waste streams, and it is too small to adequately deal with the level of demand which can cause long queues onto the industrial estate. The 2024 Dacorum local plan recognises and need at strategic policy HGC2, which is similar to St Albans policy LG3, but does not identify a location.

Previous work to investigate expansion into neighbouring land demonstrated this was unfeasible due to the cost of remediating contaminated land. An indicative area of search focusing along the A414 corridor has been included within the WSS, and historic site searches have not produced a viable alternative location for an RC to serve Hemel Hempstead.
The plan does include policy at Pillar 2 within policy LG3 in part A in support of the delivery of a recycling centre, as follows:
Delivery of Key Projects including a Household Waste Recycling Centre and Local Authorities Depot facilities to meet the needs of new and existing communities;
However, this policy applies across all of the HGC programme and does not bind any of the HGC sites in St Albans to deliver a site should the masterplan process identify a location within St Albans, or indeed direct the masterplan process to resolve this cross-boundary issue. There is no corresponding policy at allocation H2 in Part B. Nor does this policy refer to the potential for a training centre. Therefore, there is only partial provision in policy against which the decision-maker can consider an application.
It is possible that a location in St Albans is suitable. HCC have since been engaging with Hertfordshire Futures on the possibility of a combined recycling centre and reuse training facility being delivered as part of the Land East of Hemel Hempstead (Central) site. This would therefore meet both service provision/mitigation and economic development objectives. This includes the provision of apprenticeships, workshops, and training. This employment aspects makes the expansion of Maylands within the St Albans district boundary a suitable host for this facility. This proposal is not yet agreed and is dependent on further feasibility work, but HCC considers this proposal for a joint recycling and training centre to be in principle acceptable.
Therefore, to deal with cross boundary matters and therefore to make the plan sound, the plan should provide for a recycling and training centre to be provided within allocation H2 at Part B if the masterplan for HGC identifies this as the preferred solution.

The county council recommends the below changes to policy as respects Hemel Garden Communities:
Part A LG2: The cost apportionment sentence (No.5, Page 26) in Strategy Policy HGC1 – Transformation of Hemel Hempstead of the DBC Local Plan to 2041 Pre-Submission Version for Approval is not in the corresponding SADC policy. For consistency, we suggest it is added into the SADC Policy LG2:
The methodology for infrastructure apportionment and cost sharing is set out in the Local Plans Infrastructure Delivery Plans (IDPs). Infrastructure, contributions and wider funding will be required to deliver on and off-site infrastructure, in accordance with the above documents.

Part B LG3: Suggest amending the text as at present working assumptions are that the Household Waste Recycling centre is to come forward separately from the district council provision.

Delivery of Key Projects including a Household Waste, a Recycling Centre, and Local Authorities Depot facilities to meet the needs of new and existing communities
Part B H1, H2, H3, H4: Suggest adding in the following text into each policy to ensure key transport schemes are included:
The provision of essential transport infrastructure, the detail of which will be identified through the HGC IDP, including mitigating the impact of traffic associated with the development; appropriate consideration of M1 Junction 8 improvements and access arrangements for wider Hemel Hempstead, the provision of appropriate financial contributions towards A414 bridge and wider highways network improvements and access arrangement for HGC and wider Hemel Hempstead, provision of appropriate public transport (services and infrastructure) serving the site; and provision of a comprehensive network for pedestrians and cyclists with good connectivity provided to adjoining areas, including a particular emphasis on improving linkages to Hemel Hempstead Station as a transport interchange

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Part B H1, H2, H3, H4: Suggest adding in the following text into each policy to ensure key transport schemes are included:
The provision of essential transport infrastructure, the detail of which will be identified through the HGC IDP, including mitigating the impact of traffic associated with the development; appropriate consideration of M1 Junction 8 improvements and access arrangements for wider Hemel Hempstead, the provision of appropriate financial contributions towards A414 bridge and wider highways network improvements and access arrangement for HGC and wider Hemel Hempstead, provision of appropriate public transport (services and infrastructure) serving the site; and provision of a comprehensive network for
pedestrians and cyclists with good connectivity provided to adjoining areas, including a particular emphasis on improving linkages to Hemel Hempstead Station as a transport interchange

To be considered sound the plan should:
1. Include a recycling centre in the IDP;
2. Provide that allocation H2 and Part B provide a recycling and training centre if the masterplan for the site does not provide for this in the HGC allocations in Dacorum;
3. Amend policy LG3 to ensure that the masterplan give further clarity that the recycling centre and the District depot are separate facilities; and
4. add recycling centres to the list of defined community infrastructure.

Firstly, the Dacorum Regulation 19 local plan Infrastructure Delivery Plan schedule
Includes the following:
A new Recycling Centre at Hemel Hempstead Delivery of a new Recycling Centre at East Hemel Hempstead or North Hemel Hempstead. Cost index to Quarter 1 2023.
Since there remains the possibility that the new recycling centre will need to be delivered in East Hemel Hempstead it is appropriate that this be included within
the Infrastructure Delivery Plan schedule for the St Albans plan. This will make
clear that this piece of infrastructure is required and may be required to be delivered within the boundary of St Albans district.
Secondly, the plan could address point 2 by amending policy at allocation H2 at

Part B to require allocation H2 at Part B to deliver a recycling centre should this be the agreed location identified in the HGC masterplan. It would not yet be
appropriate to require the delivery of a recycling and training centre in policy at
allocation H2 in Part B as the evidence is not in place to identify a specific
location. However, the policy will need to provide a mechanism for the delivery of a recycling centre within St Albans if the masterplan identifies that Maylands, is the agreed location.
Part B H2: The delivery of a site of not less than 2ha for a recycling centre and
associated training centre, if the agreed masterplan for the whole Hemel Garden
Communities allocation in St Albans and Dacorum provides for this to be delivered in St Albans.
Thirdly, the plan should clarify that the two LPA and HCC waste facilities are
separate facilities. This would ensure that the masterplan identifies a location for
the recycling centre within the whole cross boundary HGC masterplan in addition
to the LPA municipal waste depot:
Part A LG3: Delivery of Key Projects including a Household Waste Recycling
Centre and a Local Authorities Depot facilities to meet the needs of new and
existing communities;
Finally, the LPA could consider adding recycling centres to the list of defined
community infrastructure at Strategic Policy LG7. This would give new recycling
centres positive policy weight in the planning balance, if delivered in Maylands,
and prevent their loss to other uses once delivered:
vi. Cemeteries and burial and crematorium facilities, [deleted text]
[deleted text]vii. Flood defences.; and
viii. Recycling centres.
Taken together, these amendments would require that the cross-boundary HGC
masterplan identify a suitable location for a recycling centre and, if this is
provided in St Albans, gives it positive policy weight so it can be positively
considered in the planning balance.

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

SITE ALLOCATIONS H1, H2, H3 & H4

Thank you for the opportunity to submit representations to the SADC Draft Local Plan Regulation 19.

This letter constitutes a joint response on behalf of the above land interests within the SADC portion of the Hemel Garden Communities (HGC) Growth Area, specifically the site allocations H1 – North Hemel Hempstead, H2 – East Hemel Hempstead (North), H3 – East Hemel Hempstead (Central), and H4 East Hemel Hempstead (South). These allocations are proposed to together deliver around 5,500 dwellings – half of the required homes in the designated Growth Area - and land for up to 6000 jobs.

In recognition of the significance of these allocations, in the period since the Local Plan Regulation 18 consultation the landowners have continued to work positively with HGC partners in progressing the ambitious transformation proposals, particularly in relation to furthering the understanding of the infrastructure and mitigation necessary at local plan stage to support the draft allocations and soundness of local plan policy.

While this understanding will continue to be developed and tested through the final stages of the Local Plan including at Examination and through SPD preparation (and in due course, realised through future Outline Planning Applications when detailed mitigation will be secured), we believe that the Local Plan has been informed by a strong evidence base, focused on matters relevant to growth at this scale and to a level of detail proportionate to local plan considerations.

This has resulted in a clear and robust policy framework. As such we can support the Local Plan and consider the overall principles, requirements and proportionality set out in its policies to be generally effective, insofar as they relate to these allocations.

LOCAL PLAN PART B – SITE ALLOCATIONS

We are supportive of the amendments made in Part B of the Local Plan relating to site allocations H1, H2, H3 and H4, recognising that they have been informed by the HGC evidence base, including the Framework Plan.

We are also supportive of the overall policy requirements for each of the HGC allocations. Whilst we have a number of detailed points of clarification within the site allocation policies which have been raised separately through individual representations, these comments are made in the interests of securing a clear and effective policy framework for each site.

**354 - Kitewood**

Submission Number: 354 Submission Date: 14/11/24 09:00

Respondent: Company/Organisation: Name: Miss Sara Sweeney

On Behalf Of Company/Organisation: Name: Kitewood

Comment Number: 9

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Kitewood Estates Ltd ('Kitewood') welcome the opportunity to comment on the Draft Local Plan 2041 Regulation 19 ('the Reg 19 Local Plan') and the supporting documents that have been published for consultation.

We understand that following the consultation, all representations will be sent to the Planning Inspectorate along with the draft Local Plan to be Examined by a government-appointed Planning Inspector who will consider if any modification need to be made to the Local Plan before it can be adopted.

The Planning Inspector will assess whether the draft Local Plan has been prepared in accordance with legal and procedural requirements, and whether it is 'sound'.

This representation is therefore focused on matters relating to soundness.

**Kitewood Interest in the Draft Plan**

Kitewood is a development company and landowner of part of the proposed Hemel Garden Communities (HGC) Growth Area to the north and east of Hemel Hempstead. Our landholding falls wholly to the north within Dacorum Borough, and abuts the boundary with the St Albans City & District, adjacent to the Reg 19 Local Plan proposed allocation H1- north Hemel Hempstead.

HGC (including the proposed Growth Area) is a collaboration between Dacorum Borough Council, St Albans City and District Council, Hertfordshire County Council and Hemel Garden Communities, and is supported by the Hertfordshire Local Enterprise Partnership. The landowner group, of which Kitewood is part of, have continued to work positively with HGC partners in progressing the ambitious proposals for growth and transformation.

The HGC Growth Areas to the north and east of Hemel Hempstead are expected to extend beyond the Plan period and will deliver up to 11,000 new homes and 10,000 new jobs by 2050 across St Albans District and Dacorum Borough.

The HGC Growth Area is consistent with the government's strong aspiration to boost the delivery of new homes and infrastructure in a comprehensive manner. It is also aligned with the government's agenda to facilitate the delivery of New Towns.

The plan extract below from *Hemel Garden Communities Position Statement* dated July 2024 identifies the full extent of the north and east Hemel Hempstead Growth Area.

**Hemel Garden Communities Program Area extract from the *Hemel Garden Communities Position Statement***

***See 'Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024' attachment for figure***

The proposed HGC Growth Area is supported by a comprehensive and robust evidence base, including the Framework Plan 2024, HGC Framework Plan Story (July 2024) and HGC Technical Report (Sept 2024). Further evidence is also emerging to support the Local Plans and the future planning applications.

The publication of the St Albans District Draft Local Plan 2041 Regulation 19 for consultation and the Council's intention to submit the Plan for Examination is a significant milestone for the HGC Growth Area, and we commend the Council for their continued engagement with us, the other landowners and HGC partners.

Whilst Dacorum Borough Council are slightly behind St Albans City & District Council in terms of the consultation on their respective Pre-Submission Dacorum Local Plan to 2041 (Regulation 19) which will run until 17th December 2024, we are of the view that it would be beneficial for the Submitted Plans to be Examined together given the importance of the HGC Growth Area to both authorities.

In addition to these comments, joint landowner representations are also submitted to this consultation by David Lock Associates (DLA) on behalf of ourselves (Kitewood), The Crown Estate, Pigeon Investments Limited and Bloor Homes.

- **H1 – North Hemel Hempstead**
- **H2 – East Hemel Hempstead (North)**
- **H3 – East Hemel Hempstead (Central)**
- H4 East Hemel Hempstead (South)

The Proposed Site Allocations H1, H2, H3 and H4 are identified on the Key Diagram, extract below.

**Reg 19 Local Plan Fig 1.2 Key Diagram extract of the Proposed Site Allocation H1, H2, H3, H4**

***See 'Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024' attachment for figure***

These allocations (H1, H2, H3 and H4) form part of the wider HGC Growth Area and they will together deliver around 5,500 dwellings, around half of the required homes in the designated Growth Area and land for up to 6,000 jobs.

The Local Plan Reg 19 proposed that 4,400 of the dwellings (around 75% of the total) will be delivered during the plan period.

Our comments relate to the need to ensure that a fully comprehensive approach is taken across all of these allocations (H1, H2, H3 and H4) and the wider HGC Growth Area to ensure the delivery of the cross-boundary infrastructure requirements, to ensure the draft Plan's *effectiveness*.

Our concerns about effectiveness of the Reg 19 Plan relate to the current lack of detail on how the infrastructure will be phased alongside the delivery of the development, and how this aligns with the delivery of the proposed north Hemel Hempstead allocation in Dacorum Borough to ensure the vision for the Hemel Garden Communities is realised and delivered without delay.

Our Comments principally relate to Policies LG1, SP1, SP8 and TRA1.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Our comments relate to the need to ensure that a fully comprehensive approach is taken across all of these allocations (H1, H2, H3 and H4) and the wider HGC Growth Area to ensure the delivery of the cross-boundary infrastructure requirements, to ensure the draft Plan's *effectiveness*.

Our concerns about effectiveness of the Reg 19 Plan relate to the current lack of detail on how the infrastructure will be phased alongside the delivery of the development, and how this aligns with the delivery of the proposed north Hemel Hempstead allocation in Dacorum Borough to ensure the vision for the Hemel Garden Communities is realised and delivered without delay.

*We consider that for the policy to be effective a joined-up approach is required by St Albans City & District and Dacorum Borough to ensure the infrastructure items that relate to the Growth Area that are set out in the Councils' respective Infrastructure Delivery Plans are fully aligned, and these accord with the HGC Infrastructure Delivery Plan.*

*We are of the view that further consideration should be given to the comprehensive infrastructure requirements to support the overall proposed overall HGC Growth Area, the delivery phasing across the authority boundaries and mechanism for appropriating cost.*

*We therefore consider that an updated St Albans City & District IDP is required to be published in advance of the Examination in Public to incorporate all of the relevant emerging evidence base.*

*Kitewood considers that further evidence is required to demonstrate cross-boundary co-operation and cumulative impact assessments on transport matters and further information is necessary in relation to the mechanisms that will ensure the sustainable growth of Hemel Hempstead during the plan period.*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Kitewood is a development company and landowner of part of the proposed Hemel Garden Communities (HGC) Growth Area to the north and east of Hemel Hempstead. Our landholding falls wholly to the north within Dacorum Borough, and abuts the boundary with the St Albans City & District, adjacent to the Reg 19 Local Plan proposed allocation H1- north Hemel Hempstead.

Kitewood considers that the *Draft Local Plan 2041 Regulation 19 is Legally compliant*, has been *Positively prepared*, is *Justified*, and is *consistent with national policy*.

However, we do not consider that Policies SP1, SP8 and TR1 are effective because all the evidence does not yet exist to demonstrate effective joint working on cross-boundary strategic matters.

***Kitewood therefore request participation in the forthcoming Examination in Public to discuss policy matters relating to the Proposed site allocations H1, H2, H3 and H4***

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

### 26 - Nikki Bugden

Submission Number: 26 Submission Date: 22/10/24 09:00

Respondent: Company/Organisation: Nash Mills Parish Council Name: Nikki Bugden

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**St Albans Regulation 19 Consultation-Nash Mills Parish Council Response Oct 2024.**

Nash Mills Parish Council have previously expressed views at Regulation 18 stage for the St Albans Local Plan. The impact of the proposed development so close to our parish has an impact on infrastructure affecting our residents. Councillors have asked me to reiterate the points raised as it is unclear how these concerns have been addressed or mitigated for the Regulation 19 stage. We do not feel that the process has enabled us to adequately make representations for the points raised below and therefore would like to make representation calling for scrutiny of the 'soundness' of this local plan.

Healthcare

We cannot see evidence that our point 5 below has been addressed. What reassurance can we obtain for our residents that this request has been adequately scrutinised and raised with the relevant dept in central government?

Whilst there is some mention in the Reg19 draft around healthcare there is no confirmation that there has been proven engagement with the relevant authorities to ensure that the population growth within Dacorum and the wider area has been adequately scrutinised. It is imperative that the currently under resourced local healthcare provision be made fit for purpose, ideally predevelopment but certainly from when the first inhabitants move in and of course going forward to support the population growth caused by these developments. There is a danger that there will be a long wait with still no adequate facilities for Dacorum and St Albans residents or that funding may not be adequately earmarked to meet the obvious need.

Traffic Calming

We cannot see evidence that our points 2 and 3 below have been addressed. What reassurance can we obtain for our residents that these requests has been adequately scrutinised and raised with the relevant department at Herts County Council Highways?

Bunkers Park

We cannot see evidence that our point 5 below has been addressed. What reassurance can we obtain for our residents that this request has been adequately scrutinised and raised with the relevant department at Dacorum Borough Council.

*Previous email below from August 2023*

*Good Afternoon*

*Nash Mills Parish Council have asked me to send across the following comments in relation to your recent consultation.*

*We do have some concerns relating to traffic and services within the parish and look forward to the opportunity to express these in further detail as the process develops.*

***In response to the consultation NMPC would ask ST Albans DC to note that NMPC***

1. *Welcomes an extension to Bunkers Park as part of SANG (Suitable Alternative Natural Green Space) whilst noting that the increased usage would exacerbate the need for an increase in parking provision.*
2. *Would be wishing to make representation for width restrictions on Bunkers Lane.*
3. *Would be wishing to make representation on the concerns received from residents regarding the impact of additional traffic on both Chambersbury Lane and Georgewood Road.*
4. *Would be looking forward to future consultation on the details of the proposed St Albans local plan as it affects land bordering Nash Mills.*
5. *Would be recommending an impact assessment of the St Albans (and Dacorum) revised local plans on the WHHT hospital redevelopment plans.*

*We look forward to making these representations in greater detail in due course and look forward to receiving your acknowledgment of receipt of this email*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 67 - Mrs christine Kavanagh

Submission Number: 67 Submission Date: 05/11/24 10:43

Respondent: Company/Organisation: Name: Mrs christine Kavanagh

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I do not consider that the SADC local plan is consistent and in line with National policy as in the plan it states that:

'National policy sets out that inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances. While local authorities should regard the construction of new buildings as inappropriate in the Green Belt, exceptions include limited affordable housing for local community needs under policies set out in the development plan, and limited infilling'

By proposing to build 2400 homes and 3 schools on green fields adjacent to the village of Leverstock Green, the character of this village will be irrevocably changed and it will become a small town. This is directly against what is stated in the plan that even building new homes as infill in villages will 'risk of eroding the character of the village and the openness and character of the Green Belt over time'

It appears that while SADC is keen to protect villages within its own district, it is happy to destroy villages at the boundary of its district whose residents have no voting rights within its district. SADC objected to 700 homes being built in Chiswell Green as it wanted to protect the green belt and village character yet is proposing to harm Leverstock Green in exactly the same way.

I also do not believe that SADC has fulfilled its duty to cooperate in the drawing up of its local plan. There was limited consultation with Leverstock Green residents when the draft plan was published in 2023. After pressure from our local councillors, representatives from SADC met with residents at a meeting in our village hall. The meeting was attended by a great many residents and there were objections made to the lack of proposed improvements to local infrastructure such as transport, sewage, water, electricity supply and frequent flooding in Green lane. None of these concerns have been answered in this final draft of the plan and the development has now increased in its scope to incorporate land on the A4147 adjacent to Bartel Close. Leverstock Green residents feel strongly that their concerns have not been listened to, let alone addressed by SADC.

Leverstock Green is a village with a strong sense of community. We have a thriving village hall which hosts a range of community events. We have a very popular cricket club and a tennis club and we host a variety of events for residents throughout the year. By annexing 2400 homes to our village, this sense of local community will be lost and the character of our village will be destroyed. We are surrounded by beautiful green fields and hedgerows which residents can enjoy while walking and cycling along Westwick Row. Any major development will destroy this forever.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To make this plan sound and consistent with National policy, SADC must use the same criteria to protect Leverstock Green as a village as it does to protect villages within its own district. Protecting the nature of villages is a important part of the vision of SADC as stated in its local plan. '

The Council attaches great importance to the Metropolitan Green Belt, which will be protected from inappropriate development. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of the Green Belt are its openness and permanence.'

I believe that vision should be applied consistently throughout its plan and be applied to Leverstock Green. Building 2400 on green fields adjacent to the village of Leverstock Green goes against the stated principles in the local plan.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**78 - Mrs Lynn Whitton**

Submission Number: 78 Submission Date: 06/11/24 03:54

Respondent: Company/Organisation: Name: Mrs Lynn Whitton

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I believe the building of a proposed 2400 houses on the very boundary of St Albans District Council is totally unacceptable. It is destroying more green belt land and would have a huge detrimental effect on the village of Leverstock Green, swamping its village character. The road network around this area is already very congested and the road leading upto the M1 motorway from Leverstock Green and the dual carriageway is one of the most congested approach roads to the M1 in the area. There is one road from Hemel Hempstead to St Albans which passes directly through Leverstock Green and it is frequently totally jammed with traffic . There is not the road infrastructure to support so many additional houses . Also there is the question of the sewerage system in the area which is already overloaded .

The residents of the new houses would use the facilities within Dacorum Borough Council due to the proximity of the houses to the village of Leverstock Green and the rest of Hemel Hempstead, while Council Tax would be paid to St Albans County Council, bringing very little benefit to the town. While it is not an issue considered in this consultation I bring it to your notice that Hemel Hempstead does not have a fully operational hospital , which is of concern to the residents and to build so many additional houses will further increase the strain on overcrowded Watford hospital . Also there is the proximity to Buncefield Oil Depot . While the new houses are considered to be within the 'safety zone' may I point out that houses in Westwick Row were damaged in the last explosion and even a window blown out in St Albans cathedral.. Then there is the motorway noise to be considered. The houses would be built in close proximity to the M1 which emits constant noise and pollution . This should be a consideration for the health of the occupants of these new dwellings . The housing development is too large for the area and should be located elsewhere . The disruption to the residents of Leverstock Green during construction would be huge as there are no other access roads to St Albans and only one Main Street through the village .

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

Comment Number: 7

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Sites in Redbourn and east/north Hemel will cause the Green Belt to disappear between Redbourn and Hemel. Most are in areas categorised as Important and require a compelling reason to build. The only reason stated is for Social or Affordable Housing which surely means the 60% of planned housing not in those categories should not be built on Green Belt as such housing is not compelling bu need but financial.

The impact of all the HGC and West Redbourn proposed has only Ben considered on a site by site basis. A significant proportion of traffic to and from the Sites would coallesce on the same small roads between Hemal and Redbourn, St Albans, Harpenden and the M1. The travel infrastructure barely supports the traffic currently at peak times. Therefore, the impact cannot be considered safe as required.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The individual areas should also be considered in relation to each. Ie if one area is developed the importance of adjacent areas should reconsidered to reflect that.

The traffic plan for each residential site should be considered sequentially in the expected order of start to take in to account the effect of the moving starting position.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

## 101 - Miss Stephanie Mitchell

Submission Number: 101 Submission Date: 06/11/24 14:41

Respondent: Company/Organisation: Name: Miss Stephanie Mitchell

Comment Number: 1

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of the Green Belt are its openness and permanence' It also states: 'National policy sets out that inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.

The land that this proposed development would cover is classified as Green Belt. It has been farmland for many years, producing a variety crops, and is also a popular route for walkers.

I understand the need for housing but am extremely concerned that some of the last Green Belt land in and around Dacorum and St Albans is under threat and must be protected at all costs. Speculative planning applications for major developments on Green Belt must be stopped or this will set a precedent for developers and precious green spaces will no longer be off limits. Developers already have the opportunity to offer up applications for development sites which are included in the council's local plan.

Limited infilling in villages can accommodate new homes although there is a risk of eroding the character of the village and the openness and character of the Green Belt over time.

This developoment would clearly erode the very precious and long standing nature of our village, Leverstock Green. Not an extension of Hemel Hempstead but a vibrant village full of community spirit and activities epitomised by the vibrant community centre, church, school and scouts. Thousands of extra homes will render our village a thoroughfare complete with extra pollution.

The proposed plans would take up to a decade of construction work which they propose to carry out from early morning until night, six days a week. This will have a major impact both on immediate neighbours and adjacent roads and properties for a significant period of time. Issues include noise pollution, construction dirt, possible access issues and a sizable and extended decline in the quality of the area we live in. These would have an adverse impact on the mental and physical health of individuals, as well as the quality of life of residents, with some being elderly and/or disabled.

Leverstock Green is home to Woodfield Special Needs school with many pupils attending from across the borough. Many of these pupils are more vulnerable to pollution and changes in their environment.

Currently there is no GP services directly in Leverstock Green and the Dental Surgery is oversubscribed and overwhelmed, causing local residents to struggle to get appointments when they need them. Any extra homes would add thousands of people to these waiting lists and a huge burden to these already oversubscribed services, if those residents are even able to find a surgery that can take them on. A further concern would be the impact of shortages in school places within the area. Leverstock Green Primary school is already oversubscribed and a one form entry school, with the same situation across the other schools locally. This would only worsen for pupils looking for secondary school places.

Maylands Avenue is a destination hub for many businesses with Leverstock Green bearing a huge load of commuters traveling to their place of work, and vice versa for those who work in St Albans and beyond who want to avoid the already hugely congested roads out of Hemel Hempstead. The current closure of one road just to the north of the village is rendering the village almost impossible to navigate during peak times and when on those days where there are no closures or delays on the M1 or M25 are small village once again bears the brunt of commuters looking for alternative routes. Adding thousands of new residents to the area - whose main access points to the new development would be through the village - would add even more pressure and inevitably cause higher levels of traffic and therefore pollution.

One of the best things about living in Leverstock Green is its village nature and the easy access to fresh air and green spaces – this would be lost forever.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**111 - Cllr. David Mitchell**

Submission Number: 111 Submission Date: 06/11/24 16:01

Respondent: Company/Organisation: Name: Cllr. David Mitchell

Comment Number: 6

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Hemel Garden Communities (HGC) programme is at a very early stage in its concept. 11,000 new houses is a huge project yet there is no substantial evidence to show it is viable and deliverable. It is all on greenbelt land NOT recommended by the ARUP green belt review for development. The land is in the Chiltern Hills and the northern parts are adjacent to the National Landscape which should be protected. It is high quality agricultural land, grade 2 and 3a, which should be reserved for our food security. HGC is not served well by public transport. The four closest rail stations are all several miles away and the bus services are currently poor. The HGC programme is over-reliant on people walking and cycling, with little private parking being made available or new main roads being provided. This would require a huge modal shift which would be difficult to achieve in the time scale. In this respect, HGC a very risky social experiment.The HGC is a long way from the Hemel town centre so the development does not connect well with the rest of Hemel. Over a third of St Albans District's new housing is proposed at HGC which does not connect well with the rest of the District. The Nickey Line is enthusiastically being put forward as a significant cycle and footpath linking Hemel to Harpenden via Redbourn but currently this route is not fit for purpose. HGC might seem great on paper but the reality of building a new town onto to an existing new town is not good spatial planning.

The site at West Redbourn (B3) has no proper access. The proposed access points are from existing cul-de-sacs and country lanes, and traffic would have to travel across Redbourn Common. This would have a big impact on the existing community.

South of Harpenden Lane, Redbourn (LG4) is mostly a flood plain. This is noted but further work needs to done on the impact new development would have on the existing development. More work needs to be done on the affect development would have on the rare chalk stream that flow through Redbourn, i.e. the River Ver and the River Red.

The broad sites in the Local Plan are proposed on over 700 hectares of greenbelt in total, of which over 500 were not recommended by ARUP for consideration in their green belt review. Half of the SADC green belt sites are in the HGC area, which is a big loss of greenbelt in one area. If HGC goes ahead it would be urban sprawl and lead to coalesence between Redbourn and Hemel Hempstead. It has been asserted that the chosen green belt sites meet the 'exceptional circumstances' criteria for building on the green belt by dint of the need for housing and by building next to existing settlements. However this has not been demonstrated in a way that overcomes all the problems with the HGC programme and the intinsic difficulties of the sites in Redbourn village. The draft Local Plan cannot be considered legal and sound.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

HGC and West Redbourn should not be included in the Local Plan. If they are, much more work needs to be done on the Infrastructure Delivery Plan. A site at NE Redbourn owned by the Lawes Agricultural Trust should be considered instead as it would integrate with Redbourn village much better.

Generally, development should be spread more evenly around the District as this would better meet the needs of St Albans District residents. The lack of public transport and inadequate roads has to be resolved. Maybe the Nickey Line could be a tram line?

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

I am very familiar with the draft Local Plan and have a good working knowledge of planning issues in general. I could add a lot of local knowledge to proceedings particularly the area of the Hemel Gardens Community programme and the sites in Redbourn Village. I am well informed about the District as a whole.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

I am writing to you as a concerned resident of Leverstock Green who will be directly affected if the above proposed development is allowed to move forward. I am extremely concerned about this and wish to object strongly for several reasons, which I have outlined below. Green Belt The land that this proposed development would cover is classified as Green Belt. It has been farmland for many years, producing a variety crops, and is also a popular route for walkers. I understand the need for housing but am extremely concerned that some of the last Green Belt land in and around Dacorum and St Albans is under threat and must be protected at all costs. Speculative planning applications for major developments on Green Belt must be stopped or this will set a precedent for developers and precious green spaces will no longer be off limits. Developers already have the opportunity to offer up applications for development sites which are included in the council's local plan. One of the absolute main reasons we love living in Levertsocok Green is for its proximity to the fields and nature walks. It has a 'village' feel to it on the edge of the countryside. Something we pride oursleves on living by.

Nature -The land is home to several species that may be at risk or in need of protection such as hedgehogs, bats, newts and many nesting birds: such as red kites. The proposed development is expected to take many years to complete and it is difficult to see how these species would remain and survive. This would be a significant loss to the local biodiversity.

Health and well-being- As previously mentioned, the proposed plans would take up to a decade of construction work which they propose to carry out from early morning until night, six days a week. This will have a major impact both on immediate neighbours and adjacent roads and properties for a significant period of time. Issues include noise pollution, construction dirt, possible access issues and a sizable and extended decline in the quality of the area we live in. These would have an adverse impact on the mental and physical health of individuals, as well as the quality of life of residents, with some being elderly and/or disabled. Leverstock Green is home to Woodfield Special Needs school with many pupils attending from across the borough. Many of these pupils are more vulnerable to pollution and changes in their environment. One of the best things about living in Leverstock Green is its village nature and the easy access to fresh air and green spaces – this would be lost forever. Residents are also, frankly, concerned about the effect of both this development and an extended construction period on the value of our homes. Backing onto the fields that are proped to be developed is seriously worrying and and gut wrenchingly sad.

Infrastructure -Currently there is no GP services directly in Leverstock Green and the Dental Surgery is oversubscribed and overwhelmed, causing local residents to struggle to get appointments when they need them. Any extra homes would add thousands of people to these waiting lists and a huge burden to these already oversubscribed services, if those residents are even able to find a surgery that can take them on. A further concern would be the impact of shortages in school places within the area. Leverstock Green Primary school is already oversubscribed and a one form entry school, with the same situation across the other schools locally. This would only worsen for pupils looking for secondary school places. Maylands Avenue is a destination hub for many businesses with Leverstock Green bearing a huge load of commuters traveling to their place of work, and vice versa for those who work in St Albans and beyond who want to avoid the already

hugely congested roads out of Hemel Hempstead. The current closure of one road just to the north of the village is rendering the village almost impossible to navigate during peak times and when on those days where there are no closures or delays on the M1 or M25 are small village once again bears the brunt of commuters looking for alternative routes. Adding thousands of new residents to the area - whose main access points to the new development would be through the village - would add even more pressure and inevitably cause higher levels of traffic and therefore pollution. I would implore alternative options to be sought to protect the very nature of the village of Leverstock Green which will be completely lost to this development.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

Concerns regarding proposed delivery rates as described above. This is combined with growth at Hemel Hempstead within Dacorum Council, where the Emerging Strategy for Growth 2020- 2038 seeks a further 1,550 dwellings to the north of Hemel Hempstead and further safeguarded land for circa 4,000 dwellings post 2038. This presents infrastructure and capacity concerns, particularly at junction 8 of the M1, which will continue to be the main route into Hemel Hempstead.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. **make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

While no comment is made on the principle of the allocation, the requirements in the Green Network (part 1) and Engaging Communities (Part 24) sections relating to the development requiring strategic and local public open space provision to be made including sports facilities plus contributions to sports provision within the wider HGC Growth Areas are welcomed. These requirements would be consistent with policies LG1 and LG3 and align with the recommendations in the Council's evidence base for sport (Playing Pitch Strategy) and thereby be consistent with Government policy in paragraph 102 of the NPPF.

**Hemel Garden Communities (HGC)**

The allocation of four housing and employment sites on the northern and eastern edge of Hemel Hempstead is a significant extension to the town that will deliver much needed housing in both Dacorum Borough and St Albans district, it is however inconsistent with the provision of sustainable development for St Albans. Allocating sites on the urban edge of Hemel Hempstead will contribute numerically to the housing requirements of St Albans but it does not align with the Local Plans strategic objectives to '*Prioritise and enable the safe and attractive use of active and sustainable means of transport and reduce the need for people to travel'*and '*Promote adaptation to and mitigation of the Climate Emergency'*by reducing carbon emissions. Nor does the allocation of these sites align with the LCWIP[13] long-term objectives of Climate and Sustainability, Clean Air and Healthy Lifestyles. These allocations will introduce more vehicles onto the A414 between Hemel, St Albans and Watford. Increasing congestion and increasing pollution.

In additional, a raft of highways improvement schemes[14] are identified to enable more effective travel by public transport and it is highlighted that there is no way to 'continuously travel by public transport' along the A414 corridor. It is acknowledged that this contributes to increased car use within the District. If the allocations at Hemel Hempstead are detrimental to the strategy of the draft Local Plan, then a more effective strategy would be to allocate sites to the south of St Albans that will generate contributions to the funding of upgrades to the A414/ North Orbital Road, or to the delivery of the Hertfordshire Essex Rapid Transit (HERT)[15] which is planned along the A414.

Furthermore, the allocation of sites in the south of St Albans could contribute to delivering the improvements to walking and cycling infrastructure identified in the LCWIP which would encourage the use of sustainable modes of transport between Hemel Hempstead and St Albans. The improvements identified in the LCWIP include a long-term aspiration for a segregated cycle route along Hemel Hempstead Road and traffic calming measures along King Harry Lane to provide a safer active travel route. These schemes could be part funded through developer contributions from additional sites allocations in the south of St Albans.

The Hemel Garden Communities are located within the 12.6km Recreational Zone of Influence (ZOI) for the Chilterns Beechwoods SAC which is considered within the Delivery Statement and Local Plan policy LG3 – Hemel Garden Communities Growth Areas Place Principles. The Green Network Vision sets out the creation of significant amounts of SANG and green spaces, and we support the delivery of multifunctional green infrastructure provision to facilitate this.

There is however a potential delivery issue associated with SANG at the HGC. The Council is legally required not to issue decisions within the recreational ZOI until appropriate mitigation is secured through a Mitigation Strategy. It is identified in the Habitats Regulations Assessment[16] that '*whilst not all allocations have a SANG strategy identified, those without a SANG solution in place are not to be occupied until at least year 6 of the Local Plan. The Council has confirmed that they are confident that appropriate SANG solutions will be delivered for all of the relevant sites within the Local Plan'*. If insufficient SANG is identified for all the allocations, then the Council will not legally be able to issue decision on applications submitted at HGC.

Another potential delivery issue is the boundary review of the Chilterns National Landscape[17] that is currently being undertaken by Natural England. Although there are no formal timeframes set out for the review, it is expected that a variation order is to be sought from the Secretary of State in Winter 2025. This could have implications for the housing numbers that can be delivered at the HGC as well as setting back the delivery as the impact of the allocations on the National Landscape are factored into the proposals.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. **make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

## 224 - Redington Capital Limited & CALA Homes

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 14

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Redington Capital Limited and CALA Homes **object** to Part B (Site Allocations) which forms part of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

Redington Capital Limited and CALA Homes conclude that the site allocation selection process undertaken by the Council is unsound. They recommend that the site selection process should be completely reviewed, revised and the draft allocations re-assessed in a transparent and consistent approach particularly in applying the recommendations of the GBR.

In addition to the above, there are a number of other concerning questions regarding some of the Broad Location sites and other housing site allocations chosen by the Council, including:

- Site H4 (2,400 homes) - This is a site located within in the Green Belt (SA164 & 165) and is regarded to **strongly** meet the purposes of the Green Belt. The majority of the site is regarded as important in strategic role terms. It was **not recommended** within the Green Belt Review as an area for release but has been included in the Local Plan. This site will only come forward as part of the Hemel Garden Communities Programme which relies on the neighbouring borough's draft Local Plan being made sound!
  It is clear from the above that the Council has chosen to allocate site:

- In locations deemed to be of strong importance to the purposes of the Green Belt;
- That are not located within the most accessible and sustainable locations; and
- That are either undeliverable or their capacity has been grossly over-estimated.

This demonstrates that the site allocations strategy adopted by the Council needs to be fundamentally reviewed and revised.

This conclusion is further exacerbated when considering the Council has chosen to ignore other more accessible and sustainable sites in lower tier settlements, including Redington Capital Limited and CALA Homes' site (Land South of Chiswell Green Lane), which:

- Benefits from high levels of accessibility by public transport and to local services (as demonstrated in Section 7 below);
- Has less harm to the purposes of the Green Belt (as demonstrated in Section 1 above);
- Is available and deliverable at a density of development that has previously been supported by the Council's planning officers when recommending approval of application ref: 5/2022/0927 (as demonstrated in Section 7 below);
- Is supported by the Inspector when determining Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024; and
- Upheld by the SOS's decision.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council:

- Should be more realistic about its choice of housing sites to deliver its critical housing needs. Some of the current set of site allocations appear to have been included / inflated to "make up the numbers." We therefore strongly recommend that the site allocations are reviewed again and the Council should:
- Remove any sites that are undeliverable;
- Reduce the expected capacity of sites that are obviously constrained and will not therefore delivery the density suggested; and
- Provide evidence to justify all site inclusions and their estimate capacity.
- Include new broad location housing sites that:
- Are located in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and services or will not be used by the district's residents;
- Result in less harm to the purposes of the Green Belt; and
- Are available and deliverable.

Redington Capital Limited and CALA Homes recommends that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing and education land allocation in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

## 227 - National Grid

Submission Number: 227 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: National Grid (Avison Young) Name: National Grid

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Proposed development sites crossed or in close proximity to NGET assets: Following a review of the above Development Plan Document, we have identified that one or more proposed development sites are crossed or in close proximity to NGET assets. Details of the sites affecting NGET assets are provided below.

**H4 – East Hemel Hempstead (South) -** ZA ROUTE TWR (419 - 522): 400Kv Overhead Transmission Line route: ELSTREE - SUNDON 1

A plan showing details of the site locations and details of NGET assets is attached to this letter. Please note that this plan is illustrative only.

Without appropriate acknowledgement of the NGET assets present within the site, these policies should not be considered effective as they cannot be delivered as proposed; unencumbered by the constraints posed by the presence of NGET infrastructure.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We propose modifications to the above site allocations and/or policies to include wording to the following effect. We propose that these modifications are applied to each of the aforementioned site allocations affected by NGET assets.

**OS1 – Land to the North of Bricket Wood**

*The development will include a strategy forresponding to the NGET Overhead Transmission Cable present within the site,demonstrating how the NGET Design Guide and Principles have been applied at the masterplanning stage and how the impact of the assets has been reduced through good design."*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**248 - Historic England**

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 15

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**H4 - East Hemel Hempstead (South), HP2 4PA4**

The proposed site includes the Grade H* listed Westwick Cottage, as well as a number of other grade H listed buildings including King Charles H Cottage, and Dell Cottage. There are further grade H listed buildings, off site, immediately to the south-east; west range of outbuildings bounding

the main yard at corner farm, including pigsty north and east ranges of outbuildings bounding the main yard at corner farm (grade ii), corner farmhouse and [plan range of outbuildings on south and east sides of east yard at corner farm.

Further afield, the remains of Old Gorhambury, listed at Grade I, Gorhambury listed at grade H*, Bacons House scheduled monument and Gorhambury Registered Park and Garden and a number of other grade H listed buildings lie to the east of the site. The scheduled monuments of Verulamium also lie to the east of the site. Any development of the site has the potential to impact these heritage assets by affecting their settings.

We welcome the preparation of the HA. We broadly welcome the inclusion of criterion 19 in relation to heritage assets.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We recommend that criterion 19 would be further improved if amended to read:

*Through Masterplanning, the layout and design of development should conserve and where appropriate enhance thesignificance of the Grade II Listed King Charles II Cottage, the Grade II* Listed Westwick Cottage, the Grade II Listed Westwick Row farm group, the Grade II Listed Corner*

*Farm group, the Grade II Listed Dell Cottage, the Grade II Listed Beechtree Cottages, Grade II Gorhambury Registered Park and Garden and Grade II * Listed Gorhambury mansion; this should include the incorporation of appropriate set backs of development and creation of open spaces.*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**250 - Mr Laurence Pilgrim**

Submission Number: 250 Submission Date: 07/11/24 22:23

Respondent: Company/Organisation: Name: Mr Laurence Pilgrim

Comment Number: 3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The plan places a large element of the housing on the edge of Leverstock Green/Hemel Hempstead as opposed to on the edge of St Albans. This means in reality Hemel Hempstead will have to provide the services to the people in the area, yet St Albans will be getting the council tax.
This placement of housing also provides all of the disruption and traffic of the new housing on Leverstock Green and Hemel Hempstead and not St Albans. A nice result for St Albans but not Dacorum.
There is already a signifcant amount of traffic and resultant air polution in the areas proposed around Leverstock Green, this proposal will only increase this and increase the noise polution.There is no plan to tackle the insufficient health provision across the area. Building surgeries is not sufficient, they need staffing and the hosipital situation for the whole of Herts has not been addressed. You cannot add thousands of houses without the required services.
I am not confident that significant investigation has been carried out of potential flooding caused by the large number of houses proposed around Leverstock Green/Hemel Hempstead. Questions raised at the consultation regarding this were not answered sufficiently.
How will the new schools be staffed and funded. Building schools is only part of the problem, they need staff and funding. There are already issues fudning current schools and getting staff in Hertfordshire. Placement of the schools so children are not travelling across Hemel Hemsptead or St Albans is also key. This again shows it is only addressing some of the issues, not all of them.

The plan continues to put the large elements of housing development on the edge of the St Albans impacting neighbouring boroughs rather than St Albans, not a sound or cooprative approach.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). More investigatios on flooding.

Proper funding for all services and facilities, not just the buildings.

Better planning around school locations and also travel to and from the schools.

Keep the major developments closer to the centre of St Albans and the services and infrastructure rther tha load neighbouring boroughs.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

- Proposed West Redbourn (B3) and Hemel Garden Communities developments will completely remove the current green belt buffer between Redbourn and Hemel Hempstead (only 1km remaining). The whole purpose of the green belt is to prevent urban sprawl, these developments completely go against this policy. Even though the ARUP report commissioned by the council rejected the Hemel Garden Communities development due to coalescence, they have decided to proceed anyway – ignoring the findings. An explanation as to why "exceptional circumstances" exist that justify building on this greenbelt land has still not been provided.
- Have the West Redbourn (B3) site and the Hemel Garden Communities developments been considered together? We haven't seen evidence of this – especially when it comes to the greenbelt.
- Loss of arable land when government should be prioritising self-sufficient food chain. Also damaging to the chalk stream network.
- The West Redbourn (B3) site in particular is a complete abomination; even local housing associations have objected to it. The access proposed will create a huge increase of traffic volume throughout the village – making it lose its village identity and putting significant pressure on already over stretched services and road network.

**Point 1:** A revised Gypsy and Traveller Accommodation Assessment (GTAA) has been produced for St Albans District Council by ORS consultants (September 2024). This shows a need for 80 pitches for households that meet the planning definition over the 2024-2041 Plan period, with 44 of these pitches required in the first five years (2024-2029). There is also a need for 7 plots for travelling show people, all within the first five years.

However, despite paragraphs 9 and 10 in the Planning Policy for Traveller Sites, Policy HOU6 does not set pitch/plot targets for the Plan period or a supply of sites for the first 5 years, years 6-10 or years 11-15.

As a result, the policy is unsound because it is not positively prepared or consistent with national policy. Dacorum recognises that the GTAA is very recent and St Albans Council has not been able to take it into account before submitting the Local Plan for public examination. Nevertheless, this matter needs to be rectified through the examination process.

**Point 2.** We also consider that Policy HOU6 is unsound, as it is not justified or effective, for the reasons explained below.

Dacorum is concerned that the only proposed new sites are both at East Hemel Hempstead, involving two sites for “up to 15-20 pitches”. This wording is not effective it means “up to 20 pitches”.

Furthermore, we consider that the proposed sites are too large, based on the advice in paragraphs 4.7 and 4.8 of the ‘Designing Gypsy and Traveller sites: good practice guide’ (2008) that sites should not normally have more than 15 pitches. Although that document was withdrawn in 2015, there is no further evidence more up to date in terms of design guidance for England.

The area close to the proposed new sites already has 62 pitches:

- Dacorum: 30 pitches at Three Cherry Trees Lane in Hemel Hempstead.

- St Albans: 17 pitches at Tullochside (off the B487 Hemel Hempstead-Redbourn Road) and 15 pitches at Ver Meadows, Redbourn.

Our view is that the existing and proposed provision would result in an over-concentration of gypsy and traveller sites to the east and north east of Hemel Hempstead and the Redbourn area.

We are also concerned that the East Hemel Hempstead (Central) Broad Location does not offer a suitable residential environment for a a gypsy and traveller site, as this broad location is proposed for employment development.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We consider that the following modifications are necessary to make Policy HOU6 sound:

- The policy should set pitch/plot targets for the plan period and include a supply of sites for the first 5 years, years 6-10 and where possible years 11+, based on the evidence in the Gypsy and Traveller Accommodation Assessment. This is necessary for the policy to be justified, effective and consistent with national policy.
- The number of pitches proposed on the East Hemel Hempstead (South and Central) Broad Location results in overconcentration in a particular area. At least one site should be deleted and the other, as a minimum, reduced in scale and not be located in close proximity to already established sites in the area. This is necessary for the policy to be justified and effective.
- Additional gypsy and traveller sites should be identified elsewhere in St Albans District, on strategic housing sites and/or in other locations, sufficient to deliver needs identified in the Gypsy and Traveller Accommodation Assessment. This is necessary for the policy to be justified and effective. It will also ensure clarity that St. Albans needs are being met in full within its administrative boundaries.

Respondent: Company/Organisation: David Lock Associates Name: Mr Will Howarth

On Behalf Of Company/Organisation: The Crown Estate Name:

Comment Number: 3

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**Site Allocation Policy H4**

Clause 5 of Policy H4 (reg 19 amendments) refers to the requirement to deliver *"the HGC Green Loop including Buncefield Lane, Westwick Row, Blackwater Lane, to Bunkers Park and adjacent to the site Bunkers Lane and connections to the Green Loop".*

It is unclear from the wording whether site allocation H4 is intended to provide all these lengths or be contributing to them. We suggest that due to the wider growth of HGC, the policy should seek appropriate contributions to the wider HGC Green Loop: as worded the current policy could be interpreted as a requirement for H4 to make the full contribution. It is suggested that clarity is added to the policy wording by amendment to read:

*"**Contributions towards the**HGC Green Loop including Buncefield Lane, Westwick Row, Blackwater Lane, to Bunkers Park and adjacent to the site**,** Bunkers Lane and connections to the Green Loop."*

This amendment would also ensure consistency across the HGC Policy Allocations, as it reflects the wording set out within Policy H3 clause 4 in respect of the Green Loop.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

It is suggested that clarity is added to the policy wording by amendment to read:

*"**Contributions towards the**HGC Green Loop including Buncefield Lane, Westwick Row, Blackwater Lane, to Bunkers Park and adjacent to the site, Bunkers Lane and connections to the Green Loop."*

This amendment would also ensure consistency across the HGC Policy Allocations, as it reflects the wording set out within Policy H3 clause 4 in respect of the Green Loop.

**279 - Mr Akeem Iginla**

Submission Number: 279 Submission Date: 08/11/24 09:52

Respondent: Company/Organisation: Name: Mr Akeem Iginla

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I'm making representation on the St Albans Local Plan (Regulation 19 draft) September 2024 (referred to hereafter as 'the Regulation 19 Plan' of draft Plan').

These representations relate to Part B of the draft Plan and allocated Site H4 – East Hemel Hempstead (south) Broad Location which is proposed to be developed in accordance with Policies LG2 and LG3 to provide a major urban extension of Hemel Hempstead that delivers approximately 2,400 dwellings to 2041 and beyond.

Paragraph 35 of the new NPPF (December 2023) states that:

*"Local plans and spatial development strategies are examined to assess whether they have been prepared in accordance with legal and procedural requirements, and whether they are sound. Plans are 'sound' if they are:*

1. *a) Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*
2. *b) Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*
3. *c) Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*
4. *d) Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant".*

I wrote with specific concerns about the soundness of the evidence base associated with Policy H4 and the way some aspects of the Policy initiatives are considered to work.

Policy H4 indicates under point 5 points in relation to the Green Loop:

"*Delivery of the HGC Green Loop to provide a connection to Bunkers Park and the wider green loop route via Bunkers Lane",*

It is unclear from the submitted material whether the Green Loop will operate along Westwick Row or adjacent to it. No clear evidence is provided to show how it will work in relation to occupiers of properties in or close to this route. Clarification on the practicality of the Green Loop, it's operation and function are important for affected residents to accurately assess the implications for traffic control and associated use and operation the Green Loop route.

The control and management of traffic along Westwick Row is not addressed within the Policy text and should be highlighted. Westwick Row is a single-track country lane, already used as a rat run and with any comprehensive Masterplanning of the area traffic control and management measures along this road will be essential, not least to protect designated heritage assets along the route from additional traffic and associated impacts.

Point 19 of Policy H4 details that suitable (landscape) buffers should be maintained around the designated heritage assets in the area including [redacted]King Charles II Cottage as well as Westwick Cottage; Westwick Row Farmhouse and Dell Cottage. We support this objective but also highlight that impacts of noise and vibration effects upon these heritage assets close to the Westwick Row should be considered and addressed and suitably mitigated within any masterplanning or associated works.

Currently there is insufficient information being provided at clear understanding as to how the proposed green loop would work and how the appropriate landscape, traffic, noise and vibration buffers would be mitigated against within the context of the Policy and the wider design and masterplanning works anticipated. This needs to be amended and enhanced within the main Policy Text. Until amended I consider that Policy H4 in the Regulation 19 Plan as drafted, is unsound and contrary to the inherent provisions in the NPPF December 2023.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

*Refer to Attached submission letter for whole response and figures.*

*Refer to LG2 and LG3 for wider Hemel Garden Communities repsonses.*

...

**Hemel Garden Communities Trajectory**

11.5 Policy LG2 states that "*the Hemel Garden Communities programme will deliver at least 4,300 new homes by 2041 and 5,500 homes in total by 2050, delivering this through a network of new garden communities to the north east and east of the town within St Albans District".*

11.6 Paragraph 75 of the NPPF states that: *"Strategic policies should include a trajectory illustrating the expected rate of housing delivery over the plan period, and all plans should consider whether it is appropriate to set out the anticipated rate of development for specific sites".*

11.7 The Draft Local Plan fails to include a housing trajectory for specific sites (including those in the Hemel Garden Communities) so that consultees can comment on the potential timing of housing delivery and the need for supporting infrastructure that needs to be delivered in close coordination for each site. This makes it rather difficult to comment on any delivery assumptions for particular sites when the Council has not considered this even though it has selected the sites as allocations.

11.8 However, the Draft Local Plan does include a high level housing trajectory (Table 3.2) and we have analysed this due to a lack of more detailed information presented by SACDC.

11.9 Furthermore, we seriously question what the Housing Trajectory is not only for the HGC sites in St Albans District but for those in Dacorum – this is not set out in the Local Plan and is clearly a critical missing piece of information for the overall Local Plan.

11.10 As the Lichfields 'From Start to Finish' evidence (Editions 1 -3) and the Letwin Review (2018) highlight, the delays with the delivery of large development proposals should not be underestimated as there will be many aspects of the housing trajectory that are beyond the immediate control of a local planning authority. We provide an analysis of this below.

**Development Lead in Times**

11.11 The trajectory is particularly unrealistic in terms of when it assumes that housing delivery will commence at the Hemel Garden Communities. The first delivery year assumed is 2029/30 with 100 dwellings. This is in four years from now.

11.12 In the recently published *'Start to Finish – How quickly do large-scale housing sites deliver"* 3rd Edition, September 2024 (Lichfields) (see Appendix B of these representations) provides an update on important research on the delivery of strategic sites across England. Its findings are that for sites of 2,000 dwellings or more (like Hemel Garden Communities) that it takes between 4 and 7.9 years from the validation of the first planning application to the first dwelling being delivered (see Table below).

*Figure 11.3: 'Start to Finish – How quickly do large-scale housing sites deliver" 3rd Edition, September 2024 (Lichfields)*

11.13 The Report updates the previous report on the average time taken from gaining outline permission to the completion of the first dwelling on site (see below). This indicates that it takes on average around 3 to 4.6 years from the grant of outline planning permission to deliver the first dwelling. It concludes that at the time of its granting, an outline permission will deliver limited housing in a five-year period.

*Figure 11.4: 'Start to Finish – How quickly do large-scale housing sites deliver"* 3rd Edition, September 2024 (Lichfields)

11.14 As Policy LG2 (Support to Transformation of Hemel Hempstead) states all development in the HGC Programme Area must follow a planned and coordinated approach to growth and infrastructure and is expected to be in accordance with:

- *Local Plan Infrastructure Delivery Plans (IDPs)*
- *Hemel Garden Communities Spatial Vision*
- *HGC Framework Plan evidence base*
- *HGC Concept Plan*
- *HGC Local Plan Policies,*
- *Supporting SPDs and Design Codes.*

11.15 It requires that "Developers and promoters in the HGC Growth Areas must work together and closely with the Councils to secure a collaboration agreement which ensures an integrated and seamless approach across site boundaries. Critical infrastructure necessary to support development must be delivered ahead of occupation. Proposals must not prejudice or impede the provision of wider infrastructure required within the HGC Programme Area. Infrastructure, contributions and wider funding will be required to deliver on and offsite infrastructure, in accordance with the above documents."

11.16 Clearly the HGC is highly complex with many authorities and parties involved in the planning and delivery process. There is also rightly a commitment to working closely with the local communities as part of this process. All of this suggests that the Lichfields research is very much a 'best case scenario' in relation to the HGC Broad Locations.

11.17 **So, we ask, what is SACDC's assumption about each of the proposed four Broad Locations at Hemel Garden Communities (H1, H2, H3, H4) in terms of the following:**

- When will the Design Codes and SPDs will be prepared and approved?

- When will the pre-application process take place including consultation and engagement with relevant consultees and stakeholders?
- When will the preparatory site works, to be informed by site-specific survey recommendations and monitoring before commencement take place?
- When will an outline application be submitted and approved for each Broad Location?
- When will a full application will be submitted and approved?
- When will reserved matters applications be submitted and approved?
- There is reference in Policy LG3 (Hemel Garden Communities Growth Areas Place Principles) to the potential need to use Compulsory Purchase Orders (CPO) powers to ensure infrastructure is provided in a timely manner. What are the time estimates made for this in the housing trajectory?
- When will the S106 for each parcel is expected to be agreed?
- When will the pre-commencement conditions for each parcel be agreed by SACDC?
- What are SACDC's assumptions for the opening up works required for each of the sites and combined?
- What infrastructure is required to be funded and / or delivered prior to commencement for each of the broad locations?
- What is the planning approval process and timing for each piece of infrastructure?
- When will conditions be discharged?

11.18 SACDC needs to answer these questions so that a realistic housing trajectory can be prepared as the current version will lead to a shortfall in housing in the District over the first five years upon adoption. As a result, the borough will be subject to planning appeals due to a lack of a five-year housing land supply. With the Local Plan still yet to be submitted to the Secretary of State there is still an opportunity for SACDC to allocate additional housing sites to ensure that the shortfall of anticipated delivery is addressed.

*Figure 11.6: Timeline for the delivery of strategic housing sites – Start to Finish Lichfields (2024)*

11.19 The additional and important benefit of this approach is that the SPDs and planning applications at Hemel are not 'rushed through' in hopes that the development will meet unrealistic commencement dates.

11.20 The report concludes that for schemes of 2,000+ dwellings the mean years from validation of the first planning application to the first dwelling being completed is 6.6 years.

11.21 Therefore, considering this research, RPC is concerned with the proposed housing trajectory, as it would not be realistic to rely on the Hemel Garden Communities development (over 4,300 dwellings) would deliver its first homes in year 6 since the adoption of the Local Plan.

*Figure 11.5: Overall lead-in times for sites of 100 dwellings or more, including time taken for outline consent size by size. Source: Lichfields report 'Start to Finish' (2024).*

11.22 Hemel Garden Communities is clearly a cross-boundary joint working project between SACDC, Dacorum, Herts County Council and others. The South West Hertfordshire Joint Strategic Plan is being prepared with Dacorum, Hertsmere, Three River and Watford Councils and there is no agreed timetable for taking this forward (as set out earlier in our representations). This complexity and cross-boundary working is likely to slow the process down even further so the assumptions above should be considered a 'best case' scenario.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The trajectory is particularly unrealistic in terms of when it assumes that housing delivery will commence at the Hemel Garden Communities. The first delivery year assumed is 2029/30 with 100 dwellings.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

---

**292 - Leverstock Green Village Association**

Submission Number: 292 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Troy Hayes

On Behalf Of Company/Organisation: Leverstock Green Village Association Name: Leverstock Green Village Association

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

1. **Introduction**

1.1. Leverstock Green Village Association CIO (LGVA) is a registered Charity (Charity No.1172784) whose geographical area of benefit is the ecclesiastical parish of Leverstock Green, a substantial portion of which is on Crown Estate land within the area of St Albans City and District Council. Formed in 1974 the Charity is governed by a Board of Trustees including both democratically elected representatives and nominated representatives of village organisations. The Association's Constitution includes responsibility for the provision and maintenance of a Village Hall, the provision of educational, recreational and leisure time facilities, and the promotion of the benefits and the protection of the interests of village residents, including, inter alia, environmental matters. Arising from this latter responsibility, since there is no civil parish for the area, the LGVA undertakes most planning matters which would normally be carried out by a Parish Council. The Charity converted from an unincorporated association to a Charitable Incorporated Organisation in 2017.

1.2. Leverstock Green is an historic and characterful village on the eastern edge of the Hemel Hempstead urban area with open countryside to the east and south. There is documented and archaeological evidence that people lived and worked in the immediate area of Leverstock Green from the time of Roman occupation onwards. Recent research indicates that settlement along Westwick Row may well date back even further to the Iron Age and perhaps the Bronze Age.

1.3. In 1949, the Masterplan for the development of Hemel Hempstead New Town stated that 'Leverstock Green should, as far as possible, retain its village character'. Over the last 70 years the village has expanded with a number of housing developments to its present size of about 2,700 dwellings.

1.4. Today, Leverstock Green is a dynamic community which has retained its strong village identity, and the residents take great pride in maintaining the character of the village. The Leverstock Green Village Association runs a highly successful and well-appointed Village Hall. The Hall is used by over 40 village and community groups including a playgroup and a theatrical group. The LGVA produces a quarterly newsletter, which is delivered to all homes, and runs an annual summer fete and winter fayre as well as regular events in the Hall such as quizzes and concerts.

1.5. Holy Trinity Church located in the centre of the village is a warm, vibrant and well attended church which is at the centre of village life, and the well-regarded village C of E primary school is rated 'Good' by OFSTED. There is a co-located Day Nursery and Preschool.

1.6. The village centre has a parade of quality shops and a Post Office which are well patronised by the community. A community library is located adjacent to the Hall. The

LGVA arranges for a display of Christmas lights which is sponsored by local businesses.

1.7. Leverstock Green has a number of successful and well supported sports clubs. The Football Club was founded in 1895. The Cricket Club adjacent to the village green was founded in 1908 and the Tennis Club in 1961. All three have thriving club houses. The village has three public houses/restaurants including the historic 'Olde Leather Bottle'. The village has a Scout Group with its own premises and two Women's Institutes.

1.8. The proposal to build 2,400 dwellings would almost double the size of Leverstock Green and would subsume the village in an expansion of the Hemel Hempstead urban area. Consequently, the village character of Leverstock Green would be lost.

1.9. The community is concerned that St Albans CDC is dismissive of the village character of Leverstock Green and the impact that such a large expansion would have on the village.

1.10. LGVA submits the following representations to the Regulation 19 Local Plannconsultation.

1.11. **LGVA has reviewed the representations prepared by Redbourn Parish Council (RPC) and we endorse these representations as most of the points in RPC makes also apply to Leverstock Green.**

1.12. For the purposes of clarification, it is the Association's considered view that the Local Plan is unsound, and the Council has failed to discharge its Duty to Cooperate. The proposed scale and distribution of growth has not been justified, it has not been positively prepared, and the policies are ineffective. LGVA considers that the delivery of growth at the Hemel Garden Communities has not been demonstrated through technical evidence including the Council's Green Belt Review, Infrastructure Delivery Plan (IDP), Viability evidence and Transport evidence.

## 2. Consultation

2.1. LGVA is concerned Leverstock Green was not included in the exhibition programme for the new Local Plan. An exhibition was subsequently added after intervention by our local DBC councillors. The event was extremely useful and was well attended by village residents.

2.2. We are grateful to the St Albans City and District Council (SADC), Dacorum Borough Council (DBC) and Hemel Garden Communities (HGC) staff for their hard work in setting up and manning the exhibition. The high level of interest shown by local residents indicated there is a great deal of concern and in some cases anger over SADC proposals to build large numbers of dwellings adjacent to Leverstock Green. This concern must not be ignored, and it is vital Leverstock Green residents are kept involved in SADC's proposals.

## 3. Duty to Cooperate

3.1. Despite SACDC's attempt to evidence that it has discharged the duty in its Statement of Common Ground (Overarching) (Autumn 2024), there is lack of substantive and up to date evidence that 'active', 'ongoing' and 'constructive' cooperation took place from the start of the preparation of the Local Plan. If further evidence of cooperation were to be submitted by SACDC in the lead up to, or after submission of the Local Plan then this would clearly demonstrate that the Local Plan and its policies were not informed by this engagement – which is, after all, the entire reason for the Duty to Cooperate as explained in the NPPF: *"effective and on-going joint working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy"*[1]. ([1] NPPF paragraph 26)

3.2. The SOCG only establishes as common ground with SACDC's strategic partners: the strategic geography and what comprises the strategic cross-boundary matters. Unfortunately, **the SOCG does not contain any substance on what constitutes the material cooperation between parties on the agreed strategic matters**.

3.3. Furthermore, we would like to highlight the fact that whilst the housing provision proposed at Hemel East will count towards SACDC's housing requirements, services and infrastructure will be provided DBC within the exiting town of Hemel Hempstead. Therefore, the taxes generated at Hemel East will go to SACDC rather than to DBC. It is our understanding that Hemel East landowners have approach the Boundary Commission about this matter suggesting that the boundary should be redrawn so that the new growth at Hemel East falls within DBC. This would clearly have significant implications for the housing land available for both Councils.

## 4. Sustainability Appraisal

4.1. We have a number of points regarding the Sustainability Appraisal (SA) which are in line with those made by Redbourn Parish Council. The SA is clearly These are summarised below:

- Without a clear understanding about what infrastructure will be delivered, its cost and how it will be funded for the largest growth area of the Local Plan at HGC, how can the SA prepare reasonable alternatives and draw meaningful conclusions to inform decisions in the Local Plan.

- By assuming that the HGC is going to be delivered under all 'reasonable alternatives' in the SA, the Plan is placing the entirety of its strategy and plan on the delivery of the HGC. If the Local Plan is found unsound and / or the HGC does not deliver as SACDC predicts (which is very likely) then SACDC and its communities will find itself in the very position it is seeking to avoid – that of unable to defend itself against planning applications due to a lack of housing supply.
- Particularly important for Leverstock Green the SA concludes at Paragraph 5.4.25 that the scale and extent of growth should really be reduced at the southern extent of the allocation, yet they fear the risk of delaying the plan-making timetable. This is clearer a case of SACDC ignoring its own technical evidence in favour of seeking to pursue a quicker plan-making timetable even if this means the Plan will not be found sound.

*"There is feasibly the possibility of reducing the scale/extent of growth somewhat at the southern extent of the area and possibly also at the northeast extent (less clear/significant), but there is no clear case for doing so, and even fairly modest adjustments could lead to a risk of delay to the plan-making timetable"*

- As we set out in our response to Policy LG2 below there are serious concerns regarding the existing air and noise pollution in the area including east of Hemel. The Sustainability Appraisal is very dismissive of this serious threat to human health and what the potential impact is of proposing development closer to the main source of the air and noise pollution – the M1. The SA states the following about this topic which demonstrates that the SA and the Local Plan has not really taken this key matter into consideration writing it off saying that air quality concerns are decreasing over time and focusing on the modal shift assumptions in the transport evidence.
- *"Hemel Garden Communities – there are two AQMAs at Hemel Hempstead, but these are relatively distant from HGC (associated with north-south road corridors close to the western edge of the town). HGC is considered to be associated with a considerable opportunity in respect of masterplanning in support of trip internalisation and modal shift away from the private car (albeit this remains a focus of ongoing work), plus the A414 strategy / HERT represents a considerable opportunity to address air quality hotspots across the sub-region (for example, Hertford is constrained). However, benefits would be felt in the long term, and air quality concerns are decreasing nationally over time (albeit concerns will remain, particularly in respect of particulates from roads, brakes and tiers given the weight of EVs)."*(Paragraph 9.3.2)
- *"In conclusion, a broadly neutral effect is predicted on the baseline, as per the conclusion in 2023. There is little reason to suggest that the proposed growth strategy will conflict with air quality objectives, particularly noting the location of AQMAs within the District and in surrounding areas. HGC is supported, but there is inherently an element of uncertainty and risk around achieving the high levels of modal shift (away from use of the private car) that are being assumed for the purposes of traffic modelling*." (Paragraph 9.3.4)

5. **Overall Timing and Housing Needs**

5.1. LGVA is concerned that the Regulation 19 Local Plan has been prepared in haste in order to avoid higher housing need / requirements through the proposed NPPF consultation.

5.2. We question whether SACDC has used the South West Hertfordshire Local Housing Needs Assessment (September 2020) to arrive at its housing need figure? This study was undertaken four years ago (2020) which is a considerable time ago and should be considered by SACDC to be an out-of-date evidence base document. Policy HOU2 (Affordable Housing) refers to a Local Housing Needs Assessment (LHNA) dated 2019 however this does not appear in the Draft Local Plan Evidence Base on SACDC's website

5.3. As we set out in our representations the Local Plan and particularly the Hemel Garden Communities allocations are not backed by sufficient or sound evidence to justify their inclusion in the Plan. Given that HGC is by far the most strategic development in the Local Plan and requires a very significant proposed release of Green Belt, the Local Plan should not be rushed through the way it has. This will only lead to the Local Plan either the Plan being at Examination for an extended period of time due to it requiring quite fundamental modifications to make it sound or it will be found unsound with no potential for its fundamental flaws to be modified leading to its withdrawal and SACDC will need to go back to the start of the process once again.

## 5. Exceptional Circumstances and Green Belt

6.1. Leverstock Green is defined by its semi-rural environment with Green Belt to the east, south and southwest of the built-up area. These areas are prime agricultural land which creates a green buffer around Leverstock Green and which needs to be protected wherever possible. The loss locally of such a significant amount of prime agricultural land is considered foolhardy in the current climate.

6.2. The Draft Local Plan (both Reg. 18 and Reg. 19 versions) fail to state what 'exceptional circumstances' there are for proposing the Draft Local Plan sites in the Green Belt.

6.3. The Green Belt Exceptional Circumstances Evidence Paper gives no evidence of discussions between SACDC and neighbouring authorities regarding meeting development need. It does not include demonstrated evidence of making as much use of brownfield and underutilised land, and there is a lack of demonstration of density optimisation. LGVA contests that the Council has demonstrated examining fully all reasonable options for meeting its identified need for development before concluding that exceptional circumstances exist to justify changes to Green Belt boundaries.

6.4. The site was considered as part of the 2014 Green Belt Review which looked at this area in the assessment of Site S2. Figure 1 shows the entirety of the site and highlights Site 2b in yellow as an area recommended as potentially suitable for release.

6.5. This area of the site infills development from the built-up boundary of the adjacent urban area up to the M1. The remainder of Policy S6 iii site 'East Hemel Hempstead (South)' is not recommended for Green Belt release in the Green Belt Review, as a result of the area being constrained by having an open landscape character which would make development visually prominent from both a local level but also from some mid-range views from land to the east of the M1 motorway. The study instead recommends that landscape features, planting and hedgerows should be retained in this area, in order to 'reduce the visibility of any future development from the key transport corridor and wider countryside' (para 4.6.10, Green Belt Review, 2014).

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 1***

*Figure 1: The yellow area indicates the area of East Hemel Hempstead (South) considered appropriate for Green Belt release with the rest of the site retained as recommended by the Green Belt Review (2014)*

6.6. The Green Belt Review Methodology (Section 4) includes an assessment of settlement area buffer zones. We suspect strongly the Green Belt Review was influenced by SADC to suit the purposes of the draft Plan. Despite Hemel Hempstead qualifying as a 'highest order settlement' with 400m buffer zones, the review uses the presence of the M1 to conveniently justify the removal of the buffer zones from the whole of the East Hemel area. If the buffer zones had stayed in place, the number of dwellings which could accommodated in East Hemel would be reduced considerably. This would also significantly reduce the HGC ambition to build 11,000 homes. We consider the 400m buffer zone should be applied to the whole of the Site H4 East Hemel (South) (Green Belt Review Sub-Area SA165).

6.7. The 2023 Part 2 Green Belt Review determines that the southern parcels (SA-162, 164 and 165) that all of the parcels perform 'strongly' against the NPPF purposes.

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 2***

*Figure 2: Part 2 Green Belt Review (2023) Figure 5.12 Overall performance against NPPF purposes – South*

6.8. The Part 2 Green Belt Review ultimately concludes the majority of the parcels are not considered any further.

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 3***

*Figure 3: Part 2 Green Belt Review (2023) Figure 5.18 Recommendations - South*

6.9. It is therefore perplexing to then see the Local Plan's allocation proposal to allocate (H4 – see below) the entirety of SA-164 and SA-165 and release the whole of the Green Belt within these parcels apart from the very southern tip

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 4***

*Figure 4: Local Plan Part B H4 - East Hemel Hempstead (South), HP2 4PA*

6.10. Therefore, exceptional circumstances have not been set out or justified by SCDC and its own Green Belt evidence since 2014 does not support the allocation of the East Hemel South yet SACDC has proposed it for allocation and Green Belt release in any case despite there being a lack of justification to do so.

6.11. **Green Belt Policy LG5:** We question part b) of this policy. It seems to be attempting to open the door for 'New state schools' in the Green Belt and we do not see where this is supported in the NPPF. It also includes "The creation of new transport infrastructure" in the Green Belt yet the wording in the NPPF is in relation to "local transport infrastructure which can demonstrate a requirement for a Green Belt location" and is only 'not inappropriate' in the Green Belt provided that it preserves its openness and does not conflict with the purposes of including land within it. **Policy LG5 is not consistent with national planning policy for the reasons explained above, therefore it is not a sound policy**.

7. **Policy SP1 (A Spatial Strategy for St Albans District)**
   **Policy LG2 (Support for Transformation of Hemel Hempstead) Site Allocation H4 (East Hemel Hempstead (South)**
   **Policy LG3 (Hemel Garden Communities Growth Areas Place Principles)**
   **Policy HOU6 (Gypsies, Travellers and Travelling Showpeople) Policy TRA2 (Major Transport Schemes)**

7.1. LGVA recognises some additional housing is required and supports modest and proportionate development. However, we object strongly to the sheer scale of the SADC proposals which would envelope and overwhelm Leverstock Green. Despite being part of the Hemel Hempstead urban area since the construction of the new town from the 1940s, Leverstock Green retains a distinct and proud village character and a strong sense of community. Under the proposals, Leverstock Green would nearly double in size and would lose much of the surrounding Green Belt which defines its identity. The character of the village would be changed out of all proportion, and the necessary infrastructure requirements would be unsustainable in a village environment.

**Hemel Garden Communities**

7.2. We recognise the vision of HGC, but we are concerned there is no comprehensive infrastructure and transport plan to support the proposals. We also have misgivings that such a large-scale project involving two local authorities and multiple other agencies over such a protracted period is deliverable.

7.3. We appreciate the planning is at an early stage, but the task of coordinating all aspects of the HGC will be a major challenge. The timely delivery of infrastructure and particularly roads will be essential.

**Scale of Housing**

7.4. The plan envisages 2,400 dwellings in the East Hemel South area adjacent to Leverstock Green. This represents 18% of SADC's total requirement. The proposed allocation extends from J8 of the M1 to the point where the A414 and A4147 cross the M1. We believe this area of 142 hectares is inadequate to accommodate over 2,000 dwellings at an acceptable level of density. Moreover, as already explained, the Green Belt Reviews recommends that only the smaller area adjacent to Junction 8 of the M1 should be considered for possible release. This equates to a gross housing density of 17 dwellings per hectare (dph) which does not even factor in the southern tip of the site which is within the allocation site yet is proposed to be retained as Green Belt. We have done a rough calculation of the amount of Green Belt appears to be retained at the southern tip of the allocation which is approximately 15.3 hectares. The potential developable area of the allocation is reduced from 142 hectares to 126.7 hectares as a result. The gross housing density is then increased to 19 dph.

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 5***

*Figure 5: Measurement of Green Belt retained in Allocation H4 - East Hemel Hempstead (South). Source: Google Maps*

7.5. As already set out in relation to the Sustainability Appraisal the matter of noise and air quality have not been properly assessed as part of the plan making process. The above gross housing density calculations do not take account of the other parts of the site that will need to be 'netted off 'due to other constraints with a key constraint being the M1 which clearly has an air and noise pollution factor that requires considerable mitigation. We have reviewed Defra's 2019 Road Traffic Noise Levels mapping to see what this means for the Local Plan Area given the heavy traffic and congestion in the area including the presence of the M1.

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 6***

*Figure 6: Defra (2019) Road Traffic Noise Levels Lden (day-evening-night) 24 hour annual average noise level in decibels with weightings applied for the evening and night periods Accessed:* http://www.extrium.co.uk/noiseviewer.html

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 7***

*Figure 7: Defra (2019) Road Traffic Noise Levels Lden (day-evening-night) 24 hour annual average noise level in decibels with weightings applied for the evening and night periods. Source:* http://www.extrium.co.uk/noiseviewer.html

7.6. As one can clearly see from the above mapping the noise levels east of Hemel do not appear to be safe and high density housing and employment in the area is going to further exacerbate this issue. It is very difficult to see how mitigation measures could greatly impact the noise and air pollution from the M1. In any case this area appears to be an unsafe and unsuitable location to allocate strategic housing that is meant to be 'sustainable' when its future residents will be exposed to unhealthy levels of pollution.

7.7. As a consequence of these strategic issues alone, as outlined above, the number of residential units in the H4 area should be drastically reduced, probably to less than 1,000 dwellings.

7.8. The Local Plan Part B Allocation for site H4 includes a number of development requirements which we list below. We seriously question how all of these requirements can fit onto a site when its strategic constraints are considered. We list a number of these requirements below:

- SANG Requirements
- BNG Requirements (aims to exceed 10% minimum target)
- High quality design and buffer zones to mitigate adverse impacts from motorway noise and air pollution and address the Buncefield oil depot and pipelines

- There is a major surface water flow path across the centre of the broad location, and three associated smaller flow paths
- Three extra-care facilities comprising of 70-80 self-contained units in each facility, two 70-80 bed nursing homes and 9 supported living units for people with disabilities.
- One new 3FE and one new 2FE primary schools
- 15-20 pitches for Gypsy and Travellers using best practice on location and design
- Land will be safeguarded for access improvements associated with Junction 8 of the M1 motorway, in case it is required to come forward for junction improvements
- The layout and design of development should minimise any harm to the setting and significance of listed buildings
- Recreation space and other community facilities
- Take appropriate account of these Environmental Constraints: Source Protection Zone (SPZ) 1; Bedrock Aquifer.

7.9. Whilst one could suggest that it will 'all be solved' in the masterplanning work, this is setting the Local Plan up for failure and the delivery of 'over development' on previous Green Belt land.

7.10. Furthermore, LGVA has serious doubts about the sound planning of infrastructure of HGC in terms of SACDC and on cross boundary infrastructure with neighbouring authorities. The Infrastructure Delivery Plan, Housing Trajectory and Viability Evidence provide us with no confidence that there is a coherent and sound plan for the coordination and delivery of the infrastructure to deliver the HGC and the quality of place-making set out in Policy LG3 (Hemel Garden Communities Growth Area Place Principles).

7.11. **LGVA has reviewed the representations prepared by Redbourn Parish Council (RPC) and we endorse these representations as most of the points which RPC make also apply to Leverstock Green.**

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

For the purposes of clarification, it is the Association's considered view that the Local Plan is unsound, and the Council has failed to discharge its Duty to Cooperate.

The proposed scale and distribution of growth has not been justified, it has not been positively prepared, and the policies are ineffective. LGVA considers that the delivery of growth at the Hemel Garden Communities has not been demonstrated through technical evidence including the Council's Green Belt Review, Infrastructure Delivery Plan (IDP), Viability evidence and Transport evidence.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Reg 19 Leverstock Green Village Association vf_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Leverstock Green Village Association (LGVA) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Hemel Hempstead LGVA considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**311 - BP Oil UK Ltd**

Submission Number: 311 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: BP Oil UK Ltd Name:

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The draft allocation of primary interest to bp is H3, which includes the currently agricultural land located between Punchbowl Lane to the north, the M1 to the east, the A414 to the south and Green Lane (and the boundary of the site) to its west. This is because the allocation is immediately adjacent to the subject site. It is noted H3 proposes around 6,000 new jobs (point 21).

Whilst the majority of the development in allocations to H1-H4 inclusive is anticipated by the draft plan to be delivered by 2041, the draft Local Plan horizon, it identifies that some delivery is likely to
take place post-2041.

**Impacts on bp's operations**
It should be noted that bp does not object to the principle of major housing and employment designations. However, the effect of the allocations, if built out, will result in significantly greater levels of residents, works and visitors in closer proximity to the subject site.

This is the case both in the construction phase as the development and associated infrastructure works are built out, and once the allocated developments are operational. The health, safety and security of bp's workforce and the communities in which they operate is of critical importance to the business.

The draft Local Plan allocations H1-H4 inclusive may:
• increase the number of people in close proximity to a COMAH regulated site, particularly with development proposed for agricultural land to the east of the site
• limit bp's ability for any potential future expansion in relation to the site such as new fuel storage tanks and equipment
• potentially compromise the long-term viability of bp's operations from its Hemel Terminal site

bp do not object to the principles of the allocations relating to the HGC, however, we seek to highlight to SADC issues that need to be carefully considered as the draft plan progresses.

bp request that the importance of its Hemel Terminal is recognised and that draft site allocations H1-H4 are amended as required to ensure the continued safe and viable operation of its facility, both now and in the future.

We welcome a collaborative approach on the drafting of the policy wording with SADC officers/Members in order to achieve this objective.

We assume the views of the Health and Safety Executive (HSE) and the Environment Agency have been sought on the allocations - in particular given the subject site is regulated under the Control of Major Accident Hazards (COMAH) Regulations 2015 - and will be fully considered as the draft Local Plan moves forward. We also urge you to consider the views of the downstream oil team (energy security) at the Department for Energy Security and Net Zero.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**323 - Diana Ngobi**

Submission Number: 323 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: National Highways Name: Diana Ngobi

Comment Number: 6

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Hemel Garden Communities (HGC) Programme is a proposal to transform Hemel Hempstead through the regeneration of the existing town and delivery of new housing and infrastructure in St Albans City & District Council and Dacorum Borough Council areas. Within St Albans District, the HGC Growth Areas will deliver at least 4,300 new homes by 2041, with a further 1,200 homes by 2050, providing a total of 5,500 new homes. Further housing growth within the area north and east of Hemel Hempstead, Two Waters and Hemel Hempstead Town will be set out in Dacorum's Local Plan. We note that this has the potential to put pressures and traffic impacts on the SRN and its junctions.

We would also seek to understand if/how the Council plans to have an overarching monitor and manage policy which addresses the cumulative traffic impacts of this growth area and the collective impact on the SRN.

The HGC Transport Vision and Strategy document (TV&S) sets out a sustainable movement network approach for the long-term growth and transformation of Hemel Hempstead and wider routes. The approach ensures the HGC programme area can be developed as a successful, integrated, well-connected place. The site has ambitions to achieve a town-wide sustainable transport network with a target of 60% of all journeys starting, ending or within the HGC growth areas and 40% of all journeys starting, ending or within the existing town of Hemel Hempstead, to be undertaken by active and sustainable modes by 2050.

We support the local authority's proposals that considers sustainable transport measures, which manage down demand and reduce the need to travel. We are open to discussions surrounding the district's plan to safeguard land, design, fund, deliver and monitor a package of transport measures to enhance M1 Junction 8 (M1 J8) and surrounding area, in association with Hemel Garden Communities (HGC).

Physical highway improvements for the SRN should only be considered as a last resort. We note that there cannot be any presumption that such infrastructure will be funded through any future RIS (Road Investment Strategy). We strongly recommend that there is no reliance placed on RIS funding to realise capacity for growth in the Plan within the plan period.

Housing and Employment Allocations:

We note that the housing requirement over the plan period is 10,808 across 98 sites in the St Albans area. H2 - East Hemel Hempstead (North) site directly borders the M1 and will provide 1,600 residential units (indicative) in total (1,235 in plan period). The site is to the east of Hemel Hempstead, between the B487 to the north, the M1 to the east and Punchbowl Lane to the south. The site is adjacent to Hemel Hempstead and forms part of the wider Hemel Garden Communities programme.

The site aims to improve and enhance countryside access links including connections under the M1 motorway. These links will require close collaboration with both National Highways and our service partner when an application comes forwards.

Site H3 and H4 East Hemel Hempstead (Central and South) also form part of the Hemel Garden Communities programme and similarly borders the M1. The proposals include mention of land to the east of Junction 8, which will be safeguarded for access improvements associated with Junction 8 of the M1 motorway, in case it is required to come forward for junction improvements.

Site H3 is also classified as Employment Led Mixed Use (Enterprise Zone), approximately 17 hectares of the site will promote high density, higher skilled employment uses to deliver a Business, Research and Development Park and explore opportunities for education. National Highways will be interested in understanding how traffic impacts will be reduced and mitigated as work on this site progresses due to the proximity of the SRN.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

### 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 20

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraph 35 and 36 of the 2023 NPPF require that local plans be positively prepared to be considered sound. To do so its policies must set out a strategy to meet the assessed needs of the area.
HCC has a statutory duty to secure sufficient early years provision under the Childcare Acts 2006 and 2016. This includes, but is not limited to, provision within day nurseries for 0-2 year olds, school nursery classes for 3-4 year olds, and school wraparound care for 5-11 year olds. HCC must therefore ensure sufficiency for all three early years cohorts that tend to receive care in different types of settings.
The 2023 Spring Budget increased parents' access to entitlement for early years support for all children under 3 by September 2025 and sets an expectation that all parents should be able to expect wraparound care by September 2026. This means that the plan needs to make sufficient provision for all of these early years

cohorts (0-2, 3-4, and 5-11), with 0-2 being a particular area of need as these are often provided in private day nurseries rather than school settings.
The Regulation 19 draft plan includes childcare facilities within the list of land uses within some broad locations within the supporting text at Part A table 3.1. This follows engagement with HCC at Regulation 18 stage and is welcome. However, policy in Part B does not require that these be provided within the corresponding allocations themselves. While policy wording in Part B does include reference to early years provision within new primary schools for those sites that are delivering new primary schools, these only tend to provide care to 3-4 and 5-11 year olds and not 0-2 year olds. Therefore HCC does not have certainty that the strategy for sufficient early years for 0-2 year olds will be delivered.
Policy COM1 gives policy support to proposals delivering childcare for 0-2 year olds and nursery for 3-4 year olds. This is strongly welcomed. However this is not the only childcare cohort. As part of its statutory sufficiency duty HCC must also ensure sufficient wraparound care for 5-11 year olds. Similarly, policy strategic policy SP7 gives policy support to proposals including nursery provision, which could be taken that only proposals for provision for 3-4 year olds should be given policy weight (as this can refer only this is cohort in some contexts). Again while policy support is welcome, it should ensure that policy support is given to the full range of settings for different age groups.
To be considered positively prepared and therefore sound the local plan should therefore set out a strategy for childcare provision in the allocations in Part B and clarify policy support for all childcare cohorts in the policies at Part A. This representation suggests a modification that if agreed, or similar, would make the plan sound.

Paragraph 35 and 36 of the 2023 NPPF require that local plans be positively prepared to be considered sound. To do so they must set out a strategy to meet the area's objectively assessed needs.

Policy HOU3 sets out the LPA's policies in respect of specialist accommodation. This only provides policies for determining applications for older person's accommodation. It does not provide policies for determining applications for children's homes. Similarly, the allocations set out in Part B of the plan make no provision for the needs of the section of the community reliant on this form of housing. Children's homes are smaller units, usually indistinguishable in form from a standard residential dwelling, that provide accommodation for 1-5 children in care. They are a vital part of the care system in Hertfordshire, alongside fostering, adoption, and other more specialist forms of accommodation. Under the Children's

Act 1989 Hertfordshire County Council (HCC) has a statutory duty to provide accommodation to children in care. The 2024 draft consultation National Planning Policy Framework at paragraph 63 also makes clear that local plans should make provision for this group and at footnote 29 makes clear that the local authority's sufficiency data should be considered suitable evidence of need. While it is expected that this local plan will be examined under the 2023 NPPF, this and HCC's statutory duties taken together mean the local plan ought to make
provision for this cohort.
Since the Regulation 18 consultation HCC is seeking for local plans to address this shortfall. There is currently a shortfall of children's home bed places in Hertfordshire for children in care. The 2024 South West Hertfordshire Housing Needs Assessment at paragraphs 10.83-10.88 shows that there is a need for 19¬39 beds at children's homes. Hertfordshire County Council only has access to 15 beds in St Albans. Countywide sufficiency data shows that it cannot accommodate all its children in care within its boundaries. It currently accommodates 89 children in care within other authorities in England, which is less desirable for children in care and expensive to commission, has a further 70 children or young people on the 'waiting placement' list, and an average of 4-5 new requests each day.
To be considered positively prepared and therefore sound the local plan should therefore make suitable provision for this section of the community within St Albans. This representation suggests modifications that if agreed, or similar, would make the plan sound.

To be considered sound the plan must be effective and therefore have a reasonable prospect of delivery.
The site allocations at Part B correctly requires proposals for development to include land and s106 contributions towards the delivery of several primary and secondary schools. This is necessary to satisfy the requirement of NPPF paragraph 99 and HCC strongly appreciates the support that the LPA have placed on sufficient education provision.
HCC's Guide to Developer Infrastructure Contributions and its technical appendices sets out how land and contributions need to be made to ensure that schools are deliverable. Proposals for sites providing schools need to make serviced land available to the County Council (at education values) and make a proportionate s106 contribution towards delivery in accordance with the CIL

regulations. Other sites will make a proportionate s106 contribution. These will be pooled to deliver schools when they are required to meet a cumulative need.
Policy in the Part B site allocations includes delivery of the following (or a similar form of words depending on the allocation):
A 3FE primary school, including Early Years provision, to serve the new community.
Or, in relation to secondary schools:
A site for, and appropriate contributions towards, an 8FE secondary school site within nearby Oaklands land ownership fronting onto Hatfield Road.
These examples' policy wording implicitly limits the deliverability of the schools:
1. It sets a hard target of the capacity of the school, which would limit the schools' ability to open in phases, which is necessary to align supply of places to demand as it builds up over time;
2. It implies in some allocations that schools sought to be developer-built, which is not the County Council's preferred method of school delivery; and

3. In some allocations policy seeks to allocate contributions towards secondary schools for which the land will not be delivered through a s106 process and will instead be delivered as an acquisition later in or following the plan period to meet a cumulative need. Tying the s106 contribution to these secondary schools therefore risks the delivery of other projects needed earlier in the plan period. The County Council also has a responsibility to ensure sufficient post-16 education, and in Hertfordshire these are usually provided at secondary school 6th forms. The County Council's strategy for post-16 education therefore includes the delivery of 6th forms at new secondary schools and secondary school expansions. For completeness, policy should also refer to 6th form provision as this has a similar relationship to new secondary education provision as early years does to new primary education provision, and the exclusion could therefore inadvertently give the impression that one does not have policy support.
HCC also supports the principle of the plan's support for secondary education in principle. However, since the publication of the Regulation 18 plan, the strategy for East St Albans has changed and the site is now only expected to deliver a 6FE school.
Therefore to be deliverable and therefore considered sound the plan should clarify the maximum capacity of schools, that schools in the first instance should not be developer-built, and that s106 contributions for individual sites should not be tied to school sites that are needed to meet a long term cumulative need. The local plan should also ensure that post-16 education has full support within new secondary schools.

Paragraph 35 and 36 of the 2023 NPPF require that local plans be justified to be considered sound. To do so its policies must be an appropriate strategy for the outcomes that they intend to secure. Policy HOU3 includes policies against which applications for specialist housing for older people will be determined. Paragraph (c) states that 'In larger sites, it may be appropriate to co-locate specialist housing provision and develop an Integrated Community'. The Associated Retirement Community Operators, the professional body representing housing with care providers, defines Integrated Retirement Communities as a gold standard of housing with care, not as colocation of different types of specialist housing provision, such as housing with care and nursing homes. While HCC has no in-principle opposition to colocation it is not clear that this is indeed what the policy is intended to achieve.

There may be benefits to co-locating housing with care schemes (as opposed to other forms of specialist accommodation for older people) only on sites delivering a larger quantum of this form of specialist older person's accommodation. This may allow them to benefit from improved economies of scale and deliver improved communal facilities and services that smaller scheme would not be able to support themselves. Policy wording within the allocations at Part B, however, refers to delivery of discrete housing with care facilities of 70-80 units. This implies a requirement for separation. This is entirely appropriate for care homes, but there is no in principle reason why housing with care schemes cannot be co-located into a single larger scheme.
Therefore to deliver an appropriate strategy there needs to be clarity as to what the policy wording at HOU3 (c) is intended to achieve, and if there is no other rationale, the plan should clarify that HOU c and the allocations at Part B to permit multiple housing with care schemes to co-locate with each other rather than with other types of specialist accommodation for older people.

The county council recommends the below changes to policy as respects Hemel Garden Communities:
Part A LG2: The cost apportionment sentence (No.5, Page 26) in Strategy Policy HGC1 – Transformation of Hemel Hempstead of the DBC Local Plan to 2041 Pre-Submission Version for Approval is not in the corresponding SADC policy. For consistency, we suggest it is added into the SADC Policy LG2:
The methodology for infrastructure apportionment and cost sharing is set out in the Local Plans Infrastructure Delivery Plans (IDPs). Infrastructure, contributions and wider funding will be required to deliver on and off-site infrastructure, in accordance with the above documents.

Part B LG3: Suggest amending the text as at present working assumptions are that the Household Waste Recycling centre is to come forward separately from the district council provision.
Delivery of Key Projects including a Household Waste, a Recycling Centre, and Local Authorities Depot facilities to meet the needs of new and existing communities
Part B H1, H2, H3, H4: Suggest adding in the following text into each policy to ensure key transport schemes are included:
The provision of essential transport infrastructure, the detail of which will be identified through the HGC IDP, including mitigating the impact of traffic associated with the development; appropriate consideration of M1 Junction 8 improvements and access arrangements for wider Hemel Hempstead, the provision of appropriate financial contributions towards A414 bridge and wider highways network improvements and access arrangement for HGC and wider Hemel Hempstead, provision of appropriate public transport (services and infrastructure) serving the site; and provision of a comprehensive network for pedestrians and cyclists with good connectivity provided to adjoining areas, including a particular emphasis on improving linkages to Hemel Hempstead Station as a transport interchange

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Policy in allocations H1 and H2 should each include:
A childcare setting capable of providing 30 places including 0-2 year olds.
Policy in allocations H4 should each include:
A childcare setting capable of providing 50 places including 0-2 year olds.

In Part B allocations H1, H2, H4, B2, B4, B5, B6, B7 should include the following wording: A children's home to accommodate three children in care and one manager.

H1: A 3FE primary school site and contributions, including Early Years provision, to serve the new community and appropriate contributions towards secondary school provision, including post-16 education.
H2: A 3FE primary school site and contributions, including Early Years provision, to serve the new community.
An 8FE secondary school site and contributions to serve the new and existing communities, including post-16 education.
H4: One new 3FE and one new 2FE primary school site and contributions, including Early Years provision, to serve the new community, and appropriate contributions towards secondary school provision, including post-16 education.

H1: The 1,500 dwelling figure above includes [deleted text] 140-160 self-contained housing with care units [deleted text], one 70- 80 bed nursing home and 6 supported living units for people with disabilities
H2: The 1,600 dwelling figure above includes [deleted text] 140-160 self-contained housing with care units [deleted text], one 70- 80 bed nursing home and 6 supported living units for people with disabilities
H4: The 2,400 dwelling figure above includes[deleted text]210-240 self-contained housing with care units [deleted text], two 70- 80 bed nursing home and 9 supported living units for people with disabilities

Part B H1, H2, H3, H4: Suggest adding in the following text into each policy to ensure key transport schemes are included:
The provision of essential transport infrastructure, the detail of which will be identified through the HGC IDP, including mitigating the impact of traffic associated with the development; appropriate consideration of M1 Junction 8 improvements and access arrangements for wider Hemel Hempstead, the provision of appropriate financial contributions towards A414 bridge and wider highways network improvements and access arrangement for HGC and wider Hemel Hempstead, provision of appropriate public transport (services and infrastructure) serving the site; and provision of a comprehensive network for
pedestrians and cyclists with good connectivity provided to adjoining areas, including a particular emphasis on improving linkages to Hemel Hempstead Station as a transport interchange

SITE ALLOCATIONS H1, H2, H3 & H4

Thank you for the opportunity to submit representations to the SADC Draft Local Plan Regulation 19.

This letter constitutes a joint response on behalf of the above land interests within the SADC portion of the Hemel Garden Communities (HGC) Growth Area, specifically the site allocations H1 – North Hemel Hempstead, H2 – East Hemel Hempstead (North), H3 – East Hemel Hempstead (Central), and H4 East Hemel Hempstead (South). These allocations are proposed to together deliver around 5,500 dwellings – half of the required homes in the designated Growth Area - and land for up to 6000 jobs.

In recognition of the significance of these allocations, in the period since the Local Plan Regulation 18 consultation the landowners have continued to work positively with HGC partners in progressing the ambitious transformation proposals, particularly in relation to furthering the understanding of the infrastructure and mitigation necessary at local plan stage to support the draft allocations and soundness of local plan policy.

While this understanding will continue to be developed and tested through the final stages of the Local Plan including at Examination and through SPD preparation (and in due course, realised through future Outline Planning Applications when detailed mitigation will be secured), we believe that the Local Plan has been informed by a strong evidence base, focused on matters relevant to growth at this scale and to a level of detail proportionate to local plan considerations.

This has resulted in a clear and robust policy framework. As such we can support the Local Plan and consider the overall principles, requirements and proportionality set out in its policies to be generally effective, insofar as they relate to these allocations.

LOCAL PLAN PART B – SITE ALLOCATIONS

We are supportive of the amendments made in Part B of the Local Plan relating to site allocations H1, H2, H3 and H4, recognising that they have been informed by the HGC evidence base, including the Framework Plan.

We are also supportive of the overall policy requirements for each of the HGC allocations. Whilst we have a number of detailed points of clarification within the site allocation policies which have been raised separately through individual representations, these comments are made in the interests of securing a clear and effective policy framework for each site.

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Kitewood Estates Ltd ('Kitewood') welcome the opportunity to comment on the Draft Local Plan 2041 Regulation 19 ('the Reg 19 Local Plan') and the supporting documents that have been published for consultation.

We understand that following the consultation, all representations will be sent to the Planning Inspectorate along with the draft Local Plan to be Examined by a government-appointed Planning Inspector who will consider if any modification need to be made to the Local Plan before it can be adopted.

The Planning Inspector will assess whether the draft Local Plan has been prepared in accordance with legal and procedural requirements, and whether it is 'sound'.

This representation is therefore focused on matters relating to soundness.

**Kitewood Interest in the Draft Plan**

Kitewood is a development company and landowner of part of the proposed Hemel Garden Communities (HGC) Growth Area to the north and east of Hemel Hempstead. Our landholding falls wholly to the north within Dacorum Borough, and abuts the boundary with the St Albans City & District, adjacent to the Reg 19 Local Plan proposed allocation H1- north Hemel Hempstead.

HGC (including the proposed Growth Area) is a collaboration between Dacorum Borough Council, St Albans City and District Council, Hertfordshire County Council and Hemel Garden Communities, and is supported by the Hertfordshire Local Enterprise Partnership. The landowner group, of which Kitewood is part of, have continued to work positively with HGC partners in progressing the ambitious proposals for growth and transformation.

The HGC Growth Areas to the north and east of Hemel Hempstead are expected to extend beyond the Plan period and will deliver up to 11,000 new homes and 10,000 new jobs by 2050 across St Albans District and Dacorum Borough.

The HGC Growth Area is consistent with the government's strong aspiration to boost the delivery of new homes and infrastructure in a comprehensive manner. It is also aligned with the government's agenda to facilitate the delivery of New Towns.

The plan extract below from *Hemel Garden Communities Position Statement* dated July 2024 identifies the full extent of the north and east Hemel Hempstead Growth Area.

**Hemel Garden Communities Program Area extract from the *Hemel Garden Communities Position Statement***

***See 'Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024' attachment for figure***

The proposed HGC Growth Area is supported by a comprehensive and robust evidence base, including the Framework Plan 2024, HGC Framework Plan Story (July 2024) and HGC Technical Report (Sept 2024). Further evidence is also emerging to support the Local Plans and the future planning applications.

The publication of the St Albans District Draft Local Plan 2041 Regulation 19 for consultation and the Council's intention to submit the Plan for Examination is a significant milestone for the HGC Growth Area, and we commend the Council for their continued engagement with us, the other landowners and HGC partners.

Whilst Dacorum Borough Council are slightly behind St Albans City & District Council in terms of the consultation on their respective Pre-Submission Dacorum Local Plan to 2041 (Regulation 19) which will run until 17th December 2024, we are of the view that it would be beneficial for the Submitted Plans to be Examined together given the importance of the HGC Growth Area to both authorities.

In addition to these comments, joint landowner representations are also submitted to this consultation by David Lock Associates (DLA) on behalf of ourselves (Kitewood), The Crown Estate, Pigeon Investments Limited and Bloor Homes.

*Kitewood support of the Proposed Broad Location for growth identified at Hemel Hempstead and in particular the proposed site allocation **H1, H2, H3 and H4:***

- **H1 – North Hemel Hempstead**
- **H2 – East Hemel Hempstead (North)**
- **H3 – East Hemel Hempstead (Central)**
- H4 East Hemel Hempstead (South)

The Proposed Site Allocations H1, H2, H3 and H4 are identified on the Key Diagram, extract below.

**Reg 19 Local Plan Fig 1.2 Key Diagram extract of the Proposed Site Allocation H1, H2, H3, H4**

***See 'Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024' attachment for figure***

These allocations (H1, H2, H3 and H4) form part of the wider HGC Growth Area and they will together deliver around 5,500 dwellings, around half of the required homes in the designated Growth Area and land for up to 6,000 jobs.

The Local Plan Reg 19 proposed that 4,400 of the dwellings (around 75% of the total) will be delivered during the plan period.

Our comments relate to the need to ensure that a fully comprehensive approach is taken across all of these allocations (H1, H2, H3 and H4) and the wider HGC Growth Area to ensure the delivery of the cross-boundary infrastructure requirements, to ensure the draft Plan's *effectiveness*.

Our concerns about effectiveness of the Reg 19 Plan relate to the current lack of detail on how the infrastructure will be phased alongside the delivery of the development, and how this aligns with the delivery of the proposed north Hemel Hempstead allocation in Dacorum Borough to ensure the vision for the Hemel Garden Communities is realised and delivered without delay.

Our Comments principally relate to Policies LG1, SP1, SP8 and TRA1.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Our comments relate to the need to ensure that a fully comprehensive approach is taken across all of these allocations (H1, H2, H3 and H4) and the wider HGC Growth Area to ensure the delivery of the cross-boundary infrastructure requirements, to ensure the draft Plan's *effectiveness*.

Our concerns about effectiveness of the Reg 19 Plan relate to the current lack of detail on how the infrastructure will be phased alongside the delivery of the development, and how this aligns with the delivery of the proposed north Hemel Hempstead allocation in Dacorum Borough to ensure the vision for the Hemel Garden Communities is realised and delivered without delay.

*We consider that for the policy to be effective a joined-up approach is required by St Albans City & District and Dacorum Borough to ensure the infrastructure items that relate to the Growth Area that are set out in the Councils' respective Infrastructure Delivery Plans are fully aligned, and these accord with the HGC Infrastructure Delivery Plan.*

*We are of the view that further consideration should be given to the comprehensive infrastructure requirements to support the overall proposed overall HGC Growth Area, the delivery phasing across the authority boundaries and mechanism for appropriating cost.*

*We therefore consider that an updated St Albans City & District IDP is required to be published in advance of the Examination in Public to incorporate all of the relevant emerging evidence base.*

*Kitewood considers that further evidence is required to demonstrate cross-boundary co-operation and cumulative impact assessments on transport matters and further information is necessary in relation to the mechanisms that will ensure the sustainable growth of Hemel Hempstead during the plan period.*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Kitewood is a development company and landowner of part of the proposed Hemel Garden Communities (HGC) Growth Area to the north and east of Hemel Hempstead. Our landholding falls wholly to the north within Dacorum Borough, and abuts the boundary with the St Albans City & District, adjacent to the Reg 19 Local Plan proposed allocation H1- north Hemel Hempstead.

Kitewood considers that the *Draft Local Plan 2041 Regulation 19 is Legally compliant*, has been *Positively prepared*, is *Justified*, and is *consistent with national policy*.

However, we do not consider that Policies SP1, SP8 and TR1 are effective because all the evidence does not yet exist to demonstrate effective joint working on cross-boundary strategic matters.

***Kitewood therefore request participation in the forthcoming Examination in Public to discuss policy matters relating to the Proposed site allocations H1, H2, H3 and H4***

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

**I would like to be notified about the adoption of the Local Plan:**

* Yes

### 356 - Rachael Donovan

Submission Number: 356 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Hertfordshire and West Essex ICB Name: Rachael Donovan

Comment Number: 22

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*Impact of specific proposed site allocations and committed sites on Primary Care Infrastructure*

- **H1 - North Hemel Hempstead - 1,500 dwellings (1,125 by 2041)**
- **H2 - East Hemel Hempstead (North) – 1,600 dwellings (1,235 by 2041)**
- **H4 - East Hemel Hempstead (South) – 2,400 dwellings (1,940 by 2041)**

This is the St Albans District element of the cross-border Hemel Garden Community development, which is expected to deliver 10,500 units in total. 5,500 of these will be in St Albans District and 5,000 in Dacorum Borough.

Such unprecedented level of growth cannot be absorbed by the existing estate and options for an on-site medical centre in both North Hemel Hempstead and East Hemel Hempstead (North) need to be reserved, with the location of a new facility dependent on which of these strategic sites come forward first.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## B1 - North St Albans, AL3 6DD

### 5 - Mr Alistair Monk

Submission Number: 5 Submission Date: 02/10/24 20:37

Respondent: Company/Organisation: Name: Mr Alistair Monk

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I consider the Local Plan not to be sound.

The oversized skew towards a large percentage of Housing being placed on the Hemel Hempstead border is a clear attempt to push as much housing as possible away from what residents would know as "St Albans".

Families like my own that live in [redacted] want new housing built in St Albans so our aging Parents, Children and Grandchildren can live close by - not "in Hemel Hempstead" in all but name.

Additionally Inspectors will be well aware that deliverability of such huge projects takes decades and is most often littered with problems, delays and Court filings. SADC was criticised in its earlier failed Local Plan for not considering smaller, more readily deliverable sites and they have gone down the exact same route again - playing the game in the hope they, the Councillors, will get re-elected by their base of local NIMBY voters.

There were a number of sites put forward in the Villages. These were never properly investigated in any way shape or form yet many are decent sized sites that could deliver houses within a few years, not decades.

Lastly I would say that the sudden rush to now, after 30 years, crash through a Plan is not, like the Council will proclaim, an attempt to meet the new Labour Govt desire to see Local Plans put in place, but rather yet another thinly veiled attempt to game the system by putting a Local Plan in place that is driven by the soon to be out of date housing number requirement and thereby delay by many years having a Plan in place that will accommodate the vastly increased housing need in the area that is reflected in the new methodology.

This whole accelerated process is entirely disingenuous and if the Inspector that is reviewing the submission simply takes the time to watch the video recording of 23rd Sept for the Planning Policy & Climate Committee it is glaring obvious what the motivations are. Residents of St Albans have been told for over a year that the previously stated timetable for a new Local Plan was the quickest that it could possibly be delivered if done properly - presumably because they knew the Conservative

Party were generally dragging their feet for Greenbelt dominated LPA's. Now, all of sudden, it can be done a lot quicker. It's laughable if it wasn't so important. This can only mean that the either the Council were lying to its Residents before - or they are now, by their own admission, not doing it properly. I'm not sure which is worst.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Site selection and methodology needs to be completely revisited and there needs to be a realistic assessment of the near term deliverability of sites.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**35 - Mrs Emma Hart**

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

While no comment is made on the principle of the allocation, requirement 4 relating to replacement playing field provision is welcomed. The inclusion of the area proposed for replacement playing field provision within the site boundary of the site allocation on the Proposals Map is also welcomed. These amendments to the policy respond positively to representations made by Sport England on the Regulation 18 plan. Requirement 4 would be consistent with Sport England's Playing Fields policy and paragraph 103 of the NPPF.

The requirements in the policy relating to providing an all weather pitch on the primary school site that would be made available for community use (requirement 2) and on-site sports provision (requirement 5) to meet the additional needs generated by the development (or off-site provision

if justified) is welcomed. These requirements would be consistent with the general recommendations in the Council's evidence base for sport (Playing Pitch Strategy) and thereby be consistent with Government policy in paragraph 102 of the NPPF.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

*Discussion*

Clause 6 relates to support for the transport network and identifies the need for off-site 'improvements' to Sandridgebury Lane. This relatively quiet lane currently performs an important role in the cycling network (as identified in the LCWIP), linking the St Albans to Heartwood Forest.

Previously, masterplanning work for Site B1, prepared at the time of the previous Local Plan reasoned to make Sandridgebury part of an internal cycling network, which is something we support as an aid to people travelling south. However, the corollary to this is that Sandridgebury Lane, west of the railway line will become the back door (and the only secondary access) to a site of around 1,000 homes. The internal cycling strategy will be undone somewhat by the increased vehicular use of this lane to/from Sandridge and Heartwood Forest and its effect on the rest of the lane.

We are therefore concerned that off-site 'improvements' to the lane might be car orientated to the detriment of cycling. Many people would not see such an outcome as an 'improvement'. There is no alternative route on this axis, and Lightwood may not offer up its land either side of Sandridgebury Lane to offer an alternative solely part of off-site measures aimed at B1. Given the modal split strategy underpinning the Transport Assessment of the Plan, the Plan should be protecting and boosting cycling infrastructure.

It will be evident that land east of the railway is one of two reasonable alternative locations that will have to come forward if uncapped housing need or the revised standard method is to be addressed. The logic of maintaining the flow of traffic free cycling along an additional stretch of Sandridgebury Lane to/from Heartwood Forest is clear. This can be achieved in a scenario where the expansion to North StAlbans (east of the railway) is masterplanned to achieve a new internal street network that retains much of the Lane for cycling. There appears to be a risk that 'improvements' become too focused on vehicular traffic, and that this will unnecessarily alter the character of part of the lane for active travel. We are realistic that there will need to be some vehicular oriented improvements under the railway (such as give way to oncoming traffic measures or signals). There is scope to achieve uninterrupted active travel flows, whilst allowing vehicles to flow in one direction at a time.

Given that development east of the railway seems very likely to be needed and would be identified an early review of the Plan, we consider that the street hierarchy within Site B1 should have regard to enable rather than frustrate the potential for a bus route service to run from the town centre and through development on both sides of the railway. That requires a specific street section/typologyto head towards the underpass (under which a bus can drive).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

For effectiveness the objective for, and improvements sought, along Sandridgebury Lane (off-site) should be qualified with more precision in clause 6.

To accord with national planning policy on transport, and to maximise 'opportunities' of public transport and viable services, clause 6 should ensure that Site B1 does not come forward in a way that would make it a cul-de-sac for a bus route.

Ultimately, the Council should be putting in place a similar masterplanning strategy for North St Albans as it is for HGC, especially in respect of transport and movement. Some might question why St Albans is not worthy of the same quality of thought that is taking place north and east of Hemel Hempstead.

**185 - Mrs Jane Sellars**

Submission Number: 185 Submission Date: 07/11/24 15:21

Respondent: Company/Organisation: Private Name: Mrs Jane Sellars

Comment Number: 2

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The traffic plan for this development is inadequate and poses a safety and freedom of movement risk to the people who will live there and use it, those living in the vicinity of it and those who commute through the area - including to and from the five schools. In the traffic report that accompanies the local plan it states that all arms of the Ancient Briton junction are already over capacity so we don't understand what highway improvements could be made.

Also in the traffic report, extra traffic movements are capped at '500+', and this junction will obviously be well above that with the extra 4000+ traffic movements expected per day through it. It would have been more honest to use a different scale to allow the company producing the report to show exactly how many extra cars are expected at peak times through that junction. Being a resident of New Greens, cars will naturally divert through our estate to avoid the Ancient Briton junction, which will make it difficult for residents of New Greens to leave the estate and will cause Green Lane to be hazardous for pedestrians, being already double parked and with cars already regularly mounting the pavement to pass each other. What consideration has been given to this / what measures will be taken to remedy it?

Expected pollution levels from the inevitable gridlock should be published, with a scale that allows true figures to be divulged. Telling people to 'be sustainable' and use unreliable, irregular, limited bus routes without bus lanes is not fair or feasible.

I also have concerns about the drainage plan and flood risk and believe that proposing to build a development on this scale in one phase is irresponsible.

We understand that there is a need for a greater supply of housing in the area. Whether that will make it affordable is another matter. We hope that opportunities to combat vacant possession and develop brownfield sites are being maximised alongside this use of greenbelt. This development might fit into the Greenbelt review parameters but each time I've asked our local

councillors how it would work, the answer ends up coming down to the fact that the council simply has to build them.  It doesn't feel like the development has been properly thought through, so residents would appreciate some reassurance as well as proper scrutiny and debate.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Plan for an additional entrance and exit from the development into Valley Road or elsewhere so that Harpenden Road, the Ancient Briton Junction and the New Greens estate don't bear all of the city, east and west bound traffic from the development on top of the volume of traffic it currently bears.

Build homes in phases rather than the proposed 1,200 at once (from both Sewell Park and Woollam Park) and review the viability of each phase before the commencing the next one.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

I would like my views to be considered, as they reflect those of many New Greens residents, and would be glad to be informed about when the debate on this development is taking place so that I can hear it.

## 224 - Redington Capital Limited & CALA Homes

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 9

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Redington Capital Limited and CALA Homes **object** to Part B (Site Allocations) which forms part of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

Redington Capital Limited and CALA Homes conclude that the site allocation selection process undertaken by the Council is unsound. They recommend that the site selection process should be completely reviewed, revised and the draft allocations re-assessed in a transparent and consistent approach particularly in applying the recommendations of the GBR.

In addition to the above, there are a number of other concerning questions regarding some of the Broad Location sites and other housing site allocations chosen by the Council, including:

- Site B1 (1,097 homes) - This is a site located within in the Green Belt (SA164 & 165) and is regarded to **strongly** meet the purposes of the Green Belt. All of this site is regarded as important in strategic role terms. It was **not recommended** within the Green Belt Review as an area for release. In addition, there is no secondary schools in this location and the road between Harpenden and St Albans (the location of the secondary schools) is extremely busy however school traffic will be required to travel through the settlement twice a day. There aren't any local amenities (shops, etc) in close proximity to the site and it lacks accessibility. This is not a sustainable location to construct new homes. However, it has been included in the Local Plan.

It is clear from the above that the Council has chosen to allocate site:

- In locations deemed to be of strong importance to the purposes of the Green Belt;
- That are not located within the most accessible and sustainable locations; and
- That are either undeliverable or their capacity has been grossly over-estimated.

This demonstrates that the site allocations strategy adopted by the Council needs to be fundamentally reviewed and revised.

This conclusion is further exacerbated when considering the Council has chosen to ignore other more accessible and sustainable sites in lower tier settlements, including Redington Capital Limited and CALA Homes' site (Land South of Chiswell Green Lane), which:

- Benefits from high levels of accessibility by public transport and to local services (as demonstrated in Section 7 below);
- Has less harm to the purposes of the Green Belt (as demonstrated in Section 1 above);
- Is available and deliverable at a density of development that has previously been supported by the Council's planning officers when recommending approval of application ref: 5/2022/0927 (as demonstrated in Section 7 below);
- Is supported by the Inspector when determining Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024; and
- Upheld by the SOS's decision.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council:

- Should be more realistic about its choice of housing sites to deliver its critical housing needs. Some of the current set of site allocations appear to have been included / inflated to "make up the numbers." We therefore strongly recommend that the site allocations are reviewed again and the Council should:
- Remove any sites that are undeliverable;
- Reduce the expected capacity of sites that are obviously constrained and will not therefore delivery the density suggested; and
- Provide evidence to justify all site inclusions and their estimate capacity.
- Include new broad location housing sites that:
- Are located in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and services or will not be used by the district's residents;
- Result in less harm to the purposes of the Green Belt; and
- Are available and deliverable.

Redington Capital Limited and CALA Homes recommends that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing and education land allocation in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The council did not listen to new evidence regarding the selection of North St Albans and this site does not meet sustainable development due to factors such as elevated severe flood risk, No safe delivery option for sustainable active travel highway plus it goes against the recommendations of the second Green Belt Review ARUP.

This local plan fails the people of the district it allows over development, our roads will become permanent long traffic jams.

There is no strategy to deliver social housing operated by the council, instead to be run by Housing associations offering investors 15% profit. This is not good for those in most need within our community.

In the case of North St Albans the Local Cycling and walking plan is high level and has not been adequately evidenced.

This local plan fails our community as vast areas of productive farmland, open spaces and valuable wildlife habitats will be lost.

I do not see evidence that the proposed number of houses are required and I wonder why the council is so keen to push ahead with this flawed plan.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**B1- North St Albans, AL3 6DD**

There are no designated heritage assets on or within the immediate vicinity of site, the nearest being the Iron Age territorial boundary known as Beech Bottom Dyke SM (LEN: 1019136) to the south, and a number of grade H listed buildings to the east of the site, in Sandridge. Given the distance, topography, intervening vegetation and buildings, we consider that development of this site would have little impact on the setting of these heritage assets.

We welcome the preparation of the high level HA by Place Services.

### 273 - Hallam Land Management and St Albans School

Submission Number: 273 Submission Date: 08/11/24 09:33

Respondent: Company/Organisation: LRM Planning Name: Mr Owen Jones

On Behalf Of Company/Organisation: Hallam Land Management and St Albans School Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

6.1 Strategic Policy SP1 and Table 3.1 lists North St Albans as a Broad Location for development within the District. Part B of the Local Plan contains the proposed site allocations and identifies North St Albans at B1.

6.2 North St Albans is strategically important to the Local Plan's strategy; both in terms of achieving the spatial outcome of a sustainable pattern of development focused on the District's main urban area and also the provision of new housing and associated infrastructure to meet identified needs. New development can similarly be located here without causing the merging of the City of St Albans and Harpenden and thus maintain the important purpose of the Green Belt in separating those two settlements.

6.3 North St Albans has consistently been identified as a strategic location for large scale growth, and Hallam and St Albans School remain highly supportive of the Council's decision to allocate it.

6.4 Crucially, before reviewing the relevant policy context in any great detail, Hallam and St Albans School would like to alert the District Council to a discrepancy issue in relation to the capacity of North St Albans. Table 3.1 at Part A of the Local Plan identifies the Broad Locations and confirms a minimum capacity of 1,146 dwellings, however B1 of Part B of the Local Plan confirms an indicative figure of 1,097 dwellings. This lack of consistency is not effective and does not meet the test of soundness. The District Council are urged to revisit this and ensure that it provides a consistent, reliable and realistic housing capacity which a future developer can achieve.

6.5 Notwithstanding this, the District Council are aware that Hallam and St Albans School have been undertaking survey work and suites of technical work which have informed an illustrative masterplan for the remainder of the North St Albans site, which excludes the 150 dwellings approved under 5/2021/0423. This has been evolving for some time but is now at a point where site capacity can be tested, confirming that the realistic capacity of this larger remaining portion of the site is 1,080 dwellings, accounting for the various specialist accommodation types required by the District and County Councils. As such, the overall capacity of the North St Albans Broad Allocation is calculated to be 1,230 dwellings of which 80 are the C2 care home.

**B1 (Local Plan Part B) – North St Albans**

6.6 B1 of the Local Plan identifies North St Albans as a Broad Location for development. It identifies the key requirements for the development, which will comprise the main components of the scheme and identifies the District's aspirations for the site.

6.7 Hallam and St Albans School have undertaken a vast suite of technical and survey work for the North St Albans site and therefore whilst they are supportive of the Council's approach to identify key development requirements, they consider that some of these objectives require alteration in order to the meet the tests of soundness required of a Local Plan to ensure that the full development capacity can be reached.

6.8 Firstly, the proposed use is described as "primarily residential 1,097 units (indicative) (this includes 150 from planning permission 5/2021/0423)." Accounting for the units provided for the specialist accommodation, nursing home, and additional disability service units, and on the basis of updated capacity work, this figure should be updated to read "primarily residential 1,230 units (indicative) (this includes 150 from planning permission 5/2021/0423)." This will allow 1,080 new dwellings to come forward on the remainder of the North St Albans scheme.

6.9 Our comments in regard to the specific development requirements are set out in turn below.

**One extra-care facility comprising of 70-80 self-contained units, one 70-80 bed nursing home and 4 supported living units for people with disabilities (these units are included within the indicative dwellings figure).**

Capacity work has been undertaken and confirms that the extra care facility will offer 80 self-contained units, and the nursing home will also support 80-beds. The provision of four supported living units is supported but these are referred to as "adult disability service units" in light of ongoing discussions with Hertfordshire County Council's adult services directorate.

**A 2FE primary school, including Early Years provision, to serve the new and wider community. This should include provision of an all weather playing pitch available for community use.**

The site can accommodate space for a two-form entry primary school, however Hertfordshire County Council have agreed that they will be responsible for delivering this. As such, the policy should be amended to read "land for a two-form entry primary school". Moreover, it will be the Local Education Authority ("LEA") who are responsible for the specification of the school and its playing field. The extent to which the primary school and associated playing field is available for community use will similarly be determined by the LEA and the school sponsor.

**A new local centre to provide local services, including Medical Centre and commercial development opportunities.**

Again, the local centre can accommodate space for a medical centre, but the Integrated Care Board have expressed that they would wish to deliver this themselves. As such, it is suggested that the policy should be amended to read “including sufficient space for a medical centre”.

**Replacement of the displaced playing fields. The replacement playing fields must be an equivalent or better playing field in terms of quantity and quality and delivered prior to commencement of any development on the existing playing field. Sport England will be a statutory consultee on any future planning application that would affect the playing field within this site allocation.**

The area of the allocation has been amended in response to previous representations to ensure sufficient land is identified to allow for the relocation of the existing playing pitches. As playing fields are appropriate uses in the Green Belt, we note the proposed revision to its boundary intends that the pitches are on land that continues to be designated accordingly, and this is not considered to be a conflict with national policy. Sport England and the England and Wales Cricket Board have requested that a small sports pavilion annex is provided to serve the replacement playing fields. This should be acknowledged and the policy should be reworded accordingly to note that the provision of a new building will be supported where it serves the replacement pitches. Again, such a facility would not conflict with Green Belt policy.

**On-site outdoor sports provision to meet the additional needs generated by the development. An offsite facility may be acceptable where justified by evidence and subject to early delivery of the offsite provision prior to occupation of first home.**

No comments or observations.

**Contributions / enhancements to support relevant schemes in the LCWIP and GTPs as indicated in the TIA.**

No comments or observations.

**Support for a transport network (including walking and cycling links) and public transport services upgrades / improvements, including off-site improvements to Harpenden Road, Sandridgebury Lane, Valley Road, Ancient Briton junction and King William IV junction, links to St Albans City Centre, station and education; aligned to schemes in the GTPs and LCWIP.**

Discussions have been held with the local bus providers and any scheme would look to incorporate

their aspirations accordingly. As such, it is suggested that the policy is amended to read “public transport services upgrades / improvements as appropriate”.

Whilst discussions have also been held with Hertfordshire County Council as the local highway authority, the exact off-site improvements are still to be confirmed. It is therefore suggested that this is also rewritten to read “including off-site improvements to Harpenden Road, Sandridgebury Lane, Valley Road, Ancient Briton junction and King William IV junction, that prioritise active and sustainable transport, as appropriate”. Similarly, the links to the city centre, the station and education facilities are also being finalised, thus “as appropriate” should be introduced after the reference to education.

**Provide pedestrian and cycle links with the part of the site that is delivering 150 homes from planning permission 5/2021/0423.**

There are no in principle issues with this, however it will depend on the developer of planning permission 5/2021/0423 delivering suitable connection points to the boundary of that site. This should be reworded to read “provide pedestrian and cycle links to the points of connection along the site boundary of the part of the site that is delivering 150 homes from planning permission 5/2021/0423.”

**Support for the improvement of the Public Rights of Way network to enable active travel and recreational use to Heartwood Forest and Nomansland Common.**

No comments or observations.

**Development proposals must take appropriate account of the Ancient Woodland, County Wildlife Site, Priority Habitat and trees covered by Tree Preservation Order along the south-east boundary, and the Priority Habitat close to the eastern boundary comprising an area of deciduous woodland.**

No comments or observations.

**A noise assessment must be carried out regarding the railway line and appropriate mitigating measures provided as necessary.**

No comments or observations.

**Take appropriate account of these Environmental Constraints: Source Protection Zone (SPZ) 3; Bedrock Aquifer; Superficial Aquifer.**

No comments or observations.

6.10 Given the extent of changes proposed, a tracked changes version of B1 is contained at Appendix 1 [see attached file] to highlighted the proposed amendments.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Reword B1 as follows:**

Proposed use: Primarily residential 1,230 units (indicative) (this includes 150 from planning permission 5/2021/0423).”

Key development requirements:

One age restricted specialist facility comprising of 70-80 self-contained units, one 70-80 bed nursing home and 4 adult disability service units for people with disabilities (these units are included within the indicative dwellings figure).

Land for a 2FE primary school, including Early Years provision, to serve the new and wider community. This should include provision of an all weather playing pitch available for community use.

A new local centre to provide local services, including sufficient space for a Medical Centre and commercial development opportunities.

Replacement of the displaced playing fields. The replacement playing fields must be an equivalent or better playing field in terms of quantity and quality and delivered prior to commencement of any development on the existing playing field, and will include a new pavilion annex to serve the replacement fields. Sport England will be a statutory consultee on any future planning application that would affect the playing field within this site allocation.

On-site outdoor sports provision to meet the additional needs generated by the development. An offsite facility may be acceptable where justified by evidence and subject to early delivery of the offsite provision prior to occupation of first home.

Contributions / enhancements to support relevant schemes in the LCWIP and GTPs as indicated in the TIA.

Support for a transport network (including walking and cycling links) and public transport services upgrades / improvements as appropriate, including off-site improvements to Harpenden Road, Sandridgebury Lane, Valley Road, Ancient Briton junction and King William IV junction, that priortise active and sustainable transport, as appropriate, and links to St Albans City Centre, station and education as appropriate; aligned to schemes in the GTPs and LCWIP.

Provide pedestrian and cycle links to the points of connection along the site boundary withof the part of the site that is delivering 150 homes from planning permission 5/2021/0423.

Support for the improvement of the Public Rights of Way network to enable active travel and recreational use to Heartwood Forest and Nomansland Common.

Development proposals must take appropriate account of the Ancient Woodland, County Wildlife Site, Priority Habitat and trees covered by Tree Preservation Order along the south-east boundary, and the Priority Habitat close to the eastern boundary comprising an area of deciduous woodland.

A noise assessment must be carried out regarding the railway line and appropriate mitigating measures provided as necessary.

Take appropriate account of these Environmental Constraints: Source Protection Zone (SPZ) 3; Bedrock Aquifer; Superficial Aquifer.

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraph 35 and 36 of the 2023 NPPF require that local plans be justified to be considered sound. To do so its policies must be appropriate for the outcomes that they intend to secure.
Policy wording at Part B allocations B1 and B2 states that the primary schools delivered within these allocations should include an all weather pitch (AWP). Part A policies COM1 and COM3 also states that all school should come with a Community Use Agreement (CUA) securing community access to new playing pitches.

It is not clear what the intention of this policy is and therefore what it requires HCC and SACDC (as the authority with sports and leisure responsibilities) to deliver on site. An AWP usually refers to a pitch with artificial grass (an AGP) that can be used more intensively than natural turf. An AGP is not required to deliver a school curriculum, and so are not usually included on a primary school site alongside other enhanced facilities that are needed to enable community use like floodlights, changing rooms, and showers. Moreover, to be usable by a primary school, an AGP would have to be an appropriate size for a school (a junior pitch) rather than for community use (an adult pitch) if that is what is intended. Conversely an AWP could refer to a multi-use games area (MUGA) which is a painted macadam surface enabling multiple sports. While these are provided as standard they too lack enhanced facilities like fencing that are required to enable community use.

Moreover, the requirement at Part A policies COM1 and COM3 for a CUA on all new schools could be interpreted as to require all new schools – not just those at sites B1 and B2 – to have some form of enhanced facilities to enable community access, as the facilities provided on a standard school site will not, on their own, meet the standards required to enable community use, as described above. As facilities on school sites must first and foremost enable a school curriculum, community access will be limited in practice if enhanced facilities are not provided: natural turf pitches would need time to recover outside of school hours to be usable for school PE lessons and the absence of floodlighting limits use in the evening in winter. This reading therefore contradicts the allocations at Part B.

The plan does not include a coherent strategy for the funding and delivery of enhanced facilities on school sites where they are required. Part B allocation B2 does explicitly state that the site should provide contributions for an all-weather pitch, but this wording is not included in allocation B1. The Infrastructure Delivery Plan schedule identifies AWPs generally as a need arising from all Broad Locations to meet the District's sports and leisure duties (and identifies the LPA as the funding body), including on sites B1 and B2 (reference 35 and 36). However, it only lists this as 'desirable', and identifies only that the need attributable to development only justifies a fraction of the overall cost. This means there is a risk that policy could require something that is only partially funded and therefore undeliverable in practice.

To be considered appropriate and therefore sound the local plan should therefore clarify first the intention of Part A policies COM1 and COM3 as to whether it requires all schools to have an AWP to satisfy the CUA requirement and secondly clarify the delivery and funding mechanism for AWPs on schools where they are provided (whether just on sites B1 or B2 or all new schools) to meet the Districts sports and leisure requirement rather than an education need. This representation suggests modifications that if agreed, or similar, would make the plan sound.

To be considered sound the plan must be effective and therefore have a reasonable prospect of delivery.

The site allocations at Part B correctly requires proposals for development to include land and s106 contributions towards the delivery of several primary and secondary schools. This is necessary to satisfy the requirement of NPPF paragraph 99 and HCC strongly appreciates the support that the LPA have placed on sufficient education provision.

HCC's Guide to Developer Infrastructure Contributions and its technical appendices sets out how land and contributions need to be made to ensure that schools are deliverable. Proposals for sites providing schools need to make serviced land available to the County Council (at education values) and make a proportionate s106 contribution towards delivery in accordance with the CIL

regulations. Other sites will make a proportionate s106 contribution. These will be pooled to deliver schools when they are required to meet a cumulative need.

Policy in the Part B site allocations includes delivery of the following (or a similar form of words depending on the allocation):

A 3FE primary school, including Early Years provision, to serve the new community.

Or, in relation to secondary schools:

A site for, and appropriate contributions towards, an 8FE secondary school site within nearby Oaklands land ownership fronting onto Hatfield Road.

These examples' policy wording implicitly limits the deliverability of the schools:

1. It sets a hard target of the capacity of the school, which would limit the schools' ability to open in phases, which is necessary to align supply of places to demand as it builds up over time;
2. It implies in some allocations that schools sought to be developer-built, which is not the County Council's preferred method of school delivery; and
3. In some allocations policy seeks to allocate contributions towards secondary schools for which the land will not be delivered through a s106 process and will instead be delivered as an acquisition later in or following the plan period to meet a cumulative need. Tying the s106 contribution to these secondary schools therefore risks the delivery of other projects needed earlier in the plan period.

The County Council also has a responsibility to ensure sufficient post-16 education, and in Hertfordshire these are usually provided at secondary school 6th forms. The County Council's strategy for post-16 education therefore includes the delivery of 6th forms at new secondary schools and secondary school expansions. For completeness, policy should also refer to 6th form provision as this has a similar relationship to new secondary education provision as early years does to new primary education provision, and the exclusion could therefore inadvertently give the impression that one does not have policy support.
HCC also supports the principle of the plan's support for secondary education in principle. However, since the publication of the Regulation 18 plan, the strategy for East St Albans has changed and the site is now only expected to deliver a 6FE school.
Therefore to be deliverable and therefore considered sound the plan should clarify the maximum capacity of schools, that schools in the first instance should not be developer-built, and that s106 contributions for individual sites should not be tied to school sites that are needed to meet a long term cumulative need. The local plan should also ensure that post-16 education has full support within new secondary schools.

Paragraph 35 and 36 of the 2023 NPPF require that local plans be justified to be considered sound. To do so its policies must be an appropriate strategy for the outcomes that they intend to secure. Policy HOU3 includes policies against which applications for specialist housing for older people will be determined. Paragraph (c) states that 'In larger sites, it may be appropriate to co-locate specialist housing provision and develop an Integrated Community'. The Associated Retirement Community Operators, the professional body representing housing with care providers, defines Integrated Retirement Communities as a gold standard of housing with care, not as colocation of different types of specialist housing provision, such as housing with care and nursing homes. While HCC has no in-principle opposition to colocation it is not clear that this is indeed what the policy is intended to achieve.

There may be benefits to co-locating housing with care schemes (as opposed to other forms of specialist accommodation for older people) only on sites delivering a larger quantum of this form of specialist older person's accommodation. This may allow them to benefit from improved economies of scale and deliver improved communal facilities and services that smaller scheme would not be able to support themselves. Policy wording within the allocations at Part B, however, refers to delivery of discrete housing with care facilities of 70-80 units. This implies a requirement for separation. This is entirely appropriate for care homes, but there is no in principle reason why housing with care schemes cannot be co-located into a single larger scheme.
Therefore to deliver an appropriate strategy there needs to be clarity as to what the policy wording at HOU3 (c) is intended to achieve, and if there is no other rationale, the plan should clarify that HOU c and the allocations at Part B to permit multiple housing with care schemes to co-locate with each other rather than with other types of specialist accommodation for older people.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To be considered sound the local plan should:

1. Clarify which schools need to deliver enhanced facilities to meet a wider sports and leisure requirement; and
2. Clarify the funding and livery mechanism for enhanced facilities.

Assuming that the intention of the local plan is that only the new schools at sites B1 and B2 need to deliver a junior AGP to meet a wider sports and leisure requirement, CUAs at other schools will only need to enable limited community access to standard school facilities, and SACDC as the local authority responsible for sports and leisure in St Albans will be the funding body (either from themselves or through development), this could be achieved through

amendments to the supporting text and policy as follows:

Supporting Text: 7.19 Schools may make school facilities, such as playing pitches or sports halls, available for community use. New schools may include enhanced sports facilities to meet the Council's sports and leisure strategy and responsibilities. Where there is an intention to deliver these on a new school site, the Council as the local authority with sports and leisure responsibilities will fully fund these through planning obligations or other funding mechanisms. The policy requirement for a community use agreement alone does not imply that enhanced facilities must be provided. Schools without enhanced facilities can also support community access but will be operationally limited and may not be sufficient to meet a formal sports and leisure need.

Part B B1: A 2FE primary school, including Early Years provision, to serve the new and wider community. This should include provision of an all weather artificial grass junior playing pitch available for community use.

Part B B2: A site for and appropriate contributions towards a 2 FE primary school, including Early Years provision and an all weather artificial grass junior sports pitch available for community use.

But see other changes suggested to the wording on school site sizes made separately.

These changes would clarify that the requirement for a CUA does not mean an AWP or other enhanced facilities are required except where explicitly stated in sites B1 and B2 and that the AWP required on sites B1 and B2 is a junior AGP. They also clarify the roles and responsibilities for the delivery and funding of an AWP on any site to avoid the risk that the school becomes undeliverable at development management stage as the delivery mechanism and funding are not agreed. This would, in turn, clarify the outcome that the policy intends to achieve and ensure a deliverable strategy for achieving it.

B1: A 2FE primary school site and contributions, including Early Years provision,
to serve the new and wider community. This should include provision of an all
weather playing pitch available for community use.

B1: [deleted text]70-80 self-contained housing with care units, [deleted text], one 70-80 bed nursing home and 4 supported living units
for people with disabilities (these units are included within the indicative dwellings
figure)

2. 2D School Delivery Details_[R].pdf
3. 3B Older Persons Accommodation Strategy_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Securing appropriate school provision is a statutory responsibility for the County Council and key to successful plan-making and as such HCC has an interest in ensuing that school provision is financially and operationally deliverable.

### 356 - Rachael Donovan

Submission Number: 356 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Hertfordshire and West Essex ICB Name: Rachael Donovan

Comment Number: 23

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

- **B1 – North of St Albans – 1,097 dwellings**
- **B4 – East of St Albans – 472 dwellings**

There will be circa 5,700 additional new homes in St Albans and Chiswell Green by 2041 and additional facilities will be required. These are to include an on-site medical centre at North of St Albans and extension/reconfiguration works to several existing GP surgeries – e.g. Grange Street Surgery, Lodge Surgery and Harvey House Surgery. Section 106 contributions will therefore be sought towards these projects in order to meet the needs of the growing population.

### 368 - Gee Smedley

Submission Number: 368 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Save North St Albans Greenbelt Name: Gee Smedley

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Reponses to points in Key Development Objectives/issues to address

**Key Development Objective #3:** There has been no agreed strategy to deliver the transport network and off-site highways improvements. There has been no traffic data or modelling supplied in the evidence base. The lack of evidence is staggering given we have produced a number of expert reports that should the cycle lane being relied upon cannot be delivered due the error by the developer in measuring the road width.

**Key Development Objective #4:** There are no HCC Highways approved off-site pedestrian and cycle links as part of planning application 5/2021/0423. We have strong and defensible evidence that any such works would be unsafe for all highways users on the A1081 section between the Ancient Briton and New Green Avenue.

**Key Development Objective #6:** Any applications must provide an adequate Environmental Impact Assessment, including the impact of the ecological corridors supporting Heartwood Forest. The application 5/2021/0423 delivered what is considered, a substandard condition on bio-diversity protection and enhancement with the new owner of that parcel of land already unlawfully removing over 500m of protected hedgerow.

**Key Development Objective #7:** There is noise data already available via Defra. The railway line sits at an elevation of approximately 30mtrs. There are no noise buffers available in current construction methodologies to mitigate for this.

**Key Development Objective #8:** There is a serious visual impact on the landscape if this land is developed. See Appendix 1a and 1b: “Sewell Application” for details of the adverse visual impact on the landscape at Site B1, especially from the Hertfordshire Way and public footpaths along the railway line from Long Spring Wood to Sandridgebury Lane, a very popular route due to the linkage to the Hertfordshire Way and Heartwood Forest.

Our consultation response will substantiate the above comments.

## B2 - North East Harpenden, AL5 5EG

### 2 - Mr John A Smith

Submission Number: 2 Submission Date: 02/10/24 15:36

Respondent: Company/Organisation: Name: Mr John A Smith

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In the cases of proposed housing developments in north-west and north-east Harpenden, SADC needs to comply with Legal Requirements regarding flooding risk, including off-site impacts on the Luton Road . See the following from January 2024: Substation Action Save East Suffolk Ltd, R (On the Application Of) v Secretary of State for Energy Security and Net Zero [2024] EWCA Civ 12. This case centres on the proper interpretation of paragraphs 159 to 167 of the 2021 version of the NPPF, which dealt with flood risk, and related sections of the PPG. It also deals with the correct approach to assessing cumulative impacts.

The National Planning Policy Framework (NPPF) sets out the strict policy tests, which all local planning authorities are expected to follow. For both plan-making and decision-taking, inappropriate development should be avoided by directing development away from areas most at risk of flooding from all sources (the “sequential test”) to ensure that development can be safely and sustainably delivered. The Strategic Flood Risk Assessment (SFRA) carried out by the local authority will provide the basis for applying the sequential test, informed by internal drainage boards and by the Environment Agency to ensure that local plans are based on a robust evidence base.

If wider sustainability considerations make it necessary for development to be carried out in flood risk locations, then it must be appropriately flood resilient and resistant, safe for the lifetime of the development (this is normally a minimum of 100 years for residential development), having regard to the vulnerability of the end-users, and, where possible, reduce flood risk overall (“the exception test”).

Off-site impacts: It will need to be shown that run-off from the proposed development will not increase flood risk elsewhere (e.g. by giving priority to the use of sustainable drainage systems). The Floods and Water Management Act 2010 establishes a Sustainable Drainage Systems Approving Body in unitary or county councils. This body must approve drainage systems in new developments and re-developments before construction begins.

Where is the evidence that all this has been done?

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To hear what the SADC say and propose about Harpenden and understand the damage they will impose on the town, which is really just a village that has grown when you see how narrow the roads are.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I am concerned at two things, particularly in relation to the planned sites B2 (North East Harpenden), B7 (North West Harpenden) and M7 (Townsend Lane Harpenden)

1. The use of greenbelt land
2. The impact on traffic

1.Each of these sites is greenbelt land, and is used for farming, walking and is a green edge for Harpenden, a place where locals can easily walk to. Creating mass housing here will severely impact the locality. These houses should not be built on greenbelt land.

2. The A1081 from both North and South is severely congested into Harpenden now from 7am – 9.15am and from 3pm – 7pm. The additional traffic these housing developments will bring will make the congestion much worse. There are no safe routes for cyclists and there are minimal plans to improve this. I think the local plan has not taken into account the traffic impact of this new housing.

## 33 - Mr Nigel Smith

Submission Number: 33 Submission Date: 28/10/24 09:00

Respondent: Company/Organisation: North Hertfordshire District Council Name: Mr Nigel Smith

Comment Number: 3

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

The northeast Harpenden site (B2) allocation for 738 homes would benefit from the inclusion of a requirement to provide support for bus provision in the rural area north-east of Harpenden to offset car trips generated by the new development. This would help reduce traffic in Harpenden and also benefit local villages such as Kimpton and Blackmore End in North Herts.

In 2022, the council commissioned Arup to undertake a review of the green belt in St Albans district. Arup submitted its final report to the council in June 2023.

One of the primary purposes of the report was to identify sub-areas which might potentially be released from or added to the Green Belt. It examined, among others, two Broad Locations that had previously been identified as possible housing development sites, North East Harpenden and North West Harpenden.

In both cases, Arup considered the Broad Locations in their entirety and as smaller sub-areas. They found that while some sub-areas could be released from the Green Belt without damaging its overall function, other sub-areas "perform strongly against the NPPF purposes and makes an important contribution to the wider Green Belt." These sub-areas were "not recommended for further consideration".

The report was thorough in is methodology and its use of all available evidence in justifying at its conclusions.

Despite this, the council rejected Arup's findings and decided to take both Harpenden Broad Locations forward in their original form. Planning officers submitted the site allocations to the Planning Policy & Climate Committee on 23 September 2024, which agreed that the Broad Locations should be taken forward in their entirety.

This was not an evidence-based decision. Instead, it relied on the assertion of planning officers that only when the sites were accepted as a whole would they "deliver a wide range of significant Economic, Environmental and Social benefits including housing, affordable housing, schools, and a significant scale of sustainable transport improvements and jobs". Evidence to support this statement was not provided, and the viability of taking forward smaller sub-areas was not explored.

This lack of evidence in reaching this decision undermines the credibility of the Local Plan. The council should revisit its Broad Location site allocations and properly consider whether it would be viable to take forward smaller sub-areas for housing development.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We need more homes - As a country, and as a district, we need more homes and it is right that Harpenden has its share. Overall we support the number of homes that are being proposed for Harpenden but have concerns about the size and impact on our community of the two largest – B2 and B7

Infrastructure needs improvement before development starts - Due to previous expansion, and changing lifestyles, the infrastructure that makes Harpenden a pleasant place to live is already overwhelmed. In particular, congested roads, insufficient parking, surface water and sewerage systems, health services and a lack of sustainable transport options. The County and District Councils and NHS bodies must undertake a full review of the current infrastructure and commit to make improvements, before any major new developments (in particular B2 and B7) are considered.

The existing roads around Batford cannot cope with the proposed development - The Society's biggest single concern relates to the development in Batford (B2), an area which will already suffers from inadequate transport infrastructure and poor road layouts (with only two road crossings points into Harpenden) which are unable to cope with the current volume of traffic. Increasing the population in this area of Harpenden by 30% without adequate thought and investment will cause gridlock.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

While no comment is made on the principle of the allocation, the requirements in the policy relating to providing an all weather pitch on the primary school site that would be made available for community use (requirement 2) and on-site sports provision (requirement 3) to meet the additional needs generated by the development (or off-site provision if justified) is welcomed. These requirements would be consistent with the general recommendations in the Council's evidence base for sport (Playing Pitch Strategy) and thereby be consistent with Government policy in paragraph 102 of the NPPF.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

---

### 189 - M E Simons Trust

Submission Number: 189 Submission Date: 07/11/24 15:40

Respondent: Company/Organisation: Bidwells Name: MR Derek Bromley

On Behalf Of Company/Organisation: M E Simons Trust Name:

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Our clients land is proposed as part of the Broad Location Site B2 shown in the Regulation 19 Plan. Our clients support this allocation subject to the qualification/caveat below.

**Is the Plan justified ?**

Whilst the Site B2 north-east Harpenden remains as part of the Local Plan allocation through to its Adoption. our clients will work together with the other land interests in the delivery of a comprehensive scheme Having regard to the recommendations of the Arup Green Belt Study there is a "planning balance" to be drawn between the benefits derived from the wider scheme which includes the provision of a two-form entry primary school, care home, neighbourhood centre and sports facilities against the Green Belt impacts identified in the ARUP Green Belt Study in relation to the whole allocation ( SA 24) which was not recommended That planning balance is a matter for others to decide and our clients make no judgement on this point but recognise the benefits which will accrue from the wider allocation.

The M E Simons land and most of the Wimms land, together with land to the south known as Sauncey View Lodge was separately identified in the ARUP Green Belt study as RC-3 and recommended for further consideration.

It is reasonable that our clients land could either deliver an independent scheme or as a phase of development within the wider strategic location In Appendix 2 we have shown how an access can be delivered off Common Lane which serves our clients land and to provide a link to the north The development of our client's land **as** a phase would not be prejudicial to the strategic allocation, in fact quite the reverse. It is complimentary and provides benefits which could enable the faster delivery of housing. A development of our client's land would be designed so that it overlaps and integrates with a wider Masterplan. As part of the Broad Location, contributions would be made towards the key development requirements education, community and sporting facilities via Section 106 obligations.

**Sustainability**

The site is in a sustainable location, adjoins the settlement edge of Harpenden and is in close proximity to education facilities of nursery, primary, junior and secondary schools, bus transport links. local facilities of shops. pubs, petrol filing station and employment areas.

**Key Development Requirements**

As part of the wider allocation it is envisaged that there would be an indicative overarching

Masterplan (attached as Appendix 3 is the latest iteration of the Master Plan where clients land edged in bold red). There have been joint meetings with the representatives of the respective interests comprising Crest Nicholson. Miller Homes, Octagon Homes, [redacted] (the owners of Sauncey Lodge) and our clients regarding this Master Plan and the earlier iterations. There is nothing which the parties have discussed in respect of the overarching indicative Masterplan which would prevent a phasing of the development.

**Statement of Common Ground**

Pursuant to the delivery of Site B2 allocation, the owners have agreed a Statement of Common

Ground with St Albans Council, on a without prejudice basis. The agreed common ground is that the Council and the owners generally support what is set out in the Local Plan Part A and the Local Plan Part **B,** including subject to the alterations indicated above the key development requirements for Site B2.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Changes to the Plan

As part of the proposed B2 allocation the key development requirements should make provision for a phasing of the development in accordance with a Masterplan approved by the parties and the Council.

In the event the 82 allocation in its present form is not accepted, then our clients land identified in the Green Belt Study as RC -3 should be nevertheless shown as a Green Belt release for housing.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 0189 M E Simons Wimms Reg 19 Subs 2024 OCR_Redacted_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Our client owns part of Site B2 which is identified as one of the Broad Locations to take housing growth. It is therefore of significant importance to the Local Plan and that objections or clarification are properly considered in open forum.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Our clients land is proposed as part of the Broad Location Site B2 shown in the Regulation 19 Plan **Our** clients support this allocation subject to the qualification/caveat below.

Is the Plan justified ?

Whilst the Site B2 north-east Harpenden remains as part of the Local Plan allocation through to its Adoption. our clients will work together with the other land interests in the delivery of a comprehensive scheme Having regard to the recommendations of the Arup Green Belt Study there is a "planning balance" to be drawn between the benefits derived from the wider scheme which includes the provision of a two-form entry primary school, care home, neighbourhood centre and sports facilities against the Green Belt impacts identified in the ARUP Green Belt Study in relation to the whole allocation ( SA 24) which was not recommended That planning balance is a matter for others to decide and our clients make no judgement on this point but recognise the benefits which will accrue from the wider allocation.
The M E Simons land and most of the Wimms land, together with land to the south known as Sauncey View Lodge was separately identified in the ARUP Green Belt study as RC-3 and recommended for further consideration.

It is reasonable that our clients land could either deliver an independent scheme or as a phase of development within the wider strategic location In Appendix 2 we have shown how an access can be delivered off Common Lane which serves our clients land and to provide a link to the north The development of our client's land as a phase would not be prejudicial to the strategic allocation, in fact quite the reverse. It is complimentary and provides benefits which could enable the faster delivery of housing. A development of our client's land would be designed so that it overlaps and integrates with a wider Masterplan. As part of the Broad Location, contributions would be made towards the key development requirements education, community and sporting facilities via Section 106 obligations.

Sustainability

The site is in a sustainable location, adjoins the settlement edge of Harpenden and is in close proximity to education facilities of nursery, primary, junior and secondary schools, bus transport links. local facilities of shops. pubs, petrol filing station and employment areas.

Key Development Requirements

As part of the wider allocation it is envisaged that there would be an indicative overarching Masterplan (attached as Appendix 3 is the latest iteration of the Master Plan where clients land edged in bold red). There have been joint meetings with the representatives of the respective interests comprising Crest Nicholson. Miller Homes, Octagon Homes, [redacted] (the owners

of Sauncey Lodge) and our clients regarding this Master Plan and the earlier iterations. There is nothing which the parties have discussed in respect of the overarching indicative Masterplan which would prevent a phasing of the development.

Statement of Common Ground

Pursuant to the delivery of Site B2 allocation, the owners have agreed a Statement of Common Ground with St Albans Council, on a without prejudice basis. The agreed common ground is that the Council and the owners generally support what is set out in the Local Plan Part A and the Local Plan Part B, including subject to the alterations indicated above the key development requirements for Site B2.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

As part of the proposed B2 allocation the key development requirements should make provision for a phasing of the development in accordance with a Masterplan approved by the parties and the Council.

In the event the 82 allocation in *its* present form is not accepted, then our clients land identified in the Green Belt Study as RC -3 should be nevertheless shown as a Green Belt release for housing.

**Policy B2 – North East Harpenden**

- The draft Local Plan and accompanying Policies Map identifies land at North East Harpenden as a proposed Broad Location for a residential-led mixed-use development. This proposal is **strongly supported** by both Miller Homes and the owners of the Land at Lower Luton Road. As is set out elsewhere in this report, the North East Harpenden site is suitable for development and should be allocated in the Local Plan.
- A total of 738 dwellings is indicatively proposed for this Broad Location and this total seems an appropriate figure at this stage of plan-making. Further masterplanning work will establish more precisely the capacity but 738 is entirely reasonable at this stage.
- The North East Harpenden Broad Location is in separate landownerships. The various parties representing the four landowners are working together and collectively support the allocation. Masterplanning work is underway and discussions have taken place with both the district and county councils.
- The policy allocating this site refers to “key development requirements”. None of the requirements prevent or unduly constrain the development of the site. The first four requirements relate to facilities to be provided in association with, or close to, the local centre. This local centre is proposed to be located on land being promoted by Crest Nicholson as it is the geographical centre of the allocation. This is illustrated on the emerging Masterplan (see Figure 5). Ongoing masterplanning work will set out the active travel links within the site to ensure accessibility and permeability through the site.

- Discussions are ongoing with the County Council in terms of specific improvements to Common Lane and accessibility to the secondary school. It should be noted that access to the secondary school from the Miller Homes part of the site would likely be taken through the existing urban area and improvements to footways on Northfield Road and Salisbury Road, for example, could be secured through a planning consent.
- On a point of detail, the draft Policies Map currently shows the Broad Locations outlined with red dots (which is correct) but also has them shaded in the buff colour that relates to policy LG4 “Site allocations in the Green Belt” (which is not correct). Policy LG4 does not relate to the Broad Locations and the key and/or colour coding will need to be revisited to specify that policy LG1 applies and not policy LG4.

- Notwithstanding Miller Homes’ commitment to working collaboratively on the North East Harpenden Broad Location, if the Local Plan strategy were to change through the Examination process and this Broad Location not be taken forward, then the Miller Homes site could be retained as a separate housing allocation in its own right. As is indicated in the Green Belt assessment at Appendix 1, the site has robust Green Belt boundaries. The site benefits from its own access on to Lower Luton Road and drainage arrangements can be dealt with separately from the wider Broad Location.
- However, Miller Homes’ priority is in supporting the Broad Location and it is highly likely that this alternative option will not be necessary.
- In summary, we consider Policy B2 to be **legally compliant** and **sound**. **No modifications** are therefore necessary.
-

## 233 - Central Bedfordshire Council

Submission Number: 233 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Central Bedfordshire Council Name:

Comment Number: 8

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

It is stated that the development will result in increases of up to 200 Passenger Car Units (PCU's) on the local network including the B653. As referenced above we are interested in seeing the specifics for the cross-boundary section of the route to ascertain whether those increases relate to cross boundary routes into and out of CBC, rather than on the route further south in the SADC area. If this is the case, CBC would expect to see specific policy requirements for this proposed allocation to ensure that these impacts are addressed and fully mitigated. Highway schemes referenced in the IDP schedule are mainly focussed on access and not any other type of mitigation, of which cross boundary/off site mitigation could be one.

On Behalf Of Company/Organisation: Crest Nicholson Partnerships and Strategic Land Name:

Comment Number: 3

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

5.9 The associated Part B of the Local Plan has also been reviewed in regard to Policy LG1 which requires

general accordance with this and the specific requirements for the Site Allocations.

5.10 The following therefore sets out our comments on Part B, in respect of the allocation including 'B2 North

East Harpenden'.

5.11 The background text to Part B has been changed as follows (with our comments in ***bold italics*** below):

- Table A1.1 – Allocation Sites in the Local Plan has seen the number of sites and associated housing numbers altered. This has reduced the number of sites from 102 to 98 and the reduced the housing numbers produced from them from 11,779 to 10,808 homes.

***While it is recognised that the Council is seeking to meet its currently identified housing numbers before the potential change to Standard Method through the NPPF reform. We would like to seek clarity on the reduction of housing provision here, given that work will be required shortly after adoption of the Local Plan to take into account increased housing numbers.***

***It is also noted that for the majority of the sites listed within the Broad Locations, the housing numbers have been reduced. For instance, Site B2 has seen a decrease from 762 units to 738 units. While these are minor decreases, these do add up and there is no clear explanation***

***within the Part B document, or the evidence base as to why this reduction has been made. We would suggest that explanation is clearly provided in order to ensure the changes can be "justified" and therefore found "sound".***

5.12 The B2 allocation box itself has then been changed as follows (with our comments in ***bold italics*** below):

- Indicative unit capacity has changed from 762 to 738

***We question why this change has been made and where the evidence is for this alteration – as per our comment above at para 5.11.***

***In addition, we note that the wider draft allocation at 'B2' states a proposed indicative capacity of 738 units, whereas the text within the Broad Locations Table 3.1 within the DLP states a minimum of 762. This figure is contradictory and should be 762 (in line with the previous Reg 18 version) to make the most effective use of land. This should be reflected correctly within Appendix B and the wider evidence base.***

- Requirement 1 – altered from the provision of a 60 unit extra care scheme to a 70-80 extra care unit scheme which has been specified as being included within the indicative dwelling capacity for the site.

***We comment that this should be stated at 60-80 units instead of 70-80 units.***

- Requirement 2 – This has added the need for an all-weather sports pitch available for community use under the same requirement as a site for the 2-Form entry primary school.

***We do question why this additional all-weather sports pitch is required when the allocation will be delivering on site outdoor sports provision within the retained land to the north which is to remain in the Green Belt. It is suggested that the need for the community pitch for the school is removed in light of requirement 3 below.***

***Alternatively, this requirement could be worded so that if there are no sports pitches proposed within the Green Belt land then an all-weather pitch is provided on the primary school site, something akin to:***

***"A site for and appropriate contributions towards a 2 FE primary school, including Early Years provision. An all-weather sports pitch available for community use should also be included if on site outdoor sports provision is not provided as set out in criteria 3 below."***

- Requirement 3 – New criterion which requires on-site outdoor sports provision (potentially as part of the remaining Green Belt land) to meet the needs of the development. It also notes that off-site provision could be acceptable where justified and subject to early delivery.

***This addition is supported, particularly noting that this could be provided within the remaining Green Belt land as this would represent an appropriate use of this area. The flexibility for alternative off-site provision is also supported.***

- Requirement 4 – Altered wording from a "*neighbourhood*" to "*local*" centre and inclusion of the need for a Medical Centre alongside the other commercial development opportunities.

***The Infrastructure Delivery Plan within the evidence base states the Integrated Care Board (ICB) requires additional on-site medical facilities within the Harpenden area and that this could be provided at either the North-East Harpenden site or the North-West Harpenden site. It is noted that the North-West site does not refer to the provision of medical facilities, therefore it is assumed that the Council would only be seeking to secure this on the North-East site.***

***There is no objection to this addition in principle, however this additional wording should take into account the fact that the provision of a medical centre should only be required where there is a clear need, given that, healthcare providers are not always willing or able to take on such new facilities. It is recommended this is re-worded to something akin to:***

***"A new local centre to provide local services, including Medical Centre (where there is a demonstrated need) and commercial development opportunities".***

***It would also be beneficial to consider altering this use at the point of construction should development be permitted but the medical facility no longer be required.***

- Requirement 5 – New criterion which requires contributions/enhancements to support relevant schemes set out within the LCWIP and GTPs.

***There is no objection to this addition, subject to these contributions being reasonable in nature given that the allocation is likely to be phased rather than coming forward as one. Any financial contributions should also take into account any on-site improvements being made by developers so that contributions are fair, reasonable, related in scale and kind to the development (under the Regulation 122 tests).***

- Requirement 6 – New criterion which requires support for improvements to walking facilities along Common Lane to mitigate impacts particularly at school pick up/drop off, which could potentially include a footway/cycleway from the site to Common Lane, improved crossings and junctions.

***There are no objections to the current wording of this requirement as it ensures that support is provided rather than the physical provision of the mitigation measures – which may not be possible due to Common Lane not being in control of any of the landowners. It is therefore anticipated this would be through s106 obligations, which may be worth clarifying within the text.***

- Requirement 7 – New criterion requiring support for improved access to Katherine Warrington school, including active travel connections through the site to the school.

***As above, there are no objections to this current wording. It is however suggested this could be amalgamated with Requirement 6 above as some of the improved access arrangements may overlap with proposals along Common Lane.***

- Requirement 8 – New criterion requiring support for links to/from and improvement of the Upper Lea Valley Way into Harpenden and out to Luton.

***There is no objection to this current wording. As above, it is anticipated that this support would be provided through s106 obligations, which may be worth clarifying within the text.***

- Requirement 9 – New criterion requiring support for improvements to the Public Rights of Way that link into the wider network to enable recreational use.

***There is no objection to this current wording, however it is advised it should be clarified whether this support is anticipated through s106 contributions or whether it would just relate to improving the on-site Public Rights of Way. If both are anticipated, then the wording should make clear that any financial contributions would be proportionate taking into account any on-site improvements.***

- Requirement 10 – Altered wording so that development also takes account of all trees protected by Tree Preservation Order as well as the woodland Priority Habitat.

***There is no objection to this updated wording.***

- Requirement 11 – New criterion requiring development to take appropriate account of the environmental constraints being the Flood Zone 2 area; the Source Protection Zone 3; Bedrock Aquifer. It also states no residential development should be outside Flood Zone 1.

***There is no objection to this requirement.***

1. **vi) Plan-wide and Site-Specific Viability**

6.35 It is noted the Reg 19 DLP is now supported by a Local Plan Viability Study, plus site specific studies (including for North East Harpenden).

6.36 In relation to the Strategic Site Testing: North East Harpenden (September 2024) report, it is noted that are some inconsistencies within the data that has been applied. For instance, the size required for the medical centre is stated within Table 2.1 as 443sqm, however within the Appendix 1 it is then listed as 176sqm. It appears that the sizes for the Local Centre and Medical Centre have been switched.

6.37 This error should be rectified and the floorspaces checked to ensure that the final outcome has been calculated properly. It is also not clear within the report where the respective floorspace figures have been derived from.

6.38 This needs to be checked and the source of the floorspaces clarified, particularly as this may impact on the viability estimations. Indeed, it is noted that the overall estimation of contributions for the North East Harpenden site indicates circa. £33,000 per unit, whereas the overall Local Plan Viability Study indicates average per unit costs of £23,000 on the basis of the emerging policies. We recommend the site specific viability study is reviewed further to ensure it can be considered "justified".

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**328 - Charlie Thompson**

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 13

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraph 35 and 36 of the 2023 NPPF require that local plans be positively prepared to be considered sound. To do so they must set out a strategy to meet the area's objectively assessed needs.
Policy HOU3 sets out the LPA's policies in respect of specialist accommodation. This only provides policies for determining applications for older person's accommodation. It does not provide policies for determining applications for children's homes. Similarly, the allocations set out in Part B of the plan make no provision for the needs of the section of the community reliant on this form of housing. Children's homes are smaller units, usually indistinguishable in form from a standard residential dwelling, that provide accommodation for 1-5 children in care. They are a vital part of the care system in Hertfordshire, alongside fostering, adoption, and other more specialist forms of accommodation. Under the Children's

Act 1989 Hertfordshire County Council (HCC) has a statutory duty to provide accommodation to children in care. The 2024 draft consultation National Planning Policy Framework at paragraph 63 also makes clear that local plans should make provision for this group and at footnote 29 makes

clear that the local authority's sufficiency data should be considered suitable evidence of need. While it is expected that this local plan will be examined under the 2023 NPPF, this and HCC's statutory duties taken together mean the local plan ought to make
provision for this cohort.
Since the Regulation 18 consultation HCC is seeking for local plans to address this shortfall. There is currently a shortfall of children's home bed places in Hertfordshire for children in care. The 2024 South West Hertfordshire Housing Needs Assessment at paragraphs 10.83-10.88 shows that there is a need for 19¬39 beds at children's homes. Hertfordshire County Council only has access to 15 beds in St Albans. Countywide sufficiency data shows that it cannot accommodate all its children in care within its boundaries. It currently accommodates 89 children in care within other authorities in England, which is less desirable for children in care and expensive to commission, has a further 70 children or young people on the 'waiting placement' list, and an average of 4-5 new requests each day.
To be considered positively prepared and therefore sound the local plan should therefore make suitable provision for this section of the community within St Albans. This representation suggests modifications that if agreed, or similar, would make the plan sound.

Paragraph 35 and 36 of the 2023 NPPF require that local plans be justified to be considered sound. To do so its policies must be appropriate for the outcomes that they intend to secure.
Policy wording at Part B allocations B1 and B2 states that the primary schools delivered within these allocations should include an all weather pitch (AWP). Part A policies COM1 and COM3 also states that all school should come with a Community Use Agreement (CUA) securing community access to new playing pitches.

It is not clear what the intention of this policy is and therefore what it requires HCC and SACDC (as the authority with sports and leisure responsibilities) to deliver on site. An AWP usually refers to a pitch with artificial grass (an AGP) that can be used more intensively than natural turf. An AGP is not required to deliver a school curriculum, and so are not usually included on a primary school site alongside other enhanced facilities that are needed to enable community use like floodlights, changing rooms, and showers. Moreover, to be usable by a primary school, an AGP would have to be an appropriate size for a school (a junior pitch) rather than for community use (an adult pitch) if that is what is intended. Conversely an AWP could refer to a multi-use games area (MUGA) which is a painted macadam surface enabling multiple sports. While these are provided as standard they too lack enhanced facilities like fencing that are required to enable community use.
Moreover, the requirement at Part A policies COM1 and COM3 for a CUA on all new schools could be interpreted as to require all new schools – not just those at sites B1 and B2 – to have some form of enhanced facilities to enable community access, as the facilities provided on a standard school site will not, on their own, meet the standards required to enable community use, as described above. As facilities on school sites must first and foremost enable a school curriculum, community access will be limited in practice if enhanced facilities are not provided: natural turf pitches would need time to recover outside of school hours to be usable for school PE lessons and the absence of floodlighting limits use in the evening in winter. This reading therefore contradicts the allocations at Part B.
The plan does not include a coherent strategy for the funding and delivery of enhanced facilities on school sites where they are required. Part B allocation B2 does explicitly state that the site should provide contributions for an all-weather pitch, but this wording is not included in allocation B1. The Infrastructure Delivery Plan schedule identifies AWPs generally as a need arising from all Broad Locations to meet the District's sports and leisure duties (and identifies the LPA as the funding body), including on sites B1 and B2 (reference 35 and 36). However, it only lists this as 'desirable', and identifies only that the need attributable to development only justifies a fraction of the overall cost. This means there is a risk that policy could require something that is only partially funded and therefore undeliverable in practice.

To be considered appropriate and therefore sound the local plan should therefore clarify first the intention of Part A policies COM1 and COM3 as to whether it requires all schools to have an AWP to satisfy the CUA requirement and secondly clarify the delivery and funding mechanism for AWPs on schools where they are provided (whether just on sites B1 or B2 or all new schools) to meet the Districts sports and leisure requirement rather than an education need. This representation suggests modifications that if agreed, or similar, would make the plan sound.

To be considered sound the plan must be effective and therefore have a reasonable prospect of delivery.

The site allocations at Part B correctly requires proposals for development to include land and s106 contributions towards the delivery of several primary and secondary schools. This is necessary to satisfy the requirement of NPPF paragraph 99 and HCC strongly appreciates the support that the LPA have placed on sufficient education provision.

HCC's Guide to Developer Infrastructure Contributions and its technical appendices sets out how land and contributions need to be made to ensure that schools are deliverable. Proposals for sites providing schools need to make serviced land available to the County Council (at education values) and make a proportionate s106 contribution towards delivery in accordance with the CIL

regulations. Other sites will make a proportionate s106 contribution. These will be pooled to deliver schools when they are required to meet a cumulative need.

Policy in the Part B site allocations includes delivery of the following (or a similar form of words depending on the allocation):

A 3FE primary school, including Early Years provision, to serve the new community.

Or, in relation to secondary schools:

A site for, and appropriate contributions towards, an 8FE secondary school site within nearby Oaklands land ownership fronting onto Hatfield Road.

These examples' policy wording implicitly limits the deliverability of the schools:

1. It sets a hard target of the capacity of the school, which would limit the schools' ability to open in phases, which is necessary to align supply of places to demand as it builds up over time;
2. It implies in some allocations that schools sought to be developer-built, which is not the County Council's preferred method of school delivery; and
3. In some allocations policy seeks to allocate contributions towards secondary schools for which the land will not be delivered through a s106 process and will instead be delivered as an acquisition later in or following the plan period to meet a cumulative need. Tying the s106 contribution to these secondary schools therefore risks the delivery of other projects needed earlier in the plan period.

The County Council also has a responsibility to ensure sufficient post-16 education, and in Hertfordshire these are usually provided at secondary school 6th forms. The County Council's strategy for post-16 education therefore includes the delivery of 6th forms at new secondary schools and secondary school expansions. For completeness, policy should also refer to 6th form provision as this has a similar relationship to new secondary education provision as early years does to new primary education provision, and the exclusion could therefore inadvertently give the impression that one does not have policy support.

HCC also supports the principle of the plan's support for secondary education in principle. However, since the publication of the Regulation 18 plan, the strategy for East St Albans has changed and the site is now only expected to deliver a 6FE school.

Therefore to be deliverable and therefore considered sound the plan should clarify the maximum capacity of schools, that schools in the first instance should not be developer-built, and that s106 contributions for individual sites should not be tied to school sites that are needed to meet a long term cumulative need. The local plan should also ensure that post-16 education has full support within new secondary schools.

Paragraph 35 and 36 of the 2023 NPPF require that local plans be justified to be considered sound. To do so its policies must be an appropriate strategy for the outcomes that they intend to secure.

Policy HOU3 includes policies against which applications for specialist housing for older people will be determined. Paragraph (c) states that 'In larger sites, it may be appropriate to co-locate specialist housing provision and develop an Integrated Community'. The Associated Retirement Community Operators, the professional body representing housing with care providers, defines Integrated Retirement Communities as a gold standard of housing with care, not as colocation of different types of specialist housing provision, such as housing with care and nursing homes. While HCC has no in-principle opposition to colocation it is not clear that this is indeed what the policy is intended to achieve.

There may be benefits to co-locating housing with care schemes (as opposed to other forms of specialist accommodation for older people) only on sites delivering a larger quantum of this form of specialist older person's accommodation. This may allow them to benefit from improved economies of scale and deliver improved communal facilities and services that smaller scheme would not be able to support themselves. Policy wording within the allocations at Part B, however, refers to delivery of discrete housing with care facilities of 70-80 units. This implies a requirement for separation. This is entirely appropriate for care homes, but there is no in principle reason why housing with care schemes cannot be co-located into a single larger scheme.

Therefore to deliver an appropriate strategy there needs to be clarity as to what the policy wording at HOU3 (c) is intended to achieve, and if there is no other rationale, the plan should clarify that HOU c and the allocations at Part B to permit multiple housing with care schemes to co-locate with each other rather than with other types of specialist accommodation for older people.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To be considered sound the local plan should:

1. Clarify which schools need to deliver enhanced facilities to meet a wider sports and leisure requirement; and
2. Clarify the funding and livery mechanism for enhanced facilities.

Assuming that the intention of the local plan is that only the new schools at sites B1 and B2 need to deliver a junior AGP to meet a wider sports and leisure requirement, CUAs at other schools will only need to enable limited community access to standard school facilities, and SACDC as the local authority responsible for sports and leisure in St Albans will be the funding body (either from themselves or through development), this could be achieved through

amendments to the supporting text and policy as follows:

Supporting Text: 7.19 Schools may make school facilities, such as playing pitches or sports halls, available for community use. New schools may include enhanced sports facilities to meet the Council's sports and leisure strategy and responsibilities. Where there is an intention to deliver these on a new school site, the Council as the local authority with sports and leisure responsibilities will fully fund these through planning obligations or other funding mechanisms. The policy requirement for a community use agreement alone does not imply that enhanced facilities must be provided. Schools without enhanced facilities can also support community access but will be operationally limited and may not be sufficient to meet a formal sports and leisure need.

Part B B1: A 2FE primary school, including Early Years provision, to serve the new and wider community. This should include provision of an all weather artificial grass junior playing pitch available for community use.

Part B B2: A site for and appropriate contributions towards a 2 FE primary school, including Early Years provision and an all weather artificial grass junior sports pitch available for community use.

But see other changes suggested to the wording on school site sizes made separately.

These changes would clarify that the requirement for a CUA does not mean an AWP or other enhanced facilities are required except where explicitly stated in sites B1 and B2 and that the AWP required on sites B1 and B2 is a junior AGP. They also clarify the roles and responsibilities for the delivery and funding of an AWP on any site to avoid the risk that the school becomes undeliverable at development management stage as the delivery mechanism and funding are not agreed. This would, in turn, clarify the outcome that the policy intends to achieve and ensure a deliverable strategy for achieving it.

B2: [deleted text]A 2 FE primary school site
and contributions, including Early Years provision and an all weather sports pitch
available for community use.
But see also comments provided separately in relation to all-weather pitches.

B2: [deleted text] 70-80 self-contained housing with care
units (these units are included within the indicative dwellings figure)

In Part B allocations H1, H2, H4, B2, B4, B5, B6, B7 should include the
following wording: A children's home to accommodate three children in
care and one manager.

2. 1B Childrens Homes_[R].pdf
3. 2D School Delivery Details_[R].pdf
4. 3B Older Persons Accommodation Strategy_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Securing appropriate school provision is a statutory responsibility for the County Council and key to successful plan-making and as such HCC has an interest in ensuing that school provision is financially and operationally deliverable.

---

### 356 - Rachael Donovan

Submission Number: 356 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Hertfordshire and West Essex ICB Name: Rachael Donovan

Comment Number: 18

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**B2 – North East Harpenden**

Further assessment has shown that opportunities to create additional capacity exists within the NHS estate and as such there is no requirement for a new on-site medical centre at North East Harpenden. Therefore, please delete '*medical centre*' in the list of development requirements and add '***Contributions to health facilities and services to meet the needs of new residents***.'

...

- **B2 – North East Harpenden – 738 dwellings**
- **B7 – North West Harpenden – 293 dwellings**

There will be circa 2,200 additional new homes in Harpenden and Wheathampstead by 2041 and additional capacity will be needed. There is a potential in the existing GP premises portfolio in Harpenden to create more capacity by extending and reconfiguring or by removing patient records and re-purposing the vacated space for clinical or administrative use. Section 106 contributions will therefore be sought towards these projects in order to meet the needs of the growing population.

### 357 - Mrs Julia Warren

Submission Number: 357 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Wheathampstead Parish Council Name: Mrs Julia Warren

Comment Number: 13

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**B2 – North East Harpenden.**

We would accept that some development in this proposal would be viable. At the same time, we are concerned that the scale of the development could be detrimental to Wheathampstead should it result in pressure on the numbers at the Katherine Warrington School. This should be considered in the light of the problem caused to the village by the closure of the secondary school in Butterfield Road.

**360 - Cathy Sweeney**

Submission Number: 360 Submission Date: 10/11/24 09:00

Respondent: Company/Organisation: Name: Cathy Sweeney

Comment Number: 1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**St Albans Draft Local Plan 2041**

We understand that the proposed draft Local Plan includes a huge housing development with limited access. We write to object to the area to the North East of Harpenden AL5 5EG being developed.

**Flood Risk**

The site is in a floodplain close to the river. The land and roads around this site have suffered severe flooding making some roads impassible in recent months and years. This includes the Lower Luton Road from which this site is accessed. Further development will only worsen the situation.

**Transport and access**

The Lower Luton Road, Bower Heath Lane and Common Lane which bound the site are already seriously overcrowded. Even without further development traffic is going to increase considerably as further pupils are enrolled at KWS. Increase traffic is already having an effect on air quality in the area. This site is on the east side of the River Lea, with only one local crossing point at Station Road. This junction is within close proximity to the site is already heavily congested and will become more so, as all the main amenities of Harpenden are on the west side of the river. The upheaval caused by construction traffic during the development which is planned over a number of years, is unthinkable and may have serious accident and safety consequences.

**Train Station**

Harpenden is a commuter town and it is highly likely that residents of the proposed new development area will seek travel by train. Access to the station by car cycle walking or bus, will involve negotiating the one river crossing over the River Lea at Station Road. This road is narrow and increased traffic cycling and pedestrian activity will not lead to further congestion but again the possibility of accidents and fear and intimidation particularly for pedestrians and cyclists.

**Bio diversity**

The plan development will cause a massive habitat change for bats, badgers, great crested newts, foxes, deer and birds currently on site and in the surrounding areas.

**Woodland and hedges**

This development would undoubtedly destroy ancient trees and hedges which will have close association with the ancient and protected Woodland at Sauncey Wood adjoining the site.

**Archaeology**

The area is of archaeological interest. There is a Saxon burial ground in close proximity. Adjoining the site used to be a prisoner of War camp during the Second World War and there may be unusual and interesting Artifacts buried there.

**Light pollution**

The proposed development area would give rise to a significant increase in light pollution from the huge number of dwellings and other buildings along with associated outside lighting. This area of countryside is already suffering from the increase lighting from recent inclusion of floodlighting at KWS which originally was restricted against as a condition of the planning granted. Local residents do not want to see street lighting or any other form of light pollution.

**Scale**

This is a huge number of proposed dwellings, and despite the proposed inclusion of education and health care, the local area simply cannot provide enough services for the huge increase in population and associated traffic.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We trust that this objection to the draft Local Plan will be taken very seriously, and that better brown field sites are chosen for development, such as existing industrial, office and retail premises closer to Harpenden Town Centre.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## B3 - West Redbourn, Redbourn, AL3 7HZ

### 38 - Mr Chris Robb

Submission Number: 38 Submission Date: 29/10/24 18:14

Respondent: Company/Organisation: Name: Mr Chris Robb

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

[redacted]

B3 – West Redbourn, Redbourn AL3 7HZ

There are many reasons why I think this proposal will be a bad idea for the village. These are the main ones:

1. **Metropolitan Green Belt** – This should be sacrosanct and not interfered with unless the proposal improves the area. This proposal certainly does not. Green Belt is justified as a buffer to separate existing villages and towns. The new plan on green belt land would see Hemel Hempstead and Redbourn almost merge to create an urban sprawl. This would be undesirable to the extreme. Using the M1 as an artificial buffer is not acceptable.

There are better sites in the St Albans District Council area to build new homes on. There is little mention of brownfield sites. Surely they would be a better option. The area around Leavesden aerodrome for example.

2. **Loss of Agricultural Land** – We are seeing food sourced from abroad increasing hugely in price over the past year. As a nation we need to become more self sufficient. To promote this, our agricultural land needs to be protected.
3. **Access to the site –** The proposal discusses the impact on Flamsteadbury Lane and Lybury Lane, but there is no mention of Mansdale Road or Ben Austins which are adjacent to the site. There is also no detail about access to the site. The surrounding roads are not built to cope with potentially an extra 1,200 cars.
4. **Highways considerations in development control** – St Albans District Council should want to make sure the roads in the surrounding area are suitable for the amount of traffic that will be generated. This applies not only to the vast increase in car numbers, but also the construction traffic which may have to go around the Common (**Protected Common Land)**, as well as Flamsteadbury Lane and Ben Austins. An extra 593 homes would mean at least another 1,200 cars and possibly more. The surrounding roads are not built or capable of supporting this.

Furthermore, issues with the M1 are increasing. When this happens traffic comes off at junction 8 and goes around the Redbourn ring road to junction 9. It is gridlocked currently at least twice a week. Many drivers cut through the village as a 'shortcut'. Adding an additional 1,200 cars to the area is only going to worsen the situation.

5. **Access to the site –** The proposal discusses the impact on Flamsteadbury Lane and Lybury Lane, but there is no mention of Mansdale Road or Ben Austins which are adjacent to the site. There is no detail about access to the site. The surrounding roads are not built to cope with potentially an extra 1,200 cars.
6. **Noise & Traffic Pollution –** Following on from the increased number of cars, the levels of noise and traffic pollution would increase significantly and negatively impact the village in a serious way.
7. **Affordable Housing –** This is generally defined as being 80% of the local market value. Given that the average house price in the surrounding area are £660,000+ I would suggest that £528,000 is hardly affordable for a number of families. Details on 'affordable housing' are misleading.
8. **Loss of Privacy –** Living on [redacted] means we face the proposed site. If this project goes ahead then we will lose privacy as we will be overlooked.
9. **Environmental Impact** – There is an oil pipe running underneath this field, from Humber to Heathrow. Building on top of this is a concern in itself. Buncefield is still fresh in many residents minds. The air quality and noise pollution for the homeowners, who would be living right next to the M1 would be unacceptable.
10. **Infrastructure –** The Village is already at capacity for doctors and schools. There is little detail in the plan about additional resources being available. There would need to be concrete details regarding the provision of extra schools, doctors and extra infrastructure. The additional strain on existing local services would be intolerable.
11. **Site Location –** This site will not stimulate the local economy as the site is too far away from Redbourn High Street. Residents are more likely to drive out to Hemel Hempstead because of its proximity.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 73 - Mr Richard Blair

Submission Number: 73 Submission Date: 05/11/24 17:09

Respondent: Company/Organisation: Bidwells Name: MR Derek Bromley

On Behalf Of Company/Organisation: Name: Mr Richard Blair

Comment Number: 2

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

1) These representations are made on behalf of Richard Blair of Flamsteadbury Farm, Redbourn. This is a qualified objection that the Plan is not " Justified" in relation specifically to the detail in Part B of the Plan for Site B3 and Item 1 of the Key development requirements. This qualified objection may become irrelevant in the event the current planning application on land south of Flamsteadbury Lane is granted in advance of the Examination.

2) Our client owns the land shown edged grey on the attached Plan 1. His ownership includes land which falls within administrative area of Dacorum Borough Council which is shown edged red.

3) The land which he owns to the south of Flamsteadbury Lane, shown hatched red, is subject to an agreement with the Vistry Group. Our client has had the opportunity to review the Regulation 19 representations submitted by Turley on behalf of the Vistry Group and supports and endorses them.

4) Flamsteadbury Lane separates the northern part of the site to that of the south. Flamsteadbury Lane is owned for its most length by our client. It is subject to a public right of way.

5) These representations relate only to the land north of Flamsteadbury Lane. Our client supports its proposed allocation of Site 83. In respect of the area north of Flamsteadbury Lane discussions have been held with Robin Blanford (as trustee of the Pennard Trust and Ulver). These discussions relate to the delivery of the land north of Flamsteadbury Lane and the owners have agreed to work together with the aim of bringing this part of the allocation forward.

6) As part of the agreement with Vistry our client has reserved right of access and services through the proposed development to the South of Flamsteadbury Lane, an access which will enable development to take place on his field to the north of Flamsteadbury Lane. The land south of Flamsteadbury Lane is the subject of planning application which has yet to be determined.

7) As referred to in the representations on behalf of the Vistry Group, a planning application has been submitted for up to 300 dwellings and is to become the first phase of development within this proposed allocation.

8) The owners of the land north of Flamsteadbury Lane agreed and submitted representations to Dacorum Borough Council for the land within its administrative boundary east of the M1 to be released from the Green Belt. This replicates the Arup Green Belt study report in relation to this location as sites SA-1 and SA-3A. We hope that under the duty to corporate the Councils would together agree that the M1 should form the natural Green Belt boundary. This will certainly be the case in the representations to the Dacorum Regulation 19 and the subsequent Examination.

**Key Development Requirements**

Item 1

9) "A new two form entry primary school including early years provision, to serve the new and wider community".

10) It is important not to delay the delivery of up to 300 dwellings to the south of Flamsteadbury Lane which is the subject of a planning application validated in January 2022, and where it is hoped it will be decided in early 2025. For clarity the wording in Item 1 should identify that the location for a school would be to the north of Flamsteadbury Lane, thereby ensuring the Council do not seek to use this to frustrate a positive planning decision.

11) Our clients and the owners of the land north of Flamsteadbury Lane will engage with Herts County Council as education authority to assess the pupil yield from the development and pupil capacity within the local schools. As a result of those discussions and a review it will be established whether an "on site" provision of a primary school is necessary or whether contributions would be sufficient to expand or enlarge existing facilities. We are conscious of the falling birth rate and the fact that some local primary schools have capacity. It is usual that Harts County Council require a two form entry level primary school however the housing numbers within this allocation and the pupil yield, would not of itself justify a two form entry school. It would therefore be reasonable and appropriate to discuss what levels of contribution towards the cost of the school would be made either by Herts County Council or other developers which benefit. All these factors will be taken into account at the time planning application is submitted in respect of the land north of Flamsteadbury Lane.

Item 9

12) "The site lies within the Chilterns Beachwood special area of conservation zone of influence. Appropriate contributions must be made toward the Strategic Access Management and Monitoring Strategy **(SAMMS).** Development proposals will also need to make provision for a new Suitable Alternative Natural Green Space (SANG) or alternatively contribute towards the maintenance of a suitable SANG project elsewhere".

13) A suitable SANG application has been submitted to Dacorum Borough Council on land which is owned by our client and is in close proximity to site 83. The SANG requirement is 8 hectares per thousand population and at an average household of 2.4 persons. For the whole allocation the area requirement would be 10.4 hectares. The minimum standards for a SANG requires a 2.3 kilometre circular walk which enables dogs to be let off the lead. The SANG application site is 16.31 hectares which means there is surplus capacity over and above what is required for the allocation. Prior to the planning application being submitted meetings were held with Natural England the key consultee, and any points raised have been addressed. The SANG application is well advanced and a resolution decision is expected on the 12th December. Our client also owns land adjoining the SANG. It has been designed so that, if necessary, it can be extended to assist other developments in the locality (4 kilometres).

14) In respect of the other Key Development Requirements our client has no observations.

15) The Vistry planning application provides all the Bio- Diversity Net Gain (BNG) within the site boundaries. The provision of the SANG on an arable field will mean there is a surplus of BNG credits which can contribute to or provide BNG for the remainder of the allocation.

16) Our client recognises the importance that a Local Plan is put in place given the acute housing shortage of only 1.5 years housing land supply, and to enable early housing delivery.

**Plan Changes**

17) Key development requirement Item 1, to be amended to identify that the provision of a school would be to the north of Flamsteadbury Lane.

**Statement of Common Ground**

18) Our client has agreed to a Statement of Common Ground with St Albans Council on a without prejudice basis. The agreed common ground is that the Council and our client generally supports what is set out in the Local Plan Part A and the Local Plan Part B, including the Key Development Requirements for site 83. There are currently no matters of general disagreement between the Council and our client.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Plan Changes**

17) Key development requirement Item 1, to be amended to identify that the provision of a school would be to the north of Flamsteadbury Lane.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Blair Reg 19 Subs 2024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Our client is the major landowner in respect of Site B3. This site is identified as one the Broad Locations to take housing growth. It is therefore of significant importance to the Local Plan and that any objections or clarification is properly considered in open forum.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 97 - Mr Paul Owen

Submission Number: 97 Submission Date: 06/11/24 13:37

Respondent: Company/Organisation: Name: Mr Paul Owen

Comment Number: 3

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Sites in Redbourn and east/north Hemel will cause the Green Belt to disappear between Redbourn and Hemel. Most are in areas categorised as Important and require a compelling reason to build. The only reason stated is for Social or Affordable Housing which surely means the 60% of planned housing not in those categories should not be built on Green Belt as such housing is not compelling bu need but financial.

The impact of all the HGC and West Redbourn proposed has only Ben considered on a site by site basis. A significant proportion of traffic to and from the Sites would coallesce on the same small roads between Hemal and Redbourn, St Albans, Harpenden and the M1. The travel infrastructure barely supports the traffic currently at peak times. Therefore, the impact cannot be considered safe as required.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The individual areas should also be considered in relation to each. Ie if one area is developed the importance of adjacent areas should reconsidered to reflect that.

The traffic plan for each residential site should be considered sequentially in the expected order of start to take in to account the effect of the moving starting position.

### If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

### 111 - Cllr. David Mitchell

Submission Number: 111 Submission Date: 06/11/24 16:01

Respondent: Company/Organisation: Name: Cllr. David Mitchell

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Hemel Garden Communities (HGC) programme is at a very early stage in its concept. 11,000 new houses is a huge project yet there is no substantial evidence to show it is viable and deliverable. It is all on greenbelt land NOT recommended by the ARUP green belt review for development. The land is in the Chiltern Hills and the northern parts are adjacent to the National Landscape which should be protected. It is high quality agricultural land, grade 2 and 3a, which should be reserved for our food security. HGC is not served well by public transport. The four closest rail stations are all several miles away and the bus services are currently poor. The HGC programme is over-reliant on people walking and cycling, with little private parking being made available or new main roads being provided. This would require a huge modal shift which would be difficult to achieve in the time scale. In this respect, HGC a very risky social experiment.The HGC is a long way from the Hemel town centre so the development does not connect well with the rest of Hemel. Over a third of St Albans District's new housing is proposed at HGC which does not connect well with the rest of the District. The Nickey Line is enthusiastically being put forward as a significant

cycle and footpath linking Hemel to Harpenden via Redbourn but currently this route is not fit for purpose. HGC might seem great on paper but the reality of building a new town onto to an existing new town is not good spatial planning.

The site at West Redbourn (B3) has no proper access. The proposed access points are from existing cul-de-sacs and country lanes, and traffic would have to travel across Redbourn Common. This would have a big impact on the existing community.

South of Harpenden Lane, Redbourn (LG4) is mostly a flood plain. This is noted but further work needs to done on the impact new development would have on the existing development. More work needs to be done on the affect development would have on the rare chalk stream that flow through Redbourn, i.e. the River Ver and the River Red.

The broad sites in the Local Plan are proposed on over 700 hectares of greenbelt in total, of which over 500 were not recommended by ARUP for consideration in their green belt review. Half of the SADC green belt sites are in the HGC area, which is a big loss of greenbelt in one area. If HGC goes ahead it would be urban sprawl and lead to coalesence between Redbourn and Hemel Hempstead. It has been asserted that the chosen green belt sites meet the 'exceptional circumstances' criteria for building on the green belt by dint of the need for housing and by building next to existing settlements. However this has not been demonstrated in a way that overcomes all the problems with the HGC programme and the intinsic difficulties of the sites in Redbourn village. The draft Local Plan cannot be considered legal and sound.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

HGC and West Redbourn should not be included in the Local Plan. If they are, much more work needs to be done on the Infrastructure Delivery Plan. A site at NE Redbourn owned by the Lawes Agricultural Trust should be considered instead as it would integrate with Redbourn village much better.

Generally, development should be spread more evenly around the District as this would better meet the needs of St Albans District residents. The lack of public transport and inadequate roads has to be resolved. Maybe the Nickey Line could be a tram line?

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

I am very familiar with the draft Local Plan and have a good working knowledge of planning issues in general. I could add a lot of local knowledge to proceedings particularly the area of the Hemel Gardens Community programme and the sites in Redbourn Village. I am well informed about the District as a whole.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**145 - Catesby Estates**

Submission Number: 145 Submission Date: 07/11/24 11:13

Respondent: Company/Organisation: Stantec Name: Mr P Derry

On Behalf Of Company/Organisation: Catesby Estates Name:

Comment Number: 9

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The site is a thin area of land to the west of Redbourn. The proposed quantum of development appears excessive given the shape of the site and the interfaces with existing built form and the M1, the latter of which is a noise and air quality constraint. There does not appear an appropriate location for a meaningful SANG on site.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to address the key matters made in the representations

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**161 - Mr Michael Street**

Submission Number: 161 Submission Date: 07/11/24 13:08

Respondent: Company/Organisation: Self Name: Mr Michael Street

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

It is understood that all representations on the draft Local Plan must relate to a matter of legal compliance or a matter of soundness as follows:

1. ***Legally compliant*** – the draft Local Plan has been prepared in accordance with the legal and procedural requirements for preparing Local Plans
2. ***Positively prepared*** – the draft Local Plan provides a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
3. ***Justified*** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
4. ***Effective*** – deliverable over the plan period, and based on effective joint working on crossboundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
5. ***Consistent with national policy*** – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant.

**SPECIFIC OBJECTIONS TO SITE B3 WEST REDBOURN, AL3 7HZ** -

Please find below my objections based on the above criteria:

**OBJECTION ONE:** causing a **DISPROPORTIONATE INCREASE IN POPULATION.**

Objection based on item 3 above ***Justified*** - " appropriate strategy……proportionate evidence".

It is proposed to build 545 units on this site. It may be assumed that this will equate to at least twice that number of adults – 1,090. The current population of Redbourn (from council's documents) is approximately 5,000 people - this development will cause a ***21.8% increase in Redbourn's population.*** No other development in the county or country has so large an increase in such a comparatively small population. This is not "appropriate" or "proportionate". This has significant further defect/objections under ***Positively prepared*** in that there is no or very little adequate provision for Secondary Schools, Doctors, Dentists, Public Transport and Road Access.

**OBJECTION TWO: STATUTORY POLLUTION & NOISE BREACHES ON SITE B3**. Based on item 1 above ***Legally compliant*** *and item 5* ***Consistent with national policy*** – Readings from this site breach current DEFRA sponsored Environmental Targets (fine particulate matter) (England) Regulations 2023 set two PM2.5 targets to be met by 2040, these require that the annual mean concentration is 10 µg m-3 or lower.

Given the current press interest there might be a POTENTIAL CORPORATE MANSLAUGHTER CHARGE against Councillors and Planners. The Coroner's Report on the death of Ella Adoo-Kissi-Debrah and the subsequent GLA/TfL's ... paying compensation, could cause Planners and Councillors to be liable for future deaths. There are many dwellings near motorways, some built within the last 5 years BUT we now know that there is a significant and real danger from exhaust particulates. **This site B3 is next to the M1 and it has an almost constant Westerly wind off the M1 blowing directly onto B3**. This pollution will not be solved by the adoption of passenger electric vehicles. Nor mitigated by the construction of a wall between the M1 and the site B3. These particulates come, mostly, from diesel HGVs and Buses.

**With this new, confirmed and verified knowledge it would be reckless and possibly criminal to put dwellings on B3.**

There is also an additional ***Legally compliant*** and ***Consistent with national policy*** issue with **NOISE/SOUND**. Site B3 has readings 200m from M1 (and not taken in the rush hours) which produced a reading of over 70dbs which is considered on or over planning guidelines. "65-70dB" LIKELY **TO EXCEED PROPOSED SOAE**

This is also in in breach of ST ALBANS CITY & DISTRICT COUNCIL's Strategic Policy SP13 – Health and Wellbeing

**OBJECTION THREE A: DESTROYING THE SOURCE OF THE RIVER RED - a very rare CHAULK STREAM** Based on item 2 ***Positively prepared*** . Site B3 is in the middle of the RIVER RED Catchment area see reports below

*[See Images in Attachment]*

**COMPLETE CATCHEMENT AREA RIVER RED - EXCLOSES COMPLETE B 3 SITE**

The Blue extension showing the River Red catchment area (map below). The area above HOLLY BUSH shown on map is in the middle of site B3 and is contrary to items 2

***Positively prepared*** and item 5 ***Consistent with national policy***

*[See Images in Attachment]*

This is in in breach of ST ALBANS CITY & DISTRICT COUNCIL's NEB5 - Blue Infrastructure

**OBJECTION THREE B: FURTHER EVIDENCE OF FLOOD DANGERS TO THE SOUTH EASTERN SITE BOUNDARIES**

*[See Images in Attachment]*

This is in in breach of ST ALBANS CITY & DISTRICT COUNCIL's NEB8 – Managing Flood Risk

**OBJECTION FOUR: POTENTIAL 1,367% INCREASE IN TRAFFIC DOWN MANSDALE ROAD,**

See Annex A (below)for details of calculation.

This is a 4.92 m minor estate road expected to take more than 3,558 journeys a day see Annex A This is in breach of item 2 ***Positively prepared*** –…" as a minimum, **seeks to meet the area's objectively assessed needs"**

Whilst ACCESS to Site B3 is not discussed in the Plan, the proposal of B3 as a site must have an assumption that access would be achieved. The only access request lodged with ST ALBANS CITY & DISTRICT COUNCIL's Planning Department is via Mansdale Road.

This relates to the original and amended planning application **ST ALBANS and DISTRICT 5/2021/3631** Land At Gaddesden Lane Redbourn Hertfordshire AL3 7DP which seeks access for the site B3.

With regard to ACCESS of site B3 there is a clash with the overall intentions of SAMMS.

**BOTH ACCESS points are on top of the catchment area of the River Red** as seen below.

Details are at *THIRD PARTY COMMENT – OBJECTION (R) - (2 OF 2) ANNEX D ITEMS 10 – 11*

*[See Images in Attachment]*

This would further produce extraordinary noise and pollution, especially during building works. This is in breach of ST ALBANS CITY & DISTRICT COUNCIL's Strategic Policy SP13 – Health and Wellbeing.

This also is contrary to their statement within the Plan that they have considered:

*13.18 A Health Impact Assessment (HIA) looks at wider determinants of health and in particular the effects on the vulnerable populations listed above, who are more likely to experience health inequalities. Hertfordshire County Council's new HIA Guidance and Toolkit provides further information.*

This is also in in breach of ST ALBANS CITY & DISTRICT COUNCIL's Strategic Policy SP13 – Health and Wellbeing.

**ANNEX A to OBJECTIONS TO ST ALBANS CITY & DISTRICT COUNCIL DRAFT LOCAL PLAN 2041 REG 19 PUBLICATION**

**TRAFFIC VOLUME AND NOISE CAUSED BY ALLOWING ACCESS VIA 2 ENTRANCES IN MANSDALE ROAD**

As already stated in my original objection there will be a 1,367% TRAFFIC INCREASE on Mansdale Road. For details of calculation see *THIRD PARTY COMMENT – OBJECTION (R) - (2 OF 2) ANNEX A STARTING AT PAGE 8.* The latest Traffic update - *THE PEGASUS GROUP TECHNICAL NOTE DATED 23 JUNE 2023 PEGASUS REF P21-2444*

*TRO4* fails to take any consideration of the extra 293 housing units proposed in the St Albans plan which will have access to Flamsteadbury Lane. *ST ALBANS REG 18 DRAFT*

*LOCAL PLAN JUL 2023,APPENDIX 1, LOCAL PLAN SITE B3*

**One** way to **assess** the impact of the St Albans Plan to build these 593 **(NOTE SINCE CHANGED TO 545 in new plan)** residential units is to view the increase against the total population (and **thus** car trips generated by them); Redbourn & St Albans Plans both mention **Redbourn as having** a population of approximately 5,000. At a modest occupancy rate of 2 per dwelling that would give 1,186 persons or an increase of Redbourn's population **by 23%.** Logically this would be **more than 3,558 journeys a day** (1186 x 1.5 = vehicle ownership, x 2 trips per day). This is a crude illustrative conservative figure, and is lower than one achieved by calculating as per *TRANSPORT ASSESSMENT BY PEGASUS GROUP DATED JAN 22 - FORECAST TRIP GENERATION TABLE 8.1*

This would mean:

All this traffic would have to go down FLAMSTEADBURY LANE.

ALL TRAFFIC would have to go through the Conservation Area.

This would also be the only way heavy construction traffic could access this site for the 5 years of projected construction period.

No Modelling has been shown as to the effect/damage of construction traffic using the proposed ACCESS routes to the B487. *ECOLOGICAL IMPACT ASSESSMENT BY CSA JAN 22 - DUST EMISSION MAGNITUDE, 5.1.4* states " Number of HDVs that will exit the site...anticipated to range between **10-50 HDVs per day**". To this must be added the second site's construction HDVs. Currently, the only HDV regularly accessing Mansdale Road/Flamsteadbury Lane is the rubbish collecting lorry once-a-week with occasional further HDVs accessing Flamsteadbury Farm via Flamsteadbury Lane.

Flamsteadbury Lane and Mansdale Road are not physically constructed for the volume or more especially the weight of 5 years' worth of construction traffic. The junction road surface will break up at the "turning" junctions. All of this Construction traffic will have to pass in and out of the Redbourn Conservation Area.

The Technical note does not address the issue of significant extra Construction noise in the CONSERVATION AREA, alongside the Common and especially during services at St Mary's Church/Churchyard. DETAILS in *THIRD PARTY COMMENT –OBJECTION (R) - (2 OF 2) ANNEX F*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. OBJECTIONS_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

The unique issues with site B3 - Dangerous Pollution and Noise over legislative limits, Danger to River Red catchment area, over 21.8% increase in Village population, Flooding, 1,367% increase in traffic on access roads

These issues are not/will not be voiced. They need personal representation.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**193 - Catesby Estates PLC**

Submission Number: 193 Submission Date: 07/11/24 15:55

Respondent: Company/Organisation: LDA Design Name: Mr Matthew Gibson-King

On Behalf Of Company/Organisation: Catesby Estates PLC Name:

Comment Number: 10

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In summary, there are a number of draft allocations which raise concerns on consistency:

The site is a thin area of land to the west of Redbourn. The proposed quantum of development appears excessive given the shape of the site and the interfaces with existing built form and the M1, the latter of which is a noise and air quality constraint. There does not appear an appropriate location for a meaningful SANG on site.

We have to conclude that not only does the Regulation 19 Plan fail to allocate sufficient sites for housing, or enough in the early stages of the Plan Period, but that Windridge Farm is a stronger contender than some sites the Plan does propose as allocations, even on the Council's terms.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**224 - Redington Capital Limited & CALA Homes**

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 10

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Redington Capital Limited and CALA Homes **object** to Part B (Site Allocations) which forms part of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

Redington Capital Limited and CALA Homes conclude that the site allocation selection process undertaken by the Council is unsound. They recommend that the site selection process should be completely reviewed, revised and the draft allocations re-assessed in a transparent and consistent approach particularly in applying the recommendations of the GBR.

In addition to the above, there are a number of other concerning questions regarding some of the Broad Location sites and other housing site allocations chosen by the Council, including:

- Site B3 (545 homes) - This is a site located within in the Green Belt (SA1, 2 and 3a/b) and is regarded to **strongly** meet the purposes of the Green Belt. This site has no access to secondary school provision, which will mean that pupils will be driven through Redbourn into Harpenden or St Albans to attend secondary school. The Site is also located adjacent the M1 motorway resulting in possible noise and air quality issues that will reduce the site's development capacity. Ther aren't local amenities (shops, etc) in close proximity to the site and it lacks accessibility. This is not a sustainable location to construction new homes. However, it has been included in the Local Plan.

It is clear from the above that the Council has chosen to allocate site:

- In locations deemed to be of strong importance to the purposes of the Green Belt;
- That are not located within the most accessible and sustainable locations; and
- That are either undeliverable or their capacity has been grossly over-estimated.

This demonstrates that the site allocations strategy adopted by the Council needs to be fundamentally reviewed and revised.

This conclusion is further exacerbated when considering the Council has chosen to ignore other more accessible and sustainable sites in lower tier settlements, including Redington Capital Limited and CALA Homes' site (Land South of Chiswell Green Lane), which:

- Benefits from high levels of accessibility by public transport and to local services (as demonstrated in Section 7 below);
- Has less harm to the purposes of the Green Belt (as demonstrated in Section 1 above);
- Is available and deliverable at a density of development that has previously been supported by the Council's planning officers when recommending approval of application ref: 5/2022/0927 (as demonstrated in Section 7 below);
- Is supported by the Inspector when determining Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024; and
- Upheld by the SOS's decision.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council:

- Should be more realistic about its choice of housing sites to deliver its critical housing needs. Some of the current set of site allocations appear to have been included / inflated to "make up the numbers." We therefore strongly recommend that the site allocations are reviewed again and the Council should:
- Remove any sites that are undeliverable;

- Reduce the expected capacity of sites that are obviously constrained and will not therefore delivery the density suggested; and
- Provide evidence to justify all site inclusions and their estimate capacity.
- Include new broad location housing sites that:
- Are located in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and services or will not be used by the district's residents;
- Result in less harm to the purposes of the Green Belt; and
- Are available and deliverable.

Redington Capital Limited and CALA Homes recommends that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing and education land allocation in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

**248 - Historic England**

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 7

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**B3 - West Redbourn, Redbourn, AL3 7HZ**

Whilst there are no designated heritage assets on site, there are a number of listed buildings immediately to the east of the site, including the grade I listed Parish Church of St Mary (LEN: 1295584). In addition, the Aubreys Camp scheduled monument (LEN: 1003520) lies to the west of the site, across the M1 motorway. It is evident that development of B3 has the potential to impact the Parish Church of St Mary and Aubreys Camp scheduled monument by altering their settings.

We welcome the preparation of the detailed Heritage Impact Assessment (HIA) by Place Services.

Whilst we broadly welcome criterion 5, we had provided detailed advice to you by e-mail on 30.7.24 setting out some requirements for this site, in particular that the southern tip should remain open space, that the masterplan will need to be informed by high quality design and that careful consideration should be given to heights in the southern part of the site.

We therefore recommend that these requirements should be incorporated into the policy wording at criterion 5.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Whilst we broadly welcome criterion 5, we had provided detailed advice to you by e-mail on 30.7.24 setting out some requirements for this site, in particular that the southern tip should remain open space, that the masterplan will need to be informed by high quality design and that careful consideration should be given to heights in the southern part of the site.

We therefore recommend that these requirements should be incorporated into the policy wording at criterion 5.

We recommend amending the policy wording to strengthen the policy throughout the Plan. We recommend two slight changes to policy wording throughout the Plan (including this site) which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend 'conserve and where appropriate enhance the significance of the...[list assets]'
2. We would recommend amending `may include setbacks etc.' to read `should include setbacks etc'.

### 260 - Mr Gerald Eastwood

Submission Number: 260 Submission Date: 08/11/24 08:08

Respondent: Company/Organisation: Name: Mr Gerald Eastwood

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

- Proposed West Redbourn (B3) and Hemel Garden Communities developments will completely remove the current green belt buffer between Redbourn and Hemel Hempstead (only 1km remaining). The whole purpose of the green belt is to prevent urban sprawl, these developments completely go against this policy. Even though the ARUP report commissioned by the council rejected the Hemel Garden Communities development due to coalescence, they have decided to proceed anyway – ignoring the findings. An explanation as to why "exceptional circumstances" exist that justify building on this greenbelt land has still not been provided.
- Have the West Redbourn (B3) site and the Hemel Garden Communities developments been considered together? We haven't seen evidence of this – especially when it comes to the greenbelt.
- Loss of arable land when government should be prioritising self-sufficient food chain. Also damaging to the chalk stream network.
- The West Redbourn (B3) site in particular is a complete abomination; even local housing associations have objected to it. The access proposed will create a huge increase of traffic volume throughout the village – making it lose its village identity and putting significant pressure on already over stretched services and road network.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

These representations continue to strongly **support** the emerging **Broad Location B3: West Redbourn** and the identification of this site for growth in the emerging Local Plan. The southern section of the B3 Broad Location, within the control of Vistry, as shown on the red line plan at **Appendix 1**. The site controlled by Vistry is also the subject of a live outline planning application (reference 5/2021/3631) which was validated in January 2022.

The representations provide a high level commentary on the Draft Local Plan, followed by a high level overview of the conformity and compatibility of the submitted outline proposals at Gaddesden Lane with the emerging requirements of Broad Location Site B3: West Redbourn.

West Redbourn, proposes an indicative 545 residential units and contains a number of key development requirements, which are broadly supported by Vistry.

Pursuant to the delivery of the Vistry element of the B3 allocation. Vistry has agreed a Statement of Common Ground with St Albans Council, on a without prejudice basis. The agreed common ground is that the Council and Vistry generally support what is set out in the Local Plan Part A and the Local Plan Part B, including the Key Development Requirements for site B3. The Statement of Common Ground identifies that there are currently no matters of general disagreement between the Council and Vistry Group on the Local Plan and that the Council will continue to work with Vistry Group on the delivery of site B3 in the Local Plan Part B up to and beyond the adoption of the new St Albans Local Plan.

Please see attached Statement for more details

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). **283 - Redbourn Parish Council**

Submission Number: 283 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Troy Planning & Design Name: Mr Troy Hayes

On Behalf Of Company/Organisation: Redbourn Parish Council Name: Redbourn Parish Council

Comment Number: 9

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*Refer to Attached submission letter for whole response and figures.*

**Allocation B3 – West Redbourn**

10.2 The proposed Broad Location B3 West of Redbourn for approximately 545 dwellings is of such a scale that will alter the character of the village forever. This strategic development in the Green Belt to the west of Redbourn is inappropriate and unjustified by evidence. It is noted that the previous Local Plan that was submitted for Examination included no proposed allocations on the edge of Redbourn and / or in the Green Belt surrounding the settlement. There is no explanation from SACDC as to why this extreme change in policy has taken place.

10.3 As SACDC is aware only a small sub area of Parcel GB18B (Green Belt Land to West of Redbourn) at the southwest edge of Redbourn was recommended for further assessment as a small scale sub-area (SA-SS2) in the Stage 1 GBR. This area is described in the Review as Land at southwest edge of Redbourn' the sub-area enclosed by the M1 to the west in the vicinity of Gaddesden Lane which the Review concluded makes limited or no contribution to Green Belt purposes. This parcel appears to be the same or similar to Parcel SA-1 in the GBR Stage 2.

10.4 It is entirely unclear from the GBR Stage 2 how the recommendations from the Stage 1 GBR for a small scale sub-area southwest of Redbourn has now morphed into what is effectively a strategic urban extension bolted onto the historic village. Apparently SACDC has disregarded the GBR Stage 1 recommendations and the proposed allocation is more than double the size (27 ha) of the small scale-sub area (SA-SS2), which was only of an area of 13 ha.

10.5 The GBR states that sub-areas SA-1, SA-3a, SA-3b scored 0 points in table 5.5 of the GBR (2023), stating that these sub-areas do not meet purpose 4: “to preserve the setting and special character of historic towns”. This decision is justified on these sub-areas not making contribution to preserving the setting of historic features. This is not accurate and it is also a simplified assessment and conclusion of the contribution of these sub-areas to the special character of the historic town and its setting. As already mentioned, the Redbourn NDP (paragraph 6.19) states that “The character of Redbourn derives from its scale and relationship with surrounding Green Belt, which comprises countryside, green and open spaces.”

10.6 The Stage 2 GBR states that the sub-area does not abut an identified historic place or provide views to a historic place claiming that it makes no contribution to purpose 4 of the Green Belt; however, as identified in the Stage 1 GBR and is a fact, the parcel adjoins the Redbourn Conservation Area and Grade I and Grade II listings at the Parish Church of St Mary's to the east and the Aubreys Camp Scheduled Monument to the west of the M1.

10.7 The Stage 2 GBR states, in relation to SA-1 that "In combination with SA-2 and SA-3a, the removal of the sub-areas is unlikely to impact on the performance of the wider Green Belt due to the already diminished sense of openness caused by the urbanising influences from Redbourn's settlement edge. The removal of these sub-areas in combination would round off the settlement edge, and further unchecked sprawl would also be restricted by the presence of the M1 to the west." It would appear that the more that Green Belt parcels that are removed from the Green Belt in a certain location the more 'logical' or 'rounded' a settlement may become as a result and that is what Arup use to determine impact on the wider Green Belt. It appears that this is simply being viewed from a parcel boundary point of view where in reality, any development that may take place will need to respond to the site constraints such as noise from the motorway so that the 'rounding off of the settlement edge' is perhaps not as neat and tidy as the consultants would like to think in this high-level study.

10.8 Despite this statement, the Stage 2 GBR then states that due to the site being located on the district boundary, the sub-area may be impacted by potential Green Belt released in the neighbouring authority of Dacorum stating that while the M1 is likely to provide a barrier to sprawl, perceptual merging could still occur. This statement is repeated for SA3a which points to a lack of cross-boundary working on Green Belt matters with Dacorum District and a risk that development

could occur on the western side of the M1 (there is a bridge that crossed the M1 in this location). It should be noted that there are multiple road crossings between Redbourn and the western side of the M1 so it is a permeable barrier and we question any reliance on it as a defensible boundary.

**Site selection**

10.9 The Local Plan **Site Selection Proforma Sheet C-096 (West of Redbourn)** published by the Council in 2024, is not accurate and does not respond to the unbiased and clear evidence. RPC is concerned with the following matters regarding the proforma assessment:

- The pro-forma states that the site is located within "Green Belt Study less important area", but according the GBR and the methodology accompanying the site selection, the site, as per the red line shown in the pro-forma is 'partly within less important area' and partly within an important area. This should be corrected, and justification should be provided to understand the rationale for the changes from the HELAA boundary site to the allocation boundary site. Furthermore, whilst the resulting allocation remains outside of the 'important area', no qualitative assessment has been carried out of the implications of the allocation being brought forward up to the boundary of the 'important area'. How is any future development going to affect the Green Belt in this important location?

*Figure 10.2. Extract of Figure 5.15 Categorisation North (Green Belt Review, 2023)*

- The accessibility scoring is clearly inflated, and it is not a realistic to Redbourn. We have already raised in the spatial strategy section of this representation the concerns with regards to access to sustainable transport options and the frequency of bus services in particular. The sub-areas studied are located on the edge of the settlement, adjacent to 20th century suburban areas with no or very limited access to public transport, where walking distances are exacerbated by a convoluted suburban layout of cul-de-sacs and long residential roads, of difficult access to the town centre, facilities, employment and public transport. Therefore, RPC considers that the 'Strong' scoring in the accessibility section is unjustified.
- The pro-forma makes a simplistic assessment of landscape by only considering whether the site is within or 100m from a landscape conservation area. The site is within the setting of the nationally designated Chilterns Area of Outstanding Natural Beauty (AONB, now National Landscape) but no consideration is given to this important landscape designation and the role of the site in its setting. The 'Strong' scoring of the site with regards to landscape is not informed by evidence and only based on a reduced and simplistic assessment approach.
- The air quality assessment (scoring 'Strong') is only looking at whether there are any air quality management areas in the area, but it does not assess beyond the presence of the air quality designation. The assessment should include a better understanding of the air quality situation, which is likely poor due to the adjacent M1.
- Noise is not considered in the assessment, but these sites are clearly exposed to significant noise pollution due to their close relationship with the M1.
- The called 'qualitative assessment' is not an assessment of any kind. It is simply an outline of the constraints of the site and other factual data, but there is no consideration of the pros and cons, opportunities and constraints and the rationale for some decisions. For instance, whilst the area of study (site ref. C-096) expands beyond the 250m settlement buffer, there is no explanation of why the site selected was reduced in size to stay within the boundary of the buffer.

10.10 The **Site Selection Proforma Sheet C-098 (Gaddesden Lane)** published by the Council in 2024, is also full of inaccuracies and RPC raises the following concerns:

- 110 metres away from Ancient Woodland
- No consideration is given to the Chilterns AONB (now National Landscape) designation and the role of the site in its setting. The 'Strong' scoring of the site with regards to landscape is not informed by evidence and only based on a reduced and simplistic assessment approach.

- The air quality assessment (scoring ‘Strong’) is only looking at whether there are any air quality management areas in the area, but it does not assess beyond the presence of the air quality designation. The assessment should include a better understanding of the air quality situation, which is likely poor due to the adjacent M1.
- Noise is missing in the assessment.
- The qualitative assessment section is also deficient for site ref. C-098, as it recommends the site to progress, but it does not justify the decision on any demonstrable consideration of evidence and its analysis. The section merely repeats facts of the site, but doesnot analyse them in the context of the site selection process.
- The qualitative assessment states that the site scores ‘Medium’ due to, according to the proforma methodology, the site is adjacent or within 100m of any known or likely Archaeological Assets. However, the proforma does not seem to acknowledge the evidence provided by the B3 West of Redbourn Heritage Impact Assessment (May 2024), which states (paragraph 5.8):

*“Evidence from the Historic Environment Record indicates that there is a potential for occupation of the Site in the later prehistoric (probably Bronze Age through to the Late Iron Age) and Roman occupation within the Site. There is also the possibility of medieval remains to be present within the Site. Any development within the Site has the potential to disturb or destroy previously unrecorded archaeological deposits. The deposits are likely to be largely intact with any damage only resulting from agricultural activity.”*

10.11 The Draft Local Plan - Part B (Local Plan Sites) sets out 12 Key Development Requirements. We make the following comments in response to this which does not in any way mean that the Parish Council is supportive of this proposed Broad Location. It objects to its inclusion in the Draft Local Plan. Its comments on the details of Part B are so that the key issues of the sites are further understood and evidenced by SACDC and the developer. We would have expected most of these matters to be assessed and addressed by this stage of the Local Plan where SACDC has already put these forward for inclusion however that is clearly not the case.

- It states that a new primary school is required to serve the new community. We refer SACDC to Policy Red 8 (Community Facilities) of the Redbourn Neighbourhood Development Plan that should be used to inform this.
- The proposed wording should strongly refer to a direct link to the Nickey Lane as a requirement prior the development takes place and to design this access so it is accessible to all users.
- Whilst RPC supports the policy requirement no. 3, it is not written strongly enough and may not be effective as it is. The policy should require a network of pedestrian and cycle routes that permeate and integrate with the rest of the town, facilitating and prioritising pedestrian mobility for all users. These routes should connect key destinations within the site and between the site and nodes and key employment areas, bus stops and facilities in the town.
- The wording of the masterplan requirement is not effective. Requirement 5 should aim for development (and the masterplan) to conserve and enhance the significance of heritage assets and their setting, not to minimise harm. The reference to setbacks is too prescriptive and unnecessary.
- The requirement for a noise assessment regarding the M1 along with mitigation measures - one would have expected for this to already have been undertaken before proposing the area in a Draft Local Plan. This is a 'showstopper' for the area and this technical work needs to be undertaken immediately.
- Requirement no. 6 regarding noise should be integrated in the masterplan design, which should be informed by a noise assessment. Layout, landscape and building design should take into account noise. The development should not rely on fencing, but noise attenuation should be designed in the layout first. Furthermore, the aspiration of the policy should be to achieve the healthiest environment as possible, rather than complying with minimum requirements.

- The reference at no. 8 to the pipeline is insufficient and requirements should be established in the policy, rather than weak sentences such as "development proposals must appropriately take this into account". This is an ambiguous requirement with no clear outcome, therefore it should be amended. There is no mention of the electricity transmission lines that are located west of Redbourn or the need for the mitigation of these constraints.
- There is no specific key development requirement covering the need for archaeological investigation and potential mitigation and enhancement.

10.12 RPC objects to the proposed Broad Location Site B3 West of Redbourn, as the allocation has not been informed by unbiased and sufficient evidence, the assessment of evidence carried out by the Council is clearly insufficient. **This policy is unsound due to it being ineffective, it is not justified and based on proportionate evidence and it is inconsistent with national policy.**

**...**

**17 Policy NEB8 (Managing Flood Risk)**

17.1 The NPPF explains that *"inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future). Where development is necessary in such areas, the development should be made safe for its lifetime without increasing flood risk elsewhere"*[13]. Inappropriate development includes housing and the NPPF is clear that housing development should be directed away from areas at highest risk.

17.2 The NPPF explains[14] that *"All plans should apply a sequential, risk-based approach to the location of development – taking into account all sources of flood risk and the current and future impacts of climate change – so as to avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by:*

1. *applying the sequential test and then, if necessary, the exception test as set out below;*
2. *safeguarding land from development that is required, or likely to be required, for current of future flood management;*
3. *using opportunities provided by new development and improvements in green and other infrastructure to reduce the causes and impacts of flooding, (making as much use as possible of natural flood management techniques as part of an integrated approach to flood risk management); and*
4. *where climate change is expected to increase flood risk so that some existing development may not be sustainable in the long-term, seeking opportunities to relocate development, including housing, to more sustainable locations*

17.3 Policy NEB8 states that *"Proposals located within flood zones (i.e. Flood Zones 2 or 3, or sites within Flood Zone 1 where there is an identified flood risk) need to meet the requirements of the sequential and exception tests, in accordance with national policy."* However, this has not been undertaken in the Council's selection of housing allocations.

17.4 Simply put, given that the site East of Redbourn has significant land within the highest risk of flooding, why did SACDC select the site without first undertaking a Sequential Test?

...

**19 Landscape**

**West of Redbourn (Broad Location B3) Landscape and Visual Assessment**

19.1 RPC is concerned that the allocation policy (Broad Location West of Redbourn B3) is not sufficiently informed by the Landscape and Visual Assessment Sheet (September 2024) and does not set out adequate key development requirements that would address some of the landscape and visual impact concerns. Some issues raised below:

19.2 The Landscape and Visual Assessment Sheet requires "the careful consideration to conserve the rural character of Lybury Lane and setting of the existing settlement, avoid incremental encroachment along Lybury Lane and create a legible settlement gateway" but no key development requirement includes this specific landscape specification and the required masterplan does not refer to the landscape evidence, only requiring setbacks from the Conservation Area.

19.3 The sheet also requires to "understand and respond to the locally distinct character of Redbourn's valued landscapes such as Redbourn Common and the River Ver. Consider the positive relationship between open space and built form." Unfortunately, this hasn't also translated into a design requirement in the allocation policy.

19.4 No reference is made in the allocation policy to the specific landscape and visual impact mitigation proposed in the sheet: *"From the wider area to the south, there are oblique views across the proposed development as it cascades across the elevated and sloping topography. Across the slopes consider layering bands of structural tree planting along the contours to help soften the roofscape in views towards the development."*

19.5 No reference is made to the opportunities to connect Green Infrastructure raised in the sheet: *"Consider opportunity for links with wider network of green infrastructure routes and assets such as Redbourn Common, Flamsteadbury Play Area, Tassell Hall Allotments to north. Opportunity to create green route through centre of site (north to south) connecting to Nickey Line in the south."*

19.6 Given the disregard of the allocation policy to the landscape evidence, RPC considers that the Local Plan is not sufficiently and robustly based on evidence, in this case landscape assessments, as to be an efficient and positively prepared policy, therefore the allocation policy of West Redbourn being **unsound**.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

RPC objects to the proposed Broad Location Site B3 West of Redbourn, as the allocation has not been informed by unbiased and sufficient evidence, the assessment of evidence carried out by the Council is clearly insufficient. **This policy is unsound due to it being ineffective, it is not justified and based on proportionate evidence and it is inconsistent with national policy.**

**..**

.. Given that the site East of Redbourn has significant land within the highest risk of flooding, why did SACDC select the site without first undertaking a Sequential Test?

...

Given the disregard of the allocation policy to the landscape evidence, RPC considers that the Local Plan is not sufficiently and robustly based on evidence, in this case landscape assessments, as to be an efficient and positively prepared policy, therefore the allocation policy of West Redbourn being **unsound**.

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

Respondent: Company/Organisation: National Highways Name: Diana Ngobi

Comment Number: 7

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Site B3 - West Redbourn, Redbourn will provide 545 residential units. As the site is situated on the boundary of the M1, requirements include right of way improvement contributions to the link under the M1 and out into the wider recreational network to the west and a noise assessment must be carried out regarding the M1 which is adjacent to the west, and appropriate mitigating measures provided as necessary, which may include setback of residential units, planting, and acoustic bunding / fencing.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). ### 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 15

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraph 35 and 36 of the 2023 NPPF require that local plans be positively prepared to be considered sound. To do so its policies must set out a strategy to meet the assessed needs of the area.
HCC has a statutory duty to secure sufficient early years provision under the Childcare Acts 2006 and 2016. This includes, but is not limited to, provision within day nurseries for 0-2 year olds, school nursery classes for 3-4 year olds, and school wraparound care for 5-11 year olds. HCC must therefore ensure sufficiency for all three early years cohorts that tend to receive care in different types of settings.
The 2023 Spring Budget increased parents' access to entitlement for early years support for all children under 3 by September 2025 and sets an expectation that all parents should be able to expect wraparound care by September 2026. This means that the plan needs to make sufficient provision for all of these early years

cohorts (0-2, 3-4, and 5-11), with 0-2 being a particular area of need as these are often provided in private day nurseries rather than school settings.
The Regulation 19 draft plan includes childcare facilities within the list of land uses within some broad locations within the supporting text at Part A table 3.1. This follows engagement with HCC at Regulation 18 stage and is welcome. However, policy in Part B does not require that these be provided within the corresponding allocations themselves. While policy wording in Part B does include reference to early years provision within new primary schools for those sites that are delivering new primary schools, these only tend to provide care to 3-4 and 5-11 year olds and not 0-2 year olds. Therefore HCC does not have certainty that the strategy for sufficient early years for 0-2 year olds will be delivered.

Policy COM1 gives policy support to proposals delivering childcare for 0-2 year olds and nursery for 3-4 year olds. This is strongly welcomed. However this is not the only childcare cohort. As part of its statutory sufficiency duty HCC must also ensure sufficient wraparound care for 5-11 year olds. Similarly, policy strategic policy SP7 gives policy support to proposals including nursery provision, which could be taken that only proposals for provision for 3-4 year olds should be given policy weight (as this can refer only this is cohort in some contexts). Again while policy support is welcome, it should ensure that policy support is given to the full range of settings for different age groups.
To be considered positively prepared and therefore sound the local plan should therefore set out a strategy for childcare provision in the allocations in Part B and clarify policy support for all childcare cohorts in the policies at Part A. This representation suggests a modification that if agreed, or similar, would make the plan sound.

To be considered sound the plan must be effective and therefore have a reasonable prospect of delivery.
The site allocations at Part B correctly requires proposals for development to include land and s106 contributions towards the delivery of several primary and secondary schools. This is necessary to satisfy the requirement of NPPF paragraph 99 and HCC strongly appreciates the support that the LPA have placed on sufficient education provision.
HCC's Guide to Developer Infrastructure Contributions and its technical appendices sets out how land and contributions need to be made to ensure that schools are deliverable. Proposals for sites providing schools need to make serviced land available to the County Council (at education values) and make a proportionate s106 contribution towards delivery in accordance with the CIL

regulations. Other sites will make a proportionate s106 contribution. These will be pooled to deliver schools when they are required to meet a cumulative need.
Policy in the Part B site allocations includes delivery of the following (or a similar form of words depending on the allocation):
A 3FE primary school, including Early Years provision, to serve the new community.
Or, in relation to secondary schools:
A site for, and appropriate contributions towards, an 8FE secondary school site within nearby Oaklands land ownership fronting onto Hatfield Road.
These examples' policy wording implicitly limits the deliverability of the schools:
1. It sets a hard target of the capacity of the school, which would limit the schools' ability to open in phases, which is necessary to align supply of places to demand as it builds up over time;
2. It implies in some allocations that schools sought to be developer-built, which is not the County Council's preferred method of school delivery; and
3. In some allocations policy seeks to allocate contributions towards secondary schools for which the land will not be delivered through a s106 process and will instead be delivered as an acquisition later in or following the plan period to meet a cumulative need. Tying the s106 contribution to these secondary schools therefore risks the delivery of other projects needed earlier in the plan period.
The County Council also has a responsibility to ensure sufficient post-16 education, and in Hertfordshire these are usually provided at secondary school 6th forms. The County Council's strategy for post-16 education therefore includes the delivery of 6th forms at new secondary schools and secondary school expansions. For completeness, policy should also refer to 6th form provision as this has a similar relationship to new secondary education provision as early years does to new primary education provision, and the exclusion could therefore inadvertently give the impression that one does not have policy support.
HCC also supports the principle of the plan's support for secondary education in principle. However, since the publication of the Regulation 18 plan, the strategy for East St Albans has changed and the site is now only expected to deliver a 6FE school.

Therefore to be deliverable and therefore considered sound the plan should clarify the maximum capacity of schools, that schools in the first instance should not be developer-built, and that s106 contributions for individual sites should not be tied to school sites that are needed to meet a long term cumulative need. The local plan should also ensure that post-16 education has full support within new secondary schools.

Paragraph 35 and 36 of the 2023 NPPF require that local plans be justified to be considered sound. To do so its policies must be an appropriate strategy for the outcomes that they intend to secure. Policy HOU3 includes policies against which applications for specialist housing for older people will be determined. Paragraph (c) states that 'In larger sites, it may be appropriate to co-locate specialist housing provision and develop an Integrated Community'. The Associated Retirement Community Operators, the professional body representing housing with care providers, defines Integrated Retirement Communities as a gold standard of housing with care, not as colocation of different types of specialist housing provision, such as housing with care and nursing homes. While HCC has no in-principle opposition to colocation it is not clear that this is indeed what the policy is intended to achieve.

There may be benefits to co-locating housing with care schemes (as opposed to other forms of specialist accommodation for older people) only on sites delivering a larger quantum of this form of specialist older person's accommodation. This may allow them to benefit from improved economies of scale and deliver improved communal facilities and services that smaller scheme would not be able to support themselves. Policy wording within the allocations at Part B, however, refers to delivery of discrete housing with care facilities of 70-80 units. This implies a requirement for separation. This is entirely appropriate for care homes, but there is no in principle reason why housing with care schemes cannot be co-located into a single larger scheme.
Therefore to deliver an appropriate strategy there needs to be clarity as to what the policy wording at HOU3 (c) is intended to achieve, and if there is no other rationale, the plan should clarify that HOU c and the allocations at Part B to permit multiple housing with care schemes to co-locate with each other rather than with other types of specialist accommodation for older people.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

B3: A new 2FE primary school site and contributions, including Early Years provision, to serve the new and wider community.

Policy in allocations B3 should include:
A childcare setting capable of providing 30 places including 0-2 year olds.

B3: [deleted text] 70-80 self-contained housing with care units (these units are included within the indicative dwellings figure).

**329 - Mr Russell Crow**

Submission Number: 329 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Mr Peter Atkin

On Behalf Of Company/Organisation: Richborough Estates Name: Mr Russell Crow

Comment Number: 19

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Richborough strongly supports the allocation of West Redbourn under Policy B3, which is consistent with the approach set out in the draft Local Plan's spatial strategy.

Richborough has entered into a promotion agreement with landowners Pennard Bare Trust and Ulvir Limited (PBTU), who control a significant part of the proposed B3 allocation at West Redbourn (c.12.1 hectares). The land under the control of Richborough is situated to the north of Flamsteadbury Lane and is shown on the updated Site Location Plan submitted in support of these representations at **Appendix 1** *[please see attached document]*.

Moreover, as discussed previously, it is noted that a small area of the landownership to the West of Redbourn and to the east of the M1 motorway is located within Dacorum Borough Council's (DBC) administrative boundary and therefore currently excluded from Broad Location B3. This small parcel would represent a logical inclusion as part of proposed Broad Location B3 and Richborough will be engaging with and submitting representations to DBC as part of the Local Plan-making process. SADC should also engage with DBC on this matter through the Duty to Cooperate to ensure opportunities for cross-boundary housing delivery are maximised and a Statement of Common Ground prepared on the matter.

The Site has been promoted as deliverable (suitable, available and achievable) for a number of years, including throughout the preparation of the previous iterations of draft Local Plans produced by the Council. The signing of the promotion agreement with Richborough, which is a leading national land promoter, demonstrates clear and continued commitment to the delivery of this Site which remains available for residential development. Richborough will be able to utilise its significant planning, technical and design expertise to work proactively with the Council to promote the Site through the remainder of the Local Plan process.

On this basis, the Site's identification as part of allocation B3 for the delivery of new housing growth is welcomed and supported. Although Richborough is supportive of the policy in principle, it recommends some modifications to the detailed policy wording to ensure soundness.

**Number of new homes:** B3 identifies the Site capacity as being 545 units. This is defined as being an indicative capacity. The indicative capacity is a reduction from that stated at the Regulation 18 stage (593 units), the reason for this slight reduction in capacity has not been explained. SADC's Housing Land Supply, Windfall and Housing Capacity Evidence Paper (2024) confirms that indicative capacities for proposed Green Belt site allocations remains based on the Housing and Economic Land Availability Assessment (2021). This calculates an approximate capacity based on the application of an average density of 40 dwellings per hectare (dph). The application of a density figure to calculate capacity in this manner is a crude tool. In reality, an average density figure is not applicable to an entire development site. Factors arising from good design principles such as creation of interesting street scenes, distinct character areas, and use of varying housing typologies to best meet local needs means a site's density will vary – with higher densities being more appropriate in central areas and adjoining the motorway boundary. This can be seen in the existing character of Redbourn, with varying densities across the village. The conclusions of the West of Redbourn Heritage Impact Assessment (2024) are also relevant, with its recommendation that an increase in housing densities in the northern part of the Site would be appropriate compared to the southern part of the Site that is in closer proximity to the listed Church and boundary of the Conservation Area.

Nonetheless, Richborough has undertaken initial site-specific capacity testing which has demonstrated that the Site is capable of delivering around 300 homes in a policy compliant manner. Taken together with the current Vistry homes live application for up to 300 homes, this provides a total potential capacity for the allocation of approximately 600 homes.

On this basis, Richborough agree with the approach taken of identifying an indicative capacity for the Site at this stage, and recommend that the final policy wording states a capacity of *approximately* 545 homes to allow flexibility. Richborough is in the process of preparing further detailed technical and design work to further evidence the suitability and sustainability of the Site. The technical work will assist in shaping a Framework Masterplan for the Site, demonstrating how the policy requirements can be delivered while taking into account and addressing known constraints. There are not considered to be any insurmountable constraints, and with careful planning the Site will be able to accommodate significant housing growth supported by public open space, landscape planting and infrastructure. The detailed technical and design work will be shared with the Council in due course as part of the ongoing collaborative working arrangement.

It is noted that the dwelling capacity for West Redbourn remains unchanged at 593 units in Table 3.1 earlier in the draft Local Plan. A consistent approach should be taken to the stated capacity of allocation B3.

**Design principles:** Richborough can confirm that the following key design principles are informing the masterplanning process of the Site, which has been informed by relevant requirements of Policy B3:

- Retention and enhancement of green infrastructure on the northern and western boundaries;
- Potential primary school land provision identified, dependent on confirmation from Local Education Authority (LEA) of the most suitable location for provision within the allocation as a whole;
- Due consideration of pipeline, with open space located along the associated easement;
- Permeable and accessible development, with opportunities identified for connections to existing Public Rights of Way (including south towards the Nickey Line), pedestrian and cycle network;

- Consideration given to the need for Suitable Alternative Natural Greenspace (SANG) or alternatively to contribute towards the maintenance of a suitable SANG project elsewhere;
- Proposals informed by a drainage strategy incorporating Sustainable Drainage Systems, with due regard given to areas of surface water flood risk.

**Criterion 1**– Richborough is committed to working with SADC and stakeholders to ensure that delivery of the allocation is supported by adequate access to local infrastructure, without there being a detrimental impact on existing infrastructure in Redbourn. It is noted that criterion 1 states a requirement for a new 2FE primary school, including Early Years provision. Richborough is willing to work collaboratively with SADC, the LEA and Vistry Homes to identify the most appropriate location within the allocation for the primary school – to ensure the stringent school site location requirements can be met.

The policy should clarify that the requirement is to safeguard land for a new early years and primary school, rather than deliver the school outright. This is to take into account that the ultimate responsibility for delivering the school rests with the LEA (supported by contributions from new development), and indeed that the requirement for education land is dependent on the need for a new school being established at the time of any planning permission being granted for development.

Safeguard land for new 2FE primary school, including Early Years provision, to serve the new and wider community.

**Criterion 2**– relating to contributions towards relevant transport schemes, which are taken from the site-specific transport appraisal undertaken by SADC. In relation to enhancements towards the Nickey Line cycleway, it is noted the IDP confirms this relates to the installation of signage and additional lighting to increase ease of use. Improvements to the A1583 route are not detailed in the IDP (in relation to West Redbourn). It is important that the policy wording maintains an element of flexibility, as any required contributions will need to be evidenced as being directly related to and required to mitigate impacts arising from proposed development.

**Criterion 3**– there is an element of duplication with criterion 2, minor amendments recommended to provide certainty:

Public Rights of Way improvement contribution to the link over the M1 and out into the wider recreational network to the West. The network of Public Rights of Way within the site must be retained and enhanced to encourage local walkers and dog walkers to use local routes into the wider countryside.

**Criterion 4** – again repeats what is covered in principle by criterion 2, and could be deleted.

**Criterion 7**– it is noted that the requested contributions towards Flamsteadbury Park play area are not covered by the IDP. It is also not clear how improvements made to this play area, and its close proximity to the Site, will be taken into account when considering new play provision that is required on the Site. Earlier comments made in response to Policy NEB12 and the recommendation of flexibility in applying open space standards are again relevant.

## B4 - East St Albans, AL4 9JJ

### 223 - Oaklands College and Taylor Wimpey

Submission Number: 223 Submission Date: 07/11/24 18:34

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Oaklands College and Taylor Wimpey Name:

Comment Number: 17

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

(Please see attachment for full submission)

**5 Representations: Part B – Site Allocations**

**5.1 Site Allocations**

Oaklands College and Taylor Wimpey strongly support the inclusion of Site Allocation B4 (East St Albans) in Part B (Site Allocations) of the Regulation 19 Publication Draft Local Plan.

It is appreciated that the Council has taken a conservative approach to development capacity and these estimates are inactive. However, the indicative number of homes that can be delivered on this site should be adjusted from 472 to at least 472 units plus approximately 60 to 80 extra care units for the following reasons:

- To be consistent with the number of homes set out in Table 3.1 of the of the Regulation 19 Publication Draft Local Plan;
- To better reflect the assumptions contained within the 'St Albans District Council Local Plan Viability Study – Strategic Site Testing: East St Albans' (September 2024) which assumes the delivery of 552 new homes (not 472, including extra care units) (as discussed in Section 3.1 and in Appendix 1).

In addition to the above, Oaklands College and Taylor Wimpey suggest that it is in the Council's interest to increase indicative housing figure to ensure:

- The maximum delivery of homes;
- The merging allocations make the most efficient use of land to reduce the pressure to release Green Belt land; and
- Whilst the emerging draft revisions to the NPPF have not yet been adopted following recent consultation, and may be subject to further change, it is worth noting that Central Government's continued drive is to significantly increase the amount of housing. As such, higher housing delivery could be supported by ensuring sites in the draft local plan are developed optimally and not artificially constrained by the site policies which should allow greater numbers of homes where evidenced masterplans submitted with planning applications demonstrate this can be achieved whilst complying with other relevant policies of the draft Local Plan.

Until this amendment is agreed the Council, Oaklands College and Taylor Wimpey must reserve their position by submitting a technical objection to the indicative site capacity shown in Site Allocation B4.

**5.1.1 Suggested Amendments**

Oaklands College and Taylor Wimpey seek the Council's agreement to increase the indicative number of homes that can be delivered on Site Allocation B4 from 472 (including 70 to 80 extra care units) to at least 472 units plus approximately 60 to 80 extra care units. This amendment can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

### 5.1.1 Suggested Amendments

Oaklands College and Taylor Wimpey seek the Council's agreement to increase the indicative number of homes that can be delivered on Site Allocation B4 from 472 (including 70 to 80 extra care units) to at least 472 units plus approximately 60 to 80 extra care units. This amendment can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public.

## 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 14

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Paragraph 35 and 36 of the 2023 NPPF require that local plans be positively prepared to be considered sound. To do so they must set out a strategy to meet the area's objectively assessed needs.
Policy HOU3 sets out the LPA's policies in respect of specialist accommodation. This only provides policies for determining applications for older person's accommodation. It does not provide policies for determining applications for children's homes. Similarly, the allocations set out in Part B of the plan make no provision for the needs of the section of the community reliant on this form of housing. Children's homes are smaller units, usually indistinguishable in form from a standard residential dwelling, that provide accommodation for 1-5 children in care. They are a vital part of the care system in Hertfordshire, alongside fostering, adoption, and other more specialist forms of accommodation. Under the Children's

Act 1989 Hertfordshire County Council (HCC) has a statutory duty to provide accommodation to children in care. The 2024 draft consultation National Planning Policy Framework at paragraph 63 also makes clear that local plans should make provision for this group and at footnote 29 makes clear that the local authority's sufficiency data should be considered suitable evidence of need. While it is expected that this local plan will be examined under the 2023 NPPF, this and HCC's statutory duties taken together mean the local plan ought to make
provision for this cohort.
Since the Regulation 18 consultation HCC is seeking for local plans to address this shortfall. There is currently a shortfall of children's home bed places in Hertfordshire for children in care. The 2024 South West Hertfordshire Housing Needs Assessment at paragraphs 10.83-10.88 shows that there is a need for 19¬39 beds at children's homes. Hertfordshire County Council only has access to 15 beds in St Albans. Countywide sufficiency data shows that it cannot accommodate all its children in care within its boundaries. It currently accommodates 89 children in care within other authorities in England, which is less desirable for children in care and expensive to commission, has a further 70 children or young people on the 'waiting placement' list, and an average of 4-5 new requests each day.

To be considered positively prepared and therefore sound the local plan should therefore make suitable provision for this section of the community within St Albans. This representation suggests modifications that if agreed, or similar, would make the plan sound.

To be considered sound the plan must be effective and therefore have a reasonable prospect of delivery.

The site allocations at Part B correctly requires proposals for development to include land and s106 contributions towards the delivery of several primary and secondary schools. This is necessary to satisfy the requirement of NPPF paragraph 99 and HCC strongly appreciates the support that the LPA have placed on sufficient education provision.

HCC's Guide to Developer Infrastructure Contributions and its technical appendices sets out how land and contributions need to be made to ensure that schools are deliverable. Proposals for sites providing schools need to make serviced land available to the County Council (at education values) and make a proportionate s106 contribution towards delivery in accordance with the CIL

regulations. Other sites will make a proportionate s106 contribution. These will be pooled to deliver schools when they are required to meet a cumulative need.

Policy in the Part B site allocations includes delivery of the following (or a similar form of words depending on the allocation):

A 3FE primary school, including Early Years provision, to serve the new community.

Or, in relation to secondary schools:

A site for, and appropriate contributions towards, an 8FE secondary school site within nearby Oaklands land ownership fronting onto Hatfield Road.

These examples' policy wording implicitly limits the deliverability of the schools:

1. It sets a hard target of the capacity of the school, which would limit the schools' ability to open in phases, which is necessary to align supply of places to demand as it builds up over time;
2. It implies in some allocations that schools sought to be developer-built, which is not the County Council's preferred method of school delivery; and
3. In some allocations policy seeks to allocate contributions towards secondary schools for which the land will not be delivered through a s106 process and will instead be delivered as an acquisition later in or following the plan period to meet a cumulative need. Tying the s106 contribution to these secondary schools therefore risks the delivery of other projects needed earlier in the plan period.

The County Council also has a responsibility to ensure sufficient post-16 education, and in Hertfordshire these are usually provided at secondary school 6th forms. The County Council's strategy for post-16 education therefore includes the delivery of 6th forms at new secondary schools and secondary school expansions. For completeness, policy should also refer to 6th form provision as this has a similar relationship to new secondary education provision as early years does to new primary education provision, and the exclusion could therefore inadvertently give the impression that one does not have policy support.

HCC also supports the principle of the plan's support for secondary education in principle. However, since the publication of the Regulation 18 plan, the strategy for East St Albans has changed and the site is now only expected to deliver a 6FE school.

Therefore to be deliverable and therefore considered sound the plan should clarify the maximum capacity of schools, that schools in the first instance should not be developer-built, and that s106 contributions for individual sites should not be tied to school sites that are needed to meet a long term cumulative need. The local plan should also ensure that post-16 education has full support within new secondary schools.

Paragraph 35 and 36 of the 2023 NPPF require that local plans be justified to be considered sound. To do so its policies must be an appropriate strategy for the outcomes that they intend to secure.

Policy HOU3 includes policies against which applications for specialist housing for older people will be determined. Paragraph (c) states that 'In larger sites, it may be appropriate to co-locate specialist housing provision and develop an Integrated Community'. The Associated Retirement Community Operators, the professional body representing housing with care providers, defines Integrated Retirement Communities as a gold standard of housing with care, not as colocation of different types of specialist housing provision, such as housing with care and nursing homes. While HCC has no in-principle opposition to colocation it is not clear that this is indeed what the policy is intended to achieve.

There may be benefits to co-locating housing with care schemes (as opposed to other forms of specialist accommodation for older people) only on sites delivering a larger quantum of this form of specialist older person's accommodation. This may allow them to benefit from improved economies of scale and deliver improved communal facilities and services that smaller scheme would not be able to support themselves. Policy wording within the allocations at Part B, however, refers to delivery of discrete housing with care facilities of 70-80 units. This implies a requirement for separation. This is entirely appropriate for care homes, but there is no in principle reason why housing with care schemes cannot be co-located into a single larger scheme.

Therefore to deliver an appropriate strategy there needs to be clarity as to what the policy wording at HOU3 (c) is intended to achieve, and if there is no other rationale, the plan should clarify that HOU c and the allocations at Part B to permit multiple housing with care schemes to co-locate with each other rather than with other types of specialist accommodation for older people.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

B4: A new 2FE primary school site and contributions, including Early Years provision, to serve the new and wider community. [deleted text] A 6FE secondary school site within nearby Oaklands land ownership fronting onto Hatfield Road and appropriate secondary education contributions, including post-16 education.

B4: [deleted text] This site has fallen below 500 units and therefore should not be mandated to deliver a housing with care scheme in accordance with HCC's general strategy.

In Part B allocations H1, H2, H4, B2, B4, B5, B6, B7 should include the following wording: A children's home to accommodate three children in care and one manager.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## B5 - Glinwell, Hatfield Road, St Albans, AL4 0HE

### 82 - Glinwell Plc

Submission Number: 82 Submission Date: 06/11/24 10:31

Respondent: Company/Organisation: Bidwells Name: MR Derek Bromley

On Behalf Of Company/Organisation: Glinwell Plc Name:

Comment Number: 2

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Background**

1.0 Site B5 comprises approximately 20.6 hectares and is currently central to the Glinwell business operations. Whilst areas of the site comprise of commercial horticultural glasshouses, significant and very important uses comprise of warehousing/distribution, packing and packhouse, the company's main offices for the European operations, 17 residential dwellings and a retail outlet.

2.0 As well salad crops being grown at Smallford, crops produced in European satellite operations and elsewhere within the UK are imported to the Smallford site which is the central hub for packing, warehousing and distribution for the Glinwell operations. It is currently the headquarters of Glinwell PLC. The future business plan makes provision for a change to operations and possible relocation.

3.0 The site is level with highway frontage to Hatfield Road and Station Road. Running north to south near the western boundary of the site is the Butterwick Brook. To the south of the site is O'Shea's yard and Alban Way with a listed building comprising the signal box. To the west of the site is the Lyon Way Industrial Estate and to the east residential dwellings along Station Road. To the north beyond Hatfield Road is a sports ground.

**Sustainability**

4.0 Para 1.30 of the Plan refers that the strategy is to locate growth in the most sustainable locations. Para 3.4 refers to *"meet the needs within or close to existing settlements".* Policy SP2 d) seeks to make *"use of the most sustainable locations for growth".* The site adjoins the settlement edge of St Albans.

5.0 Within Smallford there are a number of local facilities within 800m (10 minute walk) including a pub/restaurant, petrol filing station, garage, garden centre with A 1 retail outlet/restaurant, shop, children's nursery and pre-school, veterinary practice and various commercial-industrial premises along the Lyon Way and Acrewood Way Industrial Estates. A local shopping parade on Hatfield Road is 1.5km distance. The Hatfield Business Park is about 1.5km distance. There are public footpaths along Hatfield Road and the Alban Way-cycle/ footpath that links to St Albans city centre and Hatfield.

6.0 Hatfield Road is a main bus route between St Albans and Hatfield, and the nearest bus stops are adjacent to the site or within 60m. Each bus stop has a shelter. All services are via St Albans.

7.0 Smallford is a bus transport intersection for a number of bus routes: -

8.0 305, 300, 331 , 601, 602 and 653.

9.0 The site is therefore well connected for bus routes to and from a number of centres. The local bus stops are served by 7 frequent bus services including links to St Albans City Station. The site has a good level of accessibility to local and medium distance destinations by bus which will provide alternative to car use. In addition, there are good connections to the national motorway network A1M, M1 and M25.

10.0 St Albans City Railway Station is located approximately 4km from the site (17 minutes cycle trip) and is served by First Capital Connect. The City station can be accessed via the Alban Way cycle route.

11 .0 Hatfield station is operated by First Capital Connect is nearby and easily accessible. This serves the King's Cross line.

12.0 Colney Heath has a primary school and Treasures Tots nursery. Oakwood primary school (1.8km) and secondary school's nearby are Nicholas Breakspear (1.6km) and Beaumont (1.8km).

13.0 In addition, the Local Plan Reg 19 Site B4 makes provision for further 2 FE primary school as part of the development. There is a new secondary school as part of the allocation in London Colney.

14.0 In the appeal decisions Chester nursery and Radio nursery, the council accepted that Smallford was a sustainable location. 15.0 From the above, Site B 5 is in a sustainable location. 16.0 Our clients own land either side of Butterwick Brook which is partly within the floodplain but also provides opportunities for biodiversity net gain and compensatory Green Belt improvements.

**Green Belt**

17.0 The site adjoins the St Albans settlement edge. The Arup Green Belt Study identifies the site as a release from the Green Belt. As indicated above, the site can reasonably be regarded as Previously Developed Land (POL) within the Green Belt given the mixed nature of its uses. This type of mixed use being POL was confirmed in Appeal decision at the Chester Nursery Site, Smallford. The Chester Nursery grew annual plants which were mostly sold direct to the public. The Local Plan strategy is to identify POL as a priority for meeting housing need.

18.0 The total site area is stated to be 22.9 hectares. Currently approximately 15 hectares of the site is covered with buildings and hard surfacing. There is a further planning permission for a new glasshouse on the western boundary which has been implemented. This covers another 2.3 hectares. This would take the total site coverage to around 75%.

19.0 Para 1.32 refers to prioritising POL and this repeated in policy SP2 b). Para 3.2 seeks to allocate POL.

20.0 Given the juxtaposition to the St Albans settlement edge and the extent of site coverage with the existing buildings and the approved planning building, the site cannot reasonably be regarded, as fulfilling the five purposes of including land within the Green Belt.

21.0 Whilst the Government's final definition of Grey Belt and the inclusion of Grey Belt as not being inappropriate development within the Green Belt, has yet to be confirmed; the proposed wording for Grey Belt includes *'any other parcels and/or areas of Green Belt land that make a limited contribution to the five Green Belt purposes'.* The case for the Trustees is that Sites A and B do not contribute to the five purposes. It is not the case these sites make a "limited contribution" to Green Belt purposes, but rather they make "no contribution". The Government consultation "Proposed reforms to the NPPF and other changes to the planning system" 24/09/2024 suggests an effective way of providing guidance and refers *"Grey Belt Land which makes a limited contribution to the Green Belt purposes will: a) Not strongly perform against any Green Belt purpose; and b) Have at least one of the following features : Land containing substantial built development or which is fully enclosed by built form. ii Land which makes no or very little contribution to preventing neighbouring towns from merging into one another. iii Land which is dominated by urban uses, including physical developments iv Land which contributes little to preserving the setting and special character historic towns".*

22.0 The site meets all the Grey Belt tests.

**Key Development Requirements**

23.0 Following the Regulation 18 our clients commissioned reports in respect of the following: - a) A Transport Assessment (item 1) b) A Noise Report (item 8) This was to establish that waste operations in the general area would not impact upon the reasonable residential amenity of residents within a proposed development. It should be noted that there was only 1 waste operation within the 250 metre safeguarding area and this a metal recycling facility, conducted within a building on Lyon Way. c) A Minerals Assessment (item 9)

24.0 These reports (which are too large to send collectively) were shared with the Council well before the Reg 19 consultation. The conclusions of each were, that there were no 'showstoppers' to providing residential development on site 85 in accordance with the Local Plan Regulation 19.

25.0 The other items referred to in the key development requirements can be readily addressed in the design stages and processes leading up to a planning application.

**Statement of Common Ground**

26.0 Our client has agreed a Statement of Common Ground with St Albans Council on a without prejudice basis. The agreed common ground is that the Council and our client generally supports what is set out in the Local Plan part A and the Local Plan part B, including the key development requirements for site 85. There are currently no matters of general disagreement between the council and our client.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Glinwell Reg 19 Subs 2024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Our client is the owner of Site B5. This site identified as providing approximately 484 dwellings. The site is of significant importance to the Local Plan that any objection to the allocation or clarification is properly considered in open forum.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 145 - Catesby Estates

Submission Number: 145 Submission Date: 07/11/24 11:13

Respondent: Company/Organisation: Stantec Name: Mr P Derry

On Behalf Of Company/Organisation: Catesby Estates Name:

Comment Number: 10

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

This site is located east of St Albans, close to an existing industrial estate. A field parcel within the site and the Butterwick Brook watercourse currently separates the Industrial Estate from a development of glasshouses, which themselves are located adjacent to the Tier 6 settlement of Smallford. The proposed housing would spur into the countryside away from the other residential areas of the settlement. There are no 'day to day' shops in the vicinity and rather than walk through or around the industrial estate, future residents would no doubt rely upon the car. Despite it being a part-brownfield site, it does not appear spatially an appropriate location for residential units. The scale of development there (436 units) appears excessive in such a lesspreferable location away from services and facilities.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In summary, there are a number of draft allocations which raise concerns on consistency:

This site is located east of St Albans, close to an existing industrial estate. There are no ‘day to day’ shops in the vicinity and rather than walk through or around the industrial estate, future residents would no doubt rely upon the car. Despite it being a part-brownfield site, it does not appear spatially an appropriate location for residential units. The scale of development there (436 units) appears excessive in such a less-preferable location away from services and facilities.

We have to conclude that not only does the Regulation 19 Plan fail to allocate sufficient sites for housing, or enough in the early stages of the Plan Period, but that Windridge Farm is a stronger contender than some sites the Plan does propose as allocations, even on the Council's terms.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**224 - Redington Capital Limited & CALA Homes**

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 11

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Redington Capital Limited and CALA Homes **object** to Part B (Site Allocations) which forms part of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

Redington Capital Limited and CALA Homes conclude that the site allocation selection process undertaken by the Council is unsound. They recommend that the site selection process should be completely reviewed, revised and the draft allocations re-assessed in a transparent and consistent approach particularly in applying the recommendations of the GBR.

In addition to the above, there are a number of other concerning questions regarding some of the Broad Location sites and other housing site allocations chosen by the Council, including:

- Site B5 (484 homes) - This is a site located within in the Green Belt Settlement Buffer (SA-92 and 84). Also, access into this site will need to be from Napsbury Park, but this has not been shown to be deliverable. This questions the deliverability of this site.

It is clear from the above that the Council has chosen to allocate site:

- In locations deemed to be of strong importance to the purposes of the Green Belt;
- That are not located within the most accessible and sustainable locations; and
- That are either undeliverable or their capacity has been grossly over-estimated.

This demonstrates that the site allocations strategy adopted by the Council needs to be fundamentally reviewed and revised.

This conclusion is further exacerbated when considering the Council has chosen to ignore other more accessible and sustainable sites in lower tier settlements, including Redington Capital Limited and CALA Homes' site (Land South of Chiswell Green Lane), which:

- Benefits from high levels of accessibility by public transport and to local services (as demonstrated in Section 7 below);
- Has less harm to the purposes of the Green Belt (as demonstrated in Section 1 above);
- Is available and deliverable at a density of development that has previously been supported by the Council's planning officers when recommending approval of application ref: 5/2022/0927 (as demonstrated in Section 7 below);
- Is supported by the Inspector when determining Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024; and
- Upheld by the SOS's decision.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council:

- Should be more realistic about its choice of housing sites to deliver its critical housing needs. Some of the current set of site allocations appear to have been included / inflated to "make up the numbers." We therefore strongly recommend that the site allocations are reviewed again and the Council should:
- Remove any sites that are undeliverable;
- Reduce the expected capacity of sites that are obviously constrained and will not therefore delivery the density suggested; and
- Provide evidence to justify all site inclusions and their estimate capacity.
- Include new broad location housing sites that:
- Are located in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and services or will not be used by the district's residents;
- Result in less harm to the purposes of the Green Belt; and
- Are available and deliverable.

Redington Capital Limited and CALA Homes recommends that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing and education land allocation in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

Respondent: Company/Organisation: Radlett Society & Green Belt Association (RSGBA) Name: John Whiting

Comment Number: 10

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We note the welcome proposal for a new secondary school and a new primary school to be built in London Colney on the large site south of Napsbury Park. We have long argued that Radlett warrants a secondary school and having a new school at least reasonably close to Radlett would help (and also help Shenley and Borehamwood). It would, though, add further to the traffic along Harper Lane and over the rail bridge; it would also add to the existing congestion at the B556(Harper Lane)/B5378(Shenley Lane) roundabout.

### 40 - mrs corinne fishman

Submission Number: 40 Submission Date: 31/10/24 12:55

Respondent: Company/Organisation: Name: mrs corinne fishman

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In Local Plan Objectives (1.28), under the section Climate Change and Spatial Preferences it refers to the need to 'Prioritise the effective use of land by locating new development on previously developed land first, where appropriate; and protecting and enhancing the Green Belt'. On this basis, why does the plan for development to the West of London Colney (B6) include a proposal for access from the new development for pedestrians, bicycles and vehicles through Grade 2 historic parkland in Napsbury Park when access can be accommodated through the site to Shenley Lane? Enhanced access through the parkland is likely to incur the destruction of areas which have

been designated as having Tree Preservation Orders and will significantly alter the existing character of the parkland with potentially thousands of people using the park to access the school and housing area. This access road contravenes the overall guidance stated in 1.28.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

No additional access routes should be provided through Napsbury Park to the proposed development. All access routes should be provided directly to Shenley Lane.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In Local Plan Objectives (1.28), under the section Natural and Historic Environment, there is a reference to the Natural Environment and Biodiversity which stipulates 'Protect, maintain and enhance the natural environment, including biodiversity, the landscape, green infrastructure and our waterways'. Any felling of trees which have a TPO against them and destruction of woodland in Napsbury Park as documented in B6 could result in the destruction of protected species such as bats which regularly fly over the tree canopy. A full assessment needs to be conducted by a licensed ecologist and arboriculturist to ensure that you're not destroying a bat habitat and acting illegally.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

A full assessment needs to be conducted by a licensed ecologist and arboriculturist to ensure that you're not destroying a bat habitat. Government guidance states that 'All bat species, their breeding sites and resting places are fully protected by law'. https://www.gov.uk/guidance/bats-protection-surveys-and-licences

## 44 - Dr Daniel Fishman

Submission Number: 44 Submission Date: 31/10/24 22:11

Respondent: Company/Organisation: Name: Dr Daniel Fishman

Comment Number: 1

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

As a resident of Napsbury Park, I wish to raise several significant objections to the proposal to provide access to the new developments in B6. Why does the council wish that *"safe and attractive site access for pedestrians, bicycles and vehicles must be provided that connects through and outside the site via Napsbury Park."*?

The Council's Local Plan ignores the Grade II listed nature of the Parkland, subjecting the grounds to wholly unnecessary additional pedestrian, but especially car, traffic. The plans would entail widening existing roads, with the potential destruction of trees, all of which in the Park have TPOs, damaging the habitat of bats and other local wildlife, and significantly impacting upon the domestic and social amenity of the residents of the Park, who moved there for the express reason of living in peaceful parkland.

The Local Plan Objectives 1.28 (Natural and Historic Environment) make reference to 'Protect, maintain and enhance the natural environment, including biodiversity, the landscape, green infrastructure and our waterways'. Allowing access to an area of 324 residential units, and an 8FE school, would result in a significant increase in traffic through the Park, to its detriment, and the detriment of its residents. These residents - through their service charges to the managing agents - pay for the maintenance and upkeep of the Park, which would be jeopardised by these unnecessary access plans.

The Council have ignored the Conservation Area Character Statement for Napsbury Park (February 2019), notably 10.5: *"Careful consideration should be had for any proposed development outside the Conservation Area that could impact on its setting as historic parkland."*

There is no justification whatsoever for adapting the Park for access to the new development, when plenty of access sites can be constructed on Shenley Lane.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Key development requirement point 3 for B6 should be amended to replace the requirement for any access to the new development through the Grade II historic Napsbury Park. This will mitigate against the potential damage to the Park. Instead, point 3 should require that adequate access is developed to enter the new site from Shenley Lane alone.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Napsbury Conservation Area Character Statement_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

As a resident of Napsbury Park, I am extremely concerned about the impact on the Parkland, its wildlife and biodiversity, which the significant increase in pedestrian, cycle and motor vehicle traffic would bring, if *"safe and attractive site access for pedestrians, bicycles and vehicles"* was allowed to go ahead.

In addition, my house is immediately adjacent to the road proposed for adaption to allow this access to occur. Therefore,mine and my families domestic amenity would be directly impacted by such a change to the character of the Grade II listed Historic Parkland. Hence I consider it essential that I am allowed to participate in the hearing session(s).

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

## 79 - Napsbury Park Residents Association NPRA

Submission Number: 79 Submission Date: 06/11/24 08:08

Respondent: Company/Organisation: Napsbury Park Residents Association Name: mrs corinne fishman

On Behalf Of Company/Organisation: Napsbury Park Residents Association NPRA Name:

Comment Number: 2

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

On behalf of the residents of the London Colney area and Napsbury Park, we, the Napsbury Park Residents Association (NPRA), object to certain Key Development Requirements of the above proposal.

As evidenced in the attached below, the draft Local Plan for B6 has not been prepared in accordance with legal and procedural requirements and therefore should be rejected as not 'sound'. These proposals are not 'Justified' - they have not taken into account the reasonable alternatives of providing all access from Shenley Lane - and they are not 'Consistent with national policy' namely the preservation of a Registered Historic Park, Metropolitan Green Belt and Conservation Area with associated biodiversity.

Whilst we appreciate the need for new homes and educational facilities within the District and the proposed enhancement of walking and cycling links to the Town Centre and retail park, we oppose the Key Development Requirements for:

*- safe and attractive site access for pedestrians, bicycles and vehicles which connects through and outside the site via Napsbury Park. A suitable cycle friendly crossing will be required with signal lights*

*- Junction priority and segregated cycle access from Napsbury Park to the new secondary school*

In addition, we understand that there has been an informal discussion for a compulsory purchase order on Napsbury Park to build a four lane access road through Pegrum Drive.

As we will demonstrate below, these proposals blatantly disregard the Council's adopted policy (2019) to preserve the trees, character and design of Napsbury Park and avoid harm to the local ecology.

Furthermore, our evidence shows that the draft Local Plan for B6 has not been prepared in accordance with legal and procedural requirements and therefore should be rejected as not 'sound'. These proposals are not 'Justified' - they have not taken into account the reasonable alternatives

of providing all access from Shenley Lane - and they are not ‘Consistent with national policy’ namely the preservation of a Registered Historic Park, Metropolitan Green Belt and Conservation Area with associated biodiversity.

Significance of Napsbury Park

As recognised in St Albans & City District Council’s 2019 Conservation Area Character Statement for Napsbury Park, the Council has a duty to pay ‘special attention to the desirability of preserving and enhancing the character and appearance of the Conservation Area.’ (1.2). The adopted report states that the ‘landscape of the area is significant, as denoted by the area’s status as a Registered Historic Park’ (2.2).

As a designated Grade II Registered Historic Park and Garden and defined as Metropolitan Green Belt, the Park is deemed to be of ‘national importance and its landscape value is a material consideration in the planning process, meaning that the Local Planning Authority must consider the impact of any proposed development on the special character of the landscape.’ (3.2) Further, ‘the conservation area is covered by a blanket Tree Preservation Order.’ (3.3)

As a Parkland, the area is home to a variety of wildlife and is actively managed by the Residents Association. In 2013, the Napsbury Park Residents Association commissioned a survey by the Royal Society for the Protection of Birds with subsequent surveys held since then. The report identified 84 different species of plants and trees in addition to some 25 species of birds nesting in bird boxes, the tree canopy and log piles around the Park. Residents have also noted bats flying above houses in Azalea Close.

Any detrimental impact on local wildlife would contradict statement 3.9 ‘significant harm to the ecological value of the countryside must be avoided’. Furthermore, government policy regarding biodiversity net gain, states that development should have ‘a measurably positive impact (‘net gain’) on biodiversity, compared to what was there before development ’. Clearly, any destruction of trees and wildlife to accommodate road and cycle access through the Park will result in a net deficit in biodiversity.

Any changes to the road network from widening roads to accommodate additional traffic, adding junction priority and segregated cycle access to the proposed school will be the detriment of the design and layout of the park which was designed to ‘reflect the original, informal parkland area…making the residential layout of the redevelopment less tangible’. (5.6)

The flow of roads and pathways through the Park was a deliberate design which the Council clearly recognised in its Conservation Area Report: ‘The lack of connectivity and through routes makes for a quiet and tranquil environment and, when coupled with the extensive landscaping, makes for a high quality environment and, consequently, a popular residential area. Overall, the design reflects the character of Napsbury as it was first conceived; a quiet, secluded location within the open countryside, with clear separation between distinct areas. Originally, these areas related to the different functions and needs of the hospital, now they relate to different parts of the residential development.’ (5.7)

Under Design Guidance, the Council cites the need for ‘The retention of mature trees and hedges [which are] vital to the street scene and all trees are protected by a Tree Preservation Order’. (9.12)

In terms of development on the surrounding area, the Character statement calls out the need for ‘careful consideration should be had for any proposed development outside the Conservation Area that could impact on its setting as historic parkland’ (10.5).

The importance of the surrounding landscape is reiterated throughout the report and should therefore be given the strongest consideration as part of any development to the south of the Park: ‘The trees and landscape quality of the Conservation Area remain extremely important to its character. Historically the site was chosen partly because of its landscape and position amongst

farmland as this was felt to assist patients with their recovery. Today, despite surrounding development, most notably the construction of the M25 and other main roads, the area retains this quality. This is denoted by its inclusion in the Register of Historic Parks and Gardens as well as the Metropolitan Green Belt. (7.11)

It is noteworthy that the development of the freight terminal by SRFI to the east of the Park will include screening with mature trees around the affected boundary. By doing so, not only will this serve to protect residents from noise but it will also help retain the semi rural feel of the Park.

Impact of proposed new development

An access road to the proposed development of 324 residential units and an 8FE secondary school through Napsbury Park will generate unacceptable volumes of traffic, cyclists and pedestrians through the Park, which will have a detrimental impact on the character and design of the Park.

The existing single access roads through Napsbury Park do not have the infrastructure to support a significant increase in traffic, pedestrians and cyclists generated by the new school and houses without the destruction of protected trees, amenity and quiet enjoyment enjoyed not only by the residents of Napsbury Park but also the local community in London Colney. The Parkland is popular with dog walkers and families who appreciate its safe, low traffic, natural environment.

- Residential units

With limited public transport through and around the Park, the number of households which own cars is likely to be high. According to The National Travel Survey 2021, 'there were 12 cars for every 10 households in England'. 3 Relating this to 324 new residential units could result in 388 additional cars driving through the Park, representing a 60% increase on the current volumes for the 550 homes on the Park.

- School

Based on a typical class size of 22.4 pupils per class, this would equate to 1,254 pupils. In addition, assuming a pupil to teacher ratio of 16.8 per, this would equate to 74 teachers and ancillary staff, amounting to an additional 1,300 additional people accessing the Park by various modes of transport.

With regards to modes of travel, government data published in December 2023, states that 'children aged 11 to 16 made 41% of trips to and from school by walking and 26% by car.

Around 16% of trips to and from school were made by local bus by this age group'. Based on this data, this could generate 326 car journeys and four coaches twice per day. This does not take into account travel by teaching and ancillary staff.

Contravention of Local Plan Objectives

As a designated conservation area, the proposed access routes directly contravene a number of the Local Plan Objectives defined by the Council under Section 1.28 namely:

- Sustainable use of land/Green Belt - …'protect and enhance the Green Belt'

- Community Infrastructure - 'Make sufficient provision for and access to community infrastructure in sustainable locations'

- Natural environment and biodiversity - 'Protect, maintain and enhance the natural environment, including biodiversity, the landscape, green infrastructure and our waterways'

- Heritage - 'Conserve and enhance our rich and varied historic assets and their settings,

celebrating their local distinctiveness and character'

Conclusion

As evidenced above, the proposed access routes through Napsbury Park with associated increases in traffic and pedestrian volumes will have a detrimental impact on the character, biodiversity and appearance of this nationally recognised historic Parkland. Indeed, they directly contravene the Council's own clearly stated policies in its Conservation Area statement and its Local Plan Objectives in addition to national Government planning policies.

As a result, we respectfully ask you to retract the statements for requirements for any form of access to the new school or housing development through Napsbury Park. All access must be provided along Shenley Lane with no impact on the designated Parkland which must be allowed to continue as a 'quiet and tranquil environment' benefiting residents both in Napsbury Park and the surrounding areas and retaining its historic, national importance.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The proposed access routes through Napsbury Park with associated increases in traffic and pedestrian volumes will have a detrimental impact on the character, biodiversity and appearance of this nationally recognised historic Parkland. They directly contravene the Council's own clearly stated policies in its Conservation Area statement and its Local Plan Objectives in addition to national Government planning policies (these are detailed in the attached letter).

As a result, we request that the statements for requirements for any form of access to the new school or housing development through Napsbury Park are retracted. All access must be provided along Shenley Lane with no impact on the designated Parkland which must be allowed to continue as a 'quiet and tranquil environment' benefiting residents both in Napsbury Park and the surrounding areas and retaining its historic, national importance.

Suggested rewording:

3. Primary access must be from Shenley Lane with safe and attractive site access for pedestrians, bicycles and vehicles including a suitable cycle friendly crossing will be required with signal lights.

4. Junction priority and segregated cycle access from London Colney to the new secondary school will be required. Access to the Public Right of Way to the south will be required, and support for the enhancement of the route through to Colney Street may be required. All Rights of Way on the site must be retained.

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The allocation has currently worded is not consistent with national policy, thus enabling the delivery of sustainable development. The below suggested wording is intended to address this

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The revised allocation takes on board the comments made by HCC GIU as part of the previous Local Plan consultation, which notes that a primary school is no longer required as part of the allocation. There are however a number of additional amendments sought, which HCC would like to see taken on board as part of the **B6 Broad Location allocation**. These are:

- The indicative unit numbers for the site should be amended back to the Regulation 18 draft of 405 units, to reflect the indicative masterplan and to ensure achieve a density of 40dph as set out at **Policy LG1**.
- The allocation should allow for the provision of a 70+ bed care facility to reflect the need expressed by HCC Adult Care Services (to be confirmed in separate representations to be made by HCC GIU).
- The allocation should allow for 10 special needs dwellings to reflect the need expressed by HCC Adult Care Services.
- In relation to **Point 3 of the Key development requirements** for the site, it is requested that either the word 'segregated' is removed when describing the proposed cycle access, or the words 'where possible' are added. HCC fully intend to deliver a scheme that is safe for and establishes priority for cyclists and pedestrians, however, there may be some areas outside of the site on route to London Colney, where segregated access may not be possible to achieve.
- The plan included within **Part 2** of the Local Plan as part of the allocation of B6 should remove the whole of the education land from the Green Belt designation, including the area allocated for playing field. This is due to the growing need for new school facilities to meet the wider local/Sport England requirements, by providing community use facilities. This is consistent with the previous representations made by GIU on behalf of Children's Services.
- The plan included within **Part 2** as part of the allocation of B6 should be consistent with the Proposals Map, showing the areas for Community Infrastructure and open space.

In addition to the requested amendments to the West of London Colney allocation, it is also requested that the following amendments to the **Proposals Map** are made to support the above changes and provide a consistent plan:

- It is considered that the area of land identified for the delivery of the entire secondary school provision, including sports pitches should also be removed from the Green Belt. The proposed built form would mean that this land no longer meets the tests of including land within the Green Belt, and the continued designation of the sports pitches as Green Belt would limit the extent that such facilities could serve a dual community / Sport England level of use. It would also mean that any minor extensions or alterations to the school buildings cannot be delivered without the need to demonstrate very special circumstances.
- The land to the south of the secondary school, previously earmarked for a primary school, should be removed from the Green Belt and included within the beige housing allocation designation in order that the site can accommodate the necessary homes to meet the 405 target. Whilst it is currently designated as Green Belt, once the secondary school is built, this piece of land will no longer perform against any of the principles of including land within the Green Belt and would not represent a strong and robust Green Belt boundary.
- It is requested that the Significant Publicly Accessible Green Space (proposed) is removed from the area to the south of Bridleway 4. It is currently unclear whether this will form part of the development scheme, and it is currently not publicly accessible land. Should it become so during the course of the further evolution of the West of London Colney proposals, there is nothing to stop this from happening even without such an allocation.

Further details regarding this site are set out at Chapter 2 of the attached document.

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As noted, the site is directly adjacent to the grade II Napsbury Hospital Registered Park and Gardens and its related Napsbury Park Conservation Area. This has the potential to impact the quantum of development at the site. The scale of development in this location will create a spur

of development into the Green Belt. The quantum of development also appears very high given the area of the site, open space requirements and the need to provide a strong Green Belt boundary.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

## 224 - Redington Capital Limited & CALA Homes

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 12

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Redington Capital Limited and CALA Homes **object** to Part B (Site Allocations) which forms part of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

Redington Capital Limited and CALA Homes conclude that the site allocation selection process undertaken by the Council is unsound. They recommend that the site selection process should be completely reviewed, revised and the draft allocations re-assessed in a transparent and consistent approach particularly in applying the recommendations of the GBR.

In addition to the above, there are a number of other concerning questions regarding some of the Broad Location sites and other housing site allocations chosen by the Council, including:

- Site B6 (324 homes) – This is a site located within in the Green Belt (SA145 to 148) and is regarded to **strongly** meet the purposes of the Green Belt. All of this site is regarded as an important in strategic role terms. It was **not recommended** within the Green Belt Review as an area for release.

It is clear from the above that the Council has chosen to allocate site:

- In locations deemed to be of strong importance to the purposes of the Green Belt;
- That are not located within the most accessible and sustainable locations; and
- That are either undeliverable or their capacity has been grossly over-estimated.

This demonstrates that the site allocations strategy adopted by the Council needs to be fundamentally reviewed and revised.

This conclusion is further exacerbated when considering the Council has chosen to ignore other more accessible and sustainable sites in lower tier settlements, including Redington Capital Limited and CALA Homes' site (Land South of Chiswell Green Lane), which:

- Benefits from high levels of accessibility by public transport and to local services (as demonstrated in Section 7 below);
- Has less harm to the purposes of the Green Belt (as demonstrated in Section 1 above);
- Is available and deliverable at a density of development that has previously been supported by the Council's planning officers when recommending approval of application ref: 5/2022/0927 (as demonstrated in Section 7 below);

- Is supported by the Inspector when determining Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024; and
- Upheld by the SOS's decision.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council:

- Should be more realistic about its choice of housing sites to deliver its critical housing needs. Some of the current set of site allocations appear to have been included / inflated to "make up the numbers." We therefore strongly recommend that the site allocations are reviewed again and the Council should:
- Remove any sites that are undeliverable;
- Reduce the expected capacity of sites that are obviously constrained and will not therefore delivery the density suggested; and
- Provide evidence to justify all site inclusions and their estimate capacity.
- Include new broad location housing sites that:
- Are located in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and services or will not be used by the district's residents;
- Result in less harm to the purposes of the Green Belt; and
- Are available and deliverable.

Redington Capital Limited and CALA Homes recommends that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing and education land allocation in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

**248 - Historic England**

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 9

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**B6 - West of London Colney, AL2 1LN**

This site lies adjacent to the Napsbury Hospital Registered Park and Garden (RPG) (grade H listed) and the Napsbury Conservation Area. The Colney Chapel Moated site, a scheduled monument, lies to the south of the site, together with a cluster of listed buildings including the All Saints Pastoral Centre (grade H* listed) and several grade H listed building a or structure including the Voluntary Mission Movement, London Coal Duty Marker and Farm Cottage garden wall. Any development of the site has the potential to impact these heritage assets by affecting their settings.

We welcome the preparation of the detailed Heritage Impact Assessment (HA) by Place Services.

We broadly welcome criterion 7. However, the policy should be amended to be more specific and reflect the recommendations of the HA in particular the need to retain open space in the northern portion of the site.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We broadly welcome criterion 7. However, the policy should be amended to be more specific and reflect the recommendations of the HA in particular the need to retain open space in the northern portion of the site.

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend a slight change to policy wording throughout the Plan which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend *'conserve and where appropriate enhance the significance of the...[list assets]'*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 276 - Ms Theresa Smith

Submission Number: 276 Submission Date: 08/11/24 09:47

Respondent: Company/Organisation: District Councillor for Napsbury Park and Park Street Name: Ms Theresa Smith

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

insufficient consideration of previous responses during Reg18.

**We oppose the Key Development Requirements for access for this proposal quoted below :**

***- safe and attractive site access for pedestrians, bicycles and vehicles which connects through and outside the site via Napsbury Park. A suitable cycle friendly crossing will be required with signal lights***

***- Junction priority and segregated cycle access from Napsbury Park to the new secondary school***

Napsbury Park is a Grade 2 listed Park and Heritage site and thus has particular protection under the NPPF. and the SADC's 2019 Conservation Area Character Statement for Napsbury Park.

Routing traffic for both a 8 form entry secondary school and 324 residential housing units will contravene all the policies which cover Napsbury Park and create an unacceptable volume of traffic in this protected area.

While the site's development itself is understandable and we are not objecting to the plans for siting the secondary school or the residential development south of Napsbury Park, **routing traffic through Napsbury Park is neither efficient, reasonable or acceptable.**

Napsbury Park is a residential area located to the north of London Colney and represents a small fraction of the community. Most residents, especially families with school-aged children, live in the south and central areas of London Colney. The proposed route would force vehicles to travel north through Napsbury Park before doubling back south to reach the B6 site. This circuitous route unnecessarily increases vehicle mileage, thereby elevating emissions, traffic, and wear on local roads in a way that disproportionately impacts the Napsbury Park community.

Additionally, the primary school feeding students to the senior school within the new development is located directly opposite the B6 site. This proximity suggests a simpler, more logical access solution from the south, where the majority of local families reside.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We propose establishing direct access to the development via Shenley Lane by constructing a roundabout at the Telford Road junction. This route offers several benefits:

1. **Traffic Calming**: A roundabout on Shenley Lane would reduce vehicle speeds, addressing current traffic issues on this busy road.
2. **Enhanced Safety**: Adding a controlled pedestrian and cyclist crossing south of the roundabout would provide safe, direct access for residents, including students, from the main village.
3. **Reduced Traffic Impact on Napsbury Park**: Direct access from Shenley Lane would relieve Napsbury Park from increased traffic flow, preserving the residential nature of the area.

This approach is a common-sense solution that meets the needs of the entire London Colney community. It ensures safe, convenient access for local residents while respecting the integrity of Napsbury Park as a residential neighbourhood.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To fully understand officers reasoning

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

### 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 16

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraph 35 and 36 of the 2023 NPPF require that local plans be positively prepared to be considered sound. To do so they must set out a strategy to meet the area's objectively assessed needs.
Policy HOU3 sets out the LPA's policies in respect of specialist accommodation. This only provides policies for determining applications for older person's accommodation. It does not provide policies for determining applications for children's homes. Similarly, the allocations set out in Part B of the plan make no provision for the needs of the section of the community reliant on this form of housing. Children's homes are smaller units, usually indistinguishable in form from a standard residential dwelling, that provide accommodation for 1-5 children in care. They are a vital part of the care system in Hertfordshire, alongside fostering, adoption, and other more specialist forms of accommodation. Under the Children's

Act 1989 Hertfordshire County Council (HCC) has a statutory duty to provide accommodation to children in care. The 2024 draft consultation National Planning Policy Framework at paragraph 63 also makes clear that local plans should make provision for this group and at footnote 29 makes clear that the local authority's sufficiency data should be considered suitable evidence of need. While it is expected that this local plan will be examined under the 2023 NPPF, this and HCC's statutory duties taken together mean the local plan ought to make
provision for this cohort.
Since the Regulation 18 consultation HCC is seeking for local plans to address this shortfall. There is currently a shortfall of children's home bed places in Hertfordshire for children in care. The 2024 South West Hertfordshire Housing Needs Assessment at paragraphs 10.83-10.88 shows that there is a need for 19¬39 beds at children's homes. Hertfordshire County Council only has access to 15 beds in St Albans. Countywide sufficiency data shows that it cannot accommodate all its children in care within its boundaries. It currently accommodates 89 children in care within other authorities in England, which is less desirable for children in care and expensive to commission, has a further 70 children or young people on the 'waiting placement' list, and an average of 4-5 new requests each day.
To be considered positively prepared and therefore sound the local plan should therefore make suitable provision for this section of the community within St Albans. This representation suggests modifications that if agreed, or similar, would make the plan sound.

To be considered sound the plan must be effective and therefore have a reasonable prospect of delivery.
The site allocations at Part B correctly requires proposals for development to include land and s106 contributions towards the delivery of several primary and secondary schools. This is necessary to satisfy the requirement of NPPF paragraph 99 and HCC strongly appreciates the support that the LPA have placed on sufficient education provision.
HCC's Guide to Developer Infrastructure Contributions and its technical appendices sets out how land and contributions need to be made to ensure that schools are deliverable. Proposals for sites providing schools need to make serviced land available to the County Council (at education values) and make a proportionate s106 contribution towards delivery in accordance with the CIL

regulations. Other sites will make a proportionate s106 contribution. These will be pooled to deliver schools when they are required to meet a cumulative need.

Policy in the Part B site allocations includes delivery of the following (or a similar form of words depending on the allocation):
A 3FE primary school, including Early Years provision, to serve the new community.
Or, in relation to secondary schools:
A site for, and appropriate contributions towards, an 8FE secondary school site within nearby Oaklands land ownership fronting onto Hatfield Road.
These examples' policy wording implicitly limits the deliverability of the schools:
1. It sets a hard target of the capacity of the school, which would limit the schools' ability to open in phases, which is necessary to align supply of places to demand as it builds up over time;
2. It implies in some allocations that schools sought to be developer-built, which is not the County Council's preferred method of school delivery; and
3. In some allocations policy seeks to allocate contributions towards secondary schools for which the land will not be delivered through a s106 process and will instead be delivered as an acquisition later in or following the plan period to meet a cumulative need. Tying the s106 contribution to these secondary schools therefore risks the delivery of other projects needed earlier in the plan period.
The County Council also has a responsibility to ensure sufficient post-16 education, and in Hertfordshire these are usually provided at secondary school 6th forms. The County Council's strategy for post-16 education therefore includes the delivery of 6th forms at new secondary schools and secondary school expansions. For completeness, policy should also refer to 6th form provision as this has a similar relationship to new secondary education provision as early years does to new primary education provision, and the exclusion could therefore inadvertently give the impression that one does not have policy support.
HCC also supports the principle of the plan's support for secondary education in principle. However, since the publication of the Regulation 18 plan, the strategy for East St Albans has changed and the site is now only expected to deliver a 6FE school.
Therefore to be deliverable and therefore considered sound the plan should clarify the maximum capacity of schools, that schools in the first instance should not be developer-built, and that s106 contributions for individual sites should not be tied to school sites that are needed to meet a long term cumulative need. The local plan should also ensure that post-16 education has full support within new secondary schools.

Paragraph 35 and 36 of the 2023 NPPF require that local plans be justified to be considered sound. To do so its policies must be an appropriate strategy for the outcomes that they intend to secure. Policy HOU3 includes policies against which applications for specialist housing for older people will be determined. Paragraph (c) states that 'In larger sites, it may be appropriate to co-locate specialist housing provision and develop an Integrated Community'. The Associated Retirement Community Operators, the professional body representing housing with care providers, defines Integrated Retirement Communities as a gold standard of housing with care, not as colocation of different types of specialist housing provision, such as housing with care and nursing homes. While HCC has no in-principle opposition to colocation it is not clear that this is indeed what the policy is intended to achieve.

There may be benefits to co-locating housing with care schemes (as opposed to other forms of specialist accommodation for older people) only on sites delivering a larger quantum of this form of specialist older person's accommodation. This may allow them to benefit from improved economies of scale and deliver improved communal facilities and services that smaller scheme would not be able to support themselves. Policy wording within the allocations at Part B, however, refers to delivery of discrete housing with care facilities of 70-80 units. This implies a requirement for separation. This is entirely appropriate for care homes, but there is no in principle reason why housing with care schemes cannot be co-located into a single larger scheme.

Therefore to deliver an appropriate strategy there needs to be clarity as to what the policy wording at HOU3 (c) is intended to achieve, and if there is no other rationale, the plan should clarify that HOU c and the allocations at Part B to permit multiple housing with care schemes to co-locate with each other rather than with other types of specialist accommodation for older people.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). Site B6 - West of London Colney AL2 1LN to be restored to Metropolitan Green Belt status. This is based on “SKM” plans which are more than 10 years out of date.

Policy 10.38 this involves the loss of agricultural land, the grading of the land has not been disclosed. Food production has to be increased by 70% during the next 25 years and food miles must be reduced. The extravagant land use for school playing fields must be curtailed. The alternative is for those areas to be opened up for community use with suitable security procedures in place, this will increase demand on sand/gravel/concrete/additional quarrying/excavations will aggrieve many local residents.

There is no evidence that sufficient resources will be available within the local authority to enforce all the standards/conditions mentioned.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Statements to be removed:

“that travel outside London Colney will be reduced.”

Reasons for this modification

Residents will be travelling to work/hospitals/friends and family/sports and entertainment venues etc and many parents will select secondary schools such as Nicholas Breakspear, Sandringham, Marlborough or even Parmiter’s (Garston).

The planned school capacity for this site is larger than necessary.

Statements to be removed (continued):

Site access for pedestrians, bicycles and vehicles will be through napsbury park.

Reasons for this modification:

The additional noise and disturbance will do nothing to further integration between the new residents and the existing residents (ie social cohesion).

Statements to be added: Policy NEB4

Confirmation that land areas within the defined site have or will be sold to SEGRO by Hertfordshire County Council as part of the SRFI compensatory measures. The areas concerned are those bordering the River Colne and those adjacent to Napsbury Park. Also, the intentions concerning the former Barley Mow Farm and Fir Tree Firm.

Confirmation that a Nursing Home accommodating 60 plus people and special needs accommodation for 10 people will be provided.

Confirmation that the site will not involve more than 40 residential units per hectare.

Confirmation that the site will contain 40% appropriate housing provision.

Confirmation that no building on site will exceed for storeys in height.

The landowners intention in the foreseeable future in respect of the agricultural land between site B6 – the Napsbury Park boundary and the railway line.

Comment Number: 6

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In the cases of proposed housing developments in north-west and north-east Harpenden, SADC needs to comply with Legal Requirements regarding flooding risk, including off-site impacts on the Luton Road . See the following from January 2024: Substation Action Save East Suffolk Ltd, R (On the Application Of) v Secretary of State for Energy Security and Net Zero [2024] EWCA Civ 12. This case centres on the proper interpretation of paragraphs 159 to 167 of the 2021 version of the NPPF, which dealt with flood risk, and related sections of the PPG. It also deals with the correct approach to assessing cumulative impacts.

The National Planning Policy Framework (NPPF) sets out the strict policy tests, which all local planning authorities are expected to follow. For both plan-making and decision-taking, inappropriate development should be avoided by directing development away from areas most at risk of flooding from all sources (the “sequential test”) to ensure that development can be safely and sustainably delivered. The Strategic Flood Risk Assessment (SFRA) carried out by the local authority will provide the basis for applying the sequential test, informed by internal drainage boards and by the Environment Agency to ensure that local plans are based on a robust evidence base.

If wider sustainability considerations make it necessary for development to be carried out in flood risk locations, then it must be appropriately flood resilient and resistant, safe for the lifetime of the development (this is normally a minimum of 100 years for residential development), having regard to the vulnerability of the end-users, and, where possible, reduce flood risk overall (“the exception test”).

Off-site impacts: It will need to be shown that run-off from the proposed development will not increase flood risk elsewhere (e.g. by giving priority to the use of sustainable drainage systems). The Floods and Water Management Act 2010 establishes a Sustainable Drainage Systems Approving Body in unitary or county councils. This body must approve drainage systems in new developments and re-developments before construction begins.

Where is the evidence that all this has been done?

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To hear what the SADC say and propose about Harpenden and understand the damage they will impose on the town, which is really just a village that has grown when you see how narrow the roads are.

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I am concerned at two things, particularly in relation to the planned sites B2 (North East Harpenden), B7 (North West Harpenden) and M7 (Townsend Lane Harpenden)

1. The use of greenbelt land
2. The impact on traffic

1.Each of these sites is greenbelt land, and is used for farming, walking and is a green edge for Harpenden, a place where locals can easily walk to. Creating mass housing here will severely impact the locality. These houses should not be built on greenbelt land.

2. The A1081 from both North and South is severely congested into Harpenden now from 7am – 9.15am and from 3pm – 7pm. The additional traffic these housing developments will bring will make the congestion much worse. There are no safe routes for cyclists and there are minimal plans to improve this. I think the local plan has not taken into account the traffic impact of this new housing.

In 2022, the council commissioned Arup to undertake a review of the green belt in St Albans district. Arup submitted its final report to the council in June 2023.

One of the primary purposes of the report was to identify sub-areas which might potentially be released from or added to the Green Belt. It examined, among others, two Broad Locations that had previously been identified as possible housing development sites, North East Harpenden and North West Harpenden.

In both cases, Arup considered the Broad Locations in their entirety and as smaller sub-areas. They found that while some sub-areas could be released from the Green Belt without damaging its overall function, other sub-areas “perform strongly against the NPPF purposes and makes an important contribution to the wider Green Belt.” These sub-areas were “not recommended for further consideration”.

The report was thorough in is methodology and its use of all available evidence in justifying at its conclusions.

Despite this, the council rejected Arup’s findings and decided to take both Harpenden Broad Locations forward in their original form. Planning officers submitted the site allocations to the Planning Policy & Climate Committee on 23 September 2024, which agreed that the Broad Locations should be taken forward in their entirety.

This was not an evidence-based decision. Instead, it relied on the assertion of planning officers that only when the sites were accepted as a whole would they ”deliver a wide range of significant Economic, Environmental and Social benefits including housing, affordable housing, schools, and a significant scale of sustainable transport improvements and jobs”. Evidence to support this statement was not provided, and the viability of taking forward smaller sub-areas was not explored.

This lack of evidence in reaching this decision undermines the credibility of the Local Plan. The council should revisit its Broad Location site allocations and properly consider whether it would be viable to take forward smaller sub-areas for housing development.

We need more homes - As a country, and as a district, we need more homes and it is right that Harpenden has its share. Overall we support the number of homes that are being proposed for Harpenden but have concerns about the size and impact on our community of the two largest – B2 and B7

Infrastructure needs improvement before development starts - Due to previous expansion, and changing lifestyles, the infrastructure that makes Harpenden a pleasant place to live is already overwhelmed. In particular, congested roads, insufficient parking, surface water and sewerage

systems, health services and a lack of sustainable transport options. The County and District Councils and NHS bodies must undertake a full review of the current infrastructure and commit to make improvements, before any major new developments (in particular B2 and B7) are considered.

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In summary, there are a number of draft allocations which raise concerns on consistency:

The site assessment set out within Part B of the Local Plan highlights some constraints, including impact upon heritage assets, Tree Preservation Orders and historical flooding issues. The latter in particular is a concern given the requirement to create betterment. The ability to demonstrate this is achievable should be provided at this stage.

We have to conclude that not only does the Regulation 19 Plan fail to allocate sufficient sites for housing, or enough in the early stages of the Plan Period, but that Windridge Farm is a stronger contender than some sites the Plan does propose as allocations, even on the Council's terms.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**233 - Central Bedfordshire Council**

Submission Number: 233 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Central Bedfordshire Council Name:

Comment Number: 9

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As the quantum of development proposed for this allocation is not large, we would expect cross boundary impact to be low, but nevertheless some sight of the plots/modelling output on the key routes into Central Bedfordshire would be helpful to ascertain if there are likely to be any impacts that require mitigation. If this is the case. CBC would expect to see specific policy requirements for this proposed allocation to ensure that these impacts are addressed and fully mitigated.

**248 - Historic England**

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 10

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**B7 - North West Harpenden, AL5 3NP**

The grade H listed Cooters End Farm falls within the site boundary, and The Old Bell Public House, also grade H, is located to the west of the site, on the opposite side of Luton Road; development here has the potential to impact these heritage assets by affecting their settings.

We welcome the preparation of the high level HA by Place Services. We welcome criterion 4 of the policy which relates to the need for setbacks of development from Cooters End Farm.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend two slight changes to policy wording throughout the Plan which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend *'conserve and where appropriate enhance the significance of the...[list assets]'*
2. We would recommend amending `may include setbacks etc.' to read `should include setbacks etc'.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

i don't know the precise legal requirements so I cannot say whether it is legally compliant. I don't consider it sound, however, as it appears the council has not taken any notice of the comments submitted by its electorate in relation to the last draft. According to the objectives, sustainable use of land and protecting the green belt are your top two priorities, even ahead of housing, but the proposed redrawing of green belt boundaries shows that this has not been implemented. it simply is not sustainable to concrete over the green belt. and even if you do go ahead and redraw the boundaries (which would be reckless) it will not make those sites suitable for building on. many of the sites you have indicated will be developed have got notes against them showing they contain protected species (eg M3), gas pipelines (M3), protected trees (m7), are atop the aquifer (B7) are at risk of flooding (M6) are on an SSSI (m15) ETC, ETC. these sites need to be protected and to do otherwise is not sustainable: it will not result in St Albans being a great place to live and work, quite the contrary. Some of the proposed development sites are on car parks which will only make the parking situation worse than it already is.

if you were serious about strategic policy 10, you would not be proposing to release plot M3 from the green belt. at the very least you would have excluded the bit north of the public footpath which includes the grass land and the orchids. I fundamentally disagree with the current proposal

overall I don't think this plan is in the best interests of the people of st albans as it is not justified as defined in the introduction to the revised draft plan

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. **328 - Charlie Thompson**

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 17

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraph 35 and 36 of the 2023 NPPF require that local plans be positively prepared to be considered sound. To do so they must set out a strategy to meet the area's objectively assessed needs.
Policy HOU3 sets out the LPA's policies in respect of specialist accommodation. This only provides policies for determining applications for older person's accommodation. It does not provide policies for determining applications for children's homes. Similarly, the allocations set out in Part B of the plan make no provision for the needs of the section of the community reliant on this form of housing. Children's homes are smaller units, usually indistinguishable in form from a standard residential dwelling, that provide accommodation for 1-5 children in care. They are a vital part of the care system in Hertfordshire, alongside fostering, adoption, and other more specialist forms of accommodation. Under the Children's

Act 1989 Hertfordshire County Council (HCC) has a statutory duty to provide accommodation to children in care. The 2024 draft consultation National Planning Policy Framework at paragraph 63 also makes clear that local plans should make provision for this group and at footnote 29 makes clear that the local authority's sufficiency data should be considered suitable evidence of need. While it is expected that this local plan will be examined under the 2023 NPPF, this and HCC's statutory duties taken together mean the local plan ought to make

provision for this cohort.
Since the Regulation 18 consultation HCC is seeking for local plans to address this shortfall. There is currently a shortfall of children's home bed places in Hertfordshire for children in care. The 2024 South West Hertfordshire Housing Needs Assessment at paragraphs 10.83-10.88 shows that there is a need for 19¬39 beds at children's homes. Hertfordshire County Council only has access to 15 beds in St Albans. Countywide sufficiency data shows that it cannot accommodate all its children in care within its boundaries. It currently accommodates 89 children in care within other authorities in England, which is less desirable for children in care and expensive to commission, has a further 70 children or young people on the 'waiting placement' list, and an average of 4-5 new requests each day.
To be considered positively prepared and therefore sound the local plan should therefore make suitable provision for this section of the community within St Albans. This representation suggests modifications that if agreed, or similar, would make the plan sound.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

In Part B allocations H1, H2, H4, B2, B4, B5, B6, B7 should include the following wording: A children's home to accommodate three children in care and one manager.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 1B Childrens Homes_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Please see attached

**331 - Zoe Galvin**

Submission Number: 331 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Stop L & G and The Harpenden Green Belt Association Name: Zoe Galvin

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

***Regulation 19 Local Plan Part B, page 26 – B7 - NW Harpenden AL5 3NP***

Stop L & G and The Harpenden Green Belt Association recognise the importance of having an adopted Local Plan to meet local needs, plan for infrastructure and prevent speculative planning applications.

However, we consider that the allocation of the NW Harpenden broad location is **unsound**. For the reasons which follow, the traffic generated by development of this site, particularly when taken together with committed and proposed development across and outside the District, is likely to result in a severe impact on the local highway network, including the A1081 Luton Road. The problems are such that they cannot be left to a planning application to be resolved – indeed, there is a current planning application for development of this site and adjacent land and the transport assessment provided by the developer in relation to that application merely serves to demonstrate the problem.

There are existing significant problems with traffic congestion down the A1081. These are exacerbated by the Nickey Line Bridge at the junction with Park Hill, which is a critical "pinch point". The conditions are currently unsuitable for all but the most experienced cyclists. Moreover, the walk into Harpenden is longer than the Transport Impact Assessment ("**TIA**") allows for, because there is no pavement on the east side as the road goes under the Nickey Line Bridge: it is therefore necessary to cross the road to use the narrow pavement on the west side to walk under the Bridge into Harpenden.

The existing queues of traffic on the A1081 cause rat-running up Cooters End Lane and Ambrose Lane and into the narrow network of Victorian streets leading into central Harpenden, adding to the traffic going back and forth from The Spire Hospital, Youth with a Mission and the Kings School. Traffic movements are hindered by a sharp blind bend on Ambrose Lane over the Nickey Line. The pavement also disappears. Consequently, we have significant concerns about the safety of cyclists and pedestrians at this point on Ambrose Lane. Moreover, there are also safety issues because the junction between Bloomfield Road and Ambrose Lane is also "blind"– residents have put up a mirror themselves but there is a clear risk of accidents.

If NW Harpenden is developed, many journeys to and from it will be by car. The TIA acknowledges that the station is too far for some people – we would say most people – to walk on a daily basis. What the TIA fails to acknowledge is the likely volume of school-related traffic. Whilst Roundwood Primary and Roundwood Park Schools are within walking distance, children from this development are not likely to be able to get into these schools. Instead they will need to go to the new primary school which is proposed on the NE Harpenden allocation or Katherine Warington School, both of which are some considerable distance away. There are no safe or easy walking routes from NW Harpenden to these schools.

The identification of NW Harpenden as a sustainable site for development is predicated on the assumption that it will be possible to create a LTN 1/20-compliant segregated cycle route along the A1081: as stated in the TIA:

"*South West GTP scheme PR37 and the St Albans LCWIP A1081 Luton Road route both demonstrate the strong requirement for a segregated cycleway along the A1081 to be providedas mitigation*."

It has also been proposed that traffic calming on Ambrose Lane will enable that road to be used as a “quiet” cycle way.

However, the difficulty with providing a segregated cycle route down the A1081 is, again, the Nickey Line Bridge. Because of the narrowing of the road, it is not possible to have two lanes of traffic and a segregated cycle lane under the bridge. Herts CC have proposed that this is addressed by a “shuttle system” so that traffic only moves in one direction at any one time, allowing cyclists to remain segregated from the traffic.

On the basis that these cycle routes will be provided, the COMET modelling which has been undertaken by Herts County Council to assess the traffic which will be generated by the NW Harpenden allocation has reduced the prospective future flows by 10%.

However, **these assumptions are flawed**.

**Firstly**, there are serious deficiencies in the COMET modelling, which do not take into account the cumulative effects of committed and proposed development in adjacent authorities: NW Harpenden is at the border with Central Bedfordshire and clearly impacted by its plans. Furthermore, it operates at a high level only, and much more detailed modelling will be necessary to properly assess the impact on local roads such as Ambrose Lane and Tennyson Road.

Stop L & G has commissioned reports from a highway’s expert, Malcolm Foster of Neptune Transport Planning. Technical Note NPT3, a copy of which is attached, addresses various questions related to the modelling of the effect of the NW Harpenden allocation for the purposes of the Local Plan and identifies a number of significant shortcomings in the approach which has been taken.

**Secondly**, the COMET modelling does not address, or even attempt to tackle, the conflict between providing a safe cycle route down the A1081 and the need to avoid congestion at the Nickey Line Bridge junction. The COMET modelling assumes that a cycle route will be successfully provided and will, with other active travel measures, reduce car traffic by 10%. However, common sense, and the available evidence, indicates that the provision of the cycle route will massively increase congestion, not decrease it.

There is an existing planning application for the development of the NW Harpenden allocation and neighbouring areas for up to 550 dwellings, reference 5/2023/0327. The developer has submitted a Transport Assessment in relation to that planning application and revised it in October 2024.

Technical Note NTP4 (copy attached) provides a high-level review of the latest submissions and proposed schemes (as well as providing further commentary on the transport assessment supporting the draft Local Plan). Even though Mr Foster has significant criticisms to make of the applicant’s transport assessment, he says that:

“*The results clearly show that with the shuttle working the junction would operate significantly over capacity, even under the current traffic conditions, with queues on Luton Road in excess of 145 pcus [passenger car units] in both northbound and southbound directions. It is highly likely that adding committed and proposed development traffic would lead to an exponential increase in traffic queues to a point where the traffic impacts on the operational performance of the local road network would be significant and severe*.” (emphasis added)

Moreover, on Wednesday 23rd October 2024, temporary traffic lights were installed at the Nickey Line bridge on the Luton Road, which created a single carriageway, replicating the effects of the proposed shuttle system. The results were nightmarish for local residents. At 15.45, queues southbound stretched all the way back causing gridlock through Harpenden town centre back to the Silver Cup on Harpenden Common. Satnav indicated a 28-minute delay, and rat-running traffic on local side roads increased massively. The gridlock caused chaos all across Harpenden.

Thus NW Harpenden has been chosen as a sustainable site for development on the basis that a safe cycle route will be provided down the A1081 but the evidence strongly suggests that it will be impossible to create such a route without causing massive congestion.

**Thirdly**, and as recognised by the applicant in respect of the planning application, the additional congestion along the A1081 is likely to encourage further rat-running down Ambrose Lane. This additional traffic, along with parked cars and the sharp bend over the Nickey Line, make this an unattractive route for cyclists and hardly a "quiet" one.

These are not issues which can be simply left over to be resolved at the time a planning application in respect of the NW Harpenden allocation is made. They are the consequence of fundamental features of the road network at this location which need to be properly considered before it is concluded that NW Harpenden is a sustainable location for development and that exceptional circumstances justify its removal from the Green Belt. NPPF paragraph 108 underscores the need for proper consideration of transport issues from the earliest stages of plan-making.

We therefore contend that the allocation of NW Harpenden is **unsound**, since it is not **justified, effective or consistent with national policy.**

## 351 - Lichfields on behalf of Legal & General

Submission Number: 351 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Name: Adam Donovan

On Behalf Of Company/Organisation: Legal and General (Strategic Land Harpenden) Ltd Name: Lichfields on behalf of Legal & General

Comment Number: 3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

[Please see attachment for full submission]

**5.0 Draft Allocation at North West Harpenden**

5.1 Part of L&G's landholding at NWH is the subject of a draft allocation in the Regulation 19 draft of the Local Plan (Ref. B7), as a Broad Location for c. 293 new homes and community facilities. Figure 5.1 below demonstrates the extent of the draft allocation site boundary (12.19 ha) alongside the red line boundary of the live planning application (24.81 ha).

Figure 5.1 Draft B7 North West Harpenden Site Allocation Boundary compared to the Site Boundary of Planning Application ref:5/2023/0327

[Please see attachment for Figure]

5.2 While L&G continues to support the principle of residential development at NWH, and agrees with SACDC that exceptional circumstances exist to justify Green Belt release in this location, it is considered that the draft allocation should be extended to the full extent of the planning application boundary, for a number of reasons which are clearly articulated within the planning application and summarised below:

1 The wider site has previously been assessed by SACDC as suitable for residential development through successive emerging Local Plans and proposed for release from the Green Belt and allocation for development of new housing. The change in SACDC's position regarding the area of the site that is suitable for development is not adequately justified or supported by the supporting evidence published with the draft Local Plan. In particular, no further evidence or review has been provided as to how the 2023 GBR has been applied to extent of the draft site allocation.

2 The supporting documents submitted alongside the live planning application demonstrate that the proposed extent of development has been informed by analysis of the existing site, its context, landscape and Green Belt impact. The extensive evidence prepared to support the planning application clearly shows that the significant additional benefits of the wider proposal outweigh any additional harm to the Green Belt and all other harms, in accordance with the NPPF tests. The planning application proposals will create a beautiful new neighbourhood within Harpenden, responding to the needs and requirements of both the existing and future population of the town.

3 The delivery of the wider site will result in numerous additional community benefits for existing and future residents, including, but not limited to, a greater quantum of housing including older people's accommodation, the ability to deliver a significant quantum of new public open space, early years provision, and a community and social hub. Conversely, the smaller site will result in a more limited scheme, with limited ability to deliver new public open space and other community benefits.

4 A review of the St Albans Stage 2 Green Belt Review (June 2023) prepared by Arup was undertaken by LDA Design ('LDA') to accompany the Regulation 18 representations. This review concluded that the new Green Belt Review fails to provide a proper assessment of the wider NWH site. LDA raise a number of concerns regarding the methodology of the report and as such it cannot be relied upon as evidence to support the draft allocation. In any event, the recommendations of the Green Belt Review must be weighed up alongside other considerations to establish a suitable site boundary (which is an approach that SACDC have taken on other Broad Location sites).

5.3 This section sets out a summary of the background to the site, the planning application, and discusses the points set out above in detail. A summary of the site background and live planning application can be found within paras 6.4- 6.20 of the Regulation 18 consultation representations and is therefore not repeated here. However, further relevant information related to the benefits which would be derived from the allocation of the whole of NWH, compared to the smaller site is provided below alongside relevant comments received from statutory consultees in relation to the live planning application.

**Benefits**

5.4 The benefits can be broken down into the following categories:

- Delivery of new homes
- Affordable housing
- Specialist housing
- Community facilities and early years facility
- Public open space
- Landscaping and ecology

5.5 These are addressed in turn below.

**Delivery of New Homes**

5.6 Paragraph 60 of the National Planning Policy Framework ('NPPF') states that:

*"To support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed, that the needs of groups with specific housing requirements are addressed and that land with permission is developed without unnecessary delay. The overall aim should be to meet as much of an area's identified housing need as possible, including with an appropriate mix of housing types for the local community."*

5.7 There is an acute housing need in St Albans, which is recognised in the draft Local Plan. The Local Plan identifies that the figure for housing need calculated by the standard method is 885 dwellings per annum. This is a capped figure and therefore, the 'true' objectively assessed need for housing without any cap applied is significantly greater than 885 dpa, at 1,186 dpa.

5.8 The 2022 Housing Delivery Test results were published in December 2023; St Albans scored only 55%. This reflects significant under-delivery over the previous three years and demonstrates that a backlog of housing need is continuing to accumulate while the Local Plan is being prepared. It is therefore crucial for the Council to allocate sufficient housing sites in the new plan to assist in meeting the district's substantial and growing housing need.

5.9 The emerging Local Plan states that broad locations are intended to be sustainable

neighbourhoods which will deliver a "*significant portion of the growth"*set out in the plan, at a scale to deliver significant services (paragraphs 3.28-3.31). In line with paragraph 129 of the NPPF, the Plan should seek to optimise the use of land and ensure that developments make optimal use of the potential of each site. This is particularly important for the broad locations which have been identified as sustainable new urban extensions for significant growth and the associated opportunity to make a significant contribution to housing delivery.

5.10 In the context of substantial housing need, which has direct impact on the future prosperity and vitality of the town, and the need to optimise the potential of the site, the delivery of new homes at NWH will be a significant benefit of allocating the site. As demonstrated by the live planning application, should the wider site be allocated, c. **550 new homes** could be comfortably accommodated on the site. This is c. 250 additional new homes in comparison with the c. 300 homes stated in the draft allocation, an increase of 83%. The delivery of **250 additional new homes** is a significant additional benefit in the context of the district's acute housing need and will make a significant contribution.

**Affordable Housing**

5.11 As a result of additional housing provision, delivery of the wider site would allow for the provision of more affordable housing. The live application proposes 40% affordable housing (excluding the specialist housing provision) which equates to **168 affordable homes**. A scheme compliant with the draft allocation would provide just 117 affordable homes. Therefore, the wider site could deliver an **additional 51 affordable homes** in comparison with the draft allocation scheme which equates to a further 43% of affordable homes from the site.

5.12 The South West Hertfordshire Local Housing Needs Assessment sets out a need for 449 affordable homes to rent and 353 affordable homes to own per annum in St Albans. Therefore, the scale of affordable housing need in the District is substantial. An additional 51 affordable homes would make a highly material contribution to addressing the affordable housing need in the District.

**Specialist Housing**

5.13 In addition to conventional housing, there is a significant need for specialist housing for elderly people in the district. In the consultation response to the current live planning application, Hertfordshire County Council Adult Care Services stated that there is a deficit of specialist elderly care in the area up to 2042. Based on an expected population growth in those aged over 75, 19210 people by 2042, Adult Care Services have identified a need of the following number of units of Housing with Care:

- 439 homes by 2032, comprising 45 affordable homes and 394 market homes
- 1,078 homes by 2042, comprising 110 affordable homes and 968 market homes

5.14 The live planning application includes a proposed Integrated Retirement Community (IRC). This includes a maximum of **130 integrated retirement homes** (C2), whereas the draft allocation, which previously allowed for one 60+ bed nursing home, does not provide any allowance for elderly or specialist care. The 130 retirement homes in the planning application will provide flexible care and support on site, and allow residents to own their own property, have their own front door, and maintain their privacy or be as involved with the wider community as they would like.

5.15 The proposals for the IRC have been developed with the wellbeing of older residents in mind; it is a high-quality proposal which goes beyond a standard residential care facility in providing flexible accommodation which is easily adapted to suit occupants' changing needs. This is in line with the ambitions of the Regulation 18 Local Plan which states at para 4.12 that "*accommodation for the elderly is moving towards more flexible forms of living and support, which seek to maintain people's independence* [...] *residents can enjoy their own self-contained home within a site offering extra-care facilities'"*.

5.16 Using an occupancy ratio of 1.8[15] the 130 IRC would provide accommodation for **234 elderly people**. This would also have an indirect impact on the broader housing market by 'freeing-up' under-occupied family homes, many of them likely to be local.

5.17 The current draft Local Plan does not provide any justification or explanation as to why the previously identified elderly care facility in the draft allocation has been removed.

**Community Facilities and Education**

5.18 The draft allocation policy sets out that community facilities must be provided as part of the scheme, however it does not provide further details as to the form of these facilities or the needs they are seeking to address.

5.19 Whilst the provision of community facilities is likely to be achievable as part of the scheme for the draft allocated site, the size of the site naturally limits the scope of what can be provided alongside the other requirements for housing, , open space and infrastructure. On the basis of a c.293 unit scheme, it is likely that these facilities would take the form of a small-scale facility both in terms of physical capacity and viability.

5.20 The allocation of the wider site could provide the opportunity to incorporate **educational facilities** into the allocation, subject to identified need. The live planning application includes an **early years facility** providing care for pre-school children; no educational facilities are currently required as per the draft allocation. It is also noted that previous draft allocations for this site have included the requirement for land for a secondary school; L&G would be willing to discuss the inclusion of a secondary school site in the wider allocation with SACDC and HCC, should this be identified as a requirement.

**Public Open Space**

5.21 Following a high-level feasibility exercise undertaken in relation to the draft allocation, it is estimated that a policy compliant quantum of public open space could be provided on the site (c. 3.5ha). While provision would be sufficient to meet *policy* requirements, the site

area and the density required to achieve the identified quantum of development results in the open space provision being inherently limited and not providing open space which goes beyond the minimum requirement.

5.22 In contrast, the allocation of the wider site would allow for a truly **landscape-led masterplan with generous open space provision** to be achieved on the site (see Figure 5.2). This is demonstrated by the current planning application which includes over **11ha (27 acres) of new public open space,** which is above policy requirements. Green open spaces wrap around and weave through the site ensuring that people are only a few minutes' walk from being in touch with nature and opportunities to ensure communal outdoor space.

5.23 The application also includes provision to address the existing local deficiency in **junior football pitches, children's play and teenage areas.** Furthermore, the site provides the opportunity to deliver increased access to a variety of green spaces that will encourage health and wellbeing for existing and future residents of Harpenden.

5.24 The provision of these play spaces and specifically the inclusion of sports pitches would not be possible within the draft allocation.

Figure 5.2 Public Open Space Plan

[Please see attachment for Figure]

5.25 In the consultation response to the live planning application, Sport England in consultation with the Football Foundation, have confirmed their support for the provision of two football pitches and associated ancillary facilities on the Site. The response states:

"*The pitches proposed would meet the additional demand for youth and mini football pitches generated by the population of the development and positively respond to the deficiencies identified in St Albans City & District Council's Playing Pitch & Outdoor Sport Strategy & Action Plan (2023).*"

5.26 In addition to the on-site provision of new sports facilities, the application would also contribute over £500,000 towards off-site financial contributions which would go towards 3G artificial grass pitches, cricket, rugby union, rugby league, hockey and tennis facilities.

**Landscaping and Ecology**

5.27 In the context of the Environment Act and the requirement for new developments to provide a 10% Biodiversity Net Gain ('BNG'), it is expected that the draft allocation site could achieve a 10% BNG in compliance with this requirement. However, due to the constrained site boundary, it could be challenging to exceed this figure in terms of improving biodiversity on the site.

5.28 In contrast, the live planning application scheme is expected to secure a **BNG of over 20%,** exceeding the minimum requirement as set out in the Environment Act. This is due to the retention of existing habitats and the **delivery of significant new habitats**, which will benefit existing important ecological features on the site.

5.29 The planning application scheme includes numerous landscape features which seek to mitigate the potential effects of the development as far as possible. This includes significant **new woodland and hedgerow/hedgerow tree planting** along the north and northeastern boundaries of the site to help screen and soften views of the built form within views from the north and north-east; creation of new public open space that exceeds standards with a range of use and habitat potential around the periphery and within the residential area; and restricting height of built form to two storeys upon more elevated ground within the site.

5.30 Clearly, the extension of the partial allocation to incorporate the wider site allows for significant additional benefits to be achieved in terms of landscaping and biodiversity at North West Harpenden. Due to the constraints of the site boundary in the draft allocation, the achievable BNG is likely to be limited to compliance with the regulations in the Environment Act, in comparison

with a BNG of c. 20% that is achievable on the wider site. The wider site also provides the opportunity to incorporate a strengthened landscape buffer to the northern boundary which not only **reduces the visual impact of the development**, but provides a new **defensible green edge to Harpenden** and provides amenity and habitat for people and wildlife.

**Economic Benefits**

5.31 The delivery of an additional 250 new homes alongside increased community floorspace would naturally allow for additional economic benefits for Harpenden and the wider District. Table 5.3 sets out the estimated economic benefits of the 550 unit application scheme, compared with those for a 300 unit scheme including a small community facility

Table 5.3 Economic Benefits of a 550 and 300 unit scheme

[Please see attachment for Table]

5.32 Table 5.3 demonstrates that there are significant additional economic benefits that could be delivered to Harpenden and the wider district through the development of the wider site allocation, including, during the construction period, the generation of over **100 additional jobs per year** (for a 6 year rather than four-year period) and an additional c. **£9m of economic output**. During the operation period, the scheme would support an additional 9 jobs per annum, with a further **35 jobs supported locally per annum** through resident expenditure. This local expenditure (including first occupation expenditure - what new residents spend to 'make a house a home') is almost **£6m more annually**; this is money that will be spent on local services and facilities.

5.33 Furthermore, based on the live planning application, the scheme is expected to generate c. £25,000 per unit in S106 contributions towards education, healthcare and other local services/facilities (N.B. this does not include highways contributions which are not known at this stage). Therefore, an **additional c. £6.4m in S106 contributions** could be generated by allocation of the wider site, suitable for an additional c. 250 units.

**Summary**

5.34 In summary, L&G supports the principle of residential development at NWH but it is considered that the draft allocation should be extended to the full extent of the planning application boundary, consistent with how previous draft Local Plans have defined the potential development of the site.

5.35 The planning application demonstrates that the extent of the site proposed for residential development has been informed by analysis of the existing site, its context, landscape and Green Belt impact. This is reflected by the consultation comments received in relation to the current planning application.

5.36 In addition, whilst the allocation site is in principle deliverable and a high-quality scheme could be achieved on this site, it is clear that the benefits to be gained by allocating the wider site for development are significant and outweigh any additional harm to the Green Belt. The additional dwellings provided on the site will also assist SACDC in meeting the shortfall in their housing trajectory identified in Section 3.0.

## 6.0 Summary and Conclusions

6.1 Whilst L&G support elements of the Draft Local Plan, our review of the plan and the supporting evidence leads our client to conclude that the draft Local Plan does not meet the tests of soundness required for a Local Plan. In particular:

- The plan has not been *positively prepared* as it does not meet the area's objectively assessed need, including unmet need from neighbouring areas.
- The plan is not *effective* in delivering over the plan period by providing the appropriate number of homes.

- The assumptions around housing trajectory are not *justified* and are not based on proportionate evidence.
- The Green Belt assessment is deficient and as such the plan is not *justified* in terms of how the evidence has informed the production of the plan.
- The plan is not *consistent with national policy* as it does not deliver sustainable development in accordance with the policies in the framework.

6.2 L&G believes the proposed North West Harpenden allocation should be increased in scale, so that it reverts back to that which was proposed in previous emerging Local Plans, consistent with previous Green Belt reviews and the current application boundary. This approach is justified by the following:

1 The current standard method figure for St Albans is capped and has been calculated as 885dpa. The 'uncapped' figure is 285 dwellings per year more than the capped figure. PPG is clear that the cap does not reduce need, and that Councils should consider whether uncapped need can be accommodated (if not, an early review may be required). The Council's own evidence shows an acute affordable housing need, amounting to over 90% of overall need. At the current level of overall delivery, the plan would meet (at most) less than half its affordable needs. PPG is clear that an increase in housing numbers in the plan should be considered where it can help deliver more affordable housing.

2 Recent delivery levels, from both St Albans and elsewhere, show that it is wholly achievable for the district to see housing growth well above its current standard method figure. Market signals show that St Albans is the area of highest housing demand outside London (as indicated by the affordability ratio), and this has become even more acute in recent years; There is an existing amount of known unmet need in the HMA, primarily arising in Three Rivers and Hertsmere, amounting to nearly 9,000 homes. Despite being known, these needs are being deferred, contrary to NPPF para 35(c).

3 The Sustainability Appraisal has not explored reasonable alternatives, insofar as it is entirely reasonable (and indeed necessary) for the Council to explore even higher housing growth options. Notwithstanding, the highest housing growth scenarios currently in the SA have been ruled out despite having very limited negative effects. The plan is therefore contrary to NPPF para 35(b).

4 A review of the housing trajectory within the draft Local Plan concludes that some of the assumptions are not realistic or robust, particularly on the Garden Community proposals. On these, the assumed rates of lead-in and build out rates are overly ambitious when compared against evidence of housing delivery on a national scale. When applying more realistic assumptions to the trajectory the total delivery during the plan period reduces by 1,925 which clearly has significant implications for SACDC's ability to meet the housing requirement over the plan period and leaves a shortfall.

5 We agree with the Council's conclusion that exceptional circumstances exist to justify the release of Green Belt land to meet the acute housing need. However, it is considered that SACDC is overly reliant on HGC to deliver almost a third of the total housing requirement over the plan period. In order to justify the quick lead-in times and high delivery rates proposed, very robust evidence must be provided to demonstrate that these are achievable. It is important that the trajectory is robust, supported by the best available evidence and realistic, to give SACDC and in due course, the Inspector, confidence in its conclusions. On this basis the trajectory is considered to be unsound in its current form and needs to be reconsidered.

6 It is considered that SACDC has not established an appropriate tipping point (i.e. the maximum amount of Green Belt release on potential site allocations. In the case of NWH, the draft plan recognises that it is a sustainable location for development but, by proposing to allocate only part of the site that was promoted (and which had been a proposed allocation in previous draft plans), it infers that the Council has identified a 'strong reason' related to the unallocated part of the site

that justifies why it should not be released to help address those needs (either now, or in the future, based on permanent Green Belt boundaries). L&G does not believe the evidence supports the Council's tipping point.

7 In the case of NWH, L&G's view – supported by evidence it has submitted with its current planning application – is that the site boundary in the planning application is the most suitable boundary for the emerging allocation; it has been determined with regard to a detailed assessment of the landscape and Green Belt considerations. It is a boundary consistent with, and supported by, previous Council assessments undertaken to inform previous drafts of the Local Plan. To not allocate the whole of the site for development does not make optimal use of the potential of the site, as required by para 129 of the NPPF.

8 L&G is committed to the delivery of NWH and the creation of a high quality residential scheme which will meet the need of Harpenden and St Albans. NWH is a self-contained development without major upfront infrastructure costs, and L&G is able to deliver the scheme quickly and make a contribution to SACDC's housing supply in the short term. This is demonstrated through the submission of the planning application which has been informed by analysis of the existing site, its context, landscape and Green Belt impact. The benefits to be gained – both locally and strategically - by allocating the wider site for development are significant and outweigh any additional harm to the Green Belt that might arise.

6.3 Therefore, taking in the above into account it is therefore requested that draft site allocation for NWH (B7) is extended so that it aligns with the current planning application and previous draft allocations. The allocation of the whole of the site for residential development is appropriate and consistent with national policy and an assessment of the Green Belt. The benefits which will be delivered by the larger site are considerably greater than the current draft allocation.

6.4 Finally, it is noted that it is SACDC's intention to Submit the Plan for Examination on 29 November 2024. The consultation on the plan closes on 8 November 2024. This therefore only allows 15 working days between the receipt of consultation responses and the submission of the final plan for examination. Firstly, it is not clear how SACDC could feasibly review all of the consultation comments which would be expected in response to the draft Local Plan within this time period. The Regulation 18 consultation attracted 955 individual responses from residents, resident organisations, groups and organisations, landowners and Councillors. It is considered that 15 days is a wholly inadequate amount of time to allow for the review of this level of consultation responses alongside a consideration of potential changes to the plan. Secondly, based on the inadequate amount of time being allocated for this review of consultation responses, it is questioned whether SACDC intend to make any further changes to the local plan and whether this consultation is meaningful.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## 356 - Rachael Donovan

Submission Number: 356 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Hertfordshire and West Essex ICB Name: Rachael Donovan

Comment Number: 25

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

- **B2 – North East Harpenden – 738 dwellings**
- **B7 – North West Harpenden – 293 dwellings**

There will be circa 2,200 additional new homes in Harpenden and Wheathampstead by 2041 and additional capacity will be needed. There is a potential in the existing GP premises portfolio in Harpenden to create more capacity by extending and reconfiguring or by removing patient records and re-purposing the vacated space for clinical or administrative use. Section 106 contributions will therefore be sought towards these projects in order to meet the needs of the growing population.

For each of the following Local Plan allocations, please add, '**Contributions to health facilities and services to meet the needs of new residents**.'
B3 – West Redbourn, Redbourn
B5 – Glinwell, Hatfield Road, St Albans
B6 – West of London Colney
B7 – North West Harpenden
B8 – Harper Lane, north of Radlett
L1 – Burstow Nurseries, North Orbital Road, St Albans
L2 – West of Watling Street, Park Street
L3 – East and West of Miriam Lane, Chiswell Green

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

This plan will negatively impact constituents on the boundary of St Albans specially Site Allocation B8 on land off Harper Lane as the site has proposed use of 274 houses on Green Belt land. This will also ruin our green spaces .

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

I propose Brown Field sites are used instead of destroying the Green Belt areas.,

## 9 - Mr Kevin O'Sullivan

Submission Number: 9 Submission Date: 09/10/24 14:35

Respondent: Company/Organisation: Name: Mr Kevin O'Sullivan

Comment Number: 1

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

With regard to the draft plan for B8 - Harper Lane, North of Radlett, WD7 7HU, there are a number of important factors which make this not a good location for the planned very large development. I have listed these below:

1) Parts of this land are a flood plain - Kitswell Brook is already struggling to manage the water flow during wet periods and any further change to this water system will definitely create flooding.

2) Wildlife - there is a mixture of bats, deer, foxes, badgers, squirrels, rodents, birds and snakes that have their habitat in this area.

3) A large development like this will create town sprawl which is contrary to planning principles which suggest having separation of greenfield between towns.

4) Local infrastructure is unable to support increased numbers of people using the roads, medical centres, schools and rail stations. Since the Harperbury and the ridiculous road design changes at the junction of Harper Lane and Watling Street and entering into Radlett from the north end, the traffic during peak times has been unsustainably bad, bringing total gridlock on occasion and significant pollution to the small town centre and surrounds. Harper Lane during wet periods has signifcant standing water ad mud washed on to the road surface, making it unsafe for users.

5) The plans focus is on the footpath/ cycle path in the plans for sustainability reasons is totally flawed. Local residents have often noted how few people actually use these due to long distances to destinations, fast main roads alongside and that these provisions are just to meet outdated planning guidelines.All new residents will predominantly use cars.

6) Local schools are full without size expansion possibilities - infant, junior and secondary schools are oversubscribed and local children are having to bus long distances to get to secondary schools.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Modifications should include:

- only allowing development on the existing brownfield and greyfield land to limit the impact on floodplains, wildlife and protect greenfield land;

- proper development of the junction of Harper Lane and Watling Street, including a widening of the railway bridge to ease traffic flow;

- if development goes ahead, significant investment should be required into local infrastructure, schools and medical care.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

please inform me that this has been received and my document can be read.

I feel site b8 should be taken out of the plan. If this site was developed it would have no effect on St Albans at all as it is directly on the Radlett boarders. All inappropriate effects will be on Radlett, and all the benefits of Council tax revenue will be for St Albans.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I am sending you comments on above site, with an OBJECTION. St Albans are being very sneaky with the outfilling of it's boundaries into homes, with only a few years ago the build of around 400 homes on Harper Lane for Bloor Homes. With this plan, that will add another 250+, so 600 homes to effectively Radlett, in a matter of years, with zero expansion of schooling, doctors, etc required for st albsns as everyone will use Hertsmeres facilities. No one in these new developments consider themselves to be part of st albans, and the town address will be Radlett. In fact Harperbury Park was supposed to have a school, which got pulled. Harper Lane site is also a source of local employment and skills, once closed, will be gone forever. You cannot approve over a course of 5 years over 600+ homes (circa 1300 people) on to an existing village population of Radlett (about 8000). A near 20% growth with zero infrastructure investment from yourselves as they all use Hertsmere services!

## 19 - Ayrat Akchurin

Submission Number: 19 Submission Date: 22/10/24 09:00

Respondent: Company/Organisation: Name: Ayrat Akchurin

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Collectively, we are disappointed to find that construction, road compromises and reduction of green areas are selected to be conducted in our corner of Radlett. I would like to make clear that I and my neighbours are positively against any activity of the proposed Saint Albans Local Plan by the District Council and St Alban's City Council.

Here are my clear reasons:

1) By restricting our right of way, each household's cost is respectively reduced and each property will endure a significant reduction in the enjoyment of land. This is both in terms of restricting the right of way and also construction that is proposed to take place. I along with everyone on the respective streets, exercise my right in saying I disagree with any construction and possible road changes around our parts of Radlett. As far as I am concerned there is no express consent of any neighbour I know and more essentially voices of the disagreed ought to be heard very clearly.

2) It is still unclear to me where and when precisely the building constructions are planned to be carried out. However, I and my neighbours challenge any construction on our respective roads (The Avenue and The Warren). We do not permit or consent to anything of such. I will add further that if construction must take place it should not be conducted on the Avenue or the Warren, but rather another part of Radlett that has (i) the consent, (ii) the space and (iii) the genuine need for more housing. That I believe is the true best alternative for anyone concerned.

3) The Avenue and the Warren also has the pleasure of security in the form of a private patrol car. Introducing amendments would almost completely compromise this. By making the road public or making the road restricted, either more patrol cars would be needed or worse still, no private patrol car could perform the job if the road becomes public or restricted thereby exposing our properties to theft, damage, vandalism etc. I assure you that it would be wholly wrong to dismiss this on the account that little theft occurs on our streets, in fact it is due to the private security that we can enjoy the safety of our streets and properties. Therefore, such a devastating effect provides a far greater drawback rather than the so stated benefit to supposedly bring the community together.

4) Now, regarding the removal of green areas. From a personal perspective having lived in Radlett for over 10 years, and with the intention of spreading roots here, it makes for a much disappointing measure that Radlett would have to experience any loss of green areas. I have looked into that

the intentions of the Saint Alban's council is to maintain the green areas. Construction and otherwise removal of the green is clearly a contradictory intention. Further any removal of green in the two roads I have mentioned is, I would like to highlight also, not under our consent.

**28 - Sarah Heighton**

Submission Number: 28 Submission Date: 24/10/24 09:00

Respondent: Company/Organisation: Aldenham Parish Council Name: Sarah Heighton

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

On behalf of Aldenham Parish Council (APC) I thank you for including APC in your latest consultation on the St Albans Local Plan. In general APC has no comment on the plan except for 'Site B8 – Harper Lane, north of Radlett'. APC finds it disappointing that the comments made by it in July 2023 have been ignored.

APC acknowledges that although this is a largely brownfield site within St Albans's St Stephens parish, the effects of any developments at this site will fall primarily and heavily on Radlett, its community, infrastructure and services.

Therefore, APC would like the following points to be noted as the basis for its strong opposition to this proposed development.

**Green Belt**

The idea of this legislation is to ensure that there is a buffer point between neighbourhoods. This application does not allow for that with the parish of St Stephens literally on the boundary of Aldenham Parish, to a point where a boundary review may be requested.

**Traffic and roads**

APC would like to remind this consultation of the chaos caused by the previous Harperbury Hospital site redevelopment by Bloor Homes in Harper Lane. Radlett residents remember well the long lines of traffic on both carriageways caused by the badly thought-out (and implemented) traffic management plan for the Watling Street/Harpers Lane junction/bridge. Although a new bridge

layout has been configured, this still leads to long queues, especially at peak times which will only be exacerbated by the introduction of 274 further residential units. Remember that the nearest shops, community services and transport links to London are via Radlett.

**Travel**

- Available buses are negligible, and are barely used as can be seen by the current Bloor Homes subsidised bus that runs into Radlett.
- There is a newly installed cycle path along Harper Lane, and across the bridge, but then there is nothing, even though a cycle route has been stated in the Radlett Neighbourhood Plan Policy GA1.
- Footpaths break off, requiring crossing the busy Watling Street to Radlett, and unless there is new access is created, all kinds of traffic to and from the site will use Harper Lane.
- The car park at Radlett Station has only 309 spaces, and Newberries Car Park limited to 203.

**Services**

There are no police or fire services in Radlett.

**Medical**

There is only one GP surgery to serve Radlett, and a few vets.

**Schools**

There are a number of oversubscribed nursery and junior schools, but no secondary schools, or any other provision for higher education. Secondary/higher education pupils have to travel to St Albans, Watford, Bushey, or Borehamwood, and they mostly travel by dedicated bus services or by car; a small number of use trains.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Section 106 agreement**

Should any application be agreed on this site, APC would ask that it is included in any Section 106 agreements as there would be long term impact on Radlett by this development, with monies being required towards pedestrian and cycle infrastructure etc.

APC will object, and anticipates extremely strong objections from local residents to this application, should it be made.

## 32 - John Whiting

Submission Number: 32 Submission Date: 27/10/24 09:00

Respondent: Company/Organisation: Radlett Society & Green Belt Association (RSGBA) Name: John Whiting

Comment Number: 9

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

We are naturally focussed on Site B8, the 'Ivory's' site on Harper Lane. This is identified as having the potential for a significant number of houses (274) which would make a material difference to Radlett which, although in a different borough, would be the natural destination for the services that the new residents would require. It is therefore crucial that any development of this site is done in liaison with Hertsmere.

We have commented before about this site. To summarise our concerns:

- It is currently an active business site; what happens to the variety of businesses operating there? Surely there is a risk to employment from turning the site over to housing?

- Although much of the site would be ranked as 'brownfield', it is surrounded by Green Belt land and would need to be properly screened off from the Green Belt. Indeed, the full development seems to include some Green Belt land; this does not seem to pass the 'Very Special Circumstances' necessary for building on Green Belt.

- Access to the site, if development proceeds must not be across the fields to streets such as The Avenue and The Warren in Radlett; that would be unacceptable and destroy the Green Belt in the area.

- The proposed development risks eroding significantly the remaining green gaps between Radlett and settlements to the north. This would especially be the case if the whole proposed site, including Green Belt, were developed.

- Transport is key and we welcome the acknowledgement that development would need proper investment in cycleways along Watling Street into Radlett.

However, the key issue with the site is the Harper Lane railway bridge which is very close to the exit from the site. This single carriageway bridge is already a bottleneck and should have been improved when the Harperbury Hospital site redevelopment started. The additional traffic generated by the proposed new site would exacerbate this and has the potential to cause significant blockages and risks to pedestrians and cyclists trying to cross the bridge.

The comment in the site development requirements says that:

"3. Support for enhancements of the junction of the B556 and A5183 will require attention due to capacity and constraints."

This massively understates the issue. It must surely be a prerequisite for any development proposal that there is a replacement bridge. It is not acceptable for this to be left to the Highways authorities: it needs to be clearly tied to development of the site and if the bridge cannot be improved (or of course another, separate bridge across the railway installed) then the development cannot proceed. This is a matter of safety and must outweigh a simplistic approval for a brownfield site.

We have to point to the Radlett aerodrome development which has the potential to generate a lot more heavy traffic over the Harper Lane bridge as lorries seek to access the M25 (given that this supposed railfreight/distribution depot is in the nonsensical situation of having no direct motorway or rail access access). Again, it points to the crushing need to solve the problem of the Harper Lane bridge before any development can take place that puts extra strain on it.

We note the reference (at point 5) that development "…should deliver enhancements that would better reveal the significance of the Grade II Listed Harper House; this may include the creation of open space between Harper Lane and the frontage of the Listed Building and adjacent Coach House to better reveal their significance." We just wonder how practical that is if it means the frontage of the new development is pushed back from Harper Lane.

---

### 39 - mr kenneth arnold

Submission Number: 39 Submission Date: 31/10/24 11:32

Respondent: Company/Organisation: Name: mr kenneth arnold

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Site allocation B8; greenbelt land off Harper Lane.

1. the site is as indicated green belt land; the proposal would add to ribbon development which haphazardly decreases the amenity available to people living in the vicinity and raises living density in the area which is and should remain primarily rural

2. The roads are narrow and the proposal neither takes into account the needs of the anticipated new residents( there are no shops, places of worship, schools or other amenities in the immediate vicinity) and will increase traffic on what is a two lane road with just one lane traffic controlled at the junction with Watling Street where there are already traffic hold ups and accidents ( one of which recently lead to the closing of the junction for weeks).

3. The proposal envisages that there will ne access or public rights of way over private roads namely the Warren, The Avenue, Beech Avenue, The Heath, Paddock View , Hill Croft, Park Avenue and Longridge and likewise it envisages access through adopted roads such as Lodge End, The Dive and Shenley Hill . Private rods have their upkeep contributed to by the residents

who use them and will result un an unfair burden being placed on those residents. Some properties are on or almost on the roads themselves such as Avenue Farm on the Avenue whose owners will be unduly affected by extra traffic (personal, cycle and car). The rods risk being made rat runs and given that there are no pavements will add to risk to children who play and cycle on them. Some (such as Longridge) are one lane only and cannot be suitable for further access. The homes are already high risk for burglary and other petty crimes and will become more so with the further general use envisaged of them .

4. The land at the back of the Warren/ Longridge etc is agricultural land and that should be preserved and valued as such

5. There are other proposals such as the building of 180 houses or so between Shenley Hill and Borehamwood which already risk if approved making Radlett a mere offshoot and continuation of Borehamwood and it losing its individual character as a small rural town and this proposal accentuates or adds thereto risking making a rural community just one part of a sprawling urban area

6. There are many sites within the urban area of St Albans ripe for development and further afield such as Potters Bar also

7. There has been insufficient attention given to grey sites, to sites already developed which could be further developed and in doing so improved which are nearer to amenities such as places of worship, shops and restaurants and leisure activity areas and sites

8. An example of the above is the small retail park off the North Orbital road at present home amongst other thigs to a cinema complex; that could be further developed to provide housing.

9. Whilst a smaller housing development could in theory be accommodated off Harper Lane that would be cut off from proper amenities, encourage the use of cars and not provide a decent environment for people to live, to work in the area without having to use cars and other means of transport

10. if contrary to my submissions this is approved it should be without the use of or access to local at present unadopted roads whether for cycle or pedestrian or vehicular use

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. ## 47 - Mrs Sylvia Calvert

Submission Number: 47 Submission Date: 01/11/24 15:46

Respondent: Company/Organisation: Name: Mrs Sylvia Calvert

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Proposed development B8 is not compliant because

1.It is for a large development on Green Belt land.

2. Part of the site is in a high Flood Risk area

3. It will significantly increase demand for public services in Radlett, whereas residents of the development will pay Council Tax to St Albans

4. Access into Radlett for pedestrians or vehicles via the southern boundary of the site is into a network of unsuitable residential roads which are poorly lit and do not have pavements

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

We write to strongly object to Site Allocation B8 on land off Harper Lane north of Radlett that it is proposed to be built on Green Belt Land.

This proposed development adversely and substantially affect Radlett.

There are various ground of objection including but not limited to:

This proposal would be an overdevelopment in that Radletts roads are inadequate for the present level of use. Due to the expansion of Radlett that has already occurred significant large Traffic jams occur very frequently - almost every day of the week.

Traffic jams are always very bad when a development is taking place. A development of the size of that proposed will will ensure that Radlett will be permanently jammed on a permanent basis.

This affects all of Radletts residents and is a hinderance to all - including emergency services.

The site does ,I understand, require public access or rights of way onto residential roads including The Avenue, Beech Avenue,The Heath,Paddock View,Hill Croft Park and Longridge Avenues.

This would severely damage the amenity of the residents and destroy the character of those roads. From what are sufficient and normally quiet access to one’s property would be plagued constant passing traffic.

This would make it difficult for residents to enter of leave their own properties.

The roads are clearly unsuitable for such access as ,amongst other things, they are nowhere near wide enough.

This traffic itself would be in difficulties as some present resident already park in the Street as they are entitled to do. This would cause traffic to be impeded - certainly lorries and the like trying to pass through while the development contuses.

It is understood that no provision is being made for eg doctors surgeries or schools to serve any incoming residents. The use of these facilities presently existing is already saturated.

We have lived in Radlett for [redacted] years and what attracted us was the almost village-like atmosphere including green spaces. While Radlett's nature has changed over the years it is remains a pleasant place to live.

We consider that the developments that have taken place already can be considered an overdevelopment that will destroy the character and attractiveness of Radlett forever

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

1 It is unclear how the residents and services are going to access and leave the site. The junction of the B553 and Watling Street would not appear, despite improvements, to be capable of handling this extra traffic and the queues into Radlett along Watling Street at rush hour is already severe. There should not be any passage allowed by vehicles or pedestrians permitted via the boundary closest to Radlett (ie where the site boundary and district boundary coincide). The residential roads have no pavements and are frequented in daylight and at nighttime by dog walkers and those with young children. It is far too dangerous to put non- essential traffic into these streets

2 the diagram is unclear, but if the site does require development of the green belt, then it should be opposed.

**74 - Mr Dean Ivory**

Submission Number: 74 Submission Date: 05/11/24 18:01

Respondent: Company/Organisation: Bidwells Name: MR Derek Bromley

On Behalf Of Company/Organisation: Name: Mr Dean Ivory

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

1) These objections are made on behalf of the Ivory Family, Ken Ivory, Dean Ivory and Chris Ivory. Our clients object to the Regulation 19 plan on the basis it is neither " Justified' or 'Positively Prepared'.

2) Our client's own Site B8 shown on the Regulation 19 Local Plan.

**Background**

3) The site is predominantly Previously Developed Land and comprises of workshops, open storage yards and equestrian facilities. There is a long and established planning history to this site. The total floor area of this mixed use is in excess of 7,000 sq.m. within part of the proposed allocation and covers an area of 6.2 hectares.

4) The site is close to the settlement boundary of Radlett which has good range of facilities/amenities and public transport links including a main line railway station.

5) Following the Reg 18 consultation our clients commissioned Transport and Noise reports to investigate some of the Key Development Requirements and these reports have been shared with the Council well in advance of the Reg 19. These files are collectively too large to attach.

6) The site specific Key Development Requirements items 1-4 have been addressed in the Transport Assessment

7) The issues raised in the Key Development Requirements item 6 have been investigated as part of a Noise Assessment Report

8) In both cases the reports conclude there are no "showstoppers" to the delivery of the housing proposed on Site B8 in accordance with the Reg 19 Local Plan. Indeed, the Transport Assessment shows the mitigation measures (all within the public highway) will have benefits for the wider community by adding to and improving a modal shift away from cars and providing greater connectivity with cycleways, paths, safe crossings and improved bus provision.

**Grey Belt**

9) The Government is proposing to introduce Grey Belt in the new NPPF, where development would not be inappropriate. The final definition and wording has yet to be confirmed however the proposed wording included *"any other parcels and/or areas of Green Belt land that make* a *limited contribution to the 5 Green Belt purposes".* That part of the allocation which is not Previously Developed Land would fall within this category. The Councils Green Belt study identified an area of Green Belt release which included land beyond the district boundary.

10) The Government consultation "Proposed reforms to the NPPF and other changes to the planning system" 24/09/2024 suggests and effective way of providing guidance and refers . *"Grey Belt land which makes a limited contribution to the Green Belt purposes will : a) Not strongly perform against any Green Belt purpose; and b) Have at least one of the following features: i Land containing substantial built development or which is fully enclosed by built form. ii Land which makes no or very little contribution to preventing neighbouring towns from merging into one another. iii Land which is dominated by urban uses, including physical developments. iv Land which contributes little to preserving the setting and special character of historic towns.*

11) The remaining part of the proposed allocation which is not Previously Developed Land would fall within Grey Belt. This is supported by the ARUP Green Belt Study which includes land beyond the district boundary.

**Is The Plan Justified?**

12) In relation to Site B8 the answer to that is no in two respects. Firstly, the site boundaries shown on the plan omits the workshops located within the area coloured red on the attached plan (Appendix 1) and shown in the photographs (Appendix 2). This simple mapping error should be corrected.

Secondly, the Key Development Requirement item 5 should be amended as it is not reasonable or justified having regard to the topography and the mature hedges and trees between Harper Lane and Harper House the listed building; trees which were probably planted or existed at the time Harper House was built. The Regulation 18 wording for item 5 stating *'the setting of a Listed Building that is adjacent to the site must be taken into account'* is acceptable.

**Has The Plan Been Positively Prepared?**

13) This is a qualified objection. Our client's raise no objection to the housing provision based upon the current standard methodology. Should the Governments new standard methodology apply for the purposes of this Plan, then there will be a gross under provision of housing. The new methodology would increase the housing number from 885 d.p.a. to 1,554 d.p.a., a 75% increase.

14) Whilst there have been Ministerial Statements regarding when the new Standard Methodology for housing need will apply, nothing is certain as to the final wording and trigger timing.

15) The current expectation based upon the Council's programme, is that the local plan will be submitted before the Government's proposed new Standard Methodology for determining housing needs takes effect. Our clients accept and acknowledge that given the acute housing shortage ( only a 1. 5 year housing land supply) that it is important a Plan is in place soon to enable early new housing delivery A further period of time without an up- to- date Plan will only add to an already difficult situation, so getting the Plan to Adoption is important. Given the circumstances the Council finds itself, with a significant risk of unmet housing need, it is important to identify and allocate in this plan more sites where this is possible and appropriate.

16) Given that planning policy and the plan process is a bit of a "moveable feast" the Councils expectation regarding timing may not be realised and there is no certainty. It is in any event clear the proposed housing provision will not meet the development needs during the plan period and an early review will be required.

17) In the event the new Standard Methodology does not apply to this Local Plan and the Councils meets the deadline for submission, then our client is of the view the Council should commit to an immediate review following the Adoption of the Plan. There will a period between the Inspector's report and the Council's formal Adoption for Council officers to start the preliminary internal processes.

18) In the event the Council is required to find additional sites to meet its housing need either due the methodology to be used for assessing the housing requirement, or if the Inspector finds that some of the proposed allocated sites should be omitted, then our client would wish for Site B8 Harper Lane housing allocation to be extended to include the area shown edged blue on Appendix 1 (in the attachment). Our assessment would be that the enlarged site would be able to accommodate a total of around 350 dwellings. Given our client owns an extensive landholding adjoining the proposed allocation the provision of 10% biodiversity net gain can be readily accommodated within our client's adjacent retained land holding.

**Statement of Common Ground**

19) Pursuant to the delivery of the site B8 allocation, the owners have agreed a Statement of Common Ground with St Albans Council, on a without prejudice basis. The agreed common ground is that the Council and the owners generally support what is set out in the Local Plan Part A and the Local Plan Part B, including subject to the alterations indicated above the Key Development Requirements for site B8.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**The proposed alterations to the plan; in the event that the current standard methodology for assessing housing need is the relevant criteria for this local plan, then the proposed allocation site boundary should be amended to include that area shown coloured red on Appendix 1 and within the Key Development Requirements for site B8 item 5 to be amended to 'the setting of a Listed Building that is adjacent to the site must be taken into account'. If it is found by the Inspectors that further land is required for housing then our client's propose that Site B8 be extended to include the Land shown edged blue on Appendix 1 (in the attachment).**

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Ivory Reg 19 Subs 2024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Our client owns Site B8 which is identified as a one of the Broad Locations to take housing growth. It is therefore of significant importance to the Local Plan and that any objections or clarification is properly considered in open forum.

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The site is partly a brownfield site, requiring use of Green Belt land to adjoin to the settlement. As highlighted, by their very nature, they do take longer on average to come forward given the need for demolition and remediation (which given the historical usage of the site will be required). There are also concerns regarding the length of leases on the site and how the land can be guaranteed to be available as a whole. The railway line separates the site from Watling Street and there is seemingly no connection to the built form to the south. As such, development would create an isolated development, where future occupiers would be reliant upon the car.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

Comment Number: 13

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In summary, there are a number of draft allocations which raise concerns on consistency:

The railway line separates the site from Watling Street and there is seemingly no connection to the built form to the south. As such, development would create an isolated development, where future occupiers would be reliant upon the car.

We have to conclude that not only does the Regulation 19 Plan fail to allocate sufficient sites for housing, or enough in the early stages of the Plan Period, but that Windridge Farm is a stronger contender than some sites the Plan does propose as allocations, even on the Council's terms.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

Respondent: Company/Organisation: Hertsmere Borough Council Name:

Comment Number: 4

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Due to the proximity of this site to Hertsmere's Boundary and Radlett, a reasonable proportion of the Affordable Housing allocation would be expected to be attributed to Hertsmere. This can be further detailed and agreed in a future Statement of Common Ground between the authorities.

Hertsmere would also encourage the development and improvement of the active travel and public transport links as much as feasibly possible surrounding the site ensuring the sustainable connection of the site with the wider area.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. ## 267 - Tarmac

Submission Number: 267 Submission Date: 08/11/24 08:55

Respondent: Company/Organisation: Turley Name: Mr Steven Kosky

On Behalf Of Company/Organisation: Tarmac Name:

Comment Number: 1

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

These site submissions have been prepared by Turley, on behalf of Tarmac, pursuant to the St Albans City and District Local Plan 2041, Regulation 19 Public Consultation, September 2024. Tarmac is a major local and national employer and operates a regionally significant minerals hub and Rail Aggregates Depot at Harper Lane, Radlett, importing hard rock and producing ready-mix concrete products and coated stone.

In September 2023 Turley submitted Regulation 18 representations on behalf of Tarmac objecting to the emerging Local Plan as then proposed, notably in relation to the Broad Allocation Site B8, Land at Harper Lane, Radlett. In this regard, Tarmac expressed very significant concerns that the permitted activities on the Rail Aggregates Depot site, which generate related levels of noise and HGV movements, were likely to adversely impact upon the expected residential amenities of future occupiers of the B8 site, leading to future disturbance and likely conflict of land use.

Our Regulation 18 representations highlighted that a large section of the B8 Broad Location falls within the 250m Rail Buffer identified in the adopted Hertfordshire Minerals and Waste Local Plan and that part of the B8 site overlaps with a site identified as a Waste Site Allocation in the same Minerals Plan. Tarmac therefore concluded that there is clear policy conflict between the emerging St Albans Local Plan and the adopted Hertfordshire Minerals and Waste Plan, making a large section of the B8 Broad location untenable.

Consequently, Tarmac sought the following resolutions to address these concerns.
a) To amend the B8 Broad Location site boundary, so as to completely exclude the Rail Buffer and Waste Site Allocation, as set out in the Hertfordshire Minerals Plan Policy Map extract, shown at figure 2.1 of the Regulation 18 submissions.
b) To change the permissible use of the amended Broad Location boundary, so to completely exclude residential uses, including those for later living or close care.
c) To change the range of uses permissible within the amended B8 Broad Location site area to only those falling within Class B2 (general industrial), Class B8 (storage and distribution and criterion (g) of Class E (office and light industrial) of the Use Classes Order 2020.

Whilst we note that some changes to the supporting narrative of Broad Allocation Site B8 have been made (notably criterion 6) these are insufficient to address Tarmac's overall objections to the allocation of this site for residential purposes as planned. Accordingly, as part of this Regulation 19 response , Tarmac continues to Object to the B8 allocation.

Whilst Tarmac is an active promoter of new development, both for its core operations and for other development activities that supports the existing and future communities of St Albans, it is important that any new strategic development, proposed as part of the new Local Plan, does not compromise Tarmac's existing critical site operations.

Accordingly Tarmac continues to seek significant changes in order to overcome their objection to the allocation of Broad Location B8 of the Regulation 19 Local Plan, as set out within these representations.

In this regard, Tarmac is willing to provide any additional information pursuant to a better understanding of the operational nature of their facility, if this will assist the Local Planning Authority in reconsidering a more appropriate, mix of uses for the residual B8 site, outside of the 250m Rail Buffer, identified in the Minerals Plan.

The concluding part of Section 2 of these representations sets out the resolutions sought by Tarmac to address these concerns, which have been updated to reflect the changes in the policy wording of Broad Location B8.

**RESPONSE TO THE B8 BROAD LOCATION - LAND AT HARPER LANE, RADLETT Broad Location B8 Site Constraints**

Policy SP1 of the Regulation 19 Local Plan identifies Broad Locations for new housing and employment growth in the plan period to 2041. Broad Locations are identified as large urban extensions of 250 + homes or strategic scale employment. The most significant of the Broad Locations are those comprising the Hemel Garden Communities, which are planned to the north and east of Hemel Hempstead. One of the Broad Locations is located at the southern tip of the district, to the south of the M25, at Harper Lane.

Site B8 – Harper Lane, North of Radlett, is identified as being 11.40 ha in area and capable of accommodating an indicative 274 dwelling units. We note in this regard that the previous requirement for a 50+ place Care Home, set out in the Regulation 18 version of the policy, has now been omitted from the Regulation 19 version. This is supported by Tarmac in principle, as the Site is entirely unsuitable for such sensitive residential uses.

We question however the presumptions made in terms of identifying the number of new market homes which are considered to be capable of being delivered on this Site. Firstly, a proportion of the Site lies within Flood Zones 3a and 3b, which precludes all residential development. It is also unclear at this stage for what purpose this land could alternatively be used for as it is unlikely to be suitable for use as public open space. This suggests that on a normal gross to net ratio of 60% (which allows 40% for open space, infrastructure and BNG delivery) that only around 6 hectares of net residential land will be available for residential development.

In this regard it is noted that the draft Local Plan sets a minimum density prescription of 40 dph for every site, however this would still only equate to a maximum of 240 dwellings on the Site. In addition, given the sensitivity of the Listed Buildings identified in policy and the requirements for enhancements to 'better reveal their significance' there is little scope to increase these densities to higher urban levels. Indeed the most appropriate solution is to significantly reduce densities in the vicinity of the Listed Buildings, which suggests a further reduction in the overall residential capacity of this Site, before the difficulty of the access arrangements are even taken into account.

in this regard, we note that the requirement for access to Harper Lane to be agreed with the County Council has been omitted in favour of achieving 'high levels of permeability' to accommodate walking and cycling, via active travel routes, between the Site and Radlett. This reflects the fact that Herts County Council (HCC) Transport raised an objection in relation to the allocation of the B8 Site at the Regulation 18 stage. Indeed, HCC Transport have consistently raised concerns about the residential allocation of this Site, even from the call for sites stage.

This is mainly due to the poor connectivity of the Site to Radlett and other known issues on Harper Lane and Watling Street, noting that the junction of the B556 and A5183 will require attention, due to capacity and other constraints.

HCC Transport further raised concerns at the Regulation 18 stage that the settlement hierarchy in the emerging St Albans local plan does not consider or appraise Radlett as a sustainable growth location. Therefore HCC Transport identified that the local plan needs to demonstrate the sustainability of what is, in transport terms, a *'particularly difficult location'*. HCC Transport therefore considered that the local plan will need to show how journeys will be made to and from key destinations in Radlett in a sustainable manner.

However this appears to have been translated in policy terms by St Albans Council into a number of general policy requirements which essentially seek support for improved footpath and cycle routes from the B8 Site directly into Radlett, the detail of which is currently unknown, but is to be agreed between St Albans Council, HCC and Hertsmere Borough Council at a future date. However there is no guarantee that these active links can actually be delivered, notably in terms of ensuring

the technical suitability of the potential active travel routes proposed into north Radlett, given the requirement for fully lit and hard surfaced walking and cycling routes directly from the Site into Radlett.

In addition, there is a presumption that any required rights over third party land at the selected points of access into Radlett can be so acquired, which may not necessarily be the case, without the need for potential compulsory acquisition by St Albans Council. Without the provision of these direct active travel links from the south and south west of the site into Radlett, for which there is no definitive evidence to confirm that they can be delivered, as required by policy, then access would need to be taken from the north of the Site, over the existing railway line, which the allocation policy correctly recognises *'acts as a barrier to movement from this site'*.

The need for a northern access arrangement would however be totally inconsistent with the basic premise of the B8 allocation, given that it is meant to be a sustainable location. However, if direct connectivity with Radlett from the south of the B8 Site is unachievable in practical terms, then this will result in additional vehicular, cycle and pedestrian movements moving southbound via Watling Street from the already congested Harper Lane, which has limited scope for further improvement. On this basis, and as highlighted by HCC Transport at the Regulation 18 stage, this calls into question the degree of due diligence undertaken by St Albans Council in appraising Radlett as a sustainable growth location for new residential growth originating from the St Albans District.

It is acknowledged that the Council are keen to pursue a 'brownfield first' policy when it comes to the identification of new strategic development sites and that the B8 allocation at Harper Lane contains an element of brownfield land in the northern area of the Site. However, whilst the redevelopment of partially previously developed land is sequentially preferable to other undeveloped sites in general principle, this does not indicate that such sites will always be suited for large scale residential use in every case, particularly if they are identified in transport terms as being 'particularly difficult locations'.

The existing brownfield use of the B8 Broad Location mainly comprises an established large, trading estate, with a range of existing small industrial and related retail uses, including a garage and open yard storage.

As such, the operational characteristics of the B8 site are currently compatible with Tarmac's existing strategic minerals operations to the north. In contrast, if this B8 Broad Location were redeveloped for residential use, the expectations of future residents will be for a neighbouring environment to the north of the allocation which is consistent with normal perceptions of residential amenity.

However this will not be the case with the scale and nature of the activities currently undertaken by Tarmac, as the Site is located within the Harper Lane Rail Depot Mineral Consultation Area. The rail depot is in constant operation 24 hours per day, and as St Albans Council is aware, the Rail Depot is safeguarded under adopted Minerals Local Plan Policy 10: Railheads and Wharves. In this regard, whilst we note that criterion 6 of Broad Location B8 recognises the strategic importance of this Site, the requirement is only that the residential design considers the depot so that *'the operation of the depot is not jeopardised and that no unreasonable restrictions will be placed upon it'.*

The Minerals Planning Authority, in its response to the Regulation 18 consultation, noted that Harper Lane Rail Depot is one of five safeguarded railheads within the county and that such railheads are critical infrastructure needed for the transportation of minerals and mineral products. The Minerals Planning Authority confirmed that Hertfordshire has no indigenous reserves of crushed rock, and is therefore entirely reliant on imports via the railheads (as well as by road) to meet the county's demands for this type of mineral.

Accordingly, the Minerals Planning Authority identified significant safeguarding concerns regarding this proposed B8 allocation and urged the District Council to reconsider the suitability of this land for allocation within the Local Plan. The Authority expressed concern that the B8 allocation could threaten the depot's longer-term viability as it could represent an incompatible nearby use resulting in amenity issues for future residents.

The Authority confirmed that waste management activity is also undertaken at the Harper Lane depot by way of recycling demolition waste, glass and rail ballast to produce secondary aggregates (planning reference: 5/0215 -98). The recycling facility is similarly safeguarded under adopted Waste Local Plan Policy 5: Safeguarding of Sites.

The Authority therefore urged St Albans Council to be mindful of paragraph 187 of the Framework and the 'agent of change' principle, in that the existing railhead operation should not be prejudiced by any future development in the vicinity, and any such development if it were to be permitted, would be required to provide any and all suitable mitigation in order to make that development acceptable (without placing unreasonable restrictions on the Rail Depot).

The Authority suggested that such mitigation would be likely to include restricting development in the northern part of the site, resulting in a reduction in the number of dwellings, or an increase in density, or both.

St Albans Regulation 19 Consultation 2024 – Broad Location B8 – Response by Tarmac

**Tarmac's Current Operations at Harper Lane Depot**

As stated in our previous Regulation 18 representations, the Harper Lane Depot remains of strategic importance, comprising a number of separate heavy industrial operations. These operations primarily comprise; a strategic rail head facility, for the importation of hard rock (granite sourced from Leicestershire); a coated roadstone plant; a crushing and recycling centre, for the production of recycled aggregates; and a mortar and concrete ready mix production plant.

The rail head and coated roadstone plant are of regional significance and so serve a wide catchment area within the County. The rail head and plant, in particular, serves the nearby London area, as well as a number of other counties beyond Hertfordshire. As a consequence, the Harper Lane Rail Depot continues to operate 24 hours a day and 7 days a week. Notably, the coated roadstone plant needs to operate both throughout the night and at weekends, in order to supply resurfacing projects, including important strategic works on the motorways and the highway network, where this can only be undertaken during such off peak periods.

In terms of HGV movements, there are no highway restrictions for vehicles heading east towards the M25 but there is a limit of 250 movements in place (125 in and 125 out) for vehicles arriving from or leaving to the west, in any single working day, under the terms of the 2009 permission for the coated roadstone and ready mix plants (HCC Application No: 5/2596-08). The planning permission also imposes general conditional controls on dust and noise, consistent with the operations of a major industrial facility of this kind.

The coated roadstone plant also operates under Local Authority Air Pollution regime and has an Environmental Permit that limits particulates from the stack. Under the terms of this Environmental Permit (Reference SADC 30/14) the permitted activities involve the production of bitumen coated stone and the crushing of returned, coated stone for recycling. The specifically permitted activity is for an Asphalt mixing plant, capable of producing 320 tonnes per hour of a range of Dense Macadam's and Hot Rolled asphalt.

**The Potential Impact Upon Tarmac's Commercial Operations**

As stated above, the existing use of the B8 site comprises a large trading estate, with a range of existing industrial and related retail uses. Therefore, the current operational characteristics of this northern part of the B8 Broad Location do not currently conflict with Tarmac's strategic minerals or other operations. In contrast, if any part of the B8 site were to be redeveloped for residential

use, even outside of the identified 250m buffer, the relationship between the two strategic sites would create an inevitable conflict of land use, by reason of the noise and disturbance impacting on the future residential areas. Tarmac are therefore highly concerned that the coated roadstone production, recycling and other permitted activities on the Rail Aggregates Depot site, which by necessity, generate levels of noise and HGV movements, throughout the day, are likely to adversely impact upon the reasonably expected residential amenities of future occupiers of the B8 Broad Allocation.

2.25 Whilst it is noted that in the Regulation 19 version of the B8 allocation the safeguarded Harper Lane Rail Depot must be considered in the design of the new planned residential development to ensure that its operation is not jeopardised, this does not address the 'agent of change' principle, which extends beyond the scope of only planning legislation. In this regard, it is highly unlikely that such impacts could be satisfactorily mitigated by a future developer and Tarmac would have no obligation to be engaged in this process.

Whilst Tarmac is an active promoter of new development, both for its core operations and for other development activities that supports the existing and future communities of St Albans, it is critical that any new strategic development, proposed as part of the emerging spatial strategy, does not interfere or otherwise compromise the viability of Tarmac's existing operations. Correspondingly, Tarmac would expect a similar strong resistance from the Council and others, if the strategic industrial operations described above, were proposed to be relocated, proximate to an existing residential community.

It is for this reason, that the Rail Depot satisfactorily coexists in its current form at Harper Lane, as it is a suitable commercial activity within its current industrial site context. This should therefore not be materially changed by the emerging Local Plan, in terms of the existing primary industrial land use. The requirement in policy that the Minerals Planning Authority must be involved in the Masterplanning work and directly consulted on any planning applications for the future residential use of the site, does not provide sufficient safeguards for Tarmac to remove its standing objection to the current B8 allocation.

It therefore remains incumbent upon St Albans Council, as responsible plan makers, to ensure that the strategic location of proposed new homes does not threaten any vital commercial activities that currently support the regional economy, as is the case with the Harper Lane Rail Depot, operated by Tarmac.

In conclusion, Tarmac retains its position of objecting to the allocation of site B8 for 274 new dwellings, in principle, given the lack of a suitable vehicular access and likely conflict with the future operations of the depot, as articulated above. Tarmac also requests the right to participate in the future examination of the St Albans Local Plan following its submission to the Secretary of State, pursuant to the matters raised in this Statement.

However, in the spirit of cooperation and, without prejudice, Tarmac sets out below a range of resolutions (set out in order of sequential preference) which if adopted, would potentially address the Tarmac objections raised at the Regulation 18 and this Regulation 19 consultation.

Please see attached Statement for more details

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Resolutions Sought to Overcome Tarmac's Objection

The resolutions sought as part of these representations to overcome Tarmac's objection to the allocation of Broad Location B8 of the Regulation 18 Local Plan are, in order of sequential preference, as follows: Tarmac also welcomes the opportunity to engage further with St Albans Council pursuant to the following matters and to provide any additional information as may be required.

1) Non-Residential Use of the B8 Site
a) Amend the B8 Broad Location site boundary, so as to completely exclude the Rail Buffer from the B8 allocation boundary.
b) Change the proposed use of the amended Broad Location allocation boundary, so as to completely exclude any residential uses.
c) Change the range of uses permissible within the amended B8 Broad Location site area to those falling within Class B2 (general industrial), Class B8 (storage and distribution and criterion (g) of Class E (office and light industrial) of the Use Classes Order 2020 and any other suitable sui generis commercial uses.

2) Partial Residential Use of the B8 Site
a) Amend the B8 Broad Location site boundary, so as to completely exclude the Rail Buffer from the B8 allocation boundary.
b) Change the proposed use of the amended Broad Location allocation boundary, so to completely exclude residential uses in the northern part of the modified site.
c) Broaden the range of uses permissible within the northern half of the amended B8 Broad Location site area to those falling within Class B2 (general industrial), Class B8 (storage and distribution and criterion (g) of Class E (office and light industrial) of the Use Classes Order 2020 and other suitable sui generis uses.
d) Where residential use is proposed, this should be limited to no more than 100 new dwellings, located in the most appropriate part of the amended B8 site area, accessible to the settlement boundary edge of Radlett, subject to robust evidence that this is compatible with the existing operations at the Depot.
e) Criterion 5 is supported and it is strongly recommended that an appropriate area of new open space is also created between Harper Lane and the Grade II Listed Harper House and Coach House to better reveal their significance.
f) A Development Brief and framework masterplan shall be prepared for the B8 allocation, for approval by the Council prior to the submission of any planning applications for the Site. The framework masterplan will need to demonstrate that all key stakeholders, including the Minerals Planning Authority and Tarmac have been fully consulted in the formulation of the framework masterplan.

Please see attached Statement for more information

### 315 - Bloor Homes and Department of Health & Social Care

Submission Number: 315 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Sarah Hamilton-Foyn

On Behalf Of Company/Organisation: Bloor Homes and Department of Health & Social Care Name:

Comment Number: 7

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Table 3.1 Broad Locations**

An objection is made to Broad Location B8 Harper Lane, Radlett, which is proposed for 274 dwellings as part of a mixed-use development.

**Broad Location B8 Harper Lane, near Radlett**

Paragraph 5.4.146 considers the Broad Location B8 North of Radlett – it is noted that the appraisal concludes from a transport perspective that:

***"the site does not relate very well to the edge of Radlett, and the nearest primary school would be some way distant, but Radlett Station (with a good service to London St. Pancras) would be ~ 2km distant. There is already a good footpath. footpath along Watling Street***

***into Radlett, and there is an opportunity to enhance this as a cycle route; however, the issue is that access to Watling Street would be at the northern extent of the site (via Harper Lane), which is the part of the site most distant from Radlett."***

Paragraph 9.2.3 states

"**At Harper Lane there is a need to closely consider school capacity, as discussed in Section 5, but otherwise the site benefits from reasonable accessibility to Radlett, where there is a very good offer."**

It is not clear why Broad Location B8 has been proposed over and above Land at Harper Green, particularly given all the evidence supplied to the Council in respect of promoting a scheme at Harper Green. It is noted that the SA under the Transport heading on page 47 previously referred to concerns being raised about safety at the adjacent Watling Street/Harper Lane Junction for Broad Location B8.

The SA in acknowledges that the proposed Broad Location B8 Harper Lane, near Radlett, does not relate well to the edge of Radlett and the nearest primary school is some distance away, but then states that Radlett station is under 2km away –"with a good service to London St Pancras". The site would not contribute to the settlement of Radlett and thus build upon the existing community. Unlike land at Harper Green which would provide a new primary school and provide the opportunity to build upon the permitted development of the former Harperbury Hospital site which is under construction.

The Broad Location B8 is a site included in the HELAA and appears to have come forward as a result of the Green Belt review (part of the site is a storage and parking of vehicles, plant and machinery and storage equipment formerly part of a waste transfer station and in the SA referred to as comprising light industrial area/trading estate, whilst the southern part of the site is greenfield), however, we consider that the Green Belt Review is fundamentally flawed for reasons outlined below in respect of land at Harper Green. There is no other evidence to support the proposed allocation and indeed the SA acknowledges the site is associated with a certain number of drawbacks/challenges. These are set out in the Broad Locations Sites – Recommended to Progress:

*"Part of the site is within flood zones, 3, 3a, 3a + 35% climate change and 3a + 70% climate change. The Strategic Flood Risk Assessment Level 2 requires this site to pass the exception test.*

*The site contains an area of Ancient Woodland, which is also designated as a County Wildlife Site and a deciduous woodland Priority Habitat. The site is adjacent to other deciduous woodland Priority Habitats and an archaeological area subject to recording conditions. The site contains a listed building and is within the 100 metres buffer of another.*

*The site contains two areas of contaminated land and an Existing Safeguarded Site. Some of site lies within the buffer zone of a Rail Aggregates Depot."*

It appears to have been considered as it is within the Green Belt buffer of Radlett (400m buffer) and adjoins the settlement which provides a wide range of economic and social benefits. However, the SA concludes that the proposed Broad Location B8 Harper Lane, near Radlett, does not relate well to the edge of Radlett and the nearest primary school is some distance away (paragraph 5.4.147 of the SA September 2024),

The inclusion of Broad Location B8 (HELAA ref STS-51-23 below) is unsound.

Harper Green HELAA reference is STS-34-18 and STS-33-18. The SA has not considered a smaller option at Harper Green which has been promoted to the Council, a reduced option showing concept plan for approximately 200 dwellings has recently been prepared which builds on the already completed scheme on the former Harperbury Hospital site.

The SA at paragraph 5.4.150 dismisses the location of Harper Green adjacent to the former Harperbury Hospital as poorly connected in transport terms, yet this location is approximately 4mins by cycle and 17 minutes walking distance from the proposed location B8 North of Radlett. There is already a bus service from Harper Green that connects to Radlett railway station and also to Colney Fields Retail Park and a solution to the Harper Lane/Watling Street has been proposed.

Bloor Homes has provided a thorough evidence-led promotion of the Harper Green site. In transport terms, this has included formal document submissions as part of their Local Plan Promotion Transport Strategies to St Albans and Hertsmere in October 2018 and February 2020 respectively. These have demonstrated the credentials of the site considered for a range of prospective housing levels with supporting infrastructure.

Attached at **Appendix 7 to our Reg 18 reps provided** an update of the report we submitted to Hertsmere Council in response to the Reg 18 consultation in November 2021, importantly this report addresses concerns raised by Hertfordshire County Council following a meeting they had with Hertsmere Borough Council and St Albans City and District Council.

**Harper Green –alternative site to Broad Location B8**

The St Albans SA has only considered a new settlement as an option adjacent to the former Harperbury Hospital despite previous submissions for a smaller scheme located within St Albans.

We have previously submitted a proposal for development at Land at Harper Green comprises approximately 470 dwellings and would provide a 2 FE primary school. The primary school not only benefits the new residents in terms of being able to walk to school, but also the existing residents (children would be able to walk to school instead of being transported to London Colney) The proposal provides an opportunity to build and consolidate on existing and committed development. We have since revised the proposal to a smaller scheme of 200 dwellings. Development at Harper Green would further support the new public transport service to the area implemented in September 2020 as part of the planning permission for the first scheme for 206 dwellings. This service carries 11 years of guaranteed subsidy through to towards the end of 2030 and hence plenty of time to grow within the context of further development. The service will also enable those travelling to and from the adjacent Healthcare site to use public transport. (The vehicle size has been chosen to allow for steadily growing patronage.)

There is an existing direct walking route via a Public Right of Way and quiet neighbourhood streets from the site to Radlett town centre and the rail station. As part of the proposals, the existing footpath along Harper Lane have taken place, providing a dedicated footpath / cycle path to Radlett. The new proposals would build on that and deliver improvements to Watling Street.

On foot this journey takes about 20 minutes, and to cycle about 10 minutes.

There may be other sites within the locality which would also benefit from and support the facilities and services provided at Harper Green. The proposed development will be set within large areas of green infrastructure, for informal and formal recreation and will provide benefits for the wider community, with enhanced facilities and services.

Conceptually the approach adopted to assess the propensity to travel by active travel and passenger transport modes as presented by WSP is valuable but in the context of a workplace travel plan where the home and workplace trips ends are fixed and mode choice is the only variable. In the consideration of a development plan, however, the home and workplace trip ends are not fixed and indeed their spatial distributions are being directly assessed. In this respect the evidence basis is incomplete in three important respects.

1. The methodology promotes locations where car trips could be made by active or passenger travel modes but are not, over locations where car trips are already lower than average. Several communities, such as Radlett and adjacent villages, already show very high rail passenger travel mode shares (2011 Census) largely by virtue of being served by trains on

the Thameslink route which provides direct access across London including to the City. Such communities should perform better than is reported particularly over other communities either without access to a nearby station or on other railway lines which run only to a terminus station in London. Demonstrable opportunities to support sustainable travel are therefore not being identified.

2. The methodology does not consider differences in infrastructure provision including the existing quality of active travel routes and the nature and extent of public transport services. In practice the provision of infrastructure is uneven but in locations such as Harper Green there has already been investment in dedicated active travel routes including along Harper Lane that can support further development within the community. With respect to passenger transport, the methodology is weakened by being based on existing service levels, as is acknowledged in the reporting, but again in respect to rail services does not differentiate the geography of the network. This is compounded by a generalised cost proxy of travel time which does not consider end constraints such as the ability/cost to park.
3. The methodology is overly focused on the peak hours periods as reported in the COMET model and therefore will not be balanced in terms of journey purposes. Journey-to-work trips are likely to be dominant but in practice only represent 20% of trips overall. By not addressing the 80% of trips, the benefits of allowing communities to growth in a proportionate manner will not be identified.

In summary from a highways/infrastructure perspective the site is characterised by:

- Comprehensive on-site permeable footway/cycleway routes;
- Continuous footway and cycle route facilities between site and Radlett;
- Provision off site for a separate bridge on Harper Lane over the railway line;
- Proposed Harper Lane footway widening to link with B5378 bus stops;
- On-site bus service linking Radlett, including rail station throughout the day and Colney Fields Retail Park off-peak (including weekends);
- Link to frequent rail services to London and other commuting destinations;
- Reasonable walking distance to frequent further bus services linking site to St Albans, Hatfield and Watford;
- On-site primary school facility; and
- Linkage to off-site rural PROW network

Land at Harper Green will provide a wide range of high-quality housing, including affordable housing.

The development will provide benefits for the wider community, with enhanced facilities and services, parkland and green infrastructure opportunities.

The location is well located with ready access to services and best able to support economic objectives.

There are local school, sports clubs and residential development along Harper Lane.

There are existing employment opportunities at the adjacent Kingsley Green Hospital, at the Hertfordshire Business Centre, London Colney. The National Autistic Society - Radlett Lodge School is located nearby. There is also a Veterinary Practice, Houndswood Care Home, Stage School Business, and further along Harper Lane is Radlett Golf Centre and Ivory's Trading Estate leading to Watling Street and the Radlett and Colney Industrial Estates.

The site is located within the Green Belt – but the extensive landownership provides the opportunity to create a new definitive permanent boundary for the Green Belt and preserves the gap between existing settlements.

With either proposal because of the land ownership there is an opportunity to design into the proposals a permanent “stop” in the form of a well-defined green edge to protect the setting of Shenley and Radlett and prevent any potential for future coalescence.

Such an approach meets the requirements of the PPG Green Belt (December 2023) as the impact of removing land from the Green Belt will be offset by compensatory improvements to the environmental quality and accessibility of the remaining Green Belt land, for example given the extensive land ownership provides an opportunity for new and enhanced infrastructure, new or enhanced walking and cycling routes, and improved access to new and enhanced or existing recreational and playing field provision e.g. the relocation of the Bowls club and the relocation of the football pitches.

This approach is also consistent with the NPPF in particular paragraph 74c where the emphasis is on the quality of place making and creating well designed and beautiful homes to meet different needs of the community and providing a genuine choice of transport modes. Paragraph 96b refers to the need to create attractive, clear and legible pedestrian and cycle routes. The proposed development at Harper Green is also consistent with NPPF (paragraph 102) as the scheme will deliver wider benefits for nature and address climate change, given the large areas of public open space and green infrastructure. This is also consistent with paragraph 180, with retained areas of woodland and new areas created including new community parkland, including areas of tree planting.

Bloor Homes controls wider land holdings in both St Albans and Hertsmere. The land controlled by the company amounts to some 83 hectares and is adjacent to land in public sector ownership. Bloor Homes have indicated in their response to the Hertsmere consultation that the nature of their arrangements with the former owners (Department of Health and Social Care) means that the proceeds would be reinvested in the National Health Service, as supported in previous Government statements.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Broad Location B8 is not justified.

In recognition of the unmet needs and the trajectory for the early years of the plan additional sites should be included which can deliver in the timescale. Land at Harper Green has been promoted to the Council in various options and can deliver a range and choice of housing to meet needs.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Representation_Form Table 31_ Broad Locations inc objection to B8 FINAL 5_11_2024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

The issues raised are fundamental to the preparation and soundness of the plan.

**324 - Elizabeth Ferdi**

Submission Number: 324 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Elizabeth Ferdi

Comment Number: 1

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I believe that the St Albans Local Plan has not had sufficient co-operation with Radlett, which abuts the proposed site for housing, along Harper Lane, running down to The Warren, Radlett. Residents need consultation.
The proposed housing will have a direct and adverse effect on the residents of Radlett, by overloading roads, and rail travel, and other social and retail amenities.
The proposed development could open onto small, private residential roads, such as The Warren, The Avenue, and Beech Avenue, which are unsuitable for construction vehicles, and high volumes of traffic from new housing that would be generated – especially in already busy periods e.g. the morning and evening rush to/from work and school; plus congestion at weekends in shopping areas.

I am in favour of creating new housing, but there needs to be proper safeguarding of the surrounding areas.

A better alternative to this proposed housing would be the use of brownfield sites or else the creation of whole new towns, like Milton Keynes or Welwyn Garden City. Perhaps our local authority (and others around the country) could make financial contributions to such schemes outside their area, so that their housing targets could be credited appropriately.

Finally, the loss of green space, which affords a restful gaze, would be a sad loss and detrimental to the mental wellbeing of Radlett residents, and people travelling through.

If there are to be further consultations, to allow residents to comment and/or object, I would be grateful to know how and when.

Thank you.

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

- **B8 – Radlett – 274 dwellings**

This development will impact on Red House Surgery, which is one of the most constrained practices in the locality. Early discussions have taken place regarding relocation to a new purpose-built facility. A detailed proposal is yet to be developed. As with any such proposal, it will be subject to NHS governance and business case processes. To mitigate the primary healthcare impact new developments in and around Radlett will have on Red House Surgery, developer contributions will be sought.

For each of the following Local Plan allocations, please add, '**Contributions to health facilities and services to meet the needs of new residents**.'
B3 – West Redbourn, Redbourn
B5 – Glinwell, Hatfield Road, St Albans
B6 – West of London Colney
B7 – North West Harpenden
B8 – Harper Lane, north of Radlett
L1 – Burstow Nurseries, North Orbital Road, St Albans
L2 – West of Watling Street, Park Street
L3 – East and West of Miriam Lane, Chiswell Green

## L1 - Burston Nurseries, North Orbital Road, St Albans, AL2 2DS

### 133 - Landowners of Burston Nurseries (Site L1)

Submission Number: 133 Submission Date: 07/11/24 10:14

Respondent: Company/Organisation: DLA Town Planning Name: Mr James Fitzpatrick

On Behalf Of Company/Organisation: Landowners of Burston Nurseries (Site L1) Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Please see attached report.

The draft Local Plan and accompanying Policies Map identifies the report site as proposed housing allocation ref L1. The identification of the development potential of this site is **supported** by the owners of this site. As is set out elsewhere in this report, the land is suitable for development and should be allocated in the Local Plan.

None of the key development requirements present a problem for the development of the site for the following reasons:

- Policy LG4 of the Local Plan requires Large Sites to have a Masterplan agreed before developing detailed designs in line with the District's Strategic Sites Design Guidance. Wakelin Associates have prepared a high-level masterplan to support this Regulation 19 submission and which can form the basis of initial conversations with the Council at the appropriate time. A more detailed description of the proposals have been provided in Section 6.0 of this Report and how they relate to the permission for the retirement village.
- The development will fulfil these requirements through reasons explained below. A financial contribution can be sought through a S106 agreement to support relevant schemes in the LCWIP and GTPs outside of the allocation.
- The approved scheme for the retirement village required the provision of an extended bridleway from St Stephen 003 to Lye Lane. This condition has been discharged under LPA Ref: 5/2023/0786, albeit a revised application will be submitted to alter the alignment of the approved bridleway shortly due to Thames Water requirements. Notwithstanding the above, the development will fulfil these requirements and it is expected a financial contribution (through a S106 Agreement) will be made to HCC in respect of improvements to Footpath 014.
- The eastern area of the allocation will have the greatest impact on the listed buildings. This issue was subject to an appeal for the retirement village, where the inspector identified a low to moderate level of substantial harm resulting from the development, and found the benefits of this scheme to outweigh this harm. A landscaping scheme is to be implemented as part of this development incorporating a landscaped buffer along the shared boundary to the listed buildings. In the above circumstances, it is not considered that the development on remaining part of the allocation, on the other side of the access road, will cause any additional harm.

- Whilst proposals are high level at this stage, buffers to the identified priority habitats will be offered to ensure they are protected. It should be noted that Footpath St Stephen 18 (in Burston's ownership) separates this allocation from the Orchard and Deciduous Woodland to the west/south-west. Likewise the new 6m wide bridleway will separate the allocation from Birch Wood to the south-east.
- Given the allocation is approximately 1km from the SSSI at Mill Quary it is not expected that any harm would be caused however this will be fully addressed in the Ecological Appraisal submitted with the application.
- A suitably worded planning condition can be imposed to ensure any resources found are used during the construction where possible.

In summary, we consider Policy L1 to be **legally compliant** and **sound**. **No modifications** are therefore necessary.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 145 - Catesby Estates

Submission Number: 145 Submission Date: 07/11/24 11:13

Respondent: Company/Organisation: Stantec Name: Mr P Derry

On Behalf Of Company/Organisation: Catesby Estates Name:

Comment Number: 16

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The site has a grade II listed building located centrally within its boundaries. The scheme will need to respect its special character and historic setting, which has the potential to impact upon the quantum of development. Again, there are concerns regarding any leasing. Continued development of active employment sites will lead to further out-migration and does not represent sustainable development.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**193 - Catesby Estates PLC**

Submission Number: 193 Submission Date: 07/11/24 15:55

Respondent: Company/Organisation: LDA Design Name: Mr Matthew Gibson-King

On Behalf Of Company/Organisation: Catesby Estates PLC Name:

Comment Number: 14

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In summary, there are a number of draft allocations which raise concerns on consistency:

The site has a grade II listed building located centrally within its boundaries. The scheme will need to respect its special character and historic setting, which has the potential to impact upon the quantum of development. Again, there are concerns regarding any leasing. Continued development of active employment sites will lead to further out-migration and does not represent sustainable development.

We have to conclude that not only does the Regulation 19 Plan fail to allocate sufficient sites for housing, or enough in the early stages of the Plan Period, but that Windridge Farm is a stronger contender than some sites the Plan does propose as allocations, even on the Council's terms.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

4. SW Herts JSP_Windridge Farm_Vision Document_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**248 - Historic England**

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 16

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**LI - Burston Nurseries, North Orbital Road, St Albans, AL2 2DS**

As identified in the SA, the site contains the grade H* listed Burston Manor House LEN: 1102862). It is evident that development of L1 has the potential to impact this listed building by altering its setting.

We welcome the preparation of the high level HA by Place Services. However, the proposed policy wording does not adequately reflect the recommendations of the HA. We had also provided detailed advice to you by e-mail on 30.7.24 setting out some requirements for this site, in particular that the eastern half of the site should remain open space to protect the setting of the Listed Building, with development confined to the western half of the site.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific.

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Policy should be revised to make it clear that development in the western part of the site and eastern part left open to protect setting of the Listed Building.

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend a slight change to policy wording throughout the Plan which would address this:

1. We would recommend amending `may include setbacks etc.' to read `should include setbacks etc'.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

Respondent: Company/Organisation: Hertfordshire and West Essex ICB Name: Rachael Donovan

Comment Number: 30

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

- **L2 – Park Street – 104 dwellings**

This development will impact on Red House Surgery branch in Park Street. Relocation of their main surgery will help to alleviate pressures in Park Street and for this reason, the HWE ICB will seek developer's contributions from any new development in and around Park Street towards the relocation of Red House Surgery.

- **L1 – Burston Nurseries – 180 dwellings**
  As per L2 above.

For each of the following Local Plan allocations, please add, '**Contributions to health facilities and services to meet the needs of new residents**.'
B3 – West Redbourn, Redbourn
B5 – Glinwell, Hatfield Road, St Albans
B6 – West of London Colney
B7 – North West Harpenden
B8 – Harper Lane, north of Radlett
L1 – Burstow Nurseries, North Orbital Road, St Albans
L2 – West of Watling Street, Park Street
L3 – East and West of Miriam Lane, Chiswell Green

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I am deeply concerned that the feedback provided during the Local Plan consultation has been largely ignored. After reviewing the 16 pages of comments regarding site L2 (pages 114 to 130 in the "Local Plan Consultation Summary Response Table"), it's clear that my input, as well as the concerns raised by others, has been met with dismissive and standardized responses.

For instance, when I raised specific issues during the Regulation 18 consultation last year regarding [insert specific concerns, such as environmental impact, infrastructure strain, etc.], they were essentially dismissed with stock phrases like "Noted," or "The inclusion of this site is in line with the methodology in the Arup Green Belt Review 2023," or "The Council is working with Herts County Council as the Highway Authority to undertake the transport impact assessments for the Reg 19 draft Plan."

This approach makes me question the genuine purpose of these consultations. What is the point of asking for public feedback if it is not going to be meaningfully addressed? It's disheartening to see that other residents who raised similar concerns have also received the same generic responses, with no real engagement from the Council.

I urge the Council to reconsider its approach and take the concerns of its residents seriously. A proper consultation process should include thoughtful responses and clear actions, not just dismissive acknowledgments. We deserve more than "noted" when the future of our community is at stake.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

I have significant concerns regarding the flaws in the Regulation 18 consultation process, which have hindered proper public engagement and scrutiny of the Local Plan.

Firstly, I was not made aware of the consultation about site allocations last year. Now I'm being told that it's too late to raise objections about specific site allocations. This feels like a failure in communication, as many residents, including myself, would have participated if the consultation had been more widely publicized.

Additionally, the consultation took place during the summer of 2023, a time when many people, including myself, were away. This limited my opportunity to comment, and I suspect many others were similarly affected. It's unreasonable to expect comprehensive engagement from the community when the consultation is held at a time when participation is likely to be lower.

Furthermore, I'm concerned by the lack of scrutiny that preceded the Regulation 18 process. It appears that there was no formal examination of the Draft Plan prior to this stage, and now the comments made during the consultation have been largely ignored. The dismissive responses given in the summary table are evidence of this.

Looking ahead, the timeline for Regulation 19 is also troubling. With the Council planning to proceed to Examination only three weeks after the Regulation 19 consultation ends, it's clear there won't be enough time for a thorough review of the public's feedback. This undermines the credibility of the entire process.

Finally, the choice of Green Belt sites seems to have been driven by speculative developers through the "call for sites" process, rather than being based on a transparent and systematic assessment. This raises concerns about whether these locations were chosen with the best interests of the community in mind or simply to appease development pressures.

In reviewing the webcasts of PP&CC meetings since December 2023, it's apparent that there has been little opportunity for proper consideration of individual site issues. It appears that planning officers have pushed the Plan through without giving these concerns the attention they deserve.

In summary, the Regulation 18 consultation process has been deeply flawed, and I urge the Council to address these shortcomings before moving forward.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

I have serious concerns that the site allocation process for L2 has breached the Council's own methodology, particularly in relation to the Arup Green Belt Review. The standard response from Planning Officers, which states, *"The inclusion of this site is in line with the methodology in the Arup Green Belt Review 2023, which recommends the site for further consideration,"* is dismissive and fails to address the real issues raised in the consultation.

Firstly, it appears that Planning Officers have not properly scrutinized the Arup Green Belt Review. During the Regulation 18 consultation, several flaws in the methodology were highlighted, yet none of these concerns seem to have been addressed. Despite detailed feedback from the public, including myself, pointing out specific issues with the way Arup evaluated Green Belt sub-areas, defensible boundaries, and buffers concerning site L2, these issues have been ignored.

Moreover, the methodology itself is flawed. The criteria used by Arup to assess Green Belt boundaries, including for L2, do not seem to follow a systematic or transparent process. For example, the identification of defensible boundaries and the establishment of appropriate buffers are critical elements in any Green Belt review, yet Arup appears to have neglected these when evaluating site L2. This raises the question of why these critical aspects were not applied, despite being part of the established methodology.

Additionally, the concerns raised in the Regulation 18 process regarding the flaws in the Arup Green Belt Review have not been addressed in the Regulation 19 process. Instead, the same proposals have been brought forward with no visible effort to correct the shortcomings identified earlier.

In summary, the site allocation process for L2 has not followed the Council's own methodology. The failure to scrutinize Arup's recommendations, address public feedback, and correct the methodological flaws undermines the legitimacy of the entire process. I urge the Council to revisit these concerns and provide a more thorough and transparent evaluation of site L2.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I feel that my comments and those of my fellow residents, from the Regulation 18 consultation regarding the Park Street proposed development (L2), have largely been dismissed and / or ignored. This is very frustrating as the comments are highly justified and the impact of this

development coupled with the Rail Freight development just up the road is likely to be devastating to this area in terms of traffic, road safety, noise, loss of wildlife and open, green space. Given the nature and number of objections, why is L2 still in the Regulation 19 process?

To put that "The inclusion of this site is in line with the methodology in the Arup Green Belt Review 2023, which recommends the site for further consideration" feels like you are deliberately missing and failing to address the point that many residents made that with respect to L2, Arup **did <u>not</u> apply their own methodology** in their Green Belt Review e.g. around defensible boundaries. In January, the Council agreed that L2 fulfils the purposes of Green Belt; rejecting the planning application and it is currently the subject of appeal so why is it still in the plan?

Given the extremely rapid time between consultation ending and the plan being finalised, when is the traffic assessment referred to in the responses, taking into account the Rail Freight Terminal, and proper assessment of the Regulation 19 comments going to take place?

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

Please remove L2 Watling Street Site from the Plan. This site is still included in Regulation 19 process even when the planning application to build houses has been rejected by the Planning Committee. Why is this?

No proper traffic assessment was undertaken in relation to L2 especially as the Strategic Rail Freight Terminal has now been given the 'go ahead' to be built. An assessment was done when the country was in lockdown, so it was it was a totally inaccurate measurement.

This land (Watling Street site L2) is totally unsuitable for development. It is valuable greenbelt and should not be sacrificed whilst there is ample bown field sites that coudl be developed on. This has been ignored by the planning officers that have failed to follow Arup's green Belt Review and as a rseult have ignored vital comments in the Regulation 18 process.

Watling Street site L2 was rejected by planning in January 2024. This raises the question of why it has been included in the Regulation 19 process?

A large number of people objected to the inclusion of Watling Street site L2 so I fail to see why this is still being included int he Regulation 19 process

To top this off the Watling Street site L2 is totally inappropriate for development. There isn't a valid traffic assement, no consideration has been taken intot he account fo the SFRI that will add over 10,000 vehicle movements a day. The roads are already over capacity and the site is on very busy roads next to the most dangerous and difficult roundabout in the county, if not the whole UK

I have objected to this proposal on a number of occasions, primarily on the grounds of traffic which is absolutely horrendous. However, I am disappointed to see that my valid concerns have, essentially, been dismissed with the vague response that Herts Highways will carry out a traffic assessment. I cannot see that any traffic assessment has been carried out to date. Any resident of Watling Street will tell you that most days of the week, the traffic queue to the Park Street roundabout tails back all the way into the village (just ask us residents for Ring doorbell footage if you need evidence!). There is no point in asking residents to comment on proposals when you blatantly ignore or dismiss our valid concerns. Many residents have raised concerns about the traffic here but all have been dismissed. In addition, the effects of the new Strategic Rail Freight Terminal do not seem to have been taken into consideration. This will generate much more traffic along the A5183 past site L2 than we already have - please tell me how any traffic assessment has accounted for these extra vehicle movements?

In addition, I believe there are serious flaws in the Regulation 18 consultation process. Firstly, I was not aware that there was a consultation about site allocation in the Local Plan last year - what was your process for ensuring that local residents were informed and had the opportunity to comment? I have now learnt that it is too late to object to site allocation - how is this a fair and equitable process? The Green Belt locations identified in the Plan have been driven by developers who have just randomly earmarked any piece of land that looks like it hasn't already been built on. There has been no systematic process to identify suitable land to build on and certainly traffic has not been considered when identifying land.

Having looked in detail at the planning officers' responses to comments relating to criticism of the Arup Green Belt review, I see that the standard response has been, “The inclusion of this site is in line with the methodology in the Arup Green Belt Review 2023, which recommends the site for further consideration”. However, I believe that Planning Officers have not scrutinised the Arup Green Belt Review and consequently have ignored comments in the Regulation 18 process.

I can see from the comments that many people, myself included, have objected to the inclusion of the Watling Street (L2) in the local plan last year. An application to build houses on this site was, rightly, rejected by the Council In January, as it fulfils the purpose of Green Belt. Therefore I am baffled as to why site L2 has been included in the Regulation 19 process.

There have been a lot of objections to the Watling Street site L2 being included in the plan already. I don't understand how this L2 site is still being considered seeing that the planning permission was rejected. it makes not sense to include the L2 site in the Regulation 19 process.
I would also say that the I am not convinced that the correct approach has been taken to asses traffic. There were lots of questions raised as to the validity of the traffic report. I would also say especially, that no thought has been given to the increase in traffic from the Rail Freight.
The location of the Watling Streel L2 site in beside the dangerous Watling Street roundabout and alongside two congested roads. I just don't think the correct weight has been given to the current heavy traffic on Watling Street.

As I originally requested the planning team take note of, but was IGNORED! With the strategic rail freight terminal now being build, the traffic assessment that was conducted is NULL and VOID (if it did indeed even take place?!). It does not take into account all the extra traffic that will come from it in the years moving forward. It was agreed that there would be a further traffic assessment, but that has not been done either! It is estimated approx 10,000 additional vehicle movements will come from the STRIFE along Watling Street past reference L2 - what traffic assessment has been undertaken to account for this??

If you do not carry out this assessment then the development CANNOT be allowed to move forward.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

You MUST carry out a correct and proper assessment of the traffic, taking into account the new Strategic Rail Freight Terminal which is being built just a couple of hundred metres from this proposed L2 new development. To not carry out a correct and proper assessment MUST be deemed non-compliant.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

The L2 site was the single more objected to site from the entire local plan consultation. So why is it still included in the local plan? SADC is a body of elected councillors to represent the local residents. 9% of the condensed comments attached to this plan (17/190) refer to this one site and demonstrates that SADC have dismissed the public consultation and not addressed any resident concerns on this matter.

Considering this site is Greenbelt and that building on it will irrevocably destroy the attached wildlife reserve and significantly impact the adjacent Traveller's site which breaches the Council's commitment to support during a climate emergency, and may not upheld their commitment to EDI .

This site is also subject to a development application and as the resident comments and concerns were ignored (highlighting again that this was the single more objected site across the District), it appears that the inclusion is driven by applications and not by suitability. As a local resident who will be impacted, this is particularly concerning.

It's also contradictory as in January 2024, the Planning Committee rejected a development application as they agreed this site fulfills the requirements of a Greenbelt. So it is difficult to understand why this has not been removed from the local plan by planning officers?

The L2 site has a particular issue with traffic. The current traffic assessment was carried out during COVID-19 restrictions so doesn't reflect the current traffic state. In recent months the work has become on the Segro Freight Terminal and this will add significant traffic, including HGVs until the road. SADC told local residents that HCC would carry out a new traffic assessment, but no results have been shared and yet the L2 site is still in the Local Plan.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is

There is a Neighbourhood Plan in the St Stephen's Parish that demonstrated where housing could be built in the Parish that was voted for by the local residents. This locally supported neighbourhood plan had appropriate housing that would have the backing and co-operation of local residents.

Why has SADC not used this plan in their local plan and dismissed all comments from local residents?

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

Local people have been ignored, as this land is a vital lung between St Albans and Park Street. The traffic is already far too heavy along this road and the Rail Freight terminal will only add to this problem. There is a narrow footpath alongside a very busy road which is unsuitable for mums with push chairs. Access into this site will lead to major traffic hold ups impacting the notorious Park St roundabout.

There is not the infrastructure to support such a large number of developments. Roads are already at capacity- every day an accident impedes on the traffic flow. Schools and surgeries are at capacity in Park Street. We will lose a vital lung between the village and St Albans if the land opposite the BP garage is developed. It is good farmland which we can not afford to lose. Access to amenities is difficult along a very busy road with a narrow footpath

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. ### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

a) Traffic assessment as to how housing on this Green Belt site will add to the already impossible situation on the A5183 roundabout, irrespective of whether the Strategic Rail Freight introduces as additional 10,000 vehicle movements daily, has FAILED TO BE CARRIED OUT despite promises from the council. This main route out of Park Street village is already hazardous, overcrowded and unfit for purpose as it is.

b) Flooding in Watling Street along the junction with Park Street Lane is a historic problem for businesses and residents. My own Grade 2 listed property has been flooded on numerous occasions causing thousands of pounds of reparation work needed to restore its livability. As climate change is showing increased storm and rainfall, building on one of the few remaining Greem Belt sites acting as both a "lung" and a drainage space, will exacertbate the situation further.

Submission Number: 145 Submission Date: 07/11/24 11:13

Respondent: Company/Organisation: Stantec Name: Mr P Derry

On Behalf Of Company/Organisation: Catesby Estates Name:

Comment Number: 17

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Park Street is a Tier 5 Medium-Sized Village. As such, it has limited facilities. The 104 dwellings would be better placed in a more sustainable settlement such as St Albans. The long frontage along Watling Street also creates the impression of encroachment into the countryside, as highlighted by the Green Belt assessment. The site is also adjacent to a landfill area, and as such will require significant ground testing and remediation to ensure it is suitable for development.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The site allocation process is flawed in the methoodology used for Arup's review. The defensible boundaries & buffers were not dealt with regard to L2.

The flaws that were pointed out have been ignored.

L2 Watling Street site, why has it been included in Regulation 19 process? especially after so many people objected

Why has this been included in the plan when L2 was rejected by the council?

Traffic ssessment L2, the traffic assessment bears no relation to the reality of the local traffic, which is getting worse and volumes becoming real risks to safety, commercial aspects & the envronment.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In summary, there are a number of draft allocations which raise concerns on consistency:

Park Street is a Tier 5 Medium-Sized Village. As such, it has limited facilities. The 104 dwellings would be better placed in a more sustainable settlement such as St Albans. The long frontage along Watling Street also creates the impression of encroachment into the countryside, as highlighted by the Green Belt assessment. The site is also adjacent to a landfill area, and as such will require significant ground testing and remediation to ensure it is suitable for development.

We have to conclude that not only does the Regulation 19 Plan fail to allocate sufficient sites for housing, or enough in the early stages of the Plan Period, but that Windridge Farm is a stronger contender than some sites the Plan does propose as allocations, even on the Council's terms.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

This development received overwhelming condemnation from local residents, and the application to build on this site was rejected by the Planning Committee in January 2024. It now seems that all of this has been disregarded to allow this site to be included in the Regulation 19 process. This decision seems to be based on ARUP incorrectly using its own methodology to produce a flawed result at to why this should be included in the local plan.

One of the significant points of objection in this matter is the significant impact of extra traffic on local roads. It has been regularly demonstrated that the local roads are exceptionally busy with queues regularly stretching back approximately three quarters of a mile into Park Street village itself. I have yet to see a response to this point being raised or indeed to the fact that Atkins admitted that the traffic survey was inaccurate, that the traffic survey was conducted during lockdown, or that the traffic modelling was incorrectly used thus producing skewed results. I myself have also raised concerns over the safety of the junction siting and the impact on car drivers and pedestrians, and this has also received no response. This traffic assessment also failed to address the impact of the impending rail freight, and the extra burden of traffic that this will bring.

The concerns I had submitted about the Plan in the Regulation 18 consultation appear not to have been addressed. Why have these issues been ignored.

It has not been made clear that a consultation about site allocation in the Local Plan took place last year. It is therefore no surprise that it is now too late to submit objections.

I understand that flaws in the methodology used by Arup's Green Belt Review were brought to the attention of Planning Officers. However, I believe that these issues have not been addressed.

Wailing Street development planning application, site L2 was rejected by the council earlier in the year, however, it is still part of the Reg 19 process.

The traffic issue has to be considered in line with the development of the Strategic Rail Freight Terminal. SRFT is designed to have 10,000 movements per day. Many of these will use Watling Street and further clog an already very busy Park Street Round. Not to mention the air pollution. Yet no traffic assessment has been completed for L2.

AS the time runs out for the invasion of the Green Belt Land in Park Street , St. Albans, it does seem that all previous objects have been ignored, and only when it is too late to correct the mistake made by making this area into yet another large Development will there be regrets.

In a nutshell – the infrastructure just will not be able to sustain this invasion. Traffic Congestion, schools, shops, Doctors, ..... the list just goes on and on, these services are pushed to the limit now, where is it all going to end? Do we just say 'good bye' to all things green – it really does seem that way, and it is still with a modicum of hope that I trust the powers to be will take note of the many objections submitted and not allow this to happen.

The proposed development was objected to on a grand scale by local residents, yet the council have still seen fit to include it in the Regulation 19 process.

The planning application to build on site L2 was rejected in January by the planning committee. However, the council seem to have either forgotten or ignored this to include this site in the Regulation 19 process.

The council have failed to address the many flaws highlighted in the original traffic assessment. Not only in relation to the existing problems with local traffic and how the development of L2 will exacerbate this, but they have also neglected to address the impact that the rail freight terminal will have on local roads.

I am submitting my response by email as I have found the Portal arduous to use and, no doubt, a deterrent to other would be contributors, so I am sure you will have had less response than otherwise might have been the case.

Be that as it may I am aware that there is significant opposition to the inclusion of L2 (West of Watling Street) in the Plan to which I add my own opposition. Given the status of this land - Primary Green Belt / Productive Agricultural / Wildlife Habitat etc - I am astonished to see it included.

The Council's responses to the numerous valid objections to the inclusion of L2 are, in my opinion and that of others I have spoken with, superficial, lacking in important detail and perfunctory, with repeated comments like "noted" or "The inclusion of the site is in line with the methodology in the Arup Green Belt review 2023 ....." (This review was much criticised for its integrity at the recent public inquiry into the building of 95 dwellings and totally rejected by objectors).

In my opinion the Council's responses are an insult to the heartfelt, technically valid concerns and hard work that the community have contributed to the consultation process and are an undermining of the democratic process. This is very much to the Council's detriment

In conclusion, I do not accept that this draft Local Plan is sound and, as it relates to L2, it is certainly contrary to the wishes and well laid out legitimate objections of the overwhelming majority of local objectors.

**239 - Alison Joynson**

Submission Number: 239 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Name: Alison Joynson

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As over a hundred other [redacted] of the Park Street/Frogmore villages have done, I have written several times objecting both to developments on this area and the inclusion of it in the Local Plan. All these perfectly-valid objections have been dismissed by the St Albans District planners without proper consideration and often by making incorrect statements.

I am repeating my prior objections to the inclusion of L2 in the Local Plan as all of these objections are stlll valid. This site should be removed from the local plan.

a) This area of the Green Belt is the only open space south of the Park Street roundabout along Watling Street between St Albans and Park Street and is beautiful open farmland. It is an integral part of the Green Belt between St Albans and How Wood and Park Street. Along with the rest of the Green Belt south of St Albans (Land Parcel 28) it has prevented coalescence of Park Street, How Wood and St Albans for decades. As the only Open space along Watling Street it fulfils the requirements of Green Belt purposes very well by maintaining an undeveloped gap between St Albans and Park Street/Frogmore and it should be retained as Green Belt and not developed.

b) If developed it would also break through the current strong, permanent, 2000 year old barrier of Watling Street. This would then violate two of the main reasons for maintaining the rest of the Green Belt in this area which are :- not joining St Albans to Park Street and having a strong permanent Green Belt border. Further encroachment on this countryside. between St Albans and Park Street and How Wood would then be facilitated. This is why developers are so keen to break into this area via this site.

c) There are no facilities within easy walking distance except a small convenience shop in the BP garage. All other shops will require a car journey. The junior school is too far away for children to walk so will also require additional car journeys. The bus services from this location are too unreliable to use on a regular basis. They only run infrequently during the day and not at all on Sundays and Bank Holidays. Park Street station is 750m away from the houses and only provides an approximately hourly but unreliable shuttle service between Watford and the small St Albans Abbey Station. As virtually all journeys will have to be made by car the site is not sustainable

Traffic along Watling Street at peak times is horrendous with queues tailing back up to the top of the hill. With this development, where everyone would need to use cars to get anywhere, the situation would be a lot worse. Access to the site would generate road blockages for traffic travelling south and aggravate the already long queue for those travelling north.

d) There is a wildlife reserve on this site and it has even been suggested that this should be built on. Neither the potential developers, nor ARUP, who carried out the Green Belt review, has carried out a thorough biodiversity survey of the effect of this development both on the wheat field and the wildlife reserve. There are protected species of animals both on and around the site, including badgers, bats, hedgehogs, reptiles and red-listed birds. These will be adversely impacted by development. An assessment of the significant negative effect of this development and a critique of the inadequate review done by the potential developer, was submitted in March 2022 as part of the response to the original planning application and is still valid.

In summary, this site is one of the most important Green Belt sites in the District and needs to be kept as Green Belt and not developed.

1. Alison reasons against development Local Plan 2024_[R].pdf

## 241 - Dr David Joynson

Submission Number: 241 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Name: Dr David Joynson

Comment Number: 1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**I object to the inclusion of L2 - West of Watling Street in the District Local Plan it should be removed for the following reasons**

# 1 Council Treatment of Existing Objections

## 1.1 ARUP Methodology

Over a hundred local residents have already presented Objections to the inclusion of this site in the previous Local Plan and these are still applicable. The council reply (in Ref 1) to more than sixty of these has been "The inclusion of this site is in line with the methodology in the ARUP Green Belt Review 2023, which recommends the site for further consideration'. However the council reply is not correct. I assume that the writer has not read the ARUP review (Ref 2) carefully nor the submission by Greebelt (Ref 3).

In the ARUP review there is a methodology for evaluating which sites within an ARUP buffer zone should be assessed for development,where a motorway, A-road or railway line forms a natural stop to the settlement,. This is shown on page 24 Fig 4.3 (Ref 2). The area of land near the bottom left is marked with a 'X' which ARUP defines as 'not assessed' thus any assessment of such land is contrary to the ARUP methodology.

The land L2 opposite the BP garage is wihin the ARUP buffer zones and is next to an A-road so it meets these criteria. It is definitively shown (in the Greenbelt submission Ref 3) that is in exactly the same relative position as the site marked with an 'X' on the ARUP Fig. 4.3 as not to be assessed (for development). Thus according to the ARUP methodology L2 should not have been considered for release from the Green Belt.

## 1.2 Consideration of Objections

In response to the sixty plus residents' Objections menioned above the council has not given one single reason why any of these Objections should be rejected. As well as noting the error made by the council as above (Section 1.1) it can be seen that the only comment made is for 'further consideration' of the site. 'Further considertaion' does not mean dismissing the Objection, but means considering whether the site should be released for development or not. This clearly has not taken place. Given the large number of valid objections, many agreed with by ARUP in their report, plus some not even considered by ARUP at all, together with the breach of so many NPPF guidelines, Green Belt purposes and even government policy the correct 'consideration' should be to accept the Objections and remove the site L2 from the Local Plan.

# 2 Biodiversity and the Environmental Value of this Site

According to The Local Plan in Chapter 10 it 'seeks to protect and enhance the natural environment and biodiversity' This is completely incompatible with proposing L2 for development.

The L2 site consists of an arable field and a wildlife reserve and the combination creates a relatively ecologically rich site. The reserve and associated field has a thriving badger and small mammal population (including red-listed hedghog) and creates a diverse and varied wildlife environment.

A review, carried out, by a prospective developer, of the environmental value of the arable field was flawed as it did not include a) the effect of development on the wildlife reserve nor b) the widlife contribution of the field margins. It is well-documented that arable field margins are a rich habitat for butterflies and moths and the long narrow shape of the field mean that these are a bigger proportion of the field than usual. These insects, their caterpillars and the arable crops of the field also have a very positive efffect on the local bird population and significantly increase the biodiversity of the whole area.

I have undertaken surveys of the local area for a national wildlfe charity for about fifteen years during which time I have found 12 species of butterfly and 39 species of bird of which 36 have been seen in the last 4 years. (Most recently skylark singing over the field and peregrine falcon). Many of the birds and butterflies visit local gardens. Development of this site as a modern residential development with paved/tarmac drives and modern 'easy to maintain' rear gardens will reduce the biodiversity significantly. This is contrary to the Council policy stated in Chapter 10 of the Local Plan

## 3 Current Governnment Priorities for Development

The current government policy was made in a Ministerial Statement to the House of Commons on the 30th July (Ref 4 Page 2) and repeated in the latest Draft of the NPPF (Ref 5 ) on an order of priority for development . This is 'first to brownfield land, before moving onto grey belt sites and then to higher performing Green Belt land'. Grey Belt has been variously described by the government and draft NPPF as Green belt 'with little aesthetic or environmental value', as 'previously developed land', as being of 'poor quality and ugly areas' and 'having little ecological value'. This is the exact opposite of the Watling Street site which is of excellent quality serving as a productive arable field, is beautiful countryside, has a high biodiversity and ecological value.. It is thus clearly high quality Green Belt and should not therefore be prioritised for development.

There are in St Albans previously developed and ugly, heavily degraded Green Belt sites which have little or no ecological value and fulfil all the definitions of 'Grey Belt' and are not included in this proposed District Plan. .According to government policy' these sites should be developed first. The L2 site is productive agricultural land which has never been developed, has high biodiversty value and is a very important part of the Green Belt as highlighted in the previous objections . According to both the Ministerial Statement and the NPPF this land should not even be considered as a priority for development.

## 4 Summary

I object most strongly to the continuing inclusion of this site for devlopment in the Local Plan. As the council has ignored my previous objections I am including (in the Appendix below) a copy of those I raised to the Draft Local Plan in 2023 omitting duplication with the above. It can clearly be seen that L2 performs the functions of Green Belt extremely strongly with respect to maintaining gaps between settlements and preventing encroachment on the countryside. Developing this land also violates the NPPF on boundaries and is contrary to the government policy to prioritise degraded land that has already been developed ('Grey Belt') and it creates extended ribbon development. In suggesting L2 for development ARUP (Ref 2) misrepresented the nature of the land; included a judgement on the gap between St Albans and Park Street that is clearly untrue and broke their own rules on the sort of site that should be considered for development.

**Appendix: Objections already made to the Draft Local PLan 2023**

## The proposed development L2 - West of Watling Street should be removed from the District Plan for the following reasons

### 1 To stop the Merging of Settlements

Green Belt Purpose two is to prevent neighbouring towns and built-up areas from merging with each other. This piece of Green Belt represents 70% of the gap between St Albans and Park Street/Frogmore and if developed would leave a gap of only c150m. This is less than the minimum distances considered adequate (e.g. the 400m used by ARUP in their Green Belt Report Ref 1) and thus it would merge the two settlements in violation of Purpose two of the Green Belt .

### 2 Unique position of this area of Green Belt

The existing gap of 500m between St Albans and Parkstreet/Frogmore is the smallest of the remaining gaps between St Albans and any of the surrounding built-up settlements. This piece of Green Belt is therefore the only one of this size in the whole of the St Albans District which if developed would merge two settlements. As such it is uniquely important to maintain this area as undeveloped Green belt.

### 3 Avoidance of Ribbon Development

The Local Government Association Planning Advisory Service (LGA-PAS) identifies the prevention of ribbon development as one of the positive achievements of the Green Belt. This development would merge St Albans with Park Street/Frogmore by ribbon development along Watling Street (A5183) in contradiction to the LGA-PAS. Even worse it would create ribbon development all the way from the M25 to the centre of St Albans.

### 4 Violation of National Planning Policy Framework (NPPF)

As well as breaking Green Belt rules, proposing to develop this area of land violates the NPPF. Firstly the NPPF states that when assessing Green Belt for development first consideration should be given to land that has been 'previously developed and/or is well served by public transport'. There are areas of underutilised brownfield sites and some Green Belt land that falls into this category. This site, however, is productive agricultural land which has not been developed and public transport is very poor.According to The NPPF this land should never have been considered as a priority for development.

### 5 Green Belt Boundaries

Secondly, according to the NPPF, Green Belt boundaries should be recognisable and permanent. The current boundary is the 2000 year old Roman Road, Watling Street and is both recognisable and permanent.. The new boundary would be a row of sparsely planted trees in the middle of a field which is neither permanent not even adequate according to the ARUP report (Ref 2). Developing this area thus violates this important NPPF principle of Green Belt boundaries.

### 6 Assist in Safeguarding the Countryside from Encroachment

The NPPF emphasises purpose three of the Green Belt which is to 'assist in safeguarding the countryside from encroachment' . The whole area west of Watling Street and north of Park Street Lane/Tippendell Lane is countryside including wheat fields, grassland and a nature reserve. The

strong and permanent boundary of Watling Street protects all of this area from encroachment. Replacing this boundary with a weak impermanent one would facilitate later encroachment on the rest of this countryside. Developing SA108 is thus contrary to the NPPF and Green Belt policy as a whole.

## 7 Separation of sub-area SA108 from SA107

It has never been suggested before, neither in the 2013 SKM Green Belt review nor the 2017 AECOM review, that the area of Green Belt west of Watling Street between Park Street and St Albans (Land Parcel 28) should be split into two separate Sub-Areas nor that the 'new' SA108 should be released for development. Land Parcel 28 is an integral whole much of which is farmed by the same farmer for wheat and other cereal crops. As noted above, artificially dividing this area into two replaces a strong permanent boundary by a weak impermanent one and thus the creation of sub-area 108 is in breach of the NPPF. SA108 and SA107 should be merged together again as a single unit.

## 8 Development of SA108

ARUP made a number of serious errors in proposing this area for development. For Green Belt Purpose 2 ARUP have classified SA108 as being 'enclosed' by built development. This is a complete misrepresentation. This site is Open and is substantially surrounded by undeveloped Green Belt. In the photograph that ARUP took of this site there is not a building in sight. They also state that this development will not close the gap between St Albans and Park Street which is manifestly untrue (Points 1-3 above)

## 9 Traffic at Park Street Roundabout

There are already long queues during rush hours and the building of the Rail Freight Terminal will generate 10,000 to 15,000 vehicle movements per day many of which will use Watling Street past this development. Even more will cross the Park Street roundabout, causing additional queuing. No proper assessment of this has been done. The potential developer carried out their survey during COVID when driving restrictions applied. It is ridiculous to then build a housing development here before the effect of the Rail Freight Terminal is known.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**L2 - West of Watling Street site should be removed.**

## 242 - Steve Barker

Submission Number: 242 Submission Date: 07/11/24 21:29

Respondent: Company/Organisation: Name: Steve Barker

Comment Number: 2

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

I express my dissatisfaction with the responses provided in the “Local Plan Consultation Summary Response Table” regarding site L2, specifically on pages 114 to 130. It is disheartening to see that the Council's responses to the numerous comments, including mine, have been largely dismissive and lack substantive engagement.

Many people raised concerns about the Plan during the Regulation 18 consultation last year, particularly about the impact on green belt and traffic congestion. However, these concerns appear to have been dismissed with standard, non-specific responses such as “Noted,”“The inclusion of this site is in line with the methodology in the Arup Green Belt Review 2023,” or “The Council is working with Herts County Council as the Highway Authority to undertake the transport impact assessments for the Reg 19 draft Plan.” etc.

It is frustrating to see that the feedback process seems to be a mere formality, with little to no genuine consideration given to the concerns of the community. This indicates the the feedback has not been considered.

### If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?

* No, I do not wish to participate in hearing session(s)

### I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The traffic assessment for L2 is seriously lacking. There hasn't been any traffic study that considers the impact of the new Rail Freight Terminal. The Rail Freight Terminal is expected to generate over 10,000 vehicle movements daily, with many of these passing along Watling Street near L2.

Has any traffic study been done to address the fact that additional developments will compound any other assessments that have taken place?

The site is located near three already busy roads and an extremely hazardous roundabout, yet no traffic assessment appears to have been carried out. We were assured that a traffic assessment would be done, but it seems this hasn't been fulfilled.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The proposal to develop the site has not taken into consideration the comments of the local residents (including myself) and appears to be based upon false comments as to the appropriateness of the site. As such the site allocation process is flawed and fails in the Duty to Cooperate. In particular the Traffic Assessment is based upon atypical traffic flows and so extrapolation as to the impact are misleading. The assessment of the site's panorama and space in the proposal are presented using photographs that have been modified, giving an unrealistic impression of the site's current position and meaning that any decision based upon them will be found to be flawed.

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Arup Green Belt Review methodology is flawed in relation to sub-areas, defensible boundaries and buffers with respect to L2, this has been pointed out by many within the Regulation 18 consultation process - the planning team continue to ignore these comments. When will these be addressed, if ever?

In relation to site L2, a significant number of comments have been raised in relation to the impact on traffic and as of yet a proper traffic assessment has not been completed, especially within the context of the Strategic Rail Freight Terminal development.

The SRFT suggests a further 10,000 vehicle movements, a large number of which will travel along Watling Street/past L2, this essential traffic assessment has been requested but never actioned by the planning team throughout this process.

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Site L2 Watling Street development planning application was turned down by the Council earlier on this year, yet it has still part of the Reg 19 process. At that time the Councils view was that L2 should be accounted as green belt. The Council do seem to be taking no account of their own decisions.

The increased traffic along Watling Street during the building of and once the development has finished must be considered alongside the development of the Strategic Rail Freight Terminal. SRFT is set to have over 10,000 vehicle movements a day many of which will use the Park Street roundabout and further clog it for local traffic. No traffic assessment taking account of both developments has been published, but the impact of both developments seems likely to be disastrous for local traffic.

**282 - Aly Fricker**

Submission Number: 282 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Aly Fricker

Comment Number: 1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

You have been lax in your planning over the past years and have rushed this plan through with inadequate consultation with the residents who will be most affected by your plan. You have failed to include other factors which are already approved in your formation of the plan, and these include but are not limited to the impact of new traffic movements and increased flows caused by the new Strategic Rail Freight site between Park Street and Napsbury. Indeed, the views of most comments made seem to have been met with stock, generalized off-the-shelf comments and there is no evidence that such comments have been absorbed or addressed in any way. Comments like ‘noted’ or ‘ is in line with Arup Green….’ And reference to working with HCC on the transport assessments for Reg 19 draft plan and very hollow.

We need some meat on these bones in order to assess the plan and be able to make valid comments. Instead, the feeling is that this plan is the result of panic following years of debate in a desperate attempt to meet government guidance and eventually be able to fulfill you correct function as planning authority.

I feel that you have not given a clear opportunity for residents to peruse the L2 plan, absorb it and comment and that you failed to comply with Regulation 18 consultation process. Allowing three weeks between Regulation 19 comments and Examination is inadequate and fails to meet the democratic process as intended in this planning matter. The plan has shown the sites that the councils believe will be the easiest one to entice a developer and satisfy speculative development. Planning officers for the local areas have had minimal opportunity for consideration of any specific sites within their area and this demonstrates a very light brush with the democratic process. I suspect most residents have no idea this process is taking place and no appreciation of how their daily lives might be affected by the consequences of it.

I see no evidence of the scrutiny of Arup's Green Belt Review and this supports my belief that the planning section are just relieved to have something to pass on in L2 to reach the goal they desire. There have been comments made about the Regulation 18 process which I do not see addressed.

For example, I see this comment from which I do not see addressed in this 'consultation' in any way. Indeed, how can this possibly be considered a valid consultation when the traffic assessment is still to be completed.

'Serious concerns about procedural process, previous plan served for 30 years. Consultation not been adequate.

Depressing to see Local Plan including speculative projects. Surprised at extreme concentration of effort on market housing. Shortage of shops and facilities. Harper Lane Bridge is an accident blackspot, no proper or safe pedestrian or cycle provision. Growing housing need but 'affordable housing' is not affordable to those on the housing register. It would have been good to see serious analysis of issues confronting the District, evidence in terms of highways is lacking. I wonder if plan will not survive to the adoption stage'.

In relation to the L2 site at Watling Street, this has already been submitted through the planning authority and a democratic process objected to the application. Why is it therefore included in this L2 plan as though the previous democratic process is worthy of being disregarded. What does this suggest about the democratic validity of the planning process?

I have already alluded to the problem within L2 of the lack of valid, completed traffic assessment and this includes but is not limited to the impact of the rail freight terminal. How can this possibly be ignored when the prediction for additional traffic are so high, with promised changes to highway network which will have a profound and real effect on the life of everyone using these roads. I reiterate my early comments that this plan has been submitted in a panic to meet government guidance and if adopted the errors made in the forwarding of these planning sites will have a long lasting detrimental effect of every resident and user of the network.

## 298 - Paul Shelley

Submission Number: 298 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Paul Shelley

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Objection to L2 West of Watling street

The council have by and large dismissed the objections and concerns that have been raised about the plan with a standard response of "noted" or “The inclusion of this site is in line with the methodology in the Arup Green Belt Review 2023”. Most of the concerns raised seemed to have been dismissed out of hand with no care or attention to the objections raised.

It seems the whole plan (L2 West of Watling street) has been driven by speculative developers via the various “call for sites” they see it purely as a money grabbing exercise with no thought given to the environment or the negative effect it will have on Park Street.

Having attended and seen the webcasts of the PP & CC meetings the planning department give the impression they are in the employ of the developers and dismiss the concerns of the local residents.

The Planning Officers continually respond to many objections with the standard phrase “The inclusion of this site is in line with the methodology in the Arup Green Belt Review 2023, which recommends the site for further consideration”. This is not accurate, Planning Officers have not scrutinised Arup’s Green Belt Review, so ignored comments in the Regulation 18 process. Flaws were pointed out in the Regulation 18 process, with the Arup Green Belt Review but none of these problems have been addressed.

L2 Watling Street should not be in the draft plan plan, a planning application to build houses on the Watling Street site L2 was rejected by the Planning Committee in January and the Council decided that L2 fulfils the purposes of Green Belt it is clear it should not be included in the Regulation 19 process.

And finally the whole question of additional traffic created by the rail freight terminal has been ignored, no traffic assessment has been undertaken that takes into account the new Rail Freight Terminal. It is reported that he building of the Rail Freight Terminal will generate over 10,000 vehicle movements per day and a large number of these will travel along Watling Street past L2 yet no traffic assessment has been undertaken.

I formally request that the council and planning office take my objections into consideration and remove L2 West of Watling street from the Regulation 19 process

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. ### 309 - Kelly Brown

Submission Number: 309 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Kelly Brown

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I have a number of objections to the proposed local plan which I would like logged please.

- It doesn't appear like there has been any systematic process regrading the identification of green belt locations, they have just been selected at random.
- The regulation 18 consultation was snuck through during the summer last year where multiple residents, myself included, were on holiday, so had little opportunity to object.
- I've been informed that the council intend to go to Examination of the regulation 19 plan in 3 weeks time. How on earth are you intending to do a properly examination of the comments and objections to the plan in this time frame? As a resident of St Albans, it feels like this is another attempt to undermine residents and 'sneak the plan through' as quickly as possible. This is simply unacceptable.

Relating to site L2 - Watling Street

- Flaws around the Arup Green Belt review process - these have not been addressed, yet the proposals have been brought forward again in the Regulation 19 process.
- The Watling street site has received strong objection from many people, indeed the planning application was rejected in January(by the council). It is completely nonsensical that it is included in the regulation 19 process.

Thank you for taking these objections into account, and I look forward to you listening to the residents of St Albans as opposed to forcing this plan through.

## 312 - Lucy Searle

Submission Number: 312 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Lucy Searle

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I would like it noted that I object to the planning application to build houses on the Watling Street site L2.

I understood that this was rejected by the Planning Committee in January, so why has it been included in the Regulation 19 process?

As a local [redacted] resident, I am deeply concerned about the impact to the local traffic, especially at the already over congested Park Street roundabout. [redacted] who cycles himself to [redacted] school, and I worry about his safety and the pollution he encounters from so many vehicles as they queue for the roundabout. This traffic is so heavy already, and with the Rail Freight, this is set to worsen. It would be awful to have yet more traffic and pollution at this already busy junction.

I concerns me also [redacted] village will no longer be set apart from St Albans proper. We already have issues with strained GP, Dentists and schools. We should be protecting our environment, wildlife and the character of our village. This development seems to damage so much for the local residents and wildlife. It seems to me this plan, should it go forward, would only benefit already wealthy property developers.

I hope to hear that building work on this site will not be granted.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. ### 314 - Mrs Susan Taylor

Submission Number: 314 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Mrs Susan Taylor

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I'm deeply concerned about the amount of greenbelt around Park Street going to development. We know the monstrous SRFI will have a significant impact on traffic levels on the A414, A405 and local roads in the area.

I'm staggered that you have allowed the greenbelt opposite the BP garage on Watling Street, adjacent to Park Street roundabout, to go to housing when the queues onto the roundabout from Park Street can stretch beyond Park Street bridge in the rush hours and school run time. Not only is it dangerous as locals will have to contend with thousands of extra HGV's and vehicles from the SRFI descending onto the roundabout on the A414, there'll be more vehicles entering and exiting the site opposite the BP garage that could have terrible consequences for vehicles entering and exiting Park Street.

I also see land is now up for auction alongside the A405 approaching Tippendell Lane roundabout, which is again, dangerous for vehicles entering and exiting the site. The queues on Tippendell Lane can already stretch back to Penn Road.

The whole area is lacking in road infrastructure to support this huge increase in traffic movements.

With possible housing developments in Chiswell Green and London Colney our roads will become gridlocked with all the burden on local roads.

Why is so much greenbelt going to inappropriately located developments?

### 344 - Richard Martin

Submission Number: 344 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: M Scott Properties Name: Richard Martin

Comment Number: 1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

These representations are submitted in response to the Regulation 19 Consultation on the St Albans City & District Council Draft Local Plan 2041 (the emerging Local Plan), and build upon the representations made on our behalf by Maddox Planning to previous consultations on the emerging Local Plan.
We support the Council's intention to work towards the adoption of a new Local Plan to meet the identified housing need within the District. Furthermore, we support the proposed allocation of Land West of Watling Street, Park Street, AL2 2PZ (the Site) for residential development under allocation reference L2, and can confirm the deliverability of this allocation.
Allocation L2 – Land West of Watling Street, Park Street, AL2 2PZ
Outline planning permission was granted at appeal on the 7th of November 2024 (ref: APP/B1930/W/24/3343986) for the development of up to 95 dwellings. The draft allocation proposes the delivery of 104 dwellings (indicative), and it has been confirmed through the application (ref: 5/2022/0267) and appeal processes that the Site can deliver up to 95 dwellings.
The Site will now be sold to a housebuilder and we expect that the reserved matters application will be submitted in 2025. We expect construction to start in 2026, and that the development will be completed before the end of 2029.
The key development requirements for the allocation have been expanded since the Regulation 18 Consultation, and now comprise eight points. These requirements have been explored in detail through the application and appeal processes and are addressed by the Conditions attached to the planning permission.
The proposed development will deliver a wide range of economic, social and environmental benefits, as set out within the Officer's Reports to the Development Management Committee and the appeal decision.

Thank you for providing the opportunity to comment on the Regulation 19 Draft Local Plan, and we confirm that we would like to be involved in future stages of consultation on the emerging Local Plan.

### 145 - Catesby Estates

Submission Number: 145 Submission Date: 07/11/24 11:13

Respondent: Company/Organisation: Stantec Name: Mr P Derry

On Behalf Of Company/Organisation: Catesby Estates Name:

Comment Number: 18

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Chiswell Green is a Tier 5 Medium-Sized Village. As such, it has limited facilities. The 101 dwellings would be better placed in a more sustainable settlement such as St Albans. The private road running through the site will sever the site and require two unconnected development parcels. Spatially, there are serious concerns regarding how this site can provide an appropriately laid-out scheme. The site also has noise impact from the neighbouring land use which may impact upon the quantum of development and capacity of the site.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

See **attached report for details**

**Policy L3 – East and West of Miriam Lane, Chiswell Green**

- We have no objection to the principle of site L3.
- However, for the reasons set out in our comments on Policy SP3, the land north of site L3 should also be removed from the Green Belt. The land immediately north, known as Land rear of Noke Side, represents an important link between site L3 and the site granted planning permission by the Secretary of State to the north.
- The Local Plan needs to be proactive and set a positive framework for development in this area, rather than ignoring the Secretary of State's decision.
- In the context of the Secretary of State's decision, the proposed Green Belt boundary at the northern end of site L3 is not sound. The boundary should be realigned to ensure that there is no separation between site L3 and the CALA Homes site to the north.

- The Council's Green Belt Review did not properly assess the Noke Side site as it did not consider the specific Green Belt impact of development on this site but rather combined the site with a much larger area. The conclusions for this larger area were far less relevant to the Noke Side site itself. The Green Belt Review findings were the key reason the site was not allocated in the draft Plan.
- In addition, the Noke Side now represents an important linkage between the proposed Local Plan allocation L3 to the south and the planning permission granted by the Secretary of State to the north. The site should be allocated for development alongside these two proposals.
- The site is adjacent to the built-up area of Chiswell Green and would be a sensible and logical addition to it, in association with the surrounding planned development. The site is within walking distance of a range of local facilities including a local school and local shops as set out in Section 2.
- The site is in single family ownership and could be brought forward for development quickly. This is particularly important given the urgency of the housing need and the time needed for strategic sites to deliver on the ground.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Green Belt boundary around the edge of site L3 should be extended to included Land at Noke Side.

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In summary, there are a number of draft allocations which raise concerns on consistency:

Chiswell Green is a Tier 5 Medium-Sized Village. As such, it has limited facilities. The 101 dwellings would be better placed in a more sustainable settlement such as St Albans. The private road running through the site will sever the site and require two unconnected development parcels. Spatially, there are serious concerns regarding how this site can provide an appropriately laid-out scheme. The site also has noise impact from the neighbouring land use which may impact upon the quantum of development and capacity of the site.

We have to conclude that not only does the Regulation 19 Plan fail to allocate sufficient sites for housing, or enough in the early stages of the Plan Period, but that Windridge Farm is a stronger contender than some sites the Plan does propose as allocations, even on the Council's terms.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. **make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

## 269 - Acre St Albans Ltd

Submission Number: 269 Submission Date: 08/11/24 09:15

Respondent: Company/Organisation: Savills Name: Mr Kieran Wheeler

On Behalf Of Company/Organisation: Acre St Albans Ltd Name:

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In summary, Acre supports the allocation of the 'East and West of Miriam Lane' site but objects to a number of the criteria set out in site specific policy wording within the allocation. Amendments have been proposed to the wording which would make it acceptable and these are detailed above and with Appendix 3.

'East and West of Miriam Lane' represents an appropriate, sustainable and deliverable allocation in the new Local Plan. This is emphasised by Acre's involvement with the scheme, the pre-application dialogue which is in process of taking place with the authority and the intention to submit a planning application in Spring 2025. Should full planning permission be granted by Autumn 2025, delivery on site could reasonably commence in early 2026. The emerging Local Plan is therefore of significant relevance to Acre and, given the deliverable and readily available nature of the scheme, the site is highly relevant to the LPA's five-year housing land supply and housing pipeline.

In this regard, it is hoped that these representations are considered carefully by SADC to ensure that the Local Plan and the key development requirements for allocations L3 do not present unreasonable challenges or complications to the planning process. SADC should therefore approach site allocations positively and seek the efficient use of site. Addressing the proposed uplift on the allocation and taking on board the changes to the Key Development requirements would go a way toward this and would contribute to the delivery of the site.

Please refer to the cover letter prepared by Savills.

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Introduction**

Keep Chiswell Green (KCG) is a local volunteer-led campaign group, formed in March 2022 in response to the planning applications submitted for large-scale development of the Metropolitan Green Belt to the west of Chiswell Green. Chiswell Green is a medium-sized village of approximately 1,250 households, located to the south of St Albans and just north of the M25 at junction 21a, close to the southern boundary of the District.

The group's objectives include informing local residents about applications and appeals, and representing their views to St Albans City and District Council (SADC) and to the Planning Inspectorate. This is achieved through extensive two-way communication.

KCG has been an active advocate for the residents of Chiswell Green and St Stephen Parish, including acting as a Rule 6 Party in the Chiswell Green Inquiry, participating in the Hearing for the Ragged Hall Lane appeal, and speaking as an interested party at the Lye Lane (Bricket Wood) Inquiry.

In this capacity, KCG has attended all Planning Policy and Climate Change committee meetings since July 2023 as a public spectator, usually in person, occasionally via the webcast of the meetings.

Chiswell Green is the target of intense speculative development; in the 2021 "call for sites" as part of the local plan preparation, land was put forward by local landowners for 2,057 new houses in Chiswell Green's Green Belt immediately around the village. Since then, speculative applications have been submitted for a total of 1,266 new houses across these sites, of which 1,259 have been granted permission, with an appeal decision still outstanding on the final 7 units. This already represents a doubling of the number of households in the village, but without the co-ordinated improvements in our existing, critically-deficient, infrastructure that could come from development through a Local Plan.

A further 98 new houses are proposed for Chiswell Green under the draft Local Plan.

Once the site for these 98 is allocated under the local plan or approved via a speculative application, two more applications will be submitted for yet another 503 new houses, concreting over what little will remain by then of Chiswell Green's Green Belt.

Residents of Chiswell Green are desperate for a new local plan – one that will protect us from further years of speculative development. However, with a very heavy heart, KCG must object to this draft local plan. The St Albans District needs a local plan, but not *any* local plan, not the *wrong* local plan, and not at the expense of sacrificing the ability of future generations to meet their own needs.

As a result of door-to-door canvassing of in excess of 1,000 properties in the village, KCG can confidently say it speaks for approximately 98% of local residents. KCG therefore submits this response with the weight of the support of over 2,000 local residents.

**Legally compliant, positively prepared, justified, effective, consistent with national policy**

In our opinion, the draft Local Plan has **not** been prepared to be *legally compliant, positively prepared, justified, effective or consistent with national policy* :

**Lack of consideration for the Regulation 18 Public Consultation**

The Regulation 18 public consultation was scheduled to run largely during the schools' summer holidays and was poorly publicised, resulting in a very low response rate; there were fewer than 2,000 responses to the consultation from across the whole District, when a number of single planning applications have each individually generated in the region of 1, 500 objections.

Appeals in June 2023 to the then Leader of the Council, Cllr Chris White, for the dates of the consultation to be changed so as to avoid the summer holidays, when the majority of residents are most distracted and busy, were rejected.

Feedback from local residents has highlighted the inaccessibility of the Draft Local Plan documents to those with no previous experience of the Planning process. The documents were extremely long and verbose, and, for those who attempted to read the documentation, it was difficult for residents to understand the implications of the document content.

The requirement to register on the SADC portal in order to submit any comments was found to be onerous and off-putting, especially as some residents already had accounts for Council services such as council tax or refuse collection, but found that they were unable to use these to comment as part of the Regulation 18 consultation.

Residents have reported to us that the SADC questionnaire was too narrow and the prescribed choice of answers resulted in a poor reflection of the respondents' views, forcing them to select responses that did not accurately represent their views.

The "response to each chapter" format was also off-putting as most residents did not want to comment on each individual chapter, but to comment overall. Whilst this was an option for respondents, coming at the end of the response template meant that some respondents did not reach that point in the template.

We believe that it is the lack of publicity, the poor timing of the Consultation and the difficulty in registering comments that have led to a poor response from local residents – not a lack of interest. This consultation has been poorly conducted and we submit that it would be wrong to assume that a low number of responses means that there is a high level of approval of the Draft Local Plan.

Residents would be justified, however, in thinking that their participation in the Regulation 18 Consultation was of little worth as there has been little more than acknowledgement that comments were made from SADC. The majority of responses received a comment saying "noted".

To reinforce the lack of regard that has been had for the responses to the Regulation 18 Consultation, there has been little change in the Plan between the Regulation 18 Draft and the Regulation 19 Draft, and certainly no evidence that feedback through the Regulation 18 process has been incorporated.

**Site selection based just on the Arup Green Belt Review**

It is clear from plan-making guidance that the selection of sites for development under the plan should be based on the full range of relevant evidence of site suitability. The sites that have been selected for this Plan have been based solely on the Arup Green Belt Review. This comment is not to criticise the Arup Review, but the Arup Review has its purpose – to assess the performance of sites in the District's Green Belt against the 5 Green Belt Purposes, to consider their role in the performance of the wider Green Belt, and to suggest whether each site assessed could, should or should not be considered for release. The Arup Review does not, and does not purport to, consider important aspects of site suitability such as flooding, highways, education provision, biodiversity etc. Furthermore, the Arup Review cannot be expected to consider the economic or socio-political implications of site selections.

The selection of sites for the Regulation 18 draft was based solely on the recommendations of the Arup Green Belt Review. When challenged as to why the selection process had not included other relevant evidence, the response given by the Spatial Planning team to councillors was that the statutory consultees did not have time to comment on all sites that might be considered in order

to refine the selection, but that the consultees would be asked to comment on the sites selected prior to the Regulation 19 Consultation. This, of course, makes a mockery of the site selection process.

**Councillors were not given time to consider documents or debate the sites selected**

Councillors were given very little time in the schedule of meetings leading up to, first, the Regulation 18 and, then, the Regulation 19 consultations. Those who raised concerns were told that their concerns would be noted and considered, but there was no opportunity for debate. In reality, there was only one major change made to the site selection between the Regulation 18 and 19 drafts - a site that did not have good access was deselected due to limitations on putting a road across common land which was a point that had been raised by the ward councillor for that ward.

Whilst there was little time during the PP&CC meetings for consideration of the various sites, there was also very little time given to the councillors to consider the thousands of pages of appendices they were expected to read and digest in the 10 days between the issue of the agenda pack for the meeting and the meeting itself. As a result, the councillors were highly dependent on the 5-10 minute briefings given by the Spatial Planning team during every meeting for their understanding of the subjects on which they were being asked to vote at each meeting. Inevitably, a 5-10 minute briefing cannot compensate for sometimes over 2,000 pages of background material, so councillors were frequently making decisions from a position of relative ignorance.

This situation was particularly pertinent in the meeting at which it was requested that councillors give their authorisation to progress the Regulation 19 Draft Plan to consultation. The agenda pack consisted of in excess of 2,000 pages and included an important report commissioned by SADC from respected consultants AECOM. This report detailed and evaluated 8 different scenarios for Green Belt release, each of which could provide the basis for a local plan in the District. The various scenarios differed in the quantum of housing development that could be accommodated – some scenarios of smaller magnitude than the level selected by SADC, some of greater magnitude. This report was not highlighted to councillors and there was no discussion as to which scenario was the better scenario for the District. For example, under 4 of the scenarios, there would be no Green Belt release in the south of the District. This is a critically important discussion and one which was not offered to the councillors.

In addition, there has been no justification for the level of development proposed, and more particularly, the level of Green Belt release proposed, when considered against the District's Green Belt and Heritage constraints. The only justification for Green Belt release is to meet housing targets. Whilst this may become the only consideration under any future NPPF, the December 2023 NPPF still expects planning authorities to justify changing their Green Belt boundaries in consideration of a wider range of priorities – not just meeting housing targets.

## 356 - Rachael Donovan

Submission Number: 356 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Hertfordshire and West Essex ICB Name: Rachael Donovan

Comment Number: 32

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

- **L3 – Chiswell Green – 101 dwellings**

This development will impact on Midway Surgery. As explained earlier in this document, the former CCG approved a proposal for the extension and refurbishment of the practice, however, due to the lack of capital, this project is currently on hold. The HWE ICB would therefore apply for developer contributions on the above and any other new development in and around Chiswell Green towards creating additional capacity at Midway Surgery.

For each of the following Local Plan allocations, please add, '**Contributions to health facilities and services to meet the needs of new residents**.'
B3 – West Redbourn, Redbourn
B5 – Glinwell, Hatfield Road, St Albans
B6 – West of London Colney
B7 – North West Harpenden
B8 – Harper Lane, north of Radlett
L1 – Burstow Nurseries, North Orbital Road, St Albans
L2 – West of Watling Street, Park Street
L3 – East and West of Miriam Lane, Chiswell Green

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## M2 - Hill Dyke Road, Wheathampstead, AL4 8TR

### 248 - Historic England

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 24

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**M2 - Hill Dyke Road, Wheathampstead, AL4 8TR**

We have raised serious concerns regarding the potential allocation of this site which is adjacent to Wheathampstead earthwork incorporating Devils Dyke and the Slad Scheduled Monument (LEN: 1003521) at Regulation 18. It is evident that development of M2 has the potential to cause a high level of harm to the Scheduled Monument by altering its setting. Furthermore, given the proximity of the scheduled monument, it is possible that further contemporaneous, and equally significant, archaeology may extend into the allocation area. This would be considered subject to the policies for designated heritage assets in accordance with NPPF footnote 72. If this were to be the case, then it could significantly reduce the potential capacity of the site for development, and therefore its suitability and achievability. We have previously recommended that the site should be deleted.

We note that you are continuing to propose this site for allocation. To support the allocation, we note that a detailed H IA has been prepared by Place Services which is welcomed.

In Summer 2024 we indicated that we were content for site to go forward for allocation on the understanding of an approximately 60-40 split between development and open land (with 40% of site being left open at eastern end). This should be included in the policy. The HA also refers to funding for improved management of the monument. This should also be included in the policy.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, `*Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, `*The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

In Summer 2024 we indicated that we were content for site to go forward for allocation on the understanding of an approximately 60-40 split between development and open land (with 40% of site being left open at eastern end). This should be included in the policy. The HA also refers to funding for improved management of the monument. This should also be included in the policy.

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend two slight changes to policy wording throughout the Plan which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend *'conserve and where appropriate enhance the significance of the...[list assets]'*
2. We would recommend amending `may include setbacks etc.' to read `should include setbacks etc'.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

7.1 In summary, proposed Allocation M2 (residential development of Hill Dyke Road, Wheathampstead ('the Site')) is supported.

7.2 The Site is suitable, available and achievable for residential development; would form a logical extension to provide proportionate growth to a settlement which is sustainable to accommodate such growth; and whilst currently Green Belt, the Site patently makes only a limited contribution to the purposes of the Green Belt, as the DLP's evidence base confirms.

7.3 The above matters are discussed in detail within this section of our representation.

**Site Characteristics**

7.4 The Site measures c.3.55ha and is broadly rectangular in shape stretching east-west.

7.5 It comprises arable land on a south-east facing slope and contains mature landscaping along its boundaries, but is otherwise largely featureless.

7.6 It adjoins the southern boundary of Wheathampstead and an existing residential area. Immediately to the west and north of the Site are existing dwellings which form part of a 1970s / 1980s suburban residential development and which comprise predominantly two and three-storey detached and semi-detached houses.

7.7 The Site's northern boundary comprises matures trees and scrub, beyond which lies the residential street of Hill Dyke Road.

7.8 The Site's southern and eastern boundaries comprise belts of mature tress which divide it from the open countryside beyond.

7.9 The land to the south of the Site consists of agricultural fields with pockets of woodland; to the east there are again agricultural fields, but also heritage assets in the form a Scheduled Monument comprising a late Iron Age enclosed oppidum (fortified administrative centre) earthworks, incorporating Devil's Dyke (a wooded area with a deep ditch, understood to be part of the enclosed oppidum's fortifications), and Slad.

7.10 A site location plan and aerial view of the Site are provided [in the attached file] as Figures 1 and 2, respectively.

**Site Suitability and Sustainability**

7.11 The DLP's proposal to direct proportionate growth to Wheathampstead is justified and consistent with national policy, as discussed in Section 2 of this representation in respect of the proposed spatial strategy.

<u>Proportionate evidence</u>

7.12 Firstly, it should be recognised that the Site's suitability for residential development has been evidenced through the DLP's evidence base.

7.13 The Site was appraised in terms of its suitability through the Council's Housing and Economic Land Availability Assessment (2021) ('the HELAA'), as well as previous drafts of this study, as site reference WH-28-21.

7.14 Furthermore, the Site's suitability in terms of impact of its removal from the Green Belt has been appropriately assessed, with the Council's St Albans Stage 2 Green Belt Review Annex Report providing a site-specific (site reference SA-50) assessment of the Site's contribution to the purposes of the Green Belt, ensuring this issue is considered at an appropriate grain.

7.15 The Sustainability Appraisal of the DLP ('the DLP SA') also supports allocation of the Site when assessing the option against various sustainability objectives.

7.16 The above, as well as other evidence of the Site's suitability, are discussed in this section.

Constraints review

7.17 The Site benefits from a lack of significant constraints to residential development, as the HELAA confirmed. The HELAA concluded the Site was potentially suitable for residential development, subject to constraints being reasonably mitigated; and found it was not subject to any absolute constraints.

7.18 The Site is in Flood Zone 1, and as such land least at risk of flooding from tidal or fluvial sources.

7.19 It is not subject to any ecological designations suggesting the Site is of ecological importance. As arable land in agricultural use, any ecological value of the Site is largely limited to existing landscaping on its boundaries.

7.20 A Preliminary Ecological Appraisal (April 2024) ('the PEA') has been undertaken by James Blake Associates and provided as **Appendix A** to this representation. The PEA concludes that whilst further surveys will be required alongside more detailed proposals, development will be able to proceed with minimal impact on the local conservation status of any protected, principally important or rare species within the area.

7.21 The PEA further concludes that with a sensitive landscape scheme, incorporating suggested enhancements, the Site has the potential to be improved for local wildlife post development.

7.22 In landscape terms, development of the Site would represent a logical extension to the existing village envelop, with new development not projecting materially further south or east than existing adjoining development to the north and west, respectively. The Site is well contained by the existing development to the west and north, as well as mature landscaping to the east and south. Landscape and visual impacts of the development of the Site are likely therefore to be largely limited to the Site itself.

7.23 The [in attached file] Figure 3 provides a map showing constraints within the wider locality of the Site, confirming the lack of on-site constraints affecting the Site itself. This is with the exception of Green Belt (which is a policy constraint), the extent of which is shown in Figure 4 [in attached file]. Figure 3 also shows Public Rights of Way within the locality, confirming none within the Site that would need to be incorporated into development / potentially diverted. Instead, the presence of Public Rights of Way adjacent to the Site is considered to represent an opportunity to help integrate the Site with the existing community and to encourage alternatives to the car.

7.24 Figure 4, Appendix C, of the Wheathampstead Neighbourhood Plan (2020) identifies locally significant views which Policy W7 seeks to protect. Notably, none of these views relate at all to the Site, but instead are focussed on the north and west of the village, suggesting the Site is in a less sensitive location in landscape and visual terms.

7.25 Having regard to all of above, potential constraints to the residential development of the Site are considered to be largely limited to issues of Green Belt and heritage. These are considered further, in turn, below.

Green Belt

7.26 Typically for settlements within the District, the Green Belt boundary is drawn tightly around Wheathampstead. It will not be feasible to expand the village envelope without impinging on the current Green Belt.

7.27 As discussed within Section 2 of this representation, there are clearly exceptional circumstances which justify alterations to the current Green Belt boundary at the District level. In our view, not only do the circumstances in the case of the District justify alterations to the Green Belt, but they actually necessitate such an approach. It is not feasible that the new Local Plan could meet development needs (and thus be capable of being found sound) without doing so.

7.28 Turning to the consideration of the Site and exceptional circumstances that justify its release from the Green Belt, it is relevant to consider the Site's contribution to the purposes of the Green Belt. Germane to this issue, the Site has been consistently found to make a limited contribution to the purposes of the Green Belt in recent reviews.

7.29 In the Council's Green Belt Review Purposes Assessment Final Report 2013 ('the GBR 2013') the Site was assessed (site reference SA-SS7 - Land south of Wheathampstead (GB43A)) and found to be one of eight sites across the District which contributed least to the purposes of the Green Belt.

7.30 In respect of the Site, the GBR 2013 concluded:

***"****Assessed in isolation this very small subarea makes a limited or no contribution towards checking* ***sprawl, preventing merging, preserving setting or maintaining local gaps."***

7.31 More recently, the Council prepared a Green Belt Review 2023 ('the GBR 2023') through which the Site (as reference SA-50) was again appraised in terms of its contribution to the purposes of the Green Belt.

7.32 This assessment again considered sites in respect of the five Green Belt purposes as per the NPPF, namely:

1. to check the unrestricted sprawl of large built-up areas;
2. to prevent neighbouring towns merging into one another;
3. to assist in safeguarding the countryside from encroachment;
4. to preserve the setting and special character of historic towns; and
5. to assist in urban regeneration, by encouraging the recycling of derelict and other urban land 33 The GBR 2023 found that the Site made no contribution to Green Belt purpose 1.

7.34 In respect of Green Belt purpose 2, it concluded the Site forms a 'less essential' gap / part of a gap which is of sufficient scale and character that development is unlikely to cause merging between settlements.

7.35 Turning to purpose 3, the GBR 2023 suggests the Site scores highly on the basis that it falls into the category of sub-areas which "*contain less than 3% built form and possess a strong unspoilt rural character*".

7.36 However, we consider this is a questionable basis, alone, on which to conclude a parcel of land assists in safeguarding the countryside from encroachment. We would have expected factors such as the Site's relationship with the existing settlement boundary, degree of containment to which it is subject, and whether impacts would be localised or wider ranging, to have been considerations in relation to this purpose.

7.37 In respect of the Site and its contribution to assist in safeguarding the countryside from encroachment, it is clearly subject to a significant degree of containment, with development of the Site not projecting further south or east than the existing extent of the settlement. There is clear potential for the allocation of the Site to form a new clearly defined, robust and defensible Green Belt boundary which would have a strong degree of permanence and help safeguard the countryside

beyond. All of these characteristics are relevant to the Site's contribution to this purpose of the Green Belt, and suggest that the Site is less significant in assisting in safeguarding the countryside from encroachment than the GBR 2023 concluded.

7.38 As with Green Belt purpose 1, the GBR 2023 found the Site makes no contribution to Green Belt purpose 4.

7.39 In respect of Green Belt purpose 5, common with Green Belt reviews, the GBR 2023 concludes that all Green Belt achieves this purpose to the same extent, and that the Green Belt value of parcels when assessed against purpose 5 is unlikely to be distinguishable.

7.40 It has been robustly evidenced that the Site makes, overall, a limited contribution to the Green Belt, even if one were to accept the GBR 2023's findings in respect of the Site's contribution to purpose 3.

7.41 Considering again the judgment in the case of ***Calverton*** and the relevance of development of a Site's potential to incorporate matters to mitigate harm to the Green Belt, given the Site makes such a limited contribution to the purposes of the Green Belt, it is considered that the extent of mitigation required is similarly relatively limited. Regardless, it is proposed to further enhance landscaping along the Site's southern and eastern boundaries, further strengthening the separation of the Site from the open countryside beyond.

7.42 Having regard to all of the above and considering these factors alongside the exceptional circumstances evidently present at the District level, the exceptional circumstances which justify the removal of the Site from the Green Belt and allocation for residential development are manifestly clear and have been robustly evidenced.

Heritage

7.43 As noted earlier within this section, to the east of the Site is a Scheduled Monument. However, there are no designated heritage assets within the Site itself.

7.44 Furthermore, and in any case, there is existing 20th century residential development to the north of the Site which already adjoins Dyke Lane and Devil's Dyke.

7.45 The Council's evidence base includes a Heritage Impact Assessment, Appendix 4 of which specifically considers the proposed allocation of the Site. This Heritage Impact Assessment concludes potential impacts on the setting of the nearby Scheduled Monument can be mitigated.

7.46 Separately, a detailed Heritage Impact Assessment ('the HIA') of the Site has been prepared by RPS and accompanies this representation as **Appendix B**.

7.47 The HIA provides a description of heritage assets potentially affected by the development of the Site, confirming the adjacent Scheduled Monument to be the only heritage asset with potential to be affected by development of the Site (potential impact on its setting).

7.48 The HIA assesses the potential impact on the setting of this heritage asset, having regard to Historic England`s *Historic Environment Good Practice Advice in Planning: 3 The Setting of Heritage Assets* (December 2017). Following this, it concludes that the Site makes a highly limited contribution to the significance of the Scheduled Monument. Further to this, it concludes that ***"any effect of the proposed*** *development on the Monument can therefore be assessed as negligible, equating to a very low and barely* ***perceptible level of "less than substantial harm****.""*

7.49 It is clear that heritage matters do not render the Site unsuitable for development. Accessibility and highways

7.50 Whilst accessibility by sustainable modes of transport is not the only factor to consider in determining the sustainability of sites to accommodate new homes, it is considered an important one.

7.51 Ensuring opportunities for future residents to make use of sustainable transport opportunities, and reduce reliance on private cars, can have a host of benefits against various sustainability objectives. Not only environmental one, but also social benefits, particularly in terms of ensuring those without access to a private car are not excluded from being able to access services, facilities and employment opportunities.

7.52 In respect of this issue, it should be recognised that the Site is well-related to a number of the village's services and facilities. Of particular note, it is well within walking distance of a primary school and nursery – the entrance to Beech Hyde Primary School and Nursery is located less than 200m from the northern boundary of the Site as measured directly; and is a six-minute walk via Hill Dyke Road and Nurseries Road.

7.53 Hill Dyke Community Centre is located c.100m to the north-west of the Site. There are also existing play spaces in close proximity to the Site also (the development would also incorporate new play spaces).

7.54 Butterfield Playing Fields, home of Wheathampstead Wanderers Football Club but also containing several adult and junior pitches available for public use, is c.400m to the west of the Site.

7.55 Facilities within Wheathampstead, concentrated around The Hill / High Street / Marford Road are, a c.15-minute walk from the Site.

7.56 The Site has the potential to connect to existing Public Rights of Way, which have both functional and recreational uses.

7.57 In terms of public transport facilities, there is an existing bus stop located immediately adjacent to the Site on Hill Dyke Road from which services to and from the centre of Wheathampstead as well as neighbouring centres of St Albans and Harpenden, are available.

7.58 Recognising that many future residents of the Site are still likely to use private cars, a Technical Note has been prepared by Aecom which considers the impact of the proposed development of the Site in terms of vehicular movements, vehicular access, and impact on the highway network. A copy of this is provided as **Appendix C**.

7.59 The Technical Note includes assessment of additional vehicular movements generated and junction capacity at Hill Dyke Road / B651, finding that the junction will operate well within capacity in the event the Site were to accommodate 100 additional dwellings.

7.60 The Technical Note demonstrate how appropriate vehicular access could be achieved for the Site, as well as identifying potential locations for non-vehicular links to help knit the development with the existing residential area and ensure sustainable transport links.

<u>Overview</u>

7.61 The Site represents opportunity to deliver a suitable and sustainable extension to Wheathampstead, helping to meet housing needs and support the vitality of the community.

7.62 It is subject to very few constraints, and those that are present can readily be mitigated through development.

7.63 The Site currently makes a limited contribution to the Green Belt, with previous Green Belt assessment work undertaken by the Council having identified it as one of the eight sites which contribute least to the purposes of the District. In combination with circumstances at the District level, there are evidently exceptional circumstances that justify removal of the Site from the Green Belt.

7.64 The Site is within walking distance of a number of the village facilities and services, ensuring future residents can access these without reliance on a car; as well as helping to ensure such services / facilities continue to be utilised and are sustained. This constitutes a benefit to the wider community, as well as future residents of the Site, and helps support the vitality of the community.

In addition, a bus stop located immediately outside the Site provides access to the centre of the village and other neighbouring centres. In respect of highways, technical evidence confirms the lack of adverse impact development of the Site would engender, as well as the ability to provide suitable vehicular access to the Site.

7.65 The Site is a suitable and sustainable site to accommodate much-needed market and affordable housing.

**Site Availability**

7.66 In addition to addressing the Site's suitability, the Council's HELAA also confirms the Site's availability for residential development.

7.67 The Site is in single ownership, and land adjoining the highway in public ownership; and there are no known legal constraints to the residential development of the Site.

7.68 The Council's evidence base correctly confirms the Site is available for development. **Site Achievability**

7.69 The Site is a greenfield site which is not subject to any significant constraints that might require potentially expensive mitigation and / or delay the delivery of new homes.

7.70 Development of the Site is being actively promoted by an established national housebuilder with a proven track record of delivery.

7.71 Considerable technical work has already been undertaken to confirm the residential development of the Site can be achieved in relation to potential constraints (as discussed earlier) which not only confirm the Site's suitability, but also show it is achievable for housing.

7.72 Having regard to all of the above, the Site is not only achievable but is achievable within the early years of the plan period. Given the acute and present housing needs shortage in the District, this is considered a further benefit.

**Potential Development**

7.73 An illustrative layout, showing how the Site could be developed is provided as **Appendix D**.

7.74 This shows how a development of c.85 dwellings could be accommodated at a density that is in keeping with the character of the locality, and incorporating significant areas of public open space and landscaping.

7.75 The illustrative layout demonstrates how vehicular and non-vehicular access points suggested by the transport Technical Note can be incorporated and integrate with the existing Public Right of Way network.

7.76 In terms of biodiversity net gain (BNG), it is anticipated that this would be delivered on adjoining, currently agricultural land, which is also controlled by the same landowner with whom TWSL is contracted. This would ensure efficient use of the Site for use for residential development (the use for which it has been found sustainable and deliverable), whilst also ensuring BNG provision is delivered in the immediate vicinity of the development, on land less suitable for development but entirely suitable to provide BNG.

Summary

7.77 The Site proposed to be allocated through Policy M2 is sustainable and deliverable for making a meaningful contribution to the housing land supply in the early years of the plan period, and a proportionate increase to the size of Wheathampstead, helping to support the vitality of this community.

7.78 It entails a logical extension to the settlement boundary, on land without significant constraints to development, and in a manner that does not harm the strategic purposes of the Green Belt.

7.79 The proposed allocation is justified, consistent with national policy, effective, and helps ensure the DLP is capable of being considered positively prepared.

8.1 As discussed in Section 7 of this representation, the Site is a sustainable and deliverable one to help

meet housing needs without undermining the strategic purposes of the Green Belt.

8.2 Within this section, we consider the 'key development requirements' that accompany the proposed

allocation of the Site (M2).

8.3 It important to recognise that the DLP only proposes to allocate a small amount of land, relative to

the District's size, to help address development needs – the sites it proposed to allocate are those which the Council considers most sustainable and deliverable to address acute housing shortages. In such circumstances, it is particularly important to adhere to the NPPF's call to make efficient use of land for development. Failure to do so will push development needs onto potentially less sustainable sites within the District, and / or result in housing needs going unmet.

8.4 Consistent with the approach to other DLP allocations, the policy requirements proposed for M2 are

described as 'key policy requirements'. We have inferred that these are the site-specific policy requirements, which should be read alongside other policies in the DLP. However, and at the risk of being overly pedantic, the current reference to these as 'key' does imply that there are other site-specific policy requirements elsewhere with the DLP and / or these are more important than other policies in the DLP. Assuming that is not what is meant, to ensure clarity for decision-makers applying the policy, we suggest these requirements be renamed 'site-specific requirements'.

8.5 There are five policy requirements proposed for Allocation M2, which are considered in turn below.

**Access**

1. ***The main site access must connect north on to Hill Dyke Road. Access on to Dyke Lane to the east must be for pedestrians and cyclists only, and not for vehicles***

8.6 We consider this is a justified policy requirement, which will ensure suitable access whilst also helping

to conserve the significance of the Scheduled Monument and Local Wildlife Site to the east of the Site.

8.7 It is also an achievable policy requirement, as the Technical Note provided as Appendix C to these

representations confirms.

**Transport contributions**

2. ***Contributions / enhancements to support relevant schemes in the LCWIP and GTPs as indicated in the TIA. Including but not limited to improvements to the B651 and connections to St Albans / Sandridge.***

8.8 Contributions from development of the Site towards transport infrastructure is appropriate in

principle, including potentially towards infrastructure as proposed by the South West Herts Growth and Transport Plan (GTP) and / or South Central Herts GTP, and / or to the Local Cycling and Walking Infrastructure Plan (LCWIP).

8.9 However, it is important that requirements to do so are consistent with the Community Infrastructure Levy Regulations (2010) ('the CIL Regulations').

8.10 Specifically, any contributions demanded will need to comply with Regulation 122 and the limitations this sets out on use of planning obligations. This states that a planning obligation may only constitute a reason for granting planning permission if it is:

1. necessary to make the development acceptable in planning terms;
2. directly related to the development; and
3. fairly and reasonably related in scale and kind to the development.

**Devil's Dyke Footpath**

3. ***Support for improvement of the Footpath across the Devil's Dyke to reduce recreational impact of walkers on the site***

8.12 It is recognised that the Site is located within proximity to a designated Local Wildlife Site (Devil's Dyke) through which an existing Public Right of Way runs.

8.13 The Preliminary Ecological Appraisal which accompanies this representation noted that there was potential for increased recreational impacts on the Local Wildlife Site, and consequently recommended measures such as signposting with instructions to keep dogs on leads be installed, along with additional dog bins, to minimise impacts on walkers through the woodland.

**Heritage**

4. ***The layout of development should minimise any harm to the setting and significance of the Devil's Dyke and the Slad Scheduled Monument; this may include a significant set back from the east boundary. Development proposals should also demonstrate how they will enhance the understanding and local interpretation of the Monument.***

8.16 We agree that it is important that the development of the Site has appropriate regard to the potential to impact on the setting of the Scheduled Monument to the east. In this respect, the findings of the HIA should be recognised. Specifically, that the Site makes a *"highly limited contribution* ***to the*** *significance of the Monument"*and that *"any effect* ***of the proposed development on the Monument can therefore be assessed as negligible, equating*** *to a very low and barely perceptible level of "less than substantial harm""*(HIA paragraphs 7.5 and 7.6, respectively)***.**

8.17 We suggest it is important that decision-makers are not encouraged to perceive a greater potential for development of the Site to harm the significance of the Scheduled Monument than actually exists, particularly if this were to result in overly onerous and unjustified requirements that would undermine efficient use of what is one of only a small number of sites the DLP has identified as being sustainable to help meet housing needs.

**Landscape Impacts**

5. ***Landscape impacts must be mitigated, which must include maintenance of substantial tree screening along the southern boundary.***

8.19 We agree that measures to mitigate landscape impacts should include focus on maintaining the existing landscaping along the Site's southern boundary – this reflects the view of landscape assessment work undertaken which accompanied our previous representation at the Regulation 18 stage.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Clause #2**

8. 11 We suggest the policy wording in respect of this requirement #2 is amended to read:

***Proportionate contributions / enhancements to support relevant schemes in the LCWIP and GTPs as indicated in the TIA, insofar as are directly related to the development and necessary to make the development acceptable in planning terms. To potentially include, but not necessarily limited to, improvements to the B651 and connections to St Albans / Sandridge, subject to the outcome of the Transport Assessment to be undertaken and submitted alongside the planning application for development of the site.***

***Clause #3***

8.14 We suggest that the policy wording of requirement #3 would benefit from making clear that this particular requirement is referring to the need to mitigate potential on Devil's Dyke in respect of ecology. It should also be recognised that it is an existing Public Right of Way, and as such there may be an existing impact.

8.15 It will also be beneficial to give an indication to decision-makers of the likely scale of improvements that would be appropriate. Having regard to these matters, we suggest the policy requirement be reworded along the line of the following:

***Support for improvements*** *to the existing footpath across the Devil's Dyke to mitigate potential* ***ecological impacts of increased recreational disturbance on the Local Wildlife Site. Such improvements may include measures such as s****ignposting with instructions to keep dogs on leads through the Devil's* ***Dyke Local Wildlife Site, along with additional dog bins, or alternative measures which will appropriately mitigate the impact of potential additional dog walkers on the Local Wildlife Site.***

***Clause #4***

8.18 We suggest that this requirement be amended along the lines of the following:

***The proposed development should be informed by a Heritage Impact Assessment, which seeks to ensure any harm to the significance of the Devil's Dyke and the Slad Scheduled Monument is minimised.***

### 357 - Mrs Julia Warren

Submission Number: 357 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Wheathampstead Parish Council Name: Mrs Julia Warren

Comment Number: 11

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Plan M2 – Hill Dyke Road**.

This is viable, provided vehicular access follows the 'no harm to the Devil's Dyke and Slad Scheduled ancient Monument' qualifying requirement**.** Also, any street parking areas should be labelled 'residents only' as in the Lamb Court and Battle View parking areas in Caesars Road. We consider this important so that residents or visitors do not park in this area when visiting the historic Dyke.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 366 - Chrissie Chadney

Submission Number: 366 Submission Date: 10/11/24 09:00

Respondent: Company/Organisation: Name: Chrissie Chadney

Comment Number: 8

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I have been a resident in Wheathampstead for over forty years and read the proposed District Plan with interest. Whilst there are some good ideas in it, there are a number of things which give me concern. I have read the WDPS response and concur with it fully, but have a few additional things to say here.

Development Sites and Local Impact: Specific development sites proposed, such as Amwell Top Field and Hill Dyke Road, threaten the rural character and ecological balance of our area. It is crucial that any development considers its impact on our countryside and strives to maintain the natural beauty and biodiversity that define our community.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Conclusion: I firmly stand with the WDPS in urging a comprehensive reevaluation of the Draft Local Plan. It is essential that the plan not only reflects realistic population projections but also prioritizes environmental conservation, sustainable development, and the enhancement of local services and infrastructure. We need a balanced, forward-thinking approach that truly serves the interests and needs of all of the St Albans District's residents.

## 367 - Ms Julie Bell

Submission Number: 367 Submission Date: 10/11/24 09:00

Respondent: Company/Organisation: Name: Ms Julie Bell

Comment Number: 8

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Development Sites and Local Impact:**
The development sites proposed, such as Amwell Top Field and Hill Dyke Road, pose a threat to the rural essence and ecological harmony of our region. It is essential that any development is carefully considered for its environmental impact, striving to preserve the inherent natural beauty and biodiversity that characterize our community.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion:**
I stand firmly with the WDPS in calling for a thorough reevaluation of the Draft Local Plan. The plan must accurately reflect our realistic population growth projections and prioritize environmental protection, sustainable development, and the improvement of local services and infrastructure. A balanced and visionary approach is required to genuinely meet the needs and interests of the residents of the St Albans District.

### 370 - Diane Black

Submission Number: 370 Submission Date: 09/11/24 09:00

Respondent: Company/Organisation: Wheathampstead District Preservation Society Name: Diane Black

Comment Number: 9

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**WDPS comments on St Albans City and District Council Draft Local Plan**

Wheathampstead and District Preservation Society (WDPS) has approximately 400 households as members, and we therefore speak for around 15% of the population of the Wheathampstead area.

**Development Sites in Wheathampstead**

WDPS is concerned about all development on Green Belt land unless there are exceptional circumstances, and as mentioned above there is provision in the NPPF for local planning authorities to restrict the scale of development to permit the protection of the Green Belt.

M2 Hill Dyke Road, Wheathampstead borders Dyke Lane which is a significant and important country lane that is mostly single track and lined with healthy trees and important hedgerows that need to be protected

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Summary**

Considering the comments above, we urge the council to revisit the draft Local Plan, challenge the Government's Standard Method for calculating housing needs and produce a more equitable balanced plan that serves the needs of the St Albans District residents. We would like to see more detailed planning which includes funding allocation and addresses key issues on exactly how the plan is going to meet climate change targets, deal with extreme weather events, increase biodiversity by 10%, protect the Green Belt, improve transport networks including cycleways, improve water networks and prevent pollution of our rivers, improve services and facilities and protect secondary school placements.

## M3 - Bedmond Lane, St Albans, AL3 4AH

### 145 - Catesby Estates

Submission Number: 145 Submission Date: 07/11/24 11:13

Respondent: Company/Organisation: Stantec Name: Mr P Derry

On Behalf Of Company/Organisation: Catesby Estates Name:

Comment Number: 23

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The site is a narrow strip of land at the western edge of St Albans. It is clearly constrained by tree planting, some of which is protected. This has the potential to impact upon the ability to achieve biodiversity net gain on the site. There are also heritage implications should the site be developed. The narrow nature of the site also restricts the potential extent of any buffer planting that could be provided. The Council must ensure they have appropriate evidence on all these matters to allow the scheme to come forward.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 333100253 A5 PD 241107 Draft Reg 19 Reps Final Reduced_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

**191 - Herts & Middlesex Wildlife Trust**

Submission Number: 191 Submission Date: 07/11/24 15:43

Respondent: Company/Organisation: Herts & Middlesex Wildlife Trust Name: Ms Chloe Edwards

On Behalf Of Company/Organisation: Herts & Middlesex Wildlife Trust Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Inclusion of M3 - Bedmond Lane was strongly objected to by Herts & Middlesex Wildlife Trust through the Reg 18 consultation. It is in conflict with national planning policy, as set out in NPPF and the policies of the local plan. It will also conflict with priorities being identified through the emerging Hertfordshire Local Nature Recovery Strategy (LNRS).

Policies in the Local Plan that inclusion of M3 does not align with:

*Chapter 10 Natural Environment and Biodiversity*

*10.4* - The location of the site close to St Albans means that it is a highly valued and loved local resource, as evidenced as its designation as an Asset of Community Value by the local community.

*10.8* - It will not be possible to deliver biodiversity net gain on this site, within the proposed plans given the location of priority habitats - lowland meadow and lowland calcareous grassland (both rare and priority habitats identified in the emerging Hertfordshire Local Nature Recovery Strategy).

*10.12* - Inclusion of this site is entirely inconsistent with a strategic approach to maintaining and enhancing networks of habitats or planning for the enhancement of natural capital. It would destroy several priority habitats, result in a massive biodiversity net loss.

*10.13* - The Council have not listened to stakeholders re: the importance of this site - it has been flagged repeatedly. By including it, it is actively invoking the destruction of the District's existing natural environment and biodiversity green infrastructure assets.

*Strategic Policy SP10 – Natural Environment and Biodiversity*

1. By including this site (which we have already established cannot be compensated due to the priority habitats present and the mosaic of habitats they create in conjunction with other valuable habitats, making them more valuable than if taken individually) the Council will be endorsing the ***destruction*** *of Green Infrastructure for its role in combating Climate Change and supporting biodiversity, along with its value for recreation, health and wellbeing, and landscape value.*

*Non-Designated Local Green Spaces*

*10.22* -

In point 2 it is stated that development cannot proceed unless the loss of the site can be adequately compensated. This site is one of the most botanically diverse sites in the district. It is home to several priority habitats made more valuable by their proximity to each other. It is home to numerous rare plant species including the rarest plant in the county, protected by the Wildlife and Countryside Act. It cannot be replaced *by equivalent or better provision in terms of quantity and quality in a suitable location.*

*10.23*

*NEB 3 – Non-Designated Local Green Space*

1. The site was an Asset of Community Value and is in daily use by the local community.
2. It continues to provide huge biodiversity benefits, which will mature over time. The occurrence of priority habitats means that it cannot be adequately provided elsewhere. The complex and rare geology means that even if it could, finding such a site within the district would be almost impossible.

Similarly point b cannot be fulfilled because it would destroy a highly valuable component of the strategic green infrastructure network which could not be replaced within or outside the development.

Point c. Biodiversity cannot be improved by this proposal.

*Biodiversity and Biodiversity Net Gain*

*10.29* - This is the epitome of a site and species of national and local importance for biodiversity. The only reason it isn't a LWS is because of a lack of landowner permission to do so. The habitats that occur there are priorities for conservation and creation in all past Hertfordshire-wide and local habitat and biodiversity strategies and the emerging Local Nature Recovery Strategy for the county.

*NEB 6 –*

1. The mitigation hierarchy has not been applied here. Nationally important species and habitats are present. Priority habitats that cannot be replaced are present. Applying the mitigation hierarchy means avoiding this site. Again, the allocation is not compliant with policy.

*Biodiversity Net Gain*

1. **This site as proposed, cannot provide a biodiversity net gain, due to the habitats that are present.**

HMWT are extremely disappointed that SADC continues to include this site - it represents a complete lack of understanding from SADC of the sites ecological value, and a concerning lack of understanding of the ecological policies in their own local plan. This representation continues to flag (as was done at Reg 18 consultation stage) the numerous policies that preclude its inclusion in the plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Removing this site allocation from the Local Plan.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**193 - Catesby Estates PLC**

Submission Number: 193 Submission Date: 07/11/24 15:55

Respondent: Company/Organisation: LDA Design Name: Mr Matthew Gibson-King

On Behalf Of Company/Organisation: Catesby Estates PLC Name:

Comment Number: 21

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In summary, there are a number of draft allocations which raise concerns on consistency:

As set out above, the site is a narrow strip of land at the western edge of St Albans. It is clearly constrained by tree planting, some of which is protected. This has the potential to impact upon the ability to achieve biodiversity net gain on the site. The site is identified as a Asset of Community Value.

We have to conclude that not only does the Regulation 19 Plan fail to allocate sufficient sites for housing, or enough in the early stages of the Plan Period, but that Windridge Farm is a stronger contender than some sites the Plan does propose as allocations, even on the Council's terms.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

## 215 - CALA Group Ltd

Submission Number: 215 Submission Date: 07/11/24 17:34

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: CALA Group Ltd Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report for details**

**Site M3 – Bedmond Lane, St Albans**

- The draft Local Plan and accompanying Policies Map identifies the report site as proposed housing allocation ref M3. This proposal is **strongly supported** by the CALA Group as owners of this site. As is set out elsewhere in this report, the land at Bedmond Lane is suitable for development and should be allocated in the Local Plan.
- The draft Local Plan indicates a total of around 70 dwellings for the site and this level of provision is supported at this stage of plan-making.
- The policy allocating this site refers to a number of "key development objectives/issues to address". These are repeated below with comments on behalf of the landowner.

1. *Proposals must take account of the Public Rights of Way on site and include support for improvements to the local walking and cycling route network. Enhanced walking and cycling connections between Bedmond Lane and Mayne Avenue should be achieved.*

The indicative layout included at Figure 8 below retains the public rights of way around and through the site on their current alignment.

2. *Contributions / enhancements to support relevant schemes in the LCWIP and GTPs as indicated in the TIA.*

Contributions towards active travel improvements can be secured through a section 106 agreement.

3. *Support for improvements to the PRoW network to enable active travel into St Albans.*

Pre-application discussions have taken place with the Local Highway Authority and these have identified improvements that could be incorporated into the scheme. As an example, the illustrative layout included at Figure 8 below has been amended to include a 3m cycle path through the site connecting to King Harry Lane.

4. *The known archaeological information suggests that the northern third of the site is particularly sensitive in heritage terms. Development proposals should avoid new buildings in this part of the site, and should better reveal the significance of the below-ground heritage assets.*

The indicative layout at Figure 8 below avoids development on the northern third of the site. An Archaeological Desk-Based Assessment has been carried out by RPS, see section 6.0 below. The archaeological constraints on the site do not prevent development as proposed.

5. *Development proposals must take appropriate account of all those trees protected under Tree Preservation Order.*

A tree survey has been undertaken, see section 6.0 below. The tree constraints on the site are almost exclusively around the edges of the site and do not constrain development within the central part of the site.

6. *Proposals must take account of the presence of the Lizard Orchid which is a protected species on Schedule 8 of the Wildlife and Countryside Act 1981.*

The illustrative layout shown at Figure 8 proposes to avoid the ecologically more interesting northern part of the site. Any protected species on site would be protected in line with legislative provisions.

7. *Built development should avoid the relatively rare species-rich grassland in the northern part of the site*

The illustrative layout shown at Figure 8 proposes to avoid the ecologically more interesting northern part of the site. The layout also proposes an area of public open space to the south of the built development, which will be the focus for recreational use and enable public access to the more vulnerable northern area to be restricted.

8. *There is a pipeline running adjacent to the site, and development proposals must appropriately take this into account.*

This will be factored in at planning application stage but does not affect the overall capacity of the site.

9. *Undertake opportunistic extraction of any suitable sand and gravel deposits for use on-site wherever possible, where such deposits are uncovered during construction / excavation works.*

At this stage, it is difficult to envisage how mineral extraction would be feasible given the small site area, the proximity of residential properties and the combination of ecological and archaeological constraints. In this context, it may be more appropriate to remove this aspect of the policy.

10. *Take appropriate account of these Environmental Constraints: Source Protection Zone (SPZ) 1; Bedrock Aquifer.*

These constraints would be considered at planning application stage but do not affect the overall capacity of the site.

- In summary, we consider Policy M3 to be **legally compliant** and **sound**.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 248 - Historic England

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 27

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Site M3 - Edmond Lane, St Albans, AL3 4AH**

We continue to have significant concerns about the allocation of M3 - Bedmond Lane, St Albans, AL3 4AH. In the absence of additional archaeological assessment, we recommend that this site should be deleted. Further consideration is given in our detailed comments below.

The site is located between the Verulamium, site of Scheduled Monument (LEN: 1003515) to the north, the Verulamium, The Fosse Scheduled Monument (LEN: 1003517) to the northwest, and Verulamium, Prae Wood settlement Scheduled Monument (LEN: 1003518) to the south-west. While we do not object in principle to the allocation of this site, further assessment will be required to confirm its suitability, evaluate its capacity, and to identify any necessary mitigation measures.

We therefore welcome the preparation of the high level HA by Place Services. Criterion 4 reflects the comment that the northern third of the site is most sensitive in heritage terms and requires that this area should be kept free from new buildings.

However, as we advised in Summer 2024, the fundamental point of the HA is that extensive Roman remains may be present across the whole site, especially given its location between two Roman roads as they enter the Roman city which is where they put their cemeteries. In the absence of field evaluation, we are concerned that there is a high risk of very significant and well-preserved Roman archaeology (including dense concentrations of human remains) that the LPA may be compelled by NPPF fn 72 to treat as equivalent in significance to a designated asset.

We re-iterate that we would be cautious about allocating the site for development without further archaeological assessment. Inclusion as an allocated site would not only pose a risk to important remains, but also a risk to the finances of a developer who uncovered them after designing a scheme.

We therefore recommend that the site is deleted on the basis of the current understanding of the site unless further archaeological assessment is undertaken to inform suitability as an allocation.

We appreciate that you have indicated that the promoter has started some site clearance in advance of some archaeological work. However, without knowing more about the scope and methodology of the archaeological evaluation, let alone the results (which could be many months away) we maintain our current position.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

In the absence of additional archaeological assessment, we recommend that this site should be deleted.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 258 - Ms Alison Evans

Submission Number: 258 Submission Date: 08/11/24 01:37

Respondent: Company/Organisation: Name: Ms Alison Evans

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

i don't know the precise legal requirements so I cannot say whether it is legally compliant. I don't consider it sound, however, as it appears the council has not taken any notice of the comments submitted by its electorate in relation to the last draft. According to the objectives, sustainable use of land and protecting the green belt are your top two priorities, even ahead of housing, but the proposed redrawing of green belt boundaries shows that this has not been implemented. it

simply is not sustainable to concrete over the green belt. and even if you do go ahead and redraw the boundaries (which would be reckless) it will not make those sites suitable for building on. many of the sites you have indicated will be developed have got notes against them showing they contain protected species (eg M3), gas pipelines (M3), protected trees (m7), are atop the aquifer (B7) are at risk of flooding (M6) are on an SSSI (m15) ETC, ETC. these sites need to be protected and to do otherwise is not sustainable: it will not result in St Albans being a great place to live and work, quite the contrary. Some of the proposed development sites are on car parks which will only make the parking situation worse than it already is.

if you were serious about strategic policy 10, you would not be proposing to release plot M3 from the green belt. at the very least you would have excluded the bit north of the public footpath which includes the grass land and the orchids. I fundamentally disagree with the current proposal

overall I don't think this plan is in the best interests of the people of st albans as it is not justified as defined in the introduction to the revised draft plan

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. ## 296 - Dr Robert Wareing

Submission Number: 296 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Dr Robert Wareing

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I understand Regulation 19 Consultation only allows for public comment on the draft Local Plan's compliance and 'soundness' with national planning policies – not whether potential sites for infrastructure, employment and housing developments should or should not be included.

I make this submission as a resident of St Albans with no specialist knowledge in planning or legal matters. I also make it reluctantly because I am aware of the time, resources and effort that have gone into its preparation. And I appreciate that if my arguments are accepted and the Plan fails, St Albans may be in a very bad situation.

However, my submission relies on the presence of one potential site for development as an exemplar, a very powerful example of which I have extensive knowledge. That site is Bedmond Lane Wildlife Meadow (shown as M3 - Bedmond Lane, St Albans, AL3 4AH in the site allocations plan).

The inclusion of this meadow calls into question three specific grounds on which I challenge the validity of the Plan. These are:

*(1) It is not consistent with national or local policy*– enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy including those announced since the new government took office.

*(2) It is not legally compliant*– the draft Local Plan has not been prepared in accordance with the legal and procedural requirements for preparing Local Plans. Principally, I submit that consultation was more akin to pseudo consultation with representations from experts, local people and councillors disregarded.

*(3) It is not justified* as an appropriate strategy, because it fails to explain the reasons for criteria adopted for site selection and has failed to identify or use one other major policy constraint which is relevant to release of land from the Green Belt. This unsound assessment of the sites within the Green Belt with potential for development, means decisions in the Plan are fundamentally flawed and thus not justified.

The selection of sites proposed for release from the Green Belt is based upon the Ove Arup & Partners Limited report on the Green Belt Review June 2023 ("The Arup Report").

The evidence I cite to support my hypothesis is as follows, specifically in relation to identifying sites for potential development.

***(1) <u>The Plan is not consistent with national or local policy.</u>***

The Arup Report indicates at part 4 (page 18) the methodology which has been used in the review. This methodology included Step 1 (sub-area identification); Step 2 (Defining Sub-Area Boundaries); followed by Steps 3 to 7 (including site visits and recommendations).

At Step 1, Arup considered a buffer zone around existing settlement areas, and also considered specific sites which had been promoted for development. In considering the natural environment, in Para 4.2.3 of the report (page 24) Arup applied "*a filtering process to remove weakly performing areas or promoted sites, which were entirely or largely constrained by major policy constraints … (*precluding development*)*". Five "major policy constraints" were then identified – Flood zone 3b; SSSI; Scheduled Monuments; Registered Parks and Gardens; and Ancient Woodland. These were the only natural environment "major constraints" identified in preventing development.

Crucially, Arup has therefore failed to identify other major policy constraints (ie reasons preventing development) which are relevant to the release of land from the Green Belt.

(i) A fundamental policy constraint is the emphasis placed in the NPPF on the requirement to encourage biodiversity, green infrastructure and natural environment as fundamental to people's health. This is also consistent with identical aims promoted by the Environment Act 2021.

(ii) Further, the Government's Environmental Improvement Plan 2023 states *"We will halt the decline in our biodiversity so we can achieve thriving plants and wildlife … This goal is at the apex of our plan: all other goals will help us to achieve it."*The Government Plan has a commitment*"To restore or create more than 500,000 hectares of wildlife rich habitat by 2042."*This plan was presented to parliament pursuant to Section 10(6) of the Environment Act 2021.

(iii) In the Draft Local Plan 2041, Regulation 18 Public Consultation, SADC has made strong claims about its policy commitment to protect, maintain and enhance the natural environment. Specifically, Strategic Policy SP10 – Natural Environment and Biodiversity, claims *"The Council will protect and enhance Green Infrastructure for its role in combating Climate Change and supporting biodiversity, along with its value for recreation, health and wellbeing, and landscape value."*And the objective, shown in Chapter 10 of the Draft Plan, is to: "*Protect, maintain and enhance the natural environment, including biodiversity, the landscape, green infrastructure*…"

*(iv)* These failures of the Plan to conform to national and local policies are underlined by an independent expert Matthew Dodds, the Planning and Biodiversity Manager at Herts and Middlesex Wildlife Trust (HMWT), a registered charity in England and Wales (239863). In a scathing and compelling submission under Regulation 18, based on irrefutable evidence, he states the inclusion of Bedmond Lane Meadow, St Albans: "… *is totally in conflict with national planning policy, as set out in NPPF and the draft policies of the local plan, as set out in the regulation 18 consultation. To include this site would be to contradict the policies of the local plan and make a mockery of any environmental credentials the council professes to promote… It could not be more precious for people and wildlife … It is the epitome of the sort of site that should be protected in accordance with local and national policy.*

HMWT goes on to say "*By including this site, the Council will be endorsing the destruction of Green Infrastructure for its role in combating Climate Change and supporting biodiversity, along with its value for recreation, health and wellbeing, and landscape value."*And conclude: "*Categorically, for the avoidance of doubt, it will not be possible to deliver biodiversity net gain on this site, within the proposed plans."*

It should also be mentioned that a lead article in the St Albans Times on 27 July, headed *"Council ridiculed for ignoring own environmental policies by including wildlife site in Local Plan"*reflected the above arguments. An editorial also refers to: "*… the ludicrous decision to include Bedmond Lane Meadow as a potential housing site."*

Therefore, I would point to a significant disconnect between established national policies (and the policy claims of the Draft Local Plan) and the methodology used by the consultants (Ove Arup & Partners Limited) whom the council has relied upon to act on their behalf in order to identify potential sites for development. This is because the Arup Report singularly fails to use Biodiversity (see points (i) to (iv) above) as a criterion in differentiating between the Green Belt sites proposed.

The prime - and most obvious - example of this key criterion having been missed by the Arup Report relates to Site M3, Bedmond Lane Wildlife Meadow. This is not just an ordinary field in the Green Belt. It is extraordinary and very special both in terms of supporting a massive range of biodiversity and, as a former Asset of Community Value, the extent of its use by many local people for outdoor recreational, social, sporting and educational activities over five decades.

This wildflower and wildlife meadow has, in previous planning applications, been described by the Hertfordshire & Middlesex Wildlife Trust (HMWT) as "*Unique in St Albans and of significant ecological value and importance"*. It is one of the very rare examples of a true natural wildflower and wildlife meadow that remain in this county. I shall further develop this point in Section 2 below.

Nor should sight be lost of massively revised policy announced since the new government took office. It has set out plans for building on the Green Belt to boost housing supply while improving "green spaces".

Under new "golden rules," councils will be required to prioritise building on brownfield sites and poor-quality areas in the Green Belt, dubbed "grey belt".

Thus ‘Greyfield’ provides a third designation for types of land, as well as the familiar ‘greenfield’ and ‘brownfield’ categories. Unfortunately, ‘Greyfield’ has, at this stage, a less clear definition but, by implication, the meaning is clear.

The essence of my referring to this, is that it further reinforces the need - apparently absent from the St Albans Plan - to use Biodiversity as a criterion in differentiating between the Green Belt sites proposed.

**(2) *It is not legally compliant*.**

‘To consult’ is defined in the Oxford Dictionary of English as ‘to seek information or advice from someone, especially an expert or professional … typically before undertaking a course of action’. It requires careful listening and consideration of views expressed.

Whilst I understand that SADC is under huge pressure to deliver a Plan, I would argue that this single imperative may be causing them to plough on regardless - apparently relying exclusively on the Arup Report - and without properly listening and considering views of residents, councillors and independent experts.

SADC's last Plan failed, at least in part, because the council failed to consult properly with neighbouring authorities. Failure to take account of this meadow's ecological value and wildlife status - as a crucial element of the holistic framework of the Plan - calls into question the validity of the consultation process and therefore the “soundness” of the whole of this latest Plan.

The Plan has not been prepared in accordance with the legal and procedural requirements for preparing Local Plans. Principally, I submit that the consultation process may have the appearance of conforming to procedural requirements but SADC has not listened to feedback. Thus, what is claimed to be consultation was more akin to pseudo consultation.

I am challenging the validity of the consultation carried out under Regulation 18 as it relates to site allocation, given the number of independent expert ecologists that have lined up over the years clearly stating that the meadow is a de facto wildlife meadow.

For instance, it should be noted that the issues raised by Matthew Dodds, an independent expert - see point (iv) above - along with similar views expressed by residents, were disregarded.

Also apparently disregarded was the unequivocal submission by HMWT stating: “*The site itself is a species rich mosaic of habitats including species rich chalk grassland, species rich neutral grassland and scrub. It easily qualifies as a local wildlife site and the only reason that it is not designated as such is because the landowner permission required to designate the site has not been given. It is a de-facto Local Wildlife Site and should be considered as such. St Albans District Council has been made aware of its value many times. Recent surveys conducted by the ecologist*

*acting for the developer on another application to establish for horse grazing on the site confirmed its botanical value, despite failing to record its most spectacular species - Lizard Orchid, one of rarest plants in the county."*

The failure of SADC to act on, or to acknowledge, representations pointing to the ecological value of this wildflower and wildlife meadow is even more perplexing because SADC and councillors for Verulam Ward have stood shoulder to shoulder with local residents in fighting to preserve Bedmond Lane Wildlife Meadow over many years as a succession of planning applications to develop the land have been made by the owners. They are therefore fully aware of the biodiversity and value of this meadow.

Since its designation as an Asset of Community Value (ACV) in 2014, the meadow has been at the vortex of a tsunami of applications and appeals from Cala Homes. Time after time, time and time again, legal actions and challenges have been initiated by Cala Homes. And each time, SADC has stood strong in preserving the meadow.

No less than four formal applications have been made to change the use of the meadow to keep horses (or a horse). Up to 2020, all were rejected by SADC and Cala Homes have taken three of these to appeal and lost each time.

But planning application (5/2019/2892) was granted by SADC Planning Referrals Committee, albeit very reluctantly, because there were no legally defensible grounds to refuse under the NPPF.

In addition, and in parallel, Cala Homes have also vigorously pursued four separate legal challenges, at ever higher levels of tribunal and court, contesting the continuing status of Bedmond Lane Meadow being designated as an ACV. All these challenges by Cala Homes - including, ultimately, that heard by the Court of Appeal at the High Court in London - failed.

Thus, as is clear from history, SADC are alert to the intrinsic ecological value of this wildflower and wildlife meadow.

I refer to the minutes of the SADC Planning Meeting that discussed Application 5/2019/2892, Agenda Item 6v, that refers to Bedmond Lane Meadow. Please see page 181. In para 6.7.1 Hertfordshire County Council Ecology states "*The grassland has been shown to support sufficient indicator plants to meet Local Wildlife Status*." In para 6.7.2 HCC Ecology further states " ... *since the number of indicator species required for an area of neutral grassland to qualify as a Local Wildlife Site (LWS) is 8, I consider this grassland presently to be of LWS quality and floristically rich*. Consequently, the site is likely to be of at least District value."

Also on page 183 of this document, In para 6.8.1 Herts and Middlesex Wildlife Trust state "*This site remains one of the most ecologically valuable unimproved grassland, scrub mosaics in the St Albans area."* And in para 6.8.2 HMWT continues "*It has been established that it is of Local Wildlife Site quality* ..."

In the past few months, a number of ecologists - ranging from independent HMWT ecologists to Hertfordshire County Council ecologist – have lined up supporting the status of the meadow as a de facto wildlife site. Specifically, I have correspondence from:

(a) Leslie Davies, Chief Executive Officer of HMWT;

(b) Astrid Biddle, ecologist HMWT; (who states in an email to local MP, Daisey Cooper: "… it is immediately obvious that the site qualifies as a Local Wildlife Site" and interestingly refers to "classifying it as a LWS would highlight its particular value". And "More widely, it may bring to the attention the value of Local Wildlife Sites more generally within the local plan."

(c) Chloe Edwards, ecologist, Director of Nature Recovery, HMWT; and

(d)Simon Richards, Hertfordshire County Council Ecologist.

This correspondence is available, should you need to see it.

I will quote just one example in more detail. At my request (through County Councillor Sandy Walkington), HCC Ecologist, Simon Richards, carried out a critical evaluation of the National Vegetation Survey carried out by Ethos Environmental Planning Ltd (see below). Mr Richards described it as *"… a reliable review of the communities present for use in further understanding the site now and in the future … with results shown from quadrats … and confirmed our previous views of the site regarding its criteria as a Local Wildlife Site.* Initially saying*"The site is not listed as a Local Wildlife Site, although following our own survey, we have argued the flora is in places akin to that of a Local Wildlife Site."*

Furthermore - and of great significance, in my view - the National Vegetation survey carried out by Ethos Environmental Planning Ltd, on behalf of Cala, supported the priority, importance and value of the meadow. Below, I reproduce the Ethos Environmental Planning Ltd conclusion in full:

*Para 5.1.1 "The habitats of the site were varied from grasslands, scrub, woodland and areas of bracken and rosebay willowherb*

Para 5.1.2 *"The grasslands were divided into two areas north and south areas which were both distributed between areas of scrub habitat. The northern grassland was particularly species rich with up to 23 species in a quadrat and abundant invertebrate activity including butterflies and any hills associated with a mature grassland. The grassland was best characterised by MG1 grassland due to the abundance of false-oat grass but there were several species present that were associated with calcareous grassland such as pyramid orchids, greater knapweed and field scabious.*

*Para 5.1.3 "Both chalk and neutral grasslands are listed as priority habitats under Hertfordshire's Local Biodiversity Action Plan and the chalk grassland is also listed within the National Biodiversity Action Plan. In addition, lowland calcareous grassland is also listed as a habitat of principal importance under Section 41 Natural Environment and Rural Communities (NERC) Act."*

The diversity and rich mosaic of different forms of life this beautiful meadow sustains is huge and includes many mature trees (some with TPOs) and lots of saplings together with a vast array of self- seeded flora. I have identified more than 160 different species of wildflowers and have been unable to identify at least as many again. Especially prolific are oxeye daisies, rosebay willowherbs, wild daffodils, snowdrops, field scabious and primroses. They share this precious space with a variety of fauna (including deer, foxes, rabbits, squirrels and bats), many species of insects and a large range of birds (from red kites and kestrels to owls). Even pheasants and partridges are seen. And this is not to mention the huge range of invertebrates (especially lots of different kinds of butterflies).

The beauty of this wildlife meadow is like an ecological kaleidoscope, constantly changing through the seasons. And its value to the environment is immense. Even protected species of orchid can be found amongst a profusion of bee orchids and pyramidal orchids. It should also be noted that in one area covered by more than twenty ancient oak trees (known locally and affectionately as "The Oak Cathedral") there is a turlow-like seasonal lake that forms.

And it should not be forgotten that it was designated as an Asset of Community Value (ACV) for five years.

It is said that a picture is worth a thousand words. I have taken many thousands of photographs of the meadow over 50 years which provide compelling evidence of its beauty, diversity and environmental value which I will submit separately in emails **(as Parts 2 and 3)** to enhance this submission.

It seems perverse that this wildlife meadow is likely to be destroyed at a time when we are looking to create such sites. It smacks of the left hand and right hand each not knowing what the other is doing.

***(3) <u>It is not justified</u>***

The Arup Report reasoning for the meadow's inclusion is not justified.

I am advised that it is an established principle of Public Law that a decision maker must take into account all relevant considerations in reaching a decision.

In Section 1 of this submission, I describe how Arup has specified five “major policy constraints” (precluding development) but has failed to identify one other major policy constraint which is relevant to release of land from the Green Belt. Arup does not explain why the emphasis placed in the NPPF on the requirement to encourage biodiversity, green infrastructure and natural environment does not form a policy constraint. The result is that some sites proposed for development - Site M3 Bedmond Lane Wildle Meadow, in particular – ought to have been excluded on the grounds that such sites conflict with national policy on the protection of the environment, both as a contributor to biodiversity and to local people’s health. This decision-making process is inconsistent with the guidance in the NPPF and the Environment Act 2021 as to the importance of the natural environment.

This unsound assessment of the sites within the Green Belt with potential for development, means decisions in the Plan are fundamentally flawed and thus not justified.

These photographs, all of which I have taken in Bedmond Lane Wildlife Meadow, support and reinforce its description by a number of independent ecologists as "*a de facto wildlife meadow*" and **"***Unique in St Albans and of significant ecological value and importance"***.**

And the photographs say much more than any written words. Thus my written description below pales into insignificance when compared to the rich vividness of my photographs.

*"The diversity and rich mosaic of different forms of life this beautiful meadow sustains is huge and includes many mature trees (some with TPOs) and lots of saplings together with a vast array of self- seeded flora. I have identified more than 160 different species of wildflowers and have been unable to identify at least as many again. Especially prolific are oxeye daisies, rosebay willowherbs, wild daffodils, snowdrops and primroses. They share this precious space with a variety of fauna (including deer, foxes, rabbits, squirrels and bats), many species of insects and a large range of birds (from red kites and kestrels to owls). Even pheasants and partridges are seen. And this is not to mention the huge range of invertebrates (especially lots of different kinds of butterflies).*

*"The beauty of this wildlife meadow is like an ecological kaleidoscope, constantly changing through the seasons. And its value to the environment is immense. Even protected species of orchid can be found amongst a profusion of bee orchids and pyramidal orchids. It should also be noted that in one area covered by more than twenty ancient oak trees (known locally and affectionately as “The Oak Cathedral”) there is a turlow-like seasonal lake that forms.*

*"And it should not be forgotten that it was designated as an Asset of Community Value (ACV) for five years."*

## M4 - North of Oakwood Road, Bricket Wood, AL2 3PT

### 140 - Landowners of Sites M4 and OS1

Submission Number: 140 Submission Date: 07/11/24 10:42

Respondent: Company/Organisation: DLA Town Planning Name: Mr James Fitzpatrick

On Behalf Of Company/Organisation: Landowners of Sites M4 and OS1 Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The draft Local Plan and accompanying Policies Map identifies the report site as proposed housing allocation ref M4. The identification of the development potential of this site is **supported** by the owners of this site. As is set out elsewhere in this report, the land is suitable for development and should remain allocated in the Local Plan.

None of the requirements present a problem for the development of the site for the following reasons:

- Given that both allocations are intrinsically linked and have one landowner, it is likely that one planning application will be submitted with proposals for both residential and community uses, so they can be dealt with in a coordinated approach.
- At this stage, it is suggested that the residential allocation will propose a connection to Footpath 29. This footpath already provides a route into a residential area off Woodside Road/The Meads and to the wider area of Bricket Wood. Proposals can also offer improvements, such as widening, to create a more attractive and useable shared footpath for both pedestrian and cycle users.
- It is accepted that access off the A405 is not likely to be feasible in Policy and Highway terms and therefore access can be achieved from Woodside Road/ The Meads, subject to technical highway input at the appropriate time.
- The development will fulfil these requirements through reasons explained below. In addition, a financial contribution can be sought through a S106 agreement to support relevant schemes in the LCWIP and GTPs outside of the site.
- As set out in the second paragraph, the proposal will include improvements to Footpath 29, encouraging both existing and future residents to engage in active travel. Considering the proposals include a community use, it is expected that site will become a more appealing area of Bricket Wood.
- Proposals will provide compliant shared use widths from Footpath 29 onto the bridge (at Junction 21a) to maintain continuous walking and cycling routes to Watford and St Albans.

- A Tree Survey and Constraints Plan will be developed as part of the design process to esnure that there will be sufficient separation between development and protected trees along this boundary.
- Noise Modelling can be overlayed onto a Constraints Plan at the early stages of the design phase to identify areas that are suitable for residential uses. Any areas that are not suitable can be utilised as open space in connection with the green corridor that will form from the improvements to Footpath 29. It is also worth noting that the existing bunds already provides some mitigation as it stretches along the majority of the northern boundary.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 0140 Local Plan representations - Sites M4 and OS1 - November 2024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

DLA Town Planning represents the owner and promoter of sites M4 and OS1 and our participation in the hearing sessions would assist the Inspector and help to respond to any queries raised.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**145 - Catesby Estates**

Submission Number: 145 Submission Date: 07/11/24 11:13

Respondent: Company/Organisation: Stantec Name: Mr P Derry

On Behalf Of Company/Organisation: Catesby Estates Name:

Comment Number: 24

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Previous comments noted that access form the A405 may not be safe. The Part B comments accept this and note access must be from elsewhere. However, there are no alternatives available. The site is not therefore considered accessible and should be removed as an emerging allocation. Noise from the M25 and A405 will no doubt require mitigation measures. Acoustic fencing would be inappropriate within a Green Belt location and therefore bunding should be provided. This will have an impact on land available for development given the area required to provide such a feature.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 333100253 A5 PD 241107 Draft Reg 19 Reps Final Reduced_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to address the key matters made in the representations

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

**193 - Catesby Estates PLC**

Submission Number: 193 Submission Date: 07/11/24 15:55

Respondent: Company/Organisation: LDA Design Name: Mr Matthew Gibson-King

On Behalf Of Company/Organisation: Catesby Estates PLC Name:

Comment Number: 22

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In summary, there are a number of draft allocations which raise concerns on consistency:

Previous comments noted that access form the A405 may not be safe. The Part B comments accept this and note access must be from elsewhere. However, there are no alternatives available. The site is not therefore considered accessible and should be removed as an emerging allocation.

Noise from the M25 and A405 will no doubt require mitigation measures. Acoustic fencing would be inappropriate within a Green Belt location and therefore bunding should be provided. This will have an impact on land available for development given the area required to provide such a feature.

We have to conclude that not only does the Regulation 19 Plan fail to allocate sufficient sites for housing, or enough in the early stages of the Plan Period, but that Windridge Farm is a stronger contender than some sites the Plan does propose as allocations, even on the Council's terms.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

4. SW Herts JSP_Windridge Farm_Vision Document_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**287 - Hertfordshire County Council Minerals and Waste Planning Policy Team**

Submission Number: 287 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council Name: Hertfordshire County Council Minerals and Waste Planning Policy Team

Comment Number: 12

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

M4 - North of Oakwood Road, Bricket Wood, AL2 3PT

Following discussions with the District Council regarding this site, and site OS1, including further clarification, the Minerals and Waste Planning Authority withdraws its previous objection.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Whilst **not a soundness matter**, the District Council may however wish to add an objective to the 'key development requirements' for this allocation, like that suggested below for M8 – Verulam Golf Club, St Albans, AL1 1JG, to include the following wording or similar:

*Undertake opportunistic extraction of any suitable sand and gravel deposits for use on-site wherever possible, where such deposits are uncovered during construction / excavation works.*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 359 - Betsy Brown

Submission Number: 359 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Natural England Name: Betsy Brown

Comment Number: 16

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy NEB9 –Agricultural Land

Natural England Reg 18 comments: *An agricultural land classification (ALC) survey has been produced and reviewed by Natural England for H3 (East of Hemel Hempstead) and we would expect to be consulted in a similar fashion or an ALC produced by the LPA for the remaining allocations over 20ha, or those that in combination will result in the accumulated loss of BMV. Further proposed allocations that have the potential to result in a loss of greater than **20ha** of BMV include:*

- *B1 - North St Albans, AL3 6DD*
- *B2 - Northeast Harpenden*
- *B4 - East St Albans, AL4 9JJ*

It is good to see inclusion of the following wording:

Other than where development is allocated in this Plan, where development on more than **20 Hectares** of agricultural land is proposed, a detailed survey (approved by the Department for Environment, Food and Rural Affairs (DEFRA) or an independent expert), which includes an assessment of grading, should be submitted.

However, we would like to see the policy include reference to in-combination/cumulative effects of smaller developments resulting in the loss of 20ha of BMV.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

However, we would like to see the policy include reference to in-combination/cumulative effects of smaller developments resulting in the loss of 20ha of BMV.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## M6 - South of Harpenden Lane, Redbourn, AL3 7RQ

### 97 - Mr Paul Owen

Submission Number: 97 Submission Date: 06/11/24 13:37

Respondent: Company/Organisation: Name: Mr Paul Owen

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Sites in Redbourn and east/north Hemel will cause the Green Belt to disappear between Redbourn and Hemel. Most are in areas categorised as Important and require a compelling reason to build. The only reason stated is for Social or Affordable Housing which surely means the 60% of planned housing not in those categories should not be built on Green Belt as such housing is not compelling bu need but financial.

The impact of all the HGC and West Redbourn proposed has only Ben considered on a site by site basis. A significant proportion of traffic to and from the Sites would coallesce on the same small roads between Hemal and Redbourn, St Albans, Harpenden and the M1. The travel infrastructure barely supports the traffic currently at peak times. Therefore, the impact cannot be considered safe as required.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The individual areas should also be considered in relation to each. Ie if one area is developed the importance of adjacent areas should reconsidered to reflect that.

The traffic plan for each residential site should be considered sequentially in the expected order of start to take in to account the effect of the moving starting position.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

### 111 - Cllr. David Mitchell

Submission Number: 111 Submission Date: 06/11/24 16:01

Respondent: Company/Organisation: Name: Cllr. David Mitchell

Comment Number: 7

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Hemel Garden Communities (HGC) programme is at a very early stage in its concept. 11,000 new houses is a huge project yet there is no substantial evidence to show it is viable and deliverable. It is all on greenbelt land NOT recommended by the ARUP green belt review for development. The land is in the Chiltern Hills and the northern parts are adjacent to the National Landscape which should be protected. It is high quality agricultural land, grade 2 and 3a, which should be reserved for our food security. HGC is not served well by public transport. The four closest rail stations are all several miles away and the bus services are currently poor. The HGC programme is over-reliant on people walking and cycling, with little private parking being made available or new main roads being provided. This would require a huge modal shift which would be difficult to achieve in the time scale. In this respect, HGC a very risky social experiment.The HGC is a long way from the Hemel town centre so the development does not connect well with the rest of Hemel. Over a third of St Albans District's new housing is proposed at HGC which does not connect well

with the rest of the District. The Nickey Line is enthusiastically being put forward as a significant cycle and footpath linking Hemel to Harpenden via Redbourn but currently this route is not fit for purpose. HGC might seem great on paper but the reality of building a new town onto to an existing new town is not good spatial planning.

The site at West Redbourn (B3) has no proper access. The proposed access points are from existing cul-de-sacs and country lanes, and traffic would have to travel across Redbourn Common. This would have a big impact on the existing community.

South of Harpenden Lane, Redbourn (LG4) is mostly a flood plain. This is noted but further work needs to done on the impact new development would have on the existing development. More work needs to be done on the affect development would have on the rare chalk stream that flow through Redbourn, i.e. the River Ver and the River Red.

The broad sites in the Local Plan are proposed on over 700 hectares of greenbelt in total, of which over 500 were not recommended by ARUP for consideration in their green belt review. Half of the SADC green belt sites are in the HGC area, which is a big loss of greenbelt in one area. If HGC goes ahead it would be urban sprawl and lead to coalesence between Redbourn and Hemel Hempstead. It has been asserted that the chosen green belt sites meet the 'exceptional circumstances' criteria for building on the green belt by dint of the need for housing and by building next to existing settlements. However this has not been demonstrated in a way that overcomes all the problems with the HGC programme and the intinsic difficulties of the sites in Redbourn village. The draft Local Plan cannot be considered legal and sound.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

HGC and West Redbourn should not be included in the Local Plan. If they are, much more work needs to be done on the Infrastructure Delivery Plan. A site at NE Redbourn owned by the Lawes Agricultural Trust should be considered instead as it would integrate with Redbourn village much better.

Generally, development should be spread more evenly around the District as this would better meet the needs of St Albans District residents. The lack of public transport and inadequate roads has to be resolved. Maybe the Nickey Line could be a tram line?

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

I am very familiar with the draft Local Plan and have a good working knowledge of planning issues in general. I could add a lot of local knowledge to proceedings particularly the area of the Hemel Gardens Community programme and the sites in Redbourn Village. I am well informed about the District as a whole.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The River Ver runs along the middle of the site. This includes areas of flood zones 2 and 3. The NPPF seeks to direct development away from high risk areas. In line with paragraph 161, a sequential risk-based approach should be taken, which will demonstrate more appropriate sites exist within the District. The site will involve loss of trees, and the need to cross the river, which will bring significant cost.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

Comment Number: 23

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In summary, there are a number of draft allocations which raise concerns on consistency:

The River Ver runs along the middle of the site. This includes areas of flood zones 2 and 3. The NPPF seeks to direct development away from high risk areas. In line with paragraph 161, a sequential risk-based approach should be taken, which will demonstrate more appropriate sites exist within the District. The site will involve loss of trees, and the need to cross the river, which will bring significant cost.

We have to conclude that not only does the Regulation 19 Plan fail to allocate sufficient sites for housing, or enough in the early stages of the Plan Period, but that Windridge Farm is a stronger contender than some sites the Plan does propose as allocations, even on the Council's terms.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

4.4. Martin Grant Homes and Kearns Land are comfortable with the development requirements and can confirm that an indicative Concept Plan (Appendix A - *see attachment*) has been prepared in respect of their interests to respond to the constraints and opportunities. The ten objectives/issues referred to above are all being taken into account.

4.5. Access to the Site is proposed via Crown Street to the west with a further pedestrian access to Harpenden Lane to the north and Harding Close to the southwest. The built form can be

provided outside of Flood Zones 2 and 3 and the important landscape and ecology features retained and enhanced.

4.6. The allocation of the site, in our view, will ensure the delivery of a high-quality sustainable housing development in accordance with the objectives of the NPPF and relevant Development Plan policies.

4.7. The site can accommodate the area required for natural greenspace and circular walks for Suitable Alternative Natural Greenspace.

4.8. Martin Grant Homes and Kearns Land remain committed to the delivery of the site. Whist the draft Local Plan does not include a trajectory for the allocations we note that medium and small sites are expected to start delivering in 2029/30. Martin Grant Homes and Kearns Land are comfortable with those timescales and subject to progress on a planning application the site is well placed to contribute to five year supply on adoption of the plan.

### 224 - Redington Capital Limited & CALA Homes

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 18

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Redington Capital Limited and CALA Homes **object** to Part B (Site Allocations) which forms part of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

Redington Capital Limited and CALA Homes conclude that the site allocation selection process undertaken by the Council is unsound. They recommend that the site selection process should be completely reviewed, revised and the draft allocations re-assessed in a transparent and consistent approach particularly in applying the recommendations of the GBR.

In addition to the above, there are a number of other concerning questions regarding some of the Broad Location sites and other housing site allocations chosen by the Council, including:

- Site M6 (68 homes) – There are safety concerns over access arrangements into the site. It is located within the Flood Plain, is current used by the traveller community and includes TPOs. The land may not therefore be deliverable at all.

It is clear from the above that the Council has chosen to allocate site:

- In locations deemed to be of strong importance to the purposes of the Green Belt;
- That are not located within the most accessible and sustainable locations; and
- That are either undeliverable or their capacity has been grossly over-estimated.

This demonstrates that the site allocations strategy adopted by the Council needs to be fundamentally reviewed and revised.

This conclusion is further exacerbated when considering the Council has chosen to ignore other more accessible and sustainable sites in lower tier settlements, including Redington Capital Limited and CALA Homes' site (Land South of Chiswell Green Lane), which:

- Benefits from high levels of accessibility by public transport and to local services (as demonstrated in Section 7 below);
- Has less harm to the purposes of the Green Belt (as demonstrated in Section 1 above);
- Is available and deliverable at a density of development that has previously been supported by the Council's planning officers when recommending approval of application ref: 5/2022/0927 (as demonstrated in Section 7 below);
- Is supported by the Inspector when determining Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024; and
- Upheld by the SOS's decision.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council:

- Should be more realistic about its choice of housing sites to deliver its critical housing needs. Some of the current set of site allocations appear to have been included / inflated to "make up the numbers." We therefore strongly recommend that the site allocations are reviewed again and the Council should:
- Remove any sites that are undeliverable;
- Reduce the expected capacity of sites that are obviously constrained and will not therefore delivery the density suggested; and
- Provide evidence to justify all site inclusions and their estimate capacity.
- Include new broad location housing sites that:

- Are located in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and services or will not be used by the district's residents;
- Result in less harm to the purposes of the Green Belt; and
- Are available and deliverable.

Redington Capital Limited and CALA Homes recommends that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing and education land allocation in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

**248 - Historic England**

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 28

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**M6 - South of Harpenden Lane, Redbourn, AL3 7RQ**

The site is adjacent to the Redbourn Conservation which includes a high concentration of listed buildings. Development of M6 therefore has the potential to impact the Conservation Area and its listed buildings through a change in their settings.

We therefore welcome the preparation of the high level HA by Place Services. Criterion 7 references the Conservation Area which is welcomed.

However, the policy should be more specific and draw on the recommendations from the HA including setting back development from Harding Close and Water End Lane, concentrating development to the north of the site and/or south of the site. Development should respond positively to local character and distinctiveness.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The policy should be more specific and draw on the recommendations from the HA including setting back development from Harding Close and Water End Lane, concentrating development to the north of the site and/or south of the site. Development should respond positively to local character and distinctiveness.

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend a slight change to policy wording throughout the Plan which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend *'conserve and where appropriate enhance the significance of the...[list assets]'*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 258 - Ms Alison Evans

Submission Number: 258 Submission Date: 08/11/24 01:37

Respondent: Company/Organisation: Name: Ms Alison Evans

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

i don't know the precise legal requirements so I cannot say whether it is legally compliant. I don't consider it sound, however, as it appears the council has not taken any notice of the comments submitted by its electorate in relation to the last draft. According to the objectives, sustainable use of land and protecting the green belt are your top two priorities, even ahead of housing, but the proposed redrawing of green belt boundaries shows that this has not been implemented. it simply is not sustainable to concrete over the green belt. and even if you do go ahead and redraw the boundaries (which would be reckless) it will not make those sites suitable for building on.

many of the sites you have indicated will be developed have got notes against them showing they contain protected species (eg M3), gas pipelines (M3), protected trees (m7), are atop the aquifer (B7) are at risk of flooding (M6) are on an SSSI (m15) ETC, ETC. these sites need to be protected and to do otherwise is not sustainable: it will not result in St Albans being a great place to live and work, quite the contrary. Some of the proposed development sites are on car parks which will only make the parking situation worse than it already is.

if you were serious about strategic policy 10, you would not be proposing to release plot M3 from the green belt. at the very least you would have excluded the bit north of the public footpath which includes the grass land and the orchids. I fundamentally disagree with the current proposal

overall I don't think this plan is in the best interests of the people of st albans as it is not justified as defined in the introduction to the revised draft plan

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. *Refer to Attached submission letter for whole response and figures.*

**Site M6 South of Harpenden Lane, Redbourn**

13.1 Policy LG4 includes site M6 - South of Harpenden Lane, Redbourn as a Medium Site in Part B of the Draft Local Plan. It indicates 68 dwellings. RPC has several concerns regarding this site which we set out below.

*Figure 13.1: Extract of allocation policy M6, Part B Draft Local Plan.*

13.2 A key concern is the fact that half of the site is located within Flood Zone 3 and 2. RPC has reviewed the published Level 2 Strategic Flood Risk Assessment and the Site Selection Proforma Sheet, and we are concerned to confirm that approximately half of the site is within flood zones 2 and 3a and 3b, which is a considerable amount of allocated land at risk of flooding. Furthermore, over 40% of the site is at risk of surface water flooding and there are areas of the site that suffer from groundwater flooding too.

13.3 Importantly, flood risk zones 2 and 3 run through the site, from its north boundary to the south boundary, cutting the site into two narrow parcels of land at each side, which would be within flood risk zone 1. RPC is concerned that the Council has not given enough consideration to floor risk and its spatial distribution within the site in the consideration of the size of the proposed allocation nor in the quantum of development allocated for.

13.4 We are of the view that a 68 dwellings development in this location would have serious viability and deliverability issues. This is due the reduced space for development and the split of the site into two narrow sites for development, which would jeopardise the number of homes delivered as well as layout and building design. Has the Council considered the potential capacity of this site considering other development plan policies? Is there sufficient and adequate space for a development to comply with other Draft Local Plan and made Redbourn NDP policies?

13.5 Shallow groundwater means that Sustainable Drainage Systems (SuDS) based on water infiltration and attenuation are unlikely feasible where groundwater is close to surface. This would have implications in the design of layout, open space and drainage solutions for the site, which take a significant amount of land and considering the very limited area safe from flooding, there would be even less space available for actual development (homes).

*Figure 13.3: EA Flood Map for Planning (Surface Water)*

13.6 We have reviewed the Council's Site Selection Proforma (M-016) and have concerns with the lack of an evidence-based and unbiased qualitative assessment of the site.

- Much of the site is affected by flood risk, reducing developable areas and reducing the opportunities for effective and efficient layout and building design, including the feasibility of SuDS.
- This site is heavily constrained by the large proportion of land at risk of flooding that bisects the site, but also by the A5183 Road along the eastern boundary, which impedes developing the site with homes immediately up to the eastern boundary. Some distance and noise mitigation feature may be required in order to provide a safe and healthy environment to future residents.
- Additionally, the Site Selection Proforma Sheet confirms that the site contains deciduous woodland (priority habitat) in the south, east and north, along with a woodland TPO and an area TPO in the south. Clearly, these woodland and trees would have implications in the development management stage of the development, as any development would have to comply with statutory biodiversity net gain (BNG), and these areas, being priority habitat, would score high in any BNG assessment.
- The site scores strongly on Green Infrastructure Corridors. This may be as the site is not part of any specific Green Infrastructure Corridor designation, but the site forms part of the Green Infrastructure network. A simple assessment of the habitats within the site (deciduous woodland and grass), the River Ver and its riparian habitats would be enough as to understand that the site forms part of a wider Green Infrastructure network along the river, expanding to the north and south of the site, following the river. We consider that the site should score weakly on Green Infrastructure for the reasons above.
- The proforma also states that part of the site is contaminated, and given current national and local policies, assessment of the contamination and any necessary decontamination would be required prior to developing the site for residential use.
- Noise is missing in the assessment.

13.7 These environmental constraints are not given sufficient weight in the proforma assessment, as they are merely outlined, but the Council is failing to explain how a 68 dwellings development could take place within the site with the heavy constraints that is subject to. Therefore, RPC considers that the site should not be recommended to progress any further unless and until the above issues are addressed.

13.8 The Draft Local Plan - Part B (Local Plan Sites) sets out 10 Key Development Requirements. We make the following comments in response to this which does not in any way mean that the Parish Council is supportive of this proposed allocation as currently proposed:

- Safe access for all modes of transport should be required in the allocation policy, and this should include that it should be provided as well in the context of an exceptional flooding scenario.
- The wording of the policy and the requirement about the existing trees is not strong enough and it should be strengthened to ensure that existing trees are retained and are part of the design process.
- The proposed wording should strongly refer to a direct link to the Nickey Lane as a requirement prior the development takes place and to design this access so it is accessible for all users.
- The wording of the conservation area requirement is not effective. This requirement should aim for development, thought layout, building and public realm design, to conserve and enhance the significance of heritage assets and their setting, not to minimise harm. IT should not only refer to layout design, but to public realm and building design too.
- The reference to the River Ver is insufficient, and this policy should require integration of the River Ver into the design of the scheme, making the river publicly accessible and part of the landscape strategy for the site and its public realm.

13.9 RPC objects to the proposed allocation site M6 (Land South of Harpenden Lane), as the allocation has not been informed by unbiased and sufficient evidence, the assessment of evidence carried out by the Council is clearly insufficient. This policy is unsound due to it being ineffective and its wording is ambiguous, it is not justified and based on proportionate evidence and it is inconsistent with national policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

## M7 - Townsend Lane, Harpenden, AL5 2RH

### 10 - Will Treasure

Submission Number: 10 Submission Date: 27/09/24 09:00

Respondent: Company/Organisation: Name: Will Treasure

Comment Number: 3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I am concerned at two things, particularly in relation to the planned sites B2 (North East Harpenden), B7 (North West Harpenden) and M7 (Townsend Lane Harpenden)

1. The use of greenbelt land
2. The impact on traffic

1.Each of these sites is greenbelt land, and is used for farming, walking and is a green edge for Harpenden, a place where locals can easily walk to. Creating mass housing here will severely impact the locality. These houses should not be built on greenbelt land.

2. The A1081 from both North and South is severely congested into Harpenden now from 7am – 9.15am and from 3pm – 7pm. The additional traffic these housing developments will bring will make the congestion much worse. There are no safe routes for cyclists and there are minimal plans to improve this. I think the local plan has not taken into account the traffic impact of this new housing.

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Dear Sirs

I refer to the Revised Local Plan and the proposed use of Townsend Lane ,Harpenden AL52RH for Housing 65 units .( indicative )- exhibit M7

We object to the proposal to include the Townsend Lane Plot M7 in the Local Plan for housing development ,on the following grounds .

1- The adjacent development of Hartwell Gardens is of similar area to that now proposed (1.88 hectares ).Hartwell Gardens has 26 properties and the proposed development 65 properties ,an increase of 150%.This would ,if your proposal were accepted ,result in a development that is not in keeping with its neighbour and other properties in the area ,including Townsend Lane, and Claygate Avenue.

2-Traffic on Townsend Lane has to negotiate the dangerous right angled turn at the top of the Lane .This development will result in a significant increase in traffic during building and after completion and will result in more accidents .

3 -Local schools and other facilities can hardly cope with existing local population yet alone another 100-200 people .

4 .The noise and nuisance to existing local residents during construction .

5 The new development is being built on the Green belt which should be preserved.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 76 - Mr Michael Davis

Submission Number: 76 Submission Date: 05/11/24 23:29

Respondent: Company/Organisation: Name: Mr Michael Davis

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

NPPF says “Where it has been concluded that it is necessary to release Green Belt land for development, plans should give first consideration to land which has been previously-developed and/or is well-served by public transport”. The M7 site has neither. The Arup Green Belt report assesses and recommends potential sites but without consideration of public transport connections. This methodology results in site recommendations with poor public transport connectivity (e.g M7 - Townsend lane, 13+ mins walk to regular bus, 24+ mins walk to train) where there are other sites with better public transport connectivity that score identically against the NPPF green belt purposes are not recommended for future consideration. This fails to meet the NPPF requirements and creates new car dependent communities in contradiction to the SP 2d in the local plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Either the plan should commit to serving sites such as M7 with public transport (e.g regular bus service, < 10 min walk) or include public transportation in the weighting used to evaluate suitability of green belt sites.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**77 - Mrs Rachel Davis**

Submission Number: 77 Submission Date: 05/11/24 23:56

Respondent: Company/Organisation: Name: Mrs Rachel Davis

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

NPPF calls for a “minimum density standards for city and town centres and other locations that are well served by public transport”. Given the M7 site is not a town centre location nor well served by public transport (13+ mins walk to regular bus, 24+ mins walk to train) and access is along “single track Townsend Lane” a lower density should be applied for this site per NPPF 129 b “It may be appropriate to set out a range of densities that reflect the accessibility and potential of different areas”.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

SADC should provide a detailed analysis of the suitability of local roads (Townsend Lane, Claygate Ave, Alders End Lane) for this number of units, in particular during the periods where these roads are used for both Roundwood Park and Roundwood Primary School runs. The evidence provided would appear to be limited to high level, focused on large sites and major junctions.

Either the plan should commit to serving medium, dense sites with public transport (e.g regular bus service, < 10 min walk) or transfer units to alternative sites that can be well served by public transport.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

## 116 - MR Alan Bostock

Submission Number: 116 Submission Date: 07/11/24 06:51

Respondent: Company/Organisation: Name: MR Alan Bostock

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Arup Green Belt report, which the local plan commissioned and references, not only fails to recognise the impact on open countryside but is also flawed in that insufficient study was conducted and out-of-date data relied upon.

A clear example is that the Arup Green Belt report describes M7 - Townsend Lane, Harpenden, AL5 2RW as “Its small scale and enclosed nature also prevents longer views and connections to the wider countryside.” However previous studies, for example the Strategic Housing Land Availability Assessment 2009 finds that “the site is highly visible from the open countryside to the South and South-west. Development of the site would therefore result in unacceptable visual impact on the openness and character of of adjoining countryside”

The Arup Green Belt report is clearly at odds with the Strategic Housing Land Availability Assessment and shows that the report is deficient and inaccurate .

The NPPF states that where it has been concluded that it is necessary to release Green Belt land for development, plans should first give consideration to land which has been previously developed and/or is well served by public transport. I have resided overlooking this site for over 40 years and attest that no part of it has ever been developed, neither is there any public transport nearby.

The nearest bus-stop is described as a 13 minutes walk away and the railway station 24 minutes away. These walking times are by a fit and healthy individual and undoubtedly in clement weather conditions. Townsend lane is a single track lane which is not gritted by the council and during the winter is sometimes impassable due to snow and dangerous due to black ice. These conditions have not been considered and is proof positive that this site is not 'well served' by public transport and it would be unethical to consider or claim that it is.

Furthermore it would be wrong to rely on the bus service and bus-stop available outside Roundwood school. This bus runs twice a day, once bringing the pupils to school at the start of the day and the other taking them home at the end of the school day. This bus does not run other than on school days so if there was a claim this bus-route should be considered to attempt to show that this site is 'well served' by public transport it would be very wrong.

I am concerned that the density (dwellings per hectare) that is intended for this site is too dense having consideration of the restricted access to public transport and that all of the roads that give access to the nearest bus stops are all single track. M7 site is not a ‘Town Centre’ location so demands to be well served by public transport.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

If St Albans Local Plan wants to show that this site is 'well served' by public transport it needs to commission a proper analysis of Townsend lane, Claygate Avenue, Alders End Lane and Moreton End Lane that it has thus far failed to do. There should be transparency in the analysis that recognises that school buses are not suitable for commuters. It must be recognised that the lack of public transport will exacerbate the already dangerous travelling conditions for the school children using Roundwood Park and Roundwood Primary School because of decision of parents to have their children driven to these schools.
Townsend lane, Claygate Avenue, Alders End Lane and Moreton End Lane are all single track roads and are already impassable in the mornings. There are pinch points at the junction with the A1081 particularly with Moreton End Lane which causes appalling travelling conditions. The lack of public transport will only add to this and increase the dangers to school children and commuters.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

I want to ensure that the important factors that I have made clear are properly considered against the NPPF guidance and not dismissed by referencing out-of-date or deficient reports.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 200 - Lawes Agricultural Trust

Submission Number: 200 Submission Date: 07/11/24 16:49

Respondent: Company/Organisation: Montagu Evans Name: Mr Amran Nagra

On Behalf Of Company/Organisation: Lawes Agricultural Trust Name:

Comment Number: 17

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Lawes Agricultural Trust supports the release of land from the Green Belt under Allocation OS4 and is pleased to see the land uses updated from the former release for market housing which would not have been delivered on a research campus.

The Lawes Agricultural Trust fully supports the proposed allocations OS3 and OS4 as part of the research campus, and the inclusion will be important for the long-term development of the research campus .

However, we would recommend that the entire site boundary shown in the HELAA map, along with the additional release, be identified for the development of the Rothamsted Campus. This would facilitate a clear and effective application of the other policies in the plan. For reference, a plan illustrating this area is included with these representations. This would be a reasonable alternative approach for land here, supporting the effectiveness of the policies in the plan which support the future of Rothamsted Research.

The Trust also supports the allocation of site M7, Land at Townsend Lane, with this being a logical green belt release and delivery for housing.

**258 - Ms Alison Evans**

Submission Number: 258 Submission Date: 08/11/24 01:37
Respondent: Company/Organisation: Name: Ms Alison Evans

Comment Number: 7

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

i don't know the precise legal requirements so I cannot say whether it is legally compliant. I don't consider it sound, however, as it appears the council has not taken any notice of the comments submitted by its electorate in relation to the last draft. According to the objectives, sustainable use of land and protecting the green belt are your top two priorities, even ahead of housing, but the proposed redrawing of green belt boundaries shows that this has not been implemented. it simply is not sustainable to concrete over the green belt. and even if you do go ahead and redraw the boundaries (which would be reckless) it will not make those sites suitable for building on. many of the sites you have indicated will be developed have got notes against them showing they contain protected species (eg M3), gas pipelines (M3), protected trees (m7), are atop the aquifer (B7) are at risk of flooding (M6) are on an SSSI (m15) ETC, ETC. these sites need to be protected

and to do otherwise is not sustainable: it will not result in St Albans being a great place to live and work, quite the contrary. Some of the proposed development sites are on car parks which will only make the parking situation worse than it already is.

if you were serious about strategic policy 10, you would not be proposing to release plot M3 from the green belt. at the very least you would have excluded the bit north of the public footpath which includes the grass land and the orchids. I fundamentally disagree with the current proposal

overall I don't think this plan is in the best interests of the people of st albans as it is not justified as defined in the introduction to the revised draft plan

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. **350 - Hill Residential**

Submission Number: 350 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: tor&co Name: Sophia Goodhead

On Behalf Of Company/Organisation: Hill Residential Name:

Comment Number: 1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Introduction**

Tor&co has been appointed by Hill Residential Ltd (Hill) to respond to the Regulation 19 consultation with respect to the St Albans City and District Council (SADC) Draft Local Plan 2041 document (DLP). The DLP consultation seeks to establish views on the draft development strategy for the District to 2041, including strategic policies and broad locations for strategic housing, employment and infrastructure, as well as development management policies and site allocations. Following this consultation, SADC intend to submit the DLP to the Planning Inspectorate for examination in December 2024.

Hill is actively promoting land at Townsend Lane, Harpenden (the Site), as selected partner of the landowner Lawes Agricultural Trust (the Trust) for a sustainable and deliverable residential allocation within the emerging SADC Local Plan (a site location plan is included at Figure 1). The Regulation 19 DLP retains the draft residential allocation of the Site (referenced under M7) which is strongly supported by Hill. Harpenden is one of the district's largest settlements and we agree with the Council that the site is a suitable and sustainable opportunity for future residential development. It is directly adjacent to the existing settlement boundary, in close proximity to public transport connections and local services, unconstrained and lacking technical obstacles to delivery and is available for development now (subject to Green Belt release).

Detailed submissions promoting the Site have been made to SADC at each consultation stage to date, including the Call for Sites (2021) and latest Regulation 18 consultation (2023), and Hill now fully supports the Council in progressing with the draft allocation of the Site. These representations should be read in conjunction with those already submitted.

Hill supports the case that exceptional circumstances exist to review the Green Belt, to meet housing need and to promote sustainable patterns of development (NPPF 147). Specifically, the amendments to the Green Belt at Townsend Lane Harpenden and the proposed allocation of the Site is strongly supported. The Site offers the opportunity to secure sustainable plan-led development in accordance with the overarching spatial strategy, and to deliver much needed housing early in the plan period to help provide resilience for the borough in terms of its housing land supply position.

It is confirmed that all of the land set out within the red line at Figure 1 is held by Hill under an option agreement with the Trust. The Trust is a registered charity that aids the advancement of agricultural science by providing support for Rothamsted Research (Rothamsted), the oldest agricultural research station in the World, which is located in Harpenden. The Trust owns the land and buildings at Rothamsted, provides annual research grants and makes capital grants to help complete and to modernise the facilities. The land at Townsend Lane lies on the periphery of the Rothamsted Estate and has been identified as surplus to its requirements.

As a local stakeholder and employer firmly committed to the area, the Trust wish to contribute positively to the local community, as well as securing the longer-term future of research at Rothamsted. Rothamsted are one of the District's major employers, directly employing over 300 people and supporting c.70 students. The Trust's tenants and occupiers on the Rothamsted campus include not only Rothamsted Research, but also a further 35 commercial tenants which between them employ c.330 people on campus in Harpenden. As such the Trust's Rothamsted campus makes a significant contribution to the local and national economy, and the Trust is in the process of planning upgrades to the campus which would further enhance this impact.

Hill is an established, well respected housebuilder who has been selected as the Trust's delivery partner for the Site. As with all of its proposals for new homes, Hill is keen to engage with local representatives and residents before drawing up detailed proposals for the Site. Hill delivers around 2,500 new homes each year and has a proven track record of delivery of high quality and award-winning homes that enhance and complement their surroundings.

The current National Planning Policy Framework (NPPF) includes a policy requirement to apply a standard method as an advisory starting point for calculating Local Housing Need (LHN), unless exceptional circumstances justify an alternative approach. Notwithstanding that this advisory

position may change under the revisions proposed earlier this year to the NPPF, we agree with SADC that an alternative approach should not be followed and consider that the LHN should be the minimum housing requirement in the plan. The NPPF also requires that LHN is met through the application of the presumption in favour of sustainable development, which in plan making does allow for the review of Green Belt boundaries to meet need and promote sustainable patterns of growth. Hill fully supports SADC's approach in both respects.

With regard to the above mentioned draft changes to the NPPF, it is highly relevant that the new Labour government announced that planning reform is key to delivering economic growth objectives and with bold promises to deal with a chronic housing shortfall, the government set out its solution to the current crisis and published proposed changes to the NPPF. The consultation on the proposed changes recently ended on 24 September 2024 and it is anticipated that the revised NPPF will be published by the end of the year. There is no mention of this or the government's direction of travel within the DLP.

In this context, it is important to highlight the potential significant increase in LHN for SADC as a result of the new standard method published alongside the recent consultation draft of the NPPF. The anticipated new standard method and the resulting uplift have not been considered or addressed in the DLP. Instead, SADC is accelerating submission of the DLP for examination (anticipated in December 2024), to avoid being considered against the new NPPF policies and the revised standard method.

Given the LHN under the revised method is only expected to increase, Hill does not see any implications on the current draft site allocations on the basis there will still be significant housing need that the Council will be required to meet. The Site will continue to make a valuable contribution to meeting need irrespective of the timing of the DLP. Indeed, the Council will arguably be under even more pressure to review greenfield sites in the Green Belt under the figures resulting from the new NPPF, and the policy changes in the framework provide support for this. Hill is, however, concerned that this accelerated approach raises the risk of the DLP being found unsound and having to withdraw from examination, which would not be reflective of a positive local plan process and would lead to an avoidable delay that could be mitigated by work undertaken now.

Notwithstanding the above concern, it is also notable that the Council is an automatic presumption authority under the Housing Delivery Test, and thus the release of a sufficient number of deliverable sites, including to provide flexibility in the plan, is essential to reverse the track record of historic under delivery. Further, it is vital that the Council actively engages with its partners through the duty to co-operate, to consider whether any unmet need from neighbouring authorities can be accommodated within the District, where practical, in order for the plan to be sound and in accordance with NPPF paragraph 35.

In essence, Hill considers that the land at Townsend Lane is in a suitable and sustainable location for housing, well placed to help meet the District's housing need (including the affordable need), under both the current and emerging standard methods. Through the delivery of new homes across a range of size, type and tenure, the Site will offer increased choice and availability of accommodation within the local area. The Site is linked to the existing urban area and within easy access of facilities within Harpenden. Its development would increase the local population through the delivery of new homes, supporting the local economy and vitality of the town centre.

Subject to confirmation of the Green Belt release and allocation, the M7 site would meet the definition of deliverable in the NPPF.

This document is accompanied by a number of appendices, further demonstrating the opportunities presented by the Site and its capacity, which should be read alongside this report. The series of technical reports already undertaken and submitted to the previous Call for Sites and Regulation 18 consultation are not included again here. However, the findings have been reviewed at this

stage and still hold good. If necessary, these can be updated during the course of 2024/2025. Further, the technical work progressed since the last consultation continues to demonstrate that there are no fundamental constraints to delivery of housing on the Site.

For ease of reference, this representation responds to SADC's consultation on the draft policies in the order that they appear in the plan for ease of reference, as well as providing greater detail on the suitability, achievability and deliverability of the draft allocation of the Site.

The comments provided are based on the Draft Local Plan 2041 Regulation 19 document, and the 'tests of soundness' prescribed in NPPF paragraph 35. Specifically, the representation responds to the allocation policy (ref M7 as set out in Figure 1 appended to this response) in Section 2.0 and the following matters in Section 3.0:

- Strategic Policy SP1: A Spatial Strategy for St Albans District
- Strategic Policy SP2: Responding to the Climate Emergency
- Policy CE1: Promoting Sustainable Design, Construction and Building Efficiency
- Policy CE2: Renewable and Low Carbon Energy
- Strategic Policy SP3: Land and the Green Belt
- Policy LG4: Large, Medium and Small Sites
- Policy LG6: Green Belt Compensatory Improvements
- Policy HOU1: Housing Mix
- Policy HOU2: Affordable Housing
- Policy HOU4: Accessible and Adaptable Housing
- Policy HOU5: Self-Build and Custom Housebuilding
- Strategic Policy SP5: Employment and the Local Economy
- Policy EMP1: Protected Employment Areas
- Policy TRA4: Parking
- Policy UIN1: Broadband
- Policy NEB6 Biodiversity and Biodiversity Net Gain
- Policy NEB7 Biodiversity Provision in the Design of New Buildings and Open Spaces
- Policy NEB12: Green Space Standards and New Green Space Provision
- Policy DES5: Residential Amenity Standards
- Policy DES7: Servicing of Development

**Land at Townsend Lane, Harpenden (site allocation M7)**

Land at Townsend Lane is proposed as a medium site for the allocation of c. 65 homes as set out in Figure 1 under site reference M7.

Hill strongly supports the allocation of this land to deliver new homes in what is a suitable and sustainable location (adjacent to the Nickey Line and strategic walking and cycle routes) that is available now and therefore able to contribute towards the council's five-year housing land supply. Further, medium sites such as M7 have the potential to be quicker to assemble and built out than the Broad Locations. There are no technical constraints to delivering development on this site.

It is noted that only part of the Site (as opposed to most of the Site which the draft policy states and which should be amended / corrected), appears to lie within the Chilterns Beechwoods Special Area of Conservation (CBSAC) Zone of Influence (ZOI). Under Policy SP10, housing within the ZOI will require an appropriate contribution to be made towards the Strategic Access Management and Monitoring Strategy (SAMMS).

It states that development proposals will also need to make provision for a new Suitable Alternative Natural Greenspace (SANG), or alternatively contribute towards the maintenance of a suitable SANG project elsewhere. Whilst Hill recognise the need to mitigate adverse impacts on such areas, the need to make such contributions must be considered as part of the site's overall viability to ensure it is not overly burdened or hindered from coming forward as a highly sustainable site.

The Site offers the opportunity to secure sustainable plan-led development, in accordance with the overarching spatial strategy, and to deliver much needed housing across the plan period to help provide resilience for the borough moving forward in terms of its housing land supply position.

Hill has undertaken extensive technical study work that demonstrates the Site's suitability for new homes. This is set out in the Call for Sites 2021 and Regulation 18 response and is not repeated here. However, Hill has progressed updates for some of the technical information previously provided, including for the Land at Townsend Lane Promotional Document and Landscape and Visual Appraisal, which is set out below. These continue to demonstrate that there are no site-specific constraints that would prevent development of the site. This is supported by the enclosed figures (2-6) and attached appendices (1-2).

**Landscape and visual considerations**

A review of the previously submitted Landscape and Visual Appraisal (LVA) and how the site interacts with the adjoining townscape and landscape has been undertaken and is submitted alongside this document (see Appendix 2), as an update to the LVA submitted as part of the Regulation 18 consultation. Overall, the landscape and visual baseline has not significantly altered in the intervening period and the assessments conclusions remain entirely unchanged.

The appraisal concludes that the site is particularly well contained and shares very limited inter-visibility with the surrounding landscape. With the effective mitigation proposed and set out in the report, the development will be almost entirely screened from the wider landscape. There is therefore no overriding landscape or visual effect that would preclude the development of the site as proposed and, in the longer term, there is the potential for some valuable landscape benefits in the form of a better defined settlement boundary and softer settlement edge adjacent to the site.

As the site is closely associated with built development, sitting within the perceived settlement boundary and further contained by an enhanced boundary, the perceived effect on sprawl is negligible. Further, the existing site and adjacent agricultural land does not currently function as an open gap and so development on site would not contribute to coalescence. The existing plateau forms a natural boundary to development, the settlement itself sitting on the valley sides and at lower elevations to the east. The site is therefore located on the gentle valley sides, is not located on the plateau and so preserves the existing settlement pattern.

**Green Belt**

The current NPPF (paragraph 142) states *"the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence."* Paragraph 143 goes on to identify the five purposes of the green belt as follows:

1. To check unrestricted sprawl of large built-up areas
2. To prevent neighbouring towns merging into one another
3. To assist in safeguarding the countryside from encroachment
4. To preserve the setting and special character of historic towns
5. To assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

A new Green Belt Review (2023) has been undertaken to support the emerging Local Plan. This seeks to address issues raised by the Inspector during the previous Local Plan, by providing a more granular approach to identifying potential sub-areas to assess within the Green Belt. The study recommends a number of sub-areas for further consideration where if removed from the Green Belt, would be unlikely to result in harm to the wider Green Belt.

It is noted that the land at Townsend Lane (M7), referred to as SA-16 within the Green Belt Review (2023), is set out as performing strongly for purpose 1, weakly for purpose 2, strongly for purpose 3 and no contribution for purpose 4. However, it's contribution to the wider strategic Green Belt is classed as "*less important*", concluding that "*It's removal is unlikely to alter the performance of the*

*wider Green Belt as it is already enclosed by built form on three sides so could constitute infill development. Its small scale and enclosed nature also prevents longer views and connections to the wider countryside*." Overall, SA-16 was recommended for further consideration in isolation (now as RA-13), on the basis its removal is unlikely to alter the performance of the wider Green Belt.

Hill agree with the conclusion of the Green Belt Review that site SA-16 does not affect the performance of the wider Green Belt. However, the Green Belt Review's sub-area assessment for site SA-16, specifically against purposes 1 and 3, is still disputed. Hill consider that its own assessment of the Site against the Green Belt purposes, as set out within the report submitted for the Call for Sites 2021 consultation, remains unchanged and should be read in conjunction with this representation. This concludes that the Site assessed on its own merits makes limited or no contribution towards the purposes of checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.

Hill consider that any limited localised harm can be mitigated through the creation of a high-quality new settlement edge, framed by green infrastructure and new boundary planting that can successfully assimilate the development with the surrounding countryside.

Figures 5 and 6 pictorially demonstrate that:

- Placing new homes on this site will not result in a reduction in the distance between Harpenden and Redbourn, or between Harpenden and any other settlements. The outer edge of the current built-up area of Harpenden in the immediate vicinity of the site is aligned with the south western edge of the site
- There are clear defensible boundaries to the edges of the site, which would form the Green Belt boundary in this location, contiguous with the urban edge to the east
- The site is well contained with very limited views from the countryside, due to its topography and landscape features
- The site is surrounded by urban development to the north west, south and east
- The historic core of Harpenden and its conservation area are not visible from the site or countryside in this location. New homes will be of high quality design and complement the existing character of the area.

Along with the conclusions of the latest Green Belt Review, the above points demonstrate that the site in question does not contribute towards the wider performance of the Green Belt, therefore its proposed release and allocation for residential development is justified.

**Site availability**

The Trust is the sole owner of the 1.91 hectare Site. All land required to access the site is within the control of the landowner or is in the public highway. As such it can be confirmed that the site is immediately available for development. Hill is a high-quality and well respected house builder who has been selected as the Trust's delivery partner on this site. As with all its proposals for new homes, Hill is keen to engage with local representatives and residents before drawing up detailed proposals for the Site. Hill delivers around 2,500 new homes each year and has a proven track record of delivery.

**Achievability and delivery**

Given what is known of the Site, it is not expected that there would be a need for any significant enabling or infrastructure works. Therefore, assuming Local Plan adoption by March 2026, the first homes could be built and available for occupation by Q1 2028, contributing to local housing needs early in the plan period. An indicative site layout is being prepared and will be submitted in due course to show how a development of up to 65 homes, in line with the draft allocation and requirement to make effective use of land, could be accommodated on the site.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

Submission Number: 359 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Natural England Name: Betsy Brown

Comment Number: 23

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Site allocations**

We have the following comments to make on site allocations, in addition to those we made in our Regulation 18 submission, which have not been repeated in this letter.

*Site allocations requiring SANG*

For the site allocations that require SANG to mitigate recreational pressure impacts on Chilterns Beechwoods SAC, the site-specific policy should include a statement to the effect that Natural England must be consulted at the pre-application stage on the detailed design of the SANG, to ensure that the SANG meets NE's SANG guidelines (2021).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## M8 - Verulam Golf Club, St Albans, AL1 1JG

### 145 - Catesby Estates

Submission Number: 145 Submission Date: 07/11/24 11:13

Respondent: Company/Organisation: Stantec Name: Mr P Derry

On Behalf Of Company/Organisation: Catesby Estates Name:

Comment Number: 26

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The site is well-treed and therefore there are concerns regarding habitat loss and the ability to achieve biodiversity net gain. The site is separated from built form by the existing industrial scheme to the northwest of the site. This will prevent connections being made and the inability to assimilate with existing built form. There are also clear heritage implications from the scheme.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 333100253 A5 PD 241107 Draft Reg 19 Reps Final Reduced_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to address the key matters made in the representations

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

---

**193 - Catesby Estates PLC**

Submission Number: 193 Submission Date: 07/11/24 15:55

Respondent: Company/Organisation: LDA Design Name: Mr Matthew Gibson-King

On Behalf Of Company/Organisation: Catesby Estates PLC Name:

Comment Number: 24

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In summary, there are a number of draft allocations which raise concerns on consistency:

The site is well-treed and therefore there are concerns regarding habitat loss and the ability to achieve biodiversity net gain. The site is separated from built form by the existing industrial scheme to the northwest of the site. This will prevent connections being made and the inability to assimilate with existing built form. There are also clear heritage implications from the scheme.

We have to conclude that not only does the Regulation 19 Plan fail to allocate sufficient sites for housing, or enough in the early stages of the Plan Period, but that Windridge Farm is a stronger contender than some sites the Plan does propose as allocations, even on the Council's terms.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

3. SW Herts JSP_Windridge Farm_Additional Information_[R].pdf
4. SW Herts JSP_Windridge Farm_Vision Document_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**248 - Historic England**

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 29

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**M8 - Verulam Golf Club, St Albans, AL1 1JG**

The site is adjacent to the St Albans Conservation Area. We recommend that an HIA is prepared to confirm its suitability.

We welcome the preparation of a high level HA by SADC. Criterion 6 references the Conservation Area which is welcomed.

However, the HA also makes recommendations in relation to the scheduled monument at Sopwell Nunnery, both in relation to further assessment needed and also potential for contributions towards monument management. This should be included in the policy.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The HA also makes recommendations in relation to the scheduled monument at Sopwell Nunnery, both in relation to further assessment needed and also potential for contributions towards monument management. This should be included in the policy.

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend a slight change to policy wording throughout the Plan which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend *'conserve and where appropriate enhance the significance of the...[list assets]'*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 287 - Hertfordshire County Council Minerals and Waste Planning Policy Team

Submission Number: 287 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council Name: Hertfordshire County Council Minerals and Waste Planning Policy Team

Comment Number: 13

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The proposed site allocation falls only partially within the Sand and Gravel Belt. BGS data also identifies potential superficial sand/gravel deposits beneath the south of the site.

This proposed site allocation has existing built development to the north-east and northwest. Due to the existing constraints, the council would therefore only encourage opportunistic extraction at this site.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Whilst **not a soundness matter**, the District Council may wish to add an objective to the 'key development requirements' for this allocation to include the following wording or similar:

*Undertake opportunistic extraction of any suitable sand and gravel deposits for use on-site wherever possible, where such deposits are uncovered during construction / excavation works.*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Verulam Golf Club

Photo montage from Sustainability Appraisal (SA) of the St Albans Local Plan SA Report September 2024 page 33 *[please see attached document]*.

By use of https://www.openstreetmap.org/ and of Google maps, there is undeveloped land on the northern side of Verulam golf club clubhouse. The photo montage with a south-facing view shows proposed housing on this land and with a redeveloped clubhouse.

Shown in white across the montage is the former London Road business park, currently under redevelopment to form a row of houses and apartments. In the foreground is Orient Close *[please see attached document]*. A train on the Midland Main Line is also in view, also a car on London Road.

This proposed development i.e. on the northern side of the existing clubhouse obstructs a rail link between St Albans Abbey and St Albans City stations, whereas the redevelopment of the former London Road business park is not thought to do so.

Our illustration earlier also available at https://hertsrail.org.uk can be magnified for details.

Site M8 - Verulam Golf Club, St Albans, AL1 1JG
Specific objection, also raised in September 2023. This would obstruct a rail link from St Albans Abbey to St Albans City by means of a semi-circular arc, as illustrated earlier in dark blue.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We are proposing an extension of the Abbey line to London Colney. Trains to and from Watford would change direction at St Albans Abbey station. From this station the line would pass beneath Cottonmill Lane making use of the trackbed of the former line from St Albans Abbey to Hatfield, then turning south before reaching Orient Close. It would then cross Verulam golf course to reach the vicinity of Napsbury Lane. From here the new line would continue southwards making use of the existing A414 bridge over the Midland Main Line which has spare capacity for an additional track.

It is possible that the clubhouse would be subject to redevelopment as planned however it would be preferable to identify a new location for a new clubhouse. In this case there would be no requirement to cross the railway line when walking between the clubhouse and the golf course.

If our proposed rail link between St Albans Abbey station and Colney Fields shopping park were to be planned and safeguarded, together with a connection on to the Midland Main Line to enable trains between St Albans Abbey and St Pancras, if our proposed rail link between St Albans Abbey and St Albans City stations were to be put on one side and if a new location for a new clubhouse were to be identified and made available, it is likely that the area of land available for redevelopment would expand, to include some of the golf course in front of the current clubhouse. This would seem to have the potential to be of financial benefit to Verulam Golf Club.

It is very much hoped that a suitable and pleasant new location for a new clubhouse can be identified and agreed. If so, the land take from the golf course, other than land in front of the current clubhouse, would be limited. It is anticipated that the existing bridge for Napsbury Lane crossing the Midland Main Line would be retained but that Napsbury Lane itself would be realigned to run closer to the railway line, thereby limiting the land take.

The golf course is in two parts bisected by Cottonmill Lane. The opportunity would be taken to improve the Cottonmill Lane crossing as used by golfers. Although railway lines are expensive, indeed too expensive, they do have potential to assist us in our response both to climate change and to population growth. The cooperation of all parties to identify and agree a suitable new location for a new clubhouse would be much appreciated and would also be of benefit to the community.

### 332 - Beechwood Homes Contracting and Verulam Golf Club

Submission Number: 332 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Ceres Property Name: James Firth

On Behalf Of Company/Organisation: C/O Ceres Property Name: Beechwood Homes Contracting and Verulam Golf Club

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The allocation at M8 Verulam Golf Club is strongly supported by my client. As detailed in our Regulation 18 representations and supporting vision document, this is a highly sustainable and deliverable allocation. Notwithstanding this, comments are provided on the detailed wording of the representation below.

[Please see image in attached form]

The key objectives and issues to address in bringing the site forward are identified in the plan as set out below. These issues as well as the proposed policy wording are considered further later in this representation and in the accompanying submission.

1. *Existing golf facilities must be retained or enhanced.*
2. *Contributions/ enhancements to support relevant scheme in the LCWIP and GTPs as indicated in the TIA.*
3. *Proposals must include support for improvements to the local Rights of Way network, including access to the public footpath adjacent to the south-west boundary and upgrading it to bridleway status to improve cycle access to the site.*

4. *Improvement to the A1081 access will be required, including support for enhancements for active modes (including access that avoids the roundabout, to both the Alban Way and the cycle path alongside London Road), in line with GTPs and LCWIP priorities.*
5. *Support for additional walking / cycling provision to the South-East of the site, towards Napsbury Lane, should be considered and explored as a significant opportunity to improve wider connectivity and enhance the Rights of Way network. This is currently a significant gap in the walking network and could not be included in the LCWIP despite local stakeholder comments and evidence of demand due to the lack of adequate footway along this route and lack of continuous right of way between London Colney and the Sopwell area.*
6. *The site lies adjacent to the St Albans Conservation Area and development should minimise any harm to, and where possible enhance, the setting and significance of this heritage asset.*
7. *Development proposals must take appropriate account of all trees protected by Tree Preservation Order.*

The supporting plan provided alongside allocation M8 sets out the area proposed to be covered by the allocation. This shows the site boundary in red and that the whole of this area will be removed from the green belt, which is fully supported by our client.

[Please see image in attached form]

The policy wording goes on to set out various 'key development requirements. Comments on these is provided below.

**Deliverability**

The site at Verulam Golf Club M8 is supported by a vision document as prepared as part of our Regulation 18 representations providing details of the technical assessment work previously undertaken and vision for the site

**Availability**

The availability of the Verulam Golf Club site strongly supports its suitability and deliverability, particularly as it involves a single landowner with an option agreement already in place. This streamlined ownership structure eliminates potential legal complexities, aligning well with the NPPF's emphasis on the timely delivery of housing. The absence of legal constraints enables the site to be readily deliverable in the short term, allowing development to proceed without delay.

According to the NPPF, deliverability is a key factor in assessing a site's suitability for development. By ensuring that sites are available now, with a realistic prospect of early delivery, local planning authorities can help meet housing needs efficiently. The established agreement with the landowner at Verulam Golf Club meets these criteria, making the site a reliable and accessible option for development, thus contributing to the NPPF's objective of maintaining a steady and responsive housing supply.

**Achievable**

The achievability of the site for development is reinforced by its operational context and existing land use. The proposal will have no impact on the functionality of the golf course, allowing current activities to continue unimpeded while integrating new development. This stability contributes to the site's overall viability and reduces the risk associated with transitioning to a development site.

Moreover, the policy objective to retain or enhance existing golf facilities is fully supported by this development. The site has the potential to complement and enhance the operation of the golf course. The commercial partnership between Beechwood Homes and the Verulam Golf Club will provide a capital receipt to the club, which can be utilised to maintain and improve the golf facilities for the benefit of members and the broader community.

Together, these factors demonstrate that the Verulam Golf Club site is not only available and suitable but also highly achievable, reinforcing its potential to contribute effectively to the local housing supply while supporting the continued operation and enhancement of the golf facilities

[Please see the attached appendices]

...

## 1 INTRODUCTION

**1.1** This representation is prepared on behalf of Beechwood Homes Contracting, (hereafter Beechwood Homes) and Verulam Golf Club with regards to the St Albans Draft Local Plan 2041 Regulation 19 Public Consultation (November 2024).

**1.2** Our client has land interests at Verulam Golf Club included at Allocation M8 in the Draft Local Plan. The site is unused land located adjoining the existing golf club facilities, London Road, and existing residential development. It does not form part of the golf course or golfing facilities currently available for public use.

**1.3** The site is indicated in the Draft Local Plan as a proposed housing allocation with an indicative capacity of 65 units. The allocation of the site is strongly supported by our client. This representation provides further detail on the form of development proposed as well as demonstrating that this remains appropriate and fully deliverable. Furthermore, the emerging proposals for the site demonstrate that there could be potential to provide a further uplift in unit number to provide approximately 80 homes.

**1.4** The site is located in a highly sustainable location close to St Albans City Centre. It is enclosed by existing built development to the west, north and east.

**1.5** While this representation supports the allocation of the Site for housing use, Land at Verulam Golf Club, St Albans, it raises some concerns in respect of the detailed policy wording and other proposed policies in the draft Plan and whether in fact they comply with the tests of soundness set out in paragraph 35 of the NPPF.

...

## 2 BACKGROUND & CONTEXT

### Planning Policy Context

**2.1** In preparing this representation, consideration has been had for Chapter 3 of the National Planning Policy Framework (NPPF) (2021) which relates to ‘plan-making’.

**2.2** Paragraph 15 of the NPPF promotes a plan-led system, and that succinct and up-to-date plans should provide a positive vision for the future of each area; a framework for addressing housing needs and other economic, social and environmental policies; and a platform for local people to shape their surroundings.

**2.3** Paragraph 16 states that plans should:

1. be prepared with the objective of contributing to the achievement of sustainable development;
2. be prepared positively, in a way that is aspirational but deliverable;
3. be shaped by early, proportionate and effective engagement between plan makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;
4. contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;
5. be accessible through the use of digital tools to assist public involvement and policy presentation; and
6. serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).

**2.4** As identified at paragraph 35, local plans are examined to assess whether they have been prepared in accordance with legal and procedural requirements, and whether they are 'sound'. The test for soundness as set out within the NPPF is as follows:

**2.5** Plans must be:

- Positively prepared
- Justified
- Effective
- Consistent with national policy

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

1. **Existing golf facilities must be retained or enhanced.**

The policy objective to retain or enhance existing golf facilities is supported. The development of the site has potential to complement as well as enhance the operation of the golf course. It is important the policy retains sufficient flexibility in this respect which it is considered the current wording achieves.

2. **Contributions / enhancements to support relevant schemes in the LCWIP and GTPs as indicated in the TIA.**

This part of the policy refers to contributions to Local Cycling and Walking Infrastructure Plan (LCWIP) and Growth and Transport Plans (GTPs). It also cross references to the Transport Impact Assessment (TIA).

As set out in the supporting note from iTransport (enclosed), submitted alongside this representation, whilst the site can potentially contribute towards such measures it is important the policy notes that any improvements or obligations will be required to meet the CIL regulations tests for planning obligations. In particularly they must be necessary to make the scheme acceptable and reasonable and proportionate in scale. Given the highly sustainable location of the site at M8, the proposals do not require significant infrastructure in order to come forward for development.

Policy SP8, indicates the need to prioritise forms of active and sustainable transport methods within new developments. This site is situated in a highly sustainable location, bolstered by its close proximity to public transport options. Furthermore, residents will have opportunities to walk or cycle to access essential services, thereby reducing dependence on private vehicles. This encourages active transportation and aligns with the objectives of Policy SP8.

Additionally, in regard to transport considerations for new developments, Policy TRA1 emphasises the importance of safe, accessible, and sustainable transport for new developments. The site is exceptionally well-suited to meet these requirements. It can accommodate safe access for walking, cycling, and vehicles, and ensures that highway safety and the transport network will not be adversely impacted.

Moreover, the site's proximity to existing transport links supports early and efficient integration with public transit, helping to reduce reliance on private vehicles. Active connections to key destinations can be readily established, promoting walking and cycling as primary modes of travel. This aligns well with TRA1's emphasis on sustainable transport and the need to provide safe, direct routes within the development and to surrounding areas.

The site is also well-positioned to facilitate additional measures such as electric vehicle charging, provisions for people with disabilities, and sustainable travel plans. These elements support the broader goals of the Local Transport Plan, including enhancements to the highway network, public transport, and active travel infrastructure.

The proposal's impact on local traffic is anticipated to be minimal, given the site's proximity to the town centre. This convenient location is expected to reduce the need for private vehicle use, aligning with sustainable transport goals. As previously outlined in the Reg 18 representation, the initial Transport Assessment findings suggest that even with a development scale of up to 85 homes, additional travel movements would be limited to approximately 30 in both the AM and PM peak periods. This equates to only a 2-3% increase over current traffic levels in the area.

For longer trips, traffic is likely to head southeast towards the wider road network, rather than toward the city centre or the Air Quality Management Area (AQMA). This directional flow further mitigates potential impacts on congestion and air quality, supporting the site's suitability and deliverability while meeting both local and NPPF policy objectives related to sustainable and resilient development.

3. **Proposals must include support for improvements to the local Rights of Way network, including providing access to the public footpath adjacent to the south-west boundary and upgrading it to bridleway status to improve cycle access to the site.**

The site already benefits from excellent access to the footway and cycleway network. Part 3 of the policy refers specifically to improvements to the public footpath adjacent to the south west boundary.

Although not specified in the policy , this is PROW 60 and the potential for improvement of this path has been considered in the supporting transport report prepared by iTransport and submitted with this representation.

The potential for improvement to the adjoining right of ways is supported in principle by our client, however we would highlight the need for any contributions or obligations sought to be in necessary and directly related to the proposed development in planning terms. In the context of the site and connectivity, it is considered this will primarily relate to the opportunity for links to be provided from the site to PRO60 and for improvements to the path where possible where it adjoins the site boundary. Where the path extends further to the south across the golf course, this area is located away the city centre and other trip destinations and is therefore likely to be lesser used. It is considered any obligations must therefore be appropriate in scale and targeted at those areas where most required.

Furthermore, the current wording of the policy in requiring an upgrade to bridleway status is overly prescriptive. Additionally, as based on its own statutory process it is important that sufficient flexibility is retained, particularly given that it appropriate cycle access could be provided by other means such as the provision of access to the front of the site.

As detailed in the iTransport report, the only distance of PROW 60 that the site would have direct impact on is a 60 metre length in the area of the site linking to the existing path network.

Criteria 3 of the policy should therefore be amended to state:

*"Proposals should include support for improvements to the local Rights of Way network where necessary in order to make the development acceptable, including providing access to the public footpath adjacent to the south-west boundary and upgrading or providing proportionate contributions to its upgrade as required."*

1. **Improvement to the A1081 access will be required, including support for enhancements for active modes (including access that avoids the roundabout, to both the Alban Way and the cycle path alongside London Road), in line with GTPs and LCWIP priorities.**

As detailed in the supporting report from iTransport submitted with this representation the site is highly sustainably located. There are potential measures that can be taken forward to further support and enhance the accessibility of the site. These must remain proportionate and in line with planning policy requirements and CIL regulations.

2. **Support for additional walking / cycling provision to the South-East of the site, towards Napsbury Lane, should be considered and explored as a significant opportunity to improve wider connectivity and enhance the Rights of Way network. This is currently a significant gap in the walking network and could not be included in the LCWIP despite local stakeholder comments and evidence of demand due to the lack of adequate footway along this route and ack of continuous right of way between London Colney and the Sopwell area.**

The proposal will not generate significant pedestrian and cyclist movements between the site and Napsbury Lane to the southeast as this is not the principal desire line for future residents (as detailed in the walking and cycling review). The expected walking and cycling trip generation (see iTransport note) will predominantly travel to the City Centre, public transport connections and the destinations detailed in the walking and cycling review.

There is therefore no requirement for off-site walking and cycling improvements to the south east of the site as they would not be compliant with the CIL regulation tests and those at paragraph 57 of the NPPF. In particular an obligation for the site at M8 Verulam Golf Club to contribution to works at Napsbury Lane would not be directly related to the development at M8, or fairly and reasonably related in scale and kind. The current policy wording is therefore unsound in this respect. This requirement (part 5) should be removed from the draft policy.

3. **The site lies adjacent to the St Albans Conservation Area and development should minimise any harm to, and where possible enhance, the setting and significance of this heritage must be taken into consideration.**

The site is located approximately 250 meters from the scheduled monument, Benedictine Priory of St. Mary (Sopwell Priory) and the nearby post-medieval mansions, Sopwell House or Lee Hall. Importantly, the proposed site does not directly adjoin these heritage assets; rather, the area is separated by the golf course and the River Ver, which create a natural buffer between the developments.

This separation is further enhanced by the presence of densely populated trees along the riverbanks and around the scheduled monument, which visually and physically distances the site from the heritage assets. Given this context, it is inappropriate to score the site negatively against heritage criteria, as the potential for adverse impacts on the significance of these designated assets is minimal.

Furthermore, supporting technical work will support the full application to ensure any potentially harmful impacts identified on the heritage assets will be mitigated.

In alignment with Strategic Policy SP11 and NPPF guidance, which emphasise the conservation and enhancement of heritage assets, the proposal demonstrates a respectful approach to development that recognises and preserves the integrity of the surrounding historic environment. This makes the Verulam Golf Club site not only suitable for development but also sensitive to its historical context, allowing for growth without compromising the value of nearby heritage sites.

Within part 6 of the policy the wording sets out considerations relevant to heritage. These issues have been fully considered as part of the emerging proposals, as previously detailed in the Regulation 18 representations and supporting vision document submit with the representations. Given the above, there is also no objection to the policy wording as presently proposed.

7. **Development proposals must take appropriate account of all trees protected by Tree Preservation Order.**

As noted in the revised Regulation 19 policy wording, parts of the site at M8 are subject to Tree Preservation Order (TPO) recently made by the Council. The proposed for the site seek to retain important trees and landscaping to the boundaries where possible. The site therefore remains fully deliverable.

Beechwood Homes would intend to continue to work closely with the Council planning and tree officers in developing the proposals for the site. Presently the TPO areas cover a large area which does not necessarily recognise individual trees or the lack of trees or low value of trees in much of the site. As part of developing the proposals in detail we would seek to agree the approach to trees including any removal and replacement works that may be required at any early stage.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Our client has land interests at Verulam Golf Club included at Allocation M8 in the Draft Local Plan. The site is unused land located adjoining the existing golf club facilities, London Road, and existing residential development. It does not form part of the golf course or golfing facilities currently available for public use.

The site is indicated in the Draft Local Plan as a proposed housing allocation with an indicative capacity of 65 units. The allocation of the site is strongly supported by our client. This representation provides further detail on the form of development proposed as well as demonstrating that this remains appropriate and fully deliverable. Furthermore, the emerging proposals for the site demonstrate that there could be potential to provide a further uplift in unit number to provide approximately 80 homes.

The site is located in a highly sustainable location close to St Albans City Centre. It is enclosed by existing built development to the west, north and east.

While this representation supports the allocation of the Site for housing use, Land at Verulam Golf Club, St Albans, it raises some concerns in respect of the detailed policy wording and other proposed policies in the draft Plan and whether in fact they comply with the tests of soundness set out in paragraph 35 of the NPPF.

## M9 - Amwell Top Field, Wheathampstead, AL4 8DZ

### 35 - Mrs Emma Hart

Submission Number: 35 Submission Date: 28/10/24 16:23

Respondent: Company/Organisation: Name: Mrs Emma Hart

Comment Number: 6

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

This site is not a sound choice. It has been recognised that access cannot be via Amwell Lane and therefore any access would have to come via encroachment on yet more green space. Furthermore this site fulfils an important Greenbelt function of stopping sprawl between settlements.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

### 145 - Catesby Estates

Submission Number: 145 Submission Date: 07/11/24 11:13

Respondent: Company/Organisation: Stantec Name: Mr P Derry

On Behalf Of Company/Organisation: Catesby Estates Name:

Comment Number: 27

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The site is a clear spur into the countryside. This is recognised within the Green Belt Review, where a '5' is scored for Purpose 3. Amwell Lane is very narrow and would require widening, in turn removing a significant hedgerow.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 333100253 A5 PD 241107 Draft Reg 19 Reps Final Reduced_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to address the key matters made in the representations

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

## 167 - Mr Richard Walker

Submission Number: 167 Submission Date: 07/11/24 13:52

Respondent: Company/Organisation: Lightwood Strategic Name: Mr Richard Walker

Comment Number: 8

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

This site is allocated for 60 homes. Clause 6 advises of a pipeline running through the site, and development proposals must appropriately take this into account.

We consider that the plan could try and enable this site, but should not rely on it in the trajectory on account of the pipeline.

A high-pressure gas pipe, operated by Cadent traverses the site east-west over 225 metres. The pipe is subject to Health and Safety Executive (HSE) consultation zones, with the inner red zone covering 90% of the site, and the middle zone covering 10% in the NE corner. The HSE will 'Advise Against' development in the inner and middle zone. The site promotor should evidence if and how the pipeline could be viably diverted, possiblyjust a few metres, the cost of this, and whether the consultation zones will be reduced if the material of the pipe is changed, and if so by how much. Another option might be 'capping', but for the site to be relied on during examination, this too would need an HSE assessment of the effect of capping on its consultation zones.

Notwithstanding the gas pipe, the allocation requires 3rd party land for access (either a property on High Ash Road or through the recreation ground car park). Further evidence of any access rights/access deal will be needed for examination.

**193 - Catesby Estates PLC**

Submission Number: 193 Submission Date: 07/11/24 15:55

Respondent: Company/Organisation: LDA Design Name: Mr Matthew Gibson-King

On Behalf Of Company/Organisation: Catesby Estates PLC Name:

Comment Number: 25

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In summary, there are a number of draft allocations which raise concerns on consistency:

The site is a clear spur into the countryside. This is recognised within the Green Belt Review, where a '5' is scored for Purpose 3. Amwell Lane is very narrow and would require widening, in turn removing a significant hedgerow.

We have to conclude that not only does the Regulation 19 Plan fail to allocate sufficient sites for housing, or enough in the early stages of the Plan Period, but that Windridge Farm is a stronger contender than some sites the Plan does propose as allocations, even on the Council's terms.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

4. SW Herts JSP_Windridge Farm_Vision Document_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**234 - Tanya Sanders**

Submission Number: 234 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Name: Tanya Sanders

Comment Number: 1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I am writing to you with regard to the proposed development of Site M9 Amwell Top Field.

This plot is not suitable for development.

There is no suitable access to the site, as already identified.

There is a large, high pressure gas pipeline crossing the field.

The joining of 2 footpaths, both already easily accessible, is not a justifiable reason to pass the development plan.

This is green belt land, currently used for arable purposes.

The local roads (Amwell Lane, Butterfield Road, particularly at the junction with Brewhouse Hill, and Brewhouse Hill itself) cannot cope with additional traffic that this development would produce.

There are many more sites in the Local Plan that are far more suitable for development.

## 236 - Robert Greenhill

Submission Number: 236 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Name: Robert Greenhill

Comment Number: 1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The inclusion of M9 in the Draft Plan is not "justified" because:

1. There are "both policy and technical barriers to its use".
2. There are reasonable alternatives offered in the Local Plan.

The policy and technical barriers include:

1. Amwell Lane cannot serve as an access.
2. The ADJACENT Amwell Conversation Area prevents use of the southern HALF of the site. This is an important corridor for the development of flora and fauna for the recently (2008/9) established Heartwood Forest. This is already a key recreational asset for St Albans District and beyond.
3. The presence of a 1200mm diameter, National, High Pressure Gas Main crossing the middle of the site from west to east will result in easement rules which will further restrict the utility of this site.
4. The adjacent recreation ground was the site of relatively recent land infill.

In my view, access is difficult to resolve due to:

a) The routes of important footpaths between the village and Heartwood Forest.

b) The presence of the recently completed Football Pavilion and its adjacent car parking area. The car park is regularly over capacity and can only be accessed through the only residential road into Old School Drive. This is a recent, medium-sized residential area which is already suffering from street-parking. I assume the pavilion will be the 'home' of the very successful Wheathampstead Wanderers Football Club established over 30 years ago and now serving the recreational needs of hundreds of boys and girls from Wheathampstead and the surrounding area.

## 237 - David Brooks

Submission Number: 237 Submission Date: 05/11/24 09:00

Respondent: Company/Organisation: Name: David Brooks

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Objections to the above proposed development:

1. Access down Amwell Lane unacceptable.
2. Use of Old School Drive and loss of carpark near playing field would cause more problems with parking.
3. Loss of greenbelt
4. Excess traffic in rural area
5. Other more suitable sites earmarked for development plan in Wheathampstead
6. Proximity to major gas pipeline

**245 - Rose Soulsby**

Submission Number: 245 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Name: Rose Soulsby

Comment Number: 1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I am writing to object to the building of 60 houses on M9 - Amwell Top Field, Wheathampstead.

My main reason is the vehicle access to the site. Amwell lane is already a narrow road making it at times dangerous and hard to see on coming traffic when driving on it. This is without the additional traffic the development would create, only amplifying this challenge further if more houses were developed with access being via it.

Secondly, I believe there is a high pressure gas pipeline within the site which should not be built near.

Thirdly, this greenbelt field is extremely close to Amwell conservation area, and development this close will have a negative impact on the wildlife within it.

It also provides key walking g routes to nomansland which would be impacted by such a development.

## 246 - Alison Sharp

Submission Number: 246 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Name: Alison Sharp

Comment Number: 1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

It has just been brought to my attention that it is proposed to build 60 homes on land off Amwell Lane, Wheathampstead.

I understand access cannot be made off Amwell Lane and surely before this can go any further it should be made known to those who may be involved where the access to the new development would be sited. Also on the information given under M9, no mention is made of the very large gas pipe which runs under the land of the proposed site.

I presume consideration has been made that there is only one doctors surgery, one chemist and two shops selling produce in Wheathampstead. It is difficult to get doctor's appointments and school places which 60 homes will need and would make it even more difficult.

As you can tell from the above I am very much against this project.

It would be appreciated if you could reply to this email with any relevant information.

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

This is our objection to the proposal to build 60 houses in Amwell Top Field Wheathampstead in the St.Albans City & District Council Draft Local Plan 2041.

There is actually a MAINS GAS PIPE that runs through the middle of this field - a fact that appears to have been concealed by the field's owner.

Apart from that, the road infrastructure is totally inadequate for a housing development at this site!

### 293 - Jill Wilcox

Submission Number: 293 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Jill Wilcox

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We wish to object to the proposed plan to build on Amwell field. For the following reasons.

1) when brought the property 43 years ago he was told the field was part of strategic farm land, to help provide food security. In the light of the current wars which have made importing food amongst Other things more expensive and difficult, we think it should remain as farm land for this purpose.

2) we are pleased to see you have acknowledged the gas pipe that is going through the field, additional traffic and vibrations can only make the possibility of explosions or leaks due to this pipe more likely. I understand the distance from the pipe to building should be 24.4 metre's.

3) Access to the site would require extensive work, digging up more green land. Disturbing wildlife.

4)The recreation land is well used by the community and using this for access to the field would make this dangerous and destroy a valuable resource.

### 297 - Andrew Clark

Submission Number: 297 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Andrew Clark

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I would like to formally in writing object to the building of 60 houses on M9 - Amwell Top Field, Wheathampstead.

There are several reasons, one of which being the main vehicle access to the site. If you were to drive down there today it is already an immensely narrow and tight road which even in it's current low traffic guise can still be dangerous and hazardous. If traffic down this route were to multiply significantly we would create consistent genuine access and safety risks for the local community. I would also question the surface water impact such a development would cause on the nearby sports field, houses and roads and the further additional pollution exposure.

I also have reviewed plans which have shown there to be a high pressure gasline to be present which absolutely should not have a housing estate built over this area- this again is a risk to the local community should these gas lines be damaged unnecessarily, which building and increased residing's in the local area promotes.

Finally, I despair at the fact a greenbelt field right on the border of the Amwell conservation areas is even coming into consideration, this is an area of natural beauty with a very unique wildlife profile (including bats seen at night time) and a key walking route to Nomansland which is one of the key draws for people to visit the local area and again fuel the local thriving economy.

I encourage you to come to this area on a summers day, when the wheat is readying for harvest and the birds are nestling in the heart of the land, these crops are used by local shops and vendors-meaning this estate could put local businesses "security of supply" at risk.

England's self sufficiency is declining year by year, our wildlife being forced to renavigate it's own natural habitat- it is truly an abomination that we have got ourselves whereby we need to challenge why this shouldn't happen, the question is why are we even having this conversation?

Wheathampstead is an area steeped in history, natural wildlife, local communities and it certainly of all places in the country does not require further building work right in the heart of it's natural forestry. I beg you to find reason and give no further thought or consideration to these plans.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

I would like object to the building of 60 houses on M9 - Amwell Top Field, Wheathampstead.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**307 - Samantha McManus**

Submission Number: 307 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Samantha McManus

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As a resident of High Ash road I wish to submit my objections to the planned development on Amwell top field M9, AL4 8dz.

Firstly as green belt land I believe building on it would destroy the feeling of this rural area and impact wildlife and the environment.

Secondly the field is only served by a narrow and uneven lane only and so access is already restricted and would not support the number of new vehicles or the construction.

Thirdly the utilities infrastructure is not set up to canter for the additional houses, with not even mains drainage in this area.

There is also a gas pipe running through this field being of utmost concern if building works were to happen here.

Moreover wheathampstead is a very small village with very limited transport links and services which would be overwhelmed by this influx and severely disrupted by the works.

I hope these comments will be considered.

### 310 - David and Sue Smith

Submission Number: 310 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: David and Sue Smith

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Please include these comments with our other comments made on 22nd of September 2023.

We strongly oppose the inclusion of the above site for development in the SAC&DC Draft Local Plan 2024.

We believe there is a compelling case for this site to be removed from the plan due to the following:

1. You have concluded in your key development requirements that Amwell Lane cannot serve as the access route to the development as the nature of the size of the lane and its technical barriers. Therefore you have no access into the site.
2. You also state that there is a pipeline running across the site. This is not any old pipeline it is a High Pressure steel Gas Pipeline with a diameter of 1.2 meters . This is owned by Cadent Gas Limited and they have placed it well away from all housing developments because of the dangerous nature of it. Cadent Gas have a Deed of Easement around it to safeguard it. Cadent state that periodically it has to be checked by a plane to inspect that it has no leaks. Their website also states that if it is damaged it will cost in excess of 15 million pounds.
3. You also state that there is an opportunity to connect footpaths 081 and 027 via a walking route across the site. I fail to understand why this would be a major requirement to giving consent to allow this development, as there is no reason why the land owner cannot give you permission to do so now. So therefore is not a valid reason to allow the development.

4. If access to the site is tried elsewhere then there are more problems to consider. ( like crossing an ancient footpath and if there was the removal of a locked gateway this would remove any barrier that the public football pitches have[redacted]. This gate was installed by Wheathampstead Parish Council to safeguard the area[redacted]
5. Therefore we conclude that there is no access to the site & should be removed from the plan. We request that SAC& DC give our objections adequate consideration to remove this site from the Draft Plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Therefore we conclude that there is no access to the site & should be removed from the plan. We request that SAC& DC give our objections adequate consideration to remove this site from the Draft Plan.

**347 - Joanne Williams**

Submission Number: 347 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Name: Joanne Williams

Comment Number: 1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We wish to object to the proposed development for M9. While we support the other proposed developments in the local plan in and around Wheathampstead, the particular proposal for M9 is wholly inappropriate for the reasons given below.
Yes ,socially it will provide homes for current and future generations, but it does not line up with the environmental considerations – it will neither protect nor enhance the natural environment and only serve to concrete over green belt that is vital for soaking up increasing rainfall that we are experiencing through climate change.
Comments in line with the key development requirements
1 . Amwell Lane cannot serve as the access route due the scale of development and nature of the lane meaning both policy and technical barriers to its use exist. However, active mode access should be provided.
JW & EL – As Amwell Lane is deemed unacceptable in terms of access to the development, any other access options (eg from other roads in the vicinity eg High Ash Road or Old School Drive) would be highly inappropriate, overwhelming those roads with the volume of plant traffic followed

by the volume of traffic from the additional residents in the 60 or so proposed dwellings. Any new access route could also impact local footpath access and seems to negate the joining of the footpaths mentioned below.
Given this, economically it does not seem to fit with the requirement for having the right land available given the above access challenges and increased costs involved with that.
2. The existing footpath to the eastern boundary must be retained and accessed from the site. There is an opportunity to connect footpath 081 through the site to 027 via a walking route in the required open space.
JW & EL – We struggle to understand how a development would present this as an opportunity.. There is nothing already stopping the connecting of footpath 081 to 027 as far as we can see.
4. Contributions / enhancements to support relevant schemes in the LCWIP and GTPs as indicated in the TIA.
Including but not limited to improvements to the B651 and connections to St Albans / Sandridge.
JW & EL - It will also require improvements to the Wheathampstead to Harpenden road which already suffers from congestion with the existing volume of traffic.
6. There is a pipeline running through the site, and development proposals must appropriately take this into
account.
JW & EL – this is a major pipeline which will need a considerable buffer around it. This could impact the development and reduce the number of units thereby rendering the development unfeasible.
I would be grateful if you would take our objections into consideration.

## 357 - Mrs Julia Warren

Submission Number: 357 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Wheathampstead Parish Council Name: Mrs Julia Warren

Comment Number: 12

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**M9 – Amwell Top Field**.

We do not consider this appropriate development because of the problems surrounding access. The Amwell Lane exit at the Junction of Brewhouse Hill is already congested and this would be exacerbated by any increase in the number of vehicle numbers joining the traffic travelling to and from Wheathampstead. There is also the longer-term danger of coalescence with the Amwell Conservation Area.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Wheathampstead PC Strategic Local Plan response approved_[R].pdf

---

**366 - Chrissie Chadney**

Submission Number: 366 Submission Date: 10/11/24 09:00

Respondent: Company/Organisation: Name: Chrissie Chadney

Comment Number: 7

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I have been a resident in Wheathampstead for over forty years and read the proposed District Plan with interest. Whilst there are some good ideas in it, there are a number of things which give me concern. I have read the WDPS response and concur with it fully, but have a few additional things to say here.

Utilities and Services: There appears to be a significant oversight in the plan regarding the enhancement of utilities and essential services to accommodate an increased population. It is critical that we collaborate with entities such as Thames Water to ensure that our infrastructure, particularly water and sewage systems, are upgraded in advance of any population growth to prevent exacerbating current issues.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Conclusion: I firmly stand with the WDPS in urging a comprehensive reevaluation of the Draft Local Plan. It is essential that the plan not only reflects realistic population projections but also prioritizes environmental conservation, sustainable development, and the enhancement of local services and infrastructure. We need a balanced, forward-thinking approach that truly serves the interests and needs of all of the St Albans District's residents.

## 367 - Ms Julie Bell

Submission Number: 367 Submission Date: 10/11/24 09:00

Respondent: Company/Organisation: Name: Ms Julie Bell

Comment Number: 7

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Development Sites and Local Impact:**
The development sites proposed, such as Amwell Top Field and Hill Dyke Road, pose a threat to the rural essence and ecological harmony of our region. It is essential that any development is carefully considered for its environmental impact, striving to preserve the inherent natural beauty and biodiversity that characterize our community.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion:**
I stand firmly with the WDPS in calling for a thorough reevaluation of the Draft Local Plan. The plan must accurately reflect our realistic population growth projections and prioritize environmental protection, sustainable development, and the improvement of local services and infrastructure. A balanced and visionary approach is required to genuinely meet the needs and interests of the residents of the St Albans District.

## 369 - Sue Greenwood

Submission Number: 369 Submission Date: 09/11/24 09:00

Respondent: Company/Organisation: Name: Sue Greenwood

Comment Number: 1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I would like to submit my objection to the proposed planning site of Amwell Top Field Wheathampstead M9.
I strongly object to the plan submitted to build on Amwell Top Field, the numbers of houses seem to vary from 60-140 over a 10 year plan
Amwell top field lays directly over a high pressured gas pipe. This gas pipe comes through our village from Peters Green , continuing on to South Mimms. It comes up the back of Brewhouse Hill, crossing the Harpenden rd entering a corner field then crossing Amwell lane into Amwell Top Field. This was constructed in 1999, and we were told nothing can be built on top of this gas pipe. There are 2 aerial checks twice a month from a helicopter, and then the pipeline is walked once a year for checks. There are AMP's ( aerial marker posts ) where the gas pipe crosses a road. Strangely this AMP is no longer visible in Amwell Top Field !!
Amwell lane where this field is situated is a narrow single track lane with very few passing places.This lane is approached from the corner junction ( bend)of Brewhouse Hill & Harpenden Rd. This is already a black spot with numerous cars leaving the road and ending up in hedges, and if the hedges weren't there, they would've ended up in the houses. This has been a big issue for us , trying to slow the traffic down on this approach, so I can't see that this proposal is going to help in any way with the increase of possibly 100 cars a day.
Amwell is a beautiful untouched hamlet. The vista is of narrow lanes lined with hedges. This is a very popular walking route for families & dog walkers leading to Nomansland.
And the infrastructure in our village cannot cope as it is, what with oversubscribed schools and doctors surgeries, where are these people going to go ?
I have added 2 photos, one being a map of the high pressure gas pipe & the other AMP which is no longer visible in this field.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**370 - Diane Black**

Submission Number: 370 Submission Date: 09/11/24 09:00

Respondent: Company/Organisation: Wheathampstead District Preservation Society Name: Diane Black

Comment Number: 10

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**WDPS comments on St Albans City and District Council Draft Local Plan**

Wheathampstead and District Preservation Society (WDPS) has approximately 400 households as members, and we therefore speak for around 15% of the population of the Wheathampstead area.

**Development Sites in Wheathampstead**

WDPS is concerned about all development on Green Belt land unless there are exceptional circumstances, and as mentioned above there is provision in the NPPF for local planning authorities to restrict the scale of development to permit the protection of the Green Belt.

WDPS opposes the proposed development site M9 Amwell Top Field. It protrudes from the existing built-up area and encroaches on the countryside. This site borders Amwell Lane which is a significant and important country lane that is partly single track and lined with healthy trees and important hedgerows that need to be protected. We understand that development at the Amwell site would be limited to half of the Top Field. We trust that this would be in the northern half closest to the village and we would urge that the Plan map be re-drawn to highlight only that part of the field where development is proposed.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Summary**

Considering the comments above, we urge the council to revisit the draft Local Plan, challenge the Government's Standard Method for calculating housing needs and produce a more equitable balanced plan that serves the needs of the St Albans District residents. We would like to see more detailed planning which includes funding allocation and addresses key issues on exactly how the plan is going to meet climate change targets, deal with extreme weather events, increase biodiversity by 10%, protect the Green Belt, improve transport networks including cycleways, improve water networks and prevent pollution of our rivers, improve services and facilities and protect secondary school placements.

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Park Street is a Tier 5 Medium-Sized Village. As such, it has limited facilities. The 51 dwellings would be better placed in a more sustainable settlement such as St Albans. The existing planting provides concerns regarding habitat loss and the ability to achieve biodiversity net gain.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In summary, there are a number of draft allocations which raise concerns on consistency:

Park Street is a Tier 5 Medium-Sized Village. As such, it has limited facilities. The 51 dwellings would be better placed in a more sustainable settlement such as St Albans. The existing planting provides concerns regarding habitat loss and the ability to achieve biodiversity net gain.

We have to conclude that not only does the Regulation 19 Plan fail to allocate sufficient sites for housing, or enough in the early stages of the Plan Period, but that Windridge Farm is a stronger contender than some sites the Plan does propose as allocations, even on the Council's terms.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is**

**incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 314 - Mrs Susan Taylor

Submission Number: 314 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Mrs Susan Taylor

Comment Number: 3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I'm deeply concerned about the amount of greenbelt around Park Street going to development. We know the monstrous SRFI will have a significant impact on traffic levels on the A414, A405 and local roads in the area.

I'm staggered that you have allowed the greenbelt opposite the BP garage on Watling Street, adjacent to Park Street roundabout, to go to housing when the queues onto the roundabout from Park Street can stretch beyond Park Street bridge in the rush hours and school run time. Not only is it dangerous as locals will have to contend with thousands of extra HGV's and vehicles from the SRFI descending onto the roundabout on the A414, there'll be more vehicles entering and exiting the site opposite the BP garage that could have terrible consequences for vehicles entering and exiting Park Street.

I also see land is now up for auction alongside the A405 approaching Tippendell Lane roundabout, which is again, dangerous for vehicles entering and exiting the site. The queues on Tippendell Lane can already stretch back to Penn Road.

The whole area is lacking in road infrastructure to support this huge increase in traffic movements.

With possible housing developments in Chiswell Green and London Colney our roads will become gridlocked with all the burden on local roads.

Why is so much greenbelt going to inappropriately located developments?

## M13 - North of Boissy Close, Colney Heath, AL4 0UE

### 145 - Catesby Estates

Submission Number: 145 Submission Date: 07/11/24 11:13

Respondent: Company/Organisation: Stantec Name: Mr P Derry

On Behalf Of Company/Organisation: Catesby Estates Name:

Comment Number: 20

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Colney Heath is a Tier 6 Green Belt Village. As such, it has limited facilities. The 49 dwellings would be better placed in a more sustainable settlement such as St Albans. The access appears very narrow to serve an additional number of dwellings

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 287 - Hertfordshire County Council Minerals and Waste Planning Policy Team

Submission Number: 287 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council Name: Hertfordshire County Council Minerals and Waste Planning Policy Team

Comment Number: 15

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

M13 – North of Boissy Close, Colney Heath, AL4 0UE

In the Minerals and Waste Planning Authority's response to the St Albans City & District Council Regulation 18 Local Plan consultation, comments for site M13 include that the District Council should refer to the Minerals and Waste Planning Authority's comment on planning application reference 5/2022/2557.

The comments made on this application request that opportunistic extraction be undertaken, however, this has not been included within the key development requirements for the proposed allocation.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is**

**incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Whilst **not a soundness matter**, the District Council may however wish to add an objective to the 'key development requirements' for this allocation, like that suggested below for M8 – Verulam Golf Club, St Albans, AL1 1JG, to include the following wording or similar:

*Undertake opportunistic extraction of any suitable sand and gravel deposits for use on-site wherever possible, where such deposits are uncovered during construction / excavation works.*

## M15 - Bucknalls Drive, Bricket Wood, AL2 3YT

### 94 - The owners of land at Bucknalls Drive, Bricket Wood

Submission Number: 94 Submission Date: 06/11/24 13:28

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: The owners of land at Bucknalls Drive, Bricket Wood Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report for details**

**Site M15 – Bucknalls Drive, Bricket Wood**

- The draft Local Plan and accompanying Policies Map identifies the report site as proposed housing allocation ref M15, with an indicative yield of 44 dwellings. The identification of the development potential of this site is **supported** by the owners of this site. As is set out elsewhere in this report, the land is suitable for development and should be allocated in the Local Plan.

**M15 -**

- The allocation identifies '*key development requirements*'. Nos 1 to 3 relate to access / highways matters as follows:

*"1. Enhancement of the existing access to include active mode facilities is required.*

2. *Contributions / enhancements to support relevant schemes in the LCWIP and GTPs as indicated in the TIA.*
3. *Support for provision of an active travel route linking to St Stephen Footpath 059 and Bricket Wood Common for recreational access."*

- The recently dismissed appeal scheme for 12 dwellings (See para 4.3 above - PINS Ref APP/B1930/W/23/3325998) proposed a new footpath to connect Bucknalls Drive to Bricket Wood Common and the St Stephen 059 Footpath therein. The creation of this link has been discussed with St Stephens Parish Council, the land owner of Bricket Wood Common (Munden Estates) and Hertfordshire County Council. The proposal also included a street crossing along the existing access from Bucknalls Drive. These elements can therefore be easily incorporated into any future proposals, together with the appropriate contributions to support active travel schemes identified by the Local Cycling and Walking Infrastructure Plan (LCWIP) and Growth and Transport Plans (GTPs).

- Whilst the aforementioned appeal was partially dismissed on the basis of concerns relating to the internal road layout, these could be easily resolved. No other highways issued were raised by the LPA or the Inspector.
- Objectives Nos 4 to 6 relate to landscape / ecology matters:

*"4. Proposals must take appropriate account of the adjoining Bricket Wood Common Site of Special Scientific Interest (SSSI).*

5. *Development proposals must take appropriate account of the woodland to the south covered by Tree Preservation Order, a deciduous woodland Priority Habitat along the west and south-west boundary, and the County Wildlife Site to the east and west boundary and adjacent to the southern boundary.*
6. *Development proposals must take appropriate account of all trees protected by Tree Preservation Order."*

- The appeal Inspector identified potential harm in relation to the adjacent SSSI and Local Wildlife Site (LWS), noting that insufficient evidence was submitted to conclude that there would not be harm. Accordingly further discussions will be held with Hertfordshire Ecology and other relevant consultees to confirm in particular the extent of the LWS and the proximity of Ancient Woodland, and the required buffers / mitigation measures.
- With regard to the impact to trees within or beyond the Site, it is noted that the appeal proposal required the removal of 3 individual trees; 3 groups of trees; and trees within groups or remnants of groups as part of the implementation of the proposed development. Neither the LPA nor the Inspector raised any objection in this respect.
- It is also noteworthy that the appeal scheme included a proposal to fund 30 years of management of the woodland within the Site, and within the strip of woodland to the south to assist in expressing the understorey and plant community characteristics of good quality woodland, along with the opportunity to monitor and subsequently curtail unforeseen impacts. This could have been achieved via a management plan, to be controlled/managed via a planning condition and would have provided a significant gain as there is currently no monitoring, management, or funding is in place for the woodland.
- The requirement of Objective 7 to undertake opportunistic extraction of any suitable sand and gravel deposits for use on-site wherever possible, where such deposits are uncovered during construction or excavation works could presumably be made the subject of a condition.
- With regard to the requirements of Objective 8 to Take appropriate account of these Environmental Constraints: Source Protection Zones; Bedrock Aquifer; Superficial Aquifer, in common with the most recent proposal relating to the residential development of the southern section of the Site, (LPA Ref 5/22/1516)any future application would be accompanied by a Flood Risk Assessment and Drainage Strategy. No issue was previously identified in these respects.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Local Plan representations - Bucknalls Drive_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

DLA Town Planning represents the owner and promoter of site M15 and our participation in the hearing sessions would assist the Inspector and help to respond to any queries raised.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

i don't know the precise legal requirements so I cannot say whether it is legally compliant. I don't consider it sound, however, as it appears the council has not taken any notice of the comments submitted by its electorate in relation to the last draft. According to the objectives, sustainable use of land and protecting the green belt are your top two priorities, even ahead of housing, but the proposed redrawing of green belt boundaries shows that this has not been implemented. it simply is not sustainable to concrete over the green belt. and even if you do go ahead and redraw the boundaries (which would be reckless) it will not make those sites suitable for building on. many of the sites you have indicated will be developed have got notes against them showing they contain protected species (eg M3), gas pipelines (M3), protected trees (m7), are atop the aquifer (B7) are at risk of flooding (M6) are on an SSSI (m15) ETC, ETC. these sites need to be protected and to do otherwise is not sustainable: it will not result in St Albans being a great place to live and work, quite the contrary. Some of the proposed development sites are on car parks which will only make the parking situation worse than it already is.

if you were serious about strategic policy 10, you would not be proposing to release plot M3 from the green belt. at the very least you would have excluded the bit north of the public footpath which includes the grass land and the orchids. I fundamentally disagree with the current proposal

overall I don't think this plan is in the best interests of the people of st albans as it is not justified as defined in the introduction to the revised draft plan

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. ## M16 - Falconers Field, Harpenden, AL5 3ES

### 57 - Mr & Mrs Roger Gibbs

Submission Number: 57 Submission Date: 03/11/24 13:16

Respondent: Company/Organisation: Name: Mr & Mrs Roger Gibbs

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Response to St Albans Draft Local Plan 2041 Regulation 19 Publication - Nov 2024

Our below comments relate to site M16 - Falconers field, Harpenden, AL5 3ET (Proforma Ref: C-050; HELAA Ref: HT-04-21; Green Belt Sub Area Ref: SA-17 / RA-14). Known locally and referred to below as the horse field.

Recently increased parking restrictions on Roundwood Park have resulted in a significant increase in schools traffic and trades vehicles parking in Falconers Field, westerly from the junction with Roundwood Park and extending down Falconers Field beyond the existing entrance to the horse field. This is creating a potentially dangerous situation particularly around school opening and closing times with vehicles conflicting with large numbers of pedestrians and cyclists (many of them young children). Any residential development of the horse field would simply add to the congestion and create a new junction in the midst of an already congested area, thus adding to the risk of injury to pedestrians and cyclists.

Falconers Field is a narrow, winding residential road with a cul-de-sac and fork. Visibility around the fork is very restricted, especially when exiting either right or left from the cul-de-sac, and there have been numerous minor accidents and near misses at this location. Any residential development of the horse field would inevitably increase the volume of traffic using Falconers Field, for which it is unsuited and would increase the risk of further accidents occurring.

As a result of the recently increased parking restrictions on Roundwood Park, Falconers Field is increasingly being used by residents of e.g. Redbourn, Markyate and Flamstead as an access road and parking place when delivering/collecting their children to/from Roundwood schools. This actual increase in traffic makes it even less desirable to introduce additional traffic which would arise from any development of the horse field.

The key development requirements include “traffic calming on Roundwood Lane”. Previously a proposal to develop a sports ground on New Farm at the rear of the horse field, accessed via Roundwood Lane, was refused due to Roundwood Lane being designated a rural road and any development must not increase its use by 10% or more - which, if the proposal to develop the horse field were to be approved would very likely happen.

We have been advised that there are numerous other serious flaws in the current proposal to earmark the horse field for development. These flaws include the following:-

The wrong area has been assessed in the St Albans Stage 2 Green Belt Review (the "GBR") as regards this site. This is because in the plan and description of the site in the draft Local Plan (as shown in Appendix 1 – Local Plan Sites) it is clear that this site M16 only includes the horse field itself, whereas the GBR incorrectly assesses (as sub-area SA-17) the horse field together with the adjoining school playing field (which is part of Roundwood Park School and is not, and has never been, part of this process/the call for sites) as one unbroken area. The assessment of the site in the GBR is therefore invalid.

In the GBR assessment sub-area SA-17 scored very highly for some of the green belt purposes - particularly for both criteria of Purpose (1) (To check the unrestricted sprawl of large built-up areas). This compellingly demonstrates the very important contribution that the site currently makes to the green belt.

The recommendation that the loss of the horse field from the green belt would require replacement through the addition of land elsewhere to the green belt clearly reveals the truth that it would be much much better not to allow the horse field to be removed from the green belt in the first place!

We understand that it is an established rule of planning law that development in the green belt should not be approved unless “very special circumstances” apply. Such “very special circumstances” patently do not exist in the case of the horse field.

We believe that the horse field is highly unsuitable for development and must be removed from the list of sites that are being considered for development under the Local Plan.

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The plan does not meet the area's objectively assessed needs nor is it consistent with achieving sustainable development. There is no need in Harpenden or this area for further development. Any development in this area is not sustainable.
Further development will destroy the nature of Harpenden.
Local services cannot support any further development.
Traffic in and around Harpenden is already excessive. Further development will only lead to increased gridlock particularly at busy times.

Roundwood Lane and Roundwood Park cannot sustain any more traffic. Roundwood Lane is designated a rural road. Further development will increase traffic levels by at least 10%.

Falconers Field itself cannot sustain more traffic. It is already becoming dangerous due to its narrowness and the increasing number of parked cars particularly by parents picking up children from Roundwood School.
Development on the greenbelt should not be approved unless very special circumstances apply. There are no very special circumstances here. Furthermore this site is within the Chilterns Beechwood Special Area of Conservation Zone of Influence.

This site should accordingly be removed from the local plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

No modifications are appropriate as this site should be removed from the local plan.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

Comment Number: 1

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

The Local plan contradicts that the natural environment and biodiversity is sustained. The Plan states to protect, maintain and enhance the natural environment landscape and green infrastructure which will be eradicated if this site is developed. This site is in the Chilterns Beechwoods Special Area of Conservation (CBSAC) Zone of Influence (ZOI).

To allow speculative and profit seeking development on this site and to then replace green belt land in another area will erode the green belt bit by bit.

Falconers Field is accessed by two roads. One is a rural road - Roundwood Lane which is designated as a rural road and so it is not allowed to have development which would increase its use more than minimally. The other road is Roundwood Park which due to Roundwood Park Schools access on to it is already at capacity with considerable parking restrictions and is also heavily used by school buses. This road in turn leads to Luton Road via Park Hill. Given the protected Nickey Line and bridge it is not possible to improve access to the Roundwood area and it is already suffering bottlenecks and drivers resorting to dangerous manoeuvres on pavements busy with school children.

Pollution would be increased with the amount of traffic generated by developing this site. Not only does controlling congestion help our air quality. The greenbelt is an effective way to reduce pollutant concentration in the ambient air.

Falconers Field is a winding road with sharp bends and a poor visibility fork leading to the cul-de-sac. Having a cul-de-sac in the area has been very precious to the community as a place to walk, a place for children to play or ride bicycles and used by the majority of the homes for street parties. An important function of the greenbelt is to safeguard the character of a community and this site has been an integral part of the community given it is visible open green land in the Roundwood area and the only one with an adjacent pavement.

Any houses built on this site won't be genuinely affordable housing. That is totally unrealistic. It would only be the developers who would gain financially.

The site is often under water in heavy rain and absorbs a great amount of water for the area which given the frequent flooding on the main road at the bottom of the hill serves an important function. This became evident when the local fire service were called to one of the homes on the estate.

A further point to question is why the whole of this site was suddenly included in the plan and not the original part which was level with the gardens of the houses on the field building line. Again is this to seek financial gain? Why does this site now protrude into the area beyond the building line?

The Plan states to prioritise and enable safe use of transport . The Roundwood area is already congested and unsafe for further development.

I accordingly consider that this site should be removed from the Local Plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). Site M16 is within the Metropolitan Green Belt. The Draft Local Plan is not sound in relation to including M16 as a suitable site for housing development. The inclusion of this site does not meet the plan's overall objective of protecting and enhancing the Green Belt. Development of this site for housing is clearly inappropriate.

...

My comments relate to site M16, Falconers Field, Harpenden AL5 3ES. Its inclusion in the Draft Local Plan represents inappropriate development within the Green Belt and the site should be withdrawn from the plan.

This area is currently considered Metropolitan Green Belt land and, according to The Sustainability Appraisal (Interim Study, July 2023), most of it lies with the Chilterns Beechwood Special Area of Conservation (CBSAC) Zone of Influence.

When the site was originally assessed for release from the Green Belt, sub area SA-17 scored highly on checking the unrestricted sprawl of a large built-up area, demonstrating its importance to the Green Belt. This shows the very important contribution that the site currently makes to the Green Belt. However, the study only assessed land up to the current building line, the area up to the end of the gardens in the cul-de-sac of Falconers Field. Since then, without further consultation, the whole of the M16 field has been included. As, under Green Belt considerations this makes further increases in the urban sprawl than originally considered, it is further contravening the Green Belt ideology.

M16 being part of the CBSAC Zone of Influence means that development proposals also need to make provision for a new Suitable Alternative Natural Greenspace (SANG). Surely and additionally, as Green Belt land should only be developed if there are ‘very special circumstances’ it would be better to leave M16 as it is.

As the Draft Local Plan suggests, one of its key issues is to address climate change, to encourage shift from private cars and encourage cycling, walking and use of public transport. The M16 site is not in a location that will support this. It is too far for families to walk to buy and carry heavy groceries from the town shops. There is a long walk down hill, and on return uphill, from and to the site to reach a bus, and the station is even further away. People will still drive. The easiest access to the main road, A1081, will be at the bottom of Park Hill. Here the narrow Nickey Line Bridge and traffic lights already cause congestion throughout the day. A cycle lane, which is suggested to encourage cycling along the A1081 into the town will only narrow the road further causing slower traffic and increased car emissions. This does not improve the environment.

Traffic access to and from the field onto Falconers Field will be problematic and dangerous for the large number of children who walk the road on their way to and from Roundwood Park School each day. Already, due to parking restrictions on Roundwood Park, parents park their cars on Falconers Field at the end of the school day, making negotiating the road from a driving and pedestrian perspective difficult and sometimes dangerous. More traffic will undoubtedly cause more problems.

Although climate resilience is a key issue in the Draft Local Plan and, as there are dramatic and disastrous climate change events in the world at large at present, one of the considerations that does not seem to have been considered is the field's value at the top of a hill in times of heavy rainfall. At such times the field becomes waterlogged and soaks up water. If developed and concreted over nature's natural way of combatting such rainfall will be negated. Heavy rainfall will run off and could well exacerbate the flooding problems on the A1081 which already exist at the bottom of the hill.

The M16 open green space is a natural breathing ground for the climate. Although some trees will receive preservation orders, other trees and historically ancient hedgerows ('carbon sinks') will be destroyed. At a time when farmers are encouraged to plant hedgerows to increase bio-diversity, development of site M16 will further rob animals, birds and insects of a natural place to thrive and flourish. We should, as Green Belt objectives maintain, 'assist in safeguarding the countryside from encroachment' and not devastate it.

Overall, it seems a great shame that the Draft Local Plan concerns itself predominately with intensively building more houses on Green Belt land, rather than seeking to balance development in the area with facility, recreation and amenity, not to mention the spacial and visual openness that is central to the Green Belt ethos. M16 consists of two paddocks and two well-built stable blocks (with water and electricity) which have been used for many decades for the grazing and stabling of ponies belonging to local children. It represents a green buffer in an otherwise wide area of urban sprawl and, rather than build more houses on it, a creative and progressive local plan might seek to preserve its use as an equine facility, or consider retaining it as an urban park or garden, a children's playground, community allotments, or as a further extension to the recreational facilities at Roundwood Park School, which adjoins it. The school has recently lost a lot of its playing field provision to building extensions and to an all-weather facility. Preserving M16 as a green space would helpfully safeguard an important area for the future development and extension of the school's playing field facilities.

From the above it is clear that site M16 does not meet the objective identified in the Draft Local Plan of protecting and enhancing the Green Belt. Its inclusion proposes inappropriate development within the Green Belt and the area should be withdrawn from the list of sites that are being considered for the building of new houses.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Site M16 should be withdrawn from the list of sites proposed for housing development.

## 171 - Jarvis Homes

Submission Number: 171 Submission Date: 07/11/24 14:29

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: Jarvis Homes Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**M16 – Falconers Field, Harpenden**

- The Regulation 19 draft Local Plan and accompanying Policies Map identifies land at Falconers Field, Harpenden as a proposed Location for residential development. This proposal is **strongly supported** by both Jarvis Homes and the owners of the site. As is set out elsewhere in this report, the Falconers Field site is suitable for development and should be allocated in the Local Plan.
- A total of 39 dwellings is indicatively proposed for the site and this level of provision is supported at this stage of plan-making.
- The policy allocating this site refers to “key development requirements”, which are repeated below, along with a brief commentary:
- *Proposals must include support for improvements to the local Rights of Way network, including access to the footpath adjacent to the western boundary and the Nickey Line.*

Improvements to the local Rights of Way network, including access to the footpath adjacent to the western boundary and the Nickey Line, can be addressed at the planning application stage. This can also be secured through a Section 106 agreement or other financial contributions as appropriate.

- *Contributions / enhancements to support relevant schemes in the LCWIP and GTPs as indicated in the TIA. Including traffic calming on Roundwood Lane, and segregated cycling on Luton Road.*

3. *Support for improvements to primary and secondary walking and cycling routes will be required and this site will need to contribute towards upgrades to them.*

These contributions and improvements can be achieved through Section 106 agreements or similar legal mechanisms to ensure long-term commitment to active travel infrastructure and sustainable connectivity.

- *Most of the site lies within the Chilterns Beechwoods Special Area of Conservation (CBSAC) Zone of Influence (ZOI). Appropriate contributions must be made towards the Strategic Access Management and Monitoring Strategy (SAMMS). Development proposals will also need to make provision for a new Suitable Alternative Natural Greenspace (SANG), or alternatively contribute towards the maintenance of a suitable SANG project elsewhere.*

Given that the majority of the site falls within the Zone of Influence (ZOI) for the Chilterns Beechwoods Special Area of Conservation (CBSAC), we acknowledge the requirement for appropriate contributions toward the Strategic Access Management and Monitoring Strategy (SAMMS). There is no scope for a new Suitable Alternative Natural Greenspace (SANG) within the site itself but a contribution could be made to the maintenance of an existing SANG project in a suitable nearby location.

- *Development proposals must take appropriate account of all trees protected by Tree Preservation Order.*

The proposed development has been carefully designed to ensure no impact on trees protected by the Tree Preservation Order. A landscape buffer will be incorporated along the site's western edge, providing an additional protective measure for the trees and enhancing the overall site landscape.

- In summary, we consider Policy M16 to be **legally compliant** and **sound**. **No modifications** are therefore necessary.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Local Plan representations - Falconers Field - Jarvis - November 2024 FINAL_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

DLA Town Planning represents the promoter of site M16 and our participation in the hearing sessions would assist the Inspector and help to respond to any queries raised.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

## 226 - Mr John Hudson

Submission Number: 226 Submission Date: 07/11/24 18:59

Respondent: Company/Organisation: Name: Mr John Hudson

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

My comments relate to site M16, Falconers Field, Harpenden AL5 3ES. Its inclusion in the Draft Local Plan represents inappropriate development within the Green Belt and the site should be withdrawn from the plan.

This area is currently considered Metropolitan Green Belt land and, according to The Sustainability Appraisal (Interim Study, July 2023), most of it lies with the Chilterns Beechwood Special Area of Conservation (CBSAC) Zone of Influence.

When the site was originally assessed for release from the Green Belt, sub area SA-17 scored highly on checking the unrestricted sprawl of a large built-up area, demonstrating its importance to the Green Belt. This shows the very important contribution that the site currently makes to the Green Belt. However, the study only assessed land up to the current building line, the area up to the end of the gardens in the cul-de-sac of Falconers Field. Since then, without further consultation, the whole of the M16 field has been included. As, under Green Belt considerations this makes further increases in the urban sprawl than originally considered, it is further contravening the Green Belt ideology.

M16 being part of the CBSAC Zone of Influence means that development proposals also need to make provision for a new Suitable Alternative Natural Greenspace (SANG). Surely and additionally, as Green Belt land should only be developed if there are 'very special circumstances' it would be better to leave M16 as it is.

As the Draft Local Plan suggests, one of its key issues is to address climate change, to encourage shift from private cars and encourage cycling, walking and use of public transport. The M16 site is not in a location that will support this. It is too far for families to walk to buy and carry heavy groceries from the town shops. There is a long walk down hill, and on return uphill, from and to the site to reach a bus, and the station is even further away. People will still drive. The easiest access to the main road, A1081, will be at the bottom of Park Hill. Here the narrow Nickey Line Bridge and traffic lights already cause congestion throughout the day. A cycle lane, which is suggested to encourage cycling along the A1081 into the town will only narrow the road further causing slower traffic and increased car emissions. This does not improve the environment.

Traffic access to and from the field onto Falconers Field will be problematic and dangerous for the large number of children who walk the road on their way to and from Roundwood Park School each day. Already, due to parking restrictions on Roundwood Park, parents park their cars on Falconers Field at the end of the school day, making negotiating the road from a driving and pedestrian perspective difficult and sometimes dangerous. More traffic will undoubtedly cause more problems.

Although climate resilience is a key issue in the Draft Local Plan and, as there are dramatic and disastrous climate change events in the world at large at present, one of the considerations that does not seem to have been considered is the field's value at the top of a hill in times of heavy rainfall. At such times the field becomes waterlogged and soaks up water. If developed and concreted over nature's natural way of combatting such rainfall will be negated. Heavy rainfall will run off and could well exacerbate the flooding problems on the A1081 which already exist at the bottom of the hill.

The M16 open green space is a natural breathing ground for the climate. Although some trees will receive preservation orders, other trees and historically ancient hedgerows ('carbon sinks') will be destroyed. At a time when farmers are encouraged to plant hedgerows to increase bio-diversity, development of site M16 will further rob animals, birds and insects of a natural place to thrive and flourish. We should, as Green Belt objectives maintain, 'assist in safeguarding the countryside from encroachment' and not devastate it.

Overall, it seems a great shame that the Draft Local Plan concerns itself predominately with intensively building more houses on Green Belt land, rather than seeking to balance development in the area with facility, recreation and amenity, not to mention the spacial and visual openness that is central to the Green Belt ethos. M16 consists of two paddocks and two well-built stable blocks (with water and electricity) which have been used for many decades for the grazing and stabling of ponies belonging to local children. It represents a green buffer in an otherwise wide area of urban sprawl and, rather than build more houses on it, a creative and progressive local plan might seek to preserve its use as an equine facility, or consider retaining it as an urban park or garden, a children's playground, community allotments, or as a further extension to the recreational facilities at Roundwood Park School, which adjoins it. The school has recently lost a lot of its playing field provision to building extensions and to an all-weather facility. Preserving M16 as a green space would helpfully safeguard an important area for the future development and extension of the school's playing field facilities.

From the above it is clear that site M16 does not meet the objective identified in the Draft Local Plan of protecting and enhancing the Green Belt. Its inclusion proposes inappropriate development within the Green Belt and the area should be withdrawn from the list of sites that are being considered for the building of new houses.

**254 - Sarah Jenkins-Greig**

Submission Number: 254 Submission Date: 08/11/24 00:34

Respondent: Company/Organisation: Name: Sarah Jenkins-Greig

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Please see my comments below.

My comments below relate to site M16 - Falconers Field, Harpenden, AL5 3ES (HELAA Ref HT-04-21; Green Belt Sub Area Ref SA-17 / RA-14), which is known locally as the horse field so I will refer to it as the "horse field". The horse field should not be released from the green belt given its importance and the incorrect assessment that has occurred as demonstrated below.

Summary:

The horse field is part of an important and identified conservation area (the Chilterns Beechwoods Special Area of Conservation Zone of Influence) and it seems the only reason it has been considered for release now is because it is owned by a developer that has put it forward and it was only then included in the most recent plan. It passes the green belt purposes tests to the same extent as the rest of that conservation area which is not being released.

The fact that the plan is looking to release land beyond the building line and beyond a previous map drawn up by the council's advisers (attached) shows it is being influenced by what the developer has put forward and this has completely skewed wrongly the analysis. In particular, extending beyond the building line encourages encroachment on the rest of the land as well as further urban sprawl. In addition, the site is accessed from a rural road and there are important safety concerns if traffic and the number of pedestrians are to increase (as would be inevitable).

Openness and Encroachment

The openness of the area created by the horse field extends whether looking out between the large gap in houses by the horse field on

Falconers Field looking over towards New Farm, or looking from the end of the cul-de-sac

over to the school field beyond, or indeed also when looking in any direction from the public right of way behind horse field on New Farm. From Roundwood Lane itself the jutting out section is also particularly visible and part of the benefit of that openness. Accordingly, the horse field is strongly performing an important function of the green belt and is key to creating and maintaining the character of the area.

Allowing a development which juts out into the open conservation land beyond the building line and has plans already drawn up which include a cul-de-sac ending at the boundary of the site and apparently ready to head into the adjoining green belt land at New Farm is clear and strong evidence that it puts the rest of the conservation green belt area at risk. It strongly suggests that the assessment of all the horse field has been influenced by who owns that part of the land and put it forward, rather than by the outcomes of successive previous green belt assessments which deemed that the horse field should be kept in green belt and conservation area and was not suitable for development. Accordingly, when the selection of the horse field is apparently driven by who owns that part of the land rather than by applying common sense as well as the correct regulations about not allowing a build to jut out into a green belt (and conservation) area, it is clear that the assessments of all of that field are fundamentally flawed and none of the field should be released.

Access/Traffic:

Falconers Field is accessed by two roads. Both are steep and uphill from the main road. One access road is a designated rural road - Roundwood Lane. So by designation as a rural road it is not allowed to have development which would increase its use more than minimally. Further up Roundwood Lane it is often not possible to use it when there has been a lot of rain or snow and many avoid it anyway as it is mostly a single-track lane. The severe limitations of these access roads are partly why a residents group of over 200 members campaigned against and defeated a planning application to change use (to playing fields) of a parcel of the green belt ten years ago (known as 'New Farm') which this horse field site is part of. Although the applicant withdrew its plans this was done after the residents submitted their own commissioned traffic report. Indeed I

note those opposing the L&G development on the A1081 north of Harpenden have commissioned their own traffic report which shows that the amount of traffic has been underestimated and there will be major queues and rat runs locally as well as safety issues.

The other access road is Roundwood Park which, due to Roundwood Park School, is already at full capacity with considerable parking restrictions and is also heavily used by school buses. It is the only road the school buses are allowed to come up given the rural road designation of Roundwood Lane. Roundwood Park in turn leads to Luton Road via Park Hill. Given the protected Nickey Line and bridge over the A1081 it is not possible to improve access to the Roundwood area and it is already suffering bottlenecks and drivers resorting to dangerous manoeuvres on pavements busy with schoolchildren as well as the road into Harpenden being heavily congested. These roads get worse when there are problems with the local section of the M1 and such problems are not infrequent. Even without any additional L&G housing on Luton Road the roads are already at capacity in the Roundwood area. If L&G do build then the area around, including the Roundwood area, will absolutely need protecting from any additional development.

With so many people suffering with breathing difficulties it is important to consider this is not just about adding time to people's journeys when traffic increases. It is not London or other city with its public transport system and nor should it be that residents of a small town like Harpenden end up living in a place as busy as a city and with levels of pollution to match.

Having done the school and train drop-off run for the last 17 years it is very noticeable how much longer my journey takes each year as more houses are built, showing our roads have become much busier.

Falconers Field itself is a winding road with sharp bends and a fork. Visability at the fork is particularly limited. I have had many near misses as cars appear and as we negotiate and allow each other to pass. When Roundwood Park was recently blocked the fork on Falconers Field became extremely busy with traffic and getting in and out of the cul-de-sac safely was incredibly difficult. Traffic measures cannot remedy this due to the houses which are built by the junction. Safety is a genuine and major concern if Falconers Field and nearby roads were to see an increase in traffic.

A resident who has been living here a long time has confirmed that a post box was moved to Roundwood Park from Falconers Field given the difficulties of the road.

The fact that Falconers Field has a grit bin also demonstrates its status as treacherous in winter. It is always a degree or two colder than the main road and Falconers Field remains covered in snow and ice for longer than other nearby roads. Indeed plans submitted by a developer in the past have been thrown out as the road is not safe for an increase of traffic and for the safety of the many schoolchildren and families who use it to access Roundwood Park School and Wood End School. Even if footpaths and cycling lanes are put in place as alternative means of access to the schools, they will not be used by the majority of road users and will have minimal beneficial impact.

With the parking restrictions on Roundwood Park more congestion has been pushed into Falconers Field so the situation on Falconers Field is worse not better now than when those planning decisions were made in the past. Some residents recently took it in turns to observe and log the number of children crossing the fork on foot, which is particularly high, and we observed cars having to quickly stop due to, for example, children crossing the road and groups spilling onto the road as they pass each other and pass pushchairs. If in the past it was considered too dangerous to increase the use of Falconers Field and traffic on nearby roads then why should it be considered more acceptable now to put the lives of pedestrians - the majority of them children - at risk?

Preserving the green belt land next to Falconers Field - land which is in the Chilterns Beechwoods Special Area of Conservation Zone of Influence - is very effective in keeping urban sprawl restricted as, inter alia, it keeps the number of road users down.

Character of the area/Community importance:

When we first drove into Falconers Field what attracted us to the area was the sight of the horse field which you can see from the Falconers Field in two places and from Roundwood Lane. Having visible open green land from a road is really precious for the nature and character of the area. With the increase in walkers and dog walkers since covid and more people working from home the wellbeing of its residents seeing and feeling attached and connected to green land is not some 'nice to have' but imperative for many. Both children and adults have for years visited the horses as a focal point for a walk. Equally for a nice shorter walk on the right of way behind the horse field it makes that so much more pleasant given it is not close to housing. There is a recognised national need to protect natural environments and eg the 'Restore Nature Now' rally was in response to the state of nature report and it was backed by significant conservation and wildlife charities. The horse field is exactly the type of space these charities want to protect given it falls within the Chilterns Beechwoods Special Area of Conservation Zone of Influence. If you allow buildings on this land restoring it won't be possible. The draft local plan green belt review report's recommendation that the loss of the horse field from the green belt would require replacement through the addition of land elsewhere to the green belt is a real kick in the teeth – far better, surely, not to allow the horse field to be removed from the green belt in the first place.

Having the focal point of a horse field in the area is also really precious to the community as a place to walk. Although crossing the road at the junction of the fork is dangerous if a vehicle is present, if you do the short walk into the cul-de-sac to the horse field and around it as part of a walk it's a really pleasant way for locals to exercise. For example, older people can walk into the cul-de-sac to see the horse field at the end as they recuperate from operations. Families with pushchairs walk down it as they help a child to settle or to see the horses. Children for decades have learnt to ride their bike in the cul-de-sac. Many street parties take place in it. Every year we make a big effort with Christmas decorations and Halloween decorations. We have a formal street Christmas lights-switch-on and we stand in the quiet cul-de-sac end to talk to and celebrate with our neighbours on those occasions. We even have a cul-de-sac book group. It's a really important way all generations can stay connected and support each other and the horse field has been integral to creating the character of this area and as a rural backdrop. Spaces like the horse field need protecting in a community for many real and vital reasons. Photographs of this part of the green belt have even regularly been used as picturesque backdrops for ITV weather news. A lot of residents have said they would love to protect it for the town and future generations by owning it as a local community.

An important function of the green belt is to safeguard the character of a community and the horse field has been an integral part of the community as it is visible open green land in the Roundwood area and the only such land with an adjacent pavement (the only other visible green land in the area - and indeed the horse field is part of it - is that which is visible from Roundwood Lane which leads away from Harpenden and which has more limited pedestrian access). Accordingly, the horse field meets an important criteria of green belt that should have been given far greater weight in its assessment.

Any houses that get built on the horse field won't be genuinely affordable housing. It will not benefit the community. They won't be cheap enough for first time buyers nor to make it possible for local residents to move elderly parents closer. It's a sad reality and any pretence otherwise is simply that. So the only real benefit will be to the developers' pockets and not to the community whose local area will be irrevocably damaged for only the developer's pocket. The horse field is not some piece of 'grey belt land' (to use the new government's terminology in its draft revised NPPF) but genuinely important green belt land and part of a conservation area. Of course new houses need to be built in the UK today and we recognise that local authority new housing targets are a reality, but there needs to be proper planning with new towns and better use of brownfield land.

Every year the number of dwellings which are not lived in increases significantly. The purposes of why the green belt came about in the first place are more important now and not less, particularly as climate issues have become so vital.

Additional important functions of the horse field:

An easement of access exists from the gate (where the horse field abuts Falconers Field on the bend in the road) across to the Roundwood Park School playing field. This right of access is not taken into account either in the plans or elsewhere in the Green Belt Review.

Residents (not the owner of the horse field or the council) have used and maintained the strip of land at the end of the cul-de-sac on Falconers Field for decades and claim ownership of it due to adverse possession.

The horse field is often under water in heavy rain and absorbs a lot water for the area which, given the frequent flooding on the main road (even with recent changes made to improve the road) at the bottom of the hill, serves a very important function. Indeed, a neighbour was told exactly this by the Fire Brigade, during an incident. The horse field absorbs water like a sponge and hence performs an invaluable function which would be lost if the site were developed.

Not only does controlling congestion help our air quality, the green belt is an effective and important way to reduce pollutant concentration in the ambient air. Given Harpenden itself is in a valley this is particularly important.

The wildlife that use the horse field and this conservation area should not be underestimated. The small stable buildings in the horse field house bats and a regular topic on the street WhatsApp is enjoying the local wildlife spotted.

Serious concerns about how the horse field has been included:

There are serious concerns about how the horse field has come to be included in this list of sites for consideration for development. In 2013 a review of the green belt took place. It recommended a further look at half of the horse field – but only up to a line level with the gardens of the houses at the end of the cul-de-sac part of Falconers Field. Even this recommendation was flawed as hedges do not make land any less open nor make that land fulfil the green belt criteria any less. Photos were taken from confusing angles. But in any event the plan called SS4 that I have a copy of from this review (and which I've attached to this response) clearly shows only half of the horse field and the school field as meriting more investigation. However, during this process the area under consideration suddenly became all of the horse field, therefore jutting way out into the green belt. Which happens to coincide with the land owned by the developer. I have retained a long email exchange that I had with the council at the time which shows they were unable to provide any explanation whatsoever for this change. Indeed it could be argued that what went on was all rather suspicious.

Now turning to the fact that the horse field - although being part of green belt and hence considered vitally important - is now deemed by the Green Belt Review not to be serving particularly well the purpose of "preventing neighbouring towns from merging". If you cut off a section of the green belt – as is the proposal in relation to the horse field - then it will always serve the purpose less and it's why all of the relevant green belt land is meant to be judged as a whole. The horse field should not have been treated differently to the green belt that it is part of just because a developer owns it. However what this latest Green Belt Review has done is group it together with the adjoining school field and incorrectly assess that whole area in terms of its contribution to the green belt. In that context it is not surprising that the land scored less well on achieving the above mentioned green belt purpose – though it should be noted that the horse field scored very highly for achieving other green belt purposes. So the Green Belt Review assesses the wrong area in relation to this site and that also means it ignores the fact that the development of the horse field as currently proposed will jut into the greenbelt and beyond the houses/building line of Falconers Field. Having seen a plan of the proposed development on the horse field, I have to question why does the

proposed new road stop adjacent to the green belt owned by Herts County Council instead of that part of land being used for a house? Does this mean it threatens its adjacent Green Belt too? Given the flawed assessment both in 2013 and in the new Green Belt Review and the inexplicable change in the area being assessed you can see why I have serious concerns as to why the whole horse field is now being put forward as it has been. The horse field was not in previous draft local plans so it should not be considered less important - or more suitable for release for development - just because a developer put it forward. For the character of the area and the safety of road users it would be terrible to lose even part of the horse field but to have the whole of the horse field developed and it jutting well out into the green belt makes no sense and would be devastating for the area.

As a broader comment, it should be noted that I understand the Harpenden Green Belt Association ("HGBA") was primarily set up by residents who were very focused on resisting building on what is now the proposed L&G development site (i.e. site B7 - North West Harpenden, AL5 3NP) but this should in no way be seen as any kind of tacit endorsement (by the HGBA or any other local residents) of the idea of the development of any of the other green belt sites in or around Harpenden. The horse field, for example, is totally unsuitable for development and each site must be considered on its own merits – and there can certainly be no question of smaller sites such as the horse field being earmarked for development in order to 'make up the numbers' for the SADC housing target if one or more of the larger sites are rejected for development as part of this process. Any build in this part of Harpenden will be problematic but given the already difficult access we have going up Park Hill and Roundwood Lane it would be better that any new houses are sited on, or closer to, a main road or at least a road with better access and less congestion.

Given that, due to the recent change in the UK Government's planning policy, the Council now has discretion as to how many houses it allows to be built over the course of the new local plan, it should be delivering on its election promises to protect the green belt. Green belt should only be used in very special circumstances so the presumption should be to protect it and that presumption should be difficult to rebut. The land at Falconers Field should not be a sacrificial lamb to help SADC hit its new build housing numbers. Just because a developer owns the horse field it should not mean it is assessed differently or wrongly in order to get it through this process. Even leaving aside what this site's release for development will do to the local community's wellbeing, it will greatly exacerbate already congested and 'full' roads, put children and others in danger and adversely impact the nature and character of the Roundwood area very considerably.

Conclusion:

Suggesting (as the Green Belt Review does) that the footpath is improved will make little if any difference. An area which 1) falls within the Chilterns Beechwoods Special Area of Conservation (CBSAC) Zone of Influence (ZOI), 2) if lost will also require provision to be made for a new Suitable Alternative Natural Greenspace (SANG), and 3) has all of the other factors set out above making development not only hugely undesirable but also unlawful under current planning rules, should remain in the green belt. Just because it is a field owned by a developer does not mean it becomes a 'grey belt' area. Being on the edge of a conservation area is also not a reason to allow it to become a 'grey' area or to allow new houses to be built which will go beyond the housing line, requiring the conservation area lost to be replaced and imposing a real threat to the rest of the local green belt. All of this, plus all the access issues highlighted above, means the horse field must remain in the conservation area and in the protected green belt.

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I do not consider that the green belt should be used for housing. My particular concerns relate to site M16 - Falconers Field, Harpenden, AL5 3ES (HELAA Ref HT-04-21; Green Belt Sub Area Ref SA-17 / RA-14), which is known locally as the horse field. The horse field is part of an important conservation area (the Chilterns Beechwoods Special Area of Conservation Zone of Influence). Just because it is owned by a developer that has put it forward seems to be why it is being considered for release. It is particularly concerning that the area identified goes beyond the building line. It passes the green belt purposes tests to the same extent as the rest of that conservation area which is not being released.

In particular, releasing it encourages encroachment on the rest of the land as well as further urban sprawl. In addition, the site is accessed from a rural road and there are important safety concerns if traffic and the number of pedestrians are to increase. It will ruin an important part of the area's character which I was lucky to grow up with and would wish children and people to continue to benefit from a safe and characterful area.

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*The Local Plan does not currently reflect the requirements of/guidance in the NPPF and I have identified a number of flaws in the process that has been used - for more details of these please see the supporting documents that I have uploaded (see box 6 below).*

Supporting Document Text:

The following comments relate to site M16 - Falconers Field, Harpenden, AL5 3ES (HELAA Ref HT-04-21; Green Belt Sub Area Ref SA-17 / RA-14). For ease in my comments I will refer to this site as the "horse field" as that is what it is known as by the local community, which greatly values the amenity of this site.

In 2013 I helped form a large local residents group which successfully resisted a proposal to develop a site (known as New Farm) adjacent to the Falconers Field (green belt) horse field site that has now been selected for consideration for development under the new draft local plan.

Subsequently, as part of the work on the last SADC local plan (which of course ended up being withdrawn), the council commissioned an assessment of the green belt land at the horse field (and beyond). That assessment only identified land up to the current building line (i.e. level with the gardens of the adjacent houses on Falconers Field) in the horse field as meriting consideration for potential development. (I have a copy of that plan, which I have uploaded along with this representation.) This in itself we contested as it is incorrect to assess in isolation the merits of only a small section of a parcel of green belt land and the horse field forms part of a much larger green belt parcel (which includes New Farm).

We then noticed that, without any explanation, the site map was replaced by a new site map which included land in the horse field that went beyond the building line. We never got an answer as to how this could have happened. In any event, none of the horse field was ultimately included for development in that iteration of the local plan so it was an issue that we did not need to pursue.

The current proposal makes the same error again (by including the whole of the horse field) and indeed in all other respects the reasons why the previous proposal was not viable and had to be withdrawn still apply today (in fact they apply to an even greater degree today). For example, we as local residents have done some initial counts of the road use at Falconers Field as Roundwood Park School means this is a significant factor. Falconers Field has a grit skip showing it is a vulnerable, hazardous road and the post box was moved for this reason too. Roundwood Lane is designated a rural road so children walking along there is not a sensible option either, nor (because of that designation) must any development increase its use by 10% or more - which, if the proposal to develop the horse field were to be approved, would very likely happen.

In addition, there are numerous other serious flaws in the current proposal to earmark the horse field for development. These flaws include the following:-

1. The wrong area has been assessed in the St Albans Stage 2 Green Belt Review (the "**GBR**") as regards this site. This is because in the plan and description of the site in the draft Local Plan (as shown in Appendix 1 – Local Plan Sites) it is clear that this site M16 only includes the horse field itself, whereas the GBR **incorrectly assesses (as sub-area SA-17) the horse field together with the adjoining school playing field** (which is part of Roundwood Park School and is not, and has never been, part of this process/the call for sites) **as one unbroken area**. The assessment of the site in the GBR is therefore invalid.
2. In the GBR assessment sub-area SA-17 scored very highly for some of the green belt purposes - particularly for both criteria of purpose (1) (To check the unrestricted sprawl of large built-up areas). This compellingly demonstrates the very important contribution that the site currently makes to the green belt, particularly when coupled with the fact that the site also clearly fulfils green belt purpose (3) (To assist in safeguarding the countryside from encroachment).

3. The GBR's recommendation that the loss of the horse field from the green belt would require replacement through the provision of a Suitable Alternative Natural Greenspace elsewhere manifestly reveals the truth that it would be much better not to allow the horse field to be removed from the green belt in the first place!
4. The Sustainability Appraisal (SA Report, September 2024), together with other supporting documentation published as part of this consultation, reveals the following in respect of the horse field site:

o Most of the site lies within the Chilterns Beechwoods Special Area of Conservation (CBSAC) Zone of Influence (ZOI).

o In the red-amber-green analysis in the table that appears on page 148 of the SA Report the site is assessed as red under each of the "SAC", "Agricultural land" and "Multiple deprivation" criteria and light red in relation to being in an Area of Outstanding Natural Beauty ("AONB").

o If the site were to be approved for development appropriate contributions must be made towards the Strategic Access Management and Monitoring Strategy (SAMMS).

o Development proposals would also need to make provision for a new Suitable Alternative Natural Greenspace (SANG), or alternatively contribute towards the maintenance of a suitable SANG project elsewhere.

o Contributions / enhancements would be required to support relevant schemes in the LCWIP and GTPs as indicated in the TIA. These would need top include traffic calming on Roundwood Lane, and segregated cycling on Luton Road.

o Proposals must include support for improvements to the local rights of way network, including access to the footpath adjacent to the western boundary and the Nickey Line.

o All of the above issues, taken together, render the horse field site unsuitable for development.

5. It is an established rule of planning law that development in the green belt should not be approved unless "very special circumstances" apply. Such "very special circumstances" patently do not exist in the case of the horse field site.
6. As a broader comment, it should be noted that the Harpenden Green Belt Association ("**HGBA**") has been very focused on resisting the proposed L&G development (i.e. site **B7 - North West Harpenden, AL5 3NP**) but this should in no way be seen as any kind of tacit endorsement (by the HGBA or any other local residents) of the idea of the development of any of the other green belt sites in or around Harpenden. The horse field, for example, is totally unsuitable for development and each site must be considered on its own merits – and there must certainly be no question of smaller sites such as the horse field being earmarked for development in order to 'make up the numbers' for the SADC new housing target if one or more of the larger sites are rejected for development as part of this process.
7. Another comment with broader application is that the Local Plan appears to take no account whatsoever of changes in UK Government planning policy (updating the NPPF guidelines) which (i) amended local authorities' housing targets in order to allow for the green belt to be protected and (ii) put the onus on local communities to decide how many new houses their area can sustain and where those houses should be built.

It is very clear from the above that the horse field is highly unsuitable for development and must be removed from the list of sites that are being considered for development under the Local Plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. M16 - this site appears to have the following problems:

- nothing about affordable housing. 39 presumably large 5-6 bedroom houses in an already packed area.

- congestion added due to closeness to Roundwood Park School. Area currently congested on school days.

- potential drainage issues. Current field soaks up large amount of water. Potential for localised flooding if this is removed

- area of Green Belt which is protected so should not be used for housing for 'rich people' and presumably intent of developers would be to expand afterwards into further green belt area

- several houses nearby have solar panels the usefulness of which likely to be reduced by closeness of houses.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). **Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I live at [redacted] close to the junction with Roundwood Park and the Roundwood park comprehensive school. I have daily problems with parents parking as it is impossible to see past the parked cars as I try to get out of my house. It is near impossible to see moving vehicles which come round the corner too fast and likely to hit both my car and other cars coming into the road. Further houses will make life even more dangerous. Currently there are builders vehicles parked all day as work is going on in Roundwood Park .

Roundwood Lane is a narrow lane and passing vehicles need to slow down to pass each other safely. I personally have twice had my wing mirrors destroyed by school parents large cars driving too fast. These have cost me over £100 each time. Extra traffic means more accidents.

The water supply to the road is often poor and more houses mean extra pressure on water, gas and electricity and internet supply.

I have been told by the fire brigade that the land behind our houses absorbs water like a sponge until it finally discharges large quantities which flow past the Bell public House onto the A1081.

More houses mean more Sewage with difficulties with inadequate pipe work.

Currently Falconers Field is designated green belt land. This is for the purpose of keeping people healthier especially with breathing problems causing people being unable to work and contribute to the National Economy. In the past we have proved the council to dishonest in their attempts to turn the land into brown belt. Are we to assume that this practice will continue? If houses are built what is to stop further development down to the M1?

I am aware of more detailed objections by my fellow residents and back their submissions wholeheartedly. I wish to take my point seriously and cease the planning to an area and town already with overcrowding problems.

**339 - Jayne and Duncan Lewis**

Submission Number: 339 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Name: Jayne and Duncan Lewis

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The following comments relate to site M16 - Falconers Field, Harpenden, AL5 3ES (HELAA Ref HT-04-21; Green Belt Sub Area Ref SA-17 / RA-14). For ease we (Duncan and Jayne Lewis) will refer to this site as the "horse field" as that is what it is known as by our local community.

In 2013 local residents successfully resisted a proposal to develop a site (known as New Farm) adjacent to the Falconers Field (green belt) horse field site that has now been selected for consideration for development under the new draft local plan. Quite why this is being reconsidered after so much time, effort and money went into investigating first time round only to have it found to be an unsuitable site, remains a mystery to us.

Traffic considerations were last time extensive (not least the inability of the top part of Roundwood Lane to cope with an increase in volume); additionally, the new road markings along Roundwood Park around the school have already increased the volume of traffic in Falconers Field (including cars parked during the school day).

We very much oppose the proposal to use the horse field site for development.

**345 - Sharon Hill**

Submission Number: 345 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Name: Sharon Hill

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

My comments below relate to site M16 - Falconers Field, Harpenden, AL5 3ES (HELAA Ref HT-04-21; Green Belt Sub Area Ref SA-17 / RA-14), which I will refer to as the “horse field”. Most of these comments have been prepared by my neighbour and I have used in this submission as I wholly support all the points being made and sincerely hope this will be taken into consideration prior to a final decision being taken.

Summary:

The horse field is part of an important and identified conservation area (the Chilterns Beechwoods Special Area of Conservation Zone of Influence) and it seems the only reason it has been considered for release now is because it is owned by a developer that has put it forward and it was only then included in the most recent plan. It passes the green belt purposes tests to the same extent as the rest of that conservation area which is not being released. The plan is looking to

release land beyond the building line and beyond a previous map drawn up by the council's advisers and in particular, extending beyond the building line encourages encroachment on the rest of the land and the site is accessed from a rural road so there are important safety concerns if traffic and the number of pedestrians are to increase (as would be inevitable).

Openness and Encroachment:

Allowing a development which juts out into the open conservation land beyond the building line and has plans already drawn up which include a cul-de-sac ending at the boundary of the site and apparently ready to head into the adjoining green belt land at New Farm is clear and strong evidence that it puts the rest of the conservation green belt area at risk. It strongly suggests that the assessment of all the horse field has been influenced by who owns that part of the land and put it forward, rather than by the outcomes of successive previous green belt assessments which deemed that the horse field should be kept in green belt and conservation area and was not suitable for development. Accordingly, when the selection of the horse field is apparently driven by who owns that part of the land rather than by applying common sense as well as the correct regulations about not allowing a build to jut out into a green belt (and conservation) area, it is clear that the assessments of all of that field are fundamentally flawed and none of the field should be released.

Access/Traffic:

Falconers Field is accessed by two roads. Both are steep and uphill from the main road. One access road is a designated rural road - Roundwood Lane. So by designation as a rural road it is not allowed to have development which would increase its use more than minimally. Further up Roundwood Lane it is often not possible to use it when there has been a lot of rain or snow and many avoid it anyway as it is mostly a single-track lane. The severe limitations of these access roads are partly why a residents group of over 200 members campaigned against and defeated a planning application to change use (to playing fields) of a parcel of the green belt ten years ago (known as 'New Farm') which this horse field site is part of. Although the applicant withdrew its plans this was done after the residents submitted their own commissioned traffic report. Indeed I note those opposing the L&G development on the A1081 north of Harpenden have commissioned their own traffic report which shows that the amount of traffic has been underestimated and there will be major queues and rat runs locally as well as safety issues.

The other access road is Roundwood Park which, due to Roundwood Park School, is already at full capacity with considerable parking restrictions and is also heavily used by school buses. It is the only road the school buses are allowed to come up given the rural road designation of Roundwood Lane. Roundwood Park in turn leads to Luton Road via Park Hill. Given the protected Nickey Line and bridge over the A1081 it is not possible to improve access to the Roundwood area and it is already suffering bottlenecks and drivers resorting to dangerous manoeuvres on pavements busy with schoolchildren as well as the road into Harpenden being heavily congested. These roads get worse when there are problems with the local section of the M1 and such problems are not infrequent. Even without any additional L&G housing on Luton Road the roads are already at capacity in the Roundwood area. If L&G do build then the area around, including the Roundwood area, will absolutely need protecting from any additional development.

Over the past decade it is very noticeable how much busier the roads have become.

Falconers Field itself is a winding road with sharp bends and a fork. Visability at the fork is particularly limited. I have had many near misses as cars appear and as we negotiate and allow each other to pass. When Roundwood Park was recently blocked the fork on Falconers Field became extremely busy with traffic and getting in and out of the cul-de-sac safely was incredibly difficult. Traffic measures cannot remedy this due to the houses which are built by the junction. Safety is a genuine and major concern if Falconers Field and nearby roads were to see an increase in traffic.

With the parking restrictions on Roundwood Park more congestion has been pushed into Falconers Field so the situation on Falconers Field is worse not better now than when those planning decisions were made in the past. Some residents recently took it in turns to observe and log the number of children crossing the fork on foot, which is particularly high, and we observed cars having to quickly stop due to, for example, children crossing the road and groups spilling onto the road as they pass each other and pass pushchairs. If in the past it was considered too dangerous to increase the use of Falconers Field and traffic on nearby roads then why should it be considered more acceptable now to put the lives of pedestrians - the majority of them children - at risk?

Preserving the green belt land next to Falconers Field - land which is in the Chilterns Beechwoods Special Area of Conservation Zone of Influence - is very effective in keeping urban sprawl restricted as, inter alia, it keeps the number of road users down.

Community importance:

An important function of the green belt is to safeguard the character of a community and the horse field has been an integral part of the community as it is visible open green land in the Roundwood area and the only such land with an adjacent pavement (the only other visible green land in the area - and indeed the horse field is part of it - is that which is visible from Roundwood Lane which leads away from Harpenden and which has more limited pedestrian access). Accordingly, the horse field meets an important criteria of green belt that should have been given far greater weight in its assessment.

Any houses that get built on the horse field won't be genuinely affordable housing. It will not benefit the community. They won't be cheap enough for first time buyers nor to make it possible for local residents to move elderly parents closer. It's a sad reality and any pretence otherwise is simply that. So the only real benefit will be to the developers' pockets and not to the community whose local area will be irrevocably damaged for only the developer's pocket. The horse field is not some piece of 'grey belt land' (to use the new government's terminology in its draft revised NPPF) but genuinely important green belt land and part of a conservation area. Of course new houses need to be built in the UK today and we recognise that local authority new housing targets are a reality, but there needs to be proper planning with new towns and better use of brownfield land. Every year the number of dwellings which are not lived in increases significantly. The purposes of why the green belt came about in the first place are more important now and not less, particularly as climate issues have become so vital.

Additional important functions of the horse field:

An easement of access exists from the gate (where the horse field abuts Falconers Field on the bend in the road) across to the Roundwood Park School playing field. This right of access is not taken into account either in the plans or elsewhere in the Green Belt Review.

Residents (not the owner of the horse field or the council) have used and maintained the strip of land at the end of the cul-de-sac on Falconers Field for decades and claim ownership of it due to adverse possession.

The horse field is often under water in heavy rain and absorbs a lot water for the area which, given the frequent flooding on the main road (even with recent changes made to improve the road) at the bottom of the hill, serves a very important function.

Not only does controlling congestion help our air quality, the green belt is an effective and important way to reduce pollutant concentration in the ambient air. Given Harpenden itself is in a valley this is particularly important.

The wildlife that use the horse field and this conservation area should not be underestimated. The small stable buildings in the horse field house bats and a regular topic on the street WhatsApp is enjoying the local wildlife spotted.

Serious concerns about how the horse field has been included:

There are serious concerns about how the horse field has come to be included in this list of sites for consideration for development. In 2013 a review of the green belt took place. It recommended a further look at half of the horse field – but only up to a line level with the gardens of the houses at the end of the cul-de-sac part of Falconers Field. However, during this process the area under consideration suddenly became all of the horse field, therefore jutting way out into the green belt. Which happens to coincide with the land owned by the developer. We understand coouncil were unable to provide any explanation whatsoever for this change. Indeed it could be argued that what went on was all rather suspicious.

Now turning to the fact that the horse field - although being part of green belt and hence considered vitally important - is now deemed by the Green Belt Review not to be serving particularly well the purpose of "preventing neighbouring towns from merging". If you cut off a section of the green belt – as is the proposal in relation to the horse field - then it will always serve the purpose less and it's why all of the relevant green belt land is meant to be judged as a whole. The horse field should not have been treated differently to the green belt that it is part of just because a developer owns it. However what this latest Green Belt Review has done is group it together with the adjoining school field and incorrectly assess that whole area in terms of its contribution to the green belt. In that context it is not surprising that the land scored less well on achieving the above mentioned green belt purpose – though it should be noted that the horse field scored very highly for achieving other green belt purposes. So the Green Belt Review assesses the wrong area in relation to this site and that also means it ignores the fact that the development of the horse field as currently proposed will jut into the greenbelt and beyond the houses/building line of Falconers Field. Having seen a plan of the proposed development on the horse field, I have to question why does the proposed new road stop adjacent to the green belt owned by Herts County Council instead of that part of land being used for a house? Does this mean it threatens its adjacent Green Belt too? Given the flawed assessment both in 2013 and in the new Green Belt Review and the inexplicable change in the area being assessed you can see why I have serious concerns as to why the whole horse field is now being put forward as it has been. The horse field was not in previous draft local plans so it should not be considered less important - or more suitable for release for development - just because a developer put it forward. For the character of the area and the safety of road users it would be terrible to lose even part of the horse field but to have the whole of the horse field developed and it jutting well out into the green belt makes no sense and would be devastating for the area.

As a broader comment, it should be noted that I understand the Harpenden Green Belt Association ("HGBA") was primarily set up by residents who were very focused on resisting building on what is now the proposed L&G development site (i.e. site B7 - North West Harpenden, AL5 3NP) but this should in no way be seen as any kind of tacit endorsement (by the HGBA or any other local residents) of the idea of the development of any of the other green belt sites in or around Harpenden. The horse field, for example, is totally unsuitable for development and each site must be considered on its own merits – and there can certainly be no question of smaller sites such as the horse field being earmarked for development in order to 'make up the numbers' for the SADC housing target if one or more of the larger sites are rejected for development as part of this process. Any build in this part of Harpenden will be problematic but given the already difficult access we have going up Park Hill and Roundwood Lane it would be better that any new houses are sited on, or closer to, a main road or at least a road with better access and less congestion.

Given that, due to the recent change in the UK Government's planning policy, the Council now has discretion as to how many houses it allows to be built over the course of the new local plan, it should be delivering on its election promises to protect the green belt. Green belt should only be used in very special circumstances so the presumption should be to protect it and that presumption should be difficult to rebut. The land at Falconers Field should not be a sacrificial lamb to help SADC hit its new build housing numbers. Just because a developer owns the horse field it should not mean it is assessed differently or wrongly in order to get it through this process.

Even leaving aside what this site's release for development will do to the local community's wellbeing, it will greatly exacerbate already congested and 'full' roads, put children and others in danger and adversely impact the nature and character of the Roundwood area very considerably.

Conclusion:

Suggesting (as the Green Belt Review does) that the footpath is improved will make little if any difference. An area which 1) falls within within the Chilterns Beechwoods Special Area of Conservation (CBSAC) Zone of Influence (ZOI), 2) if lost will also require provision to be made for a new Suitable Alternative Natural Greenspace (SANG), and 3) has all of the other factors set out above making development not only hugely undesirable but also unlawful under current planning rules, should remain in the green belt. Just because it is a field owned by a developer does not mean it becomes a 'grey belt' area. Being on the edge of a conservation area is also not a reason to allow it to become a 'grey' area or to allow new houses to be built which will go beyond the housing line, requiring the conservation area lost to be replaced and imposing a real threat to the rest of the local green belt. All of this, plus all the access issues highlighted above, means the horse field must remain in the conservation area and in the protected green belt.

### 359 - Betsy Brown

Submission Number: 359 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Natural England Name: Betsy Brown

Comment Number: 21

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Site allocations**

We have the following comments to make on site allocations, in addition to those we made in our Regulation 18 submission, which have not been repeated in this letter.

*Site allocations requiring SANG*

For the site allocations that require SANG to mitigate recreational pressure impacts on Chilterns Beechwoods SAC, the site-specific policy should include a statement to the effect that Natural England must be consulted at the pre-application stage on the detailed design of the SANG, to ensure that the SANG meets NE's SANG guidelines (2021).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## M17 - North of Wheathampstead Road, Harpenden, AL5 1AB

### 35 - Mrs Emma Hart

Submission Number: 35 Submission Date: 28/10/24 16:23

Respondent: Company/Organisation: Name: Mrs Emma Hart

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

This site is not sound. It forms a critical green space around a protected heritage dwelling. It also sits in an area already oversubscribed in terms of car traffic, and next to a school which should provide cause for concern in terms of increased air pollution and increased traffic and risk to the pupils.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

### 104 - The owners of land north of Wheathampstead Road

Submission Number: 104 Submission Date: 06/11/24 15:02

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: The owners of land north of Wheathampstead Road Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report for details**

**Site M17 – Land North of Wheathampstead Road, Harpenden**

- The Regulation 19 draft Local Plan and accompanying Policies Map identifies the report site as proposed housing allocation ref M17. This proposal is **strongly supported** by the owners of this site. As is set out elsewhere in this report, the land is suitable for development and should be allocated in the Local Plan.
- A total of 38 dwellings is indicatively proposed for the site and this level of provision is supported at this stage of plan-making. The live planning application submitted for the site shows 40 dwellings, which is consistent with the "indicative" estimate of 38 dwellings.
- The policy allocating this site refers to four "key development requirements" and these are listed below, along with a brief commentary on behalf of the landowner:

1. *Support for access for active modes to be delivered on both Piggottshill Lane and onto Wheathampstead Road.*

The planning application submitted for this site (ref 5/2022/2748) was accompanied by a Transport Statement and Active Travel Audit, which identified series of active travel improvements that could be made in the local area. These improvements, together with a section 106 contribution towards wider transport improvements were satisfactory to the Local Highway Authority, who do not object to the application.

2. *Contributions / enhancements to support relevant schemes in the LCWIP and GTPs as indicated in the TIA.*

As for item 1 above, extensive negotiations have taken place with the Local Highway Authority in relation to the planning application and these have led to a "no objection".

3. *The layout of development should minimise any harm to the setting and significance of the Grade II Listed Aldwick Manor and Granary at Aldwickbury Farm; this may include the incorporation of appropriate set backs of development.*

The location of the two Listed Buildings is shown in Figure 6 below. Aldwick Manor is a house dating to circa 1700, although with later additions and alterations. A second Listed Building, a former granary building, is within the historic farm courtyard near to Aldwick Manor. The significance of these buildings is assessed in detail in the Heritage Statement submitted with the planning application (ref 5/2022/2748). This Statement concludes that *"Whilst the land could be said to be part of the wider setting of the two listed buildings it makes no contribution to the significance of these buildings which stand on their own in their contemporary residential settings."* Recent approved development around these buildings has altered their setting and continues the process of change from its agricultural origins.

The indicative layout shown at Figure 7 (Section 5.0) has taken account of the setting of these two Listed Buildings and the indicative form of development has been aligned to create vistas towards and away from the buildings. The detailed layout and materials used would be considered at Reserved Matters stage but for the purposes of the Local Plan work, there is no heritage reason why the site cannot be developed.

4. *Development proposals must take appropriate account of the existing trees on / adjacent to the site.*

Planning application ref 5/2022/2748 was accompanied by an Arboricultural Report and Tree Protection Plan identifying the important trees on and around the site and assessing the impact of the proposed development of up to 40 homes. This work concluded that the dwellings could be accommodated without harming notable trees on or near the site. In particular, the two copses of trees can be retained and incorporated into green space within the development. Similarly, the two groups of trees and one single tree that are the subject of the provisional TPO served on 14 October 2024 (see figure 6 below) can be retained and protected through development.

- In summary, we consider Policy M17 to be **legally compliant** and **sound**. **No modifications** are therefore necessary.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Local Plan representations - Wheathampstead Road - Novembe_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

DLA Town Planning represents the owner and promoter of site M17 and our participation in the hearing sessions would assist the Inspector and help to respond to any queries raised.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 248 - Historic England

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 22

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**M17 - North of Wheathampstead Road, Harpenden, AL5 lAB**

The site is immediately adjacent to two grade H listed buildings. Development has the potential to impact these listed buildings through a change in their settings.

We welcome the preparation of the high level HA by Place Services.

We welcome criterion 3 that references the grade H listed buildings and the need for set backs.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend two slight changes to policy wording throughout the Plan which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend *'conserve and where appropriate enhance the significance of the...[list assets]'*
2. We would recommend amending `may include setbacks etc.' to read `should include setbacks etc'.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## M18 - North East of Austen Way, St Albans, AL4 0XH

### 114 - Hertfordshire County Council - Property Team

Submission Number: 114 Submission Date: 06/11/24 23:21

Respondent: Company/Organisation: Vincent + Gorbing Name: George Sellers

On Behalf Of Company/Organisation: Hertfordshire County Council - Property Team Name:

Comment Number: 8

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

This allocation as currently drafted is not consistent with national policy, thus enabling the delivery of sustainable development. The below suggested wording is intended to address this

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

- The draft allocation sets out the key constraints that have previously been identified. It is however considered that the following amendment should be made to the **M18 North East of Austen Way allocation**:
- Development of the site for housing will only be supported if it is concluded by HCC Children's Services that the site is not required for the expansion of Beaumont School.
- Please see further details set out at Chapter 3 of the attached document.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. SADC Reg 19 Oct 2024 Reps FV3 w apps_compressed_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

It is considered that the changes sought would be best discussed in the forum of the EiP.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**163 - Mr Roy Warren**

Submission Number: 163 Submission Date: 07/11/24 13:18

Respondent: Company/Organisation: Sport England Name: Mr Roy Warren

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

While no comment is made on the principle of the allocation, requirement 5 relating to development considering and addressing the potential lighting/noise impacts with the existing artificial grass pitch and cricket ball strike risk on the adjoining Beaumont School site is welcomed. This would help ensure that any prejudicial impact on the use of these sports facilities would be addressed by the development. This approach would be consistent with paragraphs 103 and 193 of the NPPF.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

---

**248 - Historic England**

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 23

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

**M18 - East of Austen Way, St Albans, AL4 0XH**

The site is immediately adjacent to two grade H listed buildings. Development has the potential to impact these listed buildings through a change in their settings.

We welcome the preparation of the high level HA by Place Services.

We broadly welcome criterion 3 of the policy. However, the policy should include the recommendations from the HA relating to the retention of open space to the north and west of the listed buildings with built form located to the northeast of the Site as well as an appropriate landscaping scheme.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, `*The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.*'

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The policy should include the recommendations from the HA relating to the retention of open space to the north and west of the listed buildings with built form located to the northeast of the Site as well as an appropriate landscaping scheme.

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend two slight changes to policy wording throughout the Plan which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend *'conserve and where appropriate enhance the significance of the...[list assets]'*
2. We would recommend amending `may include setbacks etc.' to read `should include setbacks etc'.

## M19 - Piggottshill Lane, Harpenden, AL5 5UN

### 110 - Thames Water Utilities Limited

Submission Number: 110 Submission Date: 06/11/24 15:39

Respondent: Company/Organisation: Thames Water Utilities Limited Name: Mr Chris Colloff

On Behalf Of Company/Organisation: Thames Water Utilities Limited Name:

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The development site is located in close proximity to Harpenden STW. To ensure that the amenity of future occupiers is protected it is considered that specific reference should be made to the need for any development to demonstrate how the amenity of future residents from will be protected from any noise, odour, lighting or flies including how necessary mitigation will be secured and delivered.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is considered that point 5 should be expanded for clarity of requirements of new development proposals to state:

"5. In accordance with adopted Waste Local Plan Policy 5: Safeguarding of Sites, the nearby safeguarded Sewage Treatment Works must be considered in the design to ensure no unreasonable restrictions are placed upon the facility and the proposal does not prejudice its current or future operation. The Waste Planning Authority must be involved in scheme Design and will be directly consulted on any planning application at the site. **Development proposals need to demonstrate that there is no unacceptable impact on amenity of residents from odour, noise, lighting or flies. Where mitigation is necessary, proposals will need to set out how mitigation will be secured and delivered."**

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**145 - Catesby Estates**

Submission Number: 145 Submission Date: 07/11/24 11:13

Respondent: Company/Organisation: Stantec Name: Mr P Derry

On Behalf Of Company/Organisation: Catesby Estates Name:

Comment Number: 22

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The supporting text in Part B confirms that Piggotshill Lane is narrow and cannot serve as a vehicle access, and there is no pedestrian provision. It is therefore unclear how this site can be safely accessed as there are no other connection points. The site is not therefore considered accessible and should be removed as an emerging allocation. The remediation of the sewage works would also be costly and would likely take a significant time period. The trajectory does not allow for an assessment as to the timeframes proposed to bring this site forward.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**193 - Catesby Estates PLC**

Submission Number: 193 Submission Date: 07/11/24 15:55

Respondent: Company/Organisation: LDA Design Name: Mr Matthew Gibson-King

On Behalf Of Company/Organisation: Catesby Estates PLC Name:

Comment Number: 20

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In summary, there are a number of draft allocations which raise concerns on consistency:

The supporting text in Part B confirms that Piggotshill Lane is narrow and cannot serve as a vehicle access, and there is no pedestrian provision. It is therefore unclear how this site can be safely accessed as there are no other connection points. The site is not therefore considered accessible and should be removed as an emerging allocation.

The remediation of the sewage works would also be costly and would likely take a significant time period. The trajectory does not allow for an assessment as to the timeframes proposed to bring this site forward.

We have to conclude that not only does the Regulation 19 Plan fail to allocate sufficient sites for housing, or enough in the early stages of the Plan Period, but that Windridge Farm is a stronger contender than some sites the Plan does propose as allocations, even on the Council's terms.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 195 - The owners of land at Piggottshill Lane

Submission Number: 195 Submission Date: 07/11/24 16:35

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: The owners of land at Piggottshill Lane Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report for details**

**Site M19 – Land at Piggottshill Lane, Harpenden**

- The Regulation 19 draft Local Plan and accompanying Policies Map identifies the report site as proposed housing allocation ref M19. This proposal is **strongly supported** by the owners of this site. As is set out elsewhere in this report, the land is suitable for development and should be allocated in the Local Plan.
- A total of 29 dwellings is indicatively proposed for the site and this level of provision is supported at this stage of plan-making.
- The policy allocating this site refers to "key development requirements", which are repeated below, along with a brief commentary on behalf of the landowner:

1. *Piggottshill Lane is narrow and cannot serve as the vehicle access route due to the scale of development and nature of the lane and there is currently no pedestrian provision. Suitable access and design across land to the west of the site, including for pedestrians and cyclists, will need to be agreed with the County Council.*

The limitations of Piggottshill Lane in providing vehicular access for a site of this scale are recognised. The planning application made on this site recently (ref. 5/22/2616) established that vehicular access for up to 6 dwellings down Piggottshill Lane was acceptable, subject to various mitigation works in the form of passing places, and this forms part of the context for considering access to a larger number of dwellings. Discussions have taken place with the owners of the land west of this site (St Albans City and District Council) with a view to providing vehicular access from Waldegrave Park to serve development on site M19 alongside potential development of the adjacent site UC47, as envisaged in Policy M19.

2. *Access including for pedestrians and cycles to the allocated site to the west (Site UC47) must be facilitated.*

The agreement on access would cover both access from Waldegrave Park to the west through site UC47 and access from Piggottshill Lane through site M19.

3. *Contributions / enhancements to support relevant schemes in the LCWIP and GTPs as indicated in the TIA.*

The Local Highway Authority would seek a section 106 contribution towards sustainable travel, which would address contributions to wider transport schemes.

4. *Contributions to wider active travel routes including to the Town Centre and train station should be considered and could include crossing and junction improvements along Crabtree Lane as well as footway improvements along Aldwickbury Crescent / Dalkeith Rd (all as per LCWIP).*

As above, this would be addressed at planning application stage, although the scale of the site is likely to mean that contributions are limited.

5. *In accordance with adopted Waste Local Plan Policy 5: Safeguarding of Sites, the nearby safeguarded Sewage Treatment Works must be considered in the design to ensure no unreasonable restrictions are placed upon the facility and the proposal does not prejudice its current or future operation. The Waste Planning Authority must be involved in scheme Design and will be directly consulted on any planning application at the site.*

Noted, the presence of the Sewage Treatment Works needs to be considered at the design stage but is not expected to be a constraint.

6. *Take appropriate account of these Environmental Constraints: Source Protection Zone (SPZ) 3; Historic Landfill.*

A Phase One Desk Study has been undertaken on the site by JNP Group. This report identified a number of issues that would need further exploration at planning application stage but none that would prevent the allocation of the site.

- In summary, we consider Policy M17 to be **legally compliant** and **sound**. **No modifications** are therefore necessary.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Local Plan representations - Piggottshill Lane - November 2024 FIN_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

DLA Town Planning represents the owner and promoter of site M19 and our participation in the hearing sessions would assist the Inspector and help to respond to any queries raised.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**224 - Redington Capital Limited & CALA Homes**

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 15

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Redington Capital Limited and CALA Homes **object** to Part B (Site Allocations) which forms part of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

Redington Capital Limited and CALA Homes conclude that the site allocation selection process undertaken by the Council is unsound. They recommend that the site selection process should be completely reviewed, revised and the draft allocations re-assessed in a transparent and consistent approach particularly in applying the recommendations of the GBR.

In addition to the above, there are a number of other concerning questions regarding some of the Broad Location sites and other housing site allocations chosen by the Council, including:

- Site M19 (29 homes) – This site does not benefit from adequate access arrangements and is undeliverable (or has less capacity than suggested).

It is clear from the above that the Council has chosen to allocate site:

- In locations deemed to be of strong importance to the purposes of the Green Belt;
- That are not located within the most accessible and sustainable locations; and
- That are either undeliverable or their capacity has been grossly over-estimated.

This demonstrates that the site allocations strategy adopted by the Council needs to be fundamentally reviewed and revised.

This conclusion is further exacerbated when considering the Council has chosen to ignore other more accessible and sustainable sites in lower tier settlements, including Redington Capital Limited and CALA Homes' site (Land South of Chiswell Green Lane), which:

- Benefits from high levels of accessibility by public transport and to local services (as demonstrated in Section 7 below);
- Has less harm to the purposes of the Green Belt (as demonstrated in Section 1 above);
- Is available and deliverable at a density of development that has previously been supported by the Council's planning officers when recommending approval of application ref: 5/2022/0927 (as demonstrated in Section 7 below);
- Is supported by the Inspector when determining Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024; and
- Upheld by the SOS's decision.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council:

- Should be more realistic about its choice of housing sites to deliver its critical housing needs. Some of the current set of site allocations appear to have been included / inflated to "make up the numbers." We therefore strongly recommend that the site allocations are reviewed again and the Council should:
- Remove any sites that are undeliverable;
- Reduce the expected capacity of sites that are obviously constrained and will not therefore delivery the density suggested; and
- Provide evidence to justify all site inclusions and their estimate capacity.
- Include new broad location housing sites that:
- Are located in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and services or will not be used by the district's residents;
- Result in less harm to the purposes of the Green Belt; and
- Are available and deliverable.

Redington Capital Limited and CALA Homes recommends that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing and education land allocation in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

M19 - Piggottshill Lane, Harpenden, AL5 5UN

The Minerals and Waste Planning Authority welcomes the text of requirement 5 of the key development requirements for proposed allocation M19 that includes the consideration of adopted Waste Local Plan Policy 5: Safeguarding of Sites. However, the District Council must carefully consider the suitability of this allocation for residential use due to its proximity to safeguarded Sewage Treatment Works.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

### 317 - Taylor Wimpey Strategic Land

Submission Number: 317 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Sam Hollingworth

On Behalf Of Company/Organisation: Taylor Wimpey Strategic Land Name:

Comment Number: 3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Specific Proposed Allocations in Harpenden**

4.17 We have a number of concerns with specific allocations proposed by the DLP to deliver homes in Harpenden, and their deliverability over the plan period.

M19 - Piggottshill Lane, Harpenden, AL5 5UN 4.18 Key development requirement 1 states:

*"Piggottshill Lane is narrow and cannot serve as the vehicle access route due to the scale of* ***development and nature of the lane and there is currently no pedestrian provision. Suitable access and design across land to the west of the site, including for pedestrians and cyclists, will need to be*** *agreed with the County Council"*

4.19 However, it is unclear from the DLP that alternative, suitable access to Piggotshill Lane can be achieved to serve development of the Site. From the policy text, this appears to be a prerequisite for any development, but at the same time one which the feasibility of achieving has yet to be confirmed.

4.20 The Site is in close proximity to the town's Sewerage Treatment works, situated under 100m from the Site's northern boundary. We would expect any site within 200m of a sewerage treatment works to require an odour and noise assessment to ensure not only that no unreasonable restrictions are placed on the operation of the facility, but that future residents of the new development would enjoy a reasonable level of amenity. The policy text, key development requirement no.5, does not provide confidence that this issue has been addressed. Instead, one can infer that further work is required to determine whether the Site can suitably accommodate 29 dwellings as per the DLP's estimate of its capacity.

4.21 Prior to further work regarding the potential impact of noise and odour, we do not consider the Site can be regarded as deliverable.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 24-208 TWSL LP Reg19 Pipers Lane - FInal_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We consider it would be of benefit to discuss the potential need for modifications as set out within our representations with the Council, Examining Inspector(s), and other stakeholders in the hearing sessions.

### 123 - Jarvis Homes

Submission Number: 123 Submission Date: 07/11/24 09:30

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: Jarvis Homes Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**M20 – Lower Luton Road, Harpenden**

4.1 The Regulation 19 draft Local Plan and accompanying Policies Map identifies the report site as proposed housing allocation ref M20. This proposal is **strongly supported** by the promoters of the land. As is set out elsewhere in this report, the site is suitable for development and should continue to be allocated in the Local Plan.

4.2 A total of 25 dwellings is indicatively proposed for the site and this total seems an appropriate figure at this stage of plan-making.

4.3 The policy allocating this site refers to "key development requirements". These are repeated across with some commentary on each on behalf of the site promoter. None of the requirements present a problem for the development of the site.

4.4 *1. There must be no residential development outside Flood Zone 1 and the Exception Test is required because part of the site is within Flood Zone 2, 3a, 3b and the development type is 'More Vulnerable'. The site is also at risk of other sources of flooding including surface water and ground water.*

Potential flood risk has been carefully considered in the indicative site concept and will continue to be a design consideration moving forward. The indicative proposals outlined in Section 6.0 of this report reflect this by showing all residential development within what is currently indicated by the Environment Agency as Flood Zone 1, in line with Policy M20 and national guidance. As more detailed modelling information becomes available the extent of developable land may vary and flexibility should be retained to maximise the capacity of the site.

4.5 2. *Safe site access for pedestrians, cyclists and vehicles must be provided that connects through and to the shared use path on north side of lower Luton Rd.*

The Access Appraisal at appendix 3 to this report sets out how an acceptable form of access can be provided. The Access Appraisal also describes how a connection can be made to the shared use path on the north side of Lower Luton Road. This would satisfy the requirements of policy M20. In addition, the indicative layout shows scope for an additional pedestrian and cycle linkage through the site. This has the benefit of enabling users to avoid the short section of Crabtree Lane which is narrow and has no footway. This is an additional benefit.

4.6 *3. Contributions / enhancements to support relevant schemes in the LCWIP and GTPs as indicated in the TIA.*

4. *Contributions to wider active travel routes including to the Town Centre and train station should be considered and could include crossing and junction improvements along Station Rd and / or Crabtree Lane (as per LCWIP).*
5. *Support for improvements for active travel to the Wheathampstead Bridleway 097 is required as part of compensatory improvements to access to the Green Belt.*

These contributions and improvements can be achieved through Section 106 agreements or similar legal mechanisms to ensure long-term commitment to active travel infrastructure and sustainable connectivity.

4.7 In summary, we consider Policy M20 to be **legally compliant** and **sound**. **No modifications** are therefore necessary.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Local Plan representations - Batford Forge - Jarvis - November 2024 FINAL_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

DLA Town Planning represents the owner and promoter of site M20 and our participation in the hearing sessions would assist the Inspector and help to respond to any queries raised.

**224 - Redington Capital Limited & CALA Homes**

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 16

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Redington Capital Limited and CALA Homes **object** to Part B (Site Allocations) which forms part of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

Redington Capital Limited and CALA Homes conclude that the site allocation selection process undertaken by the Council is unsound. They recommend that the site selection process should be completely reviewed, revised and the draft allocations re-assessed in a transparent and consistent approach particularly in applying the recommendations of the GBR.

In addition to the above, there are a number of other concerning questions regarding some of the Broad Location sites and other housing site allocations chosen by the Council, including:

- Site M20 (20 homes) – The site is located within a nature corridor and is part of a strategic view in the neighbourhood plan. It is therefore undeliverable (or has less capacity than suggested).

It is clear from the above that the Council has chosen to allocate site:

- In locations deemed to be of strong importance to the purposes of the Green Belt;
- That are not located within the most accessible and sustainable locations; and
- That are either undeliverable or their capacity has been grossly over-estimated.

This demonstrates that the site allocations strategy adopted by the Council needs to be fundamentally reviewed and revised.

This conclusion is further exacerbated when considering the Council has chosen to ignore other more accessible and sustainable sites in lower tier settlements, including Redington Capital Limited and CALA Homes' site (Land South of Chiswell Green Lane), which:

- Benefits from high levels of accessibility by public transport and to local services (as demonstrated in Section 7 below);
- Has less harm to the purposes of the Green Belt (as demonstrated in Section 1 above);
- Is available and deliverable at a density of development that has previously been supported by the Council's planning officers when recommending approval of application ref: 5/2022/0927 (as demonstrated in Section 7 below);
- Is supported by the Inspector when determining Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024; and
- Upheld by the SOS's decision.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council:

- Should be more realistic about its choice of housing sites to deliver its critical housing needs. Some of the current set of site allocations appear to have been included / inflated to “make up the numbers.” We therefore strongly recommend that the site allocations are reviewed again and the Council should:
- Remove any sites that are undeliverable;
- Reduce the expected capacity of sites that are obviously constrained and will not therefore delivery the density suggested; and
- Provide evidence to justify all site inclusions and their estimate capacity.
- Include new broad location housing sites that:
- Are located in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of ‘higher tier settlements’ that benefit from far less access to transport and services or will not be used by the district’s residents;
- Result in less harm to the purposes of the Green Belt; and
- Are available and deliverable.

Redington Capital Limited and CALA Homes recommends that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council’s HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing and education land allocation in the Draft Local Plan. This can be achieved via a ‘minor modifications to the Local Plan’ during 2025 in the lead up EIP.

## M21 - Rothamsted Lodge, Hatching Green, AL5 2JS

### 1 - Mr Russell Collins

Submission Number: 1 Submission Date: 02/10/24 15:10

Respondent: Company/Organisation: Name: Mr Russell Collins

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

- The draft Local Plan has not been prepared in accordance with the legal and procedural requirements for preparing Local Plans because it is late.
- The draft Local Plan does not provide a strategy which seeks to meet the area's objectively assessed needs; and is not consistent with achieving sustainable development;
- The plan is not based on anappropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
-
- The plan is not consistent with national policy – ie not enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

There is no logic whatsoever or consistency with government policy to permit building houses on land previously designated as for use by Rothamsted Research. It is merely convenient for St Albans District Council to approve a small development of 5 residential units (as it did previously adjacent to this site, and these houses have been built) and then a slightly larger one for 20 residential units (as proposed in this Plan) and then, presumably, an "enormous" housing development on land currently designate green belt or used by the Research establishment. There should be a full explanation of the rationale for this site explaining how houses fit in with the

designated purpose currently in the Plan for Rothamsted (the houses will be bought by the public not be Rothamsted employees or associated with the research establishment. In addition, it needs to address the sustainability/environmental impact.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Redington Capital Limited and CALA Homes **object** to Part B (Site Allocations) which forms part of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

Redington Capital Limited and CALA Homes conclude that the site allocation selection process undertaken by the Council is unsound. They recommend that the site selection process should be completely reviewed, revised and the draft allocations re-assessed in a transparent and consistent approach particularly in applying the recommendations of the GBR.

In addition to the above, there are a number of other concerning questions regarding some of the Broad Location sites and other housing site allocations chosen by the Council, including:

- Site M21 (25 homes) – This is a heavily constrained site and is located within the setting of heritage assets. The access to the site also has capacity issues. There is also habitat on the site. It is therefore undeliverable (or has less capacity than suggested).

It is clear from the above that the Council has chosen to allocate site:

- In locations deemed to be of strong importance to the purposes of the Green Belt;
- That are not located within the most accessible and sustainable locations; and
- That are either undeliverable or their capacity has been grossly over-estimated.

This demonstrates that the site allocations strategy adopted by the Council needs to be fundamentally reviewed and revised.

This conclusion is further exacerbated when considering the Council has chosen to ignore other more accessible and sustainable sites in lower tier settlements, including Redington Capital Limited and CALA Homes' site (Land South of Chiswell Green Lane), which:

- Benefits from high levels of accessibility by public transport and to local services (as demonstrated in Section 7 below);
- Has less harm to the purposes of the Green Belt (as demonstrated in Section 1 above);
- Is available and deliverable at a density of development that has previously been supported by the Council's planning officers when recommending approval of application ref: 5/2022/0927 (as demonstrated in Section 7 below);
- Is supported by the Inspector when determining Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024; and
- Upheld by the SOS's decision.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council:

- Should be more realistic about its choice of housing sites to deliver its critical housing needs. Some of the current set of site allocations appear to have been included / inflated to "make up the numbers." We therefore strongly recommend that the site allocations are reviewed again and the Council should:
- Remove any sites that are undeliverable;
- Reduce the expected capacity of sites that are obviously constrained and will not therefore delivery the density suggested; and
- Provide evidence to justify all site inclusions and their estimate capacity.
- Include new broad location housing sites that:
- Are located in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and services or will not be used by the district's residents;
- Result in less harm to the purposes of the Green Belt; and
- Are available and deliverable.

Redington Capital Limited and CALA Homes recommends that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing and education land allocation in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

**248 - Historic England**

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 25

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**M21 - Rothamsted Lodge, Hatching Green, AL5 2GT**

The site lies within the Harpenden Conservation Area, and is adjacent to a Grade H Listed Building, and has Locally Listed Buildings to the east side. Development has the potential to impact these listed buildings through a change in their settings.

We welcome the preparation of the high level HA by Place Services. However, we note that the HA incorrectly states that Rothamsted Manor House is grade II when it is actually grade I. (page 74).

We broadly welcome criterion 3 of the policy. However, the policy should include the recommendations from the HA relating to setbacks from the northern and eastern edges of the site as well as high quality materials to affect the local distinctiveness of the area.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The policy should include the recommendations from the HA relating to setbacks from the northern and eastern edges of the site as well as high quality materials to affect the local distinctiveness of the area.

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend two slight changes to policy wording throughout the Plan which would address this:

1. Instead of ‘minimise any harm to the setting and significance of the… [list assets]’ we would recommend *‘conserve and where appropriate enhance the significance of the...[list assets]’*
2. We would recommend amending `may include setbacks etc.' to read `should include setbacks etc'.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

The location is directly on the west side of Redbourn Lane (partially in a Conservation Area) where there are no other residential developments with direct access in the vicinity and a fully rural outlook. 15 residential units are proposed. The land is currently one house with a "paddock", basically a grassed area, adjacent to trees and fields with a Priority habitat. It is therefore impacting the biodiversity and sustainability of the plan with no remediation given the conservation status.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

---

**89 - The owner of land at Wood End, Hatching Green**

Submission Number: 89 Submission Date: 06/11/24 12:54

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: The owner of land at Wood End, Hatching Green Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report for details**

**M22 – Wood End, Hatching Green, Harpenden**

- The Regulation 19 draft Local Plan and accompanying Policies Map identifies the report site as proposed housing allocation ref M22. This proposal is **strongly supported** by the owners of the land. As is set out elsewhere in this report, the Hatching Green site is suitable for development and should continue to be allocated in the Local Plan.
- A total of 15 dwellings is indicatively proposed for the site (previously 14 at Reg 18) and this density can be achieved on the site and various layout options considered to deliver 15 homes. However, we do note the density of surrounding development is somewhat lower than this. As the draft Local Plan states, the indicative dwelling capacity is only a guide and the appropriate density for the site can be arrived at through pre-application discussions with the local planning authority. Flexibility is provided for through the use of the word “indicative” to cover any subsequent variation in density.
- The policy allocating this site refers to “key development requirements”. These are repeated across with some commentary on each on behalf of the landowner. None of the requirements present a problem for the development of the site.
- *Due to the severance caused by the B487 a high quality crossing facility from the site is required to enable access to the area’s walking and cycling network.*

The proposal will incorporate an uncontrolled crossing, strategically positioned at the most appropriate location, as illustrated in Section 6.0 and detailed in the plan at Appendix 2. This crossing aims to enhance connectivity and facilitate pedestrian and cyclist access, aligning with the Local Highway Authority's (LHA) guidance for pedestrian infrastructure as part of the development.

- *Contributions / enhancements to support relevant schemes in the LCWIP and GTPs as indicated in the TIA.*

This can be secured by S106 or similar legal agreements / mechanisms.

- *The site contains a Locally Listed Building, which must be retained.*

Any application would ensure that the Locally Listed Building at Wood End would be retained and any development would be informed by a detailed Heritage Impact Assessment as stated at page 80 of Place Services St Albans City & District Council High-Level Heritage Impact Assessments.

- *The site lies partially within Harpenden Conservation Area. Development proposals should minimise any harm to the character and appearance of Harpenden Conservation Area and its setting, and minimise any harm to the setting of the Locally Listed Wood End. This may include buildings which are of a comparable scale to nearby detached dwellings but which contain within them multiple dwelling units, so as to ensure efficient use of land while remaining sympathetic to adjacent character.*

Although the site is provisionally proposed for the development of 15 dwellings, any application—guided by a detailed Heritage Impact Assessment—will ensure that the development achieves an appropriate and efficient density. It will also be sympathetic to the character and appearance of the Harpenden Conservation Area, preserving its setting.

- *Development proposals must take appropriate account of the adjacent deciduous woodland Priority Habitat along the western boundary.*

Any development proposal will give careful consideration to this priority habitat, taking all necessary measures to protect and enhance local biodiversity. Should it be required, detailed ecological surveys will be commissioned to assess potential impacts.

- *Take appropriate account of these Environmental Constraints: Source Protection Zone (SPZ) 3; Bedrock Aquifer.*

Any necessary Hydrogeological Risk Assessments would be conducted to ensure comprehensive evaluation and mitigation of potential groundwater or contamination risks associated with the development.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Local Plan representations - November 2024 - FINAL_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

## M23 - Ashdale Lye Lane, Bricket Wood, AL2 3LQ

### 227 - National Grid

Submission Number: 227 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: National Grid (Avison Young) Name: National Grid

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Proposed development sites crossed or in close proximity to NGET assets: Following a review of the above Development Plan Document, we have identified that one or more proposed development sites are crossed or in close proximity to NGET assets. Details of the sites affecting NGET assets are provided below.

**M23 – Ashdale Lye Lane, Bricket Wood -** ZA ROUTE TWR (419 - 522): 400Kv Overhead Transmission Line route: ELSTREE - SUNDON 1

A plan showing details of the site locations and details of NGET assets is attached to this letter. Please note that this plan is illustrative only.

Without appropriate acknowledgement of the NGET assets present within the site, these policies should not be considered effective as they cannot be delivered as proposed; unencumbered by the constraints posed by the presence of NGET infrastructure.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We propose modifications to the above site allocations and/or policies to include wording to the following effect. We propose that these modifications are applied to each of the aforementioned site allocations affected by NGET assets.

**OS1 – Land to the North of Bricket Wood**

*The development will include a strategy forresponding to the NGET Overhead Transmission Cable present within the site,demonstrating how the NGET Design Guide and Principles have been applied at the masterplanning stage and how the impact of the assets has been reduced through good design."*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## M25 - Baulk Close, Harpenden, AL5 4LY

### 357 - Mrs Julia Warren

Submission Number: 357 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Wheathampstead Parish Council Name: Mrs Julia Warren

Comment Number: 17

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**M25 Baulk Close, Harpenden**

This proposal is in the flood plain area. We would repeat the concerns regarding M20, that flood defences at this site could displace the problem to Wheathampstead.

We would, in addition, highlight our concern that the provision of extra housing would lead to increased pressure on the already overburdened sewage treatment facilities and the supply of water. Furthermore, development would result in increased traffic on a rural road system and utilities which are already in need of updating. Any accompanying improvement in this system is likely to be expensive and disruptive.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

Comment Number: 28

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Smallford is a Tier 6 Green Belt Village. As such, it has limited facilities. The 58 dwellings would be better placed in a more sustainable settlement such as St Albans. There are concerns regarding the level of remediation required at the site and the neighbouring landfill, and the potential number of leases at the site. It is noted that an appeal (ref: Appeal Ref: APP/B1930/W/20/3260479) at the site refused consent for 100 dwellings and highlighted impacts upon the surrounding countryside.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

On Behalf Of Company/Organisation: Catesby Estates PLC Name:

Comment Number: 26

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In summary, there are a number of draft allocations which raise concerns on consistency:

Smallford is a Tier 6 Green Belt Village. As such, it has limited facilities. The 58 dwellings would be better placed in a more sustainable settlement such as St Albans. There are concerns regarding the level of remediation required at the site and the neighbouring landfill, and the potential number of leases at the site. It is noted that an appeal (ref: Appeal Ref: APP/B1930/W/20/3260479) at the site refused consent for 100 dwellings and highlighted impacts upon the surrounding countryside.

We have to conclude that not only does the Regulation 19 Plan fail to allocate sufficient sites for housing, or enough in the early stages of the Plan Period, but that Windridge Farm is a stronger contender than some sites the Plan does propose as allocations, even on the Council's terms.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 287 - Hertfordshire County Council Minerals and Waste Planning Policy Team

Submission Number: 287 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council Name: Hertfordshire County Council Minerals and Waste Planning Policy Team

Comment Number: 17

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

P1 - Smallford Works, Smallford Lane, AL4 0SA

The proposed site allocation falls entirely within the Sand and Gravel Belt. BGS data also identifies potential superficial sand/gravel deposits beneath the site.

This site allocation has existing built development to the east. Due to the existing constraints, the council would only encourage opportunistic extraction at this site.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Whilst **not a soundness matter**, the District Council may however wish to add an objective to the 'key development requirements' for this allocation, like that suggested below for M8 – Verulam Golf Club, St Albans, AL1 1JG, to include the following wording or similar:

*Undertake opportunistic extraction of any suitable sand and gravel deposits for use on-site wherever possible, where such deposits are uncovered during construction / excavation works.*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 295 - Smallford Business Park Ltd

Submission Number: 295 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Alex Cole

On Behalf Of Company/Organisation: Smallford Business Park Ltd Name:

Comment Number: 3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

[Please see attachment for full submission]

**The Site**

Smallford Works is a brownfield site, measuring approximately 3.34 ha (8.25 ac), currently in employment use. It is located to the west of Smallford Lane, three miles east of St Albans City Centre. The North Orbital Road (A414 dual carriageway) is access less than half a mile to the south. Smallford village is located on the other side of Smallford Lane, and extends to the A41.

Built development on the site comprises a complex of industrial uses and storage yards, partitioned and providing a variety of open storage type uses (Use Class B8). This includes the storage of construction materials, plant, portacabins, commercial vehicles, and other related items.

The site is designated within both the Metropolitan Green Belt and the Colney Heath Farmland Landscape Character Area.

The site is designated within the draft Plan as previously developed land within the Green Belt, and has an allocation for residential development, with an indicative capacity of 58 units. It is important to note that this is an unexplained reduction from the 80 unit capacity in the Regulation 18 draft, and appears to ignore previous representations to the Regulation 18 consultation, in which SBP clearly stated their intention to retain the site in its existing employment use with potential to deliver intensified employment development on the site in the future.

...

**Site Allocation P1 - Smallford Works**

Smallford Works is allocated in the Regulation 19 draft, and SBP are strongly supportive of the site's allocation, its proposed release from the Green Belt, and its identification as a site capable of sustainably contributing to St Albans' identified needs. However, the capacity and the proposed use are not in line with either the site's potential or its capacity, and the details of the allocation need to be changed to reflect this.

The draft allocation puts the site forward for residential, with an indicative capacity of 58 dwellings. As set out in our Regulation 18 consultation response, the site is being promoted for employment use only and will not be coming forward for residential. The Regulation 19 draft has not been changed to reflect this, which has implications not merely for the site, but also for the soundness of the Plan's housing strategy. As stated above, the Plan has reduced it supply in order to ensure that it tallies with the revised requirement, and provide no margin for contingency. As the site will not be delivering the 58 dwellings for which it has been identified, the Plan is now unable to meet its housing requirement in full, thereby failing a basic test of soundness – namely that it advances an effective, positively prepared strategy that is able, at a minimum, to meet the area's identified need.

The fact that the site is also in active employment use means that, even if it were to come forward for residential development, there would be a loss of 3.34ha from the current stock of employment land. Considering the apparent narrowness of the Plan's supply when set against its requirements, this loss could also have implications relating to the sufficiency of the Plan's supply of employment land.

Beyond the nature of the allocated use, there is also a concern around the site's development capacity. The allocation gives an indicative capacity of 58 dwellings, which is 22 units fewer than put forward by St Albans in the Regulation 18 draft of the Plan. This reduction has nothing to do with the site itself, or any perceived constraints. For reasons set out above, the reduction has been driven entirely by the Council lowering its housing supply in order to tally with its reduced housing requirement. The reduction of the site's capacity is inconsistent with national planning policy, which clearly seeks to make the best and most efficient use of land.

The reduction of the site's indicative capacity is strongly resisted, and the proposed residential use is not being pursued by SBP. The site is a brownfield employment site, and it would be a far more efficient use of land to allocate it for intensifying redevelopment to increase the quantum of employment uses on site. It is capable of sustainably accommodating significantly more development than the Plan's indicative capacity of 58 dwellings, and both the site's development capacity and allocated use ought to be changed in order to represent the best possible use of the site, and ensure that Plan's soundness.

...

**Conclusion**

As set out above, the St Albans' Regulation 19 Draft Local Plan 2041 does not meet the tests of soundness, as set out in the NPPF, for the following reasons:

- **Positively prepared** – the Plan does not state its employment need at all, nor its supply in any detail. It is therefore not possible to establish whether it meets, as a minimum, the area's objectively assessed needs. The Plan also claims to have an oversupply of employment land that can contribute to neighbouring unmet need, but precise figures are not provided, an approach which lacks clarity. Further, a review of the relevant evidence suggests that the Plan's claim that it meets its need is subject to challenge.
- **Justified** – the chosen strategy for employment land delivery is to allocate a single strategic site. This leaves no space for contingency in the event that this site doesn't come forward, and the site itself may not provide enough land to delivery the necessary level of B2/B8 floorspace over the Plan period. Aside from the quantitative need, there are concerns that this site will not meet the qualitative requirements of the area, which is characterised by micro, small, and medium sized business. The allocation also resists logistics development, which throws into further doubt the Plan's ability to meet anticipated needs.
- **Effective** – the Plan seemingly puts forward no timelines for site deliveries, and it is therefore unclear whether or not the needs of the area can be met over the course of the Plan, this is particularly pertinent for employment need, which is principally tied to a single strategic allocation.
- **Consistent with national policy** – key requirements of national planning policy, such as the need to make effective use of land, are not met by the Plan's strategy, which has systematically reduced the capacity of a large number of residential allocations for reasons that appear to have little to do with the site's themselves. Rather, it appears that this has been driven by the desire to reduce the housing requirement (and consequently the supply) as much as possible.

Beyond concerns with the Plan's broad strategy, the details of the allocation at Smallford Works does not meet the test of soundness either:

- **Positively prepared** – the site will not be providing housing on the site. This reduces the Plan's overall housing supply figure, risking its ability to meet, as a minimum, its objectively assessed need for residential development. The Plan and its evidence base also seems to ignore the fact that delivering employment on the site would reduce the stock of employment land within St Albans, which would need to be addressed through appropriate allocation of replacement land. For reasons stated above, the allocation at Hemel Hempstead (Central) may be both quantitatively and qualitatively unable to accommodate this;
- **Justified** – the allocated use is inconsistent with representations previously submitted, clearly stating the site is being promoted for employment use and not residential development. In this, the Plan fails to account for clearly stated evidence regarding the site allocation;
- **Effective** – whilst allocating the site for development is wholly supported, a far more appropriate strategy for redeveloping the site would be to identify it for intensifying employment development consider its current status as an employment site in active use;
- **Consistent with national policy** – the principle of the site's allocation is consistent with relevant national policy, but the details are not: the proposed loss of employment floorspace without appropriate replacement, and the inefficient reduction of the site's developable capacity do not accord with central tenants of national planning policy.

Evidently, the Plan requires significant alteration if it is to be found sound under examination, and this should include:

- A clearly stated employment land requirement;
- Clearly identify employment land supply (including the indicative hectarage of all proposed employment uses set against their requirements);
- Clear timeframes for site delivery;
- A greater range of employment sites in order to provide *inter* alia flexibility and contingency;

- Greater efficiency in the use of allocated land in order to ensure that this tenet of national planning policy is met; and
- Alteration site allocation P3 (Smallford Works) to identify the site for intensifying employment development.

Making these changes are necessary if the Plan is to be considered sound, and capable of progression through examination to formal adoption.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## P2 - Land at North Orbital Road, AL2 1DL

### 84 - The owners of the Albert Bygrave Retail Park

Submission Number: 84 Submission Date: 06/11/24 11:47

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: The owners of the Albert Bygrave Retail Park Name:

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report for details**

**Site P2 – Land at North Orbital Road**

- The Regulation 19 draft Local Plan and accompanying Policies Map identifies the report site as proposed housing allocation ref P2. The identification of the development potential of this site is **stronglysupported** by the owners of this site. As is set out elsewhere in this report, the land is suitable for development and should continue to be allocated in the Local Plan.
- An estimated capacity of 64 dwellings is given for the site. However, the indicative layout for the site shown at Figure 3 below shows a total of 93 dwellings. Given the existing buildings and the surrounding pattern of development, this increase in capacity is considered both appropriate for the site and useful for the Council in ensuring the overall housing target is achieved.
- The Council has decided not to remove this site from the Green Belt, presumably because the site does not immediately adjoin the existing Green Belt boundary and based on the concerns raised in the Council's Green Belt Review around the impact of creating a "hole" in the Green Belt. While this decision is understandable, the allocation of significant new residential development in the Green Belt could raise concerns about consistency with the NPPF, which generally seeks to prevent new buildings in the Green Belt.
- However, the NPPF also allows the redevelopment of previously developed land under paragraph 154g, indeed it prioritises such development in paragraph 147 and elsewhere. On this basis, there is a clear basis to conclude that the allocation of this site is consistent with the NPPF.

- For the sake of clarity, and to assist with the determination of subsequent planning applications, it would be helpful to specify that the redevelopment of the entire site for residential development is considered to be consistent with paragraph 154g in that it is the redevelopment of previously developed land that would meet an affordable housing need and that would not cause substantial harm to the openness of the Green Belt.
- The policy allocating this site refers to “key development requirements”. These are repeated below with some commentary on each on behalf of the landowner. None of the requirements prevent or unduly constrain the development of the site.

1. *Support for new and / or significantly improved pedestrian, cycle and vehicular access west to Napsbury Lane and east to London Road and more widely to St Albans and London Colney must be provided.*

The ability to secure significant highway improvements from this site will be limited by virtue of the existing vehicle movements to and from the site and by a previous appeal Inspector agreeing that the existing access was suitable for a residential development. Vehicular access would be taken from the A414 as it is currently – there is no scope nor need to change the access. There is also an existing footway alongside the A414. While it is not entirely clear what improvements are required, these issues can properly be discussed at planning application stage.

2. *Contributions / enhancements to support relevant schemes in the LCWIP and GTPs as indicated in the TIA.*

Such contributions can be sought through section 106 requests as part of development proposals.

3. *Development proposals should minimise any harm to the significance and setting of the Grade II Listed Lys Eira; this may include retention and strengthening of tree screening on the west boundary.*

This would be expected of any development proposal but the presence of the listed building is worth highlighting within the policy. The Council’s Heritage Impact Assessment conducted for the Local Plan concludes that “There are no likely impacts on heritage assets that preclude the site’s allocation or which impact on estimated capacity”. We support this conclusion.

It should be noted that the intervening trees are not within the proposed allocation but instead lie within two separate ownerships to the west of the allocation. For this reason, we suggest the second half of the sentence relating to potential retention of trees be removed from the policy requirements. The detailed relationship with the listed building and any necessary planting can be established at planning application stage when more details of the specific proposal are available.

4. *The site is within Flood Zone 1 but at risk from surface water and groundwater flooding. The Exception Test is not required. However, it must be shown that the development will be safe for its lifetime and the risk can be managed through a sequential approach to design*

The extent of the site that is subject to surface water flooding is shown in Figure 2 below, taken from the Council’s Strategic Flood Risk Assessment. There is a very small area in the north-west corner of the site that is at “high” risk and two very small linear areas of medium risk near the existing buildings. This limited degree of risk can be managed through the development process and does not represent a constraint to development.

*Figure 2: surface water flood risk (see attached report)*

5. *A noise assessment must be carried out regarding the adjacent North Orbital Road, and appropriate mitigation measures provided if necessary.*

A noise assessment would be provided as part of a planning application. While noise is a design consideration, it does not unduly constrain the site.

6. *There is a pipeline running adjacent to the site, and development proposals must appropriately take this into account.*

The landowner is aware of this pipeline and of the implications for development. While it is a design consideration, it does not unduly constrain the site.

- In summary, we **fully support** the proposed allocation of this site. In terms of the detailed wording of Policy P2, we consider it to be **legally compliant** and **sound**. However, to ensure the site is fully deliverable and to secure consistency with national policy in respect of Green Belt, Policy P2 should include clarification that the redevelopment of the entire site for residential development is consistent with paragraph 154g in that it is the redevelopment of previously developed land that would meet an affordable housing need and that would not cause substantial harm to the openness of the Green Belt. In addition, the increase in dwelling capacity from 64 to 93 dwellings should be noted in the policy.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Owners of Albert Bygrave Retail Park_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

DLA Town Planning represents the owner and promoter of the site and our participation in the hearing sessions would assist the Inspector and help to respond to any queries raised.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 145 - Catesby Estates

Submission Number: 145 Submission Date: 07/11/24 11:13

Respondent: Company/Organisation: Stantec Name: Mr P Derry

On Behalf Of Company/Organisation: Catesby Estates Name:

Comment Number: 29

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

There are concerns regarding the timings for development at the site, given the level of built form on the site. The site also has the potential for significant noise disturbance from the A414 and will require appropriate mitigation (which may impact upon capacity). The existing access is sub-standard and links to east bound traffic only.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

4. SW Herts JSP_Windridge Farm_Vision Document_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**248 - Historic England**

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 33

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**P2 - Land at North Orbital Road, AL2 1DL**

This site is adjacent to the Grade II listed Lys Eira.

We welcome the preparation of the high level HA by SADC.

We welcome criterion 3 which relates to the nearby grade H listed Lys Eira.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend a slight change to policy wording throughout the Plan which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend *'conserve and where appropriate enhance the significance of the...[list assets]'*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## U4 - Greenwood United Reformed Church, AL2 3HG

## UC1 - Sainsbury's Supermarket, Everard Close, St Albans, AL1 2QU

### 224 - Redington Capital Limited & CALA Homes

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 19

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Redington Capital Limited and CALA Homes **object** to Part B (Site Allocations) which forms part of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

Redington Capital Limited and CALA Homes conclude that the site allocation selection process undertaken by the Council is unsound. They recommend that the site selection process should be completely reviewed, revised and the draft allocations re-assessed in a transparent and consistent approach particularly in applying the recommendations of the GBR.

In addition to the above, there are a number of other concerning questions regarding some of the Broad Location sites and other housing site allocations chosen by the Council, including:

- UC1 (92 homes) – This is a very busy supermarket. Housing on this site is highly unlikely to be delivered because it will have an impact on the performance of this store.

It is clear from the above that the Council has chosen to allocate site:

- In locations deemed to be of strong importance to the purposes of the Green Belt;
- That are not located within the most accessible and sustainable locations; and
- That are either undeliverable or their capacity has been grossly over-estimated.

This demonstrates that the site allocations strategy adopted by the Council needs to be fundamentally reviewed and revised.

This conclusion is further exacerbated when considering the Council has chosen to ignore other more accessible and sustainable sites in lower tier settlements, including Redington Capital Limited and CALA Homes' site (Land South of Chiswell Green Lane), which:

- Benefits from high levels of accessibility by public transport and to local services (as demonstrated in Section 7 below);
- Has less harm to the purposes of the Green Belt (as demonstrated in Section 1 above);
- Is available and deliverable at a density of development that has previously been supported by the Council's planning officers when recommending approval of application ref: 5/2022/0927 (as demonstrated in Section 7 below);

- Is supported by the Inspector when determining Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024; and
- Upheld by the SOS's decision.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council:

- Should be more realistic about its choice of housing sites to deliver its critical housing needs. Some of the current set of site allocations appear to have been included / inflated to "make up the numbers." We therefore strongly recommend that the site allocations are reviewed again and the Council should:
- Remove any sites that are undeliverable;
- Reduce the expected capacity of sites that are obviously constrained and will not therefore delivery the density suggested; and
- Provide evidence to justify all site inclusions and their estimate capacity.
- Include new broad location housing sites that:
- Are located in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and services or will not be used by the district's residents;
- Result in less harm to the purposes of the Green Belt; and
- Are available and deliverable.

Redington Capital Limited and CALA Homes recommends that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing and education land allocation in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

## 243 - Network Rail

Submission Number: 243 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Network Rail Name:

Comment Number: 2

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Network Rail is reiterating the previous comments (Regulation 18, attached).

For the St Albans Abbey branch line, proposals include a large supermarket site at St Albans Abbey station, with intensification of the car park for housing. We wish to highlight that there is a nearby level crossing at Cottonmill Lane. We would encourage early discussion with Network Rail to ensure that the level crossing is given suitable consideration as plans develop.

There doesn't appear to be anything in the 'key development requirements' about the level crossing at Cottonmill Lane. Developments should be accompanied by a TS/TA which includes consideration of the impact of proposals upon any Cottonmill LC with mitigation implemented as required. We would encourage the Council to adopt specific policy wording to ensure that the impact of proposed new development (including cumulative impact) on the risk at the existing level crossing is assessed by the developer(s), and suitable mitigation incorporated within the development proposals and funded by the developer(s). TS/TAs should be undertaken in conjunction with the local highways authority with advice from Network Rail. Contributions will be sought where proposals impact on level crossings to mitigate the impacts of those developments. Where level crossing closure is the only option, the applicant is advised that closure would be via s257 of the T&CPA, and that closure would be required before the occupation of any dwellings.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We would encourage the Council to adopt specific policy wording to ensure that the impact of proposed new development (including cumulative impact) on the risk at the existing level crossing is assessed by the developer(s), and suitable mitigation incorporated within the development proposals and funded by the developer(s).

**UC2 - Civic Close Car Park Bricket Road, St Albans, AL1 3JX**

We welcome the preparation for the high level HA by SADC.

We welcome criterion 3 that refers to listed and locally listed buildings.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is**

**incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend a slight change to policy wording throughout the Plan which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend *'conserve and where appropriate enhance the significance of the...[list assets]'*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**259 - Mercer & Hole**

Submission Number: 259 Submission Date: 08/11/24 08:04

Respondent: Company/Organisation: Aitchison Raffety Name: Mr Hayden Todd

On Behalf Of Company/Organisation: Mercer & Hole Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The London Road Car Park generally operates at full capacity and provides important local infrastructure needed to support the effective operation of the surrounding businesses. Residential redevelopment of this Car Park would have a significant impact

on the local office market and create a barrier to economic growth, in conflict with the

provisions and aspirations of the NPPF.

The London Road Car Park provides the infrastructure needed to support the vitality and

viability of the City Centre.

The constrained Site layout, arrangement of the surrounding properties, location of important mature planting and the historic context, would restrict and limit new housing development options. Given the likely need to maintain existing parking levels, it has not been demonstrated that there is a 'reasonable prospect' that this housing allocation will be delivered during the plan period, particularly given the allocation of other nearby parking areas.

For the reasons outlined above, the draft Local Plan and associated housing allocation has not been prepared in accordance with legal and procedural requirements, and the test of soundness.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 0259 Site Allocation Rep - Reg 19 Local Plan SADC LC_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Could I please be informed of the hearing and given the option closer to the time

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

**287 - Hertfordshire County Council Minerals and Waste Planning Policy Team**

Submission Number: 287 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council Name: Hertfordshire County Council Minerals and Waste Planning Policy Team

Comment Number: 30

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Site Allocations (Sites within Settlements (Urban Capacity Study))**

The proposed site allocations UC1 to UC7, UC10, UC12, UC16, UC18, UC19 and UC35 fall entirely outside the Sand and Gravel Belt. BGS data however identifies potential superficial sand/gravel deposits beneath these sites.

These proposed site allocations have existing built development adjacent to them. Due to their existing constraints, the council would only encourage opportunistic extraction at these sites.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Whilst **not a soundness matter**, the District Council may however wish to add an objective to the 'key development requirements' for this allocation, like that suggested below for M8 – Verulam Golf Club, St Albans, AL1 1JG, to include the following wording or similar:

*Undertake opportunistic extraction of any suitable sand and gravel deposits for use on-site wherever possible, where such deposits are uncovered during construction / excavation works.*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**357 - Mrs Julia Warren**

Submission Number: 357 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Wheathampstead Parish Council Name: Mrs Julia Warren

Comment Number: 18

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Carparks**

Wheathampstead Parish Council has concerns about the potential plans to build on the following Car Parks:

**UC3 London Road, St Albans**

Wheathampstead Parish is poorly served by Public Transport so inevitably our residents will use private cars to visit St Albans and other retail and leisure centres in the District. The car park on London Rd provides parking for St Albans town centre for retail, restaurants and drinking establishments, plus the hugely popular Odyssey cinema. Loss of car parking is likely to have a disproportionate impact on residents from rural locations in comparison to residents in the City of St Albans who can more easily reach this location on foot or by public transport.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**370 - Diane Black**

Submission Number: 370 Submission Date: 09/11/24 09:00

Respondent: Company/Organisation: Wheathampstead District Preservation Society Name: Diane Black

Comment Number: 11

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**WDPS comments on St Albans City and District Council Draft Local Plan**

Wheathampstead and District Preservation Society (WDPS) has approximately 400 households as members, and we therefore speak for around 15% of the population of the Wheathampstead area.

**Other Development Sites impacting Wheathampstead**

Wheathampstead Parish is poorly served by Public Transport so inevitably our residents will use private cars to travel to stations to commute to London, visit St Albans, Harpenden and other retail and leisure centres in the District.

UC3 London Road Car Park and UC8 Car Park Adelaide St Albans provides parking for St Albans town centre for retail, restaurants and drinking establishments, plus the hugely popular Odyssey cinema. Loss of car parking is detrimental to residents from rural locations who are dependent on private car use.

UC14 Car Park to rear of Waitrose, Harpenden provide parking for the retailer and the loss of this car park is detrimental to residents of Wheathampstead.

UC15 Bowers Way East Car Park, Harpenden and UC50 Southview Car Park, Lower Luton Rd, Harpenden provides parking for Harpenden retail, restaurants and shopping loss of this car park is detrimental to residents of Wheathampstead. It should also be noted that UC15 Bowers Way East Car Park provide overspill for station parking on Tues-Thurs when both station car parks fill up by 8.30am.

UC54 Harpenden Railway Stn Car Park East, Harpenden provides station parking for commuters and is already completely full by 8.30am on Tues-Thurs even without considering the additional spaces that will be required for the increase in commuters from the new housing in Harpenden and the surrounding area, especially given the lack of new employment. Therefore, the loss of the car park is detrimental to residents of Wheathampstead that commute from Harpenden.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Summary**

Considering the comments above, we urge the council to revisit the draft Local Plan, challenge the Government's Standard Method for calculating housing needs and produce a more equitable balanced plan that serves the needs of the St Albans District residents. We would like to see more detailed planning which includes funding allocation and addresses key issues on exactly how the plan is going to meet climate change targets, deal with extreme weather events, increase biodiversity by 10%, protect the Green Belt, improve transport networks including cycleways, improve water networks and prevent pollution of our rivers, improve services and facilities and protect secondary school placements.

## UC6 - 13-19 Sutton Road & 5-11a Pickford Road, St Albans, AL1 5JH

### 224 - Redington Capital Limited & CALA Homes

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 22

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Redington Capital Limited and CALA Homes **object** to Part B (Site Allocations) which forms part of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

Redington Capital Limited and CALA Homes conclude that the site allocation selection process undertaken by the Council is unsound. They recommend that the site selection process should be completely reviewed, revised and the draft allocations re-assessed in a transparent and consistent approach particularly in applying the recommendations of the GBR.

In addition to the above, there are a number of other concerning questions regarding some of the Broad Location sites and other housing site allocations chosen by the Council, including:

Site UC6 (29 homes) – Not all of the site is available and is therefore unlikely to delivery any new homes [rather than 29 homes as suggested].

It is clear from the above that the Council has chosen to allocate site:

- In locations deemed to be of strong importance to the purposes of the Green Belt;
- That are not located within the most accessible and sustainable locations; and
- That are either undeliverable or their capacity has been grossly over-estimated.

This demonstrates that the site allocations strategy adopted by the Council needs to be fundamentally reviewed and revised.

This conclusion is further exacerbated when considering the Council has chosen to ignore other more accessible and sustainable sites in lower tier settlements, including Redington Capital Limited and CALA Homes' site (Land South of Chiswell Green Lane), which:

- Benefits from high levels of accessibility by public transport and to local services (as demonstrated in Section 7 below);
- Has less harm to the purposes of the Green Belt (as demonstrated in Section 1 above);
- Is available and deliverable at a density of development that has previously been supported by the Council's planning officers when recommending approval of application ref: 5/2022/0927 (as demonstrated in Section 7 below);

- Is supported by the Inspector when determining Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024; and
- Upheld by the SOS's decision.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council:

- Should be more realistic about its choice of housing sites to deliver its critical housing needs. Some of the current set of site allocations appear to have been included / inflated to "make up the numbers." We therefore strongly recommend that the site allocations are reviewed again and the Council should:
- Remove any sites that are undeliverable;
- Reduce the expected capacity of sites that are obviously constrained and will not therefore delivery the density suggested; and
- Provide evidence to justify all site inclusions and their estimate capacity.
- Include new broad location housing sites that:
- Are located in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and services or will not be used by the district's residents;
- Result in less harm to the purposes of the Green Belt; and
- Are available and deliverable.

Redington Capital Limited and CALA Homes recommends that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing and education land allocation in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

## UC7 - 5 Spencer Street, St Albans, AL3 5EH

### 166 - Denton Homes Ltd

Submission Number: 166 Submission Date: 07/11/24 13:49

Respondent: Company/Organisation: Nexus Planning Name: Georgia Goff

On Behalf Of Company/Organisation: Denton Homes Ltd Name:

Comment Number: 2

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We support the provision of a residential only development on this site. The Council cannot currently demonstrate a 5 Year Housing Land Supply, with a land supply of just 2 years; therefore, this site provides a key opportunity to provide residential dwellings on a highly sustainable brownfield site within close proximity to the town centre. In line with the draft NPPF, to deliver the Council's housing targets, Council's must look to brownfield land first, prioritising the development of previously used land wherever possible.

In addition, the existing retail unit has been vacant since 2020; therefore, demonstrating that the provision of retail on the site is no longer feasible.

In terms of the number of units appropriate for the site, in line with Paragraph 129 of the NPPF (2023) *"where there is an existing or anticipated shortage of land for meeting identified housing needs, it is especially important that planning policies and decisions avoid homes being built at low densities, and ensure that developments make optimal use of the potential of each site"*. It is noted that the site is located within the St Albans Conservation Area, and within close proximity to statutorily and locally listed buildings; therefore, in line with Paragraph 130 of the NPPF, the density of the development should take into consideration the character of the existing area, to ensure the development does not result in harm to these heritage assets and where possible enhance the setting and significance of the heritage assets. However, development at the site has been subject to pre-application discussions dating back to 2022 and is subject to ongoing discussions via a Planning Performance Agreement. Not only do these discussions show that the site is deliverable, they have also demonstrated that, subject to detailed design, the site is capable of achieving a higher density development than 27 units that reflects the surrounding character and context of the area.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**UC7 5 Spencer Street, St Albans, AL3 5EH**

We welcome the preparation for the high level HA by SADC.

We welcome criterion 3 that refers to the Conservation Area as well as listed and locally listed buildings.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend a slight change to policy wording throughout the Plan which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend *'conserve and where appropriate enhance the significance of the...[list assets]'*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 287 - Hertfordshire County Council Minerals and Waste Planning Policy Team

Submission Number: 287 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council Name: Hertfordshire County Council Minerals and Waste Planning Policy Team

Comment Number: 35

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Site Allocations (Sites within Settlements (Urban Capacity Study))**

The proposed site allocations UC1 to UC7, UC10, UC12, UC16, UC18, UC19 and UC35 fall entirely outside the Sand and Gravel Belt. BGS data however identifies potential superficial sand/gravel deposits beneath these sites.

These proposed site allocations have existing built development adjacent to them. Due to their existing constraints, the council would only encourage opportunistic extraction at these sites.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Whilst **not a soundness matter**, the District Council may however wish to add an objective to the 'key development requirements' for this allocation, like that suggested below for M8 – Verulam Golf Club, St Albans, AL1 1JG, to include the following wording or similar:

*Undertake opportunistic extraction of any suitable sand and gravel deposits for use on-site wherever possible, where such deposits are uncovered during construction / excavation works.*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## UC8 - Public Hall, 6 Southdown Road, Harpenden, AL5 1TE

### 224 - Redington Capital Limited & CALA Homes

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 23

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Redington Capital Limited and CALA Homes **object** to Part B (Site Allocations) which forms part of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

Redington Capital Limited and CALA Homes conclude that the site allocation selection process undertaken by the Council is unsound. They recommend that the site selection process should be completely reviewed, revised and the draft allocations re-assessed in a transparent and consistent approach particularly in applying the recommendations of the GBR.

In addition to the above, there are a number of other concerning questions regarding some of the Broad Location sites and other housing site allocations chosen by the Council, including:

- Site UC8 (24 homes) – This site is located adjacent to listed building and is within a Conservation Area. It is only likely to delivery 14 units, not the 26 units suggested.

It is clear from the above that the Council has chosen to allocate site:

- In locations deemed to be of strong importance to the purposes of the Green Belt;
- That are not located within the most accessible and sustainable locations; and
- That are either undeliverable or their capacity has been grossly over-estimated.

This demonstrates that the site allocations strategy adopted by the Council needs to be fundamentally reviewed and revised.

This conclusion is further exacerbated when considering the Council has chosen to ignore other more accessible and sustainable sites in lower tier settlements, including Redington Capital Limited and CALA Homes' site (Land South of Chiswell Green Lane), which:

- Benefits from high levels of accessibility by public transport and to local services (as demonstrated in Section 7 below);
- Has less harm to the purposes of the Green Belt (as demonstrated in Section 1 above);
- Is available and deliverable at a density of development that has previously been supported by the Council's planning officers when recommending approval of application ref: 5/2022/0927 (as demonstrated in Section 7 below);

- Is supported by the Inspector when determining Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024; and
- Upheld by the SOS's decision.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council:

- Should be more realistic about its choice of housing sites to deliver its critical housing needs. Some of the current set of site allocations appear to have been included / inflated to "make up the numbers." We therefore strongly recommend that the site allocations are reviewed again and the Council should:
- Remove any sites that are undeliverable;
- Reduce the expected capacity of sites that are obviously constrained and will not therefore delivery the density suggested; and
- Provide evidence to justify all site inclusions and their estimate capacity.
- Include new broad location housing sites that:
- Are located in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and services or will not be used by the district's residents;
- Result in less harm to the purposes of the Green Belt; and
- Are available and deliverable.

Redington Capital Limited and CALA Homes recommends that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing and education land allocation in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

## UC9 - Keyfield Terrace Car Park, Keyfield Terrace, St Albans, AL1 1PD

### 224 - Redington Capital Limited & CALA Homes

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 24

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Redington Capital Limited and CALA Homes **object** to Part B (Site Allocations) which forms part of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

Redington Capital Limited and CALA Homes conclude that the site allocation selection process undertaken by the Council is unsound. They recommend that the site selection process should be completely reviewed, revised and the draft allocations re-assessed in a transparent and consistent approach particularly in applying the recommendations of the GBR.

In addition to the above, there are a number of other concerning questions regarding some of the Broad Location sites and other housing site allocations chosen by the Council, including:

- Site UC9 (10 homes) – This car park site has no reasonable prospect of coming forward. There is a lease to a private company beyond 2041 (which means there is a high risk of ransom). There are mature trees present and the site is too narrow. It is therefore undeliverable (or has less capacity than suggested).

It is clear from the above that the Council has chosen to allocate site:

- In locations deemed to be of strong importance to the purposes of the Green Belt;
- That are not located within the most accessible and sustainable locations; and
- That are either undeliverable or their capacity has been grossly over-estimated.

This demonstrates that the site allocations strategy adopted by the Council needs to be fundamentally reviewed and revised.

This conclusion is further exacerbated when considering the Council has chosen to ignore other more accessible and sustainable sites in lower tier settlements, including Redington Capital Limited and CALA Homes' site (Land South of Chiswell Green Lane), which:

- Benefits from high levels of accessibility by public transport and to local services (as demonstrated in Section 7 below);
- Has less harm to the purposes of the Green Belt (as demonstrated in Section 1 above);

- Is available and deliverable at a density of development that has previously been supported by the Council's planning officers when recommending approval of application ref: 5/2022/0927 (as demonstrated in Section 7 below);
- Is supported by the Inspector when determining Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024; and
- Upheld by the SOS's decision.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council:

- Should be more realistic about its choice of housing sites to deliver its critical housing needs. Some of the current set of site allocations appear to have been included / inflated to "make up the numbers." We therefore strongly recommend that the site allocations are reviewed again and the Council should:
- Remove any sites that are undeliverable;
- Reduce the expected capacity of sites that are obviously constrained and will not therefore delivery the density suggested; and
- Provide evidence to justify all site inclusions and their estimate capacity.

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Redington Capital Limited and CALA Homes **object** to Part B (Site Allocations) which forms part of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

Redington Capital Limited and CALA Homes conclude that the site allocation selection process undertaken by the Council is unsound. They recommend that the site selection process should be completely reviewed, revised and the draft allocations re-assessed in a transparent and consistent approach particularly in applying the recommendations of the GBR.

In addition to the above, there are a number of other concerning questions regarding some of the Broad Location sites and other housing site allocations chosen by the Council, including:

- Site UC11 6 homes) – This site is too narrow. It is therefore undeliverable (or has less capacity than suggested).

It is clear from the above that the Council has chosen to allocate site:

- In locations deemed to be of strong importance to the purposes of the Green Belt;
- That are not located within the most accessible and sustainable locations; and
- That are either undeliverable or their capacity has been grossly over-estimated.

This demonstrates that the site allocations strategy adopted by the Council needs to be fundamentally reviewed and revised.

This conclusion is further exacerbated when considering the Council has chosen to ignore other more accessible and sustainable sites in lower tier settlements, including Redington Capital Limited and CALA Homes' site (Land South of Chiswell Green Lane), which:

- Benefits from high levels of accessibility by public transport and to local services (as demonstrated in Section 7 below);
- Has less harm to the purposes of the Green Belt (as demonstrated in Section 1 above);
- Is available and deliverable at a density of development that has previously been supported by the Council's planning officers when recommending approval of application ref: 5/2022/0927 (as demonstrated in Section 7 below);

- Is supported by the Inspector when determining Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024; and
- Upheld by the SOS's decision.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council:

- Should be more realistic about its choice of housing sites to deliver its critical housing needs. Some of the current set of site allocations appear to have been included / inflated to "make up the numbers." We therefore strongly recommend that the site allocations are reviewed again and the Council should:
- Remove any sites that are undeliverable;
- Reduce the expected capacity of sites that are obviously constrained and will not therefore delivery the density suggested; and
- Provide evidence to justify all site inclusions and their estimate capacity.
- Include new broad location housing sites that:
- Are located in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and services or will not be used by the district's residents;
- Result in less harm to the purposes of the Green Belt; and
- Are available and deliverable.

Redington Capital Limited and CALA Homes recommends that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing and education land allocation in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

## 248 - Historic England

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 36

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**UC11 50 Victoria Street, St Albans, AL1 3HZ**

We welcome the preparation for the high level HA by SADC.

We welcome criteria 2 and 3 that refer to the retention of the locally listed Baptist Church and to the Conservation Area as well as locally listed buildings.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, `*Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, `*The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend a slight change to policy wording throughout the Plan which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend *'conserve and where appropriate enhance the significance of the...[list assets]'*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## UC12 - Garage Block Between Hughenden Road and The Ridgeway, St Albans, AL4 9RH

### 287 - Hertfordshire County Council Minerals and Waste Planning Policy Team

Submission Number: 287 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council Name: Hertfordshire County Council Minerals and Waste Planning Policy Team

Comment Number: 26

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Site Allocations (Sites within Settlements (Urban Capacity Study))**

The proposed site allocations UC1 to UC7, UC10, UC12, UC16, UC18, UC19 and UC35 fall entirely outside the Sand and Gravel Belt. BGS data however identifies potential superficial sand/gravel deposits beneath these sites.

These proposed site allocations have existing built development adjacent to them. Due to their existing constraints, the council would only encourage opportunistic extraction at these sites.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Whilst **not a soundness matter**, the District Council may however wish to add an objective to the 'key development requirements' for this allocation, like that suggested below for M8 – Verulam Golf Club, St Albans, AL1 1JG, to include the following wording or similar:

*Undertake opportunistic extraction of any suitable sand and gravel deposits for use on-site wherever possible, where such deposits are uncovered during construction / excavation works.*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The site UC54 should be deleted from the plan as it is incompatible with encouraging residents to use greener transport. Those living outside of Harpenden in rural areas are not able to get to the station in a timely manner by public transport in order to commute to London on a daily basis. By developing on that site, local roads would get more congested with parked cars and there would not enough room on Station Car Park West for these commuters. Until such times that there is a reliable local bus service or working policies in London change, it is not viable to develop this site without an adverse impact on the surrounding area or villages. It also does not take into account the parking needs of the less mobile if this area is developed as not all less mobile have Blue Badges and there will be competition for the reduced number of parking spaces in the west car park. This decision to develop the station car park could be detrimental to people moving to the Harpenden area as many do so as a result of the current easy access to Central London.

Sites UC14 and UC15 should also be deleted from the plan as this is not compatible with the policy to enhance and encourage the town centre of Harpenden to thrive. By reducing parking, those from surrounding villages will be unable to easily visit the town centre to spend money in the local economy. With reduced parking these visitors may well decide to go elsewhere such as out of town shopping centres, which do provide free and plenty of parking. In addition, the Farmers Market is held on a Sunday so without adequate parking, the numbers visiting will be impacted as there is a next to none bus services running on a Sunday from outlying villages. Equally, these sort of events attract people from St Albans itself and the bus service would not be adequate to cope with the numbers. In addition, those who are less mobile or with young children, rely on being able to park near to the shops when doing their weekly supermarket shop as it would be too much to carry their shopping to and from a bus stop.

The strategy of converting these car parks into housing developments will have a detrimental impact on the very heart of Harpenden with its varied small businesses that sets it apart from other towns in the area. It is bad enough that it appears that the free parking is being removed in the town centre but then building on these sites will just make the situation worse. I urge the council to reconsider these recommendations.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

We need a parking strategy for Harpenden

At a time when parking is under scrutiny, it is concerning that numerous car parks including those at the railway station, Bowers Way East, at the rear of Waitrose and in Southview Road are under threat (UC14, UC15, UC50, UC52 and UC54) where proposed developments would reduce or extinguish parking capacity. We request a full parking review, to include on-street parking, is undertaken to ensure that our roads are free flowing and the retailers and business, whose customers are being impacted, remain viable.

**224 - Redington Capital Limited & CALA Homes**

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 25

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Redington Capital Limited and CALA Homes **object** to Part B (Site Allocations) which forms part of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

Redington Capital Limited and CALA Homes conclude that the site allocation selection process undertaken by the Council is unsound. They recommend that the site selection process should be completely reviewed, revised and the draft allocations re-assessed in a transparent and consistent approach particularly in applying the recommendations of the GBR.

In addition to the above, there are a number of other concerning questions regarding some of the Broad Location sites and other housing site allocations chosen by the Council, including:

- Site UC14 (17 homes) – Waitrose car park is required by Waitrose for this high-performing supermarket. Even if Waitrose have promoted the site, it is highly unlikely to be closed because this will severely impact the performance of the supermarket. It's in a conservation area and sat of high ground. It is therefore undeliverable (or has less capacity than suggested).

It is clear from the above that the Council has chosen to allocate site:

- In locations deemed to be of strong importance to the purposes of the Green Belt;
- That are not located within the most accessible and sustainable locations; and
- That are either undeliverable or their capacity has been grossly over-estimated.

This demonstrates that the site allocations strategy adopted by the Council needs to be fundamentally reviewed and revised.

This conclusion is further exacerbated when considering the Council has chosen to ignore other more accessible and sustainable sites in lower tier settlements, including Redington Capital Limited and CALA Homes' site (Land South of Chiswell Green Lane), which:

- Benefits from high levels of accessibility by public transport and to local services (as demonstrated in Section 7 below);
- Has less harm to the purposes of the Green Belt (as demonstrated in Section 1 above);
- Is available and deliverable at a density of development that has previously been supported by the Council's planning officers when recommending approval of application ref: 5/2022/0927 (as demonstrated in Section 7 below);
- Is supported by the Inspector when determining Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024; and
- Upheld by the SOS's decision.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council:

- Should be more realistic about its choice of housing sites to deliver its critical housing needs. Some of the current set of site allocations appear to have been included / inflated to "make up the numbers." We therefore strongly recommend that the site allocations are reviewed again and the Council should:
- Remove any sites that are undeliverable;
- Reduce the expected capacity of sites that are obviously constrained and will not therefore delivery the density suggested; and
- Provide evidence to justify all site inclusions and their estimate capacity.
- Include new broad location housing sites that:

- Are located in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and services or will not be used by the district's residents;
- Result in less harm to the purposes of the Green Belt; and
- Are available and deliverable.

Redington Capital Limited and CALA Homes recommends that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing and education land allocation in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Specific Proposed Allocations in Harpenden**

4.17 We have a number of concerns with specific allocations proposed by the DLP to deliver homes in Harpenden, and their deliverability over the plan period.

UC14 - Car Park to rear of 3 Church Green (Waitrose)

4.22 This site concerns an existing car park, centrally located within Harpenden and the Conservation Area.

4.23 Key development requirement no.1 is:

*"Proposals must retain the adjoining supermarket with the same floorspace and retain a similar amount of parking, through intensification or redevelopment".*

4.24 Key development requirement no.2:

*"Appropriate levels of car parking for existing and new development must be provided."*

4.25 However, the DLP lacks evidence that either of these two key development requirements are achievable.

4.26 Furthermore, the DLP acknowledges that the Site is within the Harpenden Conservation Area and close to a number of listed buildings. Whilst this does not of course render redevelopment of the Site intrinsically unsuitable, it does provide a further constraint in terms of design and layout. This gives rise to further questionability regarding the Site's deliverability for housing in a manner in which other key policy requirements pertaining to car parking can be achieved.

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I was having difficulty submitting a comment. Wasn't sure if I was in the right place as message was that I would be first to comment!

Anyway, I would like to point out that insufficient consideration has been given to what would happen to cars that currently park at UC54, UC15 and UC14, the Harpenden car parks.

The Transport Impact Assessment states that there are no showstoppers to these sites. However, this is incorrect, as nowhere in the assessment have they given consideration as to where the cars that need to park would go.

I note that there is a big push to move people to cycling, which is hugely commendable and I fully support, and sincerely hope that we see fully segregated, well maintained, well lit cycle paths in the future. However, these would not remove the need for the Harpenden car parks. They are

only expected to reduce traffic by around 30%. In addition the users of the station car park will often live too far to consider cycling and users of the Church Green car park will have shopping that needs to be transported home in a car.

Please remove the option of building on the 3 Harpenden car parks from the plan.

### 370 - Diane Black

Submission Number: 370 Submission Date: 09/11/24 09:00

Respondent: Company/Organisation: Wheathampstead District Preservation Society Name: Diane Black

Comment Number: 12

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**WDPS comments on St Albans City and District Council Draft Local Plan**

Wheathampstead and District Preservation Society (WDPS) has approximately 400 households as members, and we therefore speak for around 15% of the population of the Wheathampstead area.

**Other Development Sites impacting Wheathampstead**

Wheathampstead Parish is poorly served by Public Transport so inevitably our residents will use private cars to travel to stations to commute to London, visit St Albans, Harpenden and other retail and leisure centres in the District.

UC3 London Road Car Park and UC8 Car Park Adelaide St Albans provides parking for St Albans town centre for retail, restaurants and drinking establishments, plus the hugely popular Odyssey cinema. Loss of car parking is detrimental to residents from rural locations who are dependent on private car use.

UC14 Car Park to rear of Waitrose, Harpenden provide parking for the retailer and the loss of this car park is detrimental to residents of Wheathampstead.

UC15 Bowers Way East Car Park, Harpenden and UC50 Southview Car Park, Lower Luton Rd, Harpenden provides parking for Harpenden retail, restaurants and shopping loss of this car park is detrimental to residents of Wheathampstead. It should also be noted that UC15 Bowers Way East Car Park provide overspill for station parking on Tues-Thurs when both station car parks fill up by 8.30am.

UC54 Harpenden Railway Stn Car Park East, Harpenden provides station parking for commuters and is already completely full by 8.30am on Tues-Thurs even without considering the additional spaces that will be required for the increase in commuters from the new housing in Harpenden and the surrounding area, especially given the lack of new employment. Therefore, the loss of the car park is detrimental to residents of Wheathampstead that commute from Harpenden.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Summary**

Considering the comments above, we urge the council to revisit the draft Local Plan, challenge the Government's Standard Method for calculating housing needs and produce a more equitable balanced plan that serves the needs of the St Albans District residents. We would like to see more detailed planning which includes funding allocation and addresses key issues on exactly how the plan is going to meet climate change targets, deal with extreme weather events, increase biodiversity

by 10%, protect the Green Belt, improve transport networks including cycleways, improve water networks and prevent pollution of our rivers, improve services and facilities and protect secondary school placements.

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

This site would be fine provided that the requirement were added to retain the existing number of parking spaces either by creating a multistorey or going underground. Losing parking spaces within the Harpenden business district is insane - it will result in a loss of traffic to the restaurants and shops and fundamentally endanger the town's ability to thrive.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

The site UC54 should be deleted from the plan as it is incompatible with encouraging residents to use greener transport. Those living outside of Harpenden in rural areas are not able to get to the station in a timely manner by public transport in order to commute to London on a daily basis. By developing on that site, local roads would get more congested with parked cars and there would not enough room on Station Car Park West for these commuters. Until such times that there is a reliable local bus service or working policies in London change, it is not viable to develop this site without an adverse impact on the surrounding area or villages. It also does not take into account the parking needs of the less mobile if this area is developed as not all less mobile have Blue Badges and there will be competition for the reduced number of parking spaces in the west car park. This decision to develop the station car park could be detrimental to people moving to the Harpenden area as many do so as a result of the current easy access to Central London.

Sites UC14 and UC15 should also be deleted from the plan as this is not compatible with the policy to enhance and encourage the town centre of Harpenden to thrive. By reducing parking, those from surrounding villages will be unable to easily visit the town centre to spend money in the local economy. With reduced parking these visitors may well decide to go elsewhere such as out of town shopping centres, which do provide free and plenty of parking. In addition, the Farmers Market is held on a Sunday so without adequate parking, the numbers visiting will be impacted as there is a next to none bus services running on a Sunday from outlying villages. Equally, these sort of events attract people from St Albans itself and the bus service would not be adequate to cope with the numbers. In addition, those who are less mobile or with young children, rely on being able to park near to the shops when doing their weekly supermarket shop as it would be too much to carry their shopping to and from a bus stop.

The strategy of converting these car parks into housing developments will have a detrimental impact on the very heart of Harpenden with its varied small businesses that sets it apart from other towns in the area. It is bad enough that it appears that the free parking is being removed in the town centre but then building on these sites will just make the situation worse. I urge the council to reconsider these recommendations.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We need a parking strategy for Harpenden

At a time when parking is under scrutiny, it is concerning that numerous car parks including those at the railway station, Bowers Way East, at the rear of Waitrose and in Southview Road are under threat (UC14, UC15, UC50, UC52 and UC54) where proposed developments would reduce or extinguish parking capacity. We request a full parking review, to include on-street parking, is undertaken to ensure that our roads are free flowing and the retailers and business, whose customers are being impacted, remain viable.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

## 224 - Redington Capital Limited & CALA Homes

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 21

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Redington Capital Limited and CALA Homes **object** to Part B (Site Allocations) which forms part of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

Redington Capital Limited and CALA Homes conclude that the site allocation selection process undertaken by the Council is unsound. They recommend that the site selection process should be completely reviewed, revised and the draft allocations re-assessed in a transparent and consistent approach particularly in applying the recommendations of the GBR.

In addition to the above, there are a number of other concerning questions regarding some of the Broad Location sites and other housing site allocations chosen by the Council, including:

- Site UC15 (32 homes) – Bowers Way car parking is a busy car park used by commuters and Harpenden's residents attending the GP surgery and local shops. Loss of car parking would result in significant problems for local residents and the viability of the town centre. It is also not a realistic option to try to the car park and then build flats above. It is therefore undeliverable (or has less capacity than suggested).

It is clear from the above that the Council has chosen to allocate site:

- In locations deemed to be of strong importance to the purposes of the Green Belt;
- That are not located within the most accessible and sustainable locations; and
- That are either undeliverable or their capacity has been grossly over-estimated.

This demonstrates that the site allocations strategy adopted by the Council needs to be fundamentally reviewed and revised.

This conclusion is further exacerbated when considering the Council has chosen to ignore other more accessible and sustainable sites in lower tier settlements, including Redington Capital Limited and CALA Homes' site (Land South of Chiswell Green Lane), which:

- Benefits from high levels of accessibility by public transport and to local services (as demonstrated in Section 7 below);
- Has less harm to the purposes of the Green Belt (as demonstrated in Section 1 above);
- Is available and deliverable at a density of development that has previously been supported by the Council's planning officers when recommending approval of application ref: 5/2022/0927 (as demonstrated in Section 7 below);
- Is supported by the Inspector when determining Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024; and
- Upheld by the SOS's decision.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council:

- Should be more realistic about its choice of housing sites to deliver its critical housing needs. Some of the current set of site allocations appear to have been included / inflated to "make up the numbers." We therefore strongly recommend that the site allocations are reviewed again and the Council should:
- Remove any sites that are undeliverable;
- Reduce the expected capacity of sites that are obviously constrained and will not therefore delivery the density suggested; and
- Provide evidence to justify all site inclusions and their estimate capacity.
- Include new broad location housing sites that:
- Are located in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and services or will not be used by the district's residents;
- Result in less harm to the purposes of the Green Belt; and
- Are available and deliverable.

Redington Capital Limited and CALA Homes recommends that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing and education land allocation in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

Comment Number: 38

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**UC15 - Bowers Way East Car Park Bowers Way, Harpenden, AL5 4EQ**

We welcome the preparation for the high level HA by SADC.

We welcome criterion 3 that refers to the Conservation Area as well as locally listed buildings.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend a slight change to policy wording throughout the Plan which would address this:

1. Instead of ‘minimise any harm to the setting and significance of the… [list assets]’ we would recommend *‘conserve and where appropriate enhance the significance of the...[list assets]’*

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**Specific Proposed Allocations in Harpenden**

4.17 We have a number of concerns with specific allocations proposed by the DLP to deliver homes in Harpenden, and their deliverability over the plan period.

UC15 - Bowers Way East Car Park Bowers Way, Harpenden, AL5 4EQ

4.27 This site is located adjacent to the railway line. Noise, and its potential to impact on amenity of future occupiers, is evidently a constraint to development. The policy recognises this, in that it requires a noise assessment to be undertaken (suggesting that the extent that noise is a constraint has yet to be fully understood); and requires necessary mitigation to be implemented.

4.28 The Site is also within the Conservation Area and adjacent to a number of listed buildings.

4.29 Whilst such heritage matters do not necessarily render the Site fundamentally unsuitable for development, they have the potential to imposes limitations on the design and layout.

4.30 Further to this, we note that the DLP's indicative capacity of this 0.1ha site is 32 dwellings, i.e. development at 320dph. Such a density would be vastly greater than adjoining development to the north.

4.31 Bringing all of the above together, to achieve the development of the Site as the DLP envisages it will be necessary to build at a much higher density than neighbouring development to the north, and incorporate noise mitigation measures, all in a manner that respects the setting of nearby heritage assets and the character and appearance of the Conservation Area.

4.32 This all assumes that noise impacts from the railway line *can* be successfully mitigated. It is unclear noise does not represent an absolute constraint in this instance.

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I was having difficulty submitting a comment. Wasn't sure if I was in the right place as message was that I would be first to comment!

Anyway, I would like to point out that insufficient consideration has been given to what would happen to cars that currently park at UC54, UC15 and UC14, the Harpenden car parks.

The Transport Impact Assessment states that there are no showstoppers to these sites. However, this is incorrect, as nowhere in the assessment have they given consideration as to where the cars that need to park would go.

I note that there is a big push to move people to cycling, which is hugely commendable and I fully support, and sincerely hope that we see fully segregated, well maintained, well lit cycle paths in the future. However, these would not remove the need for the Harpenden car parks. They are only expected to reduce traffic by around 30%. In addition the users of the station car park will often live too far to consider cycling and users of the Church Green car park will have shopping that needs to be transported home in a car.

Please remove the option of building on the 3 Harpenden car parks from the plan.

### 370 - Diane Black

Submission Number: 370 Submission Date: 09/11/24 09:00

Respondent: Company/Organisation: Wheathampstead District Preservation Society Name: Diane Black

Comment Number: 13

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**WDPS comments on St Albans City and District Council Draft Local Plan**

Wheathampstead and District Preservation Society (WDPS) has approximately 400 households as members, and we therefore speak for around 15% of the population of the Wheathampstead area.

**Other Development Sites impacting Wheathampstead**

Wheathampstead Parish is poorly served by Public Transport so inevitably our residents will use private cars to travel to stations to commute to London, visit St Albans, Harpenden and other retail and leisure centres in the District.

UC3 London Road Car Park and UC8 Car Park Adelaide St Albans provides parking for St Albans town centre for retail, restaurants and drinking establishments, plus the hugely popular Odyssey cinema. Loss of car parking is detrimental to residents from rural locations who are dependent on private car use.

UC14 Car Park to rear of Waitrose, Harpenden provide parking for the retailer and the loss of this car park is detrimental to residents of Wheathampstead.

UC15 Bowers Way East Car Park, Harpenden and UC50 Southview Car Park, Lower Luton Rd, Harpenden provides parking for Harpenden retail, restaurants and shopping loss of this car park is detrimental to residents of Wheathampstead. It should also be noted that UC15 Bowers Way East Car Park provide overspill for station parking on Tues-Thurs when both station car parks fill up by 8.30am.

UC54 Harpenden Railway Stn Car Park East, Harpenden provides station parking for commuters and is already completely full by 8.30am on Tues-Thurs even without considering the additional spaces that will be required for the increase in commuters from the new housing in Harpenden and the surrounding area, especially given the lack of new employment. Therefore, the loss of the car park is detrimental to residents of Wheathampstead that commute from Harpenden.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Summary**

Considering the comments above, we urge the council to revisit the draft Local Plan, challenge the Government's Standard Method for calculating housing needs and produce a more equitable balanced plan that serves the needs of the St Albans District residents. We would like to see more detailed planning which includes funding allocation and addresses key issues on exactly how the plan is going to meet climate change targets, deal with extreme weather events, increase biodiversity by 10%, protect the Green Belt, improve transport networks including cycleways, improve water networks and prevent pollution of our rivers, improve services and facilities and protect secondary school placements.

## UC19 - 50-54 Lemsford Road St Albans, AL1 3PR

### 248 - Historic England

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 41

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**UC19 54 Lemsford Road, St Albans, AL1 3PR**

We welcome the preparation for the high level HA by SADC.

Criterion 2 should be amended as there are two locally listed buildings within the site which should be retained.

We welcome criterion 3 that refers to the Conservation Area as well as locally listed buildings.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Criterion 2 should be amended as there are two locally listed buildings within the site which should be retained.

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend a slight change to policy wording throughout the Plan which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend *'conserve and where appropriate enhance the significance of the...[list assets]'*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Criterion 3 states that the site lies adjacent to the Conservation Area when part of the site lies within the Conservation Area. Please amend the wording accordingly.

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend a slight change to policy wording throughout the Plan which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend *'conserve and where appropriate enhance the significance of the...[list assets]'*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

We welcome the preparation for the high level HA by SADC.

We welcome criterion 3 that refers to the Conservation Area as well as the setting of Sopwell Priory.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend a slight change to policy wording throughout the Plan which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend *'conserve and where appropriate enhance the significance of the...[list assets]'*

Submission Number: 110 Submission Date: 06/11/24 15:39

Respondent: Company/Organisation: Thames Water Utilities Limited Name: Mr Chris Colloff

On Behalf Of Company/Organisation: Thames Water Utilities Limited Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The site is in close proximity to Harpenden STW and as such the amenity of any future occupiers will need to be protected from any unacceptable impacts from odour, noise, light or flies. To ensure these issues are adequately considered in any application it is considered that additional text should be added to ensure any submission suitably takes into consideration the potential issues and secures any necessary mitigation measures. Without additional text the allocation may not be effective in ensuring the impacts on occupiers are considered and mitigated.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is considered that the following requirement should be added to the allocation:

**"In accordance with adopted Waste Local Plan Policy 5: Safeguarding of Sites, the nearby safeguarded Sewage Treatment Works must be considered in the design to ensure no unreasonable restrictions are placed upon the facility and the proposal does not prejudice its current or future operation. The Waste Planning Authority must be involved in scheme Design and will be directly consulted on any planning application at the site. Development proposals need to demonstrate that there is no unacceptable impact on amenity of residents from odour, noise, lighting or flies. Where mitigation is necessary, proposals will need to set out how mitigation will be secured and delivered."**

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

While no comment is made on the principle of the allocation, requirement 1 relating to retaining existing community facilities including Harpenden & District Indoor Bowling Club and its ancillary parking is supported. This would provide clarity that the allocation needs to retain this important sports facility facilities and would be consistent with paragraph 103 of the NPPF.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

## 287 - Hertfordshire County Council Minerals and Waste Planning Policy Team

Submission Number: 287 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council Name: Hertfordshire County Council Minerals and Waste Planning Policy Team

Comment Number: 21

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

UC47 - Crabtree Fields / Land at Waldegrave Park, Harpenden, AL5 5SA

The proposed site allocation falls entirely within the Sand and Gravel Belt, but BGS data does not identify any potential deposits beneath the site. The council therefore has no mineral safeguarding concerns for this allocation.

The site is however also located just south of the safeguarded Sewage Treatment Works. The council has significant safeguarding concerns regarding this proposed allocation and urges the District Council to reconsider the suitability of this land for allocation within the Local Plan.

The council is concerned that the proposed allocation could threaten the Sewage Treatment Works' longer-term viability because it could represent an incompatible nearby use resulting in amenity issues for future residents.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

As it currently stands therefore, the Minerals and Waste Planning Authority finds this proposed allocation **unsound**, as it is not consistent with National Policy, namely the National Planning Policy Framework (December 2023) paragraph 193 and the National Planning Policy for Waste (October 2014) paragraph 8.

If the District Council were to continue with this allocation, and in order to address the soundness concerns, the following modification (or similar) should be included within the 'key development requirements' in part B:

*'In accordance with adopted Waste Local Plan Policy 5: Safeguarding of Sites, the nearby safeguarded Sewage Treatment Works must be considered in the design to ensure no unreasonable restrictions are placed upon the facility and the proposal does not prejudice its current or future operation. The Waste Planning Authority must be involved in scheme Design and will be directly consulted on any planning application at the site.'*

**370 - Diane Black**

Submission Number: 370 Submission Date: 09/11/24 09:00

Respondent: Company/Organisation: Wheathampstead District Preservation Society Name: Diane Black

Comment Number: 17

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**WDPS comments on St Albans City and District Council Draft Local Plan**

Wheathampstead and District Preservation Society (WDPS) has approximately 400 households as members, and we therefore speak for around 15% of the population of the Wheathampstead area.

**Other Development Sites impacting Wheathampstead**

Wheathampstead Parish is poorly served by Public Transport so inevitably our residents will use private cars to travel to stations to commute to London, visit St Albans, Harpenden and other retail and leisure centres in the District.

UC3 London Road Car Park and UC8 Car Park Adelaide St Albans provides parking for St Albans town centre for retail, restaurants and drinking establishments, plus the hugely popular Odyssey cinema. Loss of car parking is detrimental to residents from rural locations who are dependent on private car use.

UC14 Car Park to rear of Waitrose, Harpenden provide parking for the retailer and the loss of this car park is detrimental to residents of Wheathampstead.

UC15 Bowers Way East Car Park, Harpenden and UC50 Southview Car Park, Lower Luton Rd, Harpenden provides parking for Harpenden retail, restaurants and shopping loss of this car park is detrimental to residents of Wheathampstead. It should also be noted that UC15 Bowers Way East Car Park provide overspill for station parking on Tues-Thurs when both station car parks fill up by 8.30am.

UC54 Harpenden Railway Stn Car Park East, Harpenden provides station parking for commuters and is already completely full by 8.30am on Tues-Thurs even without considering the additional spaces that will be required for the increase in commuters from the new housing in Harpenden and the surrounding area, especially given the lack of new employment. Therefore, the loss of the car park is detrimental to residents of Wheathampstead that commute from Harpenden.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Summary**

Considering the comments above, we urge the council to revisit the draft Local Plan, challenge the Government's Standard Method for calculating housing needs and produce a more equitable balanced plan that serves the needs of the St Albans District residents. We would like to see more detailed planning which includes funding allocation and addresses key issues on exactly how the plan is going to meet climate change targets, deal with extreme weather events, increase biodiversity by 10%, protect the Green Belt, improve transport networks including cycleways, improve water networks and prevent pollution of our rivers, improve services and facilities and protect secondary school placements.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We need a parking strategy for Harpenden

At a time when parking is under scrutiny, it is concerning that numerous car parks including those at the railway station, Bowers Way East, at the rear of Waitrose and in Southview Road are under threat (UC14, UC15, UC50, UC52 and UC54) where proposed developments would reduce or extinguish parking capacity. We request a full parking review, to include on-street parking, is undertaken to ensure that our roads are free flowing and the retailers and business, whose customers are being impacted, remain viable.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Carparks**

Wheathampstead Parish Council has concerns about the potential plans to build on the following Car Parks:

**UC54 - Harpenden Railway Station Car Park East, Harpenden**

Regarding key development point 2, as mentioned above in Paragraph 6.23, Wheathampstead Parish Council would like St Albans District Council to implement Safe Cycle Routes (also usable as Safe Accessible Routes) to link Wheathampstead to its neighbouring settlements. We would ask that consideration be given to allocate funding obtained by any Section 106 agreements towards a Safe Route between the main line train station and Wheathampstead.

Regarding the proposed development at the Harpenden railway station car park, I thought this was to be considered outside the Local Plan but has now been sneaked in. It is a ridiculous scheme. Firstly, the number of car park spaces would be reduced, when the Local Plan is set for up to 1,400 new homes in the area. People move to Harpenden for a number of reasons and one key reason is the rail link to London. So this idea to reduce the car parking spaces contradicts the Local Plan and makes no sense. Station Road is an extremely congested road right now and downright dangerous at the turning up to the east side of the station for both vehicles and pedestrians. There is four-way traffic at that point. Building 95 residential units where many, no doubt, will want cars (believing they will want to cycle, you might as well believe in the tooth fairy!), would make Station Road even more dangerous and gridlocked, especially at peak times, even if the entrance is widened. The idea is madness and contravenes the term "Justified", which it isn't, and "Effective", which it most certainly is not.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

One task that SADC and HTC should do with immediate effect is to widen the access road up to the east side of the station and put in some control traffic lights. It is downright dangerous for both pedestrians and vehicles.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

### 3 - Mr John A Smith

Submission Number: 3 Submission Date: 02/10/24 16:25

Respondent: Company/Organisation: Name: Mr John A Smith

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The proposed development at the east car park at Harpenden station is a danger to life. Station Road is already heavily congested and gridlocked at peak times and the entrance to the car park involves 4-way traffic. It is downright dangerous now! To build 95 residential units where the occupants are bound to need a car (if you think they will all cycle then you must also believe in the tooth fairy!). This would just make a dangerous situation even worse with those cars going in and out of the station through the single narrow access track (it is not of a standard to be called a road). Even with proposed widening, the additional traffic and the sharp turn straight onto a zebra crossing is hazardous. Furthermore, the plan to reduce the number of car park spaces is just ridiculous and not thought through. It contradicts the concept of the Local Plan. People move to Harpenden for a number of reasons and one of the main ones being the rail link to London. So, if the new houses are built as set out in the Local Plan, then the demand for car parking at the station from commuters would increase greatly, and more spaces would be needed, not less. Forget the cycling nonsense. This planned development fails the "Positively prepared" test as it does not meet the area's *objectively-assessed* needs as no-one wants this development! It fails the "Justified" test because the *evidence is not proportionate to the facts and the evidence.*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

As a matter of urgency, SADC and HTC need to substantially improve the access to the east car park at Harpenden station as it is dangerous. A traffic-light control system would help. I guess they would need to liaise with Network Rail and the Highways Agency, but need to get things moving.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To be present to hear first-hand the damage that would be inflicted on Harpenden which is just a village that has grown - as evidenced by the narrow roads.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

Respondent: Company/Organisation: Name: Mrs Emma Hart

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

This site would be fine provided that the requirement were added to retain the existing number of parking spaces either by creating a multistorey or going underground. Losing parking spaces in the train station carparks is ridiculous. Harpenden has a significant commuter population and the rate of return to office working is only going to continue to increase post Covid. The car parks are already almost back to full capacity on most days during the week.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

The site UC54 should be deleted from the plan as it is incompatible with encouraging residents to use greener transport. Those living outside of Harpenden in rural areas are not able to get to the station in a timely manner by public transport in order to commute to London on a daily basis. By developing on that site, local roads would get more congested with parked cars and there would not enough room on Station Car Park West for these commuters. Until such times that there is a reliable local bus service or working policies in London change, it is not viable to develop this site without an adverse impact on the surrounding area or villages. It also does not take into account the parking needs of the less mobile if this area is developed as not all less mobile have Blue Badges and there will be competition for the reduced number of parking spaces in the west car park. This decision to develop the station car park could be detrimental to people moving to the Harpenden area as many do so as a result of the current easy access to Central London.

Sites UC14 and UC15 should also be deleted from the plan as this is not compatible with the policy to enhance and encourage the town centre of Harpenden to thrive. By reducing parking, those from surrounding villages will be unable to easily visit the town centre to spend money in the local economy. With reduced parking these visitors may well decide to go elsewhere such as out of town shopping centres, which do provide free and plenty of parking. In addition, the Farmers Market is held on a Sunday so without adequate parking, the numbers visiting will be impacted as there is a next to none bus services running on a Sunday from outlying villages. Equally, these sort of events attract people from St Albans itself and the bus service would not be adequate to cope with the numbers. In addition, those who are less mobile or with young children, rely on being able to park near to the shops when doing their weekly supermarket shop as it would be too much to carry their shopping to and from a bus stop.

The strategy of converting these car parks into housing developments will have a detrimental impact on the very heart of Harpenden with its varied small businesses that sets it apart from other towns in the area. It is bad enough that it appears that the free parking is being removed in the town centre but then building on these sites will just make the situation worse. I urge the council to reconsider these recommendations.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

We need a parking strategy for Harpenden

At a time when parking is under scrutiny, it is concerning that numerous car parks including those at the railway station, Bowers Way East, at the rear of Waitrose and in Southview Road are under threat (UC14, UC15, UC50, UC52 and UC54) where proposed developments would reduce or extinguish parking capacity. We request a full parking review, to include on-street parking, is undertaken to ensure that our roads are free flowing and the retailers and business, whose customers are being impacted, remain viable.

### If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?

## 248 - Historic England

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 55

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**UC54 - Harpenden Railway Station Car Park East, Harpenden, AL5 4SP**

We welcome the preparation for the high level HA by SADC.

We welcome criterion 3 that refers to the Conservation Area as well as the nearby locally listed buildings.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend a slight change to policy wording throughout the Plan which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend *'conserve and where appropriate enhance the significance of the...[list assets]'*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 317 - Taylor Wimpey Strategic Land

Submission Number: 317 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Sam Hollingworth

On Behalf Of Company/Organisation: Taylor Wimpey Strategic Land Name:

Comment Number: 6

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Specific Proposed Allocations in Harpenden**

4.17 We have a number of concerns with specific allocations proposed by the DLP to deliver homes in Harpenden, and their deliverability over the plan period.

UC54 - Harpenden Railway Station Car Park East, Harpenden, AL5 4SP 4.33 The site currently provides parking for Harpenden Railway Station.

4.34 In terms of the suitability of the redevelopment of this site, in principle, for residential development, it is notable that key development requirement no.1 is a survey of car park usage before proceeding with any proposals, and also requires development proposals should take into account potential future station parking needs.

4.35 The above suggests that the acceptability of losing the parking the site currently provides for the railway station has yet to be determined.

4.36 In terms of whether the site's redevelopment can incorporate sufficient compensatory parking provision, this cannot be known until the parking need has been established.

4.37 Additionally, this site is located immediately adjacent to the railway line. As with proposed allocation UC15, noise, and its potential to impact on amenity of future occupiers is evidently a constraint to development. Again as with UC15, the policy recognises this, in that it requires a noise assessment to be undertaken.

4.38 As with UC15, it is not clear if the Site can be developed in a manner that ensures appropriate amenity for future occupiers.

4.39 The Site measures 1.23ha but is a long, thin shape. No part of it appears to be more than c.30m from the railway line. Not only is this a potential issue in terms of the extent of the site which might be subject to excessive noise levels, but also a possible constraint to implementing noise mitigation measures.

4.40 The site is within the Conservation Area, and heritage matters may impose another constraint on design options and the ability of the site to adequately mitigate the impact of noise.

4.41 Key policy requirement no.5 also suggests areas of the site are at risk of service water flooding. Whilst this is not necessarily an absolute constraint to development on its own, in combination with the other constraints to which the Site is subject, it raises further concerns regarding the Site's deliverability.

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I was having difficulty submitting a comment. Wasn't sure if I was in the right place as message was that I would be first to comment!

Anyway, I would like to point out that insufficient consideration has been given to what would happen to cars that currently park at UC54, UC15 and UC14, the Harpenden car parks.

The Transport Impact Assessment states that there are no showstoppers to these sites. However, this is incorrect, as nowhere in the assessment have they given consideration as to where the cars that need to park would go.

I note that there is a big push to move people to cycling, which is hugely commendable and I fully support, and sincerely hope that we see fully segregated, well maintained, well lit cycle paths in the future. However, these would not remove the need for the Harpenden car parks. They are only expected to reduce traffic by around 30%. In addition the users of the station car park will often live too far to consider cycling and users of the Church Green car park will have shopping that needs to be transported home in a car.

Please remove the option of building on the 3 Harpenden car parks from the plan.

### 370 - Diane Black

Submission Number: 370 Submission Date: 09/11/24 09:00

Respondent: Company/Organisation: Wheathampstead District Preservation Society Name: Diane Black

Comment Number: 15

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**WDPS comments on St Albans City and District Council Draft Local Plan**

Wheathampstead and District Preservation Society (WDPS) has approximately 400 households as members, and we therefore speak for around 15% of the population of the Wheathampstead area.

**Other Development Sites impacting Wheathampstead**

Wheathampstead Parish is poorly served by Public Transport so inevitably our residents will use private cars to travel to stations to commute to London, visit St Albans, Harpenden and other retail and leisure centres in the District.

UC3 London Road Car Park and UC8 Car Park Adelaide St Albans provides parking for St Albans town centre for retail, restaurants and drinking establishments, plus the hugely popular Odyssey cinema. Loss of car parking is detrimental to residents from rural locations who are dependent on private car use.

UC14 Car Park to rear of Waitrose, Harpenden provide parking for the retailer and the loss of this car park is detrimental to residents of Wheathampstead.

UC15 Bowers Way East Car Park, Harpenden and UC50 Southview Car Park, Lower Luton Rd, Harpenden provides parking for Harpenden retail, restaurants and shopping loss of this car park is detrimental to residents of Wheathampstead. It should also be noted that UC15 Bowers Way East Car Park provide overspill for station parking on Tues-Thurs when both station car parks fill up by 8.30am.

UC54 Harpenden Railway Stn Car Park East, Harpenden provides station parking for commuters and is already completely full by 8.30am on Tues-Thurs even without considering the additional spaces that will be required for the increase in commuters from the new housing in Harpenden and the surrounding area, especially given the lack of new employment. Therefore, the loss of the car park is detrimental to residents of Wheathampstead that commute from Harpenden.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Summary**

Considering the comments above, we urge the council to revisit the draft Local Plan, challenge the Government's Standard Method for calculating housing needs and produce a more equitable balanced plan that serves the needs of the St Albans District residents. We would like to see more detailed planning which includes funding allocation and addresses key issues on exactly how the plan is going to meet climate change targets, deal with extreme weather events, increase biodiversity by 10%, protect the Green Belt, improve transport networks including cycleways, improve water networks and prevent pollution of our rivers, improve services and facilities and protect secondary school placements.

## UC55 - 44-52 Lattimore Road, St Albans, AL1 3XW

### 248 - Historic England

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 56

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**UC55 - 44-52 Lattimore Road, St Albans, AL1 3XW**

We welcome the preparation for the high level HA by SADC.

We welcome criterion 2 that refers to the Conservation Area as well as the nearby locally listed buildings.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend a slight change to policy wording throughout the Plan which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend *'conserve and where appropriate enhance the significance of the...[list assets]'*

## UC57 - Telford Court, Alma Road, St Albans, AL1 3BP

### 248 - Historic England

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 57

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**UC57 - Telford Court, Alma Road, St Albans, AL1 3BP**

We welcome the preparation for the high level HA by SADC.

We welcome criterion 3 that refers to the Conservation Area as well as the nearby locally listed buildings.

The policy should also discuss the issue of height. We appreciate that the current development on the site is 11 storeys. We would be looking for a significant reduction in height on this site to improve the townscape within the Conservation Area. The HA identifies the current height as an issue to be addressed.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, *`The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected,*

*where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The policy should also discuss the issue of height. We appreciate that the current development on the site is 11 storeys. We would be looking for a significant reduction in height on this site to improve the townscape within the Conservation Area. The HA identifies the current height as an issue to be addressed.

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend a slight change to policy wording throughout the Plan which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend *'conserve and where appropriate enhance the significance of the...[list assets]'*

## OS1 - Land to the North of Bricket Wood, bounded by the M25 and A405 North Orbital, AL2 3ET

### 141 - Landowners of Sites M4 and OS1

Submission Number: 141 Submission Date: 07/11/24 10:46

Respondent: Company/Organisation: DLA Town Planning Name: Mr James Fitzpatrick

On Behalf Of Company/Organisation: Landowners of Sites M4 and OS1 Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The draft Local Plan and accompanying Policies Map identifies the report site as proposed community facilities ref OS1. The identification of the development potential of this site is **supported** by the owners of this site. As is set out elsewhere in this report, the land is suitable for development and should remain allocated in the Local Plan.

- As set out in the St Stephen Neighbourhood Plan, the community use delivered will reflect the aspirations of the residents in the Parish. There will be consultation with all interested parties before any application is submitted to determine what the most appropriate use; however, given the size of the allocation, a large proportion of the site will come forward as publicly accessible open space and will include significant improvements to the PRoW network.
- Access can be achieved from Woodside Road, subject to technical highway input at the appropriate time.
- A Tree Survey and Constraints Plan will be developed as part of the design process to ensure that there will be sufficient separation between development and the Priority Habitat (and protected trees) along this boundary.
- Given that both allocations are linked by common ownership and adjoin, it is likely that proposals for both the residential and community uses will be coordinated
- The extent of the site that is subject to surface water flooding is shown in Figure 2 below, taken from the Council's Strategic Flood Risk Assessment. Areas of surface water flooding are mainly located along the watercourse which traverses the site and enters Five Acres. There are pockets of higher risk areas although these are limited to a very small proportion of the site. This limited degree of risk can be managed through the development process and does not represent a constraint to development.
- The SuDS Strategy will take into account the latest guidance on development in a Groundwater Source Protection Zone.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 0141 Local Plan representations - Sites M4 and OS1 - November 2024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

DLA Town Planning represents the owner and promoter of sites M4 and OS1 and our participation in the hearing sessions would assist the Inspector and help to respond to any queries raised.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**187 - Mr Roy Warren**

Submission Number: 187 Submission Date: 07/11/24 15:30

Respondent: Company/Organisation: Sport England Name: Mr Roy Warren

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Support is offered for the principle of allocating a site for community uses which may include a community centre and associated outdoor sport and recreation facilities. This may help address community outdoor sports needs in the Bricket Wood area identified in the Council's evidence base (Playing Pitch Strategy).

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Support is offered for the principle of redeveloping the pavilion at Toulmin Drive. The Council's Playing Pitch Strategy & Action Plan identified that the existing pavilion facilities were in need of replacement to support the use of the playing fields. This allocation would accord with the Council's evidence base (Playing Pitch Strategy).

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

---

**227 - National Grid**

Submission Number: 227 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: National Grid (Avison Young) Name: National Grid

Comment Number: 6

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Proposed development sites crossed or in close proximity to NGET assets: Following a review of the above Development Plan Document, we have identified that one or more proposed development sites are crossed or in close proximity to NGET assets. Details of the sites affecting NGET assets are provided below.

**OS1 – Land to the North of Bricket Wood -** ZA ROUTE TWR (419 - 522): 400Kv Overhead Transmission Line route: ELSTREE - SUNDON 1

A plan showing details of the site locations and details of NGET assets is attached to this letter. Please note that this plan is illustrative only.

Without appropriate acknowledgement of the NGET assets present within the site, these policies should not be considered effective as they cannot be delivered as proposed; unencumbered by the constraints posed by the presence of NGET infrastructure.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We propose modifications to the above site allocations and/or policies to include wording to the following effect. We propose that these modifications are applied to each of the aforementioned site allocations affected by NGET assets.

**OS1 – Land to the North of Bricket Wood**

*The development will include a strategy forresponding to the NGET Overhead Transmission Cable present within the site,demonstrating how the NGET Design Guide and Principles have been applied at the masterplanning stage and how the impact of the assets has been reduced through good design."*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 200 - Lawes Agricultural Trust

Submission Number: 200 Submission Date: 07/11/24 16:49

Respondent: Company/Organisation: Montagu Evans Name: Mr Amran Nagra

On Behalf Of Company/Organisation: Lawes Agricultural Trust Name:

Comment Number: 15

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Lawes Agricultural Trust fully supports the proposed allocations OS3 and OS4 as part of the research campus, and the inclusion will be important for the long-term development of the research campus .

Paragraphs 5.5, 5.24-5.26 of the draft Local Plan provides a discussion on the Herts Innovation Quarter and mentions the Rothamsted Campus as one of 3 core locations for knowledge-based research and development activities. These are also reflected within draft Policy EMP4 – Hertfordshire Innovation Quarter (Herts IQ).

We welcome the support for the Rothamsted Campus, particularly the release of land to the south from the Green Belt to facilitate future expansion, ensuring it maintains its status as a centre of excellence for agricultural science.

We endorse the inclusion of employment allocations (Refs: OS3 and OS4) for the extension of the research facility and view these as integral to deliver new facilities required to secure the long-term successful operation of Rothamsted Research. While we acknowledge that the draft employment allocations referenced in Policy EMP4 will support development proposals for additional facilities and spin-off companies, we believe the supporting text could provide further commentary.

Specifically, it should emphasise the importance of clustering research and business activities in this location, which is vital for the success of the scientific work and the creation of a world-class campus environment.

The amendments to Policy EMP4 in the Regulation 19 publication do not adequately reflect the facility's national and international significance or the nature of the work conducted there. As stated in our previous representation, we urge the Council to include more detailed information on the role and function of Rothamsted Research to ensure a robust policy framework that enables future proposals to advance. The Trust would be happy to provide any further input required to support this process.

Furthermore, we note that the revised policies map published under Regulation 19 does not delineate the full extent of the Lawes Agricultural Trust landholding beyond the core campus. Given that the majority of this land falls within the Green Belt, we believe this represents a missed opportunity in the latest Local Plan publication. Clearly demarcating the entire landholding on the policy map and linking it to emerging Policy EMP4 would create a strong Very Special Circumstances case to support future operational development and the effective application of Policy LG5.

While we appreciate the references to new employment allocations at OS3 and OS4, we recommend that these allocations be updated to encompass the entirety of the landholding and identify the various areas designated for development and operational work supporting the scientific facilities. As we noted in our Regulation 18 representations, this approach would help resolve inconsistencies between emerging Policies EMP4, which supports the development of Rothamsted Research and the Rothamsted Campus, and Policy LG5 (Green Belt), which restricts development within the Green Belt without further amendments.

Finally, to adequately reflect the significance of the Rothamsted Campus, we feel there is merit in the Council collaborating with site owners to prepare a supplementary planning document aimed at supporting the long-term vision for the site.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The amendments to Policy EMP4 in the Regulation 19 publication do not adequately reflect the facility's national and international significance or the nature of the work conducted there. As stated in our previous representation, we urge the Council to include more detailed information on the role and function of Rothamsted Research to ensure a robust policy framework that enables future proposals to advance. The Trust would be happy to provide any further input required to support this process.

Furthermore, we note that the revised policies map published under Regulation 19 does not delineate the full extent of the Lawes Agricultural Trust landholding beyond the core campus. Finally, to adequately reflect the significance of the Rothamsted Campus, we feel there is merit in the Council collaborating with site owners to prepare a supplementary planning document aimed at supporting the long-term vision for the site.

However, we would recommend that the entire site boundary shown in the HELAA map, along with the additional release, be identified for the development of the Rothamsted Campus. This would facilitate a clear and effective application of the other policies in the plan. For reference, a plan illustrating this area is included with these representations. This would be a reasonable alternative approach for land here, supporting the effectiveness of the policies in the plan which support the future of Rothamsted Research.

## 200 - Lawes Agricultural Trust

Submission Number: 200 Submission Date: 07/11/24 16:49

Respondent: Company/Organisation: Montagu Evans Name: Mr Amran Nagra

On Behalf Of Company/Organisation: Lawes Agricultural Trust Name:

Comment Number: 16

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Lawes Agricultural Trust supports the release of land from the Green Belt under Allocation OS4 and is pleased to see the land uses updated from the former release for market housing which would not have been delivered on a research campus.

The Lawes Agricultural Trust fully supports the proposed allocations OS3 and OS4 as part of the research campus, and the inclusion will be important for the long-term development of the research campus .

Paragraphs 5.5, 5.24-5.26 of the draft Local Plan provides a discussion on the Herts Innovation Quarter and mentions the Rothamsted Campus as one of 3 core locations for knowledge-based research and development activities. These are also reflected within draft Policy EMP4 – Hertfordshire Innovation Quarter (Herts IQ).

We welcome the support for the Rothamsted Campus, particularly the release of land to the south from the Green Belt to facilitate future expansion, ensuring it maintains its status as a centre of excellence for agricultural science.

We endorse the inclusion of employment allocations (Refs: OS3 and OS4) for the extension of the research facility and view these as integral to deliver new facilities required to secure the long-term successful operation of Rothamsted Research. While we acknowledge that the draft employment allocations referenced in Policy EMP4 will support development proposals for additional facilities and spin-off companies, we believe the supporting text could provide further commentary. Specifically, it should emphasise the importance of clustering research and business activities in this location, which is vital for the success of the scientific work and the creation of a world-class campus environment.

The amendments to Policy EMP4 in the Regulation 19 publication do not adequately reflect the facility's national and international significance or the nature of the work conducted there. As stated in our previous representation, we urge the Council to include more detailed information on the role and function of Rothamsted Research to ensure a robust policy framework that enables future proposals to advance. The Trust would be happy to provide any further input required to support this process.

Furthermore, we note that the revised policies map published under Regulation 19 does not delineate the full extent of the Lawes Agricultural Trust landholding beyond the core campus. Given that the majority of this land falls within the Green Belt, we believe this represents a missed opportunity in the latest Local Plan publication. Clearly demarcating the entire landholding on the policy map and linking it to emerging Policy EMP4 would create a strong Very Special Circumstances case to support future operational development and the effective application of Policy LG5.

While we appreciate the references to new employment allocations at OS3 and OS4, we recommend that these allocations be updated to encompass the entirety of the landholding and identify the various areas designated for development and operational work supporting the scientific facilities. As we noted in our Regulation 18 representations, this approach would help resolve inconsistencies between emerging Policies EMP4, which supports the development of Rothamsted Research and the Rothamsted Campus, and Policy LG5 (Green Belt), which restricts development within the Green Belt without further amendments.

Finally, to adequately reflect the significance of the Rothamsted Campus, we feel there is merit in the Council collaborating with site owners to prepare a supplementary planning document aimed at supporting the long-term vision for the site.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The amendments to Policy EMP4 in the Regulation 19 publication do not adequately reflect the facility's national and international significance or the nature of the work conducted there. As stated in our previous representation, we urge the Council to include more detailed information on the role and function of Rothamsted Research to ensure a robust policy framework that enables future proposals to advance. The Trust would be happy to provide any further input required to support this process.

Furthermore, we note that the revised policies map published under Regulation 19 does not delineate the full extent of the Lawes Agricultural Trust landholding beyond the core campus. Given that the majority of this land falls within the Green Belt, we believe this represents a missed opportunity in the latest Local Plan publication. Clearly demarcating the entire landholding on the

policy map and linking it to emerging Policy EMP4 would create a strong Very Special Circumstances case to support future operational development and the effective application of Policy LG5.

While we appreciate the references to new employment allocations at OS3 and OS4, we recommend that these allocations be updated to encompass the entirety of the landholding and identify the various areas designated for development and operational work supporting the scientific facilities. As we noted in our Regulation 18 representations, this approach would help resolve inconsistencies between emerging Policies EMP4, which supports the development of Rothamsted Research and the Rothamsted Campus, and Policy LG5 (Green Belt), which restricts development within the Green Belt without further amendments.

Finally, to adequately reflect the significance of the Rothamsted Campus, we feel there is merit in the Council collaborating with site owners to prepare a supplementary planning document aimed at supporting the long-term vision for the site.

However, we would recommend that the entire site boundary shown in the HELAA map, along with the additional release, be identified for the development of the Rothamsted Campus. This would facilitate a clear and effective application of the other policies in the plan. For reference, a plan illustrating this area is included with these representations. This would be a reasonable alternative approach for land here, supporting the effectiveness of the policies in the plan which support the future of Rothamsted Research.

## 248 - Historic England

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 32

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**OS4 (formerly site M11) Extension to Rothamsted Research, Harpenden Campus, AL5 2JQ**

The site is located within the wider setting of the Grade I listed Rothamsted Manor House, and associated Grade II listed buildings. Development has the potential to impact these listed buildings through a change in their settings.

We welcome the preparation of the detailed HA by Place services for this site. However, we note that there are some inconsistences in the assessment e.g. para 5.7 states that development of the site `would result in high level of harm to the Grade I listed Rothamsted Manor House, and moderate level of harm to the Grade II listed Kitchen Garden Walls and adjoining outbuilding, Grade II listed Storage Barn.' However, para 6.3 states that `the proposed Allocation would result in high level of harm to the Grade I listed Rothamsted Manor House, and low level of harm to the Grade II listed Kitchen Garden Walls and adjoining outbuilding, Grade II listed Storage Barn' (emphasis added).

We are particularly concerned about the high level of harm identified to the Manor House through the loss of parkland in an area of importance.

We note that the HA recommends the site be used to commercial/research use instead of residential. This would seem to be an unusual form of mitigation.

We broadly welcome the reference to heritage in criterion 5 and restriction of development to eastern half of site in criterion 1.

We are concerned about the potential height and mass of research buildings. Whilst we appreciate that the deciduous trees along the access road/avenue offer some visual mitigation in the summer months, the impact on winter views will need to be carefully considered. We would also recommend a height limit of 2.5 storeys.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, `*Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, `*The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.'*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We recommend an additional criterion to read:

*Development should be discreet and of high-quality design, with a maximum height of 2.5 storeys. Consideration should be given to both summer and winter views.*

We recommend amending the policy wording to strengthen the policy throughout the Plan (including this site). We recommend a slight change to policy wording throughout the Plan which would address this:

1. Instead of 'minimise any harm to the setting and significance of the… [list assets]' we would recommend *'conserve and where appropriate enhance the significance of the...[list assets]'*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## Appendix 1 - Cycle and Car Parking Guidance and Standards for New Development

### 70 - Mr Philip Anderson

Submission Number: 70 Submission Date: 05/11/24 15:27

Respondent: Company/Organisation: Name: Mr Philip Anderson

Comment Number: 1

**Type:**

* Table

**Number:**

Figure 1 Amount of car parking to be provided in each Zone

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Appendix 1 Figure 1 states that in Zone 1 that the amount of Car Parking to be Provided “Must normally meet parking standards in full” The use of the word “normally" allows planners to ignore parking requirements by introducing any justifications they choose to invent. I reference as an example a recent approval (5/17/2481) which allowed a six bedroom house to reduce its in-curtillage parking from two to one space with the following justification: “Given the site’s sustainable location, its proximity to local shops, and its accessibility to local bus networks and St Albans City Railway, it is considered that the provision of one car parking space would be sufficient for the needs of the application site. " Justifications for reducing parking requirements are typically "access to local shops, bus services, train services" which are then argued make the site “sustainable”. Such justifications clearly apply to nearly all locations within the St Albans’s area and allow parking requirements to be ignored. Strict adherence to required parking standards are absolutely necessary in order to maintain safe access to local roads for local traffic and therefore the proposed wording shows that the Plan is not Positively Prepared.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The suggested wording for Zone 1 is : "Must meet parking standards in full except in exceptional circumstances.”A reference is then required to advise on what does, or does not, consist of exceptional circumstances. The suggested wording for this condition is: "The parking requirement must be met unless the reasons for changing it are truly exceptional and do not apply to the majority of houses in St Albans."

These wording changes and additions are intended to make it more difficult for planners to ignore the in-curtilage parking requirements of the Local Plan particularly when considering changes to existing buildings. The broader reason for strengthening the wording is that if the plan allows in-curtillage parking to be reduced more vehicles will park in the roads resulting in increased hazards for pedestrians and motorists. It will also impede traffic flows and increase congestion. The interests of road users must surely be prioritised over those whose interest is simply to increase a building's size.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

## 71 - Mr Philip Anderson

Submission Number: 71 Submission Date: 05/11/24 16:02

Respondent: Company/Organisation: Name: Mr Philip Anderson

Comment Number: 1

**Type:**

* Table

**Number:**

Appendix 1 Figure 1 Residential Car Parking Standards

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

The proposal in Residential Parking Standards is that a 3+ bedroom dwelling should have 2 allocated spaces and 0.5 unallocated. The previous Local Plan from 1994 required that only a 3 bedroomed dwelling should have this requirement. A 4+ dwelling was required to have 3 allocated spaces and 0.5 unallocated. The new plan therefore permits in-road parking to be increased over that which was required in 1994. The new plan allows all houses with more than 3 bedrooms to have only 2 allocated spaces. I do not believe that a modern Local Plan should allow more parking in our roads than was viewed as acceptable 30 years ago. The allocated parking requirements should if anything be increased to reflect the substantial increase in car ownership that has happened since 1994. The proposed Plan is therefore not Positively Prepared nor is it Justified since it will permit increased roadside parking. An increase in roadside parking will increase dangers for all road users including pedestrians as well as motorists. It will also result in increased congestion and delays.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The referenced table should include a statement that car parking standards for 4+ bedroom dwellings are 3.5 spaces (3 allocated and 0.5 unallocated). The requirement for 3+ dwellings should be removed and replaced by a requirement for 3 bedroom dwellings of 2.5 spaces (2 allocated and 0.5 unallocated).

This change will increase allocated parking in St Albans and therefore decrease roadside parking with benefits described above for all road users

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 223 - Oaklands College and Taylor Wimpey

Submission Number: 223 Submission Date: 07/11/24 18:34

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Oaklands College and Taylor Wimpey Name:

Comment Number: 2

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

See attached representations for full submission.

**5.2 Appendix 1 (Cycle and Car Parking Guidance and Standards for New Development)**

It is acknowledged that a sustainable location and development which make the most of promoting sustainable travel can and does generally drive down the need for traveling by car and need for car parking, but this is an occupiers decision based on the attractiveness of the transport options available to them. If the sustainable transport strategy is successful, residents generally own fewer cars and so fewer parking spaces are needed. However, there are to fundamental issues that result from forcing developers to meet lower parking standards:

1. Whether occupiers of dwellings use the parking space or not, they associate the availability of parking spaces with value, and so, reduce parking on housing plats reduces sale prices and therefore revenues/viability; and
2. If parking is reduced below actual need for a development, residents simply park on-street which harms placemaking and actually discourages residents from walking and cycling.

Oaklands College and Taylor Wimpey note that in Figure 1 of Appendix 1, broad location sites are to be supported by 'bespoke parking strategy' at the planning application determination stage. This strategy is to include a lower than standard parking requirements, in accordance with Policy TRA4e):– for example, for residential development: 1-bed = less than 1.5 spaces; 2-bed = less than 2 spaces; and 3+bed = less than 2.5 spaces.

Oaklands College and Taylor Wimpey wish to highlight that the strategy agreed with the Council should provide a sufficient amount of car parking to avoid 'parking stress' in the local area and should not therefore require reduced parking standards without regard for potential other negative effects (including but not limited to a detrimental impact on placemaking and viability through reduced values). As such, for the broad locations (zone 4) in Figure 1 of Appendix, the Council should 'allow' lower car parking standards rather than 'require' lower parking standards.

Oaklands College and Taylor Wimpey reserve the right to make comments at a later stage.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. **4.0 Housing Supply & Allocations**

- Part A Table 3.1 and 3.2 & Part B Local Plan Housing Sites

4.1 At Regulation 18 (September 2023) LIH submitted detailed representations in relation to the suitability,

deliverability, and availability of several of the proposed site allocations in the Local Plan. We asserted that the Council's approach was unsound as it had not been suitably justified, effective or positively prepared and as such was not consistent with national policy. These concerns remain and have not been addressed adequately by the Council in the Regulation 19 Plan.

4.2 We rely in part in these representations on the Identified Sites Deliverability Assessment – FINAL - 25th

Sept 23 submission made at Regulation 18 stages, as it pertains to the sites retained as allocations in the Regulation 19 Plan and as applicable to additional identified sites, where these are pertinent.

4.3 We have set out in Sections 2.0 and 3.0 the prevailing national policy agenda and lack of regard to which

StADC have placed upon this, which we consider means that the draft Plan cannot be sound as it is not consistent with national policy. We now turn to the specifics of the Plan and its supporting evidence base.

4.4 Limited information has been provided in relation to the Council's updated position on site allocations

and housing supply, however we do note that a Housing Evidence Paper with Trajectory (2024) has been published which we address below. The same Trajectory is also provided at Table 3.2 of Part A of the Regulation Plan.

4.5 The focus of our representations relates to:

- Draft Policies SP1 and SP3 Key diagram 1.3, paragraph 3.7 – 3.11, Policy.
- Table 3.1 and 3.2 of Part A of the draft Local Plan.
- Draft Policies LG1, LG2, LG3, LG4, LG5 and LG6.
- Part B of the draft Local Plan Table A1.1.
- Part B - Sites H 1 – H4; B1 – B8 ; M2 – M23; P1. – P3; U2 – U4; UC1 – UC57.
- Green Belt Review (2023).
- Sustainablity Appraisal (2024).
- Infrastructure Delivery Plan (2023 & 2024).
- Lack of due regard to the South West Hertfordshire - Local Housing Needs Assessment Report.

4.6 Substantial revisions are required to the draft Plan and for additional housing allocations to be included

on land such as the land at NE Redbourn which has the potential to provide a sustainable and timely contribution to the housing supply position within the first 5 years of the plan period (following adoption).

4.7 In terms of context, Table 6 identifies housing requirement as detailed in the Regulation 18 Plan and

sets this against the position as now set out in Part B Local Plan Sites (Part B). The final column in Table 6 indicates the change in position (based upon the Part B Local Plan Sites figures).

Table 6 – Regulation 18 and Regulation 19 Housing Supply

| | **Regulation 18 Identified Supply** | **Regulation 19 Identified Supply** | **Difference** |
|---|---|---|---|
| 1 - Hemel Garden Community | 4,750 | 4,300 | -450 |
| 2 - Broad Locations | 4,431 | 4,227 | -204 |
| 3 - Large Sites | 284 | 385 | +101 |
| 4 - Medium and Small Sites | 1,302 | 856 | -446 |
| 5 – PDL Green Belt | 144 | 137 | -7 |
| 6 - HELAA Sites | 93 | 43 | -50 |
| 7 - Urban Capacity Sites | 775 | 860 | +85 |
| 8 - Other | 0 | 0 | / |
| Total | **11,779** | **10,808** | **-971*** |

4.8 It is evident that the identified supply of housing has been substantially reduced in the Regulation 19 Plan.

- Housing Land Supply & Allocated Sites

4.9 Several mathematical errors were identified in the supply position at Regulation 18 stage which appear

to have been duplicated at Regulation 19 stage, perhaps due to the undue speed in which the Plan has been prepared.

4.10 Table 7 highlights the inconsistencies identified at Regulation 18 stage and now again at Regulation 19

stage. We highlight inconsistencies and errors that have occurred in red in Table 7 which relate to:

- Part A Broad Locations as set out in Table 3.1.
- Trajectory as at Table 3.2 of Part A of the Draft Plan (and Appendix A to the Housing Land Supply Windfall & Capacity Evidence Paper[30] (Housing Evidence Paper)
- Part B Local Plan Sites Table A1.1 when compared Trajectory in the Housing Evidence Paper (Trajectory 2024).

4.11 Table 7 – Table 3.2/Appendix A Trajectory Supply

| | **Regulation 18 Trajectory Supply** | **Regulation 19 Trajectory Supply** | **Difference** |
|---|---|---|---|
| 1 - Hemel Garden Community | 4,750 | 4,300 | -450 |
| 2 - Broad Locations | 4,431 4,281 | 4,227 4,077 | -204 |
| 3 - Large Sites | 284 | 385 | +101 |
| 4 – Medium and Small Sites | 1,302 1,581* | 856 851 | -446 -345 |
| 5 – PDL Green Belt | 144 | 137 | -7 |
| 6 – HELAA Sites | 93 78 | 43 | -50 -35 |
| 7 – Urban Capacity Sites | 775 847 | 860 | +85 +13 |
| 8 - Other | 0 | 0 | / |
| Harpenden Neighbourhood Plan | | 57 ** | |
| Total | **11,779 11,681** | **10,808 10,653** | **-1,028*** |
| **Identified Shortfall** | **4,606** | **3,690** | |

**Assumes that 3 and 4 are added together 1,581 in Trajectory mathematically it = 1,586 ** Harpenden NP dwellings excluded from Allocation figure*

4.12 The mathematical errors show a difference of 160 dwellings between the Part B Table A1.1 and the

Table 3.2 Part A or Housing Evidence Paper/Appendix A Trajectory. This is confusing and suggests a lack of time has been allowed to fully review the material pursuant to the Regulation 19 Plan consultation. It also undermines the soundness of approach if such errors are taking place in a process that the Council themselves indicate is swift.

4.13 In addition to the mathematical errors that we note above, Table 3.1 in Part A of the Local Plan, sets out

the follow different housing requirements for the Broad Locations from the assumptions set out in Part B of the Local Plan:

- North St Albans – 1,146 dwellings (Part B states 1,097)
- North East Harpenden – 762 dwellings (Part B states 738)
- West Redbourn – 593 dwellings (Part B states 545)
- East St Albans – 522 dwellings (Part B states 472)
- Glinwell, St Albans – 436 dwellings (Part B states 484)
- West of London Colney – 405 dwellings (Part B states 324)
- North West Harpenden - 293 dwellings (Part B the same)
- Harper Lane, near Radlett 274 dwellings *(Part B the same)*

4.14 The supply position on sites in Part's A and B of the Regulation 19 Local Plan and its evidence base, is

inconsistent and confusing. StADC should take the time required to ensure that the Regulation 19 Plan and its associated evidence base is accurate, consistent, and consequently sound in basis and fact.

4.15 Given the numerical anomalies and as there is more detail on the sites in the Trajectory (2024), our

representations continue to be based upon a comparison against the Trajectory (2024) for consistency purposes.

*30 Appendix A to the SADC Housing Land Supply Windfall & Capacity Evidence Paper - Sep 2024 V5.*

4.16 The Housing Evidence Paper is scant in detail in explaining the Council's position in moving from

Regulation 18 to Regulation 19, not least given the concerns raised in representations at Regulation 18

stage and given the substantial deficit that was identified, which appear to have been ignored.

4.17 We summarise below the apparent changes in the Council's Position on housing land supply as set out

in the Trajectory (2024). The change in overall supply elements is set out in Table 8 below:

Table 8

| **Regulation 18 to 19 Position Change** | **Change** |
|---|---|
| · **Completions** | |
| o Regulation 18 – 1,267dw 2019/20 to 2021/22. | |

- Regulation 18 – 888 dw/yr (15,096)
- Regulation 19 – 885 dw/yr (14,603)
- Only $^{1}/_{2}$ year assumed for 2024/2025 (482dw)
- Reduction 493 dw. -493

· **Stepped Trajectory**

- Regulation 18 – 15,096, Delivering from 24/25
- Regulation 19 – 14,603 delivering from 24/25
- Reduction 493 dw -493
- 2024/25 – 25/26 – Same 389/yr
- 2026/27 – 2030/31 – 225 dw/yr reduction (710 to 485dw)
- 2031/32 – 2035/36 – 55dw/yr increase (1,200 – 1,255dw)
- 2026/37 – 2040/41 – 75dw increase (950 to 1,025dw)

· **Total Supply:**

- Regulation 18 – 15,938, Delivering from 22/23
- Regulation 19 – 14,989 delivering from 21/22
- Reduction of 949 dwellings -949
- 107 dwellings different from Stepped Trajectory.

· **Overall, Buffer**

- Regulation 18 – 5%
- Regulation 19 – 2.6%
- Reduction of 2.4% (on lower figure)

4.18 Except for the Harpenden Neighbourhood Plan sites (57 dwellings) and increase in future completions

(92 dwellings) the overall supply position has reduced significantly in all regards:

- Completions – reduced.
- Windfalls - reduced.

- Site allocations – reduced.
- Annual requirement – reduced.
- Stepped Trajectory reduced by 42% for years 1 – 5 following Plan adoption.
- Total supply – reduced.
- Overall buffer – reduced.

4.19 These changes have been taken with the knowledge of the wider national political picture on housing

supply. It is questionable as to whether the approach is a positive approach to plan making and is plainly inconsistent with adopted and emerging national policy.

**Site Allocations Assessment**

4.20 At Appendix 1 to these representations, we assess the Regulation 19 position on site allocations as
compared to the draft Regulation 18 position.

4.21 At columns 1 to 4 of Appendix 1 we identify:

- Site name and category additional sites at Regulation 19 are in red
- Appendix A housing requirement Regulation 18 Plan.
- Part B of Local Plan housing requirement Regulation 19 Plan.
- The difference between the two assumptions.

4.22 Appendix 1 to these representations shows that:

- HCG allocations – dwelling provision has been reduced (-450 dwellings).
- Broad Locations - dwelling provision has been reduced (-204 dwellings).
- Large Sites – minor amendment (+3 dwellings).
- Medium & Small Sites – dwelling provision has been reduced (-338 dwellings).
- Green Belt PDL - minor amendment (-7 dwellings).
- HELAA Sites - dwelling provision has been reduced (-50 dwellings).
- Urban Capacity Sites – dwelling provision has been increased (+76 dwellings).
- Other sites - N/A.

4.23 Neither in Part B Table A1.1 of the Local Plan or in the Housing Evidence Paper (or Trajectory at Appendix

1. A) do StADC explain the justification for the current assumptions or provide reasoning as to the basis for the substantial reductions in supply that have been made.

4.24 We identify that for Broad Locations, Part B Table A1.1 does not mirror the actual capacity of the sites

when their individual capacity figures are reviewed, and this does not match the broad location capacity indications in Table 3.1 in Part A of the Local Plan and in other instances does not mirror the Trajectory (2024).

4.25 This is confusing, poorly prepared and demonstrated a lack of proper review in respect of the housing

supply position which is perhaps resultant from the rush to publish the draft Plan. The consistency in errors however undermine the justification of the Council's supply position. Part A, Part B and the supporting evidence base should be reviewed by StADC and brought into line to demonstrate the consistency of approach and a robustness in evidential basis to be effective.

4.26 At columns 5 to 6 of Appendix 1 to these representations we identify that:

- The housing figure as set out in the Trajectory at Appendix A of the Housing Evidence Paper
- Detail the differential between this figure and that in Part B Table A1.1

4.27 In undertaking this assessment, we show that the Part B Table A1.1 and the Trajectory assumptions at

Appendix A of the Housing Evidence Paper do not match up, resulting in a difference of 160 dwelling (shortfall).

4.28 At columns 7 and 8, we identify:

- The LIH Regulation 18 representations, identified shortfall in housing provision.
- The sum differential between the LIH assumptions on deliverability and the Regulation 18 draft Plan.

4.29 At columns 9 and 10, we identify:

- The LIH identified shortfall in housing provision at Regulation 19 (based upon Regulation 18 assessments)
- The differential between the LIH assumptions on deliverability and the Regulation 19 draft Plan.

4.30 Appendix 1 to these representations shows that the Council's assumptions at Regulation 19 Plan

overestimates capacity by almost 3,700 dwellings and that only 7,180 dwellings are likely to be delivered within the plan period to 2041 from the identified supply sites and sources. Clearly there is a need for additional sites such as NE Redbourn to be included as allocations to ensure that the draft Plan can at least meet its housing targets within the first 5 years - and beyond, following adoption.

4.31 We caveat some of this due to the anomalies in the Council's housing figures across documents, it does

make assessing the accuracy of the baseline confusing, but broadly even if these mathematical anomalies were overlooked the shortfall in supply is still in the region of 3,500-3,700 dwellings.

4.32 We now turn to other supply side aspects as substantiated by Policies SP1, SP3 and Table 3.2 of Reg 19

Local Plan Part A and Part B Local Plan Table A1.1, Housing Evidence Paper and Trajectory (2024) specifically.

**Housing Trajectory Within the Local Plan Document**

4.33 Sets out new assumptions. No explanation for why any changes have taken place from Regulation 18
assumptions. Appendix 2 – Trajectory Comparison shows that the Plan has dropped two years from the Trajectory 19/20 and 20/21 from Regulation 18 Plan to Regulation 19 Plan.

**Period Covered by the Housing Trajectory**

4.34 The revised plan period has been adjusted to 1st October 2024 to 31st March 2041. 15 years from the
estimated point of adoption of the Plan in March 2026.

4.35 No explanation or justification for altering the base date or how previous under delivery in previous

years has been addressed has been provided.

**Non-implementation rate / Lapse assumption**

4.36 We note that the Housing Evidence Paper refers to the Litchfield's Report [31] as justification for its
approach.

**Windfall Rate**

4.37 Reduction in rates has been identified justified by revised trend data:

- 180dw/yr based upon completions 2010/11 – 2019/20
- 145dw/yr based upon completions 2013/14 – 2022/23

4.38 The justification of the reduction also indicated to relate to a decrease office conversion, but no

evidence is provided to substantiate this. The AMR 2024 has not been prepared (or published).

**Build Out Rates**

4.39 Reference to Litchfield's Report [32] and indicates that a '*conservative approach to build out has been*
*applied given housing market is attractive*' however, no details as to the assumptions or rationale for each site's anticipated delivery, which underpins the assumptions has been provided.

4.40 With regards to HGC , we note that an alternative approach has been taken due to the site's scale, but

this is not fully explained based upon the sites deliverability trajectory and associated logical considerations associated with the site 'coming on stream'.

4.41 We note that with regards to infrastructure delivery mix of housing it is stated that "*the development*

*can meet the complete range of different housing needs simultaneously*." Again, this might be

*31 Feeding the Pipeline, Lichfields (November 2021)* https://lichfields.uk/content/insights/feeding-the-pipeline

*32 Start to Finish (third edition), Lichfield's (March 2024)*https://lichfields.uk/content/insights/start-to-finish-3)

achievable, but no information is provided as to the rationale and approach to such across a site as large as HGC which straddles Local Authority boundaries and has significant infrastructure requirements with associated substantial lead times.

**Housing Capacity**

4.42 This appears from the Housing Evidence Paper to have been based upon HELAA and UCS assumptions
however as Appendix 1 to this submission shows many of the capacity assumptions have been amended without explanation. Our representations at Regulation 18 stage indicated significant concerns over the assumptions in this regard.

4.43 We note that the Housing Evidence Paper indicates that the assumptions on Green Belt sites – based

upon work done in 2014 from the Councils Residential Density Report 2014 [33]. This is historic data and would benefit from further consideration and review to substantiate the site capacity assumptions – perhaps having more regard to specific site context and capacity.

4.44 We have noted above that the draft Plan and associated evidence base are lacking in relation to matter

of Hertfordshire and London's unmet need and assessing the role that StADC is able to play a role in meeting either its own, or wider unmet housing needs.

4.45 We note the gross to net assumptions as detailed below:

| Area (hectares) | Gross to net ratio |
|---|---|

| | |
|---|---|
| Sites up to 0.4ha | 100% |
| Sites between 0.4 to 2ha | 85% |
| Sites greater than 2ha | 60% |

4.46 No explanation has been provided in relation to wider supply changes of aspects of the Trajectory

(2024) which is at Table 3.2 of Part A of the draft Plan and Appendix A to the Housing Evidence Paper, which we address below.

**Trajectory**

4.47 At paragraph 74 of the NPPF (2023) it states:

*"Strategic policies should include a trajectory illustrating the expected rate of housing delivery over the plan period, and all plans should consider whether it is appropriate to set out the anticipated rate of development for specific sites. Local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum o f five years' worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old.*

*The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:*

1. *5% to ensure choice and competition in the market for land; or*
2. *10% where the local planning authority wishes to demonstrate a five-year supply o f deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or*
3. *20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply. "*

4.48 We have already addressed above several aspects of the Trajectory Table 3.1 in Part A of the Local Plan

and Appendix A of the Housing Evidence Paper (2024) on matters such as pipeline, windfalls, large and medium site assumptions. We deal with some more detailed aspects associated with the Trajectory below.

4.49 At this stage, it is not clear whether assumptions in the Trajectory (2024) are deliverable or not due to

the lack of supporting evidence being provided. We provide a comparison on the Trajectory's from the Regulation 18 and 19 Plans for comparison at Appendix 2 - Trajectory Comparison to these representations.

4.50 We note the Council's most recent AMR (2023) (published since the Regulation 18 consultation in later

2023, whist not in the evidence base for the Plan, is on the Council's website and this shows a completely different 4/5-year HLS approach, assumptions, and rationale, that is not addressed with the

*33 para 7.4 Housing Land Supply Windfall & Capacity Evidence Paper*

Housing Evidence Paper (2024) or elsewhere within the draft Plan. No 2024 AMR has been published to support the Regulation 19 Plan assumptions.

4.51 No details have been provided as to the changes in the Trajectory assumptions from Regulation 18 to

19 these include:

- Delay of the HGC dwelling commencement
- Reduction of the stepped trajectory from 710 dwellings per annum to 485 dwellings in the first 5 years.
- Reduction in the first 5 years period (25/26 – 2030/31) of completions from 4,285 dwelling to 2,941 dwellings.
- Significant alteration in the first 5 years period (25/26 – 2030/31) from PDL land in urban areas.

4.52 It is unclear how StADC has made its decisions in relation to its Trajectory (2024), approach to the use

of a stepped method, and the approach to the revised delivery rates from its identified sites. What is evident is that the approach for the next 7 years appeals to be to defer housing delivery as far as possible.

Allocations Overview

4.53 We consider that the following polices, and aspects of the draft Plan are unsound, the reasons for which
we address below:

- Draft Policy SP1, SP3 and Table 3.1 of Reg 19 Local Plan Part A
- Part B Local Plan Table A1.1 and Sites H 1 – H4, Sites B1 – B8; M2 – M23; P1. – P3; U2 – U4; UC1 – UC57
- Part A Policies LG1 – LG4

4.54 Appendix 2 – Trajectory Comparison to these representations, explores the changes undertaken in

housing supply between Regulation 18 and 19 stages of the Plan. No substantiation has been provided to the changes that we identified in Table 9 below.

4.55 Table 9 summarises the changes in housing supply from Regulation 18 to 19 identified in Appendix A in

respect of site allocation assumptions in the Trajectory (2024). No explanation or justification is provided for the following amendments, which leads to uncertainty around the basis and reasoning for decision making in the draft Plan on site delivery and allocation requirements.

Table 9 – Changes in Site Allocation Assumptions in Trajectory (2023) and Trajectory (2024)

| **Supply Element** | **Regulation 19 Position** |
|---|---|
| Hemel Garden Communities | -450 |
| · Regulation 18 to 19 – deferred 1 year from delivery. | |
| · Annual delivery profile remains the same. | |
| · 1 year delay causes 450 dwellings to fall off beyond plan period. | |
| · Reduction 450 dw (4,750 to 4,300dw) | |
| Broad Locations | -204 |
| · Regulation 18 to 19 – deferred 1 year from delivery. | |
| · Changes to delivery profile over most years. | |
| · Reduction of 204 dwelling in period (4,281 – 4,077dw) | |
| Large Sites | / |
| Regulation 18 to 19: | |

· Was within ‘Other GB Locations’ at Reg 18

· Total 385 dwellings to supply

· 150 dwellings first delivered in 32/33, 7 years after adoption.

Medium & Small Sites /

Regulation 18 to 19:

· Was within ‘Other GB Locations’ at Reg 18

· 851 dwellings to supply

· 152 completions starting in 29/30, 4 years after adoption

Combined Large & Medium/Small Sites -345

· Other GB Locations Regulation 18 = 1,581 dwellings

· Combines L&M Sites Regulation 19 – 1,236 dwellings

· Reduction of 345 dwellings

Previously Developed Green Belt -7

· Regulation 18 to 19 – 144 dw to 137.

· Starting in same year 29/30.

· Small changes to delivery profile.

· Reduction of 7 dwellings

PDL in Urban Area (HELAA) -35

· Regulation 18 to 19 – 78 to 43 dw.

· 1 year delay in delivery, starting in 29/30.

· Small changes to delivery profile.

· Reduction of 35 dwellings.

Other in Urban Area (UCS) +13

· Regulation 18 to 19 – 847dw to 860dw.

· Starting 1 year later and significant reduction in delivery rates spread out more by an additional year (over the deferral year (so two years).

· Increase of 13.

**Previously Developed Land within Urban Areas**

4.56 At Regulation 18, in 2028/2029 is a strange entry which suggests that 547 dwellings were identified as
being delivered in that one year. There was no detail on lead times provided in relation to the delivery rates and no site details provided to suggest what sites might be delivering this significant one off, contribution, which formed part of the stepped trajectory for the five-year period after the plan’s adoption (2026/2027 – 2030/2031).

4.57 This has been amended at Regulation 19 stage but with no explanation as to the change that have been

made. Sites have been repositioned between the large, medium, and small sites categories and some small sites have been removed but it is unclear as to the basis for the change in approach and rationale.

4.58 Again, no delivery is anticipated from this source until 2029/2030. No justification for the rationale has

been provided.

**Delivery Rates**

4.59 At Regulation 18 stage, delivery in the past 3 years was averaging 422 dwellings per annum. In the
Regulation 19 Plan, this is reduced to 360 dwellings[34]. This is just **40%** of the required annual supply going forwards (885 dwellings (2023 standard method) and **23%** of the (1,544 dwellings 2024 standard method).

4.60 Delivery from future completions average in the period from now until 2030/31 (5 years after anticipated

plan adoption) totals some 1,944 dwellings (or 1,787 including lapse rates) – an average of 297-324 dwellings (based upon 6 years average) or 255 - 277 dwellings based upon 7 years. At best this represents about **36%** of the required annual supply (885 dwellings (2023 standard method) and **22%** of the (1,544 dwellings 2024 standard method).

4.61 No draft allocated sites are identified in the Trajectory (2024) to be delivering any dwellings until

2029/2030 which represents year 4 after the Draft Plan is adopted, 5.5 years from now. Based upon the current assumptions the housing supply position will be significant below the standard method (2023), further increasing issues of unmet need and affordability within the district. We question on this basis whether 'no plan is better than a plan'.

4.62 An additional buffer of sites is required to ensure that a suitable range and breadth of sites are identified

to ensure that the StADC is able (should delays on large sites arise) to meet in target housing projections.

4.63 The significant reduction in housing delivery is not assessed within the context of identified housing

need in the district of some 802 dwellings per annum and/or the draft NPPF (2024) requirement for 1,544 dwellings per annum.

4.64 In effect, for the next 5 years, StADC is relying upon the delivery from sites with existing planning

permissions, and 363 dwellings being delivered from windfall sites. This does not appear to be a plan lead system and is not the way in which either a stepped or incremental Trajectory should work.

*34 Appendix 2 – Trajectory Comparison years 2021/22 – 2023/24*

**Stepped Trajectory**

4.65 The Trajectory (2024) of the Draft Plan indicates delivery targets:

- 2024 – 2026– an average of 398 dwellings/year.
- 2026/2031 (5 years after the plan adoption) - 710 dwellings per annum at Regulation 18, now 485 dwellings per annum.
- 2031 – 2036 (6 – 10 years post adoption)– 1,200 dwellings per annum at Regulation 18, now 1,255 dwellings per annum.
- 2036 – 2041 - 950 dwellings per annum at Regulation 18, now 1,025 dwellings per annum.

4.66 We note that from 2030/31 StADC anticipated the stepped trajectory increasing from 485 dwellings per

annum (which is only exceeds the standard method housing requirement in year 5 from adopted (2030/31) to 1,255 dwellings per annum in 2031/32. No explanation has been given for the reduction of the stepped trajectory from 710 dwellings per annum to 485 dwellings in the first 5 years from adoption or the increased provision in the final 5-year period from 950 to 1,025 dwellings per annum.

4.67 There is no explanation given in the Housing Evidence Paper for these changes, not least the 42%

reduction in the stepped Trajectory and it's rational as set against the SM (2023) requirement of 885 dwellings.

4.68 What is wholly apparent is that in almost all areas of housing supply, provision is being reduced,

deferred, and delayed, an approach which is completely counter to the NPPF (2023) WMS and draft NPPF (2024).

**Buffer**

4.69 With a 20% buffer applied to years 1 – 5 and the 5% buffer at Regulation 18 has been reduced to 2.6%
overall as detailed above (as required by the NPPF), several anomalies result including:

- Delivery only exceeds the standard method (2023) in 20930/31 the final year of the plan period. In all years prior to that performance substantially falls below the requirement.
- 2031 – 2036 (6 – 10 years post adoption)- in this period it appears in the assumption is that more than 500 dwellings/ year will be delivered from Broad Locations to year 9 of 10.
- HGC delivery assumptions appear overly ambitious and highly unrealistic as summarised above and detailed in the Identified Sites Deliverability Assessment (2023).

4.70 Moreover, no regard has been had for infrastructure capacity or delivery and how this relates to the

assumed delivery rates from identified sites.

**Unmet Need**

4.71 As already set out, StADC in an area of very high market demand, low affordability and is close to
London. It is an area which has not has properly planned for growth for circa 30 years. Such is the acute level of unmet need within the district. We set out in Section 5.0 the significant gaps in the evidence base regarding housing need and market evidence and, as such, greater evidence is required in this regard to support the draft plan's policies around matters such as quantum and spatial decision making for example.

4.72 In addition to StADC's acute unmet housing need for market and affordable housing, the district's

relationship to London and the extent of unmet housing need in the capital, should be acknowledged or addressed within the draft Regulation 19 evidence base.

4.73 For the reasons noted above it is evident that a significant amount of further work is needed to ensure

that the draft Plan's land supply targets and assumptions can actually be achieved and that sufficient sites have been identified which are capable of delivering within the plan period.

4.74 Accordingly, we consider that the current housing land supply assumptions in the Regulation 19 Plan

are significantly lacking in evidential support, and it clear that the land at NE Redbourn (being available, deliverable and suitable in NPPF terms) should be allocated in the draft Plan to help address some of the major deficiencies that have been identified in the land supply position.

**Mathematical Anomalies**

4.75 We have detailed above the mathematical anomalies between the Trajectory (2024) details of site
delivery and Part B Local Plan Sites Table A1.1.

- Alternative Supply Position

Hemel Garden Community & Broad Locations

4.76 HGC straddles both Dacorum and St Albans administrative districts and, as such, there will be certain
aspects of the HGC's delivery which will not be within the control of the StADC. Dacorum's plan is currently lagging. StADC will, on some level, be constrained by the progress made – or not made - in Dacorum. This could be a major factor in restricting delivery, not least in relation to securing outline planning permission (resolutions) and entering the necessary s106 agreements; but also matters of infrastructure delivery, SANG's and other shared aspects of the HGC concept plan.

4.77 To achieve the delivery of 100 dwellings per year occupations by 2028/2029 the following aspects all

need to take place within a 3-year period from plan adoption which, from our experience, seems highly unrealistic:

- Securing outline planning approval and completion of (complex) s106 agreement.
- Sale of land parcel, submission and approval of reserved matters details and discharge of relevant pre commencement conditions.
- 
- Construction of enabling works.
- Development of land parcels to deliver units.

4.78 As such, assuming the Local Plan is adopted as proposed in March 2026 (LDS Sept 2024)[35] for a large

strategic scheme of this nature, we would anticipate (at best) the following time considerations for these requirements, namely:

- Preparation of masterplan – 18 months (mid-late 2027)
- Planning application & s106 execution - 2 years for complex site (mid - end 2029)
- Pre commencement condition submission and discharge – 12 months (mid - end 2030)
- Commencement of early enabling Infrastructure works – 12 months (mid - end 2031)

4.79 Indeed, the Crown Estate own (best case) work programme suggests that it is unlikely that 100 dwellings

can be delivered by 2028.

4.80 StADC provide no details on:

- Condition discharge
- Land sales and procurement
- Reserved matters submissions

4.81 The allocation of HGC is accepted as per Policy SP1, SP3 and Table 3.1 of Part Local Plan and Part B Local

Plan Table A1.1 and Sites H 1 – H4, however concerns relate to the level of assumed delivery within the draft Plan period and the lack of evidence to substantiate the proposed delivery rates set out in the Trajectory (2024) and timeline. The lack of justification around the delivery timeframes for HGC, given the cross-boundary nature draws into question the soundness of the plan's spatial strategy. These concerns also link to draft policies LG1, LG2 and lG3 which fail to demonstrate the deliverability framework of the site.

4.82 Appendix 1 to these representations indicates that the capacity of these sites is likely to result **in a**

**reduction of supply of circa 935 dwellings**.

Other Broad Locations

4.83 Broad locations are not delivering houses until 2031/32, HGC is anticipated to deliver 275 dwellings by
2030/31. No allocated sites are identified to deliver any houses in the period from 2024/25 to 2028/29 – 5 years.

4.84 For the next 5 years, St Albans anticipate delivering some 1,863 dwellings, an average of 372 dwellings

per annum, or within 3 years from adoption. In the first four years from adoption based upon StADC's own trajectory, only 1,888 dwellings will be delivered which represents just 472 dwellings per annum. If a Local Plan review is to commence in 2026/207 looking to deliver a housing requirement in line with the revised standard method (2024) the assumptions in the stepped trajectory should be orientated to facilitate this, and not be reduced to defer delivery in line with the standard method for (2023) until years 4/5 after adoption.

*35* https://www.stalbans.gov.uk/sites/default/files/attachments/SADCX20LocalX20DevelopmentX20SchemeX20-X20SepX202024X20-X20Final.pdf

4.85 The basis for 500 dwellings per annum (from 2031/32) being delivered from Broad Locations is

unevidenced.

4.86 The lack of justification around the delivery timeframes for the Broad Locations set out in Table 3.1 of

Reg 19 Local Plan Part A and in Part B Local Plan Table A1.1 - Sites B1 – B8, given the cross-boundary nature draws into question the soundness of the draft Plan's spatial strategy. No evidence has been provided as to the deliverability of the anticipated supply to provide confidence that the assumptions can or will be achieved.

4.87 Appendix 1 to these representations indicates that the capacity of these sites is likely to result **in a**

**reduction of supply of circa 1,487 dwellings**.

Large Medium & Small Sites

4.88 The Large Medium & Small sites allocated via Policy LG4 in Part A Plan and Part B Local Plan Table A1.1
- Sites L1 – L3; M2 – M23, in many instances have significant deliverability constraints as detailed in our Regulation 18 representations (Identified Sites Deliverability Assessment - FINAL - 25th Sept 23).

4.89 Appendix 1 to these representations indicates that the capacity of these sites is likely to result **in a**

**reduction of supply of circa 374 dwellings**.

Greenbelt Previously Developed Land

4.90 We assert that the Part B Local Plan Table A1.1 – Sites P1 – P3 have questionable deliverability that has
not been fully substantiated by the evidence base to the Regulation 19 Plan is likely to result **in a reduction of supply of circa 73 dwellings**.

HEELA Sites

4.91 We assert that the Part B Local Plan Table A1.1 – Sites U2 – U4 have questionable deliverability that has
not been fully substantiated by the evidence base to the Regulation 19 Plan is likely to result **in a reduction of supply of circa 33 dwellings**.

Urban Capacity Sites

4.92 We assert that the Part B Local Plan Table A1.1 – Sites UC1 – UC57 have questionable deliverability that
has not been fully substantiated by the evidence base to the Regulation 19 Plan is likely to result **in a reduction of supply of circa 788 dwellings**.

4.93 Appendix 1 to these Representations shows supply which assessed based upon our Regulation 19

assessment (where applicable) results in the following revised supply position as defined in Table 10:

Table 10 Alternative Supply Position:

| | **Regulation 19 Identified Supply** | **Questionable/Non-Deliverable** | **Deliverable** |
|---|---|---|---|
| Harpenden NP Sites | 57 | 0 | 57 |
| Hemel Garden Community (Policy LG2, 3,4) | 4,300 | -935 | 3,365 |
| Broad Locations (Policy LG1) | 4,232 | -1,487 | 2,740 |
| Large Sites (Policy LG4) | 385 | -110 | 275 |
| Medium and Small Sites (Policy LG4) | 866 | -264 | 602 |
| Greenbelt Previously Developed Land | 137 | -73 | 64 |
| HELAA Sites | 43 | -33 | 10 |
| Urban Capacity Sites | 855 | -788 | 67 |
| Other | 0 | 0 | 0 |
| Total | **10,875** | | **7,180** |
| **Shortfall** | | **-3,690** | |

4.94 The above Table 10 highlights that a 3,690 dwellings shortfall from the target figure of 10.875 (or 10,653

in the Trajectory) and notwithstanding the other mathematical anomalies we identity above.

4.95 The Regulation 19 Plan is therefore unsound for the reasons detailed above which include (in summary):

- Mathematical errors across Part A, B and associated evidence base to the Plan resulting from a lack of time to review the draft Plan material.
- Lack of justification of delivery assumptions.

- Lack of justification for a reliance for the first 4 years of the Plan following adoption on existing commitments, resulting in a substantial under delivery of housing.
- Approach to Green Belt review (2023) has been inconsistent and haphazard.
- Delivery assumptions from HGC have been inflated.
- Delivery assumptions from Broad Locations have been inflated.
- Delivery assumptions for medium and small site lack robust justification.
- Delivery assumptions from Urban Capacity site lack rigour, design input and comprehensive understanding of capacity and availability of sites, to deliver housing in the plan period
- The Trajectory fails to properly plan for housing delivery in the 5 year period after adoption with only 485 dwellings per annum being targeted (when set against a requirement in the NPPF (2024) of 1,544 dwellings per annum, and contrary to officers advice to member at Committee on the 12th and 23rd September that on the day after adoption they will need to be planning for 1,544 dwellings – this is not evidenced in the land us allocation decisions made in the plan.
- Provides circa 3,690 fewer dwellings than is required by the standard method (2023).
- Additional housing allocation such as the land at NE Redbourn, are required to address the imbalance and ensure sustainable development of homes across the district.

4.96 Given the comprehensive failings in the Part B Local Plan Sites, the supporting Housing Evidence Paper,

Trajectory and associated assumptions of the draft Plan, the current basis for which is unsound as it fails to have been positively prepared, lacks justification. It is not effective or consistent with national policy as we demonstrate above. Additional allocations should therefore be made in Part B of the Local Plan.

**Monitoring & Review**

4.97 Part A of the draft Plan provides little if any guidance on the manner and extent to which the policies of
the Plan (in respect of housing) affordability and otherwise, will be monitored and reviewed. We note Appendix 6 of Part A which sets out some monitoring indicators, as there is no provision for regular monitoring and review of the Plan. This is particularly important given the way StADC is wishes to progress - ignoring the WMS[1] and draft PPF (2041 provisions – but with an intention to review their Local Plan on day one following adoption (See Sections 2.0 and 3.0 above).

4.98 In recent times, due to concerns in relation to housing supply, Bedford Local Plan (2020) through Main

Modification 1 introduced a review mechanism for the Local Plan which resulted in the adopted Local Plan, having the following requirement as Policy 1.

4.99 Bedford Local Plan Adopted Plan (January 2020) has an implementation and review policy which states:

*“Policy 1 - Reviewing the Local Plan 2030*

*The Council will undertake a review of the Local Plan 2030, which will commence no later than one year after the adoption of the plan. An updated or replacement plan will be submitted for examination no later than three years after the date of adoption of the plan. In the event that this submission date is not adhered to, the policies in the Local Plan 2030 which are most important for determining planning applications for new dwellings will be deemed to be ‘out of date’ in accordance with paragraph 11 d) of the National Planning Policy Framework 2019.*

*The plan review will secure levels of growth that accord with government policy and any growth deals that have been agreed. The planning and delivery of strategic growth will be aligned with the delivery of planned infrastructure schemes including the A421 expressway, Black Cat junction, East West Rail link and potentially the A1 realignment.*

*The review will also serve to build stronger working relationships with adjoining and nearby authorities and may result in the preparation of a joint strategic plan based on a wider geography. "*

4.100 This potential provides a framework should the draft Plan be found sound on which to hold StADC to account in respect of its intentions.

4.101 However, a word of caution should also exist as even with such provisions, opportunities for delay and

prevarication have arisen in Bedford, as highlighted in the 'Effectiveness of Review Mechanisms (Planning Policy Briefing Note) April 2024':

"*Policy 1 of Local Plan 2030 requires the council to submit a review of the plan within three years after the date of adoption. The submission of Local Plan 2040 in January 2023 fulfils this requirement. The draft plan is still at examination and the Inspector has agreed to a pause in*

*the examination until at least January 2025. The council anticipates adoption of the plan by December 2025...*"

4.102 This shows, firstly, that whilst the Submission of a revised Local Plan was achieved within the target of

3 years, the examination process has then been substantially protracted with the revised Plan not being in place (as at the time of these representations). If similar mechanisms are to be contemplated for StADC, then whilst sanctions are helpful, they need to avoid scope for evasion.

3.72 Currently the Regulation 19 Plan's implementation and monitoring policies and mechanisms are virtually non-existent and so fail to be effective, justified, and consistent with national policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

3.73 The required changes to draft Plan include:

- Reconcile various mathematical errors and inconsistencies which affect Part A (Table 3.1 and 3.2), Part B Table A1.1 and the Trajectory (2024) also at Table 3.2 Part A/Appendix A to the Housing Evidence Paper.
- Housing Trajectory (Tables 3.1 and 3.2 and Appendix A to Housing Evidence Paper) to be amended to prioritise supply as soon as possible within plan period – not defer provision as far as possible.
- Draft Policy SP1, SP3 and Policies LG 1 – 4 alongside Tables 3.1 and 3.2 of Reg 19 Local Plan Part A should be amended. Part B of the Plan updated accordingly to address.
- Delivery assumptions from HGC has been inflated and should be adjusted.
- Delivery assumptions from Broad Locations have been inflated.
- Delivery assumptions for medium and small site lack robust justification.
- Delivery assumptions from Urban Capacity site lack rigour, design input and

comprehensive understanding of capacity and availability of sites, to deliver housing in the plan period.

- Housing supply is questionable a level of circa 3,690 fewer dwellings than is required by the (current) standard method (2023) and the Plan should be amended, and additional allocations made such as the land at North East Redbourn to address these shortcomings.
- The Trajectory (2024) should be amended to address significant proposed shortfalls in the 5-year period following adoption.
- Revise the assumptions underpinning Draft Policies SP1, SP3 and Table 3.1 and Table 3.2 of Reg 19 Local Plan Part A and Part B Local Plan Table A1.1 and Sites H 1 – H4
- Mitigate the identified shortfall of 3.690 dwellings in supply through the identification and allocation of further Broad Locations at Policy SP1, SP3 and Table 3.1/3.2 of Part Local Plan and Part B Local Plan Table A1.1.
- The Trajectory (2024) fails to properly plan for housing delivery in the 5 year period after adoption with only 485 dwellings per annum being targeted (when set against a requirement in the NPPF (2024) of 1,544 dwellings per annum, and contrary to officers advice to member at Committee on the 12th and 23rd September 2024, that on the day after adoption they will need to be planning for 1,544 dwellings – this is not evidenced in the land us allocation decisions made in the draft Plan.
- Trajectory (2024) revisions and assumptions require evidence and verification, including maters such as dwelling delivery commencement, amendments to the stepped trajectory for the first 5 years of the plan period, significant reduction in assumed dwellings completions for the first 5 year following adoption (25/26 – 2030/31) from 4,285 dwelling to 2,941 dwellings – against a requirement figure of 4,425 dwellings, a shortfall of 1,484 dwellings.
- Revise the assumed delivery rates in the first 5 years of the Plan to address the current position where only about **36%** of the required annual supply (885 dwellings (2023 standard method) and **22%** of the (1,544 dwellings 2024 standard method) will be delivered. This will require additional allocations to achieve sustainable development.
- Reviewing the stepped trajectory assumptions for the first 5 years of the plan to ensure greater supply of housing in the early years of the plan, whilst larger sites come on stream.
- Increased buffer from 2.6%
- Additional allocations are required to address the identified shortfall in supply, sites include those which have the potential to make a tangible contribution within the first 5 years of the Plan as well as offering a range of sustainable development benefits, this plainly includes the land at NE Redbourn.
- Provide additional details as to the basis for the revised windfall assumptions
- Provide greater detail as to the assumptions underpinning assumed build out rates and lead times to provide necessary clarity on the identified supply position.
- 2024 AMR is required to provide additional substantiate to the Regulation 19 supply assumptions.
- Greater regard to levels of housing need in addressing the housing requirements and in determining the way supply is manged over the plan period. The deferral of delivery seeks only to exacerbate matter of housing need and increasing level of unmet need.
- Suitable implementation, monitoring and review policies should be provided to ensure that strict oversight is provide in respect of the Plans delivery aspirations and performance. Detailed review polices as detailed above should be included to ensure sanctions apply if performance is not achieved.

5. St Albans Technical Submission - Final Draft - 7th November 2024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To address the matters detailed in the attached Submission Document

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## Sustainability Appraisal Note

### 99 - St Congar

Submission Number: 99 Submission Date: 06/11/24 13:56
Respondent: Company/Organisation: Andrew Black Consulting Name: Mr Andrew Black
On Behalf Of Company/Organisation: St Congar Name:

Comment Number: 3

**Type:**

* Site

**Number:**

New site

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

*Please see attachment for tables and images referenced below:*

St Congar have an interest in the Land at Smug Oak Lane in Bricket Wood as set out within these representations.

The representations are made in the context of the tests of soundness as set out in paragraph 35 of the current National Planning Policy Framework (NPPF). This states that plans are 'sound' if they are:

***Positively prepared*** *– providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*

***Justified*** *– an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*

***Effective****–deliverable over the plan period, and based on effective joint working on crossboundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*

***Consistent with national policy*** *– enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant.*

The wider context is that an up-to-date local plan for St Albans is long overdue. The council has one of the oldest Local Plans in the country which dates back to 1994. The previous attempt to adopt a local plan came to a halt in April 2020 when the Inspector found significant issues of soundness including:

- Failure to engage constructively and actively with neighbouring authorities.
- The preparation of the plan was not in accordance with Council's Statement of Community Involvement.
- Failure of the Sustainability Appraisal to consider some seemingly credible and obvious reasonable alternatives to the policies and proposals of the plan.
- Failure of the plan to meet objectively-assessed needs.
- Absence of key pieces of supporting evidence for the plan.

Since the publication of the regulation 18 version of the plan for consultation last year, the Labour Government announced a significant consultation on the revised NPPF. Alongside this the government has proposed significant changes to the standard method of housing calculation which would see the housing need for St Albans increase from 885 dwellings per annum (dpa) under the current standard method to 1,544 dpa under the new method. The consultation for the NPPF and Standard Method ended in September 2024 and the new NPPF is expected to be released by the end of this year.

This increase in housing requirement was made clear to council members as part of the briefing on the regulation 19 consultation version at the full council meeting on 16 October 2024. Annex 1 of the draft NPPF sets out the proposed Implementation/Transition Arrangements. Paragraph 226 states that from the publication date of the new NPPF (+ 1 month) the policies set out within the new NPPF will apply unless one or more of the following apply with emphasis added:

1. *the emerging annual housing requirement in a local plan that reaches or has reached Regulation 19 (pre-submission stage) on or before [publication date + one month] is no more than 200 dwellings below the published relevant Local Housing Need figure;*
2. *the local plan is a Part 2 plan that does not introduce new strategic policies setting the housing requirement unless the relevant Local Plan Part 1 has been prepared applying the policies in this version of the Framework;*
3. ***the local plan is or has been submitted for examination under Regulation 22 on or before [publication date + one month].***

In order to meet the proposed transition arrangements under the emerging NPPF, the council has set out an ambitious programme for the adoption of the new local plan by early December which involves approval of submission of the plan for examination by full council at the end of November.

Paragraph 3.31 of the briefing paper to full council in October clearly set out the risks of the accelerated time frame for submission as follows:

*3.31. The accelerated timescale to Submission (intended on 2 December 2024, rather than as previously envisaged at the end of March 2025) means that there will be less time to undertake work to support Submission of the Plan and Examination, which raises the risk of having to withdraw the Plan at Examination. This is primarily because of the accelerated point of Submission in December 2024, rather than the end of March 2025:*

*1 – There will realistically be fewer agreed and signed Statements of Common Ground to assist the Inspectors.*

*2 – There will realistically be fewer and less extensive Topic Papers to assist the Inspectors.*

*3 – There will realistically be less time to prepare extensive responses to Objections or concerns raised at Regulation 19 stage to assist the Inspectors.*

In an important aspect of the local plan process is set out in Section 20 of the Planning and Compulsory Purchase Act 2004 sets out the process for independent examination and states that a local planning authority must not submit a development plan document to the Secretary of State for independent examination unless (with emphasis added)

1. *a) They have complied with any relevant requirements contained in regulations under this part, and*
2. ***b) They think the document is ready for independent examination.***

It is clear that a fastracked submission of a local plan would breach the requirements in this regard and the points of risk raised by council officers are highly pertinent. In any event, even if the plan was to be found sound, such an approach would mean that preparation of a new plan would be required under the provisions of paragraph 227 of the draft NPPF which states:

***Where paragraph 226 c) applies, local plans that reach adoption with an annual housing requirement that is more than 200 dwellings lower than the relevant published Local Housing Need figure will be expected to commence plan-making in the new plan-making system at the earliest opportunity to address the shortfall in housing need.***

It is patently clear that the council is attempting to subvert a justified and effective plan making process which could properly meet housing needs in favour of a short-lived victory of a plan meeting an outdated housing requirement which will need to be immediately updated and addressed in any event.

**Site Details and Background**

The site is located to the south of Smug Oak Lane to the west of Bricket Wood. The site is approximately 2.5 hectares in size and is currently used as open grazing land.

The site is outside of the settlement and within the green belt but has no other environmental or landscape designations. However, it adjoins existing built form on two sides with residential housing to the east and St Stephen Parish Council Hall and car park to the west.

St Congar has had an interest in the site for some time and dialogue took place with St Stephen Parish Council in April 2023.

Two options were presented to them:

**Option 1** – 75 homes with 100% affordable housing (owned and manged by a Registered Provider) with a policy compliant level of 17 affordable / social rent houses.

- 58nr intermediate / shared ownership houses
- No “for market sale” houses.

**Option 2** – 33 homes with 50% affordable housing.

- 16nr 3 and 4 bedroom market houses
- 11nr 2 and 3 bedroom affordable / social rent houses • 6nr 3 bedroom intermediate / shared ownership houses

The site is identified as site reference C-183 and STS-02-18/STS-02-21 in the Housing and Economic Land Availability Assessment and was previously noted as being *potentially suitable, available, and achievable subject to further assessment as part of the site selection process.*

Further analysis of the site selection process through the Sustainability Appraisal and Green Belt Review is set out within these representations.

**Sustainability Appraisal**

Paragraph 32 of the framework requires that Local Plans and Spatial Development Strategies should be informed **throughout** their preparation by a Sustainability Appraisal (SA) that meets the relevant legal requirements.

The legal frameworks for SAs are set out within section 19 of the Planning and Compulsory Purchase Act 2004 which states that the authority must prepare a plan *with the objective of contributing to the achievement of sustainable development.* Moreover, the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 states that SAs must ensure the potential environmental effects are given **full consideration** alongside social and economic issues.

Paragraph 32 of the framework goes on to state that the SA should *demonstrate how the plan has addressed relevant economic, social, and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered).*

In support of the regulation 19 version of the plan, the council has undertaken a Strategic Environmental Assessment (SEA) and Sustainability Appraisal (SA) (September 2024) in accordance with the requirements of Planning and Compulsory Purchase Act 2004.

Table B of Appendix 4 of the Sustainability Appraisal assesses the individual development sites as set out in the HELAA against the objectives of the site selection / sustainability objectives. This includes an assessment of the site as identified as STS-02-18/STS-02-21. The findings of the assessment are set out [in the attachment] and commentary provided against each in turn.

It is unclear through the Sustainability Assessment to what extent sites were not taking forward on this basis alone or whether other factors such as the green belt review had influence.

It is considered that the assessment of sites within the Sustainability Assessment is unsound as it is not effective or justified. Further commentary is set out on the site selection process and green belt review process within the representations.

**Housing Requirement**

The Housing Requirement for St Albans is derived from the Standard Method and sets out that the council must identify and allocate land for at least 15,096 net additional homes over the plan period or 888 dwellings per annum. The Local Housing Need derived from the Standard Method is a capped figure and it should be noted that the uncapped figure for St Albans is considerably higher at 1,165 dwellings per annum. The housing requirement under the proposed amendments to the standard method would see a further increase to 1,544 dpa. In several recent local plan examinations (Mid Sussex, Bournemouth and Elmbridge) inspectors have placed weight on the emerging standard method as a material consideration which indicates the direction of travel for government policy and have sought further consideration of a higher housing need accordingly.

As set out in the table [in the attachment], the council has consistently failed to deliver housing at the rate expected within the draft local plan.

The South West Herts Local Housing Needs Assessment indicates that 443 affordable rented dwellings and 385 affordable home ownership dwellings per annum would be needed in St Albans District to meet demand. This would represent a total of 825 dwellings per annum which is almost the entire annual housing target in the plan. It is therefore considered that the use of the capped current standard method masks the true and pressing affordable housing need in the district which will continue to grow without consideration of a higher housing target.

St Albans is in a wider region of significant unmet need from other nearby/adjoining authorities. Three Rivers District Council is advancing with a revised plan which is described as *Low Housing Growth and Green Belt Restraint* and 6,600 homes short of Local Housing Need (LHN). Hertsmere

Council published a draft plan in April 2024 which is 2,200 homes short of LHN. Dacorum Borough Council set out a consultation document in October 2023 which gives rise to an unmet need figure in the region of 2,800 homes. There is also a requirement for further consideration of unmet need from adjoining London Boroughs (Barnet, Enfield and Harrow) which are all progressing with local plans. Specifically, the draft Enfield Local Plan states that there could be a shortfall of 38,000 homes in the borough by the end of the plan period. The unmet need in the surrounding areas is of a substantial magnitude which also gives rise to further requirements in terms of Duty to Cooperate which are set out below.

Finally, as set out, the adoption of an up-to-date plan has been considerably delayed for St Albans and it is vital that a sound a robust plan is put in place which would allow for the delivery of much needed market and affordable housing to be delivered in the early part of the plan period.

**Duty to Co-operate**

Paragraph 26 and 27 of the National Planning Policy Framework emphasises the importance of maintaining effective co-operation throughout the plan making process and states (with emphasis added):

***Effective and on-going*** *joint working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy. In particular, joint working should help to determine where additional infrastructure is necessary, and whether development needs that cannot be met wholly within a particular plan area could be met elsewhere.*

*In order to demonstrate* ***effective and on-going joint working****, strategic policy- making authorities should prepare and maintain* ***one or more*** *statements of common ground, documenting the cross-boundary matters being addressed and progress in cooperating to address these. These should be produced using the approach set out in national planning guidance and be made publicly available throughout the plan- making process to provide transparency.*

Section 33A(3) of the Planning and Compulsory Purchase Act 2004 sets out the activities which bodies subject to the duty to co-operate must co-operate on. Paragraph (3)(d) of section 33A of that Act provides that such bodies will be subject to the duty when undertaking activities that can reasonably be considered to prepare the way for the preparation of development plan documents, marine plans, and other local development documents, in this case the regulation 18 version of the Local Plan.

The Statement of Community Involvement for St Albans Council (February 2023) sets out a list of Specific Consultation Bodies in appendix A and lists the prescribed bodies as follows:

- Hertfordshire County Council
- Adjoining / neighbouring local planning authorities (Three Rivers District Council, Dacorum Borough Council, North Hertfordshire District Council, Welwyn Hatfield Council, Hertsmere Borough Council, Watford Borough Council, Central Bedfordshire District Council, Luton Borough Council)
- All town and parish councils in St Albans City and District Parish Councils in other Districts, where the Parish Council boundary adjoins St. Albans City and District

There has been no such update produced as part of the evidence base for the regulation 19 consultation.

Paragraph 1.12 of the Local Plan states:

*A Duty to Cooperate workshop for all prescribed bodies, including all neighbouring planning authorities and Hertfordshire County Council, was held in September 2022. Following the workshop follow-up letters were sent, with a specific request being sent to those neighbouring authorities that could potentially help to meet St Albans' need, including for land for housing and for a potential Strategic Rail Freight Interchange (SRFI).*

However, there is no evidence base document which sets out the outcomes of the workshop or any indication that engagement with the neighbouring planning authorities has been *ongoing* in the past year since the initial workshop. The Evidence Paper published in September 2024 sets out the response to the issues raised by the inspectors of the previous SADC local plan. In relation to DtC which was a key failing of the plan the council sets out that:

*The Council wrote to neighbouring authorities regarding Local Plan Vision, Strategic Priorities and Objectives, the Green Belt Methodology, and the SA Scoping Report in 2022 and the draft Local Plan Reg 18 in 2023. Pre-Reg 18 DtC Councillor meetings held 2022 during Reg 18 DtC Councillor meetings held Sept 2023 and during Reg 19 DtC Councillor meetings proposed for October 2024. SADC 'Can you help us meet our need' letters sent November 2022 and follow up letters on 'can you help us meet our need' sent 24.10.23 after Reg 18 and DtC Councillor meetings. Letters focus on the key issue of potential unmet housing need and approach to the Green Belt, and other cross boundary issues (including the SRFI, employment need, education provision etc.).*

It then states that this will be updated further at the Submission Stage and Statements of Common Ground will be prepared at the time of the plan submission and notes that an *Overarching Statement of Common Ground [will be] published with Reg 19.* No such overarching SOCG has been published with this regulation 19 consultation pointing to a lack of progress in this regard which is required to be remedied ahead of submission. In any event, letters sent to adjoining authorities asking for need to be met does not satisfy actions required under the DtC and it is clear that the plan is fatally unsound on this basis alone.

Given that a failure of the Duty to Co-operate was one of the primary reasons the previous Local Plan was found unsound, then it is highly surprising that this matter has not been adequately evidenced from the outset of the plan making process. In its current form the plan is not effective, justified nor has it been positively prepared and is therefore unsound on this basis. This is a matter which must be remedied before the draft Local Plan can proceed to any next steps.

**Reasonable Alternatives**

The Planning Practice Guidance sets out the way in which the Sustainability Appraisal should assess reasonable alternatives and identify likely significant effects as follows:

*The sustainability appraisal needs to consider and compare all reasonable alternatives as the plan evolves, including the preferred approach, and assess these against the baseline environmental, economic, and social characteristics of the area and the likely situation if the plan were not to be adopted. In doing so it is important to:*

- *outline the reasons the alternatives were selected, and identify, describe, and evaluate their likely significant effects on environmental, economic, and social factors using the evidence base (employing the same level of detail for each alternative option). Criteria for determining the likely significance of effects on the environment are set out in schedule 1 to the Environmental Assessment of Plans and Programmes Regulations 2004;*
- *as part of this, identify any likely significant adverse effects and measures envisaged to prevent, reduce and, as fully as possible, offset them;*
- *provide conclusions on the reasons the rejected options are not being taken forward and the reasons for selecting the preferred approach in light of the alternatives.*

*Any assumptions used in assessing the significance of the effects of the plan will need to be documented. Reasonable alternatives are the different realistic options considered by the plan-maker in developing the policies in the plan. They need to be sufficiently distinct to highlight the different sustainability implications of each so that meaningful comparisons can be made.*

*The development and appraisal of proposals in plans needs to be an iterative process, with the proposals being revised to take account of the appraisal findings.*

*[Paragraph: 018 Reference ID: 11-018-20140306 Revision date: 06 03 2014]*

Table 5.2 of the SA sets out the Reasonable Alternative Growth Scenarios which are tested as part of the regulation 19 consultation.

There are two significant failings in the testing of reasonable alternatives in the plan. The first being that only figure marginally in excessive of the Local Housing Need (+12%) has been tested. No testing has been undertaken on a substantially increase housing figure which would take in to account the emerging NPPF requirements or would address the significant unmet need from local authorities. It is not suggested that there would not be significant impacts with this approach, but it would also give rise to substantial economic and social benefits. There is no justification to not testing this approach at all as part of reasonable alternatives.

Secondly, it is only a higher delivery from St Albans or Redbourn which are tested in the growth scenarios. The figures from Bricket Wood are consistently either 127dpa or alternatively 0dpa. It is not considered that this approach adequately tests credible reasonable alternatives with particular focus on the wording of the PPG which requires the alternatives *to be sufficiently distinct to highlight the different sustainability implications of each so that meaningful comparisons can be made.*

Paragraph 75 of the Inspector Report for the previous Local Plan set out the following in relation to Reasonable Alternatives:

*Based on our concerns set out above, we consider that there are a number of obvious and seemingly credible reasonable alternatives that have not been considered. This being so, we are not convinced that either the SA or the SA addendum has considered and compared reasonable alternatives as the Plan has evolved, including the preferred approach, and assessed these against the baseline environmental, economic and social characteristics of the area and the likely situation if the Plan were not to be adopted.*

Overall, it is not considered that the Sustainability Appraisal has adequately considered Reasonable Alternatives and the plan is therefore not justified or effective in that regard.

**Hemel Garden Communities**

The Draft Local Plan has a strong reliance on the delivery of at least 4,750 new homes as part of the Hemel Garden Communities programme by 2041 under policy LG2. This represents just over 31% of the entire housing requirement. The delivery of the Hemel Garden Communities is reliant on cross boundary working with Dacorum Council.

The Housing Trajectory as set out in Table 3.2 of the Local Plan indicates that delivery of dwellings from the Garden Communities will start in 2029/30 then continue to the end of the plan period as [set out in the attachment]:

Even with the expedited timeframe for the local plan as now envisaged it is considered overly ambitious to expect delivery of dwellings from a site of this scale only three years after adoption of the plan.

The second edition of the *Start to Finish Report* prepared by Lichfields in September 2024 sets out key figures based on actual examples of large developments across the country. The report states that the average time from validation of the first planning application to the completion of the first dwelling on schemes of more than 2,000 dwellings is 6.6 years, considerably more than the 3 years being predicted in the housing trajectory.

The *Start to Finish* report also examines the average build out rates for large schemes of 2,000+ dwellings and puts this at 100-188dpa. Again, this is considerably less that the delivery rate predicted in the housing trajectory.

The speed of delivery of housing within the plan period from garden communities is a matter which has led to findings that plans produced by other local authorities were not sound with the most recent examples being Tandridge District Council and the North Essex Authorities.

Overall, it is accepted that the development of a garden community at Hemmel Hempstead is required and could deliver sustainable places in the much longer term. However, the overly ambitious expectations for the delivery of housing from the garden communities within this plan are not considered to be effective and the plan would not be sound in its current form.

**Site Selection Process**

The site at Smug Oak Lane was assessed in the Green Belt Review in the wider Strategic Land Parcel 27 as site SA-121. Overall, the review sets out the following scores [see attachment] against the individual purposes of the green belt:

The assessment sets outs out detailed commentary on the impact of development of the site on each of the individual purposes.

The scores against purpose 1 are considered appropriate given the location of the site.

Regarding purpose 2 (to prevent neighbouring towns merging into on another) the assessment sets out the following commentary (with emphasis added):

*The sub-area is not located at the edge of the settlement. The sub-area would introduce a new area of built form, which would perceptually and physically narrow the existing gap between Bricket Wood and How Wood; and between Bricket Wood and Radlett and reduce the overall openness and scale of these gaps.* ***It is judged that there may be some scope for development without significant physical or perceptual erosion of the gap between neighbouring built-up areas. The M25 provides an additional barrier to the merging of settlements.***

The view that there is some scope for development is supported. On this basis it is considered that the score against this green belt purposes should in fact be lower. Regarding purpose 3 (to assist in safeguarding the countryside from encroachment) the assessment sets out the following commentary: *The sub-area is not covered by any built form. The sub-area comprises an open field. It is bounded by intermittent tree lines and has a flat topography which limits views into wider countryside. There are some views onto neighbouring residential buildings. Overall, the subarea has a strongly unspoilt rural character.*

It is considered that the site is capable of being developed in such a way that the views into the wider countryside and corresponding rural character would not be harmed. Accordingly, the scoring of the parcel to this purpose of the green belt should be revised down.

Overall, it is considered that the council has taken an overly cautious approach to the protection of individual green belt sites which are highly appropriate for development. This concern was raised in the inspector report to the previous Local Plan at paragraph 49 which states:

*We also have concerns regarding the strategic site selection process. At Stage 1 a high number of sites were immediately discounted from further assessment on the basis of their Green Belt Review evaluation (and were rated red). The 4 identified amber sites all had only 1 or zero effects on the Green Belt Purposes (as identified for the relevant parcels in the 2013 Green Belt Review). However, representors refer to a number of sites that were rejected at Stage 1 despite also having zero or only 1 significant impact on Green Belt purposes (in the same way as the amber and green rated sites).*

As set out, it is considered that it is justified for the council to seek to meet a higher housing target for a number of reasons. These representations also set out significant concerns over the delivery of dwellings from Hemel Garden Communities within the lifetime of the plan. It is therefore considered that the council will need to seek to allocate other suitable and deliverable sites in order to meet the pressing need in the early part of the plan period.

The Planning Practice Guidance sets out what should happen if there are insufficient sites to meet housing need as follows:

*When preparing strategic policies, it may be concluded that insufficient sites / broad locations have been identified to meet objectively assessed needs, including the identified local housing need.*

*In the first instance, strategic policy-making authorities will need to revisit their assessment, for example to carry out a further call for sites, or changing assumptions about the development potential of particular sites to ensure these make the most efficient use of land. This may include applying a range of densities that reflect the accessibility and potential of different areas, especially for sites in town and city centres, and other locations that are well served by public transport. If insufficient land remains, then it will be necessary to investigate how this shortfall can best be planned for. If there is clear evidence that strategic policies cannot meet the needs of the area, factoring in the constraints, it will be important to establish how needs might be met in adjoining areas through the process of preparing statements of common ground, and in accordance with the duty to cooperate. If following this, needs cannot be met then the planmaking authority will have to demonstrate the reasons why as part of the plan examination. ]Paragraph: 025 Reference ID: 3-025-20190722 Revision date: 22 07 2019]*

It is considered highly appropriate that the council should consider the allocation of other sites in order to meet established housing need through both unmet need from adjoining authorities and/or the emerging increased housing need figures as a result of the standard method calculation.

**Comparisons with Other Allocations in Bricket Wood**

It is noted that three sites in Bricket Wood are identified in the local plan for release from green belt:

- M4 – North of Oakwood Road, Bricket Wood – 74 dwellings
- M15 – Bucknalls Drive, Bricket Wood – 44 dwellings
- M23 Ashdale Lye Lane, Bricket Wood – 9 dwellings

A further site (OS1 – Land to North of Bricket Wood) which adjoins site M4 is identified for the delivery of community uses including allotments, a new medical centre, relocated scout hut, community centre and associated outdoor/recreation facilities.

Appendix E of the Site Selection Methodology, Outcomes and Site Allocations sets out the conclusions of the sites in respect of each of the sites and this is compared to the assessment of the land at Smug Oak Lane: [See attachment for more details]

It is therefore clear that the land at Smug Oak Lane performs at least as well, if not better, against key sustainability objectives than the allocations in the plan for Bricket Wood. In the absence of further justification and reasoning for the discounting of the land at Smug Oak at Lane it is considered that this represents a logicial opportunity for allocation in the plan.

**Conclusions**

These representations set out considerable concern on the soundness of the regulation 18 version of the local plan in a number of areas.

The land at Smug Oak Lane represents an appropriate site for housing development and engagement with the parish council has indicated there would be support for this to come forward. It is considered that additional sites will be needed in order to make the plan sound and that this site represents a suitable site for allocation within a future iteration of the plan.

St Congar is able to provide any further information on the site that the council require.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. Respondent: Company/Organisation: Name: Mr Geoffrey Coates

Comment Number: 7

**Type:**

* Sustainability Appraisal

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Creation of over 4000 homes plus an industrial estate in Hemel Garden Communities, 5 miles in either direction from the nearest rail station, is inherently car-dependent and at odds with the statutory duty to consider climate impact.

A modal shift on the scale of 4000 new households and an industrial estate, switching en masse to active travel modes over a 5 mile journey, is unprecedented both in reality and as a justification for development in a Local Plan.

The Nickey Line cycle/foot path is proposed as a panacea, but this is an unlit mud-and-shingle path which requires users to cross numerous main roads and does not lead at either end to a station. This suggestion could only have been made by someone with no on-the-ground knowledge of the site. It would be laughable if it weren't so dangerous to vulnerable road users and women after dark.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Building on this scale so far from a rail station and without any tested transport alternative is incompatible with the duty to mitigate climate change. Only the removal of Hemel Garden Communities could make this Local Plan consistent with this duty.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

St Albans District Council have made no meaningful response to the numerous and detailed concerns raised in the Reg 18 consultation. Engagement with the citizenry has been entirely one-directional, with their proposals presented as inviolate and immutable. There must be some accountability to the residents of the District.

**Reasonable Alternatives: Hemel Garden Communities as a constant**

The submitted SA notes that "*whilst HGC was a 'variable' across the growth scenarios in 2023, at this stage the decision is taken (on balance) to hold it 'constant'*". Each of the four HGC allocations (H1-H4) therefore form part of each growth scenario (with H3, an employment allocation, supporting H1,2 and 4).

The SA strategy of holding HGC as a constant is largely to be one of convenience, rather than one based on strong planning logic, argument, or necessity. Granted, HGC has merit as a whole, but to suggest that it is not capable of sub-division lacks substance for SA spatial strategy optioneering. HGC (in St Albans) is not presented as single site, but as a collection four sites and must therefore be capable of being considered as a series of components. We understand the

planning logic that H1(in the north) is necessary to deliver other part of HGC in Dacorum. We also see the logic of H3 (Employment) as a constant, and therefore the land between H1 and H3 (this being H2) as a constant. However, H4, in the south (2,400 homes and 1,940 during the plan period) appears to be capable of being viewed as a more variable part of HGC.

Based on the other spatial strategy options that are presented in the SA, there is a clear and obvious alternative to all H1-H4, and that is to direct a higher level of development to St Albans (City of), where an expanded North StAlbans (1,400) and East StAlbans (800) present an 'in combination' reasonable alternative to all the period delivery in H4. In our assessment, HGC does not 'collapse' as a project without H4 and so an alternative spatial strategy that tested the relative roles of the two sub-regional settlements in Hertfordshire should have been considered/evaluated. To regard this as an 'unreasonable alternative' is to stretch the credibility of the plan-making process and the leeway that can be given to planning judgment when looking at the reasonable roles of the most strategic settlements.

We note that at Regulation 18, comments from people living at Leverstock Green also suggested a reduction in scale of H4 to 1,000 rather 2,400, which would achieve a more compact form of extension. The reason this was rejected in the SA was that it was said that it would not link so well with a separate secondary school allocation between the A4147 and Bedmond Road. We find this to be a very weak point, with the school location still being accessible to a development of 1,000 homes and if needs be, the school could move to the residual part of H4.

Similarly, and given our comments on the housing trajectory, under SP3, if delivery assumptions concerning HGC are inflated (by around 1,000), such that H1,2 and 4 form part of the Plan but cannot deliver what the Council hopes for /expects, it will be necessary to evaluate compensatory supply as part of an adjusted spatial strategy. Based on the submitted SA, the choice would be between an expanded North St Albans and East St Albans, or conceivably both could be allocated as sites that deliver across plan periods or with safeguarded land playing a role on the policy framework.

***Remedy***

The SA as published is at risk of irrationality. It would be prudent for an addendum to be produced that regarded HGC as a variable location, with a focus on H4, and for a spatial strategy to be evaluated with compensatory development at St Albans.

**Consistency across scenarios**

We observe that Scenarios 7 and 8 (the preferred option with the additional SE St Albans or Ex North St Albans) are presented as a 'dead heat, across all objectives, including transport, where each are ranked '2'

We are therefore unable to understand why Scenarios 4 and 5 (where small sites are removed and either SE St Albans or Ex North St Albans is added) results in daylight between the scenarios. Scenario 4 (SE Albans) is ranked '1' and Scenario 5 (Ex North St Albans) is ranked '3'.

Whilst the SA provides much scope for planning judgment it must still be consistently applied.

*Remedy*

Amend Scenarios 4 and 5 so that they are equal for the transport objective

**Relativity of assessment against the housing objective**

The SA is assessing scenarios of the capped housing need, which, as set out under issue 2 of SP1, is just a temporary national policy provision, which if utilised will require an early review of the plan.

Whilst it is logical to rank each scenario from low to high in terms of housing supply, it does not follow that even the highest-ranking scenarios should be coloured in a shade of green. This is because they offer a sustainability outcome that is still significantly under the actual uncapped level of housing need, which should be the sustainability measure.

*Remedy*

The colour banding should be amended to reflect the reality. Scenarios 1-4 should be red, and 5-8 should also be red (or orange) as all scenario do not deliver the actual need, merely an interim figure pending early review.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**7.0 Sustainability Appraisal (SA)**

- **Sustainability Appraisal (September 2024)**

7.1. The Sustainably Appraisal (2024) (referred to hereafter as the SA) seeks to provide the 'justification' for

the Local Plan spatial strategy and land use decisions, however we contend that the application of the SA findings have been undertaken in an inconsistent manner which alongside the Green Belt Review (2023) fails to assess sites objectively and consistently for potential allocation.

7.2. The SA has implications for the spatial strategy underpinning Part A and B of the draft Plan as well as

the site selection methodology and wider evidence base.

<u>New Settlements</u>

7.3. With regards to the matter of new settlements, we note that page 31 the SA states: states that without
HGC very difficult decisions would be required to either not meet housing and employment needs, releasing land from Green Belt around the edge of settlement "*given a lack of new settlement options locally*" and as such, "*There is every chance that such decisions would prove politically too difficult, such that there would be a risk of the Local Plan failing, as per the last two attempts to deliver a local plan....*"

7.4. This suggests that political prevarication sits behind the spatial decisions being taken in the Local Plan.

The rationale has been to avoid difficult decisions, which is not an excuse for poor plan making. We question again whether an approach to planning where 'any plan is better than no plan' can prevail.

7.5. The Local Plan has failed on two previous occasions due to inadequacies in the DtC, a trap that StADC

in rushing forwards with their Regulation 19 Plan run the risk of repeating a third time.

7.6. With regards to the SA conclusion on allocated sites in Redbourn at paragraph 5.4.101 its tates :

"***West Redbourn*** *strategic urban extension – is one of four proposed allocations from the Draft Plan stage where it is the case that both: A) the land is recommended for further consideration by the Green Belt Review; and B) there is the potential to deliver a strategic scale scheme. In particular, the site will deliver a primary school, which is supported by the County Council (N.B. this is an evolution of the situation since the Draft Plan stage, when there was thought to be the possibility of alternatively funding expansion of the existing primary school). Furthermore, of the four sites discussed, it is fair to say that this site is one of the stronger performing in Green Belt terms, given hard boundaries around most (but not all) of the site boundary. However, there are clear access / connectivity challenges and constraints, including in the form of the adjacent M1 and several public rights of way. Also, it is noted that there is a pending application for 300 homes within the southern half of the site (ref. 5/2021/3631), which is not ideal from a perspective of comprehensive planning (and it is noted that there are three landowners in total, plus a small adjacent site to the east is being promoted by the County Council). The current planning application is for 300 homes, but total site capacity is 545 homes (down from 593 homes in 2023). It is recognised that the Parish Council request "furthergranulation of West of Redbourn which does not include the whole site." However, supporting only half of the site would create Green Belt challenges, with a long-term perspective, and delivery of a primary school could be called into question... "*

*Underline Urbanissta emphasis*

7.7. We make the following observations in respect of the proposed West Redbourn strategic urban

extension allocation.

- The Parish Council do not support the allocation in full and seek to reduce the site's capacity.
- In stating that *supporting only half of the site would create Green Belt challenges, with a longterm perspective, and delivery of a primary school could be called into question.*
- Potential for piecemeal development and lack of coordinating planning.
- The Site is heavily constrained in access, environmental and PROW terms.

7.8. The main driver for the site's allocation appears to be the way it was assessed in the Green Belt Review,

which we deal with the inconsistencies and inadequacies of this aspect of the evidence base in Section 6.0 above.

7.9. It should also be noted that High Town Housing Association also highlighted at Regulation 18 stage of

the Local Plan that the North East Redbourn site represented a better site for allocation given the constraints of the West Redbourn site.

7.10. Councillor Mitchell [41] Chair of Redbourn Parish Council, indicated to Policy Committee that the NE

Redbourn site would make a better allocation that the West Redbourn allocation, given the scale, deliverability credentials and extent of opportunities that would be presented by the Site's allocation.

7.11. We therefore question why, given the uncertainties surrounding the West Redbourn draft allocation,

alternative site's potentially have not been more fully explored and investigated through the SA – and indeed with Landowners.

7.12. Turning to the SA conclusions on the proposed East Redbourn site allocation, also at paragraph 5.4.101

it is stated that:

"...***East Redbourn*** *– this site is also recommended by the Green Belt Review but is not a strategic site. The site benefits from good proximity to the village centre (much better than West of Redbourn) and there is a considerable opportunity to improve access to the River Ver corridor, to the benefit of the village as a whole. However, this is a complex site, particularly given the river corridor. In this light, the expectation is that the site would deliver in two parts, with the bulk of homes to the northwest of the river, and a smaller number of homes to the south. The northwest component is constrained by priority habitat at its northern extent (seemingly a remnant orchard, i.e. not riverine habitat) and road access from Crown Street could potentially be challenging, noting that the road bends quite sharply. The southeast component would benefit from very good access to the village centre and Nickey Line, but onsite priority habitat is a constraint. Across both components of the site there is a clear need for ongoing close consideration of the possible need to buffer the flood risk zone, to account for climate change*..."

*Underline Urbanissta emphasis*

7.13. The East Redbourn site is non-strategic in nature and constrained by flood risk. It does not have the

potential to provide a primary school.

7.14. Paragraph 5.4.102 of the SA then goes on to look at sites not recommended for further consideration in

the Green Belt Review:

"*Moving on to sites not recommended for further consideration by the Green Belt Review, a first port of call is a possible* ***NE Redbourn*** *strategic urban extension. This was not proposed for allocation in 2023, but was 'noted', and does warrant ongoing consideration. This is primarily on the basis of the site's access and transport credentials, noting direct access onto two good road corridors (including one with bus connectivity) and good proximity to the village centre. Also, there are limited onsite constraints, although viewing the site in its wider context it seems likely that landscape is a constraint*."

*Underline Urbanissta emphasis*

7.15. The SA then continues ...

*"The site is being actively promoted for up to 1,000 homes plus a primary school, a care home, community and potentially employment uses, and a 22 ha SANG. Also, delivery in combination with East of Redbourn could support a comprehensive approach to river corridor enhancements, and a further consideration is that the land is owned by Lawes Agricultura l Trust, which is a charity that owns the Rothamsted Estate, and which supports Rothamsted Research plus 38 third party commercial agri-tech tenant businesses that operate within the estate (as understood from the site promoters consultation response, ref 799). "*

7.16. Paragraph 5.4.104 of the SA (Sept 2024) refers *to 'housing development on the raised land to the*

*northern extent of the site which might be revisited'*and *'a reduced scheme without compromising on infrastructure'.*

7.17. The SA considered that a reduced scheme might present a sustainable opportunity, however DJA have

reviewed the NE Redbourn site and conclude that the northern aspect of the site is not constrained in landscape terms. DJA find this assertion to be incorrect with no basis in fact or evidence. It is therefore our contention that the site can be delivered in landscape and sustainability terms in its entirety, delivering the full range of sustainability and infrastructure benefits.

7.18. The SA (Sept 2024) concludes:

*"**NE Redbourn** – has a degree of merit when viewed in isolation but can be ruled out at this stage (i.e. need not be progressed to Section 5.5) when considered in context, in that the*

*previously proposed allocations from the Draft Plan stage – i.e. West and East Redbourn – are preferable, and there is no case for a high growth strategy at Redbourn to include allocation of all three sites. This is particularly noting the lack of a train station and secondary school (with established concerns around school traffic between Redbourn and Harpenden), the limited village centre offer, and the very limited employment offer (albeit major employment locations are within cycling distance). West Redbourn is preferable to NE Redbourn in Green Belt terms and would also deliver a more appropriate quantum of growth*."

7.19. As detailed above, Councillor Mitchell (for Redbourn) highlighted at PPC Committee on the 23rd

September 2024, that the NE Redbourn Site represented a much better option for allocation that the existing options.

7.20. West Redbourn site (B3) in not in a sustainable location in transport terms and performs poorly when

objectively compared to the NE Redbourn site.

7.21. The West Redbourn site is less favourable in topographical and landscape terms than the NE Redbourn

site and marginal or questionable as to whether the site can provide the required infrastructure set out in Part B of the draft Plan for Site B3.

7.22. Site M6 (East Redbourn) is constrained in ecological, flood and ownership terms and therefore has more

questionable deliverability credentials.

7.23. It is unclear how the SA can conclude that the two existing allocations at Redbourn are preferable when

both sites are constrained, potentially unable to deliver at the required levels of housing identified in the Regulation 19 Plan and are publicly not supported by key local stakeholders, such as the Parish Council.

7.24. The SA (2024) also fails to assess objectively the proposed benefits of the NE Redbourn site against the

community benefits that would arise from the exiting two allocations, including (not exhaustively);

- Primary school
- SANG - providing publicly accessible SANG not only for the site but additional to meet wider development requirements.
- Rothamsted Research enhancements, including:
- Enable specific new purpose-built building(s) on site for science R&D and innovation.

- New residential accommodation for staff and students.
- Creation of an endowment fund to provide research grants in line with our charitable purposes.
- Enable enhancements to Rothamsted Manor.

7.25. With regards to the constraints of the Site in relation to the SA, we make the following observations:

- If there is no case for a high growth strategy at Redbourn– perhaps alternative site allocations should be made which have guaranteed deliverability and sustainability credentials.
- The lack of a train station– Harpenden Station is circa 3miles away. Several allocations within the Plan are circa 3 miles away from a mainline railway station. Sustainable transport options form part of the infrastructure package of NE Redbourn.
- lack of secondary school (established concerns around school traffic between Redbourn and Harpenden) - no regard is given to the social infrastructure that would be achieved through HGC which might assist in addressing Redbourn secondary school needs (towards with NE Redbourn would make financial contribution).
- the limited village centre offer - the NE Redbourn site would help support and sustain the village centre offer.
- very limited employment offer (albeit major employment locations are within cycling distance) – the site is in a sustainable location with good access to a range of employment and other community uses and has the potential of contribute towards strengthening and enhancing wider infrastructure needs in Redbourn, which site B3 and M6 are not of sufficient scale to achieve.
- The unique benefits to Rothamsted Research are not fully acknowledged.

7.26. Indeed, the SA (2024) does not examine how the infrastructure deficits (as perceived) could be

overcome through other alternative sites within the draft Plan – such as the secondary school provision that will be provided within HGC.

7.27. Based upon the research and conclusions of the SA (2024) it is our contention that the Local Plan has not fully and properly looked at alternatives, rather it has sought to retrofit conclusions to support a pre-determined spatial strategy. The approach is not effective or justified and draws into question the soundness of the spatial strategy set out in Part B of the Plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

7.28. Changes to the Sustainability Appraisal (2024) to the draft Plan in this regard to ensure soundness and legal compliance include:

- Addressing the inconsistencies in approach to reviewing site alternatives, including matters:
- Local political considerations.
- Ability of sites to deliver in the identified timescale and levels anticipated.
- Actual Site constraints and potential benefits.
- The SA to be reviewed to have more comprehensive regard to sustainable development fully when reviewing site allocations and omission sites.

- Considering whether the existing allocation in Redbourn should be replaced with a single allocation which is unsustainable, deliverable, unconstrained and capable of provide specific and unique benefits to both Redbourn and Rothamsted Research.
- Addressing overreliance on the (flawed) Green Belt Review when assessing site sustainability at paragraphs 5.4.101 and 5.4.102.
- Amending the SA to reflect how perceived infrastructure deficits might be over come through other spatial decisions within the plan (such as HGC providing a secondary school).
- The Link between the SA (2023 and 2024) and the IDP (2023 and 2024) to be better developed to substantiate the preferred (and discounted spatial options considered by the plan through formulation.
- Reviewing the spatial strategy and SA conclusions to reflect the fact that site sB3 and M6 have deliverability and environmental constraints which render them questionable in deliverability terms. The allocation of the land at NE Redbourn would make a tangible contribution towards sustainable development within Redbourn, in line with the aspirations of paragraph 8 of the NPPF (2023).
- The SA suggestion that the northern aspect of the site is constrained in landscape term sis incorrect and should be revised alongside its associated conclusions on the NE Redbourn.
- Site selection methodology and approach has been undertaken in a spurious manner which is contradictory in nature and therefore should be reviewed.

The Sustainability Appraisal (SA) sets out that a number of different growth scenarios were assessed to determine the most sustainable outcomes for the District in meeting the currently identified housing need. Putting aside the fact that this housing need is likely to increase considerably when the Government adopts the new standard methodology ("SM") later this year, and therefore the assessments may not be applicable to the scale of housing required by a revised SM formula, it is evident that not all opportunities have been fully explored within the SA for growth.

Particularly, the eLP makes clear in various instances that the spatial strategy seeks to direct development and growth to the main urban settlements. Despite this, however, the SA makes clear that of the 8 growth scenario options, the emerging preferred option (option 3) relies primarily on strategic allocations in the west of the District towards Hemel Hempstead, strategic scale allocations to the north and east of St. Albans city, and a number of smaller allocations at Harpenden and settlements in the south of the District. As such, there appears to be limited growth around the edge of St. Albans in the context of small and medium-sized sites – unlike that which is proposed for Harpenden where there is an abundance of these.

In fact, all of the growth scenarios assessed do not seem to exhibit a level of growth on the edge of the St. Albans urban settlement – the most sustainable location in the District as identified in the proposed Settlement Hierarchy – which seems counterintuitive.

We therefore object to the approach taken in the SA growth scenarios as they are biased towards a spatial strategy that is overly reliant on a small number of large urban extensions / strategic scale allocations at St. Albans city. Insufficient levels of small and medium sites being allocated would

result in the need for time lag to allow for the delivery of much larger and, when considered in conjunction with the increasing housing need figure under the proposed NPPF changes, it is untenable that the Council believes it's current approach is a suitable one.

The District simply cannot afford to keep waiting for adequate levels of growth to be left later in Plan period or to a review of the LP and certainly not when it is anticipated a higher level of growth will need to be planned for once the final changes to the NPPF are announced that may very likely drastically increase the growth required for this district.

There is appropriate land being promoted in such locations, such as the site Ms. Bennett has put forward. This illustrates the need in removing the current narrow focus to the exceptional circumstances for releasing Green Belt land as is currently set out in this eLP and amending the wider spatial strategy to include small and medium allocations in appropriate locations such as at Land Between The Alban Way And Colney Heath Lane.

**Spatial Strategy**

Sustainability Appraisal – Local Housing Need

The Local Plan seeks to deliver 14,603 dwellings over a 17 year period and includes a 5% uplift to account for unaffordability. The Council's Sustainability Appraisal Report[6] in paragraphs 5.2.16 – 5.2.25 discusses the main reasons for considering a local housing need requirement higher than the standard method and concludes the subsequent affordable housing need is a lot higher than the present Reg 19 Plan is providing for.

Furthermore, the draft revised Standard Method outlined in the consultation on the draft NPPF has increased the weight afforded to affordability in the calculation. This results in a 74% increase in the housing targets for St Albans district, as referenced in Council papers[7]. The housing requirement would be 26,248 dwellings rather than 14,603 over the 17 year plan period. Given this increase, the higher figure is likely to be a more accurate representation of the actual housing needs within St Albans. **It would be a more effective and responsible strategy to plan for more growth than is required, in an attempt to address the severe under provision that has occurred for many years both for affordable housing and needs generally.**

In addition to local housing need there is also a discussion about the affordable housing needs of the district. The Local Housing Needs Assessment[8] identifies a need for 802 affordable homes per annum, which is a very high number relative to LHN of 885. Given that the PPG states that "an increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes" it seems unachievable in the present version of the Plan to deliver the required affordable homes in the district given that the need figure is 90.6% of the total annual housing provision being planned for. This supports a higher growth

scenario, as this will lower the proportion of affordable housing that needs to be delivered and increase the opportunity for affordable housing being provided for in cross-subsidy schemes with general market housing.

Finally, there is a discussion, in Box 5.1, about unmet housing need from the other authorities in the wider South West Hertfordshire sub-region and neighbouring authorities. The discussion points out that there is likely to be unmet need arising from Dacorum and Hertsmere Borough Councils and significant unmet need from Three Rivers District Council and Welwyn Hatfield District Council.

The discussion concludes that there is a 'high level case for exploring growth scenarios involving setting the housing requirement above the LHN, particularly given the latest understanding of unmet housing need within the sub region'. Why have St Albans chosen not to meet any of these unmet housing needs when it is clear from the SA that a higher level of growth could be accommodated without significant adverse effects? It is furthermore acknowledged that a higher growth level could unlock transport upgrades, which the region urgently requires. This is not a positive strategic, cross boundary planning and it is irresponsible for the Council to not bring forward an ambitious strategy that will more effectively address housing need and affordability across the district and the sub region.

Without the overarching presence of the JSP it is incumbent on the individual planning authorities in the South West Hertfordshire region to effectively cooperate in relation to unmet housing needs and this acknowledgement of their remaining unmet needs without proper evidence of effective engagement between authorities throws into question whether this Plan and other Local Plans across the sub region have been positively prepared. This puts much of the County of Hertfordshire at risk of having no adopted or up to date local plans if plans are found unsound and subsequently withdrawn from Examinations.

<u>Sustainability Appraisal – Growth Scenarios</u>

It is recognised within the SA that planning for 'higher growth at St Albans could unlock or facilitate the delivery of strategic transport infrastructure upgrades'. Later in the discussion it is highlighted that the A414 corridor needs upgrades in order to accommodate the higher level of traffic that will be generated from new development and to fix existing issues at strategic junctions. There is also a recognition that supporting strategic growth locations in the areas where housing is needed, such as St Albans City, would provide the opportunities to develop 'walkable neighbourhoods' through a master planning approach.

Increasing the number of homes being delivered on the urban edge of St Albans would improve the prospects of not only creating new 'walkable neighbourhoods' on allocated sites but also integrating with and improving the connectivity of existing communities to the city centre and new services and facilities.

It is highlighted that a factor for discussion regarding the higher growth option is '*that exporting unmet need may well lead to increased car-miles' (page 136)* however, there is no consideration within the appraisal of the impacts on the transport network of delivering a significant portion of homes across the plan period at Hemel Hempstead. Delivering approximately 38% of the District's growth remotely from its Tier 1 settlement will increase the number of car-miles between Hemel Hempstead and St Albans and will only increase pressure on the A414 corridor, which is the main route between the two settlements, as there is no train link between St Albans and Hemel.

This approach does not align with the objectives of the Local Plan to 'reduce greenhouse gas emissions' and 'prioritise and enable the safe and attractive use of active and sustainable means of transport and reduce the need for people to travel'. It is also contradictory to discounting a higher growth scenario with further allocations on the urban edge of St Albans City.

It is our view that the appraisal fails to highlight the opportunities that would be presented from planning for a higher growth scenario, such as:

- Increased developer contributions towards infrastructure to provide more school provision, health care facilities, highways upgrades and open space provision, all of which have been identified as being required through the Infrastructure Delivery Plan[9].
- Opportunities for biodiversity enhancements and contributing to the emerging Hertfordshire Local Nature Recovery Strategy[10].
- Increase delivery of housing, and affordable housing, increasing the supply of homes and improving affordability across the District.
- Contributing to the unmet needs of neighbouring authorities, helping to address housing delivery at a regional scale.

These additional benefits should be given more weight in the decision on the local housing requirement as the higher growth scenario could contribute significantly to alleviating several of the District's planning issues. **It is our view that the Council should be planning for a higher level of housing that the standard method LHN figure.**

Housing Trajectory

The Council sets out it's housing trajectory on page 26 of the draft Local Plan[11]. It is outlined that a stepped approach is being taken to 'allow for sufficient time for the significant uplift in housing delivery to be realistically delivered'. The stepped approach on housing delivery assumes that none of the allocated sites will deliver in the first 3 years after adoption of the Plan and that the housing requirements will be met through existing permissions and windfall development.

The stepped requirement sets out that the annual housing requirement will be 485 dwellings in the first 5 years of the plan, increasing to 1,255 dwellings in years 6-10 and 1,025 dwellings in years 11-15. The St Albans Housing Delivery Test Action Plan 2022[12] shows that since 1994 an average of 395 dwellings per annum have been delivered and of those years the maximum level of housing delivery was 624 dwellings in 2018/19. The Council should be identifying and allocating sufficient amounts of deliverable sites to ensure that the annual housing requirement is met from the start of the plan period and to ensure that there is a sufficient supply of land from the point of adoption.

Furthermore, there is a requirement within the plan to deliver 885 dwellings per annum, which amounts to 4,425 dwellings over a five year period, with a 20% buffer, required by para 77 of the NPPF, this figure amounts to 5,310 dwellings over a 5 year period. The current stepped housing trajectory is wholly inadequate as it results in a 2,885 dwelling shortfall in housing delivery within the first 5 years of the plan. This is surely a completely unwanted outcome given the failure of planning for housing in St Albans over the last 30 years or more.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We would therefore conclude that the Plan is not *effective* as it relies on a strategy that is inadequate over the plan period. Allocating additional broad locations and small to medium sites that are deliverable before year 6 in the plan period would increase the number of homes being delivered early in the plan and help to ensure a consistent five years supply from the point of adoption.

Phase one (Part A) of Land at Windridge Farm can be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could form a new well integrated urban boundary to St Albans with significant landscaping improvements and the creation of community spaces and new woodland. The scheme would be delivered consistently and help to achieve other policy objectives within the plan.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

4. **Sustainability Appraisal (SA)**

4.1 We bring into question the validity of the methodology and the results of the SACDC Sustainability Appraisal (September 2024). We summarise our points in relation to the Sustainability Appraisal below. Please note, we make a number of points in this section in relation to proposed broad locations and sites. We request that SACDC please ensures that those representations are captured in response to the Sustainability Appraisal as well as in response to the broad locations and sites.

4.2 As an overall statement about the SA, it is extremely difficult to see how the assumptions and output of the SA can be relied upon given the lack of up to date and detailed information across the evidence in relation to HGC. Without a clear understanding about what infrastructure will be delivered, its cost and how it will be funded for the largest growth area of the Local Plan how can the SA prepare reasonable alternatives and draw meaningful conclusions to inform decisions in the Local Plan.

4.3 Perhaps this lack of critical evidence base regarding the HGC is what has led the SA to include that HGC is a 'constant' across all eight 'reasonable alternatives'. This is clearly an unsound approach and undermines the validity of the SA.

4.4 The SA states at paragraph 5.5.2 that:

*"The starting point is an understanding that: A) support for **HGC** in full can reasonably be held constant"*

4.5 In order to understand the reason for this conclusion one must read paragraphs 5.4.22 – 5.4.28. This makes a number of statements which are not based on technical assessments but are more political and 'practical' in nature which should raise very serious concerns as to the legitimacy of the SA as sound evidence to be relied upon for the Local Plan.

4.6 It states at paragraph 5.4.23 that:

*"On balance, the decision reached is that HGC warrants being treated as a **constant**, in light of the latest evidence and understanding, including via the consultation in 2023. An overriding consideration is that the St Albans Local Plan simply could not progress to the Regulation 19 stage without HGC i.e. there would be a need for further consultation under Regulation 18, leading to major issues in terms of a risk/likelihood of Government intervention and a further prolonged period of struggling to defend against planning applications due to the presumption in favour of sustainable development. Also, it seems highly likely that the Dacorum Local Plan would struggle to progress, and there is the wider context of unmet housing and employment land needs in SW Herts (and, more generally, growth strategy, including HERT)."*

4.7 As we have set out through our representations the 'latest evidence' for HGC does not justify how the allocations are going to be delivered, and it is entirely unclear what the infrastructure required is or how it will be delivered.

4.8 The SA is also effectively saying that without all of HGC that it could not progress to the Regulation 19 and that another Regulation 18 consultation stage would lead to Government intervention and struggle to defend itself against planning applications. This is not an objective or technical assessment which is what an SA should be. There is another obvious flaw in this approach by the SA - by pretending that the HGC is going to be delivered under all reasonable alternatives, the Plan is placing the entirety of its strategy and plan on the delivery of the HGC. If the Local Plan is found unsound and / or the HGC does not deliver as SACDC predicts (which is very likely) then SACDC and its communities will find itself in the very position it is seeking to avoid – that of unable to defend itself against planning applications due to a lack of housing supply.

4.9 The SA does conclude at paragraph 5.4.25 that:

*"There is feasibly the possibility of reducing the scale/extent of growth somewhat at the southern extent of the area and possibly also at the northeast extent (less clear/significant), but there is no clear case for doing so, and even fairly modest adjustments could lead to a risk of delay to the plan-making timetable"*

4.10 Therefore, technically there is a case for reducing the scale and growth at HGC yet the risk of delay to the plan-making timetable has meant that the SA and SACDC have are unwilling to assess this properly.

4.11 The SA explains (paragraph 5.4.28) that there is a separate question regarding delivery timescales which it claims is covered in section 5.5 of the SA however we cannot see how this is covered in this section.

4.12 As our representations clearly set out, the timely delivery of infrastructure, the development lead in times and delivery rates of HGC are unrealistic which should be assessed as part of the SA to arrive at a number of reasonable alternatives for the quantum of development that is actually possible at HGC.

*Figure 4.1: SA Table 5.2 RA Growth Scenarios showing HGC as the same in all scenarios*

4.13 The SA (2023) provides an overview of Redbourn (see Pages 128 -129) we have the following comments:

- It states there is an *"hourly bus service to Dunstable and St Albans (19 mins)"*. **See our detailed overview of the bus service in Redbourn in the Spatial Strategy section – it should not be characterised as an hourly bus service to Dunstable and St Albans.**

- It states "*With regards to Green Belt options, the first point to make is that there is a strategic argument for Green Belt release at Redbourn, particularly given the need to consider the possibility of not delivering HGC in full; the need to consider the possibility of supporting lower growth at the three higher order settlement discussed above; and the need to minimise pressure for growth at lower tier settlements".* **Firstly, the SA should not be recommending a supposed 'backup plan' for the possibility that that HGC might not deliver in full; this is inappropriate. Nor should the SA be suggesting that a Tier 4 settlement (Redbourn) should be taking more growth instead of higher order settlements which are set out in the Settlement Hierarchy of the Local Plan. Furthermore, it appears to be stating that Redbourn should also be taking the pressure off lower Tier settlements. The SA does not actually justify these statements which are basically that Redbourn should be a 'back up' for HGC non delivery, take the pressure off higher order settlements and take the pressure off lower tier settlements. We suggest and request this statement is removed from the SA.**
- The SA then provides a 'broad sequential order of preference in relation to 'Green Belt options'. **The 'sequential order' approach taken appears to be made up by the Consultants as this is not set out in the Green Belt Review.**
- The first sequential options it lists is 'West of Redbourn' quoting its strong performance in Green Belt terms, new infrastructure in the form a primary school or expansion of the existing primary school. It rightly points out inherent access / connectivity challenges and clear constraints including the M1 being adjacent and several public rights of way and the need to liaise very closely with Dacorum Borough. T**he GBR Sub Areas that comprise West of Redbourn actually score 'Strongly' against the NPPF purposes for the Green Belt. The GBR also raises potential issues regarding potential perceptual merging across the M1. The SA should not downplay the impact of the M1 impacting on potential development in this location.**
- The second sequential option in the SA is East of Redbourn. **It rightly states that this is a complex site and that the River Ver corridor is on site. However it fails to mention the large extent of Flood Zones 3 and 2 present which should be highlighted in more detail.**
- Table E (Summary of Redbourn growth scenarios to progress to Section 5.5) sets out 2 potential scenarios. **We consider that these scenarios should be developed further rather than stating that it is either 'Non-Green Belt Release' or 'Both West of Redbourn' and 'East of Redbourn'. There should be additional scenarios that test just West of Redbourn and just East of Redbourn. Ideally there would be further granulation of West of Redbourn which does not include the whole site.**

*Figure 4.2: Interim SA Table E: Summary of Redbourn growth scenarios to progress to Section 5.5*

4.14 SA Table 5.2 sets out the four growth scenarios by settlement. For Redbourn 661 dwellings is included for three out of the four scenarios with only one scenario showing no Green Belt Release in Redbourn. For the higher Tier settlements (St Albans, Harpenden, London Colney) there is more granulation in terms of the options across the scenarios.

**Noise and Air Quality**

4.15 The matter of noise and air quality have not been properly assessed as part of the plan making process including in the SA. There are serious concerns regarding the existing air and noise pollution in the area at Redbourn and Hemel East. The Sustainability Appraisal is very dismissive of this serious threat to human health and what the potential impact is of proposing development closer to the main source of the air and noise pollution – the M1. The SA states the following about this topic which demonstrates that the SA and the Local Plan has not really taken this key matter into consideration writing it off saying that air quality concerns are decreasing over time and focusing on the modal shift assumptions in the transport evidence.

*"Hemel Garden Communities – there are two AQMAs at Hemel Hempstead, but these are relatively distant from HGC (associated with north-south road corridors close to the western edge of the town). HGC is considered to be associated with a considerable opportunity in respect of masterplanning in support of trip internalisation and modal shift away from the private car (albeit this remains a focus of ongoing work), plus the A414 strategy / HERT represents a considerable opportunity to address air quality hotspots across the sub-region (for example, Hertford is constrained). However, benefits would be felt in the long term, and air quality concerns are decreasing nationally over time (albeit concerns will remain, particularly in respect of particulates from roads, brakes and tiers given the weight of EVs)."*(Paragraph 9.3.2)

*"In conclusion, a broadly neutral effect is predicted on the baseline, as per the conclusion in 2023. There is little reason to suggest that the proposed growth strategy will conflict with air quality objectives, particularly noting the location of AQMAs within the District and in surrounding areas. HGC is supported, but there is inherently an element of uncertainty and risk around achieving the high levels of modal shift (away from use of the private car) that are being assumed for the purposes of traffic modelling*." (Paragraph 9.3.4)

4.16 We have reviewed Defra's 2019 Road Traffic Noise Levels mapping to see what this means for the Local Plan Area given the heavy traffic and congestion in the area including the presence of the M1.

*Figure 4.3: Defra (2019) Road Traffic Noise Levels Lden (day-evening-night) 24 hour annual average noise level in decibels with weightings applied for the evening and night periods Accessed:* http://www.extrium.co.uk/noiseviewer.html

*Figure 4.4: Defra (2019) Road Traffic Noise Levels Lden (day-evening-night) 24 hour annual average noise level in decibels with weightings applied for the evening and night periods. Source:* http://www.extrium.co.uk/noiseviewer.html

4.17 As one can clearly see from the above mapping the noise levels east of Hemel and West of Redbourn do not appear to be safe and high density housing and employment in the area is going to further exacerbate this issue. It is very difficult to see how mitigation measures could greatly impact the noise and air pollution from the M1. In any case this area appears to be an unsafe and unsuitable location to allocate strategic housing that is meant to be 'sustainable' when its future residents will be exposed to unhealthy levels of pollution.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

As an overall statement about the SA, it is extremely difficult to see how the assumptions and output of the SA can be relied upon given the lack of up to date and detailed information across the evidence in relation to HGC. Without a clear understanding about what infrastructure will be delivered, its cost and how it will be funded for the largest growth area of the Local Plan how can the SA prepare reasonable alternatives and draw meaningful conclusions to inform decisions in the Local Plan.

Perhaps this lack of critical evidence base regarding the HGC is what has led the SA to include that HGC is a 'constant' across all eight 'reasonable alternatives'. This is clearly an unsound approach and undermines the validity of the SA.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

4. **Sustainability Appraisal**

4.1. We have a number of points regarding the Sustainability Appraisal (SA) which are in line with those made by Redbourn Parish Council. The SA is clearly These are summarised below:

- Without a clear understanding about what infrastructure will be delivered, its cost and how it will be funded for the largest growth area of the Local Plan at HGC, how can the SA prepare reasonable alternatives and draw meaningful conclusions to inform decisions in the Local Plan.
- By assuming that the HGC is going to be delivered under all 'reasonable alternatives' in the SA, the Plan is placing the entirety of its strategy and plan on the delivery of the HGC. If the Local Plan is found unsound and / or the HGC does not deliver as SACDC predicts (which is very likely) then SACDC and its communities will find itself in the very position it is seeking to avoid – that of unable to defend itself against planning applications due to a lack of housing supply.
- Particularly important for Leverstock Green the SA concludes at Paragraph 5.4.25 that the scale and extent of growth should really be reduced at the southern extent of the allocation, yet they fear the risk of delaying the plan-making timetable. This is clearer a case of SACDC ignoring its own technical evidence in favour of seeking to pursue a quicker plan-making timetable even if this means the Plan will not be found sound.

*"There is feasibly the possibility of reducing the scale/extent of growth somewhat at the southern extent of the area and possibly also at the northeast extent (less clear/significant), but there is no clear case for doing so, and even fairly modest adjustments could lead to a risk of delay to the plan-making timetable"*

- As we set out in our response to Policy LG2 below there are serious concerns regarding the existing air and noise pollution in the area including east of Hemel. The Sustainability Appraisal is very dismissive of this serious threat to human health and what the potential impact is of proposing development closer to the main source of the air and noise pollution – the M1. The SA states the following about this topic which demonstrates that the SA and the Local Plan has not really taken this key matter into consideration writing it off saying that air quality concerns are decreasing over time and focusing on the modal shift assumptions in the transport evidence.
- *"Hemel Garden Communities – there are two AQMAs at Hemel Hempstead, but these are relatively distant from HGC (associated with north-south road corridors close to the western edge of the town). HGC is considered to be associated with a considerable opportunity in respect of masterplanning in support of trip internalisation and modal shift away from the private car (albeit this remains a focus of ongoing work), plus the A414 strategy / HERT represents a considerable opportunity to address air quality hotspots across the sub-region (for example, Hertford is constrained). However, benefits would be felt in the long term, and air quality concerns are decreasing nationally over time (albeit concerns will remain, particularly in respect of particulates from roads, brakes and tiers given the weight of EVs)."*(Paragraph 9.3.2)
- *"In conclusion, a broadly neutral effect is predicted on the baseline, as per the conclusion in 2023. There is little reason to suggest that the proposed growth strategy will conflict with air quality objectives, particularly noting the location of AQMAs within the District and in surrounding areas. HGC is supported, but there is inherently an element of uncertainty and risk around achieving the high levels of modal shift (away from use of the private car) that are being assumed for the purposes of traffic modelling*." (Paragraph 9.3.4)

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

For the purposes of clarification, it is the Association's considered view that the Local Plan is unsound, and the Council has failed to discharge its Duty to Cooperate.

The proposed scale and distribution of growth has not been justified, it has not been positively prepared, and the policies are ineffective. LGVA considers that the delivery of growth at the Hemel Garden Communities has not been demonstrated through technical evidence including the Council's Green Belt Review, Infrastructure Delivery Plan (IDP), Viability evidence and Transport evidence.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Reg 19 Leverstock Green Village Association vf_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Leverstock Green Village Association (LGVA) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Hemel Hempstead LGVA considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

## 315 - Bloor Homes and Department of Health & Social Care

Submission Number: 315 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Sarah Hamilton-Foyn

On Behalf Of Company/Organisation: Bloor Homes and Department of Health & Social Care Name:

Comment Number: 2

### Type:

* Sustainability Appraisal

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

**Sustainability Process**

A Sustainability Appraisal is integral to the preparation and development of the local plan. The SA must inform and influence the Plan at the earliest possible stage and in that process consultation responses must be effective to help shape the options considered.

The PPG provides guidance on the preparation of the SA.

*"The sustainability appraisal needs to consider and compare all reasonable alternatives as the plan evolves, including the preferred approach, and assess these against the baseline environmental, economic and social characteristics of the area and the likely situation if the plan were not to be adopted. In doing so it is important to:*

*outline the reasons the alternatives were selected, and identify, describe and evaluate their likely significant effects on environmental, economic and social factors using the evidence base (employing the same level of detail for each alternative option). Criteria for determining the likely significance of effects on the environment are set out in schedule 1 to the Environmental Assessment of Plans and Programmes Regulations 2004;*

*as part of this, identify any likely significant adverse effects and measures envisaged to prevent, reduce and, as fully as possible, offset them;*

*provide conclusions on the reasons the rejected options are not being taken forward and the reasons for selecting the preferred approach in light of the alternatives." Paragraph: 018 Reference ID: 11-018-20140306*

The LGA states:

*"The sustainability appraisal is integral to the plan making process. It should perform a key role in providing a sound evidence base for the plan and form an integrated part of the plan preparation process. It should be transparent and open to public participation. The sustainability appraisal should inform the decision making process to facilitate the evaluation of alternatives. It should also help demonstrate that the plan is the most appropriate given the reasonable alternatives."*

The Sustainability Appraisal must address the legal requirements of the EU Directive (2001/42/EC) known as the Strategic Environmental Assessment (or SEA) Directive. The Environmental Assessment of Plans and Programmes Regulations 2004 give effect to this Directive and set out specific, legal, requirements for each stage of the sustainability appraisal process. Failure to carry out the sustainability appraisal process properly can expose the plan to legal challenge.

The SA should ensure that potentially environmentally preferable alternatives are not discarded as part of the process of approving plans without proper consideration of the environmental impacts of the various options.

Paragraph 4.1.7 of the SA states that individual site options are not considered to be reasonable alternatives, instead a package of sites to meet needs and wider objectives is assessed.

Consequently, there is no audit trail of all the reasonable alternative site options considered and the Council's reasons for either including or excluding the sites. Whilst it is acknowledged that the SA findings are not the only factors to be taken into account by a local planning authority when selecting options to take forward in a plan; factors such as public opinion, deliverability and conformity with national policy are also to be taken into account by plan-makers when selecting options for their plan.

As the SA is an integral part of plan preparation this assessment should be undertaken, the process needs to be transparent in order for the plan to be justified and found sound as set out in paragraph 35 of the NPPF (2023).

Paragraph 35 states:

***"...Plans are sound if they are:***

1. ***b) Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;"***

It is considered that there needs to be an audit trail to support the justification of the sites proposed in the Plan; on the basis of the current evidence the Plan would be unsound.

The PPG Plan Making states that:

***"The evidence needs to inform what is in the plan and shape its development rather than being collected retrospectively. Strategic policy-making authorities may wish to consider ensuring that their assessment of and strategies for housing, employment and other uses are integrated, and that they take account of relevant market signals." Paragraph: 038 Reference ID: 61038-20190315***

***Revision date: 15 03 2019***

***We have made separate objections to the SA Section 5.3 Site Options.***

**Levels of Growth**

The SA at paragraph 5.2.26 concludes that "***there are strategic arguments for setting the housing requirement at a figure above and below the LHN***"in the absence of higher level plan to distribute growth across the sub-region; but in paragraph 5.2.28 then concludes that "***the arguments in both directions ultimately they cancel each other out***".

The difference in the SA in 2024 is that in paragraph 5.2.31 it is acknowledged that there is more pressure for higher levels of growth:

"***With regards to higher growth, the conclusion here is that whilst such scenarios were ultimately ruled out as unreasonable in 2023, there is now increased strategic argument, particularly given unmet need, but also noting the Government's direction of travel at the time of writing (August 2024)."***

**Appendix 1: Economic Overview and Housing Need** (attached to our representations) provides a clear rationale for the St Albans Local Plan Review to go beyond the capped housing requirement (885) identified by the standard method for determining local housing need. An increase above the capped method would not only be more consistent with national policy and guidance, (in terms of significantly boosting the supply of housing); but would also assist in remedying the acute issues of affordability, affordable housing need, ageing population and economic growth with St Albans. Furthermore, given the evidence, It is therefore not unreasonable that the housing target in St Albans should be more in line with the proposed standard method figure of 1,544 dpa.

**Site Selection**

At the time of the Reg 18 Local Plan consultation reference was made to an officer led assessment, paragraph 5.3.12 of the 2023 SA refers to an officer led assessment - a 10 stage site selection methodology was presented to LPAG in June 2022; however, this site assessment did not appear in the evidence base during Reg 18 consultation. Consequently, at that stage it was unclear how the sites had been assessed and how these have influenced the sub – area scenarios included in the Reg 19 Plan. The SA fails to provide an assessment of reasonable alternative sites.

**The Local Plan Evidence - Site Selection Methodology Outcomes and Site Allocations** states in paragraph 3.14 under the heading: Site Selection Proformas for Green Belt Sites

"3*.14. In some locations there is more than one HELAA site due to multiple submissions over the course of several Call for Sites between 2016 to 2021. In these cases the most recent submission was considered in the site selection process and included within the Proforma."*

However, in relation to land at Harperbury Hospital, Harper Green (HELAA sites ref Annex 15 St Stephen the site is referenced STS- 33 -18 and STS-34-18), this is NOT the case as explained to the Council in our representations to the Reg 18 Plan.

The issue is that the site options have not been considered for the site. **See separate representation form on Section 5.3 Site Options Section 4 Sub -Area Scenarios**

Section 5.4 covers the sub-area scenarios - it is noted that the sub areas take into account the settlement pattern, parish boundaries and the distribution of "realistic site options". However, there is no map defining the sub-areas, so it is impossible to see how sites relate to the sub-areas, without reference to Appendix VI, where the parishes included in each of the sub-areas are listed.

It is noted (paragraph 5.4.10) that the aim is not to present a formal appraisal of reasonable alternatives and to discuss all site options in the same level of detail.

Most Sustainability Appriasls appraise sites being considered in order to form the options so that there is a transparent assessment of how the sites have been considered and which sites are then "taken forward" into the Plan as proposed allocations.

There are 9 sub-areas (paragraph 5.4.2) one of which is "Edge of Radlett", and a link is provide to the map of the HELAA sites in the parish of St Stephen. The settlement of Radlett is within Hertsmere BC. Reference is made to Hertsmere Local Plan Reg 18 consultation in April 2024;

however, the Plan proposed a shortfall against the current SM. The key issues for Radlett are described as: "*Existing pressures on key services... affordable housing [including because of housing growth coming forward from small schemes]... absence of a secondary school and congestion on Watling Street."*

The Council should consider with Hertsmere BC (through the Duty to Cooperate to meet the unmet needs) the future needs of the area and not be artificially constrained by administrative boundaries.

The site proposed in the SADC Reg 19 Local Plan as one of the Broad Locations is B8 land at Harper Lane, however this site would not address any of the unmet needs of Hertsmere and does not relate well to the edge of Radlett and does not relate well to the edge of Radlett (paragraph 5.4.145 of the SA Sept 2024)

It is not clear why Broad Location B8 has been proposed over and above Land at Harper Green, particularly given all the evidence supplied to the Council in respect of promoting a scheme at Harper Green adjacent to the already recently completed housing completed on the former Harperbury Hospital site, (see representations to Broad Location B8). "*The northern half of the site (adjacent to Harper Lane) comprises a light industrial area / trading estate (fully operational), and within this the northern part of the estate is a protected rail depot (important for minerals). The southern half of the site (adjacent to Radlett) them comprises greenfield land. An area of parkland / former parkland associated with Grade II listed Harper House is located to the east."*It is not clear what benefits this site would bring over and above land at Harper Green.

Paragraph 5.4.150 makes reference to our previous earlier submission of a new settlement at Harper Green, however despite the evidence and plans submitted the smaller proposal for about 470 dwellings has not been considered. This proposal would have "built on" to the approved, now built redevelopment of the former Harperbury Hospital site of 206 dwellings adjacent to the Kingsley Green Hospital. A smaller, more contained proposal is submitted to the Council –**see Appendix 2 Concept Plan.**

**Section 5 Reasonable Growth Scenarios**

It is noted in Section 5.5 that the SA considers 8 growth scenarios (as opposed to 4 that were considered in the Interim SA in 2023):

- Lower growth by removing either East St Albans or small sites (Scenarios 1 and 2)
- The emerging preferred option (PO, Scenario 3)
- Remove small sites and replace with one or both of the St Albans omission sites (Scenarios 4, 5, 6).

- Higher growth by additional allocation of one of the St Albans omission sites (Scenarios 7 and 8).

It is not necessarily clear which sites have been included in the 8 reasonable scenarios – the process is simply not transparent, and it is not clear how these scenarios contribute to meeting the SA topics/ objectives of the Plan.

The 8 reasonable scenarios are then appraised using 13 headings (one for each of the topics/objectives that comprise the SA framework), this does not constitute an appraisal of the sites under each of the scenarios. Under the Transport heading paragraph 6.13.1 it is acknowledged that transport objectives are centrally important to the local plan spatial strategy /site selection and there is a need to minimise the need to travel, support modal shift away from the private car towards public and active transport etc. "*Support for the achievement of transport objectives will have wide-ranging benefits in respect of other key objectives for the Local Plan, including decarbonisation." (my emphasis).*

**Sustainability Appraisal - Section 5.3 Site Options**

Whilst this heading implies consideration of Site Options, this is not the case. **It is not clear which sites from the HELAA assessment have been carried forward into the SA and which sites form the options in the sub areas**. There is no SA of individual sites so that they can be compared. Instead, the HELAA is the starting point as stated in paragraph 5.3.3 of the SA,

**"*The effect is to sift out a small number of sites, leading to an initial shortlist of 354 site options with a total capacity of 58,175 homes). In addition, a further 215 sites are shortlisted on the basis of an Urban Capacity Study, although for many of these sites availability was subsequently established as an issue such that the site did not warrant further consideration. Finally, all shortlisted site options are assessed using under a standard set of criteria across a series of site 'proformas', informed by the Green Belt Review and consultation (2023*)"**

The Local Plan Site Selection -Proforma Methodology Paper (September 2024) states that the site selection work is set out in Proformas which have been used to assess each site for suitability (paragraph 1.3). However, these proforma do not assess the sites against the sustainability objectives of the Plan.

**Our objections focus on the Site Selection and the also the Green Belt Review.**

**Site Selection**

Paragraph 1.9 of the Site Selection Proforma Methodology Paper acknowledges that:

**"*These recommendations for further consideration are important in site selection and are key elements that inform the proformas. The GBR Level 2, however, is not the only consideration for site selection and other criteria for suitability for the selection of sites in the Green Belt are part of the process that is set out in the proformas.*"**

However, Green Belt sites identified in the HELAA, but outside of the GB buffers were not considered to be suitable due to their less sustainable location and because development on such sites would create holes in the Green Belt, leading to fragmentation.

Paragraph 1.15 of the Site Selection Proforma Methodology Paper states:

**"*In some locations there is more than one HELAA site due to multiple submissions over the course of several Call for Sites between 2016 to 2021. In these cases the most recent submission was considered in the site selection process and included within the proforma*."**

However, in relation to land at Harperbury Hospital, Harper Green (HELAA sites ref Annex 15 St Stephen the site is referenced STS- 33 -18 and STS-34-18), this is NOT the case as explained to the Council in our representations to the Reg 18 Plan. (Land at Harper Green was submitted to the SHLAA in 2018 and again in 2021.) For Harper Green there have been several submissions, but despite the most recent submissions illustrating a smaller

development of about 400 dwellings the Council appear to have only assessed the original proposal for a garden village.

In response to the Call for Sites in March 2021, the forms were submitted and a site location plan together with an updated Vision document promoting Harper Green was submitted (February 2021) and set out the two options.

There are several references in the HELAA, but essentially the land is within STS-34-18 and STS-33-18. The sites in the HELAA 2021 report Annex 15 St Stephen and were *"considered to be potentially suitable subject to absolute and non-absolute constraints being reasonably mitigated. Evidence base work, including a Green Belt Review, is underway and may change the site suitability in the future.*" The overall conclusion was that:

***"The site is considered be potentially suitable, available and achievable subject to further assessment as part of the site selection process." Annex 15 in respect of STS-33-17, STS-33-18, STS-34-18, and STS-34-21.***

The site is adjacent to the former Harperbury Hospital site granted (5/15/0990) for 206 dwellings (SHLAA ref 254). The area of land promoted expands upon the site for 206 dwellings and can deliver a smaller development of approximately 470 dwellings supporting existing facilities. Since the Reg 18 Local Plan consultation further technical work has been undertaken to confine the area to a more limited extent of new development

Given further work that has been undertaken we are proposing an option of approximately 200 dwellings in addition to the 206 dwellings that have recently been completed on the former Harperbury Hospital site, which would assist in meeting the housing shortfall in the early part of the plan period. The proposal straddles the St Albans /Hertsmere district boundary however, this artificial boundary should not prevent the delivery of sustainable development, it should be noted that Hertsmere BC are not planning to meet their housing needs at the recent Reg 18 consultation in May 2024.

In our previous representations we submitted that the number of dwellings is not fixed and as such the proposal could accommodate a scheme of between 400 and 1,400 dwellings. The revised scheme proposes approximately 200 dwellings, relocated football pitches, playing fields, relocated bowls club, proposed community building, there is however potential for more development within Hertsmere. **Appendix 2 provides an updated concept plan for land at Harper Green for the revised proposal which is appended to the representations.**

Previously, land at Harper Green has been promoted as a cross-boundary site to both St Albans City and District Council and to Hertsmere Borough Council, although an option has been promoted for approximately 470 dwellings solely located within St Albans District and immediately adjacent to and enclosing the former hospital redevelopment for 206 dwellings (ref 5/2015/0990 granted planning permission by your Council in May 2017). The 2016 SHLAA site is SHLAA ref 254. The wider cross boundary site is SHLAA ref 539 submitted in 2018, and the smaller area ref 540 submitted in 2018. The HELAA references are STS-34-18 and STS-33-18.

Bloor Homes controls wider land holdings in both St Albans and Hertsmere. The land controlled by the company amounts to some 81.30 hectares and is adjacent to land in

public sector ownership. Bloor Homes have previously indicated to both Councils that the nature of their arrangements with the former owners (Department of Health and Social Care) means that the proceeds would be reinvested in the National Health Service. It is considered that the use of public sector land, i.e., its disposal and subsequent development is encouraged and supported by national policy in the NPPF (2023) paragraph 125.

***"Local planning authorities, and other plan-making bodies, should take a proactive role in identifying and helping to bring forward land that may be suitable for meeting development needs, including suitable sites on brownfield registers or held in public ownership, using the full range of powers available to them. This should include identifying opportunities to facilitate land assembly, supported where necessary by compulsory purchase powers, where this can help to bring more land forward for meeting development needs and/or secure better development outcomes."****(my emphasis)*

Relating to the point made earlier whilst the proforma have been prepared for the sites considered they are not assessed against the sustainability objectives of the Plan.

Paragraph 1.20 states:

***Each site is then assessed in terms of its sustainable development potential which is considered in detail in the next section of this Report and Table 1.***

However, **this is not against the sustainability objectives of the plan instead this assessment is made against the following in Table 1:**

- Whether the site is located within the Green Belt Buffer or settlement areas
- Located on PDL
- Located within GB Study weakly performing area
- Located within GB Study less important area
- Located within GB Study recommended for further consideration area

The sites have not been assessed against the SA objectives.

As referred to above we have promoted land at Harper Green for some time, throughout the preparation of the previously withdrawn St Albans Local Plan (we responded to the Call for Sites and submitted representations to the Reg 19 Local Plan and subsequently submitted Hearing Statements and attended the Local Plan Examination in 2020).

**In March 2021 in response to the St Albans Call for Sites** the submission was supported by a Vision document. The 2021 Vision document outlined the 2 options:

- a new Garden Village of approximately 1,400 dwellings in addition to the 206 dwellings at the Harperbury Hospital site.

1. 400 dwellings sustainable community - this is in addition to the 206 currently being built on the former Harperbury Hospital site and included land within Hertsmere Borough Council which contributes to the extensive amount of Green Infrastructure.

Both of these options above are cross boundary and provide a package of benefits. We indicated that the number of dwellings was not fixed and as such the proposal could

accommodate a scheme of between 400 and 1,400 dwellings and include significant planning advantages.

**The Call for Sites submission in March 2021 included a plan showing the red line boundary of the entire site** and indicated the location of the district boundary, indicating the respective areas within St Albans and within Hertsmere.

**In January 2022 we proposed to your Council a scheme where the residential element (approximately 470 dwellings) is solely located in St Albans**, **the proposal included the provision of Green Infrastructure (GI) in St Albans (approximately 25.48ha).** This would again expand upon the development of Harper Green (i.e., adjacent to the former Harperbury Hospital site) thus providing the opportunity to consolidate the existing development pattern to establish a balanced community. The plan indicated the land within St Albans which comprises approximately 39 hectares which included land for Green Infrastructure. Additional land in Hertsmere Borough Council provides a further 44.54 ha. of Green Infrastructure. To be clear at the time a red line plans showing the land within St Albans was submitted and also a red line plan to show the land with St Albans and Hertsmere was submitted. A concept plan was also submitted which illustrated the significant benefits on the land under control.

**In March 2023 we also submitted two plans which drew attention to the significant amount of Green Infrastructure that can be provided within the various options** that we are promoting, whether entirely within St Albans or whether it is a cross-boundary site with Hertsmere BC.

The two plans illustrated the extent of GI and the opportunities that this would provide:

- The smaller option for approximately 470 dwellings (solely located within St Albans) would include approximately 64 hectares of GI (including natural and semi-natural and amenity space) in addition to the existing vegetation, buffer planting and re-located football club.
- The slightly larger option for approximately 575 dwellings (including land within Hertsmere) would include approximately 62 hectares of GI. In each case a primary school is proposed.

This approach is consistent with the NPPF insofar as if land is removed from the Green Belt for development, improvements to the environmental quality and accessibility of the remaining Green Belt land can be made in accordance with paragraph 141 of the NPPF (2023).

However, as reported in the Local Plan Interim Sustainability Appraisal July 2023, only the larger proposal of a new settlement has been considered (Paragraph 5.3.13 which has a link to part of the vision document we submitted in 2021 (page 10 onwards)). Unfortunately, the pages in the Vision Document which clearly outlined the proposals for both options i.e., approximately 400 dwellings (which would be in addition to the 206 dwellings built on the

former Harperbury Hospital site) and alternatively a new Garden village of approximately 1,400 additional dwellings are missing (in particular page 9).

Irrespective of the fact that the pages are missing in the link in the SA, given the Council had the information for both options in response to the Call for Sites in March 2021, and further information was submitted supporting a scheme solely in St Albans in January 2022 and March 2023, it is not clear why both options have not been considered by the Council.

When all factors are taken into account in accordance with the NPPF, it is considered that further development around the former Harperbury Hospital on land at Harper Green is a more sustainable location than Broad Location B8 and should be included as a proposed allocation to meet the needs of St Albans. It is acknowledged that it would result in land being removed from the Green Belt, however, exceptional circumstances can be justified and land at Harper Green includes some previously developed land, it is well served by public transport (new services are already benefiting the wider community e.g., Kingsley Green Hospital) and it is adjacent to development that has recently been completed on the former hospital site. Land at Harper Green formed part of the NHS Estate and importantly, as referred to above the nature of their arrangements with the former owners (Department of Health and Social Care) means that the proceeds would be reinvested in the National Health Service. Such a proposal therefore accords with the NPPF. This site and the options should have been appraised against the SA objectives.

**Appendix 3: Appraisal of the Harper Green site against the SA Objectives of the Reg 19 Local Plan.**

**Appendix 4: Policy Compliance Assessment for Harper Green**

Transport is but one of the factors considered in promoting a sustainable development. As set out in the NPPF, achieving sustainable development means ensuring that the three overarching objectives, economic, social and environmental are considered in mutually supportive ways, so that opportunities can be taken to secure net gains across each of the different objectives.

As part of the original planning of the ongoing development of Harper Green, a strategy was put in place to ensure that sustainable travel patterns would be generated by the new housing. Improved foot and cycle provision have been provided. A new bus service has been provided to connect to Radlett railway station and Colney Fields Retail Park. The sustainable travel credentials of the location have therefore been scrutinised only very recently.

An additional appraisal has therefore been undertaken to understand how the location performs within this wider context, what are the constraints in this location and what improvements over and above those that have already been implemented are required to maximise its performance.

Our report concluded that there are opportunities to develop the local transport system to maximise the outcomes for existing and future residents; staff and visitors to the Kingsley Green Healthcare facility; and other premises on Harper Lane and beyond. Further improvements are proposed to the walking and cycling network and the public rights of

way network to improve connectivity between local communities and to the railway station.

The link in the SA at paragraph 5.3.13 is to an extract of the Vision Document submitted in 2021 and the pages that set out the two options for the site (i.e., 1,400 dwellings and 400 dwellings) have not been included in the extract. Consequently, it appears that the smaller scheme of approximately 400 dwellings has been ignored. The smaller scheme is a viable site and includes extensive areas of Green Infrastructure (GI) and provides pedestrian and cycle links to Radlett station.

A considerable amount of technical work has been undertaken across the site within the landownership, which can support a sustainable community and reinforcing the settlement pattern of the area. As part of the representations to the previous St Albans Local Plan Reg 19 consultation in October 2018 our submission included the following:

Appendix 1: Harper Green Garden Village

Appendix 2: Sustainability Appraisal Land at Harper Lane, Radlett.

This SA included the following appendices:

Site Location Plan

Transport Appraisal (covering 500 – 1400 dw)

Ecological Constraints baseline report

Phase 1 Geo-environmental Assessment

Agricultural Land Classification Report

Flood Risk and Surface Water Drainage Note

Heritage Desk based assessment.

Landscape and Visual appraisal

The site is 81.0 hectares (approximately 39ha in St. Albans and 42.0ha in Hertsmere). It lies immediately adjacent to, and encloses, the Harperbury Hospital which has permission for 206 dwellings which are currently under construction. There is an opportunity to build and consolidate on existing and committed development. It is within this context that a scheme for approximately 470 dwellings was proposed as an alternative to Broad Location B8.

The proposal located entirely within St Albans provides for:

- circa 470 dwellings,
- 2FE primary school,

- local centre to include medical facilities if required, provides for the opportunity to relocate the Bowling Club (Bloor Homes already have permission to do this in association with the Harperbury Hospital scheme) and includes the relocation of the football pitches under the existing lease terms.
- Further supports the new public transport service to the area implemented in September 2020 as part of the planning permission for the first scheme for 206 dwellings. This service carries 11 years of guaranteed subsidy through to towards

  the end of 2030 and hence plenty of time to grow within the context of further development. The service will also enable those travelling to and from the adjacent Healthcare site to use public transport. (The vehicle size has been chosen to allow for steadily growing patronage.)

  - There is an existing direct walking route via a Public Right of Way and quiet neighbourhood streets from the site to Radlett town centre and the rail station. As part of the proposals, the existing footpath along Harper Lane have taken place, providing a dedicated footpath / cycle path to Radlett. The new proposals would build on that and deliver improvements to Watling Street.
  - On foot this journey takes about 20 minutes, and to cycle about 10 minutes.
  - Land at Harper Green can contribute significantly to the delivery of new strategic walking and cycling infrastructure in line with the priorities set out within the St Albans Local Cycling and Walking Implementation Plan which is a key consideration as noted in para 6.2.3 of the SA.
  - Figure 5.6 in the SA states that it shows several recent sub-divisions of HELAA sites (made post the publication of the HELAA in 2021, however the smaller site at Harper Green which was promoted to the HELAA is not included).

  The revised scheme proposes approximately 200 dwellings, relocated football pitches, playing fields, relocated bowls club, proposed community building, there is however potential for more development within Hertsmere.

Our objection to the Site Options is that the SA has failed to consider the options for Harper Green, despite submissions which clearly explained that there are two options, and that the scheme could vary between 400 – 1,400 dwellings.

**Green Belt Review**

**We agreed that there are exceptional circumstances to justify removing land from the Green Belt, however, we have consistently maintained objections to the methodology and site selection process that the Council has applied.**

In order to alter the boundaries of the green belt, exceptional circumstances should be fully evidenced and justified. The NPPF states that strategic policies should establish the need for any changes to the Green Belt boundaries, having regard to the intended permanence in the long term, "*so that they can endure beyond the plan period". (paragraph 145 NPPF 2023)*

Importantly any changes therefore need to endure beyond the plan period rather than making a whole series of small-scale changes which do not secure any of the community and wider benefits and do not endure for the long term.

***"Before concluding that exceptional circumstances exist to justify changes to Green Belt boundaries, the strategic policy-making authority should be able to demonstrate that it has examined fully all other reasonable options for meeting its identified need for development..."***

Paragraph 5.3.4 refers to the Green Belt review, that Stage 1 was published in 2013 and that concerns about the Stage 2 report led to a new Green Belt Review Stage 2 being published in June 2023.

We have previously commented on the Green Belt Review and note that the Stage 1 report (undertaken in 2013), although it assessed the entirety of the Green Belt in St Albans against the NPPF purposes, the Council still consider it to be relevant despite criticisms of the approach in the last local plan review. The issue with the Green Belt Review Stage 1 is that it reached high level conclusions, if the very broad areas were ruled out at this stage, then smaller areas within were not taken forward.

The new Stage 2 Green Belt has been undertaken by ARUP (published June 2023) "builds upon" the SKM Stage 1 (2013) report which assessed the entire Green Belt. The Council consider that this assessment provides robust evidence base and have taken the findings of the Stage 1 GBR on the weakest performing GB and used these to form the sub- areas for the Stage 2 study. Consequently, any areas which were not considered favourable then (some 10 years ago) continue to be discounted no matter how marginal and whether the assessment was considered to be well founded or not. The new Stage 2 report now has been prepared by ARUP for the Council to address the concerns raised by the Inspectors.

The Stage 2 assessment only considered those sites that fell within the settlement boundary buffer. The area of search was thus limited by applying a buffer around each settlement inset from the Green Belt. The intention *was:*

*"***encouraging a sustainable pattern of development accessible to existing settlements and maintain the integrity of the Green Belt (as supported by the NPPF). The GBR Stage 2 (2023) assessed sub-areas, with these sub-areas driven by the sites promoted and considered through the HELAA process, along with small sites identified in the previous GBR Stage 2 of 2013."**(paragraph 1.7 of the Site Selection Proforma Methodology Paper (September 2024)

In our reps to the previous Local Plan, we criticised the Stage 1 assessment. The Stage 1 assessment stated: "***To achieve 'further consideration for development' the site must be evaluated as lower or medium impact (Green or Amber). Any Red rating (higher impact) will rule a site out for further consideration."***This is a "policy on" assessment.

Land at Harper Green is within Green Belt Parcel 31, overall, the parcel was assessed to contribute significantly to only 1 of the purposes of the Green Belt, yet it was scored "Red" in Table 1 of the Councils assessment attached to the Planning Policy Committee Papers of 22nd May 2018. At the time Pegasus objected to the Council's assessment of land at Harper Green adjacent to the former Harperbury Hospital as the evidence did not support the Council's assessment. **We provided our assessment of the Parcel against the 5 purposes of the Green Belt - this was submitted with our representations in 2018.**

At that time, it appeared that Harper Green Garden Village was dismissed not only because it was located in the Green Belt, but also because the Council's assessment of capacity was such that they concluded that less than 500 dwellings could be accommodated in St Albans as the site straddles the boundary with Hertsmere Borough.

From the Stage 1 report only strategic sub area SA-S7 - south and west of London Colney was considered to go forward into the next stage review even though the main contribution

of Parcel GB31 to the Green Belt purposes is stated to be the contribution to the maintenance of the existing settlement pattern, particularly on the secondary local gap between London Colney, Frogmore and Radlett Road. While any reduction in these gaps could compromise the separation of settlements in physical, visual, or openness terms, it affirms the suitability of considering the Harperbury site when it states that a limited

reduction in the size of the strategic parcel would not significantly compromise the physical

separation of any settlements or primary role of the Green Belt.

In our submission to the St Albans Local Plan in 2018 we responded to the SKM Stage 1 and 2 reports and provided a detailed assessment of the land parcel around former Harperbury

Hospital against the purposes of the Green Belt. Each parcel was assessed against potential spawl, coalescence and effect on the countryside. Parcels were identified suitable for development, and some mitigation and parcels not suitable for development. Parcels not suitable for development included the now proposed Broad Location B8 which was considered to contribute to urban sprawl.

In undertaking our own Green Belt assessment of this location and can demonstrate that a Garden Village or smaller scale development at Harper Green can be accommodated in the

location of Harperbury Hospital without undermining the purposes of the Green Belt and at the same time creating a new definitive boundary for the Green Belt. It also addresses the issues in the Green Belt.

We have previously raised issues with the analysis of the Stage 1 report and as this has not been reviewed this analysis has been "rolled forward" into the new Stage 2 report. In addition, the new Stage 2 report is confined to the assessment of sites with the narrowly defined buffers.

The ARUP Stage 2 report sub-divides the Stage 1 recommended areas where appropriate but also identifies additional sub-areas for assessment. However, whilst the additional subareas are based on promoted sites, they are only those that are within defined buffers

around existing settlements in St Albans and neighbouring authorities. "*The additional sub-*

*areas lie within both strongly and weakly performing strategic parcels (as defined in the*

*Stage 1 GBR*)." (page 2 of the Stage 2 Green Belt Review).

The existence of the buffers around existing settlements has precluded the consideration of other promoted sites.

However, it is considered that the Stage 2 assessment has been constrained as it is

confined to those areas within the defined buffers around the existing settlements. Notably

the areas of search were defined by applying settlement buffers, identifying potential areas or sites within the buffers, then refining the sites to be removed from the GB. Consequently,

sites that are not adjacent to existing urban areas (or the buffers) i.e., those that fell outside

the buffers were excluded from the assessment i.e., that fell beyond the 250m and 400m

buffer were excluded (paragraph 4.2.1 of the Stage 2 Green Belt Review). The justification

for the exclusion being that "*the release of such sites would (a) not contribute to a sustainable pattern of development; and (b) undermine the integrity of the Green Belt by creating hole(s) within its fabric."*

The Green Belt Assessment then goes on to state that:

***"The identification of a buffer should not be taken as an indication that this land is necessarily the most sustainable, suitable or deliverable option for any future development. Areas of land which are assessed to perform less strongly against the Green Belt purposes will need to be balanced against wider local plan work to determine the preferred spatial growth option."***

In which case the extent to which land falls within a buffer should not be the determining factor in considering the area for future development.

**As stated in paragraph 4.2.1 of the Stage Green Belt Assessment, there is no formal guidance on the identification of buffers**, and it is noted that the Council have taken into account approaches in neighbouring authorities with similar characterises and making adjustments for the local context, applying professional judgement.

The settlement hierarchy and local circumstances including settlement pattern and spacing were considered.

These buffers indicate the maximum extent of sustainable development and vary accordingly to the position of the built-up area in the settlement hierarchy (the justification for the buffers is set out in paragraph 4.2.1 of the Stage 2 Green Belt Review June 2023). It is noted that the buffers were also applied to the immediately adjacent settlements in neighbouring authorities, where the buffer would lead to some partial interception with SACDC Green Belt as set out on page 24 of the ARUP Final GB Report June 2023

It is noted that in order to ensure that the assessment reflects the local context (paragraph 4.2.2), the areas of assessment within the buffers were refined by taking into account:

- SKM Stage 1 GBR weakly performing land against NPPF purposes. (however, this only included a sub-area of land parcel GB30 from the Stage 1 report)
- Promoted sites identified through the Council's site selection work (land at Harper Green has been promoted to the Council at every opportunity yet there is no published analysis of the site selection)
- Non-Green Belt land.

From the SKM Report Stage 1 "*only those sub-areas that fell entirely or partially within the settlement buffer, or immediately adjacent to another area / site entirely or partially within the settlement buffer were taken forward (page 23) Similarly, although the promoted sites from 2016 –2021 were considered, only those promoted sites that fell entirely or partially within the settlement buffer, or immediately adjacent to another area / site entirely or partially within the settlement buffer were taken forward"*.

***The application of the settlement buffers has resulted in only those areas and sites falling entirely or partially within the defined buffers being subject to further assessment. Where weakly performing sub-areas and promoted sites were located partially within a settlement buffer, the entirety of these areas and sites was taken forward for further consideration, i.e., essentially extending the buffer.***

Areas or sites located outside of the settlement buffer fell into two categories:

- Outside the buffer and no immediate adjacency to an area / site within the buffer. These areas or sites were discounted from further consideration – this is Harper Green. **It is not clear why a buffer could not be defined around Harperbury Hospital/Haper Green as a settlement.**
- Outside the buffer but adjoining areas or sites located within the buffer. These areas and sites were included for further assessment. In this instance, this was limited to one site extension outside of the buffer.

It is noted in paragraph 4.2.3 that although a "*filtering process to remove weakly performing areas or promoted sites, which were entirely or largely constrained by major policy constraints was undertaken. These policy constraints effective rule out development of the land*" (paragraph 4.3.2 of the Stage 2 GB Report and are listed including Historic Parks and Gardens); Parcel GB31 (SA-S7) land south and west of London Colney is constrained by Historic Parks and Gardens (Figure 4.5) of the Stage 2 GB report, however, the proposed Broad Location B6 West of London Colney appears to lie directly south of the Historic Parks and Garden (the proposed allocation includes land for a 8 FE secondary school site with adjoining HCC land ownership and lies outside the 250 buffer).

It is not clear why some sub-areas have been identified as opposed to others (Figure 4.7) our main concern is the reliance on the Stage 1 report of 2013 which underpins the Stage 2 report and as a result the application of the buffers.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Our objections to SA process are that there is no audit trail of all the reasonable alternative site options considered and the Council's reasons for either including or excluding the sites. In other SA, sites have been appraised against the SA objectives so that a comparison can be made.

Our fundamental objection is that the Stage 1 GB report of 2013 is relied upon and that the Stage 2 report relies on the buffers around settlements which excludes sites which are sustainable. There is no justification for the buffers.

The lack of a SA for the sites results in a less than transparent site selection process results in the fact that there is no clear audit trail of all the reasonable alternative site options considered and the Council's reasons for either including or excluding the sites

Whilst it is acknowledged that the SA findings are not the only factors to be taken into account by a local planning authority when selecting options to take forward in a plan; factors such as public opinion, deliverability and conformity with national policy are also to be taken into account by plan-makers when selecting options for their plan.

As the SA is an integral part of plan preparation, the process needs to be transparent in order for the plan to be justified and found sound as set out in paragraph 35 of the NPPF (2023).

Our objection to the Site Options is that the SA has failed to consider the options for Harper Green, despite submissions which clearly explained that there are two options, and that the scheme could vary between 400 – 1,400 dwellings.

The GB assessment has been constrained by what appears to be arbitrary buffers, this has resulted in only those sub-areas that fell entirely or partially within the settlement buffer, or immediately adjacent to other areas /sites entirely or partially within the settlement buffer being taken forward.

**327 - Gary lees**

Submission Number: 327 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Tom Beardsmore

On Behalf Of Company/Organisation: Clowes Developments Name: Gary lees

Comment Number: 2

**Type:**

* Sustainability Appraisal

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

These submissions to the Regulation 19 Draft Local Plan consultation are made on behalf of Clowes Developments who has an interest in circa 74 hectares of land either side of the M25 motorway west of Junction 21a, the northern parcel lying south of Noke Lane, Chiswell Green and the southern parcel lying west of Bricket Wood. The land parcels are identified on the enclosed site location plan.

**Chapter 1 Spatial Strategy**

It is contended that the draft plan fails all four tests of soundness in not giving sufficient consideration to plan for more homes or more employment floorspace, given the clear evidence of increased needs for both of these in St Albans and across the South West Hertfordshire Market Area (HMA).

<u>Housing Need</u>

Whilst the draft plan is seeking to provide for the Standard Method housing figure, it should be noted that:

1. This is a capped figure, and thus below actual housing need;
2. There is a very high, local affordable housing need; and
3. There is unmet need from neighbouring authorities in the Housing Market Area.

The Sustainability Appraisal (SA) notes that the PPG states: "*Where the minimum annual local housing need figure is subject to a cap, consideration can still be given to whether a higher level of need could realistically be delivered*". The uncapped housing need figure is 1,165 dpa and would result in the need to allocate land for a further 4,709 dwellings.

The SA also acknowledges that the PPG states: "*An increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes.*" The Local Housing Needs Assessment (LHNA, 2024) identifies a need for 449 affordable homes to rent per annum plus a need for 353 per annum affordable home ownership, a total affordable housing need over the plan period of 13,233 dwellings. There is thus a desperate affordable housing need that planning for additional homes would help alleviate.

The Duty to Cooperate (DtC) requires strategic policy-making authorities to cooperate with each other, and other bodies, when preparing policies which address strategic matters (such as meeting housing needs) and to produce Statements of Common Ground (SoCG). The SoCG published alongside this Regulation 19 consultation is unsigned, but identifies that an approach to accommodating unmet housing needs that may exist within the wider Housing Market Area is a Strategic Matter to be addressed. Given the decision of Three Rivers to not proceed with their new local plan, there exists significant unmet need across the HMA. There is no evidence of any 'effective' joint work to address this strategic issue; just noting this issue in the SoCG fails to meet the DtC requirement of engaging effectively.

Whilst the SA acknowledges there are implications for the matter of planning for unmet need across the sub-region as a consequence of the proposed changes to the NPPF (including a 75% increase on the present standard method calculation for St Albans), this is also evidentially the case under the existing NPPF as well.

The SA does not consider a growth option higher than 12% above the (capped) standard method requirement. In light of the actual housing and affordable housing needs in St Albans being substantially higher than the standard method figure, it is a failure of the SA to not test a higher growth option as a reasonable alternative.

NPPF paragraph 61 sets out circumstances where a figure higher than the standard method might be justified; not only does the plan fail to respond positively to these and also fails to take account of unmet need from elsewhere in the HMA, the plan's housing figure also fails to provide for an appropriate flexibility allowance. This should be at least 10% of the standard method figure to allow for potential non-delivery and ensure the quantum of housing being planned for is actually delivered over the plan period.

Plan period: it would be confusing for monitoring purposes to have a plan that does not start and end at the same point in the year. 31st March is an accepted start and finish point and it would therefore be logical for this local plan to start at 31st March 2024.

Employment Need

The SA is quite dismissive of testing a higher growth strategy with increased employment land on the basis that 'none of the sites in question would deliver new employment land'. The northern parcel of the land as identified on the attached site location plan is subject to a Planning Performance Agreement with the City Council to consider the merits of the site to deliver a new stadium for St Albans City Football Club along with enabling development. The principle of a new stadium for the football club is supported by the New Local Plan at Policy COM5. One of the enabling development options being considered is employment. The site has been put forward for consideration as a potential employment site and the HELAA 2021/22 Report Annex 17 Employment includes this site as STS 19-21. There then appears to be no further assessment of the site for employment purposes as part of the plan making process.

The South West Herts Economic Study (SWHES) 2024 identifies a need for just 1.5 ha of industrial and storage & distribution land within St Albans over a 20-year period. However, Savills has considered this study and do not agree with its findings on the following grounds:

The SWHES sets out a range of demand estimation methods and identifies the Net Absorption method as its preferred. This scenario relies in part on elements of the Savills demand estimation method outlined in the "Levelling Up – The Logic of Logistics" report prepared for the BPF. Savills consider this estimation method the strongest because it is based directly on market indicators.

The three other estimation methods (past completions, labour demand and labour supply) have significant limitations which typically result in inaccurate estimates of future land demand, particularly in the Industrial and Logistics (I&L) sector. These methods have no direct relationship to market realities and the growth drivers that support demand.

Whilst the fact that the SWHES has stated a preference for the Net Absorption method for estimating need is welcome, it has not been applied entirely correctly or to its fullest. There are several reasons why the estimation method falls short. It does not take account of current and future growth drivers that will continue to underpin I&L demand such as online retailing and housing growth. Also, given St. Albans proximity to Greater London, and its excellent transport infrastructure, it doesn't account for how new I&L floorspace in St Albans could help to address the loss of land in Greater London. Finally, the plot ratios uses in the SWHES are too high at 40%. From Savills' experience, a plot ratio of around 35% is more reflective of modern I&L occupier requirements.

Based on Savills' own demand methodology, apportioning FEMA down to St Albans results in demand for between 43 ha and 71 ha of land over a 20-year period. This is a significantly higher demand requirement than that estimated in the SWHES. I consider Savills' demand estimates demonstrate that the Council has not allocated enough of the right land for I&L uses, and that quantitatively a strong needs case can be made for further I&L development in the FEMA and St Albans specifically. The Subject Site will help to meet this demand.

Although the Council has allocated two large sites for employment, neither is fully oriented towards meeting the Council's need for new I&L premises. The East Hemel Hempstead draft allocation is located in the Herts Innovation Quarter and primarily oriented towards office and R&D activities. The SRFI is nationally significant infrastructure and its capacity to meet local or even sub-regional need is limited. The Subject Site is uniquely positioned to provide St Albans and the sub-region with highly deliverable, strategically located Class A I&L premises.

Whilst the study confirms that hyperscale data centres fall outside of its scope, it does recognise that Herts is an attractive location for these uses and that the development of data centres is now established as critical national infrastructure, with the evidence demonstrating there is significant demand for large scale centres and that this should be expected to continue to increase.

Notwithstanding the plan will not be assessed against the new version of the NPPF, and thus does not need to identify strategic sites for data centre uses as proposed in the NPPF changes to paragraphs 84 & 85, the ministerial statement of Chris Bryant MP of 12th September 2024 is now government policy that plan will need to have regard to. This statement confirms UK Data Infrastructure, including data centres, as Critical National Infrastructure. The statement also confirms the government's commitment to explore further how to ensure the right conditions are in place to drive necessary capacity expansion to support economic growth and innovation. The plan does not provide any policies or proposals to assist in ensuring data centre demand – which is known to be high in Hertfordshire – is provided for or to assist in directing such uses to appropriate locations.

The SA in support of the Reg 19 draft local plan fails to consider any reasonable alternatives in relation to employment growth – including the northern parcel of the subject site that has been put forward for employment development. It is also noted that employment levels actually decreased in St Albans between 2015 and 2021, an alarming statistic that points to an unsustainable, aging population and one that requires a local plan to plan positively to meet the needs of younger generations by providing the homes and jobs to enable them to stay and prosper in the District.

For all the above reasons, the Spatial Strategy of the draft Plan fails the Duty to Cooperate and all four tests of soundness.

### 332 - Beechwood Homes Contracting and Verulam Golf Club

Submission Number: 332 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Ceres Property Name: James Firth

On Behalf Of Company/Organisation: C/O Ceres Property Name: Beechwood Homes Contracting and Verulam Golf Club

Comment Number: 3

**Type:**

* Sustainability Appraisal

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

The St Albans Local Plan's SA sets a vision prioritising sustainable development, climate action, and community well-being, all while preserving the district's Green Belt and unique environmental assets.

**Preferred Growth Scenario (Scenario 3) and Potential for Higher Growth**

The SA's preferred Scenario 3 proposes a modest expansion focused primarily on East St Albans, aiming to balance housing demand with infrastructure capacity. However, St Albans has substantial capacity to accommodate significantly higher levels of housing growth. The existing infrastructure, along with plans for enhanced transit and community services, supports an alternative preferred option with expanded growth to meet acute housing demands.

Higher growth could support a more resilient local economy, enhance social equity through increased affordable housing provision, and contribute to the council's climate goals by supporting development in sustainable locations.

In line with the above objectives it is considered the plan should seek to maximise the potential of sites and in this context the amendment of policy M8 to reflect the potential for a higher number units should also be taken forward.

**Assessment of Site at M8 Verulam Golf Club**

The site at Verulam Golf Club is assessed under reference SA-07-21.

This supports the allocation of the site to meet housing needs. As detailed in our regulation 18 representation, the current assessment within the Sustainable Appraisal appears to score the site negatively in respect of certain criteria despite there not being considered to be justification on this basis. Whilst the overall conclusions of the Local Plan and Sustainability Appraisal that the site is suitable for allocation are supported, there are a number of areas where it is considered amendments

be made to the assessment of the site, or where its scoring has not taken proper account of the circumstances of the site.

The proposed Site has been allocated red in the AQMA (Air Quality Management Area Category). It has been outlined as the closest greenfield site located to an AQMA, situated 998 meters away. It is important to note that the threshold for the assigned red metric is considered for Sites within 1000m of an AQMA, and therefore the Site is only 2m away from being allocated to a different colour. The nearest allocated site is located 269 meters away from the AQMA.

This scoring, however, fails to properly acknowledge that in line with the Council's climate change objectives this site is sustainably located close to the centre of St Albans. The key benefit of this is the availability of walking, cycling and public transport options for travel without use of the private car for all journeys. It is therefore inappropriate to negatively score the site purely due to a distance criteria from the AQMA.

The proposal is anticipated to have minimal impact on traffic within the area as the need for a private vehicle is reduced since the Site is within walking distance from the town centre, which boasts an array of facilities. Initial Transport Assessment work indicates that even with a larger scale of development of 85 homes, travel movements would be limited to approximately 30 additional movements in the AM and PM peak periods. It is anticipated for longer trips traffic is likely to travel south east towards the wider road network rather than towards the city centre and AQMA in any case.

The Site has also been assessment as having an amber rating for Local Wildlife Site (LWS). Comparatively to other Sites within St Albans, the Site demonstrates a more sustainable approach to encroaching on LWS's as it is of an increased distance to other Sites within the Green Belt.

The proposed Site is situated approximately 250 meters from a scheduled monument (The Benedictine Priory of St Mary (Sopwell Priory) and the post-medieval mansions known as Sopwell House or Lee Hall). However, the Site does not directly border the area, with part of the Golf Course and the River Ver making up the space in between. Visually these sites are very separate, with the proposed Site have trees bordering as well as the river's banks bordering densely populated Trees which then form the border of the scheduled monument. It is therefore also considered inappropriate to negatively score the site against this criteria.

The Site is identified as adjacent to a conservation area. However, as stated in Paragraph 2.3.5 of the SA, St Albans contains a high density of conservation areas (19 in total), meaning many appropriate Sites will be located in an area surrounding a conservation area. The proposal will seek to ensure that there will be a minimal impact on the surrounding landscape, aiming to ensure that the biodiversity will be protected and enhanced within the area as well as being policy compliant. The SA notes on Page 132 that there should be good potential to avoid/mitigate any impacts within St Albans. Subject to detailed design there is potential for a scheme to preserve and enhance the Conservation Area as of course is the statutory requirement. The areas of conservation area immediately adjoining the site are largely of modern construction without particular features of conservation importance. Bringing forward a suitable and high quality scheme to open up public access to the land alongside new path links can therefore be considered a positive.

Figure 1 shows that the Site is regarded as a more affluent area therefore scoring an amber rating in Multiple Deprivation Category. St Albans and the surrounding area has traditionally been affluent, with the Local Plan noting issues regarding affordability within the area. Many of the Sites being

allocated for development being scored poorly in the category. The Proposed Development is intended to be policy compliant with the Local Plan regarding affordable housing and housing mix aiming to assist the Council in meeting objectives associated with achieving a diverse economic demographic.

[Please see attached appendices]

...

## 2 BACKGROUND & CONTEXT

### Planning Policy Context

**2.1** In preparing this representation, consideration has been had for Chapter 3 of the National Planning Policy Framework (NPPF) (2021) which relates to 'plan-making'.

**2.2** Paragraph 15 of the NPPF promotes a plan-led system, and that succinct and up-to-date plans should provide a positive vision for the future of each area; a framework for addressing housing needs and other economic, social and environmental policies; and a platform for local people to shape their surroundings.

**2.3** Paragraph 16 states that plans should:

1. be prepared with the objective of contributing to the achievement of sustainable development;
2. be prepared positively, in a way that is aspirational but deliverable;
3. be shaped by early, proportionate and effective engagement between plan makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;
4. contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;
5. be accessible through the use of digital tools to assist public involvement and policy presentation; and
6. serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).

**2.4** As identified at paragraph 35, local plans are examined to assess whether they have been prepared in accordance with legal and procedural requirements, and whether they are 'sound'. The test for soundness as set out within the NPPF is as follows:

**2.5** Plans must be:

- Positively prepared
- Justified
- Effective
- Consistent with national policy

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The St Albans Local Plan's SA sets a vision prioritising sustainable development, climate action, and community well-being, all while preserving the district's Green Belt and unique environmental assets.

**Preferred Growth Scenario (Scenario 3) and Potential for Higher Growth**

The SA's preferred Scenario 3 proposes a modest expansion focused primarily on East St Albans, aiming to balance housing demand with infrastructure capacity. However, St Albans has substantial capacity to accommodate significantly higher levels of housing growth. The existing infrastructure, along with plans for enhanced transit and community services, supports an alternative preferred option with expanded growth to meet acute housing demands.

Higher growth could support a more resilient local economy, enhance social equity through increased affordable housing provision, and contribute to the council's climate goals by supporting development in sustainable locations.

In line with the above objectives it is considered the plan should seek to maximise the potential of sites and in this context the amendment of policy M8 to reflect the potential for a higher number units should also be taken forward.

**Assessment of Site at M8 Verulam Golf Club**

The site at Verulam Golf Club is assessed under reference SA-07-21.

This supports the allocation of the site to meet housing needs. As detailed in our regulation 18 representation, the current assessment within the Sustainable Appraisal appears to score the site negatively in respect of certain criteria despite there not being considered to be justification on this basis. Whilst the overall conclusions of the Local Plan and Sustainability Appraisal that the site is suitable for allocation are supported, there are a number of areas where it is considered amendments

be made to the assessment of the site, or where its scoring has not taken proper account of the circumstances of the site.

The proposed Site has been allocated red in the AQMA (Air Quality Management Area Category). It has been outlined as the closest greenfield site located to an AQMA, situated 998 meters away. It is important to note that the threshold for the assigned red metric is considered for Sites within 1000m of an AQMA, and therefore the Site is only 2m away from being allocated to a different colour. The nearest allocated site is located 269 meters away from the AQMA.

This scoring, however, fails to properly acknowledge that in line with the Council's climate change objectives this site is sustainably located close to the centre of St Albans. The key benefit of this is the availability of walking, cycling and public transport options for travel without use of the private car for all journeys. It is therefore inappropriate to negatively score the site purely due to a distance criteria from the AQMA.

The proposal is anticipated to have minimal impact on traffic within the area as the need for a private vehicle is reduced since the Site is within walking distance from the town centre, which boasts an array of facilities. Initial Transport Assessment work indicates that even with a larger scale of development of 85 homes, travel movements would be limited to approximately 30 additional movements in the AM and PM peak periods. It is anticipated for longer trips traffic is likely to travel south east towards the wider road network rather than towards the city centre and AQMA in any case.

The Site has also been assessment as having an amber rating for Local Wildlife Site (LWS). Comparatively to other Sites within St Albans, the Site demonstrates a more sustainable approach to encroaching on LWS's as it is of an increased distance to other Sites within the Green Belt.

The proposed Site is situated approximately 250 meters from a scheduled monument (The Benedictine Priory of St Mary (Sopwell Priory) and the post-medieval mansions known as Sopwell House or Lee Hall). However, the Site does not directly border the area, with part of the Golf Course and the River Ver making up the space in between. Visually these sites are very separate,

with the proposed Site have trees bordering as well as the river's banks bordering densely populated Trees which then form the border of the scheduled monument. It is therefore also considered inappropriate to negatively score the site against this criteria.

The Site is identified as adjacent to a conservation area. However, as stated in Paragraph 2.3.5 of the SA, St Albans contains a high density of conservation areas (19 in total), meaning many appropriate Sites will be located in an area surrounding a conservation area. The proposal will seek to ensure that there will be a minimal impact on the surrounding landscape, aiming to ensure that the biodiversity will be protected and enhanced within the area as well as being policy compliant. The SA notes on Page 132 that there should be good potential to avoid/mitigate any impacts within St Albans. Subject to detailed design there is potential for a scheme to preserve and enhance the Conservation Area as of course is the statutory requirement. The areas of conservation area immediately adjoining the site are largely of modern construction without particular features of conservation importance. Bringing forward a suitable and high quality scheme to open up public access to the land alongside new path links can therefore be considered a positive.

Figure 1 shows that the Site is regarded as a more affluent area therefore scoring an amber rating in Multiple Deprivation Category. St Albans and the surrounding area has traditionally been affluent, with the Local Plan noting issues regarding affordability within the area. Many of the Sites being allocated for development being scored poorly in the category. The Proposed Development is intended to be policy compliant with the Local Plan regarding affordable housing and housing mix aiming to assist the Council in meeting objectives associated with achieving a diverse economic demographic.

## 341 - Higgins Group

Submission Number: 341 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Name: Alexandra Milne

On Behalf Of Company/Organisation: Higgins Group Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Sustainability appraisal

Under Section 19(5) of the Planning and Compulsory Purchase Act 2004, all Local Planning Authorities
must carry out an appraisal of the sustainability of proposals in each development plan document. Paragraph 165 of the NPPF states “A sustainability appraisal which meets the requirements of the
European Directive [Ref: 2001/42/EC] on strategic environmental assessment should be an integral part of the plan preparation process, and should consider all the likely significant effects on the environment, economic and social factors.”
Paragraph 5.2.25 of the Sustainability Appraisal Report (September 2024) (‘the 2024 SA’) states “there
is a high level case for exploring growth scenarios involving setting the housing requirement above LHN, particularly given latest understanding of unmet housing need within the subregion. A high level
case was similarly acknowledged in 2023, but then higher growth scenarios were ultimately judged to
be unreasonable in light of wider factors (Section 5.5 of the ISA Report). At the current time there is
an opportunity to revisit wider factors (see below) and, in turn, the conclusion (Section 5.5).”

The 2024 does include additional assessment of higher growth scenarios, but these are limited in exploration and do not consider the high potential for alternative sites including those within the Green Belt to come forward as part of the spatial strategy to meet the intense need for housing within
SACDC (see paragraph 5.5.8 in relation to omission sites).
The 2024 SA does recognise the high and unmet housing need, stating at paragraph 5.2.26 that “there
are strategic arguments for setting the housing requirement at a figure both above and below LHN. This leads to an inherent challenge, in respect of preparing the St Albans Local Plan, in the absence of
a higher-level plan to distribute growth across the sub-region.” It goes on to recognise that “there is
an argument for awaiting the outcomes of the South West Herts Joint Strategic Plan. However, this is
not a realistic option. There is a critical need for an up-to-date local plan in order to avoid the risk of
Government intervention and to avoid a continued risk of ‘planning by appeal’.”
The assertion that arguments for higher growth and lower growth scenarios “ultimately cancel each
other out and lead to a strategic argument for setting the housing requirement at precisely LHN” is
unfounded and does not rely on evidence or balanced judgment in selecting the appropriate housing
requirement.
The speed with which the Draft Local Plan has progressed has prevented reasonable consideration of
ways in which to identify and plan for an appropriate housing supply to meet years of unmet need and
results in a plan that is not positively prepared, justified, effective, or consistent with national policy.

**Sustainability Appraisal (SA)**

Natural England Reg 18 comment: *St Alban's Interim Sustainability Appraisal (July 2023) acknowledges at 6.2.67 that 'landscape is a key constraint to growth locally' and that whilst there are no nationally designated landscapes intersecting the District, the north / northwest part of the District is associated with the dip slope of the nearby Chilterns AONB with a pattern of valleys / dry valleys and raised plateaus, giving rise to long distance views and characteristic land uses, such as areas of woodland and common land, as well as characteristic settlement pattern.*

*Given these sensitivities and the complimentary nature of the landscape pattern adjacent to the Chilterns AONB in providing the setting to the AONB, it will be important to have a robust landscape evidence baseline to justify decision making around proposed site allocations within the Local Plan. Whilst the Sustainability Appraisal (SA) makes reference to the sensitivity of the landscape, it is unclear whether a Landscape Sensitivity Study has been carried out to inform the HEELA and Sustainability Appraisal. If a Landscape Sensitivity Study has not been carried out to inform selection of sites, then we strongly recommend that this is carried out to provide a sound and robust evidence base to inform the subsequent iterations of these interim documents, which will eventually form the basis for decision making around where to locate new development within the local plan.*

Having reviewed the Sustainability Appraisal that supports the Regulation 19 consultaion of the St Albans new Local Plan, Natural England is satisfied that there are no reasonable alternatives to the one growth scenario proposed in the SA regarding Hemel Garden Communities (HGC), as the alternatives discussed in the SA would not meet local and district objectives. The concept masterplan has been amended since the Regulation 18 consultation with specific reference to SANG allocation and green space requirements. It is acknowledged in the Sustainability Appraisal that the impact on the Chilterns National Landscape is a key sensitivity/ issue in regard to this

development, however allocation of HGC to the east and northeast of Hemel Hempstead potentially serves to reduce pressure on the part of HGC to the north, which is likely the most sensitive in National Landscape terms. As stated in NE's Regulation 18 response, we would expect such conclusions to be supported by a robust Landscape Visual Impact Assessment. It is acknowledged and welcomed that amendments have been made to wording within the Broad Location allocation of HGC communities to reflect this:

*...be informed by a comprehensitive landscape and Visyual Impact Assessment which addresses the recommendations of the Councils Landscape and Visual Appraisal 2024.*

Natural England is content that the current growth scenario, subject to detailed design of the new SANG in consultation with NE, the aforementioned detailed LVIA and continued consultation with the Chilterns Conservation Board (CCB), will go towards mitigating effects on the National Landscape. It is also acknowledged that four allocations have been removed from the Local Plan due to their likelihood of falling into the revised National Landscape. Again, this is welcomed.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

n/a - We can confirm that we have no concerns regarding the Sustainability Appraisal

### 363 - D'Arblay Investments

Submission Number: 363 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Ceres Property Name: Rory Baker

On Behalf Of Company/Organisation: Name: D'Arblay Investments

Comment Number: 4

**Type:**

* Sustainability Appraisal

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Sustainability Appraisal**

6.14 The Sustainability Appraisal's conclusions regarding the sensitivity and development suitability of sites SAN-02-21 and SAN-02-16 in Sandridge appear overly cautious and may not fully consider the unique characteristics and inherent development potential of these sites. A more nuanced view suggests that their contribution to Green Belt purposes may, in fact, be limited, and that with the right approach, these sites could accommodate sustainable development without compromising the integrity of the Green Belt or local environmental objectives.

6.15 Sandridge's location and existing infrastructure position it well for thoughtful, sustainable growth that aligns with both housing needs and sustainable development objectives. While the SA characterizes Sandridge as a "washed over" village, it may overlook the fact that some of its peripheral areas, like SAN-02-21 and SAN-02-16, are already influenced by surrounding development and urban characteristics. These sites, when assessed independently, exhibit lower sensitivity in terms of openness and separation from nearby urban areas, suggesting that they could serve as logical, modest extensions to the village's built form.

6.16 SAN-02-21's proximity to existing developments and natural boundaries, such as mature hedgerows and treelines, provide strong, defensible edges that naturally limit further urban sprawl. While the SA emphasizes this site's role in preserving openness, these established features arguably contain any potential development effectively, ensuring minimal impact on the wider Green Belt. The site's character could be enhanced with landscape-led design principles, creating a buffer that harmonizes with the surrounding rural landscape while delivering much-needed housing. Additionally, SAN-02-

21's location within reasonable distance of local services and infrastructure supports its potential for sustainable development.

6.17 SAN-02-16 is similarly buffered by natural features that define and contain its perimeter, reducing its visibility and impact on the surrounding countryside. The SA's conclusion that this site contributes to the Green Belt's purpose in safeguarding the countryside may not fully reflect its limited visibility and containment. With sensitive design that emphasizes green infrastructure and low-impact housing, SAN-02-16 could support sustainable growth while respecting the Green Belt's objectives. This approach would balance development needs with the preservation of the area's rural character, fostering a harmonious integration of new housing.

6.18 The SA suggests that both sites significantly contribute to Green Belt purposes, yet neither is situated in a strategic gap between towns nor forms a critical buffer that is central to preventing urban sprawl. Rather, both sites are set within a context of established boundaries, with existing developments providing a natural buffer against further encroachment. Furthermore, by employing sustainable site design, both sites could support a limited, carefully planned expansion of Sandridge, delivering housing that aligns with the Local Plan's aims of promoting sustainable development in well-connected locations.

6.19 In light of SADC's pressing need to address housing shortages, particularly in sustainable, well-connected areas, sites SAN-02-21 and SAN-02-16 present opportunities for carefully managed growth without compromising Green Belt principles. Given Sandridge's proximity to St Albans, modest, landscape-sensitive development on these sites would support the village's role in meeting housing needs while reinforcing its connection to the broader district. This approach would not only serve local housing goals but also bolster Sandridge's viability and vitality.

6.20 In conclusion, a re-evaluation of SAN-02-21 and SAN-02-16, with an emphasis on sustainable, low-impact development strategies, suggests that these sites could make a meaningful contribution to housing supply while respecting Green Belt aims. A development approach that integrates green infrastructure, enhances natural boundaries, and carefully manages density could mitigate perceived impacts on the Green Belt, making these sites viable candidates to address pressing housing needs in Sandridge and beyond.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

5 SUSTAINABILITY APPRAISAL AND SITE SELECTION

St Albans

5.1 The St Albans Local Plan's SA sets a vision prioritising sustainable development, climate action, and community well-being, all while preserving the district's Green Belt and unique environmental assets. Given these aims, sites like SAN-03-21 are scrutinised rigorously to ensure that development aligns with core sustainability objectives. However, SAN-03-21 can still contribute meaningfully to these objectives. Through thoughtful design and planning, Sandpit Lane proposes a landscape-led development that strengthens the Green Belt, minimises environmental disruption, and enhances accessibility and sustainability.

Preferred Growth Scenario (Scenario 3) and Potential for Higher Growth

5.2 The SA's preferred Scenario 3 proposes a modest expansion focused primarily on East St Albans, aiming to balance housing demand with infrastructure capacity. However, St Albans has substantial capacity to accommodate significantly higher levels of housing growth. The existing infrastructure, along with plans for enhanced transit and community services, supports an alternative preferred option with expanded growth to meet acute housing demands.

5.3 Higher growth could support a more resilient local economy, enhance social equity through increased affordable housing provision, and contribute to the council's climate goals by supporting compact, transit-oriented developments that reduce emissions and urban sprawl pressures.

Strategic Omission Sites and Expanded Growth Scenarios

5.4 Current appraised scenarios examine strategic omission sites like Southeast (SE) and North St Albans, but even under high-growth projections, the SA stops short of advocating for full development at both sites. Instead, it presents East St Albans as the primary area for expansion.

5.5 St Albans City, however, is well-placed to support a more integrated growth approach across multiple sites. SE St Albans, with its advantageous location and infrastructure compatibility, can accommodate further growth without disproportionately affecting the Green Belt or local landscape quality. This adjustment would better meet housing needs while spreading development pressures, ensuring sustainable expansion across several areas rather than concentrating growth solely in East St Albans.

Environmental and Landscape Constraints in the Context of Expanded Growth

5.6 While the SA emphasizes Green Belt preservation and landscape sensitivity, St Albans City's ability to integrate green infrastructure and landscape buffers means it can support a higher growth rate with minimal environmental disruption. A refined approach to higher-density developments in designated areas could accommodate increased housing needs while safeguarding sensitive landscapes.

5.7 Instead of limiting development to East St Albans, expanding to SE and potentially North St Albans, with landscape-sensitive planning and Green Belt boundary adjustments, could accommodate housing while still maintaining critical landscape and Green Belt functions. This higher-growth approach should therefore be reappraised as a viable and beneficial preferred option.

Infrastructure and Accessibility Capacity to Support Expanded Growth

5.8 Scenario 3, which emphasizes East St Albans, is infrastructure-compatible, but St Albans' broader transport network can facilitate growth across additional areas. Public transport links, established educational facilities, and healthcare services in St Albans support the case for higher growth, particularly given the district's well-developed transit and community infrastructure.

5.9 By strategically expanding growth into SE and North St Albans, alongside East St Albans, the district can leverage existing infrastructure while fostering self-sufficient, walkable neighborhoods that align with sustainable development goals. Appraising a higher-growth option would allow St Albans City to meet future housing demands comprehensively, reflecting its strategic urban role within the region.

Emissions Reduction and Climate Goals Aligned with Compact Growth

5.10 The SA's preferred scenario aims to limit car dependency and promote active travel. An expanded growth option, however, could better serve these goals by enabling higher-density, transit-oriented developments in well-connected areas of St Albans. The Abbey Line, public transit corridors, and proximity to employment centers mean that expanded growth could reduce per capita emissions while meeting housing needs.

5.11

5.12 Concentrating growth solely in East St Albans overlooks the broader transit and emissions reduction potential across SE and North St Albans. A higher-growth option that integrates these areas would better support climate and accessibility goals, reinforcing St Albans as a compact, low-carbon community.

5.13 While the SA's preferred Scenario 3 offers a modest growth approach, St Albans is well-positioned to support a significantly higher level of housing growth. Appraising an alternative preferred option with increased allocations in SE, North, and East St Albans would align with local infrastructure strengths, address acute housing shortages, and support St Albans' role as a sustainable urban center.

5.14 Expanded growth would also allow for a more equitable distribution of housing and affordable options, supporting community diversity and economic resilience. This higher-growth approach, guided by landscape-sensitive planning, green infrastructure, and transit alignment, should therefore be appraised as a primary alternative to ensure that St Albans meets its full potential as a balanced, thriving district.

Green Belt Constraints and Spatial Strategy

Green Belt considerations anchor the spatial strategy of the SA, aiming to prevent urban sprawl and safeguard St Albans City's character. The SA's low ranking for SAN-03-21 stems from concerns that the site's development might erode the Green Belt. Yet, SAN-03-21 is uniquely positioned to form a discreet, well-contained extension of St Albans. Its natural boundary features and adjacent infrastructure serve as robust buffers, limiting visual impact and preserving the Green Belt's continuity. Pigeon advocates for SAN-03-21's release from the Green Belt, positing that it performs weakly against core Green Belt functions and, if designed thoughtfully, could enhance Green Belt integrity rather than detract from it.

Housing Needs and Affordable Housing Challenges

5.15 St Albans faces a significant housing shortage, exacerbated by high demand for affordable homes. The SA emphasises that sites should meet housing needs while supporting infrastructure and resilience goals. SAN-03-21 meets these objectives directly by proposing up to 200 homes, 40% of which will be affordable. This provision supports local housing requirements and promotes

a socially inclusive community, which can contribute to the local economy by providing housing for essential workers. The development also includes custom and self-build homes, which foster a diverse housing market aligned with community needs. This robust housing offering addresses the SA's concerns around sustainability and equity in housing, while enhancing community vitality.

Climate Change, Flooding, and Environmental Resilience

5.16 Environmental resilience is a top SA priority, particularly regarding flood risks, emissions reduction, and ecological impact. Whilst SAN-03-21's is located within Flood Risk Zone 1 (low risk) and incorporates Sustainable Drainage Systems (SuDS), including swales and attenuation basins to manage surface water on-site. These measures, combined with the green infrastructure strategy that prioritizes biodiversity net gain (exceeding 10%), counteract the SA's concerns by presenting a development approach that enhances both environmental resilience and sustainability.

Preservation of Cultural and Historic Assets

5.17 St Albans' historical and cultural richness is integral to its identity, with the SA closely assessing sites for potential impacts on heritage assets. SAN-03-21 has been considered as less compatible with the preservation goals of the district owing to nearby heritage assets. Pigeon strongly considers that the Site is physically and visually separated from nearby heritage assets, ensuring no adverse impact on the historic environment. By proposing a landscape-sensitive approach, the development at Sandpit Lane can preserve the historic character of St Albans, aligning with the National Planning Policy Framework (NPPF) requirement to "conserve and enhance the historic environment" while accommodating necessary growth.

Accessibility, Transport, and Community Infrastructure

5.18 A site's accessibility to services, schools, healthcare, and transport networks is central to the SA's sustainability framework. Sites supporting active travel and reduced car dependency are prioritised. Pigeon challenge the SA's low accessibility ranking for SAN-03-21 given the Site has excellent connectivity offered at Sandpit Lane: it lies within walking or cycling distance of essential services and is supported by regular public transport options. The proposal includes new pedestrian and cycle routes along Sandpit Lane and Coopers Green Lane, connecting the site to existing transit and infrastructure networks. This connectivity supports active travel, enhances accessibility to local amenities, and aligns with St Albans' ambition to create "15-minute neighbourhoods" that prioritise sustainable living.

Deliverability and Viability

5.19 Pigeon emphasises SAN-03-21's immediate availability for development, positioning it as a viable contributor to the district's urgent housing needs within the early Local Plan period. This commitment to timely delivery aligns with the SA's emphasis on practical, achievable developments that meet housing supply targets.

[Please see attached appendix]

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

5 SUSTAINABILITY APPRAISAL AND SITE SELECTION

St Albans

5.1 The St Albans Local Plan's SA sets a vision prioritising sustainable development, climate action, and community well-being, all while preserving the district's Green Belt and unique environmental assets. Given these aims, sites like SAN-03-21 are scrutinised rigorously to ensure that development aligns with core sustainability objectives. However, SAN-03-21 can still contribute meaningfully to these objectives. Through thoughtful design and planning, Sandpit Lane proposes a landscape-led development that strengthens the Green Belt, minimises environmental disruption, and enhances accessibility and sustainability.

Preferred Growth Scenario (Scenario 3) and Potential for Higher Growth

5.2 The SA's preferred Scenario 3 proposes a modest expansion focused primarily on East St Albans, aiming to balance housing demand with infrastructure capacity. However, St Albans has substantial capacity to accommodate significantly higher levels of housing growth. The existing infrastructure, along with plans for enhanced transit and community services, supports an alternative preferred option with expanded growth to meet acute housing demands.

5.3 Higher growth could support a more resilient local economy, enhance social equity through increased affordable housing provision, and contribute to the council's climate goals by supporting compact, transit-oriented developments that reduce emissions and urban sprawl pressures.

Strategic Omission Sites and Expanded Growth Scenarios

5.4 Current appraised scenarios examine strategic omission sites like Southeast (SE) and North St Albans, but even under high-growth projections, the SA stops short of advocating for full development at both sites. Instead, it presents East St Albans as the primary area for expansion.

5.5 St Albans City, however, is well-placed to support a more integrated growth approach across multiple sites. SE St Albans, with its advantageous location and infrastructure compatibility, can accommodate further growth without disproportionately affecting the Green Belt or local landscape quality. This adjustment would better meet housing needs while spreading development pressures, ensuring sustainable expansion across several areas rather than concentrating growth solely in East St Albans.

Environmental and Landscape Constraints in the Context of Expanded Growth

5.6 While the SA emphasizes Green Belt preservation and landscape sensitivity, St Albans City's ability to integrate green infrastructure and landscape buffers means it can support a higher growth rate with minimal environmental disruption. A refined approach to higher-density developments in designated areas could accommodate increased housing needs while safeguarding sensitive landscapes.

5.7 Instead of limiting development to East St Albans, expanding to SE and potentially North St Albans, with landscape-sensitive planning and Green Belt boundary adjustments, could accommodate housing while still maintaining critical landscape and Green Belt functions. This higher-growth approach should therefore be reappraised as a viable and beneficial preferred option.

Infrastructure and Accessibility Capacity to Support Expanded Growth

5.8 Scenario 3, which emphasizes East St Albans, is infrastructure-compatible, but St Albans' broader transport network can facilitate growth across additional areas. Public transport links, established educational facilities, and healthcare services in St Albans support the case for higher growth, particularly given the district's well-developed transit and community infrastructure.

5.9 By strategically expanding growth into SE and North St Albans, alongside East St Albans, the district can leverage existing infrastructure while fostering self-sufficient, walkable neighborhoods that align with sustainable development goals. Appraising a higher-growth option would allow St Albans City to meet future housing demands comprehensively, reflecting its strategic urban role within the region.

Emissions Reduction and Climate Goals Aligned with Compact Growth

5.10 The SA's preferred scenario aims to limit car dependency and promote active travel. An expanded growth option, however, could better serve these goals by enabling higher-density, transit-oriented developments in well-connected areas of St Albans. The Abbey Line, public transit corridors, and proximity to employment centers mean that expanded growth could reduce per capita emissions while meeting housing needs.
5.11

5.12 Concentrating growth solely in East St Albans overlooks the broader transit and emissions reduction potential across SE and North St Albans. A higher-growth option that integrates these areas would better support climate and accessibility goals, reinforcing St Albans as a compact, low-carbon community.
5.13 While the SA's preferred Scenario 3 offers a modest growth approach, St Albans is well-positioned to support a significantly higher level of housing growth. Appraising an alternative preferred option with increased allocations in SE, North, and East St Albans would align with local infrastructure strengths, address acute housing shortages, and support St Albans' role as a sustainable urban center.
5.14 Expanded growth would also allow for a more equitable distribution of housing and affordable options, supporting community diversity and economic resilience. This higher-growth approach, guided by landscape-sensitive planning, green infrastructure, and transit alignment, should therefore be appraised as a primary alternative to ensure that St Albans meets its full potential as a balanced, thriving district.

Green Belt Constraints and Spatial Strategy
Green Belt considerations anchor the spatial strategy of the SA, aiming to prevent urban sprawl and safeguard St Albans City's character. The SA's low ranking for SAN-03-21 stems from concerns that the site's development might erode the Green Belt. Yet, SAN-03-21 is uniquely positioned to form a discreet, well-contained extension of St Albans. Its natural boundary features and adjacent infrastructure serve as robust buffers, limiting visual impact and preserving the Green Belt's continuity. Pigeon advocates for SAN-03-21's release from the Green Belt, positing that it performs weakly against core Green Belt functions and, if designed thoughtfully, could enhance Green Belt integrity rather than detract from it.

Housing Needs and Affordable Housing Challenges
5.15 St Albans faces a significant housing shortage, exacerbated by high demand for affordable homes. The SA emphasises that sites should meet housing needs while supporting infrastructure and resilience goals. SAN-03-21 meets these objectives directly by proposing up to 200 homes, 40% of which will be affordable. This provision supports local housing requirements and promotes a socially inclusive community, which can contribute to the local economy by providing housing for essential workers. The development also includes custom and self-build homes, which foster a diverse housing market aligned with community needs. This robust housing offering addresses the SA's concerns around sustainability and equity in housing, while enhancing community vitality.

Climate Change, Flooding, and Environmental Resilience
5.16 Environmental resilience is a top SA priority, particularly regarding flood risks, emissions reduction, and ecological impact. Whilst SAN-03-21's is located within Flood Risk Zone 1 (low risk) and incorporates Sustainable Drainage Systems (SuDS), including swales and attenuation basins to manage surface water on-site. These measures, combined with the green infrastructure strategy that prioritizes biodiversity net gain (exceeding 10%), counteract the SA's concerns by presenting a development approach that enhances both environmental resilience and sustainability.

Preservation of Cultural and Historic Assets
5.17 St Albans' historical and cultural richness is integral to its identity, with the SA closely assessing sites for potential impacts on heritage assets. SAN-03-21 has been considered as less compatible with the preservation goals of the district owing to nearby heritage assets. Pigeon strongly considers that the Site is physically and visually separated from nearby heritage assets, ensuring no adverse

impact on the historic environment. By proposing a landscape-sensitive approach, the development at Sandpit Lane can preserve the historic character of St Albans, aligning with the National Planning Policy Framework (NPPF) requirement to “conserve and enhance the historic environment” while accommodating necessary growth.

Accessibility, Transport, and Community Infrastructure
5.18 A site’s accessibility to services, schools, healthcare, and transport networks is central to the SA’s sustainability framework. Sites supporting active travel and reduced car dependency are prioritised. Pigeon challenge the SA’s low accessibility ranking for SAN-03-21 given the Site has excellent connectivity offered at Sandpit Lane: it lies within walking or cycling distance of essential services and is supported by regular public transport options. The proposal includes new pedestrian and cycle routes along Sandpit Lane and Coopers Green Lane, connecting the site to existing transit and infrastructure networks. This connectivity supports active travel, enhances accessibility to local amenities, and aligns with St Albans’ ambition to create “15-minute neighbourhoods” that prioritise sustainable living.

Deliverability and Viability
5.19 Pigeon emphasises SAN-03-21’s immediate availability for development, positioning it as a viable contributor to the district’s urgent housing needs within the early Local Plan period. This commitment to timely delivery aligns with the SA’s emphasis on practical, achievable developments that meet housing supply targets.

## 5 SUSTAINABILITY APPRAISAL AND SITE SELECTION

### St Albans

5.1 The St Albans Local Plan's SA sets a vision prioritising sustainable development, climate action, and community well-being, all while preserving the District's Green Belt and unique environmental assets. Given these aims, sites like SA-16-21are scrutinised rigorously to ensure that development aligns with core sustainability objectives. However, SA-16-21 can still contribute meaningfully to these objectives. Through thoughtful design and planning, Land north of Batchwood Drive proposes a landscape-led development that strengthens the Green Belt, minimises environmental disruption, and enhances accessibility and sustainability.

**Preferred Growth Scenario (Scenario 3) and Potential for Higher Growth**

5.2 The SA's preferred Scenario 3 proposes a modest expansion focused primarily on East St Albans, aiming to balance housing demand with infrastructure capacity. However, St Albans City has substantial capacity to accommodate significantly higher levels of housing growth. The existing infrastructure, along with plans for enhanced transit and community services, supports an alternative preferred option with expanded growth to meet acute housing demands.

5.3 Higher growth could support a more resilient local economy, enhance social equity through increased affordable housing provision, and contribute to the council's climate goals by supporting compact, transit-oriented developments that reduce emissions and urban sprawl pressures.

**Strategic Omission Sites and Expanded Growth Scenarios**

5.4 Current appraised scenarios examine strategic omission sites like west of St Albans City, but even under high-growth projections, the SA stops short of advocating for full development at both sites. Instead, it presents East St Albans as the primary area for expansion.

5.5 St Albans City, however, is well-placed to support a more integrated growth approach across multiple sites. West St Albans, with its advantageous location and infrastructure compatibility, can accommodate further growth without disproportionately affecting the Green Belt or local landscape quality. This adjustment would better meet housing needs while spreading development pressures,

ensuring sustainable expansion across several areas rather than concentrating growth solely in East St Albans.

**Environmental and Landscape Constraints in the Context of Expanded Growth**

5.6 While the SA emphasizes Green Belt preservation and landscape sensitivity, St Albans City's ability to integrate green infrastructure and landscape buffers means it can support a higher growth rate with minimal environmental disruption. A refined approach to higher-density developments in designated areas could accommodate increased housing needs while safeguarding sensitive landscapes.

5.7 Instead of limiting development to East St Albans, expanding to west / north west St Albans, with landscape-sensitive planning and Green Belt boundary adjustments, could accommodate housing while still maintaining critical landscape and Green Belt functions. This higher-growth approach should therefore be reappraised as a viable and beneficial preferred option.

**Infrastructure and Accessibility Capacity to Support Expanded Growth**

5.8 St Albans' broader transport network can facilitate growth across additional areas. Public transport links, established educational facilities, and healthcare services in St Albans support the case for higher growth, particularly given the district's well-developed transit and community infrastructure.

5.9 By strategically expanding growth into west and north west St Albans, alongside East St Albans, the district can leverage existing infrastructure while fostering self-sufficient, walkable neighbourhoods that align with sustainable development goals. Appraising a higher-growth option would allow St Albans City to meet future housing demands comprehensively, reflecting its strategic urban role within the region.

**Emissions Reduction and Climate Goals Aligned with Compact Growth**

5.10 The SA's preferred scenario aims to limit car dependency and promote active travel. An expanded growth option, however, could better serve these goals by enabling higher-density, transit-oriented developments in well-connected areas of St Albans. The Abbey Line, public transit corridors, and proximity to employment centers mean that expanded growth could reduce per capita emissions while meeting housing needs.

5.11 Concentrating growth solely in East St Albans overlooks the broader transit and emissions reduction potential across west and north west St Albans. A higher-growth option that integrates these areas would better support climate and accessibility goals, reinforcing St Albans as a compact, low-carbon community.

5.12 While the SA's preferred Scenario 3 offers a modest growth approach, St Albans City is well-positioned to support a significantly higher level of housing growth. Appraising an alternative preferred option with increased allocations in west, north west and East St Albans would align with local infrastructure strengths, address acute housing shortages, and support St Albans' role as a sustainable urban center.

5.13 Expanded growth would also allow for a more equitable distribution of housing and affordable options, supporting community diversity and economic resilience. This higher-growth approach, guided by landscape-sensitive planning, green infrastructure, and transit alignment, should therefore be appraised as a primary alternative to ensure that St Albans meets its full potential as a balanced, thriving district.

**SA-16-21 – Land Northwest of Batchwood Drive**

**Green Belt Constraints and Spatial Strategy**

4.18 The spatial strategy of the Sustainability Appraisal (SA) for the St Albans Local Plan prioritizes Green Belt preservation to limit urban sprawl and retain the district's character. Site SA-16-21 is evaluated within the broader sub-area SA-16, assessed as making a "moderate" Green Belt contribution. However, this general evaluation does not account for the nuanced features of this specific site. SA-16-21, for example, possesses natural boundary elements and surrounding infrastructure that could allow for a well-contained, minimal-impact extension to the urban area,

preserving Green Belt continuity while fulfilling local housing needs. Releasing these sites from the Green Belt, especially if landscape-led boundaries are applied, would align with the Green Belt's core purposes and meet spatial strategy objectives effectively.

**Housing Needs and Affordable Housing Challenges**

4.19 St Albans has significant housing needs, particularly for affordable homes, which are inadequately met due to high demand and limited availability. The SA prioritizes development sites that can contribute substantially to local housing and infrastructure goals. SA-16-21 is well-situated to

support these priorities. If designated for development, this site could deliver a significant proportion of affordable homes alongside market-rate housing, meeting local demand and contributing to a balanced, inclusive community. Such housing provision would also help retain essential workers within the district, enhancing economic and social resilience in line with the SA's objectives.

**Climate Change, Flooding, and Environmental Resilience**

4.20 Building resilience against climate change, flooding, and ecological impact is a key priority of the SA. Site SA-16-21 is situated within Flood Zone 1, presenting a low flood risk. Development on this site could incorporate Sustainable Drainage Systems (SuDS), such as swales and attenuation basins, to manage surface water effectively, enhancing resilience to flooding. Further, by committing to a green infrastructure strategy that exceeds the 10% biodiversity net gain target, this site could directly address SA concerns around sustainability and environmental enhancement.

**Preservation of Cultural and Historic Assets**

4.21 St Albans' historical character is crucial to its identity, and the SA assesses the Site for potential impacts on nearby heritage assets. For site SA-16-21, any development approach would need to be sensitive to local heritage, with design solutions ensuring minimal visibility from nearby historic areas. The Site offers the opportunity to implement a landscape and design-led approach that preserves the visual integrity of St Albans' historic environment, aligning with the NPPF's mandate to "conserve and enhance the historic environment" while accommodating necessary growth.

**Accessibility, Transport, and Community Infrastructure**

4.22 The SA emphasizes site accessibility to essential services, schools, healthcare, and transport options as part of its sustainability framework. SA-16-21 benefits from proximity to key infrastructure, enabling residents to access services within a short walk or cycle. With planned improvements to pedestrian and cycling paths, this Site would align with the district's vision for 15-minute neighbourhoods, encouraging sustainable living, reducing car dependence, and supporting active travel options.

**Deliverability and Viability**

4.23 The deliverability of Site SA-16-21 makes it a strong candidate for early delivery within the Local Plan period, given its immediate availability and minimal constraints to development. Early delivery from this Site would contribute meaningfully to St Albans' housing targets and reflect the SA's emphasis on practical, achievable development that addresses both immediate and long-term housing needs.

[Please see attached appendices]

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## 5 SUSTAINABILITY APPRAISAL AND SITE SELECTION

### St Albans

5.1 The St Albans Local Plan's SA sets a vision prioritising sustainable development, climate action, and community well-being, all while preserving the District's Green Belt and unique environmental assets. Given these aims, sites like SA-16-21are scrutinised rigorously to ensure that development aligns with core sustainability objectives. However, SA-16-21 can still contribute meaningfully to these objectives. Comment Number: 12

### Type:

* Sustainability Appraisal

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

[Please see attachment for full submission]

We see the follow extracts [paras 5.4.38, 5.4.42, 5.4.50, 5.5.8] the AECOM SR to be flawed or failing given our responses about the evidence base above.

Page 22. In the great majority of cases sites were sifted-out through the HELAA due to availability concerns or due to being too small. Just nine sites were sifted out due to suitability concerns (flood risk in six instances, and heritage impact in three)

- **Transport -** key factors are: A) there is not support for lower growth, nor for high growth at St Albans; B) there is a modest degree of support for removing smaller allocations at lower tier settlements; and C) there is a preference for SE St Albans over expanded **North St Albans.** With regards to significant effects, the ISA Report (2023) concluded a 'moderate or uncertain positive effect' for the preferred approach at that time, and there is now greater confidence in this conclusion in light of consultation responses received and ongoing work to explore transport issues and opportunities, including transport modelling work and detailed work to explore the potential for growth to deliver targeted enhancements to the District's active travel network. However, it is not possible to predict 'significant' positive effects given ongoing work and because inherent challenges remain locally, given the densely populated nature of the south of the District (also noting recent sites unexpectedly gaining permission at appeal) and given inherent transport challenges at Harpenden (including noting likely future expansion of Luton Airport).

**North St Albans** and NE Harpenden — are the two largest strategic allocations other than HGC, and **neither site is** `recommended' by the Green Belt Review (2023). such that there must close scrutiny of their potential to deliver infrastructure benefits. Neither site will deliver a secondary school, but there is no clear need for one at either location; also, NE Harpenden benefits from being located near-adjacent to a secondary school with capacity (indeed, one delivered only in recent years). Both sites will deliver a primary school and a local centre, as well as other targeted infrastructure benefits.

- **Other strategic allocations - North St Albans** is beyond easy walking distance of the town centre and train station but is located on good bus route (and East St Albans is near a good bus route; indeed. these are the two key routes locally) and there are opportunities for upgrades to cycling infrastructure. West of London Colney is in good proximity to the local centre and

schools, plus delivering a new secondary school will help to reduce the distance that students need to travel to school and, in turn, help with peak time traffic congestion (although there are concerns around school traffic affecting London Colney). A benefit of NE Harpenden is its proximity to a recently delivered secondary school, although school traffic in combination with traffic relating to housing growth is a matter for further consideration.

**- North St Albans —**the southern extent is notably constrained by Long Spring LWS (ancient woodland), which is associated with a public footpath and potentially serves a role in terms of functional connectivity between habitat patches at a landscape scale. Also, Sandridgebury Lane cuts through the site, which is associated with historic hedges. On the other hand, growth here would be in close proximity to Heartwood Forest, such that it could potentially contribute to targeted enhancements.

9.4.4 In conclusion, a broadly **neutral effect** is predicted on the baseline, accounting for established objectives. There is a case for predicting positive effects given: certain site-specific opportunities, growth broadly directed in support of two key opportunity areas, namely Heartwood Forest and the series of country parks set to be delivered alongside the Government permitted SRFI; and support for HGC, which is subject to limited constraint (assuming effective SANG) such that it is supported in biodiversity terms (as it will take the pressure of more sensitive areas). However, a number of the proposed non-strategic allocations are subject to significant onsite or adjacent constraint (primarily locally designated habitat or non-designated priority habitat), and there are also some notable constraints affecting two of the strategic urban extensions, namely **NortWStAlbanS** and NE Harpenden (but strategic sites give rise to a good opportunity to avoid and mitigate impacts through masterplanning etc). Also, growth could potentially be directed with a clearer focus on realising strategic green / blue infrastructure opportunities (e.g. river corridors).

- **Active travel —**this is a focus of discussion under other headings, but also warrants mention here, as access to active travel infrastructure (linking to key destinations) is important for good health, and new / upgraded infrastructure is a key means of achieving `planning gain' to the benefit of existing community.

The District has a very good existing network, including cycle routes along two former train lines, and this network has been a key factor influencing site selection. HGC and East Redbourn are located on the Nickey Line, and Glinwells (east of St Albans) is also located on an offroad cycle route. Other urban extensions **with clear** potential to deliver strategic upgrades to cycle infrastructure include NW Harpenden. **North St Albans** and Harper Lane; however, the site proformas for numerous other proposed allocations also identify active travel routes that should be a focus of developer contributions. Overall, there is confidence that a strategic / targeted approach is proposed to realising key opportunities.

- **Green Belt —**warrants mention here as an issue that can clearly generate a high degree of interest / concern amongst local residents. The contribution of land to the defined purposes of the Green Belt has been a major factor influencing the progression of sites to the reasonable growth scenarios; however, and as discussed in Section 5.4, HGC and four of the eight proposed strategic urban extensions are not supported in full by the Green Belt Review (although HGC is supported in part, as is NE Harpenden).

However, in each case the decision to 'depart' somewhat from the Green Belt Review is on account of wider factors including opportunities to secure infrastructure and wider benefits, and there is a need to consider these sites in context, i.e. mindful that non-allocation would result in increased pressure for growth elsewhere. Also, it is notable that all four sites featured in the previous version of the St Albans Local Plan (withdrawn in 2020), such that they have been the focus of a considerable amount of consultation over the years (with **North St Albans** perhaps standing out as generating local concern).

- Other strategic allocations (i.e. all other than East St Albans, which is discussed in Section 6) —

- Sites subject to limited constraint are — North St Albans (although historic Sandridgebury Lane passes through the site, and is likely a popular route linking to historic Sandridgebury and Sandridge); Glinwell (east of St Albans), which is a previously developed site, and where the possibility of increasing appreciation of the Grade II listed former station house at its southern extent might be envisaged (the glasshouses are not thought to have significant heritage value, unlike elsewhere in the sub-region); and Harper Lane (to the north of Radlett), which is distant from the historic core of Radlett, although a consideration is the proximity of the former Harperbury estate to the east.

- Other strategic allocations (i.e. all other than East St Albans, which is discussed in Section 6) — only North St Albans has been surveyed, with the finding being that the site comprises mainly grade 3a land.

Landscape Chapter 9

- North St Albans - Sandridgebury Lane follows a shallow valley, with higher ground to the south (Bernard's Heath, now within the St Albans urban area) and to the north (Childwick Green and the Heartwood Forest). This arguably lends a degree of support for growth in this area, from a landscape perspective, and there is also a need to factor-in the adjacent site with planning permission for 150 homes. There is also a need to note the urbanising influence of the Porters Wood industrial area to the south; however, on the other hand, there is an argument to suggest that the industrial area, along with its two valued linear woodlands (Beech Bottom and Long Spring) and nearby St Albans Girls School, represents an appropriate northern extent to the St Albans urban area, from a landscape perspective. There is also a need to note the public right of way following Long Spring, which is likely to be a popular walking route linking St Albans to the Heartwood Forest. It appears to be the case that the footpath partly follows Sandridgebury Lane, hence increased traffic should be avoided.

*Table 9.1: Key findings of the Modal Shift Study (2024)*

[Please see attachment for Table]

— North St Albans – does not give rise to any clear transport concern, given good connectivity to a toptier settlement, plus reasonable connectivity to key destinations outside of the District. However, the train station is a 42 minute walk, opportunities appear fairly limited – primarily relating to enhanced cycle connectivity and support for key bus services – and the site is distant from the key A414 corridor.
A particular opportunity is in respect of a new cycle route along the A1081 between St Albans and Harpenden, which is a priority within the St Albans LCWIP. The LCWIP discusses the cost of St Albans – Harpenden A1081 cycle infrastructure upgrades as being in the region of £15m, which is more than the funding available for the whole of Hertfordshire through the Government's Active Travel Fund for the period 2020-2023. This serves to highlight the important of developer funding (S106). Also, with regards to the A1081 as a cycle corridor, it is noted that the Harpenden Neighbourhood Plan states:
*"St Albans City and District Council has provided a shared surface cycle and pedestrian route along the edge of the A1081. However, this route is limited in width and many cyclists use the road instead. A separate cycle route could provide a popular route in a similar style to the Nickey Line..."*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**
