### 114 - Hertfordshire County Council - Property Team

Submission Number: 114 Submission Date: 06/11/24 23:21

Respondent: Company/Organisation: Vincent + Gorbing Name: George Sellers

On Behalf Of Company/Organisation: Hertfordshire County Council - Property Team Name:

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

- Hertfordshire County Council Children's Services has revised its forecasts for the long-term requirements for a primary school in the north area of St Albans, concluding that the provision of a new primary school at the Ariston Works site is no longer required.
- This policy as currently written is not consistent with national policy or local need, thus enabling the delivery of sustainable development. The below suggested wording is intended to address this.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

- It is requested that reference to Ariston Works as a site to meet long term need for a new primary school is removed from criterion (e) in light of the revised forecasts published by HCC.
- It is also requested that the 'blue dot' currently placed on the Pioneer Club building within the Ariston Works site on the Proposals Map is removed.
- Further details are set out within Chapter 4 of the attached document.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. SADC Reg 19 Oct 2024 Reps FV3 w apps_compressed_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

It is considered that the requested amendments would be best discussed in the forum of the EiP given the opposing stances currently being taken by SADC and HCC as service provider.

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Support is offered for the requirement in criterion b for indoor and outdoor sports facilities in new schools in the Broad Locations to serve a community joint use function and for access to be secured through community use agreements. This requirement would accord with the Council's evidence base (Playing Pitch Strategy (see strategic recommendations b and c of the strategy)) and paragraph 97a of the NPPF.

Support is offered for the identification in criterion g of the policy (and on the Proposals Map) of a Sports and Community Zone at Oaklands College. As well as meeting the college's need for additional sports facilities, this will offer potential for meeting needs for additional community outdoor sports provision (especially football pitches) identified in the Council's evidence base for sport (Playing Pitch Strategy). The requirement for community use of sports facilities and playing pitches to be secured by an appropriate mechanism is welcomed as this would offer some certainty that any new facilities that are provided will have community access secured over a long term period. The inclusion of criterion g would therefore be considered to be a positive response to the community sports facility needs identified in the evidence base and would align with the approach advocated by paragraph 102 of the NPPF.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

## 183 - McCarthy & Stone Retirement Lifestyles Ltd, Jarvis Homes, and Wheathampstead Land

Non compliance with national policy

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

**COM1 – Education (Chapter 7)**

Policy COM 1 requires at point a) that '*Major residential development will be required to make appropriate provision for new schools and early years facilities either on-site or by making a suitable contribution towards the improvement or expansion of nearby existing facilities*.

To ensure the plan is in accordance with NPPF para 57 that states '*Planning obligations must only be sought where they meet all of the following tests: a) necessary to make the development acceptable in planning terms, b) directly related to the development; and c) fairly and reasonably related in scale and kind to the development'*, the policy should exempt all older people's housing from education contributions. Older People's housing by its very nature and age of residents does not create a demand for education.

**Recommendation:**

For the plan to be consistent with national policy and effective the following text should be added to policy COM 1:

***'Older person's housing schemes are exempt from providing education contributions.'***

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

6.11 We support the provision for major development to make appropriate provision for education facilities, either on-site or through contributions. This includes new provision within Broad Locations.

6.12 Criterion b) requires school associated sports facilities to "serve a community joint use function" and now sees additional text which specifies that "*access must be secured through community use agreements*". There is further additional text which states: "*The provision of playing pitches for community use will be required at new primary and secondary schools*".

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

6.13 Whilst the principle of these requirements is supported, this needs to be considered on a site-by-site basis with Hertfordshire County Council as the Education Authority as there may be different needs for different areas depending upon capacities and other facilities in the nearby area. This is also considered the same for criterion c) which requires allocated school sites reserved for state funded schools. In both cases, flexibility should be built into the policy to recognise the requirements are subject to discussion and agreement with the Education Authority who may have different priorities and needs compared to St Albans City and District Council.

## 273 - Hallam Land Management and St Albans School

Submission Number: 273 Submission Date: 08/11/24 09:33

Respondent: Company/Organisation: LRM Planning Name: Mr Owen Jones

On Behalf Of Company/Organisation: Hallam Land Management and St Albans School Name:

Comment Number: 6

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

8.7 Hallam and St Albans School continue to support the principle of providing sports facilities as part of a new school. Whilst it is agreed that these facilities can in some circumstances also serve a community function, ultimately this will be a matter for the Local Education Authority to decide. Hallam and St Albans School have no in principle objection to this secondary use of the school facilities, but are of the view that the District Council cannot oblige a developer to ensure this is met.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

It is therefore suggested that the following sentences are removed from COM1(b):

“The associated indoor and outdoor sports facilities should serve a community joint function” and

*“The provision of playing pitches for community use will be required at new primary and secondary schools”.*

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraph 35 and 36 of the 2023 NPPF require that local plans be positively prepared to be considered sound. To do so its policies must set out a strategy to meet the assessed needs of the area.

HCC has a statutory duty to secure sufficient early years provision under the Childcare Acts 2006 and 2016. This includes, but is not limited to, provision within day nurseries for 0-2 year olds, school nursery classes for 3-4 year olds, and school wraparound care for 5-11 year olds. HCC must therefore ensure sufficiency for all three early years cohorts that tend to receive care in different types of settings.

The 2023 Spring Budget increased parents' access to entitlement for early years support for all children under 3 by September 2025 and sets an expectation that all parents should be able to expect wraparound care by September 2026. This means that the plan needs to make sufficient provision for all of these early years cohorts (0-2, 3-4, and 5-11), with 0-2 being a particular area of need as these are often provided in private day nurseries rather than school settings.

The Regulation 19 draft plan includes childcare facilities within the list of land uses within some broad locations within the supporting text at Part A table 3.1. This follows engagement with HCC at Regulation 18 stage and is welcome. However, policy in Part B does not require that these be provided within the corresponding allocations themselves. While policy wording in Part B does include reference to early years provision within new primary schools for those sites that are delivering new primary schools, these only tend to provide care to 3-4 and 5-11 year olds and not 0-2 year olds. Therefore HCC does not have certainty that the strategy for sufficient early years for 0-2 year olds will be delivered.

Policy COM1 gives policy support to proposals delivering childcare for 0-2 year olds and nursery for 3-4 year olds. This is strongly welcomed. However this is not the only childcare cohort. As part of its statutory sufficiency duty HCC must also ensure sufficient wraparound care for 5-11 year olds. Similarly, policy strategic policy SP7 gives policy support to proposals including nursery provision, which could be taken that only proposals for provision for 3-4 year olds should be given policy weight (as this can refer only this is cohort in some contexts). Again while policy support is welcome, it should ensure that policy support is given to the full range of settings for different age groups.

To be considered positively prepared and therefore sound the local plan should therefore set out a strategy for childcare provision in the allocations in Part B and clarify policy support for all childcare cohorts in the policies at Part A. This representation suggests a modification that if agreed, or similar, would make the plan sound.

Paragraph 35 and 36 of the 2023 NPPF require that local plans be justified to be considered sound. To do so its policies must be appropriate for the outcomes that they intend to secure.

Policy wording at Part B allocations B1 and B2 states that the primary schools delivered within these allocations should include an all weather pitch (AWP). Part A policies COM1 and COM3 also states that all school should come with a Community Use Agreement (CUA) securing community access to new playing pitches.

It is not clear what the intention of this policy is and therefore what it requires HCC and SACDC (as the authority with sports and leisure responsibilities) to deliver on site. An AWP usually refers to a pitch with artificial grass (an AGP) that can be used more intensively than natural turf. An AGP

is not required to deliver a school curriculum, and so are not usually included on a primary school site alongside other enhanced facilities that are needed to enable community use like floodlights, changing rooms, and showers. Moreover, to be usable by a primary school, an AGP would have to be an appropriate size for a school (a junior pitch) rather than for community use (an adult pitch) if that is what is intended. Conversely an AWP could refer to a multi-use games area (MUGA) which is a painted macadam surface enabling multiple sports. While these are provided as standard they too lack enhanced facilities like fencing that are required to enable community use.

Moreover, the requirement at Part A policies COM1 and COM3 for a CUA on all new schools could be interpreted as to require all new schools – not just those at sites B1 and B2 – to have some form of enhanced facilities to enable community access, as the facilities provided on a standard school site will not, on their own, meet the standards required to enable community use, as described above. As facilities on school sites must first and foremost enable a school curriculum, community access will be limited in practice if enhanced facilities are not provided: natural turf pitches would need time to recover outside of school hours to be usable for school PE lessons and the absence of floodlighting limits use in the evening in winter. This reading therefore contradicts the allocations at Part B.

The plan does not include a coherent strategy for the funding and delivery of enhanced facilities on school sites where they are required. Part B allocation B2 does explicitly state that the site should provide contributions for an all-weather pitch, but this wording is not included in allocation B1. The Infrastructure Delivery Plan schedule identifies AWPs generally as a need arising from all Broad Locations to meet the District's sports and leisure duties (and identifies the LPA as the funding body), including on sites B1 and B2 (reference 35 and 36). However, it only lists this as 'desirable', and identifies only that the need attributable to development only justifies a fraction of the overall cost. This means there is a risk that policy could require something that is only partially funded and therefore undeliverable in practice.

To be considered appropriate and therefore sound the local plan should therefore clarify first the intention of Part A policies COM1 and COM3 as to whether it requires all schools to have an AWP to satisfy the CUA requirement and secondly clarify the delivery and funding mechanism for AWPs on schools where they are provided (whether just on sites B1 or B2 or all new schools) to meet the Districts sports and leisure requirement rather than an education need. This representation suggests modifications that if agreed, or similar, would make the plan sound.

To be considered sound the plan must be justified and therefore a reasonable strategy based on evidence.

Previous drafts of the St Albans plan, including the Regulation 18 draft, have referred to a primary school at Ariston to meet a preexisting shortfall in places within the St Albans settlement. The regulation 19 draft refers to this on the policies map as a dot without a fixed boundary and within Part A policy COM1 which states:

1. *e) St Albans is an area of high primary school need and with growth there will likely be a long term need for the provision of a new primary school. A site has been identified at the former Ariston site. St Albans has an identified need for a new secondary school in the long term. A site has been identified at East St Albans near Oaklands College.*

While the LPA's support for school provision is welcomed, the preexisting shortfall that justified this allocation in the past no longer exists. As per HCC's education statement, the demand arising from growth in St Albans settlement can be met through the delivery of new schools at East St Albans and North St Albans broad locations, with a balance met through expansions of existing schools and through existing capacity in the area.

To be considered sound the plan should therefore remove the Ariston primary school from Part A policy COM1 and the policies map.

To be considered sound the plan must be effective and therefore have a reasonable prospect of delivery.

The site allocations at Part B correctly requires proposals for development to include land and s106 contributions towards the delivery of several primary and secondary schools. This is necessary to satisfy the requirement of NPPF paragraph 99 and HCC strongly appreciates the support that the LPA have placed on sufficient education provision.

HCC's *Guide to Developer Infrastructure Contributions* and its technical appendices sets out how land and contributions need to be made to ensure that schools are deliverable. Proposals for sites providing schools need to make serviced land available to the County Council (at education values) and make a proportionate s106 contribution towards delivery in accordance with the CIL regulations. Other sites will make a proportionate s106 contribution. These will be pooled to deliver schools when they are required to meet a cumulative need.

Policy in the Part B site allocations includes delivery of the following (or a similar form of words depending on the allocation):

A 3FE primary school, including Early Years provision, to serve the new community.

Or, in relation to secondary schools:

A site for, and appropriate contributions towards, an 8FE secondary school site within nearby Oaklands land ownership fronting onto Hatfield Road.

These examples' policy wording implicitly limits the deliverability of the schools:

1. It sets a hard target of the capacity of the school, which would limit the schools' ability to open in phases, which is necessary to align supply of places to demand as it builds up over time;
2. It implies in some allocations that schools sought to be developer-built, which is not the County Council's preferred method of school delivery; and
3. In some allocations policy seeks to allocate contributions towards secondary schools for which the land will not be delivered through a s106 process and will instead be delivered as an acquisition later in or following the plan period to meet a cumulative need. Tying the s106 contribution to these secondary schools therefore risks the delivery of other projects needed earlier in the plan period.

The County Council also has a responsibility to ensure sufficient post-16 education, and in Hertfordshire these are usually provided at secondary school 6th forms. The County Council's strategy for post-16 education therefore includes the delivery of 6th forms at new secondary schools and secondary school expansions. For completeness, policy should also refer to 6th form provision as this has a similar relationship to new secondary education provision as early years does to new primary education provision, and the exclusion could therefore inadvertently give the impression that one does not have policy support.

HCC also supports the principle of the plan's support for secondary education in principle. However, since the publication of the Regulation 18 plan, the strategy for East St Albans has changed and the site is now only expected to deliver a 6FE school.

Therefore to be deliverable and therefore considered sound the plan should clarify the maximum capacity of schools, that schools in the first instance should not be developer-built, and that s106 contributions for individual sites should not be tied to school sites that are needed to meet a long term cumulative need. The local plan should also ensure that post-16 education has full support within new secondary schools.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To be considered sound the local plan should:

1. Allocate land within broad locations for childcare provision (primarily relating to 0-2 year olds)
2. Clarify that childcare provision needs to be made for all three age groups

Firstly, the local plan should set out a strategy for childcare for 0-2 year olds in the allocations at Part B in addition to provision for 3-4 and 5-11 year olds at new and expanded primary schools. This would ensure that there is a reasonable prospect of there being sufficient provision for this cohort when sites are delivered.

Policy in allocations H1 and H2 should each include:

*A childcare setting capable of providing 30 places including 0-2 year olds.*

Policy in allocations H4 should each include:

*A childcare setting capable of providing 50 places including 0-2 year olds.*

Policy in allocations B3 should include:

*A childcare setting capable of providing 30 places including 0-2 year olds.*

Taken together these would deliver a strategy for childcare across the St Albans plan.

The evidence base for assessing childcare has changed since the Regulation 18 consultation to better take account of existing supply, and the need for new facilities in Harpenden and in St Albans no longer exists. Therefore the references to childcare facilities in table 3.1 at East St Albans and North East Harpenden should be removed.

Secondly, the local plan at Part A should clarify that it gives policy support to all forms of early years provision. This would ensure positive weight can be given to the delivery of all early years settings irrespective of which age group to which they provide care.

Strategic policy SP7 should state:

1. *Secondary and primary schools, Sixth Forms and further education, early*

*education including nursery and childcare provision and special needs services;*

Policy COM1 should state:

1. *a) Major residential development will be required to make appropriate provision for new schools and early years facilities ([deleted text]including 0-2, 3–4, and 5-11-year-olds [deleted text]) either on-site or by making a suitable contribution towards the improvement or expansion of nearby existing facilities.*

Taken together these changes at Part B would include a strategy for meeting the demand for childcare places for 0-2 year olds and at part A give decision-makers supportive policy to ensure this can be delivered at development management stage

To be considered sound the local plan should:

1. Clarify which schools need to deliver enhanced facilities to meet a wider sports and leisure requirement; and
2. Clarify the funding and livery mechanism for enhanced facilities.

Assuming that the intention of the local plan is that only the new schools at sites B1 and B2 need to deliver a junior AGP to meet a wider sports and leisure requirement, CUAs at other schools will only need to enable limited community access to standard school facilities, and SACDC as the local authority responsible for sports and leisure in St Albans will be the funding body (either from themselves or through development), this could be achieved through

amendments to the supporting text and policy as follows:

Supporting Text: 7.19 Schools may make school facilities, such as playing pitches or sports halls, available for community use. New schools may include enhanced sports facilities to meet the Council's sports and leisure strategy and responsibilities. Where there is an intention to deliver these on a new school site, the Council as the local authority with sports and leisure responsibilities will fully fund these through planning obligations or other funding mechanisms. The policy requirement for a community use agreement alone does not imply that enhanced facilities must be provided. Schools without enhanced facilities can also support community access but will be operationally limited and may not be sufficient to meet a formal sports and leisure need.

Part B B1: A 2FE primary school, including Early Years provision, to serve the new and wider community. This should include provision of an all weather artificial grass junior playing pitch available for community use.

Part B B2: A site for and appropriate contributions towards a 2 FE primary school, including Early Years provision and an all weather artificial grass junior sports pitch available for community use.

But see other changes suggested to the wording on school site sizes made separately.

These changes would clarify that the requirement for a CUA does not mean an AWP or other enhanced facilities are required except where explicitly stated in sites B1 and B2 and that the AWP required on sites B1 and B2 is a junior AGP. They also clarify the roles and responsibilities for the delivery and funding of an AWP on any site to avoid the risk that the school becomes undeliverable at development management stage as the delivery mechanism and funding are not agreed. This would, in turn, clarify the outcome that the policy intends to achieve and ensure a deliverable strategy for achieving it.

To be considered sound the plan should remove the Ariston primary school from the policies map by removing the blue dot from Map 4 and modifying policy COM1 as follows:

1. *e)[deleted text] St Albans has an identified need for a new secondary school in the long term. A site has been identified at East St Albans near Oaklands College.*

This would ensure that policy includes only schools that are needed to deliver the primary education strategy for the St Albans settlement.

To be considered sound the plan should:

1. Revise policy wording at Part B so that allocations deliver school sites that enable the maximum required school capacity that HCC needs to plan for;
2. Amend policy wording in Part A table 3.1 and Part B allocation B4 to refer to a 6FE secondary school; and
3. Amend policy COM1 to give policy support to post-16 provision on an equal footing to early years, primary, and secondary education phases.

Firstly, the plan should replace policy referring to delivery of schools of a particular capacity to school sites of a particular capacity. This would enable the transfer of land to HCC on which HCC can build a school, and permit schools to be opened in phases at a lower capacity as pupil yield demands. References to post-16 education should also be included so that there is an appropriate policy hook for school sites to be large enough to include a 6th form, and to seek s106 contributions for post-16 provision:

revise policy wording in the site allocations in Part B as follows:

H1: A 3FE primary school site and contributions, including Early Years provision, to serve the new community and appropriate contributions towards secondary school provision, including post-16 education.

H2: A 3FE primary school site and contributions, including Early Years provision, to serve the new community.

An 8FE secondary school site and contributions to serve the new and existing communities, including post-16 education.

H4: One new 3FE and one new 2FE primary school site and contributions, including Early Years provision, to serve the new community, and appropriate contributions towards secondary school provision, including post-16 education.

B1: A 2FE primary school site and contributions, including Early Years provision, to serve the new and wider community. This should include provision of an all weather playing pitch available for community use.

But see also comments provided separately in relation to all-weather pitches.

B2: [deleted text]A 2 FE primary school site and contributions, including Early Years provision and an all weather sports pitch available for community use.

But see also comments provided separately in relation to all-weather pitches.

B3: A new 2FE primary school site and contributions, including Early Years provision, to serve the new and wider community.

B4: A new 2FE primary school site and contributions, including Early Years provision, to serve the new and wider community.

[deleted text]A 6FE secondary school site within nearby Oaklands land ownership fronting onto Hatfield Road and appropriate secondary education contributions, including post-16 education

This also ensures that the secondary school is the correct size following the Regulation 18 consultation.

B6: [deleted text]*An 8FE secondary school site within adjoining HCC land ownership and appropriate secondary education contributions, including post-16 education.*

Part A table 3.1 should also refer to a 6FE rather than an 8FE school at East St Albans:

*86FE secondary school site*

Secondly, references to post-16 education should also be included at policy COM1 so that there is an appropriate policy hook for school sites to be large enough to include a 6th form, and to seek s106 contributions for post-16 provision and provision of 6th form provision can be given consideration in the decision-making process:

Policy COM1 should also be amended to refer to post-16 education so that there is an appropriate policy hook to secure contributions and land towards 6th forms as part of new secondary school capacity, as follows:

*Major residential development will be required to make appropriate provision for new schools and early years facilities (nursery 3–4-year-olds and childcare 0-2-year-olds) and post-16 education provision either on-site or by making a suitable contribution towards the improvement or expansion of nearby existing facilities.*

But see also comments provided separately in relation to the nursery and childcare wording).

Taken together these changes would ensure that school sites are provided in such a way that would enable HCC to deliver and open up schools flexibly and ensure sites are suitably sized and funded, including for 6th form provision.

**329 - Mr Russell Crow**

Submission Number: 329 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Mr Peter Atkin

On Behalf Of Company/Organisation: Richborough Estates Name: Mr Russell Crow

Comment Number: 6

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Richborough is committed to ensuring that Redbourn has the infrastructure it requires as part of delivering housing growth. Policy B3 states that the draft West Redbourn allocation will result in a need for additional primary education capacity, in the form of a new 2FE primary school with early years capacity, to be delivered on the Site. The IDP specifies the early years requirement as a nursery; reference is also made to a new 30 place childcare setting which it is assumed is intended for delivery at West Redbourn as well.

While the IDP indicates that the data source for deficit / surplus in primary school places is Hertfordshire County Council, there is no clear evidence demonstrating how a deficit in school places has been translated into a need for a new school.

Although Policy B3 now specifies delivery of an on-site school only, it is noted that the IDP (Appendix A.1) still refers to contributions towards either a new school or expansion of the existing school. The Local Plan Viability Study Strategic Site Testing: West of Redbourn does not allow for costs relating to either provision of land for a primary school, or contributions towards its delivery.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Proposed remedy: Consistency needs to be provided across all evidence base documents to ensure there is clarity as to SADC's strategy in relation to primary school provision.

Criterion b) of COM1 states that 'The provision of playing pitches for community use will be required at new primary and secondary schools'.

The evidence supporting the need for this requirement is unclear. A review of the IDP shows that Redbourn Leisure Centre Football Pitch is being upgraded and the quality improved, so a need for a second football pitch seems unnecessary. The IDP states that Redbourn Leisure Centre Cricket Pitch needs to be relocated but this is incorrect, there is a separate cricket pitch and club already located in the centre of the village. A second cricket pitch would therefore also seem unnecessary. The needs for rugby are met at Harpenden Rugby Club.

In addition to the above, IDP Appendix 1 confirms off-site contributions will be required from West Redbourn to support delivery of associated sports provision, or enhancement of existing provision. No on-site delivery is indicated.

It is recognised that the Playing Pitch and Outdoor Sport Strategy (2024) suggest that sites of 600 or more dwellings are likely to generate demand for sports uses. However, the Strategy recommends SADC *consider* provision of playing pitches. It is clear that no need has been demonstrated for playing pitch provision at West Redbourn. Suggested policy amends are provided below – this will also address the fact that the policy is very unclear about provision required. A playing pitch could range from a small 'five-a-side' pitch to a full sized cricket field. Impacts on site capacity would thus also be wide ranging, and the impacts of this policy requirement in that regard do not appear to have been considered.

Proposed remedy: Suggested amendments to the policy wording are provided below. In addition, SADC need to provide clarity on what is meant by community use agreements and when and how such an agreement would be entered into, and the parties responsible for this agreement.

Requirements for schools within Large Urban Extensions are set out in in the Site Allocations (Part B). Any associated indoor and outdoors sports facilities should serve a community joint use function. Access must be secured through community use agreements. The provision of playing pitches for community use will be required at new primary and secondary schools where a local need has been clearly evidenced and demonstrated.

## 358 - St Albans School

Submission Number: 358 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: MFS Resolution Name: Michael Fearn

On Behalf Of Company/Organisation: Name: St Albans School

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

3.9. **Draft Policy COM1** *"Education"* – according to the draft policy in order to be able to expand, existing schools in Green Belt locations *"must provide evidence of education need"*. This is not a requirement of National policy and goes beyond the terms of the NPPF's policy regarding exceptions (see paragraphs such as 154). As stated above, the NPPF attaches *"great weight"* to any improvements to educational provision.

3.10. It is also noted that the draft policy will generally 'expect' *"that provision of the new facilities for wider community uses will be secured through community use agreements"*. Not every proposal for new facilities will be suited to granting wider public access. It is also not always feasible to have *"joint use"* facilities as part of new educational development. This could be due to the location of the development site within the subject school and whether safe and separate access can be provided without conflict with a school's responsibilities to safeguard children.

3.11. Many of the other provisions of this draft policy do not add anything to the policy already available in the NPPF such as *"proposals for detached school playing fields in Green Belt locations must preserve the openness of the Green Belt and must not conflict with the Green Belt purposes"*; *"Design, external appearance and new landscaping must be to a high standard";* or *"Effects on the amenity of the surrounding area in terms of visual impact, lighting, noise, disturbance, road access and traffic generation must be acceptable".* The policy is not positively prepared; justified; effective; or consistent with National policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). ## COM2 - Cemeteries and Burial Grounds

### 349 - Lisa Peters

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 15

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Cemetries and Burial Grounds**
CHPC supports **Policy COM 2** on Cemeteries and Burial Grounds, which highlights the importance of ensuring adequate provision of burial facilities during the plan period. Given that St. Mark's Church Cemetery in Colney Heath is nearing full capacity, the Council acknowledges the need for additional burial grounds in the area to meet local demand and support the needs of the community.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Clause (a), which ensures the provision of additional cemetery facilities during the Plan period, is welcomed. However, given the limited capacity at St. Mark's, CHPC suggests that careful consideration be given to identifying suitable locations for new burial grounds, especially in rural areas like Colney Heath, where land availability can be more constrained.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**328 - Charlie Thompson**

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraph 35 and 36 of the 2023 NPPF require that local plans be justified to be considered sound. To do so its policies must be appropriate for the outcomes that they intend to secure.

Policy wording at Part B allocations B1 and B2 states that the primary schools delivered within these allocations should include an all weather pitch (AWP). Part A policies COM1 and COM3 also states that all school should come with a Community Use Agreement (CUA) securing community access to new playing pitches.

It is not clear what the intention of this policy is and therefore what it requires HCC and SACDC (as the authority with sports and leisure responsibilities) to deliver on site. An AWP usually refers to a pitch with artificial grass (an AGP) that can be used more intensively than natural turf. An AGP is not required to deliver a school curriculum, and so are not usually included on a primary school site alongside other enhanced facilities that are needed to enable community use like floodlights, changing rooms, and showers. Moreover, to be usable by a primary school, an AGP would have to be an appropriate size for a school (a junior pitch) rather than for community use (an adult pitch) if that is what is intended. Conversely an AWP could refer to a multi-use games area (MUGA) which is a painted macadam surface enabling multiple sports. While these are provided as standard they too lack enhanced facilities like fencing that are required to enable community use.

Moreover, the requirement at Part A policies COM1 and COM3 for a CUA on all new schools could be interpreted as to require all new schools – not just those at sites B1 and B2 – to have some form of enhanced facilities to enable community access, as the facilities provided on a standard school site will not, on their own, meet the standards required to enable community use, as described above. As facilities on school sites must first and foremost enable a school curriculum, community access will be limited in practice if enhanced facilities are not provided: natural turf pitches would need time to recover outside of school hours to be usable for school PE lessons and the absence of floodlighting limits use in the evening in winter. This reading therefore contradicts the allocations at Part B.

The plan does not include a coherent strategy for the funding and delivery of enhanced facilities on school sites where they are required. Part B allocation B2 does explicitly state that the site should provide contributions for an all-weather pitch, but this wording is not included in allocation B1. The Infrastructure Delivery Plan schedule identifies AWPs generally as a need arising from all Broad Locations to meet the District's sports and leisure duties (and identifies the LPA as the funding body), including on sites B1 and B2 (reference 35 and 36). However, it only lists this as 'desirable', and identifies only that the need attributable to development only justifies a fraction of the overall cost. This means there is a risk that policy could require something that is only partially funded and therefore undeliverable in practice.

To be considered appropriate and therefore sound the local plan should therefore clarify first the intention of Part A policies COM1 and COM3 as to whether it requires all schools to have an AWP to satisfy the CUA requirement and secondly clarify the delivery and funding mechanism for AWPs on schools where they are provided (whether just on sites B1 or B2 or all new schools) to meet the Districts sports and leisure requirement rather than an education need. This representation suggests modifications that if agreed, or similar, would make the plan sound.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To be considered sound the local plan should:

1. Clarify which schools need to deliver enhanced facilities to meet a wider sports and leisure requirement; and
2. Clarify the funding and livery mechanism for enhanced facilities.

Assuming that the intention of the local plan is that only the new schools at sites B1 and B2 need to deliver a junior AGP to meet a wider sports and leisure requirement, CUAs at other schools will only need to enable limited community access to standard school facilities, and SACDC as the local authority responsible for sports and leisure in St Albans will be the funding body (either from themselves or through development), this could be achieved through

amendments to the supporting text and policy as follows:

Supporting Text: 7.19 Schools may make school facilities, such as playing pitches or sports halls, available for community use. New schools may include enhanced sports facilities to meet the Council's sports and leisure strategy and responsibilities. Where there is an intention to deliver these on a new school site, the Council as the local authority with sports and leisure responsibilities will fully fund these through planning obligations or other funding mechanisms. The policy

requirement for a community use agreement alone does not imply that enhanced facilities must be provided. Schools without enhanced facilities can also support community access but will be operationally limited and may not be sufficient to meet a formal sports and leisure need.

Part B B1: A 2FE primary school, including Early Years provision, to serve the new and wider community. This should include provision of an all weather artificial grass junior playing pitch available for community use.

Part B B2: A site for and appropriate contributions towards a 2 FE primary school, including Early Years provision and an all weather artificial grass junior sports pitch available for community use.

But see other changes suggested to the wording on school site sizes made separately.

These changes would clarify that the requirement for a CUA does not mean an AWP or other enhanced facilities are required except where explicitly stated in sites B1 and B2 and that the AWP required on sites B1 and B2 is a junior AGP. They also clarify the roles and responsibilities for the delivery and funding of an AWP on any site to avoid the risk that the school becomes undeliverable at development management stage as the delivery mechanism and funding are not agreed. This would, in turn, clarify the outcome that the policy intends to achieve and ensure a deliverable strategy for achieving it.

## COM5 - St Albans City Football Club

### 139 - Mr Roy Warren

Submission Number: 139 Submission Date: 07/11/24 10:39

Respondent: Company/Organisation: Sport England Name: Mr Roy Warren

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The supportive approach in the policy to relocating St Albans City FC's stadium and training facilities is welcomed, especially the recognition that a site in the Green Belt is likely to be needed for a development of this scale and that enabling development may be necessary to deliver such a project. The policy would align with the Council's Playing Pitch Strategy recommended action for the football club which sets out that the club should be supported to explore the transfer away from the club's existing site and into a new purpose built stadium offer. Criteria a(ii) and a(vi) are welcomed as they set out the importance of how the proposals help meet identified community sports and leisure facility needs and how the arising community benefits are delivered as factors that might contribute to 'very special circumstances'. These are considered to appropriate factors to consider when justify inappropriate development in the Green Belt for a proposal such as this.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**Chapter 7 – Community Infrastructure Policy COM5**
Statement by Lawrence Levy, Chairman of St Albans City FC:

'On behalf of everyone at the St Albans City FC, thank you for including the club in Policy COM5 which will help the club fulfil its long-term aspirations for the benefit of everyone in the community.

St Albans City FC is the primary sporting club within the City and District of St Albans and it is widely recognised that it cannot survive in the current outdated Clarence Park location. This is due to its crumbling infrastructure, limited footprint, short-term license conditions, and not having the ability to deliver the necessary revenues required to keep it afloat.

The club is not only a football club but also a destination for many inclusive groups within the District. As well as having over 17,500 unique visitors to matches last season alone in its current division (National League South), the club has already seen approximately 1,000 primary school aged children sign up to its 'Young Saints' scheme. The prospect of a new environmentally and economically sustainable stadium will be aspirational to all in the community. It will also secure the future of the club and allow it to deliver greater community outcomes as well as attract exponentially more visitors to the City each year'.

Whist the Football Club welcomes and is fully supportive of proposed Policy COM5 in the draft local plan, a few amendments would help clarify the policy and ensure it will be fit for purpose:

- To omit the words 'in principle' from the first line, to clarify the Council's full support

In roman numeral i, to add the word 'suitable' before 'alternative site' for clarity

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## Chapter 8 - Transport

### 33 - Mr Nigel Smith

Submission Number: 33 Submission Date: 28/10/24 09:00

Respondent: Company/Organisation: North Hertfordshire District Council Name: Mr Nigel Smith

Comment Number: 4

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

The Council should consider the cumulative impacts of Local Plan allocations, North Herts sites (east of Luton and Codicote) and the expansion of Luton Airport (both the consented expansion to 19mppa and the to-be-decided expansion to 32mppa) on traffic through the villages within the rural area east of the A1081, north of the A1057, west of the A1(M) and south of the A505. This area has poor transport provision for all modes.

---

### 145 - Catesby Estates

Submission Number: 145 Submission Date: 07/11/24 11:13

Respondent: Company/Organisation: Stantec Name: Mr P Derry

**Number:**

Chapter 8

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

- Policy TRA2 notes the Council support the Hertfordshire Mass Rapid Transport (HERT) scheme, which proposes to link Hemel Hempstead to Harlow. The initial route of HERT includes running parallel or on the A414 to the south of St Albans.
- Catesby Estates control a parcel of land adjacent to the A414/A1081 London Road roundabout. The Vision Document that accompanies these representations (see **Appendix 1**) shows proposals to include a HERT interchange hub adjacent to the roundabout. Clearly details of the precise layout and use are not known at this stage. However, following initial discussion

direct with the HERT team, there is an opportunity for this land to support HERT and provide an interchange between HERT and sustainable travel into central St Albans. This will accommodate facilities to support first and last mile feeder journeys to and from St Albans, ensuring that multi-modal journeys can be made sustainably. Linked to the wider London Road development, this land is retained as available for this proposed use.

- Policy TRA1 sets a series of transport considerations for new development and Policy TRA4 seeks Broad Locations to prioritise sustainable and active modes of transport, as well as providing alternatives to the private car. The site at London Road meets the aims and objectives of these policies. As noted within these representations, this is not considered the case for some of the site allocations.
- There are existing bus stops along London Road directly opposite the site, providing regular services into St Albans and to Hatfield, Harpenden, Watford, Potters Bar and Borehamwood. This provides direct links to St Albans City Railway Station, which provides Thameslink services between Bedford to the north, and southwards to central London and beyond. London Road also has an existing cycle way, encouraging cycling into St Albans centre. The site has significant sustainability potential to encourage active travel, by ensuring links to these existing facilities and creating further routes between the existing public right of way network. Safe and suitable access to the site can be provided through the development of a priority junction off London Road (see **Appendix 3**).

It would be possible to travel from a proposed dwelling at London Road, St Albans and be within central London is less than an hour given the proximity of the railway station and the service distance to a number of London stations. The layout across the site is designed to encourage active travel and reduce car dependency.

## 223 - Oaklands College and Taylor Wimpey

Submission Number: 223 Submission Date: 07/11/24 18:34

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Oaklands College and Taylor Wimpey Name:

Comment Number: 14

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

See attached representations for full submission.

### 4.8 Chapter 8 – Transport

It is acknowledged that a sustainable location and development which make the most of promoting sustainable travel can and does generally drive down the need for traveling by car and need for car parking, but this is an occupiers decision based on the attractiveness of the transport options available to them. If the sustainable transport strategy is successful, residents generally own fewer cars and so fewer parking spaces are needed. However, there are two fundamental issues that result from forcing developers to meet lower parking standards:

1. Whether occupiers of dwellings use the parking space or not, they associate the availability of parking spaces with value, and so, reduce parking on housing plats reduces sale prices and therefore revenues/viability; and
2. If parking is reduced below actual need for a development, residents simply park on-street which harms placemaking and actually discourages residents from walking and cycling.

Oaklands College and Taylor Wimpey note that as a result of Policy TRA4 (Parking), broad location sites are to be supported by 'bespoke parking strategy' at the planning application determination stage. This strategy is to include a lower than standard parking requirements, in accordance with Policy TRA4e):– for example, for residential development: 1-bed = less than 1.5 spaces; 2-bed = less than 2 spaces; and 3+bed = less than 2.5 spaces.

Oaklands College and Taylor Wimpey **object** that this approach. The Council's approach should provide a sufficient amount of car parking to avoid 'parking stress' in the local area and should not therefore require reduced parking standards without regard for potential other negative effects (including but not limited to a detrimental impact on placemaking and viability through reduced values).

### 4.8.1 SUGGESTED AMENDMENTS

Oaklands College and Taylor Wimpey seek the Council's agreement to adjust part e) of Policy TRA4 to 'allow' lower car parking standards rather than 'require' lower parking standards. This amendment can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. **Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

It creates increased traffic in Hemel Hempstead/Leverstock Green and around St Albans. It assumes wishful thinking with regard to people using cycling or walking and does not include sufficient infrastructure creation. A new motorway junction north of Hemel is required. The planning of this needs to be included rather than passed of to another party. It should be ONE plan/strategy.

The proposed housing in Dacorum and Redbourne are not near any railway stations so is not appropriate for London commuters. Transport across Hemel and St Albans to stations takes too long during rush hours.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

## 268 - St Michael Parish Council

Submission Number: 268 Submission Date: 08/11/24 09:05

Respondent: Company/Organisation: St Michael Parish Council Name: Julia Reading

On Behalf Of Company/Organisation: St Michael Parish Council Name:

Comment Number: 3

### Type:

* Policy

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

Please note that the following comments represent a consensus of individual opinions among the St Michael Parish Councillors, and are offered subject to retrospective formal approval at the Parish Council's next meeting, scheduled for January 2025.

Without detailed technical knowledge it is difficult for the Parish Council to decide, within the confines of the Regulation 19 consultation requirements, whether on balance to endorse or censure the draft Local Plan. It must also be stated that there is a real dilemma in the potential outcomes offered between hurrying through a flawed plan as it stands and the threat of further inflated housing quotas being imposed by central government if the plan is rejected.

We do find some positive, but mainly negative, aspects of the draft Local Plan. Primarily there is a lack of thoroughness and transparency around the methodology for Green Belt release and the lack of planning and thought for road infrastructure to support an even bigger population in the district.

What is clear is that preservation of Green Belt status now carries very little weight in determining planning considerations. We accept that St Albans City and District Council (SADC) has lamentably had some of its local decisions, i.e. of refusal on Green Belt grounds, overturned on appeal. There is however an intention in the draft Local Plan, in defiance of the National Planning Policy Framework, to sacrifice Green Belt areas to meet quotas without either an Agricultural Land Classification or any demonstration that all other site options have been properly considered and found to be unsuitable for housing development.

We also remain deeply concerned about the validity of the transport modelling which is predicated on a population (existing and incoming) voluntarily undertaking vastly increased numbers of trips by public transport services and via pedestrian and cycle routes. While this may be a desirable scenario, we do not see any solid evidence and analysis of projected demographic behaviour and consumers' appetite for change. The plan relies too heavily on existing transport infrastructure, without demonstrable improvements in quality or capacity to cope with increased population numbers, even in the short term, let alone the demographics leading up to 2041, all on top of what are already congested thoroughfares throughout the district. No new cycle routes to connect the sites on the A1081 have been approved and we find this to be a great oversight in the evidence base.

The Parish Council is indebted to Redbourn Parish Council which has shared some of its technical knowledge with us in order for us to make a more informed submission.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

The area covered by the VRA does not have adequate transport links to surrounding areas now, let alone after any further development in the area or beyond.

Our area, generates a lot of unavoidable short car journeys. Among the reasons for this are:

- our lack of local facilities – we don't, for example, have a GP or dentist
- we have no local community facilities
- we have few shops
- our bus service is sporadic to put it mildy
- and although a superficial glance at a map might make it look as though the city centre is readily accessible on foot or bike, we have between it and us the slopes of Verulamium Park and a footbridge/path from King Harry Lane into the park that is steep, narrow and very difficult, if not impossible for anoyone with mobility issues to use
- The main roads bordering the area: King Harry Lane, Hemel Hempstead Road, Watford Road and just outside the area, Watling Street are highly congested at the best of times and on those regular occasions when problems on the M1 or M25 occur, and displaced traffic uses these roads as a cut through,become gridlocked.

Many residents would welcome the opportunity to use their cars less, but in the current cicumstances this is not a practical possibility.

And we would also hope that this Local Plan would help to adress some of these shortcomings, thereby, among other things, reducing car usage.

The main roads bordering the area: King Harry Lane, Hemel Hempstead Road, Watford Road and just outside the area, Watling Street are highly congested at the best of times and on those regular and relatively frequent occasions when problems on the M1 or M25 occur, and displaced traffic uses these roads as a cut through,become gridlocked.

The Bluehouse Hill and Park Street roundabouts are always busy, and the King Harry roundabout (which we note was identified as a priority in the 1994 Local Plan) is seemingly a problem without a solution.

We believe that the proposed developments in Hemel Hempstead (in particular H3 and H4) Chiswell Green (L1) and Park Street (L2) would only add to the congestion on these roads

As, of course would M3 Bedmond Lane

This persistent congestion is a major issue, not just for pollution/climate change reasons but because it poses a potential threat to the safety of residents. All of the relatively few roads providing access to the 1100 or so homes in our area (Mayne Avenue, Abbey Avenue, the entrance to King Harry Park, St Stephen's Avenue and Midway open onto either King Harry Lane or Watford Road, so that when, as often happens, these two roads are at a standstill, getting into and out of the area in a timely manner is essentially impossible. This is frustrating for residents but, if emergency vehicles are considered, could have serious consequences.

In these circumstance it is hard to see how:

Policy TRA1 –Transport considerations for new development

Proposals must demonstrate that development would not lead to highway safety problems or cause unacceptable impacts on the transport network

and

Policy TRA3 -Development generating new lorry movements

Proposals for developments leading to significant increases in lorry movements shall demonstrate that any increase in lorry movements can be appropriately accommodated on the surrounding road network

can remotely be met.

And this is all to deal with future increases in traffic loads, when the problem is happening now and needs to be tackled now. The major transport schemes listed in TRA2, even if they were to address the problems that our area faces (which most of them won't) won't be happening for some time yet.

Strategic Policy SP8 – Transport Strategy at point c says the council will "support reductions in car journeys for existing and new settlements" but it is hard to find anything in the plan that suggests how this will be done.

Admittedly the plan does say that "the council will work in partnership with stakeholders to ensure that a range of sustainable and active transport options are available" but again this all sound rather woolly. How, for example, will the council's performance against this target be monitored?

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

---

**272 - The Crown Estate**

Submission Number: 272 Submission Date: 08/11/24 09:32

Respondent: Company/Organisation: David Lock Associates Name: Mr Will Howarth

On Behalf Of Company/Organisation: The Crown Estate Name:

Comment Number: 12

**Type:**

* Policy

**Number:**

SP8

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Transport Policies**

We suggest the thrust of the transport policies within the local plan, and consider that overall, they provide a sound approach upon which to support a move to sustainable patterns of movement and active travel in new growth and development.

We have a number of observations on the detailed policy wording in respect of some of the transport policies, which we consider would aid clarity and thus effectiveness. These are set out below:

**TRA2 – Major Transport Schemes**

As currently worded, part (a) subsection (ii) of TRA2 makes reference to *"enhancing M1 Junction 8"*and could be interpreted as being provision of a new bridge over the M1. All parties are keen to clarify the respective elements of any highway works which may be required as part of the HGC Growth Areas and what may be required as part of wider local plan growth. As such, we suggest the policy is amended to read:

*"A package of transport measures to enhance the* ***highway network in the vicinity of****M1 Junction 8 in association with HGC".*

**TRA3 – Development Generating New Lorry Movements**

We support the intention of this policy. However, to ensure that what is being sought relates to any mitigation of impact arising from new development, we suggest that part (a) clause (iv) of this policy would benefit from additional clarification to read:

*"a) Proposals for development leading to significant increases in lorry movements shall demonstrate that:*

1. *iv) "There is adequate and suitable provision for* ***any overnight****lorry parking* ***generated by that development****".*

-

**TRA4 -Parking**

We support the elements of policy TR4 relating to new development within the Broad Locations, and particularly part (e) clause iii in relation to supporting the development of *"an appropriate parking strategy with lower than standard parking requirements"*on the grounds that this provides some flexibility on the approach to parking which allows for alignment with the wider sustainable transport ambitions for HGC.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**368 - Gee Smedley**

Submission Number: 368 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Save North St Albans Greenbelt Name: Gee Smedley

Comment Number: 10

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

This chapter is completely inadequate.

We have commissioned an independent highways expert to delivery a review of the transport ad highways evidence base. The main finds make for depressing reading.

**Main Findings of the review of transport and highways issues within the Local Plan process:**

"*1.4 Our review of the information presented as part of the Reg 19 consultation, supported by our previous work reviewing planning applications relating to this site, lead us to conclude that the proposed allocation cannot be supported on highway and transport grounds.*

*1.5 In reaching this conclusion we fundamentally disagree with the views expressed by Hertfordshire County Council (which is the local highway authority) in their Transport Impact Assessment of the site where they conclude that:*

*"Overall there are 'no showstoppers'".*

*1.6 In our opinion the main 'showstoppers' are:*

- ***LCWIP Scheme 1 St Albans-Harpenden Link (A1081)***

*Development of this site (or part thereof) is tied in with the delivery of LCWIP Scheme 1 St Albans-Harpenden Link (A1081). This scheme proposes a fully segregated cycleway along the full length of the A1081 between Harpenden and St Albans. The scheme is included in the Infrastructure Delivery Plan (20 September 2024)*

*Our investigations relating to the proposed pedestrian and cycle facilities along Harpenden Road to the north of the Ancient Briton junction (i.e. the section of 3 | P a g e*

*Harpenden Road from which access to the site will be provided) have identified landownership, highway safety and technical design feasibility constraints that when considered individually and collectively seriously impact on the deliverability of this scheme.*

*Essentially, there is insufficient highways land along the section of Harpenden Road between the Ancient Briton junction to the south and the proposed site allocation to enable the LCWIP requirements to be delivered.*

- ***Congestion & delay on Harpenden Road (A1081) and at the Ancient Briton junction***

*Harpenden Road (A1081) already experiences high levels of congestion and delay. Traffic flows, and delays, on Harpenden Road and at the Ancient Briton junction to the south of the site, are forecast to increase in each of the scenarios considered as part of the traffic modelling work undertaken in support of the Reg 19 Local Plan. This modelling considers all the sustainable transport measures set out in the IDS together with a series of increasingly optimistic modal shift forecasts in favour of sustainable modes of travel instead of car use. As noted above the scheme most likely to encourage walking and cycling to/from the proposed site allocation cannot be delivered in accordance with the LCWIP specification.*

- *Traffic modelling undertaken in support of the Reg 19 draft local plan*

*The traffic modelling undertaken in support of the Reg 19 draft local plan is based on the County Council's Comet model. This is a high-level "countywide model of transport".*

*As acknowledged by the County Council, WSP (who undertook the Comet modelling) and Arup (who prepared the Infrastructure Delivery Plan) further detailed traffic modelling work is required."*

***"Production & Timing***

*2.1 There was no transport evidence base presented in support of the Regulation 18 draft local plan when it went to public consultation in July 2023."*

The full report can be viewed in Appendices 4.

**<u>Transport assumptions in the Aecom Sustainability Review</u>**

The Sustainability Review is completely wrong with regard to transport assessment of North St Albans, see Figure 7 for the extract from the Aecom Sustainability Review.

We have clear evidence that the proposed cycle lane is not deliverable for two proposed routes which would not be LTN 120 compliant and would not even fit into the topography due to the lack of road width. See Appendices 4, technical notes from THaT Consultancy.

*Figure 7: Extract from Aecom Sustainability Review* [see attached file]

A site selection process can only be made with supporting evidence and deliverability must be evidenced. As stated in the LGA "Effective Delivery of Strategic Sites" Toolkit: "Ensuring infrastructure delivery alongside development".

NPPF makes it clear that evidence base is required to support the "objectively assessed development needs". PINS will examine "soundness" as part of the plan making process.

1. There is no evidence of up-to-date traffic data or modelling of traffic flows in the future to check the impact of the site. The recently submitted COMET modelling is poor. See Appendices 4d, COMET modelling review by THaT Consultancy.
2. There is no evidence of feasibility and delivery of strategic routes in North St Albans via the LCWIP.
3. There has been no updated road hierarchy assessment.

Specifically in relation to Site B1 “North St Albans”: We ask in both this consultation, the previous Regulation 18 Consultant and at many Planning Policy & Climate Committee meetings, as a follow up questions to the Committee, why is the real evidence of no deliverable cycle and unmanaged over capacity traffic on the A1081 being ignored? We have had no comprehensive response from Officers.

CLASH has provided evidence that the proposals put forward by the developers in the 5/2021/0423 application and subsequent application for amendment 5/2023/1426, which was withdrawn, are not safe. See Appendix 4: THaT Consultancy report in relation to withdrawn application 5/2023/1426.

A damning verdict was given of the latest COMET modelling from Hertfordshire County Council by a number of groups including ourselves. In public consultations and stakeholder engagement events, promoters for North St Albans development concede that “Modal shift: realistic needs to be key driver...work is ongoing. Working above and beyond HCC’s multi-modal transport model (COMET) which is unrealistic in its trip expectations.” See the statement captured in the minures of St Michael’s Parish Council meeting Sept 2024, Microsoft Word - StMPC Minutes September 2024 PUBLISHED DRAFT

**Local Cycling and Walking Infrastructure Plan LCWIP:** This document is not conclusive or cohesive and Officers have clearly stated that is a “high-level concept” in a written response to questions at the PP&CC meeting on September 12th. This is not a strong evidence base for site selection.

It talks of the strategic importance of the St Albans to Harpenden link and sustainable travel upgrade but fails to provide any substantial traffic modelling or data with the proposals. There is only a medium probability of residents switching from cars to walking or cycling. We say that is very much lower given the volume of traffic that comes from beyond the edge of the proposed development site, which can be seen daily and evidence via both Google Maps and TomTom traffic data. See photographic evidence of this in the CLASH objection Appendix 1a and 1b, to application 5/2021/0423.

**Correspondence between CLASH and Planning Policy & Climate Committee CLASH question:**

*“The LCWIP proposes upgrades and maintenance which is long overdue (by some estimates overdue by 10 years) which are very welcome. The presentation we are about to see this evening notes that the A1081 St Albans - Harpenden corridor as being "strategically important". However, the LWCIP does not state there is high conviction that the take up of cycling will be delivered (figure 4.4 LCWIP GIS Models: District Wide Cycling Outputs). Specifically: The LCWIP contains details about a diversion to the existing cycle lane National Highways Network Route 6, that has not been given approval by HCC yet. The section is between the Texaco Garage and Ancient Briton on the A1081. Attached is the expert opinion that this proposed change is not deliverable due to safety reasons. Why has this been included in the LCWIP and what weight will the expert opinion carry?”*

**SADC Response:**

*“The A1081 is on the LCWIP primary network for cycling due to its strategic importance as a route on the National Cycling Network, and the primary route between the district’s largest settlements of Harpenden and St Albans, with a medium-high level of cycling potential identified in the DfT Propensity for Cycling Tool (PCT – Appendix C) and the LCWIP GIS model (Appendix E). The proposals included in the LCWIP Infrastructure Plans are high-level concepts, and are therefore*

*only an indication of what is believed to be possible and most effective on each route after auditing. Further detailed design and feasibility work will need to be undertaken for each route, and this will include an assessment of road safety factors. Where necessary, changes to the LCWIP routing or infrastructure proposals could be suggested in order to improve safety, while still adhering to the latest guidance on high-quality walking and cycling infrastructure."*

**CLASH follow up question on the webcast:**Planning Policy & Climate Committee - Tuesday 12 September 2023, 7:00pm - St Albans Webcasting (public-i.tv)

*"When will the feasibility studies supporting the LCWIP strategy and proposals be available? There is no traffic management or flow data."*

**SADC response:** *"These will come further down the line when HCC respond in full and when funding is available for them"*

**CLASH email to SADC on Sept 12th 2023:**

*Please see the following as a follow up question after the debate on the LCWIP this evening:*

*- Will the concerns we have raised about the delivery of the LCWIP on the section of A1081 between Ancient Briton and Texaco garage, also be raised with HCC along side other concerns with the A1081 in Harpenden? Including the evidence document we have from a certified transport consultant.*

*- also, the document relates to an application that was withdrawn by the developer. So we cannot see how there would be an appeal of this as there is no right to appeal in this situation. Please advise. We would expect this material document to be shared publicly and with HCC.*

*Also, we contest the response where is states "largest settlements of Harpenden and St Albans, with a "medium-high" level of cycling potential identified in the DfT Propensity for Cycling Tool ", the proposals actually only shows "medium" potential.*

**SADC Response September 21st 2023:**

*Many thanks for your email and apologies for the slow response – I have been on leave.*

*There is no provision in the Procedure Rules for follow-up questions to be sent after the meeting, because we have a function where public questioners are entitled to an oral supplementary question.*

*However, you are welcome to submit questions to a future meeting of the Planning Policy & Climate Committee where it relates to matters within the remit of the Committee and a substantive item on the agenda.*

*Kind regards,*

**Traffic evidence and modelling:**

SADC have failed to provide the necessary evidence base to objectively justify this Local Plan site allocation and have over reliance on the modelling high modal shift to justify their approach to highways improvements.

CLASH have been pro-active and delivered sound and defendable evidence as follows:

- Objection to the application 5/2021/0423, (outline application granted with 39 conditions): Highways Conditions not yet delivered and with low probability of delivery. CLASH highlighted the discrepancy between the developer's road width measurements and the real measurements. See Appendix 1a and 1b, for the full CLASH objection which contains data that still stands.

- *Objection to the withdrawn application 5/2023/1426: The developers have made it clear in the covering letter that the off-site highways works were not assessed by HCC in the original application 5/2021/0423. Figure 10*

- THaT Consultancy provided a sound and defensible report August 2024 and November 2024 (included assessment of the LCWIP 2023 published documents). The conclusion of that reports being:

*See Appendices 4 for full reports from THaT Consultancy.*

We would except current traffic modelling and surveys of the A1081 corridor to find what we experience daily. This is a severely congested A road, of high strategic importance due to the connectivity of the M1. There will be no situation that we can envisage that will change the status and road hierarchy of the A1081 and supporting function to the M1, especially when there are closures on the motorway. We cannot envisage any scenario where cycling routes will be given highways priority on the A1081. If there is such a scenario, SADC must supply the evidence.

## Strategic Policy SP8 - Transport Strategy

### 15 - Trans Link London Limited

Submission Number: 15 Submission Date: 18/10/24 12:13

Respondent: Company/Organisation: PJB Planning Name: Peter Biggs

On Behalf Of Company/Organisation: Trans Link London Limited Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The principles of Policy SP8 and the emphasis about promoting sustainable forms of transport including railways are supported. It is considered the site north of Napsbury Park Estate (Parcel 515) presents such an opportunity to promote alternative forms of transport for Napsbury Park Estate, Napsbury and London Colney through the provision of a new rail station on the Midland Mainline between St Albans and London. Further consideration should be given to this opportunity to improve transport connections between London Colney and St Albans, thus reducing car movements to the surrounding areas.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 142 - Mr Roy Warren

Submission Number: 142 Submission Date: 07/11/24 10:51

Respondent: Company/Organisation: Sport England Name: Mr Roy Warren

Comment Number: 1

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* Yes

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

The policy is supported due to its focus on supporting sustainable travel modes especially active travel which will encourage physical activity. The strategy in the policy would accord with Government policy in paragraph 96(c) of the NPPF and Sport England's 'Uniting the Movement' Strategy https://www.sportengland.org/about-us/uniting-movement

### If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?

* No, I do not wish to participate in hearing session(s)

## 233 - Central Bedfordshire Council

Submission Number: 233 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Central Bedfordshire Council Name:

Comment Number: 7

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Transport**

Following the recent DtC meeting held between the two Councils on 28th October 2024, Central Bedfordshire Council are waiting for additional model outputs to be provided to quantify any potential cross boundary impact on key routes.

In the meantime, we have set out our current position in relation to the potential transport impacts within Central Bedfordshire and mitigation that may be required. However, as agreed at the DtC meeting, following a review of the traffic modelling data, we hope to revise our position and provide an updated response in relation to traffic impacts in due course.

At the current time, CBC do have some concerns relating to the cross-boundary traffic impacts arising from two proposed allocations in close proximity to Central Bedfordshire, and we are concerned that as drafted, the proposed St Albans Local Plan would not meet the Soundness

Tests at Examination, specifically in terms of being Effective, the test for which includes being based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred. Our reasoning is outlined further below.

We note that the Council has updated the traffic modelling for the proposed allocations to ensure the most up to date assumptions have been included. However, the presentation of the modelling makes it very difficult to quantify what impacts to expect on cross boundary routes/ junctions on the B563 and A1081. It is therefore difficult to comment specifically on any mitigation requirements that may be required in the CBC area.

Within our Regulation 18 response, we advised that we would wish to review the specific model runs by site when they were available. This work has now been completed to support the Regulation 19 submission, however, the model output presented is very St Albans centric, with little clear data presented for the northern boundary of the authority area. The junction delay plots and journey time routes for example, stop short of sections of key routes into Central Bedfordshire (A1081, B653) but it appears that there are some locations that are impacted across the boundary, without a clear entry in the Infrastructure Delivery Plan (IDP) where this may warrant further investigation.

From the work on the Luton Rising DCO, it is known that the A1081 and B653 south of Luton are both sensitive to increases in traffic, with the A1081 junction with Newlands Road (which is due to be signalised), the junction with Half Moon Lane and the junction with West Hyde Road likely to be sensitive to increases in flow, whilst on the B653 the crossroads junction with West Hyde Road and Chiltern Green Road was identified as being particularly sensitive to increases in traffic, with increased flows on the B653 resulting in potentially significant levels of queuing on the side roads.

The journey times in tables 9-11 and 9-12 of the COMET St Albans LP modelling report forecast an increase on the A1081 (Route HPD1) and the B653 (Route HPD 2a). Unfortunately, as noted above, the journey time route pretty much ends at the District boundary for HPD1 and only extends partly across the boundary for HPD2a, but these would seem to be fairly clear indicators of increased congestion and delay on these routes, due to the additional levels of traffic demand modelled. It is likely that this would extend across into the CBC network.

It is considered that the majority of the increases on the CBC network would be attributable to the North-East Harpenden proposed allocation, with a lesser amount from North-West proposed allocation, and possibly some residual further traffic from the other proposed allocations routing north towards Luton.

On neighbouring authority growth, its noted that outside of Hertfordshire, National Trip End Model (NTEM ) 7.2 levels of growth have been applied. The described rationale for this is understood, however with large scale development currently under consideration for the expansion of London Luton Airport, we could suggest that consideration is given to London Luton Airport both at its current operation and potentially expanded, as key cross boundary routes will be affected, and this is an area that SADC are seeking specific agreement on the SoCG.

## 266 - Crest Nicholson Partnerships and Strategic Land

Submission Number: 266 Submission Date: 08/11/24 08:47

Respondent: Company/Organisation: Stantec Name: Sarah Cross

On Behalf Of Company/Organisation: Crest Nicholson Partnerships and Strategic Land Name:

Comment Number: 14

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

6.15 Criterion d) has been updated to clarify that only high trip generating uses which generate trips "*in excess of the thresholds set in Hertfordshire County Council's Travel Plan Guidance*" are required to prepare, submit and implement Travel Plans. This is helpful clarification.

6.16 Criterion i) has been updated to ensure that Masterplans at Broad Locations include implementation of sustainable travel infrastructure at "*the earliest reasonable opportunity*". This wording is supported as it reflects the need to be reasonable when planning infrastructure.

### Please upload any supporting documents here. Do not include any signatures or other personal data.

1. 35429 A5 SC 241014 Reg 19 Reps Final_[R].pdf

### If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?

* Yes, I wish to participate in hearing session(s)

### If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

We represent Crest Nicholson Partnerships and Strategic Land who have a land interest in the draft Broad Location allocation B2 'North East Harpenden', so would like to be involved in the hearing sessions regarding this allocation and other local plan matters where appropriate

### I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:

* Yes

### I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:

* Yes

### I would like to be notified about the adoption of the Local Plan:

* Yes

## 270 - Verulam Residents Association

Submission Number: 270 Submission Date: 08/11/24 09:20

On Behalf Of Company/Organisation: Verulam Residents Association Name:

Comment Number: 4

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

The area covered by the VRA does not have adequate transport links to surrounding areas now, let alone after any further development in the area or beyond.

Our area, generates a lot of unavoidable short car journeys. Among the reasons for this are:

- our lack of local facilities – we don't, for example, have a GP or dentist
- we have no local community facilities
- we have few shops
- our bus service is sporadic to put it mildy
- and although a superficial glance at a map might make it look as though the city centre is readily accessible on foot or bike, we have between it and us the slopes of Verulamium Park and a footbridge/path from King Harry Lane into the park that is steep, narrow and very difficult, if not impossible for anoyone with mobility issues to use
- The main roads bordering the area: King Harry Lane, Hemel Hempstead Road, Watford Road and just outside the area, Watling Street are highly congested at the best of times and on those regular occasions when problems on the M1 or M25 occur, and displaced traffic uses these roads as a cut through,become gridlocked.

Many residents would welcome the opportunity to use their cars less, but in the current cicumstances this is not a practical possibility.

And we would also hope that this Local Plan would help to adress some of these shortcomings, thereby, among other things, reducing car usage.

The main roads bordering the area: King Harry Lane, Hemel Hempstead Road, Watford Road and just outside the area, Watling Street are highly congested at the best of times and on those regular and relatively frequent occasions when problems on the M1 or M25 occur, and displaced traffic uses these roads as a cut through,become gridlocked.

The Bluehouse Hill and Park Street roundabouts are always busy, and the King Harry roundabout (which we note was identified as a priority in the 1994 Local Plan) is seemingly a problem without a solution.

We believe that the proposed developments in Hemel Hempstead (in particular H3 and H4) Chiswell Green (L1) and Park Street (L2) would only add to the congestion on these roads

As, of course would M3 Bedmond Lane

This persistent congestion is a major issue, not just for pollution/climate change reasons but because it poses a potential threat to the safety of residents. All of the relatively few roads providing access to the 1100 or so homes in our area (Mayne Avenue, Abbey Avenue, the entrance to King Harry Park, St Stephen's Avenue and Midway open onto either King Harry Lane or Watford Road, so that when, as often happens, these two roads are at a standstill, getting into and out of the area in a timely manner is essentially impossible. This is frustrating for residents but, if emergency vehicles are considered, could have serious consequences.

In these circumstance it is hard to see how:

Policy TRA1 –Transport considerations for new development

Proposals must demonstrate that development would not lead to highway safety problems or cause unacceptable impacts on the transport network

and

Policy TRA3 -Development generating new lorry movements

Proposals for developments leading to significant increases in lorry movements shall demonstrate that any increase in lorry movements can be appropriately accommodated on the surrounding road network can remotely be met.

And this is all to deal with future increases in traffic loads, when the problem is happening now and needs to be tackled now. The major transport schemes listed in TRA2, even if they were to address the problems that our area faces (which most of them won't) won't be happening for some time yet.

Strategic Policy SP8 – Transport Strategy at point c says the council will "support reductions in car journeys for existing and new settlements" but it is hard to find anything in the plan that suggests how this will be done.

Admittedly the plan does say that "the council will work in partnership with stakeholders to ensure that a range of sustainable and active transport options are available" but again this all sound rather woolly. How, for example, will the council's performance against this target be monitored?

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 280 - Cycling UK (Cyclists Touring Club)

Submission Number: 280 Submission Date: 08/11/24 09:59

Respondent: Company/Organisation: Cycling UK (Cyclists Touring Club) Name: Dr David Lauder

On Behalf Of Company/Organisation: Cycling UK (Cyclists Touring Club) Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Strategic Policy SP8 - Transport Strategy h)Supporting inter-settlement connectivity for active modes (e.g. Alban Way, Nickey Line, Ayot Greenway and Upper Lea Valley Walk) and identification and delivery of new routes. This is unsound by itself as it should be extended to specifically mention the need to to address poor inter-settlement connectivity of Colney Heath by active travel modes North and East to Hatfield and southeast to Welham Green.

To the North there is only one safe means of crossing the A414 at the "longabout". All other public rights of way crossing the A414 have been severed circa 1965 when the A405 (now A414) was changed to dual carriageway and the footway/cycle track that was on the South side was removed To the East the only cycle access route is via the subway under the A1(M) near the Oak Hotel.

Towards Welham Green and National Cycle Network Route 12, Colney Heath needs improved cycle connectivity as Tollgate Road is hazardous for cycling. and all other Eastbound routes have been severed by the A1(M).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

In "Strategic Policy SP8 - Transport Strategy h)Supporting inter-settlement connectivity for active modes (e.g. Alban Way, Nickey Line, Ayot Greenway and Upper Lea Valley Walk) and identification and delivery of new routes." add "including improved inter-settlement connectivity of Colney Heath"

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**283 - Redbourn Parish Council**

Submission Number: 283 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Troy Planning & Design Name: Mr Troy Hayes

On Behalf Of Company/Organisation: Redbourn Parish Council Name: Redbourn Parish Council

Comment Number: 18

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*Refer to Attached submission letter for whole response and figures.*

**16 Transport**

16.1 The Transport evidence and policies do not provide a clear overall multimodal transport strategy for the Plan Area, the individual settlements and HGC. Furthermore, there is no clear strategy for cross boundary transportation infrastructure.

16.2 As we have pointed out in our representations in response to the Infrastructure Delivery Plan (IDP) and Infrastructure Delivery Schedule (IDS) the Draft Local Plan is not backed by sound transport evidence and we provide detailed comment on HGC in relation to the IDP/IDS in response to the HDC Policies.

16.3 SACDC has published a Transport Impact Assessment (TIA) which appears to the SACDC's key evidence base document to justify the Local Plan and its growth. The TIA appears to use two pieces of transport evidence as the foundation to the Local Plan's 'transport strategy'. These are:

- COMET Model; and
- St Albans Modal Shift Study

16.4 The COMET Model develops 4 options with the 3 key options set out below in Page 14 of the Study.

*Refer to attachment for figure*

16.5 *A summary of the results of the impact on the District are set out below:*

*Refer to attachment for figure*

16.6 It then concludes that:

*"Overall, in Option 2 and 3 the highway network operates satisfactory however there are parts of the highway network which experience increases in delays, on links and junctions, of over 2 minutes in Option 2 and 3 compared to Option 1. However, it is envisaged that these impacts could be mitigated against subject to further investigation".*

16.7 How is SACDC further investigating these impacts and their mitigation? It appears that there is a missing piece of evidence that delves much deeper into the impacts and their potential solutions.

16.8 The Report concludes that:

"*There are critical pieces of infrastructure that are needed to support key developments, such as the A414/ Green Lane junction improvement close to the East Hemel site. These are needed to improve congestion and delays and to prevent traffic diverting to less suitable roads in the area. It is also necessary to close some minor roads to through traffic in the East Hemel and north of St Albans area to prevent unsuitable volumes of traffic using narrow minor roads such as Punchbowl Lane, Hogg End Lane, Sandridgebury Lane and Valley Road.*

*"There are increases in traffic flow on the Strategic Road Network as a result of the Local Plan proposals. The key percentage increases which occur are on slip roads to access the SRN whereas percentages increases on the main carriage way remain within -/+ 10%. There are increases in delay at some access points onto the SRN further investigation could be considered alongside potential mitigation measures to look to reduce delays."*

16.9 These 'critical pieces of infrastructure' that are needed at the East Hemel site include the junction improvement to the A414/Green Lane junction however this is by no means an exhaustive list of all the improvements that will be required at Hemel. There needs to be a much more definitive list of the required mitigation measures that are being proposed, their costs, timing, trigger points etc.

16.10 Appendix D of the Report is the 'Opportunity to Shift Modes Report'. Whilst RPC appreciates that modal shift away from the car to walking cycling and public transport is certainly the aim and should be prioritized, there is a need for some realism to be brought into the picture about existing and future populations and their likelihood to switch their travel modes. The key element to this is

the type of sustainable infrastructure that is being proposed as part of the Local Plan Strategy. Just because a site is within a certain distance to public transport or services, it does not mean that the route is safe or comfortable enough for it to be used.

16.11 The main requirements of cycling infrastructure are issued by the Dutch institute of traffic design (CROW), which is the basis for the UK Guidance Cycle Infrastructure Design (LTN 1/20).

**Safe:** The safety of the trail for traffic is crucial. This involves evaluating how different types of transport users are mixed on the trail and assessing the safety of intersections. The minimum requirement for a safe intersection includes the presence of a median, allowing people to cross a busy road in phases. A grade-separated intersection is a safer and more appealing option, though it comes with a higher cost.

**Comfortable:** The route must provide comfort for all users. Factors such as potential stops at intersections, the quality of the surface, obstacles along the way, and noise levels are considered to ensure a pleasant experience.

**Attractive:** The attractiveness of the route plays a key role in its usability. This includes evaluating whether the route runs parallel to major roads or passes through greener, more scenic environments.

**Direct:** The route should offer a direct connection between points, minimizing both travel distance and travel time. This can be achieved, for example, by avoiding busy intersections. The deviation factor is considered here, which is the ratio of the actual cycling route distance compared to the straight-line distance.

**Coherent:** The cycling network should be logical and provide good connectivity to various destinations. It is important that the network integrates well with other routes, ensuring a seamless connection for cyclists travelling through different areas.

16.12 As overarching strategy, we suggest that solutions for HGC, Redbourn and the District should focus on delivering on these requirements for the new and existing development of the area.

16.13 It is concerning that the Local Plan appears to be reliant on a minimum of a 10% modal shift with no fallback position should people's behaviour not realise this assumption and / or the sustainable infrastructure is not delivered.

16.14 The Local Plan appears to be heavily reliant on the HGC Transport & Vision Strategy for the growth at Hemel. It states the following in the TIA:

*Refer to attachment for figure*

16.15 Again, it is concerning that it states that "*further transport work, including a transport implementation plan, will be undertaken before, during and after Local Plan Examination"*

16.16 The HGC Transport & Vision Strategy includes an HGC Programme Area Map which has a very extensive 'Area of Influence' which is not surprising given the impact the new growth that Hemel will have on the sub region (and likely wider). **Given that the Strategy still requires a lot of transport work we question how the St Albans Local Plan can really progress without this further evidence given that it will clearly have influence over a considerable proportion of the District?**

*Figure 16.1: HGC Programme Area Map*

16.17 Clearly, the 'Major Transport Schemes' set out in Policy TRA2 are subject to any future transport modelling so the list of major schemes could very well change and increase in terms of requirements.

16.18 As we have set out in the IDP section, the transport projects in the IDP are lacking any substantive detail including project details, timing / phasing and do not have cost estimates and do not have secured funding.

16.19 Chapter 8 (Transport) is virtually silent on any improvements to local bus services. As we set out in our representations, Redbourn does not have a railway station so is completely reliant on local bus services for its public transportation and the existing service is not adequate – planning nearly 700 additional dwellings in Redbourn, without proper investment in the bus service, will leave no viable choice other than driving a car.

16.20 Policy TRA2 states that the Council will support the delivery of Improvements to Walking and Cycle Infrastructure as identified in the LCWIP. The LCWIP is limited to St Albans City and Harpenden with a future version covering the other settlements including Redbourn.

...

**11 Policy LG2 (Support for Transformation of Hemel Hempstead)**

**...**

**Transport Infrastructure**

11.33 In relation to 'transport infrastructure the IDP states (paragraph 9.1.6) that:

*"One of the core principles of the Garden Community is to deliver transformative mobility improvements to achieve a significant shift towards active and sustainable modes of transport. Whilst a significant amount of baseline information has been collected to support the development of the sections below, there are a number of evolving transport studies and strategies that are not yet completed that will identify and evidence the transport interventions required to support behaviour change in a shift to sustainable modes. These will need to be incorporated into future iterations of this IDP."*

11.34 The fact that the delivery of mobility improvements to achieve a significant shift towards active and sustainable modes of transport cannot be evidenced through the IDP due to a number of evolving transport studies and strategies being incomplete raises serious concerns about the deliverability of this infrastructure. To simply state that these will need to be incorporated into future iterations of the IDP provides no confidence that there is a sound transport infrastructure evidence base on which the plan is based.

11.35 The IDP provides an *"inexhaustive list of planned highways infrastructure projects, as included in the St Albans IDP Infrastructure Schedule, of most relevance to the Hemel Garden Communities"*. It then provides two bullet points which are:

- M1 junction 8 enhancement (Phases 1 to 3)
- Access enhancements to support development at Hemel Garden Communities

11.36 This is clearly not sufficient information. We sought clarification on the highways infrastructure in the IDS however the information appears to be incomplete and it is very difficult to ascertain using the IDS spreadsheet which is not at all 'user friendly'.

11.37 Reference 141 of the IDS is for Highways Access to support development at East Hemel which includes transport measures as part of M1 J8 Enhancements:

*Figure 11.6: IDS Reference 141*

11.38 Yet when looking for the estimated costs there is no estimation despite it being a Critical piece of transport infrastructure. Furthermore, the time period for its delivery is stated as 2025 – 2041. That is a very wide period of time which indicates that SACDC simply does not know the cost or when it is likely to be delivered let alone what development will trigger its necessity for delivery.

*Figure 11.7: IDS Reference 141*

11.39 There are many other examples of this in the IDS which do not need to be highlighted as there is clearly a fundamental issue with the IDP and IDS in that they lack the required information to demonstrate the allocations are sound and deliverable. Based on the current information available there is nothing to suggest that the infrastructure to support the growth at Hemel is sound or deliverable.

***Rail Services***

11.40 The IDP states at Page 188 that:

*"The proposed expansion of Hemel Hempstead is likely to have an impact on the nearby railway stations (Hemel Hempstead station and Apsley station) and the need to improve and expand station facilities, as necessary, to reflect increased demand for rail services has been raised in the engagement as a concern."*

11.41 *"Further details are not yet developed as to exactly what new or improved infrastructure is required to facilitate this increased demand".* Again, a key piece of required infrastructure has no evidence on what is needed or its cost etc.

***Bus Services***

11.42 The IDP explains at Page 189 that:

*"Initial investigations undertaken with developers suggest that new bus routes could be introduced, and existing routes expanded to link the HGC developments with both Hemel Hempstead (including the train station, which will provide further, regional public transport connectivity) and St Albans City".*

11.43 "Initial investigations" are not sufficient to justify the proposed allocations and evidence deliverability and soundness.

***Walking and Cycling Infrastructure***

11.44 Whilst it is important that there is sustainable and safe walking and cycling infrastructure delivered as part of the allocations there is quite a contrast in the level of detail provided in the IDP and IDS for these schemes compared to the strategic transport requirements. It is helpful to have this detailed level of costings and projects for walking and cycling infrastructure however it is currently very much an 'incomplete picture' of the full range of strategic transport measures required and how, when by whom and their cost.

....

**The Settlement Hierarchy**

6.22 Redbourn Parish Council is also concerned with the implication that such increase in housing numbers would have in terms of sustainability. As set out throughout our representations, Redbourn is not an area that is well located to other uses and nor is it serviced by any choice of transport modes apart from the private automobile and poor bus services. Furthermore, whilst the village is served by the Nickey Line (cycle way), the general infrastructure and public realm in the village is not suitable for inclusive and safe cycling. This means that car usage in Redbourn is high.

6.23 There is a heavy reliance on the Nickey Line throughout SACDC's documentation in terms of its role in delivering a modal shift away from the car to sustainable modes. However, the HGC Transport Vision and Strategy (2024) states the following, indicating that its deliverability is yet to be determined and it should not be assumed that its delivery is certain:

*"work remains ongoing to further understand how the route can be improved further to increase the number of people using it for active travel purposes and enhance its strategic importance to HGC; this includes:*

- *“The HGC Nickey Line Strategy and Feasibility Study (Hemel Hempstead to Harpenden);*
- *The HCC Nickey Line Cycle Connectivity and Accesses Study; and*

6.24 *Sustrans Nickey Line Feasibility Study (Redbourn to Harpenden)”*The Settlement Hierarchy Study states that Redbourn is located at a 15-minute drive to Luton Airport, but this is not a service, or an infrastructure used by residents on a regular basis nor necessary for daily live. Rail services are not available in Redbourn, but they are in Harpenden, 3 miles to the east, which could be accessed conveniently by private automobile, and less so by an infrequent bus service or by cycle via the Nickey Line that is not accessible nor inclusive for all users. Therefore, the only reasonable option to travel to the nearest railway station is by private automobile.

6.25 The Nickey Line is an excellent cycle route for recreation, also serving for commuting for some cyclists for travelling from Redbourn to Harpenden and Hemel Hempstead. Notwithstanding its benefits, the cycle line is not lit at night and it is not surfaced appropriately. Moreover, the line is isolated and detached from what should be a wider and complete cycle network. In the absence of a cycle network that connects the Nickey Line to different areas of the village (centre, common, school, etc.), there will be difficulties in the Nickey Line being a meaningful commuting route for all. All the above means that the Nickey Line is not an attractive infrastructure for all potential users, as it is a convenient and convenient use to all users. That is all potential users regardless of age, background, gender, health, etc.

6.26 There is no justification provided by SACDC for the selected Spatial Strategy in relation to Redbourn and to the disproportionate housing figure allocated in such unsustainable location. The proposed Policy SP1 is difficult to follow, considering the existing evidence (Settlement Hierarchy Study and Sustainability Appraisal) and it fails to effectively justify SACDC’s decision to look to Redbourn for additional housing. The objectives of the Draft Local Plan regarding climate change and spatial strategy, housing and infrastructure state the following:

*“Promote adaptation to and mitigation of the Climate Emergency; seek to achieve net zero by 2030, including through the Council doing everything reasonably within its power; promote the use of renewable resources, reduce greenhouse gas emissions, protect natural resources and reduce waste. [...]*

*Provide a sufficient amount of good quality housing which meets the needs of all sections of society in sustainable locations. [...]*

*Prioritise and enable the safe and attractive use of active and sustainable means of transport and reduce the need for people to travel.”*

6.27 Redbourn is a village that is not sustainable due to having limited services and facilities and residents depend on private automobile for transportation. How is the proposed disproportionate housing figure proposed for Redbourn village aligned with the above-mentioned objectives of the Draft Local Plan? The Council has not provided any meaningful explanation.

6.28 Redbourn has a poor bus service, which poses a barrier to the proposed housing allocations, necessitating a comprehensive review of the Draft Local Plan's proposed site allocations and distribution of development. This revaluation is essential to ensure that future residents have viable and accessible means of public transportation within the Parish of Redbourn and to surrounding settlements.

6.29 The Settlement Hierarchy Study (2023) states that the three highest scoring settlements: St Albans, Harpenden and London Colney, whilst not scoring equally, they all score relatively well against settlement size, sustainable modes of transport, access to key services and facilities and employment. The study also states (paragraph 6.39) that Redbourn does not contain higher order services such as supermarket or leisure centre and has fewer employment sites than London Colney. Furthermore, Redbourn is a self-contained village detached from any other settlement,

poorly connected to other settlements by public transport with a deficient bus service. Whilst London Colney benefits from better public transport and shorter distances to other settlements' services by foot and cycle.

6.30 Therefore, RPC considers that there is not enough justification for Redbourn being allocated a high amount of development in the settlement (and parish) where there are other locations that perform higher in the settlement hierarchy and are more sustainable in their location.

6.31 RPC considers the proposed settlement hierarchy to be ineffective not based on robust evidence, as the submitted Settlement Hierarchy Study (2023) is flawed. We explain the reasons below.

6.32 Policy SP1 states that the Settlement Hierarchy (Table 1.3) provides the basis for allocation and location of growth generally within and adjacent to the larger and most sustainable urban centres that are Tier 1 (St Albans and Hemel Hempstead) Tier 2 (Harpenden), and Tier 3 (London Colney). Redbourn and Wheathampstead are identified as Large Villages in Tier 4.

*Figure 6.5: Draft Local Plan Settlement Hierarchy (Table 1.3)*

6.33 The current policy in the Adopted Local Plan (1994) has Bricket Wood, Chiswell Green, How Wood, London Colney, Park Street / Frogmore, Redbourn and Wheathampstead designated as 'Large Villages'. We note that the Green Belt Review (Stage 1) (2013) which SACDC seeks to retain as part of its Local Plan evidence base, includes Bricket Wood, Chiswell Green, How Wood, London Colney, Park Street/Frogmore, Redbourn and Wheathampstead as part of the 'Interpretation of the Local Settlement Hierarchy' (Table 3.2).

6.34 There is no explanation in the Draft Local Plan for why there is such a fundamental proposed change to the Settlement Hierarchy in terms of Redbourn and Wheathampstead remaining as Large Villages and the other settlements being downgraded.

6.35 We have reviewed the Settlement Hierarchy Study (June 2023) yet its methodology is quite crude and simplistic. The study uses a quantitative approach to assessing settlements in St Albans District, with regards to the following factors:

- Population
- Accessibility
- Services and facilities
- Employment

6.36 Population is an important factor but should not be decisive in the Settlement Hierarchy Study, as this document is designed to inform future growth in sustainable locations. Should a settlement have a relatively low population but score very high in terms of sustainability of its location, the low population factor should not score the settlement down, and vice versa. Appendix 3 of the Settlement Hierarchy Study gives 0.5 points to Redbourn due to its population. We contest that this scoring is necessary, as the assessment of settlements, when focused towards identifying sustainability and adequacy for future growth, should not necessarily be informed by the population (quantitative data), but the qualitative data of accessibility and availability of services, transport, etc.

6.37 The approach to assessing and scoring accessibility, for instance, is too simplistic and does not consider accessibility to transport options, but merely the presence of a service in a particular location. The study should provide points according to the distance of residential and employment areas to services, facilities and transport hubs. For example, the presence of a Nickey Line and other cycle routes in Redbourn means that the settlement scores 3 points in the transport assessment but given the route's location on the edge of the village, the conditions of the route, the limited destinations available and the intrinsic physical nature of cycling, the transportation

service of the cycle route is limited. The Nickey Line is only suitable for recreational cycling currently and as highlighted previously the extension of this line is not yet evidenced so it should not be used in assumptions regarding accessibility scores.

6.38 Unfortunately, the study does not refer to these relevant accessibility factors, but merely scores the settlement based on the presence of the cycle route. A qualitative assessment would be required as well as a quantitative check.

6.39 In terms of transport, the Settlement Hierarchy Study scores equivalently different transport options. For example, the presence of five cycle routes within/between settlements is equivalent to the presence of a main line railway station. Clearly, these two cannot be compared and scored equally in principle, as railway services provide transportation services normally to nearby settlements, London and the rest of the country. On the other side, cycle infrastructure is limited as a transport option insofar as medium and large distances cannot be reasonable travelled by bicycle. Cycling is also not a feasible option for many people in the district due to disabilities, age, health, safety, etc. Rail and cycle are two different transport options that whist they are complementary to each other, cannot be compared with similar or equal scores. Similarly, bus lines are given a single point in the assessment, if there is a bus line present in a settlement. However, it is worth to question what the actual service of this bus line (and other transport option) provides. Clearly an infrequent bus line connecting two small villages should not score equally to a frequent and regular bus service that connects a village to a city or a railway hub. The approach taken in the Settlement Hierarchy Study to assess accessibility and transport is too simplistic and therefore it is flawed.

6.40 We are concerned with the scoring given to Redbourn for cycling as it is not realistic. Appendix 4 (Accessibility Audit Scoring Table and Maps) identify three cycle routes and a confused picture of what cycling infrastructure is in Redbourn:

- Bridleway Flamstead 039 – a public right of way that meanders the countryside with no large settlement destination.
- Gaddesden Lane – a road with no dedicated cycle infrastructure, shared with vehicular traffic and leading to the countryside, not relevant destinations nor larger settlements.
- The Nickey Lane – national cycle route 57 along the south edge of Redbourn, connecting it to Hemel Hempstead and Harpenden.

6.41 The above gives a more realistic picture of the deficient cycle infrastructure in Redbourn, which should not be given 3 points in the scoring as the reality is that the aren't "*three to four strategic cycle routes within or between/connecting settlements*", which is the methodology requirement for scoring 3 points. Redbourn should score 1 point only as there is a single strategic cycle route that connects the village to other settlements.

*Figure 6.6: The Nickey Line or National Cycle Route 57 shown in yellow/orange. The only strategic cycle route serving Redbourn.*

6.42 RPC is also concerned with the scoring of buses in the Settlement Hierarchy Study. Redbourn scores 3 points in this field, as there are three bus lines offering services in Redbourn. We consider that this is a very simplistic assessment of the bus services in the settlement and that is flawed by not assessing the services qualitatively.

6.43 For instance, Bus 34 does not offer service all days of the week and the last service available during the week to travel to St Albans is at 18:10. The last service to return from St Albans is at 18:25.

*Figure 6.8: Bus 34 timetable from St Albans to Redbourn (*Intalink.org.uk*)*

6.44 Similarly, the 46 bus offers hourly services between Luton and Hemel Hempstead. The service to Luton operates between 06:58 to 20:14, Monday through Saturday. The service to Hemel Hempstead operates between 07:22 and 19:32, Monday through Saturday. There is no service on Sundays.

*Figure 6.10: Bus 46 timetable to Hemel Hempstead (*Intalink.org.uk*)*

6.45 The 357 Red Rose bus offers a 'Sunday only' convoluted and slow service between Redbourn and Borehamwood via Harpenden and St Albans. The service to Borehamwood operates at 10:06, 12:36, 16:06, and 18:36. The service from Borehamwood to Redbourn arrives and terminates at 10:04, 12:34, 16:04 and 18:32.

*Figure 6.11: Bus 357 timetable to Borehamwood (*Redrosetravel.com*)*

*Figure 6.12: Bus 357 timetable of arrivals in Redbourn (*Redrosetravel.com*)*

6.46 In summary, the public transport in Redbourn is insufficient with a shortage of evening buses timetabled throughout the week, especially poor connectivity between Redbourn and Harpenden and a lack of Sunday bus services including no services between Redbourn, Hemel Hempstead or Luton and a slow and convoluted service to St Albans. The lack of available routes and the constrained frequency of services should be better reflected in the Settlement Hierarchy Study, as these services are not adequate nor sufficient to score 3 points. Other settlement hierarchy studies' methodology would normally score points if buses provide frequent services all week. This would be a more realistic and complete approach to assessing bus services in Redbourn. In the current context of bus services in Redbourn, the Settlement Hierarchy should score buses lower or zero points, instead of 3 points

....

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is concerning that the Local Plan appears to be reliant on a minimum of a 10% modal shift with no fallback position should people's behaviour not realise this assumption and / or the sustainable infrastructure is not delivered.

The HGC Transport & Vision Strategy includes an HGC Programme Area Map which has a very extensive 'Area of Influence' which is not surprising given the impact the new growth that Hemel will have on the sub region (and likely wider). **Given that the Strategy still requires a lot of transport work we question how the St Albans Local Plan can really progress without this further evidence given that it will clearly have influence over a considerable proportion of the District?**

As we have set out in the IDP section, the transport projects in the IDP are lacking any substantive detail including project details, timing / phasing and do not have cost estimates and do not have secured funding.

Chapter 8 (Transport) is virtually silent on any improvements to local bus services. As we set out in our representations, Redbourn does not have a railway station so is completely reliant on local bus services for its public transportation and the existing service is not adequate – planning nearly 700 additional dwellings in Redbourn, without proper investment in the bus service, will leave no viable choice other than driving a car.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

**291 - SEGRO (Radlett) Limited**

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 6

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

6.1 Strategic Policy SP8 - Transport Strategy outlines how the Council *will 'prioritise the use of active and sustainable transport modes and deliver accessibility improvements to the transport and highways network'*.

6.2 Policy TRA1 – Transport Considerations for New Development sets out the requirements for major proposals to ensure that *'safe and suitable access can be provided' and 'development would not lead to highway safety problems or cause unacceptable impacts upon the transport network'*.

6.3 Policy TRA2 – Major Transport Schemes states in part (b) that *'there is now a reasonable prospect that the Government permitted Strategic Rail Freight Interchange identified in policy EMP2 will be delivered during the Plan period. The Council supports the road and sustainable transport infrastructure needed to mitigate it, in particular A414 enhancement.*'

6.4 As discussed above in paragraph 5.13, SEGRO (Radlett) Limited welcome the recognition of the SRFI in policy TRA2, we further consider that the the policy wording of *'a reasonable prospect'*of the SRFI will be delivered could be more accurately stated as a 'likely' or 'good prospect' given the fact that development has commenced on site and the clear delivery programme set out by SEGRO (Radlett) Limited.. Nonetheless, SEGRO (Radlett) Limited consider the support for *'road and sustainable transport infrastructure needed to mitigate'*the SRFI, in particular regarding the A414, to be sound.

6.5 Policy TRA3 – Development Generating New Lorry Movements sets out requirements for proposals leading to significant increases in lorry movements and how they can reduce their impact on the environment and congestion.

6.6 Policy TRA4 – Parking states that development proposals should meet on-site car and cycle parking standards for new non-residential development which are set out within the draft Local Plan. It is acknowledged that the SRFI consent has a condition (no. 10) restricting the maximum number of parking spaces, which would be less parking provision than the draft policy. However, it is specific to the approved development and any future need to review parking spaces will be subject to detailed assessment at the relevant time. SEGRO (Radlett) Limited are supportive of Policies TRA3 and TRA4 which set out the car and lorry transport and parking requirements.

6.7 In addition to encouraging the transfer of freight from road to rail, the SRFI will also improve local transport connections in line with the draft Local Plan policies SP8, TRA1 and TRA3. The SRFI will become a nationally significant logistics hub which will meet the requirements of businesses serving London and the South-East of the UK.

6.8 The Radlett SRFI development will deliver a wide range of transport benefits, including combination of on and off-site highway works with improvements to the PRoW network will fully consider the needs of pedestrians and cyclists. Alongside the measures addressed in the draft TFMMP, it will ensure the scheme is well served by a range of transport modes with the aim of reducing reliance on cars.

6.9 Overall, SEGRO (Radlett) Limited are supportive of Policies SP8, TRA1, TRA2, TRA3 and TRA4 and consider them to be sound. It is considered these policies are an important inclusion within the draft Local Plan to ensure SADC is well connected, accessible and encourages sustainable transport.

1. LOCAL PLAN CONSULTATION REG19 SEGRO_[R].pdf

## 303 - Phil Escritt

Submission Number: 303 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Open Space Society Name: Phil Escritt

Comment Number: 2

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**Consultation Need to explicitly refer to the HCC Rights of Way improvement Plan (ROWIP)**

The Open Spaces Society welcomes the emphasis in strategic policy SP1 - A Spatial Strategy for St Albans District, on the need for better accessibility by walking and cycling, better access to the countryside via new and improved rights of way and significantly improved infrastructure for walking and cycling. We also welcome the way in which these strategic requirements are reflected in subsequent policies.

We note the emphasis in policies LG1, LG4, SP8 and TRA1, and in the individual site requirements in Part B, on the Local Cycling and Walking Infrastructure Plan (LCWIP) as a vehicle for specifying detailed infrastructure requirements. The St Albans District LCWIP is almost exclusively concerned with the infrastructure required for utility journeys e.g. to shops, schools, transport hubs and places of work and leisure activity.

It does not cover the paths needed to enable the public to access the countryside and the existing rights of way network in order to walk and cycle as leisure activities in their own right. It does not cover the infrastructure needs of equestrians at all. It does not therefore meet the requirement in policy SP1 for better access to the country and does not adequately support the needs of policy SP13, Health and Wellbeing.

In addition the current edition of the LCWIP concentrates largely on existing urban areas, particularly central St Albans. It does not cover all of the allocated sites or many of the requirements of the smaller settlements in the district. In all these respects the plan is neither proportionate nor effective.

These gaps would be substantially filled by reference to the Herts County Council's Rights of Way improvement Plan (ROWIP). The ROWIP is a statutory requirement of the Countryside and Right of Way Act (CROW) 2000. The Hertfordshire ROWIP is in two parts. The first part, the policy document, is an assessment of the current situation and a statement of action. It is supplemented by a database of "suggestions" for improvements. This database is a living document which is added to over time based on input from councillors, officers and members of the public.

The St Albans Access Forum which comprises representatives of walking, cycling and horse riding organisations has systematically reviewed the situation in the district's parishes and submitted suggestions which have been included in the ROWIP database. The ROWIP suggestions now cover a large proportion of the selected sites in this plan.

The HCC ROWIP is a daughter document of the Local Transport Plan LTP4 and is therefore implicitly covered by paragraph a) of strategic policy SP8, Transport Strategy which requires alignment with the HCC "Local Transport Plan (LTP) and other evidence and supporting documents, as relevant."

The Local Plan will be made more effective and proportionate by explicitly referencing the ROWIP in the following policies.

- Policy LG1 – Broad Locations. In paragraph l) after "LCWIP" add "and ROWIP"
- Policy LG4 – Large, Medium and Small Sites. In paragraph j) after "LCWIP" add "and ROWIP"
- Policy SP8 – Transport Strategy. In paragraph a) after "supporting documents as relevant" add "e.g the ROWIP"
- Policy TRA1 – Transport Considerations for New Development. In paragraph b) sub paragraph x) after "LCWIP" add "and ROWIP"

The Society strongly recommends that the district council should adopt these changes.

**Need to ensure off-road links will be public rights of way**

The Open Spaces Society strongly supports the policies in this plan which call for improved infrastructure for walkers, cyclists and equestrians. Examples include "new and improved rights of way"[1], "excellent walking and cycling links"[2], "new or enhanced walking, cycling or equestrian routes"[3], "appropriate local infrastructure..... to encourage cycling and walking"[4], "improvements to walking and cycle infrastructure"[5].

The developments which this infrastructure will serve will be permanent. The new infrastructure must be equally permanent and it must be available to everyone, not just the residents of the new development. Private streets may be difficult to close but permissive off road paths can be closed by the landowner with no notice and no redress.

The only way to guarantee permanent public access is for the routes to be adopted by the highway authority or dedicated as public rights of way. There is no policy which explicitly requires these guarantees and as the above examples demonstrate the existing policies are ambiguous. Although policy SP1 "supports" new and improved rights of way does this mean that the new and enhanced walking, cycling and equestrian routes of policy LG6 must be public rights of way or can they be permissive?

This ambiguity is recognised and clarified by the addition in parentheses of "public rights of way" in the specific requirements for the Hemel Hempstead Garden Communities sites H1[6], H2[7], H3[8] and H4[9] in the paragraphs which require "Improved and enhanced countryside access links and off-road paths **(Public Rights of Way)** in and adjacent to the site...." (emphasis added).

Without clarification of this issue for other policies and sites the plan is ambiguous. This is contrary to the requirement of NPPF paragraph 16 (d) which makes this version of the plan potentially unsound.

A simple solution would be to add a requirement to policy SP8 – Transport Strategy. This strategy begins by saying "The Council will prioritise the use of active and sustainable transport modes and deliver accessibility improvements to the transport and highways networks by:..."

To resolve the ambiguity a new sub paragraph could be added saying:

"Supporting the dedication of off-road paths as public rights of way"

The Society strongly recommends that the District Council should adopt this change.

[1] SP1 – A Spatial Strategy for St Albans

[2] LG1 – Broad Location (para l) and LG4 –Large Medium and Small Sites (para j)

[3] LG6 – Green Belt Compensatory Improvements (para a iv)

[4] COM1 – Education (para d)iv)

[5] TRA2 – Major Transport Schemes (para a) i)

[6] H1 – North Hemel Hempstead para 3

[7] H2 – East Hemel Hempstead (North) para 3

[8] H3 – East Hemel Hempstead (Central) para 5

[9] H4 – East Hemel Hempstead (South) para 2

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The only way to guarantee permanent public access is for the routes to be adopted by the highway authority or dedicated as public rights of way. There is no policy which explicitly requires these guarantees and as the above examples demonstrate the existing policies are ambiguous.

A simple solution would be to add a requirement to policy SP8 – Transport Strategy. This strategy begins by saying “The Council will prioritise the use of active and sustainable transport modes and deliver accessibility improvements to the transport and highways networks by:...”

To resolve the ambiguity a new sub paragraph could be added saying:

“Supporting the dedication of off-road paths as public rights of way”

..

The Local Plan will be made more effective and proportionate by explicitly referencing the ROWIP in the following policies.

Policy SP8 – Transport Strategy. In paragraph a) after “supporting documents as relevant” add “e.g the ROWIP”

**306 - St ALbans and District Footpaths Society**

Submission Number: 306 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: St ALbans and District Footpaths Society Name:

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

St Albans and District Footpaths Society supports the provision, preservation and protection of public rights of way over footpaths in St Albans and adjoining areas. It also aims to preserve and enhance the beauty of the countryside for the benefit of the public.

We welcome the recognition in the Local Plan of the importance of enabling public access to the countryside. We support its commitment to improve the need for larger settlements to provide better accessibility and connectivity by walking, cycling and public transport (SP1).

And (also in SP1) its support for better access to the countryside via new and improved rights of way and improved infrastructure for walking, cycling and public transport).

We have seen the submission by the Open Spaces Society (OSS) and agree with their comments. In particular, we think it would strengthen the Plan if it explicitly references the Hertfordshire County Council's Rights of Way Improvement Plan in the policies set out by the OSS in their submission. We also support their view that new footpaths should be designated as public rights of way in order to ensure permanent public access.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**323 - Diana Ngobi**

Submission Number: 323 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: National Highways Name: Diana Ngobi

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Thank you for inviting National Highways to comment on the proposed submission version of the St Albans Draft Local Plan 2041, as part of the Regulation 19 consultation.

The Strategic Road Network (SRN) is a critical national asset and as such National Highways works to ensure that it operates and is managed in the public interest, both in respect of current activities and needs as well as in providing effective stewardship of its long-term operation and integrity. For the purposes of the emerging St Albans Local Plan, we would be concerned with development patterns that have the potential to impact on the operation of the A1(M), M1, M25 specifically M25 J21, 21A, 22 and 23, although subject to the scale of impact, this may include other SRN positioned further afield.

As a statutory consultee to the Local Plan consultation, we are interested in the potential traffic impacts of any development site proposals and/or policies coming forward which may impact on the operation of our network and the need to ensure that any impacts are fully understood at the plan-making stage. For National Highways, the safety and operation of the SRN is our primary consideration. In terms of traffic impacts on the SRN, we take the view that development proposals would be unacceptable, by virtue of an unacceptable road safety impact or severe congestion impacts, in accordance with DfT Circular 01/2022 and NPPF.

DfT Circular 01/2022 confirms in paragraph 28 that 'the policies and allocations that result from plan-making must not compromise the SRN's prime function to enable the long-distance movement of people and goods. When the company assists local authorities in the development of their plans and strategies, the local authority should ensure that the SRN is not being relied upon for the transport accessibility of site allocations except where this relates to roadside facilities or SRN-dependent sectors (such as logistics and manufacturing). The company will also work with local authorities to explore opportunities to promote walking, wheeling, cycling, public transport and shared travel in plan-making, in line with the expectations set out in the NPPF and the Transport Decarbonisation Plan'.

Our response is focused on the soundness of the Plan, in particular compliance with the 'Justified', 'Effective' and 'Consistent with national policy' tests. In terms of the 'Justified' test, we focused on the transport evidence. We considered the supporting Infrastructure Delivery Plan (IDP) in our assessment of the deliverability of the Plan ('Effective' test). We assessed consistency of the Plan with Circular 01/2022 as well as with the NPPF.

We have undertaken a review of the St Albans District Council 'Draft Local Plan 2041' (Regulation 19) and we agree with the themes and objectives set out in the Plan. We welcome the Council's vision to make St Albans a thriving, inclusive and sustainable community which is a great place to live and work and has a vibrant economy and to prioritise and enable the safe and attractive use of active and sustainable means of transport and reduce the need for people to travel.

We would be concerned if any material increase in traffic were to occur on the SRN, or on its junctions, because of planned growth within the borough, without careful consideration of mitigation measures. It is important that the Local Plan provides the planning policy framework to ensure development cannot progress without the appropriate infrastructure being in place.

The car parking standards in policy TRA4 In St Albans District outline how car ownership and usage levels are high and accessibility by non-car modes of transport in most of the district is insufficient to justify a significant level of parking restraint. For planning purposes, the operation of the car parking standards is based on a zonal approach, with a degree of parking restraint imposed in locations that are most accessible to services, community facilities and public transport.

The Hemel Garden Communities (HGC) Programme is a proposal to transform Hemel Hempstead through the regeneration of the existing town and delivery of new housing and infrastructure in St Albans City & District Council and Dacorum Borough Council areas. Within St Albans District, the HGC Growth Areas will deliver at least 4,300 new homes by 2041, with a further 1,200 homes by 2050, providing a total of 5,500 new homes. Further housing growth within the area north and east of Hemel Hempstead, Two Waters and Hemel Hempstead Town will be set out in Dacorum's Local Plan. We note that this has the potential to put pressures and traffic impacts on the SRN and its junctions.

We would also seek to understand if/how the Council plans to have an overarching monitor and manage policy which addresses the cumulative traffic impacts of this growth area and the collective impact on the SRN.

The HGC Transport Vision and Strategy document (TV&S) sets out a sustainable movement network approach for the long-term growth and transformation of Hemel Hempstead and wider routes. The approach ensures the HGC programme area can be developed as a successful, integrated, well-connected place. The site has ambitions to achieve a town-wide sustainable transport network with a target of 60% of all journeys starting, ending or within the HGC growth areas and 40% of all journeys starting, ending or within the existing town of Hemel Hempstead, to be undertaken by active and sustainable modes by 2050.

We support the local authority's proposals that considers sustainable transport measures, which manage down demand and reduce the need to travel. We are open to discussions surrounding the district's plan to safeguard land, design, fund, deliver and monitor a package of transport measures to enhance M1 Junction 8 (M1 J8) and surrounding area, in association with Hemel Garden Communities (HGC).

Physical highway improvements for the SRN should only be considered as a last resort. We note that there cannot be any presumption that such infrastructure will be funded through any future RIS (Road Investment Strategy). We strongly recommend that there is no reliance placed on RIS funding to realise capacity for growth in the Plan within the plan period.

Housing and Employment Allocations:

We note that the housing requirement over the plan period is 10,808 across 98 sites in the St Albans area. H2 - East Hemel Hempstead (North) site directly borders the M1 and will provide 1,600 residential units (indicative) in total (1,235 in plan period). The site is to the east of Hemel Hempstead, between the B487 to the north, the M1 to the east and Punchbowl Lane to the south. The site is adjacent to Hemel Hempstead and forms part of the wider Hemel Garden Communities programme.

The site aims to improve and enhance countryside access links including connections under the M1 motorway. These links will require close collaboration with both National Highways and our service partner when an application comes forwards.

Site H3 and H4 East Hemel Hempstead (Central and South) also form part of the Hemel Garden Communities programme and similarly borders the M1. The proposals include mention of land to the east of Junction 8, which will be safeguarded for access improvements associated with Junction 8 of the M1 motorway, in case it is required to come forward for junction improvements.

Site H3 is also classified as Employment Led Mixed Use (Enterprise Zone), approximately 17 hectares of the site will promote high density, higher skilled employment uses to deliver a Business, Research and Development Park and explore opportunities for education. National Highways will be interested in understanding how traffic impacts will be reduced and mitigated as work on this site progresses due to the proximity of the SRN.

Site B3 - West Redbourn, Redbourn will provide 545 residential units. As the site is situated on the boundary of the M1, requirements include right of way improvement contributions to the link under the M1 and out into the wider recreational network to the west and a noise assessment must be carried out regarding the M1 which is adjacent to the west, and appropriate mitigating measures provided as necessary, which may include setback of residential units, planting, and acoustic bunding / fencing. The proposed extension to Rothamsted Research, Harpenden Campus (OS3 and OS4) are the only other sites assigned to employment. The development will be associated in character with the adjacent research facilities, with new buildings in the eastern half of the site only.

We would also like to highlight that should unallocated development come forwards which is adjacent to the SRN, this will require a higher level of engagement with National Highways in relation to boundary concerns such as geotechnical matters, drainage and lighting.

We would reinforce that a master planning process presents an opportunity for the Council, and early consultation/working with key stakeholders, to consider traffic associated with the developments using, accessing, and exiting the SRN and viable alternatives to the private car, to understand future infrastructure requirements, to develop a package of mitigation measures with detailed costing, to utilise Travel Plan monitoring strategies triggered through phased development and where applicable to collect appropriate mitigation funding.

Transport Evidence Base & Infrastructure Delivery Plan:

To ensure that the Local Plan is deliverable, the transport evidence base should demonstrate the Local Plan impact on the SRN and as necessary identify suitable mitigation. This work forms a key piece of evidence to demonstrate that the Local Plan is sound, therefore it is important that any identified mitigation that the plan and its allocations are reliant upon has a reasonable prospect of delivery within the timescales of when the identified growth is planned.

National Highways and St Albans City and District Council along with Hertfordshire County Council and their transport modelling consultants have been liaising and corresponding over the use of the existing COMET transport model covering Hertfordshire for the Local Plan modelling assessment. We previously raised concerns over the suitability of the model due to the lack of suitable calibration and validation evidence provided to demonstrate that the model was operating satisfactorily. Although some evidence was provided and agreement was reached on a suitable transport modelling methodology for the Local Plan assessment, some of the requested information about the model validation/calibration and evidence on mode shift was not provided. This specifically concerned evidence that the COMET model could replicate base year traffic flows on the M25 and other parts of the SRN plus evidence of how mode shift in modelled scenarios 2 and 3 could be delivered.

While there is some further information provided within the evidence base on the latter, it is insufficient to demonstrate that the mode shift can be achieved. The former traffic flow information is still outstanding and this raises concerns as to the validity of the transport modelling evidence in relation to impacts on the SRN.

We have examined the transport assessment evidence base from St Albans' website, it appears that the main transport report has not been included. There is a tab labelled "Report Final Issued.pdf", however when clicking on the tab it produces a report "COMET 7 Forecasting Report"

dated November 2022, identical to the report under a separate tab above on the same webpage. The main report has seemingly been omitted presumably by administrative error, so further documentation is required in support of the transport evidence.

Reviewing the modelling evidence provided in the Modelling Report (August 2024) there is insufficient information provided in relation to the SRN to determine whether there are any severe impacts or unacceptable safety concerns resulting from the Local Plan. We would need to see evidence at junction level relating to differences in queues and delays “with and without” the Local Plan. Additionally, we require evidence of traffic flows through merges and diverges on the SRN network “with and without” the Local Plan to determine whether the merges and diverges with the main carriageways can accommodate traffic flow changes.

Therefore, in our judgement there is insufficient evidence to demonstrate that the Local Plan growth can be accommodated in transport terms on the SRN. Further evidence will be required to demonstrate that the Local Plan is sufficiently robust on transport grounds. We would request the opportunity to discuss these matters in more detail to reach agreement on what additional evidence is required to demonstrate either that the Local Plan will not have any severe or unacceptable safety impacts on the strategic road network or that suitable mitigation is included within the Plan and that there is a reasonable prospect of delivery at appropriate junctures in the Plan period. Given the current timeline for Local Plan to Examination we would stress the urgency to enter into immediate dialogue.

Having reviewed the Infrastructure Delivery Plan (IDP), we note that there is significant attention paid to improvements on the A414. Although the A414 is only part of the SRN between M1 J8 and the Park Street Roundabout, and the proposed improvements fall outside of this area, we will still be interested in the funding and delivery of improvements proposed. In particular, the improvements to the Park Street Roundabout as described in section 7.2 of the IDP could impact the SRN, even if entirely within Local Highway Authority land.

The IDP currently lists improvements to M1 J8 as being funded by a combination of National Highways through RIS3 and developer contributions. We would like to highlight that any proposed improvement to M1 J8 Breaksphere Interchange is not part of the RIS3 programme. Should this improvement be necessary to facilitate Local Plan growth, appropriate alternative funding and management should be in place, with the agreement of National Highways. As previously noted, there cannot be any presumption that such infrastructure will be funded through any future RIS during the Plan period. Notwithstanding this, National Highways supports the safeguarding of land for expansion of M1 J8 should it come forwards at a later date, during the Plan period.

Statement of Common Ground

We are still liaising with the council and will review the supporting transport evidence from the ongoing traffic modelling discussion. It will be essential for National Highways and the council to agree a statement of common ground following our review of the modelling, setting out any potential concerns and agreed next steps in advance of an Examination in Public. We look forward to continuing our constructive engagement.

National Highways are unable to confirm that the Plan is sound until further evidence is provided, the required sustainable transport mitigation measures to mitigate the impacts of the Plan have detailed cost estimates and funding sources are committed.

However, National Highways supports St Albans District Councils commitment to work in partnership with stakeholders including Hertfordshire County Council, neighbouring authorities, National Highways and service providers to ensure that a range of sustainable and active transport options are available to all existing and future users of the transport network.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Therefore, in our judgement there is insufficient evidence to demonstrate that the Local Plan growth can be accommodated in transport terms on the SRN. Further evidence will be required to demonstrate that the Local Plan is sufficiently robust on transport grounds. We would request the opportunity to discuss these matters in more detail to reach agreement on what additional evidence is required to demonstrate either that the Local Plan will not have any severe or unacceptable safety impacts on the strategic road network or that suitable mitigation is included within the Plan and that there is a reasonable prospect of delivery at appropriate junctures in the Plan period. Given the current timeline for Local Plan to Examination we would stress the urgency to enter into immediate dialogue.

National Highways are unable to confirm that the Plan is sound until further evidence is provided, the required sustainable transport mitigation measures to mitigate the impacts of the Plan have detailed cost estimates and funding sources are committed.

However, National Highways supports St Albans District Councils commitment to work in partnership with stakeholders including Hertfordshire County Council, neighbouring authorities, National Highways and service providers to ensure that a range of sustainable and active transport options are available to all existing and future users of the transport network.

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Movement and access
HCC Public Health support Strategic Policy SP8 – Transport Strategy, which prioritises active and sustainable transport modes and restrictions on car journeys. We are pleased to see that this policy refers to the HCC Travel Plan Guidance which requires developments to submit a travel plan to embed sustainable and active travel at an early stage of the design process. This policy also requires developments to be in sustainable locations with provision for walking and cycling.

**329 - Mr Russell Crow**

Submission Number: 329 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Mr Peter Atkin

On Behalf Of Company/Organisation: Richborough Estates Name: Mr Russell Crow

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Richborough notes the request at criterion i) for Masterplans at 'Broad Locations' to include the implementation of sustainable travel infrastructure. In line with comments made in response to Policy LG1, additional clarity needs to be provided on the Masterplan process. This is important to ensure reasonable detail is requested at the Masterplan stage, that does not unduly delay the progress of applications at the development management stage. Additionally, it is also important at ensuring applicants have a clear and transparent process through which a Masterplan can be progressed, so there is certainty from the outset on the timescales and work involved.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. Luton Council considers that the draft Local Plan is a sound, positive approach to plan making, however given the influence of Luton airport, planned future growth, the generation of travel movements and the commuting relationship between St Albans and the airport, it is considered that the Local Pan could be more effective in relation to the need for integrated strategic transport measures and opportunities afforded by the HERT proposals and Luton's own DART mass transit scheme.

Changes could be made to strategic policies SP8 (Transport strategy) TR1 (Transport Considerations for New Development) and TR2 (Major Transport Schemes) and the SADC Infrastructure Development Plan to further recognise these influences and relationships and the need for improved public transport provision in the context of the need to improve inter-urban connectivity.

***Policy SP8- Transport Strategy***

We support the aspiration of Policy SP8: *Transport Strategy* to "*prioritise the use of active and sustainable transport modes and deliver accessibility improvements to the transport and highways network…*".

We recognise that there are a number of evidence base documents that support Policy SP8 Including the following documents:

- HCC Local Transport Plan 2018-2031 (LTP4), which promotes sustainable transport modes, related infrastructure, encourages change in travel behaviour and seeks to reduce the need to travel.

- South West Herts Growth and Transport Plan (GTP) and South Central Herts GTP, which are supporting strategies to LTP4
- Local Cycling and Walking Infrastructure Plan (LCWIP)
- Infrastructre Delivery Plan (IDP)

*To ensure the effectiveness and deliverability of the Transport Strategy Policy SP8 aspiration, we are of the view that further consideration should be given to the comprehensive infrastructure requirements to support the overall proposed overall HGC Growth Area, the delivery phasing across the authority boundaries and mechanism for appropriating cost.*

We acknowledge that the St Albans City & District IDP refers to a number of ongoing studies which are relevant to the IDP but were not published at the time that the current IDP report was prepared.

These are as follows:

- Transport Impact Assessment (on behalf of St Albans City and District Council);
- St Albans Modal Shift Study (on behalf of Hertfordshire County Council);
- Hemel Garden Communities Opportunity to Shift Modes (on behalf of Hemel Garden Communities);
- Transport Study for Hemel Hempstead (on behalf of Dacorum Borough Council);
- Hemel Hempstead Local Walking and Cycling Infrastructure Plan (on behalf of Dacorum Borough Council);
- East Hemel Hempstead Garden Community Masterplan (on behalf of The Crown Estate) and future masterplan (on behalf of other landowners); and
- Traffic forecast to 2041 for St Albans District using COMET8 (on behalf of St Albans District Council and Hertfordshire County Council).

*We therefore consider that an updated St Albans City & District IDP is required to be published in advance of the Examination in Public to incorporate all of the relevant emerging evidence base.*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Kitewood is a development company and landowner of part of the proposed Hemel Garden Communities (HGC) Growth Area to the north and east of Hemel Hempstead. Our landholding falls wholly to the north within Dacorum Borough, and abuts the boundary with the St Albans City & District, adjacent to the Reg 19 Local Plan proposed allocation H1- north Hemel Hempstead.

Kitewood considers that the *Draft Local Plan 2041 Regulation 19 is Legally compliant*, has been *Positively prepared*, is *Justified*, and is *consistent with national policy*.

However, we do not consider that Policies SP1, SP8 and TR1 are effective because all the evidence does not yet exist to demonstrate effective joint working on cross-boundary strategic matters.

***Kitewood therefore request participation in the forthcoming Examination in Public to discuss policy matters relating to the Proposed site allocations H1, H2, H3 and H4***

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We have some comments in relation to air quality and the need to consider air pollution issues on the natural environment, both in the Core Policy for Air Quality, and in relation to policies TRA3 (Development Generating New Lorry Movements) and Strategic policy SP8 (Transport Strategy). It is important that in addition to human health, environmental considerations including air quality impacts on air quality sensitive protected sites are included in policy wording.

...

Strategic Policy SP8 –transport strategy

We would like to see, in addition to consideration of impacts on human health, inclusion of environmental risks around air quality impacts on air quality sensitive designated sites. Further information on this is provided in comments relating to policy HW1 which we would recommend cross referencing in policy SP8.

Policy HW1 –Air and Noise Pollution

The Policy on air quality should be expanded to include reference to air pollution impacts on the natural environment and relevant protected sites. Employment and residential allocations have the potential to increase Annual Average Daily Traffic (AADT) on roads within 200m of protected sites. Air quality impacts should be assessed at the Local Plan stage, rather than individual planning applications, as the outcome of assessment may result in a change to site allocations within the draft St Albans Local Plan.

Natural England's report on the assessment of road traffic emissions (NE001) should be followed when assessing road traffic emissions. Roads within 200m of protected sites should be modelled and assessed in relation to site allocations, prior to inclusion of site allocations in the submission version of the St Albans Local Plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

1. 489319 NE RESPONSE St Albans Local Plan Reg 19 consultation_[R].pdf

## 366 - Chrissie Chadney

Submission Number: 366 Submission Date: 10/11/24 09:00

Respondent: Company/Organisation: Name: Chrissie Chadney

Comment Number: 3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I have been a resident in Wheathampstead for over forty years and read the proposed District Plan with interest. Whilst there are some good ideas in it, there are a number of things which give me concern. I have read the WDPS response and concur with it fully, but have a few additional things to say here.

Transport and Traffic Issues: The anticipated population increase will undoubtedly exacerbate existing traffic issues. Over my years in Folly Fields I have seen the B651 change from one where a horse or bicycle could be safely ridden, to one with a virtually permanent stream of traffic, with many vehicles going much faster than the required 30mph. Roads such as the B651 and B653 are already nearing capacity, and with the additional burden from new housing, we could see a significant rise in congestion and accidents. This plan must consider enhancing public transport and developing cycling infrastructure to mitigate these effects and support a sustainable transport network.The reality is that Wheathampstead residents will need to use Harpenden to shop and catch trains to London. The plans to remove much of the parking in Harpenden, where even at the moment you cannot get into the station car park after 9am, are little short of madness.

Community and Accessibility: I fully support the efforts of the “Inclusive Wheathampstead Working Group” to improve accessibility throughout our area. The introduction of green corridors and safe cycling routes would greatly benefit our community's health and mobility, reducing our reliance on cars and helping to preserve our local environment.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Conclusion: I firmly stand with the WDPS in urging a comprehensive reevaluation of the Draft Local Plan. It is essential that the plan not only reflects realistic population projections but also prioritizes environmental conservation, sustainable development, and the enhancement of local services and infrastructure. We need a balanced, forward-thinking approach that truly serves the interests and needs of all of the St Albans District's residents.

## 367 - Ms Julie Bell

Submission Number: 367 Submission Date: 10/11/24 09:00

Respondent: Company/Organisation: Name: Ms Julie Bell

Comment Number: 3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Transport and Traffic Issues:**
The increase in population this plan aims to support will inevitably worsen the existing traffic problems. Roads like the B651 and B653 are nearing their full capacity, and additional housing will likely lead to increased congestion and a higher incidence of traffic accidents. It is crucial that the plan incorporates strategies to enhance public transport and develop cycling infrastructure, promoting a sustainable and efficient transport network.

**Community and Accessibility:**
I wholeheartedly endorse the initiatives of the “Inclusive Wheathampstead Working Group” to enhance accessibility across our community. Implementing green corridors and safe cycling paths will significantly improve community health and mobility, lessen our dependence on cars, and help preserve our environment.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion:**
I stand firmly with the WDPS in calling for a thorough reevaluation of the Draft Local Plan. The plan must accurately reflect our realistic population growth projections and prioritize environmental protection, sustainable development, and the improvement of local services and infrastructure. A balanced and visionary approach is required to genuinely meet the needs and interests of the residents of the St Albans District.

## 370 - Diane Black

Submission Number: 370 Submission Date: 09/11/24 09:00

Respondent: Company/Organisation: Wheathampstead District Preservation Society Name: Diane Black

Comment Number: 3

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**WDPS comments on St Albans City and District Council Draft Local Plan**

Wheathampstead and District Preservation Society (WDPS) has approximately 400 households as members, and we therefore speak for around 15% of the population of the Wheathampstead area.

**Traffic**

However, many dwellings are constructed there will inevitably be an increase in traffic. The main roads in and out of Wheathampstead, especially the B651 and the B653, are already very busy. Both roads are extremely narrow in parts and have been getting busier and busier in the last few years with regular growing traffic tailbacks at busy times. On the B651 in and around Sandridge, new dwellings are already being constructed increasing already heavy traffic volumes. The B651 in particular is regularly used by cyclists and has a number of accident black spots where there have been serious accidents recently. According to data from Crashmap, in the last 10 years there have been 7 accidents on the B651 from Wheathampstead to Sandridge, 2 fatal and 2 serious and 25 accidents on the B653 from Marford roundabout to Katherine Warington School, 4 serious.

Any significant increase of traffic on these would give rise to an unacceptable level of congestion and higher risk of accidents. Careful consideration needs to be given as to how traffic from any new development would feed into these routes without causing undue congestion.

New developments also need to be sited and designed so that the impact on country lanes and residential streets is minimised.

A significant increase in road traffic would cause air quality to suffer further in the medium term, which in turn would have a detrimental impact on health.

Public transport, which has been declining, should be improved to meet the needs of a larger

population, and cycling should be encouraged. However, many people will continue to use their cars, and the car park in the centre of Wheathampstead must remain free to use in order to discourage parking in the busy High Street or in nearby residential roads.

There is also no mention of additional commuter trains from Thameslink to take workers into London from Harpenden. The current trains are already at capacity at peak times with standing room only and there is no contingency in the system.

**Factors Outside Wheathampstead**

Wheathampstead would of course also be impacted by nearby development outside its borders, in particular the developments at B2 North East Harpenden, M17 North of Wheathampstead Road, M19 Piggotshill Lane and M20 Lower Luton Road. The large-scale development at North East Harpenden (B2) would vastly increase the amount of traffic using the already very busy B653 through both Batford itself and Wheathampstead.

A further threat comes from the possibility of developments outside the District. In particular, the proposed expansion of Luton Airport would have a major impact on our area in terms of traffic, pollution and noise.

The combination of these external factors and the developments proposed within Wheathampstead itself would put an enormous and unacceptable strain on local roads and would vastly increase noise and pollution levels.

**Cycleways**

The Wheathampstead Neighbourhood Plan highlights the lack of safe cycle routes linking the village to all neighbouring settlements. Key routes to Welwyn Garden City and Harpenden would provide ideal cycling commuter routes by connecting to major railway stations. The route to Harpenden would also make it safe for children to cycle to secondary school which is currently not possible as the B653 is deemed too dangerous for children to cycle on. These should be included in the Local Plan as “Cycleways proposed routes” in figure 1.3.

New cycling infrastructure by creating Safe Cycleways for Wheathampstead should be explicitly provided through Section 106 funding allocation when major developments are approved. Also, when the Local Plan is approved and when the District becomes eligible for Community Infrastructure Levy then Wheathampstead must be allocated a significant share for cycling infrastructure since a failure to do so will perpetuate the use of private cars.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Summary**

Considering the comments above, we urge the council to revisit the draft Local Plan, challenge the Government’s Standard Method for calculating housing needs and produce a more equitable balanced plan that serves the needs of the St Albans District residents. We would like to see more detailed planning which includes funding allocation and addresses key issues on exactly how the plan is going to meet climate change targets, deal with extreme weather events, increase biodiversity by 10%, protect the Green Belt, improve transport networks including cycleways, improve water networks and prevent pollution of our rivers, improve services and facilities and protect secondary school placements.

## 115 - Mr Geoffrey Coates

Submission Number: 115 Submission Date: 07/11/24 00:58

Respondent: Company/Organisation: Name: Mr Geoffrey Coates

Comment Number: 1

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

The level of development within Redbourn Parish (3768 new dwellings in one rural parish), and in particular the Hemel Garden Communities proposal (H1-H4) are wholly incompatible with TRA1 provisions a i and aii.

a i: Safe and suitable access cannot be provided for walking, cycling and vehicles to so many additional dwellings using existing infrastructure. Redbourn lies beyond walking distance to any station; cycling is impractical for those with luggage, those who cannot dress for wet weather, the mobility impaired and the elderly. Hemel Garden Communities (a total of 11,000 new dwellings, of which around 3100 in Redbourn Parish) is five miles from the nearest station and is car-dependent from the get go. No credible plan has been offered to mitigate this; merely hopes of modal shift on an unprecedented scale. This is not consistent with the duty to consider climate impact.

a ii: Development on this scale will inevitably cause unacceptable impacts upon the transport network. The B487 is the only road serving Hemel Garden Communities. It already comes to a standstill in peak hours. It cannot support the additional traffic of an 11,000 home development, a large industrial estate and further building in Redbourn itself.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Development on this scale is not feasible at this site without contravening TRA1 clauses a i and ii. There is no credible means to avoid car use in a development 5 miles from the nearest station. The only viable mitigation is to remove sites H1 and H2 from the plan.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

As stated in other annotations, St Albans District Council have conducted a PR exercise, not a consultation, at Reg 18. No meaningful improvements have been made to the Local Plan at this stage in response to comprehensive feedback from individuals and Redbourn Parish Council. It has been pushed forward as-is wihtout proper public engagement in an attempt to beat the introduction of the incoming government's new NPPF.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

6.17 This policy has been updated at a) i) to clarify that safe and suitable access also relates to walking, cycling (and not just vehicles). This is supported as it aligns with the NPPF.

6.18 Criterion x) has also been updated, requiring suitable mechanism to secure transport measures through the Bus Service Improvement Plan, Growth and Transport Plan plus anything identified within the Supporting Documents to the Local Transport Plan. This is an increase compared to the previous wording which only required delivery of schemes identified within the LCWIP.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

6.19 While this change is not objected to, we consider that flexibility should be imbedded within the wording here so that it is recognised that it may not be appropriate for all sites to meet **all** of the improvements identified within **all** of the listed documents, and that there should be a reasonableness test provided to any such schemes to ensure this policy is "justified".

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

The area covered by the VRA does not have adequate transport links to surrounding areas now, let alone after any further development in the area or beyond.

Our area, generates a lot of unavoidable short car journeys. Among the reasons for this are:

- our lack of local facilities – we don't, for example, have a GP or dentist

- we have no local community facilities
- we have few shops
- our bus service is sporadic to put it mildy
- and although a superficial glance at a map might make it look as though the city centre is readily accessible on foot or bike, we have between it and us the slopes of Verulamium Park and a footbridge/path from King Harry Lane into the park that is steep, narrow and very difficult, if not impossible for anoyone with mobility issues to use
- The main roads bordering the area: King Harry Lane, Hemel Hempstead Road, Watford Road and just outside the area, Watling Street are highly congested at the best of times and on those regular occasions when problems on the M1 or M25 occur, and displaced traffic uses these roads as a cut through,become gridlocked.

Many residents would welcome the opportunity to use their cars less, but in the current cicumstances this is not a practical possibility.

And we would also hope that this Local Plan would help to adress some of these shortcomings, thereby, among other things, reducing car usage.

The main roads bordering the area: King Harry Lane, Hemel Hempstead Road, Watford Road and just outside the area, Watling Street are highly congested at the best of times and on those regular and relatively frequent occasions when problems on the M1 or M25 occur, and displaced traffic uses these roads as a cut through,become gridlocked.

The Bluehouse Hill and Park Street roundabouts are always busy, and the King Harry roundabout (which we note was identified as a priority in the 1994 Local Plan) is seemingly a problem without a solution.

We believe that the proposed developments in Hemel Hempstead (in particular H3 and H4) Chiswell Green (L1) and Park Street (L2) would only add to the congestion on these roads

As, of course would M3 Bedmond Lane

This persistent congestion is a major issue, not just for pollution/climate change reasons but because it poses a potential threat to the safety of residents. All of the relatively few roads providing access to the 1100 or so homes in our area (Mayne Avenue, Abbey Avenue, the entrance to King Harry Park, St Stephen's Avenue and Midway open onto either King Harry Lane or Watford Road, so that when, as often happens, these two roads are at a standstill, getting into and out of the area in a timely manner is essentially impossible. This is frustrating for residents but, if emergency vehicles are considered, could have serious consequences.

In these circumstance it is hard to see how:

Policy TRA1 –Transport considerations for new development

Proposals must demonstrate that development would not lead to highway safety problems or cause unacceptable impacts on the transport network

and

Policy TRA3 -Development generating new lorry movements

Proposals for developments leading to significant increases in lorry movements shall demonstrate that any increase in lorry movements can be appropriately accommodated on the surrounding road network can remotely be met.

And this is all to deal with future increases in traffic loads, when the problem is happening now and needs to be tackled now. The major transport schemes listed in TRA2, even if they were to address the problems that our area faces (which most of them won't) won't be happening for some time yet.

Strategic Policy SP8 – Transport Strategy at point c says the council will "support reductions in car journeys for existing and new settlements" but it is hard to find anything in the plan that suggests how this will be done.

Admittedly the plan does say that "the council will work in partnership with stakeholders to ensure that a range of sustainable and active transport options are available" but again this all sound rather woolly. How, for example, will the council's performance against this target be monitored?

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**273 - Hallam Land Management and St Albans School**

Submission Number: 273 Submission Date: 08/11/24 09:33

Respondent: Company/Organisation: LRM Planning Name: Mr Owen Jones

On Behalf Of Company/Organisation: Hallam Land Management and St Albans School Name:

Comment Number: 22

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

9.2 Policy TRA1 lists the transport considerations for new development. Hallam and St Albans School previously raised concerns with the wording Criterion (a)(ii) which requires that development would not lead to highway safety problems or cause unacceptable impacts on the transport network. This language is considered imprecise and ambiguous when contrasted with §115 of the NPPF which states: *"Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts **on the road network would be severe**".* (emphasis added). This opinion remains.

9.3 Criteria b(i), b(iv) and b(x) of Policy TRA1 references the implementation of active travel routes, suggesting the elements of the wider active travel network which will need to be delivered independently by Broad Locations, even where the routes may benefit more than one Broad Location.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

9.4 Specifically, it is suggested that criterion (b)(x) is amended to read:

*"Suitable mechanisms will be provided to secure sustainable transport measures, including contributions towards or delivery of schemes identified in the LCWIP, Bus Service Improvement Plan, Growth & Transport Plan and IDP and improvements to the existing highway network and other appropriate transport mitigations, including as identified in Supporting Documents to the Local Transport Plan."*

Submission Number: 286 Submission Date: 07/11/24 09:00
Respondent: Company/Organisation: Quod Name: Alex Hamlet
On Behalf Of Company/Organisation: Name: Bloor Homes

Comment Number: 9

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**TRA1 - Transport Considerations for New Development**

3.12 Policy TRA1 sets out the transport considerations for new development. At part (ii) it states "*That development would not lead to highway safety problems or cause unacceptable impacts upon the transport network*". However, this is likely to be superseded by the current draft NPPF (July 2024) wording. It should reference to a vision for the development, and that the development may have an impact in some tested scenarios, but not in the desired vision. At part (b) it states that "Major proposals must demonstrate as appropriate how: i. Measures to reduce the need to travel by private car are identified and implemented…". The test should also reference an overall reduction in the need to travel overall, rather than just by car. This would correspond with Policy LG3, paragraph 109 of the NPPF and paragraph 107 of the draft NPPF (July 2024).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**291 - SEGRO (Radlett) Limited**

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 11

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

6.1 Strategic Policy SP8 - Transport Strategy outlines how the Council *will 'prioritise the use of active and sustainable transport modes and deliver accessibility improvements to the transport and highways network'*.

6.2 Policy TRA1 – Transport Considerations for New Development sets out the requirements for major proposals to ensure that *'safe and suitable access can be provided' and 'development would not lead to highway safety problems or cause unacceptable impacts upon the transport network'*.

6.3 Policy TRA2 – Major Transport Schemes states in part (b) that *'there is now a reasonable prospect that the Government permitted Strategic Rail Freight Interchange identified in policy EMP2 will be delivered during the Plan period. The Council supports the road and sustainable transport infrastructure needed to mitigate it, in particular A414 enhancement.*'

6.4 As discussed above in paragraph 5.13, SEGRO (Radlett) Limited welcome the recognition of the SRFI in policy TRA2, we further consider that the the policy wording of *'a reasonable prospect'*of the SRFI will be delivered could be more accurately stated as a 'likely' or 'good prospect' given the fact that development has commenced on site and the clear delivery programme set out by SEGRO (Radlett) Limited.. Nonetheless, SEGRO (Radlett) Limited consider the support for *'road and sustainable transport infrastructure needed to mitigate'*the SRFI, in particular regarding the A414, to be sound.

6.5 Policy TRA3 – Development Generating New Lorry Movements sets out requirements for proposals leading to significant increases in lorry movements and how they can reduce their impact on the environment and congestion.

6.6 Policy TRA4 – Parking states that development proposals should meet on-site car and cycle parking standards for new non-residential development which are set out within the draft Local Plan. It is acknowledged that the SRFI consent has a condition (no. 10) restricting the maximum number of parking spaces, which would be less parking provision than the draft policy. However, it is specific to the approved development and any future need to review parking spaces will be subject to detailed assessment at the relevant time. SEGRO (Radlett) Limited are supportive of Policies TRA3 and TRA4 which set out the car and lorry transport and parking requirements.

6.7 In addition to encouraging the transfer of freight from road to rail, the SRFI will also improve local transport connections in line with the draft Local Plan policies SP8, TRA1 and TRA3. The SRFI will become a nationally significant logistics hub which will meet the requirements of businesses serving London and the South-East of the UK.

6.8 The Radlett SRFI development will deliver a wide range of transport benefits, including combination of on and off-site highway works with improvements to the PRoW network will fully consider the needs of pedestrians and cyclists. Alongside the measures addressed in the draft TFMMP, it will ensure the scheme is well served by a range of transport modes with the aim of reducing reliance on cars.

6.9 Overall, SEGRO (Radlett) Limited are supportive of Policies SP8, TRA1, TRA2, TRA3 and TRA4 and consider them to be sound. It is considered these policies are an important inclusion within the draft Local Plan to ensure SADC is well connected, accessible and encourages sustainable transport.

**303 - Phil Escritt**

Submission Number: 303 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Open Space Society Name: Phil Escritt

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Consultation Need to explicitly refer to the HCC Rights of Way improvement Plan (ROWIP)**

These gaps would be substantially filled by reference to the Herts County Council's Rights of Way improvement Plan (ROWIP). The ROWIP is a statutory requirement of the Countryside and Right of Way Act (CROW) 2000. The Hertfordshire ROWIP is in two parts. The first part, the policy document, is an assessment of the current situation and a statement of action. It is supplemented by a database of "suggestions" for improvements. This database is a living document which is added to over time based on input from councillors, officers and members of the public.

The St Albans Access Forum which comprises representatives of walking, cycling and horse riding organisations has systematically reviewed the situation in the district's parishes and submitted suggestions which have been included in the ROWIP database. The ROWIP suggestions now cover a large proportion of the selected sites in this plan.

The HCC ROWIP is a daughter document of the Local Transport Plan LTP4 and is therefore implicitly covered by paragraph a) of strategic policy SP8, Transport Strategy which requires alignment with the HCC "Local Transport Plan (LTP) and other evidence and supporting documents, as relevant."

The Local Plan will be made more effective and proportionate by explicitly referencing the ROWIP in the following policies.

- Policy LG1 – Broad Locations. In paragraph l) after "LCWIP" add "and ROWIP"
- Policy LG4 – Large, Medium and Small Sites. In paragraph j) after "LCWIP" add "and ROWIP"

- Policy SP8 – Transport Strategy. In paragraph a) after “supporting documents as relevant” add “e.g the ROWIP”
- Policy TRA1 – Transport Considerations for New Development. In paragraph b) sub paragraph x) after “LCWIP” add “and ROWIP”

The Society strongly recommends that the district council should adopt these changes.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). ### 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 8

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraph 35 and 36 of the 2023 NPPF require that local plans be effective to be considered sound. To do so its policies must be deliverable over the plan period and dealt with rather than deferred.

Policy, both in Part A and Part B, refers to sites 'supporting' and 'contributing to' their required transport infrastructure mitigation. For example, strategic policy SP14 at Part A requires proposals for development to 'provide, finance and / or contribute' to infrastructure and allocation B1 at Part B requires that the site deliver 'Contributions / enhancements to support relevant schemes'. Policy therefore rightly requires that mitigation be made, and HCC supports the intention of the plan to ensure mitigation is made. However it leaves issues of the delivery mechanism and timing to the decision-maker. This specific allocation is only taken as an example, and the same principle applies to all allocations.

NPPF paragraphs 108, 109, and 100 govern how LPAs must consider sustainable transport provision in plan-making. Paragraph 108 sets a number of objectives including ensuring impacts on the network are addressed and pursuing opportunities to maximise active and public transport. The 2024 draft consultation NPPF further requires a vision led approach at paragraphs at paragraph 122.

To achieve this, the infrastructure required to achieve shift towards active and sustainable modes of transport must be provided by default prior to the first occupation. To do otherwise risks unsustainable behaviours being embedded prior to infrastructure being delivered and take-up therefore being lower than that is needed to make development acceptable a decision-making stage. Policy TRA1 requires that on major development 'Active and sustainable connections to key destinations are deliverable at an early stage of development'. However, policy on infrastructure delivery does not dovetail with this requirement and therefore risks undermining this in practice. As stated above, policy is agnostic on delivery of financial contribution via a s106 agreement or CIL (if adopted) or directly via a s278 agreement. It is unlikely however that delivery of transport infrastructure via a financial contribution, even if sufficient to pay for infrastructure, can deliver infrastructure in sufficient time. Instead, this issue is deferred to development management stage.

Therefore for the aspirations of the plan to be considered deliverable and therefore sound the plan should take a more proactive approach to the delivery mechanism of infrastructure so that the aspirations of policy TRA1 are delivered.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To be considered sound the plan should:

1. Amend policy IMP1 at Part A to ensure that proposals demonstrate how transport schemes required to make sites sustainable will be delivered;
2. Amend policy in the site allocations at Part B to refer to delivery of infrastructure rather than just contributions; and
3. Amend the Infrastructure Impact Assessments to refer to delivery of infrastructure rather than just contributions;

Firstly, policy TRA1 should be strengthened to ensure that transport infrastructure will be delivered in the real world rather than be merely deliverable in the abstract. Demonstrating deliverability in the abstract is not a sufficiently robust test as applicants would not have to demonstrate that the delivery mechanism, as well as the scheme itself, ensures delivery at an early stage of development.

*Major proposals must demonstrate as appropriate how...Active and sustainable connections to key destinations [deleted text] will be delivered at an early stage of development;*

Similarly, policy TRA3 should be amended along similar lines to ensure that infrastructure is delivered in practice for proposals generating heavy goods vehicle movements:

Encourage and enable Heavy Goods Vehicles to use the primary route network by means of signing and traffic management.

Secondly, the policy wording in the site allocations at Part B should be amended to give support to delivery of infrastructure (irrespective of the delivery mechanism) rather than wording that implies making a financial contribution that may be incapable of being secured, spent, and delivered early in the development.

For example, at allocation B1 (taken as an example only):

Contributions / [deleted text] to delivery of support relevant schemes in the LCWIP and GTPs as indicated in the TIA.

[deleted text]Improvements via delivery or contributions to the transport network (including walking and cycling links) and public transport services upgrades / improvements, including off-site improvements to Harpenden Road, Sandridgebury Lane, Valley Road, Ancient Briton junction and King William IV junction, links to St Albans City Centre, station and education, aligned to schemes in the GTPs and LCWIP.

Similar wording appears in all the allocations and should be amended along the lines of the above.

Finally, the TIAs should be amended on similar lines, again taking allocation B1 as an example:

5. Settlement Strategy – St Albans (Indicative Contributions)

This site will make significant contributions or direct delivery of infrastructure to

St Albans Settlement Strategy.

Taken together, these amendments would ensure that both the scheme and the delivery mechanism align to provide infrastructure early in the build out of development, thereby enabling sustainable travel behaviours and mode shift in line with the NPPF sustainable development objective

### 340 - Chris Thom

Submission Number: 340 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Luton Borough Council Name: Chris Thom

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Luton Council considers that the draft Local Plan is a sound, positive approach to plan making, however given the influence of Luton airport, planned future growth, the generation of travel movements and the commuting relationship between St Albans and the airport, it is considered that the Local Pan could be more effective in relation to the need for integrated strategic transport measures and opportunities afforded by the HERT proposals and Luton's own DART mass transit scheme.

Changes could be made to strategic policies SP8 (Transport strategy) TR1 (Transport Considerations for New Development) and TR2 (Major Transport Schemes) and the SADC Infrastructure Development Plan to further recognise these influences and relationships and the need for improved public transport provision in the context of the need to improve inter-urban connectivity.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**354 - Kitewood**

Submission Number: 354 Submission Date: 14/11/24 09:00

Respondent: Company/Organisation: Name: Miss Sara Sweeney

On Behalf Of Company/Organisation: Name: Kitewood

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

***Policy TRA1 - Transport Considerations for New Development***

Policy TRA1: *Transport Considerations for New Development* sets out the importance that proposals will not lead to highways safety problems or cause unacceptable impacts upon the transport network.

Part (x.) of Policy TRA1 states that; "*Suitable mechanisms will be provided to secure sustainable transport measures, including delivery of schemes identified in the LCWIP, Bus Service Improvement Plan, Growth & Transport Plan and IDP and improvements to the existing highway network and other appropriate transport mitigations, including as identified in Supporting Documents to the Local Transport Plan."*

*Kitewood considers that further evidence is required to demonstrate cross-boundary co-operation and cumulative impact assessments on transport matters and further information is necessary in relation to the mechanisms that will ensure the sustainable growth of Hemel Hempstead during the plan period.*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

*Kitewood considers that further evidence is required to demonstrate cross-boundary co-operation and cumulative impact assessments on transport matters and further information is necessary in relation to the mechanisms that will ensure the sustainable growth of Hemel Hempstead during the plan period.*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Kitewood is a development company and landowner of part of the proposed Hemel Garden Communities (HGC) Growth Area to the north and east of Hemel Hempstead. Our landholding falls wholly to the north within Dacorum Borough, and abuts the boundary with the St Albans City & District, adjacent to the Reg 19 Local Plan proposed allocation H1- north Hemel Hempstead.

Kitewood considers that the *Draft Local Plan 2041 Regulation 19 is Legally compliant*, has been *Positively prepared*, is *Justified*, and is *consistent with national policy*.

However, we do not consider that Policies SP1, SP8 and TR1 are effective because all the evidence does not yet exist to demonstrate effective joint working on cross-boundary strategic matters.

***Kitewood therefore request participation in the forthcoming Examination in Public to discuss policy matters relating to the Proposed site allocations H1, H2, H3 and H4***

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## TRA2 - Major Transport Schemes

### 15 - Trans Link London Limited

Submission Number: 15 Submission Date: 18/10/24 12:13

Respondent: Company/Organisation: PJB Planning Name: Peter Biggs

On Behalf Of Company/Organisation: Trans Link London Limited Name:

Comment Number: 10

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Whilst the principles of Policy TRA2 are supported, it is consider the policy misses an opportunity to promote a new rail station at land north of Napsbury Park Estate (Parcel 515) that would provide a rail link into St Albans and London for residents of Napsbury, Napsbury Park Estate and London Colney, thus significantly reducing the need to use the car.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Further consideration should be given to including a new rail station on land to the north of Napsbury Park Estate (Parcel 515) along the Midland Main line.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To scrutinise policy TRA2 in more detail and put forward the case for a new rail station on land to the north of Napsbury Park Estate along the Midland Mainline between London and St Albans.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

WBC will continue to work with SADC and HCC to plan and deliver cross boundary infrastructure projects, such as the HERT and improvements to the Abbey Line. Efforts to enhance the Abbey Line, which currently provides a key, but irregular, sustainable transport connection between Watford and St Albans, are fully supported and it is pleasing to see references to this in the draft Plan.

These cross boundary sustainable transport projects will further improve regional connectivity and improve access to economic opportunities across South West Hertfordshire.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

n/a

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

The area covered by the VRA does not have adequate transport links to surrounding areas now, let alone after any further development in the area or beyond.

Our area, generates a lot of unavoidable short car journeys. Among the reasons for this are:

- our lack of local facilities – we don't, for example, have a GP or dentist
- we have no local community facilities
- we have few shops
- our bus service is sporadic to put it mildy
- and although a superficial glance at a map might make it look as though the city centre is readily accessible on foot or bike, we have between it and us the slopes of Verulamium Park and a footbridge/path from King Harry Lane into the park that is steep, narrow and very difficult, if not impossible for anoyone with mobility issues to use
- The main roads bordering the area: King Harry Lane, Hemel Hempstead Road, Watford Road and just outside the area, Watling Street are highly congested at the best of times and on those regular occasions when problems on the M1 or M25 occur, and displaced traffic uses these roads as a cut through,become gridlocked.

Many residents would welcome the opportunity to use their cars less, but in the current cicumstances this is not a practical possibility.

And we would also hope that this Local Plan would help to adress some of these shortcomings, thereby, among other things, reducing car usage.

The main roads bordering the area: King Harry Lane, Hemel Hempstead Road, Watford Road and just outside the area, Watling Street are highly congested at the best of times and on those regular and relatively frequent occasions when problems on the M1 or M25 occur, and displaced traffic uses these roads as a cut through,become gridlocked.

The Bluehouse Hill and Park Street roundabouts are always busy, and the King Harry roundabout (which we note was identified as a priority in the 1994 Local Plan) is seemingly a problem without a solution.

We believe that the proposed developments in Hemel Hempstead (in particular H3 and H4) Chiswell Green (L1) and Park Street (L2) would only add to the congestion on these roads

As, of course would M3 Bedmond Lane

This persistent congestion is a major issue, not just for pollution/climate change reasons but because it poses a potential threat to the safety of residents. All of the relatively few roads providing access to the 1100 or so homes in our area (Mayne Avenue, Abbey Avenue, the entrance to King Harry Park, St Stephen's Avenue and Midway open onto either King Harry Lane or Watford Road, so that when, as often happens, these two roads are at a standstill, getting into and out of the area in a timely manner is essentially impossible. This is frustrating for residents but, if emergency vehicles are considered, could have serious consequences.

In these circumstance it is hard to see how:

Policy TRA1 –Transport considerations for new development

Proposals must demonstrate that development would not lead to highway safety problems or cause unacceptable impacts on the transport network

and

Policy TRA3 -Development generating new lorry movements

Proposals for developments leading to significant increases in lorry movements shall demonstrate that any increase in lorry movements can be appropriately accommodated on the surrounding road network can remotely be met.

And this is all to deal with future increases in traffic loads, when the problem is happening now and needs to be tackled now. The major transport schemes listed in TRA2, even if they were to address the problems that our area faces (which most of them won't) won't be happening for some time yet.

Strategic Policy SP8 – Transport Strategy at point c says the council will "support reductions in car journeys for existing and new settlements" but it is hard to find anything in the plan that suggests how this will be done.

Admittedly the plan does say that "the council will work in partnership with stakeholders to ensure that a range of sustainable and active transport options are available" but again this all sound rather woolly. How, for example, will the council's performance against this target be monitored?

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

Comment Number: 19

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*Refer to Attached submission letter for whole response and figures.*

16.17 Clearly, the 'Major Transport Schemes' set out in Policy TRA2 are subject to any future transport modelling so the list of major schemes could very well change and increase in terms of requirements.

16.18 As we have set out in the IDP section, the transport projects in the IDP are lacking any substantive detail including project details, timing / phasing and do not have cost estimates and do not have secured funding.

16.19 Chapter 8 (Transport) is virtually silent on any improvements to local bus services. As we set out in our representations, Redbourn does not have a railway station so is completely reliant on local bus services for its public transportation and the existing service is not adequate – planning nearly 700 additional dwellings in Redbourn, without proper investment in the bus service, will leave no viable choice other than driving a car.

16.20 Policy TRA2 states that the Council will support the delivery of Improvements to Walking and Cycle Infrastructure as identified in the LCWIP. The LCWIP is limited to St Albans City and Harpenden with a future version covering the other settlements including Redbourn.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**TRA2 – Major Transport Schemes**

3.13 The Parking policy across the District is set out in TRA4 Parking. Part (e) states that "*New development at Broad Locations should: i. Prioritise sustainable and active modes of transport*". This is a repetition of the same point in Policy LG1 on Broad Locations and does not need repeating in this policy.

3.14 Part (f) also provides guidance on car clubs, stating that SADC will seek financial contributions from all major developments to car club facilities. However, such specific requirements reduces the opportunity for applicants and promotors to engage directly with and appoint a car club provider, which may allow more flexibility of delivery and innovation of approach over time. It is proposed that the policy is re-worded as follows:

(f) "The Council supports provision for car clubs to help reduce the need for private car parking. Provision of suitable onsite car club facilities is required for development of 100 or more dwellings or 10,000m² of non-residential floorspace. The Council will **either** seek appropriate financial contributions from all major developments to car club facilities and schemes, **or the Council will secure a car club to be delivered by the Developer by a planning condition**."

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**291 - SEGRO (Radlett) Limited**

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 12

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

6.1 Strategic Policy SP8 - Transport Strategy outlines how the Council *will 'prioritise the use of active and sustainable transport modes and deliver accessibility improvements to the transport and highways network'*.

6.2 Policy TRA1 – Transport Considerations for New Development sets out the requirements for major proposals to ensure that *'safe and suitable access can be provided' and 'development would not lead to highway safety problems or cause unacceptable impacts upon the transport network'*.

6.3 Policy TRA2 – Major Transport Schemes states in part (b) that *'there is now a reasonable prospect that the Government permitted Strategic Rail Freight Interchange identified in policy EMP2 will be delivered during the Plan period. The Council supports the road and sustainable transport infrastructure needed to mitigate it, in particular A414 enhancement.*'

6.4 As discussed above in paragraph 5.13, SEGRO (Radlett) Limited welcome the recognition of the SRFI in policy TRA2, we further consider that the the policy wording of *'a reasonable prospect'*of the SRFI will be delivered could be more accurately stated as a 'likely' or 'good prospect' given the fact that development has commenced on site and the clear delivery programme set out by SEGRO (Radlett) Limited.. Nonetheless, SEGRO (Radlett) Limited consider the support for *'road and sustainable transport infrastructure needed to mitigate'*the SRFI, in particular regarding the A414, to be sound.

6.5 Policy TRA3 – Development Generating New Lorry Movements sets out requirements for proposals leading to significant increases in lorry movements and how they can reduce their impact on the environment and congestion.

6.6 Policy TRA4 – Parking states that development proposals should meet on-site car and cycle parking standards for new non-residential development which are set out within the draft Local Plan. It is acknowledged that the SRFI consent has a condition (no. 10) restricting the maximum number of parking spaces, which would be less parking provision than the draft policy. However, it is specific to the approved development and any future need to review parking spaces will be subject to detailed assessment at the relevant time. SEGRO (Radlett) Limited are supportive of Policies TRA3 and TRA4 which set out the car and lorry transport and parking requirements.

6.7 In addition to encouraging the transfer of freight from road to rail, the SRFI will also improve local transport connections in line with the draft Local Plan policies SP8, TRA1 and TRA3. The SRFI will become a nationally significant logistics hub which will meet the requirements of businesses serving London and the South-East of the UK.

6.8 The Radlett SRFI development will deliver a wide range of transport benefits, including combination of on and off-site highway works with improvements to the PRoW network will fully consider the needs of pedestrians and cyclists. Alongside the measures addressed in the draft TFMMP, it will ensure the scheme is well served by a range of transport modes with the aim of reducing reliance on cars.

6.9 Overall, SEGRO (Radlett) Limited are supportive of Policies SP8, TRA1, TRA2, TRA3 and TRA4 and consider them to be sound. It is considered these policies are an important inclusion within the draft Local Plan to ensure SADC is well connected, accessible and encourages sustainable transport.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Policy TRA2 –Major Transport Schemes**

*"a) The Council supports the delivery of the following major transport schemes in principle:*

1. *Improvements to Walking and Cycle Infrastructure*
2. *A package of transport measures to enhance M1 Junction 8 (M1 J8) and surrounding area, in association with Hemel Garden Communities (HGC);*
3. *Mobility Hubs located at Land East of Hemel Hempstead in association with HGC;*
4. *Transport schemes identified in the IDP;*
5. *Abbey Line enhanced service; and*
6. *Hertfordshire Essex Rapid Transport Scheme (HERT).*
7. *There is now a<u>strong likelihood</u> that the Government permitted Strategic Rail Freight Interchange identified in policy EMP2 will be delivered during the Plan period. The Council supports the road and sustainable transport infrastructure needed to mitigate it, in particular A414 enhancement.*
8. *Development should not prejudice the construction or effective operation of the existing transport infrastructure and schemes listed above. Any proposals for development that may reasonably be considered to impact upon transport infrastructure or the delivery of the identified schemes will not be supported unless it is demonstrated the proposal would not harm their delivery.*
9. *As the options for the transport schemes progress, the impact of the delivery of the major transport schemes will be subject to assessment in accordance with policies in the Plan such as archaeological assessment, environment assessment and flood risk."*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

---

**292 - Leverstock Green Village Association**

Submission Number: 292 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Troy Hayes

On Behalf Of Company/Organisation: Leverstock Green Village Association Name: Leverstock Green Village Association

Comment Number: 7

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

1.12. For the purposes of clarification, it is the Association's considered view that the Local Plan is unsound, and the Council has failed to discharge its Duty to Cooperate. The proposed scale and distribution of growth has not been justified, it has not been positively prepared, and the policies are ineffective. LGVA considers that the delivery of growth at the Hemel Garden Communities has not been demonstrated through technical evidence including the Council's Green Belt Review, Infrastructure Delivery Plan (IDP), Viability evidence and Transport evidence.

...

5. **Overall Timing and Housing Needs**

5.1. LGVA is concerned that the Regulation 19 Local Plan has been prepared in haste in order to avoid higher housing need / requirements through the proposed NPPF consultation.

5.2. We question whether SACDC has used the South West Hertfordshire Local Housing Needs Assessment (September 2020) to arrive at its housing need figure? This study was undertaken four years ago (2020) which is a considerable time ago and should be considered by SACDC to be an out-of-date evidence base document. Policy HOU2 (Affordable Housing) refers to a Local Housing Needs Assessment (LHNA) dated 2019 however this does not appear in the Draft Local Plan Evidence Base on SACDC's website

5.3. As we set out in our representations the Local Plan and particularly the Hemel Garden Communities allocations are not backed by sufficient or sound evidence to justify their inclusion in the Plan. Given that HGC is by far the most strategic development in the Local Plan and requires a very significant proposed release of Green Belt, the Local Plan should not be rushed through the way it has. This will only lead to the Local Plan either the Plan being at Examination for an extended period of time due to it requiring quite fundamental modifications to make it sound or it will be found unsound with no potential for its fundamental flaws to be modified leading to its withdrawal and SACDC will need to go back to the start of the process once again.

...

7. **Policy SP1 (A Spatial Strategy for St Albans District)**
**Policy LG2 (Support for Transformation of Hemel Hempstead) Site Allocation H4 (East Hemel Hempstead (South)**
**Policy LG3 (Hemel Garden Communities Growth Areas Place Principles)**
**Policy HOU6 (Gypsies, Travellers and Travelling Showpeople) Policy TRA2 (Major Transport Schemes)**

...

**Hemel Garden Communities**

7.2. We recognise the vision of HGC, but we are concerned there is no comprehensive infrastructure and transport plan to support the proposals. We also have misgivings that such a large-scale project involving two local authorities and multiple other agencies over such a protracted period is deliverable.

7.3. We appreciate the planning is at an early stage, but the task of coordinating all aspects of the HGC will be a major challenge. The timely delivery of infrastructure and particularly roads will be essential.

...

7.10. Furthermore, LGVA has serious doubts about the sound planning of infrastructure of HGC in terms of SACDC and on cross boundary infrastructure with neighbouring authorities. The Infrastructure Delivery Plan, Housing Trajectory and Viability Evidence provide us with no confidence that there is a coherent and sound plan for the coordination and delivery of the infrastructure to deliver the HGC and the quality of place-making set out in Policy LG3 (Hemel Garden Communities Growth Area Place Principles).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

For the purposes of clarification, it is the Association's considered view that the Local Plan is unsound, and the Council has failed to discharge its Duty to Cooperate.

The proposed scale and distribution of growth has not been justified, it has not been positively prepared, and the policies are ineffective. LGVA considers that the delivery of growth at the Hemel Garden Communities has not been demonstrated through technical evidence including the Council's Green Belt Review, Infrastructure Delivery Plan (IDP), Viability evidence and Transport evidence.

1. Reg 19 Leverstock Green Village Association vf_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Leverstock Green Village Association (LGVA) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Hemel Hempstead LGVA considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**322 - AbbeyRail**

Submission Number: 322 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: AbbeyRail

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Our primary concern in relation to the Local Plan is derived from the context arising from the planning of Hertfordshire Essex Rapid Transit (HERT). We provide an introduction to HERT at https://hertsrail.org.uk

HERT features content-free glossy marketing. Whilst we have no reason to object to a direct bus service between Hemel Hempstead and Harlow, the branch via Watford does not take into account reasonable alternatives proposed by us. We have multiple proposals. Over a period of some years these proposals have not been evaluated. Therefore HERT lacks justification.

AbbeyRail is provided by rail researcher RailAble. Objectively-assessed needs for transport connectivity were researched by consultants Atkins in 2014. They were also researched by England's Economic Heartland resulting in Passenger Rail Study Phase Two. We are putting forward proposals to meet these assessed needs, discussed in some detail in parts two and three of our research in the RailAble East west rail - Oxford to Cambridge project. HERT does not meet these assessed needs and therefore lacks positive preparation.

HERT fails two tests, both that of justification and of positive preparation. The implication for the St Albans Local Plan in terms of transport connectivity is that it fails to meet requirements.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Our primary proposals as they affect the St Albans Local Plan are:

(i) a rail link between St Albans Abbey station and Colney Fields shopping park. This is illustrated in orange below *[please see attached document]*, also with connecting chords to the Midland Main Line. Subsequently this would extend eastwards to Hatfield on the East Coast Main line. Rail access to Radlett SRFI as planned is illustrated in light blue *[please see attached document]*;

(ii) a rail link between St Albans Abbey and St Albans City stations. This is illustrated in dark blue below *[please see attached document]*;

(iii) a multi-storey car park replacing the Sainsbury's Supermarket car park. The car park would provide parking both for customers of Sainsbury's Supermarket and for the adjacent Abbey railway station;

(iv) an M25 parkway station at London Colney including a Thameslink service.

Additional proposals awaiting evaluation, mostly made by ourselves, include:

(a) an Abbey Line enhanced service, options including trains passing at How Wood or vicinity;

(b) East West rail at Watford Junction, connecting Watford High Street to the Abbey line;

(c) The Building Research Establishment (BRE) could be served by a new station stop on the Abbey line which passes at the boundary;

(d) a viable alternative to HERT:
To quote from Reg 19 Local Plan Part A Chapter 8 – Transport, page 78 section 8.4:
"Addressing the challenge of increased future travel demand cannot be solved solely through capacity driven highway infrastructure improvements. It will require" ... "traffic demand management measures where appropriate."
In response, there has been no consideration of demand management on the A414, which is used as a short-cut between the M25 and A1(M) motorways nor of how to provide a shorter link between these motorways that would not use the A414. Such a shorter link could run eastwards from M25 junction 22 and form a parallel corridor with a rail link from St Albans to Hatfield. As a longer term proposal, a shorter link between these motorways with a parallel rail link is far more fruitful in terms of transport connectivity than an upgrade to the A414.

Planning of a St Albans to Hatfield rail corridor via Colney Fields shopping park would need to take place prior to development of the Bowmans Cross proposal on the east of M25 junction 22 in Hertsmere Borough.

Signposting of routes for walking to the Abbey station are currently lacking.

AbbeyRail and others appreciate the support given to the Abbey line by St Albans City and District Council in previous years and very much hope this can continue.

### 340 - Chris Thom

Submission Number: 340 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Luton Borough Council Name: Chris Thom

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Luton Council considers that the draft Local Plan is a sound, positive approach to plan making, however given the influence of Luton airport, planned future growth, the generation of travel movements and the commuting relationship between St Albans and the airport, it is considered that the Local Pan could be more effective in relation to the need for integrated strategic transport measures and opportunities afforded by the HERT proposals and Luton's own DART mass transit scheme.

Changes could be made to strategic policies SP8 (Transport strategy) TR1 (Transport Considerations for New Development) and TR2 (Major Transport Schemes) and the SADC Infrastructure Development Plan to further recognise these influences and relationships and the need for improved public transport provision in the context of the need to improve inter-urban connectivity.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**349 - Lisa Peters**

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 16

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Major Transport Schemes**

CHPC acknowledges the mention of the Strategic Rail Freight Interchange (SRFI) in Policy TRA2, particularly in relation to the expected delivery of this development during the Plan period. While the CHPC recognises the potential economic benefits of the SRFI, particularly in terms of logistics and regional employment, it has significant concerns regarding the impact on the local transport network, specifically the A414, and the wider infrastructure needs of the area.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The proposed enhancement of the A414, as referred to in the policy, is critical for mitigating the increased traffic that is expected to result from the SRFI. However, CHPC urges that the road enhancements should not only focus on capacity increases but also consider the potential environmental impacts, such as noise, air pollution, and the degradation of rural character along the A414 corridor. CHPC consider that a direct link from the SRFI to M25 is the only way to mitigate the harm from the SRFI on the local highway network. There is a concern that simply improving the road may not sufficiently address the long-term sustainability of transport in the region, particularly for local communities like Colney Heath, where traffic congestion and limited access to public transport could be exacerbated.

CHPC further highlights the importance of ensuring that sustainable transport measures, such as improved public transport links and cycling infrastructure, are incorporated alongside the A414 enhancements. These measures would help reduce the dependency on private vehicles and minimise the environmental impact of increased traffic, benefiting both local residents and the broader district.

It is crucial that the infrastructure improvements associated with the SRFI are fully integrated with sustainable transport solutions to ensure that both the development itself and the surrounding communities can thrive without being adversely affected by traffic and environmental issues. In summary, while CHPC supports the road and transport infrastructure improvements related to the SRFI, it stresses the need for a balanced approach that prioritises both the effective management of transport needs and the long-term sustainability and environmental integrity of the area.

3 LOCAL POLICIES

Policy TRA2 – Major Transport Schemes

3.1 The Major Transport Schemes policy (TRA2) reflects a positive intent to support critical infrastructure upgrades and promote sustainable travel options across the district. However, to be fully consistent with the National Planning Policy Framework (NPPF)—specifically paragraph 108, which advocates for early integration of sustainable transport options in plan-making—the policy would benefit from a more proactive approach in supporting development proposals that enhance and connect with planned transport infrastructure.

3.2 An example of this opportunity is Land at Sandpit Lane, where a planned pedestrian and cycle upgrade along the south-eastern frontage on Coopers Green Lane could be leveraged to create a significant and cohesive transport connection. New development proposals at this site could facilitate an essential linkage from Coopers Green Lane, through the site, and toward the eastern fringe of St Albans. This would enhance accessibility for both current and future residents, providing a direct, safe route for active travel modes and reducing car dependency.

3.3 By incorporating supportive language within TRA2 for developments that actively contribute to the district's sustainable travel objectives, such as those presented by Land at Sandpit Lane, the policy could enable more integrated, holistic development. This adjustment would ensure that new sites are not only compatible with but actively bolster the district's long-term transport vision, creating a network of interlinked routes that align with and enhance planned upgrades. As a result,

TRA2 would better fulfill NPPF requirements for soundness, maximizing the benefits of cohesive infrastructure planning and creating a truly sustainable transport network that delivers long-term value to the community.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. **291 - SEGRO (Radlett) Limited**

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 13

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

6.1 Strategic Policy SP8 - Transport Strategy outlines how the Council *will 'prioritise the use of active and sustainable transport modes and deliver accessibility improvements to the transport and highways network'*.

6.2 Policy TRA1 – Transport Considerations for New Development sets out the requirements for major proposals to ensure that *'safe and suitable access can be provided' and 'development would not lead to highway safety problems or cause unacceptable impacts upon the transport network'*.

6.3 Policy TRA2 – Major Transport Schemes states in part (b) that *'there is now a reasonable prospect that the Government permitted Strategic Rail Freight Interchange identified in policy EMP2 will be delivered during the Plan period. The Council supports the road and sustainable transport infrastructure needed to mitigate it, in particular A414 enhancement.*'

6.4 As discussed above in paragraph 5.13, SEGRO (Radlett) Limited welcome the recognition of the SRFI in policy TRA2, we further consider that the the policy wording of *'a reasonable prospect'*of the SRFI will be delivered could be more accurately stated as a 'likely' or 'good prospect' given the fact that development has commenced on site and the clear delivery programme set out by SEGRO (Radlett) Limited.. Nonetheless, SEGRO (Radlett) Limited consider the support for *'road and sustainable transport infrastructure needed to mitigate'*the SRFI, in particular regarding the A414, to be sound.

6.5 Policy TRA3 – Development Generating New Lorry Movements sets out requirements for proposals leading to significant increases in lorry movements and how they can reduce their impact on the environment and congestion.

6.6 Policy TRA4 – Parking states that development proposals should meet on-site car and cycle parking standards for new non-residential development which are set out within the draft Local Plan. It is acknowledged that the SRFI consent has a condition (no. 10) restricting the maximum number of parking spaces, which would be less parking provision than the draft policy. However, it is specific to the approved development and any future need to review parking spaces will be subject to detailed assessment at the relevant time. SEGRO (Radlett) Limited are supportive of Policies TRA3 and TRA4 which set out the car and lorry transport and parking requirements.

6.7 In addition to encouraging the transfer of freight from road to rail, the SRFI will also improve local transport connections in line with the draft Local Plan policies SP8, TRA1 and TRA3. The SRFI will become a nationally significant logistics hub which will meet the requirements of businesses serving London and the South-East of the UK.

6.8 The Radlett SRFI development will deliver a wide range of transport benefits, including combination of on and off-site highway works with improvements to the PRoW network will fully consider the needs of pedestrians and cyclists. Alongside the measures addressed in the draft TFMMP, it will ensure the scheme is well served by a range of transport modes with the aim of reducing reliance on cars.

6.9 Overall, SEGRO (Radlett) Limited are supportive of Policies SP8, TRA1, TRA2, TRA3 and TRA4 and consider them to be sound. It is considered these policies are an important inclusion within the draft Local Plan to ensure SADC is well connected, accessible and encourages sustainable transport.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. LOCAL PLAN CONSULTATION REG19 SEGRO_[R].pdf

## 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 39

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Paragraph 35 and 36 of the 2023 NPPF require that local plans be effective to be considered sound. To do so its policies must be deliverable over the plan period and dealt with rather than deferred.

Policy, both in Part A and Part B, refers to sites 'supporting' and 'contributing to' their required transport infrastructure mitigation. For example, strategic policy SP14 at Part A requires proposals for development to 'provide, finance and / or contribute' to infrastructure and allocation B1 at Part B requires that the site deliver 'Contributions / enhancements to support relevant schemes'. Policy therefore rightly requires that mitigation be made, and HCC supports the intention of the plan to ensure mitigation is made. However it leaves issues of the delivery mechanism and timing to the decision-maker. This specific allocation is only taken as an example, and the same principle applies to all allocations.

NPPF paragraphs 108, 109, and 100 govern how LPAs must consider sustainable transport provision in plan-making. Paragraph 108 sets a number of objectives including ensuring impacts on the network are addressed and pursuing opportunities to maximise active and public transport. The 2024 draft consultation NPPF further requires a vision led approach at paragraphs at paragraph 122.

To achieve this, the infrastructure required to achieve shift towards active and sustainable modes of transport must be provided by default prior to the first occupation. To do otherwise risks unsustainable behaviours being embedded prior to infrastructure being delivered and take-up therefore being lower than that is needed to make development acceptable a decision-making stage. Policy TRA1 requires that on major development 'Active and sustainable connections to key destinations are deliverable at an early stage of development'. However, policy on infrastructure delivery does not dovetail with this requirement and therefore risks undermining this in practice. As stated above, policy is agnostic on delivery of financial contribution via a s106 agreement or CIL (if adopted) or directly via a s278 agreement. It is unlikely however that delivery of transport infrastructure via a financial contribution, even if sufficient to pay for infrastructure, can deliver infrastructure in sufficient time. Instead, this issue is deferred to development management stage.

Therefore for the aspirations of the plan to be considered deliverable and therefore sound the plan should take a more proactive approach to the delivery mechanism of infrastructure so that the aspirations of policy TRA1 are delivered.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To be considered sound the plan should:

1. Amend policy IMP1 at Part A to ensure that proposals demonstrate how transport schemes required to make sites sustainable will be delivered;
2. Amend policy in the site allocations at Part B to refer to delivery of infrastructure rather than just contributions; and
3. Amend the Infrastructure Impact Assessments to refer to delivery of infrastructure rather than just contributions;

Firstly, policy TRA1 should be strengthened to ensure that transport infrastructure will be delivered in the real world rather than be merely deliverable in the abstract. Demonstrating deliverability in the abstract is not a sufficiently robust test as applicants would not have to demonstrate that the delivery mechanism, as well as the scheme itself, ensures delivery at an early stage of development.

*Major proposals must demonstrate as appropriate how...Active and sustainable connections to key destinations [deleted text] will be delivered at an early stage of development;*

Similarly, policy TRA3 should be amended along similar lines to ensure that infrastructure is delivered in practice for proposals generating heavy goods vehicle movements:

Encourage  and enable Heavy Goods Vehicles to use the primary route network by means of signing and traffic management.

Secondly, the policy wording in the site allocations at Part B should be amended to give support to delivery of infrastructure (irrespective of the delivery mechanism) rather than wording that implies making a financial contribution that may be incapable of being secured, spent, and delivered early in the development.

For example, at allocation B1 (taken as an example only):

Contributions / [deleted text] to delivery of support relevant schemes in the LCWIP and GTPs as indicated in the TIA.

[deleted text] Improvements via delivery or contributions to the transport network (including walking and cycling links) and public transport services upgrades / improvements, including off-site improvements to Harpenden Road, Sandridgebury Lane, Valley Road, Ancient Briton junction and King William IV junction, links to St Albans City Centre, station and education, aligned to schemes in the GTPs and LCWIP.

Similar wording appears in all the allocations and should be amended along the lines of the above.

Finally, the TIAs should be amended on similar lines, again taking allocation B1 as an example:

5. Settlement Strategy – St Albans (Indicative Contributions)

This site will make significant contributions or direct delivery of infrastructure to

St Albans Settlement Strategy.

Taken together, these amendments would ensure that both the scheme and the delivery mechanism align to provide infrastructure early in the build out of development, thereby enabling sustainable travel behaviours and mode shift in line with the NPPF sustainable development objective

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 5B Highways Infrastructure Delivery_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We have some comments in relation to air quality and the need to consider air pollution issues on the natural environment, both in the Core Policy for Air Quality, and in relation to policies TRA3 (Development Generating New Lorry Movements) and Strategic policy SP8 (Transport Strategy). It is important that in addition to human health, environmental considerations including air quality impacts on air quality sensitive protected sites are included in policy wording.

...

Policy TRA3 –Development Generating New Lorry Movements

As referenced in our responses to Policy HW1 and Strategic Policy SP8 we would like to see explicit reference to considerations of air quality impacts on the environment as a result of development and traffic changes. Cross referencing between policies is recommended to provide stronger support for the need for air quality modelling and assessment.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. ## TRA4 - Parking

### 223 - Oaklands College and Taylor Wimpey

Submission Number: 223 Submission Date: 07/11/24 18:34

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Oaklands College and Taylor Wimpey Name:

Comment Number: 19

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

(Please see attachment for full submission)

It is acknowledged that a sustainable location and development which make the most of promoting sustainable travel can and does generally drive down the need for traveling by car and need for car parking, but this is an occupiers decision based on the attractiveness of the transport options available to them. If the sustainable transport strategy is successful, residents generally own fewer cars and so fewer parking spaces are needed. However, there are two fundamental issues that result from forcing developers to meet lower parking standards:

1. Whether occupiers of dwellings use the parking space or not, they associate the availability of parking spaces with value, and so, reduce parking on housing plats reduces sale prices and therefore revenues/viability; and
2. If parking is reduced below actual need for a development, residents simply park on-street which harms placemaking and actually discourages residents from walking and cycling.

Oaklands College and Taylor Wimpey note that as a result of Policy TRA4 (Parking), broad location sites are to be supported by 'bespoke parking strategy' at the planning application determination stage. This strategy is to include a lower than standard parking requirements, in accordance with Policy TRA4e):– for example, for residential development: 1-bed = less than 1.5 spaces; 2-bed = less than 2 spaces; and 3+bed = less than 2.5 spaces.

Oaklands College and Taylor Wimpey **object** that this approach. The Council's approach should provide a sufficient amount of car parking to avoid 'parking stress' in the local area and should not therefore require reduced parking standards without regard for potential other negative effects (including but not limited to a detrimental impact on placemaking and viability through reduced values).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

#### 4.8.1 SUGGESTED AMENDMENTS

Oaklands College and Taylor Wimpey seek the Council's agreement to adjust part e) of Policy TRA4 to 'allow' lower car parking standards rather than 'require' lower parking standards. This amendment can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public.

9.5 Parking standards are set out in Policy TRA4. Whilst the District Council's approach to lower than standard parking requirements at Broad Locations is supported, the aspiration to maintain current levels of parking in more central areas is not, and neither is the presumption of refusal of permission of proposals in the built up area. Indeed, the intention to increase parking provision in the case of new development in these locations, appears to be contrary to criterion (c) of Policy SP8 which seeks to promote a reduction in car journeys for new and existing settlement. In this regard, criterion (b) is likely to hamper or prevent delivery of active travel infrastructure on routes identified for improvement within the LCWIP and within the North St Albans wider active travel measures proposals. Given the constrained highway network with St. Albans, particularly in central areas, there must remain flexibility to consider the relocation or reduction of on-street parking provision in order to meet active travel objectives. We consider this policy as written will undermine the aims of Policy SP8.

**291 - SEGRO (Radlett) Limited**

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 14

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

6.1 Strategic Policy SP8 - Transport Strategy outlines how the Council *will 'prioritise the use of active and sustainable transport modes and deliver accessibility improvements to the transport and highways network'*.

6.2 Policy TRA1 – Transport Considerations for New Development sets out the requirements for major proposals to ensure that *'safe and suitable access can be provided' and 'development would not lead to highway safety problems or cause unacceptable impacts upon the transport network'*.

6.3 Policy TRA2 – Major Transport Schemes states in part (b) that *'there is now a reasonable prospect that the Government permitted Strategic Rail Freight Interchange identified in policy EMP2 will be delivered during the Plan period. The Council supports the road and sustainable transport infrastructure needed to mitigate it, in particular A414 enhancement.*'

6.4 As discussed above in paragraph 5.13, SEGRO (Radlett) Limited welcome the recognition of the SRFI in policy TRA2, we further consider that the the policy wording of *'a reasonable prospect'*of the SRFI will be delivered could be more accurately stated as a 'likely' or 'good prospect' given the fact that development has commenced on site and the clear delivery programme set out by SEGRO (Radlett) Limited.. Nonetheless, SEGRO (Radlett) Limited consider the support for *'road and sustainable transport infrastructure needed to mitigate'*the SRFI, in particular regarding the A414, to be sound.

6.5 Policy TRA3 – Development Generating New Lorry Movements sets out requirements for proposals leading to significant increases in lorry movements and how they can reduce their impact on the environment and congestion.

6.6 Policy TRA4 – Parking states that development proposals should meet on-site car and cycle parking standards for new non-residential development which are set out within the draft Local Plan. It is acknowledged that the SRFI consent has a condition (no. 10) restricting the maximum number of parking spaces, which would be less parking provision than the draft policy.

However, it is specific to the approved development and any future need to review parking spaces will be subject to detailed assessment at the relevant time. SEGRO (Radlett) Limited are supportive of Policies TRA3 and TRA4 which set out the car and lorry transport and parking requirements.

6.7 In addition to encouraging the transfer of freight from road to rail, the SRFI will also improve local transport connections in line with the draft Local Plan policies SP8, TRA1 and TRA3. The SRFI will become a nationally significant logistics hub which will meet the requirements of businesses serving London and the South-East of the UK.

6.8 The Radlett SRFI development will deliver a wide range of transport benefits, including combination of on and off-site highway works with improvements to the PRoW network will fully consider the needs of pedestrians and cyclists. Alongside the measures addressed in the draft TFMMP, it will ensure the scheme is well served by a range of transport modes with the aim of reducing reliance on cars.

6.9 Overall, SEGRO (Radlett) Limited are supportive of Policies SP8, TRA1, TRA2, TRA3 and TRA4 and consider them to be sound. It is considered these policies are an important inclusion within the draft Local Plan to ensure SADC is well connected, accessible and encourages sustainable transport.

### 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 32

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Draft Policy TRA4 - Parking, provides parking standards for new developments. This policy supports active travel in numerous ways. First, it provides a requirement for bicycle parking to encourage more people to cycle instead of drive. It also states new development at Broad Locations should demonstrate alternatives to car use to reduce car parking spaces. This policy also supports car clubs to reduce private car parking spaces, bike share schemes and
electric vehicle charging points in new developments. We support this policy as this will have a positive impact on residents' health and wellbeing by supporting active travel over private car use.

### 329 - Mr Russell Crow

Submission Number: 329 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Mr Peter Atkin

On Behalf Of Company/Organisation: Richborough Estates Name: Mr Russell Crow

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Criterion e)ii. states that it needs to be demonstrated to the 'satisfaction' of SADC that attractive alternatives to the private car would lead to reduced demand. While the principle of promoting sustainable modes of travel is fully supported, this requirement is not clear or measurable; there is no clarity for the Applicant on how compliance with this policy would be assessed at the development management stage. This needs to be clarified in the policy.

SADC also need to ensure that the Local Highways Authority (LHA) is in agreement with proposals to provide reduced parking provision, as requirements to increase parking (whether allocated parking for residents or visitor parking) are often enforced by the LHA. Rather than focusing specifically on 'Broad Locations' as areas for reduced parking, it would be more appropriate to draft a set of flexible parking standards that allow appropriate parking provision to be agreed on a site-by-site basis with both SADC and the LHA.

## 335 - Michael Fearn

Submission Number: 335 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: MFS Resolution Name: Michael Fearn

Comment Number: 35

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

3.19. **Draft Policy TRA4** *"Parking"* – states that new housing proposals in Zone 3 ('Areas of Overnight Parking Stress') will be refused unless financial obligations are paid. The areas in question are still not shown on the Policies Map (they were not shown on the Policies Maps which accompanied the Regulation 18 consultation either). The text to the latest consultation draft says that the Zone Maps are available on the Council's website and having now located a document showing the Zones, it is clear that the areas of Zone 3 correspond with large parts of the District's existing built up areas. The provision therefore runs entirely counter to any attempt to direct new housing to the most sustainable locations and prioritise the use of previously developed land.

3.20. The requirement at criterion h) to meet Building Regulations in respect of Electric Vehicle charging is totally otiose. The policy is not positively prepared; justified; effective; or consistent with national policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## 349 - Lisa Peters

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 17

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**New Development at Broad Locations**

CHPC acknowledges the goals set out in **Policy TRA4** for new development at Broad Locations, particularly in prioritising sustainable and active modes of transport. The policy's emphasis on reducing reliance on private cars through alternative transport options is aligned with the broader sustainability objectives of the Local Plan and is welcomed by CHPC.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

However, CHPC raises some concerns regarding the implementation of clauses (ii) and (iii) of this policy, particularly the reduction in parking provision against the standards, and the need for robust enforcement mechanisms. While the principle of reducing parking spaces to encourage sustainable travel is supported in theory, the practical implications for rural and semi-rural areas like Colney Heath need careful consideration.

In areas with limited public transport and infrastructure, such as Colney Heath, there may be a higher reliance on private vehicles, particularly for households that do not have easy access to alternative transport options. Therefore, any reduction in parking provision should be approached with caution. CHPC recommends that in areas where public transport links are limited, the reduction in parking spaces should be carefully assessed and not enforced unless it can be demonstrated that there are realistic, well-established alternatives to car use, such as frequent bus services, cycling infrastructure, or car-sharing schemes.

Furthermore, Clause (iii) requires the development of an appropriate parking strategy with lower-than-standard parking requirements, which must be agreed with the Council and effectively enforced through planning obligations or on-street parking controls. CHPC emphasises that effective enforcement of these controls will be critical to the success of the policy. In practice, it is often challenging to implement and enforce on-street parking controls, particularly in areas with limited local government resources or where local residents may be resistant to changes that affect their ability to park.

As such, CHPC suggests that the policy include provisions for periodic reviews of parking demand after developments are completed, ensuring that any negative impacts on local parking conditions are promptly addressed. This would allow for flexibility in responding to evolving community needs and ensure that the development of Broad Locations does not result in unintended consequences, such as increased parking pressure in surrounding areas.

In summary, while CHPC supports the intention of Policy TRA4 to reduce car dependence and promote sustainable transport, we recommend a more tailored approach that considers the specific transport infrastructure and local needs in rural areas. Any reduction in parking provision should be carefully assessed, and effective enforcement mechanisms should be put in place to ensure that the policy's objectives do not inadvertently harm local communities.

**350 - Hill Residential**

Submission Number: 350 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: tor&co Name: Sophia Goodhead

On Behalf Of Company/Organisation: Hill Residential Name:

Comment Number: 15

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Policy TRA4: Parking**

Hill note that parts f) and g) of the policy seek financial contributions for the provision of car clubs and bike share schemes from all major developments. There is no evidence to justify this requirement, therefore Hill consider such requirements to be unsound. Both car clubs and bike share schemes operate on a commercial basis and do not require contributions from developers to support their operations. There may be a need to provide identified parking spaces to support the operation of such schemes but to require a financial contribution from all major developments is not appropriate or necessary.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Chapter 9: Utilities Infrastructure as currently written does not comply with Government objectives and policy to support the provision of renewable energy. This approach is not consistent with national policy, thus enabling the delivery of sustainable development. The below suggested wording is intended to address this.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Given the Council's declaration of a Climate Emergency in 2019 and the objective of achieving net zero by 2030, it is considered imperative that Chapter 9: Utilities Infrastructure includes a section on how the Council are going to support the delivery of renewable energy generation. It is considered a missed opportunity to support and promote this sector by not including objectives and policy about how this is going to be delivered through this Plan period.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

A number of representations have been made on behalf of HCC Property which would benefit from being discussed within the forum of the EiP.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

We have grave concerns about the lack of detail provided by SADC in para 9.5 of DLP.

The Hertfordshire Water Study (which was sourced elsewhere and not part of SADC online evidence base documents) does not confirm there is available water supply to support projected levels of growth in the current plan period. As stated in the DLP at Para 9.5.

The study gives a framework of policy that must be delivered in order to achieve the supply and demand balance up to 2040, which is dependent on imports of water from outside the region.

Para 6.3.3 of The Hertfordshire Water Study, Hertfordshire_Water_Study 2017 (hertsmere.gov.uk) clearly shows there is a shortfall of water supply using the projections of the Standard Method.

Figure 11 [see attached file], shows Para 8.6.4 of The Hertfordshire Water Study showing the indicative growth areas in blue. These do not match the current site allocations. Site B1 “North St Albans” does not appear as a feature on this map and is not part of the indicative growth areas.

Para 10.3.1 of The Hertfordshire Water Study, requires a sustainable approach to development and groundwater recharge. Development on Site B1 “North St Albans”, would substantially deplete local ground water recharge as we make clear in our consultation response to Chapter 10.

The area is a flood attenuation point that recharges the local aquifer. Any SuDS plan that suggests that excess rainwater be diverted to the Thames sewer system will deplete aquifer volumes and limit groundwater abstraction which is favoured over chalk stream abstraction.

There is no mention in this consultation of the need to ensure Natural Catchment Management. Which is vital to the delivery of the recommendations in The Hertfordshire Water Study.

The study conclusions specific to St Albans in section 12, related to the indicative growth areas and these do not match the site allocations in this Local Plan. Therefore, if there is a reason for this study to supply conclusive evidence of the water “supply – demand balance”, it has not been stated.

The most recent consultation for Affinity water shows substantial water supply shortage by 2030. There is only mention of Affinity Water's strategy for 'demand management' in this DLP. See Affinity Water 'supply management' in the link. Why is this not included in the DLP? Sites that might be needed for extra bore holes should not be considered in the Local Plan. The recent application 5/2021/0423 has allowed building right on top of a key water filtration point in our ground water system. Annex 9 of the Call for Sites, shows the extent of development proposed on the chalk aquifer in North St Albans. The same areas that filter the water for the ecological systems of our wonderful Heartwood Forest. Why have SADC not considered this?

Affinity Water Water Resources Management Plan 2024

52e25a3b0555c5d43114dde844fba378_A_summary_of_our_draft_Water_Resources_Management Plan_2024.pdf (amazonaws.com)

Why is there no mention of maintaining ground water filtration to support our local chalk streams? We question if the SUDS plans attached to large scale housing development are fit for purpose? The usage of "1 in 100 year" rain fall events does not model today's erratic rain fall. The "excess" rainfall is to be diverted to the Thames sewer rather than be managed back into the local water supply and offering protection to our chalk streams. How can the Local Plan stand up to scrutiny for sustainability when these types of policies are in place?

With proposals to deliver water to the South East from Oxfordshire, West Midlands and South Lincolnshire, should any Local Plan deliver housing on Green Belt, which will further exacerbating local water stresses. Would the water from these regions be classed as a "sustainable" supply within the context of the Climate Crisis in the Local Plan?

Of the two discharge stations managing St Albans sewage, the main one at Maple Cross is regularly discharging into the River Colne or Grand Union Canal. The other station at Bricket Wood does not have a reporting system yet. See details herehttp://www.thameswater.co.uk/edm-map. What confidence does the SADC have that Thames Water will deliver the mentioned upgrades in capacity in line with the planned development over the plan period?

## Strategic Policy SP9 - Utilities Infrastructure

### 114 - Hertfordshire County Council - Property Team

Submission Number: 114 Submission Date: 06/11/24 23:21

Respondent: Company/Organisation: Vincent + Gorbing Name: George Sellers

On Behalf Of Company/Organisation: Hertfordshire County Council - Property Team Name:

Comment Number: 18

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Policy as currently written is not consistent with national policy, thus enabling the delivery of sustainable development. The below suggested wording is intended to address this.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

- Given the Council's declaration of a Climate Emergency in 2019 and the objective of achieving net zero by 2030, it is considered imperative that Chapter 9 includes a section on how the Council are going to support the delivery of renewable energy generation. It is considered a missed opportunity to support and promote this sector by including objectives and policy about how this is going to be delivered through this Plan period.
- Policy SP9 – to support the above, it is requested that a further bullet is inserted within this policy that supports the delivery of renewable energy infrastructure within the District, including the designation of sites within the District to support the delivery of renewable energy facilities. Suggested wording as follows:

*e) The Council will support development proposals for renewable and low-carbon energy generation to meet the net zero carbon objective, including delivery of sites allocated within the Local Plan for this purpose, where they can demonstrate that there are no adverse impacts, including cumulative impact on:*

*i) the overall visual effect on the landscape, with consideration of local topography*

*ii) residential or local amenity, including air quality, noise and light flicker; and*

*iii) species at risk from air strike.*

Please see details set out at Chapter 6 of the attached document.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

Submission Number: 281 Submission Date: 05/11/24 09:00

Respondent: Company/Organisation: Thames Water Name: Chris Collof

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

St Albans district is served by a number of sewage treatment works (STWs) including Maple Lodge, Blackbirds and Harpenden STWs with Harpenden STW located within the district on the eastern edge of Harpenden.

Upgrades are proposed for Maple Lodge STW will progress during AMP8 which runs from 2025 until 2030 and profiling of delivery of growth within the catchment alongside the upgrades may need to be taken into account. Upgrades are also proposed at Harpenden STW with the scheme providing additional capacity to the 2036 design horizon.

We support the content of Policy SP9 which provides the potential for phasing conditions to be used to align the occupation of development with the delivery of any necessary infrastructure upgrades. While we encourage developers to engage with us early and prior to the submission of any planning applications so the impact of development can be considered, we would not be in a position to progress modelling and delivery and any resulting network upgrades until there is certainty that development is coming forward, For information, a RAG assessment of network and STW capacity for the proposed site allocations is appended for information.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**349 - Lisa Peters**

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 18

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Utilities Infrastructure**

CHPC raises serious concerns regarding **Policy SP9** with regards the treatment of wastewater at the Maple Lodge Sewage Treatment Works, which serves the majority of the St Albans region. CHPC note that the works are currently operating at or near capacity and are occasionally overwhelmed, Thames Water has indicated that the growth scenario outlined in the Local Plan is not expected to cause significant issues for the wastewater network. However, we also recognise that investment in additional capacity will be required to support growth beyond the current capacity of the treatment works.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

CHPC shares the concern that while Thames Water's response may indicate confidence in the system's ability to manage the expected growth, the current strain on the Maple Lodge facility presents a long-term risk to both the environment and local communities. Should growth exceed the projections or unforeseen challenges arise, there could be a potential for wastewater treatment issues that might impact water quality and local infrastructure.

CHPC strongly recommends that further investment in both capacity and resilience of the wastewater infrastructure be prioritised, particularly with respect to future-proofing against higher levels of growth or extreme weather events that could exacerbate the current pressures. It is crucial that Thames Water's plans for additional capacity be clearly outlined and integrated into the Infrastructure Delivery Plan (IDP), with mechanisms in place to ensure timely delivery of these upgrades in parallel with development, rather than after the fact.

Moreover, CHPC urges that monitoring and assessment of the wastewater network's performance be conducted regularly throughout the Plan period. Should any signs of strain or underperformance arise in the future, proactive measures should be taken to mitigate any impact on local communities and the environment. This could include ensuring that new developments are only approved in areas where there is adequate wastewater treatment capacity, or where the necessary improvements can be made before construction commences.

In conclusion, while the Local Plan's growth scenario may not currently present an immediate risk to the wastewater network, CHPC stresses the importance of long-term planning and investment to ensure that the capacity of the Maple Lodge Sewage Treatment Works is sufficient to support both projected growth and any unforeseen challenges. Continued engagement with Thames Water and clear assurances regarding infrastructure upgrades will be essential in managing this critical issue.

### 366 - Chrissie Chadney

Submission Number: 366 Submission Date: 10/11/24 09:00

Respondent: Company/Organisation: Name: Chrissie Chadney

Comment Number: 6

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I have been a resident in Wheathampstead for over forty years and read the proposed District Plan with interest. Whilst there are some good ideas in it, there are a number of things which give me concern. I have read the WDPS response and concur with it fully, but have a few additional things to say here.

Development Sites and Local Impact: Specific development sites proposed, such as Amwell Top Field and Hill Dyke Road, threaten the rural character and ecological balance of our area. It is crucial that any development considers its impact on our countryside and strives to maintain the natural beauty and biodiversity that define our community.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Conclusion: I firmly stand with the WDPS in urging a comprehensive reevaluation of the Draft Local Plan. It is essential that the plan not only reflects realistic population projections but also prioritizes environmental conservation, sustainable development, and the enhancement of local services and infrastructure. We need a balanced, forward-thinking approach that truly serves the interests and needs of all of the St Albans District's residents.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**367 - Ms Julie Bell**

Submission Number: 367 Submission Date: 10/11/24 09:00

Respondent: Company/Organisation: Name: Ms Julie Bell

Comment Number: 6

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Utilities and Services:**

There is a notable lack of attention in the plan to the necessary enhancements of utilities and services to support a growing population. We must work collaboratively with service providers like Thames Water to ensure our infrastructure, especially water and sewage systems, is adequately upgraded before any increase in population, to avoid exacerbating existing problems.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion:**
I stand firmly with the WDPS in calling for a thorough reevaluation of the Draft Local Plan. The plan must accurately reflect our realistic population growth projections and prioritize environmental protection, sustainable development, and the improvement of local services and infrastructure. A balanced and visionary approach is required to genuinely meet the needs and interests of the residents of the St Albans District.

**370 - Diane Black**

Submission Number: 370 Submission Date: 09/11/24 09:00

Respondent: Company/Organisation: Wheathampstead District Preservation Society Name: Diane Black

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**WDPS comments on St Albans City and District Council Draft Local Plan**

Wheathampstead and District Preservation Society (WDPS) has approximately 400 households as members, and we therefore speak for around 15% of the population of the Wheathampstead area.

**Utilities and Local Services**

There is little mention in the Plan of utilities such as water and waste. If there is to be any increase in population, it will be vital that these are adequately provisioned. The impact on local services including doctors, dentists and schools, some of which are already under pressure, needs to be carefully assessed and proper plans and appropriate funding allocated before additional housing plans approved.

In particular, given the current water and sewage crisis, the council needs to work with Thames Water to ensure that the current issues are resolved before any additional strain is put on the water network. According to Thames Water data there have already been 14 storm overflow discharge events on the Wheathampstead stretch of the River Lea in the last 12 months. Work is urgently required to ensure sewage is not entering the River Lea as well fixing pipework, fixing/relocating pumping stations and improved flood management. Careful consideration, planning and appropriate funding will then be required to ensure the system can cope with additional housing.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Summary**

Considering the comments above, we urge the council to revisit the draft Local Plan, challenge the Government's Standard Method for calculating housing needs and produce a more equitable balanced plan that serves the needs of the St Albans District residents. We would like to see more detailed planning which includes funding allocation and addresses key issues on exactly how the plan is going to meet climate change targets, deal with extreme weather events, increase biodiversity by 10%, protect the Green Belt, improve transport networks including cycleways, improve water networks and prevent pollution of our rivers, improve services and facilities and protect secondary school placements.

### 350 - Hill Residential

Submission Number: 350 Submission Date: 08/11/24 09:00

Respondent:  Company/Organisation: tor&co Name: Sophia Goodhead

On Behalf Of Company/Organisation: Hill Residential Name:

Comment Number: 16

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Policy UIN1: Broadband**

Hill recognises the importance of high speed internet access, however, the wider infrastructure required to ensure connection to full fibre broadband is outside of the developers control, therefore in order to ensure the policy is effective, Hill recommend that the wording be amended to help clarify this as follows: "*Planning applications for major residential and employment developments must demonstrate that appropriate infrastructure is to be provided during construction, sufficient to enable all the development to be connected to full fibre broadband once available from the provider.*"

This will ensure that new development is ready to access full fibre broadband without being delayed if external providers are slow in implementing the necessary infrastructure.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character

of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

## UIN2 - Telecommunications

### 349 - Lisa Peters

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 19

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Telecommunications**

CHPC generally supports **Policy UIN2** regarding Telecommunications, as it seeks to balance the growing demand for telecommunication infrastructure with the need to protect the visual amenity and character of local areas. The importance of ensuring that telecommunications apparatus and associated structures do not adversely impact the appearance of rural areas like Colney Heath Parish, with its distinct landscape and low-rise residential character, is particularly significant.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Clause (a), which emphasises minimising negative impacts on visual amenity, aligns with the Council's commitment to preserving the rural character of Colney Heath Parish and the surrounding environment. CHPC advocates for the careful siting of telecommunications structures, especially in sensitive locations such as the Green Belt or near listed buildings, heritage sites, or areas of natural beauty. The use of existing infrastructure, such as telephone poles, buildings, or other structures, should be prioritised wherever possible, to reduce the need for additional, visually intrusive installations. Additionally, CHPC would welcome greater emphasis on the use of design techniques, such as screening or camouflaging, to further mitigate the visual impact of any new apparatus.

Clause (b) highlights that telecommunications installations must be acceptable in relation to other planning matters. While this is a broad statement, CHPC believes it is important that this clause explicitly includes considerations for the local environment, including the impact on wildlife, ecology, and local traffic. It is essential that any new installations do not disrupt local ecosystems or create hazards for road users or pedestrians. Furthermore, the cumulative impact of telecommunications apparatus, particularly in areas with numerous existing installations, should be assessed to ensure that the overall visual impact does not become significant over time.

Overall, CHPC supports Policy **UIN2** but encourages a more detailed and proactive approach to mitigate the visual and environmental impacts of telecommunications infrastructure, particularly in rural and Green Belt areas, where the preservation of local character and amenity is of paramount importance.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

Comment Number: 2

**Type:**

* Figure

**Number:**

10.1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

No reference to Local Wildlife Sites in Fig 10.1 Green infrastructure. There are 186 in the District and these are important components of any green infrastruture network - why are non-statutory local designations which relate to wildlife-rich habitats not identified in the mapping? They should also be referenced in the text. NPPF states:
*174. To protect and enhance biodiversity and geodiversity, plans should:*
*a) **Identify, map and safeguard components of local wildlife-rich habitat**s and wider ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity*

To tie in with their reference in NEB6 - these need referencing, identifying and mapping in the preceding part of the plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Spatial Extent of Green Belt**

The approach taken by SADC in relation to the overall justification for the review and proposed release of Green Belt land to provide the necessary new homes, employment and critical infrastructure for the district is supported by TCE, and it is considered that the exceptional circumstances required to release Green Belt land are justified.

The Policies Map and Part B of the Local Plan sets out the allocated sites and defines the associated Green Belt boundaries to be redrawn as a result of the sites' allocation for development.

We support the rolling of the Green Belt boundary westwards to the M1 as a defensible boundary for EHH. However, we note that whilst the M1 forms a common eastern extent of all three of the draft EHH site allocations, it is not proposed by the Council as a consistent and common boundary for a new Green Belt over the same area.

We question the justification for the inconsistent approach to Council's selection of a new Green Belt boundary in this location, noting the inconsistencies in the Green Belt assessment in this respect, and particularly in respect of the decision to use the overhead electricity pylons as a new defensible GB boundary within the H2 allocation rather than either well established field boundaries or indeed, the M1 as for the remainder of the allocations.

NPPF Paragraph 142 expresses that "*The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.*"Supporting this is NPPF Paragraph 146 which states that boundaries for Green Belt should be defined "*using physical features that are readily recognisable and likely to be permanent.*"

We understand the recommendation to use the overhead pylons as the Green Belt boundary was first presented in the *Green Belt Review Sites and Boundaries Study (February 2014)* which was produced by SKM on behalf of SADC. Paragraph 3.5.3 of the Study states "*The rationale for this is that the overhead lines are likely to restrict development further east.*"

We make two points in this respect; first that pylons are not considered to be permanent features as they can be rationalised and removed or placed underground, and second, that the

presence of an overhead line is visually permeable and therefore does not generally affect the openness of the landscape.

We consider that other physical features - such as the level of vegetation cover, hedgerows or built form – are more of an indication of the openness of a landscape. In respect of EHH, considering how physical features appear on site, rather than on plan, confirms how field boundaries and roads (in this case the M1 motorway) are more permanent, legible, and robust boundaries which successfully take account of landscape character.

This matter was first raised in TCE representations to the previous local plan in 2018, where the same approach to GB release was proposed by the Council. A report produced by SLR on behalf of TCE in October 2018 (and which was submitted as part of the previous SADC Local Plan's Regulation 19 consultation in that year) provided a critique of the Council's 2014 *Green Belt Study,* noting that the "*electricity pylon corridor does not represent a strong and permanent boundary."*[para 3.16]. The conclusions of this report remain valid, including the recommendation that the M1 is used as a strong and appropriate Green Belt boundary due to its permanency, clear alignment and boundary presence that would clearly define the edge of East Hemel Hempstead.

Paragraph 143 of the NPPF remains unchanged since 2018, in respect of defining one of the five Green Belt purposes as "*to prevent neighbouring towns merging into one another".* We acknowledge that protecting the separation between settlements (in this case, the north-eastern edge of Hemel Hempstead and the southern edge of Redbourn east of the M1) is a legitimate purpose of the defined Green Belt boundary in this location. This is reinforced in the *North Hemel Landscape Study* [September 2024] which comments that that *"Restricting development to west of the pylons* ***and/or*** *setting houses back from Hemel Hempstead Road would assist in maintaining a sense of separation between Hemel Hempstead and Redbourn as experienced along the road."*(our emphasis)

The evidence base document, *Broad Locations – Landscape + Visual Appraisal* (page 11) makes a notable distinction between site allocations H1 and H2 in respect of the use of the overhead pylons as a defining feature for GB purposes, stating that for H1 (HH North): "*The existing pylon line easement provides a logical limit to the extent of built development eastwards, helping to maintain the open gap between Hemel Hempstead and Redbourn to the east*", whereas for H2 (East Hemel Hempstead (North), it is *…"****the M1 corridor that provides a logical limit to the extension of development eastwards."***(page 18, our emphasis).

The *Broad Locations – Landscape + Visual Appraisal* also recognises the potential impact of overhead pylons as a dominant feature in the landscape, suggesting that one should *"Consider how development* ***addresses pylon easements*** *and no-build areas, in line with National Grid Guidelines … setting clear design objectives such as* ***to break down the linearity*** *of the transmissions route into inter-related places rather than treating the route as one continuous strip…" (Page 6).* Having a Green Belt edge which mirrors the straight alignment of the pylons (on the ground and in the air) reinforces a contrived straight development edge which does not sensitively respond to topographical or landscape features or character. It draws attention to the linear overhead pylon lines, contradicting best practice design guidance and disregarding more suitable opportunities for defining and establishing a permanent Green Belt boundary on the ground.

On this basis, although the overarching approach to releasing Green Belt land to support the Local Plan allocations is fully supported by TCE, we object to the extent of the H2, East Hemel Hempstead (North) allocation proposed to remain within the Metropolitan Green Belt as currently shown on the Policies Map. This also applies to H4 as the Green Belt boundary follows the M1 except for in the south-east corner of the site. Instead, it is suggested that the Green Belt boundary is adjusted to follow the M1 along the entirety of the H2-H4 allocations.

It is important to note that should our representations be supported by the Council through Modification or by an independent Inspector at Examination, this would not mean that the need or desire to provide open green infrastructure as part of the development proposed within site H2 is diminished in any way. The draft Local Plan Policy, Concept Plan and Framework Plan evidence base for the HGC Growth Areas requires the provision of a Country Park, sports hub and SANG in the eastern part of H2 as part of the creation of a new landscaped edge to Hemel Hempstead; this design requirement would not be altered simply by the removal of the land from the Green Belt and TCE would be happy to agree policy restrictions to agree an appropriate eastern extent of built development in this part of the allocated site if needed.

Further, it should be noted that given the NPPF requirement to periodically review Green Belt boundaries as part of local plan reviews in order to accommodate development needs, the designation of land as SANG which comes with a requirement for its designation 'in perpetuity' has arguably more permanence, and thus might be seen as a preferable alternative policy and practical tool to ensure openness and a green setting ensuring separation of settlements over the long term.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

On this basis, although the overarching approach to releasing Green Belt land to support the Local Plan allocations is fully supported by TCE, we object to the extent of the H2, East Hemel Hempstead (North) allocation proposed to remain within the Metropolitan Green Belt as currently shown on the Policies Map. This also applies to H4 as the Green Belt boundary follows the M1 except for in the south-east corner of the site. Instead, it is suggested that the Green Belt boundary is adjusted to follow the M1 along the entirety of the H2-H4 allocations.

It is important to note that should our representations be supported by the Council through Modification or by an independent Inspector at Examination, this would not mean that the need or desire to provide open green infrastructure as part of the development proposed within site H2 is diminished in any way. The draft Local Plan Policy, Concept Plan and Framework Plan evidence base for the HGC Growth Areas requires the provision of a Country Park, sports hub and SANG in the eastern part of H2 as part of the creation of a new landscaped edge to Hemel Hempstead; this design requirement would not be altered simply by the removal of the land from the Green Belt and TCE would be happy to agree policy restrictions to agree an appropriate eastern extent of built development in this part of the allocated site if needed.

Further, it should be noted that given the NPPF requirement to periodically review Green Belt boundaries as part of local plan reviews in order to accommodate development needs, the designation of land as SANG which comes with a requirement for its designation 'in perpetuity' has arguably more permanence, and thus might be seen as a preferable alternative policy and practical tool to ensure openness and a green setting ensuring separation of settlements over the long term.

1. TCE Reg 19 Reps SADC 07_11_24 FOR ISSUE_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

The Crown Estate (TCE) is the landowner in respect of three of the four SADC Broad Allocation allocations within the Hemel Garden Communities programme area, namely H2 East Hemel Hempstead (North), H3 East Hemel Hempstead (Central) and H4 East Hemel Hempstead (South). TCE has made a significant commitment to supporting the work of HGC since its designation in 2019 and continues to work positively with both HGC and the planning authority of St Albans in order to progress emerging development proposals in line with the draft allocations. As landowner and promoter of these strategic site allocations we wish to participate fully in the Examination.

Ellenbrook Fields

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Natural Environment, Biodiversity and Green Infrastructure**

CHPC supports the emphasis on protecting the natural environment, biodiversity, and green infrastructure outlined in Chapter 10 of the Local Plan, particularly in relation to the protection of sensitive sites such as the Chilterns Beechwoods Special Area of Conservation (SAC). The recognition of the pressures placed on the SAC from increasing visitor numbers and the need for mitigation strategies is an important step in ensuring that the integrity of the site is maintained for future generations.

Colney Heath Parish, being situated within the Watling Chase Community Forest, has a strong connection to the region's green infrastructure and biodiversity goals. However, CHPC is concerned about the potential impacts that new developments and increased visitor pressures could have on sensitive local areas such as Ellenbrook Fields and Colney Heath Common Local Nature Reserve (LNR). These sites are integral to the local ecology and contribute to the overall green infrastructure network, providing critical habitats for wildlife and valuable spaces for residents to enjoy nature.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

There does appear to have been a drafting error as Ellenbrook Fields does not appear in the northwestern area.

While there is no immediate impact on Colney Heath Parish from the Chilterns Beechwoods SAC directly, the potential for increased recreational pressure on local sites such as Colney Heath Common LNR and Ellenbrook Fields is a valid concern. If development in the surrounding areas leads to an increase in foot traffic and recreational use, these areas may experience detrimental effects, including habitat degradation and disturbances to wildlife. As a result, CHPC strongly encourages the development of a robust Mitigation Strategy, particularly one that includes the identification and creation of Suitable Alternative Natural Greenspaces (SANGs) to reduce visitor pressure on sensitive areas.

Furthermore, CHPC urges that the Local Plan address the cumulative impact of new developments on local wildlife sites, ensuring that appropriate measures are put in place to prevent harm to the biodiversity of both Colney Heath Common and Ellenbrook Fields. The Plan should also consider promoting and enhancing local green spaces. To confirm there are no allotments in Colney Heath Parish as stated in Chapter 10.

In conclusion, while CHPC acknowledges the importance of mitigating visitor impacts on the Chilterns Beechwoods SAC, we emphasise the need for a wider, more localised approach to ensure that Colney Heath's own natural spaces, such as Colney Heath Common and Ellenbrook Fields, are protected and enhanced in line with the broader green infrastructure objectives of the Local Plan. This will help maintain the environmental integrity of local sites while also ensuring that the community benefits from improved access to sustainable green spaces.

**368 - Gee Smedley**

Submission Number: 368 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Save North St Albans Greenbelt Name: Gee Smedley

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Flood risk sequential testing and specific assessment of all sources of flooding have been washed over and are inadequate.

See Appendix 8a and 8b for our full reports on the flood risk at the two development sites in North St Albans. The Aecom Sustainability Review and site selection rating has inadequately assessed flood risk sequentially. Looking at the broad location side-by-side in Figure 12, we see a huge error in the assessment Functional Floodplain (or climate change floodplain), with the definition being too narrow to capture pluvial flooding which is wide spread. See appendix 9, for full side-by-side analysis in Excel.

We also fail to understand way Sewell Park (150 dwellings) and North St Albans (1,000 dwellings) are now split out and how they can vary so widely given they are adjoining land parcels which form the site B1 North St Albans. We have highlighted these discrepancies in pink and can evidence why we think they should all be measured as "Weak".

Figure 12: Side by side site scoring analysis [see attached file], see appendix 9 for full version in Excel.

We welcome SADC's commitment to protect and enhance "Significant Public Accessible Green Areas".

But public access should not be the primary focus as it is with the report.

How will SADC protect Heartwood Forest from loss of water filtration into the aquifer beneath as water run off is diverted into sewers? The Aquifer provides Heartwood Forest Springs with the volume and pressure of water needed to deliver water at a higher altitude in Heartwood Forest if you propose building on key flood attenuation sites at Site B1 “North St Albans” that will support the aquifer water levels? See figure 13 [see attached file], Source: DEFRA Magic Map Flood Risk.

We welcome the inclusion of Blue Infrastructure as a point of environmental assessment.

How will SADC ensure there is no negative impact on the potable abstraction zone for the main abstraction of drinking water by Affinity Water at the two local bore holes? Information on location available via the British Geological Survey and is of a sensitive nature so exact locations are not included in this consultation response. But both bore holes lie less than 2 miles from the B1 “North St Albans” site.

An adequate reply to protection of potable abstraction zones was not provided to the question raised at the PP&CC June 2023 meeting on this matter. SADC answer did not cover the necessary detail. See Appendix 6.

The site B1 “North St Albans” is less than two miles from two drinking water abstraction points i.e. bore holes, that are licenced to Affinity Water. According to DEFRA there are Drinking Water Safeguard Zones for surface water and Source Protection Zone Level 3, on the site B1 “North St Albans”. These zones also undoubtedly support our chalk streams via lateral chalk bedrock aquifer flows. This has not been considered in the site selection process. Why not? Especially given the sensitivity of chalk stream protection.

The area within site B1 “North St Albans” is a flood attenuation point that recharges the local aquifer. Any SuDS plan that suggests that excess rainwater be diverted to the Thames sewer system will deplete aquifer volumes and limit groundwater abstraction which is favoured over chalk stream abstraction in current and future water management plans.

SADC must take into account the chalk stream catchment area. The maps available must read by a hydrogeologist to have the correct interpretation as the catchment boundary has an error of up to 500m and is dependent upon the topography of land. Figure 14. shows the estimated catchment boundary and expectations of actual boundary.

We have defensible evidence that water flows downhill from the railway line, across Sandridgebury Lane and into the fields, so forming part of the Ver Catchment. This land is not contaminated by the bromate plume traveling East from Sandridge.

In addition there is clear Government guidance that groundwater abstraction should be closely managed. Water abstraction plan - GOV.UK (www.gov.uk) and Colne Abstraction Licensing Strategy (publishing.service.gov.uk)

Ref “*NEB 8 – Managing Flood Risk”* : There is no data provided by SADC on the management of the extensive flood risk from groundwater at site B1 “North St Albans”. The extent of surface water flooding is clear to see in Figure 13.

Ref “*NEB 9 – Agricultural Land* : *Other than where development is allocated in this Plan, where major development on agricultural land is proposed, a detailed survey (approved by the Department for Environment, Food and Rural Affairs (DEFRA) or an independent expert), which includes an assessment of grading, should be submitted. Development resulting in the loss of the best and most versatile agricultural land (grades 1, 2 or 3a) will normally be refused. An exception may be made where it can be evidenced that there is an overriding need for the development and there is no alternative land of a lower quality which could reasonably be used.”*

1. Why should sites where development is allocated in this DLP be exempt from detailed agricultural survey? The majority of the site B1 “North St Albans” is between Grade 2 and 3a most versatile agricultural grading, with some areas being 3b, but that has not held back the farmers delivering the same crop across the whole site as pictured below.
2. The ARUP Green Belt Review gives significant weight to this being agricultural land. There is little mention of it in the Aecom Sustainability Review. This is against NPPF policy and NPPG guidance.

*See figure 15 [in attached file], Land classification on the Defra Magic Map*

There is no mention of how the plan making process will seek to protect the ecological corridors around the sites. Specifically for site B1 “North St Albans”, we have defendable evidence that the land around Heartwood for up to 2miles across the natural landscape operates as a continuous ecological corridor and any disruption of it will affect Heartwood. It is home to many red list bird species and protected mammals. See Appendix 7, Heartwood Halo Project August 2023.

We have identified eight red list bird species over the last two years as being consistently present on land within site B1 “North St Albans”. Full details on page 2 of Appendix 7, Heartwood Halo.

## 291 - SEGRO (Radlett) Limited

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 16

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

7.1 Strategic Policy SP10 – Natural Environment, Biodiversity and Green and Blue Infrastructure outlines how the Council *'will protect and enhance green and blue infrastructure for its role in combating Climate Change and supporting biodiversity, along with its value for recreation, health and wellbeing, and landscape value.'*

7.2 Policy NEB 4 - Significant Publicly Accessible Green Areas states that *'the Council will preserve and enhance the SRFI Country Park(s) (approved)'*and *'will seek development contributions from relevant major developments to mitigate impacts and support the maintenance and enhancement of these areas, including through delivery of Greenspace Action Plans (GAPs) and Greenspace Management Plans.'*

7.3 SEGRO (Radlett) Limited is supportive of the above and highlights the contribution that the SRFI will provide towards SADC achieving these objectives. The proposed Country Park is an important element of the Radlett SRFI proposals.

7.4 The SRFI Country Park will provide 247 hectares of woodland and managed countryside including 80 hectares of new species rich mixed woodland planting and 160 hectares of conservation grazing which will contribute to the Watling Chase Community Forest Area. Within the Country Park there will be a Visitor Interpretation Centre, car parking and picnic areas. New footpaths, bridleways, nature trails and multi-use routes along with improvements to existing rights of way comprising circa 17km in total will be delivered. Additionally, new and improved bird watching, equestrian and fishing facilities will also be created, as well as informal recreational facilities such as play areas, outdoor gyms and trim trails.

7.5 The Country Park as part of the SRFI has been provided to provide improved public access to green space, facilities for recreation and biodiversity. SEGRO (Radlett) Limited are supportive of Policy NEB4's recognition of the SRFI Country Park in assisting to maintain a high quality of life and supporting both mental and physical health.

7.6 Policy NEB7 - Biodiversity Provision in the Design of New Buildings and Open Spaces requires that proposals *'have regard to the biodiversity already present within the site'*as well as *'identify opportunities to maximise the provision for biodiversity on the design of new buildings in line with national and local nature conservation priorities'*.

7.7 Policy NEB 10 – Landscape and Design requires major proposals to consider *'how the existing*

*landscape will be protected, enhanced and integrated into the development, detailed in a Landscape Strategy, along with new tree planting as part of any new green space provision'*.

7.8 It is considered that policies NEB7 and NEB10 are justified and sound, recognising the importance of new developments in increasing biodiversity and providing sufficient landscaping. The landscaping and biodiversity improvements that will be facilitated through the Country Park as part of the SRFI accord with Policies NEB7 and NEB10.

Comment Number: 37

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Quality local space, play and recreation
We are pleased to see that the draft Local Plan seeks to preserve existing urban and rural green space/ green infrastructure and enhancement, or creation of new areas are developed to encourage public access through draft Strategic Policy SP10 and draft policies NEB2, NEB3, NEB4, NEB6 and NEB10.
We support the Plan's landscape-led approach to retain and enhance existing green infrastructure in new developments. We recommend that there should be an expectation on developers that the provision of open space and green infrastructure should come forward at an early stage of development to encourage healthy, sustainable behaviours from the outset.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 370 - Diane Black

Submission Number: 370 Submission Date: 09/11/24 09:00

Respondent: Company/Organisation: Wheathampstead District Preservation Society Name: Diane Black

Comment Number: 7

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**WDPS comments on St Albans City and District Council Draft Local Plan**

Wheathampstead and District Preservation Society (WDPS) has approximately 400 households as members, and we therefore speak for around 15% of the population of the Wheathampstead area.

**Environmental Issues**

Biodiversity issues and the protection of natural resources receive scant attention in the Plan despite the significant loss of Green Belt land that the Plan envisages. The need to respond to climate change is dealt with in only a very general way.

Detailed plans are required on how the 10% improvement in biodiversity will be delivered given the extent of the building work, increase in traffic and loss of Green Belt and detailed plans of what measures will be taken to achieve climate change targets and deal with the expected extreme weather conditions.

The following Nature Reserves in Wheathampstead Parish should be added to the list;

1) Bower Heath

2) Butterfield Road Nature Reserve

3) Marshalls Heath

The country lanes around Wheathampstead Parish are lined with a plethora of healthy trees and many important hedgerows. The Parish Council is concerned that residential development in Wheathampstead will inevitably lead to more cars and vehicles using our country lanes. To protect the character of the country lanes (many of which are single track) and to preserve the important hedgerows and trees plus the ecology they support, road widening should be prevented. The alternative approach to facilitate increased throughput would be the use of properly signposted passing places at regular intervals.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Summary**

Considering the comments above, we urge the council to revisit the draft Local Plan, challenge the Government's Standard Method for calculating housing needs and produce a more equitable balanced plan that serves the needs of the St Albans District residents. We would like to see more detailed planning which includes funding allocation and addresses key issues on exactly how the plan is going to meet climate change targets, deal with extreme weather events, increase biodiversity by 10%, protect the Green Belt, improve transport networks including cycleways, improve water networks and prevent pollution of our rivers, improve services and facilities and protect secondary school placements.

## 372 - Gate Herts (Gypsy & Traveller Empowerment, Hertfordshire)

Submission Number: 372 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Name: Michael Hargreaves

On Behalf Of Company/Organisation: Gate Herts (Gypsy & Traveller Empowerment, Hertfordshire) Name:

Comment Number: 7

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

The implication of Policy SP10 f) is that Gypsy and Traveller residential development within the Chilterns Beechwoods Special Area of Conservation Zone of Influence will be required to make contributions towards the Strategic Access Management and Monitoring Strategy and to provision for new Suitable Alternative Natural Greenspace. These financial contributions are substantial. In the absence of evidence about the recreational habits of Gypsies and Travellers we would question whether such contributions are justified.

**7.0 Legal Compliance**

7.1 The implication of the flaws in the Local Plan identified in the above paragraph, not least in failing to making any allocations for Gypsies and Travellers, means that not only is the plan not sound, it is also not legally compliant on the basis:

- It indirectly discriminates against Gypsies and Travellers (whose ethnicity is a protected characteristic under the Equality Act) without adequate justification, contrary to s.19 of the 2010 Equality Act; and
- Its approach is contrary to the Public Sector Equality Duty under s.149 of the Act.

### Please upload any supporting documents here. Do not include any signatures or other personal data.

## NEB1 - Woodlands, Trees and Landscape Features

### 145 - Catesby Estates

Submission Number: 145 Submission Date: 07/11/24 11:13

Respondent: Company/Organisation: Stantec Name: Mr P Derry

On Behalf Of Company/Organisation: Catesby Estates Name:

Comment Number: 30

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy NEB 1 seeks development within the Broad Locations to demonstrate a delivery of a minimum of at least 1 semi-mature tree for each dwelling. This builds upon the requirements of Strategic Policy SP10 which highlights that tree planting is a priority for the Council. The principle behind the policy and the wish to encourage canopy cover is supported in principle.

The Council must however ensure that this can be achievable, particularly on the larger Broad Locations. The need for them to be semi-mature confirms that this will require a large land take. The location of trees in gardens should be discouraged (although a small amount no doubt allowed) given there is no long term ability to retain (beyond the standard 5 year replacement planning condition).

Broad Locations will therefore need to factor this into the scheme. Along with space limitations brought about by requirements for wall thickness to meet sustainability/BREEAM standards, space standards, biodiversity net gain etc, there is a pressure on space to fit all the requirements within a site. The knock-on effect will be the ability to provide appropriate numbers on the site. The concern is that the larger Broad Locations would not be able to provide the trees necessary given such space pressures. Therefore, the Council aims of responding to the climate emergency, and its priority for providing tree planting at scale may be compromised.

As noted within comments (relating to Part B below) regarding specific draft allocations, a number of these sites will require removal of trees, in some case in great quantity. Such allocations would be in direct conflict with the proposed policy.

Land at London Road, St Albans includes proposals for new areas of open space throughout the site, where it is envisaged that tree planting can make a significant contribution towards placemaking. There would also be new opportunities for further planting along the site boundaries. The site area also includes land to the south of London Road Cemetery, part of which would be used for a cemetery extension as necessary, with the remainder forming a significant area of accessible open space to be enhanced for beneficial use (including biodiversity net gain). This allows for additional tree planting, and strengthening along the southern boundary to the existing housing at Nightingale Lane. It should be noted that any such planting would be located to the north of any properties and therefore would not cause any overshadowing to these existing dwellings.

**273 - Hallam Land Management and St Albans School**

Submission Number: 273 Submission Date: 08/11/24 09:33
Respondent: Company/Organisation: LRM Planning Name: Mr Owen Jones
On Behalf Of Company/Organisation: Hallam Land Management and St Albans School Name:

Comment Number: 18

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

10.2 In the case of the Broad Location at North St Albans, Hallam and St Albans School support the intent to enhance tree cover and protect existing woodlands, trees and landscape features. Further clarity is however sought in relation to criterion (a), which requires one semi-mature tree for each dwelling. It is not clear from the policy wording what this provision is expected to include, whether it be on-plot planting, or could be delivered in part or in whole through woodland creation. There also appears to be a discrepancy in the policy, which does not reflect the intentions of Policy LG1 which also requires one tree to be provided per 2.5 bedspaces for C2 accommodation.

10.3 The wording of criterion (e) of the policy also creates potential problems from a deliverability perspective, and although the presumption against the removal or destruction of any hedgerow that is considered important is acknowledged and understood, it is considered that this sentence should be concluded to read "unless material considerations exist to justify their loss or amendment, and any loss can be mitigated for".

### 349 - Lisa Peters

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 22

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Woodlands, Trees and Landscape Features**

CHPC supports the intention of **Policy NEB1**, which aims to enhance biodiversity and improve the quality of green spaces in new developments, particularly through the planting of semi-mature trees. The requirement for each new dwelling in Broad Locations to contribute to the delivery of at least one semi-mature tree is a positive step towards improving the local environment, enhancing wildlife habitats, and contributing to the aesthetic and ecological value of new developments.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

However, CHPC raises concerns about the practicality and sustainability of the policy, particularly in rural and semi-rural areas like Colney Heath. The policy should ensure that the choice of tree species is appropriate for the local environment and does not inadvertently lead to problems in terms of maintenance, growth, or integration with existing landscapes. While the requirement for native local species is welcomed, it will be important to ensure that the specific species selected are suited to the soil, climate, and local wildlife needs.

Additionally, while the policy specifies that trees should be grown within the UK, there should be consideration of how the trees are sourced, ensuring they are cultivated in a manner that maximises their resilience and long-term viability. The cost and logistics of sourcing semi-mature trees that meet these criteria could pose challenges for developers, so the Council recommends flexibility in the implementation of this requirement, allowing for tree planting schemes that may evolve in stages or incorporate more mature trees from local nurseries.

Finally, CHPC encourages the Local Plan to further elaborate on how the planting of semi-mature trees will be maintained over time. Ensuring that trees are cared for, especially in the early years of growth, is critical to the success of this policy. It will be essential to establish long-term stewardship and maintenance plans to ensure that the trees are properly watered, protected, and allowed to thrive.

In conclusion, while CHPC fully supports the objectives of **Policy NEB1** in enhancing biodiversity and green infrastructure, we recommend careful consideration of the implementation challenges related to tree species selection, sourcing, and long-term maintenance to ensure the policy achieves its intended environmental benefits.

## NEB2 - Local Green Spaces

### 114 - Hertfordshire County Council - Property Team

Submission Number: 114 Submission Date: 06/11/24 23:21

Respondent: Company/Organisation: Vincent + Gorbing Name: George Sellers

On Behalf Of Company/Organisation: Hertfordshire County Council - Property Team Name:

Comment Number: 11

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

It is considered that Flamsteadbury Park, Redbourn as a whole does not meets the tests of allocation as an LGS. It is demonstrated at Chapter 5 of the attached document why the designation is inconsistent with national policy and guidance in relation to this matter.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

- It is requested that the allocation of Flamsteadbury Park as a Local Green Space is amended.
- It is requested that, in line with representations made at Part B, the northern half of the site is allocated as a small housing site, to meet the growth strategy of this Local Plan, and the southern part of the site is allocated as a Local Green Space, to continue to contribute toward the open space provision within the village.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

Quality local space, play and recreation
We are pleased to see that the draft Local Plan seeks to preserve existing urban and rural green space/ green infrastructure and enhancement, or creation of new areas are developed to encourage public access through draft Strategic Policy SP10 and draft policies NEB2, NEB3, NEB4, NEB6 and NEB10.

We support the Plan's landscape-led approach to retain and enhance existing green infrastructure in new developments. We recommend that there should be an expectation on developers that the provision of open space and green infrastructure should come forward at an early stage of development to encourage healthy, sustainable behaviours from the outset.

**358 - St Albans School**

Submission Number: 358 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: MFS Resolution Name: Michael Fearn

On Behalf Of Company/Organisation: Name: St Albans School

Comment Number: 6

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Draft Policy NEB2***"Local Green Spaces"*– There is guidance within the NPPF & PPG upon the terms of this designation. Because this designation equates to Green Belt in its impact, it must be used with caution and only where absolutely necessary. The designation as LGS*"should not be used in a way that undermines this aim of plan making* [and]....*designation should not be proposed as a 'back door' way to try to achieve what would amount to a new area of Green Belt by another name".* It is unclear as to how the 'demonstrably special' nature of these sites has been established. In some cases, the proposed LGS is already within the Green Belt and the PPG is clear in stating "*consideration should be given to whether any additional local benefit would be gained by designation as Local Green Space".* There is no evidence that this exercise has been undertaken. Affected landowners should be contacted *"at an early stage about proposals to designate any part of their land as Local Green Space* [giving them]....*opportunities to make representations in respect of proposals in a draft plan"*(NPPF, paragraphs 105-107 & PPG Reference IDs: 37-007, 010, 015 & 019-20140306 Revision date: 06 03 2014).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. ## NEB3 - Non-Designated Local Green Space

### 144 - Mr Roy Warren

Submission Number: 144 Submission Date: 07/11/24 11:10

Respondent: Company/Organisation: Sport England Name: Mr Roy Warren

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The principle of protecting green spaces (not designated as Local Green Space) which is likely include a large proportion of the district's outdoor sports facilities that meet the community's sport and recreation needs is welcomed. However, in relation to the second part of criterion (a), while the intention is welcomed, does not specify that replacement land and facilities need to be equivalent or better in terms of quantity and quality. At present, the wording only requires 'suitable equivalent replacement land and facilities'. As well as the need for this policy to be consistent with paragraph 103 of the NPPF, an amendment is required to ensure that replacement local green space is not inferior in practice. For example, if an outdoor sports pitch for instance is smaller or of poorer quality than the one it would replace it would not meet the needs of existing users and would not represent an acceptable replacement in principle. The current wording may be misinterpreted by an applicant because 'suitable equivalent' does not have any quantity or quality parameters. Based on Sport England's experience, where such clarifications have not made explicit in local plan policies, this can be exploited and interpreted to promote developments on open space that include inferior replacement facilities. In its current form the policy would not therefore be considered to meet the 'consistent with national policy' test of soundness.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To address this representation, it is requested that the second part of criterion (a) be revised along the following lines "*Or, if this does not apply, suitable replacement land and facilities of equivalent or better provision in terms of quantity and quality can be provided elsewhere and must be laid out and playable before the existing site is lost".*

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

---

**328 - Charlie Thompson**

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 28

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Quality local space, play and recreation
We are pleased to see that the draft Local Plan seeks to preserve existing urban and rural green space/ green infrastructure and enhancement, or creation of new areas are developed to encourage public access through draft Strategic Policy SP10 and draft policies NEB2, NEB3, NEB4, NEB6 and NEB10.
We support the Plan's landscape-led approach to retain and enhance existing green infrastructure in new developments. We recommend that there should be an expectation on developers that the provision of open space and green infrastructure should come forward at an early stage of development to encourage healthy, sustainable behaviours from the outset.

## 335 - Michael Fearn

Submission Number: 335 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: MFS Resolution Name: Michael Fearn

Comment Number: 26

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Draft Policy NEB3***"Non-designated Local Green Space"*– there is no need for such a policy. Bearing in mind the status of most of the District is already subject to Green Belt restrictions, the imposition of yet further controls over many of the few possible remaining urban area development sites is likely to compromise even further the delivery of the necessary development. Sports fields do not need any additional protection to that already given by paragraph 103 of the NPPF. Furthermore, the statutory consultee 'Sport England', also provide detailed policy safeguards regarding development proposals upon open spaces in the 2018 policy document referenced earlier in these submissions. The policy is not positively prepared; justified; effective; or consistent with national policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). ## 114 - Hertfordshire County Council - Property Team

Submission Number: 114 Submission Date: 06/11/24 23:21

Respondent: Company/Organisation: Vincent + Gorbing Name: George Sellers

On Behalf Of Company/Organisation: Hertfordshire County Council - Property Team Name:

Comment Number: 15

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

This policy as currently written is not consistent with national policy, thus enabling the delivery of sustainable development. It is not considered compliant or sound that the area to the south of Broad Location B6 at London Colney has been allocated as Significant Publicly Accessible Green Space.

The below suggested wording is intended to address this.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

- It is requested that the Significant Publicly Accessible Green Space (proposed) is removed from the area to the south of Bridleway 4 at Broad Location B6 London Colney. It is currently unclear whether this will form part of the development scheme, and it is currently not publicly accessible land. Should it become so during the course of the further evolution of the West of London Colney proposals, there is nothing to stop this from happening even without such an allocation. The allocation is premature to bring forward as part of this Local Plan.
- Further explanation and justification is set out at Chapter 2 of the attached document.

### Please upload any supporting documents here. Do not include any signatures or other personal data.

1. SADC Reg 19 Oct 2024 Reps FV3 w apps_compressed_[R].pdf

### If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

This is a new allocation as part of the Reg 19 Plan. The allocation of this land has not been discussed with HCC Property as landowner. It is therefore considered appropriate for the Inspector to hear discussion on this point within the forum of the EIP.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**291 - SEGRO (Radlett) Limited**

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 18

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

7.1 Strategic Policy SP10 – Natural Environment, Biodiversity and Green and Blue Infrastructure outlines how the Council *'will protect and enhance green and blue infrastructure for its role in combating Climate Change and supporting biodiversity, along with its value for recreation, health and wellbeing, and landscape value.'*

7.2 Policy NEB 4 - Significant Publicly Accessible Green Areas states that *'the Council will preserve and enhance the SRFI Country Park(s) (approved)'*and *'will seek development contributions from relevant major developments to mitigate impacts and support the maintenance and enhancement of these areas, including through delivery of Greenspace Action Plans (GAPs) and Greenspace Management Plans.'*

7.3 SEGRO (Radlett) Limited is supportive of the above and highlights the contribution that the SRFI will provide towards SADC achieving these objectives. The proposed Country Park is an important element of the Radlett SRFI proposals.

7.4 The SRFI Country Park will provide 247 hectares of woodland and managed countryside including 80 hectares of new species rich mixed woodland planting and 160 hectares of conservation grazing which will contribute to the Watling Chase Community Forest Area. Within the Country Park there will be a Visitor Interpretation Centre, car parking and picnic areas. New footpaths, bridleways, nature trails and multi-use routes along with improvements to existing rights of way comprising circa 17km in total will be delivered. Additionally, new and improved bird watching, equestrian and fishing facilities will also be created, as well as informal recreational facilities such as play areas, outdoor gyms and trim trails.

7.5 The Country Park as part of the SRFI has been provided to provide improved public access to green space, facilities for recreation and biodiversity. SEGRO (Radlett) Limited are supportive of Policy NEB4's recognition of the SRFI Country Park in assisting to maintain a high quality of life and supporting both mental and physical health.

7.6 Policy NEB7 - Biodiversity Provision in the Design of New Buildings and Open Spaces requires that proposals *'have regard to the biodiversity already present within the site'*as well as *'identify opportunities to maximise the provision for biodiversity on the design of new buildings in line with national and local nature conservation priorities'*.

7.7 Policy NEB 10 – Landscape and Design requires major proposals to consider *'how the existing*

*landscape will be protected, enhanced and integrated into the development, detailed in a Landscape Strategy, along with new tree planting as part of any new green space provision'*.

7.8 It is considered that policies NEB7 and NEB10 are justified and sound, recognising the importance of new developments in increasing biodiversity and providing sufficient landscaping. The landscaping and biodiversity improvements that will be facilitated through the Country Park as part of the SRFI accord with Policies NEB7 and NEB10.

Respondent: Company/Organisation: Name: Mr Malcolm Day

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Site B6 - West of London Colney AL2 1LN to be restored to Metropolitan Green Belt status. This is based on “SKM” plans which are more than 10 years out of date.

Policy 10.38 this involves the loss of agricultural land, the grading of the land has not been disclosed. Food production has to be increased by 70% during the next 25 years and food miles must be reduced. The extravagant land use for school playing fields must be curtailed. The alternative is for those areas to be opened up for community use with suitable security procedures in place, this will increase demand on sand/gravel/concrete/additional quarrying/excavations will aggrieve many local residents.

There is no evidence that sufficient resources will be available within the local authority to enforce all the standards/conditions mentioned.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Statements to be removed:

“that travel outside London Colney will be reduced.”

Reasons for this modification

Residents will be travelling to work/hospitals/friends and family/sports and entertainment venues etc and many parents will select secondary schools such as Nicholas Breakspear, Sandringham, Marlborough or even Parmiter’s (Garston).

The planned school capacity for this site is larger than necessary.

Statements to be removed (continued):

Site access for pedestrians, bicycles and vehicles will be through napsbury park.

Reasons for this modification:

The additional noise and disturbance will do nothing to further integration between the new residents and the existing residents (ie social cohesion).

Statements to be added: Policy NEB4

Confirmation that land areas within the defined site have or will be sold to SEGRO by Hertfordshire County Council as part of the SRFI compensatory measures. The areas concerned are those bordering the River Colne and those adjacent to Napsbury Park. Also, the intentions concerning the former Barley Mow Farm and Fir Tree Firm.

Confirmation that a Nursing Home accommodating 60 plus people and special needs accommodation for 10 people will be provided.

Confirmation that the site will not involve more than 40 residential units per hectare.

Confirmation that the site will contain 40% appropriate housing provision.

Confirmation that no building on site will exceed for storeys in height.

The landowners intention in the foreseeable future in respect of the agricultural land between site B6 – the Napsbury Park boundary and the railway line.

---

**349 - Lisa Peters**

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 23

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Significant Publicly Accessible Green Spaces**

CHPC strongly supports the objectives outlined in **Policy NEB4**, which seeks to protect and enhance local nature reserves and other areas of biodiversity value. In particular, we believe that Colney Heath Common is a vital asset for the local community and wildlife, and should be safeguarded as part of the broader green infrastructure network within the Local Plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

In light of this, CHPC recommends that the area known as Warren Field be formally included as part of the Colney Heath Common Local Nature Reserve (LNR). Warren Field, located adjacent to Colney Heath Common, holds significant ecological value and contributes to the overall biodiversity of the area.

### 370 - Diane Black

Submission Number: 370 Submission Date: 09/11/24 09:00

Respondent: Company/Organisation: Wheathampstead District Preservation Society Name: Diane Black

Comment Number: 8

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**WDPS comments on St Albans City and District Council Draft Local Plan**

Wheathampstead and District Preservation Society (WDPS) has approximately 400 households as members, and we therefore speak for around 15% of the population of the Wheathampstead area.

**Environmental Issues**

The following Nature Reserves in Wheathampstead Parish should be added to the list;

1) Bower Heath

2) Butterfield Road Nature Reserve

3) Marshalls Heath

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Summary**

Considering the comments above, we urge the council to revisit the draft Local Plan, challenge the Government's Standard Method for calculating housing needs and produce a more equitable balanced plan that serves the needs of the St Albans District residents. We would like to see more detailed planning which includes funding allocation and addresses key issues on exactly how the plan is going to meet climate change targets, deal with extreme weather events, increase biodiversity by 10%, protect the Green Belt, improve transport networks including cycleways, improve water networks and prevent pollution of our rivers, improve services and facilities and protect secondary school placements.

### 361 - Mohammad Ahmed

Submission Number: 361 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: The Environment Agency Name: Mohammad Ahmed

Comment Number: 10

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**NEB 5: Blue Infrastructure**

We are pleased to see that most of comments from the Regulation 18 response have been taken on-board, in relation to:

- The technical feasibility of river restoration.
- Inclusion of further text on wider issues associated to watercourses.
- Inclusion of the requirements for a WFD impact assessment for development within 8-metres of a main river.
- Inclusion of text around overshadowing etc.

However, as communicated in our Regulation 18 response and the Duty to Cooperate meeting, we have significant concerns that the requested 8-metre buffer zone provisions have not been incorporated into this policy. Please see details below:

We recommend adding a clause related to the establishment of a minimum 8-metre buffer between all new development and the top of riverbank / flood defence / culvert. Leaving appropriate undeveloped buffer between river and development can reduce the risk of flooding and the need for a flood risk activity permit (FRAP). Additionally, these buffer zones also provide broader benefits towards biodiversity and assist in WFD compliance. Furthermore, as the Environment Agency is responsible for the management of main rivers, new development should not restrict access to main rivers and flood defence assets.

Please refer to Local Plans for neighbouring districts/boroughs for examples of this policy.

## NEB6 - Biodiversity and Biodiversity Net Gain

### 87 - The owners of the Albert Bygrave Retail Park

Submission Number: 87 Submission Date: 06/11/24 12:43

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: The owners of the Albert Bygrave Retail Park Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

- The Government's Planning Practice Guidance advises Councils on how to deal with BNG in Local Plans. Paragraph 006 (Reference ID: 74-006-20240214) states that Councils should not duplicate the provisions of the statutory framework and prohibits policies that are incompatible with this framework. This need for consistency is vital.
- Draft Policy NEB6 sets out that off-site habitat creation will only be allowed where on-site delivery is "not possible or desirable". While this is laudable and reflects the government's preference for onsite delivery, achieving a net gain on a greenfield site is likely to be difficult. As a recent example (not in St Albans district), a 2ha site for 50 dwellings could achieve an on-site net gain only if built development was restricted to 25% of the site and habitat creation occupied the remaining 75% of the site. The achievement of the Council's expected capacity for allocated housing sites needs to be part of the consideration as to whether on-site delivery is "possible or desirable".
- In summary, while we consider Policy NEB6 to be **legally compliant** and **sound** and **no modifications** are necessary, the policy will need to be interpreted flexibly by the Council if it is not to frustrate the Local Plan objectives.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Owners of Albert Bygrave Retail Park_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**207 - Bellway Homes (North London) Limited**

Submission Number: 207 Submission Date: 07/11/24 17:11

Respondent: Company/Organisation: Bellway Homes (North London) Limited (C/O Savills) Name: Miss Dorothy Tsang

On Behalf Of Company/Organisation: Bellway Homes (North London) Limited Name:

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

2.223 Bellway Homes Ltd are supportive of the overarching objective for delivery of tangible enhancements to biodiversity and ecology as part of new developments. However, we have comments on the

framing of the part of the policy which refers to mandatory net gain as outlined below:

*"i. Meet a minimum 10% net gain in biodiversity that is calculated using the latest Biodiversity Metric from Government guidance and is approved via a Biodiversity Gain Plan. Off-site habitat creation and / or enhancement contributions will be allowed only where on-site is not possible or desirable and these should be within the District wherever possible. Payments in lieu to the national statutory biodiversity credit scheme will only be allowed in exceptional circumstances; and"*

2.224 It is accepted that under the Environment Act 2021, all planning permissions granted in England (with a few exemptions) will have to deliver at least 10% gain. Mandatory Net Gain took effect in the UK from February 2024. A **clause needs to be included within the supporting text to the draft policy outlining the exemptions from mandatory biodiversity net gain in line with the provisions of the planning practice guidance** as summarised below**:**

*"While every grant of planning permission in England is deemed to have been granted subject to the biodiversity gain condition, commencement and transitional arrangements, as well as exemptions, mean that certain permissions are not subject to biodiversity net gain.*

*Biodiversity net gain has only been commenced for planning permissions granted in respect to an application made on or after 12 February 2024. Permissions granted for applications made before this date are not subject to biodiversity net gain.*

*Biodiversity net gain does not apply to:*

- retrospective planning permissions made under section 73A; and
- *section 73 permissions where the original permission which the section 73 relates to was either granted before 12 February 2024 or the application for the original permission was made before 12 February 2024*
- The approval of reserved matters for outline planning permissions is not subject to the biodiversity gain condition (as it is not a grant of planning permission)".

2.225 The inclusion of this clause will provide sufficient comfort for developers that committed developments or other applications which predate mandatory net gain coming into effect, will not be retrospectively caught by the provisions of Policy NEB6.

2.226 Whilst Bellway had submitted an application on their landholdings at Roestock Lane in November 2022, in advance of mandatory net gain taking effect, the scheme had been designed to achieve a voluntary biodiversity net gain in excess of the 10% requirement, which had been based on Metric 3.1.

2.227 As the transitional provisions are applicable to the landholdings at Roestock Lane the consideration of the outline application and subsequent applications for reserved matters approval shall be determined on the basis of the voluntary and not mandatory net gain and the statutory metric shall not be applied.

2.228 Additionally, we would query the reference to onsite reprovision of all habitat types as outlined in the draft policy, "*Off-site habitat creation and / or enhancement contributions will be allowed only where on-site is not possible or desirable and these should be within the District wherever possible".* In the decision to allocate housing sites, or consideration of applications for new housing the authority have to balance the inevitable loss of grassland habitats against the need to deliver new housing to meet the needs of the local community. The draft policy should acknowledge that losses to certain habitat typologies are necessary to delivery housing and development should be supported where it can be demonstrated that proposals will result in delivery of tangible gains to ecology.

2.229 It is not uncommon for developers to struggle to deliver a 10% on greenfield sites as they have a particularly high baseline. The BNG section of the above policy states that off-site contributions in the District will be allowed only where on-site is not possible or desirable.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

2.230 In the first instance, it should be clarified what the Council deem to be 'not possible or desirable', for example an unavoidable loss of a high priority habitat or making a scheme financially unviable. Secondly, there is no statutory requirement for off-site contributions to be delivered within the District and as such this requirement should be removed from the policy.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Representations to the Reg_19 consultation on St Albans Draft Local Plan_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Our client has significant concerns regarding the soundness of this draft local plan. Given that they have landholdings within the borough, we assert our right to participate in discussions regarding the draft policies during the Examination in Public (EIP) stage

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report for details**

**Policy NEB6 – Biodiversity and Biodiversity Net Gain (BNG)**

- The Government's Planning Practice Guidance advises Councils on how to deal with BNG in Local Plans. Paragraph 006 (Reference ID: 74-006-20240214) states that Councils should not duplicate the provisions of the statutory framework and prohibits policies that are incompatible with this framework. This need for consistency is vital.
- Draft Policy NEB6 sets out that off-site habitat creation will only be allowed where on-site delivery is "not possible or desirable". While this is laudable and reflects the government's preference for onsite delivery, achieving a net gain on a greenfield site is likely to be difficult. As a recent example (not in St Albans district), a 2ha site for 50 dwellings could achieve an on-site net gain only if built development was restricted to 25% of the site and habitat creation occupied the remaining 75% of the site. The achievement of the Council's expected capacity for allocated housing sites needs to be part of the consideration as to whether on-site delivery is "possible or desirable".

- In summary, while we consider Policy NEB6 to be **legally compliant** and **sound** and **no modifications** are necessary, the policy will need to be interpreted flexibly by the Council if it is not to frustrate the Local Plan objectives.

**Policy NEB6 – Biodiversity and Biodiversity Net Gain (BNG)**

- The Government's Planning Practice Guidance advises Councils on how to deal with BNG in Local Plans. Paragraph 006 (Reference ID: 74-006-20240214) states that Councils should not duplicate the provisions of the statutory framework and prohibits policies that are incompatible with this framework. This need for consistency is vital.
- Draft Policy NEB6 sets out that off-site habitat creation will only be allowed where on-site delivery is "not possible or desirable". While this is laudable and reflects the government's preference for onsite delivery, achieving a net gain on a greenfield site is likely to be difficult. As a recent example (not in St Albans district), a 2ha site for 50 dwellings could achieve an on-site net gain only if built development was restricted to 25% of the site and habitat creation occupied the remaining 75% of the site. The achievement of the Council's expected capacity for allocated housing sites needs to be part of the consideration as to whether on-site delivery is "possible or desirable".
- In summary, while we consider Policy NEB6 to be **legally compliant** and **sound** and **no modifications** are necessary, the policy will need to be interpreted flexibly by the Council if it is not to frustrate the Local Plan objectives.

This policy has seen changes following the updated Biodiversity Net Gain (BNG) legislation. The changes under the BNG section are supported as they have been made are in accordance with the Environment Act (2021). It is noted that additional text has been added stating “where possible, higher than 10% net gain in biodiversity on site is strongly encouraged”. While this is aspirational, there is no objection to the wording of this addition.

## 304 - EDIT Land Ltd

Submission Number: 304 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 5

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land to the south of Burydell Lane, Park Street” have been discounted incorrectly.

**Representations**

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

SP1: A Spatial Strategy for St Albans District

SP3 — Land and the Green Belt

HOU 1- Housing Mix

HOU 2 — Affordable Housing

SP2 — Responding to the Climate Emergency

NEB 6 - Biodiversity and Biodiversity Net Gain — Comment

LG5 — Green Belt — Object

**Policy *NEB 6 - Biodiversity and Biodiversity Net Gain - Comment***

EDIT Land are supportive of the overarching objective for delivery of tangible enhancements to biodiversity and ecology as part of new developments. However, we have comments on the framing of the part of the policy which refers to mandatory net gain as outlined below:

*"i.* Meet *a minimum 10% net gain in biodiversity that is calculated using* the latest *Biodiversity Metric from Government guidance and is approved via a Biodiversity Gain Plan.* Off-site habitat *creation and / or enhancement contributions will be allowed only where on-site is* not *possible or desirable and* these *should be within the District wherever possible. Payments in lieu* to *the national* statutory *biodiversity credit scheme will only be allowed in exceptional circumstances; and"*

It is accepted that under the Environment Act 2021, all planning permissions granted in England (with a few exemptions) will have to deliver at least 10% gain. Mandatory Net Gain took effect in the UK from February 2024. A **clause needs to be included within the supporting text to the draft policy outlining the exemptions from mandatory biodiversity net gain in line with the provisions of the planning practice guidance** as summarised below:

*"While every grant of planning permission in England is deemed* to have *been granted subject* to *the biodiversity gain condition, commencement and transitional arrangements,* as *well* as *exemptions, mean that certain permissions are not subject to biodiversity net gain.*

*Biodiversity net gain has only been commenced for planning permissions granted in* respect to *an application made* on or after 12 *February 2024. Permissions granted for applications made before this date are* not *subject to biodiversity net gain.*

*Biodiversity net gain does not apply* to:

retrospective planning permissions made under section 73A; and section *73 permissions where the original permission which the section* 73 relates to was *either granted before 12 February 2024 or the application for the original permission was made before* 12 *February 2024*

The approval of reserved matters for outline planning permissions is not subject to the biodiversity gain condition (as it is not a grant of planning permission)".

The inclusion of this clause will provide sufficient comfort for developers that committed developments or other applications which predate mandatory net gain coming into effect, will not be retrospectively caught by the provisions of Policy NEB6.

Additionally, we would query the reference to onsite reprovision of all habitat types as outlined in the draft policy, *"Off-site habitat creation and/or enhancement contributions will be allowed only where on-site is* not *possible or desirable and these should be within the District wherever possible".* In the decision to allocate housing sites, or consideration of applications for new housing the authority have to balance the inevitable loss of grassland habitats against the need to deliver new housing to meet the needs of the local community. The draft policy should acknowledge that losses to certain habitat typologies are necessary to delivery housing and development should be supported where it can be demonstrated that proposals will result in delivery of tangible gains to ecology.

It is not uncommon for developers to struggle to deliver a 10% on greenfield sites as they have a particularly high baseline. The BNG section of the above policy states that off-site contributions in the District will be allowed only where on-site is not possible or desirable.

In the first instance, it should be clarified what the Council deem to be 'not possible or desirable', for example an unavoidable loss of a high priority habitat or making a scheme financially unviable. Secondly, there is no statutory requirement for off-site contributions to be delivered within the District and as such this requirement should be removed from the policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

*Biodiversity net gain does not apply* to:

retrospective planning permissions made under section 73A; and section *73 permissions where the original permission which the section* 73 relates to was *either granted before 12 February 2024 or the application for the original permission was made before* 12 *February 2024*

The approval of reserved matters for outline planning permissions is not subject to the biodiversity gain condition (as it is not a grant of planning permission)".

The inclusion of this clause will provide sufficient comfort for developers that committed developments or other applications which predate mandatory net gain coming into effect, will not be retrospectively caught by the provisions of Policy NEB6.

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Quality local space, play and recreation
We are pleased to see that the draft Local Plan seeks to preserve existing urban and rural green space/ green infrastructure and enhancement, or creation of new areas are developed to encourage public access through draft Strategic Policy SP10 and draft policies NEB2, NEB3, NEB4, NEB6 and NEB10.
We support the Plan's landscape-led approach to retain and enhance existing green infrastructure in new developments. We recommend that there should be an expectation on developers that the provision of open space and green infrastructure should come forward at an early stage of development to encourage healthy, sustainable behaviours from the outset.

## 350 - Hill Residential

Submission Number: 350 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: tor&co Name: Sophia Goodhead

On Behalf Of Company/Organisation: Hill Residential Name:

Comment Number: 17

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Policy NEB6 Biodiversity and Biodiversity Net Gain**

Part a)i. of the policy (impact on Sites of Special Scientific Interest) is not required as NPPF 186b already stipulates how the Council should deal with proposals that have an 'adverse effect' on SSSI's. This part of the policy should therefore be removed.

With regard to Biodiversity Net Gain, the legislation already includes a preference for on-site solutions so the current policy wording in the final 'Biodiversity Net Gain' section of text is not necessary nor desirable. Hill also note that the policy states that payments in lieu to the national statutory biodiversity credit scheme will only be allowed in exceptional circumstances. However the use of credits will depend on the ability of net gains to be delivered on site and the availability of credits within the local area or indeed elsewhere. In order to not hinder the delivery of sustainable development where use of credits may be required, Hill would suggest that this sentence is deleted from policy NEB6 so that it is effective.

Part f) should be amended to "*Where necessary and justified, off-site initiatives supporting biodiversity will be through environmental land management schemes including alongside mandatory biodiversity net gain as another source of income to enhance biodiversity and the wider environment*;" This will ensure the policy requirement is sufficiently justified, proportionate and deliverable and does not hinder the development of sustainable sites.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.

- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

## 361 - Mohammad Ahmed

Submission Number: 361 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: The Environment Agency Name: Mohammad Ahmed

Comment Number: 11

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**NEB 6: Biodiversity and Biodiversity Net Gain**

As communicated in our Regulation 18 response, we recommend the inclusion of a clause which covers invasive non-native species and their management, including biosecurity measures.

Invasive species are a growing issue and must be addressed to stop the spread. Development sites should be checked for invasive species and measures should be put in place to follow biosecurity and eradicate the invasive species on site.

### Please upload any supporting documents here. Do not include any signatures or other personal data.

## 362 - EDIT Land Ltd

Submission Number: 362 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 6

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land at Roundhouse Farm, Colney Heath” have been discounted incorrectly

Representations

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

The Reg. 18 Draft Local Plan includes planning policies relating to various topics, which would become the principal consideration for the decision maker when determining planning applications.

EDIT Lands has not provided comment on a number of policies and advise which they are commenting on in the list below, but reserves the right to comment on others in the future.

However, SADC should consider whether all the policies as drafted are useful and necessary for decision making, and do not just repeat that which is already stated in the National Planning Policy Framework (NPPF), Planning Practice Guidance or legislation. Policies should also be unambiguous, clear and concise, without being overly onerous or stifle innovation or ambition.

EDIT Lands main concern with the Local Plan, as a whole, is the weak approach to the provision of much needed housing. Firstly, the level of housing planned for does not seek to address housing need adequately or provide any contingency, nor does it seek to address unmet need or positively plan for previous years of significant under-delivery.

Furthermore, the level of housing which is proposed as windfall, is unsound. 20% of the total housing supply to come forward on sites which do not have allocations, nor are formally identified is not positively prepared and is a huge outlier compared to neighbouring authorities. We consider the proportion of windfall to be wholly inappropriate given the borough's historic poor delivery and acute housing need.

It is also perverse for SADC to suggest that all brownfield sites have been exhausted to necessitate Green Belt release, whilst anticipating that such a high number will come forward via the windfall process. In addition, the Local Plan is heavily reliant on the delivery of a small number of broad growth areas and strategic extensions, namely the Hemel Garden Community which is allocated for net. 5,500 dwellings and 4,281 across the other strategic development sites which are subject to challenging land assembly and infrastructure delivery requirements which will constrain delivery of housing units within the early periods of the Local Plan. St Albans have acknowledged this situation in the reg.19 draft Local Plan where they are now asserting that only 4,300 dwellings will be delivered on the HGC sites within the LP period, a reduction of 450 dwellings from the LP trajectory and 1200 from the wider site allocation. Across all allocated sites within the borough, the council has lost net. 971 dwellings between Reg.18 and Reg.19 stage. There is no explanation, or justification on how the shortfall in housing delivery is accounted for within the revised housing trajectory, or local plan housing targets.

The housing trajectory places significant reliance on these strategic sites without due consideration to implications of these strategic sites not being delivered or brought online in line with the housing trajectory.

The emerging Local Plan is also not prepared positively as it fails to make any consideration to the need for natural growth (and deliverable) within the 'washed over villages' within the green belt, with no consideration paid in detail to areas for release from the green belt in these locations. As outlined in Section 3 of this document our client challenges the methodology which has been applied in the green belt review in light of a failure to apply a macro level analysis to the green belt parcels.

Furthermore the draft Local Plan fails to make provision for custom build and self-building housing typologies despite a clear need being identified in the National Planning Policy Framework no recognition is made to the contribution this typology makes to meeting established demand. We understand that there is a need locally for such housing and failure to plan for such housing, is not positive.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

- SP1: A Spatial Strategy for St Albans District
- SP3 – Land and the Green Belt
- HOU 1 – Housing Mix
- HOU 2 – Affordable Housing
- SP2 – Responding to the Climate Emergency
- NEB 6 – Biodiversity and Biodiversity Net Gain – Comment
- LG5 – Green Belt – Object

Policy NEB 6 – Biodiversity and Biodiversity Net Gain – Comment

EDIT Land are supportive of the overarching objective for delivery of tangible enhancements to biodiversity and ecology as part of new developments. However, we have comments on the framing of the part of the policy which refers to mandatory net gain as outlined below:

“i. Meet a minimum 10% net gain in biodiversity that is calculated using the latest Biodiversity Metric from Government guidance and is approved via a Biodiversity Gain Plan. Off-site habitat creation and / or enhancement contributions will be allowed only where on-site is not possible or desirable and these should be within the District wherever possible. Payments in lieu to the national statutory biodiversity credit scheme will only be allowed in exceptional circumstances; and” It is accepted that under the Environment Act 2021, all planning permissions granted in England (with a few exemptions) will have to deliver at least 10% gain. Mandatory Net Gain took effect in the UK from February 2024. A clause needs to be included within the supporting text to the draft policy outlining the exemptions from mandatory biodiversity net gain in line with the provisions of the planning practice guidance as summarised below:

“While every grant of planning permission in England is deemed to have been granted subject to the biodiversity gain condition, commencement and transitional arrangements, as well as exemptions, mean that certain permissions are not subject to biodiversity net gain.

Biodiversity net gain has only been commenced for planning permissions granted in respect to an application made on or after 12 February 2024. Permissions granted for applications made before this date are not subject to biodiversity net gain.

Biodiversity net gain does not apply to:

- retrospective planning permissions made under section 73A; and
- section 73 permissions where the original permission which the section 73 relates to was either granted before 12 February 2024 or the application for the original permission was made before 12 February 2024
- The approval of reserved matters for outline planning permissions is not subject to the biodiversity gain condition (as it is not a grant of planning permission)”.

The inclusion of this clause will provide sufficient comfort for developers that committed developments or other applications which predate mandatory net gain coming into effect, will not be retrospectively caught by the provisions of Policy NEB6.

Whilst EDIT Landy had submitted an application on their landholdings at Roestock Lane in November 2022, in advance of mandatory net gain taking effect, the scheme had been designed to achieve a voluntary biodiversity net gain in excess of the 10% requirement, which had been based on Metric 3.1.

As the transitional provisions are applicable to the landholdings at Roestock Lane the consideration of the outline application and subsequent applications for reserved matters approval shall be determined on the basis of the voluntary and not mandatory net gain and the statutory metric shall not be applied.

Additionally, we would query the reference to onsite reprovision of all habitat types as outlined in the draft policy, “Off-site habitat creation and / or enhancement contributions will be allowed only where on-site is not possible or desirable and these should be within the District wherever possible”.

In the decision to allocate housing sites, or consideration of applications for new housing the authority have to balance the inevitable loss of grassland habitats against the need to deliver new housing to meet the needs of the local community.
The draft policy should acknowledge that losses to certain habitat typologies are necessary to delivery housing and development should be supported where it can be demonstrated that proposals will result in delivery of tangible gains to ecology.
It is not uncommon for developers to struggle to deliver a 10% on greenfield sites as they have a particularly high baseline. The BNG section of the above policy states that off-site contributions in the District will be allowed only where on-site is not possible or desirable.
.
In the first instance, it should be clarified what the Council deem to be 'not possible or desirable', for example an unavoidable loss of a high priority habitat or making a scheme financially unviable. Secondly, there is no statutory requirement for off-site contributions to be delivered within the District and as such this requirement should be removed from the policy.

## NEB7 - Biodiversity Provision in the Design of New Buildings and Open Spaces

### 263 - Mr Michael Priaulx

Submission Number: 263 Submission Date: 08/11/24 08:24

Respondent: Company/Organisation: Swifts Local Network: Swifts & Planning Group Name: Mr Michael Priaulx

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy NEB7 is very welcome but not sound as not effective due to lack of context (e.g. swift bricks are considered a universal nest brick suitable for a wide range of small bird species including swifts, house sparrows and starlings, e.g. see NHBC Foundation: Biodiversity in New Housing Developments (April 2021) Section 8.1 Nest sites for birds, page 42: https://www.nhbcfoundation.org/wp-content/uploads/2021/05/S067-NF89-Biodiversity-in-new-housing-developments_FINAL.pdf ), and lack of detail regarding best-practice guidance.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Please add to NEB7 to provide context and ensure suitable numbers for non-residential development and suitable locations for all types of development: "Swift bricks are a universal nest brick for small bird species and should be installed in accordance with best-practice guidance such as BS 42021 or CIEEM".

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To provide further information, if required.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**266 - Crest Nicholson Partnerships and Strategic Land**

Submission Number: 266 Submission Date: 08/11/24 08:47

Respondent: Company/Organisation: Stantec Name: Sarah Cross

On Behalf Of Company/Organisation: Crest Nicholson Partnerships and Strategic Land Name:

Comment Number: 17

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

6.22 This policy has seen additional text added with specifics on what new housing and non-residential development should provide. This includes:

- For new housing at c) i) – at least one swift brick per dwelling, on average for the development, installed in groups in optimal locations;
- For new housing at c) ii) – at least one integrated bat box and one integrated insect box per dwelling;
- For non-residential development at d) – groups of integrated swift bricks in numbers appropriate; and
- For fencing at f) whereby it is stated that all fencing should be hedgehog friendly with hedgehog highways throughout the development to a proportionate degree.

6.23 This policy is supported in principle. However, the wording does not provide any flexibility for developments where the installation of such bird or bat boxes would not be suitable to its location, orientation or type of development (i.e. a solely flatted block development). In addition, the use of hedgehog appropriate fencing is not always possible where there are sites with

topography issues (i.e. where retaining walls have to be used), or where they join onto secure boundaries such as with schools (education authorities do not support hedgehog fencing as this can cause small pets to get onto school grounds).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

6.24 Therefore, while this policy is appropriate for enhancing biodiversity in principle, it should be re-worded to allow flexibility where specific site constraints or circumstances do not allow for these types of installations, otherwise this policy will not be considered “positively prepared” or “justified”.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 273 - Hallam Land Management and St Albans School

Submission Number: 273 Submission Date: 08/11/24 09:33

Respondent: Company/Organisation: LRM Planning Name: Mr Owen Jones

On Behalf Of Company/Organisation: Hallam Land Management and St Albans School Name:

Comment Number: 21

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

10.4 It is agreed that development proposals should have regard to existing biodiversity on site, and how future biodiversity considerations can be designed for.

10.5 Criterion (c) specifically identifies the requirements for new residential development, which includes one swift brick box, one bat box, and one insect box, per dwelling. It also states that the swift boxes should be installed in groups in optimal locations. Consideration needs to be afforded to the practicality of this; although there are no in principle objections to the installation of such measures, the requirement for three boxes per dwelling would require consideration at a fairly early stage of the development proposals for large schemes to establish where they would be most successful. This should also be dependent on the result of survey work; if there are existing high levels of species within the site then there should be a greater emphasis on delivering these measures.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

10.6 It is suggested that criterion (c) is amended to read:

“Where practical and feasible, all housing proposals should provide:

1. at least one swift brick per dwelling, on average for the development, installed in groups in optimal locations;
2. at least one integrated bat box, on average for the development, per dwelling; and
3. at least one integrated insect box, on average for the development, per dwelling.

In instances where survey work reveals an existing high presence of these species, greater emphasis should be placed on delivering these measures".

**291 - SEGRO (Radlett) Limited**

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 19

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

7.1 Strategic Policy SP10 – Natural Environment, Biodiversity and Green and Blue Infrastructure outlines how the Council *'will protect and enhance green and blue infrastructure for its role in combating Climate Change and supporting biodiversity, along with its value for recreation, health and wellbeing, and landscape value.'*

7.2 Policy NEB 4 - Significant Publicly Accessible Green Areas states that *'the Council will preserve and enhance the SRFI Country Park(s) (approved)'*and *'will seek development contributions from relevant major developments to mitigate impacts and support the maintenance and enhancement of these areas, including through delivery of Greenspace Action Plans (GAPs) and Greenspace Management Plans.'*

7.3 SEGRO (Radlett) Limited is supportive of the above and highlights the contribution that the SRFI will provide towards SADC achieving these objectives. The proposed Country Park is an important element of the Radlett SRFI proposals.

7.4 The SRFI Country Park will provide 247 hectares of woodland and managed countryside including 80 hectares of new species rich mixed woodland planting and 160 hectares of conservation grazing which will contribute to the Watling Chase Community Forest Area. Within the Country Park there will be a Visitor Interpretation Centre, car parking and picnic areas. New footpaths, bridleways, nature trails and multi-use routes along with improvements to existing rights of way comprising circa 17km in total will be delivered. Additionally, new and improved bird watching, equestrian and fishing facilities will also be created, as well as informal recreational facilities such as play areas, outdoor gyms and trim trails.

7.5 The Country Park as part of the SRFI has been provided to provide improved public access to green space, facilities for recreation and biodiversity. SEGRO (Radlett) Limited are supportive of Policy NEB4's recognition of the SRFI Country Park in assisting to maintain a high quality of life and supporting both mental and physical health.

7.6 Policy NEB7 - Biodiversity Provision in the Design of New Buildings and Open Spaces requires that proposals *'have regard to the biodiversity already present within the site'*as well as *'identify opportunities to maximise the provision for biodiversity on the design of new buildings in line with national and local nature conservation priorities'*.

7.7 Policy NEB 10 – Landscape and Design requires major proposals to consider *'how the existing*

*landscape will be protected, enhanced and integrated into the development, detailed in a Landscape Strategy, along with new tree planting as part of any new green space provision'*.

7.8 It is considered that policies NEB7 and NEB10 are justified and sound, recognising the importance of new developments in increasing biodiversity and providing sufficient landscaping. The landscaping and biodiversity improvements that will be facilitated through the Country Park as part of the SRFI accord with Policies NEB7 and NEB10.

**350 - Hill Residential**

Submission Number: 350 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: tor&co Name: Sophia Goodhead

On Behalf Of Company/Organisation: Hill Residential Name:

Comment Number: 18

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Policy NEB7 Biodiversity Provision in the Design of New Buildings and Open Spaces**

Hill recognise the need to consider biodiversity, however, in order to provide some flexibility and to avoid being overly prescriptive where it may not be suitable, it is suggested that part e) (to include hedgehog highways throughout the development) include the term '*where appropriate'*so that the policy is proportionate and effective.

Further part c) now requires an integrated feature per dwelling, such as integrated bird, bat and insect boxes. This requirement represents a significant increase in provision compared to the Regulation 18 DLP requirement which has not been justified within the DLP or the evidence base. Such justification should be provided to support any increase.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

## NEB8 - Managing Flood Risk

### 110 - Thames Water Utilities Limited

Submission Number: 110 Submission Date: 06/11/24 15:39

Respondent: Company/Organisation: Thames Water Utilities Limited Name: Mr Chris Colloff

On Behalf Of Company/Organisation: Thames Water Utilities Limited Name:

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The promotion of SuDS is supported. However, it is considered the policy requires strengthening to ensure that the policy is effective in reducing the risk of all forms of flooding. In particular, the reference to SuDS being required for minor and householder development where applicable is vague and is unlikely to be effective. While the requirement for green SuDS is supported these may not be possible in all circumstances and it is considered that the policy would benefit from referencing a drainage hierarchy to be followed by development proposals to ensure it is effective.

Connection of surface water to existing sewers increases the risk of sewer flooding and pollution incidents and as such connection to foul sewers should be avoided.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is considered that Part (m) of the policy should be revised as follows to provide greater clarity on the drainage hierarchy to be followed by new development:

"m) SuDS should be **green where possible,** provide multiple benefits, such as biodiversity and integrate into the green infrastructure network **and should follow the following drainage hierarchy**

**1) Storing rainwater for later re-use;**
**2) Use infiltration techniques;**
**3) Attenuate rainwater in ponds/basins for later gradual release;**
**4) Attenuate rainwater by storage for later gradual release;**

**5) Discharge rainwater directly to a watercourse;**
**6) Discharge rainwater to a surface water sewer.**

**discharge of surface water to watercourse or sewer system is not to exceed pre-development (greenfield) runoff rates or a maximum of 2/l/s/ha whichever is lower."**

It is considered that the 2l/s/ha requirement should be incorporated into the wording of the policy. This standards is supported by DEFRA guidance (see: https://assets.publishing.service.gov.uk/media/602e7158d3bf7f7220e109d/_Rainfall_Runoff_Management_for_Developments__Revision_E.pdf ).

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*Refer to Attached submission letter for whole response and figures.*

**17 Policy NEB8 (Managing Flood Risk)**

17.1 The NPPF explains that *"inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future). Where development is necessary in such areas, the development should be made safe for its lifetime without increasing flood risk elsewhere"*[13]. Inappropriate development includes housing and the NPPF is clear that housing development should be directed away from areas at highest risk.

17.2 The NPPF explains[14] that *"All plans should apply a sequential, risk-based approach to the location of development – taking into account all sources of flood risk and the current and future impacts of climate change – so as to avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by:*

1. *applying the sequential test and then, if necessary, the exception test as set out below;*
2. *safeguarding land from development that is required, or likely to be required, for current of future flood management;*
3. *using opportunities provided by new development and improvements in green and other infrastructure to reduce the causes and impacts of flooding, (making as much use as possible of natural flood management techniques as part of an integrated approach to flood risk management); and*
4. *where climate change is expected to increase flood risk so that some existing development may not be sustainable in the long-term, seeking opportunities to relocate development, including housing, to more sustainable locations*

17.3 Policy NEB8 states that *"Proposals located within flood zones (i.e. Flood Zones 2 or 3, or sites within Flood Zone 1 where there is an identified flood risk) need to meet the requirements of the sequential and exception tests, in accordance with national policy."* However, this has not been undertaken in the Council's selection of housing allocations.

17.4 Simply put, given that the site East of Redbourn has significant land within the highest risk of flooding, why did SACDC select the site without first undertaking a Sequential Test?

[13] NPPF paragraph 165

[14] NPPF paragraph 167

*Figure 17.1:* PPG Application of the Sequential Test for Local Plan preparation

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

..Given that the site East of Redbourn has significant land within the highest risk of flooding, why did SACDC select the site without first undertaking a Sequential Test?

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

## 361 - Mohammad Ahmed

Submission Number: 361 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: The Environment Agency Name: Mohammad Ahmed

Comment Number: 13

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**NEB 8: Managing Flood Risk**

We welcome the new text for this policy that includes information on the sequential and exception test, sequential approach, climate change considerations and FRA requirements.

We note that in our Regulation 18 response, we raised soundness concerns around this policy and can confirm that those concerns have now been addressed with the improvements made.

Please note that the text around buffer-zones, recommended above (NEB5: Blue Infrastructure) will also be relevant to this policy considering the impact on flood risk.

### Please upload any supporting documents here. Do not include any signatures or other personal data.

## NEB9 - Agricultural Land

### 114 - Hertfordshire County Council - Property Team

Submission Number: 114 Submission Date: 06/11/24 23:21

Respondent: Company/Organisation: Vincent + Gorbing Name: George Sellers

On Behalf Of Company/Organisation: Hertfordshire County Council - Property Team Name:

Comment Number: 10

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

This policy as currently written is not consistent with national policy, thus enabling the delivery of sustainable development. The below suggested wording is intended to address this.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

- Policy NEB 9 Agricultural Land seeks to protect the best and most versatile land except if there is an overriding need for development. It is considered that the need to generate renewable energy is as important as food security. In particular, the provision of a solar farm could still allow the grazing of animals, which enables the continued use of the land to ensure national food security. Provision of a solar farm is also not development that would result in the permanent loss or removal of the best and most versatile soil. These installations generally have a life span of 30 years, after which time the land would become available for alternative uses or returned for the sole purpose of agricultural. A change to the wording is therefore suggested as follows:

*An exception may be made where it can be evidenced that there is an overriding need for the development and there is no alternative land of a lower quality which could be reasonably used, or that the proposals do not result in a permanent loss of this resource.*

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

A number of representations have been made on behalf of HCC Property which would benefit from being discussed within the forum of the EiP.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*Refer to Attached submission letter for whole response and figures.*

**21 Agricultural Land**

21.1 The NPPF (paragraph 180) states (our emphasis):

*"Planning policies and decisions should contribute to and enhance the natural and local environment by:*

1. *b) recognising the intrinsic character and beauty of the countryside, the wider benefits from natural capital and ecosystem services –<u>including the economic and other benefits of the best and most versatile agricultural land</u>, and of trees and woodland"*

21.2 A Green Future: Our 25 Year Plan to Improve the Environment [15] ([15] https://www.gov.uk/government/publications/25-year-environment-plan) sets out the government's 25-year plan to improve the health of the environment by using natural resources more sustainably and efficiently. It plans to:

- protect the best agricultural land
- put a value on soils as part of our natural capital
- manage soils in a sustainable way by 2030
- restore and protect peatland

21.3 Paragraphs 001 and 002: Planning Practice Guidance for the Natural Environmentexplain why planning decisions should take account of the value of soils andagricultural land classification (ALC)to enable informed choices on the future use of agricultural land within the planning system.

21.4 The PPG states the following about assessing agricultural land to enable informed choices about its future:

*"How can planning take account of the quality of agricultural land?*

*The Agricultural Land Classification assesses the quality of farmland to enable informed choices to be made about its future use within the planning system.*

*There are five grades of agricultural land, with Grade 3 subdivided into 3a and 3b. The best and most versatile land is defined as Grades 1, 2 and 3a. Planning policies and decisions should take account of the economic and other benefits of the best and most versatile agricultural land.*

*In the circumstances set out in Schedule 4 paragraph (y) of the Development Management Procedure Order 2015, Natural England is a statutory consultee: a local planning authority must consult Natural England before granting planning permission for large-scale non-agricultural development on best and most versatile land that is not in accord with the development plan. Natural England has published guidance on development on agricultural land."*

21.5 The areas to west, south, east and northeast of Redbourn and east of Hemel Hempstead appear to be comprised of Best and Most Versatile Agricultural Land (high likelihood) as evidenced by the map below. Which means that if developed the borough would lose some of its best agricultural land and this would be lost to future generations at a time when climate change is having immediate impacts.

21.6 One of the SA Framework Objectives under 'Soils and other resources' is to *"Minimise development on best and most versatile agricultural land and minimise the degradation/loss of soils, particularly soils known to be of higher quality."*It also states (Page 82):

*"A clear priority is avoiding the loss of productive* ***agricultural land****, particularly that which is defined as 'best and most versatile', which is defined as that which is of grade 1, grade 2 or grade 3a quality. However, data availability is a barrier, as the nationally available dataset is very low resolution (and does not differentiate between grades 3a and 3b) whilst the available dataset showing agricultural land quality with a high degree of accuracy (following fieldwork) is very patchy. In this light, site promoters are encouraged to submit evidence on land quality."*

21.7 The Draft Local Plan Policy NEB9 states:

*"Other than where development is allocated in this Plan, where major development on agricultural land is proposed, a detailed survey (approved by the Department for Environment, Food and Rural Affairs (DEFRA) or an independent expert), which includes an assessment of grading, should be submitted. Development resulting in the loss of the best and most versatile agricultural land (grades 1, 2 or 3a) will normally be refused. An exception may be made where it can be evidenced that there is an overriding need for the development and there is no alternative land of a lower quality which could reasonably be used."*

21.8 We question the justification for this policy which effectively says that SACDC does not require a detailed survey for the development proposed for allocation in the Draft Local Plan but does require surveys for development not in the Local Plan. As the SA states SACDC does not have detailed survey for all of the proposed sites. Either SACDC or the site promoters of proposed allocations should provide this information as soon as possible. In any case, the Defra mapping of Predictive BMV is quite detailed and should inform decisions regarding the locations of proposed growth. Both of the proposed allocations at Redbourn would be removed as would large sections of the Hemel Hempstead related growth.

*See Figure for* ***Predictive BMV Land Assesment***

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. ### 349 - Lisa Peters

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 21

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Agricultural Land**

CHPC acknowledges the importance of safeguarding agricultural land in the Local Plan to protect the rural character and productivity of the district in **PolicyNEB9**. However, CHPC have concerns regarding the designation of 20hectares of agricultural land as the threshold for certain development restrictions, particularly in rural areas such as Colney Heath, where the size of plots and local circumstances need to be carefully considered.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Given the rural context of Colney Heath Parish and the general size of agricultural holdings in the parish, we believe that a reduction to 10 hectares would be more appropriate and reflective of the local landscape and land use patterns. Large-scale agricultural plots of 20 hectares or more are relatively rare in this area, and applying this higher threshold could inadvertently restrict small-scale, local agricultural businesses and farming practices that are vital to the area's economy and character.

Reducing the threshold to 10 hectares would provide greater flexibility for the retention of smaller, more manageable plots of agricultural land, which are often used for a variety of purposes, including local food production, equestrian activities, and conservation efforts. A smaller threshold would also better align with the scale of development typically seen in rural areas, allowing for more proportionate protection of agricultural land while still enabling some development where appropriate.

In conclusion, CHPC recommends that the threshold for protecting agricultural land be reduced from 20 hectares to 10 hectares to better reflect the rural landscape and agricultural practices in Colney Heath and surrounding areas. This change would help preserve local farming traditions and protect the rural character of the parish while still allowing for necessary development within the appropriate context.

**Policy NEB10 – Landscape and Design**

19.17 RPC considers that the proposed policy NEB10 wording is not robust and clear enough as to secure the aspirations in terms of landscape and quality of design. We have summarised below a number of concerns with regards to policy NEB10:

- The policy makes a confusing reference to landscape and landscaping, where these are two different terms. The constant reference and focus on the "landscaping" elements of development proposals weakens the policy aspirations for development to follow a Landscape Strategy, which is a wider concept that involves more (design) than just landscaping. Landscaping is not the only element that contributes towards sustainable and attractive places. Therefore, it would be preferred for the policy to refer to good quality design as an essential element to deliver attractive and sustainable places, instead.

- NEB10 adequately requires a Landscape Strategy to inform development, protecting landscape, integrating and enhancing it, thus design. Unfortunately, and without justification, policy NEB10 only requires protecting, enhancing and integrating landscape (including tree planting) to major development. Why is not all development proposal required to comply with this requirement? The Council provides no explanation, and it seems to contradict the SACDC Local Plan's wider landscape aspirations.
- This policy also states that "*where changes to landscape may be required, details be provided of existing landscaping, trees and shrubs trees to be removed; the planting of new trees, shrubs and grass; alongside details of and level changes, enclosure, screening and paving; significant healthy trees and other important landscape features shall normally be retained*." RPC considers that this policy is not correctly worded as it assumes that development proposals should result in changes to landscape. This could lead to developments that irrevocably alter landscape character, not protecting or enhancing it, as required in the same policy. Instead, the wording of the policy should refer to "development proposals" that should demonstrate the protection and enhancement of local landscape character. Some elements that contribute towards character could be listed, as the policy currently does, but this should not be an exhaustive list.
- Landscape and Visual Impact Assessments should be required not only to major development, but also to those development proposals that may be in sensitive locations, e.g.: the setting of the Chilterns National Landscape, adjacent to open access land/PROW, adjacent to Green Belt, etc.

19.18 RPC is concerned that the proposed wording of policy NEB10 is **not effective in protecting and enhancing landscape, neither is sufficiently justified and positively prepared, therefore policy NEB10 is unsound**.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Landscaping is not the only element that contributes towards sustainable and attractive places. Therefore, it would be preferred for the policy to refer to good quality design as an essential element to deliver attractive and sustainable places, instead.

NEB10 adequately requires a Landscape Strategy to inform development, protecting landscape, integrating and enhancing it, thus design. Unfortunately, and without justification, policy NEB10 only requires protecting, enhancing and integrating landscape (including tree planting) to major development. Why is not all development proposal required to comply with this requirement? The Council provides no explanation, and it seems to contradict the SACDC Local Plan's wider landscape aspirations.

This policy also states that "*where changes to landscape may be required, details be provided of existing landscaping, trees and shrubs trees to be removed; the planting of new trees, shrubs and grass; alongside details of and level changes, enclosure, screening and paving; significant healthy trees and other important landscape features shall normally be retained*." ... Instead, the wording of the policy should refer to "development proposals" that should demonstrate the protection and enhancement of local landscape character. Some elements that contribute towards character could be listed, as the policy currently does, but this should not be an exhaustive list.

Landscape and Visual Impact Assessments should be required not only to major development, but also to those development proposals that may be in sensitive locations, e.g.: the setting of the Chilterns National Landscape, adjacent to open access land/PROW, adjacent to Green Belt, etc.

RPC is concerned that the proposed wording of policy NEB10 is **not effective in protecting and enhancing landscape, neither is sufficiently justified and positively prepared, therefore policy NEB10 is unsound**.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**291 - SEGRO (Radlett) Limited**

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 17

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

7.1 Strategic Policy SP10 – Natural Environment, Biodiversity and Green and Blue Infrastructure outlines how the Council *'will protect and enhance green and blue infrastructure for its role in combating Climate Change and supporting biodiversity, along with its value for recreation, health and wellbeing, and landscape value.'*

7.2 Policy NEB 4 - Significant Publicly Accessible Green Areas states that *'the Council will preserve and enhance the SRFI Country Park(s) (approved)'*and *'will seek development contributions from relevant major developments to mitigate impacts and support the maintenance and enhancement of these areas, including through delivery of Greenspace Action Plans (GAPs) and Greenspace Management Plans.'*

7.3 SEGRO (Radlett) Limited is supportive of the above and highlights the contribution that the SRFI will provide towards SADC achieving these objectives. The proposed Country Park is an important element of the Radlett SRFI proposals.

7.4 The SRFI Country Park will provide 247 hectares of woodland and managed countryside including 80 hectares of new species rich mixed woodland planting and 160 hectares of conservation grazing which will contribute to the Watling Chase Community Forest Area. Within the Country Park there will be a Visitor Interpretation Centre, car parking and picnic areas. New footpaths, bridleways, nature trails and multi-use routes along with improvements to existing rights of way comprising circa 17km in total will be delivered. Additionally, new and improved bird watching, equestrian and fishing facilities will also be created, as well as informal recreational facilities such as play areas, outdoor gyms and trim trails.

7.5 The Country Park as part of the SRFI has been provided to provide improved public access to green space, facilities for recreation and biodiversity. SEGRO (Radlett) Limited are supportive of Policy NEB4's recognition of the SRFI Country Park in assisting to maintain a high quality of life and supporting both mental and physical health.

7.6 Policy NEB7 - Biodiversity Provision in the Design of New Buildings and Open Spaces requires that proposals *'have regard to the biodiversity already present within the site'*as well as *'identify opportunities to maximise the provision for biodiversity on the design of new buildings in line with national and local nature conservation priorities'*.

7.7 Policy NEB 10 – Landscape and Design requires major proposals to consider *'how the existing*

*landscape will be protected, enhanced and integrated into the development, detailed in a Landscape Strategy, along with new tree planting as part of any new green space provision'*.

7.8 It is considered that policies NEB7 and NEB10 are justified and sound, recognising the importance of new developments in increasing biodiversity and providing sufficient landscaping. The landscaping and biodiversity improvements that will be facilitated through the Country Park as part of the SRFI accord with Policies NEB7 and NEB10.

Comment Number: 33

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Quality local space, play and recreation
We are pleased to see that the draft Local Plan seeks to preserve existing urban and rural green space/ green infrastructure and enhancement, or creation of new areas are developed to encourage public access through draft Strategic Policy SP10 and draft policies NEB2, NEB3, NEB4, NEB6 and NEB10.
We support the Plan's landscape-led approach to retain and enhance existing green infrastructure in new developments. We recommend that there should be an expectation on developers that the provision of open space and green infrastructure should come forward at an early stage of development to encourage healthy, sustainable behaviours from the outset.

**330 - Taylor Wimpey Strategic Land**

Submission Number: 330 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Sam Hollingworth

On Behalf Of Company/Organisation: Taylor Wimpey Strategic Land Name:

Comment Number: 8

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

6.1 Our comments on Chapter 10 (Natural Environment, Biodiversity and Green Infrastructure are confined to Policy NEN10, and then to one specific element of this.

6.2 The draft policy current requires, at point c), a Landscape and Visual Impact Assessment for all major developments.

6.3 It should be recognised that a Landscape Visual Impact Assessment (LVIA) is a formal process of identifying and assessing a proposed development's landscape and visual effects, including specifically significant effects such that it can form part of Environmental Impact Assessment. There are other ways, including those which follow a less formal process, of considering the landscape and visual impacts. This includes Landscape and Visual Appraisal (LVA).

6.4 Major developments can include those that are unlikely to have any significant impacts on landscape, e.g. redevelopment of a previously developed site within an existing urban area.

6.5 The need for LVIA, LVA or other form of appraisal / assessment will vary on a case-by-case basis. It would be wholly disproportionate to demand an LVIA for all major developments.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

6.6 We suggest the policy be amended to make clear applicants should demonstrate that a proportionate approach to considering landscape and visual impacts has been undertaken, having regard to the nature of the development and the landscape sensitivities of the Site.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 24-203 TWSL LP Reg 19 Wheathampstead Final_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We consider it would be of benefit to discuss the proposed modifications as set out within our representations with the Council, Examining Inspector(s), and other stakeholders in the hearing sessions.

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Draft Policy NEB10***"Landscape and Design"*– this draft policy requires Landscape and Visual Impact Assessments (LVIAs) for all 'major' developments regardless of location. This is unduly onerous, as requiring the carrying out of a full LVIA to Landscape Institute standard even for relatively small schemes will involve an applicant in considerable time and expense. In the cases of most 'major' developments this will be unnecessary and entirely disproportionate. This requirement is also likely to impact adversely upon the Council's own developments, as well as those of RSLs. The policy is not positively prepared; justified; effective; or consistent with national policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). ## NEB11 - Chilterns National Landscape

### 233 - Central Bedfordshire Council

Submission Number: 233 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Central Bedfordshire Council Name:

Comment Number: 13

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We welcome the recognition in the plan and Policy NEB11 that some allocated sites are located close to the designated landscape and so have the potential to impact upon the setting of the Chilterns National Landscape. We agree that great weight should be given to conserving and enhancing the landscape and scenic beauty in the Chilterns National Landscape.

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*Refer to Attached submission letter for whole response and figures.*

**Policy NEB11 – Chilterns National Landscape**

19.19 Policy NEB11 is insufficient as currently worded as it only refers to demonstrating that development proposals would not have an impact on the statutory purpose of the Chilterns National Landscape. It should specifically state that no harm or negative impact should be caused to the National Landscape, including its statutory purpose and its special qualities. As worded, "not have an impact" is an unclear sentence, as the Local Plan should require proposals to avoid harm, but not impacts in general, which could also be neutral or positive, which would normally be welcomed.

19.20 Importantly, Policy NEB11 has missed in the policy wording the reference to the setting of the Chilterns National Landscape. The NPPF (paragraph 182) states:

"*Great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty which have the highest status of protection in relation to these issues. The conservation and enhancement of wildlife and cultural heritage are also important considerations in these areas, and should be given great weight in National Parks and the Broads. The scale and extent of development within all these designated areas should be limited, while development within their setting should be sensitively located and designed to avoid or minimise adverse impacts on the designated areas*."

19.21 Therefore, it would be expected for Policy NEB11 to develop, at local level, the NPPF expectation for the adequate protection of the setting of a National Landscape. In the absence of this, we consider that Policy NEB11 is insufficient, as currently worded, and fails to comply with national planning policy, also not being effective in protecting the National Landscape. This policy is **unsound**.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Policy NEB11 is insufficient as currently worded as it only refers to demonstrating that development proposals would not have an impact on the statutory purpose of the Chilterns National Landscape. It should specifically state that no harm or negative impact should be caused to the National Landscape, including its statutory purpose and its special qualities. As worded, "not have an impact" is an unclear sentence, as the Local Plan should require proposals to avoid harm, but not impacts in general, which could also be neutral or positive, which would normally be welcomed.

It would be expected for Policy NEB11 to develop, at local level, the NPPF expectation for the adequate protection of the setting of a National Landscape. 1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

## 290 - BRiCS Development

Submission Number: 290 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: ET Planning Name: Tom Ryan

On Behalf Of Company/Organisation: C/O ET Planning Name: BRiCS Development

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Chilterns National Landscape**

Policy NEB11 of the SALP relates to the Chilterns National Landscape, which currently lies outside of SACDC. The policy has been drafted and included in the Regulation 19 SALP on the anticipation of an extension to the boundary of the Chilterns National Landscape into the District. This has led to the deletion of the following proposed allocations:

- North of The Slype, Gustard Wood;
- South of Codicote Road; and
- Highway Chipping Depot, Lower Luton Road

An update published in June 2024 by the governing body for the Chilterns National Landscape states that ”the statutory and public consultation will take place in winter 2024/25…[with the] aim to seek a variation order from the Secretary of State in winter 2025”

At this stage, the extent of the proposed boundary variation to the Chilterns National Landscape is unclear, with the first stage of consultation scheduled for the end of 2024. It is therefore not justified for the SALP to pre-determine the boundary changes to the Chilterns National Landscape, as the proposals for the boundary extension are not material and haven’t been tested through Examination by the Secretary of State.

As there is no detail as of yet to the proposed amendments to the Chilterns National Landscape, only very limited weight can be applied to the proposals for the purposes of Plan making.

For the emerging Plan to be positively prepared (in light of the comments elsewhere within these representations relating to housing need), deleted allocations set out at paragraph 4.2 should be reinstated as proposed allocations. In addition, further growth should be proposed specifically at Wheathampstead (see paragraphs 2.2-2.5).

As currently drafted, Policy NEB11 acts like a moratorium on development, which is neither justified nor positively prepared.

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

It is not clear why NEB11 is necessary given that it merely repeats national policy. If it is considered necessary to include NEB11 it is not clear why part b is necessary as it is self-evident that should the Chilterns National Landscape expand then the requirements for the consideration of national land scape will apply. As such we would suggest part b is deleted

Policy NEB11 –Chilterns National Landscape

Natural England Reg 18 comments: *we would like to see a specific policy regarding the Chilterns Area of Outstanding Natural Beauty (AONB). Whilst no allocations fall within the AONB, some broad locations lie close to the designated landscape and so have the potential to impact upon the AONBs setting....Within the policy it would be beneficial to include a requirement to consult the relevant AONB Partnership or Conservation Board.*

Natural England is pleased to see that our comments at Regulation 18 were taken onboard and there has been an addition of policy NEB11 which focuses on the Chilterns National Landscape. We would however like to reiterate that there needs to be stronger wording in terms of furthering the purposed of the National Landscape and reference to the new LURA duty.

...

That being said, we feel that stronger wording regarding the LURA duty is required in light of the expectation to further the goals of, rather than just avoid impacts on the National Landscape. The new duty underlines the importance of avoiding harm to the statutory purposes of protected landscapes but also to seek to further the conservation and enhancement of a protected landscape. That goes beyond mitigation and like for like measures and replacement. A relevant authority must be able to demonstrate with reasoned evidence what measures can be taken to further the statutory purpose.

The proposed measures to further the statutory purposes of a protected landscape, should explore what is possible in addition to avoiding and mitigating the effects of the development, and should be appropriate, proportionate to the type and scale of the development and its implications for the area and effectively secured. Natural England's view is that the proposed measures should align with and help to deliver the aims and objectives of the designated landscape's statutory management plan.

...

We would also like to see specific reference to the new LURA duty

...

Paragraph 182 of the NPPF states that development in the settings of AONBs should be sensitively located and designed to avoid or minimise impacts on the designated areas. In addition,Section 245(Protected Landscapes) of the Levelling Up and Regeneration Act 2023 places a duty on relevant authorities to seek to further the statutory purposes of the area in carrying out their functions in relation to, or so as to affect, land in an AONB.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. ## NEB12 - Green Space Standards and New Green Space Provision

### 146 - Mr Roy Warren

Submission Number: 146 Submission Date: 07/11/24 11:27

Respondent: Company/Organisation: Sport England Name: Mr Roy Warren

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The policy is welcomed for the following reasons:

- The approach to new green space provision (part a) requires new green space within a development site to meet the needs of the new development and local green space deficiencies, larger strategic open spaces are preferred, spaces are expected to be multi-functional and ancillary facility infrastructure is encouraged in principle. This approach would accord with the principles in Sport England's Active Design guidance https://www.sportengland.org/guidance-and-support/facilities-and-planning/design-and-cost-guidance/active-design and would accord with Government policy in paragraph 96(c) of the NPPF.
- The approach to new sports pitches (part f) aligns with advice provided by Sport England and recommendation (g) in the Council's Playing Pitch Strategy. This approach would therefore be considered to accord with Government policy in paragraph 102 of the NPPF.
- The approach to existing sports pitches (part g) accord with the recommendations in the Council's Playing Pitch Strategy and would therefore be considered to accord with Government policy in paragraph 102 of the NPPF.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

## 207 - Bellway Homes (North London) Limited

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

2.250 Bellway Homes Limited supports the framing of Policy NEB12 and the requirement for new residential development to provide onsite amenity green space and child play space to service the needs of the occupants of the development. We welcome the provisions in Table 10.2 that outline that residential development of less than 250 dwellings are only required to provide amenity space and child play facilities and financial contributions can be sourced to provide enhancements to sports and recreation facilities, in lieu of onsite provision.

2.251 On their landholdings at Roestock Lane, at outline stage the scheme had been designed to make provision for 1.259ha of public open space and 0.024 ha of child play provision as part of the wider open space offering, which aligns with the standards contained within the Draft Local Plan.

2.252 Final details of the public open space and child play strategy will be secured at reserved matters stage.

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

(Please see attachment for full submission)

Oakland College and Taylor Wimpey object to the contents of Policy NEB12 (Green Space) of the Regulation 19 Publication Draft Local Plan. It requires development to deliver 4.5 sqm per person quantity standard for allotments. This figure is derived from the latest Open Space Study which indicates that the current level of provision in the District is 0.28 hectares per 1,000 people. However, the standard set by the National Society of Allotments is a standard of 0.25 ha per 1,000 people.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

4.12.1 SUGGESTED AMENDMENTS
Oaklands College and Taylor Wimpey seek the Council's agreement to adjust Policy NEB12 to require a standard of 0.25 ha per 1,000 people. This amendment can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public.

## 266 - Crest Nicholson Partnerships and Strategic Land

Submission Number: 266 Submission Date: 08/11/24 08:47

Respondent: Company/Organisation: Stantec Name: Sarah Cross

On Behalf Of Company/Organisation: Crest Nicholson Partnerships and Strategic Land Name:

Comment Number: 19

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

6.27 The Reg 19 DLP is supported by an updated Open Space Study (April 2024) which reviews existing open space typologies across analysis areas.

6.28 These figures have changed minimally compared to the Reg 18 version and as such, while the exact typology and level of shortfall varies across area, all still have shortfalls in some form of open space as demonstrated by Table 11.3.2 within the updated Open Spaces Study (April 2024).

6.29 It is noted that for all the typologies listed within draft **Policy NEB12** at Table 10.1, the quantity standard (sqm per person) matches the findings of the updated Open Spaces Study with regard to the shortfall. However, this is with the exception of the allotment provision, which is still stated as requiring 4.5sqm per person, when the Open Spaces Study shows a shortall of 2.8sqm per person. This needs to be reviewed as this provision is currently unjustified.

6.30 The policy also includes new criteria relating to new sport pitches, which includes: provision in accordance with Sport England's Playing Pitch Calculator; priority to facilities that contribute towards a strategic approach; provision of a clubhouse for multi-pitch and multi-sports sites; and facilities that are designed in accordance with Sport England's design guidance. The policy also recognises that for most developments, an off-site financial contrition may be more feasible. There is no objection to these additions.

On Behalf Of Company/Organisation: The Crown Estate Name:

Comment Number: 8

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Open Space Standards Updates**

Policy NEB 12 –*Green Space Standards and New Green Space Provision* sets out the Open Space Quantity Standards being sought in the local plan (see Table 10.1).

The quantitative requirements for open space have been updated by the Council as part of the Regulation 19 plan. This results in an increase of total multi-functional green space to be provided in new developments from 32sqm per person to 57sqm per person, primarily as a result of an increased requirement for 'natural and semi-natural green spaces' from 5 sqm/pp to 34.6 sqm/pp. This is not an inconsiderable increase, and now excludes playing pitch provision, the requirements for which will be sought based on the Sport England Calculator.

We understand that the evidence underpinning the increase in policy requirement has been provided through the Council's updated Open Space Study (April 2024).

Delivering a high proportion of green space on sites such as East Hemel remains a key shared objective of the Council and TCE. However, we wish to highlight that for the HGC Growth Areas, the HGC Framework Plan evidence tested the capacity and deliverability of the allocations against policy requirements using the green space standards set out in the Regulation 18 plan.

Therefore, if the HGC allocations are to meet the policy requirements of NEB 12 as now proposed as well as the quantum of development and infrastructure set out in the site allocation policies, we would welcome clarification on the way in which overall green space is to be calculated for the HGC allocations.

These increased standards will need to be delivered alongside the relevant requirements for BNG, SANG and other critical GI infrastructure. Particularly relevant for East Hemel Hempstead, we seek confirmation that the provision of SANG can be included as part of the Natural and Semi-Natural Green Space provision.

Whilst we note and welcome the amendment to clause (a) of policy NEB12 to replace 'must' with 'should' - and consider that this goes some way to provide a degree of flexibility around how open space provision is to be determined especially for strategic sites – we would welcome some clarification in policy to demonstrate that a flexible approach to the application of open space standards on strategic sites will be taken.

We therefore suggest that the policy wording of NEB 12 is adjusted to explicitly recognise that within the Broad Locations/HGC Growth Areas, given the wider GI provision already required elsewhere in policy, a flexible approach will be taken to the calculation of open space standards.

(Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We therefore suggest that the policy wording of NEB 12 is adjusted to explicitly recognise that within the Broad Locations/HGC Growth Areas, given the wider GI provision already required elsewhere in policy, a flexible approach will be taken to the calculation of open space standards.

## 273 - Hallam Land Management and St Albans School

Submission Number: 273 Submission Date: 08/11/24 09:33

Respondent: Company/Organisation: LRM Planning Name: Mr Owen Jones

On Behalf Of Company/Organisation: Hallam Land Management and St Albans School Name:

Comment Number: 20

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

10.9 The need to identify specific requirements for new green space is supported, and the level of detail provided is welcome and will be helpful in informing development proposals. There are however a couple of sections where the policy could be strengthened and/or clarified.

10.10 In regard to new green space, criterion (a)(vi) states that the creation of new green space should "encourage the provision of ancillary infrastructure to support the use of green spaces, where appropriate". The policy does not offer any definition of ancillary infrastructure in this context so it is not possible to ascertain what type of supporting built development may or not be acceptable.

10.11 The requirement for natural and semi-natural green spaces has been increased to 34.6sqm per person, from 5sqm per person in the Regulation 18 consultation document. There does not appear to be sufficient evidence to justify this increase; within the Open Space Study (2024), the Fields In Trust suggest 1.8ha per 1000 population, which equates to approximately 18sqm per person. The Open Space Study also reveals a current provision of approximately 3.46ha per 1000

population, which equates to approximate 34.6sqm per person. There is evidently a surplus of such space in the District per population and therefore whilst 18sqm per person may be aspirational, it does not appear to be necessary, and a provision of 34.6sqm per person is therefore certainly unnecessary. Conversely, the existing overprovision in the District suggests a lower quantum of natural and semi-natural green space can be justified.

10.12 The Regulation 18 version of the Local Plan also identified a necessary provision of 0.18sqm per person for teenage play areas. The Regulation 19 version has excluded this, without any apparent justification. The provision for children's play area has also stayed the same at 0.6sqm per person and so it plainly has not been accounted for elsewhere. Hallam and St Albans School suggest that this needs to be revisited.

10.13 In regard to allotments, the draft policy strictly refers to provision of "allotments". This is incredibly onerous and conflicts with current best practice which encourages inclusive, community-focused productive landscapes. Hallam and St Albans School consider that a more beneficial policy requirement would be for this to refer to "allotments and/or community grow zones". Strict adherence to such a policy requirement might also compromise the achievement of other equally important policy objectives and as such a balanced approach will be necessary in considering individual development proposals. This amendment would represent a positive policy approach.

**304 - EDIT Land Ltd**

Submission Number: 304 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 11

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land to the south of Burydell Lane, Park Street” have been discounted incorrectly.

**Representations**

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

SP1: A Spatial Strategy for St Albans District

SP3 — Land and the Green Belt

HOU 1- Housing Mix

HOU 2 — Affordable Housing

SP2 — Responding to the Climate Emergency

NEB 6 - Biodiversity and Biodiversity Net Gain — Comment

LG5 — Green Belt — Object

**Draft Policy NEB12: Green Space Standards and New Green Space Provision**

EDIT Land supports the framing of Policy NEB12 and the requirement for new residential development to provide onsite amenity green space and child play space to service the needs of the occupants of the development. We welcome the provisions in Table 10.2 that outline that residential development of less than 250 dwellings are only required to provide amenity space and child play facilities and financial contributions can be sourced to provide enhancements to sports and recreation facilities, in lieu of onsite provision.

Final details of the public open space and child play strategy will be secured at reserved matters stage.

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We support draft Policy LG4 - Large, Medium and Small Sites which requires developments to provide contributions towards enhancing open spaces. We also support draft Policy NEB12 which sets out green space standards for the creation of new green spaces.

Draft Policy SP7 - Community Infrastructure seeks to support and protect existing community infrastructure. This policy also seeks to safeguard existing sport facilities by only permitted development on these facilities if the development is for an alternative sport and recreational provision and the needs for which outweigh the loss. We support this policy to protect existing sport facilities and draft Policy NEB12, which provides guidance on how to determine sport pitch provision requirements for new housing developments.

Comment Number: 3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Richborough acknowledge and support the principle of providing high quality open space as part of residential developments. Indeed, it is their aspiration to deliver an attractive, healthy and biodiversity rich residential development at West Redbourn. Notwithstanding their in-principle support for the Local Plan providing a policy which promotes the delivery of new public open space, the matters of detail raise some concern.

Table 10.1, within Policy NEB12, provides a rigid set of Quantity Standards for open space typologies and numerical standards. Table 10.2 confirms that these requirements will be required to be met on-site for all development of 250+ dwellings. Based on the standards a scheme of 300 dwellings (and 2.4 people per dwelling) would need to deliver approximately 4.3ha of public open space set across six different typologies including parks and gardens (7.1 sqm per resident) and allotments (4.5 sqm per resident). The figures are based on open space standards provided by the latest Open Spaces Study (2024), which itself sets open space targets based on the level of existing provision.

Any playing pitch provision would be an additional requirement – Table 10.1 refers Applicants to the Sport England Playing Pitch Calculator, however this is not publicly available and would not take into account existing local provision and needs.

The typology and numerical requirements set out in Policy NEB12 are a useful guide, however, in practice at the Development Management stage of the planning process there will inevitably be a need for flexibility in their application to respond to local needs and site-specific circumstances. Land at West Redbourn for instance is located adjacent to an existing play area, and a new children's play area may not necessarily be required.

Some of the requirements, such as 34.6sqm per person for natural green space and 4.5sqm per person for allotments, seems excessive especially when the inflexibility of the current wording is taken into account. SADC should ensure there is sufficient justification to support these standards, and that the impact of meeting these standards in full on the capacity of allocations has been fully considered.

The need for flexibility in approach is heightened by the legal national requirement for developments to deliver minimum 10% Biodiversity Net Gain (BNG). In our experience, depending on site specific circumstances, a significant and specific type of open space provision may be required to meet net gain targets. By seeking a prescriptive numerical standard per typology, alongside typologies which have limited BNG value (for example: sports pitches, allotments and equipped play) Policy NEB12 could potentially act as a barrier to achieving on-site net gain targets. There is a clear need for flexibility in approach from SADC as part of the Local Plan.

In our experience it is uncommon, not necessary and potentially inappropriate for a scheme of 250+ dwellings to deliver parks and gardens. Parks and gardens typically form part of the open space provision on large-scale strategic sites, often in excess of 1,000 dwellings. In respect of allotment provision, it is sometimes the case that Parish Councils wish for investment in or expansion of existing allotment facilities; or depending on waiting lists at existing facilities they may not want further allotment provision. A similar principle can also apply for equipped play and sports pitches with Parish Councils and local communities preferring investment in existing facilities rather than diluting the local offer across a number of sites.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Proposed remedy: In light of the above, it is recommended that Table 10.1 is removed from Policy NEB12 and added to supporting text as guidance only with the threshold for the parks and gardens typology raised to 1000+ dwellings or 'where local circumstances indicate a

specific need'. Sports pitch provision should also be based on 'where local circumstances indicate a specific need', this is already partly acknowledged in criterion f) but this specific wording should be incorporated for clarity.

Table 10.2 should then be deleted from the Policy and replaced with flexible wording which indicates that for schemes of up to 1,000 dwellings, on-site provision can be replaced by an off-site contribution in lieu of a specific typology should local circumstances indicate that this is appropriate.

Given the need to support the aspirations of local communities, make efficient use of allocated land and allow for the best chance of delivering at least 10% BNG on-site, these proposed amendments to Policy NEB12 are entirely logical and will support the delivery of sustainable development. As currently drafted, Policy NEB12 provides a rigid set of requirements which do not reflect the constraints in achieving mandatory minimum 10% BNG on-site and allowing development proposals to be considered on a site-by-site and unique basis.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 350 - Hill Residential

Submission Number: 350 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: tor&co Name: Sophia Goodhead

On Behalf Of Company/Organisation: Hill Residential Name:

Comment Number: 19

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Policy NEB12: Green Space Standards and New Green Space Provision**

Hill note that some of the quantity standards for new green space set out in Table 10.1 are not justified or based upon the quantity standards set out in the evidence base. For example, the 4.5 sqm per person quantity standard for allotments does not reflect the standard set out in the latest Open Space Study, which indicates that the current level of provision is 0.28 hectares per 1,000

people (i.e 2.8 sqm pp). Further, the standard set by the National Society of Allotments suggesting a standard of 0.25 ha per 1,000 people. This would result in a per person standard of 2.5 sqm of allotment per person. The higher standard set out in the policy is therefore inconsistent with Council's own evidence, is unjustified and is not related in scale to the development. The Council need to review and provide evidence to support the quantity standards set out in the policy.

Part a(vi) encourages the provision of ancillary infrastructure to support the use of green spaces, where appropriate. However, it is not clear what type of ancillary infrastructure it means and therefore cannot be properly considered in terms of whether it is deliverable or viable. The policy wording should provide specific examples in order for the policy to be justified and effective.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address

the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

**362 - EDIT Land Ltd**

Submission Number: 362 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 10

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land at Roundhouse Farm, Colney Heath” have been discounted incorrectly

Representations

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

The Reg. 18 Draft Local Plan includes planning policies relating to various topics, which would become the principal consideration for the decision maker when determining planning applications.

EDIT Lands has not provided comment on a number of policies and advise which they are commenting on in the list below, but reserves the right to comment on others in the future.

However, SADC should consider whether all the policies as drafted are useful and necessary for decision making, and do not just repeat that which is already stated in the National Planning Policy Framework (NPPF), Planning Practice Guidance or legislation. Policies should also be unambiguous, clear and concise, without being overly onerous or stifle innovation or ambition.

EDIT Lands main concern with the Local Plan, as a whole, is the weak approach to the provision of much needed housing. Firstly, the level of housing planned for does not seek to address housing need adequately or provide any contingency, nor does it seek to address unmet need or positively plan for previous years of significant under-delivery.

Furthermore, the level of housing which is proposed as windfall, is unsound. 20% of the total housing supply to come forward on sites which do not have allocations, nor are formally identified is not positively prepared and is a huge outlier compared to neighbouring authorities. We consider the proportion of windfall to be wholly inappropriate given the borough’s historic poor delivery and acute housing need.

It is also perverse for SADC to suggest that all brownfield sites have been exhausted to necessitate Green Belt release, whilst anticipating that such a high number will come forward via the windfall process. In addition, the Local Plan is heavily reliant on the delivery of a small number of broad growth areas and strategic extensions, namely the Hemel Garden Community which is allocated for net. 5,500 dwellings and 4,281 across the other strategic development sites which are subject to challenging land assembly and infrastructure delivery requirements which will constrain delivery of housing units within the early periods of the Local Plan. St Albans have acknowledged this situation in the reg.19 draft Local Plan where they are now asserting that only 4,300 dwellings will be delivered on the HGC sites within the LP period, a reduction of 450 dwellings from the LP trajectory and 1200 from the wider site allocation. Across all allocated sites within the borough, the council has lost net. 971 dwellings between Reg.18 and Reg.19 stage. There is no explanation, or justification on how the shortfall in housing delivery is accounted for within the revised housing trajectory, or local plan housing targets.

The housing trajectory places significant reliance on these strategic sites without due consideration to implications of these strategic sites not being delivered or brought online in line with the housing trajectory.

The emerging Local Plan is also not prepared positively as it fails to make any consideration to the need for natural growth (and deliverable) within the ‘washed over villages’ within the green belt, with no consideration paid in detail to areas for release from the green belt in these locations. As outlined in Section 3 of this document our client challenges the methodology which has been applied in the green belt review in light of a failure to apply a macro level analysis to the green belt parcels.

Furthermore the draft Local Plan fails to make provision for custom build and self-building housing typologies despite a clear need being identified in the National Planning Policy Framework no recognition is made to the contribution this typology makes to meeting established demand. We understand that there is a need locally for such housing and failure to plan for such housing, is not positive.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

- SP1: A Spatial Strategy for St Albans District
- SP3 – Land and the Green Belt
- HOU 1 – Housing Mix
- HOU 2 – Affordable Housing
- SP2 – Responding to the Climate Emergency
- NEB 6 – Biodiversity and Biodiversity Net Gain – Comment
- LG5 – Green Belt – Object

Draft Policy NEB12: Green Space Standards and New Green Space Provision
EDIT Land supports the framing of Policy NEB12 and the requirement for new residential development to provide onsite amenity green space and child play space to service the needs of the occupants of the development. We welcome the provisions in Table 10.2 that outline that residential development of less than 250 dwellings are only required to provide amenity space and child play facilities and financial contributions can be sourced to provide enhancements to sports and recreation facilities, in lieu of onsite provision.
On their landholdings at Roestock Lane, at outline stage the scheme had been designed to make provision for 1.259ha of public open space and 0.024 ha of child play provision as part of the wider open space offering, which aligns with the standards contained within the Draft Local Plan.
Final details of the public open space and child play strategy will be secured at reserved matters stage.

## Chapter 11 - Historic Environment

### 32 - John Whiting

Submission Number: 32 Submission Date: 27/10/24 09:00

Respondent: Company/Organisation: Radlett Society & Green Belt Association (RSGBA) Name: John Whiting

Comment Number: 7

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

The coverage of the historic environment is also very good; we accept that historic aspects cannot be an automatic 'trump card' to prevent any development, but it is vital to ensure that full and careful consideration is given to these aspects – and of course that all relevant sites are properly logged.

---

# Strategic Policy SP11 - Historic Environment

## 180 - Mr Brian Parker

Submission Number: 180 Submission Date: 30/10/24 09:00

Respondent: Company/Organisation: MRP Planning Name: Mr Brian Parker

Comment Number: 5

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**1 Introduction and Summary**

1.1 Paragraph 35 of the NPPF sets out the criteria by which a Draft Local Plan is tested for 'soundness':

*"Plans are 'sound' if they are:*

1. *Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*
2. *Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*
3. *Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*
4. *Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant."*

1.2 Criterion (e) of Draft Policy SP11 'Historic Environment' claims that the Council will pursue a positive strategy for the conservation and enjoyment of the historic environment through, amongst other things:

*"Periodic reviews of Conservation Areas and locally identified non designated assets".*

1.3 Given the significant changes that have taken place since the last "periodic reviews" and the requirement for residents submitting even modest planning applications to spend time and money taking account of designated assets, Criterion (e) is too vague. Consequently, it risks undermining confidence in the concept of Conservation Areas and the planning system in general.

1.4 The Historic Environment element of the Draft Local Plan (the DLP) is, therefore, unsound because designated assets have not been properly reviewed and there is no certainty over when they will be reviewed going forwards. Consequently, it is not 'justified' because a more reasonable alternative would have been (a) to have reviewed its Conservation Areas as part of the emerging Local Plan process and (b) to commit to more specific review periods.

**2 Statute, National Policy and National Guidance**

2.1 Under Section 69 [1] of the 'Planning (Listed Buildings and Conservation Areas) Act 1990' (the Act), a Local Planning Authority (LPA) can designate as Conservation Areas, places which it considers to be desirable to preserve and enhance. Under Section 69 [2] of the Act, LPAs have a duty to review these designations *"from time to time"*.

2.2 The reason why Conservation Areas should be reviewed is explained by Paragraph 197 of the National Planning Policy Framework (the NPPF), which states:

*"When considering the designation of conservation areas, local planning authorities should ensure that an area justifies such status because of its special architectural or historic interest, and that the concept of conservation is not devalued through the designation of areas that lack special interest."*

2.3 In other words, retaining Conservation Area status in places when the designation is no longer justified will devalue the very concept.

2.4 The Planning Practice Guidance (the PPG) clearly explains that Conservation Area reviews are mandatory and, crucially, that they are also helpful in plan-making[1]:

[Footnote 1: "Do local planning authorities need to review conservation areas?" Ref. ID 18a-025-20190723]

*"Local planning authorities must review their conservation areas from time to time (section 69 [2] of the Planning (Listed Buildings and Conservation Areas) Act 1990).*

*A conservation area appraisal can be used to help local planning authorities develop a management plan and plan-making bodies to develop appropriate policies for local and neighbourhood plans. A good appraisal will consider what features make a positive or negative contribution to the significance of the conservation area, thereby identifying opportunities for beneficial change or the need for planning protection."*

(emphasis added)

2.5 As to what is meant by "from time to time", Historic England's Advice Note[2] states [104]:

[Footnote 2: "Conservation Area Appraisal, Designation and Management" Historic England Advice Note 1 (Second Edition)]

*"Resources permitting, every five years is ideal, but review frequency will vary according to the development pressures in the local area."*

2.6 Consequently, a reasonable strategy would have seen the Council review its Conservation Areas within the past 5 years, because so much development had taken place since the last review and because it was developing a new Local Plan at the time.

**3 An example of the need for a review of the St Albans Conservation Area**

3.1 As declared above, my family home (built c.1997) is in part of the St Albans Conservation Area (the SACA). Specifically, it is in Character Area 6b Midland & Great Northern Railways (Area 6b) on the south-east edge of the SACA (see Fig. 1 below).

[See attachment for image]

Fig. 1 The St Albans Conservation Area – Area 6b is on the south-east edge.

3.2 On page vi of the SACA Character Statement, under 'Status of the Document', the Council advises:

*"The draft St Albans Character Statement was produced in 2009/2010 and was put out to public consultation in September 2010. Consultation responses were considered and, where appropriate, were incorporated*

*within the final St Albans Character Statement which was revised in 2014 and published in 2016."*

3.3 Thus, based on Historic England's advice, a Review is well overdue and there was no better time to carry one out than during the evolution of the DLP. However, no such Review took place.

3.4 As set out above, Criterion (e) of Draft Policy SP11 states that the Council will carry out "periodic reviews of Conservation Areas" but provides no timeframes. Given the Council's failure to carry out any reviews in the past 10 years, there can be no confidence that timely reviews will be carried out.

3.5 In respect of Area 6b, a change to the current boundary, from, for instance, Plan 1 to Plan 2 (see below) is justified by the new housing developments that have helped change the character of this part of the Area since the Character Statement was revised 10 years ago.

[See attachment for images: Plan 1 above – extract from Area 6b Character Statement; and Plan 2 above – Potential changes to extent of Area 6b]

3.6 The new housing schemes justifying a change to the boundary are:

1. a) the conversion of the Ziggurat building into flats (central building immediately below);

[See attachment for image]

1. b) the construction of a 7-storey building with over 70 flats on the former car park of the Ziggurat (centre of photograph below)

- [See attachment for image]

1. c) and the imminent completion of Vickers Mews: 32 dwellings, including 23 no. 3-storey townhouses (below)

- [See attachment for image]

3.7 Self-evidently, none of these modern residential buildings are of any historic interest. When they are seen in the context of the 53 family homes on Orient Close and the modern office buildings on Grosvenor Road (see front cover), there is no justification for retaining the boundary of Area 6b unchanged.

3.8 The following comparison (Fig. 2) adds further support for a change to Area 6b. The photograph and caption on the left are taken directly from page 226 of the SACA Character Statement. The accompanying text states:

*"To the east of Orient Close at the eastern edge of the conservation area marked by a band of trees, on a narrow site and like the station set down below London Road, lies no. 222 a long narrow building, an early C20 century engineering works and experimental station, used previously by ship builders having included a large flotation tank and now converted for a series of small commercial and light industrial users."*

3.9 Noting, first – and importantly – that the band of trees is, in fact, over 70 metres beyond the Conservation Area and did not mark its eastern edge, the photograph on the right (taken in October 2024) explains that the historic engineering has gone, replaced by modern townhouses which all but obscure the trees to the east.

- [See attachment for image]

Fig. 2 (L) Photo and caption from the SACA Character Statement. (R) My photo and caption. The important tree screen – which was never in the Conservation Area – is all but obscured by townhouses which have replaced the historic engineering works.

3.10 On its website, under "How and when conservation areas are designated", the Council states:

*"The Council can also remove the designation of an area or part of an area if it loses its special interest."*

3.11 This part of Area 6b shown in Plan 2 above (paragraph 3.5) has lost any special interest it may have had. Consequently, its Conservation Area designation should have been removed as part of the plan-making process and the boundary changed.

3.12 Finally, it can be noted that the DLP proposes protecting the route of the former railway line between Orient Close and Cottonmill Lane (part of the Alban Way) under Draft Policy NEB4 'Significant Publicly Accessible Green Areas (Key Linear Green Spaces)' as shown in the extract from Sheet 4 of the Policies Map (Fig. 3) – adding further support to changes to this part of the Conservation Area.

- [See attachment for image]

Fig. 3 The DLP proposes protecting the south-west 'finger' of Area 6b from development as a Significant Publicly Accessible Green Area.

**Conclusion**

4.1 The plan-making process provides an opportunity for Councils to review their Conservation Areas, something which should also be done every 5 years throughout a plan period. St Albans Council has not taken that opportunity and, furthermore, its last review of the St Albans Conservation Area was over 10 years ago.

4.2 This document has demonstrated that a change to part of Area 6b if the SACA is overdue and necessary. It is very likely that other parts of the extensive Conservation Area should no longer be designated, too.

4.3 Consequently, the heritage strategy currently proposed in the Draft Local Plan is not justified.

## 273 - Hallam Land Management and St Albans School

Submission Number: 273 Submission Date: 08/11/24 09:33

Respondent: Company/Organisation: LRM Planning Name: Mr Owen Jones

On Behalf Of Company/Organisation: Hallam Land Management and St Albans School Name:

Comment Number: 24

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

11.2 Strategic Policy SP11 relates to the need to balance the need for growth with proper conservation and enhancement of the historic environment. There is some conflict between criterion (a) and the NPPF, with the first policy test stating that strategies for conservation will include "maintaining a strong presumption in favour of the retention, conservation and enhancement of heritage assets and their setting according to their significance". Paragraph 205 of the NPPF does indeed identify the need to consider the impact of a proposed development on the significant of an asset, but makes no similar conclusions in respect of their setting.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

As such, it is considered that criterion (a) is rewritten accordingly:

"*Maintaining a strong presumption in favour of the retention, conservation and enhancement of heritage assets according to their significance."*

**283 - Redbourn Parish Council**

Submission Number: 283 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Troy Planning & Design Name: Mr Troy Hayes

On Behalf Of Company/Organisation: Redbourn Parish Council Name: Redbourn Parish Council

Comment Number: 26

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*Refer to Attached submission letter for whole response and figures.*

**20 Heritage**

20.1 Whilst RPC is pleased to see that SACDC has undertaken Heritage Impact Assessments (HIAs) for many of the proposed allocations, it is unclear as to how these Assessments have influenced the Local Plan proposals or its policies. It states in its covering report (paragraph 2.5) that:

*"The recommendations of the site-specific HIAs have informed the site allocations in Part B of the Local Plan, including the indicative capacities and the Key development requirements".*

20.2 Whilst it states that the HIAs informed the site allocations in Part B of the Local Plan including indicative capacities and key development requirements there is no proof of this provided by SACDC.

20.3 In terms of the HIA's informing the allocations and their capacity how have they resulted in any changes to the site capacities and assumed densities for example?

20.4 When one reviews Part B of the Local Plan it simply states the same text repeatedly whenever there is a locally listed building. For example:

**H1 North Hemel Hempstead (Requirement 16):**

*"Through Masterplanning the layout and design of development should minimise any harm to the setting and significance of the Grade II Listed Holtsmere Manor, the Grade II Listed Great Revel End Farmhouse, the Grade II Listed Barn at Great Revel End Farmhouse and the Grade II Listed Wood End Cottages; this may include the incorporation of appropriate set backs of development and creation of open spaces."*

**H3 East Hemel Hempstead (Requirement 20):**

*"Through Masterplanning, the layout and design of development should minimise any harm to the setting and significance of Grade II Listed Breakspear, Grade II Gorhambury Registered Park and Garden and Grade II* Listed Gorhambury mansion; this may include the incorporation of appropriate set backs of development and creation of open spaces."*

**B3 West Redbourn (Requirement 5):**

*"Through Masterplanning, the layout and design of development should minimise any harm to the setting and significance of the Grade I Listed Parish Church of St Mary and the Redbourn Conservation Area; this may include the incorporation of appropriate set backs of development."*

20.5 Ultimately it will be for Historic England to respond as to whether the evidence and the planning process is in line with their guidance on how authorities should approach heritage in the Local Plan and the selection of potential sites including the potential impacts on heritage that might result from the proposals.

20.6 It is still unclear as to how the proposed allocations and their alternatives were assessed using HIAs given that the HIAs were not prepared until after the Regulation 18 Plan was prepared. For example the growth at HGA – how was this informed by the HIAs?

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Whilst RPC is pleased to see that SACDC has undertaken Heritage Impact Assessments (HIAs) for many of the proposed allocations, it is unclear as to how these Assessments have influenced the Local Plan proposals or its policies

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

## HE1 - Designated heritage assets

### 200 - Lawes Agricultural Trust

Submission Number: 200 Submission Date: 07/11/24 16:49

Respondent: Company/Organisation: Montagu Evans Name: Mr Amran Nagra

On Behalf Of Company/Organisation: Lawes Agricultural Trust Name:

Comment Number: 9

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy HE1 seeks to ensure that development that could affect designated heritage assets or their setting are appropriately assessed and controlled. Part b of the policy relates to listed buildings, noting works that will be supported where they preserve the building.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

As currently worded in the Regulation 19 publication of the Local Plan, Policy HE1 still does not acknowledge that the long term viability of designated heritage assets, in accordance with the NPPF and emerging Policy HE7, may, in some instances, depend on the advancement of other forms of development. We reiterate our previous recommendations to update Policy HE1 to incorporate language that reflects this important consideration.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 273 - Hallam Land Management and St Albans School

Submission Number: 273 Submission Date: 08/11/24 09:33

Respondent:  Company/Organisation: LRM Planning Name: Mr Owen Jones

On Behalf Of Company/Organisation: Hallam Land Management and St Albans School Name:

Comment Number: 12

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

11.2.1 As drafted, Policy HE4 requires all development which would adversely affect a scheduled monument to obtain a Scheduled Monument Consent prior to planning permission being granted. This is problematic because it relies on the full suite of information and detailed drawings to be available at that time, however, this is not practical for applications that are submitted in outline, with detailed matters reserved for subsequent approval. In these scenarios it is therefore not possible for the sufficient level of information to be provided and for the Scheduled Monument Consent to be issued.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

As such It is suggested that Policy HE4 is reconsidered in this context and the need for separate Scheduled Monument consent is instead sought at the detailed design stage, whether that be outline or reserved matters.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 241108 St Albans Local Plan Reg 19 response_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Our representations are of strategic importance to the Local Plan and the delivery of our scheme will contribute to its objectives.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**Number:**

12.6

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Dear Planning,

Thank you for sight of the Draft St Albans Local Plan 2041 and for including a reference to the official UK Police security initiative, Secured by Design (Chap 12 Para 6.).

This crime reduction initiative has been independently and academically assessed almost continually since its inception 35 years ago and has consistently demonstrated dramatic reductions in burglary, anti-social behaviour and other crimes.

Over the years the tested products that SBD has recommended have become much more common-place and due to economies of scale, have become ever more cost effective.

If the decision to build to the police specification of SBD is taken at the design stage, the costs involved are quite minimal. The last evaluation carried out by consultants (Davis Langdon Construction Consultants), resulted in an average figure of less than £170 per unit. I would expect this figure to have fallen considerably since the last evaluation.

If you consider the benefits that the occupiers of these St Albans homes can hope to derive in terms of quality of life, this figure is almost insignificant and not a reason to back away from SBD.

Living in a home that you feel safe and secure within has multiple benefits, which should be enjoyed by all. I invite you to 'Google' the question 'Why is it important to live in a safe and secure home UK'.

When I did this myself, I was surprised to find an 'AI' generated answer along with the numerous other replies (all worth reading).

**'Why is it important to live in a safe and secure home UK'**

***Safety-*** *Homes without security measures are five times more likely to be burgled than those with simple security measures. Burglary can impact your finances, emotional wellbeing, and sense of security*

.

***Family***– *A secure home can provide the foundation for supporting your family. Families without a secure home may be forced to split up to survive, especially if they have dependents like young children or elderly relatives.*

***Wellbeing****- The sense of security impacts your physical health, emotional wellbeing and how you manage stress.*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

I would ask that the wording in the final Plan 2041 be altered to reflect the fact that SBD is a minimum standard and one that should be seriously considered by all builders wishing to construct new homes in St Albans, and to follow a national 'best practise'.

I respectfully ask the wording to be changed to that shown below.

12.6 National policy sets out that policies should ensure that developments create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users. In providing for a high standard of amenity, the design of new development should take account of the needs of users including where they may change over time, and should seek to ensure that crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion and resilience. This may be through following the principles set out in 'Secured by Design', which is the official UK Police security initiative supporting the principles of 'designing out crime' through physical security. *Building new homes to the police specifications contained within Secured by Design, which is a basic security standard, will demonstrate to this council that the applicant is complying with national planning policy with regards to building developments that create safe and secure places that people want to live and work in.*

**223 - Oaklands College and Taylor Wimpey**

Submission Number: 223 Submission Date: 07/11/24 18:34

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Oaklands College and Taylor Wimpey Name:

Comment Number: 5

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

See attached representations for full submission.

**4.12 Chapter 12 – High quality design**

Oaklands College and Taylor Wimpey **support**:

- The expectation that new developments reflect local character and provide a high quality design for future occupiers, as set out in Policy DES1; and
- The delivery of 'at least' the density of 40 net dwellings per hectare, as set out in Policy DES3.

No suggested amendments are offered in respect of Policies DES1 and DES3 at this stage.

However, Oakland College and Taylor Wimpey object to the contents of Policy NEB12 (Green Space) of the Regulation 19 Publication Draft Local Plan. It requires development to deliver 4.5 sqm per person quantity standard for allotments. This figure is derived from the latest Open Space Study which indicates that the current level of provision in the District is 0.28 hectares per 1,000 people. However, the standard set by the National Society of Allotments is a standard of 0.25 ha per 1,000 people.

**4.12.1 SUGGESTED AMENDMENTS**

Oaklands College and Taylor Wimpey seek the Council's agreement to adjust Policy NEB12 to require a standard of 0.25 ha per 1,000 people. This amendment can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

See attached representations for full submission.

**308 - Look! St Albans**

Submission Number: 308 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Look! St Albans Name: Look! St Albans

Comment Number: 2

**Type:**

* Policy

**Number:**

SP12

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

The Officers of Look! St Albans have wrestled with the question should we make a representation or not at this stage, given St Albans is in desperate need of an up-to-date Local Plan. The last being dated 1994. As that Local Plan ran its course St Albans District has undergone unprecedented development pressure and continues today to be subject of speculative development, including substantial changes of use to meet the demand for new homes. There are many within the wider community who naturally feel concerns at such rapid change and feel they have little control or say in these changes which have manifested into trenchant positions, by some, against any development. Local groups such as CLASH, STRIFE and RAGE have come together to oppose new development which we agree makes life even harder for our LPA.

*However, this should not mean that we should not strive for quality community engagement. There should be a realization that step changes are needed to finally bring forward a Local Plan which the community can, in the main part, support.* We know from experience that this is not naturally an easy road, however the rewards of the effort are incalculable.

Regulation 18 took place in high summer 2023. Apart from a report to the Planning and Climate Change Committee of selected salient comments from the community, were in the most part merely noted. There appear very few changes to the Local Plan policies before us today to those that went out to consultation at Regulation 18. *It was reported to Councillors that the Regulation 18 consultation produced no 'red flags' or 'showstoppers'. We cannot see any evidence that any community views were taken on board.*

Regrettably it appears and has been widely reported that this Local Plan has been accelerated from its previous timetable to try and beat the expected rise in number of new homes the Council will need to plan for within the Local Plan period.

This was a political decision and the LPA has acknowledged there are 'heightened risks' in submitting this Local Plan for examination now. However they are considered to be 'risks well worth taking'. We understand that the Council proposes a review of the Plan, if passed, in 5 years' time. However, given our history on this process we think it not unreasonable to have doubts on the Council's ability to stick to this timetable.

**Our reason for submitting a representation at Regulation 19**

**Justified: There is insufficient evidence of participation or influence by the local community on matters of design post Consultation 18.**

We cannot see material evidence that the participation of the community post Regulation 18 has been included and reflected in the Local Plan on design, which will be submitted for Examination immediately after the closure of the Regulation 19 Consultation.

**Who are we**

Look! St Albans developed, with community support, from the City Centre Steering Group, formed from a wide range of community and business groups and individuals in 2012. This was set up, with the support and agreement of The Council and the Planning Department, *to enable the wider community in St Albans to work with The Prince's Foundation*. This followed the previous year's Coalition Government's 'Localism Act'. It was funded through a grant provided by the Department for Communities and Local Government. It was part of the *'Communities and Neighbourhoods in Planning'*programme and was supported with additional funds and 'in kind' contributions by a great number of local organisations, individuals and institutions, including St Albans City & District Council.

The brief endorsed by St Albans District Council was for The Foundation to initiate the development of design codes for the key areas of change within St Albans city centre through the facilitation of a three day community planning event. The Foundation set out to identify a range of architectural and urban design characteristics that the community, landowners, officers and elected members agree represents an acceptable direction for contemporary design within the historic context of St Albans.

The workshop reporthttps://lookstalbans.org/what-have-look-st-albans-done/ gave three options to use the substantial work co-created with the community in St Albans.

At the meeting in January 2013 the Look! St Albans Steering Group members (including St Albans Local Planning Officer) considered a 3rd option, which did not preclude either route 1 or 2 as set out in the report. This 3rd option would be to extend an invitation to all prospective developers of areas within the city centre and their architects to work with the community to test and progress the design codes/guidance. In the spirit of neighbourhood planning this ensures the community

is proactively and positively engaged in the design stage and not reactive to already shaped planning applications. Importantly this would not delay redevelopment, but ensure new buildings and spaces were, in part, designed with people who know St Albans well.

This was particularly pertinent in the light of the unfortunate delay in adopting the Strategic Local Plan and the mounting development pressures. (Note: The Council failed to endorse at a Full Council meeting at the end of 2012 to take forward the draft Strategic Local Plan prepared to The Inspection stage.)

The Look! ethos is to be proactive, collaborative, open, diverse, explorative and community rooted. In the future the group would like to become an important first port of call for developers wishing to invest in the city centre. Although members of the Representatives Group have their own views, these have not, and will not, override the views of the wider community. Every voice must and should be heard.

Since 2012 we have hosted two design charrettes using the draft design codes. Oak Tree Gardens in collaboration with The Council as owners' to produce with the community a concept plan. This development is now built and lived in, and has won acclaim locally, regionally and nationally. This has proven that people can and will support development within the city of St Albans. It is regrettable that our Masterplan charrette for the City Centre Opportunity Site which won RTPI acclaim never came to fruition, mainly due to political issues.

The Representatives Group of Look! St Albans always has a place for an LPA Officer responsible for design and it was hoped this would continue to foster a good relationship between the community and the LPA on design and eventually build on the work we started in 2012. Regrettably since the end of 2018 no Spatial Planning and Design Team Leader has been actively involved within the Representatives Group.

The lack of having a representative of a Spatial Planning and Design Officer seems all the more bewildering following the work of the report of the Building Better Building Beautiful Commission (Jan 2020) in which we participated which demonstrated momentum was gathering around the design agenda in the UK. The Planning for the Future white paper was issued in August 2020. It came to be that, just after the pandemic, the National Model Design Code was published which delighted us and gave us hope that finally design codes would come to St Albans, especially after our groundbreaking work began in 2012. Our workshop report is to be found on the Office of Place design code library https://www.gov.uk/guidance/design-code-library which is a selection of design codes, chosen by the advisory board to the Office for Place, that demonstrate good practice.

*All the others in this Library have been embraced by their LPA, except ours!*

**We asked in part of our regulation 18 response that our workshop report be at least finally placed in St Albans Local Plan evidence base. We have received no communications or feedback from the LPA on this request. We note that it has not been placed in the evidence base.**

The growth of developments and changes within the city of St Albans (which is unparished) has been unparalleled within the last 15 years and without a Local Plan with robust policies on design this has been to the detriment of our historic and cultural heritage. This added to the disempowerment and sometimes anger of the local community. Design codes greatly assist in ensuring local opposition is diminished by ensuring local views are incorporated by utilising a familiar pallet of materials and careful massing to ensure a stronger sense of place.

In our submission at Regulation 18 Look! St Albanshttps://lookstalbans.org/ we took issue with the now 6.20 Chapter 6 City, Town and Village Centres and Retail "There have been successful recent buildings that had responded positively to the local heritage whilst providing modern architectural approaches and valued new facilities. There will continue to be change and growth most particularly in St Peters Street and its vicinity." The Council has failed to back up this statement in our view.

In the St Albans Strategic Sites Design Guidance and Design Principles Strategic-scale sites are defined as 100+ homes or 10,000 square meters of commercial floorspace (retail, leisure and industrial), and reflect the Broad Locations and Large Sites identified in the Draft Local Plan. *However,* 'The principles may also be applicable to smaller-scale development.' In the document showing examples of good design only one appears that can be considered local, Park House, Harpenden. Were the LPA unable to find examples of new developments within St Albans as examples of good design to place in the Local Plan? If so, where are the policies to ensure design standards are raised and strengthened by community involvement in the production of Local Design Codes. After all, we have a starter pack already.

However should this Local Plan meet with Inspectors requirements, we ask that a recommendation is made to the LPA to build bridges with the community, not just local architects, to help wider acceptance of growth by co-creating design codes through an SPD within a set timeframe. We suggest with the help of external independent facilitators, this methodology has served Look! and the community well. We have worked with and are highly regarded by a number of these professionals. Some of whom have called on us to participate in giving presentations of our work and being on panels when discussing the value of community engagement with other professionals. In short we are taken seriously and we appreciate their faith in us.

An added benefit would be to the Local Development Management team which has been in special measures (for Householder applications) since the middle of the year. Design codes are widely known to speed up decision making if the design codes are clear and well produced. This would surely be welcome to both planners and applicants.

We thank you for taking the time in reading our representation and hopefully it is understood we wish to work constructively with our LPA. We have been recognised by the RTPI as worthy supporters of their 'It Takes Planners and You' campaign https://www.planningyourworld.org.uk/it-takes-planners-and-you/

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Justified: There is insufficient evidence of participation or influence by the local community on matters of design post Consultation 18.**

We cannot see material evidence that the participation of the community post Regulation 18 has been included and reflected in the Local Plan on design, which will be submitted for Examination immediately after the closure of the Regulation 19 Consultation.

**We asked in part of our regulation 18 response that our workshop report be at least finally placed in St Albans Local Plan evidence base. We have received no communications or feedback from the LPA on this request. We note that it has not been placed in the evidence base.**

**291 - SEGRO (Radlett) Limited**

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

8.1 Strategic Policy SP12 – High-Quality Design suggests that new development should *'respond positively to its context, be of high quality architecture and make efficient use of land'*.

8.2 Policy DES1 – Design of New Development sets out the parameters which new development should account for in order to achieve high quality design.

8.3 SEGRO (Radlett) Limited support the above policies in order to ensure that new development will positively respond to its surroundings, provide a high standard of amenity and ensure a high quality of architecture. These policies are consistent with national policy, notably the NPPF and National Design Guide, and are therefore considered sound and positively prepared.

8.4 Policy DES7 – Servicing of Development expects *'servicing needs of development should be considered at an early stage in the design process'*. The policy details how proposals are required to demonstrate compliance with refuse storage, cycle storage, parcel and deliveries and mechanical servicing and plant systems.

8.5 SEGRO (Radlett) Limited consider Policy DES7 to be an important part of the design process to ensure that new buildings will function appropriately for users. SEGRO (Radlett) Limited consider it to be justified and sound and are thus supportive of the policy.

## DES1 - Design of New Development

### 83 - Affinity Water

Submission Number: 83 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Name: Lita Khazaka

On Behalf Of Company/Organisation: Name: Affinity Water

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Affinity Water broadly supports the council's overall approach to addressing the effects of climate change as it relates to water use. Policy SP2 provides an overall approach and Policy CE1 – Promoting Sustainable Design, Construction and Building Efficiency - seeks to introduce the optional standards under the Building Regulations (Part G) to reduce water consumption. Affinity Water specifically supports the use of a 110 litre per person per day standard consistent with the standard adopted in the London Plan 2021. The council's approach is consistent with the evidence on likely future water stress produced by the Environment Agency and our own research in our Water Resources Management Plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Draft Local Plan approach to water conservation would be improved and made more effective if were to set out how the council will ensure "greywater recycling and storage facilities" are delivered in all major developments as well as in Broad Locations (Policy LG1 – Broad Locations and Policies LG2, LG3 and LG4 which cover the Hemel Garden Communities project as well as other site allocations in Appendix 1) to go further than "water management" and to embrace "water conservation" too. The council is also invited to make specific reference to water conservation in the various design policies in the Draft Local Plan (for example, Policy DES1 – Design of New Development and Policy DES7 – Building Servicing). That way, water conservation and broader sustainability principles would be integrated into the design process from the outset in the same way that all new development is likely to have to design in and incorporate biodiversity net gain when the relevant parts of the Environment Act 2021 come into force.

Other councils are proposing more precise ways of directing developers to address the need to use water resources more efficiently. For example, the emerging Tower Hamlets Local Plan Policy CG6 specifically requires that: *All new major residential and non-residential development proposals must install water supply and drainage pipework suitable for the separate collection of rain, grey, and foul water as well as the distribution of non-potable water throughout the development from and to all relevant fitments. All major residential and non-residential refurbishment and change of use should aim to retrofit rain and greywater recycling systems.*

Affinity Water further urges the council to ensure that the development plan policy relating to water conservation is applied in all planning applications approved after the Local Plan's adoption so that it can be applied. This is because the 110 litre per person per day standard can only be currently applied at the Building Regulations stage of construction if it is included as a condition of the grant of planning permission.

Finally, it is suggested that the council include an appropriate measure on how the Local Plan will promote water conservation that can be monitored in future Authority Monitoring Reports. This could cover, for example, the number of major developments with greywater recycling and storage facilities or the number of planning permissions for new housing that have a planning condition that will secure the 110 litre per person per day water target. This would have wider benefits for the council as it seeks to articulate further its local response to the Climate Emergency. Table 3 (in attachment) identifies the defects in the policy relative to the NPPF's tests of soundness.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 241103 Reg 19 Final Submission_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Affinity Water may just prepare written representations once it has seen the inspector's proposed agenda. It is of course open to the council to incorporate Affinity Water's suggestion to make the policy more effective. This would avoid the need to appear in front of the inspector.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 147 - Mr Roy Warren

Submission Number: 147 Submission Date: 07/11/24 11:32

Respondent: Company/Organisation: Sport England Name: Mr Roy Warren

Comment Number: 1

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* Yes

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

The inclusion of criterion h in the policy is welcomed as expecting new development to be designed to provide opportunities for encouraging physical activity would accord with Government policy in paragraph 96(c) of the NPPF and Sport England's 'Uniting the Movement' Strategy https://www.sportengland.org/about-us/uniting-movement

### If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?

* No, I do not wish to participate in hearing session(s)

---

## 227 - National Grid

Submission Number: 227 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: National Grid (Avison Young) Name: National Grid

Comment Number: 7

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**Utilities Design Guidance**

The increasing pressure for development is leading to more development sites being brought forward through the planning process on land that is crossed by NGET infrastructure.

NGET advocates the high standards of design and sustainable development forms promoted through national planning policy and understands that contemporary planning and urban design agenda require a creative approach to new development around high voltage overhead lines and other NGET assets.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Therefore, to ensure that Policy DES1 Design of New Development is consistent with national policy we would request the inclusion of a policy strand such as:

*"Take a comprehensive and co-ordinated approach to development including respecting existing site constraints including situated within sites."*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 273 - Hallam Land Management and St Albans School

Submission Number: 273 Submission Date: 08/11/24 09:33

Respondent: Company/Organisation: LRM Planning Name: Mr Owen Jones

On Behalf Of Company/Organisation: Hallam Land Management and St Albans School Name:

Comment Number: 8

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

12.3 Criterion (i) of Policy DES1 identifies the need for dwellings to be "set a minimum of 1m from the property / party boundary above ground floor level, where it would otherwise result in an undesirable terracing effect". This is overly specific, and arguably will not be relevant in the consideration of all development proposals.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To avoid any potential future conflict, it is suggested that this is reworded to allow minimum floor levels to be controlled via a suitably worded planning condition.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 241108 St Albans Local Plan Reg 19 response_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

## DES2 - Public Space

### 148 - Mr Roy Warren

Submission Number: 148 Submission Date: 07/11/24 11:40

Respondent:  Company/Organisation: Sport England Name: Mr Roy Warren

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The policy is supported especially criteria a, b and f as these principles of designing public space would be broadly consistent with Sport England's Active Design guidance https://www.sportengland.org/guidance-and-support/facilities-and-planning/design-and-cost-guidance/active-design . The signposting to the Active Design guidance in paragraph 12.11 of the reasoned justification to the policy is particularly welcomed as this will provide applicants with detailed guidance on how the policy can be implemented in practice. Collectively, the criteria in the policy would encourage physical activity through the deign of open spaces which would accord with Government policy in paragraph 96(c) of the NPPF and Sport England's 'Uniting the Movement' Strategy https://www.sportengland.org/about-us/uniting-movement.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy DES2 –Public Space

Natural England is pleased to see inclusion of a new policy dedicated to public space, specifically incorporation of soft landscaping that protects existing planting and landscape features and integrates naturalised SuDS, as well as supporting biodiversity creation and enhancement. Taking a joint approach to development including landscape features/the natural environment in conjunction with people is a welcome approach to urban design and we are in support of this.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## DES3 - Efficient Use of Land

### 69 - Trustees of the G A Simons Family Settlement

Submission Number: 69 Submission Date: 05/11/24 12:42

Respondent: Company/Organisation: Bidwells Name: MR Derek Bromley

On Behalf Of Company/Organisation: Trustees of the G A Simons Family Settlement Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Policy Objections**

18) The policies LG4 h) and DES3 a) provide a density of 40 d.ph as a minimum, these are simply unrealistic and unobtainable when it comes to small sites (up to 9 dwellings) and to a lesser extent for medium sites. These sites are not of a size which can accommodate a housing mix to achieve this density. As an example, a site proposed for 9 self- build/custom build (Policy HOU5) would be for individual plots for detached dwellings, (such as the successful council scheme Graven Hill, Bicester, Oxfordshire). Building co -operatives would be needed where the plots are not for detached dwellings, these are fraught with challenges which deters interest. Whilst it is recognised there are proposed requirements for such plots in the Broad Locations, discussions with housebuilders indicate is they are seldom taken up. They are unattractive to the market. Cause many issues concerning site security/ health and safety procedures and responsibilities. A minimum density for small/ medium sites should be deleted from the policy wording.

19) Policy HOU5 d) needs further wording that where the custom/self- build plots have not sold in the open market, then if offered to the Council or Registered Provider it will be at the open market value and failing that sold to a small/medium enterprise housebuilder.

**Is the Plan Justified**

20) Given the above, the Plan is not justified as an appropriate strategy as it does not take into and its evidence base for not doing so is not proportionate or indeed reasonable. In respect of Sites A and B the Councils Green Belt study conclusions to not stand up to scrutiny.

21) The plan policy for minimum densities to be applied to small/medium sites should be deleted. New wording should be inserted where this is an aim, but to have regard to the surrounding character and density and uses.

22) Whilst the Government's final definition of Grey Belt and the inclusion of Grey Belt as not being inappropriate development within the Green Belt, has yet to be confirmed; the proposed wording for Grey Belt includes *'any other parcels and/or areas of Green Belt land that make a limited contribution to the five Green Belt purposes'.* The case for the Trustees is that Sites A and B do

not contribute to the five purposes. It is not the case these sites make a "limited contribution" to Green Belt purposes, but rather they make "no contribution". The Government consultation "Proposed reforms to the NPPF and other changes to the planning system" 24/09/2024 suggests an effective way of providing guidance and refers

*"Grey Belt Land which makes a limited contribution to the Green Belt purposes will:*

1. *a) Not strongly perform against any Green Belt purpose; and*
2. *b) Have at least one of the following features : Land containing substantial built development or which is fully enclosed by built form.*

*ii Land which makes no or very little contribution to preventing neighbouring towns from merging into one another.*

*iii Land which is dominated by urban uses, including physical developments*

*iv Land which contributes little to preserving the setting and special character historic towns".*

Sites A and B satisfies all Grey Belt tests.

**Has The Plan Been Positively Prepared**

23) This is a qualified objection. Our client raises no objection to the overall housing provision based upon the current standard methodology, though has issues with the housing delivery during the plan period given the Council only has a 1.5 years housing land supply. Should the Governments new standard methodology apply for the purposes of this Plan, then there is a gross under provision of housing. The new methodology would increase the housing numbers from 885 d.p.a. to 1,554 d.p.a., a 75% increase.

24) Whilst there have been Ministerial Statements regarding when the new standard methodology for housing need will apply, nothing is certain as to the final wording and timing when it will apply.

25) The current expectation based upon the Council's programme is that the local plan will be submitted before the Government's proposed Standard Methodology for determining housing need takes effect. It is important a Plan is in place given the acute housing shortfall with only a 1.5 years housing land supply and to enable early new housing delivery. A further period of time without an up to date Plan will only add to an already difficult situation, so getting the Plan to Adoption is important. However, given the circumstances the Council has found itself, with a significant risk of unmet housing need, it is very important to identify and allocate in this plan more sites where possible and appropriate.

26) Given that planning policy and the plan process is a bit of a "moveable feast" the expectation in 25) above, may not be realised and there is no certainty. It is in any event clear the proposed housing provision will not meet the future development needs during the local plan period and an early review will be required.

27) In the event the new Standard Methodology does not apply to this Local Plan and the Council meets the deadline for submission, then our client is of the view the Council should commit to an immediate review following the Adoption of the Plan. There will a period between the Inspector's report and the Council's formal Adoption for Council officers to start the preliminary internal processes.

**Housing Trajectory**

28) The Council's housing trajectory (Table 3.2) for delivering housing from the Broad Locations is overly optimistic given the timelines for all the necessary planning approvals and lead in times for infrastructure.

29) Lichfields, produced a report in 2020 "Start to Finish" which reviewed build out rates of large housing sites across te country. This showed that nationally the average planning approval period for large sites of say 1,000 dwellings was 4.6 years. Given the local councils do not embrace new development but are reluctant participants when it comes to development on green fields, locally the time is longer. The Lichfield report also analyses tbuild out rate on large sites. The averages for sites 500-1 ,000 was 68 d.p.a., 1,000-1499 was 107 d.p.a. It is generally acknowledged that the early development years of schemes the completion rates are far less than the average. The build out rate in the early years for the Broad Locations is again overly optimistic.

30) My experience of the delivery of large sites in Hertfordshire, a county which has been reluctant to housing growth for decades, is that it will not be until the early/mid 2030's that many of the "Broad Locations" begin to deliver housing, the exceptions possibly being part of West Redbourn and part of North St Albans where permission has either granted or the application is well advanced. I set out below examples I have been involved with or are aware.

31) **Hemel Hempstead.** Allocated site for 900 dwellings in the Sites Allocations, Adopted 2017. Hybrid Planning Application submitted 21/12/2018. Granted 03/12/2021. Price negotiation with land owners and following approvals of pre- commencement conditions, start date on site November 2024. First dwelling for occupation November 2025. Total time for an allocated site from planning application to delivery of first dwelling 7 years.

32) **Stevenage.** Allocated site for 1,350 dwellings in Adopted Local Plan 22/05/2019. Hybrid planning application 07/04/2021 . Following Section 106 negotiations expected planning permission November 2024. There will be a period of negotiations on value which involves the Council and Homes England, with probable reference to an Expert, allow 18 months. Planning precommencement condition approvals, allow further 9 months. Lead in time for infrastructure to first dwelling allow further 18 months. Total time for an allocated site from planning application to first occupation just under 7.5 years.

33) **Hitchin.** Outline Planning Application for up to 700 dwellings submitted in advance of Local Plan on the 26/04/2018. Site allocated in the Adopted Local Plan November 2022 for 700 dwellings. Awaiting a decision. First occupation is likely to be in excess of 9 years from application.

34) On the basis of the above it is my view a reasonable expectation is that for large sites there is a 7 year gap between the submission of a planning application to first delivery of a completed dwelling. Given that to date with a couple of exceptions, applications on large sites have not been registered I think my estimate of early to mid 2030's is supported by the evidence. There are varied reasons why these sites have taken so long (continued public and councillor resistance, officer workload) .This will apply to all sites. That is why the timescales envisaged in the Housing Trajectory are not in some instances likely to be achieved. In my view based upon evidence, the first housing on most of the larger sites will not be delivered until the early/mid 2030's.

35) From the Councils own housing figures there is a substantial shortfall in delivery up to the 2030's. This under provision needs to be reduced with more small sustainable sites. Small sites are usually less constrained by infrastructure delivery because this is already available, or complicated Section 106 agreements involving both District and County. Early delivery is essential given the Council only has a 1.5 year housing land supply.

36) A greater number of smaller sites which do not have constraints to delivery need to be identified. Sites A and B are an obvious example.

37) The Council's identified urban sites include many which are Council owned comprising many garage blocks with poor access, city and town car parks and community buildings. It is very unlikely the total housing numbers indicated from these sites will be achieved. There will be objections to the loss of vehicle parking land, this loss of spaces creates further pressure for "on street" parking and in the case of public car parks the impact this will have upon the vitality and vibrancy of the

town centres. Any loss of car parking provision or community buildings is likely to be strongly resisted by the local community. Access to many is substandard for residential development and comprise of back land plots out of character to the surrounding area.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**The Policy wording in LG4 h) and DES3 a) should be amended to provide greater flexibility for densities on small /medium sites.**

**The Policy wording in HOU5 d) should be amended to make it clear the price to be paid by the Council or Registered Provider will be at the open market value and failing that, the plots can be sold to small/medium enterprise housebuilders.**

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. G A Simons Reg 19 Subs 2024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

It is important that the Council is questioned upon its approach to Green Belt Release given the apparent inconsistences where some sites have been identified and other more obvious ones omitted. The Councils minimum density for all sites irrespective of size is not reasonably achievable for small sites. The housing trajectory is overly optimistic. It's reliance on urban sites delivering the numbers indicated, is not reasonably achievable given the constraints of many of the sites.

It is evident that more sites need to be allocated to meet the housing numbers, particularly in the short term.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 81 - Harpenden Society

Submission Number: 81 Submission Date: 06/11/24 10:20

Respondent: Company/Organisation: Harpenden Society Name: Mr Martyn Reed

On Behalf Of Company/Organisation: Harpenden Society Name:

Comment Number: 7

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* Yes

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Build up, not just out

We believe that the council should, where the topography of the land permits, consider three storey properties thereby minimising the use of land.

### If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?

* No, I do not wish to participate in hearing session(s)

### I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:

* Yes

### I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:

* Yes

### I would like to be notified about the adoption of the Local Plan:

* Yes

## 100 - Trustees of the Shonleigh Trust

Submission Number: 100 Submission Date: 06/11/24 14:24

Respondent: Company/Organisation: Bidwells Name: Mr Derek Bromley

On Behalf Of Company/Organisation: Trustees of the Shonleigh Trust Name:

Comment Number: 4

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

1) These objections are made on behalf of the Trustees of the Shonleigh Trust. The Trustees object to the Regulation 19 Local Plan on the basis it is neither 'Justified' or 'Positively Prepared'.

2) The Trustees own the land shown edged red and coloured pink and edged blue on the plan **(Appendix 1 of attachment**). The land holding was severed as a consequence of the compulsory acquisition for the M25 in the early 1980s. At this point the M25 is in a deep cutting.

3) The field north of the M25 ( edged red and coloured pink) is contained by residential development along its northern boundary, residential development along part of its western boundary, the St Albans/Watford railway line (Abbey Line) on the eastern boundary and the M25 to the south.

4) Within the northern field are two stable blocks (these fall within te definition of Previously Developed Land). The field is divided by a mature tree line shown by the green line on plan Appendix 1.

5) It is the northern field (edged red) to which these objections relate, in particular the area coloured pink. The southern field would be made available for community benefits as part of any development.

**Green Belt Study**

6) The site adjoins How Wood a settlement excluded from the Green Belt.

7) In 2016 the Council produced their Strategic Housing Land Availability Assessment (SHLAA) relating to Green Belt sites. A copy of the assessment relating to the northern field is provided in **Appendix 2 of attachment.** The Stage conclusions 1 noted *'however, the northern half of the site is bounded by existing residential development to the north and west and its development would not have the same impact as described above'.*

8) As part of the previous local plan the Council commissioned SKM to undertake a Green Belt study in relation to sites which could deliver more than 250 dwellings. The SKM report did not undertake a Green Belt Study in relation to smaller sites. The Council's strategy being that the larger sites would be identified in the Local Plan and that smaller sites would come forward through Neighbourhood Plans and either granted under very special circumstances or within a revised Local Plan (policy DLP12) which amended the Green Belt boundaries.

9) As part of the St Stephen Neighbourhood Plan the Parish Council commissioned Aecom to undertake site assessments. The relevant extract of the final report dated December 2017 is attached as **Appendix 3 of attachment.** The extract identifies the northern field identified as Site S43, "land south of How Wood" and concludes in respect of the Neighbourhood Plan Site Assessment *'it would therefore be an appropriate site for the NP to put forward as a proposal for*

*housing, under policy DLP12 of the draft strategic local plan 2011-2031* '. It then goes on, that if this site is put forward through the neighbourhood plan and accepted by the council then the implementation would be through a Green Belt boundary change in a future local plan review.

10) The Draft Pre Submission St Stephen Parish Council Neighbourhood Plan 2019-2036 (28/11/2019) identified our clients land in Policy 27, **Appendix 4 of attachment** as proposed housing allocation subject to certain criteria.

11) In the St Stephen Parish Neighbourhood Plan Housing Report and Aspiration Sites (10/2020) (Appendix 5 of attachment) it also identifies the northern part of our clients land for housing to accommodate approximately 30 dwellings.

12) In the St Stephen Parish Neighbourhood Plan Pre Submission (Reg 14) Consultation draft (Policy 27) again identifies the northern part of our clients site for residential development for up to 30 dwellings, Appendix 6 of attachment.

13) The St Albans Housing and Economic Land Availability Assessment 2021 (Appendix 7) the overall conclusion was 'the site is considered to be potentially suitable, available and achievable subject to a further assessment as part of the site selection process".

14) The Council's Green Belt Study 2023 prepared by Arup, upon which the Council relies for its evidence base, came to the conclusion that the site (SA 126) should not come forward as a Green Belt release **Appendix 8 of attachment.** It is noted however this was the same conclusion for Site SA 133, which was subsequently granted planning permission for housing. A site which again was identified for housing in the St Stephen Neighbourhood Plan documents.

15) Whilst these studies endeavour to provide objective test criteria, the weighting is very much subjective. It is clear that among the experts commissioned by the 2 Councils to review this site, they have come to different conclusions. There has been no change to the area in terms of landform, topography or landscape which justifies different conclusions.

16) It is also evident that there has been a long history of the northern part of the subject site being identified for development in many council documents. The recent Arup Study only reviews the whole site, whereas the previous SHLAA and Aecom reports have used a finer grain approach and identified the northern part of the subject site as not performing well in relation to the 5 purposes of including land in the Green Belt. Not using a finer grain approach was one of the criticisms of the Councils general approach at the last failed Local Plan.

17) The Arup omission of the northern field is in contrast to the joint council's proposals, where the St Stehen P.C. Pre- Submission Plan and its Housing Aspirations identified the site for housing. In summary from 2016 until 2023 the subject site was identified for housing.

18) There are sites in the Reg 19 which have a wider and greater Green Belt impact or do not share the same level of sustainability. We would wish to review these comparisons as part of the Examination.

**Sustainability**

19) The site adjoins the settlement edge of How Wood, a settlement excluded from the Green Belt. It is in a sustainable location given its proximity to a range of facilities/amenities and public transport connections.

20) In sustainability terms the site has the following (actual distances not as the crow flies): A bus stop on the frontage to Park Street Lane. Services 361 and 635 Abbey Line (St Albans/Watford) railway stations Bricket Wood and How Wood 0.8 km Radlett main line railway station 5.5km Local Neighbourhood Centre 0.9km Park Street Doctor's surgery 0.55km Primary schools 1.0km Secondary schools 3.4km

21) The Arup Qualitative Assessment of this site has errors. The site has a bus stop adjoining the frontage, not 1.6 kilometres distance. There are 2 services; the 361 which is the main How Wood service between St Albans and Borehamwood and the less frequent 635 between Watford and Hatfield. The report makes no mention that the site is mid- way between the railway stations of How Wood and Bricket Wood on the Abbey line, both being 0.8km and accessible by footpath. No mention of the Doctors surgery which is 0.55km. Other than the Radlett main line station and secondary school all the above are accessible by footpath. Whilst the Arup report refers to distances from an S.S.S.I and County Wildlife Site, these are is separated by the railway line. The site is separated from contaminated land by the railway. This land was tipped on decades ago and has methane vent pipes; it has been naturalised and is a publicly accessible resource.

22) As part of the Major Transport Schemes Policy TRA2 **(Appendix 9 of attachment)** provides that the Council supports the delivery of an enhanced Abbey line service (the St Albans/Watford railway line).

23) The Reg 19, Para 1.30 refers that the strategy is to locate growth in the most sustainable locations. Para 3.4 refers to "meet the needs within or close to existing settlements". Policy SP2 d) seeks to make "use of the most sustainable locations for growth". It is evident that the location of this site meets these policies objectives.

**Development Benefits**

24) It is envisaged that in accordance with the Draft St Stephen N.P. the area shown colour washed on the plan Appendix I would contain built development. In addition to all the usual benefits which are derived from housing, the southern area of the field will provide a green buffer for compensatory Green Belt benefits, utilised for on-site Bio Diversity Net Gain and a Sustainable Urban Drainage scheme.

25) The made St Stephen N.P. policy S19 and para's 8.21 and 8.22 (Appendix 10) together refer to the St Albans Green Spaces Report indicates there is a deficit of allotment facilities. Our clients land south of the M25 adjoins existing Allotments; this would be made available as an extension to te existing allotments.

**Policy Objections**

26) The policies which provide a density of 40 d.ph as a minimum (LG4 h) and DES3 a)) are simply unrealistic and unobtainable when it comes to small sites (up to 9 dwellings) and to a lesser extent for medium sites. These sites are not of a size which can accommodate a housing mix to achieve this density.

27) The plan policy for minimum densities to be applied to small/medium sites should be deleted. New wording should be inserted where this is an aim for small and medium sites but to have regard to the surrounding character and density and uses.

**Is the Plan Justified**

28) Given the above, the Plan is not justified as an appropriate strategy as it does not take into account the reasonable alternative of including part of the northern field as a Green Belt release for housing and the Councils evidence base for not doing so, is not proportionate or justified. Given the previous history of reports. The Councils Green Belt Study conclusions are at variance to the direction the Council and St Stephen P.C were taking in respect of this site.

29) Whilst the Government's final definition of Grey Belt and the inclusion of Grey Belt as not being inappropriate development within the Green Belt, has yet to be confirmed; the proposed wording for Grey Belt includes *'any other parcels and/or areas of Green Belt land that make* a *limited contribution to the five Green Belt purposes'.* The Government consultation "Proposed reforms to the NPPF and other changes to the planning system" 24/09/2024 suggests an effective way of providing guidance and refers *"Grey Belt Land which makes* a *limited contribution to the Green Belt purposes will: a) Not strongly perform against any Green Belt purpose; and b) Have at least*

*one of the following features : Land containing substantial built development or which is fully enclosed by built form. ii Land which makes no or very little contribution to preventing neighbouring towns from merging into one another. iii Land which is dominated by urban uses, including physical developments iv Land which contributes little to preserving the setting and special character historic towns".*

30) The part of the northern field which is largely contained by development on 3 boundaries has 2 stable blocks which fall within the definition of Previously Developed Land. It is described in the Pro- Forma Site Assessment as scrub land.

**Has The Plan Been Positively Prepared**

31) This is a qualified objection. Our client raises no objection to the overall housing provision based upon the current standard methodology, though has issues with the housing delivery during the plan period given the Council only has a 1.5 years housing land supply. Should the Governments new standard methodology apply for the purposes of this Plan, then there is a gross under provision of housing. The new methodology would increase the housing numbers from 885 d.p.a. to 1,554 d.p.a., a 75% increase.

32) Whilst there have been Ministerial Statements regarding when the new standard methodology for housing need will apply, nothing is certain as to the final wording and timing when it will apply.

33) The current expectation based upon the Council's programme is that the local plan will be submitted before the Government's proposed Standard Methodology for determining housing need takes effect. It is important a Plan is in place given the acute housing shortfall with only a 1.5 years housing land supply and to enable early new housing delivery. However, given the circumstances the Council has found itself, with a significant risk of unmet housing need, it is very important to identify and allocate in this plan more sites where appropriate.

34) Given that planning policy and the plan process is a bit of a "moveable feast" the expectation in 26) above, may not be realised and there is no certainty. It is in any event clear the proposed housing provision will not meet the future development needs during the local plan period and an early review will be required.

35) In the event the new Standard Methodology does not apply to this Local Plan and the Council meets the deadline for submission, then our client's are of the view the Council should commit to an immediate review following the Adoption of the Plan. There will a period between the Inspector's report and the Council's formal Adoption for Council officers to start the preliminary internal processes.

36) The Council's Housing Trajectory (Table 3.2) for delivering housing from the "Broad Locations" is overly optimistic given the timelines for all the necessary planning approvals and lead in times for infrastructure.

37) Lichfields, produced a report in 2020 "Start to Finish" which reviewed build out rates of large housing sites across te country. This showed that nationally the average planning approval period for large sites of say 1,000 dwellings was 4.6 years. Given the local councils in Hertfordshire have not embraced new development but are reluctant participants when it comes to development on green fields, then locally the time is longer. The Lichfield report also analyses the build out rate on large sites. The averages for sites 500-1,000 was 68 d.p.a., 1,000-1499 was 107 d.p.a. It is generally acknowledged that the early development years of schemes the completion rates are far less than the average. The build rate in the early years for the Broad Locations is again overly optimistic.

38) My experience of the delivery of large sites in Hertfordshire, a county which has been reluctant to housing growth for decades, it will not be until the early/mid 2030's that many of the "Broad Locations" begin to deliver housing, the exceptions possibly being part of the west Redbourn and part of North St Albans where permission has either granted or the application is well advanced. I set out below examples I have been involved with or are aware.

39) Hemel Hempstead. Allocated site for 900 dwellings in the Sites Allocations, Adopted 2017. Hybrid Planning Application submitted 21/12/2018. Granted 03/12/2021. Price negotiations with land owners and following approvals of pre- commencement conditions, start date on site November 2024. First dwelling for occupation spring 2026. Total time for an allocated site from planning application to delivery of first dwelling 7.25 years.

40) Stevenage. Allocated site for 1,350 dwellings in Adopted Local Plan 22/05/2019. Hybr'1d planning application 07/04/2021. Following Section 106 negotiations expected planning permission November 2024. There will be a period of negotiations on value which involves the Council and Homes England, with probable reference to an Expert, allow 18 months. Planning precommencement condition approvals, allow further 9 months. Lead in time for infrastructure to first dwelling allow further 18 months. Total time for an allocated site from planning application to first occupation just under 7.5 years.

41) Hitchin. Outline Planning Application for up to 700 dwellings submitted in advance of Local Plan on the 26/04/2018. Site allocated in the Adopted Local Plan November 2022 for 700 dwellings. Awaiting a decision. First occupation is likely to be in excess of 9 years from application.

42) On the basis of the above it is my view a reasonable expectation is that for large sites there is a 7 year gap between the submission of a planning application to first delivery of a completed dwelling. Given that to date with a couple of exceptions, applications on large sites have not been registered I think my estimate of early to mid 2030's is supported by the evidence. There are varied reasons why these sites have taken so long (continued public and councillor resistance, officer's workload) This will apply to all sites. That is why the timescales envisaged in the Housing Trajectory are not in some instances likely to be achieved. In my view based upon evidence, the first housing on most of the larger sites will not be delivered until the then later early/mid 2030's.

43) From the Councils own housing figures there is a substantial shortfall in delivery up to the 2030's. This under provision needs to be reduced with more small sustainable sites. These are not so constrained by infrastructure delivery because this is already available, or complicated Section 106 agreements involving both District and County . Early delivery is essential given the Council only has a 1.5 year housing land supply.

44) A greater number of smaller sites which do not have constraints to delivery need to be identified. The subject site is an obvious example.

45) The Council's identified urban sites include many which are Council owned comprising many garage blocks with poor access, city and town car parks and community buildings. It is very unlikely the total housing numbers predicted indicated for these sites will be achieved. There will be objections to the loss of vehicle parking land, this loss of spaces creates further pressure for "on street" parking and in the case of city centre public car parks the impact this will have upon the vitality and vibrancy of the town centres. Any loss of car parking provision or community buildings is likely to be strongly resisted by the local community.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**The Policy wording in LG4 h) and DES3 a) should be amended to provide greater flexibility for densities on small /medium sites.**

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Shonleigh Trustees - Land at Park Street__[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

It is important the the Council is questioned upon its approach to Green Belt Release given the apparent inconsistencies where some sites have been identified and other more obvious ones omitted. The Councils minimum density for all sites irrespective of size is not reasonably achievable for small sites. The housing trajectory is overly optimistic. It's reliance on urban sites delivering the numbers indicated, is not reasonably achievable given the constraints of many of the sites.

It is evident that more sites need to be allocated to meet the housing numbers particularly in the short term.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

Submission Number: 222 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Marrons Name: David Pendle

On Behalf Of Company/Organisation: C/O Marrons Name: Martin Grant Homes and Kearns Land Ltd

Comment Number: 8

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy DES3 requires development proposals to achieve 40 dwellings per hectare or at least the existing site context. This policy introduces a slightly different test to that prescribed (as drafted) by Policy LG4(h) upon which we have already commented above. The differences introduce uncertainty and render the policy set ambiguous (Framework paragraph 16d). As per our comments on LG4(h) the policy should provide for flexibility to understand when lower density developments may be appropriate based upon a constraints-led design process.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

As per our comments on LG4(h) the policy should provide for flexibility to understand when lower density developments may be appropriate based upon a constraints-led design process.

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Vistry notes that there is a complex framework of prescriptive development management policies, but it is unclear whether, on a practical basis, there has been any assessment of how these policies inter-relate, without causing tensions within the Local Plan. In this regard, it is noted that Policy DES3 of the Draft Local Plan (Efficient Use of Land) requires a minimum overall net density of 40 dwellings per hectare (dph) in every instance and that development proposals that do not make efficient use of land will be refused. Vistry advocates that each of the proposed current allocation sites, including Site B3: West Redbourn, should be considered on their own respective merits and developed at an optimum sustainable density, consistent with the constraints and opportunities identified for the particular site in question.

Please see attached Statement for more details

## 273 - Hallam Land Management and St Albans School

Submission Number: 273 Submission Date: 08/11/24 09:33

Respondent: Company/Organisation: LRM Planning Name: Mr Owen Jones

On Behalf Of Company/Organisation: Hallam Land Management and St Albans School Name:

Comment Number: 10

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

12.6 Policy DES3 states that development should:

"Where additional residential units are proposed, achieve at least the density of the existing site context or 40 net dwellings per hectare, whichever is higher"

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

12.7 Hallam and St Albans School consider that this should be balanced against other factors, including for example, the respective requirements for housing mix and/or contextual factors which may necessitate a lower density in order to be in keeping with local context and character. A strict residential density could result in inappropriate development which complies with policy but does not relate to the immediate site environs.

Respondent: Company/Organisation: MFS Resolution Name: Michael Fearn

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Draft Policy DES3***"Efficient use of land"*– whilst not objecting to the principle of the policy it should be considered that there will be many parts of the District that currently do not attain the minimum density of *"40 net dwellings per hectare"*. However, it remains unclear which policies would prevail (SP12/DES1 versus DES3). It seems that the 40 dwellings to the hectare density is the minimum, although the proposal could then be refused for not 'respecting' the area's existing character. In order to help with this paragraph 129 of the NPPF advises setting out a "range of densities that reflect the accessibility and potential of different areas, rather than one broad density range". As a further point, the requirement for the provision of BNG (and the first choice being that the provision is made on-site), militates against efficient use of development land. The policy is not positively prepared; justified; effective; or consistent with national policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. **349 - Lisa Peters**

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 24

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Efficient Use of Land**

CHPC has concerns regarding **Policy DES3**, specifically in relation to the requirement for development proposals to achieve at least 40 net dwellings per hectare or match the density of the existing site context, whichever is higher. While the intention to make efficient use of land is understood, this policy may have unintended consequences, particularly in urban fringe and rural areas like Colney Heath, where densities are generally lower and the character of the environment is more suburban or rural in nature.

In particular, the 40 dwellings per hectare target could lead to higher density developments that are out of character with the surrounding area, especially in rural fringe locations. Colney Heath and similar areas typically feature lower-density housing, and imposing a higher density requirement could lead to overdevelopment, potentially eroding the rural character of these areas andputting pressure on local infrastructure, such as roads, schools, and public services. Additionally, higher densities in such areas could undermine the integrity of existing green spaces.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

While higher housing densities will reduce the need for development on Green Belt Land which is welcomed, CHPC believes there is a need to balance higher densities with character of the area.

Moreover, development in rural fringe areas is often associated with a need for additional infrastructure to support new residents, such as transportation, utilities, and community services. These may not always be easily provided or may exacerbate environmental concerns, particularly in areas with limited public transport links or constrained infrastructure. In such contexts, lower-density development that aligns with the existing character and capacity of the area might be more appropriate, as it can ensure a better fit with the local environment and avoid negative impacts on the rural and Green Belt landscape.

CHPC therefore recommends that the Local Plan allows for greater flexibility in the application of Policy DES3, particularly in rural areas and those on the edge of urban settlements. Instead of rigidly applying a minimum density requirement of 40 dwellings per hectare, the policy should consider local context and the specific characteristics of each site. In rural or urban fringe areas like Colney Heath, a more nuanced approach that takes into account the density of the surrounding area, the capacity of local infrastructure, and the need to protect the Green Belt would result in more sustainable and appropriate development.

In conclusion, CHPC urges that the Local Plan's density requirements in Policy DES3 be applied flexibly, particularly in rural and Green Belt areas, to prevent overdevelopment, respect the local character, and mitigate the impact on the Green Belt. This approach would support sustainable development while maintaining the integrity of the area's natural and built environment.

## DES4 - Extensions to Existing Buildings

### 335 - Michael Fearn

Submission Number: 335 Submission Date: 07/11/24 09:00

Respondent:  Company/Organisation: MFS Resolution Name: Michael Fearn

Comment Number: 6

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Draft Policy DES4***"Extensions to existing buildings"*– this is another unnecessary policy. The rights for householders to alter and extend their properties have been purposely introduced in order to reduce the need for planning control. In essence, where the extension causes no harm, it is pre-granted planning permission. Amongst the unnecessary controls which this draft policy seeks to introduce, extensions are deemed to *"result in an undesirable terracing effect"*if they are less than 1 metre from a boundary. There is no provision in the General Permitted Development Order which would prevent a householder from extending their dwelling in this way. The policy is not positively prepared; justified; effective; or consistent with national policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. 12.8 Standards in regard to amenity space can be useful in forming development proposals, however it is considered that a suitably worded sentence should be included to identify that some exceptions to the policy may exist where higher density development can be achieved. There is risk that as currently drafted, the requirements of Policy DES5 could conflict with the need to seek to make the most efficient use of land as per Policy DES3 and in turn compromise other important policy objectives.

**304 - EDIT Land Ltd**

Submission Number: 304 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 9

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land to the south of Burydell Lane, Park Street” have been discounted incorrectly.

**Representations**

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

SP1: A Spatial Strategy for St Albans District

SP3 — Land and the Green Belt

HOU 1- Housing Mix

HOU 2 — Affordable Housing

SP2 — Responding to the Climate Emergency

NEB 6 - Biodiversity and Biodiversity Net Gain — Comment

LG5 — Green Belt — Object

**Draft Policy DES5 — Residential Amenity Standards — Comment**

EDIT Land supports the framing of Policy DES5 (a), which states that new development should achieve a minimum separation distance between facing windows servicing habitable spaces of net. 22m.

In the instance that outline permission is granted, the detailed scheme at reserved matters stage will be designed to achieve conformity with the requirements of Policy DES5.

## 334 - TT Group

Submission Number: 334 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Knight Frank Name: Stuart Baillie

On Behalf Of Company/Organisation: TT Group Name:

Comment Number: 11

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**DES5 (Residential Amenity Standards)**

In line with the NPPF, Policy DES5 of the Draft Local Plan makes provisions to ensure that developments create places with a high standard of amenity for existing and future users. Policy DES5 sets out various amenity standards for new development, including (*inter alia*):

- **Privacy and Separation**– the following standards and distances should normally be achieved:
  - *New balconies or upper-floor windows serving habitable rooms should not lead to a harmful degree of overlooking for existing and future users of both the new development and neighbouring sites;*
  - *A minimum distance of 22m should be achieved between upper floor rear windows of habitable rooms and facing windows of habitable rooms; and*
  - *A minimum distance of 11m should be achieved between new upper floor rear windows and the rear boundary.*
- **Private amenity space –**new residential development should normally provide the following:
  - *Studios – 15sq.m for each room*
  - *Flats – 20sq.m. for the first bedroom of each flat and 10sq.m. for each additional bedroom. Communal amenity space should be provided for flatted developments, although ground floor flats may be able to benefit form private space immediately adjacent to the residential unit.*

Our Client acknowledges the need to ensure that developments provide a high standard of living for future occupants and existing neighbours.

Nevertheless, it should be acknowledged that proposals, notably those that make the effective and efficient use of previously developed urban sites, may result in some impact on the amenity of neighbouring properties. Any impacts on residential amenity must be balanced against existing context, planning context, and the benefits of a proposed development including maximising housing delivery. Policy DES5 should therefore be amended to acknowledge this.

Equally, our Client welcome the acknowledgement that flatted developments should provide communal amenity space, noting the considerable difficulties associated with private provision in such developments. Nevertheless, Policy DES5 must allow for flexibility in meeting the space requirements, particularly in constrained urban sites. If onerous communal amenity space standards are applied rigidly across all development, it will not be possible to make efficient use of brownfield land, and therefore opportunities to meet housing need will be stifled.

Our Client therefore urge SACDC to amend Policy DES5 to ensure that it balances the need to provide high quality amenity with the overarching objective of making the efficient uses of previously developed land to meet the significant housing need within the district.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusions**

Our Client welcomes the preparation of the St Albans' new Local Plan, noting that those policies contained in the current adopted Local Plan (1994) are extremely outdated and do not accurately reflect current circumstances.

Our Client broadly supports the aspirations of the Plan, particularly that of prioritising residential development on previously developed sites, and ensuring the efficient use of such land in order to meet the significant housing need within the district. Our Client agrees this represents a sensible and effective way of providing much needed new homes in highly sustainable locations across the district which is otherwise constrained by Green Belt.

Nevertheless, our Client has significant concerns regarding specific policies of the Draft Local Plan. Most notably, our Client raises key concerns with the failure of the Draft Local Plan to identify Marlborough House as a site for future residential development. As discussed throughout this representation, Marlborough House represents an underutilised, highly accessible previously developed site, the comprehensive redevelopment of which to provide residential units would make a significant contribution towards meeting housing need within SACDC.

Furthermore, our Client contends that the Draft Local Plan are not legally sound and do not comply with the NPPF. Our Client has therefore made a number of recommendations, which if adopted would ensure consistency across the Draft Local Plan. Notably, our Client strongly contends that those policies within the Draft Local Plan must be sufficiently flexible in order to maximise the chances of meeting the significant housing need within the district. Failure to do so risks the Draft Local Plan stifling opportunities to meet housing need through the effective and efficient use of the highly sustainable brownfield sites.

Overall, it is concluded that in its current form the Draft Local Plan has areas of inconsistency, is not justified with appropriate evidence and is therefore at risk of not be legally compliant, and it is suggested that the Council take further review. We look forward to engaging further in the preparation of the St Albans Local Plan 2041.

**335 - Michael Fearn**

Submission Number: 335 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: MFS Resolution Name: Michael Fearn

Comment Number: 7

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Draft Policy DES5***"Residential amenity standards"*– the draft policy enshrines National Space Standards into policy. As noted above, this is always a risk, as such guidelines are frequently revised and so the policy then becomes out of date. The redevelopment of urban sites in particular may require flexibility on standards, so as to achieve a form of development that either maximises the land and/or fits with the existing grain of an area. The strict operation of this policy is only likely to frustrate the delivery of many projects (an unduly restrictive approach is expressly warned against at paragraph 129c of the NPPF and a *"flexible approach"*can sometimes be taken). The policy is not positively prepared; justified; effective; or consistent with national policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**350 - Hill Residential**

Submission Number: 350 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: tor&co Name: Sophia Goodhead

On Behalf Of Company/Organisation: Hill Residential Name:

Comment Number: 20

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Policy DES5: Residential Amenity Standards**

Part c) of the policy requires new residential development to meet or exceed the nationally described space standards (NDSS), however, no evidence has been provided to justify the introduction of this requirement in the district, in accordance with paragraph 135 footnote 52 of the NPPF and paragraph 56-020 of the PPG. SADC should provide evidence of the need for such homes and the impact on the affordability of housing within the area. If the need is justified it should also include some flexibility to meet the needs / affordability of some households.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest

a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

**362 - EDIT Land Ltd**

Submission Number: 362 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 9

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land at Roundhouse Farm, Colney Heath” have been discounted incorrectly

Representations

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

The Reg. 18 Draft Local Plan includes planning policies relating to various topics, which would become the principal consideration for the decision maker when determining planning applications.

EDIT Lands has not provided comment on a number of policies and advise which they are commenting on in the list below, but reserves the right to comment on others in the future.

However, SADC should consider whether all the policies as drafted are useful and necessary for decision making, and do not just repeat that which is already stated in the National Planning Policy Framework (NPPF), Planning Practice Guidance or legislation. Policies should also be unambiguous, clear and concise, without being overly onerous or stifle innovation or ambition.

EDIT Lands main concern with the Local Plan, as a whole, is the weak approach to the provision of much needed housing. Firstly, the level of housing planned for does not seek to address housing need adequately or provide any contingency, nor does it seek to address unmet need or positively plan for previous years of significant under-delivery.

Furthermore, the level of housing which is proposed as windfall, is unsound. 20% of the total housing supply to come forward on sites which do not have allocations, nor are formally identified is not positively prepared and is a huge outlier compared to neighbouring authorities. We consider the proportion of windfall to be wholly inappropriate given the borough’s historic poor delivery and acute housing need.

It is also perverse for SADC to suggest that all brownfield sites have been exhausted to necessitate Green Belt release, whilst anticipating that such a high number will come forward via the windfall process. In addition, the Local Plan is heavily reliant on the delivery of a small number of broad growth areas and strategic extensions, namely the Hemel Garden Community which is allocated for net. 5,500 dwellings and 4,281 across the other strategic development sites which are subject to challenging land assembly and infrastructure delivery requirements which will constrain delivery of housing units within the early periods of the Local Plan. St Albans have acknowledged this situation in the reg.19 draft Local Plan where they are now asserting that only 4,300 dwellings will be delivered on the HGC sites within the LP period, a reduction of 450 dwellings from the LP trajectory and 1200 from the wider site allocation. Across all allocated sites within the borough, the council has lost net. 971 dwellings between Reg.18 and Reg.19 stage. There is no explanation, or justification on how the shortfall in housing delivery is accounted for within the revised housing trajectory, or local plan housing targets.

The housing trajectory places significant reliance on these strategic sites without due consideration to implications of these strategic sites not being delivered or brought online in line with the housing trajectory.

The emerging Local Plan is also not prepared positively as it fails to make any consideration to the need for natural growth (and deliverable) within the ‘washed over villages’ within the green belt, with no consideration paid in detail to areas for release from the green belt in these locations. As outlined in Section 3 of this document our client challenges the methodology which has been applied in the green belt review in light of a failure to apply a macro level analysis to the green belt parcels.

Furthermore the draft Local Plan fails to make provision for custom build and self-building housing typologies despite a clear need being identified in the National Planning Policy Framework no recognition is made to the contribution this typology makes to meeting established demand. We understand that there is a need locally for such housing and failure to plan for such housing, is not positive.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

- SP1: A Spatial Strategy for St Albans District
- SP3 – Land and the Green Belt
- HOU 1 – Housing Mix
- HOU 2 – Affordable Housing
- SP2 – Responding to the Climate Emergency
- NEB 6 – Biodiversity and Biodiversity Net Gain – Comment
- LG5 – Green Belt – Object

Draft Policy DES5 – Residential Amenity Standards – Comment
EDIT Land supports the framing of Policy DES5 (a), which states that new development should achieve a minimum separation distance between facing windows servicing habitable spaces of net. 22m.
On their landholdings at Roestock Lane the outline application submitted had been designed to achieve compliance with the adopted 1994 Local Plan Policy 70 part (vi) which requires new development to achieve separation distances of 27 metres between facing windows alongside delivery of permanent rear boundary screen 1.8 metres high. The Illustrative masterplan provides a visualisation of how the scheme will be delivered at detailed design stage
In the instance that outline permission is granted, the detailed scheme at reserved matters stage will be designed to achieve conformity with the requirements of Policy DES5.
Final details of the public open space and child play strategy will be secured at reserved matters stage.

## DES6 - Building Heights

### 32 - John Whiting

Submission Number: 32 Submission Date: 27/10/24 09:00

Respondent: Company/Organisation: Radlett Society & Green Belt Association (RSGBA) Name: John Whiting

Comment Number: 12

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The commentary about building heights in 12.19 and related paragraphs is welcome. However, we do wonder if there need to be more said about adding an additional storey to some buildings. Would a third storey be acceptable on a block of shops with flats above? Or a fourth storey on top of an existing three storey block? (Always assuming the structure is appropriate of course.)

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

---

**248 - Historic England**

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**DES6 - Building Heights**

At regulation 18, we raised the issue of lack of evidence to support the Building Heights Policy. We are pleased to see that you have now reviewed the evidence base and refined the corresponding Map 12.1.

However, in our response we recommend that you review a number of additional key viewpoints around the city and include these in the Review document. The map should also be amended accordingly. In addition, we have suggested some changes to the policy wording itself.

We welcome the reference to heritage assets in criterion a ii. We also welcome reference to historic features at b v.

We recommend that the policy should also refer to the need for applicants to demonstrate and quantify the potential harm of proposals for the significance of heritage assets.

The policy should refer to the importance of kinetic views.

**Map 12.1**

Once the other viewpoints listed above have been considered and assessed, the map should be amended to reflect these other viewpoints.

**Evidence Base**

We welcome the review of the Building Height Control Area.

We note that you have revisited the viewpoints from the previous study and updated the map to reflect any changes in views.

We suggest that a number of other views should also be considered.

Further to our recent DtC meeting, we acknowledge that for LVIA purposes the focus should consider views from local communities focusing on the way that a community currently experiences views from public locations such as streets and open spaces and how those will change. Views from houses and individual properties are a matter of private amenity. (Landscape Institute / IEMA guidance (GLVIA3))

We are advocating for additional viewpoints to assist in understanding heritage impacts. Good Practice Advice Note 3 on the Setting of Heritage Assetsmakes it clear that *The contribution that setting makes to the significance of the asset does not depend on there being public rights or an ability to access or experience that setting'.* Moreover, it is also worth bearing in mind that Gorhambury Drive has permissive access for most of the year, enabling access to the EHT property at Old Gorhambury House and with part of its length even promoted as the Hertfordshire Way Recreational Route: https://www.gorhamburyestate.co.uk/gorhambury-drive/& https://www.english-heritage.org.uk/visit/places/old-gorhambury-house/.

Please explore these views and amend the review document and map if needed. b)

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Policy DES6**

We recommend that the policy should also refer to the need for applicants to demonstrate and quantify the potential harm of proposals for the significance of heritage assets.

The policy should refer to the importance of kinetic views.

**We suggest that a number of other views should also be considered.**

These include:

- Bacons Mound - there is a designed view towards the Abbey from this outlying part of the Gorhambury RPG which lies within the scheduled monument.
- Gorhambury Estate and Drive - various views from this higher land across towards the city
- The Roman Theatre - there should be a viewpoint from the theatre.
- Sopwell Priory - there are important historical connections between the Priory and Abbey. The Building Height Control Area viewpoint review and Conservation Management Plan review currently being undertaken by the Council should both explore the setting of the priory

and any important views towards the Abbey. We recommend that you liaise with the City Archaeologist to work up any designated view here in tandem with the project to prepare a Conservation Management Plan for the priory.

- Wheathampstead - Check for any views of the city/abbey tower from Wheathampstead, including the iron age oppidum.
- We note that viewpoint E has been changed to run along the public footpath through the park. Whilst we agree that the footpath is an important view, views from higher up the hill are also important and should be retained as a viewpoint.

We are advocating for additional viewpoints to assist in understanding heritage impacts. Good Practice Advice Note 3 on the Setting of Heritage Assetsmakes it clear that *The contribution that setting makes to the significance of the asset does not depend on there being public rights or an ability to access or experience that setting'.* Moreover, it is also worth bearing in mind that Gorhambury Drive has permissive access for most of the year, enabling access to the EHT property at Old Gorhambury House and with part of its length even promoted as the Hertfordshire Way Recreational Route: https://www.gorhamburyestate.co.uk/gorhambury-drive/& https://www.english-heritage.org.uk/visit/places/old-gorhambury-house/.

**Map 12.1**

Once the other viewpoints listed above have been considered and assessed, the map should be amended to reflect these other viewpoints.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**DES6 – Building Heights**

We include the following commentary informed by our Client's Townscape and Heritage Advisors, Turley.

DES6 a) effectively creates a presumption of 'refusal unless' all criteria i. through iv. are satisfied. A more pragmatic approach would be that proposals are 'required to meet' a set of criteria, giving the presumption of approval if conditions can be met.

DES6 a) iii. Suggest wording changes to ' positively contributes to the existing roofscape…' this would be an improvement on the the current policy which encourages roof forms in keeping with locality, which has resulted in lots of modern mansards and very conservative design.

DES6 b) i. is incredibly restrictive when you consider the Building Height Control Area covers most of St Albans. This area has not changed since the 1994 plan. Could this not be reviewed with new evidence? The area incorporates the City Centre where there is an office core and increased height may well be appropriate subject to strong justification.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusions**

Our Client welcomes the preparation of the St Albans' new Local Plan, noting that those policies contained in the current adopted Local Plan (1994) are extremely outdated and do not accurately reflect current circumstances.

Our Client broadly supports the aspirations of the Plan, particularly that of prioritising residential development on previously developed sites, and ensuring the efficient use of such land in order to meet the significant housing need within the district. Our Client agrees this represents a sensible and effective way of providing much needed new homes in highly sustainable locations across the district which is otherwise constrained by Green Belt.

Nevertheless, our Client has significant concerns regarding specific policies of the Draft Local Plan. Most notably, our Client raises key concerns with the failure of the Draft Local Plan to identify Marlborough House as a site for future residential development. As discussed throughout this representation, Marlborough House represents an underutilised, highly accessible previously developed site, the comprehensive redevelopment of which to provide residential units would make a significant contribution towards meeting housing need within SACDC.

Furthermore, our Client contends that the Draft Local Plan are not legally sound and do not comply with the NPPF. Our Client has therefore made a number of recommendations, which if adopted would ensure consistency across the Draft Local Plan. Notably, our Client strongly contends that those policies within the Draft Local Plan must be sufficiently flexible in order to maximise the chances of meeting the significant housing need within the district. Failure to do so risks the Draft Local Plan stifling opportunities to meet housing need through the effective and efficient use of the highly sustainable brownfield sites.

Overall, it is concluded that in its current form the Draft Local Plan has areas of inconsistency, is not justified with appropriate evidence and is therefore at risk of not be legally compliant, and it is suggested that the Council take further review. We look forward to engaging further in the preparation of the St Albans Local Plan 2041.

## 365 - Pigeon Capital Management 4 Limited and the Gorhambury Estate

Submission Number: 365 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Ceres Property Name: Rory Baker

On Behalf Of Company/Organisation: Name: Pigeon Capital Management 4 Limited and the Gorhambury Estate

Comment Number: 1

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Please refer to Section 3 of the enclosed representation.

3 LOCAL POLICIES

Policy DES6 – Building Heights

3.1 The proposed Building Heights policy (DES6) in the St Albans Regulation 19 Draft Local Plan seeks to manage and control the development of taller buildings to protect the character, views, and heritage of the district, particularly in St Albans City. The policy is grounded in the importance of preserving the area's predominantly low-rise, suburban skyline, with special attention to iconic features such as St Albans Cathedral, which dominates the historic cityscape.

3.2 The supporting text for DES6 outlines the historic and visual significance of the city's roofscape and skyline, emphasising that St Albans City is situated on a hill adjacent to the Ver Valley, which provides significant long-distance views. Here, St Albans Cathedral, along with other key heritage landmarks, defines the city's silhouette, contributing to the St Albans Conservation Area's character.

3.3 The policy aims to ensure that any proposals for buildings taller than the surrounding structures are rigorously assessed to prevent negative impacts on the city's distinctive skyline.

3.4 The intention behind Policy DES6 and its supporting provisions is to carefully manage building heights in a way that preserves the unique historical and visual qualities of St Albans, preventing overdevelopment that could impact the City's cherished character. Through these controls, DES6 seeks to ensure that the City's growth remains sensitive to its heritage and visual prominence, balancing development with the conservation of views and landmarks that define the identity of St Albans.

3.5 Policy DES6 has been carried forward from the Regulation 18 Draft Local Plan and is predominantly the same policy wording but for some additional context. Figure 12.1: St Albans Building Height Control Area has also been carried forward and has been updated from the previous

of the draft local plan. Figure 12.1 however now has a greater zone of visibility now capturing all of the land east of the bridleway to Batchwood drive, that runs from the Batchwood drive northeast to Toulmin Drive.

3.6 Not only is there no evidence or explanation to justify why there is now a considerably greater land take that falls within the zone of visibility that will be subject to any development that comes forward and is assessed against Policy DES6, but Pigeon's concerns as set out within their representations to the Regulation 18 draft Local Plan that there appears to be no landscape led evidence based to justify these additional viewpoints and zones of visibility have not been addressed.

3.7 To reiterate, NPPF paragraph 35 requires plans to be justified based on proportionate evidence. However, SADC has still not published any evidence, such as a Landscape Character Assessment, to justify the location of these public viewpoints and associated zones of visibility or to explain why they are said to have any special quality.

3.8 The footpath is located to the north west of an existing heavily vegetated hedgerow and tree belt which prevents views from the footpath towards St Albans City. As such, there is no justification for the public viewpoints that are shown in Figure 12.1 as there are no views from the footpath.

3.9 The public viewpoints, and associated zones of visibility, to the north and west of the Site should therefore be removed from the PDLP.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Please refer to Section 3 of the enclosed representation.

3 LOCAL POLICIES

Policy DES6 – Building Heights

3.1 The proposed Building Heights policy (DES6) in the St Albans Regulation 19 Draft Local Plan seeks to manage and control the development of taller buildings to protect the character, views, and heritage of the district, particularly in St Albans City. The policy is grounded in the importance of preserving the area's predominantly low-rise, suburban skyline, with special attention to iconic features such as St Albans Cathedral, which dominates the historic cityscape.

3.2 The supporting text for DES6 outlines the historic and visual significance of the city's roofscape and skyline, emphasising that St Albans City is situated on a hill adjacent to the Ver Valley, which provides significant long-distance views. Here, St Albans Cathedral, along with other key heritage landmarks, defines the city's silhouette, contributing to the St Albans Conservation Area's character.

3.3 The policy aims to ensure that any proposals for buildings taller than the surrounding structures are rigorously assessed to prevent negative impacts on the city's distinctive skyline.

3.4 The intention behind Policy DES6 and its supporting provisions is to carefully manage building heights in a way that preserves the unique historical and visual qualities of St Albans, preventing overdevelopment that could impact the City's cherished character. Through these controls, DES6 seeks to ensure that the City's growth remains sensitive to its heritage and visual prominence, balancing development with the conservation of views and landmarks that define the identity of St Albans.

3.5 Policy DES6 has been carried forward from the Regulation 18 Draft Local Plan and is predominantly the same policy wording but for some additional context. **If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We consider it would be of benefit to discuss the potential need for modifications as set out within our representations with the Council, Examining Inspector(s), and other stakeholders in the hearing sessions.

## DES7 - Servicing of Development

### 83 - Affinity Water

Submission Number: 83 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Name: Lita Khazaka

On Behalf Of Company/Organisation: Name: Affinity Water

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Affinity Water broadly supports the council's overall approach to addressing the effects of climate change as it relates to water use. Policy SP2 provides an overall approach and Policy CE1 – Promoting Sustainable Design, Construction and Building Efficiency - seeks to introduce the optional standards under the Building Regulations (Part G) to reduce water consumption. Affinity Water specifically supports the use of a 110 litre per person per day standard consistent with the standard adopted in the London Plan 2021. The council's approach is consistent with the evidence on likely future water stress produced by the Environment Agency and our own research in our Water Resources Management Plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Draft Local Plan approach to water conservation would be improved and made more effective if were to set out how the council will ensure "greywater recycling and storage facilities" are delivered in all major developments as well as in Broad Locations (Policy LG1 – Broad Locations and Policies LG2, LG3 and LG4 which cover the Hemel Garden Communities project as well as other site allocations in Appendix 1) to go further than "water management" and to embrace "water conservation" too. The council is also invited to make specific reference to water conservation in the various design policies in the Draft Local Plan (for example, Policy DES1 – Design of New Development and Policy DES7 – Building Servicing). That way, water conservation and broader sustainability principles would be integrated into the design process from the outset in the same way that all new development is likely to have to design in and incorporate biodiversity net gain when the relevant parts of the Environment Act 2021 come into force.

Other councils are proposing more precise ways of directing developers to address the need to use water resources more efficiently. For example, the emerging Tower Hamlets Local Plan Policy CG6 specifically requires that: *All new major residential and non-residential development proposals must install water supply and drainage pipework suitable for the separate collection of rain, grey, and foul water as well as the distribution of non-potable water throughout the development from and to all relevant fitments. All major residential and non-residential refurbishment and change of use should aim to retrofit rain and greywater recycling systems.*

Affinity Water further urges the council to ensure that the development plan policy relating to water conservation is applied in all planning applications approved after the Local Plan's adoption so that it can be applied. This is because the 110 litre per person per day standard can only be currently applied at the Building Regulations stage of construction if it is included as a condition of the grant of planning permission.

Finally, it is suggested that the council include an appropriate measure on how the Local Plan will promote water conservation that can be monitored in future Authority Monitoring Reports. This could cover, for example, the number of major developments with greywater recycling and storage facilities or the number of planning permissions for new housing that have a planning condition that will secure the 110 litre per person per day water target. This would have wider benefits for the council as it seeks to articulate further its local response to the Climate Emergency. Table 3 (in attachment) identifies the defects in the policy relative to the NPPF's tests of soundness.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 241103 Reg 19 Final Submission_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Affinity Water may just prepare written representations once it has seen the inspector's proposed agenda. It is of course open to the council to incorporate Affinity Water's suggestion to make the policy more effective. This would avoid the need to appear in front of the inspector.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 291 - SEGRO (Radlett) Limited

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 21

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

8.1 Strategic Policy SP12 – High-Quality Design suggests that new development should *'respond positively to its context, be of high quality architecture and make efficient use of land'*.

8.2 Policy DES1 – Design of New Development sets out the parameters which new development should account for in order to achieve high quality design.

8.3 SEGRO (Radlett) Limited support the above policies in order to ensure that new development will positively respond to its surroundings, provide a high standard of amenity and ensure a high quality of architecture. These policies are consistent with national policy, notably the NPPF and National Design Guide, and are therefore considered sound and positively prepared.

8.4 Policy DES7 – Servicing of Development expects *'servicing needs of development should be considered at an early stage in the design process'*. The policy details how proposals are required to demonstrate compliance with refuse storage, cycle storage, parcel and deliveries and mechanical servicing and plant systems.

8.5 SEGRO (Radlett) Limited consider Policy DES7 to be an important part of the design process to ensure that new buildings will function appropriately for users. SEGRO (Radlett) Limited consider it to be justified and sound and are thus supportive of the policy.

**350 - Hill Residential**

Submission Number: 350 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: tor&co Name: Sophia Goodhead

On Behalf Of Company/Organisation: Hill Residential Name:

Comment Number: 21

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Policy DES7: Servicing of Development**

Part a) of the policy which relates to refuse storage should be amended to state that development will 'take account of County Council guidance'.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

## 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 11

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* Yes

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

Thank you for the opportunity to comment on the draft St Albans Local Plan.
HCC Public Health seeks to support District and Borough Council's in the development of their Local Plans by providing policy recommendations to ensure that Local Plans comply with national and local policy, whilst also improving the health and wellbeing of Hertfordshire residents.
National and Local Policy
The NPPF, in its planning objective 8b, sets out that the planning system has a social objective to support strong, vibrant, and healthy communities and to support communities' health and social wellbeing. This should be seen as an equal consideration to environmental and economic objectives. Paragraph 92 requires planning to aim to achieve healthy places which enable and support healthy lifestyles, especially where this would address identified local health and wellbeing needs (Para 92c).
The Hertfordshire Health and Wellbeing Strategy 2022 – 20265 sets out the vision and strategic priorities for improving health and wellbeing and reducing health inequalities in the County. This strategy outlines three key overarching ambitions and six themed strategic outcomes we are collectively aspiring to in Hertfordshire.
We recommend that Planning Officers refer to the Hertfordshire Health and Wellbeing Planning Guidance1, Public Health England's Spatial Planning for Health evidence resource2, the NHS England 'Putting Health into Place, 10 Principles' Guidance document 2019 and the TCPA's 'Planning for Healthy Places' guidance document 2024.
This sets out our expectation in terms of the delivery of healthy development and communities and focusses on the principle of 'designing in' health and wellbeing as an essential part of the planning process. In doing so, this recognises the wider determinants of health as a diverse range of social, economic, and environmental factors which influence people's mental and physical health.
Strategic Objective and Spatial Strategy

HCC Public Health are pleased to see that healthy places and high-quality design is included as an objective of the draft Local Plan. This objective reflects the Council's aspirations to improve health and wellbeing through the natural and built environment, which HCC Public Health fully supports.

In addition to this, we support the Spatial Strategy for the St Albans District, which promotes improving the quality and sustainability of new development, active travel, increasing tree planting, access to greenspaces, community infrastructure and renewable energy production; all of which will have a positive impact on health and wellbeing. To strengthen the Plan's Spatial Strategy, we recommend that the spatial strategy includes references to the detailed policies in the Plan which the spatial strategy supports, in accordance with the Town and Country Planning Association's Planning for Healthy Places Guidance (2024).

Health Impact Assessments

HCC Public Health recommend that a Health Impact Assessment (HIA) should be conducted during the preparation of a Local Plan to ensure that health and wellbeing are fully considered. Where it is not possible to conduct a standalone HIA, it is recommended that HIA guidance from Wales Health Impact Assessment Unit is used to expand upon the health elements of the Strategic Environmental Assessment (SEA) or Sustainability Appraisal. This will ensure that the draft Local Plan policies optimise health benefits.

We support draft Policy HW5, which requires HIA for major developments. We are pleased to see that the draft policy refers to our position statement for HIAs and the catchment requirements for an HIA is clearly defined. To strengthen this policy, we recommend that scope/key themes of the HIA should be included within the wording of the policy to ensure wider health impacts are considered. The key themes that should be included within the scope of the HIA are:

- Housing quality and design
- Access to healthcare services and other social infrastructure
- Access to open space and nature
- Air quality, noise, and neighbourhood amenity
- Accessibility and active travel
- Crime reduction and community safety
- Access to healthy food
- Access to work and training
- Social cohesion and lifetime neighbourhoods
- Minimising the use of resources
- Climate change

In addition to a HIA policy for major developments, A desktop HIA is recommended by HCC Public Health for new proposals for hot food takeaways in areas of high deprivation, poor health, elderly, or vulnerable groups, and/or high levels of childhood obesity. When this is the case, applicants are advised to complete a desktop HIA template in Appendix 8 of the HCC HIA Guidance and Toolkit 2023 and submit it alongside a planning application to the local authority in support of their planning application. Where an HIA has identified an issue that may have a significant adverse impact, the applicant should set out how this has been addressed and mitigated as part of the proposal.

We also recommend that the Local Plan should also have a policy which requires a HIA or an incorporated HIA into a sustainability appraisal for all planning policy documents to ensure that all policies and guidance optimise health and wellbeing benefits.

Air Quality

We support draft Policy HW1 – Air and Noise Pollution, which requires air and noise pollution assessments for developments located in areas which may exceed national legislative air quality limits. To strengthen this policy, we recommend the following should be included:

•

Enforcement of no development granted permission in an Air Quality Management Area.

•

considers unfavourably any applications for schools, care homes and other vulnerable communities that are within an AQMA or immediately adjacent to known traffic hotspots;

•

requires a detailed Air Pollution Modelling for Major developments to ensure that more mitigation, additional to the default for such developments, is required where 'adverse impacts' are predicted.

Access to Healthy Food

HCC Public Health support Strategic Policy SP13 – Health and Wellbeing which seeks to provide access to healthy foods, including through access to shops and food growing.

In terms of food growing, we have reviewed the draft Local Plan, and we feel that the Plan provides suitable policies to safeguard allotment spaces. The Strategic Policy protects existing allotments and considers that new developments should seek to create new allotments where appropriate. This Strategic Policy is strengthened through draft Policy NEB3 – Non-Designated Local Green Space which restricts loss of allotments unless suitable replacement for the allotments is provided, or evidence demonstrates that there is no need for the allotments. In addition, draft Policy LG3 – Hemel Garden Communities Growth Areas Place Principles includes the requirement for green infrastructure for food growing.

Turning to improving access to healthy food through the built environment, it is our opinion that the draft Local Plan does not have a policy which supports this. We recommend that the plan should include a policy on promoting healthy food environments to reduce obesity risk
and other forms of malnutrition. An example of well evidenced policies, supported by HCC's Public Health Team, include those which restrict and prevent the proliferation of hot food takeaways (HFTs) such as:

•

A limit on how many hot food takeaway units is located within a street in Town Centre or Local Centres; and

•

The introduction of a Hot Food Takeaway Management Zone restricting the introduction of new HFTs within 400 metres walking distance of the boundary of a nursery, primary school, secondary school, community college or youth facility. Hertfordshire County Councils Whole Systems Obesity Team has developed the Healthy Food Environmental Tool to assist Local Authority's to map the areas to be covered by a takeaway management zone policy: https://hcc-phei.shinyapps.io/healthy_food_environments/

The preferred policy recommended by HCC's Public Health team would be the introduction of takeaway outlet management zones which are the most common planning policy relating to improving food environments adopted by local authorities1 Evidence finds these policies to be effective in preventing the proliferation of HFTs within these areas as well as bringing health benefits to the local communities in which they are implemented23. Further research also identifies that takeaway management zones are associated with net economic benefits for local authorities, national government, and the NHS. This is due to the relatively low economic contribution of takeaways to the high street in comparison to the higher economic contribution of potential alternative uses in addition to cost savings associated with a reduced burden of BMI-related diseases4.

St Albans National Child Measurement Programme data5 (3 years data combined, 2020/21 – 22/23) for prevalence of children living with overweight/obesity in reception (17.26%) and year 6 (23.45) are favourable in comparison to the Hertfordshire averages (19.26% and 31.11% respectively). Just 4 of 20 electoral wards (Colney Heath, Cunningham, Park Street and Redbourn) had a prevalence of reception aged children living with overweight (including obesity) greater than the Hertfordshire average (19.26%). Similarly, just 4 of 20 electoral wards (London Colney, Cunningham, Sopwell, Park Street) had a prevalence of year 6 aged children living with overweight (including obesity) greater than the Hertfordshire average (31.11%).

However, some electoral wards in St Albans have a relatively high density of existing fast-food outlets with St Peters (2.37 outlets per 1000 of the population), Harpenden West (1.7 outlets per 1000 of the population), Sopwell (1.04 outlets per 100 of the population) in

1 Public health England. Using the planning system to promote healthy weight environments. Published February 7 2020. Accessed July 8th, 2024. https://assets.publishing.service.gov.uk/media/5e3ae462400b6091732cc3/PHE_Planning_healthy_weight_environments_guidance__1_.pdf

2 Rahilly et al. 2024. Changes in the number of new takeaway food outlets associated with adoption of management zones around schools: a natural evaluation in England.

3 Rogers et al. 2024. Health impacts of takeaway management zones around schools in six different local authorities across England: a public health modelling study using PRIMEtime.

4 Derbyshire, D.W., et al., The economic impacts of Local Authority takeaway management zones around schools. Social Science Research network, 2024 (pre-print).

5 Department of Health & Social Care, (2024). Obesity Profile. https://fingertips.phe.org.uk/profile/national-child-measurement-programme/data#page/3/gid/1938133228/pat/6/par/E07000240/ati/15/are/E06000015/iid/90319/age/201/sex/4/cat/-1/ctp/-1/yrr/1/cid/4/tbm/1 Accessed: 10 October 2024

comparison to the Hertfordshire average (0.86 outlets per 1000 of the population). Large numbers of these outlets are typically located in the wards surrounding the city centre with St Peters (0.98 minutes), Clarence (1.55 minutes) and Sopwell (1.73 minutes) being the 3 electoral wards with the shortest average distances residents must travel by car to reach a fast-food outlet.

The wards surrounding St Albans City centre also contain many primary and secondary schools (Appendix 1). Of the 9 secondary schools within the area highlighted in Appendix 1, 4 (44.44%) had at least 1 HFT within a 400-metre radius of the school site. Of the 18 Primary schools, 13 (72.22%) had at least 1 HFT within a 400-metre radius of the school site. This emphasises the existing high exposure to HFTs currently experienced by children in this area of the district.

Whilst current childhood overweight and obesity statistics generally appear favourable, the introduction of policies such as those recommended above would work preventatively, alongside other interventions, to ensure health does not worsen in the District. Justification for the implementation of a HFT management zone surrounding schools is strongest in the wards surrounding St Albans City Centre due to the existing high exposure to HFTs experienced by children in this area.

Housing and development design

HCC Public Health support Strategic Policy SP4 -Housing which seeks to provide good quality housing that meets different needs, including the provision of specialist housing for older people and people with disabilities. This policy also requires developments to provide new accessible and adaptable housing to meet the changing lifestyle needs of all occupants.

We recommend that all new housing for older people of any tenure should be built to accessible and sustainable standards, conforming to HAPPI design standards6, be digitally enabled for assistive and other technology, and encourage developers to build to energy efficient and carbon neutral specifications, and thus promoting accessible, adaptable, and dementia friendly design.

In addition to the above, all new housing for older people should investigate options such as PassivHaus and other eco-build designs for specialist older persons housing, to reduce thermal variances and the associated costs, and assist in preventing poor health outcomes in older people.

The development should contribute to the priorities regarding public health and the built environment as set out in the Housing for Older People Strategy. They should be considered during the design stage and consideration of how they have been considered should be included in a planning application e.g. as part of the Health Impact Assessment or Design and Access Statement.
6 https://www.housinglin.org.uk/Topics/browse/Design-building/HAPPI
Community spaces and open spaces
HCC Public Health recommend that JSNA data should be used at the locality level to identify community needs. We support the Local Plan's objective of providing community infrastructure in sustainable locations.
We support draft Policy SP13 – Health and Wellbeing which seeks to encourage designs that reduce community severance and improve opportunities for social interaction. In addition, this policy requires major developments to provide appropriate public open space, including a children's play space.
We support draft Policy LG4 -Large, Medium and Small Sites which requires developments to provide contributions towards enhancing open spaces. We also support draft Policy NEB12 which sets out green space standards for the creation of new green spaces.
Draft Policy SP7 -Community Infrastructure seeks to support and protect existing community infrastructure. This policy also seeks to safeguard existing sport facilities by only permitted development on these facilities if the development is for an alternative sport and recreational provision and the needs for which outweigh the loss. We support this policy to protect existing sport facilities and draft Policy NEB12, which provides guidance on how to determine sport pitch provision requirements for new housing developments.
We are pleased to see that the Plan includes a policy on Public Space (draft Policy DES2) which provides design requirements for public spaces. We are satisfied that this policy will help deliver safe, well maintained, and attractive places that will encourage social interaction, civic engagement, and recreation.
In terms of greenspaces, we are pleased to see a policy safeguarding Local Green Spaces in the St Albans Local Plan.
Healthy Streets
HCC Public Health recommend planning authorities should include a policy in the Local Plan which requires developments to:
• include the Healthy Streets approach and its 10 evidence-based Healthy Streets Indicators, which focus on creating healthier places for people to live in:
1) Everyone feels welcome 2) Easy to cross
3) Shade and shelter
4) Places to stop and rest
5) Not too noisy
6) People choose to walk and cycle
7) People feel safe
8) Things to see and do
9) People feel relaxed
10) Clean air
• Prioritise and balance the ten Healthy Streets Indicators to improve social, economic, and environmental sustainability through how streets are designed and managed.
• Establish expectations from the start, with this approach so new developments have clearer air, provide opportunities for cycling and walking and help make communities green, healthier, and more attractive places, so there is a low noise environment, a relaxing environment where people can spend time and have the opportunity to be physical active every day, as part of their everyday routine.
•

With use of a range of free tools for measuring the Healthy Streets Indicators, Developers, designers and engineers can quantify how street designs affect the 10 Healthy Streets Indicators and generate a quantified score for an existing street or a plan. Other available tools such as the new Development Check can be used in the early stages of planning new streets to ensure the development maximises its Healthy Streets potential.

•

Healthy Streets | Making streets healthy places for everyone

Active Design

HCC Public Health are pleased to see that the draft Local Plan seeks to maximise opportunities for encouraging physical activity by referring to Sport England's and Public Health England's Active Design guidance in draft Policy SP13: https://www.sportengland.org/how-we-can-help/facilities-and-planning/design-and-cost-guidance/active-design. We recommend the checklist in the Active Design guidance should be used for informing the design and consideration of the planning application e.g., as part of the Health Impact Assessment or Design and Access Statement. The planning authority may wish to consider this by way of a condition to request details to be submitted and approved which demonstrate how promoting physical activity has been considered in the design and layout of the development.

Movement and access

HCC Public Health support Strategic Policy SP8 – Transport Strategy, which prioritises active and sustainable transport modes and restrictions on car journeys. We are pleased to see that this policy refers to the HCC Travel Plan Guidance which requires developments to submit a travel plan to embed sustainable and active travel at an early stage of the design process. This policy also requires developments to be in sustainable locations with provision for walking and cycling.

Draft Policy TRA4 -Parking, provides parking standards for new developments. This policy supports active travel in numerous ways. First, it provides a requirement for bicycle parking to encourage more people to cycle instead of drive. It also states new development at Broad Locations should demonstrate alternatives to car use to reduce car parking spaces. This policy also supports car clubs to reduce private car parking spaces, bike share schemes and
electric vehicle charging points in new developments. We support this policy as this will have a positive impact on residents' health and wellbeing by supporting active travel over private car use.

Local economy and employment

We recommend planning authorities to include a policy in the Local Plan that sets out an expectation that new development will provide inclusive, non-car reliant, means of access between employment zones, new communities, and public transport hub.

HCC Public Health recommend new commercial/business/industrial zones or town centre regeneration to provide accessible, inclusive, safe, well maintained, and sustainable infrastructure for non-car users.

Quality local space, play and recreation

We are pleased to see that the draft Local Plan seeks to preserve existing urban and rural green space/ green infrastructure and enhancement, or creation of new areas are developed to encourage public access through draft Strategic Policy SP10 and draft policies NEB2, NEB3, NEB4, NEB6 and NEB10.

We support the Plan's landscape-led approach to retain and enhance existing green infrastructure in new developments. We recommend that there should be an expectation on developers that the provision of open space and green infrastructure should come forward at an early stage of development to encourage healthy, sustainable behaviours from the outset.

Conclusion

HCC Public Health is pleased to see a variety of health-related policies embedded in the St Albans draft Local Plan. It is clear to see that the Planning Officers have a good understanding of how the planning system can positively shape our environments to improve health inequalities through Local Plans. The recommendations provided above will help strengthen the proposed draft policies to achieve the Plan's objective of creating healthy places. If you would like to discuss the points

## 368 - Gee Smedley

Submission Number: 368 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Save North St Albans Greenbelt Name: Gee Smedley

Comment Number: 6

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

The inclusion of air quality and noise assessments is welcomed.

1. There is no data provided in the site selection for air quality, air pollution or noise assessment.
2. New technologies and data sources are available to provide close to real time data on the issues and some is published by Central Government.

Ref "*Strategic Policy SP13 – Health and Wellbeing"*

1. *a) Improved walking and cycle infrastructure to allow people to move around more easily using*
   *active modes of travel, so reducing air pollution and increasing levels of everyday exercise;*

Policy SP13 is admirable. But when the majority of traffic passing along a road is from outside the walking or cycling catchment area, as it is on the A1081 adjacent to site B1 "North St Albans", it is clear that these aspirations are not deliverable on all sites.

We have already asked in both this consultation and at the Planning Policy & Climate Committee meeting on September 12th 2023, as a follow up questions to the Committee, why there has been no traffic data modelling or monitoring evidence provided?

There are only "Air Quality in England" (AQE) sensors at three locations in St Albans. St Albans Holywell Hill (sensor) Annual Statistics - Air Quality monitoring service (airqualityengland.co.uk)Hollywell Hill, Verulam Road and Folley Lane. None of the major tributary A roads have AQE sensors.

The Defra Air Quality Viewer only looks at existing Air Quality Management Areas.Local Authority Details - Defra, UK

Any evidence submitted on air quality is of great importance and carries substantial weight under the NPPF and High Court case law. Openly available air quality assessment tools are sound evidence and carrying a high level of accuracy. They can and should be used to gather local evidence.

New online application www.addresspollution.orgwas accepted by Inspector Boniface as evidence in the Planning Inquiry at the recent SADC Chiswell Green appeals, which have now been recovered by the Secretary of State.

Use of the tool using postcodes in B1, “North St Albans” confirms the issues of already poor air quality along the A1081 corridor and must not be simply discounted.

Extract from terms and conditions at AddressPollution.org

- "AddressPollution.org is now one of the most awarded environmental campaigns worldwide.

- In the summer of 2022 it received United Nations accreditation becoming a UNESCO Green Citizens project. It has now landed front page national news 3 times, been featured in more than 570 pieces of national and international press, whilst changing the property sector for good, turning home owners and estate agents into budding environmentalists."

Figure 16 [see attached file], shows the level of Air Pollution, using the postcode of St Albans Girls School: AL3 6DD

Application 5/2021/0423 which forms part of the site B1 “North St Albans” failed to assess air quality and approval was given against the evidence provided by the developers own Air Quality Assessment report.

a. The air quality report by Hawkins Environmental as part of application 5/2021/0423, corroborates the data gathered by addresspollution.org, and shows the area already has low air quality, with high levels of the worst pollutants in the categories of PM10 and PM2.5 at the test sites on Harpenden Road and Sandridgebury Lane.

1. The reference to monitors at other locations in St Albans is not relevant to this application as the pollutants are localised. It is not clear what height the sensors were located and for the exact duration.
2. The proposal of a cycle lane linking down to the major traffic lights at The Ancient Briton junction is an important part of the sustainability of the site, but the current design is flawed and will not provide a safe cycling experience, thereby deterring users. Thus it will do little to mitigate the air quality as the likelihood of the application site being substantially served by bicycle is very low. There have been many representations by local cyclists and cycling groups on the issues with design of the cycle lane.
3. Walking routes for children attending local schools from the application site, will mainly be along the Harpenden Road and Sandridgebury Lane, both identified as having the highest levels of pollution in the area, based on the data presented. Having no mitigation strategy for this level of air pollution is not consistent with national or regional policies. These locations and pollution levels were not assessed in the recent Council Air Quality Action Plan.
4. The conclusion of the report infers there would be little additional impact on already poor air quality and essentially states that because it is very bad already, the incremental change will have a small proportional impact. This should not be interpreted as a positive. It is another factor to show the lack of sustainability of this site. The Council has a statutory duty to limit and reduce poor air quality.

There is no reference to how noise pollution will be monitored. Is this another example of when there is no evidence base?

**Important areas:**

FAQs.pdf (extrium.co.uk)

Figure 17 [see attached file] shows Extium/Defra Important Areas. What are Important Areas? Noise Important Areas (IAs) for roads and railways are based upon the strategic noise maps results and have been produced in line with the requirements set out in the noise action plans. The IAs highlight “hotspot” locations where the highest 1% of noise levels at residential locations can be

found. In accordance with the noise action plans, the IAs provide a framework for further investigation. You can see an Important Area hotspot on the A1081 between the Texaco Garage and Sandridgebury Lane. This runs exactly parallel to the main site.

Given the extent of the rail noise pollution from the Thameslink line, which is significantly higher that the surrounding landscape built on a bunt with a bank structure underneath, we do not believe there are any current construction techniques that could mitigate for the railway noise. No green noise limiting features can be grow as Network Rail has an aggressive tree management policy that removes all trees that have the potential to cause leaves, branches or trunks on the railway line.

## Strategic Policy SP13 - Health and Wellbeing

### 68 - NHS Property Services Ltd

Submission Number: 68 Submission Date: 05/11/24 10:48

Respondent: Company/Organisation: NHS Property Services Ltd Name: Miss Ellen Moore

On Behalf Of Company/Organisation: NHS Property Services Ltd Name:

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Draft Policy SP13 sets out the Council's commitment to making sure that new developments promote healthier lifestyles and improve overall health and wellbeing. We thank the Council for the amends made to this Policy since Regulation 18 stage. NHSPS welcomes and supports the inclusion of policies that support healthy lifestyles. There is a well-established connection between planning and health, and the planning system has an important role in creating healthy communities. The planning system is critical not only to the provision of improved health services and infrastructure by enabling health providers to meet changing healthcare needs, but also to addressing the wider determinants of health.

NHSPS considers Policy SP13 sound as currently drafted.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

N/A

NHSPS considers Policy SP13 sound as currently drafted.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**149 - Mr Roy Warren**

Submission Number: 149 Submission Date: 07/11/24 11:48

Respondent: Company/Organisation: Sport England Name: Mr Roy Warren

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The policy is supported as it seeks to address health inequalities and encourage a healthy lifestyle including encouraging sport and physical activity. Reference to promoting Active Design in major developments criterion (h) is particularly welcomed in this regard. The policy is considered to accord with Government policy in paragraph 96(c) of the NPPF and Sport England's 'Uniting the Movement' Strategy https://www.sportengland.org/about-us/uniting-movement.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

### 229 - Brian Worrell

Submission Number: 229 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: British Horse Society Herts Name: Brian Worrell

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Strategic Policy SP13 – Health and Wellbeing

1. p) Supporting the value of equestrian activities and associated infrastructure.

**Comment** Engagement with horses, whether ridden or driven, improves health and wellbeing physically and mentally. Many equestrians are older residents, particularly carriage drivers. Also statistics show that whilst cyclists are predominantly male, horse riders and drivers are predominantly women. Another reason to fully support equestrians.

### 291 - SEGRO (Radlett) Limited

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 15

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

9.1 Strategic Policy SP13 – Health and Wellbeing aims to *'improve people's health and wellbeing and encourage them to adopt a healthy lifestyle'* which will be *'sought through relevant policies throughout this Plan'* related to improved sustainable transport infrastructure, provision of green space and reducing the dominance of the car.

9.2 The SRFI aligns with Policy SP13 by encouraging the transfer of freight from road to rail, improving local transport connections and provision of the publicly accessible Country Park. As discussed in paragraph 6.12 of these representations, the TFMMP secured through Condition 9 of the outline planning permission will encourage a reduction in car journeys and will ensure the SRFI is served by a range of sustainable transport modes including walking, cycling, buses, trains. The Country Park is also an important part of the SRFI which will deliver extensive open space and woodland that will be accessible and beneficial for the local community. Furthermore, Area 2 of the Development Site will be similar in appearance and character to the Country Park with the provision of green space adjacent to the development platform accommodating the rail terminal and associated B8 floorspace.

9.3 Overall, SEGRO (Radlett) Limited are supportive of Policy SP13 considering its conformity with national policy and its soundness based on the objective of promoting healthy and sustainable communities.

### 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 24

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Access to Healthy Food
HCC Public Health support Strategic Policy SP13 – Health and Wellbeing which seeks to provide access to healthy foods, including through access to shops and food growing.
In terms of food growing, we have reviewed the draft Local Plan, and we feel that the Plan provides suitable policies to safeguard allotment spaces. The Strategic Policy protects existing allotments and considers that new developments should seek to create new allotments where appropriate. This Strategic Policy is strengthened through draft Policy NEB3 – Non-Designated Local Green

Space which restricts loss of allotments unless suitable replacement for the allotments is provided, or evidence demonstrates that there is no need for the allotments. In addition, draft Policy LG3 – Hemel Garden Communities Growth Areas Place Principles includes the requirement for green infrastructure for food growing.

Turning to improving access to healthy food through the built environment, it is our opinion that the draft Local Plan does not have a policy which supports this. We recommend that the plan should include a policy on promoting healthy food environments to reduce obesity risk
and other forms of malnutrition. An example of well evidenced policies, supported by HCC's Public Health Team, include those which restrict and prevent the proliferation of hot food takeaways (HFTs) such as:

•

A limit on how many hot food takeaway units is located within a street in Town Centre or Local Centres; and The introduction of a Hot Food Takeaway Management Zone restricting the introduction of new HFTs within 400 metres walking distance of the boundary of a nursery, primary school, secondary school, community college or youth facility.

HCC's Whole Systems Obesity Team has developed the Healthy Food Environmental Tool to assist Local Authority's to map the areas to be covered by a takeaway management zone policy: https://hcc-phei.shinyapps.io/healthy_food_environments/

The preferred policy recommended by HCC's Public Health team would be the introduction of takeaway outlet management zones which are the most common planning policy relating to improving food environments adopted by local authorities1 Evidence finds these policies to be effective in preventing the proliferation of HFTs within these areas as well as bringing health benefits to the local communities in which they are implemented23. Further research also identifies that takeaway management zones are associated with net economic benefits for local authorities, national government, and the NHS. This is due to the relatively low economic contribution of takeaways to the high street in comparison to the higher economic contribution of potential alternative uses in addition to cost savings associated with a reduced burden of BMI-related diseases4.

St Albans National Child Measurement Programme data5 (3 years data combined, 2020/21 – 22/23) for prevalence of children living with overweight/obesity in reception (17.26%) and year 6 (23.45) are favourable in comparison to the Hertfordshire averages (19.26% and 31.11% respectively). Just 4 of 20 electoral wards (Colney Heath, Cunningham, Park Street and Redbourn) had a prevalence of reception aged children living with overweight (including obesity) greater than the Hertfordshire average (19.26%). Similarly, just 4 of 20 electoral wards (London Colney, Cunningham, Sopwell, Park Street) had a prevalence of year 6 aged children living with overweight (including obesity) greater than the Hertfordshire average (31.11%).

However, some electoral wards in St Albans have a relatively high density of existing fast-food outlets with St Peters (2.37 outlets per 1000 of the population), Harpenden West (1.7 outlets per 1000 of the population), Sopwell (1.04 outlets per 100 of the population) in comparison to the Hertfordshire average (0.86 outlets per 1000 of the population). Large numbers of these outlets are typically located in the wards surrounding the city centre with St Peters (0.98 minutes), Clarence (1.55 minutes) and Sopwell (1.73 minutes) being the 3 electoral wards with the shortest average distances residents must travel by car to reach a fast-food outlet.

The wards surrounding St Albans City centre also contain many primary and secondary schools (Appendix 1). Of the 9 secondary schools within the area highlighted in Appendix 1, 4 (44.44%) had at least 1 HFT within a 400-metre radius of the school site. Of the 18 Primary schools, 13 (72.22%) had at least 1 HFT within a 400-metre radius of the school site. This emphasises the existing high exposure to HFTs currently experienced by children in this area of the district.

Whilst current childhood overweight and obesity statistics generally appear favourable, the introduction of policies such as those recommended above would work preventatively, alongside other interventions, to ensure health does not worsen in the District. Justification for the

implementation of a HFT management zone surrounding schools is strongest in the wards surrounding St Albans City Centre due to the existing high exposure to HFTs experienced by children in this area.

We support draft Policy SP13 – Health and Wellbeing which seeks to encourage designs that reduce community severance and improve opportunities for social interaction. In addition, this policy requires major developments to provide appropriate public open space, including a children's play space.

Active Design
HCC Public Health are pleased to see that the draft Local Plan seeks to maximise opportunities for encouraging physical activity by referring to Sport England's and Public Health England's Active Design guidance in draft Policy SP13: https://www.sportengland.org/how-we-can-help/facilities-and-planning/design-and-cost-guidance/active-design. We recommend the checklist in the Active Design guidance should be used for informing the design and consideration of the planning application e.g., as part of the Health Impact Assessment or Design and Access Statement. The planning authority may wish to consider this by way of a condition to request details to be submitted and approved which demonstrate how promoting physical activity has been considered in the design and layout of the development.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## HW1 - Air and Noise Pollution

### 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 23

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Air Quality
We support draft Policy HW1 – Air and Noise Pollution, which requires air and noise pollution assessments for developments located in areas which may exceed national legislative air quality limits. To strengthen this policy, we recommend the following should be included:

•
Enforcement of no development granted permission in an Air Quality Management Area.

•
considers unfavourably any applications for schools, care homes and other vulnerable communities that are within an AQMA or immediately adjacent to known traffic hotspots;

•
requires a detailed Air Pollution Modelling for Major developments to ensure that more mitigation, additional to the default for such developments, is required where ‘adverse impacts’ are predicted.

**359 - Betsy Brown**

Submission Number: 359 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Natural England Name: Betsy Brown

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We have some comments in relation to air quality and the need to consider air pollution issues on the natural environment, both in the Core Policy for Air Quality, and in relation to policies TRA3 (Development Generating New Lorry Movements) and Strategic policy SP8 (Transport Strategy). It is important that in addition to human health, environmental considerations including air quality impacts on air quality sensitive protected sites are included in policy wording.

...

Policy HW1 –Air and Noise Pollution

The Policy on air quality should be expanded to include reference to air pollution impacts on the natural environment and relevant protected sites. Employment and residential allocations have the potential to increase Annual Average Daily Traffic (AADT) on roads within 200m of protected sites. Air quality impacts should be assessed at the Local Plan stage, rather than individual planning applications, as the outcome of assessment may result in a change to site allocations within the draft St Albans Local Plan.

Natural England's report on the assessment of road traffic emissions (NE001) should be followed when assessing road traffic emissions. Roads within 200m of protected sites should be modelled and assessed in relation to site allocations, prior to inclusion of site allocations in the submission version of the St Albans Local Plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Policy on air quality should be expanded to include reference to air pollution impacts on the natural environment and relevant protected sites.

## HW3 - Contaminated Land

### 361 - Mohammad Ahmed

Submission Number: 361 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: The Environment Agency Name: Mohammad Ahmed

Comment Number: 14

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**HW3: Contaminated Land**

We welcome the inclusion of this new policy on contaminated land. We note that it may be helpful to indicate the direction of the groundwater pollution emanating from St Leonard's Court as has been included for Buncefield. This is approximately eastwards.

We also recommend the inclusion of 'with infiltration drainage or losing **or damaging** monitoring infrastructure' in the text related to Sandridge, St Leonard's Court.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. EA Response - St Albans Local Plan (Reg 19)_[R].pdf

## HW4 - Groundwater Pollution

### 83 - Affinity Water

Submission Number: 83 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Name: Lita Khazaka

On Behalf Of Company/Organisation: Name: Affinity Water

Comment Number: 13

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Affinity Water supports the council's decision to insert a new Policy HW4 - Groundwater Pollution in this Regulation 19 draft version of the Local Plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

This policy would be improved in its application if the DEFRA Magic Source Protection Zone maps (for Zones 1 and 2) could be overlayed onto the final Policies Map especially if and when the council publishes a digitised version online as a tool to help developers conducting due diligence of potential development sites.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

## 361 - Mohammad Ahmed

Submission Number: 361 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: The Environment Agency Name: Mohammad Ahmed

Comment Number: 15

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**HW3: Groundwater Pollution**

We welcome the inclusion of this new policy on groundwater pollution and quality. We note that there appears to be a typing error in the text of the second paragraph: 'Development must take account of the relevant Source advice with regards to the Protection Zone that it lies within', we believe this should be:

Development must take account of the relevant Source advice with regards to the **Source** Protection Zone that it lies within.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## HW5 - Health Impact Assessments

### 4 - Mr John A Smith

Submission Number: 4 Submission Date: 02/10/24 16:46

Respondent: Company/Organisation: Name: Mr John A Smith

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The University of Hertfordshire, Smart Mobility Unit, produced a report in September 2023 on "Transport In Harpenden". It is publicly available and here are some extracts, which make grim reading:
"Traffic levels in Hertfordshire as a whole are among the highest in Britain, at 6.6 billion vehicle miles in 2021, around 55,230 miles per head. It is not surprising, therefore, that prosperous places like Harpenden see relatively high traffic levels and consequent congestion, and official maps show Harpenden as one of the county's congestion hotspots. Car ownership in Hertfordshire is 1.38 per household (against the England average of 1.16)."
"It is important to note that the problems of transport and traffic in Harpenden have a wide range of impacts – congestion and delays are just the most noticeable issues. Motor vehicles produce pollution from their exhausts, and also from their brakes and tyres. There are internationally set, by the World Health Organisation, standards for air quality with limits to the pollutants, which aim to reduce the health impacts. **However, in Harpenden, the air quality in some streets breaches these limits. For example, in Church Green, in the centre of town, the air quality breaches THREE WHO limits and is in the 67th percentile nationally, i.e. in the top third nationally for pollution." SADC and Harpenden Town Council are aware of this but have done nothing about it.**
Additional housing in and around Harpenden is bound to exacerbate the problem through more traffic and will probably extend the polluted areas. The residents of Harpenden are exposed to dangerous levels of pollution that may create breathing difficulties, particularly for those with existing problems, like asthma, or those with babies or infants. What mitigations will be put in place by SADC and will they put up warnings for the health and wellbeing of their constituents?

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

There is no simple answer other than to reduce the traffic flow through Harpenden.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

I want to hear how the SADC are going to protect the health and wellbeing of the people of Harpenden whilst facilitating increased vehicular traffic through the narrow streets of Harpenden, particularly the High Street, which is already breaching three WHO pollution limits.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

Draft Policy HW5 sets out the Council's commitment to making sure that new developments promote healthier lifestyles and improve overall health and wellbeing. NHSPS welcomes and supports the inclusion of policies that support healthy lifestyles, and the requirement for Health Impact Assessment on significant residential developments of 100 units or more. There is a well-established connection between planning and health, and the planning system has an important role in creating healthy communities. The planning system is critical not only to the provision of improved health services and infrastructure by enabling health providers to meet changing healthcare needs, but also to addressing the wider determinants of health.

NHSPS considers Policy HW5 sound as currently drafted.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. ### 150 - Mr Roy Warren

Submission Number: 150 Submission Date: 07/11/24 11:58

Respondent: Company/Organisation: Sport England Name: Mr Roy Warren

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The policy is broadly supported because it requires major developments to prepare health impact assessments and mitigate against any identified impacts which would include consideration of physical activity opportunities. The reference to Hertfordshire County Council's HIA Guidance and Toolkit is welcomed for further information is also welcomed.

Sport England supports the representations made by Hertfordshire County Council relating to the scope and key themes of HIAs (which include access to open space and active travel.) being included in the policy wording to ensure that wider health impacts are considered when preparing HIAs.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

---

### 291 - SEGRO (Radlett) Limited

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 22

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

9.4 Policy HW5 – Health Impact Assessments states that *'Health Impacts Assessments are required for proposals that may have an adverse impact on the immediate area and affect people living in the development and close by'*. More specifically, the policy suggests that Health Impact Assessments (HIAs) should be provided as part of a planning application for *'major transport infrastructure improvements, including the Government permitted Strategic Rail Freight Interchange'*.

9.5 Whilst the merits of an HIA are fully acknowledged, the above policy wording should be amended to remove reference to the SRFI as the development has full planning permission and has been implemented. In the event where amendments to the approved scheme are required, which meet the threshold requiring an HIA to be undertaken, this would be assessed at the appropriate time. However, to avoid confusion and ensure the policy is justified and effective, the SRFI reference should be omitted.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**HW5 –Health Impact Assessments**

*"Health Impacts Assessments are required for proposals that may have an adverse impact on the immediate area and affect people living in the development and close by. More specifically, Health Impact Assessments should be provided as part of certain planning applications in accordance with the latest Hertfordshire County Council Position Statement, and in line with the local Health Impact Assessment methodology set out in Hertfordshire County Council's Health Impact Assessment Guidance and Toolkit document.*

*A Health Impact Assessment must be submitted for the following types of applications:*

1. *a) Residential proposals of 100 dwellings or more (however this threshold may be reduced depending on the nature and scale of the development);*
    1. *Major transport infrastructure improvements, including major new roads or major new junctions, existing rail networks, rail stations,and the proposed Hertfordshire Essex Rapid Transit (HERT);*
    2. *Any other locally or nationally significant infrastructure project;*
    3. *Landfill, waste treatment and management facilities, major composting facilities, anaerobic digesters, new minerals workings and aggregate depots, other permanent infrastructure such as coated stone plants or ready mix plants and recycling centres;*
    4. *Developments subject to an Environmental Impact Assessment; and*
    5. *Non-residential developments of over 1,000 square metres.*
2. *Where a Health Impact Assessment has identified an issue that may have a significant adverse impact, the applicant should set out how this will be addressed and mitigated as part of the proposal."*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 40

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* Yes

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

We support draft Policy HW5, which requires HIA for major developments. We are pleased to see that the draft policy refers to our position statement for HIAs and the catchment requirements for an HIA is clearly defined. To strengthen this policy, we recommend that scope/key themes of the HIA should be included within the wording of the policy to ensure wider health impacts are considered. The key themes that should be included within the scope of the HIA are:

- Housing quality and design
- Access to healthcare services and other social infrastructure
- Access to open space and nature
- Air quality, noise, and neighbourhood amenity
- Accessibility and active travel
- Crime reduction and community safety
- Access to healthy food
- Access to work and training
- Social cohesion and lifetime neighbourhoods
- Minimising the use of resources

•
Climate change
In addition to a HIA policy for major developments, A desktop HIA is recommended by HCC Public Health for new proposals for hot food takeaways in areas of high deprivation, poor health, elderly, or vulnerable groups, and/or high levels of childhood obesity. When this is the case, applicants are advised to complete a desktop HIA template in Appendix 8 of the HCC HIA Guidance and Toolkit 2023 and submit it alongside a planning application to the local authority in support of their planning application. Where an HIA has identified an issue that may have a significant adverse impact, the applicant should set out how this has been addressed and mitigated as part of the proposal.
We also recommend that the Local Plan should also have a policy which requires a HIA or an incorporated HIA into a sustainability appraisal for all planning policy documents to ensure that all policies and guidance optimise health and wellbeing benefits.

On Behalf Of Company/Organisation: LIH Name:

Comment Number: 8

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**9.0 Infrastructure Delivery Plan (IDP)**

- Introduction

9.1. Before reviewing the Infrastructure Delivery Plan (IDP) (September 2024) in detail, we make the
following general observations about the importance of planning positively for infrastructure and ensuring that delivery of such is an integral feature of plan making.

9.2. The NPPF (2023) makes it clear that in strategic plan making, strategic polices should look to make

sufficient provision for infrastructure (paragraph 20) and look to a minimum 15-year period from adoption to "*anticipate and respond to long-term requirements and opportunities, such as those arising from major improvements in infrastructure*" (paragraph 21), and the need to determine where infrastructure is needed (paragraph 27) and to positively prepare plans on this basis.

9.3. Paragraph 11 of the NPPF (2023) emphasises the need for growth to be aligned with infrastructure

requirements.

9.4. This is further enhanced through the draft NPPF (2024), with paragraph 24 amendments reading:

"*Effective strategic planning across local planning authority boundaries will play a vital and increasing role in how sustainable growth is delivered and key spatial issues, including meeting housing needs, delivering strategic infrastructure, and building economic and climate resilience, are addressed. Local planning authorities and county councils (in two-tier areas) are continue to be under a DtC with each other, and with other prescribed bodies, on strategic matters that cross administrative boundaries...*"

9.5. New paragraph 27 states:

"*27. Once the matters which require collaboration have been identified, strategic policy-making authorities should make sure that their plan policies are consistent with those of other bodies where a strategic relationship exists on these matters, and with the relevant investment plans of infrastructure providers, unless there is a clear justification to the contrary. In particular their plans should ensure that:*

1. *a consistent approach is taken to planning the delivery of major infrastructure, such as major transport services/projects, utilities, waste, minerals, environmental improvement and resilience, and strategic health, education and social infrastructure (such as hospitals, universities, major schools, major sports facilities and criminal justice accommodation);*
2. *unmet development needs from neighbouring areas are accommodated in accordance with paragraph 11b; and*
3. *any allocation or designation which cuts across the boundary of plan areas, or has significant implications for neighbouring areas, is appropriately managed by all relevant authorities*...."

9.6. Following review, we have several concerns about the IDP (2023) expressed at Regulation 18 stage. We

reiterate some of these aspects in conjunction with providing an assessment of the IDP (2024). The IDP (2024) we assert is misguided as to the issues raised in respect of the IDP (2023) which have not been addressed to regularise the assumptions on which the IDP (2024) is predicated. This leads to flawed conclusions which are not fully effective or justified.

9.7. The IDP (2023) in assessing a spatial distribution that had principally already been decided. It examined

a top-down approach, rather than assessing the need and looking to see how a spatial allocation of growth could support redressing any identified infrastructure requirements (so bottom up). This would appear to be a serious flaw in the approach. Not least given the wider JSP context, as acknowledged in the IDP (2024) at paragraph 2.7.

9.8. Paragraph 73 of the NPPF (2023) states:

*"The supply of large numbers of new homes can often be best achieved through planning for larger scale development, such as new settlements or significant extensions to existing villages and towns, provided they are well located and designed, and supported by the necessary infrastructure and facilities (including a genuine choice of transport modes). Working with the support of their communities, and with other authorities if appropriate, strategic policy-making authorities should identify suitable locations for such development where this can help to meet identified needs in a sustainable way. In doing so, they should:*

1. *a) <u>consider the opportunities presented by existing or planned investment in infrastructure, the area's economic potential and the scope for net environmental gains</u>; ..... "*

*<u>Underline</u> Urbanissta emphasis*

9.9. There is no evidence to suggest that paragraph 73 of the NPPF has been addressed adequately or at all

in relation to the draft site allocation decisions that have been taken in Part B of the draft Plan. This will need to be rectified for the Regulation 19 Plan to be found sound. Site identification decisions also need to address this matter clearly and should be robustly evidenced. This is not evident from the Regulation 19 Plan. As asserted in relation to the SA (2024) in Section 8.0 above, the IDP (2024) findings appear to retrofit the infrastructure requirements to a pre-determined spatial strategy. There is no regard to the infrastructure 'opportunity cost' of alternative spatial planning decisions.

9.10. In the first instance we reiterate the concerns expressed at Regulation 18 stages regarding the approach

to scenario testing below.

Infrastructure Delivery Plan (IDP) (July 2023)

9.11. Two growth scenarios were modelled in the IDP (2023), one a need-based assumptions (Scenario 1)
delivering 15,893 dwellings in the period to 2041 (or 935 dwellings per year), the other at a lower projection limiting Green Belt development and providing a lesser number of houses in the plan period around 10,363 dwellings or 610 dwellings per annum.

9.12. In line with paragraph 11 of the NPPF, and the presumption of sustainable development it is unclear if

the infrastructure requirements of the district have been linked to the growth and investment decisions of the draft Plan (at either Regulation 18 or 19 stage):

*"Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that:*

1. *a) all plans should promote a sustainable pattern of development that seeks to: meet the development needs of their area; align growth and infrastructure; improve the environment; mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects; ....."*

*Underline Urbanissta emphasis*

9.13. The two scenarios tested in the IDP (2023) differed from the assumptions tested through the interim SA

at that time. It was not evident why this was the case as growth and infrastructure requirements and sustainable development opportunities, should be planned alongside each other. Accordingly, there appeared to be no consistent application across the technical assessments used to evidence the spatial strategy decisions taken in the Regulation 18 Plan and to inform the site selection process. Clear evidence should have been provided and made publicly available. This is also not the case at Regulation 19 stage instead the course has just been continued in the same vein, with no retrospection or reflection.

9.14. The approach to infrastructure delivery appears to have been numerically driven, not driven by the

infrastructure requirements of opportunities or strategically spatially assessed to determine what opportunities might arise from taking different land use decisions. The special strategy as informed by the IDP (2024) is therefore unjustified as robust testing of different spatial decision and their infrastructure demands and opportunities, have not been robustly undertaken. This is clearly flawed.

9.15. Indeed, neither the growth options at Regulation 18 stage, fully addressed the infrastructure

opportunities that might result from higher growth scenarios or a markedly different spatial strategy. As such, it is difficult to determine how the IDP (2024) or draft Local Plan's spatial context at Regulation 19 can be considered to have been fully justified or evidenced.

Growth Scenario 1

9.16. *"Growth Scenario 1 presents an approach in which SADC delivers a scale of homes aligned to their*
*housing need, as defined through the standard methodology. This includes Hemel Hempstead Garden Community and a wider range of sites within and adjoining the urban settlements of SADC."*

*Figure 8 – Growth Option 1 IDP (July 2023)*

*Source – Arup*

9.17. Even by looking at the spatial distribution of growth as shown in Option 1 at Figure 8 above, it is clear

to see that the principal focus for development is to locate housing at the far west of the district on the edge of Hemel Hempstead. This may well provide infrastructure opportunities but does little to address the infrastructure issues or challenges or requirements of the rest of the district – of which there are many. The IDP (2023 or 20204) does not look at the disproportionate balance of growth to the west of the district, leaving limited opportunities for enhancements elsewhere. This should have been tested to determine what the preferred spatial strategy was and what the best approach to achieving sustainable development might be.

9.18. Whilst HGC is a substantial aspect of the draft Plan's land supply (identified to deliver some 4,300

dwellings within the plan period to 2041, there is an additional 6,535 dwellings (Trajectory 2024) that would arise from sites outside HGC. It is of concern that these spatial arrangement of such a significant number of dwellings have not been more rigorously scrutinised and different distributions assessed within the IDP (and SA) either in 2023 or now at Regulation 19.

Growth Scenario 2

9.19. "*Growth Scenario 2 presents an approach in which SADC limits development located within*
*the Green Belt, with a focus on delivering urban capacity sites and Hemel Hempstead Garden Community."*

*Figure 9 – Growth Option 2 IDP (July 2023)*

*Source – Arup*

9.20. s No alternative development strategies for meeting Scenarios 1 or 2 (Figure 9) are tested. Scenario 1 has

a significant delay in the target delivery of dwellings, with somewhere close to 885 dwellings per annum only being achieved by 2030/2031, with a significant emphasis on the period 2031/3032 to the end of the plan period delivering more than 1,000 dwellings per annum. This might reflect the very long lead in times that are likely to be achieved in relation to HGC as reflected in the current Trajectory (2024).

9.21. The Trajectory (2024), spatial assumptions and infrastructure delivery assumptions are significantly

backloaded with broad locations and large sites not delivering any dwellings until almost 6/7 years after adoption, years into the future, circa 8/9 years from the current Plan base date.

9.22. In fact, the Stepped Trajectory anticipated on 485 dwellings per annum being delivered only from

existing commitments in the period for 2024/225 until 2030/31, some 5/6 years from now. The infrastructure implications of this approach appear untested and are not have been assessed within the IDP (2024).

9.23. The IDP (2024) in supporting the Regulation 19 plan, has no regard to alternative growth scenarios,

beyond those considered at Regulation 18 and does not look in any way at opportunities for alternative growth scenarios or spatial arrangements which may lesser infrastructure demands to provide substantial benefits that might result in a revised spatial approach.

Bus Services

9.24. Focusing on bus services, Section 7.5 of the IDP (2023) references the previous 2018 IDP stating that "in
rural areas such routes often suffer from "*economic viability issues due to the low population density and therefore are not as frequent as users would like"*. The emerging local plan should be used as an opportunity to build upon the density and support the viability of existing services, instead of including rural sites requiring new services to be provided which, as set out within the IDP, would be unlikely to sustain a viable public transport service in the medium to long term due to the low population density.

9.25. In the context of the above, and HCC's desire to "*promote passenger transport across the County to*

*encourage increased use of modes of travel other than by car*", we consider that good access to public transport services should be an essential necessity of any proposed site allocation to ensure that the growth can be focussed around enhancing and ensuring the viability of existing services.

Walking and Cycling Provision

9.26. The IDP (2023) states (Section 7.5) that "*Walking and cycling (active travel) can contribute to*

*environmental benefits, increase accessible connectivity for all, as well as play a key role in improving physical and mental health*". In particular, the IDP continues to note that "One of the key LTP4 aims is to encourage a switch from the private car to sustainable transport (e.g. walking, cycling and passenger transport). Therefore, sustainable travel infrastructure is strongly supported by both HCC and the City and District Council. The LTP4, the strategies that support it, and strategies set by the Council outline various measures to encourage walking and cycling locally".

9.27. The IDP (2023) continues by stating that "*Site-specific active travel schemes would include internal and*

*site access provisions for walking and cycling at each site*" (page 119), and, in this context, it is considered that the ability to provide suitable pedestrian and cycle access to the draft allocations should be key to determining their viability and impact. In this context, we would consider that details of the anticipated pedestrian and cycle accesses should be provided within the draft allocation document together and that the deliverability of the improvements should be suitably scrutinised to ensure that the appropriate level of access by all modes can be achieved.

IDP Infrastructure Schedule July 2023

9.28. Many items in in the IDP Schedule (2023) were uncosted. It was unclear how land use decisions were
being made without fully identifying the cost of the infrastructure requirements of the distract and by

assessing how such land uses decision could assist in ameliorating any deficits or requirements.

9.29. The scenarios for the IDP (2023) were not the same scenarios as those assumed in the interim SA so it

was unclear how decisions on allocations have been made to address or mitigate infrastructure requirements, or the timescale associated with addressing the infrastructure deficits whilst ensuring sustainable development, Additional work was advised to enable a demonstrate of the link the between the infrastructure requirements (and provision) to the site allocation decisions and associated delivery timescales. This work has clearly not been undertaken in the period to the publication of the Regulation 19 Plan.

9.30. Similarly, an assessment of how existing settlements can be enhanced or reinforced to ensure their

longevity through sustainable, well-planned development also appears lacking in the IDP (2024).

UCS Sites

9.31. The proliferation of small sites (775 dwellings) proposed. It is not clear how do these USC sites assist in
addressing the infrastructure requirements of the plan or how the IDP (2024) has sought to address balance infrastructure demands from these sites.

9.32. There is no regard to this category of sites in the current IDP which will need to be addressed as the

smaller sites have much more limited ability to mitigate infrastructure impacts.

9.33. The Trajectory (2024) identifies that 145 dwellings per year will accrue from windfalls (2,175 dwellings

in the plan period to 2041). If this supply plus 855 dwellings from Urban Capacity Sites; 43 dwellings from HEELA sites and 137 dwellings from PDL sites are combined, this means a total of 3,210 dwellings (2175+855+43+137dwellings) being provided from these sources which will be constrained in size and nature and unlikely to meet their infrastructure requirements onsite. They will have significant infrastructure demands and limited ability to resolve them given the nature of the sites. These represent some 30% of the planned land supply (10,653 dwellings). No assessment is apparent as to how the infrastructure demands of these land supply sources will be addressed or whether alternative spatial decision might result in a 'better' delivery of social infrastructure.

Community Infrastructure Levy (CIL)

9.34. Furthermore, no details are provided on the proposed approach towards CIL and addressing
infrastructure demands from all sites, but particularly smaller sites.

- IDP (2024)

9.35. Paragraph 2.7 of the IDP (2024) examines the DtC and Cross-boundary issues, stating:

"*St Albans borders six local authorities within Hertfordshire (North Hertfordshire, Welwyn Hatfield, Hertsmere, Watford, Three Rivers and Dacorum) as well as Central Bedfordshire Unitary Authority. St Albans is also part of the 'South West Hertfordshire' strategic partnership of local authorities, which includes Dacorum, Hertsmere, St Albans, Three Rivers and Watford".*

9.36. It continues to state that:

*"There are therefore a total of eight local authorities with potential cross-boundary infrastructure linkages with St Albans*

*The intricate arrangement of local authority boundaries in Hertfordshire makes cross-boundary engagement particularly crucial – there are a number of areas of contiguous urban development which are split across administrative boundaries. As St Albans is located in the London commuter belt, radial transport corridors out from London also have a key role to play in infrastructure patterns. "*

9.37. We note that there are a number of factual errors in the IDP (2024) which again might result from

StADC's eagerness and undue haste In racing ahead to publish a Regulation 19 Plan, but which undermine the approach and rational to plan making and draws into question as to whether StADC's approach has been positively prepared, justified and effective.

9.38. Figure 2 shows the Green Belt as amended in St Michaels and Redbourn Parish reflecting the HGC

scheme, not reflecting the current spatial arrangement. This also appears true around Redbourn. This seems to be erroneous as the proposals have not yet been adopted.

9.39. Table 2 at paragraph 3.3, preferred growth strategy includes the following errors:

- Total Dwellings - IDP says 11,681 dwellings. The sum of the total number of dwellings (even including dwellings outside the plan period) it is 9,727 dwellings which is not the same as the Part B Table A1.1 or the Trajectory (2024).
- The total housing requirement for the Plan as defined in the Regulation 18 Plan (Trajectory) was 11,681 dwellings but for the Regulation 19 Plan, the figure is identified in the Council's Trajectory) at 10,653 and Part B of the Local Plan as 10,808 dwellings. This does not seem to correlate through to the IDP (2024) position.

9.40. No comprehensive assessment of alternative growth options is explored in the SA (Sept 2024) or any

assessment of the infrastructure requirements/contributions or benefits of any substantially different alternative growth scenarios. Again, the approach seems to be to simply progress with the preferred growth strategy without robustly testing alternatives, which demonstrated the lack of justification in the draft Plan's formulation which draws into question its overall soundness.

9.41. The IDP (2024) findings appear to have been retrofitted to suit a specific objective rather than to assess

how identified – or omission sites - might address infrastructure requirements across the district and resolve any exposition infrastructure constraints through development and resulting in sustainable development.

9.42. The IDP (2023 and 2024) take a blinkered approach to justify a pre-determined preferred spatial

approach rather than robustly testing different of potential growth and infrastructure requirements prior to the determination of the preferred growth strategy be that in addition to or alongside the HGC allocation. This is not effective or justifiable as an approach to Plan making.

9.43. The preferred growth strategy does not appear to have been reflected upon in any way, consequent to

representations on the Regulation 18 draft plan, except for the addition of some further urban capacity sites (totalling some 140 dwellings) and the removal of 8 small sites. This is further demonstrated by the approach taken in the IDP (2024).

9.44. We have shown that in the StADC's eagerness to progress with a Local Plan to avoid the implications

of the draft NPPF (2024), they have failed to robustly and diligently check the correlation of the interplay between the SA alternatives, IDP infrastructure requirements and the scope of alternative spatial growth strategies might achieve sustainable development.

9.45. The speed with which the Plan has been collated has clearly resulted in errors in assumptions. This coupled with a lack of justification for testing alternative sustainable growth options undermines the robustness of the Plan's evidence base and spatial decision making. This goes to the lack of justification and soundness of the Plan and its spatial decision making.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

9.46. Changes to the IDP (2024) in this regard to ensure soundness include:

- The IDP (2024) should be reviewed to address the flawed premise that the growth options used to underpin the IDP (2023) were correct and sound.
- Evidence is required to demonstrate how compliance with paragraph 73 of the NPPF (2023) has informed the site allocation decisions that have been taken in Part B of the draft Plan.
- Amending the IDP (2024) to assess how infrastructure requirements (and benefits) resultant from the circa 6,535 dwellings (Trajectory 2024) that would arise from sites outside HGC will result in sustainable development and that the spatial decisions underpinning the Regulation 19 Plan.
- Demonstrating in the IDP (2024) that the spatial arrangements of the draft Plan have been rigorously scrutinised and different distributions assessed and how this relates to the SA outputs (2024).
- Amending identified errors at Table 2 at paragraph 3.3 and Figure 2.

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

CBC welcomes the detailed Infrastructure Delivery Plan (IDP) that has been provided alongside the draft St Albans Local Plan. It is considered essential that all Infrastructure required as a result of growth within St Albans, is funded and delivered in a timely manner so as not to compromise the sustainability of new development or to detrimentally impact on existing residents and communities both within and neighbouring St Albans.

***Infrastructure Development Plan (IDP)***

Paragraph 7.3 of the Local Plan Part A refers to the IDP as a 'living document' that will continue to be updated and refined before and after the adoption of the new Local Plan.

This approach is supported by TCE. It enables the IDP to be updated, where necessary, to reflect additional information provided in evidence to support the Local Plan process, and can be adjusted as necessary if the way in which infrastructure is to be phased, delivered and funded (by Councils as well as by developers) changes over time without the need to seek changes to inflexible policy wording around infrastructure delivery, which would otherwise be the case.

We consider that there are elements of the IDP that require a more detailed review as the development proposals and infrastructure provision is refined through ongoing HGC activity, including the preparation of SPDs, to provide further guidance to support the policy context for the determination of application proposals.

Specifically, we suggest:

• there is a requirement for a collaborative exercise across HGC allocations to test the infrastructure items set out within the St Albans IDP and the Dacorum IDPs: the outcomes of this exercise may be able to be confirmed through aligned Examination processes should the DBC local plan progress in a similar timeframe, but otherwise should be reviewed as part of the ongoing update of the evidence base; and

• that, whilst there appears to be broad consistency between the IDP and the Council's viability assessment (undertaken by BNP), final conclusions will be heavily dependent upon understanding the make-up of costs within the BNP appraisal, aligned with the exercise in (i) above.

TCE wishes to maintain its involvement in the evolution of the IDP and SPDs, working with SADC, other landowners and the relevant authorities to input into any IDP discussions that may have an impact on East Hemel or the wider HGC allocations.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). ### 368 - Gee Smedley

Submission Number: 368 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Save North St Albans Greenbelt Name: Gee Smedley

Comment Number: 7

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

We cannot see how the implementation of the Draft Local Plan will stand up to the soundness test.

SADC claims powers for plan making will be taken away by Central Government if the DLP was not progressed by July 2023, so they bought the consultation in without the necessary objectively assessed evidence base required.

1. The plan making process has failed to follow LGA guidance.
2. Bringing another plan forward with substantive errors is costing tax payers millions of pounds in wasted money and is a failure of SADC Leadership.

We have a Freedom of Information request response form 2023, in Appendix 10, that states the last time Officers were advised of the potential for the removal of powers in the plan making process, was in 2018. We cannot see that Officers have asked for clarification of the question we posed a number of times in a number of different ways to the Planning Policy and Climate Committee, “should the plan be reassessed to allow for full and reliable evidence. Each time of asking, we have been rebuffed.

That withstanding, SADC should have done a much better job at Regulation 18 stage before coming to Regulation 19.

## Strategic Policy SP14 - Delivery of Infrastructure

### 68 - NHS Property Services Ltd

Submission Number: 68 Submission Date: 05/11/24 10:48

Respondent: Company/Organisation: NHS Property Services Ltd Name: Miss Ellen Moore

On Behalf Of Company/Organisation: NHS Property Services Ltd Name:

Comment Number: 6

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Draft Policy SP14 states that proposals should make provision for infrastructure that is necessary in order to accommodate additional demands resulting from the development.

Whilst we consider Policy SP14 to be sound as currently drafted, we request that the Council continue its engagement with the NHS ICB to further refine the identified healthcare needs and proposed solutions to support the level of growth proposed by the Local Plan, as identified in the Infrastructure Development/Delivery Plan (IDP), prior to submission. Further comments on IDP are provided below.

Healthcare providers should have flexibility in determining the most appropriate means of meeting the relevant healthcare needs arising from a new development. Where new developments create a demand for health services that cannot be supported by incremental extension or internal modification of existing facilities, this means the provision of new purpose-built healthcare infrastructure will be required to provide sustainable health services. Options should enable financial contributions, new-on-site healthcare infrastructure, free land/infrastructure/property, or a combination of these. It should be clarified that the NHS and its partners will need to work with the council in the formulation of appropriate mitigation measures.

<u>Comments on the Infrastructure Delivery Plan (2024) (as part of the Evidence Base)</u>

The provision of adequate healthcare infrastructure is in our view critical to the delivery of sustainable development. A sound IDP must include sufficient detail to provide clarity around the healthcare infrastructure required to the level of growth proposed by the Plan, and to ensure that both planning obligations and the capital allocation process for the Community Infrastructure Levy (CIL) effectively support and result in capital funding towards delivery of the required infrastructure.

We welcome identification in the IDP at Section 5.2.1 of projects to provide new health infrastructure. To ensure that any mitigation options secured align with NHS requirements we suggest the following process (set out in bullet points below) for determining the appropriate form of contribution for the provision of healthcare infrastructure associated with new development is included in the IDP:

*The requirement for a contribution towards healthcare infrastructure from new development will be determined by working with the ICB and other key stakeholders as appropriate, in accordance with the following process:*

- *Assessing the level and type of demand generated by the proposal.*
- *Working with the ICB to understand the capacity of existing healthcare infrastructure and the likely impact of the proposals on healthcare infrastructure capacity in the locality.*
- *Identifying appropriate options to increase capacity to accommodate the additional service requirements and the associated capital costs of delivery.*
- *Identifying the appropriate form of developer contributions.*

Comments on the Local Plan Viability Assessment (2024) (as part of the Evidence Base)

The draft policy requirements identified in the Plan are supported by the Local Plan Viability Assessment. Having reviewed the Assessment, we note that where contributions towards healthcare have been identified in the policy requirements for site-specific testing, the assessment does not include a specific allowance for contributions towards healthcare. The report appears to test a minimum lump sum for S106 contributions of at least £5,000 per unit for residential development to cover site specific mitigation.

Without prejudice to any future representations the NHS or its partners may make on specific planning applications or applications for CIL funding, in our view the S106 headroom identified as part of the site-specific testing is generally sufficient to enable financial contributions to be secured for healthcare, and therefore we consider that overall the assessment of plan-wide viability demonstrates that policy requirements in relation to healthcare infrastructure contributions are deliverable. However, we are concerned that without explicit mention of required healthcare mitigation in the viability assessment, healthcare mitigation will compete with other planning obligations or be ignored entirely, rendering development unsustainable and putting future residents' health at risk.

Healthcare facilities are currently experiencing significant strain. Furthermore, if appropriate mitigation is not secured, the growth strategy outlined in the Plan is expected to exacerbate this situation. We would recommend that the viability assessment includes a separate cost input for typologies where a healthcare contribution is expected. This would ensure that healthcare mitigation is appropriately weighted when evaluating the potential planning obligations necessary to mitigate the full impact of a development.

A separate cost input for health would also mean that developers are adequately informed in advance, in accordance with ICB's estate strategy and the development's location and size, that they may be required to make on-site provision or off-site financial contributions to mitigate the impact on healthcare infrastructure resulting from their development. Such an approach would also support the effective implementation of Draft Policy SP14 in situations when a viability assessment demonstrates that development proposals are unable to fund the full range of infrastructure requirements. We would welcome further engagement with the Council to on this issue to determine a reasonable cost assumption that could be used in future viability assessments.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is**

**incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

As above, whilst we consider Policy SP14 to be sound as currently drafted, we request that the Council continue its engagement with the NHS ICB and include the following process for determining the appropriate form of contribution for the provision of healthcare infrastructure associated with new development in the IDP:

*The requirement for a contribution towards healthcare infrastructure from new development will be determined by working with the ICB and other key stakeholders as appropriate, in accordance with the following process:*

- *Assessing the level and type of demand generated by the proposal.*
- *Working with the ICB to understand the capacity of existing healthcare infrastructure and the likely impact of the proposals on healthcare infrastructure capacity in the locality.*
- *Identifying appropriate options to increase capacity to accommodate the additional service requirements and the associated capital costs of delivery.*
- *Identifying the appropriate form of developer contributions.*

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

Comment Number: 27

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

13.2 Strategic Policy SP14 concerns the delivery of infrastructure either by direct provision or by way of planning obligations. It is noted that criterion (a)(iv) requires any adverse impacts to be mitigated. Hallam and St Albans School do not agree that any and all adverse impacts require mitigation, and it is normal for this to relate only to “unacceptable” adverse impacts. Adverse effects may be outweighed by positive beneficial effects and not warrant mitigation. However, as currently written, the practical operation of criterion (c) of the policy would be that such development should be refused. In this regard, it should be noted that paragraph 55 of the NPPF acknowledges that “unacceptable development could be made acceptable through the use of conditions or planning obligations”.

13.3 There are also concerns that criterion (b) requires "new infrastructure to support new development is operational no later than the completion of development or phase in which it is needed, unless otherwise agreed with relevant providers". Whilst indeed developers should ensure that these mechanisms are in place, there is potential that a development could have made the appropriate contributions to infrastructure delivery, but are unable to ensure that it is physically delivered within any particular timescale, requiring a delay of unknown length in the development delivery. This is particularly likely to be the case when developers are relying on the District or County Council(s) to deliver particular elements of infrastructure.

**11 Policy LG2 (Support for Transformation of Hemel Hempstead)**

**...**

**Infrastructure Delivery**

11.31 Policy LG2 states that:

*"Developers and promoters in the HGC Growth Areas must work together and closely with the Councils to secure a collaboration agreement which ensures an integrated and seamless approach across site boundaries. Critical infrastructure necessary to support development must be delivered ahead of occupation. Proposals must not prejudice or impede the provision of wider infrastructure required within the HGC Programme Area.."*

11.32 These statements do not instill confidence that SACDC has an adequate grasp on what infrastructure is required to deliver the development is proposing at Hemel Hempstead through the Draft Local Plan, who will be responsible for delivering it, its timing and its cost. It is entirely unclear from this statement what infrastructure projects SACDC is seeking contributions.

**Transport Infrastructure**

11.33 In relation to 'transport infrastructure the IDP states (paragraph 9.1.6) that:

*"One of the core principles of the Garden Community is to deliver transformative mobility improvements to achieve a significant shift towards active and sustainable modes of transport. Whilst a significant amount of baseline information has been collected to support the development of the sections below, there are a number of evolving transport studies and strategies that are not yet completed that will identify and evidence the transport interventions required to support behaviour change in a shift to sustainable modes. These will need to be incorporated into future iterations of this IDP."*

11.34 The fact that the delivery of mobility improvements to achieve a significant shift towards active and sustainable modes of transport cannot be evidenced through the IDP due to a number of evolving transport studies and strategies being incomplete raises serious concerns about the deliverability of this infrastructure. To simply state that these will need to be incorporated into future iterations of the IDP provides no confidence that there is a sound transport infrastructure evidence base on which the plan is based.

11.35 The IDP provides an *"inexhaustive list of planned highways infrastructure projects, as included in the St Albans IDP Infrastructure Schedule, of most relevance to the Hemel Garden Communities"*. It then provides two bullet points which are:

- M1 junction 8 enhancement (Phases 1 to 3)
- Access enhancements to support development at Hemel Garden Communities

11.36 This is clearly not sufficient information. We sought clarification on the highways infrastructure in the IDS however the information appears to be incomplete and it is very difficult to ascertain using the IDS spreadsheet which is not at all 'user friendly'.

11.37 Reference 141 of the IDS is for Highways Access to support development at East Hemel which includes transport measures as part of M1 J8 Enhancements:

*Figure 11.6: IDS Reference 141*

11.38 Yet when looking for the estimated costs there is no estimation despite it being a Critical piece of transport infrastructure. Furthermore, the time period for its delivery is stated as 2025 – 2041. That is a very wide period of time which indicates that SACDC simply does not know the cost or when it is likely to be delivered let alone what development will trigger its necessity for delivery.

*Figure 11.7: IDS Reference 141*

11.39 There are many other examples of this in the IDS which do not need to be highlighted as there is clearly a fundamental issue with the IDP and IDS in that they lack the required information to demonstrate the allocations are sound and deliverable. Based on the current information available there is nothing to suggest that the infrastructure to support the growth at Hemel is sound or deliverable.

***Rail Services***

11.40 The IDP states at Page 188 that:

*"The proposed expansion of Hemel Hempstead is likely to have an impact on the nearby railway stations (Hemel Hempstead station and Apsley station) and the need to improve and expand station facilities, as necessary, to reflect increased demand for rail services has been raised in the engagement as a concern."*

11.41 *"Further details are not yet developed as to exactly what new or improved infrastructure is required to facilitate this increased demand".* Again, a key piece of required infrastructure has no evidence on what is needed or its cost etc.

***Bus Services***

11.42 The IDP explains at Page 189 that:

*"Initial investigations undertaken with developers suggest that new bus routes could be introduced, and existing routes expanded to link the HGC developments with both Hemel Hempstead (including the train station, which will provide further, regional public transport connectivity) and St Albans City".*

11.43 "Initial investigations" are not sufficient to justify the proposed allocations and evidence deliverability and soundness.

***Walking and Cycling Infrastructure***

11.44 Whilst it is important that there is sustainable and safe walking and cycling infrastructure delivered as part of the allocations there is quite a contrast in the level of detail provided in the IDP and IDS for these schemes compared to the strategic transport requirements. It is helpful to have this detailed level of costings and projects for walking and cycling infrastructure however it is currently very much an 'incomplete picture' of the full range of strategic transport measures required and how, when by whom and their cost.

**Physical Infrastructure**
***Potable Water***

11.45 Paragraph 9.2.1 of the IDP explains that there is no modelling yet for the possibility

that a new water supply network might be required for HGC and that there could be cross boundary issues with the supply of potable water. This does not appear to be covered in the IDS.

*"It is possible that new water supply network infrastructure will be required when connecting large allocations like Hemel Garden Communities. However, this will be modelled as sites are brought forward by developers. During stakeholder engagement in May 2023, Affinity Water suggested that the pressure due to development at Hemel Hempstead will be increased by the growth in bordering local authorities. Cross-local authority boundary sites are most likely to encounter issues when connecting to the supply and timing and phasing of how these sites are brought forward should be aligned and considered when applying to Affinity Water for connection to the supply network."*

***Waste Water***

11.46 The IDP explains (paragraph 9.2.2) that:

*"The strategic upgrades to wastewater treatment works outlined in Section 8.1.2 will also apply to Hemel Garden Communities. Consequently, as indicated during stakeholder engagement with Thames Water, Hemel Garden Communities is not likely to cause significant issues on the wastewater network and therefore capacity is expected to be available to support the growth.*

*"Similar to potable water, because the preferred growth scenario includes significant greenfield urban extension proposed allocations it is likely that these will need new infrastructure in order to connect to the network. However, this is determined on a site by site basis, and therefore it is important that applications for new infrastructure are provided sufficiently in advance for Thames Water to be able to provide necessary upgrades"*

11.47 However, when one reads Section 8.1.2 as referred to by the consultants there is nothing in that section that specifically refers to the growth planned for HGC. Saying that new infrastructure is likely to be needed for 'significant greenfield urban extensions' and that the infrastructure will be determined on a site-by-site basis is setting up the Plan for failure. There needs to be an assessment of what the wastewater requirements are for the whole of the HGC and a plan for how it will be met, how much it is who will pay for it, where it will be located and when it will be needed.

***Energy (Gas and Electric)***

11.48 The IDP states (aragraph 9.2.3) that:

*"Currently, there are no reported infrastructure capacity issues within the Hemel Garden Communities, according to information published by UK Power Networks and Cadent. However, Cadent has indicated that a new intermediate pressure regulator will be necessary if there is a surge in residential demand"*

11.49 It is concerning that the IDP and IDS has not considered the utilities required at Hemel Garden Communities as this is clearly a very key consideration for the area given the presence of the Buncefield Oil Storage Depot, the BPA Gas Pipeline that runs north and south through the site, and the on-site Overhead Electricity Transmission Lines and the new utility infrastructure (including Wastewater Infrastructure) that is required.

11.50 As one can see from the mapping below, there is significant utility infrastructure located east of Hemel Hempstead and around Redbourn (including west of Redbourn). Nowhere in the Local Plan or in the evidence base does it explain how the existing utility infrastructure is going to be addressed as part of the proposals despite this being a clear strategic matter that should be considered a potential 'showstopper' to development proposals at Hemel Hempstead and Redbourn. This includes:

- National Grid Sundon-Elstree (400kv) pylons and line running north to southeast of Hemel Hempstead.
- Elstree – Sundon (132kv) pylons running north to south and east to west including to the east of the M1 (west of Redbourn).
- Buncefield Oil Terminal.
- Epping to Buncefield Oil Pipeline located east of Hemel Hempstead looping around the settlement to the north and west.
- Finaline (Killingholme – Buncefield) located north of Redbourn, running along the western edge of Redbourn, continuing south until crossing the M1 to Buncefield Oil Terminal.

*Figure 11.8: Electric Transmission Lines east of Hemel Hempstead and at Redbourn Source* https://openinframap.org/#12.99/51.76249/-0.39699

*Figure 11.9:: Oil and Gas Pipelines at Hemel Hempstead and Redbourn Source:* https://openinframap.org/#12.99/51.76249/-0.39699

**Viability**

11.51 It is currently unclear how the Local Plan Policies, the IDP / IDS and the Local Plan Viability Assessment (September 2024) relate to one another. The information contained in each of these documents is not clearly set out anywhere for each allocation at HGC in terms of the infrastructure requirements, their costs, when it is necessary, and who will be delivering it.

11.52 For example, the Viability report Strategic Sites Testing for East Hemel (North) includes the following assumptions for S106 contributions:

*Figure 11.10: Strategic Sites Testing Table 3.2.14.1: Section 106 contributions*

11.53 However, when one attempts to reconcile these figures in the IDP / IDS it is not possible to do so.

11.54 It is unclear in the viability evidence how cross-boundary infrastructure is being calculated. When one reviews the Hemel Garden Communities Delivery Statement (September 2024) there are a range of cross boundary schemes that are 'key transformational projects' (see below). How are these being treated in the viability evidence base?

*Figure 11.11: Transformational projects Hemel Garden Communities (HGC) Delivery Statement (September 2024)*

11.55 The Local Plan states that

*"The Spatial Vision for Hemel Garden Communities sets out the scope for transformation across the town, as well as providing a sustainable approach for growth, in accordance with the Town and Country Planning Association (TCPA) Garden City Principles"*[11]

11.56 We question how the TCPA Garden City Principles are taken into account in the viability evidence. For example:

- Land value capture for the benefit of the community
- Community ownership of land and long-term stewardship of assets

11.57 Furthermore, we are unclear as to how the viability evidence has taken account of all the requirements of the Local Plan Policies including Policy LG3 (Hemel Garden Communities Growth Area Place Principles). This policy includes a number of requirements for the developers and it is unclear how these have been costed.

11.58 Policy LG6 (Green Belt Compensatory Improvements) requires that the allocations in the Local where Green Belt boundaries are changed that 'proportionate' compensation is required. What assumptions have been made about this in the viability evidence base as this is clearly a costly requirement for Green Belt release allocations particularly that at Hemel.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Given that the two proposed Broad Locations at North Hemel Hempstead and East Hemel Hempstead (North) have not been recommended to be taken forward for further consideration SACDC and the Local Plan should not be proposing these areas for Green Belt release. **This should effectively remove these two Broad Locations along with their development assumptions which principally consist of a total of 3,100 dwellings.**

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

## 288 - Chris Berry

Submission Number: 288 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: CPRE Hertfordshire Name: Chris Berry

Comment Number: 15

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**The Draft Local Plan is not deliverable due to inadequate infrastructure including roads, water supply, and sewerage capacity**

The Draft Local Plan is not capable of implementation due to the existing and projected pressures on infrastructure, including traffic increase, water supply, sewerage capacity and related matters. The very minimal treatment of implementation issues in Chapter 14 gives no indication of the deliverability of the Infrastructure Development Plan and undermines the soundness of the Local Plan.

Existing pressures on physical and social infrastructure are not identified and further analysis is necessary on present levels of provision. The local road network cannot handle further traffic increases and the continuation of car dependent development proposals is just one example of the inadequacy of planned provision.

Deliverability of the Draft Local Plan and its inappropriate proposed levels of housing and other development is likely to be constrained by infrastructure such as sewerage capacity, water supply, flooding, air quality concerns. Water related issues will lead to potential environmental damage to unique environmental assets including chalk streams, and the implications for health and well-being of residents and visitors are inadequately considered.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Draft Local Pan should provide significantly greater indication of the feasibility regarding implementation of policies and proposals. The lack of adequate consideration of the implementation of the physical development proposed renders the Local Plan unsound.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. St Albans LP Reg 19 RF9_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To explain our concerns about the lack of adequate consideration of the implementation of the Draft Local Plan.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

**292 - Leverstock Green Village Association**

Submission Number: 292 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Troy Hayes

On Behalf Of Company/Organisation: Leverstock Green Village Association Name: Leverstock Green Village Association

Comment Number: 9

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

1.12. For the purposes of clarification, it is the Association's considered view that the Local Plan is unsound, and the Council has failed to discharge its Duty to Cooperate. The proposed scale and distribution of growth has not been justified, it has not been positively prepared, and the policies are ineffective. LGVA considers that the delivery of growth at the Hemel Garden Communities has not been demonstrated through technical evidence including the Council's Green Belt Review, Infrastructure Delivery Plan (IDP), Viability evidence and Transport evidence.

...

**Hemel Garden Communities**

7.2. We recognise the vision of HGC, but we are concerned there is no comprehensive infrastructure and transport plan to support the proposals. We also have misgivings that such a large-scale project involving two local authorities and multiple other agencies over such a protracted period is deliverable.

7.3. We appreciate the planning is at an early stage, but the task of coordinating all aspects of the HGC will be a major challenge. The timely delivery of infrastructure and particularly roads will be essential.

...

7.10. Furthermore, LGVA has serious doubts about the sound planning of infrastructure of HGC in terms of SACDC and on cross boundary infrastructure with neighbouring authorities. The Infrastructure Delivery Plan, Housing Trajectory and Viability Evidence provide us with no confidence that there is a coherent and sound plan for the coordination and delivery of the infrastructure to deliver the HGC and the quality of place-making set out in Policy LG3 (Hemel Garden Communities Growth Area Place Principles).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

For the purposes of clarification, it is the Association's considered view that the Local Plan is unsound, and the Council has failed to discharge its Duty to Cooperate.

The proposed scale and distribution of growth has not been justified, it has not been positively prepared, and the policies are ineffective. **323 - Diana Ngobi**

Submission Number: 323 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: National Highways Name: Diana Ngobi

Comment Number: 8

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Transport Evidence Base & Infrastructure Delivery Plan:

To ensure that the Local Plan is deliverable, the transport evidence base should demonstrate the Local Plan impact on the SRN and as necessary identify suitable mitigation. This work forms a key piece of evidence to demonstrate that the Local Plan is sound, therefore it is important that any identified mitigation that the plan and its allocations are reliant upon has a reasonable prospect of delivery within the timescales of when the identified growth is planned.

National Highways and St Albans City and District Council along with Hertfordshire County Council and their transport modelling consultants have been liaising and corresponding over the use of the existing COMET transport model covering Hertfordshire for the Local Plan modelling assessment. We previously raised concerns over the suitability of the model due to the lack of suitable calibration and validation evidence provided to demonstrate that the model was operating satisfactorily. Although some evidence was provided and agreement was reached on a suitable

transport modelling methodology for the Local Plan assessment, some of the requested information about the model validation/calibration and evidence on mode shift was not provided. This specifically concerned evidence that the COMET model could replicate base year traffic flows on the M25 and other parts of the SRN plus evidence of how mode shift in modelled scenarios 2 and 3 could be delivered.

While there is some further information provided within the evidence base on the latter, it is insufficient to demonstrate that the mode shift can be achieved. The former traffic flow information is still outstanding and this raises concerns as to the validity of the transport modelling evidence in relation to impacts on the SRN.

We have examined the transport assessment evidence base from St Albans' website, it appears that the main transport report has not been included. There is a tab labelled "Report Final Issued.pdf", however when clicking on the tab it produces a report "COMET 7 Forecasting Report" dated November 2022, identical to the report under a separate tab above on the same webpage. The main report has seemingly been omitted presumably by administrative error, so further documentation is required in support of the transport evidence.

Reviewing the modelling evidence provided in the Modelling Report (August 2024) there is insufficient information provided in relation to the SRN to determine whether there are any severe impacts or unacceptable safety concerns resulting from the Local Plan. We would need to see evidence at junction level relating to differences in queues and delays "with and without" the Local Plan. Additionally, we require evidence of traffic flows through merges and diverges on the SRN network "with and without" the Local Plan to determine whether the merges and diverges with the main carriageways can accommodate traffic flow changes.

Therefore, in our judgement there is insufficient evidence to demonstrate that the Local Plan growth can be accommodated in transport terms on the SRN. Further evidence will be required to demonstrate that the Local Plan is sufficiently robust on transport grounds. We would request the opportunity to discuss these matters in more detail to reach agreement on what additional evidence is required to demonstrate either that the Local Plan will not have any severe or unacceptable safety impacts on the strategic road network or that suitable mitigation is included within the Plan and that there is a reasonable prospect of delivery at appropriate junctures in the Plan period. Given the current timeline for Local Plan to Examination we would stress the urgency to enter into immediate dialogue.

Having reviewed the Infrastructure Delivery Plan (IDP), we note that there is significant attention paid to improvements on the A414. Although the A414 is only part of the SRN between M1 J8 and the Park Street Roundabout, and the proposed improvements fall outside of this area, we will still be interested in the funding and delivery of improvements proposed. In particular, the improvements to the Park Street Roundabout as described in section 7.2 of the IDP could impact the SRN, even if entirely within Local Highway Authority land.

The IDP currently lists improvements to M1 J8 as being funded by a combination of National Highways through RIS3 and developer contributions. We would like to highlight that any proposed improvement to M1 J8 Breaksphere Interchange is not part of the RIS3 programme. Should this improvement be necessary to facilitate Local Plan growth, appropriate alternative funding and management should be in place, with the agreement of National Highways. As previously noted, there cannot be any presumption that such infrastructure will be funded through any future RIS during the Plan period. Notwithstanding this, National Highways supports the safeguarding of land for expansion of M1 J8 should it come forwards at a later date, during the Plan period.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is**

**incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Therefore, in our judgement there is insufficient evidence to demonstrate that the Local Plan growth can be accommodated in transport terms on the SRN. Further evidence will be required to demonstrate that the Local Plan is sufficiently robust on transport grounds. We would request the opportunity to discuss these matters in more detail to reach agreement on what additional evidence is required to demonstrate either that the Local Plan will not have any severe or unacceptable safety impacts on the strategic road network or that suitable mitigation is included within the Plan and that there is a reasonable prospect of delivery at appropriate junctures in the Plan period. Given the current timeline for Local Plan to Examination we would stress the urgency to enter into immediate dialogue.

National Highways are unable to confirm that the Plan is sound until further evidence is provided, the required sustainable transport mitigation measures to mitigate the impacts of the Plan have detailed cost estimates and funding sources are committed.

However, National Highways supports St Albans District Councils commitment to work in partnership with stakeholders including Hertfordshire County Council, neighbouring authorities, National Highways and service providers to ensure that a range of sustainable and active transport options are available to all existing and future users of the transport network.

### 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 7

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraph 35 and 36 of the 2023 NPPF require that local plans be justified to be considered sound. To do so its policies must be based on appropriate evidence.
The evidence base for the local plan includes a suite of PNP Paribas Real Estate viability appraisals for the sites in Hemel Garden Communities (HGC) and the Broad Locations. These viability appraisals rightly include indicative s106 contributions as a policy cost to determine the residual land value and the viability of the site. All the viability appraisals include these costs under five headings: education, healthcare, sports and community, green infrastructure, and transport infrastructure.
The viability appraisals include an allowance of (usually) £11,813 per unit on most sites for primary education, where provided, an allowance of £8,882 per unit-

£11,813 per unit for secondary education, and an allowance of £1,655-£3,314 per unit for sport and community.
It is not clear how these allowances were calculated and what infrastrucutre is intended to be included within them. Nor is it clear what that indexation base date is for these figures so they can be compared to the GDV (assumed to be 2024) on a like for like basis.
HCC's own evidence, set out in the Guide to Developer Infrastructure Contributions, shows that an allowance of £11,640 per unit is required for a greenfield site for primary education (including nursery) and £11,331 per unit for secondary education (including 6th form) with an indexation base date of 2024. These allowances made may therefore not be sufficient.
It is not clear what is intended to be included in the 'sport and community' heading. However HCC will also need to seek s106 contributions for SEND education, 0-2 childcare, 5-11 childcare, libraries, youth, waste (transfer stations), and fire and rescue services in addition to transport and mainstream education. These are services for which HCC has projects to deliver as mitigation. Therefore, assuming that these are not intended to be included in other headings, the £1,655-£3,314 per unit allowance will need to be sufficient to include both these and any other obligations that the LPA may require (such as gyms, offsite playing pitches, and offsite children's play areas). HCC's own evidence, set out in the Guide to Developer Infrastructure Contributions, shows that an allowance of £2,164 needs to be made for these services with an indexation base date of 2024. The HGC sites will need to make an additional allowance of £146 per unit for the waste (recycling centre) project. The sport and community allowance made may therefore not be sufficient to deliver infrastructure for which HCC and the LPA have responsibility.
The viability appraisals for Glinwell, East St Albans, North East Harpenden, North West Harpenden, West of Redbourn, West of London Colney, and Harper Lane make no allowance for secondary education. This is a serious omission as HCC has a statutory duty to secure sufficient secondary education provision and mitigation must be made through the s106 process. The viability evidence here may also be insufficient to deliver this form of infrastructure.
The viability appraisals for the Hemel Garden Communities (HGC) allocations assume a level of contributions based on £6,826 per home for active travel, £11,000 per home for transport requirements, and £385,000 for mobility hub. However, as per our representations on policies LG2 and LG3, the cross-boundary HGC IDP has not yet been drafted and therefore the likely cost of mitigation is not yet known. While the quantum of infrastructure is unknown the residual land value and viability cannot be considered conclusive.
Paragraph 58 of the NPPF emphasises that viability is determined at the plan-making stage. It is therefore vital that viability appraisals contain realistic allowances for planning obligations (and all other policy costs). To do otherwise could risk residual land values being found unrealistically high, in turn creating expectations that cause delay at decision-making stake and sites with marginal viability being found viable solely based on lack of funding for mitigation. This could potentially risk the deliverability of the wider infrastructure strategy.

SP14 sets out policies that govern the viability appraisal process. However, this does not include a policy that would allow SACDC to require a viability review mechanism to reappraise the viability of a site at completion.

To be considered based on evidence and therefore sound the local plan should therefore ensure the viability evidence base includes realistic planning obligations for HCC services that will be needed to deliver infrastructure and mitigate the impact of development.

Paragraph 35 and 36 of the 2023 NPPF require that local plans be compliant with national policy. To do so they must comply with the other policies of the NPPF.

The successful delivery of the Hemel Garden Communities (HGC) programme in St Albans will be reliant on the agreement and delivery of on-site infrastructure within the site allocations in the Dacorum & St Albans local plans as well as off-site infrastructure across the settlement of Hemel Hempstead. The local plan as respects the HGC programme must therefore meet NPPF requirements for both infrastructure delivery and dealing with relevant cross-boundary issues. NPPF paragraphs 16 (c) and 25 make explicit the need for infrastructure cooperation across boundaries where appropriate.

Both the St Albans and the Dacorum local plans include an Infrastructure Delivery Plan as evidence to support their own local plans. This is needed to evidence the

requirement at NPPF paragraph 11 (a) that plan-making demonstrate sustainable development. Paragraph 110 places further requirements on plans to include policies to deliver infrastructure that ensures positive outcomes. However, the St Albans IDP, prepared by Arup following extensive engagement with HCC, does not include the infrastructure required to deliver the Hemel Garden Communities allocations in St Albans.

The successful delivery of HGC requires a similar IDP to that which supports this plan. The HGC IDP will need to identify the strategic-cross boundary infrastructure that will be required to mitigate HGC's growth, as well as the infrastructure that will need to be delivered beyond the plan periods of the emerging St Albans and Dacorum local plans. The HGC IDP is currently being prepared and should be available for the examination of the emerging local plans that allocate the HGC land parcels for development. The output of that work, as it relates to the identification, timing, costing, location and delivery agents of infrastructure, will be needed to ensure the necessary mitigations to deliver HGC allocations are incorporated into the plan and tested at examination.

The soundness of the plan would benefit from a clearer, more refined policy that will govern the delivery of (cross-boundary) infrastructure required to facilitate the delivery of the garden community. Any decision-maker for any application within St Albans must be directed to consider the strategic cross-boundary impacts of development of this scale in this location when making their decision. Such a policy would provide a framework to ensure applications deliver mitigations identified in both the St Albans IDP and HGC IDP where appropriate.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To be considered sound the local plan evidence base should:

1. Clarify what services, obligations, or infrastructure is included within the

sport and community, green infrastructure, and healthcare headings;

2. Clarify that the there is sufficient allowance for planning obligations for both County and District infrastructure areas of responsibility in the sport and community heading;
3. Ensure that allowance for primary and secondary obligations reflects HCC's evidence and practice and is included for all sites;
4. Ensure that the viability evidence on HGC aligns with the HGC IDP when this is completed; and
5. Amend policy SP14 to permit a viability review mechamism.

Firstly, the evidence base should clarify what planning obligations for which services are included within each of the other headings. If HCC's recycling infrastructure responsibilities were included within the green infrastructure heading, for example, this could help create sufficient allowance for the remaining obligations within the sport and community heading. Conversely, if childcare is also included within the education heading further allowance would need to be made, as the per unit allowance in the viability report already undershoots HCC's evidence. The viability appraisals should also confirm the indexation base date for its evidence on planning obligations matches that of the GDV to ensure a like for like comparison; if the planning obligations evidence base is from an earlier date an allowance for indexation on the difference needs to be included.

Secondly, once the above has been confirmed the viability evidence should ensure that there is sufficient allowance within the sport and community heading for £2,188 per unit for HCC non-education non-transport services (plus £146 per unit in HGC) in addition to any further District requirements within the sports and community planning obligation allowance. This would ensure that the viability evidence contains a suitable allowance for both County and District community and sports infrastructure, if not provided for under other headings.

Thirdly, the viability evidence must ensure that an allowance is made for secondary education on all sites, as this will be required to ensure that sufficient secondary school places can be provided as sites are delivered, and therefore needs to be reflected in viability evidence. This should reflect the likely costs as per HCC's Guide to Developer Infrastructure Contributions as the most realistic cost of mitigation.

Fourthly, the viability evidence should also be reconsidered following the publication and agreement of the HGC IDP to confirm that the HGC sites remain viable when the actual cost of the suite of transport interventions is known. Policy SP14 should also ensure that any further viability evidence includes both the SACDC IDP and the cross boundary HGC IDP:

1. *g) Expect that infrastructure requirements set out in the Infrastructure Delivery Plan and the Hemel Garden Communities IDP will be delivered. Where infrastructure requirements could render major development unviable, proposals should be supported by an independent and transparent viability assessment that accords with Planning Practice Guidance. Where viability constraints are demonstrated by evidence, the Council will:*

Finally, policy SP14 should be amended to require that any site with a viability issue include a viability review mechanism in the s106 legal agreement to determine whether the viability situation has improved upon completion:

1. *Refuse planning permission if the development would be unsustainable without the inclusion of the unfunded infrastructure requirements, taking into account reasonable contributions from elsewhere, and.*
2. *Use an appropriate mechanism to review the viability of the development at the completion to determine whether the viability has improved*

Taken together this would ensure that the viability evidence reflects what is required in terms of planning obligations and other policy costs to deliver the infrastructure and thereby ensure that required infrastructure has a reasonable prospect of delivery. This would ensure that the viability evidence is robust and has the greatest chance of remaining valid at decision-making stage.

To be considered sound the plan must:

1. Incorporate the completed HGC IDP into the evidence base of the local plan (including viability testing the outputs); and
2. Include a new strategic policy either in place of or preceding policies LG2 and/or LG3 that requires all HGC development to comply with the HGC IDP.

Firstly, the completed HGC IDP must be included as part of the evidence base for the local plan and tested as part of the examination process. NPPF paragraph 20 expects plans to make sufficient infrastructure provision, while paragraph34 requires plans to set level of development contributions that will be required to support the plan. The HGC IDP will evidence the infrastructure schemes that will be required to support HGC as a whole. This work is ongoing with the support of HCC, and we expect that this should be available to be inform the local plan examination. This point is made to ensure that appropriate provisions are made in the plan to ensure infrastructure required to fund growth in Hemel Hempstead as a whole is understood, fixed in local plan policy and funding sought from all development schemes that will benefit from the infrastructure.

Secondly, a new strategic policy should set a clear framework for the delivery of the HGC programme as a whole within St Albans. This could potentially replace parts of policy LG2. This would leave the remainder of LG2 and LG3 as subsidiary non-strategic policies setting out some of the intended policy outcomes. The below policy wording is suggested as a draft pending further discussion, for example, as to the exact documents that need to be prepared at HGC scale to evidence the infrastructure needed before applications can be determined:

***Policy SP(X): Phased Development and Infrastructure Funding in Hemel Hempstead Garden Community***

1. ***Charter Principles and HGC Spatial Vision****: Development proposals should reflect the Hemel Garden Communities (HGC) Charter Principles and HGC Spatial Vision which set out the ambition for the development of Hemel Hempstead and the wider area. Applications should also promote the four thematic pillars of the HGC Vision*
2. ***Growth Area Proposals:*** *Planning applications within the growth area should also adhere to the requirements of Policies LG2 – Support for Transformation of Hemel Hempstead, LG3 – Hemel Garden Communities Growth Areas Place Principles and LG4 – Large, Medium and Small Sites*
3. ***Phased Development****: Development sites within the Hemel Hempstead Garden Community area (HGC) shall only be permitted once the infrastructure requirements of the wider garden community are comprehensively identified, planned and set out in a comprehensive, and iterative, IDP. This includes, but is not limited to, transportation networks, utilities, educational facilities, healthcare services, and green spaces.*
4. ***Strategic Contributions****: Development proposals will be required to make a wider strategic contribution in terms of safeguarding or reserving land and funding and/or delivering strategic infrastructure that is required to mitigate the impacts of new development on the Hemel Hempstead settlement and the surrounding area, as identified in the Hemel Hempstead Garden Community Infrastructure Delivery Plan (HGC IDP).*
5. ***Evidence Base Compliance****: Planning permission shall only be granted once key HGC documents are in place, including the HGC IDP [and any SPDs or Development Framework Document, or a more detailed form of the Framework Plan] and proposals can demonstrate compliance with the*
6. ***Cross-Boundary Effects****: Any application must consider and assess cross-boundary impacts between St Albans and Dacorum, including cumulative impacts with other anticipated developments within the local plan(s) including windfall sites.*
7. ***Comprehensive Masterplan Proposals****: Individual masterplan proposals must accord with development aspirations of the entire HGC area and contribute positively to the transformation of Hemel Hempstead, and must not prejudice or impede the provision of strategic infrastructure*

*in the phased manner identified in the HGC IDP. Any such masterplan is to be prepared and agreed between the landowner/developer and the Council. Where applications have already been submitted to the Council a masterplan should be agreed prior to the or as part of the grant of planning permission.*

8. ***Monitoring and Review**: The implementation of this policy will be monitored regularly by the establishment of a stakeholder Hemel Hempstead Infrastructure Review Group (and any necessary subgroups) to ensure compliance, effectiveness. Adjustments to the policy may be made based on the outcomes of these reviews so that the local authorities have the ability to address any emerging issues or changing circumstances.*

Taken together, these modifications would ensure that the decision-maker has a cross-boundary IDP that takes into account the cross-boundary impacts on the transport network (and other key infrastructure, such as secondary schools, for example) before them when approving any planning application within the HGC area. This would, in turn, fulfil the requirements and outcomes of the NPPF at paragraphs 11 and 110.

2. 5A HGC IDP Evidence and Strategy_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

HCC a statutory responsibility to deliver services as mitigation for development and is reliant on securing planning obligations to do so. Therefore HCC has a considerable interest in this matter.

HCC is a partner in the HGC programme and as Highway Authority has a statutory responsibility for and interest in the successful delivery of the HGC programme. It is therefore essential that HCC be able to participate in any discussion on the delivery of the HGC sites and infrastructure policy.

**329 - Mr Russell Crow**

Submission Number: 329 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Mr Peter Atkin

On Behalf Of Company/Organisation: Richborough Estates Name: Mr Russell Crow

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Richborough is committed to mitigating the impact of development on existing local infrastructure and should it be evidenced as being required will support the on or off-site delivery of new local infrastructure to meet the needs of new and existing communities. Accordingly, the principle of draft Policy SP14 is supported, a Policy of this nature will be required as part of the Plan.

Notwithstanding the above, Richborough has comments on criterion g) of Policy SP14 which requires the infrastructure needs highlighted in the Infrastructure Delivery Plan (IDP) to be delivered by new developments. It is assumed that the vast majority of these new developments will be Local Plan allocations.

Whilst Policy SP14 offers flexibility in approach for Applicant's if a scheme has viability issues at the application stage, ultimately g iii) confirms that SADC would refuse planning permission if the scheme would be unsustainable without the required infrastructure. In this regard, SADC should remember that there is an onus on the Council to test the viability of the proposed site allocations alongside the IDP requirements as part of the Plan-making process. In this regard, the concerns raised in these representations above about discrepancies
between draft policies and the IDP regarding open space provision and playing pitch provision should be costed in a robust manner.

Respondent: Company/Organisation: Luton Borough Council Name: Chris Thom

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Luton Council considers that the draft Local Plan is a sound, positive approach to plan making, however given the influence of Luton airport, planned future growth, the generation of travel movements and the commuting relationship between St Albans and the airport, it is considered that the Local Pan could be more effective in relation to the need for integrated strategic transport measures and opportunities afforded by the HERT proposals and Luton's own DART mass transit scheme.

Changes could be made to strategic policies SP8 (Transport strategy) TR1 (Transport Considerations for New Development) and TR2 (Major Transport Schemes) and the SADC Infrastructure Development Plan to further recognise these influences and relationships and the need for improved public transport provision in the context of the need to improve inter-urban connectivity.

### 349 - Lisa Peters

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 25

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Delivery of Infrastructure**

CHPC strongly supports the principles outlined in **Policy SP14**, particularly its focus on ensuring that new developments are adequately supported by appropriate infrastructure and facilities. The policy's emphasis on avoiding unreasonable burdens on existing communities and addressing cumulative impacts is crucial to ensuring that growth does not outpace the capacity of local services or degrade the quality of life for current residents.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

However, CHPC highlights some specific concerns regarding the implementation of this policy in rural and semi-rural areas like Colney Heath. While the policy's objectives are commendable, we believe that the infrastructure provisions must be carefully planned to align with the unique needs and constraints of rural communities, which often face different challenges compared to urban areas. These challenges include limited transport links, reliance on private vehicles, and less access to key services such as healthcare and education.

Provision of facilities and infrastructure for new residents: CHPC advocates for a tailored approach to the provision of new facilities and infrastructure, ensuring that any new development is accompanied by the necessary investments in roads, public transport, healthcare, schools, and other essential services. Given the limited existing infrastructure in Colney Heath, it is crucial that any new development is designed with these considerations in mind to prevent overburdening local resources. For example, the lack of public transport options in rural areas could exacerbate traffic congestion and increase reliance on private cars, making sustainable development more challenging.

Addressing cumulative impacts across multiple developments: CHPC acknowledges that cumulative impacts from multiple developments in a local area can have significant consequences for the community and the environment. It is important that Policy SP14 ensures the coordinated delivery of infrastructure to prevent individual developments from straining resources. This approach should include consideration of local infrastructure capacity, particularly in terms of road networks, water and sewage systems, and community services. For Colney Heath, this would mean ensuring that infrastructure improvements are made in parallel with development, rather than waiting until problems arise.

Avoiding unreasonable burdens on existing infrastructure: CHPC stresses that careful planning is essential to ensure that existing communities do not bear the brunt of new development, particularly in terms of increased traffic and pressure on local services. In Colney Heath, where services such as public transport, healthcare, and schools are already limited, new developments should not exacerbate these issues. We recommend that mitigation measures such as improvements to local roads and increased support for public transport be a requirement for all

new developments. Additionally, financial contributions from developers to enhance local infrastructure would help ensure that the costs of growth are fairly distributed and that the existing community does not bear a disproportionate burden.

In conclusion, while CHPC supports Policy SP14, we urge that it be applied with careful consideration of the unique needs of rural communities such as Colney Heath. The delivery of infrastructure should be strategically planned to address cumulative impacts, avoid placing excessive strain on existing services, and ensure that new development is supported by the necessary infrastructure to meet the needs of both new and existing residents.

***Policy SP8- Transport Strategy***

We support the aspiration of Policy SP8: *Transport Strategy* to "*prioritise the use of active and sustainable transport modes and deliver accessibility improvements to the transport and highways network…*".

We recognise that there are a number of evidence base documents that support Policy SP8 Including the following documents:

- HCC Local Transport Plan 2018-2031 (LTP4), which promotes sustainable transport modes, related infrastructure, encourages change in travel behaviour and seeks to reduce the need to travel.

- South West Herts Growth and Transport Plan (GTP) and South Central Herts GTP, which are supporting strategies to LTP4
- Local Cycling and Walking Infrastructure Plan (LCWIP)
- Infrastructre Delivery Plan (IDP)

*To ensure the effectiveness and deliverability of the Transport Strategy Policy SP8 aspiration, we are of the view that further consideration should be given to the comprehensive infrastructure requirements to support the overall proposed overall HGC Growth Area, the delivery phasing across the authority boundaries and mechanism for appropriating cost.*

We acknowledge that the St Albans City & District IDP refers to a number of ongoing studies which are relevant to the IDP but were not published at the time that the current IDP report was prepared.

These are as follows:

- Transport Impact Assessment (on behalf of St Albans City and District Council);
- St Albans Modal Shift Study (on behalf of Hertfordshire County Council);
- Hemel Garden Communities Opportunity to Shift Modes (on behalf of Hemel Garden Communities);
- Transport Study for Hemel Hempstead (on behalf of Dacorum Borough Council);
- Hemel Hempstead Local Walking and Cycling Infrastructure Plan (on behalf of Dacorum Borough Council);
- East Hemel Hempstead Garden Community Masterplan (on behalf of The Crown Estate) and future masterplan (on behalf of other landowners); and
- Traffic forecast to 2041 for St Albans District using COMET8 (on behalf of St Albans District Council and Hertfordshire County Council).

*We therefore consider that an updated St Albans City & District IDP is required to be published in advance of the Examination in Public to incorporate all of the relevant emerging evidence base.*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

1. Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Kitewood is a development company and landowner of part of the proposed Hemel Garden Communities (HGC) Growth Area to the north and east of Hemel Hempstead. Our landholding falls wholly to the north within Dacorum Borough, and abuts the boundary with the St Albans City & District, adjacent to the Reg 19 Local Plan proposed allocation H1- north Hemel Hempstead.

Kitewood considers that the *Draft Local Plan 2041 Regulation 19 is Legally compliant*, has been *Positively prepared*, is *Justified*, and is *consistent with national policy*.

However, we do not consider that Policies SP1, SP8 and TR1 are effective because all the evidence does not yet exist to demonstrate effective joint working on cross-boundary strategic matters.

***Kitewood therefore request participation in the forthcoming Examination in Public to discuss policy matters relating to the Proposed site allocations H1, H2, H3 and H4***

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

# IMP1 - Additional Infrastructure Requirements for Strategic Scale Development

## 68 - NHS Property Services Ltd

Submission Number: 68 Submission Date: 05/11/24 10:48

Respondent: Company/Organisation: NHS Property Services Ltd Name: Miss Ellen Moore

On Behalf Of Company/Organisation: NHS Property Services Ltd Name:

Comment Number: 1

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* Yes

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Draft Policy IMP1 requires applicants for Broad Locations and other Strategic Scale developments, defined as 100+ homes or 10,000 square metres of 139 commercial floorspace (retail, leisure and industrial) to engage with the Council and infrastructure providers and service delivery organisations in early pre-application discussions and deliver infrastructure to a set of timescales agreed with the Council, infrastructure providers, service delivery organisations and any other relevant organisations.

Whilst we consider Policy IMP1 to be sound as currently drafted, we request that the Council continue its engagement with the NHS ICB to further refine the identified healthcare needs and proposed solutions to support the level of growth proposed by the Local Plan, as identified in the Infrastructure Development/Delivery Plan (IDP), prior to submission. Further comments on IDP are provided below.

Healthcare providers should have flexibility in determining the most appropriate means of meeting the relevant healthcare needs arising from a new development. Where new developments create a demand for health services that cannot be supported by incremental extension or internal modification of existing facilities, this means the provision of new purpose-built healthcare infrastructure will be required to provide sustainable health services. Options should enable financial contributions, new-on-site healthcare infrastructure, free land/infrastructure/property, or a combination of these. It should be clarified that the NHS and its partners will need to work with the council in the formulation of appropriate mitigation measures.

Comments on the Infrastructure Delivery Plan (2024) (as part of the Evidence Base)

The provision of adequate healthcare infrastructure is in our view critical to the delivery of sustainable development. A sound IDP must include sufficient detail to provide clarity around the healthcare infrastructure required to the level of growth proposed by the Plan, and to ensure that both planning obligations and the capital allocation process for the Community Infrastructure Levy (CIL) effectively support and result in capital funding towards delivery of the required infrastructure.

We welcome identification in the IDP at Section 5.2.1 of projects to provide new health infrastructure. To ensure that any mitigation options secured align with NHS requirements we suggest the following process (set out in bullet points below) for determining the appropriate form of contribution for the provision of healthcare infrastructure associated with new development is included in the IDP:

*The requirement for a contribution towards healthcare infrastructure from new development will be determined by working with the ICB and other key stakeholders as appropriate, in accordance with the following process:*

- *Assessing the level and type of demand generated by the proposal.*
- *Working with the ICB to understand the capacity of existing healthcare infrastructure and the likely impact of the proposals on healthcare infrastructure capacity in the locality.*
- *Identifying appropriate options to increase capacity to accommodate the additional service requirements and the associated capital costs of delivery.*
- *Identifying the appropriate form of developer contributions.*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

As above, whilst we consider Policy IMP1 to be sound as currently drafted, we request that the Council continue its engagement with the NHS ICB and include the following process in the IDP to determine the appropriate form of contribution for the provision of healthcare infrastructure associated with new development:

*The requirement for a contribution towards healthcare infrastructure from new development will be determined by working with the ICB and other key stakeholders as appropriate, in accordance with the following process:*

- *Assessing the level and type of demand generated by the proposal.*
- *Working with the ICB to understand the capacity of existing healthcare infrastructure and the likely impact of the proposals on healthcare infrastructure capacity in the locality.*
- *Identifying appropriate options to increase capacity to accommodate the additional service requirements and the associated capital costs of delivery.*
- *Identifying the appropriate form of developer contributions.*

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**266 - Crest Nicholson Partnerships and Strategic Land**

Submission Number: 266 Submission Date: 08/11/24 08:47

Respondent: Company/Organisation: Stantec Name: Sarah Cross

On Behalf Of Company/Organisation: Crest Nicholson Partnerships and Strategic Land Name:

Comment Number: 20

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

6.32 This policy sets out additional infrastructure requirements for Broad Locations including: needing to engage early with the Council and infrastructure providers and service delivery organisations in early pre-application discussions; and deliver infrastructure to a set of timescales agreed with the Council, infrastructure providers, service delivery organisations and any other relevant organisations. We are supportive of this.

6.33 The policy also requires landowners to facilitate and co-ordinate infrastructure provision together or demonstrate why this cannot be achieved. While the wording of this policy does allow some flexibility through being able to set out why in some instances this cannot be achieved, the deletion of the words "*will be strongly encouraged to*" and the alteration to "*should*" has weakened this flexibility and does not take account of the intricacies of working with multiple landowners. We recommend this wording is amended to advocate for joint working where practicable, whilst ensuring development does not prejudice neighbouring land coming forward.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

6.34 The removal of the wording "*Planning permission will not be granted where there is insufficient evidence on utilities capacity to support the development and that the capacity will be delivered to meet the needs of the development*" from part c) of the policy is supported as it will ensure that where utility providers have failed in their legal duty to provide the relevant upgrades this does not prejudice the ability of the strategic sites coming forward where they are most needed.

Respondent: Company/Organisation: CPRE Hertfordshire Name: Chris Berry

Comment Number: 16

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**The Draft Local Plan is not deliverable due to inadequate infrastructure including roads, water supply, and sewerage capacity**

The Draft Local Plan is not capable of implementation due to the existing and projected pressures on infrastructure, including traffic increase, water supply, sewerage capacity and related matters. The very minimal treatment of implementation issues in Chapter 14 gives no indication of the deliverability of the Infrastructure Development Plan and undermines the soundness of the Local Plan.

Existing pressures on physical and social infrastructure are not identified and further analysis is necessary on present levels of provision. The local road network cannot handle further traffic increases and the continuation of car dependent development proposals is just one example of the inadequacy of planned provision.

Deliverability of the Draft Local Plan and its inappropriate proposed levels of housing and other development is likely to be constrained by infrastructure such as sewerage capacity, water supply, flooding, air quality concerns. Water related issues will lead to potential environmental damage to unique environmental assets including chalk streams, and the implications for health and well-being of residents and visitors are inadequately considered.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Draft Local Pan should provide significantly greater indication of the feasibility regarding implementation of policies and proposals. The lack of adequate consideration of the implementation of the physical development proposed renders the Local Plan unsound.

**328 - Charlie Thompson**

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 38

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraph 35 and 36 of the 2023 NPPF require that local plans be effective to be considered sound. To do so its policies must be deliverable over the plan period and dealt with rather than deferred.

Policy, both in Part A and Part B, refers to sites 'supporting' and 'contributing to' their required transport infrastructure mitigation. For example, strategic policy SP14 at Part A requires proposals for development to 'provide, finance and / or contribute' to infrastructure and allocation B1 at Part B requires that the site deliver 'Contributions / enhancements to support relevant schemes'. Policy therefore rightly requires that mitigation be made, and HCC supports the intention of the plan to ensure mitigation is made. However it leaves issues of the delivery mechanism and timing to the decision-maker. This specific allocation is only taken as an example, and the same principle applies to all allocations.

NPPF paragraphs 108, 109, and 100 govern how LPAs must consider sustainable transport provision in plan-making. Paragraph 108 sets a number of objectives including ensuring impacts on the network are addressed and pursuing opportunities to maximise active and public transport. The 2024 draft consultation NPPF further requires a vision led approach at paragraphs at paragraph 122.

To achieve this, the infrastructure required to achieve shift towards active and sustainable modes of transport must be provided by default prior to the first occupation. To do otherwise risks unsustainable behaviours being embedded prior to infrastructure being delivered and take-up

therefore being lower than that is needed to make development acceptable a decision-making stage. Policy TRA1 requires that on major development 'Active and sustainable connections to key destinations are deliverable at an early stage of development'. However, policy on infrastructure delivery does not dovetail with this requirement and therefore risks undermining this in practice. As stated above, policy is agnostic on delivery of financial contribution via a s106 agreement or CIL (if adopted) or directly via a s278 agreement. It is unlikely however that delivery of transport infrastructure via a financial contribution, even if sufficient to pay for infrastructure, can deliver infrastructure in sufficient time. Instead, this issue is deferred to development management stage.

Therefore for the aspirations of the plan to be considered deliverable and therefore sound the plan should take a more proactive approach to the delivery mechanism of infrastructure so that the aspirations of policy TRA1 are delivered.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To be considered sound the plan should:

1. Amend policy IMP1 at Part A to ensure that proposals demonstrate how transport schemes required to make sites sustainable will be delivered;
2. Amend policy in the site allocations at Part B to refer to delivery of infrastructure rather than just contributions; and
3. Amend the Infrastructure Impact Assessments to refer to delivery of infrastructure rather than just contributions;

Firstly, policy TRA1 should be strengthened to ensure that transport infrastructure will be delivered in the real world rather than be merely deliverable in the abstract. Demonstrating deliverability in the abstract is not a sufficiently robust test as applicants would not have to demonstrate that the delivery mechanism, as well as the scheme itself, ensures delivery at an early stage of development.

*Major proposals must demonstrate as appropriate how...Active and sustainable connections to key destinations [deleted text] will be delivered at an early stage of development;*

Similarly, policy TRA3 should be amended along similar lines to ensure that infrastructure is delivered in practice for proposals generating heavy goods vehicle movements:

Encourage and enable Heavy Goods Vehicles to use the primary route network by means of signing and traffic management.

Secondly, the policy wording in the site allocations at Part B should be amended to give support to delivery of infrastructure (irrespective of the delivery mechanism) rather than wording that implies making a financial contribution that may be incapable of being secured, spent, and delivered early in the development.

For example, at allocation B1 (taken as an example only):

Contributions / [deleted text] to delivery of support relevant schemes in the LCWIP and GTPs as indicated in the TIA.

[deleted text] Improvements via delivery or contributions to the transport network (including walking and cycling links) and public transport services upgrades / improvements, including off-site improvements to Harpenden Road, Sandridgebury Lane, Valley Road, Ancient Briton junction and King William IV junction, links to St Albans City Centre, station and education, aligned to schemes in the GTPs and LCWIP.

Similar wording appears in all the allocations and should be amended along the lines of the above.

Finally, the TIAs should be amended on similar lines, again taking allocation B1 as an example:

5. Settlement Strategy – St Albans (Indicative Contributions)

This site will make significant contributions or direct delivery of infrastructure to

St Albans Settlement Strategy.

Taken together, these amendments would ensure that both the scheme and the delivery mechanism align to provide infrastructure early in the build out of development, thereby enabling sustainable travel behaviours and mode shift in line with the NPPF sustainable development objective

## Part B - Local Plan Sites

### 30 - MS REGINE JEANNIN

Submission Number: 30 Submission Date: 27/10/24 20:26

Respondent: Company/Organisation: Name: MS REGINE JEANNIN

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

My concerns previously raised have not been addressed: The Plan generally appears to have taken ARUPs Green Belt review and just used these sites, without further consideration of other important factors, such as traffic, schools, doctors and other sustainabilty aspects. In addition, there appears a general desire to concrete over the Green Belt, rather than redeveloping Brownfield sites.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

On behalf of our client, we submitted a detailed representation for the Reg 18 consultation relating to our client's land at River Junction, which is considered suitable for circa 185 homes. This has not been considered at all within the Reg 19 policy or evidence base, specifically the Site Selection and Allocation 2024. We therefore re-submit this information for consideration.

Please refer to the attached supporting representation with regards to Images, Maps and Figures referenced.

These representations have been prepared by hgh Consulting and are submitted on behalf of our clients, Yuval Hen, Oren Arush and Rabbi Asaf Portal, in response to the consultation on the Regulation 19 version of St Albans City and District Council's (SACDC) Local Plan. Our clients own approximately 24ha of land to the north of Radlett, which is known as River Junction. A site location plan is included at Figure 1 below.

It is considered that the site at River Junction is suitable for a mixed-use development providing approximately 185 new homes, employment space targeted towards micro, starter and SME businesses, shared workspace, a café and community facilities. A concept masterplan has been developed by Mountford Pigott Architects which is based upon a comprehensive understanding of the site and surrounding area in addition to the aspirations and requirements of the Draft Local Plan.

This representation provides a detailed description of the site, its surrounding context and its suitability for development (including an assessment of the Green Belt designation). It provides a summary of the concept masterplan and demonstrates how this responds and contributes to the identified housing and employment need within SACDC.

This representation also looks at the wider context, providing commentary on the Council's proposed housing and employment floorspace delivery and site allocations.

**Site and Surrounding Area**

The site currently comprises an area of low-quality agricultural land (predominantly grass and scrub), with no agriculture currently taking place. It is located within Colney Street, approximately 2km to the north of Radlett and 2km to the west of Brickett Wood.

The primary access to the site is from Radlett Road (A5183) to the east. There is also limited access from Smug Oak Lane to the north, although this is constrained and would not be suitable for larger vehicles. The two points of access are shown in Figure 2 below:

The site is bounded by several residential properties to the east, agricultural land to the north, the River Colne to the south and River Ver to the west. The surrounding area is primarily agricultural in nature interspersed with residential dwellings. Directly opposite the site on the other side of Radlett Road is a large industrial/business estate known as Ventura Park, which is designated as a Protected Employment Area in the Draft Local Plan.

The majority of the site is located within Flood Zones 2 and 3, which means the land has a medium to high probability of land having a 1 in 100 or greater annual probability of river flooding. The extent of these flood zones is shown on the map below:

With regard to public transport links, the site is only 5 minutes walk from a bus stop on Radlett Road which provides an hourly service to Radlett Train Station (5 minute bus journey) Park Street Railway Station (7 minute journey) and St Albans (25 minute journey). There are direct services from Radlett to St Albans, Luton and central London. The M25 motorway is approximately 150m to the north.

*Planning Designations*

Within the St Albans and District Council adopted Policies Map the site is currently designated within the Metropolitan Green Belt and a Landscape Development Area. This Green Belt designation is carried through in the Regulation 18 Draft Local Plan, however the Landscape Development Area designation is not.

**Assessment of site suitability for development**

This section of the submission addresses the suitability of the site for mixed-use development,in the context of its location in the Green Belt and with consideration to environmental considerations including flood risk and transport and highways.

*Green Belt*

A detailed Green Belt Assessment has been carried out by Bryant Landscape Planning and is enclosed with this submission. The assessment considers the site's contribution to the purposes of the Green Belt (as set out within the NPPF), which are as follows:

- *Purpose 1: To check the unrestricted sprawl of large built-up areas;*
- *Purpose 2: To prevent neighbouring towns merging into one another;*
- *Purpose 3: To assist in safeguarding the countryside from encroachment;*
- *Purpose 4: To preserve the setting and special character of historic towns; and*
- *Purpose 5: To assist in urban regeneration, by encouraging the recycling of derelict and other urban land.*

The assessment concludes that the site does not contribute to purposes 1, 2, 4 or 5, as it does not lie adjacent to any built-up areas (and therefore doesn't function as a barrier against urban sprawl), nor does it lie within a strategic gap between neighbouring towns (historic or otherwise) and it is not within an urban location. The key contribution of the site to the Green Belt is therefore to purpose 3 (safeguarding the countryside from encroachment), against which it is considered to perform significantly.

The assessment considers that the development of the eastern part of the site could provide a new settlement edge which would be defensible in landscape terms (for example, with a native hedgerow) and would not give rise to a perception of excessive encroachment into the wider countryside. Indeed, the western part of the site is within a flood plain (as discussed below) and the topography of this part of the site would make any future development unlikely.

Due to the topography of the site, while the development would be visible from some locations,it would be viewed within the context of existing built form and development on Radlett Road.

The assessment concludes that development within the eastern part of the site would not weaken the integrity or contribution of adjacent Green Belt land. It is therefore considered that the site is appropriate for development, subject to addressing other planning policy requirements.

*Flood Risk*

The site is located adjacent to the River Ver and River Colne. As shown in Figure 3 above, the eastern part of the site is in Flood Zones 1 and 2 and is suitable for a variety of uses (including residential), while the western part the site is located within Flood Zone 3 and is therefore only suitable for less vulnerable uses. Full details are provided within the enclosed Flood Risk Statement prepared by Canham Consulting.

The eastern part of the site is considered to be appropriate for development, and the Statement confirms that the flood risk to this area can be mitigated through the implementation of an appropriate drainage strategy (incorporating SuDS) and mitigation measures such as level design and consideration to exceedance flows.

It is therefore considered that the eastern part of the site is appropriate for development from a flood risk perspective, which will be demonstrated through a detailed Flood Risk Assessment should a planning application be submitted in the future.

*Transport and highways*

The site is located to the east of the A5183 Radlett Road, from which it is accessed via an agricultural access. A second agricultural access is from Smug Oak Lane to the north. These points of access are shown in Figure 2 above.

A Transport Assessment has been undertaken by Markides Associates and is enclosed with this submission. The assessment demonstrates that the site can be safely accessed by vehicles, cyclists and pedestrians via an appropriately designed access point on Radlett Road.

The Assessment confirms that the site is located within cycling distance of key social infrastructure and there are also existing public bus services in proximity on Radlett Road, providing an hourly service to Radlett Train Station (5 minute bus journey) Park Street Railway Station (7 minute journey) and St Albans (25 minute journey).

The development of the site, as set out in the proposals prepared by Mountford Pigott Architects,

is not anticipated to result in a material impact on the local highway network. The site is therefore considered to be suitable for development in terms of transport and highways.

**Proposed concept masterplan**

A concept masterplan has been prepared by Mountford Pigott Architects, which has been

informed by a detailed understanding of the site and surrounding area. This comprehensive site analysis is set out in the enclosed design document, along with a detailed narrative explaining how the site brief has been developed to respond to this context and setting out design principles for the masterplan.

The concept masterplan seeks to provide a mix of uses on the site, including up to 185 homes,

supporting employment and commercial uses and a small-scale community floorspace. Full details are provided in the enclosed design document, but in summary, the masterplan proposes:

- Up to 185 new homes, all of which would be discounted market sale
- Up to 35 new employment units, suitable for SMEs (a total of 6,800sqm employment floorspace)
- A café with outdoor seating (up to 275sqm)
- Flexible community floorspace (up to 425sqm)
- Approximately 12.5ha of public open space with enhanced public access and biodiversity enhancement
- Policy compliant car and cycle parking provision

The concept layout has been developed to provide development areas appropriate in terms of

flood risk, which will be connected through new vehicle, pedestrian and cycle routes and supported by open spaces, with the western part of the site dedicated to biodiversity enhancement. The illustrative layout is as follows:

*Figure 4: Concept masterplan*

Details of the character areas within the masterplan and indicative street and building typologies are set out within the enclosed design document.

A Landscape Strategy has been developed for the site by the Landscape Agency. The strategy for the eastern part of the site includes character areas including areas of native woodland, open green space with playspace and green and leafy streets with trees and planting. The strategy also incorporates attenuation features which will play an integral role in surface water management, with ponds and swales.

The western part of the site will be dedicated as public open space, with biodiversity enhancements, new habitats, rewilding and pedestrian access.

Overall the proposed landscaping strategy will provide significant opportunity for Biodiversity Net Gain (BNG) across the site.

**St Albans Context Analysis**

*Housing Need and Supply*

The Council has a significant unmet housing need, with a five-year housing land supply of only 2.2 years (as set out in the 2021 AMR) which equates to a shortfall of 3,195 market homes and 4,360 affordable homes. This situation is not anticipated to improve as the Council has failed to meet the Housing Delivery Test (HDT) since 2016/17 and is only able to demonstrate a supply of 395 affordable homes over the next five years.

The requirement for housing is acknowledged within the emerging planning policy and the Regulation 18 Local Plan identifies a need for 888 dwellings per annum, which equates to 15,096 new homes until 2041.

The Draft Local Plan Housing Trajectory identifies that 11,681 of these homes will be delivered through the draft site allocations, with the majority of these to be in Hemel Garden Communities (a programme to regenerate Hemel Hempstead town centre and ‘growth areas’) and 12 identified ‘Broad Locations’ (areas of significant urban extension). The distribution of these site allocations is focussed upon extending existing urban settlements.

There is a significant number of homes (2,880 in total, 180 per year) which are expected to be delivered through windfall sites. This is a significant number of homes, and there is a considerable uncertainty that these numbers will be achieved, given the Council's historic failure to deliver on housing. We consider that SACDC should seek to increase the number of homes delivered through site allocations to address this shortfall.

With regard to housing mix, the Regulation 18 Local Plan Policy HOU1 requires a mix of dwelling types and sizes to meet the needs of current and future households and confirms that the greatest opportunity to provide for the specific locally needed mix of housing is provided by housing sites with a capacity of 100+ units. We note that the River Junction site has capacity for 185 residential dwellings, and as such is well placed to respond to the specific housing needs of Colney Street and the surrounding area.

The emerging policy position seeks to secure 40% on-site affordable housing under Policy HOU2. The site is able to exceed this provision, with the concept masterplan based upon 100% of homes to be provided as discount market sale.

*Housing Delivery*

We note that the Draft Local Plan Housing Trajectory identifies a significant delay before any of the housing identified in the site allocations is delivered, with no completions estimated to take place before 2028. Up until this point, the Council is relying upon existing planning permissions and windfall sites to deliver housing. Although the annual housing requirement has been identified as 888 per year, the Trajectory indicates a stepped approach, with only 398 units to be delivered per year until 2026, rising to 710 per year until 2031 and then increasing to 1,200 per year. This means that the Council will not be meeting their annual housing targets until 2031. It is therefore essential that additional sites are allocated which can be delivered in the short to medium term.

The River Junction site currently comprises vacant land which is in a single ownership and can be delivered as soon as planning permission is achieved.

*Employment Floorspace Need and Supply*

With regard to current employment provision, St Albans lies within the Southwest Hertfordshire Functional Economic Area (FEMA). The 2019 South West Herts FEMA Economic Study Update carried out for the relevant local authorities (the '2019 Update') concluded that there is a very limited supply of office space in St Albans, which acts as a significant barrier to growth and investment, and will make it increasingly difficult to attract and retain growing businesses. There is a requirement for 188,000sqm of additional office space and 481,500sqm of industrial space between 2018 and 2036 within Southwest Herts as a whole, which equates to 39,500sqm of office floorspace and 75,900sqm of industrial floorspace within St Albans.

The need for a significant amount of employment floorspace is acknowledged within the Reg 18 Local Plan, which identifies Protected Employment Areas and new industrial and business locations in East Hemel Hempstead and the Radlett aerodrome. The Local Plan notes that the District has experienced a loss in office floorspace in recent years due to Permitted Development Rights allowing residential conversions.

While the Local Plan suggests that the allocated employment sites will result in an oversupply of floorspace, we note that the Plan is relying upon the delivery of the Strategic Rail Freight Interchange at the former Radlett aerodrome to achieve this floorspace provision. Policy EMP2 acknowledges that this may not be delivered, stating there is only 'a reasonable prospect that the SRFI will be delivered during the Plan period', and the FEMA Study Update states 'there is still significant uncertainty about whether this development will go ahead'. Without the delivery of the SRFI, there appears to be a significant undersupply of employment floorspace. We therefore believe that the Council should seek additional site allocations to address this shortfall, and that the inclusion of 6,800sqm of employment floorspace at River Junction would significantly contribute towards this need.

**River Junction Site Allocation**

There are numerous benefits associated with allocating the site at River Junction for a mixed- use development. as follows:

*Site suitability*

The site is clearly suitable for mixed-use development, as demonstrated within the submitted reports; notably the detailed site and surrounding area analysis undertaken by Mountford Pigott, the Green Belt Assessment prepared by Bryant Landscape Planning, the Flood Risk Statement prepared by Canham Consulting and the Transport Assessment prepared by Markides Associates.

*Availability of site for development*

The site is in a single ownership and is available to be developed immediately. A scheme could be delivered quickly and within minimal delay, subject to obtaining planning permission.

*Provision of housing and affordable housing*

There is an identified need for housing within SACDC, and while the Local Plan goes some way to addressing this, it places significant reliance on the delivery of windfall sites. In addition, the current site allocations do not result in the substantial delivery of homes until 2031, due to the nature of these allocations (namely the large-scale of the urban extension sites and the timeframe taken to achieve planning permission for such schemes).

The site at River Junction is able to provide a significant contribution towards the identified housing need, with the provision of 185 affordable homes. The nature of the site (which is available for development) and the advanced stage of the concept masterplan development means that a planning application for the proposals could be submitted without delay and the scheme delivered quickly.

*Provision of employment and jobs*

The Draft Local Plan identifies a requirement for a substantial amount of employment floorspace, however it relies on the delivery of the Strategic Rail Freight Interchange at the former Radlett aerodrome to achieve the required employment floorspace provision, and the Plan itself identifies that there is a high level of uncertainty associated with the delivery of the SRFI.

The concept masterplan for River Junction includes a significant quantum of employment floorspace which would contribute towards this identified need, and could be delivered with minimal delay, providing employment and benefitting the local economy.

*Provision of supporting retail/community facilities*

The concept masterplan includes the provision of community floorspace, comprising a small shop to provide a valuable amenity for residents and employees.

*Provision of public open space and BNG gain*

The concept masterplan proposes a significant quantum of public open space, with over 12.5ha; far in excess of draft policy requirements.

The Landscape Strategy for the eastern part of the site includes character areas including areas of native woodland, open green space with playspace and green and leafy streets with trees and planting. The Strategy also incorporates attenuation features which will play an integral role in surface water management, with ponds and swales.

The western part of the site will be dedicated as public open space, with biodiversity enhancements, new habitats, rewilding and pedestrian access.

Overall, the landscape strategy will result in significant Biodiversity Net Gain across the site.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Consideration of our client's site, River Junction, within the Site Selection and Allocation 2024

**Summary**

This submission has clearly demonstrated that the site at River Junction is suitable for development, and that the allocation of the site for housing and employment uses would make a significant contribution towards the identified need for these land uses within SACDC,

There are numerous benefits associated with allocating the site at River Junction for a mixed-use development, including the provision of housing and employment floorspace in a sustainable location within a well-considered scheme which will deliver significant BNG gain.

We therefore request that the site is allocated within the St Albans Local Plan.

**Number:**

Existing development site

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

As a final point, we find it curious that there is no mention in the documents of the Harperbury development by Bloor Homes. The site straddles St Albans and Hertsmere (about 2/3 in St Albans). It makes sense to continue development on this site it but it needs some local facilities (a few shops) and proper consideration of transport links (as mentioned in the previous paragraph, the roundabout on Harper Lane to Shenley and to London Colney is already congested and needs improvement; the impact on the Harper Lane bridge; establishing a proper bus route). In simple terms, this site needs proper strategic planning consideration given to it rather than just being left to grow randomly or just left.

**Number:**

New sites

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

The Trustees own the land shown as Sites A and B on the attached plan (Appendix 1) which are separated by a school access owned by Herts C.C.

3) Site A has an area of 0.4614 hectares.

Site B has an area of 0.295 hectares.

4) The sites adjoin the settlement edge of Harpenden and are severed from the wider Green Belt by the Katherine Warington Secondary School and residential development to the north. The sites do not perform the five purposes for including land within the Green Belt.

**Background**

5) Sites A and B originally formed part of a larger agricultural field which was a subject of a resolution by Herts County Council to exercise compulsory purchase powers to acquire the land for the purposes of a secondary school. The compensation provisions mean that land to be compulsory acquired is only land which is needed/required for the purposes of the acquisition. The County Council accepted that it did not require the whole of the field for the purposes of providing a secondary school. In order to prevent a successful objection to a compulsory purchase order a lesser was agreed. The land was transferred to the County Council in 2018. This left Sites A and B and the farm buildings and paddock land to the north out of the purchase by the County Council, which used the compulsory purchase powers in the background.

6) The Katherine Warington Secondary School was constructed a few years ago and the early pupils now joining the newly opened Sixth (Sept 2024).

7) The agricultural buildings to the north of Site A obtained permission for change of use to four dwellings under Class Q of the General Permitted Development Order 2015 in February 2021 (P/A5/2020/3143 and 3142). The site of the buildings was then sold together with the adjoining paddock to a developer. The developer then obtained planning permission for three new dwellings in April 2022 (P/A5/2021/3482) on the same footprint as the original farm barns. Subsequent to that a further planning permission for an agricultural building was granted in January 2023 (P/A5/2022/2279). This agricultural building was 162sqm. A further planning application for a barn is pending determination (P/A5/2024/0208).

8) It will be evident both from plan and site inspection that the two parcels Sites A and B are severed from the wider countryside by the built form which surrounds them, (see photo's Appendix 2)

9) The sites no longer perform any of the five purposes for including land within the Green Belt due to the developments around the boundaries.

**Green Belt Study**

10) The Council's Green Belt study as part of its evidence base does not properly adopt a finer grain approach to considering Sites A and B in isolation and in the context of the surrounding development. Had it separately assessed these sites as identified in the "Call for Sites", it could not have reasonably concluded that Sites A and B should remain within the Green Belt, as they

do not perform the five purposes for including land within the Green Belt. The Green Belt Study upon which the Council relies, assessed Sites A and B as part of SA-29, which includes the school, playing fields, paddock and the 3 new dwellings and agricultural building. It was wrong to do so and the Study is flawed in respect of our clients land.

11) The omission of Sites A and B as a Green Belt release is in contrast to a number of the Council's proposed sites for Green Belt release to meet housing need; sites which have a wider and greater Green Belt impact. We would wish to review these comparisons ss part of the Examination.

**Sustainability**

12) Sites A and B adjoin the Harpenden settlement edge. They are on a bus route, adjoin a secondary school, within 490 metres of primary and nursery schools. There are pubs, petrol filling stations and shops within 480 metres and employment within 225 metres and 650 metres. The town centre and mainline railway station are within 1.5 kilometres. All of which can be reached safely by pedestrians.

13) Close to the site the Council is proposing an urban extension comprising site 82 northeast Harpenden which is identified for delivering 738 dwellings, extra care home, primary school and outdoor sports provision and new local centre.

14) The Reg 19, Para 1. 30 refers that the strategy is to locate growth in the most sustainable locations. Para 3.4 refers to "meet the needs within or close to existing settlements". Policy SP2 d) seeks to make "use of the most sustainable locations for growth "

**Proposed Housing**

15) Sites A and B have frontage to Common Lane. The sites have a depth of a minimum 37 metres.

16) Common Lane has all main services for the length of the two sites. Given the minimal infrastructure and servicing costs the sites closely fit towards a market requirements for small and medium enterprises and custom/self- build. Para 1.31 seeks opportunities for self build/custom build. Policy HOU5 makes provision for self build/custom build plots.

17) The expectation is that 9 x 3/4 bed detached houses with garages could be accommodated on Site A with a maximum of 30% 4 bed. On Site B, 9 smaller x 3 bed detached houses with/without garages. This would provide dwellings which takes into account the adjacent housing character and would represent attractive plot sizing for custom/self- build. The provision of a high proportion of 3 bed dwellings is where there is the highest need (Policy HOU1 ).

**Policy Objections**

18) The policies LG4 h) and DES3 a) provide a density of 40 d.ph as a minimum, these are simply unrealistic and unobtainable when it comes to small sites (up to 9 dwellings) and to a lesser extent for medium sites. These sites are not of a size which can accommodate a housing mix to achieve this density. As an example, a site proposed for 9 self- build/custom build (Policy HOU5) would be for individual plots for detached dwellings, (such as the successful council scheme Graven Hill, Bicester, Oxfordshire). Building co -operatives would be needed where the plots are not for detached dwellings, these are fraught with challenges which deters interest. Whilst it is recognised there are proposed requirements for such plots in the Broad Locations, discussions with housebuilders indicate is they are seldom taken up. They are unattractive to the market. Cause many issues concerning site security/ health and safety procedures and responsibilities. A minimum density for small/ medium sites should be deleted from the policy wording.

19) Policy HOU5 d) needs further wording that where the custom/self- build plots have not sold in the open market, then if offered to the Council or Registered Provider it will be at the open market value and failing that sold to a small/medium enterprise housebuilder.

**Is the Plan Justified**

20) Given the above, the Plan is not justified as an appropriate strategy as it does not take into and its evidence base for not doing so is not proportionate or indeed reasonable. In respect of Sites A and B the Councils Green Belt study conclusions to not stand up to scrutiny.

21) The plan policy for minimum densities to be applied to small/medium sites should be deleted. New wording should be inserted where this is an aim, but to have regard to the surrounding character and density and uses.

22) Whilst the Government's final definition of Grey Belt and the inclusion of Grey Belt as not being inappropriate development within the Green Belt, has yet to be confirmed; the proposed wording for Grey Belt includes *'any other parcels and/or areas of Green Belt land that make a limited contribution to the five Green Belt purposes'.* The case for the Trustees is that Sites A and B do not contribute to the five purposes. It is not the case these sites make a "limited contribution" to Green Belt purposes, but rather they make "no contribution". The Government consultation "Proposed reforms to the NPPF and other changes to the planning system" 24/09/2024 suggests an effective way of providing guidance and refers

*"Grey Belt Land which makes a limited contribution to the Green Belt purposes will:*

1. *a) Not strongly perform against any Green Belt purpose; and*
2. *b) Have at least one of the following features : Land containing substantial built development or which is fully enclosed by built form.*

*ii Land which makes no or very little contribution to preventing neighbouring towns from merging into one another.*

*iii Land which is dominated by urban uses, including physical developments*

*iv Land which contributes little to preserving the setting and special character historic towns".*

Sites A and B satisfies all Grey Belt tests.

**Has The Plan Been Positively Prepared**

23) This is a qualified objection. Our client raises no objection to the overall housing provision based upon the current standard methodology, though has issues with the housing delivery during the plan period given the Council only has a 1.5 years housing land supply. Should the Governments new standard methodology apply for the purposes of this Plan, then there is a gross under provision of housing. The new methodology would increase the housing numbers from 885 d.p.a. to 1,554 d.p.a., a 75% increase.

24) Whilst there have been Ministerial Statements regarding when the new standard methodology for housing need will apply, nothing is certain as to the final wording and timing when it will apply.

25) The current expectation based upon the Council's programme is that the local plan will be submitted before the Government's proposed Standard Methodology for determining housing need takes effect. It is important a Plan is in place given the acute housing shortfall with only a 1.5 years housing land supply and to enable early new housing delivery. A further period of time without an up to date Plan will only add to an already difficult situation, so getting the Plan to Adoption is important. However, given the circumstances the Council has found itself, with a significant risk of unmet housing need, it is very important to identify and allocate in this plan more sites where possible and appropriate.

26) Given that planning policy and the plan process is a bit of a "moveable feast" the expectation in 25) above, may not be realised and there is no certainty. It is in any event clear the proposed housing provision will not meet the future development needs during the local plan period and an early review will be required.

27) In the event the new Standard Methodology does not apply to this Local Plan and the Council meets the deadline for submission, then our client is of the view the Council should commit to an immediate review following the Adoption of the Plan. There will a period between the Inspector's report and the Council's formal Adoption for Council officers to start the preliminary internal processes.

**Housing Trajectory**

28) The Council's housing trajectory (Table 3.2) for delivering housing from the Broad Locations is overly optimistic given the timelines for all the necessary planning approvals and lead in times for infrastructure.

29) Lichfields, produced a report in 2020 "Start to Finish" which reviewed build out rates of large housing sites across te country. This showed that nationally the average planning approval period for large sites of say 1,000 dwellings was 4.6 years. Given the local councils do not embrace new development but are reluctant participants when it comes to development on green fields, locally the time is longer. The Lichfield report also analyses tbuild out rate on large sites. The averages for sites 500-1 ,000 was 68 d.p.a., 1,000-1499 was 107 d.p.a. It is generally acknowledged that the early development years of schemes the completion rates are far less than the average. The build out rate in the early years for the Broad Locations is again overly optimistic.

30) My experience of the delivery of large sites in Hertfordshire, a county which has been reluctant to housing growth for decades, is that it will not be until the early/mid 2030's that many of the "Broad Locations" begin to deliver housing, the exceptions possibly being part of West Redbourn and part of North St Albans where permission has either granted or the application is well advanced. I set out below examples I have been involved with or are aware.

31) **Hemel Hempstead.** Allocated site for 900 dwellings in the Sites Allocations, Adopted 2017. Hybrid Planning Application submitted 21/12/2018. Granted 03/12/2021. Price negotiation with land owners and following approvals of pre- commencement conditions, start date on site November 2024. First dwelling for occupation November 2025. Total time for an allocated site from planning application to delivery of first dwelling 7 years.

32) **Stevenage.** Allocated site for 1,350 dwellings in Adopted Local Plan 22/05/2019. Hybrid planning application 07/04/2021 . Following Section 106 negotiations expected planning permission November 2024. There will be a period of negotiations on value which involves the Council and Homes England, with probable reference to an Expert, allow 18 months. Planning precommencement condition approvals, allow further 9 months. Lead in time for infrastructure to first dwelling allow further 18 months. Total time for an allocated site from planning application to first occupation just under 7.5 years.

33) **Hitchin.** Outline Planning Application for up to 700 dwellings submitted in advance of Local Plan on the 26/04/2018. Site allocated in the Adopted Local Plan November 2022 for 700 dwellings. Awaiting a decision. First occupation is likely to be in excess of 9 years from application.

34) On the basis of the above it is my view a reasonable expectation is that for large sites there is a 7 year gap between the submission of a planning application to first delivery of a completed dwelling. Given that to date with a couple of exceptions, applications on large sites have not been registered I think my estimate of early to mid 2030's is supported by the evidence. There are varied reasons why these sites have taken so long (continued public and councillor resistance, officer

workload) .This will apply to all sites. That is why the timescales envisaged in the Housing Trajectory are not in some instances likely to be achieved. In my view based upon evidence, the first housing on most of the larger sites will not be delivered until the early/mid 2030's.

35) From the Councils own housing figures there is a substantial shortfall in delivery up to the 2030's. This under provision needs to be reduced with more small sustainable sites. Small sites are usually less constrained by infrastructure delivery because this is already available, or complicated Section 106 agreements involving both District and County. Early delivery is essential given the Council only has a 1.5 year housing land supply.

36) A greater number of smaller sites which do not have constraints to delivery need to be identified. Sites A and B are an obvious example.

37) The Council's identified urban sites include many which are Council owned comprising many garage blocks with poor access, city and town car parks and community buildings. It is very unlikely the total housing numbers indicated from these sites will be achieved. There will be objections to the loss of vehicle parking land, this loss of spaces creates further pressure for "on street" parking and in the case of public car parks the impact this will have upon the vitality and vibrancy of the town centres. Any loss of car parking provision or community buildings is likely to be strongly resisted by the local community. Access to many is substandard for residential development and comprise of back land plots out of character to the surrounding area.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**That our client's sites identified as A and B on the attached plan should be included as a Green Belt release and allocated for housing.**

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. G A Simons Reg 19 Subs 2024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

It is important that the Council is questioned upon its approach to Green Belt Release given the apparent inconsistences where some sites have been identified and other more obvious ones omitted. The Councils minimum density for all sites irrespective of size is not reasonably achievable for small sites. The housing trajectory is overly optimistic. It's reliance on urban sites delivering the numbers indicated, is not reasonably achievable given the constraints of many of the sites.

It is evident that more sites need to be allocated to meet the housing numbers, particularly in the short term.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 83 - Affinity Water

Submission Number: 83 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Name: Lita Khazaka

On Behalf Of Company/Organisation: Name: Affinity Water

Comment Number: 14

**Type:**

* Site

**Number:**

New site

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

NEW SITE SUGGESTION: Affinity Water Depot, Roestock Lane, Colney Heath

Affinity Water has set out above that: (a) the council's spatial strategy may be at risk because of its reliance on one large urban extension at Hemel Hempstead; (b) that its housing target is flawed and does not contain an appropriate buffer of sites in its trajectory; (c) that it has not planned for enough gypsy and traveller housing which represents a potential legal defect in the Local Plan, and that this shortfall should be covered on all Broad Allocation sites; and (d) that some of its allocations are at odds with other planning policies (minerals and community infrastructure protection).

For this reason, it is appropriate that other better sites are brought forward as site allocations in the Local Plan.

Affinity Water wishes to promote the surplus part of its depot/ reservoir (1.42 ha gross) for housing development to help address the defects identified above. It is Green Belt land on the south side of Roestock Lane between Roundhouse Farm to the north east and Hall Gardens to the south west and between the settlements of Roestock and Bullen's Green. It contains a number of buildings associated with its use as a depot. There is extensive tree cover around its southern, eastern and western boundaries (refer Figure 3 in attachment).

It is immediately to the west of the site known as Roundhouse Farm, Bullens Lane which straddles the district's border with the Welwyn Hatfield Borough Council area and has outline planning permission for up 100 new homes (refer Figure 4 in attachment).

The site is now being promoted for housing having taken account of a number of new considerations since an outline planning application for housing on the site (5/2015/0784) was refused.

The reasons for promoting the site now are: the need for the Local Plan to deliver a higher housing target than the publicised version; the need for more "specific, deliverable sites" to come forward in the first five years of the lifetime of the Local Plan to address a worsening performance in recent years since planning permission was refused for housing; and recent local Green Belt considerations including the findings (and defects) of the Arup Green Belt Part 2 Review as it relates to Washed Over Villages. This case is set out below.

This Planning Statement has demonstrated above why the council has to plan for a significantly higher housing target of "at least 17,700 homes" with a trajectory of 21,240 homes rather than the "at least 14,603 homes" figure in the Regulation 19 Draft. This site will make a contribution towards meeting this higher target.

This Planning Statement has also demonstrated that the Draft Local Plan housing trajectory is inconsistent with national planning policy because it has not identified a schedule of "specific, deliverable" sites in Years 1 to 5 of its life. This site has few constraints. It is not in a Conservation Area. The trees on the site are not covered by a Tree Preservation Order. It is in Flood Risk Zone 1. It could easily be delivered within the first five years of the lifetime of the Local Plan.

Much of the site is previously developed land. Theoretically, developing this site for housing will both accord with national policy to promote brownfield land first (Section 11 of the NPPF) and support the Draft Local Plan (Policy SP1 and Chapter 3) too. There are no other known environmental constraints with the site that could not be addressed on site. These factors reinforce the suitability of this site for consideration in principle.

The site is previously developed land and therefore some form of housing development would not be inappropriate (refer paragraph 154(g) of the 2023 NPPF and draft Policy LG9 – Extension or Replacement of Buildings in the Green Belt). It is submitted that given this fallback position in policy, the council should plan positively to release this site.

It is submitted that promoting this site would give the council more control over the release of Green Belt land elsewhere in the district and thus it would be plan-led.

Finally, the council has commissioned Arup to carry out a Green Belt Review. Its findings are interesting both for what it has recorded and for what it has not. Its omissions lend further support to Affinity Water's view that this site should be included as a site allocation.

The area in which the site is located is referred to in both the Stage 2 Green Belt Review and the Washed Over Villages Study.

The Stage 2 review covers the whole of the district identifies the site within a Strategic Land Parcel 34 (refer Figure 3.2) using the methodology of the 2013 SKM study. That earlier study acknowledged that the Parcel had one of the highest proportions of built land but that it formed a function of separating the coalescence with Hatfield to the east.

The Stage 2 report and Washed Over Villages study prepared a decade later has continued to assess the area and context as if nothing has changed here, that is as if this part of the district comprises three distinct settlements (refer Figure 5 in attachment).

That is wholly inappropriate given that the part of the parcel (the Roundhouse Farm site has outline planning permission). It is submitted that not having regard to this factor has altered the findings of both the Stage 2 and Washed Over Villages study. Particularly, with regard to the Washed Over Villages study, it is noted that much of the landscape context that contributes to the purposes of the Green Belt has been seriously eroded because of this grant of planning permission. Furthermore, the grant of planning permission effectively results in the coalescence of two of these settlements (refer Figure 5 in attachment), thus the Affinity Water depot can be more readily be seen as a modest infill site.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Cognisant of these new factors since the 2015 planning application, Affinity Water suggests the Affinity Water Depot, Roestock Lane, Colney Heath should be promoted as a site allocation that could usefully deliver up to 34 new dwellings consistent with draft Policy LG4 – Large, Medium and Small Sites.

To support this allocation, a template for the site's inclusion in Part B of the Local Plan is set out at Table 4 (see attachment).

RIVERSIDE FARM, RADLETT, WD7 7HS

**Introduction** These representations have been prepared by hgh Consulting and are submitted in response to the consultation on the Regulation 19 version of St Albans City and District Council's (SACDC) Local Plan 2041 which was published in September 2024. Our client owns the land shown in Figure 1 below, which is known as Riverside Farm. *Figure 1: Site Location Plan*

It is considered that the site at Riverside Farm is suitable for residential development and should be allocated for this use within the Local Plan. This representation provides a detailed description of the site, its surrounding context and its suitability for development. It also considers the wider

context, providing commentary on the Council's proposed housing delivery and site allocations as set out within the Local Plan Regulation 19 consultation documents, and how these sit within the current planning and political context.

**Site and Surrounding Area** The site is located approximately 500m to the northwest of Radlett and 1km to the southwest of Bricket Wood. It is accessed directly from Smug Oak Lane (at the junction with Drop Lane), which runs adjacent to the M25 to the north. The site currently comprises a purpose-built livery yard with stables, a large barn containing an indoor sand school, an outdoor sand school and lunge ring, and associated outbuildings providing facilities such as a tack room, laundry and drying room. To the south of the equestrian centre buildings are a number of paddocks for horse grazing. The site also includes areas of woodland and soft landscaping. The site layout and existing built form can be seen in the aerial image below: *Figure 2: Site Layout*

The site is bounded by the River Colne to the south and River Ver to the east. Netherwylde (a private dwelling within the same land ownership as the equestrian centre) is located to the southeast and there are a number of residential dwellings to the north, on Drop Lane. As seen in the figure below, the majority of the site sits within Flood Zone 1, with the exception of the northeastern part of the site and land directly adjoining the Rivers Colne and Ver.

*Flood zone areas within the site* With regards to public transport links, the site is in close proximity to Bricket Wood station, which is 1.2miles west of the site, which serves the West Midlands Railway. Radlett Station is 2 miles southeast of the site which serves the Thames Link. There are bus routes along Radlett Road, providing an hourly service to Radlett Train Station Park Street Railway Station and St Albans.

*Planning Designations* Within the St Albans City and District Council Draft Policies Map (the figure below), the site is designated within the Metropolitan Green Belt.

**Assessment of site suitability for development**

This section of the submission addresses the suitability of the site for residential development, in the context of its location in the Green Belt and with consideration to the environment. *Green Belt*

The NPPF sets out the purpose of the Green Belt, which are as follows:

- *Purpose 1: To check the unrestricted sprawl of large built-up areas;*
- *Purpose 2: To prevent neighbouring towns merging into one another;*
- *Purpose 3: To assist in safeguarding the countryside from encroachment;*
- *Purpose 4: To preserve the setting and special character of historic towns; and*
- *Purpose 5: To assist in urban regeneration, by encouraging the recycling of derelict and other urban land.*

The site does not lie adjacent to any built-up areas (and therefore doesn't function as a barrier against urban sprawl), nor does it lie within a strategic gap between neighbouring towns (historic or otherwise) and it is not within an urban location. The key contribution of the site to the Green Belt is therefore to purpose 3 (safeguarding the countryside from encroachment).

The site currently comprises a significant amount of built form, with stables, barns and outbuildings associated with its use as an equestrian centre. It therefore comprises previously developed land (PDL) within the Green Belt. It is acknowledged that development of the wider site would encroach on undeveloped land, however this would be limited by the topography of the site, and its location in relation to the rivers (and associated flood risk). Development would therefore affect the openness of the site but it would not weaken the integrity of adjacent Green Belt land or its contribution to the purposes of the Green Belt, and it would not diminish the overall contribution of the wider Green Belt designation. The contribution of the site to the purpose of the Green Belt and relevant policies would be assessed in detail if the site were to come forward for development and a planning application submitted.

*Flood Risk* The site is bounded by the River Colne to the south and River Ver to the east. The middle of the site is in Flood Zone 1 and is suitable for a variety of uses (including residential), while the edges and the northeast of the site are located within Flood Zone 3 and are therefore only suitable for less vulnerable uses. It is therefore considered that the central part of the site is appropriate for development from a flood risk perspective, which will be demonstrated through a detailed Flood Risk Assessment should a planning application be submitted in the future.

*Transport and highways* The site is located to the south of Smug Oak Lane and to the west of the A5183, Radlett Road. The site is accessed via Smug Oak Lane, at the junction with Drop Lane. If this site is taken forward, a Transport Assessment will be undertaken which would demonstrate that the site can be safely accessed by vehicles, cyclists and pedestrians via an appropriately designed access point on Drop Lane. The site is located within cycling distance of key social infrastructure and there are also existing public bus services in proximity on Radlett Road providing an hourly service to Radlett Train Station and St Albans.

**St Albans Context Analysis**

*Housing Need and Supply* The Council has a significant unmet housing need, with a five-year housing land supply of only 1.7 years. The Council has also failed to meet the Housing Delivery Test (HDT) since 2016/17. The requirement for housing is acknowledged with the emerging planning policy and the Regulation 19 Local Plan identifies a need for 885 dwellings per annum, which equates to 14,603 homes until 2041. The Draft Local Plan Housing Trajectory identifies at 10,653 of these homes will be delivered through the draft site allocations, with the majority of these to be in Hemel Garden Communities and Broad Locations (250+ homes) The distribution of these site allocations is focussed upon extending existing urban settlements. www.hghconsulting.com Page 6 The Draft Local Plan expects 2,103 homes to be delivered through windfall sites.

This is a significant number of homes, and there is a considerable uncertainty that these numbers will be achieved, given the Council's historic failure to deliver on housing. We consider that SACDC should seek to increase the number of homes delivered through site allocations to address this shortfall. With regards to housing mix, Regulation 19 Local Plan Policy HOU1 requires a mix of dwelling types and sizes to meet the needs of current and futures households and confirms that the greatest opportunity to provide for the specific locally needed mix of housing is provided by housing sites with a capacity of 100+ units. The emerging policy position seeks to secure 40% on-site affordable housing under Policy HOU2.

*Housing Delivery* We note that the Draft Local Plan Housing Trajectory (October 1st 2024) identifies a significant delay before any of the housing identified in the site allocations is delivered, with no completions estimated to take place before 2029. Up until this point, the Council is relying upon existing planning permissions and windfall sites to deliver housing. Although the annual housing requirement has been identified as 885 per year, the Trajectory indicates a stepped approach, with only 389 units to be delivered per year until 2026, rising to 485 per year until 2031 and then increasing to 1,255 per year, before decreasing to 1,025 per year from 2036. This means that the Council will not be meeting their annual housing targets until 2031. It is therefore essential that additional sites are allocated which can be delivered in the short to medium term.

**Changing Context**

The Labour Government has proposed significant reforms to the planning system in order to increase housing delivery. A draft NPPF has been issued for consultation, which introduces a new method for calculating local authority housing targets to match the scale of new homes that the Government considers are needed – which equates to 370,000 new homes.

As set out on the St Albans City and District Council website, this would equate to a further 11,000 homes within the borough (rising from 885 to 1,544 per year – an increase of 74%). The aspiration to avoid delivering these homes is behind the Council's decision to accelerate the timetable for submission of the Local Plan. Should the draft Local Plan not be submitted for Examination within

a month of the publication of the NPPF, or the Plan be found to be unsound at Examination, then the Council will need to revisit their housing target and allocate additional land for housing accordingly.

The draft NPPF is also relevant to the site in terms of its location in the Green Belt. The draft NPPF introduces the concept of 'grey belt' land, which is defined as land which includes previously developed land (PDL) within the Green Belt. The site clearly falls within this definition and would be considered 'grey belt'. The draft NPPF suggests that such land should be released from the Green Belt. It also proposes that where a local authority cannot demonstrate a 5 year housing land supply or is delivering less than 75% against the Housing Delivery Test, development which would utilise grey belt in sustainable locations should not be regarded as inappropriate development in the Green Belt. www.hghconsulting.com Page 7 In light of the draft NPPF, the acute shortfall in the housing delivery in SACDC and lack of 5 year housing supply, we consider that the Council should look to amend the existing Green Belt boundaries and seek further site allocations to support the delivery of additional housing. The site at Riverside Farm would be suitable for allocation, as set out further below.

**Riverside Farm Site Allocation**

There are numerous benefits associated with allocation the site at Riverside Farm for residential development, as follows: *Site Suitability* The site is clearly suitable for residential development, as demonstrated as above. *Availability for site development* The site is in a single ownership and is available to be developed immediately. A scheme could be delivered quickly and with minimal delay, subject to obtaining planning permission. *Provision of housing and affordable housing* There is an identified need for housing within SACDC, and while the Local Plan goes some was to address this, it places significant reliance on the delivery of windfall sites. In addition, the current site allocations do not result in the substantial delivery of homes until 2031, due to the nature of these allocations (namely the large-scale of the urban extension sites and the timeframe taken to achieve planning permission for such scheme). The site at Riverside Farm is able to provide a significant contribution towards the identified housing need.

**Summary** This submission has clearly demonstrated that the site is suitable for development, and that the allocation of the site for housing would make a significant contribution towards the identified need for residential uses within SACDC. We therefore request that the site is allocated within the St Albans Local Plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

This submission has clearly demonstrated that the site is suitable for development, and that the allocation of the site for housing would make a significant contribution towards the identified need for residential uses within SACDC. We therefore request that the site is allocated within the St Albans Local Plan.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Riverside Farm - Representations [R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Please see the enclosed submission.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**Number:**

New site - Land at Smug Oak Lane, Bricket Wood

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

*Please see attachment for tables and images referenced below:*

St Congar have an interest in the Land at Smug Oak Lane in Bricket Wood as set out within these representations.

The representations are made in the context of the tests of soundness as set out in paragraph 35 of the current National Planning Policy Framework (NPPF). This states that plans are 'sound' if they are:

***Positively prepared*** *– providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*

***Justified*** *– an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*

***Effective****–deliverable over the plan period, and based on effective joint working on crossboundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*

***Consistent with national policy*** *– enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant.*

The wider context is that an up-to-date local plan for St Albans is long overdue. The council has one of the oldest Local Plans in the country which dates back to 1994. The previous attempt to adopt a local plan came to a halt in April 2020 when the Inspector found significant issues of soundness including:

- Failure to engage constructively and actively with neighbouring authorities.
- The preparation of the plan was not in accordance with Council's Statement of Community Involvement.
- Failure of the Sustainability Appraisal to consider some seemingly credible and obvious reasonable alternatives to the policies and proposals of the plan.
- Failure of the plan to meet objectively-assessed needs.
- Absence of key pieces of supporting evidence for the plan.

Since the publication of the regulation 18 version of the plan for consultation last year, the Labour Government announced a significant consultation on the revised NPPF. Alongside this the government has proposed significant changes to the standard method of housing calculation which would see the housing need for St Albans increase from 885 dwellings per annum (dpa) under the current standard method to 1,544 dpa under the new method. The consultation for the NPPF and Standard Method ended in September 2024 and the new NPPF is expected to be released by the end of this year.

This increase in housing requirement was made clear to council members as part of the briefing on the regulation 19 consultation version at the full council meeting on 16 October 2024. Annex 1 of the draft NPPF sets out the proposed Implementation/Transition Arrangements. Paragraph 226 states that from the publication date of the new NPPF (+ 1 month) the policies set out within the new NPPF will apply unless one or more of the following apply with emphasis added:

1. *the emerging annual housing requirement in a local plan that reaches or has reached Regulation 19 (pre-submission stage) on or before [publication date + one month] is no more than 200 dwellings below the published relevant Local Housing Need figure;*
2. *the local plan is a Part 2 plan that does not introduce new strategic policies setting the housing requirement unless the relevant Local Plan Part 1 has been prepared applying the policies in this version of the Framework;*
3. ***the local plan is or has been submitted for examination under Regulation 22 on or before [publication date + one month].***

In order to meet the proposed transition arrangements under the emerging NPPF, the council has set out an ambitious programme for the adoption of the new local plan by early December which involves approval of submission of the plan for examination by full council at the end of November.

Paragraph 3.31 of the briefing paper to full council in October clearly set out the risks of the accelerated time frame for submission as follows:

*3.31. The accelerated timescale to Submission (intended on 2 December 2024, rather than as previously envisaged at the end of March 2025) means that there will be less time to undertake work to support Submission of the Plan and Examination, which raises the risk of having to withdraw the Plan at Examination. This is primarily because of the accelerated point of Submission in December 2024, rather than the end of March 2025:*

*1 – There will realistically be fewer agreed and signed Statements of Common Ground to assist the Inspectors.*

*2 – There will realistically be fewer and less extensive Topic Papers to assist the Inspectors.*

*3 – There will realistically be less time to prepare extensive responses to Objections or concerns raised at Regulation 19 stage to assist the Inspectors.*

In an important aspect of the local plan process is set out in Section 20 of the Planning and Compulsory Purchase Act 2004 sets out the process for independent examination and states that a local planning authority must not submit a development plan document to the Secretary of State for independent examination unless (with emphasis added)

1. *a) They have complied with any relevant requirements contained in regulations under this part, and*
2. ***b) They think the document is ready for independent examination.***

It is clear that a fastracked submission of a local plan would breach the requirements in this regard and the points of risk raised by council officers are highly pertinent. In any event, even if the plan was to be found sound, such an approach would mean that preparation of a new plan would be required under the provisions of paragraph 227 of the draft NPPF which states:

***Where paragraph 226 c) applies, local plans that reach adoption with an annual housing requirement that is more than 200 dwellings lower than the relevant published Local Housing Need figure will be expected to commence plan-making in the new plan-making system at the earliest opportunity to address the shortfall in housing need.***

It is patently clear that the council is attempting to subvert a justified and effective plan making process which could properly meet housing needs in favour of a short-lived victory of a plan meeting an outdated housing requirement which will need to be immediately updated and addressed in any event.

**Site Details and Background**

The site is located to the south of Smug Oak Lane to the west of Bricket Wood. The site is approximately 2.5 hectares in size and is currently used as open grazing land.

The site is outside of the settlement and within the green belt but has no other environmental or landscape designations. However, it adjoins existing built form on two sides with residential housing to the east and St Stephen Parish Council Hall and car park to the west.

St Congar has had an interest in the site for some time and dialogue took place with St Stephen Parish Council in April 2023.

Two options were presented to them:

**Option 1** – 75 homes with 100% affordable housing (owned and manged by a Registered Provider) with a policy compliant level of 17 affordable / social rent houses.

- 58nr intermediate / shared ownership houses
- No “for market sale” houses.

**Option 2** – 33 homes with 50% affordable housing.

- 16nr 3 and 4 bedroom market houses
- 11nr 2 and 3 bedroom affordable / social rent houses • 6nr 3 bedroom intermediate / shared ownership houses

The site is identified as site reference C-183 and STS-02-18/STS-02-21 in the Housing and Economic Land Availability Assessment and was previously noted as being *potentially suitable, available, and achievable subject to further assessment as part of the site selection process.*

Further analysis of the site selection process through the Sustainability Appraisal and Green Belt Review is set out within these representations.

**Sustainability Appraisal**

Paragraph 32 of the framework requires that Local Plans and Spatial Development Strategies should be informed **throughout** their preparation by a Sustainability Appraisal (SA) that meets the relevant legal requirements.

The legal frameworks for SAs are set out within section 19 of the Planning and Compulsory Purchase Act 2004 which states that the authority must prepare a plan *with the objective of contributing to the achievement of sustainable development.* Moreover, the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 states that SAs must ensure the potential environmental effects are given **full consideration** alongside social and economic issues.

Paragraph 32 of the framework goes on to state that the SA should *demonstrate how the plan has addressed relevant economic, social, and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered).*

In support of the regulation 19 version of the plan, the council has undertaken a Strategic Environmental Assessment (SEA) and Sustainability Appraisal (SA) (September 2024) in accordance with the requirements of Planning and Compulsory Purchase Act 2004.

Table B of Appendix 4 of the Sustainability Appraisal assesses the individual development sites as set out in the HELAA against the objectives of the site selection / sustainability objectives. This includes an assessment of the site as identified as STS-02-18/STS-02-21. The findings of the assessment are set out [in the attachment] and commentary provided against each in turn.

It is unclear through the Sustainability Assessment to what extent sites were not taking forward on this basis alone or whether other factors such as the green belt review had influence.

It is considered that the assessment of sites within the Sustainability Assessment is unsound as it is not effective or justified. Further commentary is set out on the site selection process and green belt review process within the representations.

**Housing Requirement**

The Housing Requirement for St Albans is derived from the Standard Method and sets out that the council must identify and allocate land for at least 15,096 net additional homes over the plan period or 888 dwellings per annum. The Local Housing Need derived from the Standard Method is a capped figure and it should be noted that the uncapped figure for St Albans is considerably higher at 1,165 dwellings per annum. The housing requirement under the proposed amendments to the standard method would see a further increase to 1,544 dpa. In several recent local plan examinations (Mid Sussex, Bournemouth and Elmbridge) inspectors have placed weight on the emerging standard method as a material consideration which indicates the direction of travel for government policy and have sought further consideration of a higher housing need accordingly.

As set out in the table [in the attachment], the council has consistently failed to deliver housing at the rate expected within the draft local plan.

The South West Herts Local Housing Needs Assessment indicates that 443 affordable rented dwellings and 385 affordable home ownership dwellings per annum would be needed in St Albans District to meet demand. This would represent a total of 825 dwellings per annum which is almost the entire annual housing target in the plan. It is therefore considered that the use of the capped current standard method masks the true and pressing affordable housing need in the district which will continue to grow without consideration of a higher housing target.

St Albans is in a wider region of significant unmet need from other nearby/adjoining authorities. Three Rivers District Council is advancing with a revised plan which is described as *Low Housing Growth and Green Belt Restraint* and 6,600 homes short of Local Housing Need (LHN). Hertsmere Council published a draft plan in April 2024 which is 2,200 homes short of LHN. Dacorum Borough Council set out a consultation document in October 2023 which gives rise to an unmet need figure in the region of 2,800 homes. There is also a requirement for further consideration of unmet need from adjoining London Boroughs (Barnet, Enfield and Harrow) which are all progressing with local plans. Specifically, the draft Enfield Local Plan states that there could be a shortfall of 38,000 homes in the borough by the end of the plan period. The unmet need in the surrounding areas is of a substantial magnitude which also gives rise to further requirements in terms of Duty to Cooperate which are set out below.

Finally, as set out, the adoption of an up-to-date plan has been considerably delayed for St Albans and it is vital that a sound a robust plan is put in place which would allow for the delivery of much needed market and affordable housing to be delivered in the early part of the plan period.

**Duty to Co-operate**

Paragraph 26 and 27 of the National Planning Policy Framework emphasises the importance of maintaining effective co-operation throughout the plan making process and states (with emphasis added):

***Effective and on-going*** *joint working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy. In particular, joint working should help to determine where additional infrastructure is necessary, and whether development needs that cannot be met wholly within a particular plan area could be met elsewhere.*

*In order to demonstrate* ***effective and on-going joint working****, strategic policy- making authorities should prepare and maintain* ***one or more*** *statements of common ground, documenting the cross-boundary matters being addressed and progress in cooperating to address these. These should be produced using the approach set out in national planning guidance and be made publicly available throughout the plan- making process to provide transparency.*

Section 33A(3) of the Planning and Compulsory Purchase Act 2004 sets out the activities which bodies subject to the duty to co-operate must co-operate on. Paragraph (3)(d) of section 33A of that Act provides that such bodies will be subject to the duty when undertaking activities that can reasonably be considered to prepare the way for the preparation of development plan documents, marine plans, and other local development documents, in this case the regulation 18 version of the Local Plan.

The Statement of Community Involvement for St Albans Council (February 2023) sets out a list of Specific Consultation Bodies in appendix A and lists the prescribed bodies as follows:

- Hertfordshire County Council
- Adjoining / neighbouring local planning authorities (Three Rivers District Council, Dacorum Borough Council, North Hertfordshire District Council, Welwyn Hatfield Council, Hertsmere Borough Council, Watford Borough Council, Central Bedfordshire District Council, Luton Borough Council)
- All town and parish councils in St Albans City and District Parish Councils in other Districts, where the Parish Council boundary adjoins St. Albans City and District

There has been no such update produced as part of the evidence base for the regulation 19 consultation.

Paragraph 1.12 of the Local Plan states:

*A Duty to Cooperate workshop for all prescribed bodies, including all neighbouring planning authorities and Hertfordshire County Council, was held in September 2022. Following the workshop follow-up letters were sent, with a specific request being sent to those neighbouring authorities that could potentially help to meet St Albans' need, including for land for housing and for a potential Strategic Rail Freight Interchange (SRFI).*

However, there is no evidence base document which sets out the outcomes of the workshop or any indication that engagement with the neighbouring planning authorities has been *ongoing* in the past year since the initial workshop. The Evidence Paper published in September 2024 sets out the response to the issues raised by the inspectors of the previous SADC local plan. In relation to DtC which was a key failing of the plan the council sets out that:

*The Council wrote to neighbouring authorities regarding Local Plan Vision, Strategic Priorities and Objectives, the Green Belt Methodology, and the SA Scoping Report in 2022 and the draft Local Plan Reg 18 in 2023. Pre-Reg 18 DtC Councillor meetings held 2022 during Reg 18 DtC Councillor meetings held Sept 2023 and during Reg 19 DtC Councillor meetings proposed for October 2024. SADC 'Can you help us meet our need' letters sent November 2022 and follow up letters on 'can you help us meet our need' sent 24.10.23 after Reg 18 and DtC Councillor meetings. Letters focus on the key issue of potential unmet housing need and approach to the Green Belt, and other cross boundary issues (including the SRFI, employment need, education provision etc.).*

It then states that this will be updated further at the Submission Stage and Statements of Common Ground will be prepared at the time of the plan submission and notes that an *Overarching Statement of Common Ground [will be] published with Reg 19.* No such overarching SOCG has been published with this regulation 19 consultation pointing to a lack of progress in this regard which is required to be remedied ahead of submission. In any event, letters sent to adjoining authorities asking for need to be met does not satisfy actions required under the DtC and it is clear that the plan is fatally unsound on this basis alone.

Given that a failure of the Duty to Co-operate was one of the primary reasons the previous Local Plan was found unsound, then it is highly surprising that this matter has not been adequately evidenced from the outset of the plan making process. In its current form the plan is not effective, justified nor has it been positively prepared and is therefore unsound on this basis. This is a matter which must be remedied before the draft Local Plan can proceed to any next steps.

**Reasonable Alternatives**

The Planning Practice Guidance sets out the way in which the Sustainability Appraisal should assess reasonable alternatives and identify likely significant effects as follows:

*The sustainability appraisal needs to consider and compare all reasonable alternatives as the plan evolves, including the preferred approach, and assess these against the baseline environmental, economic, and social characteristics of the area and the likely situation if the plan were not to be adopted. In doing so it is important to:*

- *outline the reasons the alternatives were selected, and identify, describe, and evaluate their likely significant effects on environmental, economic, and social factors using the evidence base (employing the same level of detail for each alternative option). Criteria for determining the likely significance of effects on the environment are set out in schedule 1 to the Environmental Assessment of Plans and Programmes Regulations 2004;*
- *as part of this, identify any likely significant adverse effects and measures envisaged to prevent, reduce and, as fully as possible, offset them;*
- *provide conclusions on the reasons the rejected options are not being taken forward and the reasons for selecting the preferred approach in light of the alternatives.*

*Any assumptions used in assessing the significance of the effects of the plan will need to be documented. Reasonable alternatives are the different realistic options considered by the plan-maker in developing the policies in the plan. They need to be sufficiently distinct to highlight the different sustainability implications of each so that meaningful comparisons can be made.*

*The development and appraisal of proposals in plans needs to be an iterative process, with the proposals being revised to take account of the appraisal findings.*

*[Paragraph: 018 Reference ID: 11-018-20140306 Revision date: 06 03 2014]*

Table 5.2 of the SA sets out the Reasonable Alternative Growth Scenarios which are tested as part of the regulation 19 consultation.

There are two significant failings in the testing of reasonable alternatives in the plan. The first being that only figure marginally in excessive of the Local Housing Need (+12%) has been tested. No testing has been undertaken on a substantially increase housing figure which would take in to account the emerging NPPF requirements or would address the significant unmet need from local authorities. It is not suggested that there would not be significant impacts with this approach, but it would also give rise to substantial economic and social benefits. There is no justification to not testing this approach at all as part of reasonable alternatives.

Secondly, it is only a higher delivery from St Albans or Redbourn which are tested in the growth scenarios. The figures from Bricket Wood are consistently either 127dpa or alternatively 0dpa. It is not considered that this approach adequately tests credible reasonable alternatives with particular focus on the wording of the PPG which requires the alternatives *to be sufficiently distinct to highlight the different sustainability implications of each so that meaningful comparisons can be made.*

Paragraph 75 of the Inspector Report for the previous Local Plan set out the following in relation to Reasonable Alternatives:

*Based on our concerns set out above, we consider that there are a number of obvious and seemingly credible reasonable alternatives that have not been considered. This being so, we are not convinced that either the SA or the SA addendum has considered and compared reasonable alternatives as the Plan has evolved, including the preferred approach, and assessed these against the baseline environmental, economic and social characteristics of the area and the likely situation if the Plan were not to be adopted.*

Overall, it is not considered that the Sustainability Appraisal has adequately considered Reasonable Alternatives and the plan is therefore not justified or effective in that regard.

**Hemel Garden Communities**

The Draft Local Plan has a strong reliance on the delivery of at least 4,750 new homes as part of the Hemel Garden Communities programme by 2041 under policy LG2. This represents just over 31% of the entire housing requirement. The delivery of the Hemel Garden Communities is reliant on cross boundary working with Dacorum Council.

The Housing Trajectory as set out in Table 3.2 of the Local Plan indicates that delivery of dwellings from the Garden Communities will start in 2029/30 then continue to the end of the plan period as [set out in the attachment]:

Even with the expedited timeframe for the local plan as now envisaged it is considered overly ambitious to expect delivery of dwellings from a site of this scale only three years after adoption of the plan.

The second edition of the *Start to Finish Report* prepared by Lichfields in September 2024 sets out key figures based on actual examples of large developments across the country. The report states that the average time from validation of the first planning application to the completion of the first dwelling on schemes of more than 2,000 dwellings is 6.6 years, considerably more than the 3 years being predicted in the housing trajectory.

The *Start to Finish* report also examines the average build out rates for large schemes of 2,000+ dwellings and puts this at 100-188dpa. Again, this is considerably less that the delivery rate predicted in the housing trajectory.

The speed of delivery of housing within the plan period from garden communities is a matter which has led to findings that plans produced by other local authorities were not sound with the most recent examples being Tandridge District Council and the North Essex Authorities.

Overall, it is accepted that the development of a garden community at Hemmel Hempstead is required and could deliver sustainable places in the much longer term. However, the overly ambitious expectations for the delivery of housing from the garden communities within this plan are not considered to be effective and the plan would not be sound in its current form.

**Site Selection Process**

The site at Smug Oak Lane was assessed in the Green Belt Review in the wider Strategic Land Parcel 27 as site SA-121. Overall, the review sets out the following scores [see attachment] against the individual purposes of the green belt:

The assessment sets outs out detailed commentary on the impact of development of the site on each of the individual purposes.

The scores against purpose 1 are considered appropriate given the location of the site.

Regarding purpose 2 (to prevent neighbouring towns merging into on another) the assessment sets out the following commentary (with emphasis added):

*The sub-area is not located at the edge of the settlement. The sub-area would introduce a new area of built form, which would perceptually and physically narrow the existing gap between Bricket Wood and How Wood; and between Bricket Wood and Radlett and reduce the overall openness and scale of these gaps.* ***It is judged that there may be some scope for development without significant physical or perceptual erosion of the gap between neighbouring built-up areas. The M25 provides an additional barrier to the merging of settlements.***

The view that there is some scope for development is supported. On this basis it is considered that the score against this green belt purposes should in fact be lower. Regarding purpose 3 (to assist in safeguarding the countryside from encroachment) the assessment sets out the following commentary: *The sub-area is not covered by any built form. The sub-area comprises an open*

*field. It is bounded by intermittent tree lines and has a flat topography which limits views into wider countryside. There are some views onto neighbouring residential buildings. Overall, the subarea has a strongly unspoilt rural character.*

It is considered that the site is capable of being developed in such a way that the views into the wider countryside and corresponding rural character would not be harmed. Accordingly, the scoring of the parcel to this purpose of the green belt should be revised down.

Overall, it is considered that the council has taken an overly cautious approach to the protection of individual green belt sites which are highly appropriate for development. This concern was raised in the inspector report to the previous Local Plan at paragraph 49 which states:

*We also have concerns regarding the strategic site selection process. At Stage 1 a high number of sites were immediately discounted from further assessment on the basis of their Green Belt Review evaluation (and were rated red). The 4 identified amber sites all had only 1 or zero effects on the Green Belt Purposes (as identified for the relevant parcels in the 2013 Green Belt Review). However, representors refer to a number of sites that were rejected at Stage 1 despite also having zero or only 1 significant impact on Green Belt purposes (in the same way as the amber and green rated sites).*

As set out, it is considered that it is justified for the council to seek to meet a higher housing target for a number of reasons. These representations also set out significant concerns over the delivery of dwellings from Hemel Garden Communities within the lifetime of the plan. It is therefore considered that the council will need to seek to allocate other suitable and deliverable sites in order to meet the pressing need in the early part of the plan period.

The Planning Practice Guidance sets out what should happen if there are insufficient sites to meet housing need as follows:

*When preparing strategic policies, it may be concluded that insufficient sites / broad locations have been identified to meet objectively assessed needs, including the identified local housing need.*

*In the first instance, strategic policy-making authorities will need to revisit their assessment, for example to carry out a further call for sites, or changing assumptions about the development potential of particular sites to ensure these make the most efficient use of land. This may include applying a range of densities that reflect the accessibility and potential of different areas, especially for sites in town and city centres, and other locations that are well served by public transport. If insufficient land remains, then it will be necessary to investigate how this shortfall can best be planned for. If there is clear evidence that strategic policies cannot meet the needs of the area, factoring in the constraints, it will be important to establish how needs might be met in adjoining areas through the process of preparing statements of common ground, and in accordance with the duty to cooperate. If following this, needs cannot be met then the planmaking authority will have to demonstrate the reasons why as part of the plan examination. ]Paragraph: 025 Reference ID: 3-025-20190722 Revision date: 22 07 2019]*

It is considered highly appropriate that the council should consider the allocation of other sites in order to meet established housing need through both unmet need from adjoining authorities and/or the emerging increased housing need figures as a result of the standard method calculation.

**Comparisons with Other Allocations in Bricket Wood**

It is noted that three sites in Bricket Wood are identified in the local plan for release from green belt:

- M4 – North of Oakwood Road, Bricket Wood – 74 dwellings
- M15 – Bucknalls Drive, Bricket Wood – 44 dwellings
- M23 Ashdale Lye Lane, Bricket Wood – 9 dwellings

A further site (OS1 – Land to North of Bricket Wood) which adjoins site M4 is identified for the delivery of community uses including allotments, a new medical centre, relocated scout hut, community centre and associated outdoor/recreation facilities.

Appendix E of the Site Selection Methodology, Outcomes and Site Allocations sets out the conclusions of the sites in respect of each of the sites and this is compared to the assessment of the land at Smug Oak Lane: [See attachment for more details]

It is therefore clear that the land at Smug Oak Lane performs at least as well, if not better, against key sustainability objectives than the allocations in the plan for Bricket Wood. In the absence of further justification and reasoning for the discounting of the land at Smug Oak at Lane it is considered that this represents a logicial opportunity for allocation in the plan.

**Conclusions**

These representations set out considerable concern on the soundness of the regulation 18 version of the local plan in a number of areas.

The land at Smug Oak Lane represents an appropriate site for housing development and engagement with the parish council has indicated there would be support for this to come forward. It is considered that additional sites will be needed in order to make the plan sound and that this site represents a suitable site for allocation within a future iteration of the plan.

St Congar is able to provide any further information on the site that the council require.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## 100 - Trustees of the Shonleigh Trust

Submission Number: 100 Submission Date: 06/11/24 14:24

Respondent: Company/Organisation: Bidwells Name: Mr Derek Bromley

On Behalf Of Company/Organisation: Trustees of the Shonleigh Trust Name:

Comment Number: 2

**Type:**

* Site

**Number:**

New site

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

1) These objections are made on behalf of the Trustees of the Shonleigh Trust. The Trustees object to the Regulation 19 Local Plan on the basis it is neither 'Justified' or 'Positively Prepared'.

2) The Trustees own the land shown edged red and coloured pink and edged blue on the plan **(Appendix 1 of attachment**). The land holding was severed as a consequence of the compulsory acquisition for the M25 in the early 1980s. At this point the M25 is in a deep cutting.

3) The field north of the M25 ( edged red and coloured pink) is contained by residential development along its northern boundary, residential development along part of its western boundary, the St Albans/Watford railway line (Abbey Line) on the eastern boundary and the M25 to the south.

4) Within the northern field are two stable blocks (these fall within te definition of Previously Developed Land). The field is divided by a mature tree line shown by the green line on plan Appendix 1.

5) It is the northern field (edged red) to which these objections relate, in particular the area coloured pink. The southern field would be made available for community benefits as part of any development.

**Green Belt Study**

6) The site adjoins How Wood a settlement excluded from the Green Belt.

7) In 2016 the Council produced their Strategic Housing Land Availability Assessment (SHLAA) relating to Green Belt sites. A copy of the assessment relating to the northern field is provided in **Appendix 2 of attachment.** The Stage conclusions 1 noted *'however, the northern half of the site is bounded by existing residential development to the north and west and its development would not have the same impact as described above'.*

8) As part of the previous local plan the Council commissioned SKM to undertake a Green Belt study in relation to sites which could deliver more than 250 dwellings. The SKM report did not undertake a Green Belt Study in relation to smaller sites. The Council's strategy being that the larger sites would be identified in the Local Plan and that smaller sites would come forward through Neighbourhood Plans and either granted under very special circumstances or within a revised Local Plan (policy DLP12) which amended the Green Belt boundaries.

9) As part of the St Stephen Neighbourhood Plan the Parish Council commissioned Aecom to undertake site assessments. The relevant extract of the final report dated December 2017 is attached as **Appendix 3 of attachment.** The extract identifies the northern field identified as Site S43, "land south of How Wood" and concludes in respect of the Neighbourhood Plan Site Assessment *'it would therefore be an appropriate site for the NP to put forward as* a *proposal for housing, under policy DLP12 of the draft strategic local plan 2011-2031* '. It then goes on, that if this site is put forward through the neighbourhood plan and accepted by the council then the implementation would be through a Green Belt boundary change in a future local plan review.

10) The Draft Pre Submission St Stephen Parish Council Neighbourhood Plan 2019-2036 (28/11/2019) identified our clients land in Policy 27, **Appendix 4 of attachment** as proposed housing allocation subject to certain criteria.

11) In the St Stephen Parish Neighbourhood Plan Housing Report and Aspiration Sites (10/2020) (Appendix 5 of attachment) it also identifies the northern part of our clients land for housing to accommodate approximately 30 dwellings.

12) In the St Stephen Parish Neighbourhood Plan Pre Submission (Reg 14) Consultation draft (Policy 27) again identifies the northern part of our clients site for residential development for up to 30 dwellings, Appendix 6 of attachment.

13) The St Albans Housing and Economic Land Availability Assessment 2021 (Appendix 7) the overall conclusion was 'the site is considered to be potentially suitable, available and achievable subject to a further assessment as part of the site selection process".

14) The Council's Green Belt Study 2023 prepared by Arup, upon which the Council relies for its evidence base, came to the conclusion that the site (SA 126) should not come forward as a Green Belt release **Appendix 8 of attachment.** It is noted however this was the same conclusion for Site SA 133, which was subsequently granted planning permission for housing. A site which again was identified for housing in the St Stephen Neighbourhood Plan documents.

15) Whilst these studies endeavour to provide objective test criteria, the weighting is very much subjective. It is clear that among the experts commissioned by the 2 Councils to review this site, they have come to different conclusions. There has been no change to the area in terms of landform, topography or landscape which justifies different conclusions.

16) It is also evident that there has been a long history of the northern part of the subject site being identified for development in many council documents. The recent Arup Study only reviews the whole site, whereas the previous SHLAA and Aecom reports have used a finer grain approach

and identified the northern part of the subject site as not performing well in relation to the 5 purposes of including land in the Green Belt. Not using a finer grain approach was one of the criticisms of the Councils general approach at the last failed Local Plan.

17) The Arup omission of the northern field is in contrast to the joint council's proposals, where the St Stehen P.C. Pre- Submission Plan and its Housing Aspirations identified the site for housing. In summary from 2016 until 2023 the subject site was identified for housing.

18) There are sites in the Reg 19 which have a wider and greater Green Belt impact or do not share the same level of sustainability. We would wish to review these comparisons as part of the Examination.

**Sustainability**

19) The site adjoins the settlement edge of How Wood, a settlement excluded from the Green Belt. It is in a sustainable location given its proximity to a range of facilities/amenities and public transport connections.

20) In sustainability terms the site has the following (actual distances not as the crow flies): A bus stop on the frontage to Park Street Lane. Services 361 and 635 Abbey Line (St Albans/Watford) railway stations Bricket Wood and How Wood 0.8 km Radlett main line railway station 5.5km Local Neighbourhood Centre 0.9km Park Street Doctor's surgery 0.55km Primary schools 1.0km Secondary schools 3.4km

21) The Arup Qualitative Assessment of this site has errors. The site has a bus stop adjoining the frontage, not 1.6 kilometres distance. There are 2 services; the 361 which is the main How Wood service between St Albans and Borehamwood and the less frequent 635 between Watford and Hatfield. The report makes no mention that the site is mid- way between the railway stations of How Wood and Bricket Wood on the Abbey line, both being 0.8km and accessible by footpath. No mention of the Doctors surgery which is 0.55km. Other than the Radlett main line station and secondary school all the above are accessible by footpath. Whilst the Arup report refers to distances from an S.S.S.I and County Wildlife Site, these are is separated by the railway line. The site is separated from contaminated land by the railway. This land was tipped on decades ago and has methane vent pipes; it has been naturalised and is a publicly accessible resource.

22) As part of the Major Transport Schemes Policy TRA2 **(Appendix 9 of attachment)** provides that the Council supports the delivery of an enhanced Abbey line service (the St Albans/Watford railway line).

23) The Reg 19, Para 1.30 refers that the strategy is to locate growth in the most sustainable locations. Para 3.4 refers to "meet the needs within or close to existing settlements". Policy SP2 d) seeks to make "use of the most sustainable locations for growth". It is evident that the location of this site meets these policies objectives.

**Development Benefits**

24) It is envisaged that in accordance with the Draft St Stephen N.P. the area shown colour washed on the plan Appendix I would contain built development. In addition to all the usual benefits which are derived from housing, the southern area of the field will provide a green buffer for compensatory Green Belt benefits, utilised for on-site Bio Diversity Net Gain and a Sustainable Urban Drainage scheme.

25) The made St Stephen N.P. policy S19 and para's 8.21 and 8.22 (Appendix 10) together refer to the St Albans Green Spaces Report indicates there is a deficit of allotment facilities. Our clients land south of the M25 adjoins existing Allotments; this would be made available as an extension to te existing allotments.

**Policy Objections**

26) The policies which provide a density of 40 d.ph as a minimum (LG4 h) and DES3 a)) are simply unrealistic and unobtainable when it comes to small sites (up to 9 dwellings) and to a lesser extent for medium sites. These sites are not of a size which can accommodate a housing mix to achieve this density.

27) The plan policy for minimum densities to be applied to small/medium sites should be deleted. New wording should be inserted where this is an aim for small and medium sites but to have regard to the surrounding character and density and uses.

**Is the Plan Justified**

28) Given the above, the Plan is not justified as an appropriate strategy as it does not take into account the reasonable alternative of including part of the northern field as a Green Belt release for housing and the Councils evidence base for not doing so, is not proportionate or justified. Given the previous history of reports. The Councils Green Belt Study conclusions are at variance to the direction the Council and St Stephen P.C were taking in respect of this site.

29) Whilst the Government's final definition of Grey Belt and the inclusion of Grey Belt as not being inappropriate development within the Green Belt, has yet to be confirmed; the proposed wording for Grey Belt includes *'any other parcels and/or areas of Green Belt land that make* a *limited contribution to the five Green Belt purposes'.* The Government consultation "Proposed reforms to the NPPF and other changes to the planning system" 24/09/2024 suggests an effective way of providing guidance and refers *"Grey Belt Land which makes* a *limited contribution to the Green Belt purposes will: a) Not strongly perform against any Green Belt purpose; and b) Have at least one of the following features : Land containing substantial built development or which is fully enclosed by built form. ii Land which makes no or very little contribution to preventing neighbouring towns from merging into one another. iii Land which is dominated by urban uses, including physical developments iv Land which contributes little to preserving the setting and special character historic towns".*

30) The part of the northern field which is largely contained by development on 3 boundaries has 2 stable blocks which fall within the definition of Previously Developed Land. It is described in the Pro- Forma Site Assessment as scrub land.

**Has The Plan Been Positively Prepared**

31) This is a qualified objection. Our client raises no objection to the overall housing provision based upon the current standard methodology, though has issues with the housing delivery during the plan period given the Council only has a 1.5 years housing land supply. Should the Governments new standard methodology apply for the purposes of this Plan, then there is a gross under provision of housing. The new methodology would increase the housing numbers from 885 d.p.a. to 1,554 d.p.a., a 75% increase.

32) Whilst there have been Ministerial Statements regarding when the new standard methodology for housing need will apply, nothing is certain as to the final wording and timing when it will apply.

33) The current expectation based upon the Council's programme is that the local plan will be submitted before the Government's proposed Standard Methodology for determining housing need takes effect. It is important a Plan is in place given the acute housing shortfall with only a 1.5 years housing land supply and to enable early new housing delivery. However, given the circumstances the Council has found itself, with a significant risk of unmet housing need, it is very important to identify and allocate in this plan more sites where appropriate.

34) Given that planning policy and the plan process is a bit of a "moveable feast" the expectation in 26) above, may not be realised and there is no certainty. It is in any event clear the proposed housing provision will not meet the future development needs during the local plan period and an early review will be required.

35) In the event the new Standard Methodology does not apply to this Local Plan and the Council meets the deadline for submission, then our client's are of the view the Council should commit to an immediate review following the Adoption of the Plan. There will a period between the Inspector's report and the Council's formal Adoption for Council officers to start the preliminary internal processes.

36) The Council's Housing Trajectory (Table 3.2) for delivering housing from the "Broad Locations" is overly optimistic given the timelines for all the necessary planning approvals and lead in times for infrastructure.

37) Lichfields, produced a report in 2020 "Start to Finish" which reviewed build out rates of large housing sites across te country. This showed that nationally the average planning approval period for large sites of say 1,000 dwellings was 4.6 years. Given the local councils in Hertfordshire have not embraced new development but are reluctant participants when it comes to development on green fields, then locally the time is longer. The Lichfield report also analyses the build out rate on large sites. The averages for sites 500-1,000 was 68 d.p.a., 1,000-1499 was 107 d.p.a. It is generally acknowledged that the early development years of schemes the completion rates are far less than the average. The build rate in the early years for the Broad Locations is again overly optimistic.

38) My experience of the delivery of large sites in Hertfordshire, a county which has been reluctant to housing growth for decades, it will not be until the early/mid 2030's that many of the "Broad Locations" begin to deliver housing, the exceptions possibly being part of the west Redbourn and part of North St Albans where permission has either granted or the application is well advanced. I set out below examples I have been involved with or are aware.

39) Hemel Hempstead. Allocated site for 900 dwellings in the Sites Allocations, Adopted 2017. Hybrid Planning Application submitted 21/12/2018. Granted 03/12/2021. Price negotiations with land owners and following approvals of pre- commencement conditions, start date on site November 2024. First dwelling for occupation spring 2026. Total time for an allocated site from planning application to delivery of first dwelling 7.25 years.

40) Stevenage. Allocated site for 1,350 dwellings in Adopted Local Plan 22/05/2019. Hybr'1d planning application 07/04/2021. Following Section 106 negotiations expected planning permission November 2024. There will be a period of negotiations on value which involves the Council and Homes England, with probable reference to an Expert, allow 18 months. Planning precommencement condition approvals, allow further 9 months. Lead in time for infrastructure to first dwelling allow further 18 months. Total time for an allocated site from planning application to first occupation just under 7.5 years.

41) Hitchin. Outline Planning Application for up to 700 dwellings submitted in advance of Local Plan on the 26/04/2018. Site allocated in the Adopted Local Plan November 2022 for 700 dwellings. Awaiting a decision. First occupation is likely to be in excess of 9 years from application.

42) On the basis of the above it is my view a reasonable expectation is that for large sites there is a 7 year gap between the submission of a planning application to first delivery of a completed dwelling. Given that to date with a couple of exceptions, applications on large sites have not been registered I think my estimate of early to mid 2030's is supported by the evidence. There are varied reasons why these sites have taken so long (continued public and councillor resistance, officer's workload) This will apply to all sites. That is why the timescales envisaged in the Housing Trajectory are not in some instances likely to be achieved. In my view based upon evidence, the first housing on most of the larger sites will not be delivered until the then later early/mid 2030's.

43) From the Councils own housing figures there is a substantial shortfall in delivery up to the 2030's. This under provision needs to be reduced with more small sustainable sites. These are not so constrained by infrastructure delivery because this is already available, or complicated Section 106 agreements involving both District and County . Early delivery is essential given the Council only has a 1.5 year housing land supply.

44) A greater number of smaller sites which do not have constraints to delivery need to be identified. The subject site is an obvious example.

45) The Council's identified urban sites include many which are Council owned comprising many garage blocks with poor access, city and town car parks and community buildings. It is very unlikely the total housing numbers predicted indicated for these sites will be achieved. There will be objections to the loss of vehicle parking land, this loss of spaces creates further pressure for "on street" parking and in the case of city centre public car parks the impact this will have upon the vitality and vibrancy of the town centres. Any loss of car parking provision or community buildings is likely to be strongly resisted by the local community.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**The proposed alteration to the plan is that our client's site identified by the land coloured pink on Appendix 1 in attachment should be included as a Green Belt release and allocated for housing.**

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Shonleigh Trustees - Land at Park Street__[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

It is important the the Council is questioned upon its approach to Green Belt Release given the apparent inconsistences where some sites have been identified and other more obvious ones omitted. The Councils minimum density for all sites irrespective of size is not reasonably achievable for small sites. The housing trajectory is overly optimistic. It's reliance on urban sites delivering the numbers indicated, is not reasonably achievable given the constraints of many of the sites.

It is evident that more sites need to be allocated to meet the housing numbers, particularly in the short term.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

Land at Stephen's Way, Redbourn - Unallocated

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

By not including this site [Land at Stephen's Way, Redbourn] as a small housing allocation, the Plan is not consistent with national policy, thus enabling the delivery of sustainable development to meet the Council's housing need. The below suggested wording is intended to address this

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

- It is considered that the northern portion of this site [Land at Stephen's Way, Redbourn] should be allocated as a small housing site.
- Allocation of the site to provide a small housing scheme, and retention and improvement of the play space would achieve the objectives of the Open Space Report in improving the quality of this open space. More valuable and usable amenity green space (lost through the development of the site) will be provided as part of the Broad Location beyond, and therefore all the objectives are met.
- It is therefore requested that this site is added to **Appendix 1 – Site Allocations** and identified on the **Proposals Map**.
- Further details regarding this site are set out at Chapter 5 of the attached document.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### Number:

New site

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

The land at The Dak has been excluded as a housing allocation in the draft Local Plan and the landowner objects to this exclusion.

**Summary**

In summary, additional housing sites are needed, both to ensure the overall housing target is achieved and to boost delivery in the early part of the Plan period. The urgent need for a new Local Plan means that it is not appropriate at this stage to completely rework the Local Plan strategy and its evidence. Nevertheless, where additional sites can come forward within the context of the submitted strategy, these opportunities should be taken.

The land at The Dak has been inappropriately excluded from the Local Plan on the basis of a Green Belt Review that did not consider the site-specific consequences of development on this site but rather combined the site with a much larger area, making the findings for the whole largely irrelevant to the report site.

The land at The Dak is a suitable and deliverable housing site. It is a brownfield site on the edge of the urban area and as such should be prioritised when seeking sites for potential development.

The site is well located and has adjoining built development on the east and west boundaries, with Colney Heath Lane on the southern boundary. Furthermore, the site immediately west of the report site has recently been granted planning permission for 49 homes. The existing boundary features and surrounding development limit the visual impact of development.

There are no technical or legal constraints to development and if allocated the site could be brought forward for development quickly and contribute to the Council's five-year housing land supply.

There is a need for additional housing sites and the report site should be included as a housing allocation in the draft Local Plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. ## 128 - 51 Pegasus Ltd

Submission Number: 128 Submission Date: 07/11/24 09:48

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: 51 Pegasus Ltd Name:

Comment Number: 2

### Type:

* Site

### Number:

New site

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

The following comments are made in relation to this site:

1. The proposed level of housing provision is the minimum required. The Council should explore a higher target to ensure that duty to cooperate requirements are fully met.
2. Additional housing sites need to be added to the draft Local Plan on the basis that 1) some of the allocated sites will not come forward, 2) some of the proposed densities on sites will not be achievable given other requirements of the plan, 3) the assumed windfall allowance has not been justified and 4) the proposed supply during the critical first five years of the plan is wholly inadequate.
3. The Council's Green Belt Review is not yet fit for purpose. Having recommended the release of the land adjacent to the Copsewood site, the Review then needs to go on and consider what consequences that recommendation has for adjoining sites. The Review recommends parcels to the immediate east and west but leaves the Copsewood site untouched. The resulting Z-shaped boundary makes little sense and does not meet the NPPF requirements for new Green Belt boundaries.

The Copsewood site itself is a suitable and deliverable housing site. It is located within walking distance of key facilities and its visual impact is limited. The substantial evidence base submitted with the recent outline application demonstrates the deliverability of the scheme, as do the statutory consultee responses received.

The development has a unique ability to deliver substantial improvements to local active travel infrastructure. A package of proposals has been developed in consultation with the Local Highway Authority that can reduce car-borne travel demand through enhancing the attractiveness of other, more sustainable modes of transport. This reduction not only makes a positive contribution to

climate change objectives but also to health and wellbeing objectives through increase recreational activity. This is reflected in the supportive representations received from local cycling and horse-riding groups.

The weight that can be attributed to the package of measures is further increased because they deliver stated aims and objectives of the two Councils involved – St Albans City and District Council and Hertfordshire County Council. The development will deliver all of the proposals for the immediate area contained in the Local Cycling and Walking Infrastructure Plan (LCWIP).

These are not random, unrelated projects that happen to be close to the site but rather the implementation of part of a coordinated project, initiated by the Councils to enhance active travel modes. These are proposals that go beyond merely facilitating development. They have been drawn up in response to consultation feedback, not only from the highway authority but also local user groups.

It is clear that the public reaction to proposed development at the Copsewood site is entirely different from other proposed developments in the local area. Without underplaying the public comments that have been made, this is not a site that has caused a public outcry on the scale previously seen.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

There is a need for additional housing sites and the Copsewood site is an ideal opportunity to help meet this need by providing 190 homes in a sustainable location with limited Green Belt impact through a project that can also deliver substantial highway infrastructure improvements. The Copsewood site should be included as a housing allocation in the next iteration of the draft Local Plan.

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

The site at London Road St Albans is located within the Green Belt. It is located within subarea SA-99 which is assessed within the Green Belt Review.

There are serious concerns regarding the assessment in the Green Belt Review which does not give regard to the position that development would take place to the north of the cemetery, with the land to the south being used potentially for a cemetery extension and for landscaping/ecology purposes. The Vision Document (see **Appendix 1**) does not seek any residential development within the area to the south of London Road Cemetery and rather seeks to enhance this area's beneficial use by offering opportunities to provide access, to provide opportunities for informal recreation; and, to enhance landscapes, visual amenity and biodiversity in line with Paragraph 145 of the National Planning Policy Framework.

An independent Green Belt Review has been undertaken and can be viewed within **Appendix 2** of these representations. It seeks to assess the site against the purposes of the Green Belt. The results of that independent review are summarised below (see attachment):

This independent Green Belt Review differs greatly from the results produced by Arup on behalf of the Council. There is a key concern that parcel SA-99 is misrepresented. A key issue is that SA-99 is assessing the wider parcel, rather than a separate and supplemental assessment of the land where built-form is proposed. The result is the Green Belt Review provides an inaccurate and lop-sided view of the proposed development site and design proposals. The proposed layout takes into account matters of urban sprawl and coalescence and has been designed to ensure minimal

impact. The Green Belt Assessment however is assuming built form across the sub-area as a whole, which does not correspond with the proposal that has been presented for consideration through the local plan making process. The Green Belt Review is therefore not an appropriate basis against which to dismiss the site as a development option and should not be used as the Council's sole guide when seeking to identify Broad Locations for development.

The comments below are made in relation to the Council's own assessment of the site against the purposes of the Green Belt:

Purpose 1a – A number of the Broad Locations or allocated sites are not located at the edge of a discrete built up area. On the Broad Locations, this includes West of Redbourn, West of London Colney and Harper Lane Radlett. Their very location therefore is moving development to less sustainable areas within the District or creating spurs into the countryside.

Purpose 1b – The Council has scored the site a rating of 5+ when considering whether the site 'prevents the outward irregular spread of a large built-up area and serves as a barrier at the edge of a discrete built-up area in the absence of another defensible boundary'. That assessment does not take into account the proposed layout for the scheme. To the south of the proposed built-up area for residential dwellings is the existing London Road cemetery. It provides a clear barrier to prevent further development at the southern edge of St Albans. The development proposal seeks planting on land south of the cemetery that will clearly demarcate the end of the built form in this area and prevent coalescence with London Colney.

Purpose 2 – For the same reason, the score given to prevent neighbouring towns merging is considered inappropriate in light of the design proposals submitted to the Council. The cemetery provides a clear hard boundary to development on the eastern side of London Road which is not reflected within the Council's assessment.

Purpose 3 – The sub-area review fails to recognise or reference the cemetery at the site. It plays a key part in dividing the sub-area. As described above, its presence provides a defensible boundary and reduces the ability to encroach any further into the countryside. It is also noted in purpose 3 that the London Road St Albans site scores '3'. Of the total of 182 sub-areas assessed, 86 score more than '3', whilst 47 sub-areas score '3'. The sub-area containing the site therefore is preferable to a high proportion of others in this regard.

Purpose 4 – It is noted there are no identified historic or heritage assets in the vicinity of the site. Only 11 sites score more than '0' in this category. That figure does seem very low and there are concerns that some heritage assets are not being picked up.

In relation to purpose 4, it is noted that Broad Location B6 (West of London Colney) is directly adjacent to the grade II Napsbury Hospital Registered Park and Gardens and its related Napsbury Park Conservation Area, and site L1 (Burston Nurseries, Orbital Road, St Albans) fails to acknowledge the presence of the Grade II* Manor House and its grade II listed outbuilding, which fall within the site itself.

There are concerns regarding the difference in results between the wider Green Belt parcels and those identified sub-areas. The London Road site sits in strategic parcel 32. Its overall assessment is set out [in the attachment] as identified in the Green Belt Review:

This is much more in line with the independent Green Belt Review set out in **Appendix 2** of these representations. The inconsistency between the strategic and sub-area appraisals with the Arup Green Belt Review is a concern. It is wholly inconsistent that a strategic parcel between St Albans and London Colney that has already been found to have limited or no contribution in terms of purposes 1 (prevention of urban sprawl) and 2 (merging of settlements), but that a smaller portion of that same strategic area would have significantly increased impacts. The sub-area assessment results do not therefore align with the strategic parcels and our own independent Review. As such, they are not considered appropriate with regards to the assessment of the site at London Road, St Albans.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

As highlighted within the accompanying Vision Document (see **Appendix 1**), London Road, St Albans provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

1. Through this representation Mr. Green is objecting to the failure to remove the site that is in his ownership to the south-east of Luton Lane, Redbourn, St Albans AL3 7PY from the Green Belt and to allocate it for Gypsy and Traveller residential use. The site is shown on the plan, Luton Lane Proposed Site Allocation. Mr Green is proposing that the site is allocated for a Gypsy and Traveller residential site with at least 15 pitches, together with a single house for the site warden.
2. Mr Green [redacted], James Cash proposed the site through the St Albans Local Plan 2041 Call for Gypsy and Traveller Sites. At that stage they proposed that the site should be allocated for either Gypsy and Traveller residential use or for housing development. Having reviewed the situation, they are now proposing that the site should be allocated for Gypsy and Traveller residential use plus a single warden's house.
3. Mr Green confirms that the site is available and can be brought forward for implementation within the next two to three years, and that it has capacity for at least 15 residential pitches, plus a warden's house and appropriate landscaping.
4. Green's representations complement and should be read with the representations on the Reg 19 St Albans Local Plan 2041 submitted by GATE Herts, which help to provide the justification for allocating Mr Green's land in the way he suggests. GATE Herts' representations provide evidence that:

- The St Albans Gypsy and Traveller Accommodation Needs Assessment, ORS, September 2024 is not consistent with national policy in its failure to engage effectively with Traveller organizations, and does not represent a robust evidence base to inform the preparation of the Local Plan;
- Policy HOU6 is profoundly inadequate and unsound, including in its failure to set pitch targets for Gypsies and Travellers and to identify a supply of specific deliverable or developable sites;

- Mr Green strongly supports GATE Herts' objection to the application of Policy 10 f), relating to contributions to the Chiltern Beechwoods SAMMS and SANG, to Gypsy and Traveller sites without evidence of whether such recreational activity is relevant to Gypsies and Travellers;
- Mr Green supports GATE's argument that the plan is not legally compliant because it is discriminatory.

5. Mr Green supports the actions and Modifications proposed by GATE to address the failures of the plan to be sound and legally compliant.
6. Mr Green makes the point that in the St Albans case his site is particularly important because of its ability to ensure the delivery of pitches at an early date. All the other sites identified through the Calls for Sites are in other people's ownership, and are dependent on confirmation of their willingness to bring the land forward for development. His land is available and he is fully committed to implementation at an early date.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. The land at Tippendell Lane has been excluded as a housing allocation in the draft Local Plan and CALA Homes object to this exclusion as the site promoter.

**Summary**

The following comments are made in relation to this site:

- **Overall housing provision:** Additional housing sites are needed, both to ensure the overall housing target is achieved and to boost delivery in the early part of the Plan period. The urgent need for a new Local Plan means that it is not appropriate at this stage to completely rework the Local Plan strategy and its evidence. Nevertheless, where additional sites can come forward within the context of the submitted strategy, these opportunities should be taken.

- **Inadequate Initial Five-Year Supply:** The plan's proposed housing supply for the critical first five years is insufficient to meet demand. The underprovision in these initial years could exacerbate housing shortages and impact the Council's ability to meet housing targets effectively.
- **Concerns with the Green Belt Review:** The Council's Green Belt Review inaccurately applies the second of the five Green Belt purposes as per the National Planning Policy Framework (NPPF). Specifically, it evaluates the impact on the merging of smaller villages and settlements, whereas the NPPF is concerned with preventing the merging of larger towns. The Green Belt Review's assessment of the site in question is flawed because it groups the site with an adjacent land parcel, leading to skewed assessment results. A more focused, site-specific evaluation – conducted using Arup's methodology – demonstrates that urban influences surrounding the site lessen its impact on encroaching into open countryside.

**Strategic Location and Surrounding Development:** The Tippendell Lane site is a suitable and deliverable housing location. It benefits from a sustainable setting, especially in relation to the planned Strategic Rail Freight Interchange

- reliance on personal vehicles. Additionally, the site is surrounded on three sides by existing residential developments, minimising the visual impact of new housing.
- **Absence of Constraints:** There are no known technical or legal obstacles that would impede development on this site. If allocated, the site could be brought forward swiftly, providing much-needed housing stock and directly contributing to the Council's five-year housing supply. Supporting evidence has been submitted to demonstrate both the suitability and the deliverability of the site.

Given the Local Plan's shortfall in housing provision, the Tippendell Lane site is a valuable addition for consideration as a housing allocation in the Local Plan. Its deliverability and lack of constraints position it as an optimal choice to help bridge the gap in housing supply.

The CALA Homes site is both suitable and deliverable. It lies on the edge of two Selected Settlements – How Wood and Park Street. As shown in Table 1 above [see attachment], the site is close to a wide range of services and facilities, including both a primary school within walking distance. How Wood and Park Street railway stations are both within 13 minutes of the site on foot and provide access to trains into London via Watford Junction.

Although not included within Table 1 (because it is not constructed yet), a Strategic Rail Freight Interchange has been granted planning permission around 600m to the east of the report site. The provision of this major employment location within easy walking distance will only boost the sustainability credentials of the report site.

The site has adjoining residential development to the south, east and north and development of the site would be seen as a logical extension of the village of How Wood. Open space created on the eastern side of the site would help maintain visual separation from Park Street and reflect the existing open space provision on the eastern side of the railway line.

In terms of deliverability, the site is being promoted by a successful national housebuilder with a reputation for high quality and well-designed homes.

CALA Homes is working with the owners of the land under the auspices of an option agreement. The option agreement enables CALA to promote the site and once the option agreement is triggered, CALA can purchase the site quickly and it can be brought forward for development. There are no legal issues or constraints that would prevent development.

To demonstrate the technical deliverability of the site, a range of evidence has been produced, as follows:

- Indicative layout (as shown in Figure 6 [see attachment] (and Appendix 2) , this demonstrates that an acceptable form of development is possible.
- Preliminary Ecological Appraisal (Ethos, July 2023, appendix 3) – the site contains some features of ecological interest, generally around the edges of the site but nothing that would unduly constrain development. Further surveys will be needed in the usual way.
- Initial highway assessment (Rappor, 2022, appendix 4) – this work demonstrated that an acceptable access can be formed on to Tippendell Lane and that appropriate visibility splays can be achieved using land within the site or adopted highway land.
- Landscape and Visual Appraisal (The Landscape Partnership, 2023, appendix 5) – this report considers the landscape and visual effects that would arise from development and includes photo analysis of key views and an Opportunities and Constraints Plan (appendix 6).

In addition to the above, pre-application advice was sought from St Albans City and District Council. The Council's pre-app advice from March 2023 provided useful feedback on the layout of the scheme but raised no substantive technical issues that could not be overcome.

With this evidence, the Council can be confident that if the site were to be allocated it would be brought forward quickly and housing would be delivered as expected. The site is of a size that development could be completed within 2-3 years. This is an important consideration given the shortage of new sites proposed to be delivered in the first five years of the plan period.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Given the Local Plan's shortfall in housing provision, the Tippendell Lane site is a valuable addition for consideration as a housing allocation in the Local Plan. Its deliverability and lack of constraints position it as an optimal choice to help bridge the gap in housing supply.

**172 - Mr and Mrs Robert and Karen Choppin**

Submission Number: 172 Submission Date: 07/11/24 14:30

Respondent: Company/Organisation: Studio LK Name: Lita Khazaka

On Behalf Of Company/Organisation: Name: Mr and Mrs Robert and Karen Choppin

Comment Number: 8

**Type:**

* Site

**Number:**

New site

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

*All appendices, tables and images can be found in the file attached to this representation.*

5.1. Studio LK has set out above that: (a) the council's spatial strategy may be at risk because of its reliance on one large urban extension at Hemel Hempstead; (b) that its housing target is flawed and does not contain an appropriate buffer of sites in its trajectory; (c) that it has not planned for enough gypsy and traveller housing which represents a potential legal defect in the Local Plan, and that this shortfall should be covered on all Broad Allocation sites; and (d) that some of its allocations are at odds with other planning policies (including minerals and community infrastructure protection).

5.2. For this reason, it is appropriate that other better sites are brought forward as site allocations in the Local Plan.

Smallford Stables, 187 Colney Heath Lane, AL4 0TP

5.3. Mr and Mrs Choppin wish to promote this site (2.72 ha gross) for housing development to help address the defects in the Draft Local Plan identified above.

5.4. Their site is on Green Belt land on the western side of Colney Heath Lane located just south of the built up area of St Albans but north of the village of Colney Heath. However, it forms part of a ribbon development out of the city and is flanked to the north west and south east by housing. The ribbon development nature of this strip has been reinforced as a result of the recently approved planning applications on Green Belt land (planning application no. 5/2022/2557). This site has been approved for 40 dwellings in outline form.

5.5. Mr. and Mrs. Choppin's site contains a number of buildings associated with its use as a stables site and, thus, can be said to have some of the characteristics of Previously Developed Land (refer Figures 3 and 4 –*see attachment*) as well as infill.

5.6. Smallford Cottage is a Grade II listed building but its setting has been substantially harmed and eroded by the proximity of a number of outbuildings and other buildings associated with the business (refer Figure 4 –*see attachment*). There is an opportunity to improve this relationship between the listed building and other structures on the site.

5.7. The site enjoys good access to all utilities and a range of local services (refer Figure 5 –*see attachment*) and is within easy walking distance of Nicolas Breakspear Secondary School (circa 800m) and Colney Heath Primary School.

5.8. The site also enjoys good access to services by foot and by public transport. There are two bus stops within 800m of the site (Routes 230/304/330/331/354/355/356/358) – see Figure 6 –*see attachment*.

5.9. There are no environmental constraints that would restrict this site from coming forward. It is in Flood Zone 1, does not contain any protected trees and is not in a designated nature reserve site. While the Hertfordshire Minerals Plan (2002-2016) locates the site within a wide Sand and Gravel Belt that covers the whole of the south of the county, any chance of extracting aggregate on this site is limited because of the proximity of nearby housing and the fact that the sand and gravel on land to the north has been extensively removed already. Thus, its development for housing would not prejudice other adjacent land within the Green Belt either.

5.10. The site is available for development now. There are no land ownership assembly or other legal constraints on the site that would prevent it from coming forward.

5.11. The reasons for promoting the site now are: the need for the Local Plan to deliver a higher housing target than the publicised version; the need for more "specific, deliverable sites" to come forward in the first five years of the lifetime of the Local Plan; and the handling of the site following the Call for Sites consultation in January 2021 including the findings of the Arup Green Belt Part 2 Review.

5.12. This case is set out below, first by considering how this candidate site was analysed by the council and then by setting out why sites such as this need to be brought forward.

History of the consideration of the site during the evolution of the Draft Local Plan

5.13. This site was first submitted for consideration in the 2021 Call for Sites associated with this Draft Local Plan (refer Appendix 1 –*see attachment*).

5.14. The council issued an initial screening view following the Call for Sites exercise stating that Site CH11-21 should be taken forward for further consideration (Appendix 2). Indeed, the overall conclusions of this appraisal were: "The site is considered potentially suitable, available and achievable subject to further assessment".

5.15. However, the council then issued a further Screening View in 2022 (Appendix 3), resolving not to take the site forward for the Arup Green Belt Review Stage 2, purportedly based on the Local Plan Site Selection – Proforma Methodology Paper.

5.16. The Methodology Paper states that council officers scored all candidate sites on 38 criteria covering three topic areas: Major Policy and Environmental Constraints; Accessibility; and Other Key Constraints. Not all of the criteria are relevant to all sites.

5.17. It is accepted that the process of screening in and out sites is not prescribed and local authorities have latitude to assess sites in a number of ways consistent with local circumstances. This process is both a quantitative one (of scoring sites) but, done correctly, also requires an element of professional judgement. It is not just a numbers game.

5.18. However, it is clear that the council's approach to scoring sites has some flaws. For example, it incorrectly assesses sites that are agricultural land in Grades 1 to 3 as "best and most versatile" when this should only apply to land in Grades 1 to 3a. The screening process also failed to give any weight to the presence of Previously Developed Land contrary to Paragraph 89 of the NPPF and the council's own Sustainability Appraisal.

5.19. The Proforma Methodology Paper gives each site a Weak (W), Medium (M), Strong (S) score against each relevant criterion.

5.20. Smallford Stables (CH11-21) scored 5 Weak, 10 Medium, 16 Strong, indicating that the site scored well (Medium) or very well (Strong) against 26 of the relevant 31 criteria against it was assessed. It was a flaw in the council's approach that it did not use its professional judgement to bring this site forward on this basis despite the flaws and critiques in the council's approach shown above.

5.21. Furthermore, the write up to this appraisal erroneously stated that this site was 1.4 kilometres from a primary school, 1 kilometre from a bus stop and 920 m from a bus stop. Figures 5 and 6 give a more accurate appreciation of the site's access to services.

5.22. Arup then conducted its Stage 2 Review of sites (Appendix 4). The site was incorporated into a much larger parcel (SA-91), an area of 42.9 ha. It is conceivable that releasing all of this larger parcel would be likely to harm the objectives of the Green Belt, the most important of which is its openness. However, the Smallford Stables site only comprises 6% of this larger parcel and, moreover, has other features too that justify its positive consideration for release from the Green Belt. These include: its location within a ribbon housing development; the fact that a 2.72 ha parcel of land would not be a viable farm; the opportunity to remove the cluster of unsightly outbuildings that would enhance the setting of the listed building at this site; and its good access to local services on foot and by public transport.

5.23. Mr and Mrs Choppin therefore urge the Planning Inspector to: (a) examine critically the criteria used to screen in and out sites; (b) consider the inconsistencies with which other sites have been included as allocations; and (c) give positive consideration to the merits of bringing this site forward given the defects in the housing and site allocation elements of the Draft Local Plan set out above.

The case for bringing this site forward

5.24. The case for bringing forward more sites like CH11-21 needs to be stated clearly.

5.25. This submission has demonstrated why the council has to plan for a significantly higher housing target of "at least 17,700 homes" with a trajectory of 21,240 homes rather than the "at least 14,603 homes" figure in the Regulation 19 Draft. This site will make a contribution towards meeting this higher target. It will deliver more much needed housing including affordable housing.

5.26. This submission has also demonstrated that the Draft Local Plan housing trajectory is inconsistent with national planning policy because it has not identified a schedule of "specific, deliverable" sites in Years 1 to 5 of its life.

5.27. This site has few constraints. It could easily be delivered within the first five years of the lifetime of the Local Plan. There is a listed building within the site but the council has allocated other sites within the Draft Local Plan that have statutorily listed buildings within or immediately adjacent to their site boundaries (Sites H1, B3, B5, B7, B8, L1, M17, M18, M21, M22, P2, UC2, UC3, UC4, UC5, UC7, UC8, UC9, UC11, UC20, UC23, UC27, UC35, UC36, UC48, UC53, OS4).

5.28. The site has some of the characteristics of Previously Developed Land. Theoretically, developing this site for housing will both accord with national policy to promote brownfield land first (Section 11 of the NPPF) and support the Draft Local Plan (Policy SP1 and Chapter 3) too. As the council assessed the site as not having any environmental constraints at its first screening, this assessment reinforces the suitability of this site for consideration in principle and further confirms that the council were in error not to bring this forward for the Arup Stage 2 review.

5.29. Moreover, the site has the characteristics of infill too. Therefore, some form of housing development would not be inappropriate (refer paragraph 154(g) of the 2023 NPPF and Policy LG9 – Extension or Replacement of Buildings in the Green Belt) on part or all of the site, provided the setting of the listed building is protected. It is submitted that given this fallback position in policy, the council should plan positively to release this site.

5.30. It is further submitted that promoting this site would give the council more control over the release of Green Belt land elsewhere in the district and thus it would be plan-led.

5.31. Cognisant of all of these factors, Mr and Mrs Choppin urge the Inspector to include this site as a site allocation that could usefully deliver up to 70 new dwellings consistent with Policy LG4 – Large, Medium and Small Sites.

5.32. To support this allocation, a template for the site's inclusion in Part B of the Local Plan is set out at Table 3 [see attachment].

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Add Site PX Smallford Stables, 187 Colney Heath Lane, AL4 0TP to the schedule of site allocations

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 241106 Reg 19 submission[2]_reva final_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To clarify the deficiencies of the Local Plan on housing numbers, trajectory and therefore the need for more site allocations.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

On Behalf Of Company/Organisation: LIH Name:

Comment Number: 2

**Type:**

* Site

**Number:**

New site

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**6.0 Green Belt**

- NPPF (2024)

6.1. Paragraph 155 of the consultation draft NPPF states:

6.2. *"Where major development takes place on land which has been released from the Green Belt through plan preparation or review, or on sites in the Green Belt permitted through development management, the following contributions should be made:*

1. *In the case of schemes involving the provision of housing, at least 50% affordable housing [with an appropriate proportion being Social Rent], subject to viability;*
2. *Necessary improvements to local or national infrastructure; and*
3. *The provision of new, or improvements to existing, green spaces that are accessible to the public. Where residential development is involved, the objective should be for new residents to be able to access good quality green spaces within a short walk of their home, whether through onsite provision or through access to offsite spaces."*

6.3. When plan making (Chapter 7 paragraph 7 of the consultation [39] commentary) it is important to note that the draft changes to the NPPF (2024) suggest that:

"*However, those with a more significant gap of over 200 dwellings per annum between the local planning authority's revised LHN figure and the emerging housing requirement will need to revise its plan in line with the revised NPPF before submitting the plan for examination no more than 18 months after the publication of the revised NPPF. "*

6.4. This as shown in Sections 2.0 and 3.0 has not been adequately addressed by StADC either in advising members or in its draft Plan evidence base.

Chapter 5 paragraph 4 of the consultation commentary[35] states:

6.5. *"The Green Belt serves a specific planning purpose, in terms of preserving openness and preventing sprawl, but is not an environmental designation or a marker of any environmental importance. Much of it is inaccessible to the public and of poor ecological status. We want our proposal to not simply offset the loss of Green Belt land, but to bring about positive improvements for the quality and enjoyment of the environment. We propose a two-stage process for doing this. First, land that is safeguarded by existing environmental designations, for example National Parks, National Landscapes and Sites of Special Scientific Interest, will maintain its current protections. Second, any development on land released from the Green Belt must bring benefits, via not only mandatory Biodiversity Net Gain, but also through new rules that will secure improved access to good quality greenspace."*

6.6. Chapter 5 paragraph 4[35] continues

*"We are interested in whether further support is needed to assist authorities in judging whether land makes a limited contribution to the Green Belt purposes. We propose incorporating the following into the glossary appended to the NPPF but welcome views on the most effective way of providing this guidance:*

*Land which makes a limited contribution to the Green Belt purposes will:*

1. *Not strongly perform against any Green Belt purpose; and*
2. *Have at least one of the following features:*
3. *Land containing substantial built development or which is fully enclosed by built form.*
4. *Land which makes no or very little contribution to preventing neighbouring towns from merging into one another .*
5. *Land which is dominated by urban land uses, including physical developments.*
6. *Land which contributes little to preserving the setting and special character of historic towns."*

6.7. Considering point a) above, StADC contend in Its assessment that the Site performs strongly performs

against Green Belt purpose 3. For the reasons set out below, this conclusion s disputed. At most the site “meets the criterion” of purpose 3. We agree with StADC that the site offers limited or no contribution to the other purposes.

3 9 https://www.gov.uk/government/consultations/proposed-reforms-to-the-national-planning-policy-framework-and-other-changes-to-the-planning-system/proposed-reforms-to-the-national-planning-policy-framework-and-other-changes-to-the-planning-system#chapter-12-the-future-of-planning-policy-and-plan-making

- NPPF (2023)

6.8. Section 13 of the NPPF addresses the protection of the Green Belt. As to plan making, the following extracts from the NPPF are noteworthy.

6.9. Paragraph 140 of the NPPF (2023) states:

“Once *established, Green Belt boundaries should only be altered where exceptional circumstances are fully evidenced and justified, through the preparation or updating of plans. Strategic policies should establish the need for any changes to Green Belt boundaries, having regard to their intended permanence in the long term, so they can endure beyond the plan period. Where a need for changes to Green Belt boundaries has been established through strategic policies, detailed amendments to those boundaries may be made through nonstrategic policies, including neighbourhood plans. “*

6.10. It is accepted that there are exceptional circumstances in StADC that warrant the review of Green Belt boundaries. These include, among other things, the

- Lack of proper spatial planning for some 30 years.
- Level of unmet needs.
- Acute housing need and suppressed housing formation.
- Strategic locational significance in relation to its proximity to London and the Midlands.
- Highly sustainable nature of the location, among other things, with good access to road, rail, and air links.

6.11. Paragraph 141 of the NPPF states:

*“Before concluding that exceptional circumstances exist to justify changes to Green Belt boundaries, the strategic policy-making authority should be able to demonstrate that it has examined fully all other reasonable options for meeting its identified need for development. This will be assessed through the examination of its strategic policies, which will take into account the preceding paragraph, and whether the strategy:*

1. *makes as much use as possible of suitable brownfield sites and underutilised land;*
2. *optimises the density of development in line with the policies in chapter 11 of this Framework, including whether policies promote a significant uplift in minimum density standards in town and city centres and other locations well served by public transport; and*
3. *hasbeeninformedbydiscussionswithneighbouringauthoritiesaboutwhether they could accommodate some of the identified need for development, as demonstrated through the statement of common ground. “*

6.12. Paragraph 143 of the NPPF (2023) states:

*“When defining Green Belt boundaries, plans should:*

1. *ensure consistency with the development plan’s strategy for meeting identified requirements for sustainable development;*
2. *not include land which it is unnecessary to keep permanently open;*

3. *where necessary, identify areas of safeguarded land between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period;*
4. *make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following an update which plan which proposes the development;*
5. *be able to demonstrate that Green Belt boundaries will not need to be altered at the end of the plan period; and*
6. *define boundaries clearly, using physical features that are readily recognisable and likely to be permanent. "*

- Green Belt Review (2023)

6.13. With regards to proposals that affect the Green Belt, we examine below the 2013, 2014, and 2023 Green Belt reviews to:

- Identify and address the methodology used between the previous Green Belt reviews and the current document.
- Address the assessment of Sub Areas SA-6 and 7 which are the Sites' current Green Belt Review references.

In summary, and for the reasons set out below, we conclude that:

- The 2013 report conclusion and the 2023 report conclusion are inconsistent and contradictory.
- The Site is adversely and detrimentally assessed given the erroneous inclusion of it within much wider land parcels which have a more strategic function than the Site and no or no adequate reasoning has been provided for being 'combined'.

6.14. Paragraph 138 of the NPPF (2023) identifies five criteria or "Purposes" against which sites/proposals in

the Green Belt are assessed:

1. *to check the unrestricted sprawl of large built-up areas;*
2. *to prevent neighbouring towns merging into one another;*
3. *to assist in safeguarding the countryside from encroachment;*
4. *to preserve the setting and special character of historic towns; and*
5. *to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.*

6.15. There is no Government defined methodology for carrying out a Stage 2 Green Belt assessment. Green

Belt Reviews take varying approaches in how these Green Belt purposes are assessed. Clarity of methodology and consistency of application is crucial to the robustness or otherwise of the reviews.

6.16. Appendix 3 - Green Belt Comparison of Allocated Sites to these representations further examines the

evidence base and Green Belt Review (2023) to assess the inconsistencies in interpretation of national policy that have occurred.

**2013 Part 1 SKM GB Study Purposes Assessment**

6.17. The assessment of the five Green Belt purposes for each parcel is not aggregated, and defaults to the
highest score in any purpose to give an indication of performance. This is a familiar approach in Green Belt Reviews.

6.18. For the purposes of the Review, the Redbourn Site is classed as a Large Village.

6.19. The Green Belt Review considers the representation of landscape characteristics as being those defined

by the National Character Assessments (NCA). It considers that the Hertfordshire Landscape Character Assessment is too small to be studied independently. Whilst this approach is understandable if the Green Belt review were to only review large-scale strategic parcels, the fact that it considers smaller sub-parcels to take forward these parcels for allocation, means that the NCAs are subsequently overly broad-brush and less meaningful.

6.20. Against Green Belt purpose 3, relating to encroachment on the countryside, footnote 14 of the Green

Belt Review considers that the functional use of land e.g. agriculture and woodland, qualified by landscape character measures, provides the working definition for the review.

6.21. Therefore, land assessed as being in active agricultural management, surrounded or adjoining

managed agricultural land, should by reasoning, score better than land that isn't adjoining managed agricultural land or isn't functional in terms of being managed for agricultural purposes. However, the Green Belt Review does not recognise this.

6.22. The Green Belt Review identifies 66 strategic parcels (para 6.1.2), of which the Site lies in Land Parcel

20. 20.

6.23. The contribution of GB20 against NPPF (2023) Purpose 3 is 'Partial' as the Parcel "*displays a wide mix*

*of urban fringe and rural and countryside characteristics*".

6.24. The 2013 Green Belt Review takes forward land within the parcels that contribute least to Green Belt

purposes, identifying these as 'strategic' or 'small scale' sub-areas. It does not however provide evidence of how other parts of the land parcels had a stronger performance. Given that the tests are made against the entire land parcel, there is no evidence base to justify how a specific sub-area was identified.

6.25. The extent of Parcel GB20 is significant. As such, any conclusions drawn from the assessment can only

be at a high level and no allowance in made for identifying smaller areas within the parcels that may be suitable for release. There appears to be no threshold of scale of land parcel that triggers a subdivision, resulting arbitrarily in some very large parcels, and some much smaller ones. This leads to an inconsistent approach.

6.26. This lack of further sub-division or examination of the strategic land parcel overlooks the smaller, more

enclosed sites such as, for example, the Land North East of Redbourn.

**2013 Part 2 SKM GB Study (dated 2014).**

6.27. This report was prepared as a further sieve of the strategic sites identified in the 2013 stage 1 review.

6.28. However, the Local Plan Inspector, amongst others, criticised this document for its lack of detail and it

has effectively been superseded.

6.29. In summary, it did not provide analysis of all 66 sub-areas, only the 8 strategic sub-areas contributing

least to the GB purposes.

6.30. There appears to be no record on the St Albans evidence base list of the Part 2 SKM GB document being

used to inform earlier site allocations.

**St Albans Green Belt Final Report 2023 (Arup).**

6.31. This report supersedes the 2013 Part 2 SKM report.

6.32. The methodology comprises multiple criteria and is supported by a review of previous methodologies

used elsewhere, it is stated as being informed by, and supports the methodology of, 2013 part 1 SKM GB review.

6.33. The assessment of the five Green Belt Purposes for each parcel is not aggregated, and defaults to the

highest score in any purpose to give an indication of performance. This is not an uncommon approach in Green Belt Reviews.

6.34. For the purposes of the Review, Redbourn is classed as a Large Village.

6.35. In the 2023 review the study area was reduced to the edge of existing settlements (para. 4.2.1) using a

buffer for sustainable development, where it "*would assist in encouraging sustainable pattern o f development accessible to existing settlements and maintain the integrity of the Green Belt*." The methodology also states that the buffer is not an indication that land within it is the most sustainable, suitable, or deliverable location.

6.36. Within this buffer, the 8 strategic and small-scale sub-areas identified in the SKM Stage 1 review were

considered, where they fell entirely or partially within the buffer. However, the Review also considered sites that are "*immediately adjacent to another area / site entirely or partially within the buffer*". The interpretation of this is that any land parcel that does not lie within the settlement buffer could still be considered if it fulfils that criterion. This approach is flawed, because it means that the Review can cherry-pick additional land to extend any one of the original 8 sub-areas that might otherwise be considered too small to achieve the LPA's housing targets.

6.37. As a consequence of using the buffer, the 2023 Green Belt Review did not need to sub-divide all of the

66 land parcels identified in the preceding 2013 report. Instead, it focussed on sub-division only of parts of the parcels that lie within the buffer or adjoining. This process was used to identify 172 sub-parcels.

6.38. It is noted that "*in combination*" effects are discussed for each parcel. This is not typical of other Green

Belt Reviews. It cannot be acceptable to allow harm to one part of the Green Belt, because removal of a high-performing parcel lies within the LPA's preferred development site.

6.39. The definition of the parcels does [not] reflect the sites as promoted through the Council's site selection

work, despite this being a consideration at paragraph 4.2.2. For example, the Site is split into two parts, when it was promoted as one.

6.40. The assessment of the sites to the west of Redbourn, RA-1-3, whilst achieving the same score, are

recommended to be taken forward for further review. This is inconsistent with the assessment of the land to the North East of Redbourn.

6.41. The parcels are considered in combination with others. This is misleading.

Parcels SA-6 and SA-7.

6.42. The site lies within Parcels SA-6 and SA-7 (Figure 7). It is clearly defined by Dunstable Road, Harpenden
Lane and the B5183 bypass.

*Figure 7 – Site References*

*Source: p42 Green Belt Review ARUP 2023*

6.43. Most of the Site falls within the 250m buffer around Redbourn identified in the Stage 1 Review.

6.44. Parcel SA-6 is free of any major policy constraints. Parcel SA-7 is partly affected by Flood Zone 3b.

6.45. The definition of the boundaries of the parcels concerned is appropriate to the methodology, being

defined by A and B roads and rivers.

6.46. Both parcels are assessed as making no contribution to Green Belt Purpose 1 to check the unrestricted

sprawl of large built-up areas. This is agreed.

6.47. Both parcels are assessed as making a weak or very weak contribution to Green Belt Purpose 2 to

prevent neighbouring towns merging into one another. This is agreed.

6.48. Both parcels are assessed as making a strong contribution to Green Belt Purpose 3 to assist in

safeguarding the countryside from encroachment. This is not agreed. The parcels, whilst largely undeveloped, have a suburban feel to the majority of the area, affected by the roads and development along the boundaries. While it could be argued that some of the more isolated areas of the Site have a strongly rural character, the remainder and the bulk of the Site should be properly classified as largely rural. This would reduce the score from making a strong contribution, to meeting the criterion of the Purposes.

6.49. Both parcels are assessed as making no contribution to Green Belt Purpose 4 to preserve the setting

and special character of historic towns. This is agreed.

6.50. The reassessment of Green Belt Purpose 3 would alter the potential ranking of SA-6.

6.51. The comments in the Annex to the Review with regards to combining sites is unhelpful, particularly

with regards sites to the west of Redbourn. In particular, it is not agreed that in combination with SA-4, SA-5 and SA-7, the removal of the sub-area is likely to represent the irregular spread of Redbourn. On the contrary, the development of SA-6 and SA-7 within the confines of the bypass represents a logical extension and “rounding off” of the settlement.

6.52. The outer boundary of SA-6 is assessed as readily recognisable and permanent, whereas the same

boundary for SA-7 is assessed as readily recognisable and not necessarily permanent. This must be inaccurate as the bypass forms the outer boundary to both parcels.

6.53. The contribution that SA-6 makes toward the wider Strategic Parcel GB20 is also overstated. GB20

covers some 1,150ha, SA-6 is 39.81ha, less than 3.5%. It cannot be tenably stated, as the Council purports in the Review that the "*sub-area plays an important role with respect to the strategic land parcel*". Indeed, this point of coalesce between the West Redbourn and HGC, linking Redbourn and Hemel Hempstead, is a matter of concern to local councillors, such as Cllr Mitchell, which would not result if the NE Redbourn were allocated.

6.54. These material discrepancies and inconsistencies, and the flawed assessment of Green Belt Purpose 3

undermines the robustness and credibility of the conclusions of the Review and should be redressed by the Council.

6.55. In short, for the reasons set out above, it is plain the Green Belt Review does not represent an adequate

and proportionate evidential basis for determining the existence or otherwise of the exceptional circumstances necessary to alter the Green Belt boundaries in specific locations and, as such, its findings require urgent review.

- DJA Green Belt Review (2024)

6.56. Given the concerns we have previously expressed in relation to the Green Belt Review (2023) which
have been largely ignored by StADC at Regulation 18 stage, we have undertaken a revised Green Belt Review of the Broad Locations. Full details of the review undertaken by DJA is provided in Appendix 3 - Green Belt Comparison of Allocated Sites to these representations and a summary of the findings provided in Table 11 below.

6.57. Table 11 below presents the findings undertaken by DJA for how Regulation 19 allocated sites perform

against the purposes of the Green Belt. This has been determined by testing each of the sites against the LPA's evidence base, being the Green Belt Review Stage 2 (2023).

6.58. It is evidence that when assessed objectively, the NE Redbourn site is only potential outperformed in

Green Belt terms by two of the Broad Local allocations.

Table 11 – Green Belt Comparison of Allocated Sites

| Site Name | Purpose 1 | | Purpose 2 | Purpose 3 | Purpose 4 | **Overall score** |
|---|---|---|---|---|---|---|
| | 1(a) | 1(b) | | | | |
| **NE Redbourn Site** | **No** | **0** | **1** | **3** | **0** | **4** |
| H1 - North Hemel Hempstead AL3 7AU | Yes | 5 | 5 | 5 | 0 | **15** |
| H2 - East Hemel Hempstead - North - HP2 7HT | Yes | 5 | 5 | 4 | 0 | **14** |
| H3 – East Hemel Hempstead (Central), HP2 7LF | Yes | 3 | 1 | 3 | 0 | **4** |
| H4 - East Hemel Hempstead (South), HP2 4PA | Yes | 3 | 3 | 5 | 0 | **11** |
| B1 - North St Albans, | Yes | 5 | 1 | 5 | 0 | **11** |

| | | | | | | |
|---|---|---|---|---|---|---|
| AL3 6DD | | | | | | |
| B2 - North East Harpenden, AL5 5EG | Yes | 5 | 1 | 3 | 1 | **10** |
| B3 - West Redbourn, Redbourn, AL3 7HZ | No | 0 | 1 | 5 | 0 | **6** |
| B4 - East St Albans, | Yes | 1 | 1 | 5 | 0 | **7** |
| AL4 9JJ | | | | | | |
| B5 - Glinwell, Hatfield Road, St Albans, AL4 0HE[40] | Yes | 0 | 3 | 0 | 0 | **3** |
| B6 - West of London Colney, AL2 1LN | No | 0 | 3 | 5 | 0 | **8** |
| B7 - North West Harpenden, AL5 3NP | Yes | 5 | 0 | 5 | 0 | **10** |
| B8 - Harper Lane, north of Radlett, WD7 7HU | No | 0 | 5 | 2 | 0 | **7** |

*40 B5 – Glinwell is now almost wholly covered by development and is acknowledged in the Green Belt Review Stage 2 2023 as an anomaly.*

| | | | | | | |
|---|---|---|---|---|---|---|
| M6 – South of Harpenden Lane, Redbourn, AL3 7RQ | No | 0 | 1 | 2 | 0 | **3** |

6.59. DJA's assessment (Appendix 3 to these Representations) clearly demonstrates that:

- The H1 allocations risk coalescence of Redbourn and Hemel Hempstead, especially with the proposed B3 allocation at West Redbourn.
- The Green Belt Review (2023) fails to adequately look at context, in relation to settlement edge
- It also underplays the qualitative character of sits and their surroundings.

6.60. DJA's detailed analysis using the same methodology and criteria, has found that the Site:

- Performs less strongly against two of the purposes of the Green Belt, compared to the allocated land area B3 –'West Redbourn'.
- Is not comparable to all other undeveloped allocations.
- Will not significantly erode or close the gap between Redbourn and Harpenden.
- Will not significantly harm openness.
- Upon release from the Green Belt, the wider Green Belt still be able to serve a role in preserving the gap and preventing sprawl.

6.61. DJA's assessment shows that further refinement and consideration of the findings of the Green Belt

Review (2023) as part of the draft Plans' evidence base is required, to be fully justified and effective.

Site Selection Methodology Committee Paper 23rd Sept

6.62. At paragraph 3.8 to the PPC Report (23rd September) it is stated that:

*"These recommendations for further consideration are important in site selection and are key elements that inform the Proformas. The GBR Level 2, however, is not the only consideration for site selection and other criteria for suitability for the selection of sites in the Green Belt are part of the process that is set out in the Methodology agreed by LPAG and the Proformas. "*

6.63. We show in relation to the Sustainability Appraisal (Section 7.0) that StADC have pursued a contradictory approach to the application of the outcomes of the Green Belt Review versus other site considerations. The inconsistency with which the Green Belt Review (2023) findings have been applied is of concern in relation to the site selection methodology and housing section of the Plan as we have set out in these representations.

## 10.0 Exceptional Circumstances (& VSC's)

- Exceptional Circumstances

10.1. Draft Strategic Policy SP 3 (Land within the Green Belt) sets out that there is a requirement based upon the standard method (2023) for 885 dwellings in the plan period 1st October 2024 to 31st March 2041. This results in a requirement of 14,603 dwellings.

10.2. Notwithstanding the errors Table 3.1 in Part A of the Local Plan regarding the Broad Location housing contributions, we agree that as detailed at paragraph 3.5 of the Local Plan (Part A) that exceptional circumstances to review green belt boundaries exist and that insufficient brownfield sites are available to meet the standard method (2023) (or draft SM 2024).

10.3. Having concluded that exceptional circumstances exists, our objections is in relation to the manner and means by which the Green Belt Review (2023) has been undertaken and the flaws in the process through the SA (2024) and IDP (2023 & 2024) evidence work which have resulted in insufficient, in undeliverable and unrealistic land use allocation decisions as set out in table 3.1 and 3.2 of the Part A Plan and Part B Table A1.1 and the associated site allocations.

10.4. The NPPF is clear that in making changes to green belt boundaries, it is necessary to demonstrate "*exceptional circumstances*" by the plan making authority.

10.5. As to what "exceptional circumstances" comprise, paragraph 141 of the NPPF (2023) states that:

*"Before concluding that exceptional circumstances exist to justify changes to Green Belt boundaries, the strategic policy-making authority should be able to demonstrate that it has examined fully al l other reasonable options for meeting its identified need for development. This will be assessed through the examination of its strategic policies, which will take into account the preceding paragraph, and whether the strategy:*

1. *makes as much use as possible of suitable brownfield sites and underutilised land;*
2. *optimises the density of development in line with the policies in chapter 11 of this Framework, including whether policies promote a significant uplift in minimum density standards in town and city centres and other locations well served by public transport; and*
3. *has been informed by discussions with neighbouring authorities about whether they could accommodate some of the identified need for development, as demonstrated through the statement of common ground "*

10.6. In relation to decision taking, in determining Green Belt planning applications or making assessments on a site-specific basis, "very special circumstances" must be demonstrated. In this regard, paragraph 148 of the NPPF states:

*"When considering any planning application, local planning authorities should ensure that substantial weight is given to any harm to the Green Belt. 'Very special circumstances' will not exist unless the potential harm to the Green Belt by reason of inappropriateness, and any other harm resulting from the proposal, is clearly outweighed by other considerations"*

10.7. It is generally agreed that the tests for 'very special circumstances' exceed the threshold for exceptional circumstances and, as such, is a higher bar to reach.

10.8. We have set out in Sections 1.0 to 9.0 of these representations the failures of the both the content and process surrounding the preparation of the Regulation 19 Plan which result in an inability of StADC to meet its legal and procedural duties under the DtC and highlighted a range of aspects which make the Plan unsound.

10.9. At the very least we have identified a significant shortfall in housing supply of some 3,690 dwellings as well as identified significant failings in the Council's identified supply in the first 5-years immediately following adoption of the draft Plan. This is irrespective of any land use implications in relation to the Government policy and the draft NPPF (2024).

10.10. Additional site allocations should be made in to enable the StADC to transition effectively towards meeting the SM requirement (2023) (and subsequently the SM requirement 2024 effectively, and to ensure that that a sufficient and sustainable supply of housing will be delivered during the plan period to help meet StADC's considerable unmet housing needs (paragraph 35 NPPF 2023).

- 86 -

10.11. In Section 1.0 to these representations, we referred to a pre-application submission that was made to StADC in September 2024. In this, a robust very special circumstances case was set out for the release of the Site from the Green Belt.

10.12. In this submission LIH/LAT set out a considerable number of very substantial planning benefits would arise from the residential led development of the Site which collectively would clearly and demonstrably comprise very special circumstances (VSC's) justifying the release from the Green Belt for residential development and its allocation in the draft Plan.

10.13. We elaborate on these matters in more detail below, however these very substantial planning and public

benefits comprising VSC (or exceptional circumstance in Local Plan making terms), in summary include:

- Site deliverability & availability.
- Opportunities for improved connections.
- Transport & sustainability advantages.
- Access and enhancements by shared modes.
- Affordable housing & meeting specific housing needs.
- Education & community - primary school.
- SANGS - provision exceeds requirements.
- Biodiversity Net Gain (BNG).
- Socio Economic Benefits.
- Provision of up to 900 homes.
- New 2FE Primary School.
- Care home.
- Community and retail facilities, with potential for employment uses.

10.14. Consideration has been given to the extent of the package of planning benefits the Site might comprise, which would generally include the following:

- Market Housing
- Affordable Housing
- Socio-Economic Benefits
- Schools and Education
- Recreational and Sporting Benefits
- Community Facilities
- Sustainable Transport Benefits
- Ecology
- High Quality Design
- Sustainability & Energy
- Self-Build Housing

10.15. Fundamental to any VSC/exceptional circumstances case for the Site are the public benefits deriving from the landowner in this instance. Most significantly, and differently to many other potential schemes, the VSC basis for the Site includes specific public benefits that result from LAT's business intentions and purposes In relation to the proposed use of the net proceeds from the proposed development of the NE Redbourn site include matters such as:

- Future funding of Rothamsted Estate and the important scientific research and innovation work undertaken on the site.
- LAT Asset Enhancements.
- Provision of land and buildings on a rent-free basis to Rothamsted Research.
- Subsidised Harpenden accommodation to Rothamsted key workers, students, staff.
- Financial support for scientific costs to Rothamsted Research.
- Developing the Rothamsted Innovation Campus in Harpenden.
- Potential for increased support to Rothamsted Research and the related Innovation Campus.
- Support for scientific research and innovation projects (requiring additional capital).

10.16. Further details on the VSC/exceptional circumstances case associated with the development of the Site specific to LAT position are detailed below, however we first provide some background on LAT and its relationship with Rothamsted Research.

- 87 -

LAT & Rothamsted Research Background

10.17. The Council will be aware of the context to the proposed development and the relationship of the LAT and Rothamsted Research. We set these out in detail in Section 8.0 of the Regulation 18 Technical Submission - Final Submission (September 2023).

10.18. In summary, LAT is a registered charity established in 1889 to promote original investigation and research for the advancement of the science of agriculture. One of the key ways that LAT fulfils its charitable purposes is by supporting Rothamsted Research Limited ("Rothamsted").

10.19. Rothamsted, also a registered charity, undertakes world leading agricultural and scientific research. Rothamsted are engaged in (over period 2017-22) 257 projects with partners from across the UK (namely other research stations, universities, farmers, businesses, etc), and 237 projects with international partners. Also, LAT's current commercial tenants collaborate with and are funded by partners in over 40 countries worldwide, including China, Brazil, Argentina, India, Pakistan, Nigeria, Australia, Myanmar, Kenya, USA, Uganda, Mexico and much of the EU.

10.20. At the heart of Rothamsted's scientific strategy sits the need to feed a growing world population in a more sustainable manner and, in the process, make British and global farming both more sustainable and successful. The work of Rothamsted is of very great significance to UK PLC and the global fight against climate change and global food security. Rothamsted is also one of the largest employers in the area, employing in the region of 370 staff, students, and visiting workers.

10.21. LAT is the freehold owner of a 300-hectare estate known as the Rothamsted Estate. The Estate, which is almost entirely within the metropolitan Green Belt, includes a 7-ha laboratory complex; extensive agricultural land holdings utilised for agricultural research (most of the remaining area); Rothamsted Manor (Grade I); and 37 houses and cottages.

10.22. In addition to Rothamsted itself, the Rothamsted Estate is currently home to 35 third party commercial agri-tech tenant businesses, which collectively employ over 330 people on site. The campus has operated at or near full capacity over the past few years, with newly-released tenanted buildings full within months of opening and a waiting list of tenants – either existing tenants seeking to expand or new tenants wishing to join the campus. Without the creation of further lab and office space on campus, these businesses will be forced to relocate elsewhere – most likely out of the district, e.g. to Cambridge, London, or overseas.

10.23. Certain buildings on the estate have been refurbished over the years with support from grants from UK Research an Innovation (UKRI) Biotechnical and Biological Sciences Research Council (BBSRC); the Hertfordshire Local Economic Partnership (LEP); and Hertfordshire Innovation Quarter (HertsIQ), the Hertfordshire Enterprise Zone, of which the Rothamsted campus is a core

element and partner. However, much of the Estate remains in need of investment and refurbishment, to fulfil its vision to continue as a world-leading centre for scientific research and innovation, and attract the best scientists, entrepreneurs, and businesses to the campus and the district.

10.24. LAT supports Rothamsted through allowing it the use of the Estate (land and buildings), providing accommodation for staff, students and visiting workers, and by providing financial support in the form of an annual research grant to supplement the primary funding which is received from the Biotechnology and Biological Science Research Council (BBSRC – a part of UKRI).

Vision for Rothamsted Research & the Site

10.25. Rothamsted Research is a world-leading, non-profit research centre that focuses on strategic agricultural science to the agricultural industry and society nationally and worldwide. It exists to Enrich Lives & Grow Economies through pioneering agricultural scientific innovation, research, and development.

10.26. The work undertaken by Rothamsted Research makes a significant contribution to the better understanding of the agricultural industry, producing research that seeks to improve the industry in response to climate change and modern farming techniques. The contribution of the work undertaken is heavily valued by both public and private bodies both nationally and internationally.

10.27. The Harpenden research centre extends to approximately 240 ha, consisting of a mix of science and supporting buildings and arable land which is farmed and used for scientific research, and the main 8 ha science and conferencing centre.

10.28. Within the Rothamsted estate there are two National Bioscience Research Infrastructure ("NBRI") sites, including seven of the longest continuous agricultural field experiments in the world, as well as a long-term national insect survey. It also includes a Grade 1 listed Manor building that requires substantial investment and renewal to keep it in a viable use for the future.

10.29. The core charitable purpose of Rothamsted Research and the Trust as set out in their Articles of Association is to "*advance the science of agriculture for the public benefit through original; investigation and research, which may embrace all or any subject(s) connected to or bearing upon agriculture, including animal or vegetable physiology, meteorology, botany and chemistry*" (43)

10.30. This is achieved by bringing together global science, fresh thinking, and innovation for lasting benefits worldwide. This is achieved through the many different, yet connected, strands of scientific and technological research and development undertake on Site, including:

- Raising the productivity of crop and livestock systems, tackling weed, disease and insect resistance to agrochemicals, improved soil health, enhanced natural capital, reducing agriculture's carbon footprint, and add novel nutritional and bio-economical value to crops and other products.
- Designing sustainable strategies to protect crops and animals from disease.
- Improving crop yields and the efficient use of resources, increased stress tolerance, and increasing the nutritional and economic value in crops.
- Improving environmental health in modern agriculture.
- Designing the next generation of sustainable arable and grassland livestock systems through an improved understanding of the sustainability and resilience of livestock and arable farming systems both in the UK and internationally.
- Developing data science and decision-making tools to forearm the farming sector and additional stakeholders.
- Introducing more effective and efficient ways of working and minimising energy use and waste to achieve net zero objectives for the Campus that the industry can adopt.

Rothamsted Campus Long Term Vision

10.31. Whilst Rothamsted Research and the Rothamsted campus has been at the forefront of agricultural research and development for 180 years, some of the facilities on site are soon to be coming to the end of their operational life and require investment and renewal. The operational and scientific needs of the research institution are also at a point of change, and there is the need to improve the working environment to deliver a world leading research campus that can attract and retain staff.

10.32. LAT are looking to secure funding to enable investment in the future of the Site to continue to deliver state-of-the-art resources and facilities for agricultural scientific research and innovation. This will ensure that the campus is able to continue to produce and facilitate breakthrough studies that have the power and potential to change the world.

10.33. There is also the need to support small businesses that partner with or grow from the research undertaken on the research site. The Rothamsted campus plays a key role in linking research with innovation, providing a collaborative centre of excellence in agricultural science. The future vision is for a campus environment to develop and deliver ground-breaking ideas that can be tested, flourish and grow, developing in connection with a network of investors and entrepreneurs.

The Existing Rothamsted Campus:

10.34. The Campus and buildings on the LAT Harpenden Estate are not performing well in terms efficiency of building types, site layout, and longevity of infrastructure.

10.35. Due to the age of some of the buildings, maintenance and running costs are very high and the ability for the LAT to be flexible and meet the changing needs of their tenants is limited.

10.36. Buildings used by Rothamsted Research are no longer fit for purpose and are of a size and proportion which makes adaption inappropriate.

10.37. The Conference Centre contains facilities which are underutilised or would be better located elsewhere on the Estate. The reception and restaurant spaces could also be used more efficiently. The 300-seat auditorium is of a size which is difficult to fill and is effectively duplicated by the more flexible 200-seat Fowden Hall.

*43*Governing document, LAWES AGRICULTURAL TRUST - 1156150, Register of Charities - The Charity Commission

10.38. Public facing buildings and facilities such as the restaurant and the Little Gym are ineffectively located, separate from each other and the Manor House, which is of heritage interest to the public.

The Proposed Rothamsted Campus Vision

10.39. The emerging Rothamsted Campus Vision seeks to create a framework within which planned improvements can be implemented to the buildings, infrastructure, and Estate to provide world class research facilities. These new and improved facilities will enable the delivery of impactful science and innovation in agricultural research.

10.40. The combination of a high-quality architectural design, a sympathetic understanding of the Green Belt, and the scientific heritage of LAT will create a sustainable, collaborate science environment.

10.41. The Campus Vision provides a green square at the centre of the site, the removal of the poor-quality buildings and construction of new science buildings together with the rerouting of traffic from the heart of the campus.

10.42. Co-locating the above public facing facilities (namely the public restaurant/café and the Little Gym, as well as public heritage and educational facilities) in and around the Manor House which could create a destination which will help to highlight and strengthen the scientific heritage of Rothamsted.

10.43. The emerging strategy for the Estate to support science over the next 30+ years is looking to deliver the following aspects:

- A secure campus environment that promotes scientific research and collaboration in an improved built environment;
- New, fit for purpose laboratory space that provides flexible technical research facilities with associated write-up space;
- Centralised research facilities such as a library, archive and cold storage;
- New more energy efficient buildings that promote more sustainable ways of working;
- Greenhouses and climate-controlled environments to support research facilities;
- Incubator space for the growth of small businesses involved in or emerging from research.
- Fit for purpose research farm buildings;
- New, energy efficient agricultural housing; and
- Supporting campus buildings and ancillary functions, including subsidised staff accommodation.

10.44. Achieving these aims for Rothamsted and to deliver the emerging vision, long-term income will be needed to secure the future of science activities at Rothamsted, which is in part, linked to the vision for the Site and Redbourn itself, which is now outlined below.

Future Funding of Rothamsted Estate

10.45. A limb of the VSC/exceptional circumstances case for the proposals include the need and ambitions of LAT in supporting Rothamsted Research and the Rothamsted Campus as a whole, proactively driving it to continue to be a world-leading and growing centre for scientific innovation and research.

10.46. LAT as a landowner has deemed the land to be surplus to operational requirements for scientific purposes, given its more remote location and physical separation from the wider estate.

10.47. There is a different demand for agricultural field trials at the Estate because of the changing nature of Rothamsted's science. This includes a shift towards enclosed laboratory work and experimentation and the need to undertake tests within different environmental conditions and with varied soil types. Further, where field trials remain operational within the Estate, Rothamsted are reviewing their approach to enable better management, particularly in terms of biosecurity and to encourage expanded application of research through Rothamsted's network of UK farmers.

10.48. Increased complexities in funding for Rothamsted's work mean BBSRC has historically provided Rothamsted with revenue grant funding. This funding is coming under increased competition as the result of Government policy changes meaning the funding has been steadily declining. In addition, grant funding is also often allocated and paid after the research is undertaken and therefore presents Rothamsted with considerable cash flow challenges. While it is hoped that these pressures will not reduce the funding available to Rothamsted in the future, it is a significant risk. Therefore, it is imperative on Rothamsted and LAT to investigate alternative forms of funding. This includes taking equity stakes in research, resulting patents and start-ups but this is unlikely to see any meaningful financial return in the next twenty years.

10.49. Given this challenging climate for LAT and Rothamsted Research, the redevelopment of the Site would provide the opportunity to deliver some considerable and specific VSC's to be demonstrated, which include:

- Site Specific VSC's

**Enable specific new purpose-built building(s) on site for science R&D and innovation**

10.50. A proportion of net receipts from the redevelopment of the Site would be used for:

- New purpose-built science research and innovation building to include a new purpose-built replacement insectary and shared scientific services for use by researchers and innovators alike.
- This building would be a modern sustainable design.

**New residential accommodation for staff and students**

10.51. A proportion of net receipts would be utilised for the provision of new:

- Residential accommodation on a preferential / flexible basis being to support Rothamsted Research's researchers and innovators to retain UK talent locally and nationally, including accommodation for visiting researchers on short term contracts to attract global talent.
- Farm workers' accommodation.
- The proposed accommodation which the Trust would be constructing as a part of the Redbourn development would include circa 50 x 1 – 4 bed properties, in addition to the overall affordable housing provision delivered on Site.

**Creation of an endowment fund to provide research grants in line with our charitable purposes**

10.52. A proportion of net receipts would be utilised to provide:

- A fund specifically designed to fund new projects for researchers or start-up businesses which exploit basic research.

**Enable enhancements to Rothamsted Manor**

10.53. A proportion of net receipts would be utilised:

- to restore, refurbish and enhance this Grade 1 listed building together with the grounds and other structures based on suitable and appropriate future uses for the property, which might include creating new office space and other employment space, whilst protecting this important national asset.

10.54. In addition to these site specific VSC's, a considerable number of further planning/public benefits would arise from the Site's proposed development which together would comprise VSC's. We detail these below.

<u>Deliverability & Availability</u>

10.55. There are no overriding constraints to development of the Site in terms of land ownership, restrictive covenants, or collaboration requirements.

10.56. The Site is deliverable, achievable, and viable in NPPF terms. It has the potential to deliver completions from FY 2027/28 of the Trajectory.

10.57. The land is 100% owned by LAT Redbourn Limited, a wholly owned subsidiary of LAT, free of any restrictive covenants or other legal impediments.

10.58. The land is currently held and valued as agricultural land and is surplus to requirements. Therefore, any income generated over, and above agricultural values would be considered reinvested into LAT for the benefit of Rothamsted Research as part of the Trust's charitable aims and objectives and would be utilised to assist in the delivery of the 4 unique benefits for Rothamsted Research as listed above.

<u>Improved Connections</u>

10.59. The Site has the potential to enhance existing connections and provide new routes into the countryside and beyond. This includes:

- Improved safe walking and cycling route along Harpenden Lane within the green frontage of the site.
- Signalised crossings at Harpenden Lane roundabout to provide safe crossing routes for users of the Nickey Line.
- Improvements to the Porridge Pot PROW to make it an all-year route.
- A new boardwalk at the underpass to create a safe crossing link of the A5183 avoiding the existing route across the road itself.

10.60. Many of these proposed connections improvement have resulted from significant consultation with residents and stakeholders such as Friends of the Nicky Line.

Affordable Housing & Meeting Specific Housing Needs

10.61. A range of housing would be developed responding to local housing needs. Opportunities at both ends of the market for elderly care in the form of a 50+ bed care home as well as first time buyer opportunities would be provided for. Policy compliant affordable housing would also be provided, but most importantly, would also provide affordable accommodation to key workers at Rothamsted Research facility within a sustainable commuting distance from the campus. LAT would seek to take ownership and management of a proportion of the affordable properties aiming them at skilled scientists and professionals on a lower income as well as visiting academics as detailed above.

10.62. Policy compliant self/custom build housing would also be provided on Site complete with a design code to ensure design quality is in keeping with the rest of the Site.

10.63. Up to 900 homes at an average density of 40dph StADC policy compliant level (DES 3 efficient use of land) as well as a substantial proportion of affordable homes coupled with meeting a specific housing need for Rothamsted Research staff and students.

Education & Community

10.64. A new 2-form entry primary school will be delivered on site providing significant new educational facilities for existing as well as new children within Redbourn. A co-located community space will be provided for use by local groups but will also enable a programme of outreach between Rothamsted Research and the local community. This will encourage scientific learning on issues that are pertinent to Rothamsted that can be translated into everyday use such as biodiversity within our landscapes and gardens to accessible climate change initiatives.

10.65. Through the Site, there will be opportunities for residents and the local community to play and explore through the variety of open spaces and in the purpose-built multi-use games equipment to be provided. Public open spaces will also be set throughout the scheme drawing on the links with Rothamsted and the art of nature.

10.66. LAT's charitable purposes are "*to advance the science of agriculture for the public benefit through original investigation and research, which may embrace all or any subjects) connected to or bearing upon agriculture, including animal or vegetable physiology, meteorology, botany and chemistry*"[(44)]. These purposes are mirrored by Rothamsted, and as a part of their work, LAT and Rothamsted contribute to education of the next generation of actual or potential scientists, whether that is through supporting PhD students, hosting local schools and providing educational tours, and support for initiatives and enterprises such as Farm School. Both charities are actively exploring how education and scientific and environmental awareness can be embedded within the scheme, for the benefit of all.

10.67. Several additional community sports pitches would also form part of the development as shown in the Vision document and Figure 2 above.

Environment

10.68. The scheme will offer significant environmental enhancements well over and above the existing use as agricultural fields. This will include improvements to the River Ver such as a new water meadow providing enhanced flood and flow management to the River Ver. LIH and LAT will work in conjunction with Rothamsted Research to design the landscape scheme ensuring the proposals deliver biodiverse rich landscapes open spaces.

10.69. The SANG, perfectly positioned on adjoining land, will provide additional recreational space for Redbourn village connecting in the wider footpaths across the Rothamsted Estate into Harpenden.

SANG

10.70. Due to the location of the new homes being located within 12.6km of the Ashridge Commons and Woods unit of the Chiltern Beechwoods Special Area of Conservation (SAC), a new Suitable Area of Natural Greenspace (SANG) would be created to the immediate east of the proposed development.

10.71. The proposed SANG has been developed in consultation with Natural England and comprises approximately 23ha of land which would be available to residents of the new development and the wider public alike for informal recreational activities such as dog walking, jogging, and picnicking.

"https://register-of-charities.charitycommission.gov.uk/charity-search/-/charity-details/5045880/governing-document

- 92 -

10.72. The SANG has been designed in accordance with Natural England's 2021 SANG creation guidelines and would include a 2.3-2.5km circular walk through an attractive landscape comprising existing mature woodlands in addition to newly created grassland habitats. The River Ver flows through the SANG adding additional interest for visitors and the SANG is well connected to wider recreational opportunities including the local footpath network and the Nicky Line recreational route (also forming part of the Chiltern Way) which crosses the central area of the SANG.

10.73. At a size of 22.92ha, the SANG will have capacity to mitigate potential effects of development on the Chiltern Beechwoods SAC beyond that required for the proposed development. This would enable development of other suitable sites which may not otherwise be possible due to lack of SANG capacity comprising a wider public benefit of the scheme, including an overprovision of SANG of approximately 4.5ha.

Biodiversity Net Gain (BNG)

10.74. Biodiversity Net gain of at least 10% will be delivered with the aspiration being, In accordance with the mitigation hierarchy, that this is achieved onsite.

Socio Economic Benefits

10.75. The socio-economic benefits of the proposed development would be very significant (Individually and collectively), and Include:

- Provision of up to 900 homes.
- New 2FE Primary School.
- Care home.
- Community and retail facilities, with potential for employment uses.

10.76. Significant job creation both during and following construction will also be provided from the proposed development.

10.77. Neither in the SA (2024) nor the IDP (2024) Is there any or any adequate regard paid to the significant infrastructure, or sustainability credentials of the site and its potential to form part of the spatial strategy for the Local Plan. This becomes even more pertinent given the erroneous and inconsistent assumptions that we have demonstrated in relation to the Green Belt Review.

9.1. The lack of justification and accuracy in approach to the spatial strategy of the draft Plan (2024) and its land use allocations has been clearly demonstrated through

9.2. Consequent of the failing identified, we consider that the Regulation 19 Plan is not legally compliant due to the failure in the DtC and is also unsound given the profound errors identified. The Regulation 19 Plan has not been positively prepared and is unjustified in many key areas. It is ineffective in ensuring delivery or cross boundary working and is therefore not consistent with existing - or emerging - national planning policy.

9.3. We assert that the Regulation 19 Plan should be urgently reviewed and revised by StADC to address these significant failings prior to submission including, existing allocations should be reviewed and additional or replacement allocations made to regularise these comprehensive concerns.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

6.64. It is our contention that draft Policies SP1, Key diagram 1.3, paragraph 3.7 – 3.11, Policy SP3, Tables 3.1 and 3.2 of Part A of the Plan require review. Policies LG1 – 4 also require amendment to reflect the inconsistent outputs of an updated Green Belt Review (2023) as we highlight in Table 11. This review would also have implications for Part B, Table A1.1 and the associated Site allocations, which require review and supplementing with additional sites such as the land at NE Redbourn.

6.65. The implications of amendments required in relation to the above policies might also need to be reviewed in relation to Draft Policies LG5 and 6, to ensure that they support the objectives for sustainable development (paragraph 8 of the NPPF) following the more comprehensive review of the Green Belt Review (2023) and the housing sections of the draft Plan (Parts A and B).

9.4. Changes to the Table 3.1 and 3.2 of Part A of the draft Local Plan; Policies LG1, LG2, LG3 and LG4; Part B of the draft Local Plan Table A1.1 and Part B - Sites H 1 – H4; B1 – B8 ; M2 – M23; P1. – P3; U2 – U4; UC1 – UC57 are required to ensure soundness and amendments to the draft Plan are needed in the following areas:

- Green Belt review (2023) requires review to address fundamental flaws.
- Inadequacies of the SA (2024) require redress, and the outputs of the assessment revised to have better regard to the benefits and opportunities that NE Redbourn site presents and then benefits that might accrue.
- Housing land supply shortfall of some 3,690 dwellings should be mitigated through the inclusion of additional allocations.
- Exceptional/very special circumstance plainly exists for the allocation of the land at NE Redbourn for residential development. In summary, development of the Site will:

- Mitigate wider site deliverability constraints in other broad locations
- Provide a tangible contribution to the housing land supply position within the first three years from adoption
- Offer unique and specific benefits to Rothamsted Research a world leading scientific research centre
- Provide wider SANG benefits to meet StADC SANG needs
- Errors and blinkered approach to infrastructure need, provision, and delivery in relation to the IDP (2023 and 2024) need amendment and reassessment.
- Significantly supressed provision of housing in the first 5 years of the plan period (following adoption) should be amended to ensure a better evidenced and aspirational trajectory of delivery.
- Lack of regard to unmet housing need and the way spatial decisions can assist in overcoming such needs.
- Lack of effective engagement demonstrated by StADC" lack of discussion with LAWES Trust in relation to site allocations made on their land at both Regulation 18 and 19 stage.

**St Albans Local Plan Reg 19 Consultation –Site Allocation**

**Land South of Codicote Road, Wheathampstead AL4 8GD**

We respond on behalf of McCarthy & Stone Retirement Lifestyles Ltd who currently have a planning application (5/2024/1508) with the council for the development of Land south of Codicote Road and Cory Wright Way, Wheathampstead, comprising 33 apartments and 13 bungalows, and also on behalf of other parties within an interest in the land, Jarvis Homes, and Wheathampstead Land.

The site comprises overgrown scrub and includes a yard and storage structures for a forestry

enterprise. We object to the removal of draft site M24 Land south of Codicote Road, Wheathampstead from the Regulation 19 draft consultation. The 1.28ha site was identified for residential development at the draft Local Plan Regulation 18 stage(Medium and Small Sites) (2023) (site M24). This proposed allocation was based on the evidence within the Council's Green Belt Study (2023) and HELAA (2022) . The site was formerly used as a storage yard.

The site is, however, now excluded from the Regulation 19 St Albans local plan on the basis that work is being undertaken that could consider the site as part of an extended Chilterns National landscape. It has therefore been included in a list of sites that are titled 'Chilterns National Landscape Site – not recommended to progress' on the basis that:

'*Technical work undertaken by Natural England, regarding the characteristics of land that meets their criteria for an extension to the Chilterns National Landscape into St Albans City & District, includes this site.'*

The outcome of this technical work is not yet available.

**Chiltern Hills National Landscape boundary Extension process.**

In 2013 the Chilterns Conservation Board applied to Natural England to extend the boundaries of the 4 designated Areas of AONB (National Landscape) to provide *'opportunities for a more strategic and coherent approach to positively managing these assets where they are outside the current designated AONB for future generations;'*

The diagram below formed part of the application to Natural England and shows the designated Area closest to the Codicote Lane site as Area 1 – North Hertfordshire. The proposed extended boundary at the southern end of Area 1 roughly followed the district boundary line of North Hertfordshire council.

*Land at Codicote Road shown in relation to proposed Chilterns Hills AONB proposed extension 2013*

Area 1

(North Herfordshire)

Area 1 Proposed

Extension

The site (allocation ref M24)

According to the Chilterns National Landscape Conservation Board meeting note of 19th September 2024 a workshop for technical experts was held in November 2023 and additional sites were proposed for consideration. It is believed that a far larger swathe of land ( to include land within St Alban's DC) was proposed at this stage. Natural England has subsequently prepared a Natural Beauty Assessment of the proposed extended area and at September 2024 was considering its consultants' (LUC) final 'Desirability to Designate' assessment of the candidate areas as potential new boundaries. We are not aware that these documents are yet publicly available. Natural England suggest that the timetable has slipped, and that they are now expecting the formal and public consultation to take place this winter and possibly not before January 2025. A Variation Order for the Secretary of State is likely to take at least a year from the date of consultation given the legal process that designation involves.

It would therefore appear that the site (M24) has been excluded from the plan solely on the basis that the general area around it has been included within a much wider study by Natural England looking at options to extend the Chilterns National Landscape, and which is not available for consideration. This is not a justification for deleting a site, especially given the council's housing need, with justification for allocation already provided. Designation within a National Landscape does not preclude development.

Furthermore, given the image above that illustrates the potential AONB extension, the development of site (M24) would not have any impact on newly designated AONB land. Due to the topography and landscape structure of the area there is no intervisibility between the areas in question.

**Housing Supply Background**

The Regulation 19 draft says that there is a need for 14,603 dwellings from October 2024 to March 2041, which is equivalent to 885 dwellings per annum, but only allocates sites totaling 10,808 dwellings, which is equivalent to a 12 year supply of dwellings over the 16 year plan period. We note that the Regulation 18 draft proposed allocations for 11,779 dwellings. The Latest published figures for the St Albans show a very limited housing land supply of 1.7 years. With the publication of the new draft NPPF and a return to a standard method it is likely that the housing requirement will increase and that the housing supply position within St Albans district will become more acute. Land south of Codicote Road, given its characteristics, should not have been removed from the draft plan and should be re-incorporated within it.

**Recommendation**

In view of the considerable delay and uncertainty surrounding the proposed Chiltern National Landscape boundary extension, the lack of current evidence to justify this approach, and the extremely low housing land supply within St Albans, it is inappropriate to exclude the site from the list of proposed site allocations within the Local Plan. The site should therefore be reintroduced to the plan and allocated for housing development.

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* Yes

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

Support is offered for the principle of redeveloping the pavilion at Toulmin Drive. The Council's Playing Pitch Strategy & Action Plan identified that the existing pavilion facilities were in need of replacement to support the use of the playing fields. This allocation would accord with the Council's evidence base (Playing Pitch Strategy).

### If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?

* No, I do not wish to participate in hearing session(s)

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

As has been set out in these representations on Part A of this Plan and its supporting evidence, there is a live outline planning application that has been submitted to the Council for our client's site referred to as Land Between The Alban Way And Colney Heath Lane for the construction of up to 190 dwellings – including 50% affordable housing and 10% self-build and custom housing, a minimum of 6ha of public open space, landscaping, biodiversity habitat, formation of new access and all ancillary works (ref: 5/2023/1923).

The supporting documentation for the planning application demonstrates that the number of constraints identified in the site selection assessment for this land have been carefully considered, resulting in a level of harm from the proposal that is limited in scope and nature. We invite the Council on Ms. Bennett's behalf to review the technical information that supports the scheme which will provide assurance that the site is suitable, available and deliverable and is an ideal choice for inclusion as a potential allocation in the eLP despite the findings of the site selection assessment and GBR.

More specifically, the below points address the criteria against which the site allegedly performs weakly on:

- The Site is in a sustainable location within close proximity to the public transport network with the submitted Travel Plan and Accessibility Audit duly considering alternative modes of transport and confirming there is no reason why planning permission should not be granted.
- The Illustrative Concept Masterplan, Land Use Parameters Plan, Illustrative Landscape Masterplan, Density Parameters Plan, Building Heights Parameters Plan and the Design and Access Statement demonstrate and explain how the proposed development will integrate into the character of its surroundings in relation to scale, height, density, size, design and materials. The open space to the east of the site provides a gentle and landscaped new edge to the settlement, as well providing valuable amenity space for existing and future residents.
- The existing protected woodland will be retained and safeguarded during construction. A tree survey has identified any trees to be removed are of low quality and will be replaced through new planting. The Landscape Masterplan provides for new ecological habitat, open space and landscaping.
- The site is not covered by any designation for character or quality other than the Watling Chase Community Forest area, which is a large swathe of land between St Albans and Hatfield. The site does not fall within any of the landscape conservation areas.

- The Site has been subject to various ecological surveys and habitat assessments which have identified protected species and areas of high-quality habitat. The proposed development provides a number of ecological enhancements as part of the scheme along with areas of new habitat and new landscaping. The application demonstrates a biodiversity net gain can be achieved through on-site mitigation and off-site compensation.
- The proposed development will result in the restoration and remediation of a contaminated site that currently poses a risk to the environment and human health. The NPPF contains at Paragraph 124 an objective that sets out planning policies and decisions should support appropriate opportunities to remediate despoiled, degraded, derelict, contaminated or unstable land.

We strongly recommend that the Council reviews the information supporting the outline planning application which will provide assurances that the development of the site will result in a net overall planning gain. The Landscape and Visual Assessment and Green Belt Assessment (LVAGBA) submitted with the application robustly addresses the shortcomings of the Arup Stage 2 GBR in its assessment of the site, and demonstrates that the site is indeed suitable for residential development in the context of harm to the Green Belt. That position will only be furthered with the introduction of Grey Belt when the new NPPF is adopted later this year, as based on the assessment in the LVAGBA submitted with the application, there is a strong argument that that the site makes only a limited contribution to Green Belt purposes, thus meaning it is considered to be Grey Belt and should be considered sequentially preferable for release from Green Belt and allocation to assist the Council meeting its substantial housing needs. Failure to do so would mean that the plan cannot be considered sound, as it would not be positively prepared or justified. Nor would it be consistent with national policy.

**Number:**

Part B Generally

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Stonebond do not believe that enough housing allocations have been identified to meet the current and growing need of the District. The removal of sites such as WH-10-18 are not justified. SADC should be identifying more housing allocations, in addition to all of those previously draft allocated at the Regulation 18 stage.

As set out in relation to other areas of the draft Local Plan, Stonebond are of the view that there is:

1. a) insufficient land identified to meet housing need over the plan period;
2. b) the windfall analysis is not justified; and
3. c) there is a lack of contingency in the supply of sites to ensure the housing requirements of the area can be met.

These factors indicated that there is a need to add additional sites, specifically deliverable small and medium sized sites, to the Local Plan to make it sound.

Whilst not objecting to the proposed allocations in Part B of the draft Local Plan, there are a number of specific observations that Stonebond wish to make in relation to sites, or groups of sites.

Car Parks

A number of sites identified in Part B of the draft Local Plan are car parks, including those in use by the public. A number of these car parks are still in use and it is stated that they will need a parking survey before any proposal is approved. It is therefore unclear whether the sites are actually available for development or what the impact on their redevelopment would be on the areas in which they sit (e.g. in terms of availability of parking, economic impacts etc.…).

A number of the sites are also noted as lying within or adjacent to Conservation Areas, meaning they are sensitive in nature. Given this constraint, it is highly likely that the number of homes that have been assumed on some of the sites will not be realised, particularly given the high densities assumed (e.g. UC2 has a density of 126 dwellings per hectare despite being in the Conservation Area and close to a number of Listed and Locally Listed Buildings).

This sort of uncertainty highlights the need for a greater buffer in the land supply to ensure sufficient homes can be delivered over the plan period to meet local needs. Without additional sites added via main modification, it is not considered that the Local Plan can be considered effective and therefore sound.

Previously Developed Sites in the Green Belt

As note earlier in this representation, the 2020 HELAA was clear that brownfield sites in the Green Belt form part of the brownfield allowance. This point is not addressed in the new Windfall Assessment but Stonebond consider that the inclusion of these sites as housing allocations likely to be a double counting of housing numbers.

In the context of a likely shortfall in land supply to meet the minimum housing requirements, to make the Local Plan sound, as addressed in relation to the Green Belt Assessment and site selection process, the Council need to revisit the assessment of sites and include suitable sites in Part B of the Local Plan as allocations.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Provide additioal justification for the inclusion of car parks as residential allocations, including the availability of parking and the impact on the local economy.

Clarify the relationship between allocated brownfield sites and the windfall allowance. Identify additional small medium sites to increase the supply of land in the area, reflecting comment of other aspects of the Local Plan

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To discuss the shortfall in the supply of small and medium sized sites and concerns about those sites identified in the Local Plan.

The Rothamsted Campus, encompassing Rothamsted Research and a number of UK and international commercial tenants, is an important ecosystem that provides specialist research, development and innovation of national and international importance. We welcome the updates incorporated into the latest version of the draft Local Plan however, as set out above, we remain of the view that a number of the draft policies could be progressed further still to support for the long-term aims and ambitions of the institution.

Furthermore, we kindly request that Officers consider the connection between forthcoming development proposals on land north of Redbourn and the need for securing investment to ensure the continued operation of the Rothamsted Research facility. We recommend the subsequent

release of this land from the Green Belt and its allocation for residential development within the St Albans District Local Plan. Such actions would not only safeguard the future of Rothamsted Research Centre but also promote a synergistic relationship between residential development and economic innovation.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. ### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

Stonebond do not wish to object to the identification of any of the sites within the Draft Local Plan. It is clear that there is a significant need for housing in the area and SADC should be allocating sufficient land to meet this need over the plan period and beyond. This means not removing sites from the proposed supply unless necessary.

However, as set out in relation to other areas of the draft Local Plan, Stonebond are of the view that there is:

1. a) insufficient land identified to meet housing need over the plan period;
2. b) the windfall analysis is not justified and
3. c) there is a lack of contingency in the supply of sites to ensure the housing requirements of the area can be met.

These factors indicated that there is a need to add additional sites, specifically deliverable small and medium sized sites, to the Local Plan to make it sound, such as Stonebond's site at Notcutts Garden Centre.

Whilst not objecting to the proposed allocations in Part B of the draft Local Plan, there are a number of specific observations that Stonebond wish to make in relation to sites, or groups of sites.

<u>Car Parks</u>

A number of sites identified in Part B of the draft Local Plan are car parks, including those in use by the public. A number of these car parks are still in use, and it is stated that they will need a parking survey before any proposal is approved. It is therefore unclear whether the sites are actually available for development or what the impact on their redevelopment would be on the areas in which they sit (e.g. in terms of availability of parking, and economic impacts on business uses (retail and office) that rely on the use of those parking areas).

A number of the sites are also noted as lying within or adjacent to Conservation Areas, meaning they are sensitive in nature. Given this constraint, it is highly likely that the number of homes that have been assumed on some of the sites will not be realised, particularly given the high densities assumed (e.g. UC2 has a density of 126 dwellings per hectare despite being in the Conservation Area, close to a number of Listed and Locally Listed Buildings with a height limit on development).

This sort of uncertainty highlights the need for a greater buffer in the land supply to ensure sufficient homes can be delivered over the plan period to meet local needs. Without additional sites added via main modification, it is not considered that the Local Plan can be considered effective and therefore sound.

B5 Glinwell

Stonebond support the identification of site B5, Glinwell, in the draft Local Plan. As referred to within comments on the Spatial Strategy, the implication of the proposed allocation is that the washed over settlement of Smallford will effectively be connected to St Albans. This has not been reflected in the draft Local Plan and Stonebond believe this is an omission which has affected the way that the potential site allocations have been assessed and considered.

Whilst not directly related to the soundness of the draft Local Plan, Stonebond would point to the fact that the 'Key Development Requirements' related to site B5, Glinwell, would reinforce their position that the area around the site is well connected from a sustainable transport point of view – a position that will be enhanced as a result of the Glinwell redevelopment.

Previously Developed Sites in the Green Belt

As noted earlier in this representation, the HELAA is clear that brownfield sites in the Green Belt form part of the brownfield allowance. Therefore, the inclusion of these sites as housing allocations is a clear double counting of housing numbers.

Whilst Stonebond don't disagree with their inclusion in the draft Local Plan given the significant need for housing in St Albans, they would highlight one of the sites (P3, Friends Meeting House near Leverstock Green) as an example of the lack of proper thought which has gone into ensuring the draft Local Plan will deliver sustainable development.

Site P3 is identified for allocation as just 1% of it lies within the 400m Green Belt buffer around Hemel Hempstead. This buffer is supposed to allow the identification of 'sustainable sites'. Yet the site lies on a narrow rural road with no footpaths making it clearly reliant on the car. Whilst the site could be made more sustainable through the development of the East of Hemel site, this is not likely to happen in the short-term meaning the site would in all likelihood be developed in isolation.

On the other hand, Stonebond's site at Notcutts (which is partially brownfield) lies immediately adjacent to a range of services and facilities and, as prioritised by national policy, a key public transport route. It also benefits from public footpaths into St Albans. However, the site is not identified for allocation due to the approach taken to the Green Belt assessment, which Stonebond consider to be flawed and inconsistent with national policy. If the correct approach was taken, sites such as that to the rear of Notcutts would be identified for allocation in addition to those sites which meet the existing criteria of simply being in proximity to a settlement despite their sustainability credentials.

In the context of a likely shortfall in land supply to meet the minimum housing requirements, to make the Local Plan sound, as addressed in relation to the Green Belt Assessment, a proper Green Belt assessment which satisfies national policy needs to be undertaken and suitable sites included in part b of the Local Plan as allocations.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

In line with comments on the evidence base and site assessment process, identify additional small and medium sized sites to provide sufficient housing land to meet ongoing short term need and the minimum requirement over the plan period.

Review car park allocations to check the impact in terms of parking provision and impact on the local economy.

Check brownfield allocations against the windfall allowance to check for double counting of supply.

Review evident base to ensure all suitable brownfield and underutilised sites are identified as allocations and include them in the Local Plan.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To discuss the need for additional sites to be included in the Local Plan as small/medium allocations as a result of errors in the assessment process, referred to in comments on other sections of the Local Plan, and the likely shortfall in deliverable land identified.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

**205 - Jarvis Homes**

Submission Number: 205 Submission Date: 07/11/24 17:08

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: Jarvis Homes Name:

Comment Number: 2

**Type:**

* Site

**Number:**

New site

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

This report responds to the draft St Albans Local Plan 2041 Regulation 18 Consultation published by St Albans City and District Council in July 2023. The representations are made on behalf of Jarvis Homes, who are promoting land between Beesonend Lane and Prospect Lane for development.

The Beesonend Lane site has been excluded as a housing allocation in the draft Local Plan and Jarvis Homes object to this exclusion as the site promoter.

In summary, additional housing sites are needed, both to ensure the overall housing target is achieved and to boost delivery in the early part of the Plan period. The urgent need for a new Local Plan means that it is not appropriate at this stage to completely rework the Local Plan strategy and its evidence. Nevertheless, where additional sites can come forward within the context of the submitted strategy, these opportunities should be taken.

The land adjacent to the Jarvis Homes site has been inappropriately excluded from the Local Plan on the basis of a possible extension of the National Landscape for which there is no evidence in the public domain and very little confidence on the possible timescales. This site should be reinstated.

The Jarvis Homes site has been inappropriately excluded from the Local Plan on the basis of a Green Belt Review that did not consider the site-specific consequences of development on this site but rather combined the site with a much larger area, making the findings for the whole largely irrelevant to the Jarvis Homes site.

The site is immediately available for development and is deliverable. There are no overriding constraints as confirmed by the HELAA.

The aspiration is to develop the site for a retirement village including dwellings for older residents and a nursing care home. Jarvis has entered into partnership with a retirement village provider, Amber, to bring forward development proposals for the site.

An indicative site layout has been prepared and is shown at Figure 7 below. This shows a scheme a 66-bed care home, 49 bungalows and 9 town houses. Associated facilities such as a village green and bowls club would be provided along with a community hub. These facilities could be made available to residents of the surrounding area.

This layout demonstrates that the site can be brought forward in an acceptable way for the quantum of development proposed, and in a way which respects the character of the surrounding area. For example, the care home provides a frontage to prospect lane, and the choice of bungalows as the majority house type reflects the site's location on the edge of an urban area and adjacent to a low-density housing estate. Structural landscaping, particularly to the west, can be incorporated.

As an alternative form of development, the site could be built out for conventional market and affordable housing. As a site of around 3.7ha, approximately 125 homes could be accommodated.

The draft Local Plan makes inadequate provision to meet the accommodation needs of older people. New sites should be allocated specifically for this type of development and specifically that can deliver early in the plan period.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Jarvis Homes site at Beesonend Lane is both suitable and deliverable as a site for older persons accommodation. It can be brought forward quickly and will have limited impact on the Green Belt. In doing so, it can also deliver a vehicular access to the Council's previously proposed site M14 on the eastern boundary.

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Bellway Homes Limited considers the plan fails on Paragraph 35 of the NPPF, and is

fundamentally unsound. Reasons why the plan is not positively prepared and deliverable is discussed in this representation, yet is summarised as below (yet not limited to):

- The baseline housing need figures cited in Table 3.2 and Policy SP1 and SP3 do not appear to be correct and directly contradict the housing need figures published in the AMR 2022, equating to a **shortfall of between 2,271 dwellings**.
- **Level of housing proposed (Standard Method) does not allow for contingency** and is therefore not robust or positively prepared;

- **Lack of recent delivery, 5YHLS,** and lack of contingency warrant a higher housing requirement;
- **Level of windfall sites anticipated is unachievable and speculative**, most sites need to be formally allocated to be sure the level of housing proposed is achievable**.**
- **Green Belt Assessment is flawed due to it not being fine-grain,** with no consideration to the need for natural growth of the washed over settlements within the green belt, which has been deemed to be unsound in the case of the Uttlesford BC Local Plan examination;
- Further sites should therefore be **allocated to account for excessive windfall provision and over reliance on a small number of strategic development sites.**
- Reasonable alternative sites, such as Land at Roundhouse Farm, to the north of Roestock Lane have been **discounted and assessed incorrectly;**

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Bellway Homes Limited suggest that these significant changes are made to the emerging Local Plan,

most notably:

- Greater number of sites allocated, including allocation of a broader range of medium and large size green belt sites within the borough to provide contingency within the early stages of the Local Plan process.
- Green Belt Review to review smaller parcels of land such as Land to the north of Roestock Lane
- Less reliance on speculative windfall sites replaced with a mixture of housing allocations; and
- Need for further Green Belt release to accommodate for the objectively assessed need (including **Land at Roundhouse Farm / to the north of Roestock Lane**) to ensure the plan is positively prepared and ultimately sound in accordance with NPPF paragraph 35;

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. REPRES~1.PDF

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Our client has significant concerns regarding the soundness of this draft local plan Given that they have landholdings within the borough, we assert our right to participate in discussions regarding the draft policies during the Examination in Public (EIP) stage.

See attached report for details

Strategic Policy SP5 - Overview

5.1 The Report Site currently provides accommodation for around 15 small businesses, comprising car recovery and storage; car sales; removals and storage; construction plant storage and scaffolding yards. These uses are characterised by their need for open storage facilities and access to the motorway network. As set out in Section 6.0, consideration could be given to the continuation and regularisation of this unlawful use in some form, on the basis that it self-evidently meets an

existing demand and would add to the mix of employment land in the District, rather than competing with or duplicating the proposed designations identified by Policy SP5. Such an approach would be supported by the landowner.

5.2 Policy SP5 designates the following 2 new industrial and business locations:

53 ha of Employment land at East Hemel Hempstead (Central) providing for a range of uses including offices, research and development, light industrial and distribution.

33.16 ha of the Government permitted Strategic Rail Freight Interchange at the former Radlett aerodrome - mostly B8 distribution / warehousing.

The landowner has no objection to the above allocations, however, a range of sizes, types and locations are needed to meet the needs of different employers.

5.3 With regard to the East Hemel Hempstead (Central) site, this would comprise an extension to the Maylands Business Park. Identified as Site H3 in Part B of the draft Plan, it is proposed to deliver integrated Enviro-Tech Businesses, environmentally friendly buildings and complementary uses. The uses currently operating at the Report Site would not be compatible with this approach, whilst in any event as an extension to the Mayland Business Park, this would primarily satisfy demand for employment space within Dacorum District, whilst similarly mainly providing jobs for Dacorum residents. Indeed, Policy SP5 states, with regard to the proposed designations as follows:

"Due to these locations providing an agreed oversupply for St Albans District's own needs, the excess will assist Dacorum Borough and potentially other South West Herts local authorities in meeting some of their employment requirements."

5.4. With regard to the Strategic Rail Freight Interchange site, this was granted permission by the Secretary of State under LPA Refs 5/2009/0708 (outline) and 5/2016/3006 (Reserved Matters) and would comprise 7 large warehouses yielding 331,665m2. Despite yielding a substantial level of warehouse floorspace, this type and size of accommodation will not provide a viable alternative for the existing users of the Report Site, which require external storage areas, with good road, rather than rail links.

5.5 The need for the provision of employment accommodation such as that existing at the Report Site is recognised by the supporting text to Policy SP5. It firstly identifies the high proportion of smaller businesses in the District:

"The District has a high proportion of small businesses, with figures for 2022 showing that out of 8,675 enterprises 91.4% were micro-businesses (employing up to 9 people), 7.1% were small businesses (employing 10 to 49 people)"

5.6 It secondly acknowledges that there has been 'a steady loss of Industrial floorspace over recent years' - as noted elsewhere, the Councils own figures demonstrate over the period 2004/05 to 2022/23 there has been a net loss of 141,293m2 of general employment (B & E class uses) floorspace. The Draft Plan states that this is largely due to the number of residential conversions. This reflects the aforementioned significant shortfall in housing supply and delivery in the District and the disparity between residential and commercial land values, heightened by the fact that over 81% of the District is covered by the Metropolitan Green Belt.

5.7 With particular reference to sites that cater for the types of uses found at the Report Site, it is noted that locally a number of farmyards - where commercial uses such as scaffolders yards and vehicle repair uses have over time become established - have then been the subject of successful planning

applications for residential redevelopment. Examples include Searches Farm, Searches Lane, Bedmond, St Albans WD5 0SB (LPA Refs 5/2012/2113, 5/2015/1841 & 5/20/0558) and Annables Farm, Annables Lane, Harpenden (LPA Ref 5/98/1720).

Sites OS3 & OS4

The draft Local Plan and accompanying Policies Map Sites OS3 and OS4 are proposed extensions to the Rothamsted Research, Harpenden Campus of 186ha and 1.67ha respectively, to provide development of employment use associated in character with the research facilities. The proposed continuation of the existing employment uses at the Report Site would again ensure no duplication or conflict with these proposed allocations, but rather would add to the mix of site available.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The former Butterfly World site should be allocated in the Local Plan

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Local Plan representations - Former Butterfly - November 2024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

DLA Town Planning represents the owner and promoter of the former Butterfly World site and our participation in the hearing sessions would assist the Inspector and help to respond to any queries raised.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 221 - Convene Construction Ltd

Submission Number: 221 Submission Date: 07/11/24 17:52

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: Convene Construction Ltd Name:

Comment Number: 2

### Type:

* Site

### Number:

New site

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

1.1 The representations are made on behalf of Convene Construction Ltd, who are promoting land at Land at Miriam Lane for development.

1.2 The Local Plan should include the allocation of this site for employment purposes under Policy SP5 on the following basis:

1. The existing unlawful use of the Site for open storage / distribution uses by multiple operators could be rationalised and reorganised to better utilise the previously developed parts thereof, retaining those uses which would result in a more modest impact on the visual openness and amenities of the MGB.
2. The allocation of the Site on this basis would deliver clear benefits as it would:

- utilise a well related brownfield site, particularly in the light of the recently allowed appeal proposal to the north and east;

- afford excellent access to the M25 and M1 motorways, precluding the need for commercial vehicles to travel through St Albans; and

- meet a self-evident demand in the light of a significant reduction in the number of comparable sites in recent years and the limited potential for new sites to come forward in a District largely constrained by the Green Belt, with a chronic undersupply of housing land.

1. The proposal would be consistent with Policy SP5 as it would add to the range of employment sites proposed, whilst as a parcel of PDL it would not be necessary to amend the Green Belt boundary.

1.3 Notwithstanding the above, the Landowner would also support the alternative allocation of the Site for residential development. In summary, additional housing sites are needed, both to ensure the overall housing target is achieved and to boost delivery in the early part of the Plan period. The urgent need for a new Local Plan means that it is not appropriate at this stage to completely rework the Local Plan strategy and its evidence. Nevertheless, where additional sites can come forward within the context of the submitted strategy, these opportunities should be taken. The Site's status as PDL and its significantly changing context in the light of the recent appeal decisions on the neighbouring land, which will result in it adjoining the extended Chiswell Green Settlement to the north and east, make it worthy of serious consideration.

**Housing and Economic Land Availability Assessment 2021/22 (HELAA)**

7.1 The site was submitted in the 2021 Call for Sites and subsequently assessed by the Council as part of the HELAA (site reference STS-49-21). That assessment concluded no absolute constraints to the site's development. Non absolute constraints were confined to:

- Within Metropolitan Green Belt
- Within Landscape Character Area(s)
- Within Minerals Safeguarding Area(s) – Sand and Gravel
- Within Source Protection Outer Zone (SPZ2)
- Within Source Protection Total Catchment Zone (SPZ3)
- Existing Section 41 NERC Habitat Act 2006 (Cat 1)

Existing habitat not **Legal issues**

- currently qualifying under S41 of the NERC Habitat Act 2006 (Cat 2).
- High priority for habitat creation (Cat 3A)
- Medium priority for habitat creation (Cat 3B)

7.2 None of these constraints would impede the site's allocation in the new Local Plan for employment or residential development. Notably, the site is not within Flood Zone 2 or 3, and has no heritage or significant ecological constraints.

**Legal issues**

7.3 The site is in single ownership and could be brought forward for development quickly. There are no 'ransom strips' present.

**Access**

7.4 Access would be available from Miriam Lane. An Initial Highways and Transportation Assessment has been prepared on behalf of the landowner and is submitted as part of the promotion of the representations of Report Site (Appendix A). This proposed that the Noke Lane/A405 junction be signalised and allow all traffic movements. The Assessment concludes that this would have a positive effect on both the Noke Roundabout and the M25 J21A, by removing U-turning traffic from both. As such, both these key junctions are likely to see some improvement in operation. Computer simulation testing of this junction has been undertaken and the results show that the revised signalised junction could accommodate up to 125 dwellings.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

1.2 The Local Plan should include the allocation of this site for employment purposes under Policy SP5 on the following basis:

- The existing unlawful use of the Site for open storage / distribution uses by multiple operators could be rationalised and reorganised to better utilise the previously developed parts thereof, retaining those uses which would result in a more modest impact on the visual openness and amenities of the MGB.
- The allocation of the Site on this basis would deliver clear benefits as it would:
  - - utilise a well related brownfield site, particularly in the light of the recently allowed appeal proposal to the north and east;
  - - afford excellent access to the M25 and M1 motorways, precluding the need for commercial vehicles to travel through St Albans; and
- meet a self-evident demand in the light of a significant reduction in the number of comparable sites in recent years and the limited potential for new sites to come forward in a District largely constrained by the Green Belt, with a chronic undersupply of housing land.
- The proposal would be consistent with Policy SP5 as it would add to the range of employment sites proposed, whilst as a parcel of PDL it would not be necessary to amend the Green Belt boundary.

1.3 Notwithstanding the above, the Landowner would also support the alternative allocation of the Site for residential development. In summary, additional housing sites are needed, both to ensure the overall housing target is achieved and to boost delivery in the early part of the Plan period. The urgent need for a new Local Plan means that it is not appropriate at this stage to completely rework the Local Plan strategy and its evidence. Nevertheless, where additional sites can come forward within the context of the submitted strategy, these opportunities should be taken. The Site's status as PDL and its significantly changing context in the light of the recent appeal decisions on the neighbouring land, which will result in it adjoining the extended Chiswell Green Settlement to the north and east, make it worthy of serious consideration.

**224 - Redington Capital Limited & CALA Homes**

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 3

**Type:**

* Site

**Number:**

New Site

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**3.1.2 REPRESENTATION**

The **ARUP 2023 GBR** provides an Overall Performance against the Purposes of the Green Belt for each Sub-Area. The **ARUP 2023 GBR** sets out the following criteria for Overall Performance for a Sub-Area:

Overall performance against the purpose assessment criteria was determined as follows:

- Any sub-area scoring strongly or very strongly (4 or 5) against the criteria for one or more NPPF purpose was judged to meet the purpose assessment criteria strongly.

- Any sub-area scoring moderately (3) against at least one NPPF purpose and failing to score strongly or very strongly (4 or 5) against any purpose was judged as meeting the purpose assessment criteria moderately.
- Any sub-area scoring weakly or very weakly (1 or 2) across all NPPF purposes was judged to meet the purpose assessment criteria weakly.

It is of note that a Sub-Area only needs to perform moderately (which is the middle ranking for a contribution to Green Belt), for one purpose out of 4 to receive an overall performance ranking of moderate, irrespective of whether it contributes at all to any other. As the ARUP 2023 GBR assesses Sub-Area 139 (Land South of Chiswell Green Lane) as Moderately contributing to Purpose 3, irrespective of Sub-Area 139 not meeting Purpose 1(a) or 4, and performing weakly against Purpose 2; Sub-Area 139 is assessed as performing **Moderately against the purposes overall**.

However, should the grading of the contribution Sub-Area 139, the Land South of Chiswell Green Lane, makes to Purpose 3 be reduced, as strongly recommended in Section 3.1.1.above, that is to Score 2:

Meets the Criterion Relatively Weakly. In which case, the assessment of the Overall Contribution of Sub-Area 139, Land South of Chiswell Green Lane, would reduce, such that it would **Perform Weakly against the Purposes Overall**. This would accord with the findings of the previous SKM 2014 GBR, the Stantec GBR (see **Appendix 1**) and the Council's officers opinion as set in the committee report (ref: 5/2022/0927) (see **Appendix 2**) and the Inspector's conclusions a paragraph 536 of appeal decision APP/B1930/W/22/3313110 (see **Appendix 3**).

Notwithstanding the above, the approach adopted in ARUP 2023 GBR uses 'settlement buffers' to define the area of search and to then exclude consideration of sites that fall outside of these buffers on the basis that they would not contribute to the sustainable pattern of development or undermine the integrity of the Green Belt. These assumptions are not backed up by any evidence to suggest that this would be the case. Without further assessment it cannot be concluded that this is the case for all sites in sub-areas outside of the buffer zones.

### 3.3 Green Belt Buffer Sites Not Recommended – Part 2 Proformas (September 2024)

This is the very first time that this information has been released by the Council for consultation purposes.

Redington Capital Limited and CALA Homes **object** to the scoring given to Site Ref: M-037 (HELAA Ref: STS-10-21) of the Proforma Sheet (page 33, Part 2) and the subsequent conclusion reached by the Council –'not recommended to progress'.

Most of the 'weak' scorings for the Site are unjustified, particularly when it has been demonstrated, via technical evidence which supports an extant planning permission (ref: 5/2022/0927), that an acceptable scheme can be delivered on the Site:

- Without any unacceptable impact on Agricultural Land Classification (ALC); priority habitat; existing woodland; Source Protection Zones; TPOs; non-designated biodiversity; Green infrastructure corridors; access to open space; and
- Resulting in the delivery of significant benefits including: access to open space and the green belt; a BNG; the provision of green corridor connections and bridleways through the Site to the wider green belt; the provision of a new school (including nursery and SEND facilities); cycle improvements to allow improved access to the nearest branch line railway station.

Therefore, many of the 'weak' and 'medium' scores for the Site should in fact be 'strong' scores, thereby adjusting the recommendation to progress with the Site for development purposes. This should be adjusted as a matter of priority.

## 6 Representations: Policies Map 3 (South-West)

This part of the representations focuses on the Policies Map 3 that supports the Regulation 19 Publication Draft Local Plan.

### 6.1 Proposals map

Redington Capital Limited and CALA Homes **object** to the Policies Map 3 for the reasons explained in:

- Sections 3, 4 and 5 of these representations;
- Section 7 of these representations which highlight a number of matters agreed by the Council's Officers and Expert Witnesses in relation to outline planning application (ref: 5/2022/0927) and the Public Inquiry (appeal reference APP/B1930/W/22/3313110). These agreed matters have not been taken into consideration when:
- Preparing the Regulation 19 Publication Draft Local Plan and help to explain why the Land South of Chiswell Green Lane should be identified as a Broad Location development site; and
- The Inspector determined Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024, and upheld by the SOS's decision.

## 7 Representations: Additional Matters

Redington Capital Limited and CALA Homes wish to highlight a number of matters agreed by the Council's Officers and Expert Witnesses in relation to outline planning application (ref: 5/2022/0927) and the Public Inquiry (appeal reference APP/B1930/W/22/3313110). These agreed matters have not been taken into consideration when preparing the Regulation 19 Publication Draft Local Plan and help to explain why the Land South of Chiswell Green Lane ("the Site") should be identified as a Broad Location development site (for housing and education purposes) ) in Part B of the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

### 7.1 The Site and Its Context

The Site comprises:

- A vacant farmhouse, yard and garden (including a swimming pool) and outbuildings;
- Horse stables and livery used for training horses and horse riding5;
- Horse grazing fields that are split up by fences and gates;
- A builder's compound that is used for storage purposes; and
- Other fields that are split up by timber stakes and wires.
  The Site is surrounded by:
- Chiswell Green (a specified settlement) to the east, south and partially to the north;
- Butterfly World, its car parking areas and its access road (Miriam's Lane) to the west;
- Chiswell Green Lane with residential properties and a traveller's site to the north; and
- Mature hedging and mature trees that screen the Site from views from the wider countryside along parts of its northern and western boundaries which are reinforced by the landscape bunding along the western boundary that is used to screen the Butterfly World car park.

The illustration found in **Appendix 9** explains which parts of the Site are regarded to be previously developed land (PDL). Paragraph 6.2 of the Council's Statement of Case submitted at the Public Inquiry acknowledges that the Site includes PDL.

The Site is not, therefore, 'open countryside' in its purest form. Local views across the Site are dominated by buildings and structures, fences and debris, as well as the rear elevations of the properties that front onto Forge End and Long Fallow.

In addition to the above, the constructed homes that front onto the Long Fallow and Forge End (along the west boundary of Chiswell Green) appear to have been designed and constructed in the early-1980s. The rear gardens that abut the Site were not designed to include a softened

landscape edge or landscaping to integrate this development into the Green Belt. The current edge to the settlement is therefore a 'hard edge'. This, when combined with the urban fringe characteristic, represent the baseline position when considering the effect of the Proposals on the Green Belt and the character of the landscape.

The Council will note that access points were deliberately left in place onto the Site from Long Fallow and Forge End, to enable another phase of homes to be constructed in the future.

Any new proposals on the Site provides an opportunity to:

- Deliver the soft edge transition into the countryside that is currently missing from the existing settlement boundary, which would be significantly more in keeping with current principles of urban design and placemaking; and
- In-fill the gap between the settlement and the former Butterfly World site and Miriam Lane, whilst providing a soft edge transition into the countryside thus improving the boundary relationship with the settlement in views from the wider Green Belt.

### 7.2 Accessibility & Local infrastructure credentials

The Site is well connected to the strategic road network. Chiswell Green Lane connects with Watford Road to the east of the Site and the A405 North Orbital Road, which connect to Watford and the M25 junction 21a, whilst St Albans is accessible via this road to the north. The M1 is 1.4km to the east and meets the M25 1.5km southeast of the Site.

The Site is within acceptable walking distance of key public transport infrastructure, including such as How Wood railway station and Park Street railway station. These stations are situated on the Abbey Line which provides hourly services between St Albans Abbey and Watford Junction. Frequent trains to London and other destinations are available from Watford Junction and St Albans City station, which is a 25 minute (2km) walk from St Albans Abbey Station or a short cycle or bus journey.

There are existing Public Rights of Way (PROW) walking route in the vicinity of the Site including no's 82, 80, 21, 39 and 28.

There are a number of destinations that can be reached within a 5km cycling distance from the Site, including:

- St Albans City Centre;
- St Albans Abbey railway station;
- Bricket Wood railway station;
- How Wood railway station;
- Park Street railway station;
- Garston railway station;
- St Albans Cathedral;
- Verulamium Park;
- Abbey View Retail Park (including Sainsburys and Lidl supermarkets),
- Westminster Lodge Leisure Centres;
- Watford Leisure Centre;
- Co-op in Chiswell Green; and
- Killigrew primary school.

The closest bus stops are located on Watford Road and serve bus routes 321 and 724. In addition to these services, the bus stops on Watford Road in the vicinity of Tippendell Lane also serves route 361 which travels along Tippendell Lane to How Wood and Bricket Wood. A fourth bus service, route 635, is accessible from bus stops on the A405 North Orbital Road between the Watford Road roundabout and the M25 junction 21A, around 780m south of the Long Fallow footway / cycleway access.

There are eight GP practices located within a 4km radius of the Site and a further two GP practices located just beyond a 4km radius, in London Colney. There is a further GP branch within the 4km radius that is linked with a GP practice in Radlett which is outside of the 4km radius but nonetheless has been included because of the linked branch being in close proximity to the Site.

St Albans City Hospital is also located less than 4km to the north of the Site.

The area is well provided with dental treatment facilities.

There is also a good provision of retail opportunity within walking distance or via public transport, to support potential growth at Chiswell Green, including a baker, public house, takeaway restaurants and a Co-op food store on Watford Road, a short distance from the Site, adding to the sustainability of the location.

There are public open spaces within proximity to the Site, including allotments, playing fields, public parks, play space and religious grounds. In terms of the public open spaces with play facilities, these include:

- Playing fields at Cherry Hill and Mayflower Road which are within 500m of the Site;
- Greenwood Park allotments; and
- Four existing play areas within 900m of the Site, one of which (Greenwood Park Play Area) has an extensive provision of play equipment for children up to the age of 14 years, with a new range of play equipment for children under 6 years installed in 2019.

### 7.3 Matters previously agreed with the council

The Council will note that Site has been the subject of an outline planning application (ref: 5/2022/0927) which was supported by a suite of technical documents and recommended for approval by the case officer. A copy of the indicative masterplan is attached as **Appendix 8.**

During the determination of the planning application and subsequent Public Inquiry (ref: APP/B1930/W/22/3313110) Redington Capital Limited and CALA Homes and the Council agreed a number of matters that were set out in a Statement of Common Ground. These included:

- Subject to conditions in certain cases, a residential and education land proposal on the Site will not result in unacceptable impact on:

1. Neighbouring amenity;
2. Heritage and townscape;
3. Ecology;
4. Minerals extraction;
5. Local transport infrastructure capacity, cycle access provision and pedestrian access provision;
6. Servicing and delivery arrangements;
7. Trees and landscape located outside the Site;
8. Air, noise and water quality;
9. Flood risk and surface water drainage;
10. Utilities;
11. Land contamination;
12. Archaeology

- No objection to the residential and education land proposal was raised by the following:
- HCC Landscape;
- HCC Growth and Infrastructure Unit;
- HCC Highways;
- HCC Ecology;
- HCC Lead Local Flood Authority (RAB Consultants);

- HCC Minerals and Waste;
- 
  - HCC Public Health;
  - HCC Rights of Way;
  - National Highways;
  - Affinity Water;
  - East of England Ambulance Service;
  - Environment Agency;
  - Hertfordshire Constabulary;
  - Herts Valley Clinical Commission Group;
  - Herts and Middlesex Wildlife Trust;
  - Natural England;
  - Thames Water;
  - The Council's internal advisors, including:
  - Spatial Planning;
  - District Archaeologist;
  - Community Services Team;
  - Design & Conservation Team;
  - Environmental & Regulatory Services;
  - Housing;
  - Legal;
  - Parking;
  - Trees & Woodlands;
  - Waste Management;

With the above in mind, other than developing on Green Belt, there are no technical reasons why the Site is unable to deliver an acceptable form of residential and education-related development. In terms of the impact of development on the Green Belt and the amount of development proposed, these matters are discussed in Sections 3.1.1 above.

### 7.4 Green Belt Review (2013)

The Green Belt Review – Stage 1 (2013) (the "SKM 2023 GBR") is a document that forms part of the evidence base that supports the Regulation 19 Publication Draft Local Plan. It sits alongside the Green Belt Review – Stage 2 (2023).

The SKM 2013 GBR identifies the Land South of Chiswell Green Lane within part of Strategic Parcel GB25. Overall, the much wider extent of Strategic Parcel GB25 was considered to contribute significantly to 1 out of 5 of the purposes of the Green Belt, as set out in the NPPF.

### 7.5 Draft Strategic Housing Land Availability Assessment (SHLAA)

The Council's draft SHLAA (updated in May 2018) is a document that forms part of the evidence base that supported the Regulation 19 Publication Draft Local Plan. It identifies the Site as a potential strategic housing development site. On page 11 of Appendix 3 of the Draft SHLAA explains that:

*"...the sub-area identified on pasture land at Chiswell Green Lane displays **urban fringe characteristics** due to its proximity to the settlement edge and Butterfly World along Miriam Road to the west. This development bounds the outer extent of the pasture land and creates a physical barrier to the open countryside. The pasture land also displays greater levels of landscape*

***development into the landscape** with lower impact on views from the wider countryside and surroundings. At the strategic level, a reduction in the size of the parcel would not significantly compromise the overall role of the Green Belt or compromise the separation of settlements. **Assessed in isolation the land makes a limited or no contribution towards all Green Belt purposes***". [our emphasis].

As explained in Section 4.1.1 above, the Draft Strategic Site Selection Evaluation (appendixes 1 and 3) undertaken as part of the SHLAA confirms that Redington Capital Limited's and CALA Homes' site at Land south of Chiswell Green Lane (site ref: CG-561) should be taken forward for the site selection stage. The following RAG conclusion was reached:

1. Green Belt Review evaluation (RAG rating = Green);
2. Suitability (RAG rating = Green)
3. Availability (RAG rating = Green)
4. Unique contribution to improve public services and facilities (RAG rating = Green)
5. Unique contribution to enhancing local high quality job opportunities (RAG rating = Green)
6. Unique contribution to other infrastructure provision or community (RAG rating = Green)
7. Deliverable / Achievable (RAG rating = Green)
8. Overall Evaluation (RAG rating = Green)

Redington Capital Limited and CALA Homes consider the above conclusions remain relevant to the Site and carry significant weight when preparing the Regulation 19 Draft Local Plan. They appear to have been ignored by the Council, resulting in the Land South of Chiswell Green Lane not being allocated for housing and education purposes, whilst other less sustainable sites that have a greater impact on the purposes of the Green Belt being identified in Part B (Site Allocations) of the Draft Local Plan.

### 7.6 Housing &Economic Land Availability Assessment (HELAA)

The Council's Housing and Economic Land Availability Assessment (HELAA, 2021) includes all the sites and broad locations within the district capable of delivering 5 or more dwellings or 0.25ha/500 sqm of economic development. It is a document that forms part of the evidence base that supported the Regulation 19 Publication Draft Local Plan.

The Site is identified as a potential site for housing in the HELAA (annex 15, page 45, Site STS-10-21) and was assessed to be:

- suitability, availability and achievability, in line with paragraph: 017 Reference ID: 3-01720190722 of the NPPG; and
- deliverability and developability.

It should be noted that Sites are deemed to be 'developable' when they are: "...in a suitable location for housing development with a reasonable prospect that they will be available and could be viably developed at the point envisaged" (NPPF Glossary, page 66)

The Council has previously indicated that the Site would have housing capacity based on the following assumption:

- 60% of the site area (for sites over 2 ha) will be considered usable for residential use, with 40% required to provide infrastructure, main roads, open space and public facilities; and
- Using 40 dwellings per hectare (dph) for the 60% site area, which was deemed by the Council to be a relatively safer and robust assumption

Redington Capital Limited and CALA Homes consider that the above Council's housing capacity and scenario assumptions (as described above) should be applied now.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

### 3.1.3 SUGGESTED AMENDMENTS

Redington Capital Limited and CALA Homes strongly suggest that:

- ARUP should undertake a site visit to fully appreciate the context of Parcels 138 and 139 and take on board the findings of the SKM 2013 GBR, SKM 2014 GBR, the findings of the Council's officers planning committee report (ref: 5/2022/0927), Stantec's GBR and the Inspector's decision;
- The descriptions of the existing development and boundaries of Sub-Areas 138 and 139 should be updated to be much more accurate and recognise the amount of enclosure surrounding the Land South of Chiswell Green Lane and the previously development land found within the subarea;
- The scoring of the contribution Sub-Area 139 makes to Purpose 3 should be reduced to Score 2: Meets the Criterion Relatively Weakly. Subsequently, the assessment of the Overall Contribution of Sub-Area 139, Land South of Chiswell Green Lane, would reduce such that it would Perform Weakly against the Purposes Overall; and
- ARUP should review the following supporting documents, drawings and evidence submitted in support of application reference (ref: 5/2022/0927) and at Public Inquiry (ref: APP/B1930/W/22/3313110). These are relevant material considerations, as they considered how development could come forward on Sub-Area 139 :
- The SKM 2013 and 2014 GBRs;
- The effect of development on Sub-Area 139 (and/or its potential release from Green Belt) using a site specific landscape and visual assessment; and
- Mitigation that limits the effect of development on the wider Green Belt and countryside, and not prejudice the characteristics, function and purposes of the Green Belt beyond Sub-Area 139.

This would mean that ARUP's recommendation (on page 623 of the ARUP 2023 GBR) in relation to Sub-Area 139 would be adjusted to 'perform weakly against the NPPF purposes' and their recommendation is adjusted to be for 'further consideration'. Consequently, Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA (2021), should be identified by the Council as a new site allocation (for 391 homes and new school) in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

Rather than exclude sites in sub-areas outside of the buffer zones from further consideration the only reasonable approach is for the Council to consider all submitted sites in the ARUP 2023 GBR. Only once these assessments have been undertaken should the Council then consider what is the appropriate strategy for the district. Without a full and proper assessment of all sites against the purposes of Green Belt the Council are at risk of repeating the mistakes made in the previous local plan that failed to give proper consideration to all sites submitted for allocation.

### 3.3.1 SUGGESTED AMENDMENTS

The assessment undertaken for Site Ref: M-037 (HELAA Ref: STS-10-21) of the Local Plan Site Selection Proforma Sheet (page 33, Part 2) should be updated to reflect the above and the Site taken forward into Part B (Site Allocations) of the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

### 6.1.1 SUGGESTED AMENDMENTS

Redington Capital Limited and CALA Homes recommend that the Council considers:

- Including more housing and education sites in areas that benefit from better access to transport services and other services (such as Land south of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and other services. Redington Capital Limited and CALA Homes recommend that the Land

South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new broad location site (for housing and education purposes) in Policies Map 3 of the Regulation 19 Publication Draft Local Plan; and

- Identifying the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, as a 'Proposed Area to be Released from the Green Belt' on the Policies Map, consistent with the way other sites with planning permission have been treated (North St Albans, Burston Nurseries, Rothamsted Lodge, Orchard Drive, How Wood).

7.6.1 SUGGESTED AMENDMENTS

Redington Capital Limited and CALA Homes recommend that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new broad location site (for housing and education purposes) in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

Redington Capital Limited and CALA Homes' site is a highly accessible, sustainable and deliverable site which can deliver housing and education facilities immediately. Its impact on the purposes of the Green Belt, as set out in the ARUP 2023 GBR, has been inaccurately inflated (as demonstrated in Section 3) and should therefore be adjusted accordingly. This means that the above site is more accessible, sustainable and deliverable than most of the sites selected by the Council in Part B (Site Allocations). The Council must review this situation and, thereby, include Redington Capital Limited and CALA Homes' site as a new Broad Location allocation in Part B of the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

[See attachment for full representations]

We write on behalf of Success Property Consortium ("the Clients") to submit representations in response to the Regulation 19 Publication Draft Local Plan and its associated evidence base documents.

Our Clients have an interest in the Lye Lane site (circa. 63 acres / 25.5 hectares – see **Figure 1**), located to the south of Chiswell Green and accessed off the North Orbital Road and wish to propose its inclusion in the St Alban's Local Plan (2024) for the following key reasons:

1. The site is available immediately for mixed used development of approximately **510** new homes[1], including:
2. Up to 60% affordable homes and 40% market sale and self-build homes (on 50% of the site area);
3. 150,000sq ft of last mile distribution (on 10% of the site area); and
4. Amenity space, including 20% (min) biodiversity net gain (on 40% of the site area).

[Footnote 1: (25.5 hectares x 50% = 12.75 ha) x circa. 40 dph required by draft policy DES3 = 510 homes]

2. The site is partially PDL, low quality green belt land, evaluated by the Council as making only a moderate (we would say, low) contribution to the purposes of the Green Belt in the SACDC Green Belt Review (GBR 2023) and falls squarely into the definition of 'grey belt land' as set out in Annex 2 of the draft changes to the NPPF.
3. The site is fully constrained by roads and well screened by mature vegetation on all sides and so poses no difficulty in relation to future 'spread', merging of settlements, unsightliness or threat to the Bricket Wood SSSI.
4. The site benefits from safe access to the North Orbital Road[2] and the M25, is in a sustainable location with good access to How Wood Station, bus routes 321 and 724, How Wood Primary and Nursery School, Park Street Surgery and other socio-economic infrastructure.

[Footnote 2: Albeit that Lye Lane will need to be widened as part of the development proposals]

5. Development of the site would also create local economic and ecological benefits including permanent employment and the reduction of articulated lorry traffic through St Albans.

Figure 1: Lye Lane Site

[See attachment for Image]

The reasons why the site should be reconsidered by the Council for inclusion in the emerging Local Plan are summarised below.

1. ***Site Development History:***

As the site is well-screened and there is no public access, the Council may not be aware that the site is in fact lower performing green belt land than the rest of Area 26 (SACDC Green Belt Review 2023). This is because:

- It has been at one time a golfing location, a motocross and a rally track; and
- It has been the subject of a significant amount of waste tipping through the importation of material and is therefore made-up ground which suffers from contaminated - It is highly likely to be one of the most contaminated parcels of land anywhere within St Albans Council's administrative area.
- The Site has also been the subject of a number of enforcement and legal cases during earlier ownership and control tenures. The Site is not pristine green belt land, unlike some of the site's being allocated for development in Part B of the Regulation 19 Publication Draft Local Plan. The Site is extremely low quality 'man-made ground' and would:
- Fall squarely into the definition of 'grey belt land', as set out in Annex 2 of the draft changes to the NPPF; and
- Be regarded as an 'appropriate' development site in the green belt, as set out in paragraphs 152 and 155 of the draft changes to the NPPF.

The Site is extremely well screened by mature boundary planting along its eastern, southern and western boundaries. The northern boundary of the Site is located adjacent to the residential development site at Burston Nurseries (5/2020/3022) and the recently consented residential development (ref: 5/2023/0983) on the Copeswood Site.

**It is therefore a contained and contaminated site that provides a limited (localised) contribution to the purposes of the Green Belt. Development on this Site would result in:**

- **Localised/limited amount of harm (if any) to the purposes of the Green Belt; and**
- **Substantial benefits, as described herein, that will outweigh this level of harm.**

2. ***Unfair Scorings in the Local Plan Evidence Base:***

Our Clients are aware that the land owners previously promoted the Site. It was considered by the Council in the Housing and Employment Land Availability Assessment (HELAA) and was accepted for further consideration. They are also aware that the Site forms part of Area 26 in the SACDC's Green Belt Review – Part 1 (GBR 2013) and its Green Belt Review – Part 2 (GBR 2023) which is purported to perform 'moderately important' in overall green belt performance terms[3].

[Footnote 3: Parcel SA-132, Table 5.8 - Purpose 2: to prevent neighbouring towns merging into one another; Purpose 3: to assist in safeguarding the countryside from encroachment.]

Unfortunately, the Site itself (Site Ref: C-249 [HELAA Ref: STS-67-21]) was not recommended[4] for release from the Green Belt and it was not included as a site allocation in the Regulation 18 and 19 versions of the Draft Local Plan.

[Footnote 4: See page 41 of Green Belt Buffer Sites Not Recommended to Progress – Part 2.]

The document titled 'Green Belt Buffer Sites Not Recommended – Part 2' (September 2024) has now been published by the Council for the first time for consultation purposes. Our Clients are extremely concerned about the scoring given to their Site (Ref: C-249 [HELAA Ref: STS-67-21] of the relevant Proforma Sheet (page 41, Part 2)) and the subsequent conclusion reached by the Council –'not recommended to progress'. Most of the 'weak' scorings for the Site are unjustified. For example:

- The Site is man-made contaminated land and, contrary to the information contained in the proforma, should not be regarded to benefit from an Agricultural Land Classification (ALC);
- Development of the Site would also offer the further benefits such as helping to:
- Protect other features that are close to the Site (ancient woodlands, County Wildlife site, traditional orchard and deciduous woodland Priority Habitat); and
- Deliver the access improvements along Lye Lane and
- De-contamination of the site before it has any impact on the Source Protection Zone

**Therefore, a large number of the 'weak' and 'medium' scores for the Site should in fact be 'strong' scores, thereby resulting in a recommendation to progress with the Site for development purposes. Our clients would like to recommend that this should be adjusted as a matter of priority.**

3. ***A more appropriate site than others currently earmarked for development in the Local Plan***

A review of the sites included in the Reg 19 Draft Local Plan would suggest that Lye Lane is a more appropriate choice than some of the other sites included. For example:

- Site Allocation Ref: M4 (North of Oakwood Road) located directly to the south, on the other side of the M25, does not currently benefit from a safe means of access from the North Orbital Road;
- Attached as **Appendix A** is a map of the sites around the Chriswell Green area that either have planning permission or are now draft site allocations. The 'red' sites suffer from constraints (e.g. no existing access arrangements, TPO or Protected Habitat) and are highly unlikely to come forward, thereby potentially not delivering a total of 298 homes in the local area; and
- Attached as **Appendix B** is a list of sites that, in our opinion, are either significantly harming the Green Belt or are undeliverable across the District.

[See attachment for Appendices]

In contrast, development of the Lye Lane site would:

- Secure more housing delivery land in the next 5-years on a site that immediately available and deliverable and can help ease the apparent need for the 'stepped' housing trajectory that has been adopted by the Council, as explained in paragraph 3.27 of the Draft Local Plan; and
- Secure new commercial (last-mile) floorspace to meet the demand for industrial, storage and distribution uses up to 2041 based around accessible junctions of the M25. The South West Hertfordshire Economic Study (Sept 2024) prepared by Hatch, this demonstrates that the supply of land for industrial, storage and distribution uses is insufficient (by approx. 9 ha) to fully meet the additional 58.9ha need identified for the period up to 2041. This conclusion is contrary to that stated by the Council in Policy SP5 (Employment and the Local Economy) of the Draft Local Plan which implies there is an oversupply of employment land.

Our Clients conclude that the Council has:

- Identified approx. 7,266 homes to be delivered on its most important parts of the Green Belt; and
- Over-estimated its delivery of homes on sites that are undeliverable, by approx. 820 homes, but are still being proposed in the draft Local Plan.

The combination of these sites means that there is a likely shortfall of approx. 1,118 homes identified in the Regulation 19 Consultation Draft Local Plan that are undeliverable and approx. 7,266 homes to be delivered on its most important parts of the Green Belt.

**We therefore commend to the Council that the Lye Lane site should be included in the Local Plan and/or substituted for one (or more) of the undeliverable and more valuable green belt sites currently identified.**

4. ***A team with an established track record of working successfully with Local Borough Councils to bring forward and deliver high-quality residential and affordable housing projects that meet the needs of local people.***

Our clients recently secured approval from Hertsmere Borough Council for a similar site at Lyndhurst Farm, Shenley. Hertsmere is an authority that also constrained by the Green Belt with limited PDL sites to build on and less than 2-YHLS.

The Lyndhurst Farm site was also partially PDL, contaminated land, benefitted from excellent access to the transport network and was adjacent to existing development – and yet was 'overlooked' and not included in the original 'shelved' draft local plan. Our Clients worked closely with Hertsmere Council prior to its inclusion in the revised 2024 draft local plan and were delighted that the Council's Planning Committee unanimously agreed that that proposal to develop the site for:

"*Full planning application for 186 dwellings, community building, associated parking, landscaping and open space, with vehicle and pedestrian access from Green Street and a separate pedestrian access from Stapleton Road*"

This proposal included a generous amount of affordable housing and community building provision, benefitted from a strong very special circumstances (VSC) case and granted a resolution to grant planning permission (ref: 24/0451/FUL) on 15th August 2024.

The point being made here is that the Lyndhurst Farm site was an overlooked site when the original 'shelved' draft local plan was initially presented and yet will now result in the most significant delivery of affordable housing in the recent history of Hertsmere Borough Council and has underpinned and shaped the direction of local housing delivery. The Lye Lane site matches the characteristics of Lyndhurst and is an example of the land that will be captured under the new emerging NPPF definition of Grey belt land.

While Lyndhurst Farm was granted planning permission through the planning application process, the site could have been brought forward by Hertsmere Council through the plan-making process. The Lye Lane site should also be identified through the plan-making process now.

**Our clients wish to commend to St Albans' Council the merits of including the Lye Lane site in the Local Plan.**

**Representations**

Considering the above context, our Clients hereby submit the following representations to the Regulation 19 Publication Draft Local Plan. Our Clients:

1. **Object** to the Council's decision not to allocate the Site for development purposes for the reasons explained above and below;
2. **Object** to the 'stepped' housing delivery approach set out in Table 2 of the Regulation 19 Draft Local Plan;
3. **Object** to the findings of the following evidence base documents which support the Regulation 19 Draft Local Plan:

- The Stage 2 Green Belt Review (June 2023); and
- Green Belt Buffer Sites Not Recommended – Part 2 Proformas (September 2024)

4. **Object** to the following components of the Part A of the Regulation 19 Draft Local Plan[5]:

- Chapters 1 (Spatial Strategy) and 3 (Sustainable Use of Land and Green Belt)
- Figures 1.3 (The Key Diagram) and 3.1 (Broad Locations);
- Tables 3.1 (Board Locations) and 3.2 (Housing Trajectory);
- Policies SP1 (A Spatial Strategy for the St Albans District), SP3 (Land and the Green Belt), LG1 (Broad Locations), Policy LG4 (Large, Medium and Small Sites) and Policy SP5 (Employment and the Local Economy);
- Paragraph 1.36, Paragraphs 3.20 to 3.21 (Categorisation of Sites), Paragraphs 3.25 to 3.27 (Housing Trajectory) and Paragraphs 3.28 to 3.33 (Broad Locations);
- Part B of the Regulation 19 Draft Local Plan (Site Allocations); and
- Policies Map 3 (South-West).

[Footnote 5: On the basis that our Clients object to the assessments and conclusions of key evidence base documents which has directly influenced the structure and contents of the Draft Local Plan, they feel compelled to object to these components of the Part A of the Regulation 19 Draft Local Plan.]

5. Conclude that the Regulation 19 Publication Draft Local Plan and its evidence base, in its current form, does **not meet the 'tests of soundness'**set out in paragraph 35 of the National Planning Policy Framework (NPPF, December 2023).

**Recommendation**

Our Clients set out below the following recommendation to assist the Council in helping to make the Draft Local Plan sound.

1. a) That the assessment undertaken for Site Ref: C-249 (HELAA Ref: STS-67-21) of the Local Plan

Site Selection Proforma Sheet (page 41, Part 2) should be:

- Revised to reflect the context set out above; and
- Revised to conclude that our Clients' Site should be 'progressed' as a potential new development location for approximately 510 new homes[6], including:

- Up to 60% affordable homes and 40% market sale and self-build homes (on 50% of the site area);
- 150,000sq ft of last mile distribution (on 10% of the site area); and

Amenity space, including 20% (min) biodiversity net gain (on 40% of the site area).

[See attachment for Image]

b) As mentioned above, the Site is available immediately for mixed-use development purposes with developer's ready and committed to its delivery. Our Clients and the future developers of

the Site would like to work with the Council to include the Site as a new site allocation in Part B of the Regulation 19 Publication Draft Local Plan. This could be either:

- In addition to the existing site allocations identified in part b of the draft Local Plan, particularly in Tables 3.1 (Broad Locations), 3.2 (Housing Trajectory) and Policies Map 3 (South-West); or
- As a replacement for one of the better quality/more sensitive Green Belt sites in more desirable locations within St Albans.

We consider the Council has two immediate opportunities to allocate our Clients' Site in the future:

1. By amending the Regulation 19 Draft Local Plan and its evidence base before it is submitted to the Secretary of State (SOS); or
2. By amending the Regulation 19 Draft Local Plan via a 'modification to the Local Plan' during 2025 in the lead up Examination in Public.

Should none of the above opportunities be progressed by the Council (for whatever reason), our Client requests that the site is considered as a new site allocation in the 'local plan review process' which will have to be undertaken by the Council immediately after the adoption of the Local Plan in circa. March 2026 in order meet the requirements of the new draft NPPF changes and Standard Methodology that will be introduced later this year.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

[See attachment for full representations]

**Recommendation**

Our Clients set out below the following recommendation to assist the Council in helping to make the Draft Local Plan sound.

1. a) That the assessment undertaken for Site Ref: C-249 (HELAA Ref: STS-67-21) of the Local Plan

Site Selection Proforma Sheet (page 41, Part 2) should be:

- Revised to reflect the context set out above; and
- Revised to conclude that our Clients' Site should be 'progressed' as a potential new development location for approximately 510 new homes[6], including:
- Up to 60% affordable homes and 40% market sale and self-build homes (on 50% of the site area);
- 150,000sq ft of last mile distribution (on 10% of the site area); and

Amenity space, including 20% (min) biodiversity net gain (on 40% of the site area).

[See attachment for Image]

b) As mentioned above, the Site is available immediately for mixed-use development purposes with developer's ready and committed to its delivery. Our Clients and the future developers of

the Site would like to work with the Council to include the Site as a new site allocation in Part B of the Regulation 19 Publication Draft Local Plan. This could be either:

- In addition to the existing site allocations identified in part b of the draft Local Plan, particularly in Tables 3.1 (Broad Locations), 3.2 (Housing Trajectory) and Policies Map 3 (South-West); or
- As a replacement for one of the better quality/more sensitive Green Belt sites in more desirable locations within St Albans.

We consider the Council has two immediate opportunities to allocate our Clients' Site in the future:

1. By amending the Regulation 19 Draft Local Plan and its evidence base before it is submitted to the Secretary of State (SOS); or
2. By amending the Regulation 19 Draft Local Plan via a 'modification to the Local Plan' during 2025 in the lead up Examination in Public.

Should none of the above opportunities be progressed by the Council (for whatever reason), our Client requests that the site is considered as a new site allocation in the 'local plan review process' which will have to be undertaken by the Council immediately after the adoption of the Local Plan in circa. March 2026 in order meet the requirements of the new draft NPPF changes and Standard Methodology that will be introduced later this year.

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

**Spatial Extent of Green Belt**

The approach taken by SADC in relation to the overall justification for the review and proposed release of Green Belt land to provide the necessary new homes, employment and critical infrastructure for the district is supported by TCE, and it is considered that the exceptional circumstances required to release Green Belt land are justified.

The Policies Map and Part B of the Local Plan sets out the allocated sites and defines the associated Green Belt boundaries to be redrawn as a result of the sites' allocation for development.

We support the rolling of the Green Belt boundary westwards to the M1 as a defensible boundary for EHH. However, we note that whilst the M1 forms a common eastern extent of all three of the draft EHH site allocations, it is not proposed by the Council as a consistent and common boundary for a new Green Belt over the same area.

We question the justification for the inconsistent approach to Council's selection of a new Green Belt boundary in this location, noting the inconsistencies in the Green Belt assessment in this respect, and particularly in respect of the decision to use the overhead electricity pylons as a new defensible GB boundary within the H2 allocation rather than either well established field boundaries or indeed, the M1 as for the remainder of the allocations.

NPPF Paragraph 142 expresses that "*The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence."*Supporting this is NPPF Paragraph 146 which states that boundaries for Green Belt should be defined "*using physical features that are readily recognisable and likely to be permanent."*

We understand the recommendation to use the overhead pylons as the Green Belt boundary was first presented in the *Green Belt Review Sites and Boundaries Study (February 2014)* which was produced by SKM on behalf of SADC. Paragraph 3.5.3 of the Study states "*The rationale for this is that the overhead lines are likely to restrict development further east."*

We make two points in this respect; first that pylons are not considered to be permanent features as they can be rationalised and removed or placed underground, and second, that the

presence of an overhead line is visually permeable and therefore does not generally affect the openness of the landscape.

We consider that other physical features - such as the level of vegetation cover, hedgerows or built form – are more of an indication of the openness of a landscape. In respect of EHH, considering how physical features appear on site, rather than on plan, confirms how field boundaries and roads (in this case the M1 motorway) are more permanent, legible, and robust boundaries which successfully take account of landscape character.

This matter was first raised in TCE representations to the previous local plan in 2018, where the same approach to GB release was proposed by the Council. A report produced by SLR on behalf of TCE in October 2018 (and which was submitted as part of the previous SADC Local Plan's Regulation 19 consultation in that year) provided a critique of the Council's 2014 *Green Belt Study,* noting that the "*electricity pylon corridor does not represent a strong and permanent boundary."*[para 3.16]. The conclusions of this report remain valid, including the recommendation that the M1 is used as a strong and appropriate Green Belt boundary due to its permanency, clear alignment and boundary presence that would clearly define the edge of East Hemel Hempstead.

Paragraph 143 of the NPPF remains unchanged since 2018, in respect of defining one of the five Green Belt purposes as "*to prevent neighbouring towns merging into one another".* We acknowledge that protecting the separation between settlements (in this case, the north-eastern edge of Hemel Hempstead and the southern edge of Redbourn east of the M1) is a legitimate purpose of the defined Green Belt boundary in this location. This is reinforced in the *North Hemel Landscape Study* [September 2024] which comments that that *"Restricting development to west of the pylons* ***and/or*** *setting houses back from Hemel Hempstead Road would assist in maintaining a sense of separation between Hemel Hempstead and Redbourn as experienced along the road."*(our emphasis)

The evidence base document, *Broad Locations – Landscape + Visual Appraisal* (page 11) makes a notable distinction between site allocations H1 and H2 in respect of the use of the overhead pylons as a defining feature for GB purposes, stating that for H1 (HH North): "*The existing pylon line easement provides a logical limit to the extent of built development eastwards, helping to maintain the open gap between Hemel Hempstead and Redbourn to the east*", whereas for H2 (East Hemel Hempstead (North), it is *…"****the M1 corridor that provides a logical limit to the extension of development eastwards."***(page 18, our emphasis).

The *Broad Locations – Landscape + Visual Appraisal* also recognises the potential impact of overhead pylons as a dominant feature in the landscape, suggesting that one should *"Consider how development* ***addresses pylon easements*** *and no-build areas, in line with National Grid Guidelines … setting clear design objectives such as* ***to break down the linearity*** *of the transmissions route into inter-related places rather than treating the route as one continuous strip…" (Page 6).* Having a Green Belt edge which mirrors the straight alignment of the pylons (on the ground and in the air) reinforces a contrived straight development edge which does not sensitively respond to topographical or landscape features or character. It draws attention to the linear overhead pylon lines, contradicting best practice design guidance and disregarding more suitable opportunities for defining and establishing a permanent Green Belt boundary on the ground.

On this basis, although the overarching approach to releasing Green Belt land to support the Local Plan allocations is fully supported by TCE, we object to the extent of the H2, East Hemel Hempstead (North) allocation proposed to remain within the Metropolitan Green Belt as currently shown on the Policies Map. This also applies to H4 as the Green Belt boundary follows the M1 except for in the south-east corner of the site. Instead, it is suggested that the Green Belt boundary is adjusted to follow the M1 along the entirety of the H2-H4 allocations.

It is important to note that should our representations be supported by the Council through Modification or by an independent Inspector at Examination, this would not mean that the need or desire to provide open green infrastructure as part of the development proposed within site H2 is diminished in any way. The draft Local Plan Policy, Concept Plan and Framework Plan evidence base for the HGC Growth Areas requires the provision of a Country Park, sports hub and SANG in the eastern part of H2 as part of the creation of a new landscaped edge to Hemel Hempstead; this design requirement would not be altered simply by the removal of the land from the Green Belt and TCE would be happy to agree policy restrictions to agree an appropriate eastern extent of built development in this part of the allocated site if needed.

Further, it should be noted that given the NPPF requirement to periodically review Green Belt boundaries as part of local plan reviews in order to accommodate development needs, the designation of land as SANG which comes with a requirement for its designation 'in perpetuity' has arguably more permanence, and thus might be seen as a preferable alternative policy and practical tool to ensure openness and a green setting ensuring separation of settlements over the long term.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

On this basis, although the overarching approach to releasing Green Belt land to support the Local Plan allocations is fully supported by TCE, we object to the extent of the H2, East Hemel Hempstead (North) allocation proposed to remain within the Metropolitan Green Belt as currently shown on the Policies Map. This also applies to H4 as the Green Belt boundary follows the M1 except for in the south-east corner of the site. Instead, it is suggested that the Green Belt boundary is adjusted to follow the M1 along the entirety of the H2-H4 allocations.

It is important to note that should our representations be supported by the Council through Modification or by an independent Inspector at Examination, this would not mean that the need or desire to provide open green infrastructure as part of the development proposed within site H2

is diminished in any way. The draft Local Plan Policy, Concept Plan and Framework Plan evidence base for the HGC Growth Areas requires the provision of a Country Park, sports hub and SANG in the eastern part of H2 as part of the creation of a new landscaped edge to Hemel Hempstead; this design requirement would not be altered simply by the removal of the land from the Green Belt and TCE would be happy to agree policy restrictions to agree an appropriate eastern extent of built development in this part of the allocated site if needed.

Further, it should be noted that given the NPPF requirement to periodically review Green Belt boundaries as part of local plan reviews in order to accommodate development needs, the designation of land as SANG which comes with a requirement for its designation 'in perpetuity' has arguably more permanence, and thus might be seen as a preferable alternative policy and practical tool to ensure openness and a green setting ensuring separation of settlements over the long term.

1. TCE Reg 19 Reps SADC 07_11_24 FOR ISSUE_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

The Crown Estate (TCE) is the landowner in respect of three of the four SADC Broad Allocation allocations within the Hemel Garden Communities programme area, namely H2 East Hemel Hempstead (North), H3 East Hemel Hempstead (Central) and H4 East Hemel Hempstead (South). TCE has made a significant commitment to supporting the work of HGC since its designation in 2019 and continues to work positively with both HGC and the planning authority of St Albans in order to progress emerging development proposals in line with the draft allocations. As landowner and promoter of these strategic site allocations we wish to participate fully in the Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

Arup Green Belt review not sound Ref SA45

The site lies to the East of Waddling Lane. Wheathampstead, Hertfordshire, comprising gentle sloping ground falling from the North to the River Lea.

Conclusion

This statement has demonstrated how Land to the East of Waddling Lane should come forward as a mixed-use housing and employment site meeting the golden thread of the NPPF 2023 promoting sustainable development in relation to economic, environmental, and social progress.

The statement has described how historic national infrastructure interventions for railways and highways have blighted any sustainable agricultural uses for the land. These historic interventions separated the site from rural farming landing effectively blighting the land for commercial agriculture.

It has described how mineral extraction has been exhausted leaving the land 'grey belt' or previously developed for those purposes. The Local authority must take account of brownfield or grey belt land and land that is currently underutilised. Both these exceptions are evident for this site and for these reasons exceptional circumstances exist that would allow the land to come forward in a form that makes best use of the land for development.

The statement has identified the shortcomings of the Arup Green Belt review where the review assessed the entirety of SA45 rather than this smaller portion of land abutting the built environment of Waddling Lane.

The statement has shown how the site will deliver a range of public benefits in addition to assisting with the shortfall in housing supply. For these additional reasons exceptional circumstances exist that would allow the land to come forward in a form that makes best use of the land for development.

The statement has demonstrated how a comprehensive offer of public benefits would support to review of Green Belt boundaries that promote sustainable patterns of development and for these reasons the subject areas SA44 and SA45 should be considered when setting out the District Nan.

In these circumstances a titled balance Should be applied when considering
Green Belt boundaries and site allocations to meet the shortfall in housing supply in the St Albans District on previously developed grey belt land.

For all those above reasons the Land East of Waddling Lane should be included in the emerging St Albans District Plan making process by a way of site allocation or Green Belt boundary adjustment.

**Site Allocations (Hemel Garden Communities - Broad Locations)**

Hemel Garden Communities (H1, H2, H3 & H4)

We have no further comments for the information in the key development requirements for the above sites.

**Site Allocations (Broad Locations – 250+ homes)**

Broad Locations (B1, B2, B3, B7)

We have no further comments for the information in the key development requirements for the above sites.

M5-Sewage Treatment Works, Piggottshill Lane, Harpenden, AL5 5UN

As the Minerals and Waste Planning Authority, we are glad to see the exclusion of site M5-Sewage Treatment Works, Piggottshill Lane, Harpenden, AL5 5UN due to the previously raised safeguarding concerns regarding these Sewage Treatment Works.

Medium and Small Sites (M2, M6, M9, M17)

We have no further comments for the information in the key development requirements for the above sites.

**Site Allocations (Medium and Small Sites – 5-99 homes)**

The reminder of the medium and small sites (as included within Part B, from pages 31- 50) are 10 dwellings or under and/or have no other safeguarding concerns. Therefore, as the Minerals and Waste Planning Authority, we have no comments to add to these proposed allocations' key development requirements.

**Site Allocations (Sites within Urban Settlements (HELAA))**

The reminder of the Sites within Urban Settlements (HELAA) (as included within Part B, from pages 54- 56) are 10 dwellings or under (U3, U4) and have no other safeguarding concerns. Therefore, as the Minerals and Waste Planning Authority, we have no comments to add to these proposed allocations key development requirements.

**Site Allocations (Sites within Settlements (Urban Capacity Study))**

The proposed site allocations UC1 to UC7, UC10, UC12, UC16, UC18, UC19 and UC35 fall entirely outside the Sand and Gravel Belt. BGS data however identifies potential superficial sand/gravel deposits beneath these sites.

These proposed site allocations have existing built development adjacent to them. Due to their existing constraints, the council would only encourage opportunistic extraction at these sites.

Whilst **not a soundness matter**, the District Council may wish to add objectives to the 'key development requirements' for these proposed allocations, like that suggested above for M8 – Verulam Golf Club, St Albans, AL1 1JG, to include the following wording or similar:

*Undertake opportunistic extraction of any suitable sand and gravel deposits for use on-site wherever possible, where such deposits are uncovered during construction / excavation works.*

The reminder of the sites within Settlements (Urban Capacity Study) (as included within Part B, from pages 57- 110) are either 10 dwellings or under and/or have no other safeguarding concerns. Therefore, as the Minerals and Waste Planning Authority, we have no comments to add to these proposed allocations key development requirements.

**Site Allocations (Other Sites)**

The remaining sites within the Other Sites (as included within Part B, from pages 111- 114) do not meet the criteria for major development and/or have no other safeguarding concerns. Therefore, as the Minerals and Waste Planning Authority, we have no comments to add to these proposed allocations key development requirements.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. ### Number:

New Site - Appspond Lane

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

[Please see attachment for full submission]

**The Site**

Appspond Lan is a brownfield site, measuring approximately 2.22 ha, currently in employment use. It is located between elevated roads: the A414 (formally the M10) to the east, the M1 to the west, the A4147 to the north. Access to the site is via Appspond Lane which runs along the site's western boundary, parallel with the M1. Due to their relative height, the roads visually separate the site from the nearby countryside and screen it from long range views. Further screening is provided by the dense foliage surrounding the entire site (save the access point), a Longfield Spring, a predominantly coniferous woodland along the site's southern boundary.

Alongside foliage, a fence, reaching approximately 2.8 metres in height, runs along the site's boundary and on the southern and western boundaries it is approximately 2.8 metres in height. This fence provides a clear delineation between the site and the surrounding planting and woodland. Within the north portion of the site are a large 58 metre high national grid electricity pylon as well as a telecoms mast, which due to their size and design, give the site a utilitarian character.

The site is within the Metropolitan Green Belt, and is designated a Safeguarded Waste Site in Hertfordshire County Council's Annual Monitoring Report (November 2021).

There are two separate and extant permissions on the site for a wood chipping facility (ref. 5/2007/1470, granted March 2007) and a wood waste biomass fuelled renewable energy plant (ref. 5/2009/2108, granted December 2010). The biomass plant was implemented but not built out.

...

**Land at Appspond Lane**

The Land at Appspond Lane is a previously developed site in employment use, on which sustainable, intensifying development is proposed and actively pursued via an ongoing planning appeal. It ought to be allocated within the Plan as part of a suite of smaller, sustainable sites capable of bringing forward employment development to ensure that the quantitative and qualitative needs of St Albans will be met over the course of the emerging Plan period.

As set out in documents submitted for both the planning application and the pending planning appeal, the site is, when set against the five Green Belt purposes, a poorly performing site which can be sustainably released from this designation in order to facilitate development. It is also a particularly sustainable and accessible location for open storage/Class B8 use, being located between the M1 to the west, the A414 (formerly the M10) to the east, and the A4147 to the north (which grants direct access to Hemel Hempstead and St Albans.

The site is also in active and long-standing employment use. Redeveloping it in order to increase its operating efficiency ought to be supported by the Council as part of a sustainable and comprehensive strategy for delivering a range of much needed employment sites throughout the authorities area of jurisdiction, and as part of the process the site should be allocated for employment development in these terms.

**Conclusion**

As set out above, the St Albans' Regulation 19 Draft Local Plan 2041 does not meet the tests of soundness, as set out in the NPPF, for the following reasons:

- **Positively prepared** – the Plan does not state its employment need at all, nor its supply in any detail. It is therefore not possible to establish whether it meets, as a minimum, the area's objectively assessed needs. The Plan also claims to have an oversupply of employment land that can contribute to neighbouring unmet need, but precise figures are not provided, an approach which lacks clarity. Further, a review of the relevant evidence suggests that the Plan's claim that it meets its need is subject to challenge.
- **Justified** – the chosen strategy for employment land delivery is to allocate a single strategic site. This leaves no space for contingency in the event that this site doesn't come forward, and the site itself may not provide enough land to delivery the necessary level of B2/B8 floorspace over the Plan period. Aside from the quantitative need, there are concerns that this site will not meet the qualitative requirements of the area, which is characterised by micro, small, and medium sized business. The allocation also resists logistics development, which throws into further doubt the Plan's ability to meet anticipated needs.
- **Effective** – the Plan seemingly puts forward no timelines for site deliveries, and it is therefore unclear whether or not the needs of the area can be met over the course of the Plan, this is particularly pertinent for employment need, which is principally tied to a single strategic allocation.
- **Consistent with national policy** – key requirements of national planning policy, such as the need to make effective use of land, are not met by the Plan's strategy, which has systematically reduced the capacity of a large number of residential allocations for reasons that appear to have little to do with the site's themselves. Rather, it appears that this has been driven by the desire to reduce the housing requirement (and consequently the supply) as much as possible.

Beyond concerns with the Plan's broad strategy, the Land at Appspond Lane ought to be allocated for employment development to further secure the Plan's soundness:

- **Positively prepared** – Allocating the site will go some way to ensuring that the Plan can meet its objectively identified quantitatively and qualitatively identified need.
- **Justified** – The site's status as a existing employment site, along with the sustained efforts to secure its redevelopment, make it clear that the site will come forward, and can be sustainably relied upon to contribute to the Plan's employment land supply

- **Effective** – The site is a previously developed site in active employment use, and ought to be supported and allocated for additional development in order to maximise the site's efficiency and ensure the best possible use of the site and its land.
- **Consistent with national policy** – allow for the stie to come forward, supported under a site allocation, to ensure that the best use is made of a poorly performing and previously development Green Belt site in active employment use, is considered to be a sound strategy that would be entirely in keeping with standards set by national planning policy.

Evidently, the Plan requires significant alteration if it is to be found sound under examination, and this should include:

- A clearly stated employment land requirement;
- Clearly identify employment land supply (including the indicative hectarage of all proposed employment uses set against their requirements);
- Clear timeframes for site delivery;
- A greater range of employment sites in order to provide *inter* alia flexibility and contingency;
- Greater efficiency in the use of allocated land in order to ensure that this tenet of national planning policy is met; and
- The inclusion of a site allocation for Land at Appspond Lane to identify the site for employment development.

Making these changes are necessary if the Plan is to be considered sound, and capable of progression through examination to formal adoption.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## 304 - EDIT Land Ltd

Submission Number: 304 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 8

### Type:

* Site

### Number:

New Site

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land to the south of Burydell Lane, Park Street” have been discounted incorrectly.

**Representations**

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

The Reg. 18 Draft Local Plan includes planning policies relating to various topics, which would become the principal consideration for the decision maker when determining planning applications.

EDIT Lands has not provided comment on a number of policies and advise which they are commenting on in the list below, but reserves the right to comment on others in the future. However, SADC should consider whether all the policies as drafted are useful and necessary for decision making, and do not just repeat that which is already stated in the National Planning Policy Framework (NPPF), Planning Practice Guidance or legislation. Policies should also be unambiguous, clear and concise, without being overly onerous or stifle innovation or ambition.

EDIT Lands main concern with the Local Plan, as a whole, is the weak approach to the provision of much needed housing. Firstly, the level of housing planned for does not seek to address housing need adequately or provide any contingency, nor does it seek to address unmet need or positively plan for previous years of significant under-delivery.

Furthermore, the level of housing which is proposed as windfall, is unsound. 20% of the total housing supply to come forward on sites which do not have allocations, nor are formally identified is not positively prepared and is a huge outlier compared to neighbouring authorities. We consider the proportion of windfall to be wholly inappropriate given the borough's historic poor delivery and acute housing need.

It is also perverse for SADC to suggest that all brownfield sites have been exhausted to necessitate Green Belt release, whilst anticipating that such a high number will come forward via the windfall process. In addition, the Local Plan is heavily reliant on the delivery of a small number of broad growth areas and strategic extensions, namely the Hemel Garden Community which is allocated for net. 5,500 dwellings and 4,281 across the other strategic development sites which are subject to challenging land assembly and infrastructure delivery requirements which will constrain delivery of housing units within the early periods of the Local Plan. St Albans have acknowledged this situation in the reg.19 draft Local Plan where they are now asserting that only 4,300 dwellings will be delivered on the HGC sites within the LP period, a reduction of 450 dwellings from the LP trajectory and 1200 from the wider site allocation. Across all allocated sites within the borough, the council has lost net. 971 dwellings between Reg.18 and Reg.19 stage. There is no explanation, or justification on how the shortfall in housing delivery is accounted for within the revised housing trajectory, or local plan housing target.

The housing trajectory places significant reliance on these strategic sites without due consideration to implications of these strategic sites not being delivered or brought online in line with the housing trajectory.

The emerging Local Plan is also not prepared positively as it fails to make any consideration to the need for natural growth (and deliverable) within the 'washed over villages' within the green belt, with no consideration paid in detail to areas for release from the green belt in these locations. As outlined in Section 3 of this document our client challenges the methodology which has been applied in the green belt review in light of a failure to apply a macro level analysis to the green belt parcels.

Furthermore the draft Local Plan fails to make provision for custom build and self-building housing typologies despite a clear need being identified in the National Planning Policy Framework no recognition is made to the contribution this typology makes to meeting established demand. We understand that there is a need locally for such housing and failure to plan for such housing, is not positive.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

SP1: A Spatial Strategy for St Albans District

SP3 — Land and the Green Belt

HOU 1- Housing Mix

HOU 2 — Affordable Housing

SP2 — Responding to the Climate Emergency

NEB 6 - Biodiversity and Biodiversity Net Gain — Comment

LG5 — Green Belt — Object

EDIT Land considers that strong exceptional circumstances exist to justify the release of Land at Burydell Lane, Park Street. This is summarised as below:

The heavily constrained nature of the Borough (SPA, SSSI and flooding);

Housing need — need for open market housing and affordable housing to address significant historic shortfall in delivery which is cataclysmic; The unavailability of suitable brownfield sites and underutilised land within settlement boundaries (on the basis of SADC's own evidence), necessitating release

Moderate performing Green Belt when assessed in isolation, with limited contribution to the Green Belt when consider on the basis of the emerging proposals and controls by policy. The emerging proposals or the site have positive consequential effects on character and perceived openness; Provision of employment benefits;

- Opportunity for Sustainable Development well served by public transport;
- Surrounded by development on 3 sides, site is in a truly sustainable location.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

EDIT Land suggest that these significant changes are made to the emerging Local Plan, most notably:

Greater number of sites allocated, including allocation of a broader range of medium and large size green belt sites within the borough to provide contingency within the early stages of the Local Plan process.

Green Belt Review to review smaller parcels of land such as Land at Burydell Lane, Park Street

Less reliance on speculative windfall sites replaced with a mixture of housing allocations; and

Need for further Green Belt release to accommodate for the objectively assessed need (including Land at Burydell Lane, Park Street ) to ensure the plan is positively prepared and ultimately sound in accordance with NPPF paragraph 35;

All

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

In the past year, I have followed the webcasts of PP&CC meetings and feel that there has been little consideration of issues pertaining to individual sites. Site-specific considerations are essential in encompassing a range of critical factors, such as the environmental impact unique to each location, the adequacy of existing infrastructure, traffic and accessibility concerns, as well as the potential strain on local services like schools and healthcare facilities. Additionally, the distinct character and heritage of each site, which contribute to community identity and cohesion, are at risk of being overlooked in the drive to meet strategic objectives.

Without proper consideration of these factors, plans risk failing to reflect the needs and challenges of the communities they are meant to serve. Lack of individualised scrutiny can lead to developments that do not align with local priorities and which cause potential long-term adverse effects, such as congestion, overburdened public resources, and environmental degradation.

**Sustainability Process**

A Sustainability Appraisal is integral to the preparation and development of the local plan. The SA must inform and influence the Plan at the earliest possible stage and in that process consultation responses must be effective to help shape the options considered.

The PPG provides guidance on the preparation of the SA.

*"The sustainability appraisal needs to consider and compare all reasonable alternatives as the plan evolves, including the preferred approach, and assess these against the baseline environmental, economic and social characteristics of the area and the likely situation if the plan were not to be adopted. In doing so it is important to:*

*outline the reasons the alternatives were selected, and identify, describe and evaluate their likely significant effects on environmental, economic and social factors using the evidence base (employing the same level of detail for each alternative option). Criteria for determining the likely significance of effects on the environment are set out in schedule 1 to the Environmental Assessment of Plans and Programmes Regulations 2004;*

*as part of this, identify any likely significant adverse effects and measures envisaged to prevent, reduce and, as fully as possible, offset them;*

*provide conclusions on the reasons the rejected options are not being taken forward and the reasons for selecting the preferred approach in light of the alternatives." Paragraph: 018 Reference ID: 11-018-20140306*

The LGA states:

*"The sustainability appraisal is integral to the plan making process. It should perform a key role in providing a sound evidence base for the plan and form an integrated part of the plan preparation process. It should be transparent and open to public participation. The sustainability appraisal should inform the decision making process to facilitate the evaluation of alternatives. It should also help demonstrate that the plan is the most appropriate given the reasonable alternatives."*

The Sustainability Appraisal must address the legal requirements of the EU Directive (2001/42/EC) known as the Strategic Environmental Assessment (or SEA) Directive. The Environmental Assessment of Plans and Programmes Regulations 2004 give effect to this Directive and set out specific, legal, requirements for each stage of the sustainability appraisal process. Failure to carry out the sustainability appraisal process properly can expose the plan to legal challenge.

The SA should ensure that potentially environmentally preferable alternatives are not discarded as part of the process of approving plans without proper consideration of the environmental impacts of the various options.

Paragraph 4.1.7 of the SA states that individual site options are not considered to be reasonable alternatives, instead a package of sites to meet needs and wider objectives is assessed.

Consequently, there is no audit trail of all the reasonable alternative site options considered and the Council's reasons for either including or excluding the sites. Whilst it is acknowledged that the SA findings are not the only factors to be taken into account by a local planning authority when selecting options to take forward in a plan; factors such as public opinion, deliverability and conformity with national policy are also to be taken into account by plan-makers when selecting options for their plan.

As the SA is an integral part of plan preparation this assessment should be undertaken, the process needs to be transparent in order for the plan to be justified and found sound as set out in paragraph 35 of the NPPF (2023).

Paragraph 35 states:

***"...Plans are sound if they are:***

1. ***b) Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;"***

It is considered that there needs to be an audit trail to support the justification of the sites proposed in the Plan; on the basis of the current evidence the Plan would be unsound.

The PPG Plan Making states that:

***"The evidence needs to inform what is in the plan and shape its development rather than being collected retrospectively. Strategic policy-making authorities may wish to consider ensuring that their assessment of and strategies for housing, employment and other uses are integrated, and that they take account of relevant market signals." Paragraph: 038 Reference ID: 61038-20190315***

***Revision date: 15 03 2019***

***We have made separate objections to the SA Section 5.3 Site Options.***

**Levels of Growth**

The SA at paragraph 5.2.26 concludes that "***there are strategic arguments for setting the housing requirement at a figure above and below the LHN***"in the absence of higher level plan to distribute growth across the sub-region; but in paragraph 5.2.28 then concludes that "***the arguments in both directions ultimately they cancel each other out***".

The difference in the SA in 2024 is that in paragraph 5.2.31 it is acknowledged that there is more pressure for higher levels of growth:

"***With regards to higher growth, the conclusion here is that whilst such scenarios were ultimately ruled out as unreasonable in 2023, there is now increased strategic argument, particularly given unmet need, but also noting the Government's direction of travel at the time of writing (August 2024)."***

**Appendix 1: Economic Overview and Housing Need** (attached to our representations) provides a clear rationale for the St Albans Local Plan Review to go beyond the capped housing requirement (885) identified by the standard method for determining local housing need. An increase above the capped method would not only be more consistent with national policy and guidance, (in terms of significantly boosting the supply of housing); but would also assist in remedying the acute issues of affordability, affordable housing need, ageing population and economic growth with St Albans. Furthermore, given the evidence, It is therefore not unreasonable that the housing target in St Albans should be more in line with the proposed standard method figure of 1,544 dpa.

**Site Selection**

At the time of the Reg 18 Local Plan consultation reference was made to an officer led assessment, paragraph 5.3.12 of the 2023 SA refers to an officer led assessment - a 10 stage site selection methodology was presented to LPAG in June 2022; however, this site assessment did not appear in the evidence base during Reg 18 consultation. Consequently, at that stage it was unclear how the sites had been assessed and how these have influenced the sub – area scenarios included in the Reg 19 Plan. The SA fails to provide an assessment of reasonable alternative sites.

**The Local Plan Evidence - Site Selection Methodology Outcomes and Site Allocations** states in paragraph 3.14 under the heading: Site Selection Proformas for Green Belt Sites

"3*.14. In some locations there is more than one HELAA site due to multiple submissions over the course of several Call for Sites between 2016 to 2021. In these cases the most recent submission was considered in the site selection process and included within the Proforma."*

However, in relation to land at Harperbury Hospital, Harper Green (HELAA sites ref Annex 15 St Stephen the site is referenced STS- 33 -18 and STS-34-18), this is NOT the case as explained to the Council in our representations to the Reg 18 Plan.

The issue is that the site options have not been considered for the site. **See separate representation form on Section 5.3 Site Options Section 4 Sub -Area Scenarios**

Section 5.4 covers the sub-area scenarios - it is noted that the sub areas take into account the settlement pattern, parish boundaries and the distribution of "realistic site options". However, there is no map defining the sub-areas, so it is impossible to see how sites relate to the sub-areas, without reference to Appendix VI, where the parishes included in each of the sub-areas are listed.

It is noted (paragraph 5.4.10) that the aim is not to present a formal appraisal of reasonable alternatives and to discuss all site options in the same level of detail.

Most Sustainability Appriasls appraise sites being considered in order to form the options so that there is a transparent assessment of how the sites have been considered and which sites are then "taken forward" into the Plan as proposed allocations.

There are 9 sub-areas (paragraph 5.4.2) one of which is "Edge of Radlett", and a link is provide to the map of the HELAA sites in the parish of St Stephen. The settlement of Radlett is within Hertsmere BC. Reference is made to Hertsmere Local Plan Reg 18 consultation in April 2024; however, the Plan proposed a shortfall against the current SM. The key issues for Radlett are described as: "*Existing pressures on key services... affordable housing [including because of housing growth coming forward from small schemes]... absence of a secondary school and congestion on Watling Street."*

The Council should consider with Hertsmere BC (through the Duty to Cooperate to meet the unmet needs) the future needs of the area and not be artificially constrained by administrative boundaries.

The site proposed in the SADC Reg 19 Local Plan as one of the Broad Locations is B8 land at Harper Lane, however this site would not address any of the unmet needs of Hertsmere and does not relate well to the edge of Radlett and does not relate well to the edge of Radlett (paragraph 5.4.145 of the SA Sept 2024)

It is not clear why Broad Location B8 has been proposed over and above Land at Harper Green, particularly given all the evidence supplied to the Council in respect of promoting a scheme at Harper Green adjacent to the already recently completed housing completed on the former Harperbury Hospital site, (see representations to Broad Location B8). "*The northern half of the site (adjacent to Harper Lane) comprises a light industrial area / trading estate (fully operational), and within this the northern part of the estate is a protected rail depot (important for minerals). The*

*southern half of the site (adjacent to Radlett) them comprises greenfield land. An area of parkland / former parkland associated with Grade II listed Harper House is located to the east."*It is not clear what benefits this site would bring over and above land at Harper Green.

Paragraph 5.4.150 makes reference to our previous earlier submission of a new settlement at Harper Green, however despite the evidence and plans submitted the smaller proposal for about 470 dwellings has not been considered. This proposal would have "built on" to the approved, now built redevelopment of the former Harperbury Hospital site of 206 dwellings adjacent to the Kingsley Green Hospital. A smaller, more contained proposal is submitted to the Council –**see Appendix 2 Concept Plan.**

**Section 5 Reasonable Growth Scenarios**

It is noted in Section 5.5 that the SA considers 8 growth scenarios (as opposed to 4 that were considered in the Interim SA in 2023):

- Lower growth by removing either East St Albans or small sites (Scenarios 1 and 2)
- The emerging preferred option (PO, Scenario 3)
- Remove small sites and replace with one or both of the St Albans omission sites (Scenarios 4, 5, 6).

- Higher growth by additional allocation of one of the St Albans omission sites (Scenarios 7 and 8).

It is not necessarily clear which sites have been included in the 8 reasonable scenarios – the process is simply not transparent, and it is not clear how these scenarios contribute to meeting the SA topics/ objectives of the Plan.

The 8 reasonable scenarios are then appraised using 13 headings (one for each of the topics/objectives that comprise the SA framework), this does not constitute an appraisal of the sites under each of the scenarios. Under the Transport heading paragraph 6.13.1 it is acknowledged that transport objectives are centrally important to the local plan spatial strategy /site selection and there is a need to minimise the need to travel, support modal shift away from the private car towards public and active transport etc. "*Support for the achievement of transport objectives will have wide-ranging benefits in respect of other key objectives for the Local Plan, including decarbonisation." (my emphasis).*

**Sustainability Appraisal - Section 5.3 Site Options**

Whilst this heading implies consideration of Site Options, this is not the case. **It is not clear which sites from the HELAA assessment have been carried forward into the SA and which sites form the options in the sub areas**. There is no SA of individual sites so that they can be compared. Instead, the HELAA is the starting point as stated in paragraph 5.3.3 of the SA,

**"*The effect is to sift out a small number of sites, leading to an initial shortlist of 354 site options with a total capacity of 58,175 homes). In addition, a further 215 sites are shortlisted on the basis of an Urban Capacity Study, although for many of these sites availability was subsequently established as an issue such that the site did not warrant further consideration. Finally, all shortlisted site options are assessed using under a standard set of criteria across a series of site 'proformas', informed by the Green Belt Review and consultation (2023*)"**

The Local Plan Site Selection -Proforma Methodology Paper (September 2024) states that the site selection work is set out in Proformas which have been used to assess each site for suitability (paragraph 1.3). However, these proforma do not assess the sites against the sustainability objectives of the Plan.

**Our objections focus on the Site Selection and the also the Green Belt Review.**

**Site Selection**

Paragraph 1.9 of the Site Selection Proforma Methodology Paper acknowledges that:

**"*These recommendations for further consideration are important in site selection and are key elements that inform the proformas. The GBR Level 2, however, is not the only consideration for site selection and other criteria for suitability for the selection of sites in the Green Belt are part of the process that is set out in the proformas.*"**

However, Green Belt sites identified in the HELAA, but outside of the GB buffers were not considered to be suitable due to their less sustainable location and because development on such sites would create holes in the Green Belt, leading to fragmentation.

Paragraph 1.15 of the Site Selection Proforma Methodology Paper states:

**"*In some locations there is more than one HELAA site due to multiple submissions over the course of several Call for Sites between 2016 to 2021. In these cases the most recent submission was considered in the site selection process and included within the proforma.*"**

However, in relation to land at Harperbury Hospital, Harper Green (HELAA sites ref Annex 15 St Stephen the site is referenced STS- 33 -18 and STS-34-18), this is NOT the case as explained to the Council in our representations to the Reg 18 Plan. (Land at Harper Green was submitted to the SHLAA in 2018 and again in 2021.) For Harper Green there have been several submissions, but despite the most recent submissions illustrating a smaller

development of about 400 dwellings the Council appear to have only assessed the original proposal for a garden village.

In response to the Call for Sites in March 2021, the forms were submitted and a site location plan together with an updated Vision document promoting Harper Green was submitted (February 2021) and set out the two options.

There are several references in the HELAA, but essentially the land is within STS-34-18 and STS-33-18. The sites in the HELAA 2021 report Annex 15 St Stephen and were *"considered to be potentially suitable subject to absolute and non-absolute constraints being reasonably mitigated. Evidence base work, including a Green Belt Review, is underway and may change the site suitability in the future.*" The overall conclusion was that:

***"The site is considered be potentially suitable, available and achievable subject to further assessment as part of the site selection process." Annex 15 in respect of STS-33-17, STS-33-18, STS-34-18, and STS-34-21.***

The site is adjacent to the former Harperbury Hospital site granted (5/15/0990) for 206 dwellings (SHLAA ref 254). The area of land promoted expands upon the site for 206 dwellings and can deliver a smaller development of approximately 470 dwellings supporting existing facilities. Since the Reg 18 Local Plan consultation further technical work has been undertaken to confine the area to a more limited extent of new development

Given further work that has been undertaken we are proposing an option of approximately 200 dwellings in addition to the 206 dwellings that have recently been completed on the former Harperbury Hospital site, which would assist in meeting the housing shortfall in the early part of the plan period. The proposal straddles the St Albans /Hertsmere district boundary however, this artificial boundary should not prevent the delivery of sustainable development, it should be noted that Hertsmere BC are not planning to meet their housing needs at the recent Reg 18 consultation in May 2024.

In our previous representations we submitted that the number of dwellings is not fixed and as such the proposal could accommodate a scheme of between 400 and 1,400 dwellings. The revised scheme proposes approximately 200 dwellings, relocated football pitches, playing fields, relocated bowls club, proposed community building, there is however potential for more development within Hertsmere. **Appendix 2 provides an updated concept plan for land at Harper Green for the revised proposal which is appended to the representations.**

Previously, land at Harper Green has been promoted as a cross-boundary site to both St Albans City and District Council and to Hertsmere Borough Council, although an option has been promoted for approximately 470 dwellings solely located within St Albans District and immediately adjacent to and enclosing the former hospital redevelopment for 206 dwellings (ref 5/2015/0990 granted planning permission by your Council in May 2017). The 2016 SHLAA site is SHLAA ref 254. The wider cross boundary site is SHLAA ref 539 submitted in 2018, and the smaller area ref 540 submitted in 2018. The HELAA references are STS-34-18 and STS-33-18.

Bloor Homes controls wider land holdings in both St Albans and Hertsmere. The land controlled by the company amounts to some 81.30 hectares and is adjacent to land in

public sector ownership. Bloor Homes have previously indicated to both Councils that the nature of their arrangements with the former owners (Department of Health and Social Care) means that the proceeds would be reinvested in the National Health Service. It is considered that the use of public sector land, i.e., its disposal and subsequent development is encouraged and supported by national policy in the NPPF (2023) paragraph 125.

***"Local planning authorities, and other plan-making bodies, should take a proactive role in identifying and helping to bring forward land that may be suitable for meeting development needs, including suitable sites on brownfield registers or held in public ownership, using the full range of powers available to them. This should include identifying opportunities to facilitate land assembly, supported where necessary by compulsory purchase powers, where this can help to bring more land forward for meeting development needs and/or secure better development outcomes."****(my emphasis)*

Relating to the point made earlier whilst the proforma have been prepared for the sites considered they are not assessed against the sustainability objectives of the Plan.

Paragraph 1.20 states:

***Each site is then assessed in terms of its sustainable development potential which is considered in detail in the next section of this Report and Table 1.***

However, **this is not against the sustainability objectives of the plan instead this assessment is made against the following in Table 1:**

- Whether the site is located within the Green Belt Buffer or settlement areas
- Located on PDL
- Located within GB Study weakly performing area
- Located within GB Study less important area
- Located within GB Study recommended for further consideration area

The sites have not been assessed against the SA objectives.

As referred to above we have promoted land at Harper Green for some time, throughout the preparation of the previously withdrawn St Albans Local Plan (we responded to the Call for Sites and submitted representations to the Reg 19 Local Plan and subsequently submitted Hearing Statements and attended the Local Plan Examination in 2020).

**In March 2021 in response to the St Albans Call for Sites** the submission was supported by a Vision document. The 2021 Vision document outlined the 2 options:

- a new Garden Village of approximately 1,400 dwellings in addition to the 206 dwellings at the Harperbury Hospital site.

1. 400 dwellings sustainable community - this is in addition to the 206 currently being built on the former Harperbury Hospital site and included land within Hertsmere Borough Council which contributes to the extensive amount of Green Infrastructure.

Both of these options above are cross boundary and provide a package of benefits. We indicated that the number of dwellings was not fixed and as such the proposal could

accommodate a scheme of between 400 and 1,400 dwellings and include significant planning advantages.

**The Call for Sites submission in March 2021 included a plan showing the red line boundary of the entire site** and indicated the location of the district boundary, indicating the respective areas within St Albans and within Hertsmere.

**In January 2022 we proposed to your Council a scheme where the residential element (approximately 470 dwellings) is solely located in St Albans**, **the proposal included the provision of Green Infrastructure (GI) in St Albans (approximately 25.48ha).** This would again expand upon the development of Harper Green (i.e., adjacent to the former Harperbury Hospital site) thus providing the opportunity to consolidate the existing development pattern to establish a balanced community. The plan indicated the land within St Albans which comprises approximately 39 hectares which included land for Green Infrastructure. Additional land in Hertsmere Borough Council provides a further 44.54 ha. of Green Infrastructure. To be clear at the time a red line plans showing the land within St Albans was submitted and also a red line plan to show the land with St Albans and Hertsmere was submitted. A concept plan was also submitted which illustrated the significant benefits on the land under control.

**In March 2023 we also submitted two plans which drew attention to the significant amount of Green Infrastructure that can be provided within the various options** that we are promoting, whether entirely within St Albans or whether it is a cross-boundary site with Hertsmere BC.

The two plans illustrated the extent of GI and the opportunities that this would provide:

- The smaller option for approximately 470 dwellings (solely located within St Albans) would include approximately 64 hectares of GI (including natural and semi-natural and amenity space) in addition to the existing vegetation, buffer planting and re-located football club.
- The slightly larger option for approximately 575 dwellings (including land within Hertsmere) would include approximately 62 hectares of GI. In each case a primary school is proposed.

This approach is consistent with the NPPF insofar as if land is removed from the Green Belt for development, improvements to the environmental quality and accessibility of the remaining Green Belt land can be made in accordance with paragraph 141 of the NPPF (2023).

However, as reported in the Local Plan Interim Sustainability Appraisal July 2023, only the larger proposal of a new settlement has been considered (Paragraph 5.3.13 which has a link to part of the vision document we submitted in 2021 (page 10 onwards)). Unfortunately, the pages in the Vision Document which clearly outlined the proposals for both options i.e., approximately 400 dwellings (which would be in addition to the 206 dwellings built on the

former Harperbury Hospital site) and alternatively a new Garden village of approximately 1,400 additional dwellings are missing (in particular page 9).

Irrespective of the fact that the pages are missing in the link in the SA, given the Council had the information for both options in response to the Call for Sites in March 2021, and further information was submitted supporting a scheme solely in St Albans in January 2022 and March 2023, it is not clear why both options have not been considered by the Council.

When all factors are taken into account in accordance with the NPPF, it is considered that further development around the former Harperbury Hospital on land at Harper Green is a more sustainable location than Broad Location B8 and should be included as a proposed allocation to meet the needs of St Albans. It is acknowledged that it would result in land being removed from the Green Belt, however, exceptional circumstances can be justified and land at Harper Green includes some previously developed land, it is well served by public transport (new services are already benefiting the wider community e.g., Kingsley Green Hospital) and it is adjacent to development that has recently been completed on the former hospital site. Land at Harper Green formed part of the NHS Estate and importantly, as referred to above the nature of their arrangements with the former owners (Department of Health and Social Care) means that the proceeds would be reinvested in the National Health Service. Such a proposal therefore accords with the NPPF. This site and the options should have been appraised against the SA objectives.

**Appendix 3: Appraisal of the Harper Green site against the SA Objectives of the Reg 19 Local Plan.**

**Appendix 4: Policy Compliance Assessment for Harper Green**

Transport is but one of the factors considered in promoting a sustainable development. As set out in the NPPF, achieving sustainable development means ensuring that the three overarching objectives, economic, social and environmental are considered in mutually supportive ways, so that opportunities can be taken to secure net gains across each of the different objectives.

As part of the original planning of the ongoing development of Harper Green, a strategy was put in place to ensure that sustainable travel patterns would be generated by the new housing. Improved foot and cycle provision have been provided. A new bus service has been provided to connect to Radlett railway station and Colney Fields Retail Park. The sustainable travel credentials of the location have therefore been scrutinised only very recently.

An additional appraisal has therefore been undertaken to understand how the location performs within this wider context, what are the constraints in this location and what improvements over and above those that have already been implemented are required to maximise its performance.

Our report concluded that there are opportunities to develop the local transport system to maximise the outcomes for existing and future residents; staff and visitors to the Kingsley Green Healthcare facility; and other premises on Harper Lane and beyond. Further improvements are proposed to the walking and cycling network and the public rights of

way network to improve connectivity between local communities and to the railway station.

The link in the SA at paragraph 5.3.13 is to an extract of the Vision Document submitted in 2021 and the pages that set out the two options for the site (i.e., 1,400 dwellings and 400 dwellings) have not been included in the extract. Consequently, it appears that the smaller scheme of approximately 400 dwellings has been ignored. The smaller scheme is a viable site and includes extensive areas of Green Infrastructure (GI) and provides pedestrian and cycle links to Radlett station.

A considerable amount of technical work has been undertaken across the site within the landownership, which can support a sustainable community and reinforcing the settlement pattern of the area. As part of the representations to the previous St Albans Local Plan Reg 19 consultation in October 2018 our submission included the following:

Appendix 1: Harper Green Garden Village

Appendix 2: Sustainability Appraisal Land at Harper Lane, Radlett.

This SA included the following appendices:

Site Location Plan

Transport Appraisal (covering 500 – 1400 dw)

Ecological Constraints baseline report

Phase 1 Geo-environmental Assessment

Agricultural Land Classification Report

Flood Risk and Surface Water Drainage Note

Heritage Desk based assessment.

Landscape and Visual appraisal

The site is 81.0 hectares (approximately 39ha in St. Albans and 42.0ha in Hertsmere). It lies immediately adjacent to, and encloses, the Harperbury Hospital which has permission for 206 dwellings which are currently under construction. There is an opportunity to build and consolidate on existing and committed development. It is within this context that a scheme for approximately 470 dwellings was proposed as an alternative to Broad Location B8.

The proposal located entirely within St Albans provides for:

- circa 470 dwellings,
- 2FE primary school,
- local centre to include medical facilities if required, provides for the opportunity to relocate the Bowling Club (Bloor Homes already have permission to do this in association with the Harperbury Hospital scheme) and includes the relocation of the football pitches under the existing lease terms.
- Further supports the new public transport service to the area implemented in September 2020 as part of the planning permission for the first scheme for 206 dwellings. This service carries 11 years of guaranteed subsidy through to towards

  the end of 2030 and hence plenty of time to grow within the context of further development. The service will also enable those travelling to and from the adjacent Healthcare site to use public transport. (The vehicle size has been chosen to allow for steadily growing patronage.)

  - There is an existing direct walking route via a Public Right of Way and quiet neighbourhood streets from the site to Radlett town centre and the rail station. As part of the proposals, the existing footpath along Harper Lane have taken place, providing a dedicated footpath / cycle path to Radlett. The new proposals would build on that and deliver improvements to Watling Street.
  - On foot this journey takes about 20 minutes, and to cycle about 10 minutes.

- Land at Harper Green can contribute significantly to the delivery of new strategic walking and cycling infrastructure in line with the priorities set out within the St Albans Local Cycling and Walking Implementation Plan which is a key consideration as noted in para 6.2.3 of the SA.
- Figure 5.6 in the SA states that it shows several recent sub-divisions of HELAA sites (made post the publication of the HELAA in 2021, however the smaller site at Harper Green which was promoted to the HELAA is not included).

The revised scheme proposes approximately 200 dwellings, relocated football pitches, playing fields, relocated bowls club, proposed community building, there is however potential for more development within Hertsmere.

Our objection to the Site Options is that the SA has failed to consider the options for Harper Green, despite submissions which clearly explained that there are two options, and that the scheme could vary between 400 – 1,400 dwellings.

**Green Belt Review**

**We agreed that there are exceptional circumstances to justify removing land from the Green Belt, however, we have consistently maintained objections to the methodology and site selection process that the Council has applied.**

In order to alter the boundaries of the green belt, exceptional circumstances should be fully evidenced and justified. The NPPF states that strategic policies should establish the need for any changes to the Green Belt boundaries, having regard to the intended permanence in the long term, "*so that they can endure beyond the plan period". (paragraph 145 NPPF 2023)*

Importantly any changes therefore need to endure beyond the plan period rather than making a whole series of small-scale changes which do not secure any of the community and wider benefits and do not endure for the long term.

***"Before concluding that exceptional circumstances exist to justify changes to Green Belt boundaries, the strategic policy-making authority should be able to demonstrate that it has examined fully all other reasonable options for meeting its identified need for development..."***

Paragraph 5.3.4 refers to the Green Belt review, that Stage 1 was published in 2013 and that concerns about the Stage 2 report led to a new Green Belt Review Stage 2 being published in June 2023.

We have previously commented on the Green Belt Review and note that the Stage 1 report (undertaken in 2013), although it assessed the entirety of the Green Belt in St Albans against the NPPF purposes, the Council still consider it to be relevant despite criticisms of the approach in the last local plan review. The issue with the Green Belt Review Stage 1 is that it reached high level conclusions, if the very broad areas were ruled out at this stage, then smaller areas within were not taken forward.

The new Stage 2 Green Belt has been undertaken by ARUP (published June 2023) "builds upon" the SKM Stage 1 (2013) report which assessed the entire Green Belt. The Council consider that this assessment provides robust evidence base and have taken the findings of the Stage 1 GBR on the weakest performing GB and used these to form the sub- areas for the Stage 2 study. Consequently, any areas which were not considered favourable then (some 10 years ago) continue to be discounted no matter how marginal and whether the assessment was considered to be well founded or not. The new Stage 2 report now has been prepared by ARUP for the Council to address the concerns raised by the Inspectors.

The Stage 2 assessment only considered those sites that fell within the settlement boundary buffer. The area of search was thus limited by applying a buffer around each settlement inset from the Green Belt. The intention *was:*

*"***encouraging a sustainable pattern of development accessible to existing settlements and maintain the integrity of the Green Belt (as supported by the NPPF). The GBR Stage 2 (2023) assessed sub-areas, with these sub-areas driven by the sites promoted and considered through the HELAA process, along with small sites identified in the previous GBR Stage 2 of 2013."**(paragraph 1.7 of the Site Selection Proforma Methodology Paper (September 2024)

In our reps to the previous Local Plan, we criticised the Stage 1 assessment. The Stage 1 assessment stated: "***To achieve 'further consideration for development' the site must be evaluated as lower or medium impact (Green or Amber). Any Red rating (higher impact) will rule a site out for further consideration."***This is a "policy on" assessment.

Land at Harper Green is within Green Belt Parcel 31, overall, the parcel was assessed to contribute significantly to only 1 of the purposes of the Green Belt, yet it was scored "Red" in Table 1 of the Councils assessment attached to the Planning Policy Committee Papers of 22nd May 2018. At the time Pegasus objected to the Council's assessment of land at Harper Green adjacent to the former Harperbury Hospital as the evidence did not support the Council's assessment. **We provided our assessment of the Parcel against the 5 purposes of the Green Belt - this was submitted with our representations in 2018.**

At that time, it appeared that Harper Green Garden Village was dismissed not only because it was located in the Green Belt, but also because the Council's assessment of capacity was such that they concluded that less than 500 dwellings could be accommodated in St Albans as the site straddles the boundary with Hertsmere Borough.

From the Stage 1 report only strategic sub area SA-S7 - south and west of London Colney was considered to go forward into the next stage review even though the main contribution

of Parcel GB31 to the Green Belt purposes is stated to be the contribution to the maintenance of the existing settlement pattern, particularly on the secondary local gap between London Colney, Frogmore and Radlett Road. While any reduction in these gaps could compromise the separation of settlements in physical, visual, or openness terms, it affirms the suitability of considering the Harperbury site when it states that a limited

reduction in the size of the strategic parcel would not significantly compromise the physical

separation of any settlements or primary role of the Green Belt.

In our submission to the St Albans Local Plan in 2018 we responded to the SKM Stage 1 and 2 reports and provided a detailed assessment of the land parcel around former Harperbury

Hospital against the purposes of the Green Belt. Each parcel was assessed against potential spawl, coalescence and effect on the countryside. Parcels were identified suitable for development, and some mitigation and parcels not suitable for development. Parcels not suitable for development included the now proposed Broad Location B8 which was considered to contribute to urban sprawl.

In undertaking our own Green Belt assessment of this location and can demonstrate that a Garden Village or smaller scale development at Harper Green can be accommodated in the

location of Harperbury Hospital without undermining the purposes of the Green Belt and at the same time creating a new definitive boundary for the Green Belt. It also addresses the issues in the Green Belt.

We have previously raised issues with the analysis of the Stage 1 report and as this has not been reviewed this analysis has been "rolled forward" into the new Stage 2 report. In addition, the new Stage 2 report is confined to the assessment of sites with the narrowly defined buffers.

The ARUP Stage 2 report sub-divides the Stage 1 recommended areas where appropriate but also identifies additional sub-areas for assessment. However, whilst the additional subareas are based on promoted sites, they are only those that are within defined buffers

around existing settlements in St Albans and neighbouring authorities. "*The additional sub-*

*areas lie within both strongly and weakly performing strategic parcels (as defined in the*

*Stage 1 GBR*)." (page 2 of the Stage 2 Green Belt Review).

The existence of the buffers around existing settlements has precluded the consideration of other promoted sites.

However, it is considered that the Stage 2 assessment has been constrained as it is

confined to those areas within the defined buffers around the existing settlements. Notably

the areas of search were defined by applying settlement buffers, identifying potential areas or sites within the buffers, then refining the sites to be removed from the GB. Consequently,

sites that are not adjacent to existing urban areas (or the buffers) i.e., those that fell outside

the buffers were excluded from the assessment i.e., that fell beyond the 250m and 400m

buffer were excluded (paragraph 4.2.1 of the Stage 2 Green Belt Review). The justification

for the exclusion being that "*the release of such sites would (a) not contribute to a sustainable pattern of development; and (b) undermine the integrity of the Green Belt by creating hole(s) within its fabric."*

The Green Belt Assessment then goes on to state that:

***"The identification of a buffer should not be taken as an indication that this land is necessarily the most sustainable, suitable or deliverable option for any future development. Areas of land which are assessed to perform less strongly against the Green Belt purposes will need to be balanced against wider local plan work to determine the preferred spatial growth option."***

In which case the extent to which land falls within a buffer should not be the determining factor in considering the area for future development.

**As stated in paragraph 4.2.1 of the Stage Green Belt Assessment, there is no formal guidance on the identification of buffers**, and it is noted that the Council have taken into account approaches in neighbouring authorities with similar characterises and making adjustments for the local context, applying professional judgement.

The settlement hierarchy and local circumstances including settlement pattern and spacing were considered.

These buffers indicate the maximum extent of sustainable development and vary accordingly to the position of the built-up area in the settlement hierarchy (the justification for the buffers is set out in paragraph 4.2.1 of the Stage 2 Green Belt Review June 2023). It is noted that the buffers were also applied to the immediately adjacent settlements in neighbouring authorities, where the buffer would lead to some partial interception with SACDC Green Belt as set out on page 24 of the ARUP Final GB Report June 2023

It is noted that in order to ensure that the assessment reflects the local context (paragraph 4.2.2), the areas of assessment within the buffers were refined by taking into account:

- SKM Stage 1 GBR weakly performing land against NPPF purposes. (however, this only included a sub-area of land parcel GB30 from the Stage 1 report)

- Promoted sites identified through the Council's site selection work (land at Harper Green has been promoted to the Council at every opportunity yet there is no published analysis of the site selection)
- Non-Green Belt land.

From the SKM Report Stage 1 "*only those sub-areas that fell entirely or partially within the settlement buffer, or immediately adjacent to another area / site entirely or partially within the settlement buffer were taken forward (page 23) Similarly, although the promoted sites from 2016 –2021 were considered, only those promoted sites that fell entirely or partially within the settlement buffer, or immediately adjacent to another area / site entirely or partially within the settlement buffer were taken forward".*

***The application of the settlement buffers has resulted in only those areas and sites falling entirely or partially within the defined buffers being subject to further assessment. Where weakly performing sub-areas and promoted sites were located partially within a settlement buffer, the entirety of these areas and sites was taken forward for further consideration, i.e., essentially extending the buffer.***

Areas or sites located outside of the settlement buffer fell into two categories:

- Outside the buffer and no immediate adjacency to an area / site within the buffer. These areas or sites were discounted from further consideration – this is Harper Green. **It is not clear why a buffer could not be defined around Harperbury Hospital/Haper Green as a settlement.**
- Outside the buffer but adjoining areas or sites located within the buffer. These areas and sites were included for further assessment. In this instance, this was limited to one site extension outside of the buffer.

It is noted in paragraph 4.2.3 that although a "*filtering process to remove weakly performing areas or promoted sites, which were entirely or largely constrained by major policy constraints was undertaken. These policy constraints effective rule out development of the land*" (paragraph 4.3.2 of the Stage 2 GB Report and are listed including Historic Parks and Gardens); Parcel GB31 (SA-S7) land south and west of London Colney is constrained by Historic Parks and Gardens (Figure 4.5) of the Stage 2 GB report, however, the proposed Broad Location B6 West of London Colney appears to lie directly south of the Historic Parks and Garden (the proposed allocation includes land for a 8 FE secondary school site with adjoining HCC land ownership and lies outside the 250 buffer).

It is not clear why some sub-areas have been identified as opposed to others (Figure 4.7) our main concern is the reliance on the Stage 1 report of 2013 which underpins the Stage 2 report and as a result the application of the buffers.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Our objections to SA process are that there is no audit trail of all the reasonable alternative site options considered and the Council's reasons for either including or excluding the sites. In other SA, sites have been appraised against the SA objectives so that a comparison can be made.

Our fundamental objection is that the Stage 1 GB report of 2013 is relied upon and that the Stage 2 report relies on the buffers around settlements which excludes sites which are sustainable. There is no justification for the buffers.

The lack of a SA for the sites results in a less than transparent site selection process results in the fact that there is no clear audit trail of all the reasonable alternative site options considered and the Council's reasons for either including or excluding the sites

Whilst it is acknowledged that the SA findings are not the only factors to be taken into account by a local planning authority when selecting options to take forward in a plan; factors such as public opinion, deliverability and conformity with national policy are also to be taken into account by plan-makers when selecting options for their plan.

As the SA is an integral part of plan preparation, the process needs to be transparent in order for the plan to be justified and found sound as set out in paragraph 35 of the NPPF (2023).

Our objection to the Site Options is that the SA has failed to consider the options for Harper Green, despite submissions which clearly explained that there are two options, and that the scheme could vary between 400 – 1,400 dwellings.

The GB assessment has been constrained by what appears to be arbitrary buffers, this has resulted in only those sub-areas that fell entirely or partially within the settlement buffer, or immediately adjacent to other areas /sites entirely or partially within the settlement buffer being taken forward.

New Site

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

For all these reasons detailed in the supporting statement, our client's site at the former HSBC site is ideally located having regard to environmental/planning designations. It is well placed spatially to meet the identified needs within the plan area. The scale and form of the proposed allocation is compatible with the requirement for a site to come forward relatively quickly in order to address the more pressing short term needs that arise in the plan. The site has also been acknowledged as a sustainable location further reinforcing its merits. An extension to a recently permitted scheme which in turn was found to be acceptable also makes logical planning sense. For all these reasons the Council is invited to engage with ourselves to pursue this allocation option which we believe has significant and overriding merits and benefits worthy of inclusion within the next iteration of the joint plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The amendments essential to make the Local Plan sound can be summarised as follows:

- The need to revise the level of housing provision within a more appropriate plan period, thereby ensuring the emerging plan is consistent with the Government's planning advice and policy.
- The Local Plan should cover the period April 2023 to March 2042 (An increase of 2 ½ years from the current Plan period (October 2024 to March 2041).
- Provision should be made for at least 16,815 dwellings in St Albans City and District during a revised plan period (April 2023 to March 2042) (887dpa).

- The sources of supply must be based upon known information at the base date and be supported by robust proportionate evidence to justify the expectations of delivery.
- The Local Plan applies an inconsistent approach to the treatment of previously developed land in the Green Belt. The land at the former HSBC Training Centre (now known as Hanstead Park) should be inset from the Green Belt (reflecting the approach on other sites) with sections yet to be redeveloped earmarked as further housing allocations for circa 60 additional dwellings.
- Land within the wider confirmed previously developed zones but awaiting redevelopment should be included as allocations for approximately 60 dwellings 13.

**Type:**

* Site

**Number:**

New site - Land at Pipers Lane, Harpenden

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

5.1 This Section of our representations describes the [Land at Pipers Lane, Harpenden]'s characteristics and considers its sustainability and deliverability for residential development.

**Site Characteristics**

5.2 It is an irregular shape, measuring c.8.7ha with a gentle topography entailing a gentle rise from west

to east.

5.3 The Site contains several small outbuildings associated with its use as grazing land concentrated on

the boundaries. Fencing and landscaping demarcates the Site's boundaries. The Site is otherwise generally featureless.

5.4 It is located on the south-eastern edge of Harpenden, with the Site's western boundary commensurate with existing residential development. The eastern boundary follows Pipers Lane. Mature landscaping provided along the other boundaries mean that the Site is subject to a relatively large degree of containment.

5.5 An aerial view of the Site is provided below as Figure 1 [see attached file].

5.6 The adjoining residential development to the west / north-west is second half 20th century development, suburban in character, predominantly two-storey. To the east of the Site is existing development which is more rural in character: sporadic residential development along Pipers Lane including more isolated dwellings and farms. This edge-of-settlement Site has urban fringe characteristics.

5.7 Other nearby uses include golf course to the east and north-west of the Site; and Aldwickbury School c.500m to the west.

5.8 A Site Location Plan showing the Site and its immediate context is provided below as Figure 2 [see attached file].

5.9 There are bus stops in proximity to the Site, along Wheathampstead Road / Meadway and Long Buftlers, from which services into Harpenden town centre are available.

5.10 In terms of potential constraints to development, the Site is entirely within Flood Zone 1 – land least at risk of flooding from tidal or fluvial sources.

5.11 Additionally, the Site is not subject to any ecological or other environmental designations which might render it unsuitable for development. On the contrary, given the Site is currently used for grazing, the ecological value is likely to be low and its development would give rise for opportunities for ecological enhancements.

5.12 Whilst there are neighbouring heritage assets, the setting of which would need to be accounted for in consideration of detailed design and layout of any development, the Site itself is not within or near to a Conservation Area and does not contain any Listed Buildings or other heritage assets.

5.13 The Site is not considered of any particular landscape value, and not a valued landscape as per paragraph 180 of the NPPF.

5.14 It is not subject to any ecological or other environmental designations considered significant for the purposes of assessing its suitability for residential allocation.

5.15 The Site forms most of the land referenced WH12 in the Council's Call for Sites; and WH-04-21 in the Council's Housing and Economic Land Availability Assessment (HELAA) (2021/22).

**Suitability and Sustainability for Residential Development**

5.16 As discussed above, the Site is located on the edge of the existing settlement of Harpenden.

5.17 As the DLP recognises, Harpenden is one of the most sustainable settlements in the District to accommodate additional growth.

5.18 The Site represents a logical extension to the settlement, on land that is not subject to any significant environmental, ecological, landscape or heritage constraints.

5.19 The Site has urban fringe characteristics and additionally is subject to a significant degree of visual containment. Its development would not give rise to concerns regarding urban sprawl or further encroachment into the countryside.

5.20 Facilities and services within proximity to the Site include an infant and nursery school; allotments; local footsore; and playground. Existing bus services would enable future residents to access the town centre via public transport in under 20 minutes.

5.21 It is of a size through which a variety of different house type can be provided, meeting a variety of housing needs, including by making a meaningful affordable housing contribution. New residents on the site would engender economic benefits to the area through increased spending in the local area. The development of the Site would help support the vitality of Harpenden and to sustain it as a vibrant community.

5.22 The principal constraint to the Site's development is its current designation in the Development Plan as Green Belt – a policy constraint.

5.23 As noted within Section 3 of this representation, it is evident that exceptional circumstances existing at the District level which justify alterations to the Green Belt boundary through preparation of a new Local Plan.

5.24 At the site-specific level, and whilst ***Calverton*** does not provide an exhaustive list of matters which may constitute exceptional circumstances justifying removal of land from the Green Belt (as confirmed by ***Compton***) it does provide matters pertinent to the issue of the Site.

5.25 Specifically, given that development needs at the District level cannot be sustainably met without impinging on the Green Belt, the nature and extent of harm that development of the Site would

cause; and the extent to which such harm could be mitigated are both of particular relevance.

5.26 In terms of the extent of harm to the Green Belt, as already noted, the Site is subject to a relatively high degree of containment, with impacts of development likely to be localised. The Site adjoins existing suburban residential development, and has urban fringe characteristics. Piper Lane would provide a robust boundary between the Site and the countryside beyond, and one with significant permanence. Consequently, any concerns regarding unrestricted urban sprawl would be limited, and a new defensible boundary that would be created would ensure the countryside is protected from future encroachment

5.27 The Site is neither of any significance in terms of preventing coalescence (or the perception of coalescence) between towns, nor in preserving the historic character of an historic town.

5.28 Development of the Site's impact on encouraging recycling of derelict and other urban land would

be no different from any other Green Belt site that may be developed, and unlikely to have any material impact in any case, given the extent of housing needs in the District.

5.29 Consequently, the Site is not considered to make a significant contribution to the purposes of the Green Belt. If allocated the Site was allocated for development, the Green Belt would continue to perform its strategic purposes.

5.30 There are opportunities to incorporate measures that may mitigate such harm as there would be to the purposes of the Green Belt, including through provision of significant additional landscaping. The Site's development also gives rise to opportunities to provide compensatory improvements, such as those set out within the PPG[11]. Such measures could include, for example, enhanced walking and cycling routes, as well as ecological enhancements.

6.1 There are a number of elements of the DLP's evidence base relevant to consideration of the Site, as

discussed in turn below.

**HELAA**

6.2 The Site was considered by the Council as a potential residential allocation as site reference WH-04-

21 through the Housing and Economic Land Availability Assessment (2021) ('the HELAA').

6.3 In respect of the Site's suitability for residential development, the HELAA concluded:

***"At this initial stage, the site is considered to be potentially suitable subject to absolute and non-absolute constraints being reasonably mitigated. Evidence base work, including a Green Belt Review, is underway and may change the site suitability in the future"***

6.4 Given the lack of constraints to development of the Site, as noted in Section 5 of this representation, the key issue appears to have been the Green Belt Review.

**Green Belt Review**

6.5 The Council has prepared a Stage 2 Green Belt Review (June 2023) ('the GBR 2023'). This utilised the findings of the Green Belt Review Purposes Assessment (2013) which acts as a Part 1 to the GBR 2023.

6.6 The Site forms a significant part of the parcel of land assessed by the GBR 2023 as site SA-37.

6.7 The GBR 2023 claims that sub area SA-37 performs strongly in relation to Green Belt purposes. It is one of 113 out of 182 sub areas found to do so.

6.8 In reaching this conclusion, the GBR 2023 found that sub area SA-37:

- strongly meets the criteria in respect of Purpose 1 (check the unrestricted sprawl of the large built-up areas);
- meets criteria in respect of Purpose 2 (prevent neighbouring towns from merging);
- strongly meets the criteria in relation to Purpose 3 (assist in safeguarding the countryside from encroachment); and
- does not meet the criteria in relation to Purpose 4 (preserve the setting and special character of historic towns).

6.9 In respect of GBR 2023's conclusions vis-à-vis the Site and contribution to Purpose 1 and 3 of the

Green Belt, the GBR 2023 does not appear to have had regard to factors such as the Site's relationship with the existing settlement boundary and other nearby development, the urban fringe characteristics of the Site, the degree of containment to which it is subject, or the fact that landscape and visual impacts are likely to be localised rather than wide ranging.

6.10 Once the above factors are appropriately accounted for, the Site evidently does not make as important a contribution to the Purpose 1 or Purpose 3 of the Green Belt as the GBR 2023 suggests.

6.11 Similarly, whilst the GBR 2023 suggests the sub area contributes to preventing the merging of towns, given the scale of the Site, the distance to the nearest neighbouring settlement, and, again, the degree of containment the Site is subject, the Site cannot feasibly be said to assist in

preventing the merging of settlements. Indeed, it is well placed to accommodate development in a manner that neither engenders coalescence of even perception of coalescence, given its characteristics and the distance to the next settlement.

6.12 It is considered that GBR 2023 has overstated the importance of sub-area SA-37 to the purposes of the Green Belt, and by extension has overstated the contribution made by the Site.

6.13 The Site has the potential to be developed in a manner that would result in substantially less harm to the Green Belt than the GBR 2023 implies.

6.14 This is of particular importance given other elements of the DLP evidence base appear to rely on the GBR 2023's conclusions in considering the Site, as discussed further below.

**Sustainability Appraisal**

6.15 The Sustainability Appraisal of the DLP ('the SA') does not appraise the Site in detail, but does include a GIS-based analysis of it in its Appendix IV. This is a somewhat simplistic analysis which does not appear to fully capture factors such as: the Site being in proximity to a nursery and infants school; that whilst it is a greenfield site, it is not in arable use; and that it gives rise to potential for, for example, ecological improvements to a site which is currently likely to be of limited ecological value. It does not capture factors such as proximity to bus stops, and the direct access to the town centre these provide.

6.16 Furthermore, it does capture the significant social and economic benefits of a site this size, which is capable of accommodating a range of house types to meet the community's various accommodation needs, including in respect of affordable housing.

6.17 The SA considers (at paragraph 5.4.70) other non-strategic options for growth in Harpenden, which are "*inherently judged to perform poorly on the basis of not being recommended by the Green Belt* ***Review (and on the basis of being non-****strategic)." It goes on to describe Land at Pipers Lane to be one of two 'notable' sites that fall within this category.*

6.18 The wording at paragraph 5.4.70 suggests significant importance has been afforded to the findings of the GBR 2023 in determining whether sites merit further consideration or not. As noted, however, earlier within this section of our representation, the GBR 2023's assessment of the Site (or rather the slightly larger sub area in which it sits) is considered to have overstated its contribution to the purposes of the Green Belt.

6.19 Nevertheless, the SA goes on to describe the Land at Pipers Lane as:

"***perhaps the stand-out larger omission site that is being actively promoted. It is located at the southeast extent of the town, and the proposal is for 220 homes****...****However, the site does not perform well in Green Belt terms and does not stand out as particularly well located in other respects, nor is there are*** *any clear planning gain proposals"*(paragraph 5.4.70).

6.20 The SA does not suggest residential development of the Site would engender any particular negative impacts, rather it implies it simply would not result in any particular positive impacts that 'stand out'. Whilst somewhat unclear what is meant by this, it suggests an absence of any specific reasons for rejecting allocation of the Site other than Green Belt. To reiterate, it is considered that the GBR 2023 has overstated the Site's contribution to the Green Belt and this has clearly distorted the SA's consideration of the Site.

6.21 Whilst evidently a soundness issue in respect of the DLP, it is one that can be readily rectified through reconsideration of the Site through the SA. Such reconsideration should factor in the positive impacts on sustainability objectives noted earlier within this section.

**Local Plan Site Selection Proforma Sheet**

6.22 The Site's suitability for residential development also considered in the Council's Local Plan Site Selection Proforma Sheet, as site reference C-257.

6.23 This Site Constraints Map within this identifies Green Belt as the only constraint that applies directly to the Site, with the setting of nearby Grade II listed buildings also necessary to consider as part of any detailed proposals.

6.24 In the Qualitative Assessment section of the Local Plan Site Selection Proforma Sheet, it reports that the Site was not recommended for further consideration by the GBR 2023, and asserts that the Site is not recommended to progress. However, it is unclear on what basis this conclusion is reached, unless solely on account of the GBR 2023 findings.

6.25 Reference is made to the Site being 1.9km from the nearest primary school. This is incorrect. It is c1km from Grove Infant and Nursery School, a c.17-minute walk, and is a benefit rather than a negative.

6.26 The Qualitative Assessment also notes the Site is located within a landscape conservation area – this designation dates from the 1994 Local Plan and covers a significant area of the District. It should not be confused with a site-specific assessment of a Site's landscape value.

6.27 In terms of the Site's proximity to listed buildings, this is a factor that can be addressed through the layout and design of any development of the Site. It is far from atypical for new development to be located adjacent to a heritage asset, and for the setting of these to be conserved through the development layout, which may, for example, include landscaped buffers.

6.28 It is not considered that the Local Plan Site Selection Proforma Sheet raises any issues that justify rejection of the Site for residential development, with the possible exception of Green Belt. But to repeat, we consider the harm to the Green Belt that would be caused by development of the Site is significantly less than the GBR 2023 implies.

**Overview**

6.29 The DLP's evidence base does not suggest any significant reasons for rejection of the Site, with the exception of its alleged contribution to the purposes of the Green Belt. This appears to be the determinative factor.

6.30 However, the GBR 2023's review of the Site's contribution to Green Belt objectives fails to consider a number of key characteristics in respect of the Site, specifically:

- The boundaries of the Site and the degree of self-containment these provide, ensuring that removal of the Site from the Green Belt would not give rise to risk of unrestricted urban sprawl or further encroachment into the countryside.
- The distance between the Site and any neighbouring settlements, and the lack of contribution towards preventing coalescence of towns the Site could be feasibly said to make.
- The relationship between the Site and adjoining sub-urban residential development, and the resultant urban fringe character of the Site.

6.31 It is considered that the rejection of the Site is not justified, and that in the event the DLP were to be required to find additional sites, the Site would be a sustainable, deliverable and justified option.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The [allocation of Land at Pipers Lane, Harpenden] would help address issues of soundness set out in this representation, and would represent a justified, effective allocation which would be consistent with national policy and help ensure the new Local Plan can be considered positively prepared.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 24-208 TWSL LP Reg19 Pipers Lane - FInal_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We consider it would be of benefit to discuss the potential need for modifications as set out within our representations with the Council, Examining Inspector(s), and other stakeholders in the hearing sessions.

**Number:**

Proposed New Site: Land North of Sandridge

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

[Please see attachment for full submission including Appendices]

**The Site Selection Process**

2.11. Whilst Longbourn supports the Council's site selections, should additional 'omission sites' be required to address any identified shortfalls in housing need, sites should be selected in sustainable locations, where there is low Green Belt harm, and/or where landscape characteristics permit proportionate development – such as at Land North of Sandridge.

**Site Deliverability**

2.12. Land North of Sandridge represents a deliverable prospect being suitable, available and viable) within the early part of the plan period (i.e. years 2024-2029) and offers the opportunity to deliver a high-quality development of up to 150 new homes to contribute towards the district's significant housing needs for all sections of the community, including the provision of market housing, affordable housing, adaptable and older persons housing.

2.13. The following therefore provides a 'high-level' review of the deliverability of Land north of Sandridge.

**Site Suitability**

Access and Highways

2.14. The site is bordered to the west by the B651 (High Street) from which a suitable access point could be created as shown in **Appendix 1**. Pedestrian connectivity is also available via a Public Right of Way (PROW - Hertfordshire Way) which runs adjacent to the south-western edge of the site.

2.15. The B651 is a key distributor road within the local highway network which links Sandridge with the centre of St Albans approx. 2.5 miles / 4km to the south. In terms of sustainable modes of transport, the 'Langley Grove' Bus Stop is situated on the High Street immediately to the west of the site and which provides regular services to St Albans. The centre of St Albans is also just an 11min cycle ride from the site, highlighting the site's sustainability credentials. Moreover, the site is located within a 5min walk of the centre of Sandridge and the local Primary School (Sandridge School).

2.16. The enclosed Transport Note (**Appendix 1**) confirms that a suitable vehicular access point can be created in the form of a simple priority junction at the B651 High Street, which is appropriate to accommodate the proposed scale of the development. Taken together, the potential development of the site is considered to accord with the transport aims and polices of the SADC Draft Local Plan which requires new developments to:

1. Be located in areas that enable active and or sustainable transport journeys;
2. Support a reduction in car journeys by facilitating connections and improvements to the existing rights of way, walking and cycling networks in order to facilitate active and sustainable travel; and
3. Avoid the creation of highway safety problems or cause unacceptable impacts upon the transport network.

Landscape & Townscape

2.17. The site is not located within an area designated for its landscape value. Existing built form ispresent to the south and west of the site which also separates the site from the Sandridge Conservation Area. Accordingly, the local landscape and surrounding townscape setting is not considered to be particularly sensitive to change.

2.18. Furthermore, the Woodland Trust has recently completed a significant tree planting programme as part of the new Heartwood Forest initiative. The new forest already extends to the northern boundary of the site and effectively encloses the site, providing a new physical boundary between Sandridge to the south and the countryside to the north.

2.19. The proposed concept plan (**Appendix 2**) for the site evidently demonstrates that Land North of Sandridge is capable of accommodating a robust landscape-led development which is sensitive to, and contributes positively towards, its local character.

Flood Risk

2.20. The site is located within Flood Zone 1 (lowest risk of flooding) as defined by the Environment Agency and is therefore sequentially preferable and considered suitable in principle for residential development in flood risk terms.

2.21. Notwithstanding this, any future planning application at this site would be supported by a site-specific flood risk assessment and surface water drainage strategy, incorporating Sustainable Urban Drainage Systems (SUDS).

Ecology

2.22. The site is not subject to any statutory environmental / ecological designations, the nearest being the 'Wheathampstead Development Centre' Local Nature Reserve approx. 2.2k to the north. The site comprises vacant (managed) arable agricultural land and therefore is of limited ecological value.

2.23. The new Heartwood Forest extends to the northern boundary of the site. The new forest will, when matured, provide a rich wildlife habitat.

2.24. There are no ecological constraints at this site restricting future development and the current agricultural use of the site is of low ecological value as confirmed within the enclosed Preliminary Ecological Appraisal (**Appendix 3**).

2.25. The potential development of the site will however provide the opportunity to introduce enhanced wildlife habitats and ecological corridors through the site to link with the new Heartwood Forest to the north and improve the function of the site as part of a wider Green Infrastructure network. Accordingly, the enclosed Biodiversity Net Gain Assessment (**Appendix 4**) confirms that minimum 10% net gains are achievable at the site through the implementation of the following onsite enhancement strategy:

- Planting of new, species-rich native hedgerow along the northern boundary of the site to buffer the woodland;
- Incorporation of other neutral grassland within the public open space;
- Providing a multifunctional approach to blue and green infrastructure, maximising opportunities for nature as part of the SUDS strategy;
- Planting of a traditional orchard.
- Heritage

2.26. The site is not designated as a Conservation Area or Area of Archaeological Potential, does not contain any Listed Buildings or Scheduled Monuments and does not form part of the setting of any heritage assets.

2.27. The Sandridge Conservation Area (which contains a number of Listed Buildings) is located approx. 80m to the south, however the Conservation Area is separated visually and physically by the existing residential estates along Langley Grove. Accordingly, the site is not constrained by any heritage assets.

Social Infrastructure and Sustainability

2.28. The Regulation 19 SADC Local Plan identifies Sandridge as falling within a 6th Tier (out of 7 Tiers) settlement within the hierarchy, being one of the District's 'Green Belt Settlements'. Other such villages identified within this tier include Annables, Kimsbourne Green, Colney Heath, Folly Fields, Gustard Wood, Lea Valley Estate, Radlett Road, Frogmore, Sleapshyde and Smallford.

2.29. However, Sandridge is well served by a range of shops, community facilities (e.g. village hall and playing fields), retail and employment space, Public Houses, a Primary School and public transport services. Sandridge is therefore considered to be more comparable to the District's 5th Tier settlements such as Bricket Wood and Chiswell Green than to the other Green Belt settlements which generally offer very little by way of public services and facilities.

2.30. Moreover, the proximity of St Albans City Centre (just 2.5 miles / 4km to the south) is also considered to be a significant factor contributing towards the sustainability of Sandridge as a suitable location to support growth given the travel distances involved and the ability to utilise sustainable modes of transport. Accordingly, it is considered that Sandridge should be viewed as an intrinsically sustainable location capable of contributing towards the growth of the wider St Albans City area should additional 'omission sites' be required to make up any identified shortfalls.

Overall Site Suitability

2.31. The above highlights the opportunity presented by the site to contribute towards the District's housing needs and demonstrates that there are no insurmountable physical, environmental or technical constraints precluding the development of land north of Sandridge. The site therefore presents a key opportunity to deliver the District's spatial and sustainable development objectives over the next Plan period.

**Site Availability**

2.32. The site is under single ownership and comprises managed arable agricultural land on the northern edge of Sandridge. There are no legal constraints to the availability of the land for development.

2.33. The landowner is willing to make the site available for development and is actively promoting the site through the emerging Local Plan and engaging with local stakeholders as part of this process.

2.34. It is therefore anticipated that subject to the removal of the Green Belt designation, that the site will be available for development in the early part of the new Local Plan period.

**Site Viability**

2.35. The site comprises managed arable agricultural land (i.e. 'Greenfield' land) and accordingly it is not anticipated that there will be any abnormal costs associated with the development of this site as may be expected on previously developed ('Brownfield') land.

2.36. As such, it is to be acknowledged that the site is wholly capable of delivering the Council's policies, particularly with regards to Affordable Housing provision.

**Conclusions**

- The site is suitable for residential development with no insurmountable environmental, technical or social infrastructure constraints;
- The site is located within a sustainable location, suitable to accommodate new development;
- The site is available for development now and is being actively promoted by a willing landowner;
- Residential development is confirmed to be a viable opportunity at this site; and
- The enclosed Illustrative Masterplan (**Appendix 5**) represents a deliverable, sympathetic and sustainable vision for the site for up to 150 high-quality new homes and for the purposes of preparing the new Local Plan, the site should be treated as a deliverable source of housing land with an expectation of completions achievable in the early part of the new plan period, subject to the removal of the Green Belt designation.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

[Please see attachment for full submission including Appendices]

**327 - Gary lees**

Submission Number: 327 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Tom Beardsmore

On Behalf Of Company/Organisation: Clowes Developments Name: Gary lees

Comment Number: 3

**Type:**

* Site

**Number:**

New site

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

These submissions to the Regulation 19 Draft Local Plan consultation are made on behalf of Clowes Developments who has an interest in circa 74 hectares of land either side of the M25 motorway west of Junction 21a, the northern parcel lying south of Noke Lane, Chiswell Green and the southern parcel lying west of Bricket Wood. The land parcels are identified on the enclosed site location plan.

**Chapter 1 Spatial Strategy**

It is contended that the draft plan fails all four tests of soundness in not giving sufficient consideration to plan for more homes or more employment floorspace, given the clear evidence of increased needs for both of these in St Albans and across the South West Hertfordshire Market Area (HMA).

Housing Need

Whilst the draft plan is seeking to provide for the Standard Method housing figure, it should be noted that:

1. This is a capped figure, and thus below actual housing need;
2. There is a very high, local affordable housing need; and
3. There is unmet need from neighbouring authorities in the Housing Market Area.

The Sustainability Appraisal (SA) notes that the PPG states: "*Where the minimum annual local housing need figure is subject to a cap, consideration can still be given to whether a higher level of need could realistically be delivered*". The uncapped housing need figure is 1,165 dpa and would result in the need to allocate land for a further 4,709 dwellings.

The SA also acknowledges that the PPG states: "*An increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes.*" The Local Housing Needs Assessment (LHNA, 2024) identifies a need for 449 affordable homes to rent per annum plus a need for 353 per annum affordable home ownership, a total affordable housing need over the plan period of 13,233 dwellings. There is thus a desperate affordable housing need that planning for additional homes would help alleviate.

The Duty to Cooperate (DtC) requires strategic policy-making authorities to cooperate with each other, and other bodies, when preparing policies which address strategic matters (such as meeting housing needs) and to produce Statements of Common Ground (SoCG). The SoCG published alongside this Regulation 19 consultation is unsigned, but identifies that an approach to accommodating unmet housing needs that may exist within the wider Housing Market Area is a Strategic Matter to be addressed. Given the decision of Three Rivers to not proceed with their new local plan, there exists significant unmet need across the HMA. There is no evidence of any 'effective' joint work to address this strategic issue; just noting this issue in the SoCG fails to meet the DtC requirement of engaging effectively.

Whilst the SA acknowledges there are implications for the matter of planning for unmet need across the sub-region as a consequence of the proposed changes to the NPPF (including a 75% increase on the present standard method calculation for St Albans), this is also evidentially the case under the existing NPPF as well.

The SA does not consider a growth option higher than 12% above the (capped) standard method requirement. In light of the actual housing and affordable housing needs in St Albans being substantially higher than the standard method figure, it is a failure of the SA to not test a higher growth option as a reasonable alternative.

NPPF paragraph 61 sets out circumstances where a figure higher than the standard method might be justified; not only does the plan fail to respond positively to these and also fails to take account of unmet need from elsewhere in the HMA, the plan's housing figure also fails to provide for an appropriate flexibility allowance. This should be at least 10% of the standard method figure to allow for potential non-delivery and ensure the quantum of housing being planned for is actually delivered over the plan period.

Plan period: it would be confusing for monitoring purposes to have a plan that does not start and end at the same point in the year. 31st March is an accepted start and finish point and it would therefore be logical for this local plan to start at 31st March 2024.

Employment Need

The SA is quite dismissive of testing a higher growth strategy with increased employment land on the basis that 'none of the sites in question would deliver new employment land'. The northern parcel of the land as identified on the attached site location plan is subject to a Planning Performance Agreement with the City Council to consider the merits of the site to deliver a new stadium for St Albans City Football Club along with enabling development. The principle of a new stadium for the football club is supported by the New Local Plan at Policy COM5. One of the enabling development options being considered is employment. The site has been put forward for consideration as a potential employment site and the HELAA 2021/22 Report Annex 17 Employment includes this site as STS 19-21. There then appears to be no further assessment of the site for employment purposes as part of the plan making process.

The South West Herts Economic Study (SWHES) 2024 identifies a need for just 1.5 ha of industrial and storage & distribution land within St Albans over a 20-year period. However, Savills has considered this study and do not agree with its findings on the following grounds:

The SWHES sets out a range of demand estimation methods and identifies the Net Absorption method as its preferred. This scenario relies in part on elements of the Savills demand estimation method outlined in the "Levelling Up – The Logic of Logistics" report prepared for the BPF. Savills consider this estimation method the strongest because it is based directly on market indicators.

The three other estimation methods (past completions, labour demand and labour supply) have significant limitations which typically result in inaccurate estimates of future land demand, particularly in the Industrial and Logistics (I&L) sector. These methods have no direct relationship to market realities and the growth drivers that support demand.

Whilst the fact that the SWHES has stated a preference for the Net Absorption method for estimating need is welcome, it has not been applied entirely correctly or to its fullest. There are several reasons why the estimation method falls short. It does not take account of current and future growth drivers that will continue to underpin I&L demand such as online retailing and housing growth. Also, given St. Albans proximity to Greater London, and its excellent transport infrastructure, it doesn't account for how new I&L floorspace in St Albans could help to address the loss of land in Greater London. Finally, the plot ratios uses in the SWHES are too high at 40%. From Savills' experience, a plot ratio of around 35% is more reflective of modern I&L occupier requirements.

Based on Savills' own demand methodology, apportioning FEMA down to St Albans results in demand for between 43 ha and 71 ha of land over a 20-year period. This is a significantly higher demand requirement than that estimated in the SWHES. I consider Savills' demand estimates

demonstrate that the Council has not allocated enough of the right land for I&L uses, and that quantitatively a strong needs case can be made for further I&L development in the FEMA and St Albans specifically. The Subject Site will help to meet this demand.

Although the Council has allocated two large sites for employment, neither is fully oriented towards meeting the Council's need for new I&L premises. The East Hemel Hempstead draft allocation is located in the Herts Innovation Quarter and primarily oriented towards office and R&D activities. The SRFI is nationally significant infrastructure and its capacity to meet local or even sub-regional need is limited. The Subject Site is uniquely positioned to provide St Albans and the sub-region with highly deliverable, strategically located Class A I&L premises.

Whilst the study confirms that hyperscale data centres fall outside of its scope, it does recognise that Herts is an attractive location for these uses and that the development of data centres is now established as critical national infrastructure, with the evidence demonstrating there is significant demand for large scale centres and that this should be expected to continue to increase.

Notwithstanding the plan will not be assessed against the new version of the NPPF, and thus does not need to identify strategic sites for data centre uses as proposed in the NPPF changes to paragraphs 84 & 85, the ministerial statement of Chris Bryant MP of 12th September 2024 is now government policy that plan will need to have regard to. This statement confirms UK Data Infrastructure, including data centres, as Critical National Infrastructure. The statement also confirms the government's commitment to explore further how to ensure the right conditions are in place to drive necessary capacity expansion to support economic growth and innovation. The plan does not provide any policies or proposals to assist in ensuring data centre demand – which is known to be high in Hertfordshire – is provided for or to assist in directing such uses to appropriate locations.

The SA in support of the Reg 19 draft local plan fails to consider any reasonable alternatives in relation to employment growth – including the northern parcel of the subject site that has been put forward for employment development. It is also noted that employment levels actually decreased in St Albans between 2015 and 2021, an alarming statistic that points to an unsustainable, aging population and one that requires a local plan to plan positively to meet the needs of younger generations by providing the homes and jobs to enable them to stay and prosper in the District.

For all the above reasons, the Spatial Strategy of the draft Plan fails the Duty to Cooperate and all four tests of soundness.

**Chapter 3 – Sustainable Use of Land and Green Belt**

The Green Belt Review appears to have been determinative in the allocation of sites for development as part of the Regulation 19 draft local plan. It is contended that the Green Belt Review, Parts 1 & 2, are flawed for the following reasons.

The Green Belt Review Part 1 is an assessment of GB purposes at a high level dating from 2013, used in support of the previous, now withdrawn draft local plan. Our objections then remain the same now, particularly with regard to the parcel north of the M25, the table below providing a summary of likely impacts on Green Belt purposes:

***Table 1: Summary of likely impacts on Green Belt purposes [see attached file]***

The 2023 Green Belt Review Part 2 by Arup provides a more granular assessment of sites and locations. This review is based on the application of buffers of 250m and 400m from existing built form as the key factors informing the consideration of sites. Indeed, the Part 2 report states at 4.2.1 "*Sites that were not adjacent to existing urban areas (or the buffers) were thus excluded for the assessment on the basis that their release would (a) not contribute to a sustainable pattern of development; and (b) undermine the integrity of the Green Belt by creating hole(s) within its fabric*". This arbitrary approach without proper regard to Green Belt openness or purposes has thus unfairly constrained the site selection process.

The assessment of land parcels against the five Green Belt purposes is also questioned, particularly with regard to my client's land interests at parcels SA-137 and SA-160. GB purpose 2 is to prevent neighbouring towns from merging, but as Chiswell Green and Bricket Wood are not towns, it is difficult to understand how SA-137 and SA-160 preform so poorly. In respect of GB purpose 3 to assist in safeguarding the countryside from encroachment, parcel SA-160 is both physically and visually constrained by the M25 and M1 motorways, yet the score in the report is the most harmful. Whilst the western part of parcel SA-137 is considered to perform poorly, the eastern part is not (as noted above in respect of comments submitted to the Part 1 review). These are just a few examples of questionable scoring.

As a consequence, the Green Belt Review is considered to fail the justified and effective tests of soundness.

### 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 22

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Paragraph 35 and 36 of the 2023 NPPF require that local plans be effective to be considered sound. To do so its policies must be deliverable over the plan period and dealt with rather than deferred.

Policy, both in Part A and Part B, refers to sites 'supporting' and 'contributing to' their required transport infrastructure mitigation. For example, strategic policy SP14 at Part A requires proposals for development to 'provide, finance and / or contribute' to infrastructure and allocation B1 at Part B requires that the site deliver 'Contributions / enhancements to support relevant schemes'. Policy

therefore rightly requires that mitigation be made, and HCC supports the intention of the plan to ensure mitigation is made. However it leaves issues of the delivery mechanism and timing to the decision-maker. This specific allocation is only taken as an example, and the same principle applies to all allocations.

NPPF paragraphs 108, 109, and 100 govern how LPAs must consider sustainable transport provision in plan-making. Paragraph 108 sets a number of objectives including ensuring impacts on the network are addressed and pursuing opportunities to maximise active and public transport. The 2024 draft consultation NPPF further requires a vision led approach at paragraphs at paragraph 122.

To achieve this, the infrastructure required to achieve shift towards active and sustainable modes of transport must be provided by default prior to the first occupation. To do otherwise risks unsustainable behaviours being embedded prior to infrastructure being delivered and take-up therefore being lower than that is needed to make development acceptable a decision-making stage. Policy TRA1 requires that on major development 'Active and sustainable connections to key destinations are deliverable at an early stage of development'. However, policy on infrastructure delivery does not dovetail with this requirement and therefore risks undermining this in practice. As stated above, policy is agnostic on delivery of financial contribution via a s106 agreement or CIL (if adopted) or directly via a s278 agreement. It is unlikely however that delivery of transport infrastructure via a financial contribution, even if sufficient to pay for infrastructure, can deliver infrastructure in sufficient time. Instead, this issue is deferred to development management stage.

Therefore for the aspirations of the plan to be considered deliverable and therefore sound the plan should take a more proactive approach to the delivery mechanism of infrastructure so that the aspirations of policy TRA1 are delivered.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To be considered sound the plan should:

1. Amend policy IMP1 at Part A to ensure that proposals demonstrate how transport schemes required to make sites sustainable will be delivered;
2. Amend policy in the site allocations at Part B to refer to delivery of infrastructure rather than just contributions; and
3. Amend the Infrastructure Impact Assessments to refer to delivery of infrastructure rather than just contributions;

Firstly, policy TRA1 should be strengthened to ensure that transport infrastructure will be delivered in the real world rather than be merely deliverable in the abstract. Demonstrating deliverability in the abstract is not a sufficiently robust test as applicants would not have to demonstrate that the delivery mechanism, as well as the scheme itself, ensures delivery at an early stage of development.

*Major proposals must demonstrate as appropriate how...Active and sustainable connections to key destinations [deleted text] will be delivered at an early stage of development;*

Similarly, policy TRA3 should be amended along similar lines to ensure that infrastructure is delivered in practice for proposals generating heavy goods vehicle movements:

Encourage and enable Heavy Goods Vehicles to use the primary route network by means of signing and traffic management.

Secondly, the policy wording in the site allocations at Part B should be amended to give support to delivery of infrastructure (irrespective of the delivery mechanism) rather than wording that implies making a financial contribution that may be incapable of being secured, spent, and delivered early in the development.

For example, at allocation B1 (taken as an example only):

Contributions / [deleted text]to delivery of support relevant schemes in the LCWIP and GTPs as indicated in the TIA.

[deleted text]Improvements via delivery or contributions to the transport network (including walking and cycling links) and public transport services upgrades / improvements, including off-site improvements to Harpenden Road, Sandridgebury Lane, Valley Road, Ancient Briton junction and King William IV junction, links to St Albans City Centre, station and education, aligned to schemes in the GTPs and LCWIP.

Similar wording appears in all the allocations and should be amended along the lines of the above.

Finally, the TIAs should be amended on similar lines, again taking allocation B1 as an example:

5. Settlement Strategy – St Albans (Indicative Contributions)

This site will make significant contributions or direct delivery of infrastructure to

St Albans Settlement Strategy.

Taken together, these amendments would ensure that both the scheme and the delivery mechanism align to provide infrastructure early in the build out of development, thereby enabling sustainable travel behaviours and mode shift in line with the NPPF sustainable development objective

**Number:**

New Site

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Introduction**

This Representation Statement has been prepared by Knight Frank LLP (hereinafter 'Knight Frank') on behalf of TT Group (hereinafter 'our Client'). This Statement has been submitted in response to St Albans City & District Council's Regulation 19 Consultation on the Draft Local Plan (hereinafter 'Draft Local Plan'). We previously engaged on behalf of our Client in the previous consultation on the Regulation 18 Draft of the Local Plan.

Within this Representation we make various points in respect of concerns relating to the following policies / components of the Draft Local Plan:

- Part B Site Allocations – we remain concerned that housing capacity, particularly in urban areas has not been robustly assessed and chiefly that brownfield sites such as our Client's Marlborough House 'site' are not recognised as a site opportunity.
- Policies LG4, HOU1 and HOU2 need to make greater provision for restrictive urban sites where larger format homes will be difficult to achieve and higher density format living should be acceptable to maximise residential supply in suitable locations.
- Policies EM1, EMP3 and SP5 are not supported by up to date evidence particularly in relation to post Covid 19 office market trends and the very real prospect of vacant office buildings no longer being suitable or viable for commercial office occupation.
- Policy DES6, we also include commentary from specialist Heritage and Townscape advisors which questions the approach taken on Building Height.

**TT Group**

TT Group is one of the UK's largest, privately owned property investment and development firms. Over the last 25 years, TT Group have completed some of the largest, complex UK property deals. TT Group have a portfolio of over 15,000 properties spanning 85millionsq.ft., along with a development pipeline of more than 14,500 homes.

TT Group has land interests within St Albans City and District Council, including its ownership of Marlborough House, 16 – 20 Upper Marlborough Road, AL1 3UT, which will be influenced by those policies and allocations contained within the Draft Local Plan.

TT Group welcomes the preparation of the Draft Local Plan, noting that the policies contained within the current adopted Plan (1994) are extremely outdated and do not accurately reflect current circumstances.

**Marlborough House**

TT Group control the property known as Marlborough House, 16 – 20 Upper Marlborough Road, AL1 3UT. The property was formerly operating as office accommodation but has been vacant since 2022.

Our Client has been involved in planning negotiations with St Albans City & Dictrict Council (SACDC) since 2021. Several positive pre application meetings have taken place with SACDC and the principle of residential redevelopment of the site has been received favourably.

Most recently a Planning Application (Ref. 5/2022/2558) sought the following for the site:

*"Demolition of existing building and construction of two residential buildings (Use Class C3) ranging from five to seven storeys in height consisting of 88 residential flats with alterations to existing access, underground parking, landscaping and other associated works."*

On 04 November 2024, with a recommendation for 'approval' from Planning Officers, the Planning Application was 'refused' planning permission based on heritage impacts resulting from design, scale and massing. At the time of writing these representations, a formal 'decision notice' has not been received, however, the Development Management Committee, in its final verbal determination, did not take issue with the intended residential use or the loss of office use. As such we remain confident that a residential solution remains achievable for this Site which can make a meaningful contribution towards housing deliver within the urban area of St Albans.

Given the prospect of an ongoing engagement in relation to this site, TT Group wishes to ensure that the Draft Local Plan, which will shape future development across district, is robust, flexible, and capable of responding to future economic and demographic changes.

**The Site**

As noted, our Client has land interests within St Albans, including Marlborough House, which will be affected by those policies and allocations included within the Draft Local Plan.

Marlborough House was originally constructed in the 1960's and comprises 4,130sq.m (GIA) of office accommodation. Marlborough House was most recently occupied by AECOM who vacated the property in March 2022.

The Site has been vacant since March 2022, with the office accommodation provided at Marlborough House considered to be dated and not to meet current market requirements. For example, Marlborough House has an Energy Performance Certificate of 'E'. As such, the existing office accommodation provided at Marlborough House does not currently meet the modern requirements of occupiers and would require substantial refurbishment to meet modern requirements, including the Government's Energy Performance Certificate requirements for non-residential buildings.

Our Client acquired the Site in 2021 and has since explored various options for bringing the site back into a viable use – including exploring the delivery of high-quality residential accommodation given the Site's highly sustainable location. The delivery of high quality residential accommodate at the Site would represent the effective and efficient use of the highly sustainable previously developed site.

Our Client submitted a Full Planning Application for the construction of two residential buildings comprising 88 flats in October 2022. This Application was subsequently reviewed and revised down to 76 flats across two blocks of five storeys with the revised Application recommended for approval by Officers.

Part B Site Allocations – we remain concerned that housing capacity, particularly in urban areas has not been robustly assessed and chiefly that brownfield sites such as our Client's Marlborough House 'site' are not recognised as a site opportunity.

We have made various references within these representations to the fact that our Client's site is not considered as a Site Allocation. We accept that a Call for Sites and Housing and Economic Land Availability Assessment 2021/22 have been undertaken and form part of the Evidence Base

for the Draft Local Plan. However, it would seem that SACDC updated this evidence base to include Council owned car park sites at a later stage. This included the following sites located in very close proximity to our Client's Marlborough House Site:

- Civic Close Car Park, Bricket Road – indicative capacity for 57 units with site area 0.45ha
- Car Park to rear of 32-34 Upper Marlborough Road – indicative capacity for 16 units with site area 0.22ha

Our Client's Site is a very similar type of site, located in close proximity to both these sites in an otherwise build up urban location with a mix of landuses.

It is incongruous that additional Council owned sites were added to the urban capacity analysis and have now been allocated in the Draft Plan without further canvassing for other similar urban sites. This would seem to be a fundamental flaw in preparing the Local Plan particularly where housing need and housing land supply is such an acute challenge for SACDC to address.

We have maintained throughout these representations that we would welcome the opportunity to allocate the Marlborough House site to help contribute towards meeting housing need in the City.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusions**

Our Client welcomes the preparation of the St Albans' new Local Plan, noting that those policies contained in the current adopted Local Plan (1994) are extremely outdated and do not accurately reflect current circumstances.

Our Client broadly supports the aspirations of the Plan, particularly that of prioritising residential development on previously developed sites, and ensuring the efficient use of such land in order to meet the significant housing need within the district. Our Client agrees this represents a sensible and effective way of providing much needed new homes in highly sustainable locations across the district which is otherwise constrained by Green Belt.

Nevertheless, our Client has significant concerns regarding specific policies of the Draft Local Plan. Most notably, our Client raises key concerns with the failure of the Draft Local Plan to identify Marlborough House as a site for future residential development. As discussed throughout this representation, Marlborough House represents an underutilised, highly accessible previously developed site, the comprehensive redevelopment of which to provide residential units would make a significant contribution towards meeting housing need within SACDC.

Furthermore, our Client contends that the Draft Local Plan are not legally sound and do not comply with the NPPF. Our Client has therefore made a number of recommendations, which if adopted would ensure consistency across the Draft Local Plan. Notably, our Client strongly contends that those policies within the Draft Local Plan must be sufficiently flexible in order to maximise the chances of meeting the significant housing need within the district. Failure to do so risks the Draft Local Plan stifling opportunities to meet housing need through the effective and efficient use of the highly sustainable brownfield sites.

Overall, it is concluded that in its current form the Draft Local Plan has areas of inconsistency, is not justified with appropriate evidence and is therefore at risk of not be legally compliant, and it is suggested that the Council take further review. We look forward to engaging further in the preparation of the St Albans Local Plan 2041.

PROMOTION SITE – REDBOURN FARM
Introduction
Previous representations have been made on behalf of Higgins Group on SACDC's Call for Sites consultation, which took place in March 2021.
This section provides further details of the site to demonstrate that it is a) suitable for release from the Green Belt, and b) deliverable in the short term as a housing site. Higgins Group has acquired the site with a view to providing a high-quality housing development that will provide both market and affordable housing, both of which will significantly contribute to SACDC's housing supply without negatively impacting on designated areas.
Site location
The Site is located north of Redbourn between Dunstable Road to the east and the M1 motorway to the west and is bound to the north by Redding Lane. It comprises roughly 53 acres of open land and is predominantly surrounded to the north, south and west by open fields.

The Site is designated as Green Belt and the Proposals Map associated with the 1994 District Local Plan Review shows the site within a Landscape Development Area (noting that the associated Policy 105 Landscape Development and Improvement within the District Local Plan Review has been revoked). There are no other designations relevant to the Site.
There is no relevant planning history for the Site readily available on SACDC's online planning register.

See appendix 1 for more information

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**LAND TO THE SOUTH OF LYE LANE**

**Site Description**

The Site (see **Appendix 1**) lies to the southeast of the junction where the M25 intercepts the North Orbital Road. The Site forms a 'U' shape, abutting the North Orbital Road to the west, M25 to the south and Lye Lane to the east.

Within the middle of the land parcel, outside the red line for the Site, lies two care homes run by BUPA, Tenterden House & Allington House.

The Site has had a historic association with the depositing of waste materials across it. This has left the land in a non-natural state with several mounds and earthworks present across the Site. Whilst it does not qualify as a 'Brownfield' site as per the NPPF definition, we consider it is also not an attractive or sensitive rural landscape.

**Development Potential**

The Site lies close to three existing settlements, How Wood, Bricket Wood and Chiswell Green. These are all defined as Medium Sized Villages (Tier 5 of 7) with the DLP which are defined as:

- Smaller population size compared to the Large Villages;
- Provision of key services;
- Functional relationship with St Albans and Watford for high order services; and
- Availability of bus routes and rail branch line to provide transport offer.

In terms of facilities, there are several facilities close to the Site, within each of the nearby settlements, which include (but not limited to):

*Chiswell Green*

- Mercure St Albans Noke Hotel, Starbucks Coffee, Greenwood Park, Midway Doctors Surgery, Killigrew Primary & Nursery School, Gracey's Pizza, The Three Hammers PH & Simmons Bakers.

*How Wood*

- Mayflower Park, Park Street Baptist Church, How Wood Primary & Nursery, How Wood Train Station, Park Street Surgery, Saplings Preschool & Nursery.

*Brickett Wood*

- Woodbury Field Playground, Brickett Wood Social Club, The Black Boy PH, Brickett Wood Train Station, Costcutter Stores, St Luke's Church, Canopy St Albans Nursery School, Brickett Wood Pharmacy, Petrol Station.

Based on the above, we consider the Site lies in an appropriate location to deliver, within the first five-years of the plan period, much needed new housing. The development will be capable of achieving, although not limited to) the following summarised benefits:

- Provision of new market homes which will make a valuable contribution to the need for new housing within the District & wider HMA;
- Provision of much needed new affordable homes which will make a valuable contribution to addressing the current affordable homes shortfall;
- Ability to develop a Site which does not make a strong contribution to any of the Green Belt purposes;
- Potential for the Site to create significant landscape and biodiversity / ecological enhancements,
- Potential to provide areas of public open space / play space alongside and an attractive & sustainable living environment for future residents; and
- Provision of economic benefits in relation to construction of the Site and longer-term local spending & jobs.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**CONCLUSION**

These representations have been prepared on behalf of Moralis Group in response to the Council's draft Local Plan (Regulation 19), specifically in respect of Land to the South of Lye Lane (the "Site").

In the first instance, we are significantly concerned that the Council is deliberately speeding up its local plan process to benefit from the transitional arrangements set out in the proposed updated NPPF. By rushing to make this deadline, we are concerned there is insufficient time to properly review & submit a 'sound' local plan.

The Council's current standard methodology figure is 885dpa. This will be increasing to 1,544dpa - an uplift of +659dpa under the revised standard method. We therefore consider the Council is only delaying the inevitable by moving forward at pace with the DLP now. We consider it would be much more prudent for the Council to delay submission of this DLP and seek to proceed here on with an updated DLP which will be in line with the requirements of the new NPPF.

Regarding the Duty to Cooperate, no detail has been provided to whether St Albans has engaged with any of its neighbouring Council's or other parties to discuss these issues. We are therefore concerned that the Council has not worked proactively with its neighbours to address any cross-border issues such as honey needs across the sub region. Furthermore, it is clear that there is a significant shortfall of housing within the SWH HMA, and it is unclear if the Council has taken this into account and whether it could assist in delivering unmet need from elsewhere.

We are also concerned the Council is seeking to deliver a large majority of its housing through large scale strategic sites, which usually have long lead in times so do not contribute to the housing supply in the early years of the plan.

Considering the above, we consider the Council should leave no stone unturned through this current plan review and the DLP to identify and allocate appropriate additional sites that could contribute to delivering and meeting more of the areas housing requirement/needs.

We consider our client's site can make a meaningful contribution towards housing land supply such that it can form part of a *sound* spatial strategy. Whilst it currently lies within the Green Belt, it does not make a strong contribution to the purposes of including land within the Green Belt.

Given the significant housing shortfall within the HMA, significant affordable housing shortfall within St Albans, and the significant increase in the Council's housing targets within the proposed NPPF, we consider the Council should seek to release additional land from the Green Belt and allocate this for housing.

We therefore do not consider that the Council's currently local plan is 'sound' as it is not positive prepared, justified, effective or consistent with national policy.

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Garage usage for housing.**

We would consider that many garage sites are suitable for development, because the structures are in a poor state of repair and in many cases are not being used as garages. It is important to note, however, that the garage may provide vital storage facilities which is particularly important for smaller properties. To the extent that some of the garages are actually being used to garage cars, consideration needs to be given to the provision of alternative parking so that the excess does not put pressure on street parking.

It should be noted that the distance between the village of Wheathampstead and central businesses, shopping and train stations of Harpenden and St Albans is not walkable, Cycle lanes are almost non-existent and bus services, at the best of times, are unreliable, impracticable and non-existent in the evening. With the exception of taxis and lifts from friends, family and neighbours, cars for

the residents of the village are essential. The reduction of parking space would therefore have a serious effect on the quality of life of the people of Wheathampstead and the economy of the village.

**362 - EDIT Land Ltd**

Submission Number: 362 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 8

**Type:**

* Site

**Number:**

New Site

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at "Land at Roundhouse Farm, Colney Heath" have been discounted incorrectly

Representations

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

The Reg. 18 Draft Local Plan includes planning policies relating to various topics, which would become the principal consideration for the decision maker when determining planning applications.

EDIT Lands has not provided comment on a number of policies and advise which they are commenting on in the list below, but reserves the right to comment on others in the future.

However, SADC should consider whether all the policies as drafted are useful and necessary for decision making, and do not just repeat that which is already stated in the National Planning Policy Framework (NPPF), Planning Practice Guidance or legislation. Policies should also be unambiguous, clear and concise, without being overly onerous or stifle innovation or ambition.

EDIT Lands main concern with the Local Plan, as a whole, is the weak approach to the provision of much needed housing. Firstly, the level of housing planned for does not seek to address housing need adequately or provide any contingency, nor does it seek to address unmet need or positively plan for previous years of significant under-delivery.

Furthermore, the level of housing which is proposed as windfall, is unsound. 20% of the total housing supply to come forward on sites which do not have allocations, nor are formally identified is not positively prepared and is a huge outlier compared to neighbouring authorities. We consider the proportion of windfall to be wholly inappropriate given the borough's historic poor delivery and acute housing need.

It is also perverse for SADC to suggest that all brownfield sites have been exhausted to necessitate Green Belt release, whilst anticipating that such a high number will come forward via the windfall process. In addition, the Local Plan is heavily reliant on the delivery of a small number of broad growth areas and strategic extensions, namely the Hemel Garden Community which is allocated for net. 5,500 dwellings and 4,281 across the other strategic development sites which are subject to challenging land assembly and infrastructure delivery requirements which will constrain delivery of housing units within the early periods of the Local Plan. St Albans have acknowledged this situation in the reg.19 draft Local Plan where they are now asserting that only 4,300 dwellings will be delivered on the HGC sites within the LP period, a reduction of 450 dwellings from the LP trajectory and 1200 from the wider site allocation. Across all allocated sites within the borough, the council has lost net. 971 dwellings between Reg.18 and Reg.19 stage. There is no explanation, or justification on how the shortfall in housing delivery is accounted for within the revised housing trajectory, or local plan housing targets.

The housing trajectory places significant reliance on these strategic sites without due consideration to implications of these strategic sites not being delivered or brought online in line with the housing trajectory.

The emerging Local Plan is also not prepared positively as it fails to make any consideration to the need for natural growth (and deliverable) within the 'washed over villages' within the green belt, with no consideration paid in detail to areas for release from the green belt in these locations. As outlined in Section 3 of this document our client challenges the methodology which has been applied in the green belt review in light of a failure to apply a macro level analysis to the green belt parcels.

Furthermore the draft Local Plan fails to make provision for custom build and self-building housing typologies despite a clear need being identified in the National Planning Policy Framework no recognition is made to the contribution this typology makes to meeting established demand. We understand that there is a need locally for such housing and failure to plan for such housing, is not positive.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

- SP1: A Spatial Strategy for St Albans District
- SP3 – Land and the Green Belt
- HOU 1 – Housing Mix
- HOU 2 – Affordable Housing
- SP2 – Responding to the Climate Emergency
- NEB 6 – Biodiversity and Biodiversity Net Gain – Comment
- LG5 – Green Belt – Object

EDIT Land considers that strong exceptional circumstances exist to justify the release of Land at Roundhouse Farm, to the north of Roestock Lane. This is summarised as below:

- The heavily constrained nature of the Borough (SPA, SSSI and flooding);
- Housing need – need for open market housing and affordable housing to address significant historic shortfall in delivery which is cataclysmic;
- The unavailability of suitable brownfield sites and underutilised land within settlement boundaries (on the basis of SADC's own evidence), necessitating release
- Moderate performing Green Belt when assessed in isolation, with limited contribution to the Green Belt when consider on the basis of the emerging proposals and controls by policy. The emerging proposals or the site have positive consequential effects on character and perceived openness;
- Provision of employment benefits;
- Opportunity for Sustainable Development well served by public transport;
- Surrounded by development on 3 sides, site is in a truly sustainable location.

## 1 INTRODUCTION

1.1 This submission is made by Ceres Property ("CP") on behalf of Pigeon Capital Management 4 Ltd ("Pigeon") and the Landowners (D'Arblay Investments Limited) to the Regulation 19 Publication Draft Local Plan ("PDLP") published for consultation by St Albans District Council ("the Council") until 8th November 2024.

1.2 This representation relates to Land at Sandpit Lane, St Albans ("the Site").

1.3 The Site was submitted as part of the Call for Sites exercise held by the Council between 25 January and 8 March 2021 to inform the list of deliverable sites to form part of the new Local Plan. The Site was registered as part of the Call for Sites under Ref: 774 and assessed as part of the Council's Housing and Economic Land Availability Assessment (HELAA) 2021/22 Report under Ref: SAN-03-21. The HELAA does not exclude the Site from the site selection process as one of the total 112 omission sites, and thus was taken forward as one of the 556 sites to further site selection.

1.4 Representations were made on behalf of Pigeon and the Landowners to the Regulation 18 PDLP being the first PDLP published following the withdrawal of the previous Publication PDLP (2020 – 2036) on 23 November 2020 having been submitted to the Secretary of State for Examination on 29 March 2019. This included a Vision Statement which is copied again to this representation at Appendix A.

1.5 The Site was discounted from the plan-making process and did not form a proposed allocation in the Regulation 18 PDLP.

1.6 The Site is once again not proposed to be allocated in the Regulation 19 Publication PDLP (the "PDLP"). It is considered that the PDLP is broadly sound and legally compliant, however there are specific parts and policies that require modifications to ensure it is sound. We strongly recommend that such modifications are made prior to submission of the PDLP for examination, to ensure it is capable of being found sound and legally compliant.

1.7 The Site remains suitable, available and achievable for residential development adjoining the highly sustainable settlement of the City of St Albans, the largest settlement in the District and a settlement capable of absorbing high levels of growth throughout the plan period.

...

Site-Specific Considerations

2.36 Sub-Area SA-75, which includes Land at Sandpit Lane, has been assessed based on NPPF Green Belt purposes. Although SA-75 as a whole scored as making a "strong" Green Belt contribution, this assessment lacks the fine-grain analysis necessary to evaluate the potential of smaller parcels within the sub-area. Given the Government's proposed reforms to the NPPF and a potential shift to a higher housing requirement under the new Standard Method, we strongly suggest that the Council consider this finer-grained analysis specific to St Albans to identify specific, sustainable opportunities for growth in this location.

2.37 While the sub-area as a whole was not recommended for further consideration, smaller parcels such as Land at Sandpit Lane are not considered to perform as strongly across all purposes as the wider area in which they sit. In such cases, a detailed assessment could reveal that these parcels, which possess natural containment through vegetation and existing development, may contribute to sustainable growth while having minimal impact on the strategic Green Belt.

2.38 It is also worth noting that certain allocations, such as Broad Location 1 (B1) north of St Albans, have been proposed despite strong Green Belt contributions from sub-areas SA-63-A, SA-66, and SA-69. Similarly, Bedmond Lane (M3) is proposed to be released from the Green Belt

despite a strong Green Belt rating. Such decisions indicate a precedent for releasing small parcels within larger sub-areas where natural containment exists and broader NPPF purposes are minimally affected.

2.39 In light of these observations, we recommend a finer-grain assessment of sites within SA-75, including Land at Sandpit Lane. This targeted review would enable the Council to identify opportunities for sustainable growth that align with proposed NPPF reforms, considering both the District's anticipated housing needs and the Government's potential higher requirement. Detailed site-level analysis would ensure the Local Plan is robust, responsive, and adaptable to both current and emerging needs, balancing growth with Green Belt preservation

## 5 SUSTAINABILITY APPRAISAL AND SITE SELECTION

St Albans

5.1 The St Albans Local Plan's SA sets a vision prioritising sustainable development, climate action, and community well-being, all while preserving the district's Green Belt and unique environmental assets. Given these aims, sites like SAN-03-21 are scrutinised rigorously to ensure that development aligns with core sustainability objectives. However, SAN-03-21 can still contribute meaningfully to these objectives. Through thoughtful design and planning, Sandpit Lane proposes a landscape-led development that strengthens the Green Belt, minimises environmental disruption, and enhances accessibility and sustainability.

Preferred Growth Scenario (Scenario 3) and Potential for Higher Growth

5.2 The SA's preferred Scenario 3 proposes a modest expansion focused primarily on East St Albans,aiming to balance housing demand with infrastructure capacity. However, St Albans has substantial capacity to accommodate significantly higher levels of housing growth. The existing infrastructure, along with plans for enhanced transit and community services, supports an alternative preferred option with expanded growth to meet acute housing demands.

5.3 Higher growth could support a more resilient local economy, enhance social equity through increased affordable housing provision, and contribute to the council's climate goals by supporting compact, transit-oriented developments that reduce emissions and urban sprawl pressures.

Strategic Omission Sites and Expanded Growth Scenarios

5.4 Current appraised scenarios examine strategic omission sites like Southeast (SE) and North StAlbans, but even under high-growth projections, the SA stops short of advocating for full development at both sites. Instead, it presents East St Albans as the primary area for expansion.

5.5 St Albans City, however, is well-placed to support a more integrated growth approach across multiple sites. SE St Albans, with its advantageous location and infrastructure compatibility, can accommodate further growth without disproportionately affecting the Green Belt or local landscape quality. This adjustment would better meet housing needs while spreading development pressures, ensuring sustainable expansion across several areas rather than concentrating growth solely in East St Albans.

Environmental and Landscape Constraints in the Context of Expanded Growth

5.6 While the SA emphasizes Green Belt preservation and landscape sensitivity, St Albans City's ability to integrate green infrastructure and landscape buffers means it can support a higher growth rate with minimal environmental disruption. A refined approach to higher-density developments in designated areas could accommodate increased housing needs while safeguarding sensitive landscapes.

5.7 Instead of limiting development to East St Albans, expanding to SE and potentially North St Albans, with landscape-sensitive planning and Green Belt boundary adjustments, could accommodate housing while still maintaining critical landscape and Green Belt functions. This higher-growth approach should therefore be reappraised as a viable and beneficial preferred option.

Infrastructure and Accessibility Capacity to Support Expanded Growth

5.8 Scenario 3, which emphasizes East St Albans, is infrastructure-compatible, but St Albans' broader transport network can facilitate growth across additional areas. Public transport links, established educational facilities, and healthcare services in St Albans support the case for higher growth, particularly given the district's well-developed transit and community infrastructure.

5.9 By strategically expanding growth into SE and North St Albans, alongside East St Albans, the district can leverage existing infrastructure while fostering self-sufficient, walkable neighborhoods that align with sustainable development goals. Appraising a higher-growth option would allow St Albans City to meet future housing demands comprehensively, reflecting its strategic urban role within the region.

Emissions Reduction and Climate Goals Aligned with Compact Growth

5.10 The SA's preferred scenario aims to limit car dependency and promote active travel. An expanded growth option, however, could better serve these goals by enabling higher-density, transit-oriented developments in well-connected areas of St Albans. The Abbey Line, public transit corridors, and proximity to employment centers mean that expanded growth could reduce per capita emissions while meeting housing needs.

5.11

5.12 Concentrating growth solely in East St Albans overlooks the broader transit and emissions reduction potential across SE and North St Albans. A higher-growth option that integrates these areas would better support climate and accessibility goals, reinforcing St Albans as a compact, low-carbon community.

5.13 While the SA's preferred Scenario 3 offers a modest growth approach, St Albans is well-positioned to support a significantly higher level of housing growth. Appraising an alternative preferred option with increased allocations in SE, North, and East St Albans would align with local infrastructure strengths, address acute housing shortages, and support St Albans' role as a sustainable urban center.

5.14 Expanded growth would also allow for a more equitable distribution of housing and affordable options, supporting community diversity and economic resilience. This higher-growth approach, guided by landscape-sensitive planning, green infrastructure, and transit alignment, should therefore be appraised as a primary alternative to ensure that St Albans meets its full potential as a balanced, thriving district.

Green Belt Constraints and Spatial Strategy

Green Belt considerations anchor the spatial strategy of the SA, aiming to prevent urban sprawl and safeguard St Albans City's character. The SA's low ranking for SAN-03-21 stems from concerns that the site's development might erode the Green Belt. Yet, SAN-03-21 is uniquely positioned to form a discreet, well-contained extension of St Albans. Its natural boundary features and adjacent infrastructure serve as robust buffers, limiting visual impact and preserving the Green Belt's continuity. Pigeon advocates for SAN-03-21's release from the Green Belt, positing that it performs weakly against core Green Belt functions and, if designed thoughtfully, could enhance Green Belt integrity rather than detract from it.

Housing Needs and Affordable Housing Challenges

5.15 St Albans faces a significant housing shortage, exacerbated by high demand for affordable homes. The SA emphasises that sites should meet housing needs while supporting infrastructure and resilience goals. SAN-03-21 meets these objectives directly by proposing up to 200 homes, 40% of which will be affordable. This provision supports local housing requirements and promotes a socially inclusive community, which can contribute to the local economy by providing housing for essential workers. The development also includes custom and self-build homes, which foster a diverse housing market aligned with community needs. This robust housing offering addresses the SA's concerns around sustainability and equity in housing, while enhancing community vitality.

Climate Change, Flooding, and Environmental Resilience

5.16 Environmental resilience is a top SA priority, particularly regarding flood risks, emissions reduction, and ecological impact. Whilst SAN-03-21's is located within Flood Risk Zone 1 (low risk) and incorporates Sustainable Drainage Systems (SuDS), including swales and attenuation basins to manage surface water on-site. These measures, combined with the green infrastructure strategy that prioritizes biodiversity net gain (exceeding 10%), counteract the SA's concerns by presenting a development approach that enhances both environmental resilience and sustainability.

Preservation of Cultural and Historic Assets

5.17 St Albans' historical and cultural richness is integral to its identity, with the SA closely assessing sites for potential impacts on heritage assets. SAN-03-21 has been considered as less compatible with the preservation goals of the district owing to nearby heritage assets. Pigeon strongly considers that the Site is physically and visually separated from nearby heritage assets, ensuring no adverse impact on the historic environment. By proposing a landscape-sensitive approach, the development at Sandpit Lane can preserve the historic character of St Albans, aligning with the National Planning Policy Framework (NPPF) requirement to "conserve and enhance the historic environment" while accommodating necessary growth.

Accessibility, Transport, and Community Infrastructure

5.18 A site's accessibility to services, schools, healthcare, and transport networks is central to the SA's sustainability framework. Sites supporting active travel and reduced car dependency are prioritised. Pigeon challenge the SA's low accessibility ranking for SAN-03-21 given the Site has excellent connectivity offered at Sandpit Lane: it lies within walking or cycling distance of essential services and is supported by regular public transport options. The proposal includes new pedestrian and cycle routes along Sandpit Lane and Coopers Green Lane, connecting the site to existing transit and infrastructure networks. This connectivity supports active travel, enhances accessibility to local amenities, and aligns with St Albans' ambition to create "15-minute neighbourhoods" that prioritise sustainable living.

Deliverability and Viability

5.19 Pigeon emphasises SAN-03-21's immediate availability for development, positioning it as a viable contributor to the district's urgent housing needs within the early Local Plan period. This commitment to timely delivery aligns with the SA's emphasis on practical, achievable developments that meet housing supply targets.

[Please see attached appendix]

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## 1 INTRODUCTION

1.1 This submission is made by Ceres Property ("CP") on behalf of Pigeon Capital Management 4 Ltd ("Pigeon") and the Landowners (D'Arblay Investments Limited) to the Regulation 19 Publication Draft Local Plan ("PDLP") published for consultation by St Albans District Council ("the Council") until 8th November 2024.

1.2 This representation relates to Land at Sandpit Lane, St Albans ("the Site").

1.3 The Site was submitted as part of the Call for Sites exercise held by the Council between 25 January and 8 March 2021 to inform the list of deliverable sites to form part of the new Local Plan. The Site was registered as part of the Call for Sites under Ref: 774 and assessed as part of

the Council's Housing and Economic Land Availability Assessment (HELAA) 2021/22 Report under Ref: SAN-03-21. The HELAA does not exclude the Site from the site selection process as one of the total 112 omission sites, and thus was taken forward as one of the 556 sites to further site selection.

1.4 Representations were made on behalf of Pigeon and the Landowners to the Regulation 18 PDLP being the first PDLP published following the withdrawal of the previous Publication PDLP (2020 – 2036) on 23 November 2020 having been submitted to the Secretary of State for Examination on 29 March 2019. This included a Vision Statement which is copied again to this representation at Appendix A.

1.5 The Site was discounted from the plan-making process and did not form a proposed allocation in the Regulation 18 PDLP.

1.6 The Site is once again not proposed to be allocated in the Regulation 19 Publication PDLP (the "PDLP"). It is considered that the PDLP is broadly sound and legally compliant, however there are specific parts and policies that require modifications to ensure it is sound. We strongly recommend that such modifications are made prior to submission of the PDLP for examination, to ensure it is capable of being found sound and legally compliant.

1.7 The Site remains suitable, available and achievable for residential development adjoining the highly sustainable settlement of the City of St Albans, the largest settlement in the District and a settlement capable of absorbing high levels of growth throughout the plan period.

Site-Specific Considerations

2.36 Sub-Area SA-75, which includes Land at Sandpit Lane, has been assessed based on NPPF Green Belt purposes. Although SA-75 as a whole scored as making a "strong" Green Belt contribution, this assessment lacks the fine-grain analysis necessary to evaluate the potential of smaller parcels within the sub-area. Given the Government's proposed reforms to the NPPF and a potential shift to a higher housing requirement under the new Standard Method, we strongly suggest that the Council consider this finer-grained analysis specific to St Albans to identify specific, sustainable opportunities for growth in this location.

2.37 While the sub-area as a whole was not recommended for further consideration, smaller parcels such as Land at Sandpit Lane are not considered to perform as strongly across all purposes as the wider area in which they sit. In such cases, a detailed assessment could reveal that these parcels, which possess natural containment through vegetation and existing development, may contribute to sustainable growth while having minimal impact on the strategic Green Belt.

2.38 It is also worth noting that certain allocations, such as Broad Location 1 (B1) north of St Albans, have been proposed despite strong Green Belt contributions from sub-areas SA-63-A, SA-66, and SA-69. Similarly, Bedmond Lane (M3) is proposed to be released from the Green Belt despite a strong Green Belt rating. Such decisions indicate a precedent for releasing small parcels within larger sub-areas where natural containment exists and broader NPPF purposes are minimally affected.

2.39 In light of these observations, we recommend a finer-grain assessment of sites within SA-75, including Land at Sandpit Lane. This targeted review would enable the Council to identify opportunities for sustainable growth that align with proposed NPPF reforms, considering both the District's anticipated housing needs and the Government's potential higher requirement. Detailed site-level analysis would ensure the Local Plan is robust, responsive, and adaptable to both current and emerging needs, balancing growth with Green Belt preservation

## 5 SUSTAINABILITY APPRAISAL AND SITE SELECTION

St Albans

5.1 The St Albans Local Plan's SA sets a vision prioritising sustainable development, climate action, and community well-being, all while preserving the district's Green Belt and unique environmental assets. Given these aims, sites like SAN-03-21 are scrutinised rigorously to ensure that development aligns with core sustainability objectives. However, SAN-03-21 can still contribute meaningfully to these objectives. Through thoughtful design and planning, Sandpit Lane proposes a landscape-led development that strengthens the Green Belt, minimises environmental disruption, and enhances accessibility and sustainability.

Preferred Growth Scenario (Scenario 3) and Potential for Higher Growth

5.2 The SA's preferred Scenario 3 proposes a modest expansion focused primarily on East St Albans,aiming to balance housing demand with infrastructure capacity. However, St Albans has substantial capacity to accommodate significantly higher levels of housing growth. The existing infrastructure, along with plans for enhanced transit and community services, supports an alternative preferred option with expanded growth to meet acute housing demands.

5.3 Higher growth could support a more resilient local economy, enhance social equity through increased affordable housing provision, and contribute to the council's climate goals by supporting compact, transit-oriented developments that reduce emissions and urban sprawl pressures.

Strategic Omission Sites and Expanded Growth Scenarios

5.4 Current appraised scenarios examine strategic omission sites like Southeast (SE) and North StAlbans, but even under high-growth projections, the SA stops short of advocating for full development at both sites. Instead, it presents East St Albans as the primary area for expansion.

5.5 St Albans City, however, is well-placed to support a more integrated growth approach across multiple sites. SE St Albans, with its advantageous location and infrastructure compatibility, can accommodate further growth without disproportionately affecting the Green Belt or local landscape quality. This adjustment would better meet housing needs while spreading development pressures, ensuring sustainable expansion across several areas rather than concentrating growth solely in East St Albans.

Environmental and Landscape Constraints in the Context of Expanded Growth

5.6 While the SA emphasizes Green Belt preservation and landscape sensitivity, St Albans City's ability to integrate green infrastructure and landscape buffers means it can support a higher growth rate with minimal environmental disruption. A refined approach to higher-density developments in designated areas could accommodate increased housing needs while safeguarding sensitive landscapes.

5.7 Instead of limiting development to East St Albans, expanding to SE and potentially North St Albans, with landscape-sensitive planning and Green Belt boundary adjustments, could accommodate housing while still maintaining critical landscape and Green Belt functions. This higher-growth approach should therefore be reappraised as a viable and beneficial preferred option.

Infrastructure and Accessibility Capacity to Support Expanded Growth

5.8 Scenario 3, which emphasizes East St Albans, is infrastructure-compatible, but St Albans' broader transport network can facilitate growth across additional areas. Public transport links, established educational facilities, and healthcare services in St Albans support the case for higher growth, particularly given the district's well-developed transit and community infrastructure.

5.9 By strategically expanding growth into SE and North St Albans, alongside East St Albans, the district can leverage existing infrastructure while fostering self-sufficient, walkable neighborhoods that align with sustainable development goals. Appraising a higher-growth option would allow St Albans City to meet future housing demands comprehensively, reflecting its strategic urban role within the region.

Emissions Reduction and Climate Goals Aligned with Compact Growth

5.10 The SA's preferred scenario aims to limit car dependency and promote active travel. An expanded growth option, however, could better serve these goals by enabling higher-density, transit-oriented developments in well-connected areas of St Albans. The Abbey Line, public transit corridors, and proximity to employment centers mean that expanded growth could reduce per capita emissions while meeting housing needs.
5.11

5.12 Concentrating growth solely in East St Albans overlooks the broader transit and emissions reduction potential across SE and North St Albans. A higher-growth option that integrates these areas would better support climate and accessibility goals, reinforcing St Albans as a compact, low-carbon community.
5.13 While the SA's preferred Scenario 3 offers a modest growth approach, St Albans is well-positioned to support a significantly higher level of housing growth. Appraising an alternative preferred option with increased allocations in SE, North, and East St Albans would align with local infrastructure strengths, address acute housing shortages, and support St Albans' role as a sustainable urban center.
5.14 Expanded growth would also allow for a more equitable distribution of housing and affordable options, supporting community diversity and economic resilience. This higher-growth approach, guided by landscape-sensitive planning, green infrastructure, and transit alignment, should therefore be appraised as a primary alternative to ensure that St Albans meets its full potential as a balanced, thriving district.

Green Belt Constraints and Spatial Strategy
Green Belt considerations anchor the spatial strategy of the SA, aiming to prevent urban sprawl and safeguard St Albans City's character. The SA's low ranking for SAN-03-21 stems from concerns that the site's development might erode the Green Belt. Yet, SAN-03-21 is uniquely positioned to form a discreet, well-contained extension of St Albans. Its natural boundary features and adjacent infrastructure serve as robust buffers, limiting visual impact and preserving the Green Belt's continuity. Pigeon advocates for SAN-03-21's release from the Green Belt, positing that it performs weakly against core Green Belt functions and, if designed thoughtfully, could enhance Green Belt integrity rather than detract from it.

Housing Needs and Affordable Housing Challenges
5.15 St Albans faces a significant housing shortage, exacerbated by high demand for affordable homes. The SA emphasises that sites should meet housing needs while supporting infrastructure and resilience goals. SAN-03-21 meets these objectives directly by proposing up to 200 homes, 40% of which will be affordable. This provision supports local housing requirements and promotes a socially inclusive community, which can contribute to the local economy by providing housing for essential workers. The development also includes custom and self-build homes, which foster a diverse housing market aligned with community needs. This robust housing offering addresses the SA's concerns around sustainability and equity in housing, while enhancing community vitality.

Climate Change, Flooding, and Environmental Resilience
5.16 Environmental resilience is a top SA priority, particularly regarding flood risks, emissions reduction, and ecological impact. Whilst SAN-03-21's is located within Flood Risk Zone 1 (low risk) and incorporates Sustainable Drainage Systems (SuDS), including swales and attenuation basins to manage surface water on-site. These measures, combined with the green infrastructure strategy that prioritizes biodiversity net gain (exceeding 10%), counteract the SA's concerns by presenting a development approach that enhances both environmental resilience and sustainability.

Preservation of Cultural and Historic Assets
5.17 St Albans' historical and cultural richness is integral to its identity, with the SA closely assessing sites for potential impacts on heritage assets. SAN-03-21 has been considered as less compatible with the preservation goals of the district owing to nearby heritage assets. Pigeon strongly considers that the Site is physically and visually separated from nearby heritage assets, ensuring no adverse

impact on the historic environment. By proposing a landscape-sensitive approach, the development at Sandpit Lane can preserve the historic character of St Albans, aligning with the National Planning Policy Framework (NPPF) requirement to “conserve and enhance the historic environment” while accommodating necessary growth.

Accessibility, Transport, and Community Infrastructure
5.18 A site’s accessibility to services, schools, healthcare, and transport networks is central to the SA’s sustainability framework. Sites supporting active travel and reduced car dependency are prioritised. Pigeon challenge the SA’s low accessibility ranking for SAN-03-21 given the Site has excellent connectivity offered at Sandpit Lane: it lies within walking or cycling distance of essential services and is supported by regular public transport options. The proposal includes new pedestrian and cycle routes along Sandpit Lane and Coopers Green Lane, connecting the site to existing transit and infrastructure networks. This connectivity supports active travel, enhances accessibility to local amenities, and aligns with St Albans’ ambition to create “15-minute neighbourhoods” that prioritise sustainable living.

Deliverability and Viability
5.19 Pigeon emphasises SAN-03-21’s immediate availability for development, positioning it as a viable contributor to the district’s urgent housing needs within the early Local Plan period. This commitment to timely delivery aligns with the SA’s emphasis on practical, achievable developments that meet housing supply targets.

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**1 INTRODUCTION**

1.1 This submission is made by Ceres Property ("CP") on behalf of Pigeon Capital Management 4 Ltd ("Pigeon") and the Landowners (Gorhambury Estate) to the Regulation 19 Publication Draft Local Plan ("PDLP") published for consultation by St Albans District Council ("the Council") until 8th November 2024.

1.2 This representation relates to Land Northwest of Batchwood Drive ("the Site").

1.3 The Site comprises two land parcels that were submitted as part of the Call for Sites exercise held by the Council between 25 January and 8 March 2021 to inform the list of deliverable sites to form part of the new Local Plan. The Site was registered as part of the Council's Housing and Economic Land Availability Assessment (HELAA) 2021/22 Report under Ref: SA-16-18 & SA-16-21, with the latter promoted for a high quality landscape and design-led sustainable scheme for approximately 200 new homes, strategic landscaping and open space, as detailed in the accompanying Vision Statement, Appendix A). The HELAA does not exclude the Site from the site selection process as one of the total 112 omission sites, and thus was taken forward as one of the 556 sites to further site selection.

1.4 Representations were made on behalf of Pigeon and the Landowners to the Regulation 18 Draft Local Plan (DLP) being the first DLP published following the withdrawal of the previous Publication PDLP (2020 – 2036) on 23 November 2020 having been submitted to the Secretary of State for Examination on 29 March 2019.

1.5 The Site was discounted from the plan-making process and did not form a proposed allocation in the Regulation 18 DLP.

1.6 The Site is once again not proposed to be allocated in the Regulation 19 Publication PDLP (the "PDLP"). It is considered that the PDLP is broadly sound and legally compliant, however there are specific parts and policies that require modifications to ensure it is sound. We strongly recommend that such modifications are made prior to submission of the PDLP for examination, to ensure it is capable of being found sound and legally compliant.

1.7 The Site remains suitable, available and achievable for residential development adjoining the highly sustainable settlement of the City of St Albans, a settlement capable of absorbing high levels of growth throughout the plan period.

...

**Site-Specific Considerations**

2.36 Arup conducted a Stage 2 Green Belt Review to support the evidence base for the new Regulation 18 Local Plan. The primary area of the Site lies within sub-area parcel SA-59. However, the southwest corner of the Site, which adjoins Redbourn Road, is not within a designated sub-area and was therefore not assessed in the Stage 2 review.

2.37 The Stage 2 Green Belt Review concludes that Parcel SA-59 plays a key role within Strategic Parcel 23, as assessed in the Stage 1 Review, suggesting that releasing SA-59 from the Green Belt would negatively impact the surrounding Green Belt's integrity. Specifically, the review states:

***"The sub-area [Parcel SA-59] does not adjoin any other sub-areas; but adjoins wider Green Belt to the north, south, and west. The removal of the sub-area in isolation is likely to alter the performance of the wider Green Belt as it would constitute an irregular spread of the large built-up area, lacking recognisable and permanent features to prevent further onward sprawl."***

2.38 It should be noted that the Green Belt review has not assessed the Site as a whole. The review also does not consider that the inclusion of physical, landscape-led boundaries could be incorporated into a development scheme to prevent sprawl.

2.39 The NPPF emphasizes the need to promote sustainable development patterns when reviewing Green Belt boundaries (paragraph 142) and mandates that boundaries be "clearly defined, using physical features that are readily recognisable and likely to be permanent" (paragraph 143).

2.40 The Vision Statement for the Site illustrates that it is located in a highly sustainable area, adjacent to St Albans City and well-connected to services and amenities. It outlines a new, defensible Green Belt boundary through strategic landscape features. For example:

- Enhanced Boundary Planting: Existing vegetation along the north and northwest of the Site would be reinforced, taking advantage of the existing separation created by Batchwood Golf Course.
- New Strategic Planting: Additional planting would form a permanent edge along the Site's southwest and southern boundaries.
- Historic Hedgerow Reinstatement: A historic hedgerow would be reinstated from the northeast to southwest, creating further distinction where Redbourn Road meets Graden House Lane.

2.41 The new Local Plan should allocate enough land to exceed minimum housing targets, given SADC's record of under-delivery of both market and affordable housing. This Site's removal from the Green Belt offers an opportunity to add capacity and meet housing needs sustainably in line with the spatial strategy. While the Plan suggests a minimum density of 40 dwellings per hectare for all site types, this density may be challenging on some sites due to other requirements, including Suitable Alternative Natural Greenspace (SANG), open space, and biodiversity net gain.

2.42 Removing this Site from the Green Belt aligns with the spatial strategy and would ensure that housing requirements are met. It would also allow for the creation of a high-quality neighbourhood in one of the district's least sensitive Green Belt locations, without compromising the Green Belt's wider purposes or effectiveness. This supports sustainable development patterns and focuses new housing in St Albans City, identified as a Tier 1 settlement for development concentration during the plan period.

...

**SA-16-21 – Land Northwest of Batchwood Drive**

## Green Belt Constraints and Spatial Strategy

4.18 The spatial strategy of the Sustainability Appraisal (SA) for the St Albans Local Plan prioritizes Green Belt preservation to limit urban sprawl and retain the district's character. Site SA-16-21 is evaluated within the broader sub-area SA-16, assessed as making a "moderate" Green Belt contribution. However, this general evaluation does not account for the nuanced features of this specific site. SA-16-21, for example, possesses natural boundary elements and surrounding infrastructure that could allow for a well-contained, minimal-impact extension to the urban area, preserving Green Belt continuity while fulfilling local housing needs. Releasing these sites from the Green Belt, especially if landscape-led boundaries are applied, would align with the Green Belt's core purposes and meet spatial strategy objectives effectively.

## Housing Needs and Affordable Housing Challenges

4.19 St Albans has significant housing needs, particularly for affordable homes, which are inadequately met due to high demand and limited availability. The SA prioritizes development sites that can contribute substantially to local housing and infrastructure goals. SA-16-21 is well-situated to

support these priorities. If designated for development, this site could deliver a significant proportion of affordable homes alongside market-rate housing, meeting local demand and contributing to a balanced, inclusive community. Such housing provision would also help retain essential workers within the district, enhancing economic and social resilience in line with the SA's objectives.

## Climate Change, Flooding, and Environmental Resilience

4.20 Building resilience against climate change, flooding, and ecological impact is a key priority of the SA. Site SA-16-21 is situated within Flood Zone 1, presenting a low flood risk. Development on this site could incorporate Sustainable Drainage Systems (SuDS), such as swales and attenuation basins, to manage surface water effectively, enhancing resilience to flooding. Further, by committing to a green infrastructure strategy that exceeds the 10% biodiversity net gain target, this site could directly address SA concerns around sustainability and environmental enhancement.

## Preservation of Cultural and Historic Assets

4.21 St Albans' historical character is crucial to its identity, and the SA assesses the Site for potential impacts on nearby heritage assets. For site SA-16-21, any development approach would need to be sensitive to local heritage, with design solutions ensuring minimal visibility from nearby historic areas. The Site offers the opportunity to implement a landscape and design-led approach that preserves the visual integrity of St Albans' historic environment, aligning with the NPPF's mandate to "conserve and enhance the historic environment" while accommodating necessary growth.

## Accessibility, Transport, and Community Infrastructure

4.22 The SA emphasizes site accessibility to essential services, schools, healthcare, and transport options as part of its sustainability framework. SA-16-21 benefits from proximity to key infrastructure, enabling residents to access services within a short walk or cycle. With planned improvements to pedestrian and cycling paths, this Site would align with the district's vision for 15-minute neighbourhoods, encouraging sustainable living, reducing car dependence, and supporting active travel options.

## Deliverability and Viability

4.23 The deliverability of Site SA-16-21 makes it a strong candidate for early delivery within the Local Plan period, given its immediate availability and minimal constraints to development. Early delivery from this Site would contribute meaningfully to St Albans' housing targets and reflect the SA's emphasis on practical, achievable development that addresses both immediate and long-term housing needs.

[Please see attached Appendices]

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## 1 INTRODUCTION

1.1 This submission is made by Ceres Property ("CP") on behalf of Pigeon Capital Management 4 Ltd ("Pigeon") and the Landowners (Gorhambury Estate) to the Regulation 19 Publication Draft Local Plan ("PDLP") published for consultation by St Albans District Council ("the Council") until 8th November 2024.

1.2 This representation relates to Land Northwest of Batchwood Drive ("the Site").

1.3 The Site comprises two land parcels that were submitted as part of the Call for Sites exercise held by the Council between 25 January and 8 March 2021 to inform the list of deliverable sites to form part of the new Local Plan. The Site was registered as part of the Council's Housing and Economic Land Availability Assessment (HELAA) 2021/22 Report under Ref: SA-16-18 & SA-16-21, with the latter promoted for a high quality landscape and design-led sustainable scheme for approximately 200 new homes, strategic landscaping and open space, as detailed in the accompanying Vision Statement, Appendix A). The HELAA does not exclude the Site from the site selection process as one of the total 112 omission sites, and thus was taken forward as one of the 556 sites to further site selection.

1.4 Representations were made on behalf of Pigeon and the Landowners to the Regulation 18 Draft Local Plan (DLP) being the first DLP published following the withdrawal of the previous Publication PDLP (2020 – 2036) on 23 November 2020 having been submitted to the Secretary of State for Examination on 29 March 2019.

1.5 The Site was discounted from the plan-making process and did not form a proposed allocation in the Regulation 18 DLP.

1.6 The Site is once again not proposed to be allocated in the Regulation 19 Publication PDLP (the "PDLP"). It is considered that the PDLP is broadly sound and legally compliant, however there are specific parts and policies that require modifications to ensure it is sound. We strongly recommend that such modifications are made prior to submission of the PDLP for examination, to ensure it is capable of being found sound and legally compliant.

1.7 The Site remains suitable, available and achievable for residential development adjoining the highly sustainable settlement of the City of St Albans, a settlement capable of absorbing high levels of growth throughout the plan period.

...

**Site-Specific Considerations**

2.36 Arup conducted a Stage 2 Green Belt Review to support the evidence base for the new Regulation 18 Local Plan. The primary area of the Site lies within sub-area parcel SA-59. However, the southwest corner of the Site, which adjoins Redbourn Road, is not within a designated sub-area and was therefore not assessed in the Stage 2 review.

2.37 The Stage 2 Green Belt Review concludes that Parcel SA-59 plays a key role within Strategic Parcel 23, as assessed in the Stage 1 Review, suggesting that releasing SA-59 from the Green Belt would negatively impact the surrounding Green Belt's integrity. Specifically, the review states:

***"The sub-area [Parcel SA-59] does not adjoin any other sub-areas; but adjoins wider Green Belt to the north, south, and west. The removal of the sub-area in isolation is likely to alter the performance of the wider Green Belt as it would constitute an irregular spread of the large built-up area, lacking recognisable and permanent features to prevent further onward sprawl."***

2.38 It should be noted that the Green Belt review has not assessed the Site as a whole. The review also does not consider that the inclusion of physical, landscape-led boundaries could be incorporated into a development scheme to prevent sprawl.

2.39 The NPPF emphasizes the need to promote sustainable development patterns when reviewing Green Belt boundaries (paragraph 142) and mandates that boundaries be "clearly defined, using physical features that are readily recognisable and likely to be permanent" (paragraph 143).

2.40 The Vision Statement for the Site illustrates that it is located in a highly sustainable area, adjacent to St Albans City and well-connected to services and amenities. It outlines a new, defensible Green Belt boundary through strategic landscape features. For example:

- Enhanced Boundary Planting: Existing vegetation along the north and northwest of the Site would be reinforced, taking advantage of the existing separation created by Batchwood Golf Course.
- New Strategic Planting: Additional planting would form a permanent edge along the Site's southwest and southern boundaries.
- Historic Hedgerow Reinstatement: A historic hedgerow would be reinstated from the northeast to southwest, creating further distinction where Redbourn Road meets Graden House Lane.

2.41 The new Local Plan should allocate enough land to exceed minimum housing targets, given SADC's record of under-delivery of both market and affordable housing. This Site's removal from the Green Belt offers an opportunity to add capacity and meet housing needs sustainably in line with the spatial strategy. While the Plan suggests a minimum density of 40 dwellings per hectare for all site types, this density may be challenging on some sites due to other requirements, including Suitable Alternative Natural Greenspace (SANG), open space, and biodiversity net gain.

2.42 Removing this Site from the Green Belt aligns with the spatial strategy and would ensure that housing requirements are met. It would also allow for the creation of a high-quality neighbourhood in one of the district's least sensitive Green Belt locations, without compromising the Green Belt's wider purposes or effectiveness. This supports sustainable development patterns and focuses new housing in St Albans City, identified as a Tier 1 settlement for development concentration during the plan period.

...

**SA-16-21 – Land Northwest of Batchwood Drive**

**<u>Green Belt Constraints and Spatial Strategy</u>**

4.18 The spatial strategy of the Sustainability Appraisal (SA) for the St Albans Local Plan prioritizes Green Belt preservation to limit urban sprawl and retain the district's character. Site SA-16-21 is evaluated within the broader sub-area SA-16, assessed as making a "moderate" Green Belt contribution. However, this general evaluation does not account for the nuanced features of this specific site. SA-16-21, for example, possesses natural boundary elements and surrounding infrastructure that could allow for a well-contained, minimal-impact extension to the urban area, preserving Green Belt continuity while fulfilling local housing needs. Releasing these sites from the Green Belt, especially if landscape-led boundaries are applied, would align with the Green Belt's core purposes and meet spatial strategy objectives effectively.

**Housing Needs and Affordable Housing Challenges**

4.19 St Albans has significant housing needs, particularly for affordable homes, which are inadequately met due to high demand and limited availability. The SA prioritizes development sites that can contribute substantially to local housing and infrastructure goals. SA-16-21 is well-situated to

support these priorities. If designated for development, this site could deliver a significant proportion of affordable homes alongside market-rate housing, meeting local demand and contributing to a balanced, inclusive community. Such housing provision would also help retain essential workers within the district, enhancing economic and social resilience in line with the SA's objectives.

**Climate Change, Flooding, and Environmental Resilience**

4.20 Building resilience against climate change, flooding, and ecological impact is a key priority of the SA. Site SA-16-21 is situated within Flood Zone 1, presenting a low flood risk. Development on this site could incorporate Sustainable Drainage Systems (SuDS), such as swales and attenuation basins, to manage surface water effectively, enhancing resilience to flooding. Further, by committing to a green infrastructure strategy that exceeds the 10% biodiversity net gain target, this site could directly address SA concerns around sustainability and environmental enhancement.

**Preservation of Cultural and Historic Assets**

4.21 St Albans' historical character is crucial to its identity, and the SA assesses the Site for potential impacts on nearby heritage assets. For site SA-16-21, any development approach would need to be sensitive to local heritage, with design solutions ensuring minimal visibility from nearby historic areas. The Site offers the opportunity to implement a landscape and design-led approach that preserves the visual integrity of St Albans' historic environment, aligning with the NPPF's mandate to "conserve and enhance the historic environment" while accommodating necessary growth.

**Accessibility, Transport, and Community Infrastructure**

4.22 The SA emphasizes site accessibility to essential services, schools, healthcare, and transport options as part of its sustainability framework. SA-16-21 benefits from proximity to key infrastructure, enabling residents to access services within a short walk or cycle. With planned improvements to pedestrian and cycling paths, this Site would align with the district's vision for 15-minute neighbourhoods, encouraging sustainable living, reducing car dependence, and supporting active travel options.

**Deliverability and Viability**

4.23 The deliverability of Site SA-16-21 makes it a strong candidate for early delivery within the Local Plan period, given its immediate availability and minimal constraints to development. Early delivery from this Site would contribute meaningfully to St Albans' housing targets and reflect the SA's emphasis on practical, achievable development that addresses both immediate and long-term housing needs.

**371 - Tarmac**

Submission Number: 371 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Turley Name: Steven Kosky

On Behalf Of Company/Organisation: C/O Turley Name: Tarmac

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

St Albans Draft Local Plan 2041 – Regulation 19: Representations by Tarmac – Land at Colney Heath and Tyttenhanger

Land at Colney Heath and Tyttenhanger

I am writing on behalf of Tarmac in connection with representations made in relation to the above sites, as part of the Regulation 18 public consultation held last year.
We are currently in the process of preparing representations to the current Regulation 19 consultation for the above two sites, owned by Tarmac, but cannot seem to find any reference to them in the Council's evidence base. The above submissions (including full appendices) were submitted at the same time as Tarmac's representations in connection with the site allocation at Harper Lane. We can find reference to our Harper Lane representations in the evidence base, but none in relation to the above two sites, notably in terms of their site assessment and reason for non-allocation.
We however do not understand why these sites appear to have not been assessed, as we have receipts for their delivery (extract below) and these sites were also promoted in the earlier call for sites exercise held in 2021, along with other sites promoted by Tarmac at the time.

These representations have been prepared by Turley, on behalf of Tarmac, pursuant to the St Albans City and District Local Plan 2041, Regulation 19 Public Consultation, 2024. Tarmac is an established land promotion and development company with a strong portfolio of freehold and other commercial land interests in St Albans District. Tarmac is a major national employer, with active businesses operating in the area and nationwide experience of bringing forward strategic development sites for all scales for residential, mixed-use, commercial and industrial development.

Tarmac is promoting a number of its freehold sites in St Albans District for potential residential, employment and other forms of development. As part of these Regulation 19 responses, Turley has been instructed to prepare separate representations in relation to each of Tarmac's promoted site locations. The following submissions specifically relate to the following Tarmac sites: Site A - Land at Colney Heath, which is located southeast of the A414, between Colney Heath and Sleapshyde, as shown on the attached red line plan at Appendix 1 and Site B - Land at Tyttenhanger, which is also located southeast of the A414, as shown on the attached red line plan at Appendix 4.

Tarmac objects to the Draft Local Plan as currently proposed, primarily in relation to the omission of the two sites identified above from allocation in the Draft Local Plan. Tarmac also has further concerns, in relation to the construct of the Regulation 19 Draft Local Plan in general, which are set out in Section 2 of these representations. These concerns relate to the calculation of Local Housing Need, constraints on the housing land supply and the need for increased residential densities. Tarmac is also concerned in relation to the narrow spatial focus of the employment land allocations and the endorsement of the contents of the draft Local Plan for submission to the Secretary of State in advance of the conclusion of this Regulation 19 consultation stage.

Promoted Land at Colney Heath

The overall Tarmac site at Colney Heath comprises 43.58 hectares of open grassland, local woodland and a lake adjacent to the southwest boundary. In the 2021 Call for Sites, this Site was promoted to the Council as a suitable hybrid development proposal with the potential to provide a mixed-use development opportunity comprising 3.70 hectares of new B1 employment fronting the A414 (for an innovation hub or similar) with a small allocation of new homes directly adjacent to Colney Heath village, on a 1 hectare parcel, as referenced in the NPPF, directly to the rear of the High Street.

The A414 is an important transport corridor and Hertfordshire County Council (HCC) have adopted a strategy to upgrade the road into a principal multi-modal movement corridor, linking the main urban centres, to help support growth in a more efficient and sustainable manner. These improvements include the development of a Mass Rapid Transport (MRT) system, cycleways and other targeted capacity and other safety improvements.

The MRT envisages new development being located at key nodes within the corridor, with high quality interchange opportunities, to complement the alignment of planned land use with the emerging transport strategy. Both Tarmac sites suitably fulfil this criteria.

The employment land is proposed with a potential connection to a transport interchange with the A414 corridor, including the future MRT system. Access work associated with this new employment development will allow existing safety issues on the A414 to be addressed whilst also making strong connectivity for pedestrians and cyclists on a north - south axis, addressing the existing severance between Colney Heath and Sleapshyde.

With regard to the 1 hectare southern land parcel to the rear of Colney Heath High Street, an outline planning application (all matters reserved except for means of access) for up to 45 new homes was submitted to St Albans Council in February 2022 and validated on 8th March 2022, under reference 5/2022/0599 for the development of land to the rear of 96 To 106 High Street Colney Heath, adjacent to the Football Club.

The application was refused by the Council in May 2023 and submitted to the Inspectorate for appeal, but later withdrawn from appeal in October 2024. The final iteration of the application proposed 50% of these homes to be affordable and additionally proposed 10% as Custom Build homes, together with new landscaping, public open space and associated infrastructure works.

Whilst the application was refused by the Council, Tarmac considers that the site to the rear of the High Street remains highly suitable for the development proposed, and so Tarmac continues to advocate the scheme within these representations. In the interim, the draft NPPF has been published, which introduces the concept of 'grey belt' which characterises this site, as discussed later in these representations.

Tarmac owns and controls all of the land, referenced in these wider site submissions, all of which, can be reasonably brought forward for practical completion within five years of securing outline planning permission and reserved matters (both for the employment and residential elements).

This is a material consideration of very substantial weight, given the acknowledged need for employment land in the district and the continuing major deficit in the Council's five year housing land supply position. Ecological enhancements will also be a key element in the green infrastructure provision for this site, to help achieve Biodiversity Net Gain (BNG) and an illustrative Framework Masterplan is attached at Appendix 3 for reference.

In summary, whilst the promoted site at Colney Heath is not currently identified for allocation in the Draft Local Plan, these representations conclude that, on overall balance, that there are exceptional circumstances to support the allocation of Land at Colney Heath by St Albans Council for the mixed-use development proposed, both fronting the A414 and to the rear of Colney Heath High Street.

St Albans Draft Local Plan 2041 – Regulation 19: Representations by Tarmac – Land at Colney Heath and Tyttenhanger

Promoted Land at Tyttenhanger

The mixed-use proposals at Land at Tyttenhanger, as set out in these representations, are primarily landscape led, with over 60% of the site proposed for open space, recreation and semi-natural green space. The remaining area of the site is proposed for employment, commercial and residential land uses, together with a new transport interchange, to help deliver sustainable development within the A414 corridor, accessible to the future MRT, as set out above. The opportunity to create an MRT stopping point on the A414 at this location would similarly encourage more active and sustainable forms of personal travel.

The proposals for the Tarmac site at Tyttenhanger are on land which has been previously used, or is in current active use and is now nearing practical completion. The site is also located close to where other large scale strategic residential development, in the form of a 5000 home new settlement, has been allocated to the immediate south of the site by the adjoining local planning authority (Hertsmere Borough) as part of its emerging Local Plan. Indeed the Tarmac site at Tyttenhanger could provide a direct public transport corridor to the A414 to access the future MRT network. It is incumbent upon St Albans and Hertsmere to fully co-operate in securing the most sustainable active transport outcomes for the new settlement.

The Tarmac proposals at Tyttenhanger, set out in these representations, therefore merit further consideration by St Albans Council and we strongly urge the Council to reconsider the potential and value of this promoted Site. This site similarly meets the definition of 'grey belt' as set out in the draft NPPF. These representations conclude that there are therefore exceptional circumstances to support the allocation of Land at Tyttenhanger by St Albans Council for the mixed-use development proposed.

In overall conclusion, these representations demonstrate that both of Tarmac's sites at Colney Heath and Tyttenhanger are both sustainable and deliverable and so strongly warrant further consideration as part of the Draft Local Plan going forward. The site at Colney Heath offers a significant new employment opportunity in a strategic transport corridor on the A414, which can help to support the future delivery of the MRT. The southern part of the site is highly suitable for

a residential and other similar uses and can assist the Council to meet its required 10% of allocations on small sites of 1ha or less. Colney Heath also offers significant potential for BNG as part of these developments.

The site at Tyttenhanger offers two land parcels, with opportunities for a similar range of uses, in the same strategic corridor, with similar benefits. Part of the site is available now and part of the site will be available later in the Plan period, which provides the Council with a future planned resource. Land at Tyttenhanger also offers significant potential for BNG as part of its development.

Both sites also meet the new definition of 'grey belt' as set out in the draft NPPF, by reason of meeting the basic tests, set out in the draft NPPF consultation. Accordingly on overall balance, there are exceptional circumstances available to St Albans Council to support the allocation of both Land at Colney Heath and Land at Tyttenhanger for the mixed-use development proposed, for the reasons set out above.

Where the Council requires any additional technical or other information, for either site, Tarmac and its consultant team will be able to address any technical queries on request and welcomes the opportunity to engage further with the Council.

Tarmac also requests the right to participate in the future examination of the St Albans Local Plan following its submission to the Secretary of State, pursuant to the matters raised in this Statement.

See attached documents for more information

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

There are exceptional circumstances available to St Albans Council to support the allocation of both Land at Colney Heath and Land at Tyttenhanger for the mixed-use development proposed.

### 372 - Gate Herts (Gypsy & Traveller Empowerment, Hertfordshire)

Submission Number: 372 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Name: Michael Hargreaves

On Behalf Of Company/Organisation: Gate Herts (Gypsy & Traveller Empowerment, Hertfordshire) Name:

Comment Number: 2

**Type:**

* Site

**Number:**

new Sites

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**REDACTED1.0 introduction**

1.1 Gypsies and Travellers are among the most prejudiced against and deprived communities in Britain, see: England's Most Deprived Groups: Gypsies, Roma, Travellers. Communities, EHRC, 2016[1] and Tackling Inequalities Faced by Gypsy Roma and Traveller, House of Commons Women and Inequalities Committee, 2019[2].

1.2 The treatment of Gypsies and Travellers is contrary to various international conventions and the UK Government's commitment to them, see for example the Council of Europe's Advisory Committee on the Framework Convention for the Protection of National Minorities, Fifth Opinion on the UK Government, December 2022. [3]

1.3 There is an accommodation crisis among Gypsies and Travellers that is far more severe than among the settled community and levels of homelessness are far more acute. The stress over sites and planning is a major contributor to anxiety, depression and even suicide. Because

having a secure home is so fundamental to people's lives and to accessing services, without addressing the accommodation shortage, it will not be possible to address the other inequalities in areas such as health, life expectancy, education, and the criminal justice system to which Gypsy people are subject.

1.4 [Sets out structure of attached pdf]

1.5 With Development Plans – as in much of the planning system - the perfect can be the enemy of the good. We are aware of the recent correspondence between Planning Minister, Matthew Pennycook and the Chief Executive of the Planning Inspectorate in which the Minister wrote:

*'Pragmatism should be used only where it is likely a plan is capable of being found sound with limited additional work to address soundness issues. Any pauses to undertake additional work should usually take no more than six months overall.'*

We support this approach. However, the plan is weak and unsound in its coverage of Traveller issues. We identify the minimum essential actions and modifications necessary to make the plan sound. There are other issues that it may not be realistic to address within the time available, and recommend modifications to identify the weaknesses in the policies being put in place that would need to be addressed in a subsequent review of the Plan.

## 2.0 Background to GATE Herts' Involvement

2.1 GATE Herts (https://gateherts.org.uk/) is one of the leading locally based Gypsy and Traveller organisations in England. Through Report Racism GRT https://reportracismgrt.com/ it plays a national role in regard to reporting and supporting the victims of hate crime against Gypsies and Travellers. It is a member of the Moving for Change coalition of Gypsy and Traveller organisations https://www.movingforchange.org.uk/.

2.2 The planning system is central to controlling the supply of accommodation for Gypsy people. Individual families will fund planning applications and appeals etc relating to individual sites. Very few resources have gone into challenging development plans, which can have the potential to address the policy constraints on making more adequate provision, and in some cases weak needs assessments and inadequate allocations have been allowed to go unchallenged in the examination of the plan, or the issues 'kicked down the road'.

2.3 Reflecting its concerns about the working of the planning system Gate Herts has been able to obtain a small amount of resources to engage with the Local Plan teams across Hertfordshire and to challenge the emerging Local Plans. We see Hertfordshire are a critical area. It is part of that ring of counties around London: Essex, Buckinghamshire, Hertfordshire, Kent, Surrey with among the largest Traveller populations, but often the highest levels of conflict reflecting the extent of Green Belt, high land values etc.

2.4 Gate Herts has engaged throughout the local plan process, consistently stressing the same issues.

2.5 We took the opportunity of the 2024 Gypsy and Traveller call for sites to identify a group of sites. We proposed that the sites should be removed from the Green Belt and allocated as Gypsy and Traveller residential sites on the basis of Planning Policy for Traveller Sites para 17. Specifically:

- We recommended that some of the land which we understand to be in the Council's ownership adjoining the Caravan Site, Watling Street, Park Street should be allocated;

- We identified the following sites REDACTED with potential for site extensions and / or for unauthorised development to be authorised: Meadowside; Adjoining 73 Chiswell Green Lane; Mill House Yard; Woodview Lodge; Nuckies Farm; Ardens Rise; Tullochside;
- However, while noting that those sites were in private ownership, and that any development would need to be carried out so as to ensure and guarantee the delivery of Traveller accommodation we supported the principle of the allocation of land for additional Gypsy and Traveller accommodation within the sites promoted through the previous call for sites to the north-west and south of the Barley Mow caravan site; and Adjoining the Ver Meadows caravan site.; and
- We supported the proposal submitted REDACTED to develop land at Luton Lane, Redbourn as a 15 pitch Gypsy & Traveller site.

**7.0 Legal Compliance**

7.1 The implication of the flaws in the Local Plan identified in the above paragraphs, not least in failing to making any allocations for Gypsies and Travellers, means that not only is the plan not sound, it is also not legally compliant on the basis:

- It indirectly discriminates against Gypsies and Travellers (whose ethnicity is a protected characteristic under the Equality Act) without adequate justification, contrary to s.19 of the 2010 Equality Act; and
- Its approach is contrary to the Public Sector Equality Duty under s.149 of the Act.

[ 1 ] https://www.equalityhumanrights.com/sites/default/files/is-england-fairer-2016-most-disadvantaged-groups-gypsies-travellers-roma.pdf

[2] https://publications.parliament.uk/pa/cm201719/cmselect/cmwomeq/360/full-report.html

[3] https://rm.coe.int/0900001680ab55b4

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We are disappointed that the Council has not included any of our proposals in the Regulation 19 Plan. However, central to our case is that to be sound, the plan must include an adequate level of allocations for Gypsy and Traveller residential use. This requires the Council to appraise and bring forward proposals. The sites we have suggested provide a useful starting point for carrying this work out.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Annex 1 Traveller Sites through Local Plan Allocations_[R].pdf
2. Annex 2 Inspectors letter to GNLP re GT sites 190122_[R].pdf
3. Herts Gate Reg 19 Rep 061124_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

GATE Herts is one of the leading locally based Gypsy and Traveller organizations in England and the only significant Gypsy & Traveller organization in Hertfordshire. In our submission the plan is unsound and not legally compliant in regard to provision for Gypsies. We would contribute the lived experience of Gypsies and Travellers and substantial experience of planning for Gypsies and Travellers to the hearings.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

## H1 - North Hemel Hempstead, AL3 7AU

### 97 - Mr Paul Owen

Submission Number: 97 Submission Date: 06/11/24 13:37

Respondent: Company/Organisation: Name: Mr Paul Owen

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Sites in Redbourn and east/north Hemel will cause the Green Belt to disappear between Redbourn and Hemel. Most are in areas categorised as Important and require a compelling reason to build. The only reason stated is for Social or Affordable Housing which surely means the 60% of planned housing not in those categories should not be built on Green Belt as such housing is not compelling bu need but financial.

The impact of all the HGC and West Redbourn proposed has only Ben considered on a site by site basis. A significant proportion of traffic to and from the Sites would coallesce on the same small roads between Hemal and Redbourn, St Albans, Harpenden and the M1. The travel infrastructure barely supports the traffic currently at peak times. Therefore, the impact cannot be considered safe as required.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The individual areas should also be considered in relation to each. Ie if one area is developed the importance of adjacent areas should reconsidered to reflect that.

The traffic plan for each residential site should be considered sequentially in the expected order of start to take in to account the effect of the moving starting position.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

### 111 - Cllr. David Mitchell

Submission Number: 111 Submission Date: 06/11/24 16:01

Respondent: Company/Organisation: Name: Cllr. David Mitchell

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Hemel Garden Communities (HGC) programme is at a very early stage in its concept. 11,000 new houses is a huge project yet there is no substantial evidence to show it is viable and deliverable. It is all on greenbelt land NOT recommended by the ARUP green belt review for development. The land is in the Chiltern Hills and the northern parts are adjacent to the National Landscape which should be protected. It is high quality agricultural land, grade 2 and 3a, which should be reserved for our food security. HGC is not served well by public transport. The four closest rail stations are all several miles away and the bus services are currently poor. The HGC programme is over-reliant on people walking and cycling, with little private parking being made available or new main roads being provided. This would require a huge modal shift which would be difficult to achieve in the time scale. In this respect, HGC a very risky social experiment.The HGC is a long way from the Hemel town centre so the development does not connect well with the rest of Hemel. Over a third of St Albans District's new housing is proposed at HGC which does not connect well

with the rest of the District. The Nickey Line is enthusiastically being put forward as a significant cycle and footpath linking Hemel to Harpenden via Redbourn but currently this route is not fit for purpose. HGC might seem great on paper but the reality of building a new town onto to an existing new town is not good spatial planning.

The site at West Redbourn (B3) has no proper access. The proposed access points are from existing cul-de-sacs and country lanes, and traffic would have to travel across Redbourn Common. This would have a big impact on the existing community.

South of Harpenden Lane, Redbourn (LG4) is mostly a flood plain. This is noted but further work needs to done on the impact new development would have on the existing development. More work needs to be done on the affect development would have on the rare chalk stream that flow through Redbourn, i.e. the River Ver and the River Red.

The broad sites in the Local Plan are proposed on over 700 hectares of greenbelt in total, of which over 500 were not recommended by ARUP for consideration in their green belt review. Half of the SADC green belt sites are in the HGC area, which is a big loss of greenbelt in one area. If HGC goes ahead it would be urban sprawl and lead to coalesence between Redbourn and Hemel Hempstead. It has been asserted that the chosen green belt sites meet the 'exceptional circumstances' criteria for building on the green belt by dint of the need for housing and by building next to existing settlements. However this has not been demonstrated in a way that overcomes all the problems with the HGC programme and the intinsic difficulties of the sites in Redbourn village. The draft Local Plan cannot be considered legal and sound.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

HGC and West Redbourn should not be included in the Local Plan. If they are, much more work needs to be done on the Infrastructure Delivery Plan. A site at NE Redbourn owned by the Lawes Agricultural Trust should be considered instead as it would integrate with Redbourn village much better.

Generally, development should be spread more evenly around the District as this would better meet the needs of St Albans District residents. The lack of public transport and inadequate roads has to be resolved. Maybe the Nickey Line could be a tram line?

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

I am very familiar with the draft Local Plan and have a good working knowledge of planning issues in general. I could add a lot of local knowledge to proceedings particularly the area of the Hemel Gardens Community programme and the sites in Redbourn Village. I am well informed about the District as a whole.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 115 - Mr Geoffrey Coates

Submission Number: 115 Submission Date: 07/11/24 00:58

Respondent: Company/Organisation: Name: Mr Geoffrey Coates

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

St Albans District Council have failed in their duty to cooperate with Redbourn Parish Council. The Parish Council have passed a Local Plan at referendum. The level of building within Redbourn Parish as a whole, and particularly at Hemel Garden Communities, is inconsistent with the policies in that document.

The Parish Council moreover commissioned a professional planning consultant (Troy Planning) to report on the proposals at Reg 18; SADC have given no meaningful consideration to the points raised in that report, despite it clearly warning that the Plan as it stands is incompatible with the NPPF and that the scale of development proposed in Redbourn Parish is unsustainable. SADC has not engaged with the substance of this report.

It is far from clear that SADC have adequately cooperated with Dacorum in drawing up the Hemel Garden Communities plans. Responsibility for provision of key services does not seem clear, despite HGC being fundamentally an extension of Hemel Hempstead conurbation into St Albans District.

Hemel Garden Communities proposals H1 and H2, and the contiguous industrial estate H3, epitomise the failings I have identified elsewhere in my commentary. They make extensive use of Green Belt land without fulfulling due process in seeking its declassification--namely, to establish the exceptional circumstances which would permit that, and to demonstrate that all urban sites (not merely brownfield sites) have been duly considered. The sites they propose for development are identified in SADC's Green Belt Review as the most significant for maintaining the integrity of the Green Belt and its aims.

The proposals at these lcoations are not consistent with a duty to consider climate change as they are inherently car dependent and offer no credible mitigation for that situation.

The proposals at these lcations are inconsistent with traffic policy, notably TRA1, requiring that development not have an adverse effect on traffic flow and safety. No modelling has been offered for the likely impact upon B487 traffic, only a vague expression of faith in the arrival of a modal shift in travel on an unprecedented scale.

Moreover the impact on biodiversity has not been properly evaluated, despite Redbourn being the site of a globally significant chalk stream and a breeding ground for Red Kites, Great Crested Newts and other rare species.

Sewage outflow has polluted our River Ver for more days this year than it hasn't, yet the additional wastewater evolved by this development has not been properly considered. It seems unavoidable that pumping will resume at Friars Wash to feed the demand of 4000 new homes, threatening the water table and with it the very existence of the chalk stream.

On all these grounds, Hemel Garden Communities H1 and H2 (and associated industrial estate H3) are perhaps the least suitable sites for development not only in this Draft Plan but from the entire call for sites. This proposal is a pipe dream conceived in the offices of the Planning Department without practical knowledge of the sites on the ground. It has become the pet project of the department and a coterie of city centre councillors, who see it as a means to displace feasible development from their own wards, and it has been sacralised in those circles to the extent that it requires someone outwith the structures of SADC to point out that the emperor's new clothes are threadbare. Public objection at Reg 18 has been simply ignored in an attempt to push through a Local Plan--any Local Plan--before a new NPPF comes into force.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The removal of proposals H1, H2 and H3 is the only sound way to mitigate the damage of this ill-conceived chimera of a development.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

As stated, SADC have marginalised the voices of residents, treating Reg 18 as a PR opportunity for this Plan and not meaningfully engaging with feedback. Attending the hearing may go some way to restoring the proper role of the citizenry at the heart of planning decision-making.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**145 - Catesby Estates**

Submission Number: 145 Submission Date: 07/11/24 11:13

Respondent: Company/Organisation: Stantec Name: Mr P Derry

On Behalf Of Company/Organisation: Catesby Estates Name:

Comment Number: 8

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Concerns regarding proposed delivery rates as described above. This is combined with growth at Hemel Hempstead within Dacorum Council, where the Emerging Strategy for Growth 2020- 2038 seeks a further 1,550 dwellings to the north of Hemel Hempstead and further safeguarded land for circa 4,000 dwellings post 2038. This presents infrastructure and capacity concerns, particularly at junction 8 of the M1, which will continue to be the main route into Hemel Hempstead.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

While no comment is made on the principle of the allocation, the requirements in the Green Network (part 1) and Engaging Communities (Part 23) sections relating to the development requiring strategic and local public open space provision to be made including sports facilities plus contributions to sports provision within the wider HGC Growth Areas are welcomed. These requirements would be consistent with policies LG1 and LG3 and align with the recommendations in the Council's evidence base for sport (Playing Pitch Strategy) and thereby be consistent with Government policy in paragraph 102 of the NPPF.

### If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?

* No, I do not wish to participate in hearing session(s)

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

DJA's assessment (Appendix 3 to these Representations) clearly demonstrates that:

- The H1 allocations risk coalescence of Redbourn and Hemel Hempstead, especially with the proposed B3 allocation at West Redbourn.
- The Green Belt Review (2023) fails to adequately look at context, in relation to settlement edge
- It also underplays the qualitative character of sits and their surroundings.

**Hemel Garden Communities (HGC)**

The allocation of four housing and employment sites on the northern and eastern edge of Hemel Hempstead is a significant extension to the town that will deliver much needed housing in both Dacorum Borough and St Albans district, it is however inconsistent with the provision of sustainable development for St Albans. Allocating sites on the urban edge of Hemel Hempstead will contribute numerically to the housing requirements of St Albans but it does not align with the Local Plans strategic objectives to '*Prioritise and enable the safe and attractive use of active and sustainable means of transport and reduce the need for people to travel'*and '*Promote adaptation to and mitigation of the Climate Emergency'*by reducing carbon emissions. Nor does the allocation of these sites align with the LCWIP[13] long-term objectives of Climate and Sustainability, Clean Air and Healthy Lifestyles. These allocations will introduce more vehicles onto the A414 between Hemel, St Albans and Watford. Increasing congestion and increasing pollution.

In additional, a raft of highways improvement schemes[14] are identified to enable more effective travel by public transport and it is highlighted that there is no way to 'continuously travel by public transport' along the A414 corridor. It is acknowledged that this contributes to increased car use within the District. If the allocations at Hemel Hempstead are detrimental to the strategy of the draft Local Plan, then a more effective strategy would be to allocate sites to the south of St Albans that will generate contributions to the funding of upgrades to the A414/ North Orbital Road, or to the delivery of the Hertfordshire Essex Rapid Transit (HERT)[15] which is planned along the A414.

Furthermore, the allocation of sites in the south of St Albans could contribute to delivering the improvements to walking and cycling infrastructure identified in the LCWIP which would encourage the use of sustainable modes of transport between Hemel Hempstead and St Albans. The improvements identified in the LCWIP include a long-term aspiration for a segregated cycle route along Hemel Hempstead Road and traffic calming measures along King Harry Lane to provide a safer active travel route. These schemes could be part funded through developer contributions from additional sites allocations in the south of St Albans.

The Hemel Garden Communities are located within the 12.6km Recreational Zone of Influence (ZOI) for the Chilterns Beechwoods SAC which is considered within the Delivery Statement and Local Plan policy LG3 – Hemel Garden Communities Growth Areas Place Principles. The Green Network Vision sets out the creation of significant amounts of SANG and green spaces, and we support the delivery of multifunctional green infrastructure provision to facilitate this.

There is however a potential delivery issue associated with SANG at the HGC. The Council is legally required not to issue decisions within the recreational ZOI until appropriate mitigation is secured through a Mitigation Strategy. It is identified in the Habitats Regulations Assessment[16] that '*whilst not all allocations have a SANG strategy identified, those without a SANG solution in place are not to be occupied until at least year 6 of the Local Plan. The Council has confirmed that they are confident that appropriate SANG solutions will be delivered for all of the relevant sites within the Local Plan'*. If insufficient SANG is identified for all the allocations, then the Council will not legally be able to issue decision on applications submitted at HGC.

Another potential delivery issue is the boundary review of the Chilterns National Landscape[17] that is currently being undertaken by Natural England. Although there are no formal timeframes set out for the review, it is expected that a variation order is to be sought from the Secretary of State in Winter 2025. This could have implications for the housing numbers that can be delivered at the HGC as well as setting back the delivery as the impact of the allocations on the National Landscape are factored into the proposals.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**224 - Redington Capital Limited & CALA Homes**

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Redington Capital Limited and CALA Homes **object** to Part B (Site Allocations) which forms part of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

Redington Capital Limited and CALA Homes conclude that the site allocation selection process undertaken by the Council is unsound. They recommend that the site selection process should be completely reviewed, revised and the draft allocations re-assessed in a transparent and consistent approach particularly in applying the recommendations of the GBR.

In addition to the above, there are a number of other concerning questions regarding some of the Broad Location sites and other housing site allocations chosen by the Council, including:

- Site H1 (1,500 homes) – This is a site located within in the Green Belt (SA170 & 172) and is regarded to strongly meet the purposes of the Green Belt. It is regarded as important in strategic role terms. It was **not recommended** within the Green Belt Review as an area for release but has been included in the Local Plan. This site will only come forward as part of the Hemel Garden Communities Programme which relies on the neighbouring borough's draft Local Plan being made sound!

It is clear from the above that the Council has chosen to allocate site:

- In locations deemed to be of strong importance to the purposes of the Green Belt;
- That are not located within the most accessible and sustainable locations; and
- That are either undeliverable or their capacity has been grossly over-estimated.

This demonstrates that the site allocations strategy adopted by the Council needs to be fundamentally reviewed and revised.

This conclusion is further exacerbated when considering the Council has chosen to ignore other more accessible and sustainable sites in lower tier settlements, including Redington Capital Limited and CALA Homes' site (Land South of Chiswell Green Lane), which:

- Benefits from high levels of accessibility by public transport and to local services (as demonstrated in Section 7 below);
- Has less harm to the purposes of the Green Belt (as demonstrated in Section 1 above);
- Is available and deliverable at a density of development that has previously been supported by the Council's planning officers when recommending approval of application ref: 5/2022/0927 (as demonstrated in Section 7 below);
- Is supported by the Inspector when determining Appeal Decision reference: APP/B1930/W/22/3313110, dated 22nd March 2024; and
- Upheld by the SOS's decision.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council:

- Should be more realistic about its choice of housing sites to deliver its critical housing needs. Some of the current set of site allocations appear to have been included / inflated to "make up the numbers." We therefore strongly recommend that the site allocations are reviewed again and the Council should:
- Remove any sites that are undeliverable;
- Reduce the expected capacity of sites that are obviously constrained and will not therefore delivery the density suggested; and
- Provide evidence to justify all site inclusions and their estimate capacity.
- Include new broad location housing sites that:
- Are located in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and services or will not be used by the district's residents;
- Result in less harm to the purposes of the Green Belt; and
- Are available and deliverable.

Redington Capital Limited and CALA Homes recommends that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing and education land allocation in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

Proposed development sites crossed or in close proximity to NGET assets: Following a review of the above Development Plan Document, we have identified that one or more proposed development sites are crossed or in close proximity to NGET assets. Details of the sites affecting NGET assets are provided below.

**H1 – North Hemel Hempstead -** ZA ROUTE TWR (419 - 522): 400Kv Overhead Transmission Line route: ELSTREE - SUNDON 1

A plan showing details of the site locations and details of NGET assets is attached to this letter. Please note that this plan is illustrative only.

Without appropriate acknowledgement of the NGET assets present within the site, these policies should not be considered effective as they cannot be delivered as proposed; unencumbered by the constraints posed by the presence of NGET infrastructure.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We propose modifications to the above site allocations and/or policies to include wording to the following effect. We propose that these modifications are applied to each of the aforementioned site allocations affected by NGET assets.

**OS1 – Land to the North of Bricket Wood**

*The development will include a strategy forresponding to the NGET Overhead Transmission Cable present within the site,demonstrating how the NGET Design Guide and Principles have been applied at the masterplanning stage and how the impact of the assets has been reduced through good design."*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 248 - Historic England

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 12

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**H1- North Hemel Hempstead, AL3 7AU**

Whilst there are no designated heritage assets within the site, there are a number of grade H listed buildings to the north and east. In addition, the Aubrey's Camp scheduled monument (LEN: 1003520) lies to the east of the site. Any development of the site has the potential to impact these heritage assets by affecting their settings.

We welcome the preparation of the HA. We broadly welcome the inclusion of criterion 16 and 17 in relation to heritage assets and Aubrey's Camp scheduled monument.

Policy wording for site allocations should incorporate HIA recommendations and be clearer, stronger and more specific

We are pleased to see the preparation of high-level Heritage Impact Assessments (HIAs) by SADC and Place Services as well as the preparation of more detailed HIAs for a number of more sensitive sites.

We note that the policies generally include a criterion relating to heritage which is good. However, the criteria are do not always include all of the recommendations from the HIA. Ideally all recommendations should be incorporated into the policy.

The criteria are also quite vague and rather weak ...e.g. `minimise harm', this may include setbacks etc'.

It is important that policies include sufficient information regarding criteria for development. Paragraph 16d of the NPPF states that policies should provide *`a clear indication of how a decision maker should react to a development proposal'.*

Planning Practice Guidance Paragraph: 002 Reference ID: 61-002-20190315Revision date: 15 03 2019 also makes it clear that, *`Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development.'*

Historic England's Advice Note on Site Allocations HEAN3 includes a section on site allocation policies at paragraphs 3.1 - 3.2. It states, `*The level of detail required in a site allocation policy will depend on aspects such as the nature of the development proposed and the size and complexity of the site. However, it ought to be detailed enough to provide information on what is expected, where it will happen on the site and when development will come forward including phasing. Mitigation and enhancement measures identified as part of the site selection process and evidence gathering are best set out within the policy to ensure that these are implemented.*'

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We recommend that criterion 16 would be further improved if amended to read:

*Through Masterplanning the layout and design of development should conserve and where appropriate enhance the significance of the Grade II Listed Holtsmere Manor, the Grade II Listed Great Revel End Farmhouse, the Grade II Listed Barn at Great Revel End Farmhouse and the Grade II Listed Wood End Cottages and their settings; this should include the incorporation of appropriate set backs of development and creation of open spaces.*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 260 - Mr Gerald Eastwood

Submission Number: 260 Submission Date: 08/11/24 08:08

Respondent: Company/Organisation: Name: Mr Gerald Eastwood

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

- Proposed West Redbourn (B3) and Hemel Garden Communities developments will completely remove the current green belt buffer between Redbourn and Hemel Hempstead (only 1km remaining). The whole purpose of the green belt is to prevent urban sprawl, these developments completely go against this policy. Even though the ARUP report commissioned by the council rejected the Hemel Garden Communities development due to coalescence, they have decided to proceed anyway – ignoring the findings. An explanation as to why "exceptional circumstances" exist that justify building on this greenbelt land has still not been provided.
- Have the West Redbourn (B3) site and the Hemel Garden Communities developments been considered together? We haven't seen evidence of this – especially when it comes to the greenbelt.
- Loss of arable land when government should be prioritising self-sufficient food chain. Also damaging to the chalk stream network.
- The West Redbourn (B3) site in particular is a complete abomination; even local housing associations have objected to it. The access proposed will create a huge increase of traffic volume throughout the village – making it lose its village identity and putting significant pressure on already over stretched services and road network.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**11 Policy LG2 (Support for Transformation of Hemel Hempstead)**

**Green Belt**

11.1 The Stage 2 GBR (2023) concludes that Sub-Areas SA-167, SA-168, SA169a, SA-169b, SA-170, SA-171 and SA-172 perform strongly against the NPPF Green Belt purposes. Of these Sub-Areas the GBR recommends that only SA-167, SA-169a and SA-169b should be taken forward for further consideration and there are still concerns raised regarding these Sub Areas in the GBR as set out below. We note that 169a is proposed for release in the Draft Local Plan but 168b is not proposed for release.

11.2 Sub-Areas (SA-168, SA-170, SA-171 and SA-172) form the Broad Locations North Hemel Hempstead and East Hemel Hempstead (North) and are also assessed as 'Important' in terms of their wider impact on the Green Belt.

11.3 Given that the two proposed Broad Locations at North Hemel Hempstead and East Hemel Hempstead (North) have not been recommended to be taken forward for further consideration SACDC and the Local Plan should not be proposing these areas for Green Belt release. **This should effectively remove these two Broad Locations along with their development assumptions which principally consist of a total of 3,100 dwellings.**

...

**Hemel Garden Communities Trajectory**

11.5 Policy LG2 states that "*the Hemel Garden Communities programme will deliver at least 4,300 new homes by 2041 and 5,500 homes in total by 2050, delivering this through a network of new garden communities to the north east and east of the town within St Albans District".*

11.6 Paragraph 75 of the NPPF states that: *"Strategic policies should include a trajectory illustrating the expected rate of housing delivery over the plan period, and all plans should consider whether it is appropriate to set out the anticipated rate of development for specific sites".*

11.7 The Draft Local Plan fails to include a housing trajectory for specific sites (including those in the Hemel Garden Communities) so that consultees can comment on the potential timing of housing delivery and the need for supporting infrastructure that needs to be delivered in close coordination for each site. This makes it rather difficult to comment on any delivery assumptions for particular sites when the Council has not considered this even though it has selected the sites as allocations.

11.8 However, the Draft Local Plan does include a high level housing trajectory (Table 3.2) and we have analysed this due to a lack of more detailed information presented by SACDC.

11.9 Furthermore, we seriously question what the Housing Trajectory is not only for the HGC sites in St Albans District but for those in Dacorum – this is not set out in the Local Plan and is clearly a critical missing piece of information for the overall Local Plan.

11.10 As the Lichfields 'From Start to Finish' evidence (Editions 1 -3) and the Letwin Review (2018) highlight, the delays with the delivery of large development proposals should not be underestimated as there will be many aspects of the housing trajectory that are beyond the immediate control of a local planning authority. We provide an analysis of this below.

**Development Lead in Times**

11.11 The trajectory is particularly unrealistic in terms of when it assumes that housing delivery will commence at the Hemel Garden Communities. The first delivery year assumed is 2029/30 with 100 dwellings. This is in four years from now.

11.12 In the recently published *'Start to Finish – How quickly do large-scale housing sites deliver"* 3rd Edition, September 2024 (Lichfields) (see Appendix B of these representations) provides an update on important research on the delivery of strategic sites across England. Its findings are that for sites of 2,000 dwellings or more (like Hemel Garden Communities) that it takes between 4 and 7.9 years from the validation of the first planning application to the first dwelling being delivered (see Table below).

*Figure 11.3: 'Start to Finish – How quickly do large-scale housing sites deliver" 3rd Edition, September 2024 (Lichfields)*

11.13 The Report updates the previous report on the average time taken from gaining outline permission to the completion of the first dwelling on site (see below). This indicates that it takes on average around 3 to 4.6 years from the grant of outline planning permission to deliver the first dwelling. It concludes that at the time of its granting, an outline permission will deliver limited housing in a five-year period.

*Figure 11.4: 'Start to Finish – How quickly do large-scale housing sites deliver"* 3rd Edition, September 2024 (Lichfields)

11.14 As Policy LG2 (Support to Transformation of Hemel Hempstead) states all development in the HGC Programme Area must follow a planned and coordinated approach to growth and infrastructure and is expected to be in accordance with:

- *Local Plan Infrastructure Delivery Plans (IDPs)*
- *Hemel Garden Communities Spatial Vision*
- *HGC Framework Plan evidence base*
- *HGC Concept Plan*
- *HGC Local Plan Policies,*
- *Supporting SPDs and Design Codes.*

11.15 It requires that "Developers and promoters in the HGC Growth Areas must work together and closely with the Councils to secure a collaboration agreement which ensures an integrated and seamless approach across site boundaries. Critical infrastructure necessary to support development must be delivered ahead of occupation. Proposals must not prejudice or impede the provision of wider infrastructure required within the HGC Programme Area. Infrastructure, contributions and wider funding will be required to deliver on and offsite infrastructure, in accordance with the above documents."

11.16 Clearly the HGC is highly complex with many authorities and parties involved in the planning and delivery process. There is also rightly a commitment to working closely with the local communities as part of this process. All of this suggests that the Lichfields research is very much a 'best case scenario' in relation to the HGC Broad Locations.

11.17 **So, we ask, what is SACDC's assumption about each of the proposed four Broad Locations at Hemel Garden Communities (H1, H2, H3, H4) in terms of the following:**

- When will the Design Codes and SPDs will be prepared and approved?
- When will the pre-application process take place including consultation and engagement with relevant consultees and stakeholders?
- When will the preparatory site works, to be informed by site-specific survey recommendations and monitoring before commencement take place?
- When will an outline application be submitted and approved for each Broad Location?
- When will a full application will be submitted and approved?
- When will reserved matters applications be submitted and approved?
- There is reference in Policy LG3 (Hemel Garden Communities Growth Areas Place Principles) to the potential need to use Compulsory Purchase Orders (CPO) powers to ensure infrastructure is provided in a timely manner. What are the time estimates made for this in the housing trajectory?
- When will the S106 for each parcel is expected to be agreed?
- When will the pre-commencement conditions for each parcel be agreed by SACDC?
- What are SACDC's assumptions for the opening up works required for each of the sites and combined?
- What infrastructure is required to be funded and / or delivered prior to commencement for each of the broad locations?
- What is the planning approval process and timing for each piece of infrastructure?
- When will conditions be discharged?

11.18 SACDC needs to answer these questions so that a realistic housing trajectory can be prepared as the current version will lead to a shortfall in housing in the District over the first five years upon adoption. As a result, the borough will be subject to planning appeals due to a lack of a five-year housing land supply. With the Local Plan still yet to be submitted to the Secretary of State there is still an opportunity for SACDC to allocate additional housing sites to ensure that the shortfall of anticipated delivery is addressed.

*Figure 11.6: Timeline for the delivery of strategic housing sites – Start to Finish Lichfields (2024)*

11.19 The additional and important benefit of this approach is that the SPDs and planning applications at Hemel are not 'rushed through' in hopes that the development will meet unrealistic commencement dates.

11.20 The report concludes that for schemes of 2,000+ dwellings the mean years from validation of the first planning application to the first dwelling being completed is 6.6 years.

11.21 Therefore, considering this research, RPC is concerned with the proposed housing trajectory, as it would not be realistic to rely on the Hemel Garden Communities development (over 4,300 dwellings) would deliver its first homes in year 6 since the adoption of the Local Plan.

*Figure 11.5: Overall lead-in times for sites of 100 dwellings or more, including time taken for outline consent size by size. Source: Lichfields report 'Start to Finish' (2024).*

11.22 Hemel Garden Communities is clearly a cross-boundary joint working project between SACDC, Dacorum, Herts County Council and others. The South West Hertfordshire Joint Strategic Plan is being prepared with Dacorum, Hertsmere, Three River and Watford Councils and there is

no agreed timetable for taking this forward (as set out earlier in our representations). This complexity and cross-boundary working is likely to slow the process down even further so the assumptions above should be considered a 'best case' scenario.

....

**North Hemel Hempstead Landscape Assessment (September 2024)**

19.7 RPC is concerned with the landscape assessment provided in support of the North Hemel Hempstead allocation and particularly with the assessment section that covers the parcels of land within St Albans District.

*Figure 19.1: Topography shown on the North Hemel Hempstead Landscape Assessment (2024).*

19.8 Parcels F and G (Upper Ver Valley) are located within the gap between Hemel Hempstead and Redbourn, providing an important physical and perceptual gap between the two settlements. RPC agrees with the Landscape Assessment in terms of their perceptual qualities, such as presence of human influence, traffic noise, disperse development, etc. that contribute to a low tranquillity value, but we are of the view that the Landscape Assessment has a simplified view of the sensitivity of parcels F and G.

19.9 Parcel G is given a moderate sensitivity from a landscape perspective, but the assessment does not give sufficient weight to the presence of the Aubreys Scheduled Monument within the area of study and it does not mention the close location of Redbourn Conservation Area, only over 200 metres distant from Parcel G. None of the views identified in the assessment explore the potential visual impact to and from the Redbourn Conservation Area, which includes Grade I, II* and II Listed Buildings. RPC is concerned that this could affect the sensitivity of Parcel F and that therefore, the landscape assessment should be reviewed. Views in the area are probable given the sloping topography of Parcel G and the existing public rights of way through the area and in the vicinity.

19.10 The North Hemel Hempstead Landscape Assessment (2024) does not follow a careful order in the assessment of landscape and visual impacts. It moves directly from identifying landscape sensitivities to design development considerations and recommendations. However, it does not explain the actual impacts caused by the proposed development proposal. How is that mitigation measures are being proposed in the absence of an evidence-based and robust assessment of impact before mitigation?

19.11 The report concludes with potential impacts or effects on landscape and views (in the absence of any mitigation), but these are identified only after a design approach, developable areas and mitigation measures have been incorporated into the design. We are concerned that this approach does not provide a clear picture of the impact of development in principle, as to understand its effects on landscape, and the recommend mitigation measures. If there is no identified harm first, how is that mitigation is being suggested?

19.12 It is important to raise that the assessment acknowledges that the gap between the settlements of Hemel Hempstead and Redbourn are important in landscape and Green Belt terms, however, it yet supports the development of most of Parcel F. The North Hemel Hempstead Landscape Assessment (2024) fails to consider the development's cumulative effects on the gap between the two settlements in light of the existing developments in Parcel G, existing infrastructure and the Draft Local Plan allocations at West of Redbourn for 545 dwellings (Site B3) and East Hemel Hempstead (North) for 1,600 dwellings (Site H2).

19.13 Furthermore, the proposed mitigation shown in the Potential Landscape Structure and Developable Extents relies significantly on landscaping screening to reduce the visual impact of the proposed development. This is proposed with new structure planting (bright green below) in the form of tree groups, woodland groups, parkland style tree planting in fields. This is not an adequate approach as it does not explore first the avoidance of harm, which is the necessary first

step in addressing landscape impact. Then, the proposed mitigation of tree planting is not also temporary and not a long term or necessarily of all-seasons durability, but it is also contrary to local landscape character. Proposals for new screening include parkland style tree planting, but this is not a parkland, which is a formalised and designed landscape. This area of the district is a deeply rural and agricultural working environment, with strong links with the rural character of the landscape to the north (Chilterns National Landscape). The proposed mitigation has the potential impact of detracting from the established and contextual landscape character only due to the need for significant screening of a development that would, in other circumstances, not be acceptable as it leads to significant impacts in the landscape.

*Figure 19.2: Potential Landscape Structure and Developable Extents.*

19.14 Additionally, there is no pre-development scenario assessment of the areas of visual sensitivity and there is also a lack of identification key/locally important views, with prominence in the list of viewpoints assessed. Surely the views from any public right of way should not be assessed equally as the views from a gateway into the settlement, the top of a ridge or from a Schedule Monument or Listed Building. There is also no assessment of views out of the site considered for development.

19.15 It is also unclear if the proposed mitigation in the North Hemel Hempstead Landscape Assessment (2024) is incorporated into the allocation policy and concept plan. The plan (see below) does not offer a clear correlation of the mitigation shown on the Landscape Assessment. The mitigation proposed on the Broad Locations – Landscape + Visual Appraisal (September 2024), whilst consistent in some, is not completely coordinated with the mitigation proposed in the North Hemel Hempstead Landscape Assessment (2024). Why is this? The Council provides no justification for having several assessments that overlap each other and a number of mitigation measures, that do not always coincide from one document to another. For instance, the Landscape Assessment recommends the development to "*maintain the physical and visual separation between Hemel Hempstead and Redbourn by keeping development behind the local ridgeline associated with Great Revel End Farm and maintaining a sense of separation along Hemel Hempstead Road*". Notwithstanding this, the landscape and visual appraisal sheets on the Broad Locations – Landscape + Visual Appraisal (September 2024) does not include this recommendation and continue failing to consider the cumulative impact of the development with the West of Redbourn B3 allocation for 545 dwellings.

19.16 In conclusion, RPC considers that the North Hemel Hempstead Landscape Assessment (2024) is flawed and it is incomplete for the reasons already explained. In this case, we cannot support this document and the allocation of the proposed sites, which is **unsound** due to the flawed landscape assessment in which it is based on.

*Figure 19.3: Indicative Concept Plan for the HGC Growth Areas (Draft Local Plan)*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Given that the two proposed Broad Locations at North Hemel Hempstead and East Hemel Hempstead (North) have not been recommended to be taken forward for further consideration SACDC and the Local Plan should not be proposing these areas for Green Belt release. **This should effectively remove these two Broad Locations along with their development assumptions which principally consist of a total of 3,100 dwellings.**

The trajectory is particularly unrealistic in terms of when it assumes that housing delivery will commence at the Hemel Garden Communities. The first delivery year assumed is 2029/30 with 100 dwellings.

In conclusion, RPC considers that the North Hemel Hempstead Landscape Assessment (2024) is flawed and it is incomplete for the reasons already explained. In this case, we cannot support this document and the allocation of the proposed sites, which is unsound due to the flawed landscape assessment in which it is based on.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

---

**286 - Bloor Homes**

Submission Number: 286 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Quod Name: Alex Hamlet

On Behalf Of Company/Organisation: Name: Bloor Homes

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Please refer to our representation letter which is submitted alongside this form and details why the Local Plan is legally compliant and sound but requires some modifications.

**Site Allocation H1 – North Hemel Hempstead, AL3 7AU**

1.1 Quod, on behalf of Bloor Homes ("Bloor"), welcomes the opportunity to submit representations in response to the St Albans District Council ("SADC") Draft Local Plan Regulation 19 consultation in relation to draft Site Allocation H1 – North Hemel Hempstead, AL3 7AU ("the Site").

**Introduction**

1.2 Bloor is the freehold owner of the northern area of draft Site Allocation H1 – North Hemel that also forms part of the emerging Hemel Garden Communities ("HGC"). Blooris fully committed to the sustainable delivery of this Site and of the new garden community which is intended to be delivered as a part of the UK Government's Garden Communities Programme.

1.3 The land subject to these representations was previously assessed through the Call for Sites process in 2021 and the Regulation 18 consultation in 2023. Bloor is pleased to see that North Hemel Hempstead remains allocated in the Draft Local Plan Site Allocations for the provision of 1,500 homes in total (at least 1,125 in Plan period).

1.4 Draft Site Allocation H1 measures 152.96 ha. A plan of draft Site Allocation H1 – North Hemel Hempstead is provided below, identifying the land ownership of the Site.

Figure 1: The Site (Draft Allocation H1 shown in red, Pigeon's land shown in dark blue and Bloor Homes land shown in light green)

***See supporting document: North Hemel Hempstead Regulation 19 Representation Bloor for figure***

1.5 As show in Figure 1, Pigeon (Hemel Hempstead) Ltd ("Pigeon") and Bloor Homes ("Bloor") control the majority of the land within draft Site Allocation H1 – North Hemel Hempstead.

1.6 As demonstrated within the Vision and Delivery Document submitted at the Regulation 18 consultation in 2023, Pigeon and Bloor are able to deliver the essential policy requirements for draft Site Allocation H1 – North Hemel Hempstead within the land it controls. This Vision and Delivery Document has also been submitted alongside these Regulation 19 representations.

***See supporting document: Hemel Hempstead Vision and Delivery Statement***

1.7 The Site represents a deliverable, technically unconstrained and a sustainable location for new development. The Site's location adjoining to Hemel Hempstead is well connected and benefits from direct linkages via the B487 to the A5183 Dunstable Road and M1. The Site is well connected to the existing built-up area both in terms of its relationship with adjoining land uses and with regards to accessibility to services, employment, facilities, and public transport links.

1.8 The Sustainability Appraisal (September 2024) that supports the draft Local Plan demonstrates that there are a range of economic, environmental and sustainable benefits that justify the release of the Site from the Green Belt in order to meet SADC's housing needs. Pigeon and Bloor developed a draft masterplan for the Site that was submitted within the Vision and Delivery Statement that supported the Regulation 18 consultation response in 2023. The draft masterplan demonstrates that the Site can be delivered in accordance with the requirements of draft Site Allocation H1 and demonstrates that Pigeon and Bloor are committed to delivering a sustainable, mixed community that truly reflects garden community principles and where people aspire to live. Any future development of the Site can be well integrated into the townscape and landscape. As identified in the Vision and Delivery Statement, there are no environmental factors that would render the North Hemel Hempstead Broad Location unsuitable for the proposed scheme.

1.9 This letter sets out Bloor Homes's representation on the policies within the Draft Local Plan and provides responses on key issues pertinent to the draft Site Allocation H1 – North Hemel Hempstead. Whilst these representations have been prepared on behalf of Bloor, Bloor is committed to continue working collaboratively with the other landowners as needed. This includes joint working with Pigeon, who control the majority of the remainder of the land within the draft Site Allocation H1 – North Hemel Hempstead.

1.10 These representations are structured as follows:

- Section 1 – responds to the draft Site Allocations document
- Section 2 – responds to the policies contained within the Regulation 19 draft Local Plan
- Section 3 – responds to the draft evidence base and supporting documents

**Section 1**

**Response to Draft Site Allocations (Part B of SADC Local Plan) – H1 North Hemel Hempstead**

**Draft Site Allocation H1**

*Figure 2: Extract from Draft Local Plan Part B – Site Allocations (H1 – North Hemel Hempstead)*

***See supporting document: North Hemel Hempstead Regulation 19 Representation Bloor***

2.1 The allocation not only represents a sustainable location for development in support of SADC's Local Plan and meeting it's own housing requirements but the Site is also critical to the development of the emerging HGC proposal and has an important role in supporting the delivery of 11,000 homes and 10,000 new jobs by 2050 across SADC and DBC.

2.2 Draft Site Allocation H1 – North Hemel Hempstead forms an important component of the wider HGC development, provides the eastern access on to Redbourn Road for the strategic sustainable movement corridor on which HGC relies, and therefore, the timely delivery of the wider HGC.

2.3 SADC is aware that the (now former) Secretary of State for Housing, Communities and Local Government wrote to SADC emphasising the importance of having an up-to-date Local Plan in March 2018 and again in December 2023. The Deputy Prime Minister most recently (30 July 2024) highlighted the Government's "goal has to be for universal coverage of ambitious local plans as quickly as possible" and stated that "there is not only a professional responsibility but a moral obligation to see more homes built". The Deputy Prime Minister also wrote to all local authority leaders on the same day and stated "the government's work is urgent, and in few areas is that urgency starker than in housing". SADC's aim of submitting the Local Plan for Examination by December 2024 is supported and reflects the urgent need to deliver more homes within SADC.

2.4 Approximately 30% of new residential growth in SADC is proposed to be located within HGC. The location of draft Site Allocation H1 – North Hemel Hempstead on the eastern edge of Hemel Hempstead represents a highly sustainable location for a high quality landscape and design-led neighbourhood to help meet the housing requirements of the local area and help meet the transformational objectives for Hemel Hempstead as part of the wider HGC proposals.

2.5 Bloor fully supports the proposed allocation, but requests that amendments are made to the specific policy wording of draft Site Allocation H1 – North Hemel Hempstead to support the timely delivery of the development. These are as follows, with reference to the numbered paragraphs in the draft allocation:

- **Draft allocation boundary**– As noted in Section 1 of this letter, there is a parcel of land within the centre of draft Site Allocation H1 – North Hemel Hempstead that is excluded from the allocation and is owned by Mr and Mrs Sill. This land is retained as part of the Green Belt and would not seem to be required to deliver draft Site Allocation H1. Immediately to the west of this land is a narrow parcel of land that is not controlled by Pigeon or Bloor, as shown in Figure 1 and 3. It is

requested that this land is excluded from draft Site Allocation H1. The exclusion of this land will not impact Pigeon and Bloor's ability to deliver all policy requirements for draft Site Allocation H1 – North Hemel Hempstead within the land it controls.

*Figure 3 - Extract of draft Site Allocation H1 – North Hemel Hempstead boundary* –showing Parcel of land requested to be removed from draft allocation boundary

***See supporting document: North Hemel Hempstead Regulation 19 Representation Bloor***

▪ **Proposed Use**– Bloor fully supports the proposed allocation for 1,500 homes. However, the allocation states that approximately 375 homes will be delivered post-2041. Paragraph 60 of the National Planning Policy Framework ("NPPF") (December 2023) states that housing should be significantly boosted, and SADC has a substantial backlog of unmet housing need. During the monitoring years 2021/22 and 2022/23 a total of 314 and 401 dwellings were completed respectively. This figure is substantially lower than the figure calculated using the Government's standard methodology of 885 dwellings per annum.

Under the proposed changes to the NPPF, SADC's annual housing need would rise to 1,544 dwellings per annum. It would be inconsistent with the scale and urgency of housing need if the Plan was to artificially defer development of allocated sites. It is requested that the policy wording is clarified so that it states that there is no restriction on the delivery of all 1,500 homes within the Plan period providing that any future application can demonstrate, through technical assessment work, that the number of homes proposed within the development is acceptable.

▪ **Para 1 - Sport provision**– the allocation makes reference to including sports facilities under paragraph 1 and also includes contributions to health and sport provision within the wider HGC Growth Areas under paragraph 23. Bloor support the delivery of sports facilities but it is important to recognise the financial commitment being asked in both delivery and contributions to sports facilities. The "Appendix A.1 SADC Infrastructure Schedule (September 2024)" expects draft Site Allocation H1 – North Hemel Hempstead to contribute £2,313,945 for sports provision in HGC. It would be expected that any sports facilities delivered as part of the allocation would reduce the financial contributions for sports provision in the wider HGC.

▪ **Para 5 - Significant Publicly Accessible Green Area and updated site boundary**–the updated wording from the Regulation 18 draft Plan is welcomed with the reference to Country Park having been removed. The expansion of the allocation boundary to include additional land to the east is also welcomed as this area will be able to be utilised for Suitable Alternative Natural Greenspace ("SANG") for the Chilterns Beechwoods Special Area of Conservation ("SAC") and to deliver Biodiversity Net Gain ("BNG") and sports provision required to be delivered under paragraph 1.

▪ **Para 11 - Extra-care facilities** states that the allocation should deliver two extra care facilities comprising of 70-80 self-contained units in each facility, one 70-80 bed nursing home and 6 supported living units for people with disabilities. As reflected in the representations submitted at the Regulation 18 stage (September 2023), there are a number of ways in which the needs of older people can be met, as set out within the sub text of draft Policy HOU3 and Planning Practice Guidance ("PPG") Paragraph: 010 Reference ID: 63-010-20190626. Therefore, we would suggest that the allocation wording is revised to remove specific reference to "extra-care" and instead state "specialist housing for older people". This includes housing with support (retirement living and / or sheltered housing) and housing with care (extra care housing and / or housing with care), residential care homes, and other appropriate forms of accommodation. This provides the flexibility to deliver accommodation that provides variety and meets demand, while meeting SADC's requirement for specialist accommodation.

▪ **Para 12 – Integrated Mobility Hub**– we recommend that paragraph 12 be split into two parts, to differentiate between education needs and the mobility hub.

▪ **Para 13 – Transport** - should refer to a new gateway along the B487 Hemel Hempstead Road, not Redbourn Road (the same applies to H2 East Hemel). The road name changes to the east of Holtsmere End Lane.

▪ **Infrastructure provision**– The "Appendix A.1 SADC Infrastructure Schedule (September 2024)" highlights the contributions draft Site Allocation H1 – North Hemel Hempstead will be expected to make.

Bloor would highlight that any planning obligations be in accordance with Regulation 122 of The Community Infrastructure Levy Regulations 2010, whereby a planning obligation may only constitute a reason for granting planning permission for the development if the obligation is necessary to make the development acceptable in planning terms, is directly related to the development and is fairly and reasonably related in scale and kind to the development.

....

**Conclusion**

5.1 Overall, Bloor strongly supports the draft Site Allocation H1 – North Hemel Hempstead, AL3 7AU. The Site represents a deliverable, technically unconstrained and a sustainable location for new development. The Site's location adjoining to Hemel Hempstead is well connected and benefits from direct linkages via the B487 to the A5183 Dunstable Road and M1. The Site is well connected to the existing built-up area both in terms of its relationship with adjoining land uses and with regards to accessibility to services, employment, facilities, and public transport links.

5.2 Draft Site Allocation H1 – North Hemel Hempstead is important in the early delivery of the St Albans Local Plan housing provision. Draft Site Allocation H1 – North Hemel Hempstead forms an important component of the wider HGC development, provides the eastern access on to Redbourn Road for the strategic sustainable movement corridor on which HGC relies, and therefore, the timely delivery of the wider HGC.

5.3 Bloor is committed to delivering this Site and to working collaboratively with SADC, DBC and other landowners with interests in the draft Site Allocation H1 – North Hemel Hempstead and the wider HGC area to develop the strategy for coordinated, sustainable development. However, as set out within these representations, some changes to the draft policies are required to help facilitate the delivery of Site Allocation H1 – North Hemel Hempstead, HGC and the wider objectives set out in the Draft Local Plan.

5.4 Given the pivotal role of draft Site Allocation H1 – North Hemel Hempstead in delivering the Local Plan strategy, and having regard to the nature of these representations, Bloor respectfully requests the right to appear and be heard at the Local Plan Examination Hearing session(s).

5.5 We trust that these representations are helpful and look forward to participating in the forthcoming Examination including attendance at relevant Hearing Sessions. Should you have any questions about these representations, or require any additional information, please do not hesitate to contact me or my colleague John Rhodes.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Please refer to our representation letter which is submitted alongside this form which details proposed modifications to policies and recommended revised wording ...

Proposed modifications to Draft Site Allocations (Part B of SADC Local Plan) – H1 North Hemel Hempstead are set out in Section 2 of the representation ...

- **Draft allocation boundary**– As noted in Section 1 of this letter, there is a parcel of land within the centre of draft Site Allocation H1 – North Hemel Hempstead that is excluded from the allocation and is owned by Mr and Mrs Sill. This land is retained as part of the Green Belt and would not seem to be required to deliver draft Site Allocation H1. Immediately to the west of this land is a narrow parcel of land that is not controlled by Pigeon or Bloor, as shown in Figure 1 and 3 (***See supporting document: North Hemel Hempstead Regulation 19 Representation Bloor)*** It is requested that this land is excluded from draft Site Allocation H1. The exclusion of this land will not impact Pigeon and Bloor's ability to deliver all policy requirements for draft Site Allocation H1 – North Hemel Hempstead within the land it controls.

  **Proposed use:** It is requested that the policy wording is clarified so that it states that **there is no restriction on the delivery of all 1,500 homes within the Plan period** providing that any future application can demonstrate, through technical assessment work, that the number of homes proposed within the development is acceptable.
- **Para 1 - Sport provision** – the allocation makes reference to including sports facilities under paragraph 1 and also includes contributions to health and sport provision within the wider HGC Growth Areas under paragraph 23. Pigeon support the delivery of sports facilities but it is important to recognise the financial commitment being asked in both delivery and contributions to sports facilities.
- **Para 11 - Extra-care facilities** - Therefore, we would suggest that the allocation wording is revised to remove specific reference to "extra-care" and instead state "**specialist housing for older people"**
- **Para 12 – Integrated Mobility Hub**– we recommend that paragraph 12 be split into two parts, to differentiate between education needs and the mobility hub.
- **Para 13 – Transport** - should refer to a new gateway along the B487 **Hemel Hempstead Road**, not Redbourn Road (the same applies to H2 East Hemel). The road name changes to the east of Holtsmere End Lane.
- **Infrastructure Provision -** Bloor would highlight that any planning obligations be in accordance with Regulation 122 of The Community Infrastructure Levy Regulations 2010, whereby a planning obligation may only constitute a reason for granting planning permission for the development if the obligation is necessary to make the development acceptable in planning terms, is directly related to the development and is fairly and reasonably related in scale and kind to the development.

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Please refer to our representation letter which is submitted alongside this form and details why the Local Plan is legally compliant and sound but requires some modifications.

**Site Allocation H1 – North Hemel Hempstead, AL3 7AU**

1.1 Quod, on behalf of Pigeon (Hemel Hempstead) Ltd ("Pigeon"), welcomes the opportunity to submit representations in response to the St Albans District Council ("SADC") Draft Local Plan Regulation 19 consultation in relation to draft Site Allocation H1 – North Hemel Hempstead, AL3 7AU ("the Site").

**Introduction**

1.2 Pigeon is the freehold owner of the northern area of draft Site Allocation H1 – North Hemel that also forms part of the emerging Hemel Garden Communities ("HGC"). Pigeon is fully committed to the sustainable delivery of this Site and of the new garden community which is intended to be delivered as a part of the UK Government's Garden Communities Programme.

1.3 The land subject to these representations was previously assessed through the Call for Sites process in 2021 and the Regulation 18 consultation in 2023. Pigeon is pleased to see that North Hemel Hempstead remains allocated in the Draft Local Plan Site Allocations for the provision of 1,500 homes in total (at least 1,125 in Plan period).

1.4 Draft Site Allocation H1 measures 152.96 ha. A plan of draft Site Allocation H1 – North Hemel Hempstead is provided below, identifying the land ownership of the Site.

Figure 1: The Site (Draft Allocation H1 shown in red, Pigeon's land shown in dark blue and Bloor Homes land shown in light green)

***See supporting document: North Hemel Hempstead Regulation 19 Representation Pigeon for figure***

1.5 As show in Figure 1, Pigeon (Hemel Hempstead) Ltd ("Pigeon") and Bloor Homes ("Bloor") control the majority of the land within draft Site Allocation H1 – North Hemel Hempstead.

1.6 As demonstrated within the Vision and Delivery Document submitted at the Regulation 18 consultation in 2023, Pigeon and Bloor are able to deliver the essential policy requirements for draft Site Allocation H1 – North Hemel Hempstead within the land it controls. This Vision and Delivery Document has also been submitted alongside these Regulation 19 representations.

***See supporting document: Hemel Hempstead Vision and Delivery Statement***

1.7 The Site represents a deliverable, technically unconstrained and a sustainable location for new development. The Site's location adjoining to Hemel Hempstead is well connected and benefits from direct linkages via the B487 to the A5183 Dunstable Road and M1. The Site is well connected to the existing built-up area both in terms of its relationship with adjoining land uses and with regards to accessibility to services, employment, facilities, and public transport links.

1.8 The Sustainability Appraisal (September 2024) that supports the draft Local Plan demonstrates that there are a range of economic, environmental and sustainable benefits that justify the release of the Site from the Green Belt in order to meet SADC's housing needs. Pigeon and Bloor developed a draft masterplan for the Site that was submitted within the Vision and Delivery Statement that supported the Regulation 18 consultation response in 2023. The draft masterplan demonstrates that the Site can be delivered in accordance with the requirements of draft Site Allocation H1 and demonstrates that Pigeon and Bloor are committed to delivering a sustainable, mixed community that truly reflects garden community principles and where people aspire to live. Any future development of the Site can be well integrated into the townscape and landscape. As identified in the Vision and Delivery Statement, there are no environmental factors that would render the North Hemel Hempstead Broad Location unsuitable for the proposed scheme.

1.9 This letter sets out Pigeon's representation on the policies within the Draft Local Plan and provides responses on key issues pertinent to the draft Site Allocation H1 – North Hemel Hempstead. Whilst these representations have been prepared on behalf of Pigeon, Pigeon is

committed to continue working collaboratively with the other landowners as needed. This includes joint working with Bloor, who control the majority of the remainder of the land within the draft Site Allocation H1 – North Hemel Hempstead.

1.10 These representations are structured as follows:

- Section 1 – responds to the draft Site Allocations document
- Section 2 – responds to the policies contained within the Regulation 19 draft Local Plan
- Section 3 – responds to the draft evidence base and supporting documents

**Section 1**

**Response to Draft Site Allocations (Part B of SADC Local Plan) – H1 North Hemel Hempstead**

**Draft Site Allocation H1**

*Figure 2: Extract from Draft Local Plan Part B – Site Allocations (H1 – North Hemel Hempstead)*

***See supporting document: North Hemel Hempstead Regulation 19 Representation Pigeon***

2.1 The allocation not only represents a sustainable location for development in support of SADC's Local Plan and meeting it's own housing requirements but the Site is also critical to the development of the emerging HGC proposal and has an important role in supporting the delivery of 11,000 homes and 10,000 new jobs by 2050 across SADC and DBC.

2.2 Draft Site Allocation H1 – North Hemel Hempstead forms an important component of the wider HGC development, provides the eastern access on to Redbourn Road for the strategic sustainable movement corridor on which HGC relies, and therefore, the timely delivery of the wider HGC.

2.3 SADC is aware that the (now former) Secretary of State for Housing, Communities and Local Government wrote to SADC emphasising the importance of having an up-to-date Local Plan in March 2018 and again in December 2023. The Deputy Prime Minister most recently (30 July 2024) highlighted the Government's "goal has to be for universal coverage of ambitious local plans as quickly as possible" and stated that "there is not only a professional responsibility but a moral obligation to see more homes built". The Deputy Prime Minister also wrote to all local authority leaders on the same day and stated "the government's work is urgent, and in few areas is that urgency starker than in housing". SADC's aim of submitting the Local Plan for Examination by December 2024 is supported and reflects the urgent need to deliver more homes within SADC.

2.4 Approximately 30% of new residential growth in SADC is proposed to be located within HGC. The location of draft Site Allocation H1 – North Hemel Hempstead on the eastern edge of Hemel Hempstead represents a highly sustainable location for a high quality landscape and design-led neighbourhood to help meet the housing requirements of the local area and help meet the transformational objectives for Hemel Hempstead as part of the wider HGC proposals.

2.5 Pigeon fully supports the proposed allocation, but requests that amendments are made to the specific policy wording of draft Site Allocation H1 – North Hemel Hempstead to support the timely delivery of the development. These are as follows, with reference to the numbered paragraphs in the draft allocation:

- **Draft allocation boundary**– As noted in Section 1 of this letter, there is a parcel of land within the centre of draft Site Allocation H1 – North Hemel Hempstead that is excluded from the allocation and is owned by Mr and Mrs Sill. This land is retained as part of the Green Belt and would not seem to be required to deliver draft Site Allocation H1. Immediately to the west of this land is a narrow parcel of land that is not controlled by Pigeon or Bloor, as shown in Figure 1 and 3. It is requested that this land is excluded from draft Site Allocation H1. The exclusion of this land will not impact Pigeon and Bloor's ability to deliver all policy requirements for draft Site Allocation H1 – North Hemel Hempstead within the land it controls.

*Figure 3 - Extract of draft Site Allocation H1 – North Hemel Hempstead boundary* –showing Parcel of land requested to be removed from draft allocation boundary

***See supporting document: North Hemel Hempstead Regulation 19 Representation Pigeon***

▪ **Proposed Use**– Pigeon fully supports the proposed allocation for 1,500 homes. However, the allocation states that approximately 375 homes will be delivered post-2041. Paragraph 60 of the National Planning Policy Framework ("NPPF") (December 2023) states that housing should be significantly boosted, and SADC has a substantial backlog of unmet housing need. During the monitoring years 2021/22 and 2022/23 a total of 314 and 401 dwellings were completed respectively. This figure is substantially lower than the figure calculated using the Government's standard methodology of 885 dwellings per annum.

Under the proposed changes to the NPPF, SADC's annual housing need would rise to 1,544 dwellings per annum. It would be inconsistent with the scale and urgency of housing need if the Plan was to artificially defer development of allocated sites. It is requested that the policy wording is clarified so that it states that there is no restriction on the delivery of all 1,500 homes within the Plan period providing that any future application can demonstrate, through technical assessment work, that the number of homes proposed within the development is acceptable.

▪ **Para 1 - Sport provision**– the allocation makes reference to including sports facilities under paragraph 1 and also includes contributions to health and sport provision within the wider HGC Growth Areas under paragraph 23. Pigeon support the delivery of sports facilities but it is important to recognise the financial commitment being asked in both delivery and contributions to sports facilities. The "Appendix A.1 SADC Infrastructure Schedule (September 2024)" expects draft Site Allocation H1 – North Hemel Hempstead to contribute £2,313,945 for sports provision in HGC. It would be expected that any sports facilities delivered as part of the allocation would reduce the financial contributions for sports provision in the wider HGC.

▪ **Para 5 - Significant Publicly Accessible Green Area and updated site boundary**–the updated wording from the Regulation 18 draft Plan is welcomed with the reference to Country Park having been removed. The expansion of the allocation boundary to include additional land to the east is also welcomed as this area will be able to be utilised for Suitable Alternative Natural Greenspace ("SANG") for the Chilterns Beechwoods Special Area of Conservation ("SAC") and to deliver Biodiversity Net Gain ("BNG") and sports provision required to be delivered under paragraph 1.

▪ **Para 11 - Extra-care facilities** states that the allocation should deliver two extra care facilities comprising of 70-80 self-contained units in each facility, one 70-80 bed nursing home and 6 supported living units for people with disabilities. As reflected in the representations submitted at the Regulation 18 stage (September 2023), there are a number of ways in which the needs of older people can be met, as set out within the sub text of draft Policy HOU3 and Planning Practice Guidance ("PPG") Paragraph: 010 Reference ID: 63-010-20190626. Therefore, we would suggest that the allocation wording is revised to remove specific reference to "extra-care" and instead state "specialist housing for older people". This includes housing with support (retirement living and / or sheltered housing) and housing with care (extra care housing and / or housing with care), residential care homes, and other appropriate forms of accommodation. This provides the flexibility to deliver accommodation that provides variety and meets demand, while meeting SADC's requirement for specialist accommodation.

▪ **Para 12 – Integrated Mobility Hub**– we recommend that paragraph 12 be split into two parts, to differentiate between education needs and the mobility hub.

▪ **Para 13 – Transport** - should refer to a new gateway along the B487 Hemel Hempstead Road, not Redbourn Road (the same applies to H2 East Hemel). The road name changes to the east of Holtsmere End Lane.

▪ **Infrastructure provision**– The "Appendix A.1 SADC Infrastructure Schedule (September 2024)" highlights the contributions draft Site Allocation H1 – North Hemel Hempstead will be expected to make.

Pigeon would highlight that any planning obligations be in accordance with Regulation 122 of The Community Infrastructure Levy Regulations 2010, whereby a planning obligation may only constitute a reason for granting planning permission for the development if the obligation is necessary to make the development acceptable in planning terms, is directly related to the development and is fairly and reasonably related in scale and kind to the development.

....

**Conclusion**

5.1 Overall, Pigeon strongly supports the draft Site Allocation H1 – North Hemel Hempstead, AL3 7AU. The Site represents a deliverable, technically unconstrained and a sustainable location for new development. The Site's location adjoining to Hemel Hempstead is well connected and benefits from direct linkages via the B487 to the A5183 Dunstable Road and M1. The Site is well connected to the existing built-up area both in terms of its relationship with adjoining land uses and with regards to accessibility to services, employment, facilities, and public transport links.

5.2 Draft Site Allocation H1 – North Hemel Hempstead is important in the early delivery of the St Albans Local Plan housing provision. Draft Site Allocation H1 – North Hemel Hempstead forms an important component of the wider HGC development, provides the eastern access on to Redbourn Road for the strategic sustainable movement corridor on which HGC relies, and therefore, the timely delivery of the wider HGC.

5.3 Pigeon is committed to delivering this Site and to working collaboratively with SADC, DBC and other landowners with interests in the draft Site Allocation H1 – North Hemel Hempstead and the wider HGC area to develop the strategy for coordinated, sustainable development. However, as set out within these representations, some changes to the draft policies are required to help facilitate the delivery of Site Allocation H1 – North Hemel Hempstead, HGC and the wider objectives set out in the Draft Local Plan.

5.4 Given the pivotal role of draft Site Allocation H1 – North Hemel Hempstead in delivering the Local Plan strategy, and having regard to the nature of these representations, Pigeon respectfully requests the right to appear and be heard at the Local Plan Examination Hearing session(s).

5.5 We trust that these representations are helpful and look forward to participating in the forthcoming Examination including attendance at relevant Hearing Sessions. Should you have any questions about these representations, or require any additional information, please do not hesitate to contact me or my colleague John Rhodes.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## 311 - BP Oil UK Ltd

Submission Number: 311 Submission Date: 07/11/24 09:00
Respondent: Company/Organisation: BP Oil UK Ltd Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The draft allocation of primary interest to bp is H3, which includes the currently agricultural land located between Punchbowl Lane to the north, the M1 to the east, the A414 to the south and Green Lane (and the boundary of the site) to its west. This is because the allocation is immediately adjacent to the subject site. It is noted H3 proposes around 6,000 new jobs (point 21).

Whilst the majority of the development in allocations to H1-H4 inclusive is anticipated by the draft plan to be delivered by 2041, the draft Local Plan horizon, it identifies that some delivery is likely to
take place post-2041.

**Impacts on bp's operations**

It should be noted that bp does not object to the principle of major housing and employment designations. However, the effect of the allocations, if built out, will result in significantly greater levels of residents, works and visitors in closer proximity to the subject site.

This is the case both in the construction phase as the development and associated infrastructure works are built out, and once the allocated developments are operational. The health, safety and security of bp's workforce and the communities in which they operate is of critical importance to the business.

The draft Local Plan allocations H1-H4 inclusive may:
• increase the number of people in close proximity to a COMAH regulated site, particularly with development proposed for agricultural land to the east of the site
• limit bp's ability for any potential future expansion in relation to the site such as new fuel storage tanks and equipment
• potentially compromise the long-term viability of bp's operations from its Hemel Terminal site

bp do not object to the principles of the allocations relating to the HGC, however, we seek to highlight to SADC issues that need to be carefully considered as the draft plan progresses.

bp request that the importance of its Hemel Terminal is recognised and that draft site allocations H1-H4 are amended as required to ensure the continued safe and viable operation of its facility, both now and in the future.

We welcome a collaborative approach on the drafting of the policy wording with SADC officers/Members in order to achieve this objective.

We assume the views of the Health and Safety Executive (HSE) and the Environment Agency have been sought on the allocations - in particular given the subject site is regulated under the Control of Major Accident Hazards (COMAH) Regulations 2015 - and will be fully considered as the draft Local Plan moves forward. We also urge you to consider the views of the downstream oil team (energy security) at the Department for Energy Security and Net Zero.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

bp do not object to the principles of the allocations relating to the HGC, however, we seek to highlight to SADC issues that need to be carefully considered as the draft plan progresses.

bp request that the importance of its Hemel Terminal is recognised
and that draft site allocations H1-H4 are amended as required to ensure the continued safe and viable operation of its facility, both now and in the future.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 241107_SADC Reg 19 Rep Cover Letter_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To expand upon our objection if the policy is not revised as proposed.

---

**323 - Diana Ngobi**

Submission Number: 323 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: National Highways Name: Diana Ngobi

Comment Number: 3

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Hemel Garden Communities (HGC) Programme is a proposal to transform Hemel Hempstead through the regeneration of the existing town and delivery of new housing and infrastructure in St Albans City & District Council and Dacorum Borough Council areas. Within St Albans District, the HGC Growth Areas will deliver at least 4,300 new homes by 2041, with a further 1,200 homes by 2050, providing a total of 5,500 new homes. Further housing growth within the area north and east of Hemel Hempstead, Two Waters and Hemel Hempstead Town will be set out in Dacorum's Local Plan. We note that this has the potential to put pressures and traffic impacts on the SRN and its junctions.

We would also seek to understand if/how the Council plans to have an overarching monitor and manage policy which addresses the cumulative traffic impacts of this growth area and the collective impact on the SRN.

The HGC Transport Vision and Strategy document (TV&S) sets out a sustainable movement network approach for the long-term growth and transformation of Hemel Hempstead and wider routes. The approach ensures the HGC programme area can be developed as a successful, integrated, well-connected place. The site has ambitions to achieve a town-wide sustainable transport network with a target of 60% of all journeys starting, ending or within the HGC growth areas and 40% of all journeys starting, ending or within the existing town of Hemel Hempstead, to be undertaken by active and sustainable modes by 2050.

We support the local authority's proposals that considers sustainable transport measures, which manage down demand and reduce the need to travel. We are open to discussions surrounding the district's plan to safeguard land, design, fund, deliver and monitor a package of transport measures to enhance M1 Junction 8 (M1 J8) and surrounding area, in association with Hemel Garden Communities (HGC).

Physical highway improvements for the SRN should only be considered as a last resort. We note that there cannot be any presumption that such infrastructure will be funded through any future RIS (Road Investment Strategy). We strongly recommend that there is no reliance placed on RIS funding to realise capacity for growth in the Plan within the plan period.

Housing and Employment Allocations:

We note that the housing requirement over the plan period is 10,808 across 98 sites in the St Albans area. H2 - East Hemel Hempstead (North) site directly borders the M1 and will provide 1,600 residential units (indicative) in total (1,235 in plan period). The site is to the east of Hemel

Hempstead, between the B487 to the north, the M1 to the east and Punchbowl Lane to the south. The site is adjacent to Hemel Hempstead and forms part of the wider Hemel Garden Communities programme.

The site aims to improve and enhance countryside access links including connections under the M1 motorway. These links will require close collaboration with both National Highways and our service partner when an application comes forwards.

Site H3 and H4 East Hemel Hempstead (Central and South) also form part of the Hemel Garden Communities programme and similarly borders the M1. The proposals include mention of land to the east of Junction 8, which will be safeguarded for access improvements associated with Junction 8 of the M1 motorway, in case it is required to come forward for junction improvements.

Site H3 is also classified as Employment Led Mixed Use (Enterprise Zone), approximately 17 hectares of the site will promote high density, higher skilled employment uses to deliver a Business, Research and Development Park and explore opportunities for education. National Highways will be interested in understanding how traffic impacts will be reduced and mitigated as work on this site progresses due to the proximity of the SRN.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

National Highways will be interested in understanding how traffic impacts will be reduced and mitigated as work on this site progresses due to the proximity of the SRN.

### 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 18

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraph 35 and 36 of the 2023 NPPF require that local plans be positively prepared to be considered sound. To do so its policies must set out a strategy to meet the assessed needs of the area.
HCC has a statutory duty to secure sufficient early years provision under the Childcare Acts 2006 and 2016. This includes, but is not limited to, provision within day nurseries for 0-2 year olds, school nursery classes for 3-4 year olds, and school wraparound care for 5-11 year olds. HCC must therefore ensure sufficiency for all three early years cohorts that tend to receive care in different types of settings.
The 2023 Spring Budget increased parents' access to entitlement for early years support for all children under 3 by September 2025 and sets an expectation that all parents should be able to expect wraparound care by September 2026. This means that the plan needs to make sufficient provision for all of these early years

cohorts (0-2, 3-4, and 5-11), with 0-2 being a particular area of need as these are often provided in private day nurseries rather than school settings.
The Regulation 19 draft plan includes childcare facilities within the list of land uses within some broad locations within the supporting text at Part A table 3.1. This follows engagement with HCC at Regulation 18 stage and is welcome. However, policy in Part B does not require that these be provided within the corresponding allocations themselves. While policy wording in Part B does include reference to early years provision within new primary schools for those sites that are delivering new primary schools, these only tend to provide care to 3-4 and 5-11 year olds and not 0-2 year olds. Therefore HCC does not have certainty that the strategy for sufficient early years for 0-2 year olds will be delivered.
Policy COM1 gives policy support to proposals delivering childcare for 0-2 year olds and nursery for 3-4 year olds. This is strongly welcomed. However this is not the only childcare cohort. As part of its statutory sufficiency duty HCC must also ensure sufficient wraparound care for 5-11 year olds. Similarly, policy strategic policy SP7 gives policy support to proposals including nursery provision, which could be taken that only proposals for provision for 3-4 year olds should be given policy weight (as this can refer only this is cohort in some contexts). Again while policy support is welcome, it should ensure that policy support is given to the full range of settings for different age groups.
To be considered positively prepared and therefore sound the local plan should therefore set out a strategy for childcare provision in the allocations in Part B and clarify policy support for all childcare cohorts in the policies at Part A. This representation suggests a modification that if agreed, or similar, would make the plan sound.

Paragraph 35 and 36 of the 2023 NPPF require that local plans be positively prepared to be considered sound. To do so they must set out a strategy to meet the area's objectively assessed needs.
Policy HOU3 sets out the LPA's policies in respect of specialist accommodation. This only provides policies for determining applications for older person's accommodation. It does not provide policies for determining applications for children's homes. Similarly, the allocations set out in Part B of the plan make no provision for the needs of the section of the community reliant on this form of housing.

Children's homes are smaller units, usually indistinguishable in form from a standard residential dwelling, that provide accommodation for 1-5 children in care. They are a vital part of the care system in Hertfordshire, alongside fostering, adoption, and other more specialist forms of accommodation. Under the Children's

Act 1989 Hertfordshire County Council (HCC) has a statutory duty to provide accommodation to children in care. The 2024 draft consultation National Planning Policy Framework at paragraph 63 also makes clear that local plans should make provision for this group and at footnote 29 makes clear that the local authority's sufficiency data should be considered suitable evidence of need. While it is expected that this local plan will be examined under the 2023 NPPF, this and HCC's statutory duties taken together mean the local plan ought to make
provision for this cohort.
Since the Regulation 18 consultation HCC is seeking for local plans to address this shortfall. There is currently a shortfall of children's home bed places in Hertfordshire for children in care. The 2024 South West Hertfordshire Housing Needs Assessment at paragraphs 10.83-10.88 shows that there is a need for 19¬39 beds at children's homes. Hertfordshire County Council only has access to 15 beds in St Albans. Countywide sufficiency data shows that it cannot accommodate all its children in care within its boundaries. It currently accommodates 89 children in care within other authorities in England, which is less desirable for children in care and expensive to commission, has a further 70 children or young people on the 'waiting placement' list, and an average of 4-5 new requests each day.
To be considered positively prepared and therefore sound the local plan should therefore make suitable provision for this section of the community within St Albans. This representation suggests modifications that if agreed, or similar, would make the plan sound.

To be considered sound the plan must be effective and therefore have a reasonable prospect of delivery.
The site allocations at Part B correctly requires proposals for development to include land and s106 contributions towards the delivery of several primary and secondary schools. This is necessary to satisfy the requirement of NPPF paragraph 99 and HCC strongly appreciates the support that the LPA have placed on sufficient education provision.
HCC's Guide to Developer Infrastructure Contributions and its technical appendices sets out how land and contributions need to be made to ensure that schools are deliverable. Proposals for sites providing schools need to make serviced land available to the County Council (at education values) and make a proportionate s106 contribution towards delivery in accordance with the CIL

regulations. Other sites will make a proportionate s106 contribution. These will be pooled to deliver schools when they are required to meet a cumulative need.
Policy in the Part B site allocations includes delivery of the following (or a similar form of words depending on the allocation):
A 3FE primary school, including Early Years provision, to serve the new community.
Or, in relation to secondary schools:
A site for, and appropriate contributions towards, an 8FE secondary school site within nearby Oaklands land ownership fronting onto Hatfield Road.
These examples' policy wording implicitly limits the deliverability of the schools:
1. It sets a hard target of the capacity of the school, which would limit the schools' ability to open in phases, which is necessary to align supply of places to demand as it builds up over time;
2. It implies in some allocations that schools sought to be developer-built, which is not the County Council's preferred method of school delivery; and
3. In some allocations policy seeks to allocate contributions towards secondary schools for which the land will not be delivered through a s106 process and will instead be delivered as an acquisition later in or following the plan period to meet a cumulative need. Tying the s106 contribution to these secondary schools therefore risks the delivery of other projects needed earlier in the plan period.

The County Council also has a responsibility to ensure sufficient post-16 education, and in Hertfordshire these are usually provided at secondary school 6th forms. The County Council's strategy for post-16 education therefore includes the delivery of 6th forms at new secondary schools and secondary school expansions. For completeness, policy should also refer to 6th form provision as this has a similar relationship to new secondary education provision as early years does to new primary education provision, and the exclusion could therefore inadvertently give the impression that one does not have policy support.
HCC also supports the principle of the plan's support for secondary education in principle. However, since the publication of the Regulation 18 plan, the strategy for East St Albans has changed and the site is now only expected to deliver a 6FE school.
Therefore to be deliverable and therefore considered sound the plan should clarify the maximum capacity of schools, that schools in the first instance should not be developer-built, and that s106 contributions for individual sites should not be tied to school sites that are needed to meet a long term cumulative need. The local plan should also ensure that post-16 education has full support within new secondary schools.

Paragraph 35 and 36 of the 2023 NPPF require that local plans be justified to be considered sound. To do so its policies must be an appropriate strategy for the outcomes that they intend to secure. Policy HOU3 includes policies against which applications for specialist housing for older people will be determined. Paragraph (c) states that 'In larger sites, it may be appropriate to co-locate specialist housing provision and develop an Integrated Community'. The Associated Retirement Community Operators, the professional body representing housing with care providers, defines Integrated Retirement Communities as a gold standard of housing with care, not as colocation of different types of specialist housing provision, such as housing with care and nursing homes. While HCC has no in-principle opposition to colocation it is not clear that this is indeed what the policy is intended to achieve.

There may be benefits to co-locating housing with care schemes (as opposed to other forms of specialist accommodation for older people) only on sites delivering a larger quantum of this form of specialist older person's accommodation. This may allow them to benefit from improved economies of scale and deliver improved communal facilities and services that smaller scheme would not be able to support themselves. Policy wording within the allocations at Part B, however, refers to delivery of discrete housing with care facilities of 70-80 units. This implies a requirement for separation. This is entirely appropriate for care homes, but there is no in principle reason why housing with care schemes cannot be co-located into a single larger scheme.
Therefore to deliver an appropriate strategy there needs to be clarity as to what the policy wording at HOU3 (c) is intended to achieve, and if there is no other rationale, the plan should clarify that HOU c and the allocations at Part B to permit multiple housing with care schemes to co-locate with each other rather than with other types of specialist accommodation for older people.

The county council recommends the below changes to policy as respects Hemel Garden Communities:
Part A LG2: The cost apportionment sentence (No.5, Page 26) in Strategy Policy HGC1 – Transformation of Hemel Hempstead of the DBC Local Plan to 2041 Pre-Submission Version for Approval is not in the corresponding SADC policy. For consistency, we suggest it is added into the SADC Policy LG2:
The methodology for infrastructure apportionment and cost sharing is set out in the Local Plans Infrastructure Delivery Plans (IDPs). Infrastructure, contributions and wider funding will be required to deliver on and off-site infrastructure, in accordance with the above documents.

Part B LG3: Suggest amending the text as at present working assumptions are that the Household Waste Recycling centre is to come forward separately from the district council provision.
Delivery of Key Projects including a Household Waste, a Recycling Centre, and Local Authorities Depot facilities to meet the needs of new and existing communities

Part B H1, H2, H3, H4: Suggest adding in the following text into each policy to ensure key transport schemes are included:
The provision of essential transport infrastructure, the detail of which will be identified through the HGC IDP, including mitigating the impact of traffic associated with the development; appropriate consideration of M1 Junction 8 improvements and access arrangements for wider Hemel Hempstead, the provision of appropriate financial contributions towards A414 bridge and wider highways network improvements and access arrangement for HGC and wider Hemel Hempstead, provision of appropriate public transport (services and infrastructure) serving the site; and provision of a comprehensive network for pedestrians and cyclists with good connectivity provided to adjoining areas, including a particular emphasis on improving linkages to Hemel Hempstead Station as a transport interchange

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Policy in allocations H1 and H2 should each include:
A childcare setting capable of providing 30 places including 0-2 year olds.
Policy in allocations H4 should each include:
A childcare setting capable of providing 50 places including 0-2 year olds.

In Part B allocations H1, H2, H4, B2, B4, B5, B6, B7 should include the following wording: A children's home to accommodate three children in care and one manager.

H1: A 3FE primary school site and contributions, including Early Years provision, to serve the new community and appropriate contributions towards secondary school provision, including post-16 education.
H2: A 3FE primary school site and contributions, including Early Years provision, to serve the new community.
An 8FE secondary school site and contributions to serve the new and existing communities, including post-16 education.
H4: One new 3FE and one new 2FE primary school site and contributions, including Early Years provision, to serve the new community, and appropriate contributions towards secondary school provision, including post-16 education.

H1: The 1,500 dwelling figure above includes [deleted text] 140-160 self-contained housing with care units [deleted text], one 70- 80 bed nursing home and 6 supported living units for people with disabilities
H2: The 1,600 dwelling figure above includes [deleted text]140-160 self-contained housing with care units [deleted text], one 70- 80 bed nursing home and 6 supported living units for people with disabilities
H4: The 2,400 dwelling figure above includes [deleted text]210-240 self-contained housing with care units [deleted text], two 70- 80 bed nursing home and 9 supported living units for people with disabilities

Part B H1, H2, H3, H4: Suggest adding in the following text into each policy to ensure key transport schemes are included:
The provision of essential transport infrastructure, the detail of which will be identified through the HGC IDP, including mitigating the impact of traffic associated with the development; appropriate consideration of M1 Junction 8 improvements and access arrangements for wider Hemel

Hempstead, the provision of appropriate financial contributions towards A414 bridge and wider highways network improvements and access arrangement for HGC and wider Hemel Hempstead, provision of appropriate public transport (services and infrastructure) serving the site; and provision of a comprehensive network for
pedestrians and cyclists with good connectivity provided to adjoining areas, including a particular emphasis on improving linkages to Hemel Hempstead Station as a transport interchange

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

SITE ALLOCATIONS H1, H2, H3 & H4

Thank you for the opportunity to submit representations to the SADC Draft Local Plan Regulation 19.

This letter constitutes a joint response on behalf of the above land interests within the SADC portion of the Hemel Garden Communities (HGC) Growth Area, specifically the site allocations H1 – North Hemel Hempstead, H2 – East Hemel Hempstead (North), H3 – East Hemel Hempstead (Central), and H4 East Hemel Hempstead (South). These allocations are proposed to together deliver around 5,500 dwellings – half of the required homes in the designated Growth Area - and land for up to 6000 jobs.

In recognition of the significance of these allocations, in the period since the Local Plan Regulation 18 consultation the landowners have continued to work positively with HGC partners in progressing the ambitious transformation proposals, particularly in relation to furthering the understanding of the infrastructure and mitigation necessary at local plan stage to support the draft allocations and soundness of local plan policy.

While this understanding will continue to be developed and tested through the final stages of the Local Plan including at Examination and through SPD preparation (and in due course, realised through future Outline Planning Applications when detailed mitigation will be secured), we believe that the Local Plan has been informed by a strong evidence base, focused on matters relevant to growth at this scale and to a level of detail proportionate to local plan considerations.

This has resulted in a clear and robust policy framework. As such we can support the Local Plan and consider the overall principles, requirements and proportionality set out in its policies to be generally effective, insofar as they relate to these allocations.

LOCAL PLAN PART B – SITE ALLOCATIONS

We are supportive of the amendments made in Part B of the Local Plan relating to site allocations H1, H2, H3 and H4, recognising that they have been informed by the HGC evidence base, including the Framework Plan.

We are also supportive of the overall policy requirements for each of the HGC allocations. Whilst we have a number of detailed points of clarification within the site allocation policies which have been raised separately through individual representations, these comments are made in the interests of securing a clear and effective policy framework for each site.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 354 - Kitewood

Submission Number: 354 Submission Date: 14/11/24 09:00

Respondent: Company/Organisation: Name: Miss Sara Sweeney

On Behalf Of Company/Organisation: Name: Kitewood

Comment Number: 7

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Kitewood Estates Ltd ('Kitewood') welcome the opportunity to comment on the Draft Local Plan 2041 Regulation 19 ('the Reg 19 Local Plan') and the supporting documents that have been published for consultation.

We understand that following the consultation, all representations will be sent to the Planning Inspectorate along with the draft Local Plan to be Examined by a government-appointed Planning Inspector who will consider if any modification need to be made to the Local Plan before it can be adopted.

The Planning Inspector will assess whether the draft Local Plan has been prepared in accordance with legal and procedural requirements, and whether it is 'sound'.

This representation is therefore focused on matters relating to soundness.

**Kitewood Interest in the Draft Plan**

Kitewood is a development company and landowner of part of the proposed Hemel Garden Communities (HGC) Growth Area to the north and east of Hemel Hempstead. Our landholding falls wholly to the north within Dacorum Borough, and abuts the boundary with the St Albans City & District, adjacent to the Reg 19 Local Plan proposed allocation H1- north Hemel Hempstead.

HGC (including the proposed Growth Area) is a collaboration between Dacorum Borough Council, St Albans City and District Council, Hertfordshire County Council and Hemel Garden Communities, and is supported by the Hertfordshire Local Enterprise Partnership. The landowner group, of which Kitewood is part of, have continued to work positively with HGC partners in progressing the ambitious proposals for growth and transformation.

The HGC Growth Areas to the north and east of Hemel Hempstead are expected to extend beyond the Plan period and will deliver up to 11,000 new homes and 10,000 new jobs by 2050 across St Albans District and Dacorum Borough.

The HGC Growth Area is consistent with the government's strong aspiration to boost the delivery of new homes and infrastructure in a comprehensive manner. It is also aligned with the government's agenda to facilitate the delivery of New Towns.

The plan extract below from *Hemel Garden Communities Position Statement* dated July 2024 identifies the full extent of the north and east Hemel Hempstead Growth Area.

**Hemel Garden Communities Program Area extract from the *Hemel Garden Communities Position Statement***

***See 'Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024' attachment for figure***

The proposed HGC Growth Area is supported by a comprehensive and robust evidence base, including the Framework Plan 2024, HGC Framework Plan Story (July 2024) and HGC Technical Report (Sept 2024). Further evidence is also emerging to support the Local Plans and the future planning applications.

The publication of the St Albans District Draft Local Plan 2041 Regulation 19 for consultation and the Council's intention to submit the Plan for Examination is a significant milestone for the HGC Growth Area, and we commend the Council for their continued engagement with us, the other landowners and HGC partners.

Whilst Dacorum Borough Council are slightly behind St Albans City & District Council in terms of the consultation on their respective Pre-Submission Dacorum Local Plan to 2041 (Regulation 19) which will run until 17th December 2024, we are of the view that it would be beneficial for the Submitted Plans to be Examined together given the importance of the HGC Growth Area to both authorities.

In addition to these comments, joint landowner representations are also submitted to this consultation by David Lock Associates (DLA) on behalf of ourselves (Kitewood), The Crown Estate, Pigeon Investments Limited and Bloor Homes.

*Kitewood support of the Proposed Broad Location for growth identified at Hemel Hempstead and in particular the proposed site allocation **H1, H2, H3 and H4:***

- **H1 – North Hemel Hempstead**
- **H2 – East Hemel Hempstead (North)**
- **H3 – East Hemel Hempstead (Central)**
- H4 East Hemel Hempstead (South)

The Proposed Site Allocations H1, H2, H3 and H4 are identified on the Key Diagram, extract below.

**Reg 19 Local Plan Fig 1.2 Key Diagram extract of the Proposed Site Allocation H1, H2, H3, H4**

***See 'Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024' attachment for figure***

These allocations (H1, H2, H3 and H4) form part of the wider HGC Growth Area and they will together deliver around 5,500 dwellings, around half of the required homes in the designated Growth Area and land for up to 6,000 jobs.

The Local Plan Reg 19 proposed that 4,400 of the dwellings (around 75% of the total) will be delivered during the plan period.

Our comments relate to the need to ensure that a fully comprehensive approach is taken across all of these allocations (H1, H2, H3 and H4) and the wider HGC Growth Area to ensure the delivery of the cross-boundary infrastructure requirements, to ensure the draft Plan's *effectiveness*.

Our concerns about effectiveness of the Reg 19 Plan relate to the current lack of detail on how the infrastructure will be phased alongside the delivery of the development, and how this aligns with the delivery of the proposed north Hemel Hempstead allocation in Dacorum Borough to ensure the vision for the Hemel Garden Communities is realised and delivered without delay.

Our Comments principally relate to Policies LG1, SP1, SP8 and TRA1.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Our comments relate to the need to ensure that a fully comprehensive approach is taken across all of these allocations (H1, H2, H3 and H4) and the wider HGC Growth Area to ensure the delivery of the cross-boundary infrastructure requirements, to ensure the draft Plan's *effectiveness*.

Our concerns about effectiveness of the Reg 19 Plan relate to the current lack of detail on how the infrastructure will be phased alongside the delivery of the development, and how this aligns with the delivery of the proposed north Hemel Hempstead allocation in Dacorum Borough to ensure the vision for the Hemel Garden Communities is realised and delivered without delay.

*We consider that for the policy to be effective a joined-up approach is required by St Albans City & District and Dacorum Borough to ensure the infrastructure items that relate to the Growth Area that are set out in the Councils' respective Infrastructure Delivery Plans are fully aligned, and these accord with the HGC Infrastructure Delivery Plan.*

*We are of the view that further consideration should be given to the comprehensive infrastructure requirements to support the overall proposed overall HGC Growth Area, the delivery phasing across the authority boundaries and mechanism for appropriating cost.*

*We therefore consider that an updated St Albans City & District IDP is required to be published in advance of the Examination in Public to incorporate all of the relevant emerging evidence base.*

*Kitewood considers that further evidence is required to demonstrate cross-boundary co-operation and cumulative impact assessments on transport matters and further information is necessary in relation to the mechanisms that will ensure the sustainable growth of Hemel Hempstead during the plan period.*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Kitewood is a development company and landowner of part of the proposed Hemel Garden Communities (HGC) Growth Area to the north and east of Hemel Hempstead. Our landholding falls wholly to the north within Dacorum Borough, and abuts the boundary with the St Albans City & District, adjacent to the Reg 19 Local Plan proposed allocation H1- north Hemel Hempstead.

Kitewood considers that the *Draft Local Plan 2041 Regulation 19 is Legally compliant*, has been *Positively prepared*, is *Justified*, and is *consistent with national policy*.

However, we do not consider that Policies SP1, SP8 and TR1 are effective because all the evidence does not yet exist to demonstrate effective joint working on cross-boundary strategic matters.

***Kitewood therefore request participation in the forthcoming Examination in Public to discuss policy matters relating to the Proposed site allocations H1, H2, H3 and H4***

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**356 - Rachael Donovan**

Submission Number: 356 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Hertfordshire and West Essex ICB Name: Rachael Donovan

Comment Number: 17

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**H1- North Hemel Hempstead**

As per the HWE ICB's response to the Regulation 18 Local Plan, heath infrastructure provision, in the form of new on-site medical centre was identified in either North Hemel Hempstead or East Hemel Hempstead, whichever comes forward the sooner. Therefore, please add '***medical centre'*** to the list of infrastructure requirements for North Hemel Hempstead.

...

*Impact of specific proposed site allocations and committed sites on Primary Care Infrastructure*

- **H1 - North Hemel Hempstead - 1,500 dwellings (1,125 by 2041)**
- **H2 - East Hemel Hempstead (North) – 1,600 dwellings (1,235 by 2041)**
- **H4 - East Hemel Hempstead (South) – 2,400 dwellings (1,940 by 2041)**

This is the St Albans District element of the cross-border Hemel Garden Community development, which is expected to deliver 10,500 units in total. 5,500 of these will be in St Albans District and 5,000 in Dacorum Borough.

Such unprecedented level of growth cannot be absorbed by the existing estate and options for an on-site medical centre in both North Hemel Hempstead and East Hemel Hempstead (North) need to be reserved, with the location of a new facility dependent on which of these strategic sites come forward first.

**Site allocations**

We have the following comments to make on site allocations, in addition to those we made in our Regulation 18 submission, which have not been repeated in this letter.

*Site allocations requiring SANG*

For the site allocations that require SANG to mitigate recreational pressure impacts on Chilterns Beechwoods SAC, the site-specific policy should include a statement to the effect that Natural England must be consulted at the pre-application stage on the detailed design of the SANG, to ensure that the SANG meets NE's SANG guidelines (2021).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Sites in Redbourn and east/north Hemel will cause the Green Belt to disappear between Redbourn and Hemel. Most are in areas categorised as Important and require a compelling reason to build. The only reason stated is for Social or Affordable Housing which surely means the 60% of planned housing not in those categories should not be built on Green Belt as such housing is not compelling bu need but financial.

The impact of all the HGC and West Redbourn proposed has only Ben considered on a site by site basis. A significant proportion of traffic to and from the Sites would coallesce on the same small roads between Hemal and Redbourn, St Albans, Harpenden and the M1. The travel infrastructure barely supports the traffic currently at peak times. Therefore, the impact cannot be considered safe as required.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The individual areas should also be considered in relation to each. Ie if one area is developed the importance of adjacent areas should reconsidered to reflect that.

The traffic plan for each residential site should be considered sequentially in the expected order of start to take in to account the effect of the moving starting position.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Hemel Garden Communities (HGC) programme is at a very early stage in its concept. 11,000 new houses is a huge project yet there is no substantial evidence to show it is viable and deliverable. It is all on greenbelt land NOT recommended by the ARUP green belt review for development. The land is in the Chiltern Hills and the northern parts are adjacent to the National Landscape which should be protected. It is high quality agricultural land, grade 2 and 3a, which should be reserved for our food security. HGC is not served well by public transport. The four closest rail stations are all several miles away and the bus services are currently poor. The HGC programme is over-reliant on people walking and cycling, with little private parking being made available or new main roads being provided. This would require a huge modal shift which would be difficult to achieve in the time scale. In this respect, HGC a very risky social experiment.The HGC is a long way from the Hemel town centre so the development does not connect well with the rest of Hemel. Over a third of St Albans District's new housing is proposed at HGC which does not connect well

with the rest of the District. The Nickey Line is enthusiastically being put forward as a significant cycle and footpath linking Hemel to Harpenden via Redbourn but currently this route is not fit for purpose. HGC might seem great on paper but the reality of building a new town onto to an existing new town is not good spatial planning.

The site at West Redbourn (B3) has no proper access. The proposed access points are from existing cul-de-sacs and country lanes, and traffic would have to travel across Redbourn Common. This would have a big impact on the existing community.

South of Harpenden Lane, Redbourn (LG4) is mostly a flood plain. This is noted but further work needs to done on the impact new development would have on the existing development. More work needs to be done on the affect development would have on the rare chalk stream that flow through Redbourn, i.e. the River Ver and the River Red.

The broad sites in the Local Plan are proposed on over 700 hectares of greenbelt in total, of which over 500 were not recommended by ARUP for consideration in their green belt review. Half of the SADC green belt sites are in the HGC area, which is a big loss of greenbelt in one area. If HGC goes ahead it would be urban sprawl and lead to coalesence between Redbourn and Hemel Hempstead. It has been asserted that the chosen green belt sites meet the 'exceptional circumstances' criteria for building on the green belt by dint of the need for housing and by building next to existing settlements. However this has not been demonstrated in a way that overcomes all the problems with the HGC programme and the intinsic difficulties of the sites in Redbourn village. The draft Local Plan cannot be considered legal and sound.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

HGC and West Redbourn should not be included in the Local Plan. If they are, much more work needs to be done on the Infrastructure Delivery Plan. A site at NE Redbourn owned by the Lawes Agricultural Trust should be considered instead as it would integrate with Redbourn village much better.

Generally, development should be spread more evenly around the District as this would better meet the needs of St Albans District residents. The lack of public transport and inadequate roads has to be resolved. Maybe the Nickey Line could be a tram line?

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

I am very familiar with the draft Local Plan and have a good working knowledge of planning issues in general. I could add a lot of local knowledge to proceedings particularly the area of the Hemel Gardens Community programme and the sites in Redbourn Village. I am well informed about the District as a whole.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 115 - Mr Geoffrey Coates

Submission Number: 115 Submission Date: 07/11/24 00:58

Respondent: Company/Organisation: Name: Mr Geoffrey Coates

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

St Albans District Council have failed in their duty to cooperate with Redbourn Parish Council. The Parish Council have passed a Local Plan at referendum. The level of building within Redbourn Parish as a whole, and particularly at Hemel Garden Communities, is inconsistent with the policies in that document.

The Parish Council moreover commissioned a professional planning consultant (Troy Planning) to report on the proposals at Reg 18; SADC have given no meaningful consideration to the points raised in that report, despite it clearly warning that the Plan as it stands is incompatible with the NPPF and that the scale of development proposed in Redbourn Parish is unsustainable. SADC has not engaged with the substance of this report.

It is far from clear that SADC have adequately cooperated with Dacorum in drawing up the Hemel Garden Communities plans. Responsibility for provision of key services does not seem clear, despite HGC being fundamentally an extension of Hemel Hempstead conurbation into St Albans District.

Hemel Garden Communities proposals H1 and H2, and the contiguous industrial estate H3, epitomise the failings I have identified elsewhere in my commentary. They make extensive use of Green Belt land without fulfulling due process in seeking its declassification--namely, to establish the exceptional circumstances which would permit that, and to demonstrate that all urban sites (not merely brownfield sites) have been duly considered. The sites they propose for development are identified in SADC's Green Belt Review as the most significant for maintaining the integrity of the Green Belt and its aims.

The proposals at these lcoations are not consistent with a duty to consider climate change as they are inherently car dependent and offer no credible mitigation for that situation.

The proposals at these lcations are inconsistent with traffic policy, notably TRA1, requiring that development not have an adverse effect on traffic flow and safety. No modelling has been offered for the likely impact upon B487 traffic, only a vague expression of faith in the arrival of a modal shift in travel on an unprecedented scale.

Moreover the impact on biodiversity has not been properly evaluated, despite Redbourn being the site of a globally significant chalk stream and a breeding ground for Red Kites, Great Crested Newts and other rare species.

Sewage outflow has polluted our River Ver for more days this year than it hasn't, yet the additional wastewater evolved by this development has not been properly considered. It seems unavoidable that pumping will resume at Friars Wash to feed the demand of 4000 new homes, threatening the water table and with it the very existence of the chalk stream.

On all these grounds, Hemel Garden Communities H1 and H2 (and associated industrial estate H3) are perhaps the least suitable sites for development not only in this Draft Plan but from the entire call for sites. This proposal is a pipe dream conceived in the offices of the Planning Department without practical knowledge of the sites on the ground. It has become the pet project of the department and a coterie of city centre councillors, who see it as a means to displace feasible development from their own wards, and it has been sacralised in those circles to the extent that it requires someone outwith the structures of SADC to point out that the emperor's new clothes are threadbare. Public objection at Reg 18 has been simply ignored in an attempt to push through a Local Plan--any Local Plan--before a new NPPF comes into force.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The removal of proposals H1, H2 and H3 is the only sound way to mitigate the damage of this ill-conceived chimera of a development.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

As stated, SADC have marginalised the voices of residents, treating Reg 18 as a PR opportunity for this Plan and not meaningfully engaging with feedback. Attending the hearing may go some way to restoring the proper role of the citizenry at the heart of planning decision-making.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Concerns regarding proposed delivery rates as described above. This is combined with growth at Hemel Hempstead within Dacorum Council, where the Emerging Strategy for Growth 2020- 2038 seeks a further 1,550 dwellings to the north of Hemel Hempstead and further safeguarded land for circa 4,000 dwellings post 2038. This presents infrastructure and capacity concerns, particularly at junction 8 of the M1, which will continue to be the main route into Hemel Hempstead.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The above provides concern regarding the suitability of the site for allocation, or queries whether the capacity is appropriate or can be achieved. The alternative to a number of these sites is London Road, St Albans. As highlighted within the accompanying Vision Document (see **Appendix 1**), it provides a sustainable form of development on the edge of St Albans, with excellent public transport and active travel infrastructure already in place.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

While no comment is made on the principle of the allocation, the requirements in the Green Network (parts 1 and 5) and Engaging Communities (Part 22) sections relating to the development requiring strategic and local public open space provision to be made including sports facilities and a sports hub plus contributions to sports provision within the wider HGC Growth Areas are welcomed. The proposed new Country Park is also welcomed as this will provide opportunities for encouraging physical activity. These requirements would be consistent with policies LG1 and LG3 and align with the recommendations in the Council's evidence base for sport (Playing Pitch Strategy) and thereby be consistent with Government policy in paragraph 102 of the NPPF.

### If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?

* No, I do not wish to participate in hearing session(s)

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**Hemel Garden Communities (HGC)**

The allocation of four housing and employment sites on the northern and eastern edge of Hemel Hempstead is a significant extension to the town that will deliver much needed housing in both Dacorum Borough and St Albans district, it is however inconsistent with the provision of sustainable development for St Albans. Allocating sites on the urban edge of Hemel Hempstead will contribute

numerically to the housing requirements of St Albans but it does not align with the Local Plans strategic objectives to '*Prioritise and enable the safe and attractive use of active and sustainable means of transport and reduce the need for people to travel'*and '*Promote adaptation to and mitigation of the Climate Emergency'*by reducing carbon emissions. Nor does the allocation of these sites align with the LCWIP[13] long-term objectives of Climate and Sustainability, Clean Air and Healthy Lifestyles. These allocations will introduce more vehicles onto the A414 between Hemel, St Albans and Watford. Increasing congestion and increasing pollution.

In additional, a raft of highways improvement schemes[14] are identified to enable more effective travel by public transport and it is highlighted that there is no way to 'continuously travel by public transport' along the A414 corridor. It is acknowledged that this contributes to increased car use within the District. If the allocations at Hemel Hempstead are detrimental to the strategy of the draft Local Plan, then a more effective strategy would be to allocate sites to the south of St Albans that will generate contributions to the funding of upgrades to the A414/ North Orbital Road, or to the delivery of the Hertfordshire Essex Rapid Transit (HERT)[15] which is planned along the A414.

Furthermore, the allocation of sites in the south of St Albans could contribute to delivering the improvements to walking and cycling infrastructure identified in the LCWIP which would encourage the use of sustainable modes of transport between Hemel Hempstead and St Albans. The improvements identified in the LCWIP include a long-term aspiration for a segregated cycle route along Hemel Hempstead Road and traffic calming measures along King Harry Lane to provide a safer active travel route. These schemes could be part funded through developer contributions from additional sites allocations in the south of St Albans.

The Hemel Garden Communities are located within the 12.6km Recreational Zone of Influence (ZOI) for the Chilterns Beechwoods SAC which is considered within the Delivery Statement and Local Plan policy LG3 – Hemel Garden Communities Growth Areas Place Principles. The Green Network Vision sets out the creation of significant amounts of SANG and green spaces, and we support the delivery of multifunctional green infrastructure provision to facilitate this.

There is however a potential delivery issue associated with SANG at the HGC. The Council is legally required not to issue decisions within the recreational ZOI until appropriate mitigation is secured through a Mitigation Strategy. It is identified in the Habitats Regulations Assessment[16] that '*whilst not all allocations have a SANG strategy identified, those without a SANG solution in place are not to be occupied until at least year 6 of the Local Plan. The Council has confirmed that they are confident that appropriate SANG solutions will be delivered for all of the relevant sites within the Local Plan'*. If insufficient SANG is identified for all the allocations, then the Council will not legally be able to issue decision on applications submitted at HGC.

Another potential delivery issue is the boundary review of the Chilterns National Landscape[17] that is currently being undertaken by Natural England. Although there are no formal timeframes set out for the review, it is expected that a variation order is to be sought from the Secretary of State in Winter 2025. This could have implications for the housing numbers that can be delivered at the HGC as well as setting back the delivery as the impact of the allocations on the National Landscape are factored into the proposals.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.
