*"The pace has slowed on the Boundary Review due to resource issues with Natural England and the need for additional work. The report to the Secretary of State was planned for winter 2024 but will now be winter 2025 and the public consultation will take place this winter. The upcoming general election may push this back again."*

- The potential delay was also picked up in the Board's risk register, which stated:
- *"Issue: Uncertainty over status of all National Landscape strategic programmes with the new Government and risk of progress being derailed by new national priorities.*
- *Risk: Public and formal consultation on Boundary Review now scheduled for winter 2024/25. Potential for further work following consultation risks pushing programme back further.*
- *Risk: Potential for delay or harm to integrity of Boundary Review proposals due to legal issue with Burnham Beeches being excluded from designation."*
- The Conservation Board's website has the following update:

*"Due to the need for additional assessment work, the project timeline has been extended. Natural England now anticipates that the statutory and public consultation will take place in winter 2024/25. If fully resourced, they aim to seek a variation order from the Secretary of State in winter 2025. The next steps include finalising the Desirability Report, followed by the boundary setting stage. We will publish further information around the public consultation dates as soon as this has been confirmed."*

- It is clear that this project has already been substantially delayed. Previous attempts to extend the National Landscape a decade or so ago did not progress. At this stage, there can be little confidence that the proposals will progress to timetable.
- A Local Plan must be sound at the point of submission. That means evidence needs to be available to justify the plan at that point and that evidence ought to have been published at Regulation 19 stage for interested parties to comment. As things stand, there is no evidence to support the proposed deletion of the previously proposed allocation M14. It should therefore be reinstated.
- The lack of evidence means there is no explanation of why this particular piece of land adjacent to a suburban housing development is considered to meet the relevant legislative tests and to constitute a landscape of national The site is over 5.5km from the current National Landscape boundary so cannot be said to affect the setting of the Chiltern Hills.
- The land adjacent to the Jarvis Homes site should be reinstated due to the lack of supporting evidence for its exclusion. The Jarvis Homes site itself should also be included in the draft Local Plan but for different reasons related to the evidence base.
- By way of background, the Jarvis Homes site was recommended for consideration in the Council's 2013 Green Belt Review by SKM. Methodological changes since 2013 meant that the Arup report only recommended the land adjacent and not the Jarvis Homes site itself.
- The Arup Green Belt review considered the site as part of a much larger sub-area, SA-12, whereas the adjacent site was considered on its own as SA-11. The adjacent site was then recommended for further consideration in isolation, as RA-7. Sub-area SA-12 is 73.55ha in size, whereas the Jarvis Homes site is 4ha.
- It is clear from Figure 5 below that the subject site has far more in common, geographically, with SA-11 than with SA-12. Very few of the conclusions reached in terms of SA-12 would be valid if the subject site were considered in isolation.

*Figure 5: Arup sub areas (see report)*

- We understand that from a practical perspective the Council will need to draw the line somewhere and cannot keep re-assessing ever smaller pieces of Green Belt. However, given that the report site is being promoted separately from the rest of the parcel, it is important that the specific Green Belt implications of this site are identified, as distinct from the wider parcel.
- The need for a detailed assessment of the report site is heightened because of the conclusions of the Stage 1 Green Belt Review carried out by SKM in 2013/14. These conclusions remain part of the Local Plan evidence base and have not been superseded by the Arup report.
- The Stage 1 Review by SKM recommended the report site as a small-scale sub-area (SA-SS5) – see Figure 6 below. SKM's conclusion reads:

*"Land south of Harpenden enclosed by Beesonend Lane to the south and settlement edge to the north and east (SA-SS5) when assessed in isolation the land makes a limited or no contribution towards checking sprawl, preventing merging, preserving setting or maintaining local gaps."*

- The methodology adopted by Arup is set out in section 3 of the Stage 2 report.

*"This Stage 2 GBR takes a more comprehensive and granular approach to identifying potential subareas to assess within the Green Belt. Not only does it re-consider the weakly performing strategic sub-areas and small-scale sub areas identified in the SKM Stage 1 GBR but also opportunities for potential release in the wider Green Belt."*

*Figure 6: weakly performing sub-areas, SKM Stage 1 Green Belt Review, as replicated in the Stage 2 Green Belt Review (Arup) (see report)*

- The Stage 2 report needed to address the criticisms of the Stage 1 report and add further granularity. However, the Stage 2 report's analysis of the report site is actually less detailed and granular than the Stage 1 report. The Stage 1 report recognises that *"some land at settlement edges is more enclosed due to localised landscape features / hedgerows and is bound by urban development land, such as at Beesonend Lane"*. However, there is no corresponding analysis in Stage 2.
- This is not just a question of one set of consultants disagreeing with another. The level of detail of the assessment needs to be greater at Stage 2 than at Stage 1 and, as things stand, it is less detailed.

- To help remedy this lack of evidence, a site-specific assessment of the subject site (termed sub-area 12A) is contained at Appendix 1. This concludes that the site, in isolation and in combination with SA11, makes a limited contribution to purposes and can be considered for further assessment/release.
- It is acknowledged that the site would have a potentially weak Green Belt boundary to the west. However, this could be easily strengthened via structural landscaping associated with any development proposal.

- A further reason for allocating the Jarvis Homes site for development is that it could provide access to the adjoining site via Prospect Lane. Vehicular access was identified as a key constraint for site M14 at Regulation 18 stage, as such access cannot be taken from Beesonend Lane.
- The location of the report site means that access could be taken from Prospect Lane through to site M14.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The land at Beesonend Lane should be allocated for development and removed from the Green Belt.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Local Plan representations - Beesonend Lane - November 2024 FINAL_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

DLA Town Planning represents the promoter of the land at Beesonend Lane and our participation in the hearing sessions would assist the Inspector and help to respond to any queries raised.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

Respondent: Company/Organisation: Bellway Homes (North London) Limited (C/O Savills) Name: Miss Dorothy Tsang

On Behalf Of Company/Organisation: Bellway Homes (North London) Limited Name:

Comment Number: 10

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*All appendices, tables, figures and footnotes can be found in the attached file*

**Strategic Policy SP1 / SP3 - Housing delivery**

2.136 Bellway Homes (North London) Limited recognise that the housing requirement for St Albans District Council given in draft policy SP1 and SP3 is 885 dwellings per annum (dpa) over the plan period, a total of 14,603dwellings. This reflects the minimum figure set out in the Governments Standard Methodology for calculating local housing needs under the NPPF 2023. However, with the new proposed Standard Methods, SADC will see a significant increase of the housing number with 1,544 dpa and with a sum of 26,248 dwellings to be delivered over the plan period.

2.137 The Standard Method figure only calculates a minimum need, and it is often applicable for Authorities to plan for a higher number and provide some contingency in their plan to account for under delivery and delays in allocations coming forward throughout the plan period. The PPG makes explicit that the need derived from the Standard Method identifies a minimum figure, and it is encouraged for Local Authorities to seek to exceed this. Relying solely on the minimum housing need as set out in the Standard Methodology means the level of housing planned for also fails to allow for non-implementation of strategic sites. The PPG states that assumptions can include lapse/non-implementation rates in permissions, lead-in times and build rate.

2.138 In the Reg.18 draft Local Plan the housing delivery target included a buffer of 20% for the first five years and 5% for the remainder of the plan period which equates to a total of 15,938 dwellings across the plan period. It is unclear whether the housing targets contained within the Local Plan are reflective of unmet housing demand from the historic shortfall in delivery across the past decade.

2.139 In the Reg.19 Local Plan no reference is made to the historic shortfall in housing delivery which had resulted in central government applying the ‘presumption in favour’ of sustainable development and the application of a 20% buffer to the housing delivery target. Conditions in the borough hadn’t suddenly changed in the period since publication of the Reg.18 consultation draft.

2.140 In fact, in the period from 2022 – 2024, the authority had cumulatively delivered net. 766 dwellings against the target of 1066 dpa which represents a shortfall of 65% of the required housing across that period. It is unclear why St Albans DC deem it appropriate to discount government guidance and omit undelivered housing supply from the revised housing target, and their housing trajectory.

2.141 The NPPF outlines a requirement that councils should maintain a supply of housing and monitor progress in building out sites (paragraph 76). The Housing Delivery Test (HDT) was introduced by Government to assist in monitoring delivery of sites.

2.142 The 2021 Housing Delivery Test results were published in January 2022 and indicated that SADC’s score was 69%. The SADC’s 2022 HDT result was 55%, compared with the result in 2021. Given the historic shortfall in housing provision across the borough there is an acute housing crisis. In response to the failure of the Council to maintain deliverable supply of housing St Albans District Council were required to adopt an action plan to seek to remedy historic underprovision.

2.143 The SADC Housing delivery action plan (2021) indicated that across the period from 1994-5 to 20202021 approximately 1,962 affordable housing units had been completed which equates to 73 units per annum; compared with 10,372 total completions across the same period. The figures cited in the action plan were challenged in the appeal decision for Bullens Green Lane where it was deemed that delivery across the period from 2012/13-2020 has worsened in recent years.

*"In SADC, the position is equally as serious. Since the period 2012/13, a total of 244 net affordable homes have been delivered at an average of 35 net dwellings per annum. Again, this equates to a shortfall also in the region of 4000 dwellings (94%) which, if to be addressed in the next 5 years, would require the delivery of 1185 affordable dwellings per annum". (Para 55 of the Bullens Green Lane Appeal Decision*

2.144 This position has been confirmed in the March 2022 annual monitoring report which indicated that across the period from April 2021 to March 2022 a total of 314, net additional dwellings had been delivered taking account a loss of 64 consented units.

*"The overall figure of 314 net additional dwellings completed for 2021/2022 is lower than the figure of 1,068 dwellings per annum (890 dwellings per annum plus 20% Buffer), calculated using the standard methodology"*

2.145 This position represents a shortfall of 754 dwellings against the housing target for this period.

2.146 The evidence set forth in the Appeal Decision for Bullens Green Lane and the Councils own annual monitoring report clearly demonstrates that there is a significant shortfall in provision of both market housing and affordable housing which should be adequately addressed through the housing targets for the replacement Local Plan. It is unclear from the figures set forth within the Reg. 18 draft of the Local Plan whether this historic shortfall is taken into account within the current draft. This position has not improved in the period between publication of the reg.18 and reg.19 publication draft Local Plan.

2.147 It is noted that the withdrawn Local Plan outlined a defined need for net. 14,608 dwellings across the plan period 2019-2036, which equated to 903 dwellings per annum. It is notable that whilst the housing trajectory for the Reg.19 Local Plan covers the period from 2024-2041, its operational lifecycle is 17 years a similar plan period to the withdrawn draft Local Plan. The current drafting does not appear to take into account any shortfall in provision incurred in the period covering the withdrawal of the previous draft Local Plan and present date.

2.148 As a result of the failure of St Albans District Council to deliver sufficient housing to meet housing demand within the borough, central government had mandated the application of a 20% buffer to the OAN housing target to remedy shortfall in provision. In December 2023, central government published the revised version of the NPPF which revised the approach to implementation of OAN and the standard methodology in local plan making. For Councils with an advanced draft Local Plan (Reg.18b) or Reg.19 a provision had been included allowing for an assessment of housing land supply based on a 4 year need rather than 5 year need.

2.149 In the AMR dated 31st March 2023, the council had produced two scenarios based on four year and five year housing land supply calculation.

Four year housing supply

2.150 Applying the four year housing supply methodology, on the basis of SADC having a Reg.18b draft Local Plan in advance of the replacement NPPF being adopted it has been demonstrated that the authority would have a 4YHLS of **1.7 years**. This had been based on a supply of 1802 dwellings across the period from 2023/2024 to 2026/2027, which equated to a shortfall of net. 2,462 dwellings across this period.

Five year housing supply

2.151 In parallel, SADC had undertaken an estimation of the housing land supply position based on a requirement to deliver a 5YHLS. Across the period from 2023/24 to 2027/2028, it had been demonstrated that the authority would have a deliverable housing supply of net. 2060 dwellings, which equates to a 5YHLS of **1.93 years**. This equates to a shortfall of net. 3273 dwellings overall.

2.152 The housing figures cited in Table 3.2 does not accurately reflect the actualised housing need when the 20% buffer is taken into account for the period from 2023/2024 to 2026/27. The 20% buffer for this period equates a requirement for **1068** dwellings per annum within this period before gradation to **888** across the remainder of the plan period.

2.153 The evidence set forth in Table 3.2 is misleading as the housing trajectory set forth in the Council's annual monitoring report 31st March 2023 (Table 3, page 33) **(Appendix 6)** outlined across the period from 2022/23 to 2040/41 a minimum of **16,696 dwellings would be required to meet objectively assessed housing need, based on the 4 YHLS scenario, or 16874 dpa based on the 5YHLS position.** The figures cited in the Reg.19 draft of the Local Plan represent a **shortfall of between 2,093 dwellings** This is broken down as follows:

- **4,264** dwellings across the first **4** years of the plan period (2023/24 – 2026/27) (**1066 dpa**)
- **12,432** dwellings across the remaining **14** years of the plan period (2027/28 – 2040/41) (888 dpa)

2.154 It is unclear, why or how the authority **are discounting net 14% of the evidenced housing need from the Local Plan trajectory.** Given that SADC had only delivered 305 dwellings in the period from 2023-2024, it is questioned how the projections within the two AMR'S have omitted net. 926 dwellings given that housing delivery across the same period would not match the variance

2.155 The figures set forth within the Reg. 198 draft of the Local Plan represent a clear contradiction to the evidence published by St Albans District Council. It is clear that the evidence set forth in the evidence base for the draft Local Plan is unsound as the **current housing target represents a shortfall of 14% against evidenced need set forth within the Councils own evidence base**.

2.156 The housing trajectory acknowledges that the housing need cannot solely be accommodated on

brownfield land and green belt land is required to meet established housing targets.

2.157 The deterioration of the housing land supply position of the past two decades has placed increasing pressure on housing affordability with demand significantly outstripping supply resulting in an exponential rise in house price to affordability ratio in St Albans. The evidence set forward in support of the Chiswell Green Lane cojoined appeals measures this as follows:

10. *In 2003, it was 10.28 –already the highest in the East of England*
11. *By 2010, it had grown to 12.36 (Parker CD 4.77 [3.20]);*
12. *By 2012, it had grown yet further to 12.47*
13. *By 2017, it was 16.62 (Parker CD 4.77 [3.36]); and*
14. *In July 2021, it was 17.32 (Parker CD 4.77 [3.44]).*

*"To put that into context, it means that individuals on median incomes now need to find more than 17 times their annual salary to buy a median priced property in St Albans (Gingell CD 4.80 [10.5]). That is the housing reality facing ordinary people on ordinary earnings, hoping to buy a home of their own in St Albans today* ***(Land North of Chiswell Green –Closing Statement –May 2023)*** [13]

2.158 It is clear that the inability of SADC to prepare a plan which positively addresses the needs of the housing market is having a catastrophic impact on the local housing market and housing affordability which unaddressed will result in a significant portion of the employment market relocating outside the borough to secure home ownership with associated knock on to the wider employment market.

2.159 As evidenced in our representations. we would strongly challenge the housing need target set forth in the Reg.19 DRLP. Without appropriate modification to the housing targets to align with evidence previously published by SADC the DRLP will be unsound and will exacerbate a deepening of the housing crisis in St Albans DC.

2.160 We would also question the approach to housing distribution and deliverability of housing sites which are relied on in the Reg. 19 DRLP.

Distribution of Housing with St Albans District Council

2.161 Table 3.2 of the Draft Local Plan identifies that 9,905 residential units are planned to be delivered on sites which are currently in the Green Belt, with delivery across 12 broad locations which have been demarcated for strategic level development in excess of 1000 units and large sites (100-249 units) and medium / small sites (5-99 units).

2.162 The housing trajectory over relies on the delivery of the Hemel Hempstead Garden Extension and the Broad Location sites to meet the housing need across the plan period, with this equating to 86% of deliverable sites on green belt land and 58% of the overall housing need across the plan period.

2.163 Conversely, the draft Local Plan indicates that 8% (1378 units) of the housing need will be met from other large and small / medium development sites across the borough, **a further reduction from Reg. 18 stage which included provision for delivery of net. 1725 units (11%) housing supply**.

2.164 Para 3.24 of the draft Local Plan acknowledges that land assembly, physical and social infrastructure provision represent a significant challenge to unlock delivery of these strategic sites.

2.165 It is conceivable that infrastructure constraints to unlock these strategic sites could hinder delivery of housing units in line with the targets set out in the housing trajectory for the DRLP. This constraint has been acknowledged by SADC with the omission of net. 450 residential dwellings between Reg. 18 and Reg. 19 stage on the Hemel Hempstead garden city. The Local Plan trajectory does not take account of real term challenges to the delivery of housing units on these sites, namely the economic downturn and challenges to supply market as a result of geopolitical issues.

2.166 At present, it is understood that on strategic land sites, housing sales can be as low as 0.8 units per week. This level of sale is not conducive to housebuilders bringing forward applications, or commencing delivery of consented units. Given the current geopolitical instability and the impact of market slow down impacting delivery rates, it is conceivable that St Albans could struggle to demonstrate a deliverable housing land supply, within the mid to latter stages of the Local Plan period given the stepped housing requirement to net. 1250 and 1050 dpa respectively. Given very little contingency has been built into the LP housing land supply it is considered that there is a tangible risk that without modification, SADC could find that they are unable to demonstrate a deliverable housing land supply.

2.167 Therefore we consider that a broader range of green belt sites should be allocated within the DRLP to provide contingency in the event that there are delays in the delivery of the strategic sites.

2.168 It would assist parties responding to the consultation if St Albans DC were to publish either full or interim figures in respect of housing delivery to 31st March 2024, to provide an accurate overview to current housing delivery at present date. **We do not consider that the housing needs will be met in SADC, nor do we consider that the timing of the delivery trajectory is achievable.**

2.169 The current calculation of the local housing need using the Standard Method for SADC sets out that the minimum figure for St Albans is 885 homes per annum, which across the plan period equates to a need of 16,874 homes, as set forth in the AMR 2023.

2.170 Table 3.2 in the draft Local Plan calculated 14,603 units within its sources of supply. **This leaves a very small, if any, adequate buffer, to account for non-delivery** This position is worsened when you take into account that **14% of the housing target** will be delivered from **unsecured windfall sites** within the borough The Local Plan is fundamentally flawed as the council are artificially reliant on an arbitrary number of windfall sites to be delivered each annum to hit

their targets. As outlined in the section below, for the first five years of the Local Plan the proportion of windfall sites contributing to housing delivery is at 26% (net. 653 dwellings) which represents an unsustainable level of windfall provision.

2.171 There is no guarantee that any of these sites will come forward, or on the timeline envisaged. This fact is evidenced by SADC's appalling housing delivery record across the past two decades. Without allocation of additional brownfield sites or green field sites in the Local Plan, a lack of clarity will unduly compromise the ability for these sites to be brought forward; which will create a shortfall in housing delivery and an ability to meet established housing targets.

2.172 This position is fundamentally flawed and innapropriate. As outlined in our reg. 18 representations and reiterated in these comments; our client contends that the authority should be seeking to include a broader range of smaller, medium and larger scale sites within the housing supply to provide contingency within the early stages of the Local Plan period to ensure that the authority are able to demonstrate a deliverable housing land supply, in advance of the housing units coming online from the strategic housing sites.

2.173 When examining the details of this calculation, it is possible to comment further on the following specific points:

Past Delivery

2.174 **885 dwellings per annum is well in excess** of the recent built rates. On average, 360 **net additional dwellings** have been built over the last three years (2021/22 – 2023/); which had been preceded by deliver of net 483 dpa between the period from April 2019 – 31st March 2022.

2.175 Furthermore, the St Albans District Council AMR 2023 indicates that across the period from 1994/95 to 2023 a total of 11,447 dwellings had been delivered across the borough equating to **395 dpa.** This already demonstrates that the targets are optimistic, in part, on the basis of the present entirely brownfield approach to housing, and high proportion of windfalls, which the DRLP should be seeking to address.

2.176 On a more granular level, the AMR (2023) outlines that across the period from 2019-2023/4, SADC delivered 2292 dwellings, which equates to net. 458 dpa. As evidenced in the housing delivery test results, the authority is consistently underperforming against the housing need.

2.177 More critically housing delivery within the borough has been centred around development on previously developed land with net**. 9,439 dwellings (392 dpa**), equating to **87% (on average)** of the borough's housing supply. Given that SADC has a limited supply of brownfield land being comprised of 81% green belt this situation is unsustainable and represents a symptom of the chronic failure of SADC to meet the established housing needs of the borough over a substantial period of time. The housing situation in St Albans DC is dire and without appropriate intervention will be unsustainable.

2.178 It is noted that the Local Plan includes a range of brownfield allocations, which are formerly employment land. The Local Plan fails to provide a robust justification outlining that the release of these employment sites will not result in a shortfall of employment floorspace within the borough.

2.179 The evidence base supporting the brownfield allocations is dated and does not adequately demonstrate that this level of brownfield release could be supported in planning terms. With regards to the deliverability of the brownfield land housing allocations for residential use, the Local Plan is lacking on evidence that the housing allocations proposed within the draft Plan are financially viable and are realistic development opportunities.

Green Belt sites

2.180 The housing trajectory over relies on the delivery of the Hemel Hempstead Garden Extension and the Broad Location sites to meet the housing need across the plan period, with this equating to 83% of deliverable sites on green belt land and 58% of the overall housing need across the plan period.

2.181 It is unclear what capacity studies have been undertaken for each of these strategic sites and consideration on deliverability. This is already unrealistic when it is considered they would have to wait for the adoption of the Local Plan, and associated Green Belt adjustments before the principle would not require the high test of very special circumstances. Further, it is likely that area wide masterplans or design briefs / design codes will need to be adopted and implemented as supplementary guidance for the larger sites before delivery can commence. This will result in significant delays in delivery.

2.182 However, an important message is being portrayed in this trajectory: the importance of Green Belt sites in terms of housing delivery. Although it is considered that the timescales mentioned above are unrealistic, it is acknowledged that Green Belt sites do usually progress at a faster rate than more complicated brownfield sites that are more likely to have existing use value, remediation, demolition and land assembly considerations. They are also more likely to incur additional costs and given the current state of the market this may slow down the progress of development even further on brownfield sites.

2.183 The most effective way of forecasting housing numbers would be to allocate a greater number of sites as contingency, and have a greater number of Green Belt sites coming forward at even periods across the plan period. As outlined below, year 6-15 of the Local Plan delivery rates barely meet the annualised housing targets of 1250 dwellings and 1050 dwellings respectively. The framing of the housing targets for the three cycles is symptomatic of a failure to plan positively to meet the housing needs for borough. It is conceivable that reliance on a small number of sites within the back end of the plan period will result in the Council failing to demonstrate a deliverable housing supply.

2.184 It is considered that further consideration should be paid to the inclusion of a greater range of smaller / medium scale green belt sites in sustainable locations which have shorter lead in times for delivery as a contingency. It is requested that further consideration is paid to the inclusion of land at Roundhouse Farm as an allocated site within the DRLP. Inclusion of this site will contribute to the early delivery of net. 155 residential units.

<u>Reliance on Effective Windfalls</u>

2.185 Within the DRLP Table 3.2, SADC has identified that c.20% of the total sources of supply would come from Windfall sites; these are not identified as allocations in the Local Plan. As set forth in these representations it has been evidenced that SADC have consistently failed to deliver sufficient housing to meet established demand, resulting in significant shortage which is exacerbating the housing crisis in SADC.

2.186 On average, **4583 net additional dwellings** have been built over the last three years (2019/20 to 2023/24). Furthermore, the AMR 2022 indicates that across the period from 1994 to 2023 a total of 11,447 dwellings had been delivered across the borough equating to **395 dpa which falls significantly below the target of 885 dwellings per annum. The heavy reliance on windfall sites with no guarantee on deliverability is fundamentally unsound.**

2.187 To rely so heavily on this level of unallocated sites coming forward which are not formally identified in a plan is overly ambitious, not robust, and not based on past trends. As indicated by the past delivery, SADC has consistently failed to plan in positive manner to deliver anywhere near to the up to date housing requirements. It is unclear how the figure of 145 dpa has been arrived at as this appears to have been arbitrarily chosen to seek to artificially meet the boroughs housing target. It is also worth repeating that SADC is heavily constrained by Green Belt, which will make delivery of this proportion of windfall development even more challenging given that the

majority of readily deliverable greenfield land has already been delivered, or is allocated within the draft Local Plan. This is not positive planning and there is no certainty that these levels are deliverable and directly contradicts with the priorities of Para 15 and 16 of the NPPF 2023.

2.188 This must also be seen in the context of SADC also indicating that they require Green Belt land to be released to meet development needs, as not enough can be accommodated within the urban area. Where, and how, this level of windfall development over and above what has already been identified can realistically be delivered is questioned.

Housing trajectory

2.189 The section below summarises the core comments which are being made on the housing trajectory for the early, mid and end period of the Local Plan process.

*Early stage*

2.190 According to the Housing Trajectory in the first five years there would be a 5.0 years housing supply and this is based on a stepped housing requirement of 485 dwellings within the first five years of the plan period. The trajectory assumes that within the first three years of the operational plan period (2026/27, 2027/28 and 2028/29) a **31% shortfall** against the **requirement of 1455 dwellings (deficit of 389 units).** This shortfall is planned to be offset by over provision within the remaining 2 years of the first five years of the plan period to achieve a 5 year housing supply of 2941 dwellings (588 dpa) within this period, but this is contingent on an over delivery of in excess of 1875dwellings for the remaining 2 years. This level of delivery is predicated on the large strategic development sites starting to be brought online, no contingency has been made for delays in delivery of these larger allocated sites which often have infrastructure and land acquisition complications that often delay progression. It is already evident that there are challenges to the delivery of the strategic sites within the borough, with the prospect for delivery of an element of housing on these sites into the next plan period.

2.191 The housing trajectory within this period is heavily reliant upon the delivery of net. 1077 dwellings from **existing permissions present within the borough, which equates to net 36%** of the housing supply for this period. Our client would query the validity of this approach and the figures that have been cited. Namely, the figures cited in the Local Plan bear no relationship to the figures set forth within the AMR (2023) as summarised in the table below:

2.192 There is an unexplained variance in 'Permissions (Estimated Future Completions)' of net. 305 dwellings within the first five years of the LP plan period alone. There is no explanation within the supporting documentation to the LP on where the additional dwellings have been derived from. Given that this equates to net.10% of the housing requirement for the first five years, our client would query where the evidence is to substantiate this position. The additional provision does not appear to be substantiated on an evidential basis in the information that has been published with the Reg.19 consultation draft.

2.193 Given that the Local Plan period already includes a windfall allowance of 653 dwellings across this period (26%) it is unclear why a further 305 dwellings (10%) of unsecured provision has been forecast within the Local Plan housing trajectory**. Overall, this would equate to approximately 26% of the total housing supply within this plan period, which represents an unsustainable level of reliance on speculative development**.

*Mid Period housing trajectory*

2.194 Our client expresses reservations over the methodology which has been applied in the preparation of the housing trajectory for the middle years of the Local Plan period.

2.195 Across the mid period (second 5 year cycle) of the LP period, planned delivery is for net. 6,298 dwellings (1259 dpa) against an annualised target of 1250 dpa. Targeted provision across this period just meets the 1250 dpa threshold and is contingent on delivery of the Hemel Hempstead Garden community (1635) and the Broad Locations (2240) with limited contribution from other green belt sites, comprising net. 892 dwellings in this period.

2.196 **This stage of the housing trajectory does not allow for any contingency in the eventuality that delivery rates on the strategic sites falls below the accelerated delivery rate of 1250 dwellings per annum.** This approach is fundamentally unsound and is likely to result in a shortfall in housing provision and failure to demonstrate a 5 year housing land supply within year 6-10.

2.197 Again, the housing trajectory is reliant on net. 612 dwellings (10%) which are delivered from the existing or future permissions. For the Local Plan to be delivering units from extant permissions this late into the Local Plan period, is questionable. This represents a departure from the evidence contained within the Annual Monitoring Report (2023) which includes provision for net. 215 dwellings within this period. **It is unclear where the additional 400 dwellings are being generated from, as this has not been substantiated with evidence contained in the Reg. 19 Draft Local Plan**.

2.198 Given that the Local Plan period already includes a windfall allowance of 725 dwellings across this period (12%) it is unclear why a further 400 dwellings (6%) of unsecured provision has been forecast within the Local Plan housing trajectory. **Overall, this would equate to approximately 18% of the total housing supply within this plan period, which represents an unsustainable level of reliance on speculative development.**

*Late stage plan period*

2.199 Similar issues are present within period 11-15 whereby it is anticipated that 4952 dwellings (990 dpa) will be delivered against an annualised target of 1050 dpa, which equates to a **shortfall of net. 298 dwellings against the stepped housing requirement.** As with the mid stage of the plan period, the f**ailure to identify a sufficient range of medium and larger scale greenfield sites to provide contingency** results in the situation where **SADC are not able to demonstrated a deliverable 5 year housing land supply within the end period of the LP (4.9 YHLS).**

2.200 Housing delivery within this period of the Local Plan lifecycle is contingent on delivery of 85% ( units) from the Hemel Hempstead extension (2,390 units) and the Broad Locations (1837 units), with the residual amount drawn from the windfall sites. As outlined in these representations, reliance on delivery of a smaller number of large and strategic allocations to provide the majority of the housing in this plan period is ill advised. It has already been demonstrated through the councils own evidence that on one site HGC, 10% of the housing provision forecasted at R.18 stage had been lost in R.19 stage and will now fall within the next plan period. It is likely that similar issues could arise on the other Broad Locations sites. **Given that SADC cannot demonstrate a deliverable 5YHLS in this period, any residual loss of units being delivered from these sites will result in the need for SADC to refresh the spatial strategy and allocate additional sites to compensate for the shortfall in provision. It is therefore requested that evidence is provided on the anticipated delivery timescales for each of the site allocations, to enable a robust review of SADC's housing land supply position.**

*Overarching comments on housing trajectory*

2.201 The housing trajectory is overly weighted towards strategic sites and large scale development sites which are all subject to requirement for the preparation of area wide masterplans, design codes and design briefs which require approval and adoption before delivery of these sites can start to commence.

2.202 The formulation of area wide masterplans and design codes can historically be an incredibly time intensive action given the need for extensive community engagement in their preparation, in some instances this extends across several years. This is all before applications can be progressed

which given the nature of these sites will either be in hybrid or outline form. It is not uncommon for strategic sites to experience multiple year delays passing through the planning system before outline permission is established, which is likely given the nature of these sites. Once outline approval is established reserved matters approval will be required before work can commence on delivery of the initial phases of these sites.

2.203 It has been evidenced that a number of strategic sites across the country have stalled as a result of land assembly, financial viability, environmental constraints and site mobilisation. A small number of examples have been set out below:

*Otter pool – Folkestone*

2.204 In Folkestone BC, the authority had sought to deliver a new garden community to deliver net. 10,000 dwellings as part of their spatial strategy, as part of the 2018 Local Plan review adopted in Feb 2022. In 2023, outline planning permission had been granted at committee for the first 8500 units, but the S106 has not been completed. It had originally been intended that the first phases would be brought online in 2025. Places for People had come online as development partner responsible for taking on the residential land. In October 2024 it had been reported that Places for People have withdrawn from the development partnership, over concerns that the scheme was unviable.

2.205 The outline application has yet to have a completed S106 agreement, and there is no clear sign that another strategic partner has the appetite to take this site on. It has been reported that the council are seeking to reengage with the landowners to bring meanwhile uses back on site while the council considers their options for the disposal of the site. **As of November 2024, more than 6 years from inception of the draft Local Plan and 2 years from the adoption of the replacement Local Plan, outline permission has not been formally executed, reserved matters approval has not been secured for preliminary phases and no units have been delivered.** There is no guarantee that this will come online in the coming years, despite investment of net. 119 million by Folkestone BC.

1. Years in inception –**6 years, 2 post plan adoption**
2. Outline permission secured –**No**
3. Reserved matters approval secured –**No**
4. housing units delivered - **Zero**

*North Horsham*

2.206 In 2018, Horsham DC granted permission for an extension to the settlement of North Horsham to deliver 2,750 new houses alongside new employment floorspace and education campus and associated development. Legal and General whom are acting as the development partner for HDC secured approval for the first 390 dwellings in 2021, as of April 2024, 100 occupations had progressed on site.

2.207 The borough has been plagued by water neutrality constraints which have resulted in the borough retrospectively seeking a water neutrality solution that has significantly delayed progression on site. As it stands HDC are still seeking a water neutrality solution and progression of future phases of the development have not been brought online.

1. Years in inception –**9 years post plan adoption (November 2015)**
2. Outline permission secured –**2018 (3 years post plan adoption)**
3. Reserved matters approval secured – 2021, (6 years post plan adoption)
4. housing units delivered – 100 occupations as of April 2024 **(9 years post plan adoption)**

2.208 Delivery of this strategic site is so challenging that the vast majority of the housing units to be delivered on this site will now fall within the housing trajectory for the replacement local plan. A small fraction of the housing units proposed to be delivered in the plan period have been.

*Deepcut Barracks*

2.209 In 2011, Surrey Heath Borough Council adopted their Local Plan which included the redevelopment of Deepcut Barracks site as a strategic housing allocation for net.1100 dwellings. Hybrid planning permission was granted in 2012 for the preliminary phases of the development. As of January 2024, net Across the wider masterplan, net. 363 residential dwellings benefit from either detailed planning permission or are currently under construction, or complete. When combined with the 81 dwellings delivered under the detailed element, this equates to 444 dwellings or 37% of the quantum of housing to be delivered on the Mindenhurst site. Delivery of the site has been complicated by infrastructure delivery and land assemblage constraints.

1. Years in inception –**13 years post plan adoption (November 2011)**
2. Outline permission secured –**2012 (1 year post plan adoption)**
3. Reserved matters approval secured for first residential phase – 2018, (7 years post plan adoption)
4. housing units delivered – 363 occupations / permissions as of October 2024 **(13 years post plan adoption)**

2.210 Delivery of this strategic site has been so significantly delayed that the majority of the housing units were submitted to Surrey Heath BC in January / Feb 2024, to prevent the outline permission from lapsing. **This site contributed less than 444 dwellings to the boroughs housing land supply within the plan period (37%) with 63% now falling within the housing trajectory for the replacement Local Plan.**

2.211 We could provide numerous other examples where constraints in the delivery of strategic housing sites has resulted in housing units being brought online significantly later than envisaged under the Local Plan. As outlined earlier in this statement, it is evident that there is scepticism on the roadmap for the delivery of the Hemel Hempstead Garden Community, which is complicated given that this is being delivered in partnership with Dacorum BC whom are progressing on divergent timescales to SADC.

2.212 This is further complicated by the requirement of Draft Policy LG6 that all sites released from the green belt will be required to provide a green belt compensatory strategy which details the approach to delivery of “new or enhanced infrastructure, woodland planting, landscape and visual enhancements, improvements to biodiversity, new or enhanced walking routes and improved access to recreational facilities’. The detail of the compensation strategy will need to be worked up in detail as part of the initial site masterplan stage.

2.213 The expectation that housing units from the larger ‘broad location’ and strategic sites will be completed within the first 7 years of the Local Plan period is overly optimistic and unrealistic, based on current trends. This is particularly relevant given the acute economic circumstances present in the UK where housing delivery rates are plummeting in response to adverse market conditions. The over reliance on a small number of large scale and strategic sites and failure to **integrate appropriate contingency is unsound**.

2.214 In summary, it is evident that SADC is heavily reliant on the Hemel Hempstead urban extensions and strategic development sites and windfall sites to meet its housing requirement, with very little allowance in the final 10 years of the plan period to rectify shortfall in delivery. Given the complexity of delivery of strategic sites, predicating the boroughs housing land supply on a small number of sites is incredibly risky, as there is no tolerance to compensate for shortfall. Based on previous delivery rates associated with large complicated sites, some of the targets are not only unachievable but they are based on flawed calculations. As such, it is evident that additional Green Belt land needs to come forward to provide greater certainty with the delivery of additional housing. It is possible to conclude therefore that the Plan has not been **positively prepared nor is it effective.**

<u>Stepped Housing Trajectory</u>

2.215 Whilst not clear from proposed policies in the Draft Local Plan, it is noted that the Table at 3.2 of the Draft Local Plan implies the Draft Local Plan is proposing a stepped housing requirement.

2.216 It suggests the housing requirement will be set at a mere 398 dpa during the early years of the plan period (2024-2026); rising to 485 dpa for the period 2026-2031. Only after 2031 does the Draft Local Plan set a requirement above the minimum 888 dpa.

2.217 Table 3.2 indicates that even by 2032, the average number of dwelling completions since 2024 will still be below 888 dpa.

2.218 The PPG[14] is clear that, whilst a stepped housing trajectory may be permissible in certain circumstances, the need for such an approach must be evidenced. It stresses that strategic policy-makers should not seek to unnecessarily delay meeting identified housing needs. A stepped trajectory should be the exception, and the new Local Plan will need to justify such an approach if it is to be pursued.

2.219 The stepping of the trajectory is inherently problematic: the housing shortage is a current and acute issue facing the District. To delay the delivery of much-needed homes, with the resultant negative social and economic impacts for the District, is something that the new Local Plan should seek to avoid if at all practicable.

2.220 In the case of St Albans District and its Draft Local Plan, before concluding that a stepped trajectory is necessary (and if it is, the degree to which it should be stepped) it is important the Council explores all sustainable options for meeting needs earlier in the plan period, i.e. to consider whether there are additional sustainable, deliverable sites the new Local Plan does not currently support, but which could deliver homes early in the plan period if they were to be allocated through the new Local Plan. Failure to do so would mean the new Local Plan is unnecessarily delaying the delivery of homes, contrary to the PPG.

Duty to Cooperate – Context with Welwyn Hatfield BC

2.221 It is recognised that SADC shares a Functional Economic Area with neighbouring Welwyn Hatfield Borough Council. SADC might well consider it is accommodating its own needs (as we question), though it is apparent that Welwyn Hatfield share many of the similar green belt conditions which hinder delivery of housing. It is unclear what effort has been made by SADC and WHBC to plan in a collaborative manner to meet objectively assessed housing need.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Summary**

2.222 In summary, Bellway Homes Limited has strong concerns with draft Policy SP3. The crux of the objections are as follows:

- **Level of housing proposed (Standard Method) does not allow for contingency** and is therefore not robust or positively prepared;
- **Lack of recent delivery, 5YHLS,** and lack of contingency warrant a higher housing requirement;
- **Level of windfall sites anticipated is unachievable and speculative**, most sites need to be formally allocated to be sure the level of housing proposed is achievable**.**

- **Green Belt Assessment is flawed due to it not being fine-grain,** and no exceptional circumstances report published;
- Further sites should therefore be **allocated to account for excessive windfall provision and over reliance on a small number of strategic development sites.**

**Strategic Policy SP3 – Land and the Green Belt**

- The draft Local Plan is based on an overall housing target of 885 dwellings per year, based on the standard methodology. This is supported and should be seen as a minimum level of supply.
- Policy SP3 and the preceding text sets out the strategic case for changes to the Green Belt to facilitate the homes, employment space and infrastructure needed in the local area. The consequences of not amending Green Belt boundaries have been obvious in the district over the past 30 years, with sustained house price growth, increased commuting as workers can no longer afford to live locally and a declining supply of commercial space. The exceptional circumstances needed to amend Green Belt boundaries are evident and the Council's position is supported.
- The age of the current Local Plan means that the priority should be to secure a new Local Plan in order to boost housing delivery above the current rate. The Council's decision to accelerate the Local Plan timescale to enable examination under the current NPPF is supported, given the almost unique circumstances of the district. However, this Local Plan can only be considered an interim Plan. The likely substantial increase in housing requirement brought in with the new NPPF means that the Council will need to commit to an immediate review of the Local Plan.
- There is no current commitment in the draft Local Plan to an immediate review. This is a policy omission. A commitment and a timescale should be included so that progress can be made as quickly as possible.
- In summary, we consider Policy SP3 to be **legally compliant** and **sound**. **No modifications** are therefore necessary.

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report for details**

**Strategic Policy SP3 – Overview**

- The draft Local Plan is based on an overall housing target of 885 dwellings per year, based on the standard methodology. While this is supported, it should be seen as a minimum level of supply and any opportunity to increase the level of provision within the context of the overall strategy should be explored.
- The Council has chosen to accelerate the Local Plan timescale to enable examination under the current NPPF, rather than address the potential 75% increase in housing target likely to be brought about by the new NPPF expected to be published early in 2025. While this decision is understandable, given the age of the current Local Plan and the need for a strategic framework of some sort, the wider context suggests that if additional sites are available now that could sit within the overall framework set by the draft Local Plan, then those opportunities should be taken.

- We consider that there is a clear case for additional housing sites to be included within the draft Plan. The reasons for this include:
- Strategic cooperation over wider housing needs
- Overoptimistic site capacity and density assumptions
- Deliverability of proposed urban sites
- Overoptimistic windfall allowance

- In addition to these concerns about the overall scale of housing, there is a clear issue with the timing of delivery – a five-year supply is only possible through the use of a stepped trajectory.
- However, addressing these issues in a systematic and comprehensive way would require extensive updates to the evidence base and cannot be done within the context of a Local Plan Examination. We therefore do not advocate that these issues are fully addressed now but are instead picked up through the immediate Plan Review.
- Nevertheless, the need for more homes – particularly delivered early in the Plan period – is such that where opportunities exist to include new sites that are consistent with the overall strategy and can be included based on existing evidence, these opportunities should be taken.

- In the above circumstances, and notwithstanding the comments above in respect of its allocation for employment use, the alternative inclusion of the Report Site as a housing site would also be supported by the landowner.

**Strategic Policies SP3 & SP5 – Approach to the Green Belt**

- The 2023 Arup Stage 2 Green Belt Assessment included the Report Site within Strategic Land Parcel SA-138. The Assessment of SA-138 is largely positive in terms of its performance against the purposes of the Green Belt overall, however, its release in isolation or combination is considered to result in significant harm to the performance of the wider Green Belt. Concerns are also raised that its release would result in a hole/island in the Green Belt to the west of Chiswell Green.

- There has however been a material change in circumstances since the publication of the Arup Assessment. The recently allowed appeals, delivering a combined total of 721 dwellings on the parcels of land to the north and east of the Report Site, will result in the development of the predominately open land to both sides of Chiswell Green Lane adjacent to the Report Site eastwards to the existing settlement boundary (See Section 2.0 and Figure 3 above).
- In these circumstances the Report Site would not appear as an isolated island, detached from Chiswell Green, but rather would adjoin significant built to the east and north that formed an extension to the settlement. The development to the north would extend further westwards than the extent of the Report Site, whilst the Site is in any event contained by the former Gardens of the Rose Site and adjacent properties - Mansion House and Bonehill Cottages.
- It is further noted that NPPF paragraph 147 states that where it has been concluded that it is necessary to release Green Belt land for development, plans should give first consideration to land which has been previously-developed and/or is well-served by public transport. It is clear that the Site comprises PDL with relatively good access to local facilities and Public transport, with scope for improved access as part of the development of the adjacent sites.
- Notwithstanding the above, as an area of PDL, it is also the case that the Site could be allocated without any further alteration to the Green Belt boundary. The NPPF (para 154 (g)), currently allows for the residential redevelopment of Sites which would not cause substantial harm to the openness of the Green Belt, where the proposal would contribute to meeting an identified affordable housing need within the area of the local planning authority. Such an approach was successful at the Noke Lane Business Centre to the south of the Site (See Section 2 and Figure 3 above). With regard to the employment use of the Site, it is noted that the draft NPPF at paragraph 151 (g) proposes to extend the '*substantial harm*' test to all proposals for the limited infilling or the partial or complete redevelopment of PDL in the Green Belt.

## 233 - Central Bedfordshire Council

Submission Number: 233 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Central Bedfordshire Council Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy SP3 identifies that the minimum number of homes needed in the district using the Government's current Standard Methodology is 885 dwellings per year, or a total of 14,603 over the plan period to 2041. CBC are supportive of the Council's use of the current Standard

Methodology as well as the Council's approach of prioritising development sites on Previously Developed Land/Brownfield land first before releasing some Green Belt sites. Furthermore, CBC supports the Council's approach to selected Green Belt boundary adjustments in the right areas to meet the identified needs as well as to provide wider protection of the remaining Green Belt.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is CBC's understanding from meetings held under the Duty to Cooperate, that St Albans are able to meet all of their housing requirement in full and are therefore not seeking assistance from any neighbouring authorities. Whilst this is alluded to in paragraph 3.19c, the plan does not explicitly state that this is the case. For the sake of clarity, it would be helpful for this to be clearly referenced in the plan.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*Refer to Attached submission letter for whole response and figures.*

8. **Housing Need and Requirement**

8.1 Policy SP3 (Land and the Green Belt) states that:

*"The minimum number of homes needed in the District, following a local housing need assessment conducted using the Government's required Standard Methodology – is **885** dwellings per year, or a total need of **14,603** to 2041. This housing need figure is the same as the housing requirement figure of **885** dwellings per year, or a total need of **14,603 in the period 1 October 2024 to 31 March 2041**."*

8.2 There is no meaningful text to support this policy in the Draft Local Plan that sets out what SACDC considers to be its housing need / requirement and where these figures come from. This is entirely unacceptable.

8.3 In order to read any further information on the housing need / requirement that the Draft Local Plan is presumably based on, one must look to Chapter 3 (Sustainable Use of Land and Green Belt) of the Draft Local Plan in the supporting text (para 3.7) to Strategic Policy SP3 (Land and the Green Belt). This supporting text states that "*to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the Government's 'Standard Method' for calculating local housing need in national policy and guidance"*.

8.4 However, SACDC does not explain in this section what 'local housing need assessment' has been used to arrive at its housing need. How can the Draft Local Plan consultees understand or interrogate the housing need evidence used by SACDC when there is none provided apart from saying it used the 'Standard Method'?

8.5 Has SACDC used the South West Hertfordshire Local Housing Needs Assessment (September 2020) to arrive at its housing need figure? This study was undertaken four years ago (2020) which is a considerable time ago and should be considered by SACDC to be an out-of-date evidence base document. Policy HOU2 (Affordable Housing) refers to a Local Housing Needs Assessment (LHNA) dated 2019 however this does not appear in the Draft Local Plan Evidence Base on SACDC's website.

8.6 The text goes on to explain (para 3.11) that "*Government requirements for housing and employment growth need to be met in line with the law and Government planning policy. This will ultimately be judged by a Government appointed Planning Inspector. The Council cannot adopt a Local Plan without going through this process. At this point in time, these requirements therefore lead to the use of the housing figures set out at 3.8 above*". It sounds from this statement like SACDC does not place much faith in the housing numbers it is using and is placing any liabilities with Government and the Planning Inspectorate.

8.7 Confusingly, Strategic Policy SP3 (Land and the Green Belt) states that the housing need figure is the same as the housing requirement figure of 885 dwellings per year, or a total need of 14,603.

8.8 It is both irresponsible and a waste of time and resources for SACDC to publish a Draft Local Plan proposing to release broad swathes of the Green Belt based on housing need / requirement figures that it has no faith in and that are not backed by robust evidence.

...

9. **Exceptional Circumstances and Green Belt**

**Exceptional Circumstances**

9.1 The NPPF affords great weight to Green Belts. Chapter 13 of the NPPF sets out policies which relate to the protection of the Green Belt. Paragraph 142 of the NPPF (Dec 2023) states that "*the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence*."

9.2 The NPPF states that:

"*Once established, there is no requirement for Green Belt boundaries to be reviewed or changed when plans are being prepared or updated. Authorities may choose to review and alter Green Belt boundaries where exceptional circumstances are fully evidenced and justified, in which case proposals for changes should be made only through the plan-making process. Strategic policies should establish the need for any changes to Green Belt boundaries, having regard to their intended permanence in the long term, so they can endure beyond the plan period. Where a need for changes to Green Belt boundaries has been established through strategic policies, detailed amendments to those boundaries may be made through non- strategic policies, including neighbourhood plans.*" (NPPF para 145).

9.3 Paragraph 3.19 of the supporting text of Policy SP3 acknowledges the requirements of national planning policy with regards to exceptional circumstances to justify changes to the Green Belt:

"*Before concluding that exceptional circumstances exist to justify changes to Green Belt boundaries, the strategic policy-making authority should be able to demonstrate that it has examined fully all other reasonable options for meeting its identified need for development. This will be assessed through the examination of its strategic policies, which will take into account the preceding paragraph, and whether the strategy:*

1. *Makes as much use as possible of suitable brownfield sites and underutilised land;*
2. *Optimises the density of development in line with the policies in chapter 11 of this Framework, including whether policies promote a significant uplift in minimum density standards in town and city centres and other locations well served by public transport; and*
3. *Has been informed by discussions with neighbouring authorities about whether they could accommodate some of the identified need for development, as demonstrated through the statement of common ground."*(NPPF para 146)

9.4 Notwithstanding the above, RPC raised concerns with the lack of text and evidence explaining the 'exceptional circumstances' that would lead to the justification of changes to the Green Belt. The Draft Local Plan (both Reg. 18 and Reg. 19 versions) fail to state what 'exceptional circumstances' there are for proposing the Draft Local Plan sites in the Green Belt. RPC concluded in previous representations that there was no demonstration by SACDC that it has "examined fully all other reasonable options for meetings its identified need for development".

9.5 Since then, the Council produced a Green Belt Exceptional Circumstances Evidence Paper (September 2024). A detailed examination of this paper outlines several serious concerns:

1. The paper does not attempt to address any of the three criteria in paragraph 146 NPPF.
2. It does not explain how the Council has made as much use as possible of suitable brownfield sites and underutilised land.
3. The Council fails to explain whether they have considered optimising the density of development in town and city centres (St Albans or Harpenden) and other locations served by public transport (e.g. London Colney, Park Street, How Wood and Chiswell Green).
4. It states that one of the 'exceptional circumstances' is *"The nature and extent of the harm to the Green Belt that would arise if the boundaries were to be altered as proposed".* This is a confusing statement and is unclear what SACDC considers to be exceptional about the 'nature and extent of the harm to the Green Belt'.
5. It is also not clear what is meant by*: "The extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonable practicable extent".*
6. Importantly, the SACDC has not complied with the Government's legal test for discharging its Duty to Cooperate. Local authorities must fulfil the legal requirement to cooperate with the Duty to Cooperate prescribed bodies by *"engaging constructively, actively and on an ongoing basis"*[10] on cross boundary strategic matters from the commencement of preparing the Local

Plan to submission of the Local Plan to the Secretary of State for examination. Paragraph 146 NPPF requires discussions with neighbouring authorities about accommodating some of the identified need for development and to demonstrate it in a Statement of Common Ground.

9.6 The Green Belt Exceptional Circumstances Evidence Paper gives no evidence of discussions between SACDC and neighbouring authorities regarding meeting development need. It does not include demonstrated evidence of making as much use of brownfield and underutilised land, and there is a lack of demonstration of density optimisation. Consequently, RPC contests that the Council has demonstrated examining fully all reasonable options for meeting its identified need for development before concluding that exceptional circumstances exist to justify changes to Green Belt boundaries.

**Green Belt Review**

9.7 The Draft Local Plan makes scant mention of the SACDC Green Belt Review (GBR) (Stage 1 2013 and Stage 2 2023). The supporting text of Policy SP3 (paragraph 3.17) only states that the Council undertook a detailed Green Belt Review in order to understand the impacts of potential development in the Green Belt.

9.8 It is perplexing how SACDC can prepare a Stage 2 Green Belt Review consisting of a Main Report of 143 pages and an Annexe of 765 pages and only mention this GBR in passing in the Draft Local Plan.

9.9 Furthermore, the Local Plan's description that the Green Belt Review was undertaken in order to "understand the impacts of potential development in the Green Belt" is not the reason that SACDC should have prepared a Green Belt Review. As the Green Belt Review itself explains the purpose of a GBR is to provide evidence of how different areas of the Green Belt perform against the Green Belt purposes. It is then the role of LPA to take these findings into account alongside other evidence in making decisions about the Draft Local Plan strategy, site allocations / broad locations and ultimately possible alterations to Green Belt boundaries.

9.10 The Local Planning Authority should take the findings of the GBR into account alongside other evidence in making decisions about the Local Plan strategy, site allocations / broad locations and ultimately possible alterations to Green Belt boundaries. Strategic policies that establish the need for changes to the Green Belt boundaries should have regard to the Green Belt intended permanence in the long term, so Green Belts can endure beyond the plan period (paragraph 145, NPPF 2023).

9.11 A GBR forms an important part of the evidence base. It helps a council determine the manner and degree to which change in the Green Belt could be considered without damaging the purposes for including land in the Green Belt and the degree to which harm to the Green Belt would result if development were to take place.

*“The purpose of a GBR is to provide evidence of how different areas of Green Belt perform against the Green Belt purposes, as set out in the National Planning Policy Framework (NPPF, 2021). The Local Planning Authority then take the findings of the review into account alongside other evidence in making decisions about the Local Plan strategy, site allocations / broad locations and ultimately possible alterations to Green Belt boundaries.*

*A GBR forms an important part of the evidence base. It helps a council determine the manner and degree to which change in the Green Belt could be considered without damaging the purposes for including land in the Green Belt and the degree to which harm to the Green Belt would result if development were to take place.”*

(Green Belt Review Stage 2 - Section 1.2)

9.12 The Draft Local Plan explains that a "Site Selection assessment has considered constraints such as environmental considerations like flood risk and wildlife conservation, and other planning factors such as distance to facilities, heritage and access" (Draft Local Plan para 3.18). A series of documents supporting site selection and allocation have been published on the Local Plan library in 2024, which we cover below.

9.13 RPC would also like to raise the following key points regarding the Green Belt Review.

- We question SACDC's decision to reuse the 2013 Green Belt Review Stage 1. This is a study that was conducted over 11 years ago. It was one of the first Green Belt Reviews in the country and consisted of a Stage 1 (Purpose Assessment) and Stage 2 (Site and Boundaries Study). SACDC wants to keep the Stage 1 Study but reject the Stage 2 Study. The reason for this as we understand it is that SACDC and its consultants that prepared the Green Belt Review Stage 2 (2023) claim that the 2013 Stage 1 Review was in some way 'endorsed' by the Inspectors who conducted the Examination for the withdrawn Local Plan in 2020. The Green Belt Review Stage 2 (2023) refers to the Post Hearing Letters issued by the Inspectors explaining that their only concerns with the Green Belt evidence were in relation to the Stage 2 (Site and Boundaries Study). Yet when one reads the Inspectors' Letter (14th April 2020) nowhere does it state this. In fact, the Inspectors appear concerned that the Stage 1 Review was conducted "around the time that the Council was working on the previous SLP. At that time housing requirements were 8,720 (or 436 per annum) and so much lower than the current objectively assessed need (OAN) of 14,608 homes over the plan period". They then raise concerns that the Green Belt Review as not re-visited in the context of the much higher scale of need.
- Over a decade has passed since this first Review was undertaken and the OAN for the District remains as high (14,603 dwellings) and there have been numerous versions of the NPPF since as well as three withdrawn St Albans Local Plans and there is an expected significant amendment to the NPPF announced by Government by the end of 2024/early 2025. Surely SACDC should have started afresh with a full new Stage 1 GBR. In addition to the changes at the national level, there have been numerous Neighbourhood Plans prepared in St Albans District including the Redbourn Neighbourhood Plan (2023) which would need to form part of a GBR Stage 1 Study yet there is no such opportunity for this due to SACDC's decision to focus solely on a GBR Stage 2.
- The GBR Stage 2 (2023) appears to have effectively disregarded the GBR Stage 1 (2013) in any case. Arup describes it as a "more spatially focused piece of work" whereby they simply drew a buffer around each settlement inset from the Green Belt. A 400 metre buffer was drawn for the main settlements (St Albans, Harpenden, Hemel Hempstead, Radlett, Hatfield and Watford) while a 250 metre buffer was drawn for lower order settlements (Bricket Wood, Chiswell Green, How Wood, London Colney, Park Street / Frogmore, Redbourn, Wheathampstead, Shenley, Blackmore End, Abbots Langley) (Section 4.2.1). It then explains that these areas of assessment within the buffers were refined by taking into account (Section 4.2.2):
- SKM Stage 1 GBR weakly performing land against NPPF purposes.
- Promoted sites identified through the Council's site selection work.
- Non-Green Belt land.
- It then states that "The full list of eight strategic and eight small-scale sub-areas, (Figure 3.3), that contribute least towards Green Belt purposes as assessed in the SKM Stage 1 GBR were considered for this exercise. However, only those sub-areas that fell entirely or partially

within the settlement buffer, or immediately adjacent to another area / site entirely or partially within the settlement buffer (see application of settlement buffers), were taken forward. (Page 23).

- Stage 2 has also not taken forward the 'Local Purpose' of the Green Belt established in the Stage 1 GBR which is "To maintain the existing settlement pattern'. This purpose is effectively to assess and maintain the pattern of inner band local gaps between 1st tier settlements from 2nd and 3rd tier settlements and outer bands of secondary local gaps which separate 2nd and 3rd tier settlements. Importantly, Redbourn (2nd tier settlement) and the gap between it and Hemel Hempstead (1st tier settlement), St Albans (1st tier settlement) and the gap between Redbourn and Harpenden (1st tier settlement) is considered a 'primary local gap' as illustrated in Figure 7.7 of the GBR Stage 1 (see below).

*Figure 9.1: Extract from GBR Stage 1 (2013) Figure 7.7 Green Belt Functions*

9.14 Based on the proposed broad locations and allocations in Redbourn in the Draft Local Plan, these 'primary local gaps' between Redbourn and Hemel Hempstead and Redbourn and Harpenden will be significantly eroded to 1.48km and 1.56km respectively (see map and measurements below). The GBR Stage 2 does not appear to acknowledge this or take this into consideration.

*Figure 9.2: Primary Local Gap Erosion between Redbourn - Hemel Hempstead and Redbourn - Harpenden*

9.15 Paragraph 4.23 of the Stage 2 GBR explains the filtering process that was undertaken to remove areas that are largely constrained by major policy constraints. It lists the following 'major policy constraints': Flood zone 3b; Scheduled Monuments; Registered Parks and Gardens; Ancient Woodland; and Sites of Special Scientific Interest (SSSI). Foot note 26 to SSI states "Other sites of international and national nature conservation importance (i.e. Special Protected Areas (SPA), Special Areas of Conservation (SAC) and Ramsar sites do not apply in St Albans. However, as highlighted in Sustainability Appraisal the Recreational Impact Zone for the Ashridge Woods and Commons SSSI component of the Chilterns Beechwoods SAC is located in the District and the great majority of affected sites are located to the east of Hemel Hempstead or at Redbourn. The GBR should take this into consideration.

9.16 As we detail under the HGC policies section in these representations, it is entirely unclear as to how SACDC can justify its disregard for the GBR studies which have not recommended the majority of Hemel East for removal from the Green Belt and in the case of West Redbourn the GBR does not recommend this site is taken forward if HGC is also taken forward.

9.17 It is both disappointing and an oversight that the GBR fails to include a review of the Redbourn Neighbourhood Plan which was 'made' in 2023 including its Design Guidance and Codes (2021) and contains a number of relevant policies and context that should be taken into account as part of the preparation of the GBR which is not even acknowledged. Central to the Neighbourhood Plan is its Vision for it to retain its village feel along with its particular individual characteristics including its high quality built heritage, high street and its green and spacious setting. As stated in the Redbourn Neighbourhood Development Plan (para 6.19):

*“The character of Redbourn derives from its scale and relationship with surrounding Green Belt, which comprises countryside, green and open spaces.”*

9.18 Policy Red 6 (New Housing Sites) (see below) contains a number of requirements that should be taken into consideration as part of the GBR.

*Figure 9.3: Redbourn Neighbourhood Plan 2023 Policy Red 6 (New Housing Sites)*

*...*

**11 Policy LG2 (Support for Transformation of Hemel Hempstead)**

**Green Belt**

11.1 The Stage 2 GBR (2023) concludes that Sub-Areas SA-167, SA-168, SA169a, SA-169b, SA-170, SA-171 and SA-172 perform strongly against the NPPF Green Belt purposes. Of these Sub-Areas the GBR recommends that only SA-167, SA-169a and SA-169b should be taken forward for further consideration and there are still concerns raised regarding these Sub Areas in the GBR as set out below. We note that 169a is proposed for release in the Draft Local Plan but 168b is not proposed for release.

11.2 Sub-Areas (SA-168, SA-170, SA-171 and SA-172) form the Broad Locations North Hemel Hempstead and East Hemel Hempstead (North) and are also assessed as 'Important' in terms of their wider impact on the Green Belt.

11.3 Given that the two proposed Broad Locations at North Hemel Hempstead and East Hemel Hempstead (North) have not been recommended to be taken forward for further consideration SACDC and the Local Plan should not be proposing these areas for Green Belt release. **This should effectively remove these two Broad Locations along with their development assumptions which principally consist of a total of 3,100 dwellings.**

11.4 We pull out some of the key points from the GBR in relation to these Sub-Areas as a record of the clear recommendations of the GBR that the Broad Locations at North Hemel Hempstead and East Hemel Hempstead (North) are not recommended for further consideration:

SA-167

- *"The sub-area plays a moderately important role in preventing the irregular sprawl of Hemel Hempstead, in the absence of prominent inner boundary features".*
- *"Due to its strongly unspoilt rural character, the sub-area makes a more important contribution to safeguarding the countryside from encroachment."*
- *"In combination with SA-168, the release of the sub-area would lead to the irregular and large-scale sprawl of Hemel Hempstead".*
- *"In combination with other sub-areas in the wider cluster in which the subarea is located (i.e. SA-163, SA-164, SA-165, SA-166, SA-168, SA-169a, SA-169b, SA-170, SA-171 and SA-172), the removal of the sub-area would lead to large-scale unchecked sprawl of Hemel Hempstead, and significantly reduce the gap between Hemel Hempstead and both Redbourn and St Albans."*

SA-168

- *"It is judged that development in the sub-area would lead to the perceptual merging of the neighbouring built-up areas."*
- *"The sub-area has a rising topography to the south, allowing views from the southern part of the sub-area onto the open fields in the north. Overall the subarea has a largely rural character."*
- *"If the sub-area was released in isolation, it would significantly alter the performance of the wider Green Belt by enclosing Green Belt to the north and south in built form if developed, and leading to the large scale, irregular sprawl of Hemel Hempstead. It would also strengthen the role of the Green Belt to the north-east in maintaining the gap between Hemel Hempstead, with only a small part of Green Belt and the M1 preventing complete physical coalescence of the settlements."*
- *"In combination with either SA-169a, SA169b and SA-171, or with SA-167 the removal of the sub-area is likely to alter the performance of the wider Green Belt by enclosing Green Belt to the north and south respectively in built form if developed, and leading to the effective coalescence of Hemel Hempstead and Redbourn. The release of the sub-areas in combination would also lead to the disproportionate sprawl of Hemel Hempstead in comparison to the existing settlement size."*

- *“Overall, the sub-area plays an important role with respect to the strategic land parcel, and its release in isolation or in combination would harm the performance of the wider Green Belt.”*
- *“The sub-area performs strongly against NPPF purposes and makes an important contribution to the wider Green Belt. Not recommended for further consideration.”*

SA-169a

- *“In combination with other sub-areas in the wider cluster in which the sub-area is located (i.e. SA-163, SA-164, SA-165, SA-166, SA-167, SA-168, SA-169b, SA-170, SA-171 and SA-172), the removal of the sub-area would lead to large-scale unchecked sprawl of Hemel Hempstead, and significantly reduce the gap between Hemel Hempstead and both Redbourn and St Albans.”*
- *“The southern boundary is readily recognisable but less likely to be permanent. If the sub-area was released, the new inner Green Belt boundary would not meet the NPPF definition. The new boundary would require strengthening.”*
- *“The sub-area performs strongly against NPPF purposes but makes a less important contribution to the wider Green Belt. If the sub-area was released, the new inner Green Belt boundary would not meet the NPPF definition for readily recognisable and likely to be permanent boundaries. The new boundary would require strengthening. Recommended for further consideration in isolation as RA-54 or in combination with SA-169b as RC-13.”*

SA-169b

- *“In combination with SA-168, the removal of the sub-areas is likely to alter the performance of the wider Green Belt by leading to the large-scale sprawl of Hemel Hempstead, introducing urbanising influences, and strengthening the role of the Green Belt to the north-east in preventing the coalescence of Hemel Hempstead and Redbourn.”*
- *“In combination with other sub-areas in the wider cluster in which the subarea is located (i.e. SA-163, SA-164, SA-165, SA-166, SA-167, SA-168, SA-169a, SA-170, SA-171 and SA-172), the removal of the sub-area would lead to large-scale unchecked sprawl of Hemel Hempstead, and significantly reduce the gap between Hemel Hempstead and both Redbourn and St Albans.”*
- *“Both the inner and outer boundaries of the sub-area are readily recognisable but not likely to be permanent. If the sub-area was released, the new inner*

*Green Belt boundary would not meet the NPPF definition. The new inner boundary would require strengthening.”*

- *“Overall, the sub-area performs strongly against NPPF purposes but makes a less important contribution to the wider Green Belt. If the sub-area is released, the new inner Green Belt boundary would meet the NPPF definition for readily recognisable and likely to be permanent boundaries. Recommended for further consideration with in isolation as RA-55 or in combination with SA-169a as RC-13.”*

SA-170

- “The removal of the sub-area in isolation is likely to alter the performance of *the surrounding Green Belt by strengthening its role in preventing further sprawl of Hemel Hempstead and the coalescence of Hemel Hempstead with Redbourn.”*
- *“In combination with either SA-169a, SA-171 or SA-172, the release of the subareas is likely to impact on the performance of the wider Green Belt by leading to the outward and irregular sprawl of Hemel Hempstead and by significantly reducing the gap between Hemel Hempstead and Redbourn.”*

- *"In combination with other sub-areas in the wider cluster in which the subarea is located (i.e. SA-163, SA-164, SA-165, SA-166, SA-167, SA-168, SA-169a, SA-169b, SA-171 and SA-172), the removal of the sub-area would lead to large-scale unchecked sprawl of Hemel Hempstead, and significantly reduce the gap between Hemel Hempstead and both Redbourn and St Albans."*
- *"Overall, the sub-area plays an important role with respect to the strategic land parcel, and its release in isolation or in combination would harm the performance of the wider Green Belt."*
- *"The sub-area performs strongly against NPPF purposes and makes an important contribution to the wider Green Belt. Not recommended for further consideration."*

SA-171

- *"The sub-area forms almost the entire gap between Redbourn and Hemel Hempstead and prevents the creation of ribbon development between the two settlements. It is judged that development in the sub-area will lead to the perceptual merging of neighbouring built-up areas."*
- *"The removal of the sub-area in isolation would create a 'hole' in the Green Belt, introducing urbanising influences which would diminish the contribution of the surrounding Green Belt against purpose 3, and harming the integrity of the wider Green Belt. Its release in isolation is also likely to impact on the performance of the surrounding Green Belt by strengthening its role in preventing the further sprawl of Hemel Hempstead and its coalescence with Redbourn."*
- *"In combination with any of the sub-areas, their removal is likely to impact on the performance of the wider Green Belt. The release would lead to the significant sprawl of Hemel Hempstead, both in terms of settlement shape and in size, and its encroachment into the countryside. It would also lead to the perceptual merging of Hemel Hempstead and Redbourn, physically separated only by the M1."*
- *"In combination with other sub-areas in the wider cluster in which the subarea is located (i.e. SA-163, SA-164, SA-165, SA-166, SA-167, SA-168, SA-169a,*

*SA-169b, SA-170 and SA-172), the removal of the sub-area would lead to large-scale unchecked sprawl of Hemel Hempstead, and significantly reduce the gap*

*between Hemel Hempstead and both Redbourn and St Albans."*

- *"The outer boundary of the sub-area is readily recognisable however the southern boundary is less likely to be permanent. If the sub-area was released, the new inner Green Belt boundary would not meet the NPPF definition. The new boundary would require strengthening."*
- *" The sub-area performs strongly against NPPF purposes and makes an important contribution to the wider Green Belt. Not recommended for further consideration."*

SA-172

- *"The sub-area forms almost the entire gap between Redbourn and Hemel Hempstead, and has perceptual visual links to Redbourn. It is judged that development in this sub-area would lead to the physical and perceptual merging of neighbouring built-up areas."*
- *"Overall the sub-area has a strongly unspoilt rural character"*
- *"The sub-area performs an important role in preventing the outward sprawl of Hemel Hempstead and preventing encroachment into the countryside due to its unspoilt rural character. The sub-area plays a more important role in preventing the merging of settlements, forming the entire gap between Redbourn and Hemel Hempstead."*
- *"Its release would enclose the Green Belt in built form if it was released, and strengthen both its role in preventing the further unchecked sprawl of Hemel Hempstead and the coalescence of Hemel Hempstead and Redbourn. It would also introduce urbanising influences to the surrounding Belt Green and diminish the sense of openness in the countryside."*

- *"In combination with SA-170, the removal of the sub-area is likely to alter the performance of the wider Green Belt against purposes 1 and 2 as it would lead to significant sprawl of Hemel Hempstead, and a diminution of the gap between Hemel Hempstead and Redbourn."*
- *"In combination with other sub-areas in the wider cluster in which the subarea is located (i.e. SA-163, SA-164, SA-165, SA-166, SA-167, SA-168, SA-169a, SA-169b, SA-170 and SA-171), the removal of the sub-area would lead to large-scale unchecked sprawl of Hemel Hempstead, and significantly reduce the gap between Hemel Hempstead and both Redbourn and St Albans."*
- *"As it is located on the district boundary, the sub-area may be impacted by potential Green Belt releases in the neighbouring authority of Dacorum Borough Council. The Dacorum Borough Council Stage 2 Green Belt review and Landscape Appraisal Study (2016) identified sub-area HH-A1 to the west of the sub-area for further consideration. If Dacorum Borough Council decide to release Dacorum HH-A1 as part of their spatial strategy for their emerging Local Plan, the cumulative impact would need to be considered."*
- *"Overall, the sub-area plays an important role with respect to the strategic land parcel, and its release in isolation or in combination would harm the performance of the wider Green Belt."*
- *"The inner boundary of the sub-area is readily recognisable and likely to be permanent. The outer boundaries of the sub-area are readily recognisable but not necessarily permanent. If the sub-area was released, the new inner Green Belt boundary would not meet the NPPF definition. The new boundary would require strengthening."*
- *"The sub-area performs strongly against NPPF purposes and makes an important contribution to the wider Green Belt. Not recommended for further consideration."*

*Figure 11.1: Stage 2 GBR(2023) Figure 5.11 Overall performance against NPPF purposes*

*Figure 11.2: Stage 2 GBR (2023) Figure 5.15 Categorisation*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

There is no meaningful text to support this policy in the Draft Local Plan that sets out what SACDC considers to be its housing need / requirement and where these figures come from.

The Draft Local Plan makes scant mention of the SACDC Green Belt Review (GBR) (Stage 1 2013 and Stage 2 2023).

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

---

### 285 - Ian Holt

Submission Number: 285 Submission Date: 01/11/24 09:00

Respondent: Company/Organisation: Name: Ian Holt

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I strongly object to any plan which is against the word and spirit
of the 'Green Belt' legislation.

And more so if any plan relies on burning carbon which we all know to be playing havoc with 'climate change', backed by established scientific knowledge.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 288 - Chris Berry

Submission Number: 288 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: CPRE Hertfordshire Name: Chris Berry

Comment Number: 13

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**The Draft Local Plan is neither legally compliant nor sound, due to its inadequate treatment of the Green Belt**

The treatment of the Green Belt in the Draft Local Plan is inadequate to the extent that it jeopardises the soundness of the Local Plan. For a Local Planning Authority where over 80% of the total land area is covered by a statutory designation affecting future development, the omission of appropriate policy and proposals renders the Local Plan ineffective.

We note the justification provided by the Sustainability Appraisal for the policy options relating to the classification and allocations of sites and locations for development. However, policies relating to the Green Belt are limited to guidance relating to development outcomes in all cases; omitting any positive treatment of the countryside and associated rural activities which may constrain and influence development form and function.

In failing to address the implications of the five purposes of the Green Belt as they relate to the SACD area, the Council fails to plan adequately for its protection and the contribution that it can make to future development options. Paragraph 180 of the National Planning Policy Framework (NPPF) specifies the need to contribute and enhance the local environment by indicating a range of policy options.

Draft Local Plan policies relate only to development within the Green Belt and not its protection and enhancement as required by the NPPF and noted in the Local Plan Objectives. The Draft Local Plan states that the Spatial Strategy is effectively required to deliver housing figures provided by the Standard Method which in turn requires the use of Green Belt.

This is a fundamental misinterpretation of national Green Belt policy and challenge to the soundness of the Draft Local Plan. The Draft Local Plan refers to legal requirements for housing and employment growth (paragraph 3.11) which ignores the Council's discretion to determine housing targets based on up to date information and national policy guidance, as provided in Paragraph 11b) and footnote 7 of the NPPF.

Paragraph 3.16 of the Draft Local Plan also implies, without evidence, that Green Belt protection inhibits development in sustainable locations. This assertion fails to recognise that development is likely to be more sustainable in urban areas than peripheral locations distant from town centres as proposed for Hemel Hempstead and elsewhere.

**Policies are ineffective and inconsistent with national policy, with regard to the Green Belt**

The Draft Local Plan is ineffective in meeting the aim of Policy SP3 "to protect the Green Belt from inappropriate development". The Plan proposes "select Green Belt boundary adjustments in the right areas to provide wider protection of 'the rest of the Green Belt", but without having established the scale of change that is necessary, or justifying the specific boundary changes.

For example, in the case of the SRFI site, the Draft Local Plan does not define a new Green Belt boundary. This is not consistent with national policy and would not be effective in meeting the Council's stated Green Belt objective. Similarly, policy relating to the Hemel Garden Communities appears only to be justified as a cross-boundary proposal without further evidence regarding specific St Albans requirements, and proposed by national Government.

In every case where “Broad Locations” and other smaller sites are proposed for removal from the Green Belt, these proposals are not justified collectively or individually, and are contrary to national policy in the absence of the demonstration of exceptional circumstances as required by the NPPF. Policy LG1 Broad Locations requires 22 criteria to be met for their development, but omits the requirement for the definition and creation of a new defensible permanent boundary for the Green Belt.

Similarly, criteria in Policy LG4 fail to require the creation of a permanent defensible Green Belt boundary for sites removed from the Green Belt, and this is ineffective and contrary to national policy. Subsequent Policies LG5 to LG9 fail to provide supporting evidence, implying very special or exceptional circumstances which are unjustified.

**The Draft Local Plan is neither legally compliant nor sound due to the omission of critical national policy guidance on constraints re housing targets.**

The application of policy constraints to the formulation of housing targets, included at para 3.16 in the 2023 Regulation 18 Draft Local Plan, has been removed from the Reg 19 version, specifically the reference to paragraph 11 (which includes footnote 7) of the National Planning Policy Framework (NPPF) which identifies designated land including Green Belt and National Landscapes (formerly Areas of Outstanding Natural Beauty (AONB)) as comprising policy constraints relating to the formulation of housing targets for Local Plans.

This jeopardises the soundness of the Draft Local Plan, together with further inconsistences in the treatment of housing figures and their implications. Notwithstanding the present consideration of amendments to the NPPF and associated proposed planning reforms by the Government, the critical requirements of the NPPF are increasingly over-ridden by Local Planning Authorities, in both local plan-making and decision-making on planning applications, and by Planning Inspectors in planning inquiries and appeals decisions.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Draft Local Plan should be re-structured to consider the role and function of the largest land use designation in the SACD i.e. the London Metropolitan Green Belt in appropriate detail. The lack of adequate consideration of the implications of this designation for physical development in the future renders the Local Plan unsound.

The Local Pan should be re-structured to consider the role and function of the largest land use designation in the SACD i.e. the London Metropolitan Green Belt in appropriate detail. The lack of adequate consideration of the implications of this designation for physical development in the future renders the Local Plan unsound in limiting the opportunities and constraints afforded by the land designation.

The total local housing need figure in policies SP1 and SP3 should be treated as a starting point and then be subject to reduction to reflect the application of Green Belt constraints as required by para 11(b) footnote 7 of the NPPF.

The Plan should include reference to policy constraints relating to the formulation of housing targets as set out in paragraph 11 (which includes footnote 7) of the National Planning Policy Framework (NPPF), as previously referenced in the Reg 18 Draft Local Plan para 3.16.

The total local housing need figure in policies SP1 and SP3 should be treated as a starting point and then be subject to reduction to reflect the application of Green Belt constraints as required by para 11(b) footnote 7 of the NPPF.

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

4.1 Strategic Policy SP3 – Land and the Green Belt seeks to *'protect the Green Belt from inappropriate development, and ensure the most effective use of land in the District up until 2041. This involves select Green Belt boundary adjustments in the right areas to provide wider protection of the rest Green Belt.'* The revised Green Belt boundaries are set out on the Policies Map. The policy also seeks to *'increase overall employment floorspace in the District.'*

4.2 The Council has undertaken a detailed Green Belt Review as part of its new evidence base to understand the impacts of potential development in the Green Belt and to revise the boundaries as necessary. Furthermore, the SRFI impact on the Green Belt has been examined at length through the planning history.

4.3 The Policies Map identifies the main development areas of the SRFI remaining as located within the Green Belt. In addition, the site-specific draft policy EMP2 – Strategic Rail Freight Interchange (SRFI) states that *'there is now a reasonable prospect that the SRFI will be delivered during the Plan period. All of the public benefits including all the country parks and community forest and the Park Street/ Frogmore relief road and other requirements set out in the 2014 Planning permission will be required to be delivered.* ***On review of this Plan and once the SRFI has been completed, Green Belt boundaries in relation to the SRFI facility will be reviewed and revised as appropriate'***.

4.4 This is welcomed, however now that full planning permission has been granted from the SRFI, and development on site has started, it is our view that the Radlett SRFI site should be removed from the Green Belt at the first opportunity to reflect the current situation; and this should not await further review.

4.5 Whilst it is accepted that Green Belt should be protected from inappropriate development and ensure the most effective use of land in line with paragraph 128 of the NPPF, the Policies Map (and Policy EMP2) should be updated to remove the SRFI from the Green Belt as the development will be coming forward during the plan preparation stages, and indicatively completed within the plan-period of 2041. The merits of the SRFI development, balanced against the impact on the Green Belt, has long been established through the planning history with permission ultimately granted in 2014, development commenced in 2019 and the CLEUD approved in 2021.

4.6 With the land acquisition completed last year in June 2023 and the site in single land ownership, SEGRO (Radlett) Limited has a committed implementation programme in place (**Appendix 1**). The retention of the SRFI site in the Green Belt is inconsistent with the aims of the policy and NPPF.

4.7 Whilst Areas 3-8 will continue to perform as Green Belt, remaining largely as open countryside, the retention of the SRFI development site (Areas 1 & 2) within the Green Belt undermines the overall legitimacy of Green Belt policy. Paragraph 148 of the NPPF (2023) states that when determining Green Belt boundaries, local plans should:

*"e) be able to demonstrate that Green Belt boundaries will not need to be altered at the end of the plan period"*

4.8 By continuing to retain the SRFI site in the Green Belt boundaries, this goes against Paragraph 148 of the NPPF. Regardless of how the Green Belt designation affects deliverability of the site, the land will no longer be permanently open, by virtue of its development. Paragraph 143 of the NPPF sets out the five purposes of the Green Belt. The land at the SRFI cannot and does not contribute to the five purposes. It cannot assist in safeguarding the countryside from

encroachment, as the future committed development will already cause encroachment. The boundary should therefore be amended. In doing so, it is relevant to note that Area 2 of the Development Site will be similar in appearance and character to the Country Park with the provision of green space adjacent to the development platform accommodating the rail terminal and associated B8 floorspace. Both Areas should however be removed for the reasons outlined above.

4.9 The progress of the SRFI will be apparent as the Draft Local Plan progresses. **Appendix 1** of this report includes a programme for implementation. Aligned to the current SADC Local Development Scheme, it is clear that should both remain on target, by the time of adoption in 2026, the SRFI will

have made significant progress ahead of the first occupation indicative target of 2026. The SRFI has an indicative target completion of Q4 2030. Whilst completion will be subject to successful delivery and occupation of the site (and wider market conditions), the target dates are comfortably within the plan period of 2041.

4.10 Furthermore, retention of the site in the Green Belt limits the ability to respond to changing needs, as even quite small changes to the scheme may be classified as a departure to the Local Plan, and referable to the Secretary of State under the Green Belt consultation procedure. Whilst SEGRO (Radlett) Limited has the intention to build out the SRFI as consented, as a strategic-scale project, to be built over a number of years, there may be a requirement to review and amend the approved scheme. As the principle of development has long been established and the planning permission approves substantial development within the Green Belt, amending the Green Belt boundary to accord with this will facilitate a more efficient planning process as the site comes forward. Any variation of the planning permission will be subject to appropriate planning procedure and due consideration. However, there is no longer a necessity for the site to remain within designated Green Belt as it fails to meet the purposes of such protective designation.

4.11 The combination of the site-specific policy in the Local Plan with the suggested Green Belt boundary change could be used to ensure that the development of the site is consistent with the principles that underpinned the granting of the SRFI permission. As presently drafted, the policy is not fully effective, justified or consistent with national policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

4.12 Therefore, to ensure the Local Plan is positively prepared, justified, and effective it is recommended that the Green Belt boundary is reconsidered and the Council exclude the SRFI site from the Green Belt.

1. LOCAL PLAN CONSULTATION REG19 SEGRO_[R].pdf

## 304 - EDIT Land Ltd

Submission Number: 304 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 7

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land to the south of Burydell Lane, Park Street” have been discounted incorrectly.

**Representations**

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

The Reg. 18 Draft Local Plan includes planning policies relating to various topics, which would become the principal consideration for the decision maker when determining planning applications.

EDIT Lands has not provided comment on a number of policies and advise which they are commenting on in the list below, but reserves the right to comment on others in the future. However, SADC should consider whether all the policies as drafted are useful and necessary for decision making, and do not just repeat that which is already stated in the National Planning Policy Framework (NPPF), Planning Practice Guidance or legislation. Policies should also be unambiguous, clear and concise, without being overly onerous or stifle innovation or ambition.

EDIT Lands main concern with the Local Plan, as a whole, is the weak approach to the provision of much needed housing. Firstly, the level of housing planned for does not seek to address housing need adequately or provide any contingency, nor does it seek to address unmet need or positively plan for previous years of significant under-delivery.

Furthermore, the level of housing which is proposed as windfall, is unsound. 20% of the total housing supply to come forward on sites which do not have allocations, nor are formally identified is not positively prepared and is a huge outlier compared to neighbouring authorities. We consider the proportion of windfall to be wholly inappropriate given the borough's historic poor delivery and acute housing need.

It is also perverse for SADC to suggest that all brownfield sites have been exhausted to necessitate Green Belt release, whilst anticipating that such a high number will come forward via the windfall process. In addition, the Local Plan is heavily reliant on the delivery of a small number of broad growth areas and strategic extensions, namely the Hemel Garden Community which is allocated for net. 5,500 dwellings and 4,281 across the other strategic development sites which are subject to challenging land assembly and infrastructure delivery requirements which will constrain delivery of housing units within the early periods of the Local Plan. St Albans have acknowledged this situation in the reg.19 draft Local Plan where they are now asserting that only 4,300 dwellings will

be delivered on the HGC sites within the LP period, a reduction of 450 dwellings from the LP trajectory and 1200 from the wider site allocation. Across all allocated sites within the borough, the council has lost net. 971 dwellings between Reg.18 and Reg.19 stage. There is no explanation, or justification on how the shortfall in housing delivery is accounted for within the revised housing trajectory, or local plan housing target.

The housing trajectory places significant reliance on these strategic sites without due consideration to implications of these strategic sites not being delivered or brought online in line with the housing trajectory.

The emerging Local Plan is also not prepared positively as it fails to make any consideration to the need for natural growth (and deliverable) within the 'washed over villages' within the green belt, with no consideration paid in detail to areas for release from the green belt in these locations. As outlined in Section 3 of this document our client challenges the methodology which has been applied in the green belt review in light of a failure to apply a macro level analysis to the green belt parcels.

Furthermore the draft Local Plan fails to make provision for custom build and self-building housing typologies despite a clear need being identified in the National Planning Policy Framework no recognition is made to the contribution this typology makes to meeting established demand. We understand that there is a need locally for such housing and failure to plan for such housing, is not positive.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

SP1: A Spatial Strategy for St Albans District

SP3 — Land and the Green Belt

HOU 1- Housing Mix

HOU 2 — Affordable Housing

SP2 — Responding to the Climate Emergency

NEB 6 - Biodiversity and Biodiversity Net Gain — Comment

LG5 — Green Belt — Object

In summary, EDIT Land has strong concerns with draft Policy SP3. The crux of the objections are as follows:

**Level of housing proposed (Standard Method) does not allow for contingency** and is therefore not robust or positively prepared;

**Lack of recent delivery, 5YHLS,** and lack of contingency warrant a higher housing requirement;

**Level of windfall sites anticipated is unachievable and speculative,** most sites need to be formally allocated to be sure the level of housing proposed is achievable.

**Green Belt Assessment is flawed due to it not being fine-grain,** and no exceptional circumstances report published;

Further sites should therefore be **allocated to account for excessive windfall provision and over reliance on a small number of strategic development sites.**

In summary, EDIT Land considers the plan fails on Paragraph 35 of the NPPF, and is fundamentally unsound. Reasons why the plan is not positively prepared and deliverable is discussed in this representation, yet is summarised as below (yet not limited to):

The baseline housing need figures cited in Table 3.2 and Policy SP1 and SP3 do not appear to be correct and directly contradict the housing need figures published in the AMR 2022, equating to a **shortfall of between 2,271 dwellings.**

**Level of housing proposed (Standard Method) does not allow for contingency** and is therefore not robust or positively prepared;

**Lack of recent delivery, 5YHLS,** and lack of contingency warrant a higher housing requirement;

**Level of windfall sites anticipated is unachievable and speculative,** most sites need to be formally allocated to be sure the level of housing proposed is achievable.

**Green Belt Assessment is flawed due to it not being fine-grain,** with no consideration to the need for natural growth of the washed over settlements within the green belt, which has been deemed to be unsound in the case of the Uttlesford BC Local Plan examination;

Further sites should therefore be **allocated to account for excessive windfall provision and over reliance on a small number of strategic development sites.** Reasonable alternative sites, such as Land at Burydell Lane, Park Street have been **discounted and assessed incorrectly;**

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Greater number of sites allocated, including allocation of a broader range of medium and large size green belt sites within the borough to provide contingency within the early stages of the Local Plan process.

Green Belt Review to review smaller parcels of land such as Land at Burydell Lane, Park Street

Less reliance on speculative windfall sites replaced with a mixture of housing allocations; and

Need for further Green Belt release to accommodate for the objectively assessed need (including Land at Burydell Lane, Park Street ) to ensure the plan is positively prepared and ultimately sound in accordance with NPPF paragraph 35

### 314 - Mrs Susan Taylor

Submission Number: 314 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Mrs Susan Taylor

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I'm deeply concerned about the amount of greenbelt around Park Street going to development. We know the monstrous SRFI will have a significant impact on traffic levels on the A414, A405 and local roads in the area.

I'm staggered that you have allowed the greenbelt opposite the BP garage on Watling Street, adjacent to Park Street roundabout, to go to housing when the queues onto the roundabout from Park Street can stretch beyond Park Street bridge in the rush hours and school run time. Not only is it dangerous as locals will have to contend with thousands of extra HGV's and vehicles from the SRFI descending onto the roundabout on the A414, there'll be more vehicles entering and exiting the site opposite the BP garage that could have terrible consequences for vehicles entering and exiting Park Street.

I also see land is now up for auction alongside the A405 approaching Tippendell Lane roundabout, which is again, dangerous for vehicles entering and exiting the site. The queues on Tippendell Lane can already stretch back to Penn Road.

The whole area is lacking in road infrastructure to support this huge increase in traffic movements.

With possible housing developments in Chiswell Green and London Colney our roads will become gridlocked with all the burden on local roads.

Why is so much greenbelt going to inappropriately located developments?

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 315 - Bloor Homes and Department of Health & Social Care

Submission Number: 315 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Sarah Hamilton-Foyn

On Behalf Of Company/Organisation: Bloor Homes and Department of Health & Social Care Name:

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Strategic Policy SP3 – Land and the Green Belt**

The first paragraph of the policy simply sets out the minimum housing requirement which is already in Policy SP1. It is unnecessary to repeat the housing requirement that has already been stated in SP1, instead reference should be confined to the supporting text. However, if the Council retain the reference to the housing requirement it should be prefaced by the words **"at least"**in order to be consistent with SP1.

The Policy SP3 should set out the Council's approach to the Green Belt, both in terms of maintaining the Green Belt and the proposed changes to the Green Belt. The Policy should state that in order to meet the housing needs in full, it is necessary to amend the boundaries of the Green Belt. Policy SP3 and LG5 should be combined.

It is noted that since the Reg 18 consultation the Council have set out in the supporting documentation (not in the supporting text to the policy) the exceptional circumstances they consider in order to justify proposing amendments to the Green Belt boundaries for the Broad Locations.

Pegasus consider that exceptional circumstances exist and that changes are required to the Green Belt, the significant shortfall in housing supply that would occur if boundaries were not amended, the backlog in the supply of affordable housing and the associated affordability issues in St Albans all contribute to the need to amend the boundaries of the Green Belt.

Whilst the Council's strategy should be, to make as much use as possible (paragraph 123 of the NPPF) of brownfield land, there are other factors to be considered and the NPPF must be read as whole.

In undertaking a review of the Green Belt, this should be done having regards to the longer term. Paragraph 145 of the NPPF (December 2023) states:

**"*Strategic policies should establish the need for any changes to Green Belt boundaries, having regard to their intended permanence in the long term, so they can endure beyond the plan period.*"**

Paragraph 148 states that:

***"When defining Green Belt boundaries, plans should:***

1. ***ensure consistency with the development plan's strategy for meeting identified requirements for sustainable development;***
2. ***not include land which it is unnecessary to keep permanently open;***
3. ***where necessary, identify areas of safeguarded land between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period;***
4. ***make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following an update to a plan which proposes the development;***

- ***) be able to demonstrate that Green Belt boundaries will not need to be altered at the end of the plan period; and***

1. ***define boundaries clearly, using physical features that are readily recognisable and likely to be permanent."***

It is considered that the Green Belt Review only has regard to the needs of this plan rather than looking to the longer term (3 of the Broad Locations state that some dwellings will take place in the next plan period, but this only amounts to approximately 1,200 dwellings.

Given the increase in the Standard Method and given the unmet needs in the area, it is considered that the Green Belt Review should have considered other areas where sustainable development could be accommodated in the long term so that the changes in this plan period can endure beyond 2041 in accordance with the NPPF paragraphs 145 and 148. The Council should not rely on the Joint Strategic Plan as this may not be realised as acknowledged in the SA (Box 5.1 page 19) and addressing unmet housing need as close to source as possible, and in a timely fashion, is a key issue for any local plan.

Paragraph 147 of the NPPF states that:

***"When drawing up or reviewing Green Belt boundaries, the need to promote sustainable patterns of development should be taken into account. Strategic policymaking authorities should consider the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary. Where it has been concluded that it is necessary to release Green Belt land for development, plans should give first consideration to land which has been previously-developed and/or is well-served by public transport. They should also set out ways in which the impact of removing land from the Green Belt can be offset through compensatory improvements to the environmental quality and accessibility of remaining Green Belt land."****(my emphasis)*

It should be noted that paragraph 147 states that plans should give first consideration to land which has been previously developed and/or is well served by public transport.

**Land at Harper Green includes some previously developed land, as it is part of the former Harperbury Hospital which is currently being developed. Land at Harper Green together with the existing facilities and services locally and with additional facilities commensurate with further development, the site can provide the opportunity to further support public transport and the existing community.**

**We do not support the changes to the Green Belt in respect of Broad Location B8,** the proposal for 274 dwellings as part of mixed-use development at Harper Lane, Radlett (see representations to Broad Location B8). The Council have not set out the site-specific circumstances that support the allocation, the site is not justified, as no evidence has been produced to justify why some sites have been taken forward and others have been rejected. As referred to above there is no clear audit trail to justify Broad Location 8 and no assessment of any reasonable alternatives to this location, have been considered. An objection is made to the site selection process.

Given our objections to Policy SP1, it is considered that this necessitates further releases of land from the Green Belt to address some of the unmet needs in neighbouring areas and provide a more significant buffer between the housing needs and housing supply and to seek to address some of highest affordable housing needs in the country

The assessment we have undertaken at Appendix 1: Economic Overview and Housing Need provides a clear rationale for the St Albans Local Plan Review to go beyond the capped housing requirement (885) identified by the standard method for determining local housing need. An increase above the capped method would not only be consistent with national policy and guidance but would also assist in remedying the acute issues of affordability, affordable housing need, ageing population and economic growth with St Albans. It is therefore not unreasonable that the housing target in St Albans should be more in line with the proposed standard method figure of 1,544 dpa.

**Categorisation of Sites**

Table 3.1 sets out the Broad Locations, the minimum capacity and the main land uses. There are no specific policies for the individual broad locations to set out the policy requirements for each location. Instead, the Plan refers to Part B Local Plan Sites which contains the site allocations for the Local Plan –

***"Planning proposals are required to deliver the requirements set out in the schedules below, as well as conforming to the policies in the rest of the document and national policy."***

It is considered that in order for the plan to be found sound then clear policies allocating the sites and setting out the policy requirement should be included in the Plan as set out in the NPPF paragraphs 17- 23.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Changes required to the Policy:

- housing requirement should be prefaced by the words "at least" in order to be consistent with SP1
- The Policy SP3 should set out the Council's approach to the Green Belt, both in terms of maintaining the Green Belt and the proposed changes to the Green Belt policy should be redrafted and combined with LG5
- Supporting text to the policy should explain the exceptional circumstances for removing land from the Green Belt.
- The Green Belt review should have considered the long term needs (in accordance with paragraphs 145 and 148 of the NPPF)
- It is considered that in order for the plan to be found sound then clear policies allocating the sites and setting out the policy requirement should be included in the Plan.
- Further sites should be removed from the Green Belt given our representations to the plan in respect of Policy SP1 and the Duty to Co-operate.
- An objection is made to the site selection process and the proposed Broad Location B8. The Council have not set out the site-specific circumstances that support the allocation, the site is not justified, as no evidence has been produced to justify why some sites have been taken forward and others have been rejected.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 316 - Linden Wates (Bricket Wood) Limited

Submission Number: 316 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Woolf Bond Planning Ltf Name: Thomas Rumble

On Behalf Of Company/Organisation: Linden Wates (Bricket Wood) Limited Name: Linden Wates (Bricket Wood) Limited

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

See enclosed statement for full details, although in summary the approach of the Plan in policy SP3 is not sound for the following reasons:

a) It is not **positively prepared** as it does not seek to address the Plan area's housing needs.

b) It is not **justified** with regard to the timeframe (as evidenced in the HELAA) for the Council to determine planning applications and their subsequent implementation (including build rates). The approach is also **inconsistent with national planning policy** in failing to comply with paragraph 22 of the NPPF.

c) It is not **effective** as the evidence does not demonstrate that the expectations for delivery are realistic.

d) The approach is also **inconsistent with national planning policy** in failing to comply with paragraph 38 of the NPPF as it is not supported by a proportionate up to date evidence base. The conclusions on delivery are not evidence based to comply with the guidance detailed in the NPPF's Glossary together with the PPG.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is**

**incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The necessary changes to Draft Policy SP3 to address the matters of soundness are (additions shown underlined and deletions struck through) (reflecting the changes advocated for policy SP1) *[please see attached document]*.

In the first paragraph, this is amended to read:

The minimum number of homes needed in the District, following a local housing need assessment conducted using the Government's required Standard Methodology – is 885 dwellings per year, or a total need of 16,853 to 2042. This housing need figure is the same as the housing requirement figure of 887 dwellings per year, or a total need of 16,815 in the period 1 April 2023 to 31 March 2042

That "2041" is replaced with "2042" in the third paragraph.

That paragraph 3.27 is omitted.

That the penultimate row in table 3.2 is amended to state that the annual requirement is "887" dwellings.

Further, the inclusion of our client's site as a site allocation for circa 60 dwellings is necessary in order to overcome this soundness concern. This should be reflected on the supporting Policies Map and within Part 2 of the plan accordingly.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**317 - Taylor Wimpey Strategic Land**

Submission Number: 317 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Sam Hollingworth

On Behalf Of Company/Organisation: Taylor Wimpey Strategic Land Name:

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Strategic Policy SP3 sets out the proposed minimum number of new homes needed in the District

over the plan period, addressing a 16.5-year period between 1 October 2024 and 31 March 2041. It also states that the Council will increase overall employment space. It stresses that growth must be supported by suitable infrastructure. Additionally, it also explains the Green Belt will continue to be protected, but that it will be necessary to make alterations to the boundary to accommodate development needs.

3.2 Our representations on this policy focuses on two elements of Policy SP3: housing need and the

principle of alterations to the Green Belt.

**Housing Need / Requirement**

3.3 Policy SP3 refers to a total housing need for the District to 2041 of 14,603 homes, taken from 1

October 2024.

3.4 It explains that this is based on an annual housing need of 885 dwellings, calculated in accordance

with the Standard Method (as per the PPG, and discussed in our response to Policy SP1).

3.5 The NPPF requires use of the Standard Method to determine the minimum number of new homes

to be planned for, and as such is supported. Reference to the number being a minimum also accords with the NPPF and PPG regarding how the Standard Method figure should be considered.

3.6 However, as noted in our response to Policy SP1, to avoid potential problems arising in the event the

timetable for the adoption of the new Local Plan was to slip, we suggest the plan period be extended to at least 2042, increasing the housing need / minimum housing requirement by 885 dwellings.

3.7 As also set out in our response to Policy SP1, it is important that the Council and the new Local Plan

recognise that whilst the Standard Method generates the minimum housing requirement, it does not generate the housing requirement per se.

3.8 The figure generated by the Standard Method and cited in the DLP not only represents the *minimum*

figure, but is also artificially constrained by application of a cap (in accordance with the PPG, and intended to ensure that the minimum housing requirement is deliverable as soon as possible[4]). As the PPG notes, the "*The cap reduces the minimum number generated by the standard method, but does not reduce housing need itself*[5]". The local housing need calculated without the cap would be 1,169 dwellings per annum (dpa).

3.9 The PPG[6] also suggests that:

***"An increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes".***

3.10 This is particularly germane to the establishment of the housing requirement in the new Local Plan, given the acute affordable housing need to which the District is subject, as the Council's evidence base confirms.

3.11 The South West Hertfordshire Local Housing Needs Assessment (September 2020) ('the LHNA) calculated a net affordable housing need for St Albans of 443 dpa – approximately half the total housing requirement. If the new Local Plan delivers the minimum local housing requirement of 885

dpa, it is improbable that affordable housing needs will be met. Particularly as a significant
proportion of the District's housing land supply is made up of windfall sites and allocations proposed to deliver fewer than 10 dwellings, and thus will not be required to make any contribution towards affordable housing.

3.12 An increase to the total number of dwellings to be delivered will result in an increase in the number of affordable homes that will be delivered and, even if needs are not met in full, would result in a smaller shortall at least.

3.13 Representations made on behalf of TWSL on the Regulation 18 iteration of the new Local Plan in 2023 raised additional factors to be accounted for in establishing the housing requirement, including market signals, the scale of housing shortage across the housing market area, and the potential impact of ongoing under delivery of housing in London. However, such matters do not appear to have been given proper consideration in establishing the DLP's housing requirement.

**Green Belt**

3.14 Reference to making alterations to the Green Belt in order to accommodate development needs is supported.

3.15 The NPPF (paragraph 145) makes clear that the preparation of a new Local Plan is an appropriate vehicle through which to amend Green Belt boundaries. It states this should only be done where there are exceptional circumstances which justify such alterations.

3.16 The NPPF (paragraph 145) also stresses that exceptional circumstances should be fully evidenced and justified; and that a Local Planning Authority must demonstrate that it has fully examined all other reasonable options for meeting its identified need for development before concluding exceptional circumstances exist (paragraph 146).

3.17 Whilst the definition of exceptional circumstances is not elaborated on further within the NPPF or PPG, judgments in respect of *Calverton*[7] and *Compton*[8] have provided a basis on which to consider the matter.

3.18 The judgment in *Calverton* preceded that in *Compton* and determined that the following can form the basis of considering exceptional circumstances in the context of development needs:

1. The acuteness of the objectively assessed development need
2. Constraints on the supply or availability of land suitable for sustainable development

- The consequent difficulties in achieving sustainable development without impinging on the Green Belt

1. The nature and extent of harm to the Green Belt that would be caused by a review of Green Belt boundaries
2. The extent to which harm to the Green Belt could be minimised as far as practicable.

3.19 In the case of St Albans City & District the scale of housing need is significant, as already noted and recognised through the DLP.

3.20 In addition to there being significant overall housing need within the District, there is also an acute need for affordable housing specifically.

3.21 The new Local Plan's evidence base includes the South West Hertfordshire Local Housing Needs Assessment (2020) ('the LHNA').

3.22 The LHNA includes an objective assessment of affordable housing needs within the Districts that make up South West Hertfordshire. It concludes St Albans City & District has an affordable housing need which equates to 443 dpa, equivalent to 50% of the Standard Method's calculation of the minimum overall annual housing requirement.

3.23 In terms of opportunities to meet this need sustainably without impinging on the Green Belt, it has been abundantly clear that only a very limited proportion of the District's needs can be met without doing so. The evidence base which supported the previous Local Plan prepared by the Council (ultimately withdrawn in 2020) confirmed the inability to make a meaningful contribution to meeting housing needs without alterations to the Green Belt. Four years on, the position remains and has likely been exacerbated by a lack of delivery – the latest Housing Delivery Test measurements (2022) report that only 55% of the District's housing needs in the preceding three years.

3.24 The lack of opportunity to meet development needs without alterations to the Green Belt boundary has been reaffirmed through the Council's Housing and Economic Land Availability Assessment (2021) ('the HELAA') and its accompanying Appendix B – the draft Urban Capacity Study (2022) ('the UCS').

3.25 The UCS estimated potential to deliver only 2,174 dwellings within the existing limits of the District's settlements, even if one were to apply a 'density uplift' within areas considered appropriate to do so. This leaves a significant housing need that will need to be delivered through new allocations. Given that the existing Green Belt boundary is drawn tightly around the District's settlements, this inevitably means that some alterations to the Green Belt will be required.

3.26 In terms of nature of harm to the Green Belt that would be engendered by amendments to the boundary, this will be dependent on specific sites to be allocated. However, it is relevant to note the findings of the St Albans Stage 2 Green Belt Review (2023) ('the Green Belt Review') or 'GBR 2023').

3.27 The Green Belt Review divided the District's Green Belt into 182 sub-areas, which were then assessed in respect of their contribution to the purposes of the Green Belt. It found that a number of these sub-areas' contributions were 'less important' or 'partly less important'. Of these 182 sub-areas, 54 were recommended for further consideration in isolation as their loss would be unlikely to result in harm to the wider Green Belt; and 29 for further consideration as their development would be unlikely to result in result in harm to the Green Belt, provided they were released in combination with other sub-areas.

3.28 There is evidently scope to make relatively modest alterations to the Green Belt in such a way that its strategic functions remain, and it continues to fulfil the purposes of the Green Belt as per the NPPF.

3.29 Similarly, the extent to which harm to the Green Belt may be mitigated will principally be a matter for consideration on a site-by-site basis. It is noted that the Green Belt Review nevertheless considers the issue of mitigation; and that the DLP itself proposes various forms of mitigation through Policy LG6.

3.30 At the District-level, the acute housing shortage (including significant need for affordable housing), together with lack of options to address this need without impinging on the Green Belt, and the identification of options for amending the Green Belt boundary without undermining its

strategic purposes, evidently constitute exceptional circumstances which justify (or moreover, necessitate) alterations to the District's existing Green Belt when considered in the context of *Calverton*.

3.31 Furthermore, *Compton* confirmed that it is not necessary to 'tick off' all of the matters identified as constituting exceptional circumstances in *Calverton*. Instead, *Compton* establishes that, provided the circumstances relied on, taken together, can rationally be considered to constitute exceptional circumstances justifying release of land from the Green Belt, then this is sufficient.

4.1 Our comments in Section 3 of this representation focus on Strategic Policy SP3 itself but it is noted

that linked to this is Table 3.2, which sets out the housing trajectory associated with the spatial strategy and which the DLP suggests its policies and allocations will deliver.

4.2 We have a number of concerns with the trajectory, and consider there are doubts that the DLP will

deliver as many homes over the plan period as it suggests. These are discussed below.

**The Stepped Trajectory**

4.3 The PPG[9] suggests that stepping the housing requirement *may* be appropriate where there is a

significant change in the level of housing requirement between existing and emerging policies.

4.4 However, the PPG also makes clear that the stepping of a housing requirement needs to be set out

in strategic policy; and that it should be evidenced. It stresses that plans should "*not seek to unnecessarily delay meeting identified development needs"*[10]

4.5 At paragraph 3.27 of the DLP it states that the housing trajectory is proposed to be stepped *"to allow*

*sufficient time for the significant uplift in housing delivery to be realistically delivered".*

4.6 However, not only is the stepping of the requirement not incorporated within a strategic policy, no

evidence appears to have been put forward to demonstrate it is necessary to delay the meeting of housing needs.

4.7 The trajectory should only be stepped if there are insufficient sites that are deliverable within the

early years of the plan period to meet needs; and even then only as far as is necessary once all sustainable, deliverable sites are proposed for allocation and this still does not meet needs in full.

**Reliance on Redevelopment of Existing Car Parks**

4.8 The proposed site allocations in the DLP Part B includes a large number of sites that are currently in

use as public car park or contain private garages.

4.9 Six allocations of sites currently in use as public car parks are proposed in which one of the key

development requirements proposed is:

*"The site will require a survey of car park usage before proceeding with any proposals"*

4.10 This very much suggests that the appropriateness of losing the existing car parking use has yet to be established. Consequently, these cannot be relied upon to deliver housing during the plan period – the survey of car park usage the DLP requires may reveal the sites are well-used public car parks which are important to be retained as such.

4.11 The projected contribution to the housing supply from these sites (based on the site-specific, indicative capacities stated within the DLP) is 219 dwellings.

4.12 Similarly, 30 sites proposed to be allocated are used for car parking / garages where the key development requirements include:

"*Appropriate levels of car parking for existing and new development must be provided*"

4.13 However, it is unclear if the sites can be redeveloped for housing and the above requirement achieved.

4.14 Furthermore, a number of these sites are backland sites where it is unclear if the quantum of development can be achieved whilst meeting appropriate development standards to ensure amenity of existing neighbours / future residents and / or, as the policy text acknowledges itself, accessed via narrow roads, and the suitability of access to proposed residential development appears uncertain.

4.15 Such sites, cumulatively, are anticipated to contribute 251 dwellings over the plan period. Again, however, they cannot be relied upon to do so without further evidence of deliverability.

4.16 Irrespective of the suitability of the sites proposed to be allocated, there is evidently a risk in terms of their deliverability. This demonstrates the importance of instilling the strategy with sufficient flexibility to be able to meet development needs, even if all sources of supply do not come forward as anticipated.

**Overview**

4.42 The stepping of the housing trajectory may be acceptable, but only if the DLP has exhausted all options from sustainable, deliverable sites capable of contributing towards the provision of homes in the early years of the plan period. To do otherwise would be to unnecessarily delay the delivery of much needed homes in the District.

4.43 The Council is urged to look again at sites that have been rejected to see if any could be deliverable in the early years of the plan period.

4.44 Separately, whilst the Council's desire to maximise development within existing urban areas is understandable and consistent with sustainable development principles, there is a concern regarding the deliverability of a number of such sites relied upon to contribute housing. Whilst this does not necessarily mean such sites' proposed residential allocations should be deleted, it does underline the need for the housing delivery strategy to be sufficiently flexible to allow for sites allocated to not come forward as expected.

**SP3 –Land and the Green Belt**

The policy is unsound as it is not justified, effective or consistent with national policy

1. This policy repeats the housing requirement for SADC, and it is not clear why it is then repeated in SP3. HBF agree that there are exceptional circumstances ort amend Green Belt boundaries. However, HBF consider there to be potential for further green belt boundary amendments to be made in order to address the unmet needs arising in neighbouring areas. As we set out in our regulation 18 representations the SA has shown that delivering beyond the 900 home housing requirement is not unsustainable and as such essential that the council revisit sites that have been considered to be unsuitable to be revisited to assess whether these could be made suitable for allocation. It is the HBF view that there are significant benefits arising from the delivery of housing to meet the housing needs of neighbouring areas given the high cost of housing in the South West Hertfordshire areas and the significant need for affordable housing.
2. The latest assessment of affordable housing need for St Albans is set out within the 2024 SW Herts LHNA. This document identifies an annual net need for the delivery of 449 affordable dwellings with St Albans, around 50% of the overall LHN. Analysis of affordable housing delivery in St Albans identifies that this level of delivery has not been achieved since 1994/95. Indeed, the highest recorded level of affordable housing deliver was 243 dwellings in 2004/05

and an average since 1994/95 of just 72 affordable dwellings per annum. Whilst this has increased to an average of 84 affordable dwellings per annum over the last 5 monitoring years, it remains nowhere near f the identified need for affordable dwellings.

3. It is therefore essential that the Council revisits it assessment of sites in both the Green Belt Review and the site selection process to look to identify whether there are sites that could address unmet needs arising in neighbouring areas.

**329 - Mr Russell Crow**

Submission Number: 329 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Mr Peter Atkin

On Behalf Of Company/Organisation: Richborough Estates Name: Mr Russell Crow

Comment Number: 13

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The response to Chapter 1 above should be referred to for comments on the draft Local Plan's housing requirement. It is reiterated here that SADC should ensure it has robustly considered all available opportunities to deliver housing above and beyond this minimum requirement, for the reasons set out at paragraphs 2.6 – 2.13.

SADC is heavily constrained by the Green Belt which extends across the District, and the boundaries of which are drawn tight around existing settlements. There is no other available solution other than to release land from the Green Belt if sufficient growth is to take place to meet even the identified housing requirement, which is the minimum local housing need, as well as economic growth ambitions. Not releasing land from the Green Belt would result in a spatial strategy that fails to address the housing and economic needs of communities across SADC, as well as missing out on associated benefits such as increased access to services and facilities.

The significant housing and economic needs of the District, coupled with the lack of sufficient available and suitable land within the urban area, clearly constitute the 'exceptional circumstances' required under paragraph 145 of the NPPF to justify altering Green Belt boundaries. SADC's Green Belt and Exceptional Circumstances – Evidence Paper sets out the relevant evidence which forms the exceptional circumstances, referring to evidence including the Housing and Economic Land Availability Assessment, the Green Belt Review and the Site Selection Methodology.

One major piece of evidence which SADC's Evidence Paper does not currently refer to is the SA. The SA demonstrates that the proposed revisions to the Green Belt boundary, including that required to deliver West Redbourn, is in accordance with SADC's spatial strategy and allows for the creation of sustainable development. This is in the context of paragraph 147 of the NPPF which states that *'When drawing up or reviewing Green Belt boundaries, the need to promote sustainable patterns of development should be taken into account'.* It is recommended that SADC incorporate the findings of the SA into their Exceptional Circumstances Evidence Paper.

West Redbourn

Richborough is fully supportive of the allocation of West Redbourn by SADC as a 'Broad Location', as confirmed by Table 3.1. As per comments made above, it is recommended that the term 'Broad Location' is replaced with 'Large Urban Extension'. Comment on the specifics of the allocation policy are made in response to Part B of the draft Local Plan (Section 10 of this Statement).

In terms of the release of West Redbourn from the Green Belt. SADC's Stage 2 Green Belt Review (2023) fully assessed the Site, as sub-parcel SA-3a (with Vistry's landownership to the south assessed as SA-1 and SA-2). The assessment confirms that the Site makes a relatively minor contribution towards the purposes of the Green Belt, and that the release of these parcels (either in isolation or as a strategic parcel) would not cause significant harm to the performance of the wider Green Belt.

Richborough agree with these conclusions on the whole, although it is questioned whether the maximum score that is provided in respect of Green Belt Purpose 3 - To Assist the Countryside from encroachment is evidenced. The highest score is provided on the basis of there being only 'some urbanising' effects on these sub-areas. However, this appears to disregard the impacts of the M1 motorway and the electricity pylons along the western boundary of the Site, which have significant urbanising impacts in this area. It is contended that the score should be reduced.

An additional small parcel of land to the north-west (shaded blue on the enclosed Site Location Plan at Appendix 1) forms part of the original promoted site. This was assessed through the Green Belt Review as part of sub-area SA-3b. Richborough disagrees with this approach; when considered 'on the ground' this area of land has a greater relationship with SA-3a, given it forms the landscaping

area for the wider site. Richborough maintains that this small area of land should be included within the allocation, as the existing vegetation could be enhanced as part of the scheme to provide valuable green infrastructure benefits.

The Site represents a logical expansion of the existing settlement. West Redbourn (Site B3) is a sustainable location for growth that is consistent with the spatial strategy set out in the draft Local Plan. This is confirmed through the assessment in the SA which agrees with West Redbourn as being sequentially preferable in both Green Belt terms and provision of appropriate quantum of growth when compared with alternative options in Redbourn. The release of the Site from the Green Belt would create revised boundaries that are defensible and capable of enduring long-term beyond the Plan period. This is in compliance with the NPPF, with the M1 providing a readily recognisable and permanent boundary to the Green Belt at this location.

## 330 - Taylor Wimpey Strategic Land

Submission Number: 330 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Sam Hollingworth

On Behalf Of Company/Organisation: Taylor Wimpey Strategic Land Name:

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

3.1 Strategic Policy SP3 sets out the proposed minimum number of new homes needed in the District

over the plan period, addressing a 16.5-year period between 1 October 2024 and 31 March 2041. It also states that the Council will increase overall employment space. It stresses that growth must be supported by suitable infrastructure. Additionally, it also explains the Green Belt will continue to be protected, but that it will be necessary to make alterations to the boundary to accommodate development needs.

3.2 Our representations on this policy focuses on two elements of Policy SP3: housing need and the

principle of alterations to the Green Belt.

**Housing Need**

3.3 Policy SP3 refers to a total housing need for the District to 2041 of 14,603 homes, taken from 1

October 2024.

3.4 It explains that this is based on an annual housing need of 885 dwellings, calculated in accordance

with the Standard Method (as per the PPG, and discussed in our response to Policy SP1).

3.5 The NPPF requires use of the Standard Method to determine the minimum number of new homes

to be planned for, and as such is supported. Reference to the number being a minimum also accords with the NPPF and PPG regarding how the Standard Method figure should be considered. As set out in our response to Policy SP1, however, it is important that the Council and the new Local Plan recognise that whilst the Standard Method generates the minimum housing requirement, it does not generate the housing requirement per se.

3.6 In addition, and again as referred to in our response to Policy SP1, the Council may wish to extend

the plan period to ensure that the new Local Plan will cover the requisite minimum period of 15 years from adoption. This would mean adding a further 885 dwellings to the housing need calculation.

**Green Belt**

3.7 Reference to making alterations to the Green Belt in order to accommodate development needs is

supported.

3.8 The NPPF (paragraph 145) makes clear that the preparation of a new Local Plan is an appropriate vehicle through which to amend Green Belt boundaries. It states this should only be done where there are exceptional circumstances which justify such alterations.

3.9 The NPPF (paragraph 145) also stresses that exceptional circumstances should be fully evidenced and justified; and that a Local Planning Authority must demonstrate that it has fully examined all other reasonable options for meeting its identified need for development before concluding exceptional circumstances exist (paragraph 146).

3.10 Whilst the definition of exceptional circumstances is not elaborated on further within the NPPF or PPG, judgments in respect of *Calverton* and *Compton*[6] have provided a basis on which to consider the matter.

3.11 The judgment in *Calverton* preceded that in *Compton* and determined that the following could form the basis of considering exceptional circumstances in the context of development needs:

1. The acuteness of the objectively assessed development need
2. Constraints on the supply or availability of land suitable for sustainable development

- The consequent difficulties in achieving sustainable development without impinging on the Green Belt

1. The nature and extent of harm to the Green Belt that would be caused by a review of Green Belt boundaries
2. The extent to which harm to the Green Belt could be minimised as far as practicable.

3.12 In the case of St Albans City & District the scale of housing need is significant, as already noted and recognised through the DLP. Furthermore, it should be noted that the figure generated by the Standard Method and cited in the DLP not only represents the *minimum* figure, but is also artificially constrained by application of a cap (in accordance with the PPG, and intended to ensure that the minimum housing requirement is deliverable as soon as possible). As the PPG notes, the

"*The cap reduces the minimum number generated by the standard method, but does not reduce housing need itself*". The local housing need calculated without the cap would be 1,169 dwellings per annum (dpa).

3.13 In addition to there being significant overall housing need within the District, there is also an acute need for affordable housing specifically.

3.14 The new Local Plan's evidence base includes the South West Hertfordshire Local Housing Needs Assessment (2020) ('the LHNA').

3.15 The LHNA includes an objective assessment of affordable housing needs within the Districts that make up South West Hertfordshire. It concludes St Albans City & District has an affordable housing need which equates to 443 dpa, equivalent to 50% of the Standard Method's calculation of the minimum overall annual housing requirement.

3.16 In terms of opportunities to meet this need sustainably without impinging on the Green Belt, it has been abundantly clear that only a very limited proportion of the District's needs can be met without impinging on the Green Belt for some time now. The evidence base which supported the previous Local Plan prepared by the Council (ultimately withdrawn in 2020) confirmed the inability to make a meaningful contribution to meeting housing needs without alterations to the Green Belt. Four years on, the position remains and has likely been exacerbated by a lack of delivery – the latest Housing Delivery Test measurements (2022) report that only 55% of the District's housing needs in the preceding three years.

3.17 The lack of opportunity to meet development needs without alterations to the Green Belt boundary has been reaffirmed through the Council's Housing and Economic Land Availability Assessment (2021) ('the HELAA') and its accompanying Appendix B – the draft Urban Capacity Study (2022) ('the UCS').

3.18 The UCS estimated potential to deliver only 2,174 dwellings within the existing limits of the District's settlements, even if one were to apply a 'density uplift' within areas considered appropriate to do so. This leaves a significant housing need that will need to be delivered through new allocations. Given that the existing Green Belt boundary is drawn tightly around the District's settlements, this inevitably means that some alterations to the Green Belt will be required.

3.19 In terms of nature of the harm to the Green Belt that would be engendered by amendments to the boundary this will be dependent on specific sites to be allocated. However, it is relevant to note the findings of the St Albans Stage 2 Green Belt Review (2023) ('the Green Belt Review').

3.20 The Green Belt Review divided the District's Green Belt into 182 sub-areas, which were then assessed in respect of their contribution to the purposes of the Green Belt. It found that a number of these sub-areas' contributions were 'less important' or 'partly less important'. Of these 182 sub-areas, 54 were recommended for further consideration in isolation as their loss would be unlikely to result in harm to the wider Green Belt; and 29 for further consideration as their development would be unlikely to result in result in harm to the Green Belt provided they were released in combination with other sub-areas.

3.21 There is evidently scope to make relatively modest alterations to the Green Belt in such a way that its strategic functions remain, and it continues to fulfil the purposes of the Green Belt as per the NPPF.

3.22 Similarly, the extent to which harm to the Green Belt may be mitigated will principally be a matter for consideration on a site-by-site basis. It is noted that the Green Belt Review nevertheless considers the issue of mitigation; and that the DLP itself proposes various forms of mitigation through Policy LG6.

3.23 At the District-level, the acute housing shortage (including significant need for affordable housing), together with lack of options to address this need without impinging on the Green Belt, and the identification of options for amending the Green Belt boundary without undermining its

strategic purposes, evidently constitute exceptional circumstances which justify (or moreover, necessitate) alterations to the District's existing Green Belt when considered in the context of *Calverton*.

3.24 In terms of the need for, and ability of, development of the Site to incorporate measures to mitigate harm to the Green Belt, this is addressed in Section 7 of this statement.

3.25 Furthermore, *Compton* confirmed that it is not necessary to 'tick off' all of the matters identified as constituting exceptional circumstances in *Calverton*. Instead, *Compton* established that provided the circumstances relied on, taken together, can rationally be considered to constitute exceptional circumstances justifying release of land from the Green Belt, then this is sufficient.

3.26 In the case of St Albans, and mindful of the factors identified above, even if one were to disregard the similarities between the circumstances in *Calverton* and those faced by St Albans, it is clearly not irrational to conclude alterations should be made to the Green Belt.

3.27 A further relevant factor in the consideration of whether exceptional circumstances apply is that the existing Development Plan is uncommonly old. The NPPF states Green Belt boundaries should be capable of enduring beyond the plan period, but they are not intended to remain unaltered in perpetuity. The existing Green Belt boundaries will, by the time a new Local Plan is adopted, have persisted for over 30 years. The existing Green Belt has fulfilled its purpose of keeping land open beyond the plan period – whilst most of the policies in the Local Plan 1994 do not have timescales, it addresses the period to 1996 in respect of development needs (as per the 1986 Hertfordshire County Structure Plan in place at the time it was adopted). Even if one were to take the current minimum plan period for new Local Plan (15 years from adoption), the Green Belt as per the Local Plan 1994 has endured well beyond that period also.

3.28 The fact that recent appeal decisions have concluded very special circumstances apply that justified grant of planning permission for residential development in the Green Belt is also germane. The District's acute housing needs, a lack of a plan in place to address these, and the inability to address needs without impinging on the Green Belt have been relevant factors in appeals for residential development in the District's being allowed.

3.29 Not only is this relevant given the test for exceptional circumstances test is less demanding than for very special circumstances (as confirmed in *Calverton*) but it also confirms that it is not a case of whether or not there will be loss of openness to the existing Green Belt – rather it will be a case of whether it is planned alterations to the Green Belt through a new Local Plan, providing certainty for local communities and ensuring the remaining (vast majority) of the Green Belt; or ad hoc development within the Green Belt, subject to very special circumstances being demonstrated on a case-by-case basis.

### 332 - Beechwood Homes Contracting and Verulam Golf Club

Submission Number: 332 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Ceres Property Name: James Firth

On Behalf Of Company/Organisation: C/O Ceres Property Name: Beechwood Homes Contracting and Verulam Golf Club

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Strategic Policy SP3 establishes a framework to meet St Albans District's critical housing and employment needs over a 16.5-year period, from October 2024 to March 2041. The policy emphasizes aligning this growth with essential infrastructure while safeguarding the Green Belt. However, SP3 recognizes that limited Green Belt adjustments may be necessary to meet this housing need. The need for amendments to the Green Belt to meet housing needs in such locations is strongly supported and it is considered that exceptional circumstances will exist in such circumstances.

**Housing Need**

To align fully with national planning policy, the Local Plan should extend the plan period to ensure it covers the 15-year minimum requirement from adoption. Extending this timeline would necessitate an additional 885 homes, further strengthening the Local Plan's commitment to fulfilling housing demands.

**Green Belt**

The acknowledgment of necessary Green Belt adjustments, particularly in and around St Albans, is essential. The approach to assessing potential Green Belt releases has relied upon the Arup Green Belt Review, with specific insights provided in the Stage 2 Final Report (June 2023).

According to paragraph 145 of the NPPF, revising Green Belt boundaries through a Local Plan can be justified if exceptional circumstances exist. This includes establishing that all other potential means of meeting development needs have been exhausted prior to considering Green Belt land (per NPPF paragraphs 145 and 146).

While "exceptional circumstances" are not explicitly defined in the NPPF, case law, including Calverton and Compton, clarifies factors that may constitute exceptional circumstances, such as:

- The scale of identified development needs,
- Constraints on sustainable land supply,
- Limitations on achieving sustainable development without Green Belt adjustments,

- The scale of potential Green Belt harm, and
- Opportunities to mitigate this harm.

In St Albans City & District, the demand for housing is acute. This is evidenced by high Standard Method-derived needs, even with a cap in place to support early deliverability. If this cap were removed, the annual requirement would rise to 1,169 dwellings, underscoring the true level of demand within the District.

Beyond overall housing need, there is a pronounced shortfall in affordable housing.

The Local Plan's evidence base includes the South West Hertfordshire Local Housing Needs Assessment (2020), which highlights the need for 443 affordable dwellings annually in St Albans. This represents 50% of the Standard Method's minimum annual figure, underscoring the importance of enabling housing growth near St Albans to meet these pressing demands.

The exact impact on the Green Belt varies by site. The Stage 2 Green Belt Review assessed 182 subareas, rating each based on its role within the broader Green Belt framework. The review found 54 areas that contribute less significantly to the purposes of the Green Belt, recommending them for further review. This suggests that limited, carefully planned adjustments could accommodate growth without compromising the essential functions of the Green Belt.

The site at M8 Verulam Golf Club represents a highly sustainably located site for appropriate scale of Green Belt release, on a site that is well enclosed and does not make a significant contribution to green belt purposes.

**Housing Distribution and Supply**

The spatial strategy effectively aligns housing allocations with the District's Settlement Hierarchy, focusing growth in highly sustainable areas. St Albans and Hemel Hempstead, as primary Tier 1 settlements, are prioritized, with significant allocations supporting their role as key urban centres. This approach is strongly supported and the allocation of suitable sustainable sites such as M8 at Verulam Golf Club is fully in line with this.

The NPPF further requires housing need to be treated as a minimum and encourages Plans to include flexibility in anticipation of changing demand. With the housing target set at 14,603 homes, the Draft Plan could offer further flexibility by considering an additional buffer, particularly in St Albans where the infrastructure can support additional growth. This would provide greater resilience to meet future demands, in line with the NPPF's goals for sustainable, adaptable planning.

**Housing Trajectory**

The NPPF promotes flexibility and resilience in housing delivery. This necessitates the allocation of a range of sites that can be delivered throughout the plan period. The allocation at M8 Verulam Golf Club, would align with these principles, by providing a site that is deliverable in the short term, allowing the plan to respond effectively to early demand fluctuations and maintaining progress toward meeting housing targets.

...

## 2 BACKGROUND & CONTEXT

### Planning Policy Context

**2.1** In preparing this representation, consideration has been had for Chapter 3 of the National Planning Policy Framework (NPPF) (2021) which relates to 'plan-making'.

**2.2** Paragraph 15 of the NPPF promotes a plan-led system, and that succinct and up-to-date plans should provide a positive vision for the future of each area; a framework for addressing housing needs and other economic, social and environmental policies; and a platform for local people to shape their surroundings.

**2.3** Paragraph 16 states that plans should:

1. be prepared with the objective of contributing to the achievement of sustainable development;
2. be prepared positively, in a way that is aspirational but deliverable;
3. be shaped by early, proportionate and effective engagement between plan makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;
4. contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;
5. be accessible through the use of digital tools to assist public involvement and policy presentation; and
6. serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).

**2.4** As identified at paragraph 35, local plans are examined to assess whether they have been prepared in accordance with legal and procedural requirements, and whether they are 'sound'. The test for soundness as set out within the NPPF is as follows:

**2.5** Plans must be:

- Positively prepared
- Justified
- Effective
- Consistent with national policy

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Strategic Policy SP3 establishes a framework to meet St Albans District's critical housing and employment needs over a 16.5-year period, from October 2024 to March 2041. The policy emphasizes aligning this growth with essential infrastructure while safeguarding the Green Belt. However, SP3 recognizes that limited Green Belt adjustments may be necessary to meet this housing need. The need for amendments to the Green Belt to meet housing needs in such locations is strongly supported and it is considered that exceptional circumstances will exist in such circumstances.

**Housing Need**

To align fully with national planning policy, the Local Plan should extend the plan period to ensure it covers the 15-year minimum requirement from adoption. Extending this timeline would necessitate an additional 885 homes, further strengthening the Local Plan's commitment to fulfilling housing demands.

**Green Belt**

The acknowledgment of necessary Green Belt adjustments, particularly in and around St Albans, is essential. The approach to assessing potential Green Belt releases has relied upon the Arup Green Belt Review, with specific insights provided in the Stage 2 Final Report (June 2023).

According to paragraph 145 of the NPPF, revising Green Belt boundaries through a Local Plan can be justified if exceptional circumstances exist. This includes establishing that all other potential means of meeting development needs have been exhausted prior to considering Green Belt land (per NPPF paragraphs 145 and 146).

While “exceptional circumstances” are not explicitly defined in the NPPF, case law, including Calverton and Compton, clarifies factors that may constitute exceptional circumstances, such as:

- The scale of identified development needs,
- Constraints on sustainable land supply,
- Limitations on achieving sustainable development without Green Belt adjustments,
- The scale of potential Green Belt harm, and
- Opportunities to mitigate this harm.

In St Albans City & District, the demand for housing is acute. This is evidenced by high Standard Method-derived needs, even with a cap in place to support early deliverability. If this cap were removed, the annual requirement would rise to 1,169 dwellings, underscoring the true level of demand within the District.

Beyond overall housing need, there is a pronounced shortfall in affordable housing.

The Local Plan’s evidence base includes the South West Hertfordshire Local Housing Needs Assessment (2020), which highlights the need for 443 affordable dwellings annually in St Albans. This represents 50% of the Standard Method’s minimum annual figure, underscoring the importance of enabling housing growth near St Albans to meet these pressing demands.

The exact impact on the Green Belt varies by site. The Stage 2 Green Belt Review assessed 182 subareas, rating each based on its role within the broader Green Belt framework. The review found 54 areas that contribute less significantly to the purposes of the Green Belt, recommending them for further review. This suggests that limited, carefully planned adjustments could accommodate growth without compromising the essential functions of the Green Belt.

The site at M8 Verulam Golf Club represents a highly sustainably located site for appropriate scale of Green Belt release, on a site that is well enclosed and does not make a significant contribution to green belt purposes.

**Housing Distribution and Supply**

The spatial strategy effectively aligns housing allocations with the District’s Settlement Hierarchy, focusing growth in highly sustainable areas. St Albans and Hemel Hempstead, as primary Tier 1 settlements, are prioritized, with significant allocations supporting their role as key urban centres. This approach is strongly supported and the allocation of suitable sustainable sites such as M8 at Verulam Golf Club is fully in line with this.

The NPPF further requires housing need to be treated as a minimum and encourages Plans to include flexibility in anticipation of changing demand. With the housing target set at 14,603 homes, the Draft Plan could offer further flexibility by considering an additional buffer, particularly in St Albans where the infrastructure can support additional growth. This would provide greater resilience to meet future demands, in line with the NPPF’s goals for sustainable, adaptable planning.

**Housing Trajectory**

The NPPF promotes flexibility and resilience in housing delivery. This necessitates the allocation of a range of sites that can be delivered throughout the plan period. The allocation at M8 Verulam Golf Club, would align with these principles, by providing a site that is deliverable in the short term, allowing the plan to respond effectively to early demand fluctuations and maintaining progress toward meeting housing targets.

### 333 - Samatha Powell

Submission Number: 333 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Department for Education Name: Samatha Powell

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Department for Education (DfE) welcomes the opportunity to contribute to the development of planning policy at the local level.

Local authorities have a statutory responsibility to ensure sufficient education provision, and have a key role in securing contributions from development to new education infrastructure. In this context, we aim to work closely with local authority education departments and planning authorities to meet the demand for new, expanding and redeveloped education facilities.

In line with the LPA's previous Green Belt review, the draft local plan proposes to remove Beaumont School site from the Green Belt designation. **DfE would like to confirm support for this proposed change.**

A number of existing buildings on Beaumont School site are in poor condition and have been identified as having high need for redevelopment. The removal of the site from the Green Belt would remove the significant policy constraint and help facilitate the proposed partial rebuilding and refurbishment of Beaumont School as part of DfE's School Rebuilding Programme (the details of which are subject to a separate pre-application submission to the LPA by DfE).

The amendments to the Green Belt boundary would help demonstrate the local plan is 'effective' and has been 'positively prepared' to meet current and future education infrastructure requirements. As such, DfE looks forward to continuing to work with St Albans to develop a sound Local Plan which will aid in the delivery of education infrastructure.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. St Albans Reg 19_ Nov24_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Please notify the department when the Local Plan is submitted for examination, the Inspector's report is published and the Local Plan is adopted. The DfE would like to reserve the option to attend the EiP.

Please do not hesitate to contact me if you have any queries regarding this response

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**341 - Higgins Group**

Submission Number: 341 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Name: Alexandra Milne

On Behalf Of Company/Organisation: Higgins Group Name:

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Green Belt Review and Site Selection Methodology (Policies SP3 and LG4)
Informed by the conclusions of the Green Belt Reviews(2014 and 2023) the Draft Local Plan has revised the Green Belt boundaries (as shown on the proposed Policies Map). HG supports the conclusion to review and revise the Green Belt boundaries in order to address housing need but considers that the proposed revisions do not go far enough in order to address the plan-period housing need.
As set out elsewhere in these representations, there are significant concerns surrounding the housing trajectory and its ability to be fully delivered to meet the housing requirements within SACDC over the plan period and additional land will be required in order to meet the authority's housing need. This is contrary to paragraph 148 of the NPPF which states that plans should "be able to demonstrate that Green Belt boundaries will not need to be altered at the end of the plan

period". SACDC should take this opportunity to identify further sites suitable for housing delivery within the Green Belt in order to avoid having to make further alterations in the short and medium term following the Draft Local Plan's adoption.
The Local Plan Site Selection Methodology Outcomes and Site Allocations document (dated September 2024) states that "Green Belt Sites identified in the HELAA but outside of the GBR buffers were not considered to be suitable due to their less sustainable location and because development on such sites would create holes in the Green Belt, leading to its fragmentation." This approach has discounted all potential development sites that are not within the defined settlement boundary buffer areas, notwithstanding their suitability for development or contribution to the Green Belt. HG considers that this approach is flawed and results in suitable sites, specifically those appropriate for housing, being overlooked.
The Redbourn Farm site owned by HG is one such site that would be suitable for allocation and should be reconsidered in order to assist SACDC in identifying appropriate sites to meet their housing need.
Further information about the Site is set out in Appendix 1 of these representations.

### 342 - Campaign Team

Submission Number: 342 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Keep Chiswell Green Name: Campaign Team

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Introduction**

Keep Chiswell Green (KCG) is a local volunteer-led campaign group, formed in March 2022 in response to the planning applications submitted for large-scale development of the Metropolitan Green Belt to the west of Chiswell Green. Chiswell Green is a medium-sized village of approximately 1,250 households, located to the south of St Albans and just north of the M25 at junction 21a, close to the southern boundary of the District.

The group's objectives include informing local residents about applications and appeals, and representing their views to St Albans City and District Council (SADC) and to the Planning Inspectorate. This is achieved through extensive two-way communication.

KCG has been an active advocate for the residents of Chiswell Green and St Stephen Parish, including acting as a Rule 6 Party in the Chiswell Green Inquiry, participating in the Hearing for the Ragged Hall Lane appeal, and speaking as an interested party at the Lye Lane (Bricket Wood) Inquiry.

In this capacity, KCG has attended all Planning Policy and Climate Change committee meetings since July 2023 as a public spectator, usually in person, occasionally via the webcast of the meetings.

Chiswell Green is the target of intense speculative development; in the 2021 “call for sites” as part of the local plan preparation, land was put forward by local landowners for 2,057 new houses in Chiswell Green’s Green Belt immediately around the village. Since then, speculative applications have been submitted for a total of 1,266 new houses across these sites, of which 1,259 have been granted permission, with an appeal decision still outstanding on the final 7 units. This already represents a doubling of the number of households in the village, but without the co-ordinated improvements in our existing, critically-deficient, infrastructure that could come from development through a Local Plan.

A further 98 new houses are proposed for Chiswell Green under the draft Local Plan.

Once the site for these 98 is allocated under the local plan or approved via a speculative application, two more applications will be submitted for yet another 503 new houses, concreting over what little will remain by then of Chiswell Green’s Green Belt.

Residents of Chiswell Green are desperate for a new local plan – one that will protect us from further years of speculative development. However, with a very heavy heart, KCG must object to this draft local plan. The St Albans District needs a local plan, but not *any* local plan, not the *wrong* local plan, and not at the expense of sacrificing the ability of future generations to meet their own needs.

As a result of door-to-door canvassing of in excess of 1,000 properties in the village, KCG can confidently say it speaks for approximately 98% of local residents. KCG therefore submits this response with the weight of the support of over 2,000 local residents.

**Legally compliant, positively prepared, justified, effective, consistent with national policy**

In our opinion, the draft Local Plan has **not** been prepared to be *legally compliant, positively prepared, justified, effective or consistent with national policy* :

**Lack of consideration for the Regulation 18 Public Consultation**

The Regulation 18 public consultation was scheduled to run largely during the schools’ summer holidays and was poorly publicised, resulting in a very low response rate; there were fewer than 2,000 responses to the consultation from across the whole District, when a number of single planning applications have each individually generated in the region of 1, 500 objections.

Appeals in June 2023 to the then Leader of the Council, Cllr Chris White, for the dates of the consultation to be changed so as to avoid the summer holidays, when the majority of residents are most distracted and busy, were rejected.

Feedback from local residents has highlighted the inaccessibility of the Draft Local Plan documents to those with no previous experience of the Planning process. The documents were extremely long and verbose, and, for those who attempted to read the documentation, it was difficult for residents to understand the implications of the document content.

The requirement to register on the SADC portal in order to submit any comments was found to be onerous and off-putting, especially as some residents already had accounts for Council services such as council tax or refuse collection, but found that they were unable to use these to comment as part of the Regulation 18 consultation.

Residents have reported to us that the SADC questionnaire was too narrow and the prescribed choice of answers resulted in a poor reflection of the respondents' views, forcing them to select responses that did not accurately represent their views.

The "response to each chapter" format was also off-putting as most residents did not want to comment on each individual chapter, but to comment overall. Whilst this was an option for respondents, coming at the end of the response template meant that some respondents did not reach that point in the template.

We believe that it is the lack of publicity, the poor timing of the Consultation and the difficulty in registering comments that have led to a poor response from local residents – not a lack of interest. This consultation has been poorly conducted and we submit that it would be wrong to assume that a low number of responses means that there is a high level of approval of the Draft Local Plan.

Residents would be justified, however, in thinking that their participation in the Regulation 18 Consultation was of little worth as there has been little more than acknowledgement that comments were made from SADC. The majority of responses received a comment saying "noted".

To reinforce the lack of regard that has been had for the responses to the Regulation 18 Consultation, there has been little change in the Plan between the Regulation 18 Draft and the Regulation 19 Draft, and certainly no evidence that feedback through the Regulation 18 process has been incorporated.

**Site selection based just on the Arup Green Belt Review**

It is clear from plan-making guidance that the selection of sites for development under the plan should be based on the full range of relevant evidence of site suitability. The sites that have been selected for this Plan have been based solely on the Arup Green Belt Review. This comment is not to criticise the Arup Review, but the Arup Review has its purpose – to assess the performance of sites in the District's Green Belt against the 5 Green Belt Purposes, to consider their role in the performance of the wider Green Belt, and to suggest whether each site assessed could, should or should not be considered for release. The Arup Review does not, and does not purport to, consider important aspects of site suitability such as flooding, highways, education provision, biodiversity etc. Furthermore, the Arup Review cannot be expected to consider the economic or socio-political implications of site selections.

The selection of sites for the Regulation 18 draft was based solely on the recommendations of the Arup Green Belt Review. When challenged as to why the selection process had not included other relevant evidence, the response given by the Spatial Planning team to councillors was that the statutory consultees did not have time to comment on all sites that might be considered in order to refine the selection, but that the consultees would be asked to comment on the sites selected prior to the Regulation 19 Consultation. This, of course, makes a mockery of the site selection process.

**Councillors were not given time to consider documents or debate the sites selected**

Councillors were given very little time in the schedule of meetings leading up to, first, the Regulation 18 and, then, the Regulation 19 consultations. Those who raised concerns were told that their concerns would be noted and considered, but there was no opportunity for debate. In reality, there was only one major change made to the site selection between the Regulation 18 and 19 drafts - a site that did not have good access was deselected due to limitations on putting a road across common land which was a point that had been raised by the ward councillor for that ward.

Whilst there was little time during the PP&CC meetings for consideration of the various sites, there was also very little time given to the councillors to consider the thousands of pages of appendices they were expected to read and digest in the 10 days between the issue of the agenda pack for the meeting and the meeting itself. As a result, the councillors were highly dependent on the 5-10 minute briefings given by the Spatial Planning team during every meeting for their understanding

of the subjects on which they were being asked to vote at each meeting. Inevitably, a 5-10 minute briefing cannot compensate for sometimes over 2,000 pages of background material, so councillors were frequently making decisions from a position of relative ignorance.

This situation was particularly pertinent in the meeting at which it was requested that councillors give their authorisation to progress the Regulation 19 Draft Plan to consultation. The agenda pack consisted of in excess of 2,000 pages and included an important report commissioned by SADC from respected consultants AECOM. This report detailed and evaluated 8 different scenarios for Green Belt release, each of which could provide the basis for a local plan in the District. The various scenarios differed in the quantum of housing development that could be accommodated – some scenarios of smaller magnitude than the level selected by SADC, some of greater magnitude. This report was not highlighted to councillors and there was no discussion as to which scenario was the better scenario for the District. For example, under 4 of the scenarios, there would be no Green Belt release in the south of the District. This is a critically important discussion and one which was not offered to the councillors.

In addition, there has been no justification for the level of development proposed, and more particularly, the level of Green Belt release proposed, when considered against the District's Green Belt and Heritage constraints. The only justification for Green Belt release is to meet housing targets. Whilst this may become the only consideration under any future NPPF, the December 2023 NPPF still expects planning authorities to justify changing their Green Belt boundaries in consideration of a wider range of priorities – not just meeting housing targets.

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Policy SP3 – Land and the Green Belt**

*The policy is unsound as it is not justified, effective or consistent with national policy.*

To support the DLP, the Council instructed a *Green Belt Assessment* prepared by Arup. We are pleased to see the Council's decision to amend its Green Belt boundaries and agree that exceptional circumstances exist to do so.

However, given the significant housing shortfall within the HMA and the proposed significant increase in the Council's minimum housing targets, we consider the Council should be looking to make further amendments and allocate more sites now in the DLP in those areas of the Green Belt which score poorly against the five purposes, set out in the NPPF at paragraph 143.

It is therefore essential that the Council revisits it assessment of sites in both the Green Belt Review and the site selection process to look to identify whether there are sites that could address unmet needs arising in neighbouring areas at the very minimum.

**Green Belt Assessment**

In relation to the Site, this was assessed as part of a slightly larger sub-area of land given reference SA-132 (South of Chiswell Green, south-west of How Wood, north of Brickett Wood) – see Figure 2 below.

*Figure 2 – Council Green Belt Assessment (SA-132)*

[see Attached PDF]

The Council choose not to release the Site from the Green Belt, concluding "...*the sub-area plays an important role with respect to the strategic land parcel, and its release in isolation would harm the performance of the wider Green Belt ... the sub-area performs moderately against NPPF purposes and makes an important contribution to the wider Green Belt. Not recommended for further consideration."* However, we do not agree with the outcome of the assessment.

We have undertaken our own desk-based assessment and conclude that development of the sub-area parcel would likely result in 'low-moderate' (limited) impacts, far from any significant impact(s):

- *(a) to check the unrestricted sprawl of large built-up areas*

The Site does not lie adjacent to a large built up are and therefore makes **no** contribution to this purpose.

- *b) to prevent neighbouring towns merging into one another*

The Site is within a larger area which separates Chiswell Green (to the north) and Brickett Wood (to the south). However, due to the presence of the M25 to the south, this acts as a notable and permanent physical and visual barrier to separate the two areas. We therefore consider the parcel/Site makes a limited contribution to this purpose at best.

The Council's own published assessment states *"..the sub-area forms a wider part of the gap between Chiswell Green and Bricket Wood; and Chiswell Green and How Wood. Due to the presence of the M25, perceptual merging of the neighbouring built-up areas of Chiswell Green and Bricket Wood would be limited. It is judged that there may be some scope for development without significant physical or perceptual erosion of the gap between neighbouring built-up areas."*

The Council gives a score of '3' (out of 5) and considers the Site performs moderately against this purpose. In our opinion the Parcel should score no more than 2 out of five, at worst.

- *(c) to assist in safeguarding the countryside from encroachment*

There are existing care home developments situated centrally within the sub-area. Historically, the Site has been subject of gravel extraction as well as the depositing of contaminated construction waste, dating back to the 1990s. As such, the majority of the sub-area and the Site comprises earthworks and informal tracks, rather than natural open and rural countryside. We acknowledge the Site does not comprise 'brownfield' land, nonetheless, it offers very little to the visual appearance and character of the countryside. Its appearance is degraded and is not typical of the wider countryside. The sub-area is also understood to be quite well visually contained. We therefore consider the sub-area makes a low-moderate contribution to this purpose at best.

The Council's assessment states *"...approximately 2% of the sub-area is covered by built form. Built form is concentrated in the centre of the site, including two residential care homes with associated car parks and gardens. The rest of the sub-area comprises woodland and meadow, which is dominated by informal tracks and earthworks..."*

The Council gives a score of '3' and considers the sub-area performs moderately against this purpose. In our opinion the sub-area should score no more than 2 out of 5.

- *(d) to preserve the setting & special character of historic towns*

The Parcel and Site are not within or adjacent to a conservation area or located near any statutory listed buildings.

The Council's assessment states *"...the sub-area does not abut an identified historic place or provide views to a historic place and does not meet this purpose".* The Council gives a score of '0' and considers the sub-area makes no contribution to this purpose.

- *(e) to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.*

As all Green Belt land contributes to this purpose equally, the requirement to develop on Green Belt land needs to be set against the housing needs of St Albans and any unmet needs of its neighbouring and HMA authorities. As already acknowledged through the DLP, it is clear there is a pressing need and requirement to release current Green Belt land to meet the current identified minimum housing needs. Needs which cannot be met solely within existing defined urban areas and or by redevelopment of previously developed land. Release of Green Belt land will therefore not undermine or discourage the recycling of derelict and other urban land where this comes forward ordinarily.

We consider the Council should seek to direct new housing towards locations which contribute the least to the Green Belt purposes. We consider this sub-area provides the Council with an opportunity to release further land from the Green Belt that does not make a strong contribution to the purposes of including land within the Green Belt. Furthermore, the Site offers an opportunity to deliver much needed new homes within the immediate coming years given its ability and alignment to the Government's proposed introduction of the Grey Belt.

Given the significant housing shortfall within the HMA and the pending significant increase in the Council's housing targets, we consider the Council need release additional land from the Green Belt and allocate this for housing though this plan review. We therefore do not consider the Council's policy on Green Belt is 'sound' as it is not justified, effective or consistent with national policy.

**Draft NPPF 2024: Grey Belt Assessment**

Chapter 5 of the draft NPPF defines Grey Belt "..*as covering areas of Previously Developed Land (PDL) and/or land that make a "limited contribution" to the Green Belt purposes*". Further definition is presented in Annex 2 of the draft NPPF.

As the Site does not constitute Previously Developed Land (PDL) it would need to be demonstrated the land does not strongly perform against any Green Belt purpose in order for the Site to accord with the proposed Grey Belt definition. Nor that its development would fundamentally undermine the function of the Green Belt across the area of the plan as a whole.

As set out in the above Green Belt section, our view is that the Site does not perform strongly against any of the Green Belt purposes. We therefore consider the Site accords with the proposed definition as set out in the draft NPPF and the accompanying consultation document.

This further demonstrates the Site provides the Council with a clear opportunity to allocate additional housing on a Site which does not make a strong contribution to any of the Green Belt purposes, and under the forthcoming NPPF, should be considered as a Site within the Green Belt that can be brought forward for development via the new Grey Belt policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**CONCLUSION**

These representations have been prepared on behalf of Moralis Group in response to the Council's draft Local Plan (Regulation 19), specifically in respect of Land to the South of Lye Lane (the "Site").

In the first instance, we are significantly concerned that the Council is deliberately speeding up its local plan process to benefit from the transitional arrangements set out in the proposed updated NPPF. By rushing to make this deadline, we are concerned there is insufficient time to properly review & submit a 'sound' local plan.

The Council's current standard methodology figure is 885dpa. This will be increasing to 1,544dpa - an uplift of +659dpa under the revised standard method. We therefore consider the Council is only delaying the inevitable by moving forward at pace with the DLP now. We consider it would be much more prudent for the Council to delay submission of this DLP and seek to proceed here on with an updated DLP which will be in line with the requirements of the new NPPF.

Regarding the Duty to Cooperate, no detail has been provided to whether St Albans has engaged with any of its neighbouring Council's or other parties to discuss these issues. We are therefore concerned that the Council has not worked proactively with its neighbours to address any cross-border issues such as honey needs across the sub region. Furthermore, it is clear that there is a significant shortfall of housing within the SWH HMA, and it is unclear if the Council has taken this into account and whether it could assist in delivering unmet need from elsewhere.

We are also concerned the Council is seeking to deliver a large majority of its housing through large scale strategic sites, which usually have long lead in times so do not contribute to the housing supply in the early years of the plan.

Considering the above, we consider the Council should leave no stone unturned through this current plan review and the DLP to identify and allocate appropriate additional sites that could contribute to delivering and meeting more of the areas housing requirement/needs.

We consider our client's site can make a meaningful contribution towards housing land supply such that it can form part of a *sound* spatial strategy. Whilst it currently lies within the Green Belt, it does not make a strong contribution to the purposes of including land within the Green Belt.

Given the significant housing shortfall within the HMA, significant affordable housing shortfall within St Albans, and the significant increase in the Council's housing targets within the proposed NPPF, we consider the Council should seek to release additional land from the Green Belt and allocate this for housing.

We therefore do not consider that the Council's currently local plan is 'sound' as it is not positive prepared, justified, effective or consistent with national policy.

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Strategic Policy SP3: Land and the Green Belt**

Similar to Strategic Policy SP1, Policy SP3 sets out the minimum number of homes that the council is required to deliver over the plan period. It also states that whilst the Council seeks overall to protect the Green Belt, select green boundary adjustments will be needed to provide wider protection for the rest of the Green Belt. The supporting text and Table 3.2 contains the housing trajectory for the DLP which includes a stepped requirement.

Hill still consider that this supporting text and Table 3.2 are an unnecessary duplication to repeat the housing requirement that has already been stated in SP1. Paragraph 16f of the NPPF sets out that this should be avoided. Hill would suggest that SP3 simply states that the Council intends to meet the current standard method housing need in full as set out in SP1 (notwithstanding the comments and issues raised on the total housing need figure across the plan period as set out in response to SP1) and that in order to achieve this objective it will need to amend Green Belt boundaries. This will give it a clear purpose in accordance with the NPPF.

With regard to the stepped requirement, Table 3.2 sets out the Council's updated housing trajectory. The Council are still proposing to adopt a stepped trajectory that would see a revised housing requirement of 389 homes in the first two years of the plan period, stepping up to 485 dpa in years 2026/27 to 2030/31, and 1,255 dpa between 31/32 to 35/36. The remaining 5 years of the plan sees the requirement fall to 1,025 dpa. As set out in paragraph 68-021 of PPG the Council need to provide evidence as to why they consider the use of a stepped trajectory as necessary and that the proposed trajectory does not seek to unnecessarily delay meeting identified development needs. As noted in response to Policy SP1 above, there has been significant and continued under-delivery in the district, resulting in a clear need to bring forward at least 885 dpa from the outset to help redress the Council's pressing affordability issues and affordable housing needs. In this context, the stepped requirement should be removed.

Delivery over the plan period is expected to be 14,989, providing a buffer between needs and supply of just under 400 homes (ie around 2.6%). Hill consider this to be wholly insufficient to take account of the risks around some of the larger allocations not coming forward as expected, and would instead anticipate a buffer of at least 10% to 15%. This provides the necessary certainty that the Local Plan will meets its objectives over the plan period, but also provide head room for the inevitable changes in delivery assumptions as the plan moves to submission and examination.

Notwithstanding the above principle around the scale of the buffer, and as set out in response to Policy SP1, the identified housing need of 885 dpa over the plan period (17 years) would be 15,045 net additional houses, not the 14,603 stated. Therefore the policy and housing trajectory should reflect this in order to be positively prepared and justified.

The Green Belt Review (2023) and the stage 2 study notes the Inspector examining the previous Local Plan raised concerns that the Green Belt Boundary Review supporting that plan made no assessment of how the small-scale sub areas contributed to the purposes of the Green Belt and that any site of less than 14ha or 500 dwellings were excluded from further consideration. As such the Council commissioned a new stage 2 study to provide a more granular approach to identifying potential sub-areas to assess within the Green Belt. This has recommended a number of sub-areas for further consideration where if removed from the Green Belt, would be unlikely to result in harm to the wider Green Belt.

Hill strongly supports the Council's decision (following the stage 2 review) to amend Green Belt boundaries, specifically at Townsend Lane, Harpenden, to meet the areas housing needs. The NPPF (paragraph 146) allows for Green Belt boundary amendments to be amended in exceptional circumstances where it can be demonstrated that as much use as possible has been made of brownfield sites and underutilised land, densities have been optimised and where through discussions with neighbouring authorities, it has not been possible to accommodate identified need elsewhere. On the basis of the evidence presented, SADC appear to have met the first two tests, albeit it is unclear whether the third test has been met with regard to discussions with neighbouring authorities about whether they could accommodate some of the identified need for development. This should be clearly set out in the evidence base, including detailed Statements of Common Ground, if so.

Provided these tests are fully met, the Council can consider amending Green Belt boundaries and whether the exceptional circumstances exist to support changing the boundary in accordance with current Paragraph 145 of the NPPF which states that: "*Authorities may choose to review and alter Green Belt boundaries where exceptional circumstances are fully evidenced and justified, in which case proposals for changes should be made only through the plan-making process*." It should be noted that the proposed NPPF changes will restore the requirement for LPAs to review Green Belt boundaries if they cannot meet their identified housing need.

Case law demonstrates that a number of factors may amount to exceptional circumstances, either individually or when combined together. Five factors were considered by the Hon. Mr Justice Jay in Calverton Parish Council v Greater Nottingham Councils [2015] EWHC 10784, which set out a number of matters that should be identified and dealt with in order to ascertain whether 'exceptional circumstances' exist to justify the release of land from the Green Belt. In the absence of a definition of exceptional circumstances in national policy, these factors have been used by a number of the authorities to determine whether the release of Green Belt in each instance was appropriate. The five factors established by Hon Mr Justice Jay were considered and set out as part Hill's submission to the Call for Sites 2021 consultation.

Although the assessment isn't repeated again here, the note was clear that exceptional circumstances do exist to amend Green Belt boundaries in the district. It was also demonstrated that exceptional circumstances existed to remove land at Townsend Lane (site M7) from the Green Belt for high quality residential development. Given the context of the district and acute housing need as set out under Policy SP1, it is considered that the results of Hill's assessment of exceptional circumstances for Green Belt release hold good and should be read in conjunction with this representation.

The Council has set out the exceptional circumstances they consider to be justification for amending Green Belt boundaries within their Green Belt and Exceptional Circumstances Evidence Paper (2024). The Paper states that the Council has considered case law, including Calverton (2015), and that the local context in which conclusions have been reached regarding the 'Exceptional Circumstances' necessary to require release of Green Belt land in the District involves a variety of factors, including:

- The acuteness/intensity of the housing need.
- The inherent constraints on supply/availability of non-Green Belt land.

- The difficulties of delivering sustainable development without impinging on the Green Belt.
- The nature and extent of the harm to the Green Belt that would arise if the boundaries were to be altered as proposed.
- The extent to which the consequent impacts on the purposes of the Green Belt may be ameliorated or reduced to the lowest reasonable practicable extent.

As a result, SADC has concluded that 'Exceptional Circumstances' do exist and it is necessary to amend Green Belt boundaries as set out in the DLP and its Policies Map. To confirm, Hill supports the case that exceptional circumstances exist to review the Green Belt, to meet housing need and to promote sustainable patterns of development (NPPF 147). Specifically, the amendments to the Green Belt at Townsend Lane Harpenden, and its proposed allocation referenced under site M7 is supported. It is considered that further significant shortfalls in housing supply would occur if Green Belt boundaries are not amended, which, along with worsening affordability issues, contribute to the exceptional circumstances required to amend green belt boundaries.

With regard to the Site itself, a review and analysis of the Green Belt Review (2023) and its assessment of land at Townsend Lane (M7), referred to as SA-16, has already been covered in section 2 of this response and is not repeated in detail here. Overall, Hill agree with the conclusion that site SA-16 doesn't affect the performance of the wider Green Belt and in dispute of the Review's sub-area assessment for the Site's contribution to purposes 1 and 3, concludes that the site assessed on its own merits makes limited or no contribution towards the purposes of checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.

Hill consider that any limited localised harm can be mitigated through the creation of a high-quality new settlement edge, framed by green infrastructure and new boundary planting that can successfully assimilate the development with the surrounding countryside.

The Green Belt Review Annexe Proforma Report (2023) sets out the above details of the site (SA-16 / RA-13). Hill would like to again reiterate that some of the details in terms of references to the cardinal directions are incorrect and need to be reviewed (for instance Townsend Lane is to the north east of the site, not the north west as referenced).

To summarise, Hill is supportive of the Council's decision to amend Green Belt boundaries and to allocate land at Townsend Lane (M7). The Site offers an excellent opportunity to secure sustainable plan-led development and help meet housing need for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Belt given its visual containment and the fact that it is developed on three sides
- The Site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap
- The Site itself is not subject to physical or environmental constraints that would affect development
- It is anticipated (based on the current local plan timetable and anticipated adoption Q1 2026) that it would be possible to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

The above, on their own, represent the exceptional circumstances necessary to justify the council's proposal to remove the site from the Green Belt and its allocation for residential development.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

## 352 - Cllr Mike Hobday

Submission Number: 352 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: St Albans Council Labour Group Name: Cllr Mike Hobday

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We wish to object to the Reg 19 Local Plan.

We believe that it is unsound (National Planning Policy Framework, section 35) insofar as its contents are not justified given the alternatives and that it is not consistent with national policy.

Our primary objection is that the plan insufficiently follows the brown-field – grey-belt – green belt sequence. This is contrary to numerous parts of the National Planning Policy Framework, including:

- Para 123: “makes as much use as possible of previously-developed or ‘brownfield’ land”
- Para 124 (c): “give substantial weight to the value of using suitable brownfield land”
- Para 146 (a): “make[s] as much use as possible of suitable brownfield sites and underutilised land”
- Para 147: “Where it has been concluded that it is necessary to release Green Belt land for development, plans should give first consideration to land which has been previously-developed”

This failing has both district-wide and local consequences:

- At a District level, table 3.2 (page 26 of main document) suggests that only 903 homes (6% of 14,989) are explicitly built on brownfield land and only 137 (0.9%) on grey belt land (previously developed land in the green belt). While both these figures are likely to rise through windfall sites, this may well not reach a reasonable expectation of avoidance of green belt development.
- At a local level, individual sites have been proposed which prioritise development on high-quality agricultural green belt over brownfield and grey belt land. In London Colney, which we represent as councillors, this has led to the prioritisation of development on prime agricultural land on Shenley Lane, south of Napbsury Park (site B6) and decisions not to propose development on brownfield land at the increasingly derelict Riverside Industrial estate or on the previously developed grey-belt land at and behind the Pastoral Centre further south along Shenley Lane.

The council’s process to determine sites for development was flawed. A scoring system was used to assess the suitability of different sites for development, but the results were ignored. Each site was considered and scored as a weak, medium or strong development case under 31 criteria.

- The “broad location site” West of London Colney and South of Napsbury Park scored: 10 weak, 10 medium, 11 strong. This is recommended by the council for development.
- In contrast, the site south-west of Willowside, London Colney scored: 8 weak, 9 medium, 14 strong. Land at the corner of the A1081 and Courser’s Road scored: 4 weak, 13 medium, 14 strong. Land south of the A414, north of the London Colney by-pass scored: 6 weak, 12 medium, 13 strong. The All Saints Pastoral Centre, mentioned above, scored: 11 weak, 11 medium, 9 strong. Land east and south of the A414 scored: 4 weak, 13 medium, 14 strong. The rural estate north of Napsbury scored: 4 weak, 1 medium, 16 strong. All of these sites score higher, yet none are recommended for development.

We are not advocating for development on specific sites, but simply saying that the council adopted a flawed methodology.

The council has ignored its scoring system in favour of a political preference to build on the outskirts of existing settlements. This runs counter to the primary purpose of the green belt, to check the unrestricted sprawl of large built-up areas. We believe that the most valuable green belt land is that which the public see and have access to, namely that adjacent to built-up areas. The council’s approach deliberately targets the most valuable green belt in the district for development.

The council’s consideration of development sites, at its planning policy committee in September, was flawed in that it did not include the Riverside Industrial Estate in London Colney, recommended for housing development by the London Colney Parish Council. This was rejected by the council at Reg 18 stage on the basis that employment land is required in London Colney. Yet this decision to protect dated and mainly unused employment land did not account for the high-quality employment land being developed at the Strategic Rail Freight Interchange a few minutes’ drive away. Given the railfreight development, the case to retain the Riverside Industrial Estate is weaker.

The council's determination to find the simple route of allocating green belt agricultural land for massive development came as a result of consistently down-playing options for brown-field development. For example:

- The council has been slow to redevelop council housing garage sites, which would be suitable for social housing. The garage site around the former Cotlandswick Community in London Colney is in poor repair and has no garages let. Planning permission for redevelopment for flats was granted in 2013, but the garages remain derelict. Other large garage sites, such as that behind 80-82 Five Acres in London Colney remain unused.
- The council has taken too restrictive an approach to the development of taller buildings. It is entirely reasonable, indeed laudable, to protect views of St Albans Abbey. But views of other protected buildings, such as Trinity URC Church, St Alban and St Stephen Catholic Church and Christ Church may not merit this same level of protection. The purpose of expressing this concern is not to advocate tall buildings on individual sites, but to show that the council has taken an extreme approach to discouraging brownfield development.

We further wish to object to the settlement hierarchy, table 1.3, which seeks to redesignate London Colney from a village to a town. There is no evidence that this matches the understanding, vision or aspirations of local residents who repeatedly say that they see London Colney as a village. It is believed by many that this is an inappropriate and artificial device, designed purely to facilitate future development proposals.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

It is important that the Inspector hears and can question objections to the council's failure to brownfield - greybelt - greenbelt principle

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 353 - Greenbelt

Submission Number: 353 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Greenbelt Name: Greenbelt

Comment Number: 3

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

1. **Summary**

1.1 The Regulation 18 public consultation process that St Albans City and District Council (SADC) conducted was flawed.

1.2 SADC failed to follow the LGA's Good Planning Guide Paragraph 6.2, and instead allowed speculative development to drive the Plan. In addition, it did not provide the necessary objectively-assessed evidence for the appropriate appraisal of sites to be undertaken. It was therefore proposing to authorise building in unsustainable locations.

1.3 SADC is failing to ensure that the houses that would be built would be truly "affordable", instead allowing vast tracts of the Green Belt to be sacrificed for the building of larger properties that are not required, under the misapprehension that this will reduce house prices.

1.4 Inappropriate duress was applied to the Councillors prior to the vote to launch the Regulation 18 process, which meant that minimal scrutiny took place, causing flaws in Arup's Green Belt Review to be incorporated into the Draft Plan.

1.5 The consultation was not well advertised, with inadequate presentations being undertaken. This consultation took place through the summer holidays when many residents were away or otherwise distracted, which led to a relatively small response.

1.6 The portal established for the community to make comments was difficult to use, and involved a misleading "short questionnaire". The Council failed to make it clear that responses could be made by email outside the portal framework. This prevented many more comments being made.

1.7 The vast majority of respondents expressed their objection to building on the Green Belt, which directly conflicts with the path that the Council is taking.

1.8 Specific issues highlighted by the public as part of the Regulation 18 process, were not adequately addressed.

1.9 The rapid progress of the Draft Plan at the Regulation 19 stage, is being driven by a fear of larger housing targets being imposed on the district, which is causing fundamental underlying problems with the Plan to be disregarded.

1.10 Inadequate is being taken of feedback from the Regulation 19 process.

1.11 The current Plan is not sound and should be withdrawn.

2. **Formulation of the Plan**

2.1 We are extremely concerned about the strategy and the formulation of the Draft Local Plan, in relation to the Green Belt.

2.2 The Green Belt locations earmarked in the Plan, have been driven by speculative developers via the various "call for sites" processes, and are often not located in the most sustainable locations or, in many cases, not located in areas that could be described as sustainable at all. This makes them the least suitable in meeting the needs of lower-income households and will drive up car usage, in a district where there is already a chronic traffic issue, with the associated pollution, exacerbated by the District being sandwiched between three major motorways. This is creating a "demand" led plan, rewarding speculative developers.

2.3 The Council has adopted a policy that new developments of over 10 units must include 40% "affordable" dwellings. As many developments comprise fewer than 10 units, this would make it likely that in excess of 70% of houses built in the District (the figure will always be over 60%), would be market price houses, in most cases large properties, built at low densities. The District does not need these executive homes, so c70% of the Green Belt that would be surrendered, would be sacrificed needlessly.

2.4 When the sizes of these units are assessed, the actually percentage of unwanted executive homes by bedrooms will actually be higher, since the "affordable" units tend to be the smaller ones.

2.5 Property prices within the District are high, therefore the concept of allowing a 60% build as an "enabling" development, to help finance the "affordable" element of a site, does not stand up to scrutiny.

2.6 The term "affordable" has been used liberally in the Plan, however no mechanism exists in the Draft Local Plan to ensure that these properties are within the renting or purchasing limitations of low-income households.

2.7 The Council is under the misapprehension that by building more houses, property values will fall. In their promotional video for the Regulation 18 process, they stated *"shortage of housing is helping to drive up house prices, young people can no longer afford to buy their first home"*, but this disregards the reality in the market. The availability of additional privately available houses has consistently attracted more people to the District, especially from London. This increased demand absorbs any additional supply, thus neutralising any effect on prices.

2.8 The proposed sites were just "lifted" from a Green Belt review produced by Arup, with no assessment of site sustainability, having been undertaken. It therefore disregarded: site access, traffic or transport assessments, viability of proposed transport improvements, proximity to employment, leisure, schools and shops, availability and capacity of other facilities such as water and other utilities, GP and dental services etc.

2.9 There are flaws in the methodology used for Arup's Green Belt Review, which have not been addressed prior to their proposals being adopted "wholesale" into the Draft Plan. Examples of this are:

1. The inclusion of sub-areas the rural side of defensible boundaries, which according to Arup's own methodology, should be excluded from consideration
2. The disregarding of buffers that Arup itself determined

- Subjectively defining the 250/400m buffers in the first place, without a firm basis for the selection of these sizes.

3. **Flaws in the Regulation 18 consultation process**

3.1 The Regulation 18 consultation process was flawed in its preparation and implementation:

3.2 There was negligible scrutiny applied to the Plan prior to the approval of the Regulation 18 process and only limited discussion was permitted at the two committee meetings on 26 June and 10 July 2023. Despite a number of serious concerns having been raised by Committee Councillors, no alterations were made to any of the 82 pages of site allocations. Councillors were only shown the 42 and 82-page Draft Local Plan documents, and the Green Belt Assessment documents of 146 (Final Report) and 762 pages (Annex), a few days before the first meeting. This appears to have been designed to restrict them from being able to properly assess the documents.

3.3 The Committee was required to vote on entering the Regulation 18 process only 2 weeks after the Draft Local Plan was first presented to them, under the threat that if they did not proceed in accordance with the proposed timetable, it would result in the plan-making process being taken away from SADC and the Council being put into "special measures". Unnecessary duress was therefore applied to the Committee.

3.4 The process for determining potential sites for development in the Regulation 18 process was not undertaken in an objective manner, since it was not based on a comprehensive evidence base. Paragraph 6.2 of the Local Government Association's Good Plan Making Guide, states:

*"Evidence should inform what is in the plan, rather than being collected retrospectively in an attempt to justify the plan. You should have a clear idea about what the evidence is needed for, how it is going to be used and how much detail is needed".*

3.5 With the exception of a Green Belt Review, which was not properly scrutinised, little other evidence had been collected. Not collecting the evidence first clearly does not conform to these guidelines, so decisions about site selection cannot be objectively justified.

3.6 Only a very small proportion of the District's residents were aware that the consultation was taking place, due to inadequate publicity by SADC.

3.7 Public presentations were made at a handful of locations over a two-week period before the deadline. However, no presentations were made in Chiswell Green, Park Street, North St Albans and many other areas that had proposals for large scale Green Belt release, or where there were on-going applications for large scale Green Belt developments. These were poorly attended since they were not well advertised and took place during the working week, making it particularly difficult for the many commuters with families to attend. There was no static exhibition at any centrally located Council office for any of the consultation period which residents could view independently. The Council recognised that it was not appropriate to hold any presentations during the summer holidays.

3.8 Many of those who tried to use the Council web portal struggled with it, and many gave up, preventing them from making comments. The portal was prohibitively complicated to use, as is illustrated by a comment from a Mount Drive resident:

*"Not user friendly at all - may be why there isn't a lot of objections - funny that.. !! "*

3.9 On the "Survey Details" introduction page, it stated that all comments must be made through the portal:

*"This event requires you to first Login or Register before providing a response."*

Then:

*"To make comments in the questionnaire you will need to sign in or register."*

3.10 This was not correct, since email responses were being accepted, but much of the public was unaware of this. Therefore, many of those who were unable to cope with the complexities of the portal believed that they could not make a comment at all. Nowhere on the portal did it make clear that responses could be emailed, or even posted, to the Council.

3.11 Many residents found that the short questionnaire was too restricted; the prescribed choice of answers constituted a poor reflection of the respondents' opinions, forcing them to select responses that did not accurately represent their views. Some felt that it was "biased", forcing residents to make binary choices, for example between housing or protecting the environment as a priority.

3.12 The widespread belief that the Council would do what it wants, irrespective of the public's opinions, caused many not to take the time to submit their thoughts. The level of this disengagement went beyond the common cynicism prevalent with such matters, and appeared to be driven by the perceived arrogance of the Council and planning department leaders, through actions such as those highlighted in "3.2" and "3.3" above.

3.13 In addition to the technical difficulties and the misleading advice given about submitting a comment, this process was commenced at the beginning of the summer holidays, adding another impediment to the task of obtaining extensive resident feedback. Whilst Cllr White stated that the minimum 6-week consultation had been extended for this reason, the reality is that the consultation on such an important document should never have been as short as the statutory minimum of 6 weeks. The minimal extension beyond the statutory period was inadequate compensation for the loss of the 6-week summer holiday period.

3.14 There was only a 3-week period subsequent to the school holidays during which the Council felt it was appropriate to hold public presentations. This is akin to recognising that, realistically, there was only a meaningful consultation period of about this duration.

3.15 The lack of engagement throughout the holidays was further evidenced by the insignificant number of responses made in that period. Approximately 90% of all responses were made in the final week. Whilst there is always a "last minute rush" with any consultation with a deadline, this was particularly extreme.

3.16 The SADC Regulation 18 public consultation was deeply flawed because of the above reasons. Only 955 responses were received, and this included statutory consultees, making the number of responses from the public even smaller. This is out of approximately 115,000 adults in the District, many of whom have very strong views about aspects of the plan, in particular building on Green Belt land. The vast majority of those who did respond expressed their opposition to Green Belt development, which is the overriding theme of the responses.

3.17 The Council has continued on this trajectory, despite the high proportion of objections from respondents to building on the Green Belt. This reaffirms the public's belief that it is pointless contributing to a consultation process such as this.

3.18 Examples of the public's comments being dismissed can be seen in relation to site L2. On pages 114 to 130 in the Local Plan Consultation Summary Responses Table, buried within the Public Pack for the PP&CC meeting on 12th December 2023. There are a very considerable number of public comments, which are merely responded to with a standard word or phrase eg "noted".

3.19 Where the public have highlighted flaws, for example in respect of the Arup Green Belt Review, no examination of the stated flaws has been made, rather the following standard phrase has been repeatedly quoted in the responses table:

*"The inclusion of this site is in line with the methodology in the Arup Green Belt Review 2023, which recommends the site for further consideration".*

## 4. Flaws in the Regulation 19 consultation process

4.1 A similar approach has been taken with the Regulation 19 process, as with the Regulation 18 process, in terms of haste.

4.2 Following the new Government's publication of the draft NPPF, the timetable for the Regulation 19 process and presentation of the document for Examination, was brought forward.

4.3 The revised timetable meant that there was no scrutiny of the Draft Plan prior to the Regulation 19 process being entered into. This was under the threat that if the Plan did not reach the Examination stage prior to the adoption of the new NPPF, that the District's housing requirement would rise from 885 units per year to 1,544, a 70% increase.

4.4 Councillors therefore supported the Plan, not because it was sound, but rather that the consequences of not doing so would be a housing target that would not be achievable without a completely different policy approach.

4.5 Officers accepted that the undue haste may cause concerns with the soundness of the plan at Examination. Under "Risk Management" at 3.28 on page 19 in the Public Reports Pack for the 23rd September 2024 meeting, they state:

*"The accelerated timescale to Submission (intended on 2 December 2024) means that there will be less time to undertake work to support Submission of the Plan and Examination, which raises the risk of having to withdraw the Plan at Examination. This is primarily because, at(the) point of Submission in(is) December 2024, rather than the end of March 2025".*

4.6 Additionally at 3.40 it is stated:

*"To meet the planned Publication launch date of 26 September 2024, Councillors will need to note that limited editorial changes will be possible within the 2-day turnaround time".*

Then under: "***4. Alternative Options Considered and Not Recommended***", pressure is exerted on Councillors to approve the plan at the meeting when it is first presented:

*"To not bring this report at this time would not allow Councillors to take forward the Local Plan at this time. This will increase the length of time necessary until a new Local Plan can be adopted and will raise the likelihood of Government intervention in the Local Plan process and/or having to go back 2-3 years to bring forward a new draft Plan in line with the proposed new NPPF."*

4.7 In short, this Regulation 19 process is being fast-tracked without adequate scrutiny in order to beat the publication date of the new NPPF, all under the threat of Government intervention.

4.8 On 16th October, only half way through the Regulation 19 Consultation, the Full Council voted to approve the Local Plan. Considerable concerns were expressed by elected councillors at that meeting, regarding the soundness of the Plan.

4.9 Approving the Plan prior to the conclusion of the consultation, completely undermines the concept of requesting input from Stakeholders, and taking this into consideration within the decision making process.

4.10 As a result of the decision having already been made ahead of the close of the consultation, many interested parties did not bother raising any comment.

4.11 The timetable which was approved by the Planning Policy and Climate Change Committee at their meeting on 12th September, endorsed going to Examination immediately after their meeting on 28th November, rather than the previous planned date in March. This short timeframe re-affirms the Council's Policy not to make changes to the Plan based on opinions received through the consultation.

4.12 As a result of "4.7" and "4.9" above, the Regulation 19 consultation is a sham.

**5. Conclusion**

5.1 The Regulation 18 process should not have taken place with such haste. It appeared designed to intentionally circumvent the opportunity for scrutiny, and meant that the Evidence Base was incomplete.

5.2 It was badly organised at a strategic level and poorly implemented on a technical level.

5.3 We believe that our elected councillors and the community should have had the opportunity for the resulting Draft Local Plan to be properly scrutinised prior to the commencement of the Regulation 18 process.

5.4 Where flaws were highlighted with site selections or methodology, these were disregarded, quoting standard phrases.

5.5 The Regulation 19 process has been expedited in an attempt to circumvent the new government's anticipated higher housing targets imposed by the draft NPPF. In doing so, this consultation has become a sham, through the lack of consideration of feedback and undermining the public's contribution of that feedback.

5.6 The Council's actions in circumventing proper procedures in an attempt to have a Local Plan adopted quickly, has deprived the local community from having the opportunity of being presented with a robust Plan, which represents their desires for the future shape of their community.

5.7 We therefore believe that the current Plan should be rejected at the earliest opportunity, so that work can commence as soon as possible on one that better represents the community's views.

5.8 The District has been repeatedly let down by planning officers and Council heads in the formulation of Local Plans over many years, which has led to the current untenable situation. The mistakes of the past have been repeated several times, with planning officers failing to consider the views and needs of the community. The top down approach from the very same officers is unsurprisingly likely to result in yet another inadequate and inappropriate Plan being presented for Examination.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The current Plan is not sound and should be withdrawn.

**358 - St Albans School**

Submission Number: 358 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: MFS Resolution Name: Michael Fearn

On Behalf Of Company/Organisation: Name: St Albans School

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

3.1. **Draft Strategic Policy SP3***"Land and the Green Belt"*- This draft policy contains the self-evident statement that the *"Council seeks overall to protect the Green Belt from inappropriate development"*. It continues that the policy *"involves select Green Belt boundary adjustments in the right areas to provide wider protection of the rest Green Belt".* However, it does not propose any adjustment to the boundary in the vicinity of the School, which currently runs through the middle of a building (see extract below). Proceeding with the current Green Belt boundary in the vicinity of the School's Campus will not be justified, effective, or consistent with National policy.

3.16. **Draft Policies Maps**– The opportunity presented by the emerging Local Plan should be used to undertake a thorough Green Belt boundary review as paragraph 148 of the NPPF advises. Amongst other things this paragraph states that boundaries should be defined *"clearly, using physical features that are readily recognisable and likely to be permanent".*

3.17. **The School's Campus -** We have given the example above of the type of anomaly which the emerging plan provides the opportunity to rectify. The Green Belt boundary in and around the School's Campus includes land which performs no Green Belt function, and includes a number of the School's most significant structures, such as the Swimming Pool / Sports Hall and the new Maths Faculty. Even more bizarrely the Green Belt boundary is still shown running through the middle of the former Aquis Court building (No.31 Fishpool Street), despite this building having been completed about 30 years ago. The continued flawed Green Belt notation is only likely to lead to the frustration of the School's further projects or at the very least retaining the need for involvement of the Secretary of State regarding development applications. There needs to be a much more thorough review of the boundaries to ensure that they are robust, but also allow for the development needs of the District across the plan period.

3.18. ARUP undertook a Green Belt Review on behalf of the St Albans City & District Council, and in its Report of June 2023, the District's Green Belt was divided into 'sub-areas' (SAs), where further analysis was carried out into the land's contribution to Green Belt objectives. 'SA-58' included some of the School's campus, although not all of it. The ARUP report found that this 'sub-area' could be removed from the Green Belt without altering *"the performance of the wider Green Belt"*(ARUP Annex Report, page 266). This 'sub-area' was one of the 54 that the report *"Recommended for further consideration as RA-33"*(ARUP, Final Report, page 69 & Annex Report, page 267).

3.19. In the *"Commentary on boundary features and impact on Green Belt boundary strength"*, page 267 of ARUP's Annex report states:

*"the inner boundary is predominantly readily recognisable and likely to be permanent. The outer boundaries to the north and east are readily recognisable and likely to be permanent. The outer boundary to the south is readily recognisable but not necessarily permanent. If the sub-area was released, the new inner Green Belt boundaries would not meet the NPPF definition. The new boundaries would require strengthening".*

3.20. ARUP makes no mention of the boundary anomaly in relation to the former 'Aquis Court'. However, ARUP's comments upon the need for boundary strengthening were 'RA-33' to be removed from the Green Belt are curious when considered against the context that the most obvious and natural boundary for the Green Belt in the vicinity of the School's Campus and Fishpool Street as a whole, would be the course of the river Ver to the immediate south. Currently, the boundary line is along the gardens of Fishpool Street and follows no recognisable, or defensible line. This

alteration could be made, without any harm to wider Green Belt objectives. As the Green Belt boundary is currently shown it is not positively prepared; justified; effective; or consistent with National policy and requires amendment.

3.21. Going forward, the School would like to work with the Council in order to define the boundary more rationally, so that the integrity of the Green Belt is maintained in a manner which does not compromise the efficient operation of the School.

3.22. **Land to the rear of No. 57 Fishpool Street** - Whilst on the matter of considering the matter of Green Belt boundaries and site allocations in the vicinity of the School, we note that Site Ref C-140, which had originally been put forward by the previous owners into the SHLAA as a potential housing site is not being progressed. The land in question is only part of a much larger area of garden land behind No. 57 Fishpool Street, the entirety of which is now in the ownership of the School. As with the rear of Aquis Court, Site Ref C-140, as well as the rest of the former garden of No.57 Fishpool Street, all fall within the Arup report parcel of land 'RA-33', which was recommended for consideration for release from the Green Belt. The reason for not proceeding with a housing allocation on the site appears to be the size of site once its various constraints are taken into account. The constraints noted include the land being at high risk of flooding; contamination; and because of its *"Agricultural Land Classification"*. As a point of information, Site Ref C-140, as originally put forward for consideration as an allocation, is not itself subject to enhanced flood risk and neither is it agricultural land. Furthermore, the School is not aware of any particular contamination issue with this land. To be justified; effective; and consistent with National policy this area should also be removed from the Green Belt.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. ## 362 - EDIT Land Ltd

Submission Number: 362 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 2

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land at Roundhouse Farm, Colney Heath” have been discounted incorrectly

Representations

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

The Reg. 18 Draft Local Plan includes planning policies relating to various topics, which would become the principal consideration for the decision maker when determining planning applications.

EDIT Lands has not provided comment on a number of policies and advise which they are commenting on in the list below, but reserves the right to comment on others in the future.

However, SADC should consider whether all the policies as drafted are useful and necessary for decision making, and do not just repeat that which is already stated in the National Planning Policy Framework (NPPF), Planning Practice Guidance or legislation. Policies should also be unambiguous, clear and concise, without being overly onerous or stifle innovation or ambition.

EDIT Lands main concern with the Local Plan, as a whole, is the weak approach to the provision of much needed housing. Firstly, the level of housing planned for does not seek to address housing need adequately or provide any contingency, nor does it seek to address unmet need or positively plan for previous years of significant under-delivery.

Furthermore, the level of housing which is proposed as windfall, is unsound. 20% of the total housing supply to come forward on sites which do not have allocations, nor are formally identified is not positively prepared and is a huge outlier compared to neighbouring authorities. We consider the proportion of windfall to be wholly inappropriate given the borough’s historic poor delivery and acute housing need.

It is also perverse for SADC to suggest that all brownfield sites have been exhausted to necessitate Green Belt release, whilst anticipating that such a high number will come forward via the windfall process. In addition, the Local Plan is heavily reliant on the delivery of a small number of broad growth areas and strategic extensions, namely the Hemel Garden Community which is allocated for net. 5,500 dwellings and 4,281 across the other strategic development sites which are subject to challenging land assembly and infrastructure delivery requirements which will constrain delivery

of housing units within the early periods of the Local Plan. St Albans have acknowledged this situation in the reg.19 draft Local Plan where they are now asserting that only 4,300 dwellings will be delivered on the HGC sites within the LP period, a reduction of 450 dwellings from the LP trajectory and 1200 from the wider site allocation. Across all allocated sites within the borough, the council has lost net. 971 dwellings between Reg.18 and Reg.19 stage. There is no explanation, or justification on how the shortfall in housing delivery is accounted for within the revised housing trajectory, or local plan housing targets.

The housing trajectory places significant reliance on these strategic sites without due consideration to implications of these strategic sites not being delivered or brought online in line with the housing trajectory.

The emerging Local Plan is also not prepared positively as it fails to make any consideration to the need for natural growth (and deliverable) within the 'washed over villages' within the green belt, with no consideration paid in detail to areas for release from the green belt in these locations. As outlined in Section 3 of this document our client challenges the methodology which has been applied in the green belt review in light of a failure to apply a macro level analysis to the green belt parcels.

Furthermore the draft Local Plan fails to make provision for custom build and self-building housing typologies despite a clear need being identified in the National Planning Policy Framework no recognition is made to the contribution this typology makes to meeting established demand. We understand that there is a need locally for such housing and failure to plan for such housing, is not positive.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

- SP1: A Spatial Strategy for St Albans District
- SP3 – Land and the Green Belt
- HOU 1 – Housing Mix
- HOU 2 – Affordable Housing
- SP2 – Responding to the Climate Emergency
- NEB 6 – Biodiversity and Biodiversity Net Gain – Comment
- LG5 – Green Belt – Object

In summary, EDIT Land considers the plan fails on Paragraph 35 of the NPPF, and is fundamentally unsound. Reasons why the plan is not positively prepared and deliverable is discussed in this representation, yet is summarised as below (yet not limited to):

- The baseline housing need figures cited in Table 3.2 and Policy SP1 and SP3 do not appear to be correct and directly contradict the housing need figures published in the AMR 2022, equating to a shortfall of between 2,271 dwellings.
- Level of housing proposed (Standard Method) does not allow for contingency and is therefore not robust or positively prepared;
- Lack of recent delivery, 5YHLS, and lack of contingency warrant a higher housing requirement;
- Level of windfall sites anticipated is unachievable and speculative, most sites need to be formally allocated to be sure the level of housing proposed is achievable.
- Green Belt Assessment is flawed due to it not being fine-grain, with no consideration to the need for natural growth of the washed over settlements within the green belt, which has been deemed to be unsound in the case of the Uttlesford BC Local Plan examination;

 Further sites should therefore be allocated to account for excessive windfall provision and over reliance on a small number of strategic development sites.
 Reasonable alternative sites, such as Land at Roundhouse Farm, to the north of Roestock Lane have been discounted and assessed incorrectly;

In summary, EDIT Land has strong concerns with draft Policy SP3. The crux of the objections are as follows:
 Level of housing proposed (Standard Method) does not allow for contingency and is therefore not robust or positively prepared;
 Lack of recent delivery, 5YHLS, and lack of contingency warrant a higher housing requirement;
 Level of windfall sites anticipated is unachievable and speculative, most sites need to be formally allocated to be sure the level of housing proposed is achievable.
 Green Belt Assessment is flawed due to it not being fine-grain, and no exceptional circumstances report published;
 Further sites should therefore be allocated to account for excessive windfall provision and over reliance on a small number of strategic development sites.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

EDIT Land suggest that these significant changes are made to the emerging Local Plan, most notably:
 Greater number of sites allocated, including allocation of a broader range of medium and large size green belt sites within the borough to provide contingency within the early stages of the Local Plan process.
 Green Belt Review to review smaller parcels of land such as Land to the north of Roestock Lane
 Less reliance on speculative windfall sites replaced with a mixture of housing allocations; and
 Need for further Green Belt release to accommodate for the objectively assessed need (including Land at Roundhouse Farm / to the north of Roestock Lane) to ensure the plan is positively prepared and ultimately sound in accordance with NPPF paragraph 35;

## 3 STRATEGIC POLICY SP3 – LAND AND THE GREEN BELT

### Housing Need / Requirement

3.1 Policy SP3 sets a housing need target of 14,603 homes by 2041, starting from October 2024, based on an annual need of 885 dwellings using the Standard Method.

3.2 The NPPF's requirement to use the Standard Method for a minimum housing target is supported. However, to allow for any delay in the Plan's adoption, we suggest extending the plan period to 2042, raising the minimum need by 885 homes.

3.3 Importantly, while the Standard Method provides a minimum target, it does not set the final housing requirement. The cap applied to the method limits the need figure to 885 dpa, but without this cap, the true need is 1,169 dpa. Additionally, the PPG suggests considering higher targets to meet affordable housing needs, which is relevant given the District's high need for affordable housing (443 dpa, or 50% of the requirement).

3.4 Relying solely on the capped minimum target risks under-delivering on affordable housing, particularly as windfall sites often contribute little to affordable housing. Increasing the total housing target could reduce the shortfall and better meet local needs.

3.5 Previous Regulation 18 representations for D'Arblay also highlighted other factors for setting a higher target, such as market signals and regional shortages, which seem overlooked in the current DLP housing requirement.

### Green Belt

3.6 We support adjustments to the Green Belt to meet development needs. The NPPF allows Green Belt changes in Local Plans where exceptional circumstances exist (NPPF paragraphs 145-146).

3.7 Based on the judgments in Calverton and Compton, exceptional circumstances include significant housing need, limited non-Green Belt land, and constraints on sustainable development. St Albans'

severe housing shortage and affordable housing needs clearly justify Green Belt adjustments.

3.8 Previous assessments confirm that meaningful housing delivery in the District requires Green Belt release. The Council's latest studies indicate limited capacity within existing settlements and highlight areas within the Green Belt that could be released with minimal impact.

3.9 The Green Belt Review (2023) identifies sub-areas that make a lesser contribution to Green Belt purposes and could be adjusted without wider harm, supporting strategic but limited Green Belt modifications.

3.10 Exceptional circumstances are evident in St Albans, meeting Calverton's criteria. Moreover, Compton allows for Green Belt release that exceeds the minimum housing need if it aids affordable housing delivery, which is pertinent here given the current shortfall.

3.11 Exceptional support should be afforded to the release of previously developed land (PDL) within the Green Belt, especially under the proposed reforms to the National Planning Policy Framework (NPPF), which signal a shift toward the introduction of a 'Grey Belt' policy. The 'Grey Belt' is envisioned to encompass land that, while within the Green Belt, has already undergone development and thus makes only a limited contribution to Green Belt purposes. Such areas are prioritized for sustainable redevelopment to support housing and economic needs while preserving the integrity of genuinely open Green Belt spaces.

3.12 A significant portion of the Site meets these conditions, being occupied by a long-established brownfield car garage business. As PDL, this land aligns closely with the emerging Grey Belt criteria, as it not only has a reduced role in serving the five purposes of the Green Belt but also holds greater potential for productive redevelopment. Furthermore, this part of the Site falls within the established village boundary as outlined in the made Sandridge Neighbourhood Plan, underscoring its integration within the local settlement pattern. By its location and existing use, the Site thus demonstrates strong compatibility with the Grey Belt designation, offering a practical and minimal-impact solution for housing or commercial needs while preserving adjacent, more sensitive Green Belt areas.

3.13 The Site's inclusion in the village boundary, combined with its brownfield status, positions it as an ideal candidate for release under the emerging Grey Belt policy, aligning with the NPPF's vision for carefully managed, sustainable development in areas where urbanization already exists. This approach reinforces the intent to balance growth with preservation by focusing development in areas where the Green Belt's purposes are least impacted, thus enabling local authorities to address housing and economic pressures within an orderly framework.

## 5 ASSESSMENT OF THE SITE

6.1 There are a number of elements of the DLP's evidence base relevant to consideration of the Site, as discussed in turn below.

### HELAA

6.2 The Site was considered by the Council as a potential residential allocation as site reference SAN-0221 and SAN-02-16 through the Housing and Economic Land Availability Assessment (2021) ('the HELAA').

6.3 In respect of the Site's suitability for residential development, the HELAA concluded:

***"At this initial stage, the site is considered to be potentially suitable subject to absolute and noabsolute constraints being reasonably mitigated. Evidence base work, including a Green Belt Review, is underway and may change the site suitability in the future"***

6.4 Given the lack of constraints to development of the Site, as noted in Section 5 of this representation, the key issue appears to have been the Green Belt Review.

### Green Belt Review

6.5 Alongside the draft Local Plan the Council have published a Stage 2 Green Belt Assessment (2023), with an Annex Report comprising a Washed Over Villages Study.

6.6 Sandridge is identified as a 'washed over village' within the Study, falling outside of any identified subarea within the main Green Belt Assessment (the closest being sub-areas SA-70a and SA-74). Each washed over village has been assessed with a recommendation to either be

retained as washed over or be inset from the Green Belt. The Study assesses the Village's 'open character' and determines whether this is low, moderate and strong, as well as determining the importance of the village to the openness of the Green Belt, again as either low, moderate or strong. The village is assessed to have a moderate open character and moderate contribution to the openness of the Green Belt, and thus is recommended to be retained as a washed over village.

6.7 The current categorization of Sandridge as a "washed over village" within the Green Belt, as outlined in the Council's evidence base, could be reconsidered to better support the Local Plan's objectives. Reclassifying Sandridge as a higher-tier settlement, with a recognition of its low contributions to the Green Belt's primary purposes, would align with both the need to meet housing demand and the principles of sustainable development. Acknowledging the distinct characteristics of Sandridge,

including its containment by natural and defensible boundaries, would support a re-evaluation of its designation within the Green Belt.

6.8 Firstly, the designation of Sandridge as a "washed over village" overlooks its minimal contribution to several Green Belt purposes as set out in the National Planning Policy Framework (NPPF). The Site is bounded by mature trees, Woodcock Hill, and existing development, creating natural limits that effectively prevent sprawl and contain urban expansion. With this natural containment, the Site does not contribute significantly to the prevention of urban sprawl or to safeguarding open countryside from encroachment. Re-evaluating Sandridge as a higher-tier settlement with limited impact on the Green Belt would better reflect these characteristics and would allow more effective planning within the Local Plan's framework.

6.9 Furthermore, Sandridge's position relative to other towns supports its suitability for targeted development without risking coalescence. The Site does not contribute to a critical gap between neighboring settlements, and any development would act as infill within the village, reducing any potential for merging with adjacent towns like St Albans or Hatfield. Recognizing Sandridge's limited role in this regard could alleviate pressure on less suitable sites, while maintaining the strategic gaps that the Green Belt seeks to protect.

6.10 Elevating Sandridge to a higher-tier settlement would strongly align with the National Planning Policy Framework's (NPPF) goals of prioritizing the use of previously developed land (PDL) within sustainable development initiatives. The Site, including the Orchard Garage, exemplifies an optimal brownfield location within the village boundary that, if redeveloped, would promote efficient land use and support local housing demand while preserving the broader Green Belt. Reclassifying Sandridge in this way would not only advance the NPPF's strategic objectives but also resonate with the proposed reforms introducing a 'Grey Belt' designation.

6.11 Under the emerging Grey Belt policy, exceptional support is encouraged for the release and sustainable redevelopment of PDL within the Green Belt, particularly where such sites make limited contributions to the Green Belt's fundamental purposes. The Orchard Garage site, with its longstanding use and brownfield classification, aligns closely with these criteria, making it a strong candidate for sustainable growth under the Grey Belt initiative. As part of the Sandridge Neighbourhood Plan's designated village boundary, this site demonstrates a limited impact on the Green Belt's core functions, particularly when compared to greenfield sites, and offers potential for housing or commercial redevelopment that supports local needs.

6.12 Reclassifying Sandridge as a higher-tier settlement would thus facilitate a balanced development approach that concentrates growth in areas of existing urbanization and infrastructure, reducing pressure on purely greenfield locations elsewhere in the district. This designation would enable Sandridge to contribute meaningfully to district-wide housing targets within an orderly framework that respects the NPPF's vision for efficient and sustainable land use. By focusing growth on previously developed sites like Orchard Garage, Sandridge can advance community and economic objectives while supporting the careful stewardship of more open Green Belt areas.

6.13 In summary, adjusting the evidence base to categorize Sandridge as a higher-tier settlement within the Green Belt would provide a more balanced approach to housing delivery in line with Green Belt purposes. By recognizing the Site's minimal impact on Green Belt objectives and its capacity to support sustainable development, this approach would contribute to a more effective Local Plan that better meets current housing and growth requirements.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Please refer to Section 3 of the enclosed representation.

## 3 STRATEGIC POLICY SP3 – LAND AND THE GREEN BELT

### Housing Need / Requirement

3.1 Policy SP3 sets a housing need target of 14,603 homes by 2041, starting from October 2024, based on an annual need of 885 dwellings using the Standard Method.

3.2 The NPPF's requirement to use the Standard Method for a minimum housing target is supported. However, to allow for any delay in the Plan's adoption, we suggest extending the plan period to 2042, raising the minimum need by 885 homes.

3.3 Importantly, while the Standard Method provides a minimum target, it does not set the final housing requirement. The cap applied to the method limits the need figure to 885 dpa, but without this cap, the true need is 1,169 dpa. Additionally, the PPG suggests considering higher targets to meet affordable housing needs, which is relevant given the District's high need for affordable housing (443 dpa, or 50% of the requirement).

3.4 Relying solely on the capped minimum target risks under-delivering on affordable housing, particularly as windfall sites often contribute little to affordable housing. Increasing the total housing target could reduce the shortfall and better meet local needs.

3.5 Previous Regulation 18 representations for D'Arblay also highlighted other factors for setting a higher target, such as market signals and regional shortages, which seem overlooked in the current DLP housing requirement.

### Green Belt

3.6 We support adjustments to the Green Belt to meet development needs. The NPPF allows Green Belt changes in Local Plans where exceptional circumstances exist (NPPF paragraphs 145-146).

3.7 Based on the judgments in Calverton and Compton, exceptional circumstances include significant housing need, limited non-Green Belt land, and constraints on sustainable development. St Albans'

severe housing shortage and affordable housing needs clearly justify Green Belt adjustments.

3.8 Previous assessments confirm that meaningful housing delivery in the District requires Green Belt release. The Council's latest studies indicate limited capacity within existing settlements and highlight areas within the Green Belt that could be released with minimal impact.

3.9 The Green Belt Review (2023) identifies sub-areas that make a lesser contribution to Green Belt purposes and could be adjusted without wider harm, supporting strategic but limited Green Belt modifications.

3.10 Exceptional circumstances are evident in St Albans, meeting Calverton's criteria. Moreover, Compton allows for Green Belt release that exceeds the minimum housing need if it aids affordable housing delivery, which is pertinent here given the current shortfall.

3.11 Exceptional support should be afforded to the release of previously developed land (PDL) within the Green Belt, especially under the proposed reforms to the National Planning Policy Framework (NPPF), which signal a shift toward the introduction of a 'Grey Belt' policy. The 'Grey Belt' is envisioned to encompass land that, while within the Green Belt, has already undergone development and thus makes only a limited contribution to Green Belt purposes. Such areas are prioritized for sustainable redevelopment to support housing and economic needs while preserving the integrity of genuinely open Green Belt spaces.

3.12 A significant portion of the Site meets these conditions, being occupied by a long-established brownfield car garage business. As PDL, this land aligns closely with the emerging Grey Belt criteria, as it not only has a reduced role in serving the five purposes of the Green Belt but also holds greater potential for productive redevelopment. Furthermore, this part of the Site falls within the established village boundary as outlined in the made Sandridge Neighbourhood Plan, underscoring its integration within the local settlement pattern. By its location and existing use, the Site thus demonstrates strong compatibility with the Grey Belt designation, offering a practical and minimal-impact solution for housing or commercial needs while preserving adjacent, more sensitive Green Belt areas.

3.13 The Site's inclusion in the village boundary, combined with its brownfield status, positions it as an ideal candidate for release under the emerging Grey Belt policy, aligning with the NPPF's vision for carefully managed, sustainable development in areas where urbanization already exists. This approach reinforces the intent to balance growth with preservation by focusing development in areas where the Green Belt's purposes are least impacted, thus enabling local authorities to address housing and economic pressures within an orderly framework.

5 ASSESSMENT OF THE SITE

6.1 There are a number of elements of the DLP's evidence base relevant to consideration of the Site, as discussed in turn below.

HELAA

6.2 The Site was considered by the Council as a potential residential allocation as site reference SAN-0221 and SAN-02-16 through the Housing and Economic Land Availability Assessment (2021) ('the HELAA').

6.3 In respect of the Site's suitability for residential development, the HELAA concluded:

"At this initial stage, the site is considered to be potentially suitable subject to absolute and noabsolute constraints being reasonably mitigated. Evidence base work, including a Green Belt Review, is underway and may change the site suitability in the future"

6.4 Given the lack of constraints to development of the Site, as noted in Section 5 of this representation, the key issue appears to have been the Green Belt Review.

Green Belt Review

6.5 Alongside the draft Local Plan the Council have published a Stage 2 Green Belt Assessment (2023), with an Annex Report comprising a Washed Over Villages Study.

6.6 Sandridge is identified as a 'washed over village' within the Study, falling outside of any identified subarea within the main Green Belt Assessment (the closest being sub-areas SA-70a and SA-74). Each washed over village has been assessed with a recommendation to either be

retained as washed over or be inset from the Green Belt. The Study assesses the Village's 'open character' and determines whether this is low, moderate and strong, as well as determining the importance of the village to the openness of the Green Belt, again as either low, moderate or strong. The village is assessed to have a moderate open character and moderate contribution to the openness of the Green Belt, and thus is recommended to be retained as a washed over village.

6.7 The current categorization of Sandridge as a "washed over village" within the Green Belt, as outlined in the Council's evidence base, could be reconsidered to better support the Local Plan's objectives. Reclassifying Sandridge as a higher-tier settlement, with a recognition of its low contributions to the Green Belt's primary purposes, would align with both the need to meet housing demand and the principles of sustainable development. Acknowledging the distinct characteristics of Sandridge,

including its containment by natural and defensible boundaries, would support a re-evaluation of its designation within the Green Belt.

6.8 Firstly, the designation of Sandridge as a "washed over village" overlooks its minimal contribution to several Green Belt purposes as set out in the National Planning Policy Framework (NPPF). The Site is bounded by mature trees, Woodcock Hill, and existing development, creating natural limits that effectively prevent sprawl and contain urban expansion. With this natural containment, the Site does not contribute significantly to the prevention of urban sprawl or to safeguarding open countryside from encroachment. Re-evaluating Sandridge as a higher-tier settlement with limited impact on the Green Belt would better reflect these characteristics and would allow more effective planning within the Local Plan's framework.

6.9 Furthermore, Sandridge's position relative to other towns supports its suitability for targeted development without risking coalescence. The Site does not contribute to a critical gap between neighboring settlements, and any development would act as infill within the village, reducing any potential for merging with adjacent towns like St Albans or Hatfield. Recognizing Sandridge's limited role in this regard could alleviate pressure on less suitable sites, while maintaining the strategic gaps that the Green Belt seeks to protect.

6.10 Elevating Sandridge to a higher-tier settlement would strongly align with the National Planning Policy Framework's (NPPF) goals of prioritizing the use of previously developed land (PDL) within sustainable development initiatives. The Site, including the Orchard Garage, exemplifies an optimal brownfield location within the village boundary that, if redeveloped, would promote efficient land use and support local housing demand while preserving the broader Green Belt. Reclassifying Sandridge in this way would not only advance the NPPF's strategic objectives but also resonate with the proposed reforms introducing a 'Grey Belt' designation.

6.11 Under the emerging Grey Belt policy, exceptional support is encouraged for the release and sustainable redevelopment of PDL within the Green Belt, particularly where such sites make limited contributions to the Green Belt's fundamental purposes. The Orchard Garage site, with its longstanding use and brownfield classification, aligns closely with these criteria, making it a strong candidate for sustainable growth under the Grey Belt initiative. As part of the Sandridge Neighbourhood Plan's designated village boundary, this site demonstrates a limited impact on the Green Belt's core functions, particularly when compared to greenfield sites, and offers potential for housing or commercial redevelopment that supports local needs.

6.12 Reclassifying Sandridge as a higher-tier settlement would thus facilitate a balanced development approach that concentrates growth in areas of existing urbanization and infrastructure, reducing pressure on purely greenfield locations elsewhere in the district. This designation would enable Sandridge to contribute meaningfully to district-wide housing targets within an orderly framework that respects the NPPF's vision for efficient and sustainable land use. By focusing growth on previously developed sites like Orchard Garage, Sandridge can advance community and economic objectives while supporting the careful stewardship of more open Green Belt areas.

6.13 In summary, adjusting the evidence base to categorize Sandridge as a higher-tier settlement within the Green Belt would provide a more balanced approach to housing delivery in line with Green Belt purposes. By recognizing the Site's minimal impact on Green Belt objectives and its capacity to support sustainable development, this approach would contribute to a more effective Local Plan that better meets current housing and growth requirements.

Strategic Policy SP3 – Land and the Green Belt

2.24 Strategic Policy SP3 establishes a framework to meet St Albans District's critical housing and employment needs over a 16.5-year period, from October 2024 to March 2041. The policy emphasizes aligning this growth with essential infrastructure while safeguarding the Green Belt. However, SP3 recognizes that limited Green Belt adjustments may be necessary to meet this housing need.

2.25 Our response to Policy SP3 centres on two primary areas: the District's housing need and the principles guiding potential Green Belt adjustments, particularly around St Albans.

Housing Need

2.26 Policy SP3 currently anticipates a need for 14,603 homes in the District by 2041, based on an annual requirement of 885 dwellings calculated using the Standard Method. This baseline, however, must be considered as a minimum requirement.

The NPPF requires use of the Standard Method to determine minimum housing needs, which we support. Yet, we stress that this should be seen as a starting point rather than an absolute cap on development, as discussed in our response to Policy SP1.

To align fully with national planning policy, the Local Plan should extend the plan period to ensure it covers the 15-year minimum requirement from adoption. Extending this timeline would necessitate an additional 885 homes, further strengthening the Local Plan's commitment to fulfilling housing demands.

Green Belt

2.27 The acknowledgment of necessary Green Belt adjustments, particularly in and around St Albans, is both pragmatic and essential. The approach to assessing potential Green Belt releases has relied upon the Arup Green Belt Review, with specific insights provided in the Stage 2 Final Report (June 2023). However, we note that, as part of the Local Plan, a finer-grain assessment of individual sites within certain sub-areas was not undertaken. In light of proposed NPPF reforms and the potential for higher housing needs based on a revised Standard Method, we recommend that a finer grain assessment of parcels in and around St Albans could help to identify sites within sub-parcels in and around St Albans that make a lesser contribution to the purposes of the Green Belt than their parent sub-areas.

2.28 According to paragraph 145 of the NPPF, revising Green Belt boundaries through a Local Plan can be justified if exceptional circumstances exist. This includes establishing that all other potential means of meeting development needs have been exhausted prior to considering Green Belt land (per NPPF paragraphs 145 and 146).

2.29 While "exceptional circumstances" are not explicitly defined in the NPPF, case law, including Calverton and Compton, clarifies factors that may constitute exceptional circumstances, such as:

- The scale of identified development needs,
- Constraints on sustainable land supply,
- Limitations on achieving sustainable development without Green Belt adjustments,
- The scale of potential Green Belt harm, and
- Opportunities to mitigate this harm.

2.30 In St Albans City & District, the demand for housing is acute. This is evidenced by high Standard Method-derived needs, even with a cap in place to support early deliverability. If this cap were removed, the annual requirement would rise to 1,169 dwellings, underscoring the true level of demand within the District.

2.31 Beyond overall housing need, there is a pronounced shortfall in affordable housing.

2.32 The Local Plan's evidence base includes the South West Hertfordshire Local Housing Needs Assessment (2020), which highlights the need for 443 affordable dwellings annually in St Albans. This represents 50% of the Standard Method's minimum annual figure, underscoring the importance of enabling housing growth near St Albans to meet these pressing demands.

2.33 With limited development opportunities within the District's urban areas, the HELAA (2021) and Urban Capacity Study (2022) reveal significant constraints on available land.

2.34 The UCS estimates that existing settlement boundaries could yield just 2,174 dwellings, even with density increases. This necessitates new allocations beyond existing urban areas, and, given the proximity of Green Belt land to St Albans, it is evident that some boundary adjustments will be unavoidable.
2.35 The exact impact on the Green Belt varies by site. The Stage 2 Green Belt Review assessed 182 sub-areas, rating each based on its role within the broader Green Belt framework. The review found 54 areas that contribute less significantly to the purposes of the Green Belt, recommending them for further review. This suggests that limited, carefully planned adjustments could accommodate growth without compromising the essential functions of the Green Belt.
Site-Specific Considerations
2.36 Sub-Area SA-75, which includes Land at Sandpit Lane, has been assessed based on NPPF Green Belt purposes. Although SA-75 as a whole scored as making a “strong” Green Belt contribution, this assessment lacks the fine-grain analysis necessary to evaluate the potential of smaller parcels within the sub-area. Given the Government’s proposed reforms to the NPPF and a potential shift to a higher housing requirement under the new Standard Method, we strongly suggest that the Council consider this finer-grained analysis specific to St Albans to identify specific, sustainable opportunities for growth in this location.
2.37 While the sub-area as a whole was not recommended for further consideration, smaller parcels such as Land at Sandpit Lane are not considered to perform as strongly across all purposes as the wider area in which they sit. In such cases, a detailed assessment could reveal that these parcels, which possess natural containment through vegetation and existing development, may contribute to sustainable growth while having minimal impact on the strategic Green Belt.
2.38 It is also worth noting that certain allocations, such as Broad Location 1 (B1) north of St Albans, have been proposed despite strong Green Belt contributions from sub-areas SA-63-A, SA-66, and SA-69. Similarly, Bedmond Lane (M3) is proposed to be released from the Green Belt despite a strong Green Belt rating. Such decisions indicate a precedent for releasing small parcels within larger sub-areas where natural containment exists and broader NPPF purposes are minimally affected.
2.39 In light of these observations, we recommend a finer-grain assessment of sites within SA-75, including Land at Sandpit Lane. This targeted review would enable the Council to identify opportunities for sustainable growth that align with proposed NPPF reforms, considering both the District’s anticipated housing needs and the Government’s potential higher requirement. Detailed site-level analysis would ensure the Local Plan is robust, responsive, and adaptable to both current and emerging needs, balancing growth with Green Belt preservation
2.40 In summary, Strategic Policy SP3 is largely consistent with the NPPF’s soundness tests, addressing housing needs and infrastructure planning while taking a measured approach to Green Belt adjustments. To further strengthen the Local Plan’s compliance with NPPF soundness criteria, we recommend:
· Extending the plan period to at least 2042 to cover a full 15-year period post-adoption.
· Conducting finer-grained assessments within identified sub-areas, such as SA-75, to pinpoint smaller parcels for sustainable growth.
· Incorporating flexibility within SP3’s housing and Green Belt strategies—through reserve sites, phased releases, or housing supply buffers—to support deliverability and adaptability over the plan period.
2.41 By refining these elements, SP3 will better align with national policy requirements and ensure the Local Plan remains robust, adaptable, and responsive to both current and projected housing needs.

[Please see attached appendix]

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Please refer to Section 2 of the enclosed representation.

Strategic Policy SP3 – Land and the Green Belt

2.24 Strategic Policy SP3 establishes a framework to meet St Albans District's critical housing and employment needs over a 16.5-year period, from October 2024 to March 2041. The policy emphasizes aligning this growth with essential infrastructure while safeguarding the Green Belt. However, SP3 recognizes that limited Green Belt adjustments may be necessary to meet this housing need.

2.25 Our response to Policy SP3 centres on two primary areas: the District's housing need and the principles guiding potential Green Belt adjustments, particularly around St Albans.

Housing Need

2.26 Policy SP3 currently anticipates a need for 14,603 homes in the District by 2041, based on an annual requirement of 885 dwellings calculated using the Standard Method. This baseline, however, must be considered as a minimum requirement.

The NPPF requires use of the Standard Method to determine minimum housing needs, which we support. Yet, we stress that this should be seen as a starting point rather than an absolute cap on development, as discussed in our response to Policy SP1.

To align fully with national planning policy, the Local Plan should extend the plan period to ensure it covers the 15-year minimum requirement from adoption. Extending this timeline would necessitate an additional 885 homes, further strengthening the Local Plan's commitment to fulfilling housing demands.

Green Belt

2.27 The acknowledgment of necessary Green Belt adjustments, particularly in and around St Albans, is both pragmatic and essential. The approach to assessing potential Green Belt releases has relied upon the Arup Green Belt Review, with specific insights provided in the Stage 2 Final Report (June 2023). However, we note that, as part of the Local Plan, a finer-grain assessment of individual sites within certain sub-areas was not undertaken. In light of proposed NPPF reforms and the potential for higher housing needs based on a revised Standard Method, we recommend that a finer grain assessment of parcels in and around St Albans could help to identify sites within sub-parcels in and around St Albans that make a lesser contribution to the purposes of the Green Belt than their parent sub-areas.

2.28 According to paragraph 145 of the NPPF, revising Green Belt boundaries through a Local Plan can be justified if exceptional circumstances exist. This includes establishing that all other potential means of meeting development needs have been exhausted prior to considering Green Belt land (per NPPF paragraphs 145 and 146).

2.29 While "exceptional circumstances" are not explicitly defined in the NPPF, case law, including Calverton and Compton, clarifies factors that may constitute exceptional circumstances, such as:

- The scale of identified development needs,
- Constraints on sustainable land supply,
- Limitations on achieving sustainable development without Green Belt adjustments,
- The scale of potential Green Belt harm, and
- Opportunities to mitigate this harm.

2.30 In St Albans City & District, the demand for housing is acute. This is evidenced by high Standard Method-derived needs, even with a cap in place to support early deliverability. If this cap were removed, the annual requirement would rise to 1,169 dwellings, underscoring the true level of demand within the District.
2.31 Beyond overall housing need, there is a pronounced shortfall in affordable housing.
2.32 The Local Plan's evidence base includes the South West Hertfordshire Local Housing Needs Assessment (2020), which highlights the need for 443 affordable dwellings annually in St Albans. This represents 50% of the Standard Method's minimum annual figure, underscoring the importance of enabling housing growth near St Albans to meet these pressing demands.
2.33 With limited development opportunities within the District's urban areas, the HELAA (2021) and Urban Capacity Study (2022) reveal significant constraints on available land.
2.34 The UCS estimates that existing settlement boundaries could yield just 2,174 dwellings, even with density increases. This necessitates new allocations beyond existing urban areas, and, given the proximity of Green Belt land to St Albans, it is evident that some boundary adjustments will be unavoidable.
2.35 The exact impact on the Green Belt varies by site. The Stage 2 Green Belt Review assessed 182 sub-areas, rating each based on its role within the broader Green Belt framework. The review found 54 areas that contribute less significantly to the purposes of the Green Belt, recommending them for further review. This suggests that limited, carefully planned adjustments could accommodate growth without compromising the essential functions of the Green Belt.
Site-Specific Considerations
2.36 Sub-Area SA-75, which includes Land at Sandpit Lane, has been assessed based on NPPF Green Belt purposes. Although SA-75 as a whole scored as making a "strong" Green Belt contribution, this assessment lacks the fine-grain analysis necessary to evaluate the potential of smaller parcels within the sub-area. Given the Government's proposed reforms to the NPPF and a potential shift to a higher housing requirement under the new Standard Method, we strongly suggest that the Council consider this finer-grained analysis specific to St Albans to identify specific, sustainable opportunities for growth in this location.
2.37 While the sub-area as a whole was not recommended for further consideration, smaller parcels such as Land at Sandpit Lane are not considered to perform as strongly across all purposes as the wider area in which they sit. In such cases, a detailed assessment could reveal that these parcels, which possess natural containment through vegetation and existing development, may contribute to sustainable growth while having minimal impact on the strategic Green Belt.
2.38 It is also worth noting that certain allocations, such as Broad Location 1 (B1) north of St Albans, have been proposed despite strong Green Belt contributions from sub-areas SA-63-A, SA-66, and SA-69. Similarly, Bedmond Lane (M3) is proposed to be released from the Green Belt despite a strong Green Belt rating. Such decisions indicate a precedent for releasing small parcels within larger sub-areas where natural containment exists and broader NPPF purposes are minimally affected.
2.39 In light of these observations, we recommend a finer-grain assessment of sites within SA-75, including Land at Sandpit Lane. This targeted review would enable the Council to identify opportunities for sustainable growth that align with proposed NPPF reforms, considering both the District's anticipated housing needs and the Government's potential higher requirement. Detailed site-level analysis would ensure the Local Plan is robust, responsive, and adaptable to both current and emerging needs, balancing growth with Green Belt preservation
2.40 In summary, Strategic Policy SP3 is largely consistent with the NPPF's soundness tests, addressing housing needs and infrastructure planning while taking a measured approach to Green Belt adjustments. To further strengthen the Local Plan's compliance with NPPF soundness criteria, we recommend:
· Extending the plan period to at least 2042 to cover a full 15-year period post-adoption.
· Conducting finer-grained assessments within identified sub-areas, such as SA-75, to pinpoint smaller parcels for sustainable growth.

· Incorporating flexibility within SP3's housing and Green Belt strategies—through reserve sites, phased releases, or housing supply buffers—to support deliverability and adaptability over the plan period.
2.41 By refining these elements, SP3 will better align with national policy requirements and ensure the Local Plan remains robust, adaptable, and responsive to both current and projected housing needs.

2 STRATEGIC POLICIES

Strategic Policy SP3 – Land and the Green Belt
2.24 Strategic Policy SP3 establishes a framework to meet St Albans District's critical housing and employment needs over a 16.5-year period, from October 2024 to March 2041. The policy emphasizes aligning this growth with essential infrastructure while safeguarding the Green Belt. However, SP3 recognizes that limited Green Belt adjustments may be necessary to meet this housing need.
2.25 Our response to Policy SP3 centres on two primary areas: the District's housing need and the principles guiding potential Green Belt adjustments, particularly around St Albans.

Housing Need
2.26 Policy SP3 currently anticipates a need for 14,603 homes in the District by 2041, based on an annual requirement of 885 dwellings calculated using the Standard Method. This baseline, however, must be considered as a minimum requirement.
The NPPF requires use of the Standard Method to determine minimum housing needs, which we support. Yet, we stress that this should be seen as a starting point rather than an absolute cap on development, as discussed in our response to Policy SP1.
To align fully with national planning policy, the Local Plan should extend the plan period to ensure it covers the 15-year minimum requirement from adoption. Extending this timeline would necessitate an additional 885 homes, further strengthening the Local Plan's commitment to fulfilling housing demands.

Green Belt
2.27 The acknowledgment of necessary Green Belt adjustments, particularly in and around St Albans, is both pragmatic and essential. The approach to assessing potential Green Belt releases has relied upon the Arup Green Belt Review, with specific insights provided in the Stage 2 Final Report (June 2023). However, we note that, as part of the Local Plan, a finer-grain assessment of individual sites within certain sub-areas was not undertaken. In light of proposed NPPF reforms and the potential for higher housing needs based on a revised Standard Method, we recommend that a finer grain assessment of parcels in and around St Albans City could help to identify sites within sub-parcels in and around St Albans City that make a lesser contribution to the purposes of the Green Belt than their parent sub-areas.
2.28 According to paragraph 145 of the NPPF, revising Green Belt boundaries through a Local Plan can be justified if exceptional circumstances exist. This includes establishing that all other potential means of meeting development needs have been exhausted prior to considering Green Belt land (per NPPF paragraphs 145 and 146).
2.29 While "exceptional circumstances" are not explicitly defined in the NPPF, case law, including Calverton and Compton, clarifies factors that may constitute exceptional circumstances, such as:
· The scale of identified development needs,
· Constraints on sustainable land supply,
· Limitations on achieving sustainable development without Green Belt adjustments,
· The scale of potential Green Belt harm, and
· Opportunities to mitigate this harm.
2.30 In St Albans City & District, the demand for housing is acute. This is evidenced by high Standard Method-derived needs, even with a cap in place to support early deliverability. If this cap were removed, the annual requirement would rise to 1,169 dwellings, underscoring the true level of demand within the District.
2.31 Beyond overall housing need, there is a pronounced shortfall in affordable housing.

2.32 The Local Plan's evidence base includes the South West Hertfordshire Local Housing Needs Assessment (2020), which highlights the need for 443 affordable dwellings annually in St Albans City.

This represents 50% of the Standard Method's minimum annual figure, underscoring the importance of enabling housing growth near St Albans to meet these pressing demands.
2.33 With limited development opportunities within the District's urban areas, the HELAA (2021) and Urban Capacity Study (2022) reveal significant constraints on available land.
2.34 The UCS estimates that existing settlement boundaries could yield just 2,174 dwellings, even with density increases. This necessitates new allocations beyond existing urban areas, and, given the proximity of Green Belt land to St Albans City, it is evident that some boundary adjustments will be unavoidable.
2.35 The exact impact on the Green Belt varies by site. The Stage 2 Green Belt Review assessed 182 sub-areas, rating each based on its role within the broader Green Belt framework. The review found 54 areas that contribute less significantly to the purposes of the Green Belt, recommending them for further review. This suggests that limited, carefully planned adjustments could accommodate growth without compromising the essential functions of the Green Belt.

**Site-Specific Considerations**
2.36 Arup conducted a Stage 2 Green Belt Review to support the evidence base for the new Regulation 18 Local Plan. The primary area of the Site lies within sub-area parcel SA-59. However, the southwest corner of the Site, which adjoins Redbourn Road, is not within a designated sub-area and was therefore not assessed in the Stage 2 review.
2.37 The Stage 2 Green Belt Review concludes that Parcel SA-59 plays a key role within Strategic Parcel 23, as assessed in the Stage 1 Review, suggesting that releasing SA-59 from the Green Belt would negatively impact the surrounding Green Belt's integrity. Specifically, the review states: "The sub-area [Parcel SA-59] does not adjoin any other sub-areas; but adjoins wider Green Belt to the north, south, and west. The removal of the sub-area in isolation is likely to alter the performance of the wider Green Belt as it would constitute an irregular spread of the large built-up area, lacking recognisable and permanent features to prevent further onward sprawl."
2.38 It should be noted that the Green Belt review has not assessed the Site as a whole. The review also does not consider that the inclusion of physical, landscape-led boundaries could be incorporated into a development scheme to prevent sprawl.

2.39 The NPPF emphasizes the need to promote sustainable development patterns when reviewing Green Belt boundaries (paragraph 142) and mandates that boundaries be "clearly defined, using physical features that are readily recognisable and likely to be permanent" (paragraph 143).

2.40 The Vision Statement for the Site illustrates that it is located in a highly sustainable area, adjacent to St Albans City and well-connected to services and amenities. It outlines a new, defensible Green Belt boundary through strategic landscape features. For example:

- Enhanced Boundary Planting: Existing vegetation along the north and northwest of the Site would be reinforced, taking advantage of the existing separation created by Batchwood Golf Course.
- New Strategic Planting: Additional planting would form a permanent edge along the Site's southwest and southern boundaries.
- Historic Hedgerow Reinstatement: A historic hedgerow would be reinstated from the northeast to southwest, creating further distinction where Redbourn Road meets Graden House Lane.

2.41 The new Local Plan should allocate enough land to exceed minimum housing targets, given SADC's record of under-delivery of both market and affordable housing. This Site's removal from the Green Belt offers an opportunity to add capacity and meet housing needs sustainably in line with the spatial strategy. While the Plan suggests a minimum density of 40 dwellings per hectare for all site types, this density may be challenging on some sites due to other requirements, including Suitable Alternative Natural Greenspace (SANG), open space, and biodiversity net gain.

2.42 Removing this Site from the Green Belt aligns with the spatial strategy and would ensure that housing requirements are met. It would also allow for the creation of a high-quality neighbourhood in one of the district's least sensitive Green Belt locations, without compromising the Green Belt's wider purposes or effectiveness. This supports sustainable development patterns and focuses new housing in St Albans City, identified as a Tier 1 settlement for development concentration during the plan period.

[Please see attached appendices]

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We consider it would be of benefit to discuss the potential need for modifications as set out within our representations with the Council, Examining Inspector(s), and other stakeholders in the hearing sessions.

## 366 - Chrissie Chadney

Submission Number: 366 Submission Date: 10/11/24 09:00

Respondent: Company/Organisation: Name: Chrissie Chadney

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I have been a resident in Wheathampstead for over forty years and read the proposed District Plan with interest. Whilst there are some good ideas in it, there are a number of things which give me concern. I have read the WDPS response and concur with it fully, but have a few additional things to say here.

Environmental and Green Belt Concerns: I am particularly troubled by the potential environmental impact this plan could have on our Metropolitan Green Belt, of which over 81% of the district is comprised. The proposed development sites around Wheathampstead are all located on Green Belt land, contrary to the guidelines set by the National Planning Policy Framework which allows for development restrictions to protect such areas. The Green Belt Review by Ove Arup & Partners underscores the importance of these areas in preventing urban sprawl, which must be preserved.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Conclusion: I firmly stand with the WDPS in urging a comprehensive reevaluation of the Draft Local Plan. It is essential that the plan not only reflects realistic population projections but also prioritizes environmental conservation, sustainable development, and the enhancement of local services and infrastructure. We need a balanced, forward-thinking approach that truly serves the interests and needs of all of the St Albans District's residents.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Chadney_C_[R].pdf

## 367 - Ms Julie Bell

Submission Number: 367 Submission Date: 10/11/24 09:00

Respondent: Company/Organisation: Name: Ms Julie Bell

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Environmental and Green Belt Concerns:**
I am deeply concerned about the adverse effects this plan may have on our Metropolitan Green Belt, which encompasses over 81% of the district. The plan proposes development on Green Belt land around Wheathampstead, which contravenes the protective measures stipulated in the National Planning Policy Framework. The significance of these Green Belt areas in curbing urban sprawl has been underscored by the Green Belt Review conducted by Ove Arup & Partners and must be preserved.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion:**
I stand firmly with the WDPS in calling for a thorough reevaluation of the Draft Local Plan. The plan must accurately reflect our realistic population growth projections and prioritize environmental protection, sustainable development, and the improvement of local services and infrastructure. A balanced and visionary approach is required to genuinely meet the needs and interests of the residents of the St Albans District.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 370 - Diane Black

Submission Number: 370 Submission Date: 09/11/24 09:00

Respondent: Company/Organisation: Wheathampstead District Preservation Society Name: Diane Black

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**WDPS comments on St Albans City and District Council Draft Local Plan**

Wheathampstead and District Preservation Society (WDPS) has approximately 400 households as members, and we therefore speak for around 15% of the population of the Wheathampstead area.

**Population Growth Projections**

The plan currently assumes that a 26% increase in the number of dwellings is required in the District, 14,603 new houses in total. Using the average number of people per household of 2.43 this equates to a population increase of 23%.

The Office for National Statistics projects a 0.6% growth in population of St Albans District from 2024 to 2043 with the main growth coming from the 65+ age range. Therefore, there is no justification for the target of 14,603 new houses.

We appreciate there is requirement across the UK for additional housing but there seems to be a completely disproportionate allocation given to St Albans City and District.

There is limited provision for additional employment in the district and therefore any population increase of this scale will mean people having to travel outside the district to work, adversely impacting the environment and putting additional pressure on a transport network already at breaking point. Over 81% of the district is also covered by Metropolitan Green Belt which needs to be protected.

We believe that the Council should challenge the Governments ‘Standard Method’ for calculating local housing needs as there is no justification given their own population growth projections for the district and the adverse impact the proposed plan will inevitably have on the environment, local services and facilities and the Metropolitan Green Belt.

**Green Belt Protection**

All the sites for development that are proposed around Wheathampstead would be on Green Belt land. The protection of the Green Belt should be a major concern for the Council, but there is little evidence of this throughout the Plan.

The Council has failed to take account of the National Planning Policy Framework (NPPF) as revised in July 2021, paragraph 11, footnote 7. This permits local planning authorities to restrict the scale of development due to planning constraints including protection of Green Belt and other designated areas and sites.

The proposed development at Amwell Top Field (M9) is within the Green Belt, which is designed to reduce the impact of existing development on the character of the Green Belt. This reduction of impact would be lost as a result of this development.

The St Albans Stage 2 Green Belt Review completed by Ove Arup & Partners in 2023 concluded that the Green Belt around Wheathampstead contributes significantly to purpose 4 of the Green Belt, namely, to safeguard the countryside from encroachment. Only one of the Wheathampstead sites proposed for development in the Plan, the area south of Hilldyke Road, is identified by Arup

as one of the areas in the District that contributes least to the Green Belt purposes. The need to provide affordable housing should not be seen as a justification for building on the Green Belt, as the average house price at the proposed sites would almost certainly be beyond the means of those for whom affordable housing is designed.

Preventing coalescence is also a critical element of the Green Belt policies so it is essential that the Local Plan prevents Wheathampstead coalescing with Harpenden along the Lower Luton Road and Harpenden Rd/Wheathampstead Rd.

Equally important is the protection of distinct communities in discrete areas within the Parish of Wheathampstead, such as The Folly, Lea Valley Estate, Amwell, and these must continue to be protected by current Green Belt policies.

We support the Green Network Vision and the creation of Green Corridors that are shown as part of the Hemel Garden Communities initiative and we would like to see similar Green Corridors allocated around Wheathampstead to provide safe links to neighbouring settlements. Wheathampstead Parish Council recently formed an “Inclusive Wheathampstead Working Group” with an initial focus on Accessibility. Green Corridors incorporating Safe Cycle Routes would also provide a safe route for Mobility Scooter users to reach nearby settlements which is important for mental and physical health and other activities.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Summary**

Considering the comments above, we urge the council to revisit the draft Local Plan, challenge the Government’s Standard Method for calculating housing needs and produce a more equitable balanced plan that serves the needs of the St Albans District residents. We would like to see more detailed planning which includes funding allocation and addresses key issues on exactly how the plan is going to meet climate change targets, deal with extreme weather events, increase biodiversity by 10%, protect the Green Belt, improve transport networks including cycleways, improve water networks and prevent pollution of our rivers, improve services and facilities and protect secondary school placements.

## LG1 - Broad Locations

### 15 - Trans Link London Limited

Submission Number: 15 Submission Date: 18/10/24 12:13

Respondent: Company/Organisation: PJB Planning Name: Peter Biggs

On Behalf Of Company/Organisation: Trans Link London Limited Name:

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraph 3.29 refers to Broad Location are considered to be large developments of 250 or more homes (or equivalent of employment use). Policy LG1 then provides criteria that the development should comply with. In particular, criteria l. requires that it is demonstrated how proposals integrate with and where appropriate seeks to improve the existing transport network, including public transport services upgrades/improvements.

Whilst criteria for Broad Locations set out by Policy LG1 are supported, it is considered that the definition for Broad Locations set out in paragraph 3.29, should be widened to include situations where the cumulative total of a number of parcels of housing within the same locality would provide for 250 or more homes.

This approach could then be applied to the 405 unit proposed site allocation west of London Colney (south of Napsbury Park Estate) and proposed additional 200 unit to the north of Napsbury Park Estate (Parcel 515), which would assist with promoting and providing a new railway station on the Midland Main line on land north of Napsbury Park Estate. This would therefore comply with criteria l. of Policy LG1 and provide significant infrastructure improvements and provision of a sustainable mode of transport for residents of the new development, Napsbury Park Estate and London Colney.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Paragraph 3.29 and Policy LG1 should be widen the definition of Broad Location to include situations where the cumulative total of a number of parcels of development/housing delivery within the same locality would provide for 250 or more homes and potential for significant infrastructure improvements.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To scrutinise the Council approach to defining Broad Locations and to ensure that the sustainability credentials and objectives of Policy LG1 are achieved.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**83 - Affinity Water**

Submission Number: 83 Submission Date: 06/11/24 09:00
Respondent: Company/Organisation: Name: Lita Khazaka
On Behalf Of Company/Organisation: Name: Affinity Water

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Affinity Water broadly supports the council's overall approach to addressing the effects of climate change as it relates to water use. Policy SP2 provides an overall approach and Policy CE1 – Promoting Sustainable Design, Construction and Building Efficiency - seeks to introduce the optional standards under the Building Regulations (Part G) to reduce water consumption. Affinity Water specifically supports the use of a 110 litre per person per day standard consistent with the standard adopted in the London Plan 2021. The council's approach is consistent with the evidence on likely future water stress produced by the Environment Agency and our own research in our Water Resources Management Plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Draft Local Plan approach to water conservation would be improved and made more effective if were to set out how the council will ensure "greywater recycling and storage facilities" are delivered in all major developments as well as in Broad Locations (Policy LG1 – Broad Locations and Policies LG2, LG3 and LG4 which cover the Hemel Garden Communities project as well as other site allocations in Appendix 1) to go further than "water management" and to embrace "water conservation" too. The council is also invited to make specific reference to water conservation in the various design policies in the Draft Local Plan (for example, Policy DES1 – Design of New Development and Policy DES7 – Building Servicing). That way, water conservation and broader sustainability principles would be integrated into the design process from the outset in the same way that all new development is likely to have to design in and incorporate biodiversity net gain when the relevant parts of the Environment Act 2021 come into force.

Other councils are proposing more precise ways of directing developers to address the need to use water resources more efficiently. For example, the emerging Tower Hamlets Local Plan Policy CG6 specifically requires that: *All new major residential and non-residential development proposals must install water supply and drainage pipework suitable for the separate collection of rain, grey, and foul water as well as the distribution of non-potable water throughout the development from and to all relevant fitments. All major residential and non-residential refurbishment and change of use should aim to retrofit rain and greywater recycling systems.*

Affinity Water further urges the council to ensure that the development plan policy relating to water conservation is applied in all planning applications approved after the Local Plan's adoption so that it can be applied. This is because the 110 litre per person per day standard can only be currently applied at the Building Regulations stage of construction if it is included as a condition of the grant of planning permission.

Finally, it is suggested that the council include an appropriate measure on how the Local Plan will promote water conservation that can be monitored in future Authority Monitoring Reports. This could cover, for example, the number of major developments with greywater recycling and storage facilities or the number of planning permissions for new housing that have a planning condition that will secure the 110 litre per person per day water target. This would have wider benefits for the council as it seeks to articulate further its local response to the Climate Emergency. Table 3 (in attachment) identifies the defects in the policy relative to the NPPF's tests of soundness.

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Hemel Garden Communities (HGC) programme is at a very early stage in its concept. 11,000 new houses is a huge project yet there is no substantial evidence to show it is viable and deliverable. It is all on greenbelt land NOT recommended by the ARUP green belt review for development. The land is in the Chiltern Hills and the northern parts are adjacent to the National Landscape which should be protected. It is high quality agricultural land, grade 2 and 3a, which should be reserved for our food security. HGC is not served well by public transport. The four closest rail stations are all several miles away and the bus services are currently poor. The HGC programme is over-reliant on people walking and cycling, with little private parking being made available or new main roads being provided. This would require a huge modal shift which would be difficult to achieve in the time scale. In this respect, HGC a very risky social experiment.The HGC is a long way from the Hemel town centre so the development does not connect well with the rest of Hemel. Over a third of St Albans District's new housing is proposed at HGC which does not connect well with the rest of the District. The Nickey Line is enthusiastically being put forward as a significant cycle and footpath linking Hemel to Harpenden via Redbourn but currently this route is not fit for purpose. HGC might seem great on paper but the reality of building a new town onto to an existing new town is not good spatial planning.

The site at West Redbourn (B3) has no proper access. The proposed access points are from existing cul-de-sacs and country lanes, and traffic would have to travel across Redbourn Common. This would have a big impact on the existing community.

South of Harpenden Lane, Redbourn (LG4) is mostly a flood plain. This is noted but further work needs to done on the impact new development would have on the existing development. More work needs to be done on the affect development would have on the rare chalk stream that flow through Redbourn, i.e. the River Ver and the River Red.

The broad sites in the Local Plan are proposed on over 700 hectares of greenbelt in total, of which over 500 were not recommended by ARUP for consideration in their green belt review. Half of the SADC green belt sites are in the HGC area, which is a big loss of greenbelt in one area. If HGC goes ahead it would be urban sprawl and lead to coalesence between Redbourn and Hemel Hempstead. It has been asserted that the chosen green belt sites meet the 'exceptional circumstances' criteria for building on the green belt by dint of the need for housing and by building next to existing settlements. However this has not been demonstrated in a way that overcomes all the problems with the HGC programme and the intinsic difficulties of the sites in Redbourn village. The draft Local Plan cannot be considered legal and sound.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

HGC and West Redbourn should not be included in the Local Plan. If they are, much more work needs to be done on the Infrastructure Delivery Plan. A site at NE Redbourn owned by the Lawes Agricultural Trust should be considered instead as it would integrate with Redbourn village much better.

Generally, development should be spread more evenly around the District as this would better meet the needs of St Albans District residents. The lack of public transport and inadequate roads has to be resolved. Maybe the Nickey Line could be a tram line?

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

I am very familiar with the draft Local Plan and have a good working knowledge of planning issues in general. I could add a lot of local knowledge to proceedings particularly the area of the Hemel Gardens Community programme and the sites in Redbourn Village. I am well informed about the District as a whole.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

This policy as currently written is not consistent with national policy, thus enabling the delivery of sustainable development. The below suggested wording is intended to address this.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is**

**incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is requested that the following amendments are made:

- removing reference to 'semi-mature' and instead require *'plant at least 1 tree for each dwelling*…from both **Policy LG1 criterion (n)** and **LG4 criterion (l)**

- remove criterion v) as it may not be applicable in all instances to make a development acceptable. This point would be better made within an Infrastructure Delivery Plan.

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

While no comment is made on the Broad Locations for development, the policy wording in criteria a, f, l, o and u is is welcomed. In particular, criterion o requires the development to make provision for new or contributions in relation to sports facilities which would accord with the Council's evidence base for sport (Playing Pitch Strategy) and paragraph 102 of the NPPF. Criteria f, l, and u would support the development being designed to encourage physical activity which would accord with Government policy in paragraph 96(c) of the NPPF and Sport England's 'Uniting the Movement' Strategy https://www.sportengland.org/about-us/uniting-movement.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

***Headline***

The term 'Broad Location' has specific meaning in the NPPF (paragraphs 23, 69) and the use of the term in the Local Plan for sites over 250 homes is misleading/unhelpful.

***Discussion***

*NPPF: 23 states that "Broad locations for development should be indicated on a key diagram, and land use designations and allocations identified on a policies map."*

*NPPF:69 (b) refers* to "*specific, developable sites or broad locations for growth, for the subsequent years 6-10 and, where possible, for years 11-15 of the remaining plan period."*

In NPPF terms, a broad location is therefore not a 'site/land use designation' to be shown on the policies map, only on the key diagram. The Plan regards its broad locations as 'sites'.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Council should select another term (such as 'strategic site') so the Plan is consistent with the 'broad location' terminology of the NPPF.

### 172 - Mr and Mrs Robert and Karen Choppin

Submission Number: 172 Submission Date: 07/11/24 14:30

Respondent: Company/Organisation: Studio LK Name: Lita Khazaka

On Behalf Of Company/Organisation: Name: Mr and Mrs Robert and Karen Choppin

Comment Number: 4

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

4.1. Studio LK observes other problems in the council's approach towards the provision of housing which further confirms its views that the housing target should be increased and more sites brought forward.

4.2. Studio LK's comments on Policy HOU 1 below are offered on the basis of the substantial amount of site appraisal and design the company does on sites across the South East of England.

4.3. At Policy HOU 1 – Housing Mix, the one size approach to housing mix on all schemes of 10 or more homes is too restrictive. More flexibility in mix would be appropriate especially for an ageing population and in the context of a continued forecast drop in mean household size over the lifetime of the Draft Local Plan. For example, a flatted scheme in the centre of St Albans or Harpenden is likely to be more suitable for smaller and older households (including downsizers) than a new build scheme on an edge of centre location such as the Smallford Stables site (Site Allocation PX). Studio LK suggests that the council adopt the same flexible approach to housing mix as it does when seeking to apply car parking standards in different parts of the district.

4.4. Policy HOU 6 – Gypsies, Travellers and Travelling Show People has more serious deficiencies. The evidence base the council has commissioned (the GTAA) directs the council to plan for 80 households who meet the "planning definition" of gypsy or traveller, a further 19 pitches for undetermined households and seven plots for travelling showpeople. However, the Draft Local Plan policy only allocates between 30 and 40 pitches for travellers on two site allocations and none for travelling showpeople. The council does not have an established track record of approving new sites for gypsies and travellers in the Green Belt or other windfall sites to make up the shortfall. The council's own evidence base confirms that neighbouring authorities will not take up the shortfall.

4.5. In the context of very high land prices and restrictive Green Belt policies, it is submitted that this draft Local Plan will be found unsound on this ground alone. Potentially the council may also be in breach of its Public Sector Equality Duty by not planning for the needs of this section of the population and, thus, its plan found to be legally defective too.

4.6. The council could easily address this defect by allocating the shortfall of pitches and plots on all of its Broad Location (Policy LG1) site allocations (that is, sites of more than 250 homes), an established practice across the Home Counties in recently adopted Local Plans. This would theoretically result in a reduction in overall "bricks and mortar" housing on these proposed site allocations but it further reinforces our client's view that other sites are needed for conventional family housing to meet this widening shortfall, especially those with easy access to existing social infrastructure such as the Smallford Stables site.

4.7. Studio LK therefore offers Smallford Stables (Site Allocation PX) on this basis.

**Hemel Garden Communities (HGC)**

The allocation of four housing and employment sites on the northern and eastern edge of Hemel Hempstead is a significant extension to the town that will deliver much needed housing in both Dacorum Borough and St Albans district, it is however inconsistent with the provision of sustainable development for St Albans. Allocating sites on the urban edge of Hemel Hempstead will contribute numerically to the housing requirements of St Albans but it does not align with the Local Plans strategic objectives to '*Prioritise and enable the safe and attractive use of active and sustainable means of transport and reduce the need for people to travel'*and '*Promote adaptation to and mitigation of the Climate Emergency'*by reducing carbon emissions. Nor does the allocation of these sites align with the LCWIP[13] long-term objectives of Climate and Sustainability, Clean Air and Healthy Lifestyles. These allocations will introduce more vehicles onto the A414 between Hemel, St Albans and Watford. Increasing congestion and increasing pollution.

In additional, a raft of highways improvement schemes[14] are identified to enable more effective travel by public transport and it is highlighted that there is no way to 'continuously travel by public transport' along the A414 corridor. It is acknowledged that this contributes to increased car use within the District. If the allocations at Hemel Hempstead are detrimental to the strategy of the draft Local Plan, then a more effective strategy would be to allocate sites to the south of St Albans that will generate contributions to the funding of upgrades to the A414/ North Orbital Road, or to the delivery of the Hertfordshire Essex Rapid Transit (HERT)[15] which is planned along the A414.

Furthermore, the allocation of sites in the south of St Albans could contribute to delivering the improvements to walking and cycling infrastructure identified in the LCWIP which would encourage the use of sustainable modes of transport between Hemel Hempstead and St Albans. The improvements identified in the LCWIP include a long-term aspiration for a segregated cycle route along Hemel Hempstead Road and traffic calming measures along King Harry Lane to provide a safer active travel route. These schemes could be part funded through developer contributions from additional sites allocations in the south of St Albans.

The Hemel Garden Communities are located within the 12.6km Recreational Zone of Influence (ZOI) for the Chilterns Beechwoods SAC which is considered within the Delivery Statement and Local Plan policy LG3 – Hemel Garden Communities Growth Areas Place Principles. The Green Network Vision sets out the creation of significant amounts of SANG and green spaces, and we support the delivery of multifunctional green infrastructure provision to facilitate this.

There is however a potential delivery issue associated with SANG at the HGC. The Council is legally required not to issue decisions within the recreational ZOI until appropriate mitigation is secured through a Mitigation Strategy. It is identified in the Habitats Regulations Assessment[16] that '*whilst not all allocations have a SANG strategy identified, those without a SANG solution in place are not to be occupied until at least year 6 of the Local Plan. The Council has confirmed that they are confident that appropriate SANG solutions will be delivered for all of the relevant sites within the Local Plan'*. If insufficient SANG is identified for all the allocations, then the Council will not legally be able to issue decision on applications submitted at HGC.

Another potential delivery issue is the boundary review of the Chilterns National Landscape[17] that is currently being undertaken by Natural England. Although there are no formal timeframes set out for the review, it is expected that a variation order is to be sought from the Secretary of State

in Winter 2025. This could have implications for the housing numbers that can be delivered at the HGC as well as setting back the delivery as the impact of the allocations on the National Landscape are factored into the proposals.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**211 - Miller Homes**

Submission Number: 211 Submission Date: 07/11/24 17:21

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: Miller Homes Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report for details**

**Policy LG1 – Broad Locations**

- Policy LG1 provides a framework for development at all of the proposed Broad Locations. It requires an emphasis on coordination and masterplanning and this emphasis is supported by Miller Homes – a masterplan is appropriate for a development of this size, particularly one involving multiple developers and landowners.

- While no objection is raised to Policy LG1, we do have concerns about the potential for misunderstanding and confusion between the requirements of Policy LG1 and the other policies in the draft Plan that LG1 attempts to summarise. Variations in wording could undermine the Council's policy objectives and make implementation difficult. In addition, some parts of Policy LG1 simply do not need to be there, such as requiring compliance with other policies in the plan (criterion C), SPDs (g) or Neighbourhood Plans (t). We feel it would be clearer to let the substantive policies speak for themselves, rather than trying to summarise the requirements into a single policy for the Broad Locations.
- Policy LG1 contains a number of requirements that have viability implications for new development, such as the requirement for affordable housing, self- or custom-build housing, highway improvements and tree planting. The viability consequences of these aspects are considered in the Council's viability assessment prepared by BNP Paribas, including the specific viability appraisal of the North East Harpenden Broad Location. Section 5.0 of this report outlines our thoughts in respect of the Council's viability appraisal.
- In summary, we consider Policy LG1 to be **legally compliant** and **sound**. **No modifications** are therefore necessary.

## 233 - Central Bedfordshire Council

Submission Number: 233 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Central Bedfordshire Council Name:

Comment Number: 6

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Broad Locations**

In general, we support the allocation of the 'broad locations' for development set out in the draft Plan and we note the proximity of the allocations at North West Harpenden (B7) for 293 residential units and North East Harpenden (B2) for 762 residential units including a school, to Central Bedfordshire. The policies for both North West Harpenden and North East Harpenden commit to a master planning process to be led by the Council. CBC are supportive of this approach as well as the recognition at paragraph 3.32, that 'masterplanning is essential to guide a well-designed development' and that 'a coordinated approach will be required with the District and County Council and other parties to ensure essential infrastructure such as sustainable transport, roads, community facilities, open spaces and schools are provided in a timely manner'.

Given the close proximity to Central Bedfordshire of two of the Broad Locations for growth identified within the draft Local Plan, it is considered that the plan should explicitly identify neighbouring authorities as one of the 'other parties' with whom the Council will engage with as masterplans develop. CBC would welcome further discussions regarding the delivery of both these allocations in due course.

We would also request to be kept informed in relation to any public engagement which takes place as part of this process and would encourage residents and parish councils within Central Bedfordshire within close proximity to the two proposed allocations, to be included in any future engagement.

Central Bedfordshire Council supports the approach to the delivery of Suitable Alternative Natural Greenspace (SANG) and the inclusion of Strategic Policy SP10 – Natural Environment, Biodiversity and Green and Blue Infrastructure, which would apply to any further sites that come forward within St Albans and within the Chilterns Beechwoods Special Area of Conservation Zone of Influence.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Given the close proximity to Central Bedfordshire of two of the Broad Locations for growth identified within the draft Local Plan, it is considered that the plan should explicitly identify neighbouring authorities as one of the 'other parties' with whom the Council will engage with as masterplans develop. CBC would welcome further discussions regarding the delivery of both these allocations in due course.

## 248 - Historic England

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 19

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**LG1- Broad Locations**

We welcome criterion q which requires proposals to be informed by a detailed Heritage Impact Assessment and Archaeological Desk-Based Assessment which address the recommendations of the HIAs prepared in 2024.

**Figure 3.2 Indicative Concept Plan for HGC Growth Areas**

We note that existing farmsteads (many of which include listed buildings) are shown as focal points. It is important to recognise that there will need to be appropriate protection and enhancement of heritage assets through sensitive masterplanning of the site including setbacks, landscaping etc. This requirement should be included in the policy and supporting text.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## 266 - Crest Nicholson Partnerships and Strategic Land

Submission Number: 266 Submission Date: 08/11/24 08:47

Respondent: Company/Organisation: Stantec Name: Sarah Cross

On Behalf Of Company/Organisation: Crest Nicholson Partnerships and Strategic Land Name:

Comment Number: 1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

5.1 Chapter 3 of the Reg 19 DLP sets out policies in relation to the sustainable use of land and the Green Belt.

5.2 The requirements for growth section have been updated to reflect the alteration in housing numbers.

Our comments on this change are as discussed in the above section.

5.3 The categorisation of sites includes Broad Locations at Table 3.1. This includes altered requirements

for each of the Broad Locations, including North East Harpenden. The altered requirements for this Site (B2) now include the addition of a childcare facility. There is no objection to this inclusion.

5.4 The retained requirements for a mixed-use scheme 2 form-entry primary school, green infrastructure,

transport infrastructure and other community infrastructure is supported.

5.5 It is noted the minimum capacity has stayed the same here at 762 dwellings. However, this conflicts

with the Evidence Base and Part B of the Local Plan, including Draft allocation Policy B2, which states a reduced capacity of 738 dwellings. This needs to be clarified and we suggest that the capacity remains in line with the previous figure of 762 dwellings.

1. **i) Policy LG1 –Broad Locations**

5.6 The wording of Policy LG1 has been altered in respect of the Broad Location allocations.

5.7 This section reviews the changes made to this policy in respect of this draft allocation, before moving

on to Part B which sets out the requirements for the Site Allocations in more detail.

5.8 Policy LG1 has been changed as follows (with our comments in ***bold italics*** below):

- At the beginning – containing within brackets *"(or unallocated windfall development at this scale*)"

***There are no comments regarding this inclusion.***

- At a) – the inclusion of "*statutory consultees*" when seeking input on the masterplanned approach to development

***It is not felt this necessarily needs to be included, however there are no objections to this additional wording.***

- At i) – Altered wording so that 3% of self or custom build dwellings are provided, instead of just the land for this provision.

***The clarity that this re-wording provides is welcomed.***

- At k) – altered wording for the provision of housing mix which has removed "*in general conformity with*" the Council's evidence base and replaced with "*including*"

***This change is welcomed as it ensures proposals have regard to the evidence base, but allows for some flexibility for site specific circumstances.***

- At l) – now refers to proposals needing to integrate with, and where appropriate, improve the existing transport network with reference to the LCWIP

***There are no objections to this additional wording.***

- At m) – altered wording to ensure development "*normally retain significant healthy*" trees and "*other important*" landscape features

***This change is welcomed as it changes from retaining all trees to recognising that it should be the important and healthy trees that are retained, alongside important landscape features so that development can be delivered more flexibly. However, we would comment that the word "normally" should be altered to "seek to retain" or similar.***

- At n) – wording changed so that for C2 accommodation 1 semi-mature tree is planted for every 2.5 dwelling equivalent bed space

***There are no objections to this additional wording.***

- At p) – now refers to development being informed by a comprehensive LVIA which addresses the recommendations of the Council's Landscape and Visual Appraisal 2024.

***There are no objections to this additional wording.***

- At q) – this is a new criterion which requires sites listed within Appendix 5 to be informed by a Detailed Heritage Assessment and Archaeology Desk Based Assessment which addresses the recommendations of the Council's Heritage Impact Assessment 2024.

***There are no objections to this additional criterion, providing the types of surveys required to support forthcoming applications is considered on a reasonable basis, subject to the type of development being applied for.***

- At r) – this has changed the wording from "*likely*" landscape impacts to "*identified*" landscape impacts

***This change is welcomed as it clarifies that assessments should be made on identified impacts and not anything else that has not been tested.***

- At s) – altered wording to refer to the use of appropriate "*Community Stewardship and Legacy bodies*" to provide long term management of community facilities and / or open spaces instead of the previous "*Community Partnership Management Organisations*" wording.

***Further clarity on what the re-wording of the Community Body is asking for is welcomed.***

- At u) – this is a new criterion which requires proposals to demonstrate the co-location of community facilities (such as schools, shops, community centres, strategic public open space) in order to reduce the number of trips that residents have to make.

***It is suggested that, as with the other requirements, the wording is updated to include "where feasible" or similar, as due to certain site constraints it may not always be possible to provide all of the community facilities within one place. There must be some flexibility provided to ensure the best possible outcome for masterplanning sites, and at the moment this is worded with no flexibility surrounding this if needed. The policy could incorporate wording so that where this is not possible, it is demonstrated why.***

- At v) – this is a new criterion which requires proposals to "*normally provide*" contributions towards the maintenance and / or upgrade of an existing community hall or village hall nearby, which is secured by appropriate mechanism such as a S106 agreement.

***We comment that the use of the word "normally" is altered to "seek to retain" or similar.***

***We would also question whether this requirement would meet the CIL Regulation tests for sites where a community facility is being sought on site. This policy as currently worded would require contributions towards other facilities in the area, at the same time as providing on site facilities. It may therefore be that the policy wording is altered to something akin to:***

***"Seek to provide contributions towards the maintenance and / or upgrade of an existing community hall or village hall nearby, which is secured by appropriate mechanism such as a S106 agreement, where there are no such facilities proposed on site"***

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

See question 4

## 273 - Hallam Land Management and St Albans School

Submission Number: 273 Submission Date: 08/11/24 09:33

Respondent: Company/Organisation: LRM Planning Name: Mr Owen Jones

On Behalf Of Company/Organisation: Hallam Land Management and St Albans School Name:

Comment Number: 16

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

6.11 Policy LG1 sets out a series of criteria which development within Broad Locations should achieve. Hallam and St Albans School previously provided commentary on the various criteria and how they align with the development proposals for North St Albans. The compatibility of the North St Albans proposals with the policy is not repeated here, however as the scheme has evolved, some further observations are made in light of these criteria.

1. **Make efficient and effective use of the site, with a minimal overall net density of 40 dwellings per hectare; utilising a range of densities that take account of adjacent character, uses and identity.**

This policy position is noted and Hallam and St Albans School acknowledge that this refers to an "overall" net density of 40 dwellings per hectare, allowing for a range of densities to be adopted across the site.

2. **Plant at least 1 semi-mature tree for each dwelling; for C2 accommodation plant 1 semi-mature tree for every 2.5 dwelling equivalent bed spaces.**

Hallam and St Albans School are committed to new tree planting throughout the development, however are concerned that semi-mature trees require more land to establish than young trees which could result in a less efficient use of land within the site.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 241108 St Albans Local Plan Reg 19 response_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Our representations are of strategic importance to the Local Plan and the delivery of our scheme will contribute to its objectives.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

Comment Number: 8

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*Refer to Attached submission letter for whole response and figures.*

**10 Strategic Policy LG1 (Broad Locations)**

10.1 Policy LG1 fails to set out in Policy what Broad Locations are actually being proposed as part of the policy wording. It relies entirely on Part B of the Local Plan (Local Plan Sites). This is particularly confusing for the Hemel Hempstead related Broads Locations given that this area also has two of its own separate policies (LG2 and LG3). We reserve our comments on the Hemel Hempstead related Broad Locations for Policies LG2 and LG3; however please note that they also apply to Policy LG1 as far as those Broad Locations are concerned.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

## 286 - Bloor Homes

Submission Number: 286 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Quod Name: Alex Hamlet

On Behalf Of Company/Organisation: Name: Bloor Homes

Comment Number: 4

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* Yes

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

- **Draft Policy LG1 – Broad Locations**

  3.1 Bloor supports the principle of draft Policy LG1 (Broad Locations) which identifies 12 areas for large urban extensions of 250 or more homes or strategic scale employments and recognises the contributions these locations make to meeting the growth requirements for the District.

  3.2 Bloor has a number of recommendations regarding the detail set out within some of the sub sections of the policy which would facilitate timely delivery.

  ▪ **Part (h) and draft Policy HOU2 – Affordable Housing** - requires 40% of homes as on-site affordable housing. This has been informed by the "BNPPRE Local Plan Viability Report – St Albans DC – September 2024" which sets out in paragraph 6.8 the results of the affordable appraisals for greenfield sites in SADC. Bloor support this policy and its evidence base.

  ▪ **Part (i) and draft Policy HOU5 – Self-Build and Custom Housebuilding** require 3% of the total number of homes as Self-build or Custom Housebuilding. Bloor suggest that the requirement for self-build homes is removed for large urban extensions such as HGC where higher density living is proposed. As a part of the master planning process, and through the use of design codes, various housing densities and typologies will be delivered across HGC. Self-build homes should be delivered through smaller-scale sites which are more likely to be situated in locations that follow the conventional approach to the delivery of self build homes.

  ▪ **Part (j) and draft Policy DES3 – Efficient Use of Land** expects development proposals to achieve 40 net dwellings per hectare. However, this policy must also recognise the open space and private amenity space requirements that need to be delivered on the Site to support the population. The Site is expected to deliver sports provision, SANG, open space, managed woodland and a range of community growing spaces. There are many competing uses on the Site that need to be managed to achieve the Four Pillars that underpin the HGC. It is therefore recommended that the policy is made more flexible so that it is a target rather than a minimum.

▪ **Part (n) and draft Policy NEB1 – Woodland, Trees and Landscape Features** requests that at least 1 semi-mature tree is planted for each dwelling; for C2 accommodation applicants are expected to plant 1 semi-mature tree for every 2.5 dwelling equivalent bed spaces. Bloor welcome this approach in principle and is committed to delivering one tree for each dwelling, however, in certain circumstances it may be more appropriate to plant young trees / saplings. For example, younger trees have resilient root systems that can overcome the stress of being planted faster than larger trees can. It is therefore recommended that the exact nature and type of tree is secured through landscape masterplans and the reference to "semi-mature" is removed.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Please refer to our representation letter which is submitted alongside this form which details proposed modifications to policies and recommended revised wording ...

Proposed modifications to Draft Policies in the Draft Regulation 19 Local Plan (Part A) are set out in Section 3 of the representation....

- **LG1 Part (i) and draft Policy HOU5 – Self-Build and Custom Housebuilding** require 3% of the total number of homes as Self-build or Custom Housebuilding. Bloor suggest that the requirement for self-build homes is removed for large urban extensions such as HGC where higher density living is proposed
- **LG1 Part (j) and draft Policy DES3 – Efficient Use of Land** It is therefore recommended that the policy is made more flexible so that it is a target rather than a minimum.

**288 - Chris Berry**

Submission Number: 288 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: CPRE Hertfordshire Name: Chris Berry

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**The Draft Local Plan is neither legally compliant nor sound, due to its inadequate treatment of the Green Belt**

The treatment of the Green Belt in the Draft Local Plan is inadequate to the extent that it jeopardises the soundness of the Local Plan. For a Local Planning Authority where over 80% of the total land area is covered by a statutory designation affecting future development, the omission of appropriate policy and proposals renders the Local Plan ineffective.

We note the justification provided by the Sustainability Appraisal for the policy options relating to the classification and allocations of sites and locations for development. However, policies relating to the Green Belt are limited to guidance relating to development outcomes in all cases; omitting any positive treatment of the countryside and associated rural activities which may constrain and influence development form and function.

In failing to address the implications of the five purposes of the Green Belt as they relate to the SACD area, the Council fails to plan adequately for its protection and the contribution that it can make to future development options. Paragraph 180 of the National Planning Policy Framework (NPPF) specifies the need to contribute and enhance the local environment by indicating a range of policy options.

Draft Local Plan policies relate only to development within the Green Belt and not its protection and enhancement as required by the NPPF and noted in the Local Plan Objectives. The Draft Local Plan states that the Spatial Strategy is effectively required to deliver housing figures provided by the Standard Method which in turn requires the use of Green Belt.

This is a fundamental misinterpretation of national Green Belt policy and challenge to the soundness of the Draft Local Plan. The Draft Local Plan refers to legal requirements for housing and employment growth (paragraph 3.11) which ignores the Council's discretion to determine housing targets based on up to date information and national policy guidance, as provided in Paragraph 11b) and footnote 7 of the NPPF.

Paragraph 3.16 of the Draft Local Plan also implies, without evidence, that Green Belt protection inhibits development in sustainable locations. This assertion fails to recognise that development is likely to be more sustainable in urban areas than peripheral locations distant from town centres as proposed for Hemel Hempstead and elsewhere.

**Policies are ineffective and inconsistent with national policy, with regard to the Green Belt**

The Draft Local Plan is ineffective in meeting the aim of Policy SP3 "to protect the Green Belt from inappropriate development". The Plan proposes "select Green Belt boundary adjustments in the right areas to provide wider protection of 'the rest of the Green Belt", but without having established the scale of change that is necessary, or justifying the specific boundary changes.

For example, in the case of the SRFI site, the Draft Local Plan does not define a new Green Belt boundary. This is not consistent with national policy and would not be effective in meeting the Council's stated Green Belt objective. Similarly, policy relating to the Hemel Garden Communities appears only to be justified as a cross-boundary proposal without further evidence regarding specific St Albans requirements, and proposed by national Government.

In every case where "Broad Locations" and other smaller sites are proposed for removal from the Green Belt, these proposals are not justified collectively or individually, and are contrary to national policy in the absence of the demonstration of exceptional circumstances as required by the NPPF. Policy LG1 Broad Locations requires 22 criteria to be met for their development, but omits the requirement for the definition and creation of a new defensible permanent boundary for the Green Belt.

Similarly, criteria in Policy LG4 fail to require the creation of a permanent defensible Green Belt boundary for sites removed from the Green Belt, and this is ineffective and contrary to national policy. Subsequent Policies LG5 to LG9 fail to provide supporting evidence, implying very special or exceptional circumstances which are unjustified.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Draft Local Plan should be re-structured to consider the role and function of the largest land use designation in the SACD i.e. the London Metropolitan Green Belt in appropriate detail. The lack of adequate consideration of the implications of this designation for physical development in the future renders the Local Plan unsound.

The total local housing need figure in policies SP1 and SP3 should be treated as a starting point and then be subject to reduction to reflect the application of Green Belt constraints as required by para 11(b) footnote 7 of the NPPF.

The Local Pan should be re-structured to consider the role and function of the largest land use designation in the SACD i.e. the London Metropolitan Green Belt in appropriate detail. The lack of adequate consideration of the implications of this designation for physical development in the future renders the Local Plan unsound in limiting the opportunities and constraints afforded by the land designation.

3. SADC Reg 19 Representation_Form Pigeon_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Pigeon (Hemel Hempstead) Ltd is the freeholder owner of the southern area of draft Site Allocation H1 – North Hemel Hempstead that also forms part of the emerging Hemel Garden Communities.

The representation letter that has been submitted alongside this form details the proposed modifications and revised wording of policies in the draft Local Plan.

Given the pivotal role of draft Site Allocation H1 – North Hemel Hempstead in delivering the Local Plan strategy, and having regard to the nature of these representations, Pigeon (Hemel Hempstead) Ltd respectfully requests the right to appear and be heard at the Local Plan Examination Hearing session(s).

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**303 - Phil Escritt**

Submission Number: 303 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Open Space Society Name: Phil Escritt

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Consultation Need to explicitly refer to the HCC Rights of Way improvement Plan (ROWIP)**

These gaps would be substantially filled by reference to the Herts County Council's Rights of Way improvement Plan (ROWIP). The ROWIP is a statutory requirement of the Countryside and Right of Way Act (CROW) 2000. The Hertfordshire ROWIP is in two parts. The first part, the policy document, is an assessment of the current situation and a statement of action. It is supplemented by a database of "suggestions" for improvements. This database is a living document which is added to over time based on input from councillors, officers and members of the public.

The St Albans Access Forum which comprises representatives of walking, cycling and horse riding organisations has systematically reviewed the situation in the district's parishes and submitted suggestions which have been included in the ROWIP database. The ROWIP suggestions now cover a large proportion of the selected sites in this plan.

The HCC ROWIP is a daughter document of the Local Transport Plan LTP4 and is therefore implicitly covered by paragraph a) of strategic policy SP8, Transport Strategy which requires alignment with the HCC "Local Transport Plan (LTP) and other evidence and supporting documents, as relevant."

The Local Plan will be made more effective and proportionate by explicitly referencing the ROWIP in the following policies.

- Policy LG1 – Broad Locations. In paragraph l) after "LCWIP" add "and ROWIP"
- Policy LG4 – Large, Medium and Small Sites. In paragraph j) after "LCWIP" add "and ROWIP"
- Policy SP8 – Transport Strategy. In paragraph a) after "supporting documents as relevant" add "e.g the ROWIP"
- Policy TRA1 – Transport Considerations for New Development. In paragraph b) sub paragraph x) after "LCWIP" add "and ROWIP"

The Society strongly recommends that the district council should adopt these changes.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Local Plan will be made more effective and proportionate by explicitly referencing the ROWIP in the following policies.

- Policy LG1 – Broad Locations. In paragraph l) after "LCWIP" add "and ROWIP"

### 315 - Bloor Homes and Department of Health & Social Care

Submission Number: 315 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Sarah Hamilton-Foyn

On Behalf Of Company/Organisation: Bloor Homes and Department of Health & Social Care Name:

Comment Number: 8

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Policy LG1 –Broad Locations**

Policy LG1 applies to all the broad locations, i.e., sites of 250 dwellings plus, while Policy LG4 sets out the requirements for large, medium and small sites.

The Policy requires a minimum overall net density of 40 dwellings per hectare.

Policy LG1 applies to 8 Broad Locations. It is not clear how Policy LG1 can be effective, it remains to be justified when all the evidence has been prepared to support the proposed allocations.

The PPG Plan Making (October 2021) states:

***"Where sites are proposed for allocation, sufficient detail should be given to provide clarity to developers, local communities and other interested parties about the nature and scale of development. Where a local plan contains both strategic and non-strategic policies, the non-strategic policies should be clearly distinguished from the strategic policies". Paragraph: 002 Reference ID: 61-002-20190315***

***Revision date: 15 03 2019***

It is considered that Part B Local Plan Sites, which are included in a separate document should be absorbed into one document to form the Plan and that individual policies should be included for each of the proposed allocations in order to provide clarity for developers and local communities etc in terms of what is proposed and expected in terms of contributions for each of the proposed sites.

The NPPF is clear on what is expected in local plans in terms of strategic and non-strategic policies - this should be reflected in the Local Plan for St Albans – i.e. the Broad Locations are the allocated strategic sites and there each requires a strategic policy to be included in the Plan.

Since the Reg 18 version of the policy was prepared further clauses have been included in the policy – with references to the need for sites to be informed by an LVIA, Heritage Impact Assessment and Archaeological Desk -Based Assessment as such the policy is duplicating what should already be included in the Council's Validation Check list.

There are references to other Council documents such as the District Strategic Sites Design Guidance, and for proposals to be in general conformity with the Council's latest evidence base. It is not clear how this policy is capable of being implemented and furthermore monitored against the objectives of the Plan.

As outlined in relation to Table 3.1 and Part B Local Plan sites an objection is made to the Broad Location of Harper Lane, Radlett for 274 dwellings (mixed use, green infrastructure and transport infrastructure).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

In order for the plan to be positively prepared (paragraph 16 of the NPPF and paragraph 35 to be effective and therefore sound), policies need to be clearly written and unambiguous, so it is evident how a decision maker should react to development proposals.

As such Policy LG1 as drafted is misleading, the broad locations are in effect strategic sites and as such the Plan should include a policy for each of the strategic sites in order to provide clarity for developers and local communities etc in terms of what is proposed and expected in terms of contributions for each of the proposed sites.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Representation_Form Policy LG1 Broad Locations FINAL 5_11_2024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

The issues raised are fundamental to the preparation and soundness of the Local Plan.

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**LG1 –Broad locations**

The policy is unsound as it lacks clarity required by paragraph 16 of the NPPF.

1. It is not clear why the council is still referring to these sites as broad locations for development. Broad locations are areas where housing development is considered feasible and will be encouraged, but where specific sites cannot yet be identified. What is clear from the local pan however is that it has identified specific sites for the delivery of development. Even the larger allocations are sites with clear expectations as to where development will come forward and is inconsistent as to what a broad location actually is planning terms. It would also appear to be inconsistent with the plan itself with each of the allocations in part B of the local plan defined as a broad location being referred to as sites. Whilst not a fundamental issue it is confusing and gives the impression that the council is still to identify specific sites at these locations which does not appear to be the case. The Council should amend this and refer to these as strategic allocations.

## 329 - Mr Russell Crow

Submission Number: 329 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Mr Peter Atkin

On Behalf Of Company/Organisation: Richborough Estates Name: Mr Russell Crow

Comment Number: 12

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As per comments made above, it is recommended that the term 'Broad Location' is replaced with 'Large Urban Extension'. LG1 as a whole requires amendment to confirm that the sites that are referred to are strategic allocations, as these are all specific sites identified by SADC with clear certainty in the delivery of development.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Proposed remedy: Replace the term 'Broad Location' with 'Large Urban Extension' and amend the policy and supporting text accordingly.

Richborough is concerned that previous representations made in respect of this policy do not appear to have been considered. The policy remains unsound and should be subject to modifications to remove criteria that are duplications of other policy requirements, and criteria that are ineffective.

Proposed remedy: LG1 requires modification to ensure a sound policy is presented to Inspectors. Amendments should be made as follows:

- Criterion d) seeks 'excellence in design, energy efficiency and water management'. 'Excellence' is a subjective word and is not a defined or measurable target for Applicants to address or respond to. Excellence should be amended to 'high quality' to ensure consistency with the NPPF. The reference to energy efficiency and water management conflicts with the energy efficiency and sustainable design measures required by policies CE1 – 3. Thus, this wording is not appropriate to include in criterion d) and should be deleted.
- In the context of comments made earlier to SP1, criterion e) 'Provide appropriate renewable energy production and supply mechanisms' is unnecessary and can be deleted.
- Criterion g) requires Broad Locations to come forward in accordance with a Masterplan or Development Brief. The draft Local Plan does not identify which Broad Location allocations need to come forward in accordance with a Masterplan or Development Brief at the development management stage of the planning process. Clarity on this issue is required.

Regard also needs to be had in the policy of existing local design guidance, such as the Redbourn Design Guidelines and Codes which supports the Redbourn Neighbourhood Plan (made January 2023) to ensure duplicated work is not sought or conflicting requirements established.

- Criterion r) states that Broad Locations must establish 'an appropriate Community Stewardship and Legacy body with sufficient assets to provide sustainable management of community facilities and open spaces'. It is contended that setting up such a body goes beyond what is a reasonable and practical expectation in planning terms. The co ordination of such a body may not be possible if there is limited local interest and its funding may not be viable. Furthermore, there is no clarification in the Local Plan or its evidence base as to how such a body would function and what funding expectations would entail.
- The requirement in criterion i) of 3% self-build and custom housebuilding provision does not appear to be supported by appropriate evidence. Nonetheless, this repeats the requirement of Policy HOU5 and should be deleted.
- Other criteria of the LG1 are not supported by published evidence. For example, n) requires allocations to deliver x1 new semi-mature tree per new dwelling provided. This requirement which an allocation 'must' provide is not based on any evidenced justification and it is also contended that complying with this requirement could potentially conflict with a site's character or landscaping strategy at the delivery stage and could ultimately affect anticipated site yields. Criterion n) cannot be rigidly applied in all cases and should be deleted; this matter is dealt with in any event through NEB1 and does not need to be repeated.
- Criterion u) requires the 'co-location of community facilities'. This will not be relevant to all strategic sites; the delivery of community facilities will be dependent on a variety of factors. This criterion should be amended to clarify which strategic sites this requirement will be relevant for, otherwise the policy is ineffective and does not provide sufficient clarity.
- Criterion v) 'Normally provide contributions towards the maintenance and / or upgrade of an existing community hall or village hall nearby…' is not an appropriate policy requirement. Again, this requirement will not be relevant to all strategic sites, and the matter of financial contributions and obligations is most appropriately considered at the development management stage, where the mitigation required to address impacts of development can be considered fully with regard to appropriate evidence such as the Infrastructure Delivery Plan, ensuring that appropriate obligations satisfy the relevant CIL tests in being: 1) necessary to the make the development acceptable in planning terms; 2) directly related to the development; and 3) fairly and reasonably related in scale and kind to the development.

Having regard to the above, it is suggested that a more streamlined policy, focussing solely on those requirements that are specific to strategic sites (for example ensuring coordination on sites where there are two or more landowners, and producing masterplans where appropriate) would be more effective. This would allow LG1 to provide relevant detail to guide the delivery of strategic sites specifically, while more general policy requirements are covered by other policies. As part of this, the incorporation of Table 3.1 in the policy would be supported as providing additional clarity. LG1 should be reviewed in detail against the evidence base before making amendments, given the concerns raised above.

The concern raised above regarding criterion n) also applies to Policy NEB1, which repeats the requirement for 1 tree per new dwelling, with the added requirement that the trees should be grown 'entirely within the UK where possible'. For the reasons provided above, this is not a sound policy requirement and should be deleted from NEB1 as well.

POLICIES FOR HEMEL GARDEN COMMUNITIES

We support Policy LG1 – Broad Locations – which establishes a clear set of policy requirements for the HGC Growth Area and recognises the importance of a coordinated approach to the planning, design and delivery of homes and associated infrastructure.

We further support the Local Plan commentary relating to Hemel Garden Communities, and the inclusion of Figure 3.2 *Indicative Concept Plan for the HGC Growth Areas* to provide appropriate and proportionate spatial direction for the Growth Area. We welcome the clarity provided at 3.53 about the intention to bring forward two SPDs and we will continue to engage with the HGC partners on these documents as they come forward.

We are supportive of thrust of policies LG2 and LG3 and welcome the inclusion of a clear set of principles for the subsequent stages of planning and delivering high quality growth.

1. Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Kitewood is a development company and landowner of part of the proposed Hemel Garden Communities (HGC) Growth Area to the north and east of Hemel Hempstead. Our landholding falls wholly to the north within Dacorum Borough, and abuts the boundary with the St Albans City & District, adjacent to the Reg 19 Local Plan proposed allocation H1- north Hemel Hempstead.

Kitewood considers that the *Draft Local Plan 2041 Regulation 19 is Legally compliant*, has been *Positively prepared*, is *Justified*, and is *consistent with national policy*.

However, we do not consider that Policies SP1, SP8 and TR1 are effective because all the evidence does not yet exist to demonstrate effective joint working on cross-boundary strategic matters.

***Kitewood therefore request participation in the forthcoming Examination in Public to discuss policy matters relating to the Proposed site allocations H1, H2, H3 and H4***

### 359 - Betsy Brown

Submission Number: 359 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Natural England Name: Betsy Brown

Comment Number: 9

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy LG1 - broad locations

Natural England Reg 18 comments: *whilst there are no nationally designated landscapes intersecting the District, the north / northwest part of the District is associated with the dip slope of the nearby Chilterns AONB with a pattern of valleys / dry valleys and raised plateaus, giving rise to long distance views and characteristic land uses, such as areas of woodland and common*

*land, as well as characteristic settlement pattern...it will be important to have a robust landscape evidence baseline to justify decision making around proposed site allocations within the Local Plan.*

*Development should also be sited to avoid impacts on local sites, such as County Wildlife Sites, and priority habitats and species in line with paragraphs 175 and179 of the NPPF.*

*We suggest the following wording change to point 'c' c) Landscape and Visual Impact Assessments (LVIAs) will be required for all major development. located outside of the settlement area.*

It is good to see updated wording with the submitted Regulation 19 taking account of our previous advice and including the following wording:

Positively relate and integrate the development to the surrounding buildings and landscape, and **be informed by a comprehensive Landscape and Visual Impact Assessment which addresses the recommendations of the Council's Landscape and Visual Appraisal 2024;**

Natural England is happy that this addresses our comments about requirements for an LVIA and assessing development in light of the National Landscape. That being said, we feel that stronger wording regarding the LURA duty is required in light of the expectation to further the goals of, rather than just avoid impacts on the National Landscape. The new duty underlines the importance of avoiding harm to the statutory purposes of protected landscapes but also to seek to further the conservation and enhancement of a protected landscape. That goes beyond mitigation and like for like measures and replacement. A relevant authority must be able to demonstrate with reasoned evidence what measures can be taken to further the statutory purpose.

The proposed measures to further the statutory purposes of a protected landscape, should explore what is possible in addition to avoiding and mitigating the effects of the development, and should be appropriate, proportionate to the type and scale of the development and its implications for the area and effectively secured. Natural England's view is that the proposed measures should align with and help to deliver the aims and objectives of the designated landscape's statutory management plan.

In regard to Hemel Garden Communities, we would expect consultation with NE and the Chilterns Conservation Board to help guide the delivery of required measures.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). ## LG2 - Support for Transformation of Hemel Hempstead

### 26 - Nikki Bugden

Submission Number: 26 Submission Date: 22/10/24 09:00

Respondent: Company/Organisation: Nash Mills Parish Council Name: Nikki Bugden

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**St Albans Regulation 19 Consultation-Nash Mills Parish Council Response Oct 2024.**

Nash Mills Parish Council have previously expressed views at Regulation 18 stage for the St Albans Local Plan. The impact of the proposed development so close to our parish has an impact on infrastructure affecting our residents. Councillors have asked me to reiterate the points raised as it is unclear how these concerns have been addressed or mitigated for the Regulation 19 stage. We do not feel that the process has enabled us to adequately make representations for the points raised below and therefore would like to make representation calling for scrutiny of the 'soundness' of this local plan.

Healthcare

We cannot see evidence that our point 5 below has been addressed. What reassurance can we obtain for our residents that this request has been adequately scrutinised and raised with the relevant dept in central government?

Whilst there is some mention in the Reg19 draft around healthcare there is no confirmation that there has been proven engagement with the relevant authorities to ensure that the population growth within Dacorum and the wider area has been adequately scrutinised. It is imperative that the currently under resourced local healthcare provision be made fit for purpose, ideally predevelopment but certainly from when the first inhabitants move in and of course going forward to support the population growth caused by these developments. There is a danger that there will be a long wait with still no adequate facilities for Dacorum and St Albans residents or that funding may not be adequately earmarked to meet the obvious need.

Traffic Calming

We cannot see evidence that our points 2 and 3 below have been addressed. What reassurance can we obtain for our residents that these requests has been adequately scrutinised and raised with the relevant department at Herts County Council Highways?

Bunkers Park

We cannot see evidence that our point 5 below has been addressed. What reassurance can we obtain for our residents that this request has been adequately scrutinised and raised with the relevant department at Dacorum Borough Council.

*Previous email below from August 2023*

*Good Afternoon*

*Nash Mills Parish Council have asked me to send across the following comments in relation to your recent consultation.*

*We do have some concerns relating to traffic and services within the parish and look forward to the opportunity to express these in further detail as the process develops.*

***In response to the consultation NMPC would ask ST Albans DC to note that NMPC***

1. *Welcomes an extension to Bunkers Park as part of SANG (Suitable Alternative Natural Green Space) whilst noting that the increased usage would exacerbate the need for an increase in parking provision.*
2. *Would be wishing to make representation for width restrictions on Bunkers Lane.*
3. *Would be wishing to make representation on the concerns received from residents regarding the impact of additional traffic on both Chambersbury Lane and Georgewood Road.*
4. *Would be looking forward to future consultation on the details of the proposed St Albans local plan as it affects land bordering Nash Mills.*
5. *Would be recommending an impact assessment of the St Albans (and Dacorum) revised local plans on the WHHT hospital redevelopment plans.*

*We look forward to making these representations in greater detail in due course and look forward to receiving your acknowledgment of receipt of this email*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Affinity Water broadly supports the council's overall approach to addressing the effects of climate change as it relates to water use. Policy SP2 provides an overall approach and Policy CE1 – Promoting Sustainable Design, Construction and Building Efficiency - seeks to introduce the optional standards under the Building Regulations (Part G) to reduce water consumption. Affinity Water specifically supports the use of a 110 litre per person per day standard consistent with the standard adopted in the London Plan 2021. The council's approach is consistent with the evidence on likely future water stress produced by the Environment Agency and our own research in our Water Resources Management Plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Draft Local Plan approach to water conservation would be improved and made more effective if were to set out how the council will ensure "greywater recycling and storage facilities" are delivered in all major developments as well as in Broad Locations (Policy LG1 – Broad Locations and Policies LG2, LG3 and LG4 which cover the Hemel Garden Communities project as well as other site allocations in Appendix 1) to go further than "water management" and to embrace "water conservation" too. The council is also invited to make specific reference to water conservation in the various design policies in the Draft Local Plan (for example, Policy DES1 – Design of New Development and Policy DES7 – Building Servicing). That way, water conservation and broader sustainability principles would be integrated into the design process from the outset in the same way that all new development is likely to have to design in and incorporate biodiversity net gain when the relevant parts of the Environment Act 2021 come into force.

Other councils are proposing more precise ways of directing developers to address the need to use water resources more efficiently. For example, the emerging Tower Hamlets Local Plan Policy CG6 specifically requires that: *All new major residential and non-residential development proposals must install water supply and drainage pipework suitable for the separate collection of rain, grey, and foul water as well as the distribution of non-potable water throughout the development from and to all relevant fitments. All major residential and non-residential refurbishment and change of use should aim to retrofit rain and greywater recycling systems.*

Affinity Water further urges the council to ensure that the development plan policy relating to water conservation is applied in all planning applications approved after the Local Plan's adoption so that it can be applied. This is because the 110 litre per person per day standard can only be currently applied at the Building Regulations stage of construction if it is included as a condition of the grant of planning permission.

Finally, it is suggested that the council include an appropriate measure on how the Local Plan will promote water conservation that can be monitored in future Authority Monitoring Reports. This could cover, for example, the number of major developments with greywater recycling and storage facilities or the number of planning permissions for new housing that have a planning condition that will secure the 110 litre per person per day water target. This would have wider benefits for the council as it seeks to articulate further its local response to the Climate Emergency. Table 3 (in attachment) identifies the defects in the policy relative to the NPPF's tests of soundness.

Housing numbers: section 1.21 states that population has increased by 6% since 2011. The Dwelling Stock Estimates ((www.gov.uk/government/collections/dwelling-stock-including -vacants) (Table 125)) shows that the housing stock for St Albans District in 2011 was 58000. This had increased to 63000 by mid-2023. This increase in the housing stock is 8.26%, suggesting that there has been a diminution of housing need in the District since 2011. There is no mention of this in Regulation 19. This makes the plan unsound.

“The Local Plan sets out the planning policies and proposals for the future development of the City and District of St Albans” (Reg 19 para 1.2). Table 1.3 Settlement Hierarchy – Settlement “St Albans, Hemel Hempstead (currently in Dacorum Borough but expansion into District planned)” There are no published proposals to change the boundary between Dacorum Borough and St Albans City and District to give effect to this “expansion”. NPPF (December 2023) section 61 states “ In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for”. The housing numbers applied to the sites included in Hemel Garden Communities within the District are solely to meet the housing need of the residents of St Albans C&DC. Under the heading Duty to Co-operate, (Reg 19) Section 1.11 states that “St Albans is also working jointly with Dacorum on proposed cross boundary development at Hemel Garden Communities”. Under the heading “Hemel Garden Communities” Section 3.34 states “The Hemel Garden Communities (HGC) Programme is an ambitious proposal to transform Hemel Hempstead through the regeneration of the existing town…”. Thus, the allocation of housing numbers to HGC is for the benefit of Dacorum Borough and, as such, fails to meet the opening declaration in section 1.1. This make the plan unsound

The “St Albans Green Belt Review Final Report June” 2023, Ove Arup and Partners, Table 5.8 Recommendations, sets out those sites that are not recommended released from the Green Belt because of the “Strong” overall performance and “Important” as making a contribution to the wider Green Belt”. Sites SA-168, SA-170, SA-171 and SA-172 are all included in the HGC proposal. The NPPF December 2023 states (para 145) “Authorities may choose to review and alter Green Belt boundaries where exceptional circumstances are fully evidenced and justified”…. There is no such fully evidenced and justified exceptional circumstances. As such, the plan is unsound

In the event was HGC is allowed to proceed, the location would act as a furtherance of the sprawl of Hemel Hempstead. Thus this is breach of the first purpose of the Green Belt. In addition, the distance between the eastern edge of the proposed development (housing) and the western edge of Redbourn (village) would be less than that between the land between Redbourn (village) and Harpenden which SADC stated was inappropriate for development as it would breach the second purpose, to prevent neighbouring towns merging into one another. Accordingly, any proposal to include a site for development west of Redbourn would not be in accordance with section 143 of the NPPF and so is unsound.

Also, in the event that HGC is allowed to proceed, it must meet the requirement of the NPPF December 2023, section 7. This states “The purpose of the planning system is to contribute to the achievement of sustainable development…” The Reg 19 section 1.24 states that the average house price within the District is £619567. There is nothing in the Reg 19 that suggests that this average will not apply to the proposed housing at HGC. Reg 19 Section 1.23 states” The rail options to London underpin the popularity of commuting out of the District.” The location of HGC is as distant as possible from the railway stations at Hemel Hempstead, St Albans City and Harpenden. Unless and until there is local employment that pays London salaries, or public transport to and from the railway stations mentioned is transformed, the HGC proposal is not sustainable and so unsound.

The consultation on the “Proposed reforms to the National Planning Policy Framework and other changes to the planning system” sets out (section 9) “Grey Belt: for the purposes of Plan-making grey belt is defined as land in the Green Belt comprising Previously Developed Land and any other

parcels and/or areas of Green Belt land that make a limited contribution to the five Green Belt purposes…" Whilst the Reg 19 has been prepared in accordance with the current NPPF, assuming the draft Plan goes forward to implantation, it will be reviewed five years later. At that time, the review will take place in accordance with the NPPF then current. The sites west of Redbourn, SA-168, SA-170, SA-171 and SA-172 could not be regarded making a "limited contribution" as they have been declared by Ove Arup as making a "strong" contribution. For this reason, this plan is unsound.

## 115 - Mr Geoffrey Coates

Submission Number: 115 Submission Date: 07/11/24 00:58

Respondent: Company/Organisation: Name: Mr Geoffrey Coates

Comment Number: 8

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The level of development within Redbourn Parish (3768 new dwellings in one rural parish), and in particular the Hemel Garden Communities proposal (H1-H4) are wholly incompatible with TRA1 provisions a i and aii.

a i: Safe and suitable access cannot be provided for walking, cycling and vehicles to so many additional dwellings using existing infrastructure. Redbourn lies beyond walking distance to any station; cycling is impractical for those with luggage, those who cannot dress for wet weather, the mobility impaired and the elderly. Hemel Garden Communities (a total of 11,000 new dwellings, of which around 3100 in Redbourn Parish) is five miles from the nearest station and is car-dependent from the get go. No credible plan has been offered to mitigate this; merely hopes of modal shift on an unprecedented scale. This is not consistent with the duty to consider climate impact.

a ii: Development on this scale will inevitably cause unacceptable impacts upon the transport network. The B487 is the only road serving Hemel Garden Communities. It already comes to a standstill in peak hours. It cannot support the additional traffic of an 11,000 home development, a large industrial estate and further building in Redbourn itself.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Development on this scale is not feasible at this site without contravening TRA1 clauses a i and ii. There is no credible means to avoid car use in a development 5 miles from the nearest station. The only viable mitigation is to remove sites H1 and H2 from the plan.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

As stated in other annotations, St Albans District Council have conducted a PR exercise, not a consultation, at Reg 18. No meaningful improvements have been made to the Local Plan at this stage in response to comprehensive feedback from individuals and Redbourn Parish Council. It has been pushed forward as-is wihtout proper public engagement in an attempt to beat the introduction of the incoming government's new NPPF.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**Hemel Garden Communities (HGC)**

The allocation of four housing and employment sites on the northern and eastern edge of Hemel Hempstead is a significant extension to the town that will deliver much needed housing in both Dacorum Borough and St Albans district, it is however inconsistent with the provision of sustainable development for St Albans. Allocating sites on the urban edge of Hemel Hempstead will contribute numerically to the housing requirements of St Albans but it does not align with the Local Plans strategic objectives to '*Prioritise and enable the safe and attractive use of active and sustainable means of transport and reduce the need for people to travel'*and '*Promote adaptation to and mitigation of the Climate Emergency'*by reducing carbon emissions. Nor does the allocation of these sites align with the LCWIP[13] long-term objectives of Climate and Sustainability, Clean Air and Healthy Lifestyles. These allocations will introduce more vehicles onto the A414 between Hemel, St Albans and Watford. Increasing congestion and increasing pollution.

In additional, a raft of highways improvement schemes[14] are identified to enable more effective travel by public transport and it is highlighted that there is no way to 'continuously travel by public transport' along the A414 corridor. It is acknowledged that this contributes to increased car use within the District. If the allocations at Hemel Hempstead are detrimental to the strategy of the draft Local Plan, then a more effective strategy would be to allocate sites to the south of St Albans that will generate contributions to the funding of upgrades to the A414/ North Orbital Road, or to the delivery of the Hertfordshire Essex Rapid Transit (HERT)[15] which is planned along the A414.

Furthermore, the allocation of sites in the south of St Albans could contribute to delivering the improvements to walking and cycling infrastructure identified in the LCWIP which would encourage the use of sustainable modes of transport between Hemel Hempstead and St Albans. The improvements identified in the LCWIP include a long-term aspiration for a segregated cycle route along Hemel Hempstead Road and traffic calming measures along King Harry Lane to provide a safer active travel route. These schemes could be part funded through developer contributions from additional sites allocations in the south of St Albans.

The Hemel Garden Communities are located within the 12.6km Recreational Zone of Influence (ZOI) for the Chilterns Beechwoods SAC which is considered within the Delivery Statement and Local Plan policy LG3 – Hemel Garden Communities Growth Areas Place Principles. The Green Network Vision sets out the creation of significant amounts of SANG and green spaces, and we support the delivery of multifunctional green infrastructure provision to facilitate this.

There is however a potential delivery issue associated with SANG at the HGC. The Council is legally required not to issue decisions within the recreational ZOI until appropriate mitigation is secured through a Mitigation Strategy. It is identified in the Habitats Regulations Assessment[16] that '*whilst not all allocations have a SANG strategy identified, those without a SANG solution in*

*place are not to be occupied until at least year 6 of the Local Plan. The Council has confirmed that they are confident that appropriate SANG solutions will be delivered for all of the relevant sites within the Local Plan'*. If insufficient SANG is identified for all the allocations, then the Council will not legally be able to issue decision on applications submitted at HGC.

Another potential delivery issue is the boundary review of the Chilterns National Landscape[17] that is currently being undertaken by Natural England. Although there are no formal timeframes set out for the review, it is expected that a variation order is to be sought from the Secretary of State in Winter 2025. This could have implications for the housing numbers that can be delivered at the HGC as well as setting back the delivery as the impact of the allocations on the National Landscape are factored into the proposals.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is our view that the Plan should allocate more homes across the district to address the serial underdelivery, releasing more Green Belt land to increase the supply of deliverable sites and increase the supply of affordable homes. Site allocations should be increased at St Albans specifically as it is in the most sustainable location within the District, with employment opportunities, sustainable transport links and access to higher order services.

The first phase (Part B) of Land at Windridge Farm could be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could be home to a new community that could be successfully integrated into the existing fabric of the town and provide the opportunity to form a new urban boundary to St Albans with significant landscaping improvements, formation of community spaces and new woodland as a product of creating this new place. The scheme would be delivered consistently with other policies within the plan as well as help to achieve the objectives of the six pillars of the South West Hertfordshire Joint Strategic Plan.

The wider Phase 2 (Part A) land has potential to deliver housing in the medium term alongside new open space and community facilities.

Land at Windridge Farm has the potential to deliver significant levels of housing and affordable housing, to help overcome some of the issues related to housing within St Albans whilst supporting the Council in delivering enhancements to retained Green Belt land.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**243 - Network Rail**

Submission Number: 243 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Network Rail Name:

Comment Number: 1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Network Rail is reiterating the previous comments (Regulation 18, attached) in relation to the Hemel Garden Village proposals.

Network Rail are keen to work with St Albans Council to help shape and bring forward the plans set out in the consultation draft. We have the following specific comments to make following review of the draft plan: Network Rail would like to highlight that there is potential interface with NR interests, including at Hemel Station with the construction of the Hemel Garden Village proposed.

Given the scale of the development (over 4,000 dwellings) it is likely that there will be a significant increase in patronage of Hemel station. This may affect the current capacity of the station (including car parking provision) and needs to be taken into consideration in any emerging plans.

We would like to work with the council and future developers as these plans mature but the requirement for developer contributions towards improved facilities should be highlighted.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. **Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

- Proposed West Redbourn (B3) and Hemel Garden Communities developments will completely remove the current green belt buffer between Redbourn and Hemel Hempstead (only 1km remaining). The whole purpose of the green belt is to prevent urban sprawl, these

developments completely go against this policy. Even though the ARUP report commissioned by the council rejected the Hemel Garden Communities development due to coalescence, they have decided to proceed anyway – ignoring the findings. An explanation as to why "exceptional circumstances" exist that justify building on this greenbelt land has still not been provided.

- Have the West Redbourn (B3) site and the Hemel Garden Communities developments been considered together? We haven't seen evidence of this – especially when it comes to the greenbelt.
- Loss of arable land when government should be prioritising self-sufficient food chain. Also damaging to the chalk stream network.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

**271 - Mr Ronan Leydon**

Submission Number: 271 Submission Date: 08/11/24 09:32

Respondent: Company/Organisation: Dacorum Borough Council Name: Mr Ronan Leydon

Comment Number: 6

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Point 1:** A revised Gypsy and Traveller Accommodation Assessment (GTAA) has been produced for St Albans District Council by ORS consultants (September 2024). This shows a need for 80 pitches for households that meet the planning definition over the 2024-2041 Plan period, with 44 of these pitches required in the first five years (2024-2029). There is also a need for 7 plots for travelling show people, all within the first five years.

However, despite paragraphs 9 and 10 in the Planning Policy for Traveller Sites, Policy HOU6 does not set pitch/plot targets for the Plan period or a supply of sites for the first 5 years, years 6-10 or years 11-15.

As a result, the policy is unsound because it is not positively prepared or consistent with national policy. Dacorum recognises that the GTAA is very recent and St Albans Council has not been able to take it into account before submitting the Local Plan for public examination. Nevertheless, this matter needs to be rectified through the examination process.

**Point 2.** We also consider that Policy HOU6 is unsound, as it is not justified or effective, for the reasons explained below.

Dacorum is concerned that the only proposed new sites are both at East Hemel Hempstead, involving two sites for "up to 15-20 pitches". This wording is not effective it means "up to 20 pitches".

Furthermore, we consider that the proposed sites are too large, based on the advice in paragraphs 4.7 and 4.8 of the 'Designing Gypsy and Traveller sites: good practice guide' (2008) that sites should not normally have more than 15 pitches. Although that document was withdrawn in 2015, there is no further evidence more up to date in terms of design guidance for England.

The area close to the proposed new sites already has 62 pitches:

- Dacorum: 30 pitches at Three Cherry Trees Lane in Hemel Hempstead.

- St Albans: 17 pitches at Tullochside (off the B487 Hemel Hempstead-Redbourn Road) and 15 pitches at Ver Meadows, Redbourn.

Our view is that the existing and proposed provision would result in an over-concentration of gypsy and traveller sites to the east and north east of Hemel Hempstead and the Redbourn area.

We are also concerned that the East Hemel Hempstead (Central) Broad Location does not offer a suitable residential environment for a a gypsy and traveller site, as this broad location is proposed for employment development.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We consider that the following modifications are necessary to make Policy HOU6 sound:

- The policy should set pitch/plot targets for the plan period and include a supply of sites for the first 5 years, years 6-10 and where possible years 11+, based on the evidence in the Gypsy and Traveller Accommodation Assessment. This is necessary for the policy to be justified, effective and consistent with national policy.

- The number of pitches proposed on the East Hemel Hempstead (South and Central) Broad Location results in overconcentration in a particular area. At least one site should be deleted and the other, as a minimum, reduced in scale and not be located in close proximity to already established sites in the area. This is necessary for the policy to be justified and effective.
- Additional gypsy and traveller sites should be identified elsewhere in St Albans District, on strategic housing sites and/or in other locations, sufficient to deliver needs identified in the Gypsy and Traveller Accommodation Assessment. This is necessary for the policy to be justified and effective. It will also ensure clarity that St. Albans needs are being met in full within its administrative boundaries.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Covering letter DBC response to St Albans Draft Local Plan_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Gypsy and Traveller sites is a Duty to Co-operate matter. Also the two proposed gypsy and traveller sites are in Hemel Garden Communities, which is a key strategic issue for the Dacorum and St Albans Local Plans.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

Comment Number: 9

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Crown Estate is a significant national landowner with a diverse portfolio that includes urban centres and development opportunities, one of the largest rural landholdings in the country (including land within and surrounding Hemel Garden Communities), substantial areas of London's West End and Windsor Great Park. It also manages the seabed and much of the coastline around England, Wales and Northern Ireland, playing a major role in the UK's world-leading offshore wind sector. Part of TCE's portfolio includes being the majority landowner within the Hemel Garden Communities (HGC), with over 70% of the designated land across the two authorities and is one of the named Partners in the formal governance structure for HGC.

In terms of The Crown Estate's representations to the draft Plan, we wish to reiterate that as a landowning interest, TCE are strongly supportive of the spatial strategy, the principle of Green Belt review to accommodate the growth needs of the area, and the emerging policy framework relating to the proposed site allocations for the HGC Growth Area within the SADC administrative boundary.

TCE is the landowner in respect of three of the four SADC allocations within HGC, namely H2 East Hemel Hempstead (North), H3 East Hemel Hempstead (Central) and H4 East Hemel Hempstead (South).

**Overall Position**

As with previous iterations of the local plan, TCE wish to express support for the principle of development established through the draft allocations in the Reg 19 plan; a key aspect of the wider transformation agenda for Hemel Hempstead set out in the Hemel Garden Communities Programme. The site allocations H2, H3 and H4 are also supported in principle.

TCE have made a significant commitment to supporting the work of HGC since its designation in 2019 and continues to work positively with both HGC and the planning authorities of St Albans in order to progress emerging development proposals for EHH in line with the draft allocations. This has included a substantial amount of technical baseline and assessment work being prepared in respect of EHH in order to ensure that the draft policy framework enables and supports HGC ambitions whilst also ensuring the growth needs of the districts to 2041 and beyond can be met in a timely manner through the implementation of new development.

As such, our representations below are made in the interests of ensuring the Plan can be found sound at Examination, and that policies can be clear and effective as a basis upon which to govern the consideration of development proposals going forward.

We have made several comments and observations on specific policy elements of the Reg 19 Plan below. We hope that these will be considered in the spirit of positive continued dialogue with policy officers and can be considered favourably by an Inspector once the plan has been submitted for Examination.

...

The comments expressed in these representations on behalf of The Crown Estate have been provided in full support of the Local Plan whilst also reflecting that there is a need to ensure that policy wording and evidence underpinning the Local Plan is robust and sound in its approach. We will continue to support the Council up to and including at Examination in providing up to date and robust evidence for HGC which demonstrates the soundness of its allocation as a key focus for the delivery of housing and associated infrastructure within the Plan.

We look forward to continuing to work with St Albans City and District Council to progress the Local Plan in a timely manner.

**Spatial Extent of Green Belt**

The approach taken by SADC in relation to the overall justification for the review and proposed release of Green Belt land to provide the necessary new homes, employment and critical infrastructure for the district is supported by TCE, and it is considered that the exceptional circumstances required to release Green Belt land are justified.

The Policies Map and Part B of the Local Plan sets out the allocated sites and defines the associated Green Belt boundaries to be redrawn as a result of the sites' allocation for development.

We support the rolling of the Green Belt boundary westwards to the M1 as a defensible boundary for EHH. However, we note that whilst the M1 forms a common eastern extent of all three of the draft EHH site allocations, it is not proposed by the Council as a consistent and common boundary for a new Green Belt over the same area.

We question the justification for the inconsistent approach to Council's selection of a new Green Belt boundary in this location, noting the inconsistencies in the Green Belt assessment in this respect, and particularly in respect of the decision to use the overhead electricity pylons as a new defensible GB boundary within the H2 allocation rather than either well established field boundaries or indeed, the M1 as for the remainder of the allocations.

NPPF Paragraph 142 expresses that "*The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence."*Supporting this is NPPF Paragraph 146 which states that boundaries for Green Belt should be defined "*using physical features that are readily recognisable and likely to be permanent."*

We understand the recommendation to use the overhead pylons as the Green Belt boundary was first presented in the *Green Belt Review Sites and Boundaries Study (February 2014)* which was produced by SKM on behalf of SADC. Paragraph 3.5.3 of the Study states "*The rationale for this is that the overhead lines are likely to restrict development further east."*

We make two points in this respect; first that pylons are not considered to be permanent features as they can be rationalised and removed or placed underground, and second, that the

presence of an overhead line is visually permeable and therefore does not generally affect the openness of the landscape.

We consider that other physical features - such as the level of vegetation cover, hedgerows or built form – are more of an indication of the openness of a landscape. In respect of EHH, considering how physical features appear on site, rather than on plan, confirms how field boundaries and roads (in this case the M1 motorway) are more permanent, legible, and robust boundaries which successfully take account of landscape character.

This matter was first raised in TCE representations to the previous local plan in 2018, where the same approach to GB release was proposed by the Council. A report produced by SLR on behalf of TCE in October 2018 (and which was submitted as part of the previous SADC Local Plan's Regulation 19 consultation in that year) provided a critique of the Council's 2014 *Green Belt Study,* noting that the "*electricity pylon corridor does not represent a strong and permanent boundary."*[para 3.16]. The conclusions of this report remain valid, including the recommendation that the M1 is used as a strong and appropriate Green Belt boundary due to its permanency, clear alignment and boundary presence that would clearly define the edge of East Hemel Hempstead.

Paragraph 143 of the NPPF remains unchanged since 2018, in respect of defining one of the five Green Belt purposes as "*to prevent neighbouring towns merging into one another".* We acknowledge that protecting the separation between settlements (in this case, the north-eastern edge of Hemel Hempstead and the southern edge of Redbourn east of the M1) is a legitimate purpose of the defined Green Belt boundary in this location. This is reinforced in the *North Hemel Landscape Study* [September 2024] which comments that that *"Restricting development to west of the pylons* ***and/or*** *setting houses back from Hemel Hempstead Road would assist in maintaining a sense of separation between Hemel Hempstead and Redbourn as experienced along the road."*(our emphasis)

The evidence base document, *Broad Locations – Landscape + Visual Appraisal* (page 11) makes a notable distinction between site allocations H1 and H2 in respect of the use of the overhead pylons as a defining feature for GB purposes, stating that for H1 (HH North): "*The existing pylon line easement provides a logical limit to the extent of built development eastwards, helping to maintain the open gap between Hemel Hempstead and Redbourn to the east*", whereas for H2 (East Hemel Hempstead (North), it is *…"****the M1 corridor that provides a logical limit to the extension of development eastwards.****"*(page 18, our emphasis).

The *Broad Locations – Landscape + Visual Appraisal* also recognises the potential impact of overhead pylons as a dominant feature in the landscape, suggesting that one should *"Consider how development* ***addresses pylon easements*** *and no-build areas, in line with National Grid Guidelines … setting clear design objectives such as* ***to break down the linearity*** *of the transmissions route into inter-related places rather than treating the route as one continuous strip…" (Page 6).* Having a Green Belt edge which mirrors the straight alignment of the pylons (on the ground and in the air) reinforces a contrived straight development edge which does not sensitively respond to topographical or landscape features or character. It draws attention to the linear overhead pylon lines, contradicting best practice design guidance and disregarding more suitable opportunities for defining and establishing a permanent Green Belt boundary on the ground.

On this basis, although the overarching approach to releasing Green Belt land to support the Local Plan allocations is fully supported by TCE, we object to the extent of the H2, East Hemel Hempstead (North) allocation proposed to remain within the Metropolitan Green Belt as currently shown on the Policies Map. This also applies to H4 as the Green Belt boundary follows the M1 except for in the south-east corner of the site. Instead, it is suggested that the Green Belt boundary is adjusted to follow the M1 along the entirety of the H2-H4 allocations.

It is important to note that should our representations be supported by the Council through Modification or by an independent Inspector at Examination, this would not mean that the need or desire to provide open green infrastructure as part of the development proposed within site H2 is diminished in any way. The draft Local Plan Policy, Concept Plan and Framework Plan evidence base for the HGC Growth Areas requires the provision of a Country Park, sports hub and SANG in the eastern part of H2 as part of the creation of a new landscaped edge to Hemel Hempstead; this design requirement would not be altered simply by the removal of the land from the Green Belt and TCE would be happy to agree policy restrictions to agree an appropriate eastern extent of built development in this part of the allocated site if needed.

Further, it should be noted that given the NPPF requirement to periodically review Green Belt boundaries as part of local plan reviews in order to accommodate development needs, the designation of land as SANG which comes with a requirement for its designation 'in perpetuity' has arguably more permanence, and thus might be seen as a preferable alternative policy and practical tool to ensure openness and a green setting ensuring separation of settlements over the long term.

**LG2 and HGC Growth Areas Collaboration Agreement**

Policy LG2 *Support for Transformation of Hemel Hempstead* presents an overarching policy for The Hemel Garden Communities programme. We note the addition of a requirement that "*Developers and promoters in the HGC Growth Areas must work together and closely with the Councils to secure a collaboration agreement which ensures an integrated and seamless approach across site boundaries."*

TCE are committed to working with other landowners within the HGC Growth Areas and Councils to establish a coordinated approach to the successful delivery of HGC. However, TCE consider that the requirement of a collaboration agreement ensuring an integrated and seamless approach across site boundaries may be a challenging commitment to achieve and it is not clear how this policy requirement will be secured or enforced. There are alternative mechanisms that may be more suitable to securing a coordinated approach across site boundaries (and for the Growth Areas, across local authority boundaries and local plans).

We therefore suggest that alternative policy wording is considered, and have suggested a form of words below:

"*Developers and promoters in the HGC Growth Areas must work together and closely with the Councils to* ***secure****establish**a* ***mechanism****collaboration agreement**which ensures a**nintegrated and seamless**coordinated**approach across site boundaries."*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Spatial Extent of Green Belt**

On this basis, although the overarching approach to releasing Green Belt land to support the Local Plan allocations is fully supported by TCE, we object to the extent of the H2, East Hemel Hempstead (North) allocation proposed to remain within the Metropolitan Green Belt as currently shown on the Policies Map. This also applies to H4 as the Green Belt boundary follows the M1 except for in the south-east corner of the site. Instead, it is suggested that the Green Belt boundary is adjusted to follow the M1 along the entirety of the H2-H4 allocations.

It is important to note that should our representations be supported by the Council through Modification or by an independent Inspector at Examination, this would not mean that the need or desire to provide open green infrastructure as part of the development proposed within site H2 is diminished in any way. The draft Local Plan Policy, Concept Plan and Framework Plan evidence base for the HGC Growth Areas requires the provision of a Country Park, sports hub and SANG in the eastern part of H2 as part of the creation of a new landscaped edge to Hemel Hempstead; this design requirement would not be altered simply by the removal of the land from the Green Belt and TCE would be happy to agree policy restrictions to agree an appropriate eastern extent of built development in this part of the allocated site if needed.

Further, it should be noted that given the NPPF requirement to periodically review Green Belt boundaries as part of local plan reviews in order to accommodate development needs, the designation of land as SANG which comes with a requirement for its designation 'in perpetuity' has arguably more permanence, and thus might be seen as a preferable alternative policy and practical tool to ensure openness and a green setting ensuring separation of settlements over the long term.

**LG2 and HGC Growth Areas Collaboration Agreement**

We therefore suggest that alternative policy wording is considered, and have suggested a form of words below:

"*Developers and promoters in the HGC Growth Areas must work together and closely with the Councils to* ***establish****a* ***mechanism*** *which ensures a* ***coordinated****approach across site boundaries."*

**11 Policy LG2 (Support for Transformation of Hemel Hempstead)**

**Green Belt**

11.1 The Stage 2 GBR (2023) concludes that Sub-Areas SA-167, SA-168, SA169a, SA-169b, SA-170, SA-171 and SA-172 perform strongly against the NPPF Green Belt purposes. Of these Sub-Areas the GBR recommends that only SA-167, SA-169a and SA-169b should be taken forward for further consideration and there are still concerns raised regarding these Sub Areas in the GBR as set out below. We note that 169a is proposed for release in the Draft Local Plan but 168b is not proposed for release.

11.2 Sub-Areas (SA-168, SA-170, SA-171 and SA-172) form the Broad Locations North Hemel Hempstead and East Hemel Hempstead (North) and are also assessed as 'Important' in terms of their wider impact on the Green Belt.

11.3 Given that the two proposed Broad Locations at North Hemel Hempstead and East Hemel Hempstead (North) have not been recommended to be taken forward for further consideration SACDC and the Local Plan should not be proposing these areas for Green Belt release. **This should effectively remove these two Broad Locations along with their development assumptions which principally consist of a total of 3,100 dwellings.**

11.4 We pull out some of the key points from the GBR in relation to these Sub-Areas as a record of the clear recommendations of the GBR that the Broad Locations at North Hemel Hempstead and East Hemel Hempstead (North) are not recommended for further consideration:

SA-167

- *"The sub-area plays a moderately important role in preventing the irregular sprawl of Hemel Hempstead, in the absence of prominent inner boundary features".*
- *"Due to its strongly unspoilt rural character, the sub-area makes a more important contribution to safeguarding the countryside from encroachment."*

- *"In combination with SA-168, the release of the sub-area would lead to the irregular and large-scale sprawl of Hemel Hempstead".*
- *"In combination with other sub-areas in the wider cluster in which the subarea is located (i.e. SA-163, SA-164, SA-165, SA-166, SA-168, SA-169a, SA-169b, SA-170, SA-171 and SA-172), the removal of the sub-area would lead to large-scale unchecked sprawl of Hemel Hempstead, and significantly reduce the gap between Hemel Hempstead and both Redbourn and St Albans."*

SA-168

- *"It is judged that development in the sub-area would lead to the perceptual merging of the neighbouring built-up areas."*
- *"The sub-area has a rising topography to the south, allowing views from the southern part of the sub-area onto the open fields in the north. Overall the subarea has a largely rural character."*
- *"If the sub-area was released in isolation, it would significantly alter the performance of the wider Green Belt by enclosing Green Belt to the north and south in built form if developed, and leading to the large scale, irregular sprawl of Hemel Hempstead. It would also strengthen the role of the Green Belt to the north-east in maintaining the gap between Hemel Hempstead, with only a small part of Green Belt and the M1 preventing complete physical coalescence of the settlements."*
- *"In combination with either SA-169a, SA169b and SA-171, or with SA-167 the removal of the sub-area is likely to alter the performance of the wider Green Belt by enclosing Green Belt to the north and south respectively in built form if developed, and leading to the effective coalescence of Hemel Hempstead and Redbourn. The release of the sub-areas in combination would also lead to the disproportionate sprawl of Hemel Hempstead in comparison to the existing settlement size."*
- *"Overall, the sub-area plays an important role with respect to the strategic land parcel, and its release in isolation or in combination would harm the performance of the wider Green Belt."*
- *"The sub-area performs strongly against NPPF purposes and makes an important contribution to the wider Green Belt. Not recommended for further consideration."*

SA-169a

- *"In combination with other sub-areas in the wider cluster in which the sub-area is located (i.e. SA-163, SA-164, SA-165, SA-166, SA-167, SA-168, SA-169b, SA-170, SA-171 and SA-172), the removal of the sub-area would lead to large-scale unchecked sprawl of Hemel Hempstead, and significantly reduce the gap between Hemel Hempstead and both Redbourn and St Albans."*
- *"The southern boundary is readily recognisable but less likely to be permanent. If the sub-area was released, the new inner Green Belt boundary would not meet the NPPF definition. The new boundary would require strengthening."*
- *"The sub-area performs strongly against NPPF purposes but makes a less important contribution to the wider Green Belt. If the sub-area was released, the new inner Green Belt boundary would not meet the NPPF definition for readily recognisable and likely to be permanent boundaries. The new boundary would require strengthening. Recommended for further consideration in isolation as RA-54 or in combination with SA-169b as RC-13."*

SA-169b

- *"In combination with SA-168, the removal of the sub-areas is likely to alter the performance of the wider Green Belt by leading to the large-scale sprawl of Hemel Hempstead, introducing urbanising influences, and strengthening the role of the Green Belt to the north-east in preventing the coalescence of Hemel Hempstead and Redbourn."*

- *"In combination with other sub-areas in the wider cluster in which the subarea is located (i.e. SA-163, SA-164, SA-165, SA-166, SA-167, SA-168, SA-169a, SA-170, SA-171 and SA-172), the removal of the sub-area would lead to large-scale unchecked sprawl of Hemel Hempstead, and significantly reduce the gap between Hemel Hempstead and both Redbourn and St Albans."*
- *"Both the inner and outer boundaries of the sub-area are readily recognisable but not likely to be permanent. If the sub-area was released, the new inner*

*Green Belt boundary would not meet the NPPF definition. The new inner boundary would require strengthening."*

- *"Overall, the sub-area performs strongly against NPPF purposes but makes a less important contribution to the wider Green Belt. If the sub-area is released, the new inner Green Belt boundary would meet the NPPF definition for readily recognisable and likely to be permanent boundaries. Recommended for further consideration with in isolation as RA-55 or in combination with SA-169a as RC-13."*

SA-170

- "The removal of the sub-area in isolation is likely to alter the performance of *the surrounding Green Belt by strengthening its role in preventing further sprawl of Hemel Hempstead and the coalescence of Hemel Hempstead with Redbourn."*
- *"In combination with either SA-169a, SA-171 or SA-172, the release of the subareas is likely to impact on the performance of the wider Green Belt by leading to the outward and irregular sprawl of Hemel Hempstead and by significantly reducing the gap between Hemel Hempstead and Redbourn."*
- *"In combination with other sub-areas in the wider cluster in which the subarea is located (i.e. SA-163, SA-164, SA-165, SA-166, SA-167, SA-168, SA-169a, SA-169b, SA-171 and SA-172), the removal of the sub-area would lead to large-scale unchecked sprawl of Hemel Hempstead, and significantly reduce the gap between Hemel Hempstead and both Redbourn and St Albans."*
- *"Overall, the sub-area plays an important role with respect to the strategic land parcel, and its release in isolation or in combination would harm the performance of the wider Green Belt."*
- *"The sub-area performs strongly against NPPF purposes and makes an important contribution to the wider Green Belt. Not recommended for further consideration."*

SA-171

- *"The sub-area forms almost the entire gap between Redbourn and Hemel Hempstead and prevents the creation of ribbon development between the two settlements. It is judged that development in the sub-area will lead to the perceptual merging of neighbouring built-up areas."*
- *"The removal of the sub-area in isolation would create a 'hole' in the Green Belt, introducing urbanising influences which would diminish the contribution of the surrounding Green Belt against purpose 3, and harming the integrity of the wider Green Belt. Its release in isolation is also likely to impact on the performance of the surrounding Green Belt by strengthening its role in preventing the further sprawl of Hemel Hempstead and its coalescence with Redbourn."*
- *"In combination with any of the sub-areas, their removal is likely to impact on the performance of the wider Green Belt. The release would lead to the significant sprawl of Hemel Hempstead, both in terms of settlement shape and in size, and its encroachment into the countryside. It would also lead to the perceptual merging of Hemel Hempstead and Redbourn, physically separated only by the M1."*
- *"In combination with other sub-areas in the wider cluster in which the subarea is located (i.e. SA-163, SA-164, SA-165, SA-166, SA-167, SA-168, SA-169a,*

*SA-169b, SA-170 and SA-172), the removal of the sub-area would lead to large-scale unchecked sprawl of Hemel Hempstead, and significantly reduce the gap*

*between Hemel Hempstead and both Redbourn and St Albans."*

- *"The outer boundary of the sub-area is readily recognisable however the southern boundary is less likely to be permanent. If the sub-area was released, the new inner Green Belt boundary would not meet the NPPF definition. The new boundary would require strengthening."*
- *" The sub-area performs strongly against NPPF purposes and makes an important contribution to the wider Green Belt. Not recommended for further consideration."*

SA-172

- *"The sub-area forms almost the entire gap between Redbourn and Hemel Hempstead, and has perceptual visual links to Redbourn. It is judged that development in this sub-area would lead to the physical and perceptual merging of neighbouring built-up areas."*
- *"Overall the sub-area has a strongly unspoilt rural character"*
- *"The sub-area performs an important role in preventing the outward sprawl of Hemel Hempstead and preventing encroachment into the countryside due to its unspoilt rural character. The sub-area plays a more important role in preventing the merging of settlements, forming the entire gap between Redbourn and Hemel Hempstead."*
- *"Its release would enclose the Green Belt in built form if it was released, and strengthen both its role in preventing the further unchecked sprawl of Hemel Hempstead and the coalescence of Hemel Hempstead and Redbourn. It would also introduce urbanising influences to the surrounding Belt Green and diminish the sense of openness in the countryside."*
- *"In combination with SA-170, the removal of the sub-area is likely to alter the performance of the wider Green Belt against purposes 1 and 2 as it would lead to significant sprawl of Hemel Hempstead, and a diminution of the gap between Hemel Hempstead and Redbourn."*
- *"In combination with other sub-areas in the wider cluster in which the subarea is located (i.e. SA-163, SA-164, SA-165, SA-166, SA-167, SA-168, SA-169a, SA-169b, SA-170 and SA-171), the removal of the sub-area would lead to large-scale unchecked sprawl of Hemel Hempstead, and significantly reduce the gap between Hemel Hempstead and both Redbourn and St Albans."*
- *"As it is located on the district boundary, the sub-area may be impacted by potential Green Belt releases in the neighbouring authority of Dacorum Borough Council. The Dacorum Borough Council Stage 2 Green Belt review and Landscape Appraisal Study (2016) identified sub-area HH-A1 to the west of the sub-area for further consideration. If Dacorum Borough Council decide to release Dacorum HH-A1 as part of their spatial strategy for their emerging Local Plan, the cumulative impact would need to be considered."*
- *"Overall, the sub-area plays an important role with respect to the strategic land parcel, and its release in isolation or in combination would harm the performance of the wider Green Belt."*
- *"The inner boundary of the sub-area is readily recognisable and likely to be permanent. The outer boundaries of the sub-area are readily recognisable but not necessarily permanent. If the sub-area was released, the new inner Green Belt boundary would not meet the NPPF definition. The new boundary would require strengthening."*
- *"The sub-area performs strongly against NPPF purposes and makes an important contribution to the wider Green Belt. Not recommended for further consideration*."

*Figure 11.1: Stage 2 GBR(2023) Figure 5.11 Overall performance against NPPF purposes*

*Figure 11.2: Stage 2 GBR (2023) Figure 5.15 Categorisation*

**Hemel Garden Communities Trajectory**

11.5 Policy LG2 states that "*the Hemel Garden Communities programme will deliver at least 4,300 new homes by 2041 and 5,500 homes in total by 2050, delivering this through a network of new garden communities to the north east and east of the town within St Albans District".*

11.6 Paragraph 75 of the NPPF states that: *"Strategic policies should include a trajectory illustrating the expected rate of housing delivery over the plan period, and all plans should consider whether it is appropriate to set out the anticipated rate of development for specific sites".*

11.7 The Draft Local Plan fails to include a housing trajectory for specific sites (including those in the Hemel Garden Communities) so that consultees can comment on the potential timing of housing delivery and the need for supporting infrastructure that needs to be delivered in close coordination for each site. This makes it rather difficult to comment on any delivery assumptions for particular sites when the Council has not considered this even though it has selected the sites as allocations.

11.8 However, the Draft Local Plan does include a high level housing trajectory (Table 3.2) and we have analysed this due to a lack of more detailed information presented by SACDC.

11.9 Furthermore, we seriously question what the Housing Trajectory is not only for the HGC sites in St Albans District but for those in Dacorum – this is not set out in the Local Plan and is clearly a critical missing piece of information for the overall Local Plan.

11.10 As the Lichfields 'From Start to Finish' evidence (Editions 1 -3) and the Letwin Review (2018) highlight, the delays with the delivery of large development proposals should not be underestimated as there will be many aspects of the housing trajectory that are beyond the immediate control of a local planning authority. We provide an analysis of this below.

**Development Lead in Times**

11.11 The trajectory is particularly unrealistic in terms of when it assumes that housing delivery will commence at the Hemel Garden Communities. The first delivery year assumed is 2029/30 with 100 dwellings. This is in four years from now.

11.12 In the recently published *'Start to Finish – How quickly do large-scale housing sites deliver"* 3rd Edition, September 2024 (Lichfields) (see Appendix B of these representations) provides an update on important research on the delivery of strategic sites across England. Its findings are that for sites of 2,000 dwellings or more (like Hemel Garden Communities) that it takes between 4 and 7.9 years from the validation of the first planning application to the first dwelling being delivered (see Table below).

*Figure 11.3: 'Start to Finish – How quickly do large-scale housing sites deliver" 3rd Edition, September 2024 (Lichfields)*

11.13 The Report updates the previous report on the average time taken from gaining outline permission to the completion of the first dwelling on site (see below). This indicates that it takes on average around 3 to 4.6 years from the grant of outline planning permission to deliver the first dwelling. It concludes that at the time of its granting, an outline permission will deliver limited housing in a five-year period.

*Figure 11.4: 'Start to Finish – How quickly do large-scale housing sites deliver"* 3rd Edition, September 2024 (Lichfields)

11.14 As Policy LG2 (Support to Transformation of Hemel Hempstead) states all development in the HGC Programme Area must follow a planned and coordinated approach to growth and infrastructure and is expected to be in accordance with:

- *Local Plan Infrastructure Delivery Plans (IDPs)*
- *Hemel Garden Communities Spatial Vision*
- *HGC Framework Plan evidence base*
- *HGC Concept Plan*

- *HGC Local Plan Policies,*
- *Supporting SPDs and Design Codes.*

11.15 It requires that "Developers and promoters in the HGC Growth Areas must work together and closely with the Councils to secure a collaboration agreement which ensures an integrated and seamless approach across site boundaries. Critical infrastructure necessary to support development must be delivered ahead of occupation. Proposals must not prejudice or impede the provision of wider infrastructure required within the HGC Programme Area. Infrastructure, contributions and wider funding will be required to deliver on and offsite infrastructure, in accordance with the above documents."

11.16 Clearly the HGC is highly complex with many authorities and parties involved in the planning and delivery process. There is also rightly a commitment to working closely with the local communities as part of this process. All of this suggests that the

Lichfields research is very much a 'best case scenario' in relation to the HGC Broad Locations.

11.17 **So, we ask, what is SACDC's assumption about each of the proposed four Broad Locations at Hemel Garden Communities (H1, H2, H3, H4) in terms of the following:**

- When will the Design Codes and SPDs will be prepared and approved?
- When will the pre-application process take place including consultation and engagement with relevant consultees and stakeholders?
- When will the preparatory site works, to be informed by site-specific survey recommendations and monitoring before commencement take place?
- When will an outline application be submitted and approved for each Broad Location?
- When will a full application will be submitted and approved?
- When will reserved matters applications be submitted and approved?
- There is reference in Policy LG3 (Hemel Garden Communities Growth Areas Place Principles) to the potential need to use Compulsory Purchase Orders (CPO) powers to ensure infrastructure is provided in a timely manner. What are the time estimates made for this in the housing trajectory?
- When will the S106 for each parcel is expected to be agreed?
- When will the pre-commencement conditions for each parcel be agreed by SACDC?
- What are SACDC's assumptions for the opening up works required for each of the sites and combined?
- What infrastructure is required to be funded and / or delivered prior to commencement for each of the broad locations?
- What is the planning approval process and timing for each piece of infrastructure?
- When will conditions be discharged?

11.18 SACDC needs to answer these questions so that a realistic housing trajectory can be prepared as the current version will lead to a shortfall in housing in the District over the first five years upon adoption. As a result, the borough will be subject to planning appeals due to a lack of a five-year housing land supply. With the Local Plan still yet to be submitted to the Secretary of State there is still an opportunity for SACDC to allocate additional housing sites to ensure that the shortfall of anticipated delivery is addressed.

*Figure 11.6: Timeline for the delivery of strategic housing sites – Start to Finish Lichfields (2024)*

11.19 The additional and important benefit of this approach is that the SPDs and planning applications at Hemel are not 'rushed through' in hopes that the development will meet unrealistic commencement dates.

11.20 The report concludes that for schemes of 2,000+ dwellings the mean years from validation of the first planning application to the first dwelling being completed is 6.6 years.

11.21 Therefore, considering this research, RPC is concerned with the proposed housing trajectory, as it would not be realistic to rely on the Hemel Garden Communities development (over 4,300 dwellings) would deliver its first homes in year 6 since the adoption of the Local Plan.

*Figure 11.5: Overall lead-in times for sites of 100 dwellings or more, including time taken for outline consent size by size. Source: Lichfields report 'Start to Finish' (2024).*

11.22 Hemel Garden Communities is clearly a cross-boundary joint working project between SACDC, Dacorum, Herts County Council and others. The South West Hertfordshire Joint Strategic Plan is being prepared with Dacorum, Hertsmere, Three River and Watford Councils and there is no agreed timetable for taking this forward (as set out earlier in our representations). This complexity and cross-boundary working is likely to slow the process down even further so the assumptions above should be considered a 'best case' scenario.

**Housing Delivery Rates**

11.23 We also question the delivery rates in the housing trajectory based on the amount of infrastructure required at each phase which still remains unclear. Linked to this is the question about how the funding of infrastructure will work? Are the developers going to forward fund infrastructure costs?

11.24 The housing delivery rates have been updated in the Lichfields report which concludes that the build-out rates for schemes of 2,000 dwellings or more is 100 to 188 dpa using the lower and upper quartiles of their analysis. SACDC's housing trajectory assumes the following delivery rates by year for HGC which are clearly well in excess of what should be considered achievable delivery rates.

- 2029/30: 100
- 2030/31: 175
- 2031/32: 250
- 2032/33: 315
- 2033/34: 340
- 2034/35: 365
- 2035/36: 365
- 2036/37: 440
- 2037/38: 490
- 2038/39: 500
- 2039/40: 495
- 2040/41: 465

11.25 This equates to 4,300 dwellings over twelve years which is an average of 358 dwellings per annum. This takes no account of market or economic changes or the fact that there will be additional competing sites in the neighbouring authorities and settlements all building at the same time flooding the local market. The assumptions are simply unrealistic and are setting SACDC and its communities up for housing shortfall over the of the plan period.

11.26 This demonstrates that the Hemel Garden Communities sites cannot be delivered within the stated plan period of 2041 and would not make any meaningful contribution to the Council's housing needs for many years to come.

11.27 As highlighted, delivery will also rely on cooperation with adjoining authorities and liaison and negotiation with statutory consultees. Even the slightest delay in the start date will result in a slower performance, which is then likely to render the assumed delivery rates unachievable.

11.28 Overall, we consider that the preparation of a realistic housing trajectory is urgently needed, considering a more realistic start date and rate of delivery than the crude assumptions included in the Draft Local Plan.

11.29 The Council's poorly thought-out assumptions regarding housing delivery and an unrealistic housing trajectory result in the Draft Local Plan being currently unjustified and requiring much further evidence looking closely at what could realistically be viably delivered.

11.30 Policy LG2 also proposes 6,000 new jobs at an expanded Maylands Business Park. Clearly for the housing, employment, infrastructure to be planned and delivered in an integrated way, will indeed require very close coordination and alignment of resources.

**Infrastructure Delivery**

11.31 Policy LG2 states that:

*"Developers and promoters in the HGC Growth Areas must work together and closely with the Councils to secure a collaboration agreement which ensures an integrated and seamless approach across site boundaries. Critical infrastructure necessary to support development must be delivered ahead of occupation. Proposals must not prejudice or impede the provision of wider infrastructure required within the HGC Programme Area.."*

11.32 These statements do not instill confidence that SACDC has an adequate grasp on what infrastructure is required to deliver the development is proposing at Hemel Hempstead through the Draft Local Plan, who will be responsible for delivering it, its timing and its cost. It is entirely unclear from this statement what infrastructure projects SACDC is seeking contributions.

**Transport Infrastructure**

11.33 In relation to 'transport infrastructure the IDP states (paragraph 9.1.6) that:

*"One of the core principles of the Garden Community is to deliver transformative mobility improvements to achieve a significant shift towards active and sustainable modes of transport. Whilst a significant amount of baseline information has been collected to support the development of the sections below, there are a number of evolving transport studies and strategies that are not yet completed that will identify and evidence the transport interventions required to support behaviour change in a shift to sustainable modes. These will need to be incorporated into future iterations of this IDP."*

11.34 The fact that the delivery of mobility improvements to achieve a significant shift towards active and sustainable modes of transport cannot be evidenced through the IDP due to a number of evolving transport studies and strategies being incomplete raises serious concerns about the deliverability of this infrastructure. To simply state that these will need to be incorporated into future iterations of the IDP provides no confidence that there is a sound transport infrastructure evidence base on which the plan is based.

11.35 The IDP provides an *"inexhaustive list of planned highways infrastructure projects, as included in the St Albans IDP Infrastructure Schedule, of most relevance to the Hemel Garden Communities"*. It then provides two bullet points which are:

- M1 junction 8 enhancement (Phases 1 to 3)
- Access enhancements to support development at Hemel Garden Communities

11.36 This is clearly not sufficient information. We sought clarification on the highways infrastructure in the IDS however the information appears to be incomplete and it is very difficult to ascertain using the IDS spreadsheet which is not at all 'user friendly'.

11.37 Reference 141 of the IDS is for Highways Access to support development at East Hemel which includes transport measures as part of M1 J8 Enhancements:

*Figure 11.6: IDS Reference 141*

11.38 Yet when looking for the estimated costs there is no estimation despite it being a Critical piece of transport infrastructure. Furthermore, the time period for its delivery is stated as 2025 – 2041. That is a very wide period of time which indicates that SACDC simply does not know the cost or when it is likely to be delivered let alone what development will trigger its necessity for delivery.

*Figure 11.7: IDS Reference 141*

11.39 There are many other examples of this in the IDS which do not need to be highlighted as there is clearly a fundamental issue with the IDP and IDS in that they lack the required information to demonstrate the allocations are sound and deliverable. Based on the current information available there is nothing to suggest that the infrastructure to support the growth at Hemel is sound or deliverable.

***Rail Services***

11.40 The IDP states at Page 188 that:

*"The proposed expansion of Hemel Hempstead is likely to have an impact on the nearby railway stations (Hemel Hempstead station and Apsley station) and the need to improve and expand station facilities, as necessary, to reflect increased demand for rail services has been raised in the engagement as a concern."*

11.41 *"Further details are not yet developed as to exactly what new or improved infrastructure is required to facilitate this increased demand".* Again, a key piece of required infrastructure has no evidence on what is needed or its cost etc.

***Bus Services***

11.42 The IDP explains at Page 189 that:

*"Initial investigations undertaken with developers suggest that new bus routes could be introduced, and existing routes expanded to link the HGC developments with both Hemel Hempstead (including the train station, which will provide further, regional public transport connectivity) and St Albans City".*

11.43 "Initial investigations" are not sufficient to justify the proposed allocations and evidence deliverability and soundness.

***Walking and Cycling Infrastructure***

11.44 Whilst it is important that there is sustainable and safe walking and cycling infrastructure delivered as part of the allocations there is quite a contrast in the level of detail provided in the IDP and IDS for these schemes compared to the strategic transport requirements. It is helpful to have this detailed level of costings and projects for walking and cycling infrastructure however it is currently very much an 'incomplete picture' of the full range of strategic transport measures required and how, when by whom and their cost.

**Physical Infrastructure**
***Potable Water***

11.45 Paragraph 9.2.1 of the IDP explains that there is no modelling yet for the possibility

that a new water supply network might be required for HGC and that there could be cross boundary issues with the supply of potable water. This does not appear to be covered in the IDS.

*"It is possible that new water supply network infrastructure will be required when connecting large allocations like Hemel Garden Communities. However, this will be modelled as sites are brought forward by developers. During stakeholder engagement in May 2023, Affinity Water suggested that the pressure due to development at Hemel Hempstead will be increased by the growth in bordering local authorities. Cross-local authority boundary sites are most likely to encounter issues*

*when connecting to the supply and timing and phasing of how these sites are brought forward should be aligned and considered when applying to Affinity Water for connection to the supply network."*

***Waste Water***

11.46 The IDP explains (paragraph 9.2.2) that:

*"The strategic upgrades to wastewater treatment works outlined in Section 8.1.2 will also apply to Hemel Garden Communities. Consequently, as indicated during stakeholder engagement with Thames Water, Hemel Garden Communities is not likely to cause significant issues on the wastewater network and therefore capacity is expected to be available to support the growth.*

*"Similar to potable water, because the preferred growth scenario includes significant greenfield urban extension proposed allocations it is likely that these will need new infrastructure in order to connect to the network. However, this is determined on a site by site basis, and therefore it is important that applications for new infrastructure are provided sufficiently in advance for Thames Water to be able to provide necessary upgrades"*

11.47 However, when one reads Section 8.1.2 as referred to by the consultants there is nothing in that section that specifically refers to the growth planned for HGC. Saying that new infrastructure is likely to be needed for 'significant greenfield urban extensions' and that the infrastructure will be determined on a site-by-site basis is setting up the Plan for failure. There needs to be an assessment of what the wastewater requirements are for the whole of the HGC and a plan for how it will be met, how much it is who will pay for it, where it will be located and when it will be needed.

***Energy (Gas and Electric)***

11.48 The IDP states (aragraph 9.2.3) that:

*"Currently, there are no reported infrastructure capacity issues within the Hemel Garden Communities, according to information published by UK Power Networks and Cadent. However, Cadent has indicated that a new intermediate pressure regulator will be necessary if there is a surge in residential demand"*

11.49 It is concerning that the IDP and IDS has not considered the utilities required at Hemel Garden Communities as this is clearly a very key consideration for the area given the presence of the Buncefield Oil Storage Depot, the BPA Gas Pipeline that runs north and south through the site, and the on-site Overhead Electricity Transmission Lines and the new utility infrastructure (including Wastewater Infrastructure) that is required.

11.50 As one can see from the mapping below, there is significant utility infrastructure located east of Hemel Hempstead and around Redbourn (including west of Redbourn). Nowhere in the Local Plan or in the evidence base does it explain how the existing utility infrastructure is going to be addressed as part of the proposals despite this being a clear strategic matter that should be considered a potential 'showstopper' to development proposals at Hemel Hempstead and Redbourn. This includes:

- National Grid Sundon-Elstree (400kv) pylons and line running north to southeast of Hemel Hempstead.
- Elstree – Sundon (132kv) pylons running north to south and east to west including to the east of the M1 (west of Redbourn).
- Buncefield Oil Terminal.
- Epping to Buncefield Oil Pipeline located east of Hemel Hempstead looping around the settlement to the north and west.
- Finaline (Killingholme – Buncefield) located north of Redbourn, running along the western edge of Redbourn, continuing south until crossing the M1 to Buncefield Oil Terminal.

*Figure 11.8: Electric Transmission Lines east of Hemel Hempstead and at Redbourn Source* https://openinframap.org/#12.99/51.76249/-0.39699

*Figure 11.9:: Oil and Gas Pipelines at Hemel Hempstead and Redbourn Source:* https://openinframap.org/#12.99/51.76249/-0.39699

**Viability**

11.51 It is currently unclear how the Local Plan Policies, the IDP / IDS and the Local Plan Viability Assessment (September 2024) relate to one another. The information contained in each of these documents is not clearly set out anywhere for each allocation at HGC in terms of the infrastructure requirements, their costs, when it is necessary, and who will be delivering it.

11.52 For example, the Viability report Strategic Sites Testing for East Hemel (North) includes the following assumptions for S106 contributions:

*Figure 11.10: Strategic Sites Testing Table 3.2.14.1: Section 106 contributions*

11.53 However, when one attempts to reconcile these figures in the IDP / IDS it is not possible to do so.

11.54 It is unclear in the viability evidence how cross-boundary infrastructure is being calculated. When one reviews the Hemel Garden Communities Delivery Statement (September 2024) there are a range of cross boundary schemes that are 'key transformational projects' (see below). How are these being treated in the viability evidence base?

*Figure 11.11: Transformational projects Hemel Garden Communities (HGC) Delivery Statement (September 2024)*

11.55 The Local Plan states that

*"The Spatial Vision for Hemel Garden Communities sets out the scope for transformation across the town, as well as providing a sustainable approach for growth, in accordance with the Town and Country Planning Association (TCPA) Garden City Principles"*[11]

11.56 We question how the TCPA Garden City Principles are taken into account in the viability evidence. For example:

- Land value capture for the benefit of the community
- Community ownership of land and long-term stewardship of assets

11.57 Furthermore, we are unclear as to how the viability evidence has taken account of all the requirements of the Local Plan Policies including Policy LG3 (Hemel Garden Communities Growth Area Place Principles). This policy includes a number of requirements for the developers and it is unclear how these have been costed.

11.58 Policy LG6 (Green Belt Compensatory Improvements) requires that the allocations in the Local where Green Belt boundaries are changed that 'proportionate' compensation is required. What assumptions have been made about this in the viability evidence base as this is clearly a costly requirement for Green Belt release allocations particularly that at Hemel.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Given that the two proposed Broad Locations at North Hemel Hempstead and East Hemel Hempstead (North) have not been recommended to be taken forward for further consideration SACDC and the Local Plan should not be proposing these areas for Green Belt release. **This should effectively remove these two Broad Locations along with their development assumptions which principally consist of a total of 3,100 dwellings.**

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. REDBOU~4.pdf
2. APPEND~2.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

**288 - Chris Berry**

Submission Number: 288 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: CPRE Hertfordshire Name: Chris Berry

Comment Number: 11

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Policies are ineffective and inconsistent with national policy, with regard to the Green Belt**

The Draft Local Plan is ineffective in meeting the aim of Policy SP3 “to protect the Green Belt from inappropriate development”. The Plan proposes “select Green Belt boundary adjustments in the right areas to provide wider protection of ‘the rest of the Green Belt”, but without having established the scale of change that is necessary, or justifying the specific boundary changes.

For example, in the case of the SRFI site, the Draft Local Plan does not define a new Green Belt boundary. This is not consistent with national policy and would not be effective in meeting the Council’s stated Green Belt objective. Similarly, policy relating to the Hemel Garden Communities appears only to be justified as a cross-boundary proposal without further evidence regarding specific St Albans requirements, and proposed by national Government.

In every case where “Broad Locations” and other smaller sites are proposed for removal from the Green Belt, these proposals are not justified collectively or individually, and are contrary to national policy in the absence of the demonstration of exceptional circumstances as required by the NPPF. Policy LG1 Broad Locations requires 22 criteria to be met for their development, but omits the requirement for the definition and creation of a new defensible permanent boundary for the Green Belt.

Similarly, criteria in Policy LG4 fail to require the creation of a permanent defensible Green Belt boundary for sites removed from the Green Belt, and this is ineffective and contrary to national policy. Subsequent Policies LG5 to LG9 fail to provide supporting evidence, implying very special or exceptional circumstances which are unjustified.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Local Pan should be re-structured to consider the role and function of the largest land use designation in the SACD i.e. the London Metropolitan Green Belt in appropriate detail. The lack of adequate consideration of the implications of this designation for physical development in the future renders the Local Plan unsound in limiting the opportunities and constraints afforded by the land designation.

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

1. **Introduction**

1.1. Leverstock Green Village Association CIO (LGVA) is a registered Charity (Charity No.1172784) whose geographical area of benefit is the ecclesiastical parish of Leverstock Green, a substantial portion of which is on Crown Estate land within the area of St Albans City and District Council.

Formed in 1974 the Charity is governed by a Board of Trustees including both democratically elected representatives and nominated representatives of village organisations. The Association's Constitution includes responsibility for the provision and maintenance of a Village Hall, the provision of educational, recreational and leisure time facilities, and the promotion of the benefits and the protection of the interests of village residents, including, inter alia, environmental matters. Arising from this latter responsibility, since there is no civil parish for the area, the LGVA undertakes most planning matters which would normally be carried out by a Parish Council. The Charity converted from an unincorporated association to a Charitable Incorporated Organisation in 2017.

1.2. Leverstock Green is an historic and characterful village on the eastern edge of the Hemel Hempstead urban area with open countryside to the east and south. There is documented and archaeological evidence that people lived and worked in the immediate area of Leverstock Green from the time of Roman occupation onwards. Recent research indicates that settlement along Westwick Row may well date back even further to the Iron Age and perhaps the Bronze Age.

1.3. In 1949, the Masterplan for the development of Hemel Hempstead New Town stated that 'Leverstock Green should, as far as possible, retain its village character'. Over the last 70 years the village has expanded with a number of housing developments to its present size of about 2,700 dwellings.

1.4. Today, Leverstock Green is a dynamic community which has retained its strong village identity, and the residents take great pride in maintaining the character of the village. The Leverstock Green Village Association runs a highly successful and well-appointed Village Hall. The Hall is used by over 40 village and community groups including a playgroup and a theatrical group. The LGVA produces a quarterly newsletter, which is delivered to all homes, and runs an annual summer fete and winter fayre as well as regular events in the Hall such as quizzes and concerts.

1.5. Holy Trinity Church located in the centre of the village is a warm, vibrant and well attended church which is at the centre of village life, and the well-regarded village C of E primary school is rated 'Good' by OFSTED. There is a co-located Day Nursery and Preschool.

1.6. The village centre has a parade of quality shops and a Post Office which are well patronised by the community. A community library is located adjacent to the Hall. The

LGVA arranges for a display of Christmas lights which is sponsored by local businesses.

1.7. Leverstock Green has a number of successful and well supported sports clubs. The Football Club was founded in 1895. The Cricket Club adjacent to the village green was founded in 1908 and the Tennis Club in 1961. All three have thriving club houses. The village has three public houses/restaurants including the historic 'Olde Leather Bottle'. The village has a Scout Group with its own premises and two Women's Institutes.

1.8. The proposal to build 2,400 dwellings would almost double the size of Leverstock Green and would subsume the village in an expansion of the Hemel Hempstead urban area. Consequently, the village character of Leverstock Green would be lost.

1.9. The community is concerned that St Albans CDC is dismissive of the village character of Leverstock Green and the impact that such a large expansion would have on the village.

1.10. LGVA submits the following representations to the Regulation 19 Local Plan

consultation.

1.11. **LGVA has reviewed the representations prepared by Redbourn Parish Council (RPC) and we endorse these representations as most of the points in RPC makes also apply to Leverstock Green.**

1.12. For the purposes of clarification, it is the Association's considered view that the Local Plan is unsound, and the Council has failed to discharge its Duty to Cooperate. The proposed scale and distribution of growth has not been justified, it has not been positively prepared, and the

policies are ineffective. LGVA considers that the delivery of growth at the Hemel Garden Communities has not been demonstrated through technical evidence including the Council's Green Belt Review, Infrastructure Delivery Plan (IDP), Viability evidence and Transport evidence.

2. **Consultation**

2.1. LGVA is concerned Leverstock Green was not included in the exhibition programme for the new Local Plan. An exhibition was subsequently added after intervention by our local DBC councillors. The event was extremely useful and was well attended by village residents.

2.2. We are grateful to the St Albans City and District Council (SADC), Dacorum Borough Council (DBC) and Hemel Garden Communities (HGC) staff for their hard work in setting up and manning the exhibition. The high level of interest shown by local residents indicated there is a great deal of concern and in some cases anger over SADC proposals to build large numbers of dwellings adjacent to Leverstock Green. This concern must not be ignored, and it is vital Leverstock Green residents are kept involved in SADC's proposals.

**3. Duty to Cooperate**

3.1. Despite SACDC's attempt to evidence that it has discharged the duty in its Statement of Common Ground (Overarching) (Autumn 2024), there is lack of substantive and up to date evidence that 'active', 'ongoing' and 'constructive' cooperation took place from the start of the preparation of the Local Plan. If further evidence of cooperation were to be submitted by SACDC in the lead up to, or after submission of the Local Plan then this would clearly demonstrate that the Local Plan and its policies were not informed by this engagement – which is, after all, the entire reason for the Duty to Cooperate as explained in the NPPF: *"effective and on-going joint working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy"*[1]. ([1] NPPF paragraph 26)

3.2. The SOCG only establishes as common ground with SACDC's strategic partners: the strategic geography and what comprises the strategic cross-boundary matters. Unfortunately, **the SOCG does not contain any substance on what constitutes the material cooperation between parties on the agreed strategic matters**.

3.3. Furthermore, we would like to highlight the fact that whilst the housing provision proposed at Hemel East will count towards SACDC's housing requirements, services and infrastructure will be provided DBC within the exiting town of Hemel Hempstead. Therefore, the taxes generated at Hemel East will go to SACDC rather than to DBC. It is our understanding that Hemel East landowners have approach the Boundary Commission about this matter suggesting that the boundary should be redrawn so that the new growth at Hemel East falls within DBC. This would clearly have significant implications for the housing land available for both Councils.

4. **Sustainability Appraisal**

4.1. We have a number of points regarding the Sustainability Appraisal (SA) which are in line with those made by Redbourn Parish Council. The SA is clearly These are summarised below:

- Without a clear understanding about what infrastructure will be delivered, its cost and how it will be funded for the largest growth area of the Local Plan at HGC, how can the SA prepare reasonable alternatives and draw meaningful conclusions to inform decisions in the Local Plan.
- By assuming that the HGC is going to be delivered under all 'reasonable alternatives' in the SA, the Plan is placing the entirety of its strategy and plan on the delivery of the HGC. If the Local Plan is found unsound and / or the HGC does not deliver as SACDC predicts (which

is very likely) then SACDC and its communities will find itself in the very position it is seeking to avoid – that of unable to defend itself against planning applications due to a lack of housing supply.

- Particularly important for Leverstock Green the SA concludes at Paragraph 5.4.25 that the scale and extent of growth should really be reduced at the southern extent of the allocation, yet they fear the risk of delaying the plan-making timetable. This is clearer a case of SACDC ignoring its own technical evidence in favour of seeking to pursue a quicker plan-making timetable even if this means the Plan will not be found sound.

*"There is feasibly the possibility of reducing the scale/extent of growth somewhat at the southern extent of the area and possibly also at the northeast extent (less clear/significant), but there is no clear case for doing so, and even fairly modest adjustments could lead to a risk of delay to the plan-making timetable"*

- As we set out in our response to Policy LG2 below there are serious concerns regarding the existing air and noise pollution in the area including east of Hemel. The Sustainability Appraisal is very dismissive of this serious threat to human health and what the potential impact is of proposing development closer to the main source of the air and noise pollution – the M1. The SA states the following about this topic which demonstrates that the SA and the Local Plan has not really taken this key matter into consideration writing it off saying that air quality concerns are decreasing over time and focusing on the modal shift assumptions in the transport evidence.
- *"Hemel Garden Communities – there are two AQMAs at Hemel Hempstead, but these are relatively distant from HGC (associated with north-south road corridors close to the western edge of the town). HGC is considered to be associated with a considerable opportunity in respect of masterplanning in support of trip internalisation and modal shift away from the private car (albeit this remains a focus of ongoing work), plus the A414 strategy / HERT represents a considerable opportunity to address air quality hotspots across the sub-region (for example, Hertford is constrained). However, benefits would be felt in the long term, and air quality concerns are decreasing nationally over time (albeit concerns will remain, particularly in respect of particulates from roads, brakes and tiers given the weight of EVs)."*(Paragraph 9.3.2)
- *"In conclusion, a broadly neutral effect is predicted on the baseline, as per the conclusion in 2023. There is little reason to suggest that the proposed growth strategy will conflict with air quality objectives, particularly noting the location of AQMAs within the District and in surrounding areas. HGC is supported, but there is inherently an element of uncertainty and risk around achieving the high levels of modal shift (away from use of the private car) that are being assumed for the purposes of traffic modelling*." (Paragraph 9.3.4)

5. **Overall Timing and Housing Needs**

5.1. LGVA is concerned that the Regulation 19 Local Plan has been prepared in haste in order to avoid higher housing need / requirements through the proposed NPPF consultation.

5.2. We question whether SACDC has used the South West Hertfordshire Local Housing Needs Assessment (September 2020) to arrive at its housing need figure? This study was undertaken four years ago (2020) which is a considerable time ago and should be considered by SACDC to be an out-of-date evidence base document. Policy HOU2 (Affordable Housing) refers to a Local Housing Needs Assessment (LHNA) dated 2019 however this does not appear in the Draft Local Plan Evidence Base on SACDC's website

5.3. As we set out in our representations the Local Plan and particularly the Hemel Garden Communities allocations are not backed by sufficient or sound evidence to justify their inclusion in the Plan. Given that HGC is by far the most strategic development in the Local Plan and requires a very significant proposed release of Green Belt, the Local Plan should not be rushed through the way it has. This will only lead to the Local Plan either the Plan being at Examination for an

extended period of time due to it requiring quite fundamental modifications to make it sound or it will be found unsound with no potential for its fundamental flaws to be modified leading to its withdrawal and SACDC will need to go back to the start of the process once again.

5. **Exceptional Circumstances and Green Belt**

6.1. Leverstock Green is defined by its semi-rural environment with Green Belt to the east, south and southwest of the built-up area. These areas are prime agricultural land which creates a green buffer around Leverstock Green and which needs to be protected wherever possible. The loss locally of such a significant amount of prime agricultural land is considered foolhardy in the current climate.

6.2. The Draft Local Plan (both Reg. 18 and Reg. 19 versions) fail to state what 'exceptional circumstances' there are for proposing the Draft Local Plan sites in the Green Belt.

6.3. The Green Belt Exceptional Circumstances Evidence Paper gives no evidence of discussions between SACDC and neighbouring authorities regarding meeting development need. It does not include demonstrated evidence of making as much use of brownfield and underutilised land, and there is a lack of demonstration of density optimisation. LGVA contests that the Council has demonstrated examining fully all reasonable options for meeting its identified need for development before concluding that exceptional circumstances exist to justify changes to Green Belt boundaries.

6.4. The site was considered as part of the 2014 Green Belt Review which looked at this area in the assessment of Site S2. Figure 1 shows the entirety of the site and highlights Site 2b in yellow as an area recommended as potentially suitable for release.

6.5. This area of the site infills development from the built-up boundary of the adjacent urban area up to the M1. The remainder of Policy S6 iii site 'East Hemel Hempstead (South)' is not recommended for Green Belt release in the Green Belt Review, as a result of the area being constrained by having an open landscape character which would make development visually prominent from both a local level but also from some mid-range views from land to the east of the M1 motorway. The study instead recommends that landscape features, planting and hedgerows should be retained in this area, in order to 'reduce the visibility of any future development from the key transport corridor and wider countryside' (para 4.6.10, Green Belt Review, 2014).

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 1***

*Figure 1: The yellow area indicates the area of East Hemel Hempstead (South) considered appropriate for Green Belt release with the rest of the site retained as recommended by the Green Belt Review (2014)*

6.6. The Green Belt Review Methodology (Section 4) includes an assessment of settlement area buffer zones. We suspect strongly the Green Belt Review was influenced by SADC to suit the purposes of the draft Plan. Despite Hemel Hempstead qualifying as a 'highest order settlement' with 400m buffer zones, the review uses the presence of the M1 to conveniently justify the removal of the buffer zones from the whole of the East Hemel area. If the buffer zones had stayed in place, the number of dwellings which could accommodated in East Hemel would be reduced considerably. This would also significantly reduce the HGC ambition to build 11,000 homes. We consider the 400m buffer zone should be applied to the whole of the Site H4 East Hemel (South) (Green Belt Review Sub-Area SA165).

6.7. The 2023 Part 2 Green Belt Review determines that the southern parcels (SA-162, 164 and 165) that all of the parcels perform 'strongly' against the NPPF purposes.

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 2***

*Figure 2: Part 2 Green Belt Review (2023) Figure 5.12 Overall performance against NPPF purposes – South*

6.8. The Part 2 Green Belt Review ultimately concludes the majority of the parcels are not considered any further.

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 3***

*Figure 3: Part 2 Green Belt Review (2023) Figure 5.18 Recommendations - South*

6.9. It is therefore perplexing to then see the Local Plan's allocation proposal to allocate (H4 – see below) the entirety of SA-164 and SA-165 and release the whole of the Green Belt within these parcels apart from the very southern tip

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 4***

*Figure 4: Local Plan Part B H4 - East Hemel Hempstead (South), HP2 4PA*

6.10. Therefore, exceptional circumstances have not been set out or justified by SCDC and its own Green Belt evidence since 2014 does not support the allocation of the East Hemel South yet SACDC has proposed it for allocation and Green Belt release in any case despite there being a lack of justification to do so.

6.11. **Green Belt Policy LG5:** We question part b) of this policy. It seems to be attempting to open the door for 'New state schools' in the Green Belt and we do not see where this is supported in the NPPF. It also includes "The creation of new transport infrastructure" in the Green Belt yet the wording in the NPPF is in relation to "local transport infrastructure which can demonstrate a requirement for a Green Belt location" and is only 'not inappropriate' in the Green Belt provided that it preserves its openness and does not conflict with the purposes of including land within it. **Policy LG5 is not consistent with national planning policy for the reasons explained above, therefore it is not a sound policy**.

7. **Policy SP1 (A Spatial Strategy for St Albans District)**
   **Policy LG2 (Support for Transformation of Hemel Hempstead) Site Allocation H4 (East Hemel Hempstead (South)**
   **Policy LG3 (Hemel Garden Communities Growth Areas Place Principles)**
   **Policy HOU6 (Gypsies, Travellers and Travelling Showpeople) Policy TRA2 (Major Transport Schemes)**

7.1. LGVA recognises some additional housing is required and supports modest and proportionate development. However, we object strongly to the sheer scale of the SADC proposals which would envelope and overwhelm Leverstock Green. Despite being part of the Hemel Hempstead urban area since the construction of the new town from the 1940s, Leverstock Green retains a distinct and proud village character and a strong sense of community. Under the proposals, Leverstock Green would nearly double in size and would lose much of the surrounding Green Belt which defines its identity. The character of the village would be changed out of all proportion, and the necessary infrastructure requirements would be unsustainable in a village environment.

**Hemel Garden Communities**

7.2. We recognise the vision of HGC, but we are concerned there is no comprehensive infrastructure and transport plan to support the proposals. We also have misgivings that such a large-scale project involving two local authorities and multiple other agencies over such a protracted period is deliverable.

7.3. We appreciate the planning is at an early stage, but the task of coordinating all aspects of the HGC will be a major challenge. The timely delivery of infrastructure and particularly roads will be essential.

**Scale of Housing**

7.4. The plan envisages 2,400 dwellings in the East Hemel South area adjacent to Leverstock Green. This represents 18% of SADC's total requirement. The proposed allocation extends from J8 of the M1 to the point where the A414 and A4147 cross the M1. We believe this area of 142

hectares is inadequate to accommodate over 2,000 dwellings at an acceptable level of density. Moreover, as already explained, the Green Belt Reviews recommends that only the smaller area adjacent to Junction 8 of the M1 should be considered for possible release. This equates to a gross housing density of 17 dwellings per hectare (dph) which does not even factor in the southern tip of the site which is within the allocation site yet is proposed to be retained as Green Belt. We have done a rough calculation of the amount of Green Belt appears to be retained at the southern tip of the allocation which is approximately 15.3 hectares. The potential developable area of the allocation is reduced from 142 hectares to 126.7 hectares as a result. The gross housing density is then increased to 19 dph.

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 5***

*Figure 5: Measurement of Green Belt retained in Allocation H4 - East Hemel Hempstead (South). Source: Google Maps*

7.5. As already set out in relation to the Sustainability Appraisal the matter of noise and air quality have not been properly assessed as part of the plan making process. The above gross housing density calculations do not take account of the other parts of the site that will need to be 'netted off 'due to other constraints with a key constraint being the M1 which clearly has an air and noise pollution factor that requires considerable mitigation. We have reviewed Defra's 2019 Road Traffic Noise Levels mapping to see what this means for the Local Plan Area given the heavy traffic and congestion in the area including the presence of the M1.

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 6***

*Figure 6: Defra (2019) Road Traffic Noise Levels Lden (day-evening-night) 24 hour annual average noise level in decibels with weightings applied for the evening and night periods Accessed:* http://www.extrium.co.uk/noiseviewer.html

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 7***

*Figure 7: Defra (2019) Road Traffic Noise Levels Lden (day-evening-night) 24 hour annual average noise level in decibels with weightings applied for the evening and night periods. Source:* http://www.extrium.co.uk/noiseviewer.html

7.6. As one can clearly see from the above mapping the noise levels east of Hemel do not appear to be safe and high density housing and employment in the area is going to further exacerbate this issue. It is very difficult to see how mitigation measures could greatly impact the noise and air pollution from the M1. In any case this area appears to be an unsafe and unsuitable location to allocate strategic housing that is meant to be 'sustainable' when its future residents will be exposed to unhealthy levels of pollution.

7.7. As a consequence of these strategic issues alone, as outlined above, the number of residential units in the H4 area should be drastically reduced, probably to less than 1,000 dwellings.

7.8. The Local Plan Part B Allocation for site H4 includes a number of development requirements which we list below. We seriously question how all of these requirements can fit onto a site when its strategic constraints are considered. We list a number of these requirements below:

- SANG Requirements
- BNG Requirements (aims to exceed 10% minimum target)
- High quality design and buffer zones to mitigate adverse impacts from motorway noise and air pollution and address the Buncefield oil depot and pipelines
- There is a major surface water flow path across the centre of the broad location, and three associated smaller flow paths
- Three extra-care facilities comprising of 70-80 self-contained units in each facility, two 70-80 bed nursing homes and 9 supported living units for people with disabilities.
- One new 3FE and one new 2FE primary schools

- 15-20 pitches for Gypsy and Travellers using best practice on location and design
- Land will be safeguarded for access improvements associated with Junction 8 of the M1 motorway, in case it is required to come forward for junction improvements
- The layout and design of development should minimise any harm to the setting and significance of listed buildings
- Recreation space and other community facilities
- Take appropriate account of these Environmental Constraints: Source Protection Zone (SPZ) 1; Bedrock Aquifer.

7.9. Whilst one could suggest that it will 'all be solved' in the masterplanning work, this is setting the Local Plan up for failure and the delivery of 'over development' on previous Green Belt land.

7.10. Furthermore, LGVA has serious doubts about the sound planning of infrastructure of HGC in terms of SACDC and on cross boundary infrastructure with neighbouring authorities. The Infrastructure Delivery Plan, Housing Trajectory and Viability Evidence provide us with no confidence that there is a coherent and sound plan for the coordination and delivery of the infrastructure to deliver the HGC and the quality of place-making set out in Policy LG3 (Hemel Garden Communities Growth Area Place Principles).

7.11. **LGVA has reviewed the representations prepared by Redbourn Parish Council (RPC) and we endorse these representations as most of the points which RPC make also apply to Leverstock Green.**

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

For the purposes of clarification, it is the Association's considered view that the Local Plan is unsound, and the Council has failed to discharge its Duty to Cooperate.

The proposed scale and distribution of growth has not been justified, it has not been positively prepared, and the policies are ineffective. LGVA considers that the delivery of growth at the Hemel Garden Communities has not been demonstrated through technical evidence including the Council's Green Belt Review, Infrastructure Delivery Plan (IDP), Viability evidence and Transport evidence.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Reg 19 Leverstock Green Village Association vf_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Leverstock Green Village Association (LGVA) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Hemel Hempstead LGVA considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

Respondent: Company/Organisation: Name: Roger Stokoe

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

To St Albans Planning Team and The Crown Estate

I am [redacted] years of age and unlikely to be directly affected by the proposal to cram thousand of houses on the well farmed fields , which lie between Westwick Row and the M1/A414 and close to the confluence of the M1 and M25. However, as a parent and grandparent, I am very concerned about the impact of cramming so many houses on public health, the environment, the motorway and road systems all evidenced by a lack of strategy and coordination with planning authorities to the north and south of the proposed developments. The whole plan seems to be predicated on an isolationist approach where obvious current and future problems are simply ignored. I am not against the need to provide houses opposite ,but deplore the lack of creativity and thoughtfulness which applies to the draft plan.

**PUBLIC HEALTH**

It is very disappointing that nothing has been learnt from the previous plan where criticism of siting schools close to the motorways have been ignored and, in fact made worse. The draft plan places a primary school close to junction 8 of the M1 where, in addition to pollution from thousands of

vehicles, the noise, particularly when the wind blows from the east ( very regularly) is deafening. This was raised at one of the exhibitions of the plan with a member of the Crown Estate whose response was irresponsible namely" the noise could be " mitigated" by acoustic barriers. The same person also decried the pollution from the motorway saying that the advent of electric cars would mitigate the problem, ignoring the fact that thousands of electric vehicles stil produce deafening noise- and pollution from tyres( A university of Plymouth study refers).

Similarly, when suggesting to another member of the Crown Estate that placing playing fields very close to the confluence of the M1/25 was not a good idea, defended it by asserting that in many places elsewhere in the country, such facilities were close to roads and M ways. A golden opportunity to be creative in the interests of public health will be lost- why not place playing fields further from the motorways on what is a huge site for housing?

Concerns about the Crown Estate's attitude to the site is that a decision has already been made ( without any consultation) to close down and move Westwick Row farm, currently used as a well run stables.If the Crown Estate is serious about providing homes for the future and " green spaces" why not keep the the stables as a rural facility adding to the so called " Hemel Garden community. One can only guess that because of the size of the farm and the grazing fields they can instead be used to provide 2-300 hundred houses?

The farmland helps to provide a green lung for local people( despite a CE person decrying this) and is important given the state of the trees planted on the bund. When the bund was created 30+ years ago, local residents were told that planting trees would muffle the sound and help to counteract pollution . Sadly , this prediction was found wanting and, via an admission from the Environment Agency, the stunted trees and shrubs on the bund are a direct result of pollution and does not mitigate the noise from the motorways.

Given that the Buncefield pipeline runs alongside the bund, limiting the scope to increase its height, one solution might be to create a secondary set of woodland at the western edge ; a stretch of planted trees would help to mitigate noise and pollution, provide a corridor for wildlife and a pathway for cyclists and walkers and would protect the pipeline .

**THE ENVIRONMENT**

The draft local plan is subject to extant issues as far as the environment is concerned with 8 lanes of motorway running from north to south via the M1 and similarly with the confluence of the M 1/ M25 , the latter providing another 8 lanes from east to west, notwithstanding the A 414 abutting the local plan sites and adding 4 lanes to the M1. This major challenge can only be mitigated by planting many more trees ( one per household according to the plan)and allowing more rewilding which, in turn encourages wildlife. This aspect gets short shrift in the plan and needs to be given a greater priority. Currently, the bund provides a safe haven for Roe deer, muntjacs, foxes and birdlife. The hedgerows and fields attract skylarks, starlings and sparrows are making a comeback and yellowhammers and other summer visitors use the wild aspects of the bund. How can this be protected and add to the so called garden community?

The concept of the garden community( used liberally as a platitude for promoting housebuilding across the country)is diminished by the building of huge warehouses adjacent to junction 8 of the M1 and abutting the A414. The planned housing opposite by Green Lane will be overshadowed by these huge warehouses , hardly promoting a garden community. Not encouraging.

**THE MOTORWAYS AND ROAD NETWORK**

The plan states that an infrastructure would be provided with roads, cycleways and footpaths , glossing over the fact that thousands of houses will mean many more cars on the roads and motorways. The current road and motorway network struggles to cope with the volume of traffic- is the aim to induce gridlock most of the working day? Ignoring the current expansion of thousands of houses north of Luton, proposals to build even more north of Harpenden, Chiswell Green and

the construction of a rail freight terminal south of St Albans is irresponsible- to say the least. Those responsible for poor strategic planning will not be around to face the consequences 20 years hence.

**A NEW AND AMBITIOUS PLAN?**

The reality is, sadly rather different ,with the new local plan being remarkably similar to the previous local plan with the same layout; no doubt that as per the previous consultation, the planned number of houses will rise by over a thousand. Cramming seems to be the underlying plan rather than a great opportunity to do things differently and obtaining the support of all those affected by a new housing development.

**It is worth quoting from one of the principals involved in the previous plan namely " it really does not matter about local objections because we will apply to the Secretary of State and they will find in our favour!" Arrogant and self-serving but correct given the recent decision to allow the building of over 700 homes at Chiswell Green.**

**A POSITIVE APPROACH**

Not just my view but mirrored by the workshop held by TOWN on the 17th October, where it was clear that there was strong support for a greener environment from most of the attendees:

Useful exemplars of other green housing developments:

in the last 30 years the former hospitals in St Albans at Cell Barnes and Hill End are now the sites of pleasant housing developments largely built with the support of local people. The former Leavesden Airfield is another good exemplar with a mix of terraced, semi- detached and detached houses with small blocks of flats and plenty of green spaces- please take due notice.

**Please retain the existing trees and hedgerows which support a returning of threatened species of birds , large areas of green spaces for skylarks and other bird and wildlife to thrive. Plant trees adjacent to the M1 and as a screen for the massive warehouses ( are they green and sustainable with ground source heat pumps etc?) if the Hemel Garden community is a serious plan more account needs to be taken to keep trees, create more woodland and open spaces and avoid the cramming of houses seen in so many other new housing developments.**

**A golden opportunity to provide a modern and greener housing plan for the future - new and ambitious- is the rhetoric- what will be the reality?**

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The draft allocation of primary interest to bp is H3, which includes the currently agricultural land located between Punchbowl Lane to the north, the M1 to the east, the A414 to the south and Green Lane (and the boundary of the site) to its west. This is because the allocation is immediately adjacent to the subject site. It is noted H3 proposes around 6,000 new jobs (point 21).

Whilst the majority of the development in allocations to H1-H4 inclusive is anticipated by the draft plan to be delivered by 2041, the draft Local Plan horizon, it identifies that some delivery is likely to
take place post-2041.

**Impacts on bp's operations**
It should be noted that bp does not object to the principle of major housing and employment designations. However, the effect of the allocations, if built out, will result in significantly greater levels of residents, works and visitors in closer proximity to the subject site.

This is the case both in the construction phase as the development and associated infrastructure works are built out, and once the allocated developments are operational. The health, safety and security of bp's workforce and the communities in which they operate is of critical importance to the business.

The draft Local Plan allocations H1-H4 inclusive may:
• increase the number of people in close proximity to a COMAH regulated site, particularly with development proposed for agricultural land to the east of the site
• limit bp's ability for any potential future expansion in relation to the site such as new fuel storage tanks and equipment
• potentially compromise the long-term viability of bp's operations from its Hemel Terminal site

bp do not object to the principles of the allocations relating to the HGC, however, we seek to highlight to SADC issues that need to be carefully considered as the draft plan progresses.

bp request that the importance of its Hemel Terminal is recognised and that draft site allocations H1-H4 are amended as required to ensure the continued safe and viable operation of its facility, both now and in the future.

We welcome a collaborative approach on the drafting of the policy wording with SADC officers/Members in order to achieve this objective.

We assume the views of the Health and Safety Executive (HSE) and the Environment Agency have been sought on the allocations - in particular given the subject site is regulated under the Control of Major Accident Hazards (COMAH) Regulations 2015 - and will be fully considered as the draft Local Plan moves forward. We also urge you to consider the views of the downstream oil team (energy security) at the Department for Energy Security and Net Zero.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**323 - Diana Ngobi**

Submission Number: 323 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: National Highways Name: Diana Ngobi

Comment Number: 2

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Hemel Garden Communities (HGC) Programme is a proposal to transform Hemel Hempstead through the regeneration of the existing town and delivery of new housing and infrastructure in St Albans City & District Council and Dacorum Borough Council areas. Within St Albans District, the HGC Growth Areas will deliver at least 4,300 new homes by 2041, with a further 1,200 homes by 2050, providing a total of 5,500 new homes. Further housing growth within the area north and east of Hemel Hempstead, Two Waters and Hemel Hempstead Town will be set out in Dacorum's Local Plan. We note that this has the potential to put pressures and traffic impacts on the SRN and its junctions.

We would also seek to understand if/how the Council plans to have an overarching monitor and manage policy which addresses the cumulative traffic impacts of this growth area and the collective impact on the SRN.

The HGC Transport Vision and Strategy document (TV&S) sets out a sustainable movement network approach for the long-term growth and transformation of Hemel Hempstead and wider routes. The approach ensures the HGC programme area can be developed as a successful, integrated, well-connected place. The site has ambitions to achieve a town-wide sustainable transport network with a target of 60% of all journeys starting, ending or within the HGC growth areas and 40% of all journeys starting, ending or within the existing town of Hemel Hempstead, to be undertaken by active and sustainable modes by 2050.

We support the local authority's proposals that considers sustainable transport measures, which manage down demand and reduce the need to travel. We are open to discussions surrounding the district's plan to safeguard land, design, fund, deliver and monitor a package of transport measures to enhance M1 Junction 8 (M1 J8) and surrounding area, in association with Hemel Garden Communities (HGC).

Physical highway improvements for the SRN should only be considered as a last resort. We note that there cannot be any presumption that such infrastructure will be funded through any future RIS (Road Investment Strategy). We strongly recommend that there is no reliance placed on RIS funding to realise capacity for growth in the Plan within the plan period.

Housing and Employment Allocations:

We note that the housing requirement over the plan period is 10,808 across 98 sites in the St Albans area. H2 - East Hemel Hempstead (North) site directly borders the M1 and will provide 1,600 residential units (indicative) in total (1,235 in plan period). The site is to the east of Hemel Hempstead, between the B487 to the north, the M1 to the east and Punchbowl Lane to the south. The site is adjacent to Hemel Hempstead and forms part of the wider Hemel Garden Communities programme.

The site aims to improve and enhance countryside access links including connections under the M1 motorway. These links will require close collaboration with both National Highways and our service partner when an application comes forwards.

Site H3 and H4 East Hemel Hempstead (Central and South) also form part of the Hemel Garden Communities programme and similarly borders the M1. The proposals include mention of land to the east of Junction 8, which will be safeguarded for access improvements associated with Junction 8 of the M1 motorway, in case it is required to come forward for junction improvements.

Site H3 is also classified as Employment Led Mixed Use (Enterprise Zone), approximately 17 hectares of the site will promote high density, higher skilled employment uses to deliver a Business, Research and Development Park and explore opportunities for education. National Highways will be interested in understanding how traffic impacts will be reduced and mitigated as work on this site progresses due to the proximity of the SRN.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

National Highways will be interested in understanding how traffic impacts will be reduced and mitigated as work on this site progresses due to the proximity of the SRN.

### 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 9

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraph 35 and 36 of the 2023 NPPF require that local plans be compliant with national policy. To do so they must comply with the other policies of the NPPF.
The successful delivery of the Hemel Garden Communities (HGC) programme in St Albans will be reliant on the agreement and delivery of on-site infrastructure within the site allocations in the Dacorum & St Albans local plans as well as off-site infrastructure across the settlement of Hemel Hempstead. The local plan as respects the HGC programme must therefore meet NPPF requirements for both infrastructure delivery and dealing with relevant cross-boundary issues. NPPF paragraphs 16 (c) and 25 make explicit the need for infrastructure cooperation across boundaries where appropriate.
Both the St Albans and the Dacorum local plans include an Infrastructure Delivery Plan as evidence to support their own local plans. This is needed to evidence the

requirement at NPPF paragraph 11 (a) that plan-making demonstrate sustainable development. Paragraph 110 places further requirements on plans to include policies to deliver infrastructure that ensures positive outcomes. However, the St Albans IDP, prepared by Arup following extensive engagement with HCC, does not include the infrastructure required to deliver the Hemel Garden Communities allocations in St Albans.
The successful delivery of HGC requires a similar IDP to that which supports this plan. The HGC IDP will need to identify the strategic-cross boundary infrastructure that will be required to mitigate HGC's growth, as well as the infrastructure that will need to be delivered beyond the plan periods of the emerging St Albans and Dacorum local plans. The HGC IDP is currently being prepared and should be available for the examination of the emerging local plans that allocate the HGC

land parcels for development. The output of that work, as it relates to the identification, timing, costing, location and delivery agents of infrastructure, will be needed to ensure the necessary mitigations to deliver HGC allocations are incorporated into the plan and tested at examination. The soundness of the plan would benefit from a clearer, more refined policy that will govern the delivery of (cross-boundary) infrastructure required to facilitate the delivery of the garden community. Any decision-maker for any application within St Albans must be directed to consider the strategic cross-boundary impacts of development of this scale in this location when making their decision. Such a policy would provide a framework to ensure applications deliver mitigations identified in both the St Albans IDP and HGC IDP where appropriate.

The county council recommends the below changes to policy as respects Hemel Garden Communities:

Part A LG2: The cost apportionment sentence (No.5, Page 26) in Strategy Policy HGC1 – Transformation of Hemel Hempstead of the DBC Local Plan to 2041 Pre-Submission Version for Approval is not in the corresponding SADC policy. For consistency, we suggest it is added into the SADC Policy LG2:

The methodology for infrastructure apportionment and cost sharing is set out in the Local Plans Infrastructure Delivery Plans (IDPs). Infrastructure, contributions and wider funding will be required to deliver on and off-site infrastructure, in accordance with the above documents

Part B LG3: Suggest amending the text as at present working assumptions are that the Household Waste Recycling centre is to come forward separately from the district council provision.

Delivery of Key Projects including a Household Waste, a Recycling Centre, and Local Authorities Depot facilities to meet the needs of new and existing communities

Part B H1, H2, H3, H4: Suggest adding in the following text into each policy to ensure key transport schemes are included:

*The provision of essential transport infrastructure, the detail of which will be identified through the HGC IDP, including mitigating the impact of traffic associated with the development; appropriate consideration of M1 Junction 8 improvements and access arrangements for wider Hemel Hempstead, the provision of appropriate financial contributions towards A414 bridge and wider highways network improvements and access arrangement for HGC and wider Hemel Hempstead, provision of appropriate public transport (services and infrastructure) serving the site; and provision of a comprehensive network for pedestrians and cyclists with good connectivity provided to adjoining areas, including a particular emphasis on improving linkages to Hemel Hempstead Station as a transport interchange*

Paragraph 35 and 36 of the 2023 NPPF require that local plans be effective. To do so they must be considered deliverable within the plan period.

Policy LG2 under the ‘delivery’ heading states that Compulsory Purchase Order (CPO)powers may be required in order to deliver the Hemel Garden Communities (HGC) scheme:

High quality new development, and infrastructure will be planned and phased in a timely manner to ensure infrastructure and transformation opportunities are maximised. To enable this, the Council and other relevant bodies will consider use of statutory powers including compulsory purchase.

This paragraph is vague and does not resolve which bodies the plan expects to be responsible for exercising CPO powers for which purpose. Local authorities have CPO powers for different purposes, such as those available to HCC under the Highways Acts for highways purposes and those available to the LPA under the

Town and County Planning Act 1990 for planning purposes. These powers are statutory and available irrespective of the local plan. However, the exercise of CPO powers comes with substantial lead in times and legal complexity and risk. The Hemel Garden Communities (HGC) allocation

also relies on infrastructure being delivered prior to occupation to enable behaviour change and mode shift. Therefore if it is anticipated that CPO powers will be required to deliver the HGC programme, there needs to be clarity on who is leading the process, under what authority, and for what purpose, to avoid risks to the delivery of land or key infrastructure at the point it is required.

Therefore to be considered deliverable any expectation that any authority should be responsible for land assembly or delivery of key infrastructure prior to occupation should be clearly made at the outset.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To be considered sound the plan must:

1. Incorporate the completed HGC IDP into the evidence base of the local plan (including viability testing the outputs); and
2. Include a new strategic policy either in place of or preceding policies LG2 and/or LG3 that requires all HGC development to comply with the HGC IDP.

Firstly, the completed HGC IDP must be included as part of the evidence base for the local plan and tested as part of the examination process. NPPF paragraph 20 expects plans to make sufficient infrastructure provision, while paragraph34 requires plans to set level of development contributions that will be required to support the plan. The HGC IDP will evidence the infrastructure schemes that will be required to support HGC as a whole. This work is ongoing with the support of HCC, and we expect that this should be available to be inform the local plan examination. This point is made to ensure that appropriate provisions are made in the plan to ensure infrastructure required to fund growth in Hemel Hempstead as a whole is understood, fixed in local plan policy and funding sought from all development schemes that will benefit from the infrastructure.

Secondly, a new strategic policy should set a clear framework for the delivery of the HGC programme as a whole within St Albans. This could potentially replace parts of policy LG2. This would leave the remainder of LG2 and LG3 as subsidiary non-strategic policies setting out some of the intended policy outcomes. The below policy wording is suggested as a draft pending further discussion, for example, as to the exact documents that need to be prepared at HGC scale to evidence the infrastructure needed before applications can be determined:

***Policy SP(X): Phased Development and Infrastructure Funding in Hemel Hempstead Garden Community***

1. ***Charter Principles and HGC Spatial Vision****: Development proposals should reflect the Hemel Garden Communities (HGC) Charter Principles and HGC Spatial Vision which set out the ambition for the development of Hemel Hempstead and the wider area. Applications should also promote the four thematic pillars of the HGC Vision*
2. ***Growth Area Proposals:*** *Planning applications within the growth area should also adhere to the requirements of Policies LG2 – Support for Transformation of Hemel Hempstead, LG3 – Hemel Garden Communities Growth Areas Place Principles and LG4 – Large, Medium and Small Sites*

3. ***Phased Development**: Development sites within the Hemel Hempstead Garden Community area (HGC) shall only be permitted once the infrastructure requirements of the wider garden community are comprehensively identified, planned and set out in a comprehensive, and iterative, IDP. This includes, but is not limited to, transportation networks, utilities, educational facilities, healthcare services, and green spaces.*
4. ***Strategic Contributions**: Development proposals will be required to make a wider strategic contribution in terms of safeguarding or reserving land and funding and/or delivering strategic infrastructure that is required to mitigate the impacts of new development on the Hemel Hempstead settlement and the surrounding area, as identified in the Hemel Hempstead Garden Community Infrastructure Delivery Plan (HGC IDP).*
5. ***Evidence Base Compliance**: Planning permission shall only be granted once key HGC documents are in place, including the HGC IDP [and any SPDs or Development Framework Document, or a more detailed form of the Framework Plan] and proposals can demonstrate compliance with the*
6. ***Cross-Boundary Effects**: Any application must consider and assess cross-boundary impacts between St Albans and Dacorum, including cumulative impacts with other anticipated developments within the local plan(s) including windfall sites.*
7. ***Comprehensive Masterplan Proposals**: Individual masterplan proposals must accord with development aspirations of the entire HGC area and contribute positively to the transformation of Hemel Hempstead, and must not prejudice or impede the provision of strategic infrastructure in the phased manner identified in the HGC IDP. Any such masterplan is to be prepared and agreed between the landowner/developer and the Council. Where applications have already been submitted to the Council a masterplan should be agreed prior to the or as part of the grant of planning permission.*
8. ***Monitoring and Review**: The implementation of this policy will be monitored regularly by the establishment of a stakeholder Hemel Hempstead Infrastructure Review Group (and any necessary subgroups) to ensure compliance, effectiveness. Adjustments to the policy may be made based on the outcomes of these reviews so that the local authorities have the ability to address any emerging issues or changing circumstances.*

Taken together, these modifications would ensure that the decision-maker has a cross-boundary IDP that takes into account the cross-boundary impacts on the transport network (and other key infrastructure, such as secondary schools, for example) before them when approving any planning application within the HGC area. This would, in turn, fulfil the requirements and outcomes of the NPPF at paragraphs 11 and 110.

To be considered sound the plan must clarify who is expected to use CPO powers and for what purpose.

Under the Town and Country Planning Act 1990 the LPA holds CPO powers to enable regeneration and development of land. If the policy wording at LG2 is intended to refer to these powers, the supporting text should clarify this position and ensure that they are used to assemble land for both housing and infrastructure as a single package as follows:

*3.45 The Town and Country Planning Act 1990 grants St Albans City and District Council and Dacorum Borough Council, as the LPAs responsible for Hemel Garden Communities, CPO powers to enable development. The LPAs expect to use these powers, if required, to assemble land and provide for key infrastructure aligned to housing delivery*

This would give some further clarity to the expected use of CPO powers if these are the powers to which the LPA is referring in the plan

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

2. 10 HGC (non soundness issue)_[R].pdf
3. 6 HGC CPO Mechanism_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

HCC is a partner in the HGC programme and as Highway Authority has a statutory responsibility for and interest in the successful delivery of the HGC programme. It is therefore essential that HCC be able to participate in any discussion on the delivery of the HGC sites and infrastructure policy.

HCC is a partner in the HGC programme and as Highway Authority has a statutory responsibility for and interest in the successful delivery of key infrastructure.

POLICIES FOR HEMEL GARDEN COMMUNITIES

We support Policy LG1 – Broad Locations – which establishes a clear set of policy requirements for the HGC Growth Area and recognises the importance of a coordinated approach to the planning, design and delivery of homes and associated infrastructure.

We further support the Local Plan commentary relating to Hemel Garden Communities, and the inclusion of Figure 3.2 *Indicative Concept Plan for the HGC Growth Areas* to provide appropriate and proportionate spatial direction for the Growth Area. We welcome the clarity provided at 3.53 about the intention to bring forward two SPDs and we will continue to engage with the HGC partners on these documents as they come forward.

We are supportive of thrust of policies LG2 and LG3 and welcome the inclusion of a clear set of principles for the subsequent stages of planning and delivering high quality growth.

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Kitewood Estates Ltd ('Kitewood') welcome the opportunity to comment on the Draft Local Plan 2041 Regulation 19 ('the Reg 19 Local Plan') and the supporting documents that have been published for consultation.

We understand that following the consultation, all representations will be sent to the Planning Inspectorate along with the draft Local Plan to be Examined by a government-appointed Planning Inspector who will consider if any modification need to be made to the Local Plan before it can be adopted.

The Planning Inspector will assess whether the draft Local Plan has been prepared in accordance with legal and procedural requirements, and whether it is 'sound'.

This representation is therefore focused on matters relating to soundness.

**Kitewood Interest in the Draft Plan**

Kitewood is a development company and landowner of part of the proposed Hemel Garden Communities (HGC) Growth Area to the north and east of Hemel Hempstead. Our landholding falls wholly to the north within Dacorum Borough, and abuts the boundary with the St Albans City & District, adjacent to the Reg 19 Local Plan proposed allocation H1- north Hemel Hempstead.

HGC (including the proposed Growth Area) is a collaboration between Dacorum Borough Council, St Albans City and District Council, Hertfordshire County Council and Hemel Garden Communities, and is supported by the Hertfordshire Local Enterprise Partnership. The landowner group, of which Kitewood is part of, have continued to work positively with HGC partners in progressing the ambitious proposals for growth and transformation.

The HGC Growth Areas to the north and east of Hemel Hempstead are expected to extend beyond the Plan period and will deliver up to 11,000 new homes and 10,000 new jobs by 2050 across St Albans District and Dacorum Borough.

The HGC Growth Area is consistent with the government's strong aspiration to boost the delivery of new homes and infrastructure in a comprehensive manner. It is also aligned with the government's agenda to facilitate the delivery of New Towns.

The plan extract below from *Hemel Garden Communities Position Statement* dated July 2024 identifies the full extent of the north and east Hemel Hempstead Growth Area.

**Hemel Garden Communities Program Area extract from the *Hemel Garden Communities Position Statement***

***See 'Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024' attachment for figure***

The proposed HGC Growth Area is supported by a comprehensive and robust evidence base, including the Framework Plan 2024, HGC Framework Plan Story (July 2024) and HGC Technical Report (Sept 2024). Further evidence is also emerging to support the Local Plans and the future planning applications.

The publication of the St Albans District Draft Local Plan 2041 Regulation 19 for consultation and the Council's intention to submit the Plan for Examination is a significant milestone for the HGC Growth Area, and we commend the Council for their continued engagement with us, the other landowners and HGC partners.

Whilst Dacorum Borough Council are slightly behind St Albans City & District Council in terms of the consultation on their respective Pre-Submission Dacorum Local Plan to 2041 (Regulation 19) which will run until 17th December 2024, we are of the view that it would be beneficial for the Submitted Plans to be Examined together given the importance of the HGC Growth Area to both authorities.

In addition to these comments, joint landowner representations are also submitted to this consultation by David Lock Associates (DLA) on behalf of ourselves (Kitewood), The Crown Estate, Pigeon Investments Limited and Bloor Homes.

*Kitewood support of the Proposed Broad Location for growth identified at Hemel Hempstead and in particular the proposed site allocation* ***H1, H2, H3 and H4:***

- **H1 – North Hemel Hempstead**
- **H2 – East Hemel Hempstead (North)**
- **H3 – East Hemel Hempstead (Central)**
- H4 East Hemel Hempstead (South)

The Proposed Site Allocations H1, H2, H3 and H4 are identified on the Key Diagram, extract below.

**Reg 19 Local Plan Fig 1.2 Key Diagram extract of the Proposed Site Allocation H1, H2, H3, H4**

***See 'Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024' attachment for figure***

These allocations (H1, H2, H3 and H4) form part of the wider HGC Growth Area and they will together deliver around 5,500 dwellings, around half of the required homes in the designated Growth Area and land for up to 6,000 jobs.

The Local Plan Reg 19 proposed that 4,400 of the dwellings (around 75% of the total) will be delivered during the plan period.

Our comments relate to the need to ensure that a fully comprehensive approach is taken across all of these allocations (H1, H2, H3 and H4) and the wider HGC Growth Area to ensure the delivery of the cross-boundary infrastructure requirements, to ensure the draft Plan's *effectiveness*.

Our concerns about effectiveness of the Reg 19 Plan relate to the current lack of detail on how the infrastructure will be phased alongside the delivery of the development, and how this aligns with the delivery of the proposed north Hemel Hempstead allocation in Dacorum Borough to ensure the vision for the Hemel Garden Communities is realised and delivered without delay.

Our Comments principally relate to Policies LG1, SP1, SP8 and TRA1.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Our comments relate to the need to ensure that a fully comprehensive approach is taken across all of these allocations (H1, H2, H3 and H4) and the wider HGC Growth Area to ensure the delivery of the cross-boundary infrastructure requirements, to ensure the draft Plan's *effectiveness*.

Our concerns about effectiveness of the Reg 19 Plan relate to the current lack of detail on how the infrastructure will be phased alongside the delivery of the development, and how this aligns with the delivery of the proposed north Hemel Hempstead allocation in Dacorum Borough to ensure the vision for the Hemel Garden Communities is realised and delivered without delay.

*We consider that for the policy to be effective a joined-up approach is required by St Albans City & District and Dacorum Borough to ensure the infrastructure items that relate to the Growth Area that are set out in the Councils' respective Infrastructure Delivery Plans are fully aligned, and these accord with the HGC Infrastructure Delivery Plan.*

*We are of the view that further consideration should be given to the comprehensive infrastructure requirements to support the overall proposed overall HGC Growth Area, the delivery phasing across the authority boundaries and mechanism for appropriating cost.*

*We therefore consider that an updated St Albans City & District IDP is required to be published in advance of the Examination in Public to incorporate all of the relevant emerging evidence base.*

*Kitewood considers that further evidence is required to demonstrate cross-boundary co-operation and cumulative impact assessments on transport matters and further information is necessary in relation to the mechanisms that will ensure the sustainable growth of Hemel Hempstead during the plan period.*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Kitewood is a development company and landowner of part of the proposed Hemel Garden Communities (HGC) Growth Area to the north and east of Hemel Hempstead. Our landholding falls wholly to the north within Dacorum Borough, and abuts the boundary with the St Albans City & District, adjacent to the Reg 19 Local Plan proposed allocation H1- north Hemel Hempstead.

Kitewood considers that the *Draft Local Plan 2041 Regulation 19 is Legally compliant*, has been *Positively prepared*, is *Justified*, and is *consistent with national policy*.

However, we do not consider that Policies SP1, SP8 and TR1 are effective because all the evidence does not yet exist to demonstrate effective joint working on cross-boundary strategic matters.

***Kitewood therefore request participation in the forthcoming Examination in Public to discuss policy matters relating to the Proposed site allocations H1, H2, H3 and H4***

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In regard to Hemel Garden Communities, we would expect consultation with NE and the Chilterns Conservation Board to help guide the delivery of required measures.

Policy LG2 –Support for Transformation of Hemel Hempstead

Natural England is pleased to see new wording regarding the policy around Hemel Hempstead and the Hemel Garden Communities programme area. It is particularly good to see intention to follow a coordinated approach between developers and promoters of the growth areas in accordance with the Local Plan Infrastructure Delivery Plans, the spatial vision, supporting SPDs and Design Codes.

Again, however, Natural England would like to see inclusion of the requirement of an LVIA assessment as part of HGC development with this specific policy.

...

Sustainability Appraisal

Having reviewed the Sustainability Appraisal that supports the Regulation 19 consultaion of the St Albans new Local Plan, Natural England is satisfied that there are no reasonable alternatives to the one growth scenario proposed in the SA regarding Hemel Garden Communities (HGC), as the alternatives discussed in the SA would not meet local and district objectives. The concept masterplan has been amended since the Regulation 18 consultation with specific reference to SANG allocation and green space requirements. It is acknowledged in the Sustainability Appraisal that the impact on the Chilterns National Landscape is a key sensitivity/ issue in regard to this development, however allocation of HGC to the east and northeast of Hemel Hempstead potentially serves to reduce pressure on the part of HGC to the north, which is likely the most sensitive in National Landscape terms. As stated in NE's Regulation 18 response, we would expect such conclusions to be supported by a robust Landscape Visual Impact Assessment. It is acknowledged and welcomed that amendments have been made to wording within the Broad Location allocation of HGC communities to reflect this:

*...be informed by a comprehensitive landscape and Visyual Impact Assessment which addresses the recommendations of the Councils Landscape and Visual Appraisal 2024.*

Natural England is content that the current growth scenario, subject to detailed design of the new SANG in consultation with NE, the aforementioned detailed LVIA and continued consultation with the Chilterns Conservation Board (CCB), will go towards mitigating effects on the National Landscape.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

In regard to Hemel Garden Communities, we would expect consultation with NE and the Chilterns Conservation Board to help guide the delivery of required measures.

...

Again, however, Natural England would like to see inclusion of the requirement of an LVIA assessment as part of HGC development with this specific policy.

## LG3 - Hemel Garden Communities Growth Areas Place Principles

### 83 - Affinity Water

Submission Number: 83 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Name: Lita Khazaka

On Behalf Of Company/Organisation: Name: Affinity Water

Comment Number: 7

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Affinity Water broadly supports the council's overall approach to addressing the effects of climate change as it relates to water use. Policy SP2 provides an overall approach and Policy CE1 – Promoting Sustainable Design, Construction and Building Efficiency - seeks to introduce the optional standards under the Building Regulations (Part G) to reduce water consumption. Affinity Water specifically supports the use of a 110 litre per person per day standard consistent with the standard adopted in the London Plan 2021. The council's approach is consistent with the evidence on likely future water stress produced by the Environment Agency and our own research in our Water Resources Management Plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Draft Local Plan approach to water conservation would be improved and made more effective if were to set out how the council will ensure "greywater recycling and storage facilities" are delivered in all major developments as well as in Broad Locations (Policy LG1 – Broad Locations and Policies LG2, LG3 and LG4 which cover the Hemel Garden Communities project as well as other site allocations in Appendix 1) to go further than "water management" and to embrace "water conservation" too. The council is also invited to make specific reference to water conservation in the various design policies in the Draft Local Plan (for example, Policy DES1 – Design of New Development and Policy DES7 – Building Servicing). That way, water conservation and broader sustainability principles would be integrated into the design process from the outset in the same way that all new development is likely to have to design in and incorporate biodiversity net gain when the relevant parts of the Environment Act 2021 come into force.

Other councils are proposing more precise ways of directing developers to address the need to use water resources more efficiently. For example, the emerging Tower Hamlets Local Plan Policy CG6 specifically requires that: *All new major residential and non-residential development proposals must install water supply and drainage pipework suitable for the separate collection of rain, grey, and foul water as well as the distribution of non-potable water throughout the development from and to all relevant fitments. All major residential and non-residential refurbishment and change of use should aim to retrofit rain and greywater recycling systems.*

Affinity Water further urges the council to ensure that the development plan policy relating to water conservation is applied in all planning applications approved after the Local Plan's adoption so that it can be applied. This is because the 110 litre per person per day standard can only be currently applied at the Building Regulations stage of construction if it is included as a condition of the grant of planning permission.

Finally, it is suggested that the council include an appropriate measure on how the Local Plan will promote water conservation that can be monitored in future Authority Monitoring Reports. This could cover, for example, the number of major developments with greywater recycling and storage facilities or the number of planning permissions for new housing that have a planning condition that will secure the 110 litre per person per day water target. This would have wider benefits for the council as it seeks to articulate further its local response to the Climate Emergency. Table 3 (in attachment) identifies the defects in the policy relative to the NPPF's tests of soundness.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 241103 Reg 19 Final Submission_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Affinity Water may just prepare written representations once it has seen the inspector's proposed agenda. It is of course open to the council to incorporate Affinity Water's suggestion to make the policy more effective. This would avoid the need to appear in front of the inspector.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 112 - Mr Richard Bullen

Submission Number: 112 Submission Date: 06/11/24 19:34

Respondent: Company/Organisation: Name: Mr Richard Bullen

Comment Number: 5

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Housing numbers: section 1.21 states that population has increased by 6% since 2011. The Dwelling Stock Estimates ((www.gov.uk/government/collections/dwelling-stock-including -vacants) (Table 125)) shows that the housing stock for St Albans District in 2011 was 58000. This had increased to 63000 by mid-2023. This increase in the housing stock is 8.26%, suggesting that there has been a diminution of housing need in the District since 2011. There is no mention of this in Regulation 19. This makes the plan unsound.

“The Local Plan sets out the planning policies and proposals for the future development of the City and District of St Albans” (Reg 19 para 1.2). Table 1.3 Settlement Hierarchy – Settlement “St Albans, Hemel Hempstead (currently in Dacorum Borough but expansion into District planned)” There are no published proposals to change the boundary between Dacorum Borough and St Albans City and District to give effect to this “expansion”. NPPF (December 2023) section 61 states “ In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for”. The housing numbers applied to the sites included in Hemel Garden Communities within the District are solely to meet the housing need of the residents of St Albans C&DC. Under the heading Duty to Co-operate, (Reg 19) Section 1.11 states that “St Albans is also working jointly with Dacorum on proposed cross boundary development at Hemel Garden Communities”. Under the heading “Hemel Garden Communities” Section 3.34 states “The Hemel Garden Communities (HGC) Programme is an ambitious proposal to transform Hemel Hempstead through the regeneration of the existing town…”. Thus, the allocation of housing numbers to HGC is for the benefit of Dacorum Borough and, as such, fails to meet the opening declaration in section 1.1. This make the plan unsound

The “St Albans Green Belt Review Final Report June” 2023, Ove Arup and Partners, Table 5.8 Recommendations, sets out those sites that are not recommended released from the Green Belt because of the “Strong” overall performance and “Important” as making a contribution to the wider Green Belt”. Sites SA-168, SA-170, SA-171 and SA-172 are all included in the HGC proposal.

The NPPF December 2023 states (para 145) “Authorities may choose to review and alter Green Belt boundaries where exceptional circumstances are fully evidenced and justified”…. There is no such fully evidenced and justified exceptional circumstances. As such, the plan is unsound

In the event was HGC is allowed to proceed, the location would act as a furtherance of the sprawl of Hemel Hempstead. Thus this is breach of the first purpose of the Green Belt. In addition, the distance between the eastern edge of the proposed development (housing) and the western edge of Redbourn (village) would be less than that between the land between Redbourn (village) and Harpenden which SADC stated was inappropriate for development as it would breach the second purpose, to prevent neighbouring towns merging into one another. Accordingly, any proposal to include a site for development west of Redbourn would not be in accordance with section 143 of the NPPF and so is unsound.

Also, in the event that HGC is allowed to proceed, it must meet the requirement of the NPPF December 2023, section 7. This states “The purpose of the planning system is to contribute to the achievement of sustainable development…” The Reg 19 section 1.24 states that the average house price within the District is £619567. There is nothing in the Reg 19 that suggests that this average will not apply to the proposed housing at HGC. Reg 19 Section 1.23 states” The rail options to London underpin the popularity of commuting out of the District.” The location of HGC is as distant as possible from the railway stations at Hemel Hempstead, St Albans City and Harpenden. Unless and until there is local employment that pays London salaries, or public transport to and from the railway stations mentioned is transformed, the HGC proposal is not sustainable and so unsound.

The consultation on the “Proposed reforms to the National Planning Policy Framework and other changes to the planning system” sets out (section 9) “Grey Belt: for the purposes of Plan-making grey belt is defined as land in the Green Belt comprising Previously Developed Land and any other parcels and/or areas of Green Belt land that make a limited contribution to the five Green Belt purposes…” Whilst the Reg 19 has been prepared in accordance with the current NPPF, assuming the draft Plan goes forward to implantation, it will be reviewed five years later. At that time, the review will take place in accordance with the NPPF then current. The sites west of Redbourn, SA-168, SA-170, SA-171 and SA-172 could not be regarded making a “limited contribution” as they have been declared by Ove Arup as making a “strong” contribution. For this reason, this plan is unsound.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Response_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

I consider it necessary to attend as SADC has made a fundamental error in ignoring the issue I raise, concerning a comparison between population growth as mentioned in Reg 19 and the greater increase in housing stock, which is not!

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 122 - Mr Roy Warren

Submission Number: 122 Submission Date: 07/11/24 09:24

Respondent: Company/Organisation: Sport England Name: Mr Roy Warren

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Pillar 1 (Green Network) is supported in relation to requirements c, f, g and h. Pillar 2 (Integrated Neighbourhoods) is supported is supported in relation to requirements c, k, l and m. All of these requirements would collectively support the development being designed to encourage physical activity which would accord with Government policy in paragraph 96(c) of the NPPF and Sport England's 'Uniting the Movement' Strategy https://www.sportengland.org/about-us/uniting-movement. Pillar 2 requirement m is particularly welcomed as it would provide for a strategic and co-ordinated approach to delivering sport and physical activity across the HGC Growth Areas which is required to ensure that the sport and physical activity needs of the development are fully met in practice.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

---

## 248 - Historic England

Submission Number: 248 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Historic England Name:

Comment Number: 20

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**LG3 - Hemel Garden Communities Growth Areas Place Principles**

There is currently no mention of the historic environment in the Place principles. We recommend an additional criterion be included to recognise the importance of the conservation and enhancement of the historic environment as well as its key role in placemaking.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## 249 - Dr Phil Wadey

Submission Number: 249 Submission Date: 07/11/24 22:06

Respondent: Company/Organisation: Patchetts Green Bridleways Trust Name: Dr Phil Wadey

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy LG3 para (h) says, "Enhance and improve Public Rights of Way including to existing local footpath links and wider countryside access;"

This unduly restricts the policy to existing local footpaths. It should be broadened to 'existing public rights of way' or should make explicit a wider set of paths such as 'footpaths, bridleways and byways' before going on to wider countryside access.

At para (f) it refers to walking and cycling. It would be more inclusive to refer to 'non motorised modes of travel' or 'walking, cycling and riding'.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

LG3

At (h) replace 'local footpath links' with 'local rights of way links'

At (f) replace 'walking and cycling' with 'walking, riding and cycling'.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 272 - The Crown Estate

Submission Number: 272 Submission Date: 08/11/24 09:32

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

***Draft Strategic Design Code (SDC)***

We note the draft Strategic Design Code (SDC) is part of the suite of documents being prepared by HGC with the intention of guiding and delivering the transformation objectives for the wider town of Hemel Hempstead, and that its purpose is to be incorporated into a supplementary planning document which will be subject to statutory consultation under the Town and Country Planning (Local Planning) (England) Regulations 2012.

We welcome the overarching objectives behind the preparation of draft SPD material and are keen to work with HGC officers to help shape this going forward. However, for the purposes of demonstrating local plan soundness, we encourage SADC and HGC to have confidence in the principles and evidence set out in the HGC Spatial Vision, the HGC Framework Plan and the adopted Strategic Sites Design Guide as the guiding design framework for the HGC Growth Area allocations.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*Refer to Attached submission letter for whole response and figures.*

**12 Policy LG3 (Hemel Garden Communities Growth**

**Areas Place Principles)**

12.1 We are supportive of the need for development to conform to Place Principles for Hemel Garden Communities and consider that these do need to be set out in Policy. However, it is critical that the principles are not simply a 'wish list' of generic statements and that the Principles are place specific and that they are viable and deliverable.

12.2 Whilst we clearly would like to see the quality development that would result from planning and delivering development in line with Garden City Principles we would expect SACDC to carefully consider this in more detail and how deliverable they are.

12.3 The Inspectors of the Uttlesford Local Plan – which proposed multiple new garden settlements and stated that the new settlements would need to be developed in line with 'garden city principles' found that there were no mechanisms in place to ensure that the garden city principles could and would be delivered by the developers. They stated in their letter: *"Without assurances that the necessary mechanisms outside the plan would be put in place, we cannot be content in principle that the new proposed settlements would be true Garden Communities, or that the plan's stated vision for these new settlements would be met. This is a serious concern."*[12]. We have the same concerns for the St Albans Draft Local Plan in respect of the purported application of 'Place Principles' with no concrete mechanisms for actually delivering development in this way and no evidence to justify it.

12.4 We note that one of the principles is to "*Minimise the impact on the surrounding landscape setting and delivery of an average of 40 net dwellings per hectare".* We consider this to be unjustified and applying an 'average housing density' across the whole of the HGC could lead to adverse landscape impacts in areas where a much lower density is required. Using an 'average density' could be misinterpreted by developers and lead to inappropriate densities and over development.

**286 - Bloor Homes**

Submission Number: 286 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Quod Name: Alex Hamlet

On Behalf Of Company/Organisation: Name: Bloor Homes

Comment Number: 14

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Draft Policy LG3 – Hemel Garden Communities Growth Areas Place Principles**

3.4 Bloor supports and welcomes the approach that SADC has taken, recognising the overarching vision and significant role HGC will have in transforming Hemel Hempstead. Draft Allocation H1 is critical to the delivery of the HGC proposal, which has an ambition to deliver 11,000 homes and 10,000 jobs on land to the north and east of Hemel Hempstead.

3.5 Bloor is working closely with SADC, DBC and other landowners of HGC in continuing to develop the HGC proposals to deliver HGC and draft Site Allocation H1 – North Hemel Hempstead. The place shaping principles identified in Policy LG3 will be adopted within the design and master planning of HGC (and draft Site Allocation H1 – North Hemel Hempstead) to ensure a robust green network, integrated neighbourhoods, self-sustaining and engaged communities.

...

**HGC Strategic Design Code**

3.7 Part B requires the retention of existing hedgerows and trees and other areas of biodiversity value. Bloor agree that protecting trees and hedgerows is an important element of conserving biodiversity. However, to successfully deliver the scale of development proposed on the Site and across HGC, there may be scenarios where some existing trees and hedgerows may need to be removed and may not be of high ecological value. Policy SP13 – Health and Wellbeing, part f), Policy SP2 – Responding to the Climate Emergency, part j) and Policy SP3 – Land and the Green Belt secure increased tree planting and support for biodiversity on sites where trees are removed. Bloor, therefore, proposes that the wording is amended as follows, so that it is more flexible (proposed text in **bold**):

"b) Retain existing hedgerows and trees **with the most ecological value (where possible),** as well as other areas of biodiversity value such as ponds;"

3.8 The HGC Strategic Design Code already provides this flexibility as it states that "the design of the site must take reasonable steps to ensure the retention of existing site features such as hedgerows, trees, woodland and watercourses". However, for consistency it is requested that the wording within the Design Code mirrors the proposed wording change noted at paragraph 3.7.

...

**HGC Design Code**

4.1 Page 21 of the draft HGC Design Code document (September 2024) divides the HGC area into six 'Neighbourhoods', which the document states have been identified during the Strategic Design Code process and will contribute to deliver the vision of Hemel as 'One Place'.

4.2 Draft Site Allocation H1 – North Hemel Hempstead falls within Neighbourhood 2 and 3. Neighbourhood 2 also extends further north west into DBC, as shown in Figure 4.

**Figure 4: Extract from Page 21 of the draft HGC Design Code**

***See supporting document: North Hemel Hempstead Regulation 19 Representation Bloor for Figure***

4.3 Page 69 sets out neighbourhood level requirements and divides these into "should" and "must" requirements. Paragraph 3.6.31 states "Neighbourhood 2 should be subject to a masterplanning process that includes the whole neighbourhood extent." Whilst is it noted that this is not a "must" requirement, it is requested that paragraph 3.6.31 is removed because it is not practical or necessary.

4.4 Draft Site Allocation H1 – North Hemel Hempstead forms an important component of the wider HGC development, provides the eastern access on to Redbourn Road for the strategic sustainable movement corridor on which HGC relies, and therefore, the timely delivery of the wider HGC. This also means that the Site needs to be developed as one of the first sites to deliver within HGC. Pigeon and Bloor are having collaborative discussions with SADC regarding the potential to bring forward a planning application for the Site.

4.5 The northern part of Neighbourhood 2 is on a different trajectory in terms of the planning application process. Therefore, requiring a masterplan to cover the entirety of Neighbourhood 2 is likely to significantly delay the delivery of Draft Site Allocation H1 – North Hemel Hempstead, which at present, is aiming to be one of the sites to deliver homes, infrastructure and community facilities early in the Plan period. It is therefore requested that paragraph 3.6.31 is removed as the HGC Framework Plan and HGC Strategic Design Code documents will ensure that Neighbourhood 2 is delivered in a co-ordinated way.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Support for LG3

**HGC Strategic Design Code**

- For consistency it is requested that the wording within the Design Code mirrors the proposed wording change for policy LG6 - Green Belt Compenstory measures noted at paragraph 3.7.
- Bloor, therefore, proposes that the wording is amended as follows, so that it is more flexible (proposed text in **bold**):
- "b) Retain existing hedgerows and trees **with the most ecological value (where possible),** as well as other areas of biodiversity value such as ponds;"

HGC Strategic Design Code

Page 69 sets out neighbourhood level requirements and divides these into "should" and "must" requirements. Paragraph 3.6.31 states "Neighbourhood 2 should be subject to a masterplanning process that includes the whole neighbourhood extent." Whilst is it noted that this is not a "must" requirement, it is requested that **paragraph 3.6.31 is removed because it is not practical or necessary**

It is therefore requested that **paragraph 3.6.31 is removed as the HGC Framework Plan and HGC Strategic Design Code documents will ensure that Neighbourhood 2 is delivered in a co-ordinated way.**

**Draft Policy LG3 – Hemel Garden Communities Growth Areas Place Principles**

3.4 Pigeon supports and welcomes the approach that SADC has taken, recognising the overarching vision and significant role HGC will have in transforming Hemel Hempstead. Draft Allocation H1 is critical to the delivery of the HGC proposal, which has an ambition to deliver 11,000 homes and 10,000 jobs on land to the north and east of Hemel Hempstead.

3.5 Pigeon is working closely with SADC, DBC and other landowners of HGC in continuing to develop the HGC proposals to deliver HGC and draft Site Allocation H1 – North Hemel Hempstead. The place shaping principles identified in Policy LG3 will be adopted within the design and master planning of HGC (and draft Site Allocation H1 – North Hemel Hempstead) to ensure a robust green network, integrated neighbourhoods, self-sustaining and engaged communities.

...

**HGC Strategic Design Code**

3.7 Part B requires the retention of existing hedgerows and trees and other areas of biodiversity value. Pigeon agree that protecting trees and hedgerows is an important element of conserving biodiversity. However, to successfully deliver the scale of development proposed on the Site and across HGC, there may be scenarios where some existing trees and hedgerows may need to be removed and may not be of high ecological value. Policy SP13 – Health and Wellbeing, part f), Policy SP2 – Responding to the Climate Emergency, part j) and Policy SP3 – Land and the Green Belt secure increased tree planting and support for biodiversity on sites where trees are removed. Pigeon, therefore, proposes that the wording is amended as follows, so that it is more flexible (proposed text in **bold**):

"b) Retain existing hedgerows and trees **with the most ecological value (where possible),** as well as other areas of biodiversity value such as ponds;"

3.8 The HGC Strategic Design Code already provides this flexibility as it states that "the design of the site must take reasonable steps to ensure the retention of existing site features such as hedgerows, trees, woodland and watercourses". However, for consistency it is requested that the wording within the Design Code mirrors the proposed wording change noted at paragraph 3.7.

...

**HGC Design Code**

4.1 Page 21 of the draft HGC Design Code document (September 2024) divides the HGC area into six 'Neighbourhoods', which the document states have been identified during the Strategic Design Code process and will contribute to deliver the vision of Hemel as 'One Place'.

4.2 Draft Site Allocation H1 – North Hemel Hempstead falls within Neighbourhood 2 and 3. Neighbourhood 2 also extends further north west into DBC, as shown in Figure 4.

**Figure 4: Extract from Page 21 of the draft HGC Design Code**

***See supporting document: North Hemel Hempstead Regulation 19 Representation Pigeon for Figure***

4.3 Page 69 sets out neighbourhood level requirements and divides these into "should" and "must" requirements. Paragraph 3.6.31 states "Neighbourhood 2 should be subject to a masterplanning process that includes the whole neighbourhood extent." Whilst is it noted that this is not a "must" requirement, it is requested that paragraph 3.6.31 is removed because it is not practical or necessary.

4.4 Draft Site Allocation H1 – North Hemel Hempstead forms an important component of the wider HGC development, provides the eastern access on to Redbourn Road for the strategic sustainable movement corridor on which HGC relies, and therefore, the timely delivery of the wider HGC. This also means that the Site needs to be developed as one of the first sites to deliver within HGC. Pigeon and Bloor are having collaborative discussions with SADC regarding the potential to bring forward a planning application for the Site.

4.5 The northern part of Neighbourhood 2 is on a different trajectory in terms of the planning application process. Therefore, requiring a masterplan to cover the entirety of Neighbourhood 2 is likely to significantly delay the delivery of Draft Site Allocation H1 – North Hemel Hempstead, which at present, is aiming to be one of the sites to deliver homes, infrastructure and community facilities early in the Plan period. It is therefore requested that paragraph 3.6.31 is removed as the HGC Framework Plan and HGC Strategic Design Code documents will ensure that Neighbourhood 2 is delivered in a co-ordinated way.

On Behalf Of Company/Organisation: Leverstock Green Village Association Name: Leverstock Green Village Association

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

5.3. As we set out in our representations the Local Plan and particularly the Hemel Garden Communities allocations are not backed by sufficient or sound evidence to justify their inclusion in the Plan. Given that HGC is by far the most strategic development in the Local Plan and requires a very significant proposed release of Green Belt, the Local Plan should not be rushed through the way it has. This will only lead to the Local Plan either the Plan being at Examination for an extended period of time due to it requiring quite fundamental modifications to make it sound or it will be found unsound with no potential for its fundamental flaws to be modified leading to its withdrawal and SACDC will need to go back to the start of the process once again.

.....

7.1. LGVA recognises some additional housing is required and supports modest and proportionate development. However, we object strongly to the sheer scale of the SADC proposals which would envelope and overwhelm Leverstock Green. Despite being part of the Hemel Hempstead urban area since the construction of the new town from the 1940s, Leverstock Green retains a distinct and proud village character and a strong sense of community. Under the proposals, Leverstock Green would nearly double in size and would lose much of the surrounding Green Belt which defines its identity. The character of the village would be changed out of all proportion, and the necessary infrastructure requirements would be unsustainable in a village environment.

**Hemel Garden Communities**

7.2. We recognise the vision of HGC, but we are concerned there is no comprehensive infrastructure and transport plan to support the proposals. We also have misgivings that such a large-scale project involving two local authorities and multiple other agencies over such a protracted period is deliverable.

7.3. We appreciate the planning is at an early stage, but the task of coordinating all aspects of the HGC will be a major challenge. The timely delivery of infrastructure and particularly roads will be essential.

....

7.8. The Local Plan Part B Allocation for site H4 includes a number of development requirements which we list below. We seriously question how all of these requirements can fit onto a site when its strategic constraints are considered. We list a number of these requirements below:

- SANG Requirements
- BNG Requirements (aims to exceed 10% minimum target)
- High quality design and buffer zones to mitigate adverse impacts from motorway noise and air pollution and address the Buncefield oil depot and pipelines
- There is a major surface water flow path across the centre of the broad location, and three associated smaller flow paths
- Three extra-care facilities comprising of 70-80 self-contained units in each facility, two 70-80 bed nursing homes and 9 supported living units for people with disabilities.
- One new 3FE and one new 2FE primary schools
- 15-20 pitches for Gypsy and Travellers using best practice on location and design
- Land will be safeguarded for access improvements associated with Junction 8 of the M1 motorway, in case it is required to come forward for junction improvements
- The layout and design of development should minimise any harm to the setting and significance of listed buildings

- Recreation space and other community facilities
- Take appropriate account of these Environmental Constraints: Source Protection Zone (SPZ) 1; Bedrock Aquifer.

7.9. Whilst one could suggest that it will 'all be solved' in the masterplanning work, this is setting the Local Plan up for failure and the delivery of 'over development' on previous Green Belt land.

7.10. Furthermore, LGVA has serious doubts about the sound planning of infrastructure of HGC in terms of SACDC and on cross boundary infrastructure with neighbouring authorities. The Infrastructure Delivery Plan, Housing Trajectory and Viability Evidence provide us with no confidence that there is a coherent and sound plan for the coordination and delivery of the infrastructure to deliver the HGC and the quality of place-making set out in Policy LG3 (Hemel Garden Communities Growth Area Place Principles).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

For the purposes of clarification, it is the Association's considered view that the Local Plan is unsound, and the Council has failed to discharge its Duty to Cooperate.

The proposed scale and distribution of growth has not been justified, it has not been positively prepared, and the policies are ineffective. LGVA considers that the delivery of growth at the Hemel Garden Communities has not been demonstrated through technical evidence including the Council's Green Belt Review, Infrastructure Delivery Plan (IDP), Viability evidence and Transport evidence.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Reg 19 Leverstock Green Village Association vf_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Leverstock Green Village Association (LGVA) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Hemel Hempstead LGVA considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**311 - BP Oil UK Ltd**

Submission Number: 311 Submission Date: 07/11/24 09:00
Respondent: Company/Organisation: BP Oil UK Ltd Name:

Comment Number: 7

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The draft allocation of primary interest to bp is H3, which includes the currently agricultural land located between Punchbowl Lane to the north, the M1 to the east, the A414 to the south and Green Lane (and the boundary of the site) to its west. This is because the allocation is immediately adjacent to the subject site. It is noted H3 proposes around 6,000 new jobs (point 21).

Whilst the majority of the development in allocations to H1-H4 inclusive is anticipated by the draft plan to be delivered by 2041, the draft Local Plan horizon, it identifies that some delivery is likely to
take place post-2041.

**Impacts on bp's operations**
It should be noted that bp does not object to the principle of major housing and employment designations. However, the effect of the allocations, if built out, will result in significantly greater levels of residents, works and visitors in closer proximity to the subject site.

This is the case both in the construction phase as the development and associated infrastructure works are built out, and once the allocated developments are operational. The health, safety and security of bp's workforce and the communities in which they operate is of critical importance to the business.

The draft Local Plan allocations H1-H4 inclusive may:
• increase the number of people in close proximity to a COMAH regulated site, particularly with development proposed for agricultural land to the east of the site
• limit bp's ability for any potential future expansion in relation to the site such as new fuel storage tanks and equipment

• potentially compromise the long-term viability of bp's operations from its Hemel Terminal site

bp do not object to the principles of the allocations relating to the HGC, however, we seek to highlight to SADC issues that need to be carefully considered as the draft plan progresses.

bp request that the importance of its Hemel Terminal is recognised and that draft site allocations H1-H4 are amended as required to ensure the continued safe and viable operation of its facility, both now and in the future.

We welcome a collaborative approach on the drafting of the policy wording with SADC officers/Members in order to achieve this objective.

We assume the views of the Health and Safety Executive (HSE) and the Environment Agency have been sought on the allocations - in particular given the subject site is regulated under the Control of Major Accident Hazards (COMAH) Regulations 2015 - and will be fully considered as the draft Local Plan moves forward. We also urge you to consider the views of the downstream oil team (energy security) at the Department for Energy Security and Net Zero.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 10

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Paragraph 35 and 36 of the 2023 NPPF require that local plans be compliant with national policy. To do so they must comply with the other policies of the NPPF.
The successful delivery of the Hemel Garden Communities (HGC) programme in St Albans will be reliant on the agreement and delivery of on-site infrastructure within the site allocations in the Dacorum & St Albans local plans as well as off-site infrastructure across the settlement of Hemel Hempstead. The local plan as respects the HGC programme must therefore meet NPPF requirements for both infrastructure delivery and dealing with relevant cross-boundary issues. NPPF paragraphs 16 (c) and 25 make explicit the need for infrastructure cooperation across boundaries where appropriate.
Both the St Albans and the Dacorum local plans include an Infrastructure Delivery Plan as evidence to support their own local plans. This is needed to evidence the

requirement at NPPF paragraph 11 (a) that plan-making demonstrate sustainable development. Paragraph 110 places further requirements on plans to include policies to deliver infrastructure that ensures positive outcomes. However, the St Albans IDP, prepared by Arup following extensive engagement with HCC, does not include the infrastructure required to deliver the Hemel Garden Communities allocations in St Albans.
The successful delivery of HGC requires a similar IDP to that which supports this plan. The HGC IDP will need to identify the strategic-cross boundary infrastructure that will be required to mitigate HGC's growth, as well as the infrastructure that will need to be delivered beyond the plan periods of the emerging St Albans and Dacorum local plans. The HGC IDP is currently being prepared and should be available for the examination of the emerging local plans that allocate the HGC land parcels for development. The output of that work, as it relates to the identification, timing, costing, location and delivery agents of infrastructure, will be needed to ensure the necessary mitigations to deliver HGC allocations are incorporated into the plan and tested at examination.
The soundness of the plan would benefit from a clearer, more refined policy that will govern the delivery of (cross-boundary) infrastructure required to facilitate the delivery of the garden community. Any decision-maker for any application within St Albans must be directed to consider the strategic

cross-boundary impacts of development of this scale in this location when making their decision. Such a policy would provide a framework to ensure applications deliver mitigations identified in both the St Albans IDP and HGC IDP where appropriate.

The county council recommends the below changes to policy as respects Hemel Garden Communities:

Part A LG2: The cost apportionment sentence (No.5, Page 26) in Strategy Policy HGC1 – Transformation of Hemel Hempstead of the DBC Local Plan to 2041 Pre-Submission Version for Approval is not in the corresponding SADC policy. For consistency, we suggest it is added into the SADC Policy LG2:

The methodology for infrastructure apportionment and cost sharing is set out in the Local Plans Infrastructure Delivery Plans (IDPs). Infrastructure, contributions and wider funding will be required to deliver on and off-site infrastructure, in accordance with the above documents

Part B LG3: Suggest amending the text as at present working assumptions are that the Household Waste Recycling centre is to come forward separately from the district council provision.

Delivery of Key Projects including a Household Waste, a Recycling Centre, and Local Authorities Depot facilities to meet the needs of new and existing communities

Part B H1, H2, H3, H4: Suggest adding in the following text into each policy to ensure key transport schemes are included:

*The provision of essential transport infrastructure, the detail of which will be identified through the HGC IDP, including mitigating the impact of traffic associated with the development; appropriate consideration of M1 Junction 8 improvements and access arrangements for wider Hemel Hempstead, the provision of appropriate financial contributions towards A414 bridge and wider highways network improvements and access arrangement for HGC and wider Hemel Hempstead, provision of appropriate public transport (services and infrastructure) serving the site; and provision of a comprehensive network for pedestrians and cyclists with good connectivity provided to adjoining areas, including a particular emphasis on improving linkages to Hemel Hempstead Station as a transport interchange*

Paragraph 35 and 36 of the 2023 NPPF require that local plans be effective to be considered sound. This means they must deal with cross-boundary matters.

It is an agreed principle that the Hemel Garden Communities (HGC) programme should deliver a new recycling centre. The HCC Local Authority Collected Waste Spatial Strategy (WSS) provides an assessment of desirable waste management facilities required in Hertfordshire over the period to 2031 and beyond. The WSS identifies that the existing Hemel Hempstead recycling centre is highly unsuitable, as the condition of the centre is very poor, the centre lacks sufficient capacity for a variety of waste streams, and it is too small to adequately deal with the level of demand which can cause long queues onto the industrial estate. The 2024 Dacorum local plan recognises and need at strategic policy HGC2, which is similar to St Albans policy LG3, but does not identify a location

Previous work to investigate expansion into neighbouring land demonstrated this was unfeasible due to the cost of remediating contaminated land. An indicative area of search focusing along the A414 corridor has been included within the WSS, and historic site searches have not produced a viable alternative location for an RC to serve Hemel Hempstead.

The plan does include policy at Pillar 2 within policy LG3 in part A in support of the delivery of a recycling centre, as follows:

Delivery of Key Projects including a Household Waste Recycling Centre and Local Authorities Depot facilities to meet the needs of new and existing communities;

However, this policy applies across all of the HGC programme and does not bind any of the HGC sites in St Albans to deliver a site should the masterplan process identify a location within St Albans, or indeed direct the masterplan process to resolve this cross-boundary issue. There is no corresponding policy at allocation H2 in Part B. Nor does this policy refer to the potential for a training centre. Therefore, there is only partial provision in policy against which the decision-maker can consider an application.

It is possible that a location in St Albans is suitable. HCC have since been engaging with Hertfordshire Futures on the possibility of a combined recycling centre and reuse training facility being delivered as part of the Land East of Hemel Hempstead (Central) site. This would therefore meet both service provision/mitigation and economic development objectives. This includes the provision of apprenticeships, workshops, and training. This employment aspects makes the expansion of Maylands within the St Albans district boundary a suitable host for this facility. This proposal is not yet agreed and is dependent on further feasibility work, but HCC considers this proposal for a joint recycling and training centre to be in principle acceptable.

Therefore, to deal with cross boundary matters and therefore to make the plan sound, the plan should provide for a recycling and training centre to be provided within allocation H2 at Part B if the masterplan for HGC identifies this as the preferred solution.

Access to Healthy Food
HCC Public Health support Strategic Policy SP13 – Health and Wellbeing which seeks to provide access to healthy foods, including through access to shops and food growing.
In terms of food growing, we have reviewed the draft Local Plan, and we feel that the Plan provides suitable policies to safeguard allotment spaces. The Strategic Policy protects existing allotments and considers that new developments should seek to create new allotments where appropriate. This Strategic Policy is strengthened through draft Policy NEB3 – Non-Designated Local Green Space which restricts loss of allotments unless suitable replacement for the allotments is provided, or evidence demonstrates that there is no need for the allotments. In addition, draft Policy LG3 – Hemel Garden Communities Growth Areas Place Principles includes the requirement for green infrastructure for food growing.
Turning to improving access to healthy food through the built environment, it is our opinion that the draft Local Plan does not have a policy which supports this. We recommend that the plan should include a policy on promoting healthy food environments to reduce obesity risk
and other forms of malnutrition. An example of well evidenced policies, supported by HCC's Public Health Team, include those which restrict and prevent the proliferation of hot food takeaways (HFTs) such as:
•
A limit on how many hot food takeaway units is located within a street in Town Centre or Local Centres; and
•
The introduction of a Hot Food Takeaway Management Zone restricting the introduction of new HFTs within 400 metres walking distance of the boundary of a nursery, primary school, secondary school, community college or youth facility. Hertfordshire County Councils Whole Systems Obesity Team has developed the Healthy Food Environmental Tool to assist Local Authority's to map the areas to be covered by a takeaway management zone policy: https://hcc-phei.shinyapps.io/healthy_food_environments/
The preferred policy recommended by HCC's Public Health team would be the introduction of takeaway outlet management zones which are the most common planning policy relating to improving food environments adopted by local authorities1 Evidence finds these policies to be effective in preventing the proliferation of HFTs within these areas as well as bringing health benefits to the local communities in which they are implemented23. Further research also identifies that takeaway management zones are associated with net economic benefits for local authorities, national government, and the NHS. This is due to the relatively low economic contribution of

takeaways to the high street in comparison to the higher economic contribution of potential alternative uses in addition to cost savings associated with a reduced burden of BMI-related diseases4.

St Albans National Child Measurement Programme data5 (3 years data combined, 2020/21 – 22/23) for prevalence of children living with overweight/obesity in reception (17.26%) and year 6 (23.45) are favourable in comparison to the Hertfordshire averages (19.26% and 31.11% respectively). Just 4 of 20 electoral wards (Colney Heath, Cunningham, Park Street and Redbourn) had a prevalence of reception aged children living with overweight (including obesity) greater than the Hertfordshire average (19.26%). Similarly, just 4 of 20 electoral wards (London Colney, Cunningham, Sopwell, Park Street) had a prevalence of year 6 aged children living with overweight (including obesity) greater than the Hertfordshire average (31.11%).

However, some electoral wards in St Albans have a relatively high density of existing fast-food outlets with St Peters (2.37 outlets per 1000 of the population), Harpenden West (1.7 outlets per 1000 of the population), Sopwell (1.04 outlets per 100 of the population) in

comparison to the Hertfordshire average (0.86 outlets per 1000 of the population). Large numbers of these outlets are typically located in the wards surrounding the city centre with St Peters (0.98 minutes), Clarence (1.55 minutes) and Sopwell (1.73 minutes) being the 3 electoral wards with the shortest average distances residents must travel by car to reach a fast-food outlet.

The wards surrounding St Albans City centre also contain many primary and secondary schools (Appendix 1). Of the 9 secondary schools within the area highlighted in Appendix 1, 4 (44.44%) had at least 1 HFT within a 400-metre radius of the school site. Of the 18 Primary schools, 13 (72.22%) had at least 1 HFT within a 400-metre radius of the school site. This emphasises the existing high exposure to HFTs currently experienced by children in this area of the district.

Whilst current childhood overweight and obesity statistics generally appear favourable, the introduction of policies such as those recommended above would work preventatively, alongside other interventions, to ensure health does not worsen in the District. Justification for the implementation of a HFT management zone surrounding schools is strongest in the wards surrounding St Albans City Centre due to the existing high exposure to HFTs experienced by children in this area.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To be considered sound the plan must:

1. Incorporate the completed HGC IDP into the evidence base of the local plan (including viability testing the outputs); and
2. Include a new strategic policy either in place of or preceding policies LG2 and/or LG3 that requires all HGC development to comply with the HGC IDP.

Firstly, the completed HGC IDP must be included as part of the evidence base for the local plan and tested as part of the examination process. NPPF paragraph 20 expects plans to make sufficient infrastructure provision, while paragraph34 requires plans to set level of development contributions that will be required to support the plan. The HGC IDP will evidence the infrastructure schemes that will be required to support HGC as a whole. This work is ongoing with the support of HCC, and we expect that this should be available to be inform the local plan examination. This point is made to ensure that appropriate provisions are made in the plan to ensure infrastructure required to fund growth in Hemel Hempstead as a whole is understood, fixed in local plan policy and funding sought from all development schemes that will benefit from the infrastructure.

Secondly, a new strategic policy should set a clear framework for the delivery of the HGC programme as a whole within St Albans. This could potentially replace parts of policy LG2. This would leave the remainder of LG2 and LG3 as subsidiary non-strategic policies setting out some of the intended policy outcomes. The below policy wording is suggested as a draft pending further discussion, for example, as to the exact documents that need to be prepared at HGC scale to evidence the infrastructure needed before applications can be determined:

***Policy SP(X): Phased Development and Infrastructure Funding in Hemel Hempstead Garden Community***

1. ***Charter Principles and HGC Spatial Vision****: Development proposals should reflect the Hemel Garden Communities (HGC) Charter Principles and HGC Spatial Vision which set out the ambition for the development of Hemel Hempstead and the wider area. Applications should also promote the four thematic pillars of the HGC Vision*
2. ***Growth Area Proposals:*** *Planning applications within the growth area should also adhere to the requirements of Policies LG2 – Support for Transformation of Hemel Hempstead, LG3 – Hemel Garden Communities Growth Areas Place Principles and LG4 – Large, Medium and Small Sites*
3. ***Phased Development****: Development sites within the Hemel Hempstead Garden Community area (HGC) shall only be permitted once the infrastructure requirements of the wider garden community are comprehensively identified, planned and set out in a comprehensive, and iterative, IDP. This includes, but is not limited to, transportation networks, utilities, educational facilities, healthcare services, and green spaces.*
4. ***Strategic Contributions****: Development proposals will be required to make a wider strategic contribution in terms of safeguarding or reserving land and funding and/or delivering strategic infrastructure that is required to mitigate the impacts of new development on the Hemel Hempstead settlement and the surrounding area, as identified in the Hemel Hempstead Garden Community Infrastructure Delivery Plan (HGC IDP).*
5. ***Evidence Base Compliance****: Planning permission shall only be granted once key HGC documents are in place, including the HGC IDP [and any SPDs or Development Framework Document, or a more detailed form of the Framework Plan] and proposals can demonstrate compliance with the*
6. ***Cross-Boundary Effects****: Any application must consider and assess cross-boundary impacts between St Albans and Dacorum, including cumulative impacts with other anticipated developments within the local plan(s) including windfall sites.*
7. ***Comprehensive Masterplan Proposals****: Individual masterplan proposals must accord with development aspirations of the entire HGC area and contribute positively to the transformation of Hemel Hempstead, and must not prejudice or impede the provision of strategic infrastructure in the phased manner identified in the HGC IDP. Any such masterplan is to be prepared and*

*agreed between the landowner/developer and the Council. Where applications have already been submitted to the Council a masterplan should be agreed prior to the or as part of the grant of planning permission.*

8. ***Monitoring and Review**: The implementation of this policy will be monitored regularly by the establishment of a stakeholder Hemel Hempstead Infrastructure Review Group (and any necessary subgroups) to ensure compliance, effectiveness. Adjustments to the policy may be made based on the outcomes of these reviews so that the local authorities have the ability to address any emerging issues or changing circumstances.*

Taken together, these modifications would ensure that the decision-maker has a cross-boundary IDP that takes into account the cross-boundary impacts on the transport network (and other key infrastructure, such as secondary schools, for example) before them when approving any planning application within the HGC area. This would, in turn, fulfil the requirements and outcomes of the NPPF at paragraphs 11 and 110.

To be considered sound the plan should:

1. Include a recycling centre in the IDP;
2. Provide that allocation H2 and Part B provide a recycling and training centre if the masterplan for the site does not provide for this in the HGC allocations in Dacorum;
3. Amend policy LG3 to ensure that the masterplan give further clarity that the recycling centre and the District depot are separate facilities; and
4. add recycling centres to the list of defined community infrastructure.

Firstly, the Dacorum Regulation 19 local plan Infrastructure Delivery Plan schedule Includes the following:

*A new Recycling Centre at Hemel Hempstead Delivery of a new Recycling Centre at East Hemel Hempstead or North Hemel Hempstead. Cost index to Quarter 1 2023.*

Since there remains the possibility that the new recycling centre will need to be delivered in East Hemel Hempstead it is appropriate that this be included within the Infrastructure Delivery Plan schedule for the St Albans plan. This will make clear that this piece of infrastructure is required and may be required to be delivered within the boundary of St Albans district.

Secondly, the plan could address point 2 by amending policy at allocation H2 at Part B to require allocation H2 at Part B to deliver a recycling centre should this be the agreed location identified in the HGC masterplan. It would not yet be appropriate to require the delivery of a recycling and training centre in policy at allocation H2 in Part B as the evidence is not in place to identify a specific location. However, the policy will need to provide a mechanism for the delivery of a recycling centre within St Albans if the masterplan identifies that Maylands, is the agreed location.

Part B H2: *The delivery of a site of not less than 2ha for a recycling centre and associated training centre, if the agreed masterplan for the whole Hemel Garden Communities allocation in St Albans and Dacorum provides for this to be delivered in St Albans.*

Thirdly, the plan should clarify that the two LPA and HCC waste facilities are separate facilities. This would ensure that the masterplan identifies a location for the recycling centre within the whole cross boundary HGC masterplan in addition to the LPA municipal waste depot:

Part A LG3: *Delivery of Key Projects including a Household Waste Recycling Centre and a Local Authorities Depot facilities to meet the needs of new and existing communities;*

Finally, the LPA could consider adding recycling centres to the list of defined community infrastructure at Strategic Policy LG7. This would give new recycling centres positive policy weight in the planning balance, if delivered in Maylands, and prevent their loss to other uses once delivered:

1. *Cemeteries and burial and crematorium facilities, [deleted text]*

*[deleted text].vii. Flood defences.; and*

1. *Recycling centres.*

Taken together, these amendments would require that the cross-boundary HGC masterplan identify a suitable location for a recycling centre and, if this is provided in St Albans, gives it positive policy weight so it can be positively considered in the planning balance.

2. 10 HGC (non soundness issue)_[R].pdf
3. 7 Hemel RC_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

HCC is a partner in the HGC programme and as Highway Authority has a statutory responsibility for and interest in the successful delivery of the HGC programme. It is therefore essential that HCC be able to participate in any discussion on the delivery of the HGC sites and infrastructure policy.

Recycling centres are a statutory HCC function as Waste Disposal Authority and therefore HCC has a considerable interest the delivery of an appropriate facility within the HGC programme.

POLICIES FOR HEMEL GARDEN COMMUNITIES

We support Policy LG1 – Broad Locations – which establishes a clear set of policy requirements for the HGC Growth Area and recognises the importance of a coordinated approach to the planning, design and delivery of homes and associated infrastructure.

We further support the Local Plan commentary relating to Hemel Garden Communities, and the inclusion of Figure 3.2 *Indicative Concept Plan for the HGC Growth Areas* to provide appropriate and proportionate spatial direction for the Growth Area. We welcome the clarity provided at 3.53 about the intention to bring forward two SPDs and we will continue to engage with the HGC partners on these documents as they come forward.

We are supportive of thrust of policies LG2 and LG3 and welcome the inclusion of a clear set of principles for the subsequent stages of planning and delivering high quality growth.

## 359 - Betsy Brown

Submission Number: 359 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Natural England Name: Betsy Brown

Comment Number: 7

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* Yes

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Policy LG3 –Hemel Garden Communities Growth Areas Place Principles

Natural England notes the inclusion of various expanded green and blue infrastructure policies, including reference to use of Sustainable Urban Drainage Systems (SuDS), greenways and ecological corridors. We also note the commitment to achieving and exceeding at least 10% Biodiversity Net Gain (BNG); a goal that is repeated throughout various sections of the Local Plan. These are all excellent additions, and we are pleased to see commitment to going beyond the mandatory 10% for HGC as well as other developments.

We have noted however that within Pillar 1 – Green networks, Suitable Alternative Natural Green Space (SANG) is mentioned without the addition of Strategic Access Monitoring Measures (SAMM) in relation to the mitigation strategy for the Chilterns Beechwood Special Area of Conservation (CBSAC).

As part of the mitigation strategy within the 12.6km zone of influence around CBSAC, both SANG and SAMM are required to mitigate recreational impacts and increased visitor pressure as a result of new development. We therefore recommend the following wording for bullet point B;

*Provide Suitable Alternative Natural Green Space (SANG) and Strategic Access Monitoring Measure (SAMM) contributions as part of an appropriate mitigation strategy for Chilterns Beechwoods Special Area of Conservation (CBSAC), as agreed with Natural England.*

We would also like to see specific reference to the new LURA duty as part of the Hemel Garden Communities Growth principles Policy. Paragraph 182 of the NPPF states that development in the settings of AONBs should be sensitively located and designed to avoid or minimise impacts on the designated areas. In addition,Section 245(Protected Landscapes) of the Levelling Up and Regeneration Act 2023 places a duty on relevant authorities to seek to further the statutory purposes of the area in carrying out their functions in relation to, or so as to affect, land in an AONB.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## LG4 - Large, Medium and Small Sites

### 15 - Trans Link London Limited

Submission Number: 15 Submission Date: 18/10/24 12:13

Respondent: Company/Organisation: PJB Planning Name: Peter Biggs

On Behalf Of Company/Organisation: Trans Link London Limited Name:

Comment Number: 7

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy LG4 refers to the allocation of Large, Medium and Small sites, which are listed in Part B of the Local Plan. The policy then sets out the criteria that would apply to such developments, to ensure that they were sustainable forms of development, that contribute to local and district requirements and protect the natural environment. Whilst the principle of Policy LG4 and criteria are supported, by not including land north of Napsbury Park Estate in the list of large sites proposed for allocation in Part B of the Local Plan, an objection is raised to this policy.

The land north of Napsbury Park Estate could deliver up to 200 new dwellings and also the potentially deliver a rail station on the Midland Main line. This form of development would therefore comply with the criteria set out in Policy LG4 and promote a highly sustainable form of development that would not only contribute positively towards new residents, but also existing residents of the Estate and London Colney.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Further consideration should be given to the inclusion of land north of Napsbury as an allocated large site (unless considered as part of a Broad Location under Policy LG3).

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To scrutinise how the Council have discounted the land north of Napsbury Park Estate, which could provide for significant infrastructure improvements and sustainability enhancement by providing a new railway station on the Midland Mainline in this location.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

## 69 - Trustees of the G A Simons Family Settlement

Submission Number: 69 Submission Date: 05/11/24 12:42

Respondent: Company/Organisation: Bidwells Name: MR Derek Bromley

On Behalf Of Company/Organisation: Trustees of the G A Simons Family Settlement Name:

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Policy Objections**

18) The policies LG4 h) and DES3 a) provide a density of 40 d.ph as a minimum, these are simply unrealistic and unobtainable when it comes to small sites (up to 9 dwellings) and to a lesser extent for medium sites. These sites are not of a size which can accommodate a housing mix to achieve this density. As an example, a site proposed for 9 self- build/custom build (Policy HOU5) would be for individual plots for detached dwellings, (such as the successful council scheme Graven Hill,

Bicester, Oxfordshire). Building co -operatives would be needed where the plots are not for detached dwellings, these are fraught with challenges which deters interest. Whilst it is recognised there are proposed requirements for such plots in the Broad Locations, discussions with housebuilders indicate is they are seldom taken up. They are unattractive to the market. Cause many issues concerning site security/ health and safety procedures and responsibilities. A minimum density for small/ medium sites should be deleted from the policy wording.

19) Policy HOU5 d) needs further wording that where the custom/self- build plots have not sold in the open market, then if offered to the Council or Registered Provider it will be at the open market value and failing that sold to a small/medium enterprise housebuilder.

**Is the Plan Justified**

20) Given the above, the Plan is not justified as an appropriate strategy as it does not take into and its evidence base for not doing so is not proportionate or indeed reasonable. In respect of Sites A and B the Councils Green Belt study conclusions to not stand up to scrutiny.

21) The plan policy for minimum densities to be applied to small/medium sites should be deleted. New wording should be inserted where this is an aim, but to have regard to the surrounding character and density and uses.

22) Whilst the Government's final definition of Grey Belt and the inclusion of Grey Belt as not being inappropriate development within the Green Belt, has yet to be confirmed; the proposed wording for Grey Belt includes *'any other parcels and/or areas of Green Belt land that make a limited contribution to the five Green Belt purposes'.* The case for the Trustees is that Sites A and B do not contribute to the five purposes. It is not the case these sites make a "limited contribution" to Green Belt purposes, but rather they make "no contribution". The Government consultation "Proposed reforms to the NPPF and other changes to the planning system" 24/09/2024 suggests an effective way of providing guidance and refers

*"Grey Belt Land which makes a limited contribution to the Green Belt purposes will:*

1. *a) Not strongly perform against any Green Belt purpose; and*
2. *b) Have at least one of the following features : Land containing substantial built development or which is fully enclosed by built form.*

*ii Land which makes no or very little contribution to preventing neighbouring towns from merging into one another.*

*iii Land which is dominated by urban uses, including physical developments*

*iv Land which contributes little to preserving the setting and special character historic towns".*

Sites A and B satisfies all Grey Belt tests.

**Has The Plan Been Positively Prepared**

23) This is a qualified objection. Our client raises no objection to the overall housing provision based upon the current standard methodology, though has issues with the housing delivery during the plan period given the Council only has a 1.5 years housing land supply. Should the Governments new standard methodology apply for the purposes of this Plan, then there is a gross under provision of housing. The new methodology would increase the housing numbers from 885 d.p.a. to 1,554 d.p.a., a 75% increase.

24) Whilst there have been Ministerial Statements regarding when the new standard methodology for housing need will apply, nothing is certain as to the final wording and timing when it will apply.

25) The current expectation based upon the Council's programme is that the local plan will be submitted before the Government's proposed Standard Methodology for determining housing need takes effect. It is important a Plan is in place given the acute housing shortfall with only a 1.5 years housing land supply and to enable early new housing delivery. A further period of time without an up to date Plan will only add to an already difficult situation, so getting the Plan to Adoption is important. However, given the circumstances the Council has found itself, with a significant risk of unmet housing need, it is very important to identify and allocate in this plan more sites where possible and appropriate.

26) Given that planning policy and the plan process is a bit of a "moveable feast" the expectation in 25) above, may not be realised and there is no certainty. It is in any event clear the proposed housing provision will not meet the future development needs during the local plan period and an early review will be required.

27) In the event the new Standard Methodology does not apply to this Local Plan and the Council meets the deadline for submission, then our client is of the view the Council should commit to an immediate review following the Adoption of the Plan. There will a period between the Inspector's report and the Council's formal Adoption for Council officers to start the preliminary internal processes.

**Housing Trajectory**

28) The Council's housing trajectory (Table 3.2) for delivering housing from the Broad Locations is overly optimistic given the timelines for all the necessary planning approvals and lead in times for infrastructure.

29) Lichfields, produced a report in 2020 "Start to Finish" which reviewed build out rates of large housing sites across te country. This showed that nationally the average planning approval period for large sites of say 1,000 dwellings was 4.6 years. Given the local councils do not embrace new development but are reluctant participants when it comes to development on green fields, locally the time is longer. The Lichfield report also analyses tbuild out rate on large sites. The averages for sites 500-1 ,000 was 68 d.p.a., 1,000-1499 was 107 d.p.a. It is generally acknowledged that the early development years of schemes the completion rates are far less than the average. The build out rate in the early years for the Broad Locations is again overly optimistic.

30) My experience of the delivery of large sites in Hertfordshire, a county which has been reluctant to housing growth for decades, is that it will not be until the early/mid 2030's that many of the "Broad Locations" begin to deliver housing, the exceptions possibly being part of West Redbourn and part of North St Albans where permission has either granted or the application is well advanced. I set out below examples I have been involved with or are aware.

31) **Hemel Hempstead.** Allocated site for 900 dwellings in the Sites Allocations, Adopted 2017. Hybrid Planning Application submitted 21/12/2018. Granted 03/12/2021. Price negotiation with land owners and following approvals of pre- commencement conditions, start date on site November 2024. First dwelling for occupation November 2025. Total time for an allocated site from planning application to delivery of first dwelling 7 years.

32) **Stevenage.** Allocated site for 1,350 dwellings in Adopted Local Plan 22/05/2019. Hybrid planning application 07/04/2021 . Following Section 106 negotiations expected planning permission November 2024. There will be a period of negotiations on value which involves the Council and Homes England, with probable reference to an Expert, allow 18 months. Planning precommencement condition approvals, allow further 9 months. Lead in time for infrastructure to first dwelling allow further 18 months. Total time for an allocated site from planning application to first occupation just under 7.5 years.

33) **Hitchin.** Outline Planning Application for up to 700 dwellings submitted in advance of Local Plan on the 26/04/2018. Site allocated in the Adopted Local Plan November 2022 for 700 dwellings. Awaiting a decision. First occupation is likely to be in excess of 9 years from application.

34) On the basis of the above it is my view a reasonable expectation is that for large sites there is a 7 year gap between the submission of a planning application to first delivery of a completed dwelling. Given that to date with a couple of exceptions, applications on large sites have not been registered I think my estimate of early to mid 2030's is supported by the evidence. There are varied reasons why these sites have taken so long (continued public and councillor resistance, officer workload) .This will apply to all sites. That is why the timescales envisaged in the Housing Trajectory are not in some instances likely to be achieved. In my view based upon evidence, the first housing on most of the larger sites will not be delivered until the early/mid 2030's.

35) From the Councils own housing figures there is a substantial shortfall in delivery up to the 2030's. This under provision needs to be reduced with more small sustainable sites. Small sites are usually less constrained by infrastructure delivery because this is already available, or complicated Section 106 agreements involving both District and County. Early delivery is essential given the Council only has a 1.5 year housing land supply.

36) A greater number of smaller sites which do not have constraints to delivery need to be identified. Sites A and B are an obvious example.

37) The Council's identified urban sites include many which are Council owned comprising many garage blocks with poor access, city and town car parks and community buildings. It is very unlikely the total housing numbers indicated from these sites will be achieved. There will be objections to the loss of vehicle parking land, this loss of spaces creates further pressure for "on street" parking and in the case of public car parks the impact this will have upon the vitality and vibrancy of the town centres. Any loss of car parking provision or community buildings is likely to be strongly resisted by the local community. Access to many is substandard for residential development and comprise of back land plots out of character to the surrounding area.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**The Policy wording in LG4 h) and DES3 a) should be amended to provide greater flexibility for densities on small /medium sites.**

**The Policy wording in HOU5 d) should be amended to make it clear the price to be paid by the Council or Registered Provider will be at the open market value and failing that, the plots can be sold to small/medium enterprise housebuilders.**

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. G A Simons Reg 19 Subs 2024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

It is important that the Council is questioned upon its approach to Green Belt Release given the apparent inconsistences where some sites have been identified and other more obvious ones omitted. The Councils minimum density for all sites irrespective of size is not reasonably achievable for small sites. The housing trajectory is overly optimistic. It's reliance on urban sites delivering the numbers indicated, is not reasonably achievable given the constraints of many of the sites.

It is evident that more sites need to be allocated to meet the housing numbers, particularly in the short term.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

**83 - Affinity Water**

Submission Number: 83 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Name: Lita Khazaka

On Behalf Of Company/Organisation: Name: Affinity Water

Comment Number: 8

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Affinity Water broadly supports the council's overall approach to addressing the effects of climate change as it relates to water use. Policy SP2 provides an overall approach and Policy CE1 – Promoting Sustainable Design, Construction and Building Efficiency - seeks to introduce the optional standards under the Building Regulations (Part G) to reduce water consumption. Affinity Water specifically supports the use of a 110 litre per person per day standard consistent with the

standard adopted in the London Plan 2021. The council's approach is consistent with the evidence on likely future water stress produced by the Environment Agency and our own research in our Water Resources Management Plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Draft Local Plan approach to water conservation would be improved and made more effective if were to set out how the council will ensure "greywater recycling and storage facilities" are delivered in all major developments as well as in Broad Locations (Policy LG1 – Broad Locations and Policies LG2, LG3 and LG4 which cover the Hemel Garden Communities project as well as other site allocations in Appendix 1) to go further than "water management" and to embrace "water conservation" too. The council is also invited to make specific reference to water conservation in the various design policies in the Draft Local Plan (for example, Policy DES1 – Design of New Development and Policy DES7 – Building Servicing). That way, water conservation and broader sustainability principles would be integrated into the design process from the outset in the same way that all new development is likely to have to design in and incorporate biodiversity net gain when the relevant parts of the Environment Act 2021 come into force.

Other councils are proposing more precise ways of directing developers to address the need to use water resources more efficiently. For example, the emerging Tower Hamlets Local Plan Policy CG6 specifically requires that: *All new major residential and non-residential development proposals must install water supply and drainage pipework suitable for the separate collection of rain, grey, and foul water as well as the distribution of non-potable water throughout the development from and to all relevant fitments. All major residential and non-residential refurbishment and change of use should aim to retrofit rain and greywater recycling systems.*

Affinity Water further urges the council to ensure that the development plan policy relating to water conservation is applied in all planning applications approved after the Local Plan's adoption so that it can be applied. This is because the 110 litre per person per day standard can only be currently applied at the Building Regulations stage of construction if it is included as a condition of the grant of planning permission.

Finally, it is suggested that the council include an appropriate measure on how the Local Plan will promote water conservation that can be monitored in future Authority Monitoring Reports. This could cover, for example, the number of major developments with greywater recycling and storage facilities or the number of planning permissions for new housing that have a planning condition that will secure the 110 litre per person per day water target. This would have wider benefits for the council as it seeks to articulate further its local response to the Climate Emergency. Table 3 (in attachment) identifies the defects in the policy relative to the NPPF's tests of soundness.

1. 241103 Reg 19 Final Submission_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Affinity Water may just prepare written representations once it has seen the inspector's proposed agenda. It is of course open to the council to incorporate Affinity Water's suggestion to make the policy more effective. This would avoid the need to appear in front of the inspector.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report for details**

**Policy LG4 – Large, Medium and Small sites**

- Draft Policy LG4 seeks to bring together and summarise the policy requirements for allocated sites through the draft Plan. However, the danger in doing so is that if the policies are not summarised accurately or comprehensively, the policy confuses rather than clarifies the requirements. If LG4 is intended to summarise the requirements of the draft Local Plan it needs to be accurate and comprehensive and include policy cross-references for clarity.
- As currently drafted, Policy LG4 includes imprecise and vague requirements, such as demonstrating a "considered approach to development" (criterion a) and "Excellence in design, energy efficiency and water management" (e). Other aspects of LG4 don't need to be stated, such as compliance with other policies in the plan (d) or regard to Neighbourhood Plans (q) – both of which are required anyway. Other criteria just repeat policy requirements from elsewhere in the plan, such as the minimum net density of 40dph set out in policy DES3.
- We think policy LG4 is not necessary and should be deleted on the basis that it is not clear and therefore fails the "effectiveness" soundness test. A clearer approach would be through a combination of the site-specific policy requirements in Part B and the generic policies that apply to all developments in Part A provide an appropriate policy framework.
- Notwithstanding our high-level concerns about Policy LG4, it contains a number of requirements that have viability implications for new development, such as the requirement for affordable housing, self- or custom-build housing, highway improvements and tree planting. The viability consequences of these aspects are considered in the Council's viability assessment prepared by BNP Paribas.
- Section 5.0 of this report outlines our concerns in respect of the Council's viability appraisal and these are not repeated here but, in summary, we have concerns that the cumulative impact of the proposed policy requirements is not fully considered and that the actual viability impacts of the draft Local Plan are likely to be higher than anticipated.
- For clarity, we are not making a case that the policy requirements of the draft Local Plan render development at the report site unviable. The report site is a greenfield site with a low alternative use value. Rather, it is a question of making sure that the proposed policy obligations are reasonable and meet the soundness tests. At this stage, it does not appear that the draft Local Plan is based on sufficient evidence and, as such, would struggle to meet the "justified" soundness test. The viability appraisal should be updated with a more accurate assessment of the likely costs involved.
- In summary, we consider Policy LG4 to be **legally compliant** but **not sound** on the basis that it fails the **effectiveness test.** The **modifications** necessary to make the Plan sound would be the deletion of Policy LG4 in its entirety.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. **100 - Trustees of the Shonleigh Trust**

Submission Number: 100 Submission Date: 06/11/24 14:24

Respondent: Company/Organisation: Bidwells Name: Mr Derek Bromley

On Behalf Of Company/Organisation: Trustees of the Shonleigh Trust Name:

Comment Number: 3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

1) These objections are made on behalf of the Trustees of the Shonleigh Trust. The Trustees object to the Regulation 19 Local Plan on the basis it is neither 'Justified' or 'Positively Prepared'.

2) The Trustees own the land shown edged red and coloured pink and edged blue on the plan **(Appendix 1 of attachment**). The land holding was severed as a consequence of the compulsory acquisition for the M25 in the early 1980s. At this point the M25 is in a deep cutting.

3) The field north of the M25 ( edged red and coloured pink) is contained by residential development along its northern boundary, residential development along part of its western boundary, the St Albans/Watford railway line (Abbey Line) on the eastern boundary and the M25 to the south.

4) Within the northern field are two stable blocks (these fall within te definition of Previously Developed Land). The field is divided by a mature tree line shown by the green line on plan Appendix 1.

5) It is the northern field (edged red) to which these objections relate, in particular the area coloured pink. The southern field would be made available for community benefits as part of any development.

**Green Belt Study**

6) The site adjoins How Wood a settlement excluded from the Green Belt.

7) In 2016 the Council produced their Strategic Housing Land Availability Assessment (SHLAA) relating to Green Belt sites. A copy of the assessment relating to the northern field is provided in **Appendix 2 of attachment.** The Stage conclusions 1 noted *'however, the northern half of the site is bounded by existing residential development to the north and west and its development would not have the same impact as described above'.*

8) As part of the previous local plan the Council commissioned SKM to undertake a Green Belt study in relation to sites which could deliver more than 250 dwellings. The SKM report did not undertake a Green Belt Study in relation to smaller sites. The Council's strategy being that the larger sites would be identified in the Local Plan and that smaller sites would come forward through Neighbourhood Plans and either granted under very special circumstances or within a revised Local Plan (policy DLP12) which amended the Green Belt boundaries.

9) As part of the St Stephen Neighbourhood Plan the Parish Council commissioned Aecom to undertake site assessments. The relevant extract of the final report dated December 2017 is attached as **Appendix 3 of attachment.** The extract identifies the northern field identified as Site S43, "land south of How Wood" and concludes in respect of the Neighbourhood Plan Site Assessment *'it would therefore be an appropriate site for the NP to put forward as a proposal for housing, under policy DLP12 of the draft strategic local plan 2011-2031* '. It then goes on, that if this site is put forward through the neighbourhood plan and accepted by the council then the implementation would be through a Green Belt boundary change in a future local plan review.

10) The Draft Pre Submission St Stephen Parish Council Neighbourhood Plan 2019-2036 (28/11/2019) identified our clients land in Policy 27, **Appendix 4 of attachment** as proposed housing allocation subject to certain criteria.

11) In the St Stephen Parish Neighbourhood Plan Housing Report and Aspiration Sites (10/2020) (Appendix 5 of attachment) it also identifies the northern part of our clients land for housing to accommodate approximately 30 dwellings.

12) In the St Stephen Parish Neighbourhood Plan Pre Submission (Reg 14) Consultation draft (Policy 27) again identifies the northern part of our clients site for residential development for up to 30 dwellings, Appendix 6 of attachment.

13) The St Albans Housing and Economic Land Availability Assessment 2021 (Appendix 7) the overall conclusion was 'the site is considered to be potentially suitable, available and achievable subject to a further assessment as part of the site selection process".

14) The Council's Green Belt Study 2023 prepared by Arup, upon which the Council relies for its evidence base, came to the conclusion that the site (SA 126) should not come forward as a Green Belt release **Appendix 8 of attachment.** It is noted however this was the same conclusion for Site SA 133, which was subsequently granted planning permission for housing. A site which again was identified for housing in the St Stephen Neighbourhood Plan documents.

15) Whilst these studies endeavour to provide objective test criteria, the weighting is very much subjective. It is clear that among the experts commissioned by the 2 Councils to review this site, they have come to different conclusions. There has been no change to the area in terms of landform, topography or landscape which justifies different conclusions.

16) It is also evident that there has been a long history of the northern part of the subject site being identified for development in many council documents. The recent Arup Study only reviews the whole site, whereas the previous SHLAA and Aecom reports have used a finer grain approach and identified the northern part of the subject site as not performing well in relation to the 5 purposes of including land in the Green Belt. Not using a finer grain approach was one of the criticisms of the Councils general approach at the last failed Local Plan.

17) The Arup omission of the northern field is in contrast to the joint council's proposals, where the St Stehen P.C. Pre- Submission Plan and its Housing Aspirations identified the site for housing. In summary from 2016 until 2023 the subject site was identified for housing.

18) There are sites in the Reg 19 which have a wider and greater Green Belt impact or do not share the same level of sustainability. We would wish to review these comparisons as part of the Examination.

**Sustainability**

19) The site adjoins the settlement edge of How Wood, a settlement excluded from the Green Belt. It is in a sustainable location given its proximity to a range of facilities/amenities and public transport connections.

20) In sustainability terms the site has the following (actual distances not as the crow flies): A bus stop on the frontage to Park Street Lane. Services 361 and 635 Abbey Line (St Albans/Watford) railway stations Bricket Wood and How Wood 0.8 km Radlett main line railway station 5.5km Local Neighbourhood Centre 0.9km Park Street Doctor's surgery 0.55km Primary schools 1.0km Secondary schools 3.4km

21) The Arup Qualitative Assessment of this site has errors. The site has a bus stop adjoining the frontage, not 1.6 kilometres distance. There are 2 services; the 361 which is the main How Wood service between St Albans and Borehamwood and the less frequent 635 between Watford and Hatfield. The report makes no mention that the site is mid- way between the railway stations of How Wood and Bricket Wood on the Abbey line, both being 0.8km and accessible by footpath. No mention of the Doctors surgery which is 0.55km. Other than the Radlett main line station and secondary school all the above are accessible by footpath. Whilst the Arup report refers to distances from an S.S.S.I and County Wildlife Site, these are is separated by the railway line. The site is separated from contaminated land by the railway. This land was tipped on decades ago and has methane vent pipes; it has been naturalised and is a publicly accessible resource.

22) As part of the Major Transport Schemes Policy TRA2 **(Appendix 9 of attachment)** provides that the Council supports the delivery of an enhanced Abbey line service (the St Albans/Watford railway line).

23) The Reg 19, Para 1.30 refers that the strategy is to locate growth in the most sustainable locations. Para 3.4 refers to "meet the needs within or close to existing settlements". Policy SP2 d) seeks to make "use of the most sustainable locations for growth". It is evident that the location of this site meets these policies objectives.

**Development Benefits**

24) It is envisaged that in accordance with the Draft St Stephen N.P. the area shown colour washed on the plan Appendix I would contain built development. In addition to all the usual benefits which are derived from housing, the southern area of the field will provide a green buffer for compensatory Green Belt benefits, utilised for on-site Bio Diversity Net Gain and a Sustainable Urban Drainage scheme.

25) The made St Stephen N.P. policy S19 and para's 8.21 and 8.22 (Appendix 10) together refer to the St Albans Green Spaces Report indicates there is a deficit of allotment facilities. Our clients land south of the M25 adjoins existing Allotments; this would be made available as an extension to te existing allotments.

**Policy Objections**

26) The policies which provide a density of 40 d.ph as a minimum (LG4 h) and DES3 a)) are simply unrealistic and unobtainable when it comes to small sites (up to 9 dwellings) and to a lesser extent for medium sites. These sites are not of a size which can accommodate a housing mix to achieve this density.

27) The plan policy for minimum densities to be applied to small/medium sites should be deleted. New wording should be inserted where this is an aim for small and medium sites but to have regard to the surrounding character and density and uses.

**Is the Plan Justified**

28) Given the above, the Plan is not justified as an appropriate strategy as it does not take into account the reasonable alternative of including part of the northern field as a Green Belt release for housing and the Councils evidence base for not doing so, is not proportionate or justified. Given the previous history of reports. The Councils Green Belt Study conclusions are at variance to the direction the Council and St Stephen P.C were taking in respect of this site.

29) Whilst the Government's final definition of Grey Belt and the inclusion of Grey Belt as not being inappropriate development within the Green Belt, has yet to be confirmed; the proposed wording for Grey Belt includes *'any other parcels and/or areas of Green Belt land that make* a *limited contribution to the five Green Belt purposes'.* The Government consultation "Proposed reforms to the NPPF and other changes to the planning system" 24/09/2024 suggests an effective way of providing guidance and refers *"Grey Belt Land which makes* a *limited contribution to the Green Belt purposes will: a) Not strongly perform against any Green Belt purpose; and b) Have at least one of the following features : Land containing substantial built development or which is fully enclosed by built form. ii Land which makes no or very little contribution to preventing neighbouring towns from merging into one another. iii Land which is dominated by urban uses, including physical developments iv Land which contributes little to preserving the setting and special character historic towns".*

30) The part of the northern field which is largely contained by development on 3 boundaries has 2 stable blocks which fall within the definition of Previously Developed Land. It is described in the Pro- Forma Site Assessment as scrub land.

**Has The Plan Been Positively Prepared**

31) This is a qualified objection. Our client raises no objection to the overall housing provision based upon the current standard methodology, though has issues with the housing delivery during the plan period given the Council only has a 1.5 years housing land supply. Should the Governments new standard methodology apply for the purposes of this Plan, then there is a gross under provision of housing. The new methodology would increase the housing numbers from 885 d.p.a. to 1,554 d.p.a., a 75% increase.

32) Whilst there have been Ministerial Statements regarding when the new standard methodology for housing need will apply, nothing is certain as to the final wording and timing when it will apply.

33) The current expectation based upon the Council's programme is that the local plan will be submitted before the Government's proposed Standard Methodology for determining housing need takes effect. It is important a Plan is in place given the acute housing shortfall with only a 1.5 years housing land supply and to enable early new housing delivery. However, given the circumstances the Council has found itself, with a significant risk of unmet housing need, it is very important to identify and allocate in this plan more sites where appropriate.

34) Given that planning policy and the plan process is a bit of a "moveable feast" the expectation in 26) above, may not be realised and there is no certainty. It is in any event clear the proposed housing provision will not meet the future development needs during the local plan period and an early review will be required.

35) In the event the new Standard Methodology does not apply to this Local Plan and the Council meets the deadline for submission, then our client's are of the view the Council should commit to an immediate review following the Adoption of the Plan. There will a period between the Inspector's report and the Council's formal Adoption for Council officers to start the preliminary internal processes.

36) The Council's Housing Trajectory (Table 3.2) for delivering housing from the "Broad Locations" is overly optimistic given the timelines for all the necessary planning approvals and lead in times for infrastructure.

37) Lichfields, produced a report in 2020 "Start to Finish" which reviewed build out rates of large housing sites across te country. This showed that nationally the average planning approval period for large sites of say 1,000 dwellings was 4.6 years. Given the local councils in Hertfordshire have not embraced new development but are reluctant participants when it comes to development on green fields, then locally the time is longer. The Lichfield report also analyses the build out rate on large sites. The averages for sites 500-1,000 was 68 d.p.a., 1,000-1499 was 107 d.p.a. It is generally acknowledged that the early development years of schemes the completion rates are far less than the average. The build rate in the early years for the Broad Locations is again overly optimistic.

38) My experience of the delivery of large sites in Hertfordshire, a county which has been reluctant to housing growth for decades, it will not be until the early/mid 2030's that many of the "Broad Locations" begin to deliver housing, the exceptions possibly being part of the west Redbourn and part of North St Albans where permission has either granted or the application is well advanced. I set out below examples I have been involved with or are aware.

39) Hemel Hempstead. Allocated site for 900 dwellings in the Sites Allocations, Adopted 2017. Hybrid Planning Application submitted 21/12/2018. Granted 03/12/2021. Price negotiations with land owners and following approvals of pre- commencement conditions, start date on site November 2024. First dwelling for occupation spring 2026. Total time for an allocated site from planning application to delivery of first dwelling 7.25 years.

40) Stevenage. Allocated site for 1,350 dwellings in Adopted Local Plan 22/05/2019. Hybr'1d planning application 07/04/2021. Following Section 106 negotiations expected planning permission November 2024. There will be a period of negotiations on value which involves the Council and Homes England, with probable reference to an Expert, allow 18 months. Planning precommencement condition approvals, allow further 9 months. Lead in time for infrastructure to first dwelling allow further 18 months. Total time for an allocated site from planning application to first occupation just under 7.5 years.

41) Hitchin. Outline Planning Application for up to 700 dwellings submitted in advance of Local Plan on the 26/04/2018. Site allocated in the Adopted Local Plan November 2022 for 700 dwellings. Awaiting a decision. First occupation is likely to be in excess of 9 years from application.

42) On the basis of the above it is my view a reasonable expectation is that for large sites there is a 7 year gap between the submission of a planning application to first delivery of a completed dwelling. Given that to date with a couple of exceptions, applications on large sites have not been registered I think my estimate of early to mid 2030's is supported by the evidence. There are varied reasons why these sites have taken so long (continued public and councillor resistance, officer's workload) This will apply to all sites. That is why the timescales envisaged in the Housing Trajectory are not in some instances likely to be achieved. In my view based upon evidence, the first housing on most of the larger sites will not be delivered until the then later early/mid 2030's.

43) From the Councils own housing figures there is a substantial shortfall in delivery up to the 2030's. This under provision needs to be reduced with more small sustainable sites. These are not so constrained by infrastructure delivery because this is already available, or complicated Section 106 agreements involving both District and County . Early delivery is essential given the Council only has a 1.5 year housing land supply.

44) A greater number of smaller sites which do not have constraints to delivery need to be identified. The subject site is an obvious example.

45) The Council's identified urban sites include many which are Council owned comprising many garage blocks with poor access, city and town car parks and community buildings. It is very unlikely the total housing numbers predicted indicated for these sites will be achieved. There will be objections to the loss of vehicle parking land, this loss of spaces creates further pressure for "on street" parking and in the case of city centre public car parks the impact this will have upon the vitality and vibrancy of the town centres. Any loss of car parking provision or community buildings is likely to be strongly resisted by the local community.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**The Policy wording in LG4 h) and DES3 a) should be amended to provide greater flexibility for densities on small /medium sites.**

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Shonleigh Trustees - Land at Park Street__[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

It is important the the Council is questioned upon its approach to Green Belt Release given the apparent inconsistencies where some sites have been identified and other more obvious ones omitted. The Councils minimum density for all sites irrespective of size is not reasonably achievable for small sites. The housing trajectory is overly optimistic. It's reliance on urban sites delivering the numbers indicated, is not reasonably achievable given the constraints of many of the sites.

It is evident that more sites need to be allocated to meet the housing numbers particularly in the short term.

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report for details**

**Policy LG4 – Large, Medium and Small sites**

- Draft Policy LG4 seeks to bring together and summarise the policy requirements for allocated sites through the draft Plan. However, the danger in doing so is that if the policies are not summarised accurately or comprehensively, the policy confuses rather than clarifies the requirements. If LG4 is intended to summarise the requirements of the draft Local Plan it needs to be accurate and comprehensive and include policy cross-references for clarity.
- As currently drafted, Policy LG4 includes imprecise and vague requirements, such as demonstrating a "considered approach to development" (criterion a) and "Excellence in design, energy efficiency and water management" (e). Other aspects of LG4 don't need to be stated, such as compliance with other policies in the plan (d) or regard to Neighbourhood Plans (q) – both of which are required anyway. Other criteria just repeat policy requirements from elsewhere in the plan, such as the minimum net density of 40dph set out in policy DES3.
- We think policy LG4 is not necessary and should be deleted on the basis that it is not clear and therefore fails the "effectiveness" soundness test. A clearer approach would be through a combination of the site-specific policy requirements in Part B and the generic policies that apply to all developments in Part A provide an appropriate policy framework.

- Notwithstanding our high-level concerns about Policy LG4, it contains a number of requirements that have viability implications for new development, such as the requirement for affordable housing, self- or custom-build housing, highway improvements and tree planting. The viability consequences of these aspects are considered in the Council's viability assessment prepared by BNP Paribas.
- Section 5.0 of this report outlines our concerns in respect of the Council's viability appraisal and these are not repeated here but, in summary, we have concerns that the cumulative impact of the proposed policy requirements is not fully considered and that the actual viability impacts of the draft Local Plan are likely to be higher than anticipated.
- For clarity, we are not making a case that the policy requirements of the draft Local Plan render development at the report site unviable. The report site is a greenfield site with a low alternative use value. Rather, it is a question of making sure that the proposed policy obligations are reasonable and meet the soundness tests. At this stage, it does not appear that the draft Local Plan is based on sufficient evidence and, as such, would struggle to meet the "justified" soundness test. The viability appraisal should be updated with a more accurate assessment of the likely costs involved.
- In summary, we consider Policy LG4 to be **legally compliant** but **not sound** on the basis that it fails the **effectiveness** The **modifications** necessary to make the Plan sound would be the deletion of Policy LG4 in its entirety.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). **LG4 – Large, Medium and Small Sites point I.**

Point I requires proposals for Large, Medium and Small sites to '*Plant at least 1 semi-mature tree for each dwelling; for C2 accommodation* plant 1 semi-mature tree for each 2.5 dwelling equivalent bed spaces'. NPPF para 16. identifies that '*Plans should…b) be prepared positively, in a way that is aspirational but deliverable'*. Para 131 provides guidance specifically associated with trees and states '*Trees make an important contribution to the character and quality of urban environments and can also help mitigate and adapt to climate change. Planning policies and decisions should ensure that new streets are tree-lined, that opportunities are taken to incorporate trees elsewhere in developments (such as parks and community orchards), that appropriate measures are in place to secure the long-term maintenance of newly-planted trees, and that existing trees are retained wherever possible. Applicants and local planning authorities should work with highways officers and tree officers to ensure that the right trees are planted in the right places, and solutions are found that are compatible with highways standards and the needs of different user*s'.

PPG with respect to viability states that '*The role for viability assessment is primarily at the plan making stage. Viability assessment should not compromise sustainable development but should be used to ensure that policies are realistic, and that the total cumulative cost of all relevant policies will not undermine deliverability of the plan'*(Paragraph: 002 Reference ID: 10-002-20190509).

Requiring 1 new trees per new dwelling especially for small brownfield sites is not deliverable or realistic and could compromise sustainability development and is therefore contrary to NPPF. The requirement also goes beyond the requirements of the NPPF. Any requirement would need to be fully evidenced and the requirement incorporated into any forthcoming viability study.

**Recommendation:**

The Council should reconsider policy LG4 point I and ensure any such policy approach introduces more flexibility or is deleted.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy LG4, intends to consolidate requirements for allocated sites, however, the policy risks causing confusion due to its vague language and redundancy with other policies in the draft Local Plan. By including ambiguous terms (e.g., “considered approach to development” and “excellence in design”) and repeating standards covered elsewhere, LG4 lacks clarity and fails the “effectiveness” test for soundness. Additionally, its requirements for affordable housing, custom-build homes, and infrastructure improvements may have underestimated viability impacts, potentially falling short of the “justified” soundness test. Therefore, we recommend deleting Policy LG4 to enhance the plan’s clarity and effectiveness.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Policy LG4, intends to consolidate requirements for allocated sites, however, the policy risks causing confusion due to its vague language and redundancy with other policies in the draft Local Plan. By including ambiguous terms (e.g., “considered approach to development” and “excellence in design”) and repeating standards covered elsewhere, LG4 lacks clarity and fails the “effectiveness” test for soundness. Additionally, its requirements for affordable housing, custom-build

homes, and infrastructure improvements may have underestimated viability impacts, potentially falling short of the “justified” soundness test. Therefore, we recommend deleting Policy LG4 to enhance the plan’s clarity and effectiveness.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Representing a range of landowners across the District.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report for details**

**Policy LG4 – Large, Medium and Small sites**

- Draft Policy LG4 seeks to bring together and summarise the policy requirements for allocated sites through the draft Plan. However, the danger in doing so is that if the policies are not summarised accurately or comprehensively, the policy confuses rather than clarifies the requirements. If LG4 is intended to summarise the requirements of the draft Local Plan it needs to be accurate and comprehensive and include policy cross-references for clarity.
- As currently drafted, Policy LG4 includes imprecise and vague requirements, such as demonstrating a "considered approach to development" (criterion a) and "Excellence in design, energy efficiency and water management" (e). Other aspects of LG4 don't need to be stated, such as compliance with other policies in the plan (d) or regard to Neighbourhood Plans (q) – both of which are required anyway. Other criteria just repeat policy requirements from elsewhere in the plan, such as the minimum net density of 40dph set out in policy DES3.
- We think policy LG4 is not necessary and should be deleted on the basis that it is not clear and therefore fails the "effectiveness" soundness test. A clearer approach would be through a combination of the site-specific policy requirements in Part B and the generic policies that apply to all developments in Part A provide an appropriate policy framework.
- Notwithstanding our high-level concerns about Policy LG4, it contains a number of requirements that have viability implications for new development, such as the requirement for affordable housing, self- or custom-build housing, highway improvements and tree planting. The viability consequences of these aspects are considered in the Council's viability assessment prepared by BNP Paribas.
- Section 5.0 of this report outlines our concerns in respect of the Council's viability appraisal and these are not repeated here but, in summary, we have concerns that the cumulative impact of the proposed policy requirements is not fully considered and that the actual viability impacts of the draft Local Plan are likely to be higher than anticipated.
- For clarity, we are not making a case that the policy requirements of the draft Local Plan render development at the report site unviable. The report site is a greenfield site with a low alternative use value. Rather, it is a question of making sure that the proposed policy obligations are reasonable and meet the soundness tests. At this stage, it does not appear that the draft Local Plan is based on sufficient evidence and, as such, would struggle to meet the "justified" soundness test. The viability appraisal should be updated with a more accurate assessment of the likely costs involved.
- In summary, we consider Policy LG4 to be **legally compliant** but **not sound** on the basis that it fails the **effectiveness** The **modifications** necessary to make the Plan sound would be the deletion of Policy LG4 in its entirety.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

3.9. Policy LG4 relates to Large, Medium and Small Sites that are allocated to support growth across the District. The policy wording includes a set of criteria which the policy wording says development proposals must meet (emphasis added). We accept the rationale in respect of the proposed criteria but at policy test which requires total conformity leads to a total lack of flexibility.

The criteria themselves also introduce terminology like 'should' which is confusing and makes it difficult to know how a decision taker will react (Framework paragraph 167d). In our view, the policy should be amended as follows:

*Proposals on these sites (or unallocated windfall development at this scale) must should accord with the following requirements in addition to the site-specific requirements listed in Part B*

3.10. Turning to the criteria specifically, we note that criterion 'd' requires accordance with [all] local plan policies and the requirements set out in Part B. In the first instance there is a conflict between the requirement to accord with all policies, given S.38(6) allows material considerations to be taken into account, and that accordance with the development plan should be taken to mean when read as a whole (noting there will be tensions between policy objectives).

3.11. Criterion 'h' sets a minimum housing density which all developments must meet and criterion 'l' prescribes a number of trees which must be planted. We accept that maximising the delivery of homes through the effective use of land is an objective which should be

shared by the local planning authority and applicants. However, it is not always practicable for a net density of 40 dwellings per hectare to be achieved. Similarly, site constraints may mean that 1 tree per dwelling could be problematic and ultimately lead to issues of delivery more widely. Both criterion are inherently inflexible and do not allow for balanced judgements. For this reason we believe the criteria should identify a target to be supported rather than a requirement to be enforced, this will allow the necessary flexibility for applicants to adequately address contextual issues and deliver an appropriate amount of housing through a well-designed scheme.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). ## 288 - Chris Berry

Submission Number: 288 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: CPRE Hertfordshire Name: Chris Berry

Comment Number: 12

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**Policies are ineffective and inconsistent with national policy, with regard to the Green Belt**

The Draft Local Plan is ineffective in meeting the aim of Policy SP3 “to protect the Green Belt from inappropriate development”. The Plan proposes “select Green Belt boundary adjustments in the right areas to provide wider protection of ‘the rest of the Green Belt”, but without having established the scale of change that is necessary, or justifying the specific boundary changes.

For example, in the case of the SRFI site, the Draft Local Plan does not define a new Green Belt boundary. This is not consistent with national policy and would not be effective in meeting the Council's stated Green Belt objective. Similarly, policy relating to the Hemel Garden Communities appears only to be justified as a cross-boundary proposal without further evidence regarding specific St Albans requirements, and proposed by national Government.

In every case where "Broad Locations" and other smaller sites are proposed for removal from the Green Belt, these proposals are not justified collectively or individually, and are contrary to national policy in the absence of the demonstration of exceptional circumstances as required by the NPPF. Policy LG1 Broad Locations requires 22 criteria to be met for their development, but omits the requirement for the definition and creation of a new defensible permanent boundary for the Green Belt.

Similarly, criteria in Policy LG4 fail to require the creation of a permanent defensible Green Belt boundary for sites removed from the Green Belt, and this is ineffective and contrary to national policy. Subsequent Policies LG5 to LG9 fail to provide supporting evidence, implying very special or exceptional circumstances which are unjustified.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Local Pan should be re-structured to consider the role and function of the largest land use designation in the SACD i.e. the London Metropolitan Green Belt in appropriate detail. The lack of adequate consideration of the implications of this designation for physical development in the future renders the Local Plan unsound in limiting the opportunities and constraints afforded by the land designation.

**302 - McCarthy Stone and Churchill Living**

Submission Number: 302 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Jane Vlach

On Behalf Of Company/Organisation: McCarthy Stone and Churchill Living Name:

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Point I requires proposals for Large, Medium and Small sites to '*Plant at least 1 semi-mature tree for each dwelling; for C2 accommodation* plant 1 semi-mature tree for each 2.5 dwelling equivalent bed spaces'. NPPF para 16. identifies that '*Plans should...b) be prepared positively, in a way that is aspirational but deliverable'*. Para 131 provides guidance specifically associated with trees and states '*Trees make an important contribution to the character and quality of urban environments and can also help mitigate and adapt to climate change. Planning policies and decisions should ensure that new streets are tree-lined, that opportunities are taken to incorporate trees elsewhere in developments (such as parks and community orchards), that appropriate measures are in place to secure the long-term maintenance of newly-planted trees, and that existing trees are retained wherever possible. Applicants and local planning authorities should work with highways officers and tree officers to ensure that the right trees are planted in the right places, and solutions are found that are compatible with highways standards and the needs of different user*s'.

PPG with respect to viability states that '*The role for viability assessment is primarily at the plan making stage. Viability assessment should not compromise sustainable development but should be used to ensure that policies are realistic, and that the total cumulative cost of all relevant policies will not undermine deliverability of the plan'*(Paragraph: 002 Reference ID: 10-002-20190509).

Requiring 1 new trees per new dwelling especially for small brownfield sites is not deliverable or realistic and could compromise sustainability development and is therefore contrary to NPPF. The requirement also goes beyond the requirements of the NPPF. Any requirement would need to be fully evidenced and the requirement incorporated into any forthcoming viability study.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is**

**incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Council should reconsider policy LG4 point I and ensure any such policy approach introduces more flexibility or is deleted.

**303 - Phil Escritt**

Submission Number: 303 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Open Space Society Name: Phil Escritt

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Consultation Need to explicitly refer to the HCC Rights of Way improvement Plan (ROWIP)**

These gaps would be substantially filled by reference to the Herts County Council's Rights of Way improvement Plan (ROWIP). The ROWIP is a statutory requirement of the Countryside and Right of Way Act (CROW) 2000. The Hertfordshire ROWIP is in two parts. The first part, the policy document, is an assessment of the current situation and a statement of action. It is supplemented by a database of "suggestions" for improvements. This database is a living document which is added to over time based on input from councillors, officers and members of the public.

The St Albans Access Forum which comprises representatives of walking, cycling and horse riding organisations has systematically reviewed the situation in the district's parishes and submitted suggestions which have been included in the ROWIP database. The ROWIP suggestions now cover a large proportion of the selected sites in this plan.

The HCC ROWIP is a daughter document of the Local Transport Plan LTP4 and is therefore implicitly covered by paragraph a) of strategic policy SP8, Transport Strategy which requires alignment with the HCC "Local Transport Plan (LTP) and other evidence and supporting documents, as relevant."

The Local Plan will be made more effective and proportionate by explicitly referencing the ROWIP in the following policies.

- Policy LG1 – Broad Locations. In paragraph l) after "LCWIP" add "and ROWIP"
- Policy LG4 – Large, Medium and Small Sites. In paragraph j) after "LCWIP" add "and ROWIP"
- Policy SP8 – Transport Strategy. In paragraph a) after "supporting documents as relevant" add "e.g the ROWIP"
- Policy TRA1 – Transport Considerations for New Development. In paragraph b) sub paragraph x) after "LCWIP" add "and ROWIP"

The Society strongly recommends that the district council should adopt these changes.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. ## 315 - Bloor Homes and Department of Health & Social Care

Submission Number: 315 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Sarah Hamilton-Foyn

On Behalf Of Company/Organisation: Bloor Homes and Department of Health & Social Care Name:

Comment Number: 9

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**Policy LG4 – Large Medium and Small Sites**

This policy covers all those sites from 9 – 249 dwellings.

Table A1.1 in Part B- Local Plan Sites provides a schedule of the allocations included in the Reg 19 Local Plan, there are no individual site policies, so similar to the points made in respect of Policy LG1 Broad Locations (which are in effect the strategic sites) it is considered that there should be policies included in the plan for the proposed site allocations rather than relying on a schedule in Part B.

In accordance with the NPPF (December 2023) paragraph 28:

***"Non-strategic policies should be used by local planning authorities and communities to set out more detailed policies for specific areas, neighbourhoods or types of development. This can include allocating sites, the provision of infrastructure and community facilities at a local level, establishing design principles, conserving and enhancing the natural and historic environment and setting out other development management policies."***

Individual policies for each of the proposed allocations should be included in order to provide clarity for developers and local communities etc in terms of what is proposed and expected in terms of contributions for each of the proposed sites.

Criteria a) states that "*large sites should have masterplans agreed with the Council before developing detailed design details*..." It is noted that according to Part B there are only 3 large sites (i.e., 100 – 249 dwellings)., however, it is not clear what the process is for agreeing a masterplan with the Council. This could be a formal or informal process and if the Council were required to approve each masterplan, it is considered that this could lead to a delay in the preparation of planning applications, resulting in an unnecessary slowing down of the delivery and undermining the housing trajectory.

It is considered that the Council should consider a similar approach to North Hertfordshire's adopted Local Plan 2011-2031 (adopted in 2022) and refer to Policy SP9 Design and Sustainability and also Policy SP19 as an exampled for a sites East of Luton.

"*Policy SP9 sets out the strategic design and masterplanning expectations of the Council for the Strategic Housing Sites and other significant development. The policy has to apply to a wide range of developments in terms of quantum, scale and complexity. The policy should be applied in its entirety to the Strategic Housing Sites but for other significant development a tailored and case-by-case approach will be required to identify a proportionate level of masterplan and design detail to secure design quality dependant on site specific issues and the level of detail submitted with any planning application.*"

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Criteria a of the policy should be amended to remove the reference to masterplans being agreed with the Council before developing detailed designs. Instead, consideration should be given to a policy similar to the North Hertfordshire adopted Local Plan ref Policy SP9 and also Policy SP19.

Individual policies should be included in the Plan for each of the allocations. NPPF (December 2023) paragraph 16 d) states that "*contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;" As referred to above paragraph 28 of the NPPF is also relevant.*

In order for the plan to be sound it must be positively prepared, justified i.e. an appropriate strategy, effective and consistent with national policy.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Representation_Form Policy LG4 Large, Medium & Sm Sites FINAL 5,11,2024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

The issues raised are fundamental to the preparation and soundness of the Local Plan.

## 316 - Linden Wates (Bricket Wood) Limited

Submission Number: 316 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Woolf Bond Planning Ltf Name: Thomas Rumble

On Behalf Of Company/Organisation: Linden Wates (Bricket Wood) Limited Name: Linden Wates (Bricket Wood) Limited

Comment Number: 3

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

See enclosed statement for full details, although in summary the approach of the Plan in policy LG4 is not sound for the following reasons:

a) It is not **positively prepared** as it does not seek to address the Plan area's housing needs.

b) It is not **justified** with regard to the exclusion of our client's site from assessment within the HELAA, especially as the earlier appeal decision confirmed the wider extent of previously developed land on the site.

c) Not **consistent with national policy** as the identification of housing allocations has not prioritise previously developed land in the Green Belt, as required by NPPF paragraphs 147 and 148.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The necessary changes to Draft Policy LG4 to address the matters of soundness are summarised below:

That our clients land at the former HSBC site is included as an allocation for around 60 dwellings.

### Please upload any supporting documents here. Do not include any signatures or other personal data.

## 330 - Taylor Wimpey Strategic Land

Submission Number: 330 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Sam Hollingworth

On Behalf Of Company/Organisation: Taylor Wimpey Strategic Land Name:

Comment Number: 3

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

4.2 Policy LG4 requires *inter alia* applicants for development of Large Sites (defined in the DLP as being developments of 100-249 homes) to prepare a masterplan, and for this masterplan to be agreed with the Council prior to developing detailed designs at Policy LG4 a).

4.3 It is not clear from the current policy text what is meant by "*agreed with the Council*"– whether this entails a formal approval process (as some Councils have implemented in respect of masterplans) and, if so, what this would involve; or it is anticipated that a masterplan will form part of an outline application to be approved; or whether a more informal approach is anticipated.

4.4 Similarly, it is not clear if the reference in Policy LG4 a) to masterplans needing to be agreed before developing detailed designs is a reference to a need for them to predate a detailed planning application (i.e. the masterplan can be incorporated into an outline application) or if reference to detailed designs is meant otherwise.

4.5 In relation to Policy LG4 l), whilst we do not object to the principle of a policy in which the provision of additional trees as part of development is encouraged, the justification for the specific requirement to provide at least one semi-mature tree per dwelling is unclear. The justification for any policy around such requirements would, in our view, need to consider that there is already a statutory requirement to achieve a minimum 10% biodiversity net gain as part of new developments and that provision of trees might not necessarily assist in maximising the potential biodiversity net gain delivered.

### 334 - TT Group

Submission Number: 334 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Knight Frank Name: Stuart Baillie

On Behalf Of Company/Organisation: TT Group Name:

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Policy LG4 (Large, Medium and Small Sites)**

Policy LG4 of the Draft Local Plan refers to those smaller sites identified within the Draft Local Plan. Policy LG4 sets out a number of requirements, including a requirement to make effective use of the site, with a minimum overall net density of 40 dwellings per hectare (dph).

40 dph is not a density we would associate with 'urban' development. It is a largely suburban typology relevant to housebuilder type development rather than flats or more intensive formats of residential development which are more associated with urban locations and the maximising of urban development opportunities.

This density calculation reflects SACDC's predominant reliance on greenfield release to achieve its housing requirement and more focus must be given to maximising density in urban areas which would be consistent with other policies. This should be noted with a more flexible wording in policy LG4 which could introduce a higher 'minimum net density' for urban areas or at the very least state that "significantly higher densities can be achieved in suitable urban locations".

Our Client encourages the continual reference to making effective use of land and agree with the importance of doing so. SACDC should ensure the Draft Local Policy effectively addresses the importance of also making efficient and effective use of small sites – particularly to meet short-term housing need.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusions**

Our Client welcomes the preparation of the St Albans' new Local Plan, noting that those policies contained in the current adopted Local Plan (1994) are extremely outdated and do not accurately reflect current circumstances.

Our Client broadly supports the aspirations of the Plan, particularly that of prioritising residential development on previously developed sites, and ensuring the efficient use of such land in order to meet the significant housing need within the district. Our Client agrees this represents a sensible and effective way of providing much needed new homes in highly sustainable locations across the district which is otherwise constrained by Green Belt.

Nevertheless, our Client has significant concerns regarding specific policies of the Draft Local Plan. Most notably, our Client raises key concerns with the failure of the Draft Local Plan to identify Marlborough House as a site for future residential development. As discussed throughout this representation, Marlborough House represents an underutilised, highly accessible previously developed site, the comprehensive redevelopment of which to provide residential units would make a significant contribution towards meeting housing need within SACDC.

Furthermore, our Client contends that the Draft Local Plan are not legally sound and do not comply with the NPPF. Our Client has therefore made a number of recommendations, which if adopted would ensure consistency across the Draft Local Plan. Notably, our Client strongly contends that those policies within the Draft Local Plan must be sufficiently flexible in order to maximise the chances of meeting the significant housing need within the district. Failure to do so risks the Draft Local Plan stifling opportunities to meet housing need through the effective and efficient use of the highly sustainable brownfield sites.

Overall, it is concluded that in its current form the Draft Local Plan has areas of inconsistency, is not justified with appropriate evidence and is therefore at risk of not be legally compliant, and it is suggested that the Council take further review. We look forward to engaging further in the preparation of the St Albans Local Plan 2041.

**341 - Higgins Group**

Submission Number: 341 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Name: Alexandra Milne

On Behalf Of Company/Organisation: Higgins Group Name:

Comment Number: 3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Green Belt Review and Site Selection Methodology (Policies SP3 and LG4)
Informed by the conclusions of the Green Belt Reviews(2014 and 2023) the Draft Local Plan has revised the Green Belt boundaries (as shown on the proposed Policies Map). HG supports the conclusion to review and revise the Green Belt boundaries in order to address housing need but considers that the proposed revisions do not go far enough in order to address the plan-period housing need.
As set out elsewhere in these representations, there are significant concerns surrounding the housing trajectory and its ability to be fully delivered to meet the housing requirements within SACDC over the plan period and additional land will be required in order to meet the authority's housing need. This is contrary to paragraph 148 of the NPPF which states that plans should "be able to demonstrate that Green Belt boundaries will not need to be altered at the end of the plan period". SACDC should take this opportunity to identify further sites suitable for housing delivery within the Green Belt in order to avoid having to make further alterations in the short and medium term following the Draft Local Plan's adoption.
The Local Plan Site Selection Methodology Outcomes and Site Allocations document (dated September 2024) states that "Green Belt Sites identified in the HELAA but outside of the GBR buffers were not considered to be suitable due to their less sustainable location and because development on such sites would create holes in the Green Belt, leading to its fragmentation." This approach has discounted all potential development sites that are not within the defined settlement boundary buffer areas, notwithstanding their suitability for development or contribution to the Green Belt. HG considers that this approach is flawed and results in suitable sites, specifically those appropriate for housing, being overlooked.
The Redbourn Farm site owned by HG is one such site that would be suitable for allocation and should be reconsidered in order to assist SACDC in identifying appropriate sites to meet their housing need.
Further information about the Site is set out in Appendix 1 of these representations.

**349 - Lisa Peters**

Submission Number: 349 Submission Date: 08/11/24 09:00
Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

CHPC raises concerns regarding **PolicyLG4**, which sets a minimum overall net density of 40 dwellings per hectare for large, medium, and small sites. Given the rural character and smaller scale of Colney Heath, this density target appears disproportionately high and may not be compatible with the existing character, infrastructure, and spatial needs of the parish. Applying a fixed density figure across diverse areas may overlook the unique requirements and constraints of smaller rural communities like Colney Heath Parish, where higher densities could strain local infrastructure, increase traffic, and affect the character and identity of the areas.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

CHPC recommends that the density requirement in **Policy LG4** be reconsidered for rural areas and, instead, suggests a percentage-based approach to ensure that the number of dwellings aligns more fairly with each area's size and capacity. This approach would allow for a more nuanced, context-sensitive application of density targets, supporting sustainable development that respects the distinct character of smaller rural communities.

**350 - Hill Residential**

Submission Number: 350 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: tor&co Name: Sophia Goodhead

On Behalf Of Company/Organisation: Hill Residential Name:

Comment Number: 7

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Policy LG4: Large, Medium and Small Sites**

Apart from the Broad Locations (sites of 250+ homes), SADC is proposing that a significant part of the District's growth will be from Large, Medium or Small sites. The definition of these in terms of size are: Large Sites (100-249 homes); Medium Sites (10-99 homes); and Small Sites (5-9 homes). These sites are generally concentrated within urban areas and around the higher tiers in the Settlement Hierarchy.

Policy LG4 states that proposals on these sites must accord with the requirements set out, in addition to the site-specific requirements listed in Appendix 1. Part e) of the policy requires 'excellence' in design, energy efficiency and water management, however it still doesn't specify how or what excellence is to be assessed against. As a result, the policy is unclear and is inconsistent with paragraph 16d of the NPPF. Further, elements such as energy efficiency and water management are already covered in policies SP2 and CE1 and shouldn't be repeated. Part e) of the policy is not justified and does not serve a clear purpose, in accordance with paragraph 16f of the NPPF, and should be removed.

Parts f), g), h) and i) also repeat other policy requirements and Hill would question whether this is required (or indeed appropriate) in accordance with the NPPF (paragraph 16f).

Hill consider that in order to ensure part j) is effective, proportionate and deliverable, that it should include *"...and where necessary public transport services upgrades/improvements*" to reflect lower impacts / requirements for smaller sites and sites where these may not be required due to existing context.

In order for part k) to be effective, Hill consider that the following wording should be added to ensure flexibility where required and to reflect instances where there are low quality trees on site: "*Where possible, retain significant healthy trees and other important landscape features and ensure that any loss required is appropriately mitigated*".

Part l) requires at least 1 semi-mature tree to be planted for each dwelling, however, there is no mention of this specific requirement within the Infrastructure Delivery Plan (2024) or Local Plan Viability Report (2024). In order for developers to be able to calculate the cost and impact of requirements such as these, there needs to be sufficient justification set out within the evidence base. In addition, the requirement takes no account of the biodiversity strategy for a site. The Biodiversity Metric includes trading rules, and consequently there must be sufficient flexibility for any landscaping strategy to reflect the requirements of the Metric.

Similar to the response above for part j), parts m) and r) should be amended as suggested below in order that the policy is effective, proportionate and deliverable and does not hinder the development of sustainable sites: "*Where necessary and justified, provide contributions to enhance existing strategic, local and recreational public open space, sports facilities, including managed woodland and ecological network links*".

For r): *"For major schemes, where necessary and justified, provide contributions towards the maintenance and / or upgrade of an existing community hall or village hall nearby, which is secured by appropriate mechanism such as a S106 agreement*."

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

Respondent: Company/Organisation: The Environment Agency Name: Mohammad Ahmed

Comment Number: 4

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We welcome the inclusion of site-specific policies for the purpose of ensuring sustainable development. However, as communicated in our Regulation 18 response, we note that **policies LG1 and LG 4** could be strengthened by including requirements for flood risk assessments, biodiversity net-gain, protection of adjacent watercourses and groundwater protection.

## LG5 - Green Belt

### 32 - John Whiting

Submission Number: 32 Submission Date: 27/10/24 09:00

Respondent: Company/Organisation: Radlett Society & Green Belt Association (RSGBA) Name: John Whiting

Comment Number: 4

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We naturally welcome the clear support for the preservation of the Green Belt at para 3.5; the processes outlined in LG5 & LG6 are helpful. We do think, however, that there needs to be stress on the reasons for the Green Belt, including in particular the prevention of nearby settlements merging. This to us is a key principle that must be part of Local Plans.

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We need to secure the Green Belt.

We acknowledge that previous commitments to protect the Green Belt are being undermined but, in the circumstances, accept that this is necessary. However the plan should define the revised boundaries to ensure that the original principles of greenbelt are maintained i.e. that towns and villages do not coalesce, and that any permitted development does not create the potential for further erosion of the green belt. Special protection should be provided to protect views of, and from, the Common; probably the single most important feature in the attractiveness of Harpenden.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

Comment Number: 13

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Emerging Policy LG5 seeks to protect the Green Belt in line with national policy and includes scenarios where the principle of development is supported and/or there is an acceptance that a "very special circumstance" ("VSC") for development can be made to support proposals that may otherwise been seen as inappropriate development.

The Lawes Agricultural Trust encourages the inclusion of part a) iii which provides in principle support for productive and sustainable farming within the Green Belt.

We had previously written that in line with comments made on the effectiveness of Policy EMP4, the Lawes Agricultural Trust would welcome scope of LG5 expanded to highlight the role and function of the institution and the very special circumstances surrounding the research undertaken. Specifically, it was suggested that this could be achieved through an amendment to Part B of the policy to make reference to "research and development" activities as those which demonstrate very special circumstances.

The rationale for this amendment is grounded in the fact that a significant portion of the landholding is situated within the Green Belt, necessitating operational development that supports agricultural research. This encompasses not only research farm buildings and worker accommodations but also security measures, scientific monitoring equipment, and the development of future technologies or research buildings aimed at advancing sustainable farming techniques.

We maintain therefore that Incorporating recognition of VSC for these types of developments within the policy wording would help minimise potential conflicts during the application stage of Policies LG5 and EMP4. We would urge the Council to consider this addition for the Plan to be effective and sound.LG7 – Affordable Housing Development in the Green Belt (rural exception sites)

The Regulation 19 version of the policy still fails to clarify that not all rural exception sites are for affordable housing, as there is need to deliver accommodation for workers associated with surrounding land uses such as agriculture and farming.

The wording of emerging Policy LG7 does not include an allowance for such forms of development to come forward as rural exception sites, as the policy requires accommodation to be secured as social rented housing through a legal agreement. Consistent with our regulation 18 representations, we maintain that this approach does not align with agricultural tenancies as these would not be managed by a registered provider.

It is also noted that there is a specific need for housing for those in the scientific community who are unable to qualify for affordable housing / need specialist locations. These too represent a need that has to be met and presents very special circumstances for development in the green belt and should be recognised.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We still contend therefore, for the Local Plan to be effective and ensure that housing comes forward to meet housing requirements, Policy LG7 be revised to make specific reference to affordable accommodation in the green belt for agricultural and scientific workers if this plan is to be effective in supporting housing need and the ongoing work for Rothamsted Research.

On Behalf Of Company/Organisation: Hertfordshire Constabulary Name:

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

This applies to SP3 but could not make 2 comments under the same green belt heading so have put comment here.

**Strategic Policy SP3 – Land at the Green Belt**

**Object**

**Plan is not positively prepared**

Hertfordshire Constabulary have reviewed the Local Plan and are of the view not enough consideration has been given to the impact growth could have on emergency services.

In accordance with the PPG (009 Reference ID:53-009-20190722):

*Planning provides an important opportunity to consider the security of the built environment, those that live and work in it and the services it provides.*

In this regard, Policy SP3 should be amended to make reference to the vital role police and fire services make as follows:

*Growth must be supported by suitable supporting infrastructure, including:*

- *Schools*
- *Healthcare and ambulance facilities*
- ***Police and fire services***
- *Transport - facilities for walking, cycling and public transport in particular*
- *Parks, play areas, allotments and other green spaces*
- *Extensive tree planting*
- *Sports and leisure facilities*
- *Renewable and low carbon energy generation.*

Unless the above amendment is made, Hertfordshire Constabulary are of the view that the plan cannot be found sound as it has not been positively prepared in accordance with paragraph 35 of the NPPF (2023).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Modification requested to **Strategic Policy SP3 – Land at the Green Belt**

Policy SP3 should be amended to make reference to the vital role police and fire services make as follows:

*Growth must be supported by suitable supporting infrastructure, including:*

- *Schools*
- *Healthcare and ambulance facilities*
- ***Police and fire services***
- *Transport - facilities for walking, cycling and public transport in particular*
- *Parks, play areas, allotments and other green spaces*
- *Extensive tree planting*

- *Sports and leisure facilities*
- *Renewable and low carbon energy generation.*

Reason for modification:

Hertfordshire Constabulary have reviewed the Local Plan and are of the view not enough consideration has been given to the impact growth could have on emergency services.

In accordance with the PPG (009 Reference ID:53-009-20190722):

*Planning provides an important opportunity to consider the security of the built environment, those that live and work in it and the services it provides.*

2.231 Bellway Homes Ltd understand the need and willingness for SADC to have a specific policy on Green Belt, given the large area of Green Belt within the authority boundary. Yet, currently the policy does not accurately reflect national policy, and wording can be amended as such. Suggested wording is below – which reflects NPPF Chapter 13. An additional paragraph is suggested to reflect Very Special Circumstances:

*"The Green Belt boundary is defined shown on the Policies Map. In order to uphold the fundamental aims of the Green Belt to prevent urban sprawl and to keep land within its designation permanently open the five purposes as defined in NPPF Paragraph 138. Inappropriate development will / should not be approved unless except in very special circumstances can be demonstrated. Very special circumstances will not exist unless the potential harm to the Green Belt by reason of inappropriateness, and any other harm resulting from the proposal, is clearly outweighed by other considerations".*

*"Very Special Circumstances are essentially the benefits that arise from the proposals that can, collectively, be balanced against the identified harm to the Green Belt and other harm. There is no definition of what might or might not constitute VSC, and each proposal should be judged on their own merits and is a matter of judgement".*

2.232 Bellway Homes Ltd also would suggest wording is amended in the supporting justification to also better reflect national policy, particularly Paragraph 2 of the NPPF whereby planning policies should be read as a whole:

*"Proposals within the Green Belt will also be expected to comply with all other Local Plan policies when taken as a whole, particularly those that cover design, amenity, landscape, biodiversity and flooding"*.

2.233 Bellway Homes Limited consider that the proposed modifications will deliver a policy which is positively framed which is implementable and sound. As outlined earlier in the representations, our client has concerns that the spatial strategy which is being implemented in the Local Plan will fail to deliver sufficient housing to meet the needs of the borough. Through the imposition of a moratorium on the release of green belt land outside of the Local Plan process this will exacerbate, not alleviate the housing crisis present in St Albans DC.

2.234 We would request that the council undertake an additional granular level green belt review prior to the progression of the Local Plan to examination stage. As outlined in the representations the team consider that there is scope for inclusion of a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**LG5 and Infrastructure Provision in the Green Belt**

Policy LG5 *Green Belt* provides support in principle for proposals in the Green Belt, including:

*"b) Infrastructure provision identified in this Plan that is essential to ensure sustainable development across the District and beyond, that demonstrates 'very special circumstances' namely:*

1. *New state schools;*
2. *The creation of new transport infrastructure;*
3. *Small scale, largely open forms of infrastructure development such as outdoor sport and recreation facilities and uses (including detached playing fields for schools) drainage areas and utilities installations".*

The approach set out in Policy LG5 is supported by TCE in respect of the HGC Growth Areas, recognising the need to retain flexibility in providing the infrastructure required to support strategic scale development at East Hemel and for the wider HGC Growth Areas whilst maintaining openness and not conflicting with the purpose of including land within the Green Belt. However, we consider the reference to 'small scale' in clause (iii) may be open to interpretation and therefore ineffective in guiding decision making.

We therefore suggest an amendment to the wording of LG5 to reflect the need commensurate with the scale of planned development to which the infrastructure relates:

*"iii. **~~Small scale, I~~L**argely open forms of infrastructure development, **at a scale necessary to support planned development,**such as outdoor sport and recreation facilities and uses…"*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## 273 - Hallam Land Management and St Albans School

Submission Number: 273 Submission Date: 08/11/24 09:33

Respondent: Company/Organisation: LRM Planning Name: Mr Owen Jones

On Behalf Of Company/Organisation: Hallam Land Management and St Albans School Name:

Comment Number: 17

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

6.12 Hallam and St Albans School previously commented on the role of Policy LG5 in the context of the Broad Locations, and concluded that as North St Albans is to be removed from the Green Belt, the policy is not applicable save in respect of the relocated playing fields.

6.13 Observations were previously made in relation to criterion (b)(iii), and its inconsistency with paragraph 154 (b) of the NPPF which states that the provision of appropriate facilities (in connection with the existing use of land or a change of use) for outdoor sport and outdoor recreation should not be regarded as inappropriate development as long as the facilities preserve the openness of the Green Belt and do not conflict with the purposes of including land within it. It was concluded at the time that reference to outdoor sports and recreation facilities should be deleted from this policy accordingly as they do not require very special circumstances where the qualifications of 154 (b) are met. Hallam and St Albans School remain of this view.

**18 Policy LG5 (Green Belt)**

18.1 The Green Belt is an active contributor of ecosystem services in the region, therefore the wording of the policy text, a) ii) should not "promote" healthy ecosystem services, but should "provide and promote" healthy ecosystem services.

18.2 We question part b) of this policy. It seems to be attempting to open the door for 'New state schools' in the Green Belt and we do not see where this is supported in the NPPF. It also includes "The creation of new transport infrastructure" in the Green Belt yet the wording in the NPPF is in relation to "local transport infrastructure which can demonstrate a requirement for a Green Belt location" and is only 'not inappropriate' in the Green Belt provided that it preserves its openness and does not conflict with the purposes of including land within it.

18.3 **Policy LG5 is not consistent with national planning policy for the reasons explained above, therefore it an unsound policy**.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

## 288 - Chris Berry

Submission Number: 288 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: CPRE Hertfordshire Name: Chris Berry

Comment Number: 6

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**The Draft Local Plan is neither legally compliant nor sound, due to its inadequate treatment of the Green Belt**

The treatment of the Green Belt in the Draft Local Plan is inadequate to the extent that it jeopardises the soundness of the Local Plan. For a Local Planning Authority where over 80% of the total land area is covered by a statutory designation affecting future development, the omission of appropriate policy and proposals renders the Local Plan ineffective.

We note the justification provided by the Sustainability Appraisal for the policy options relating to the classification and allocations of sites and locations for development. However, policies relating to the Green Belt are limited to guidance relating to development outcomes in all cases; omitting any positive treatment of the countryside and associated rural activities which may constrain and influence development form and function.

In failing to address the implications of the five purposes of the Green Belt as they relate to the SACD area, the Council fails to plan adequately for its protection and the contribution that it can make to future development options. Paragraph 180 of the National Planning Policy Framework (NPPF) specifies the need to contribute and enhance the local environment by indicating a range of policy options.

Draft Local Plan policies relate only to development within the Green Belt and not its protection and enhancement as required by the NPPF and noted in the Local Plan Objectives. The Draft Local Plan states that the Spatial Strategy is effectively required to deliver housing figures provided by the Standard Method which in turn requires the use of Green Belt.

This is a fundamental misinterpretation of national Green Belt policy and challenge to the soundness of the Draft Local Plan. The Draft Local Plan refers to legal requirements for housing and employment growth (paragraph 3.11) which ignores the Council's discretion to determine housing targets based on up to date information and national policy guidance, as provided in Paragraph 11b) and footnote 7 of the NPPF.

Paragraph 3.16 of the Draft Local Plan also implies, without evidence, that Green Belt protection inhibits development in sustainable locations. This assertion fails to recognise that development is likely to be more sustainable in urban areas than peripheral locations distant from town centres as proposed for Hemel Hempstead and elsewhere.

**Policies are ineffective and inconsistent with national policy, with regard to the Green Belt**

The Draft Local Plan is ineffective in meeting the aim of Policy SP3 “to protect the Green Belt from inappropriate development”. The Plan proposes “select Green Belt boundary adjustments in the right areas to provide wider protection of ‘the rest of the Green Belt”, but without having established the scale of change that is necessary, or justifying the specific boundary changes.

For example, in the case of the SRFI site, the Draft Local Plan does not define a new Green Belt boundary. This is not consistent with national policy and would not be effective in meeting the Council’s stated Green Belt objective. Similarly, policy relating to the Hemel Garden Communities appears only to be justified as a cross-boundary proposal without further evidence regarding specific St Albans requirements, and proposed by national Government.

In every case where “Broad Locations” and other smaller sites are proposed for removal from the Green Belt, these proposals are not justified collectively or individually, and are contrary to national policy in the absence of the demonstration of exceptional circumstances as required by the NPPF. Policy LG1 Broad Locations requires 22 criteria to be met for their development, but omits the requirement for the definition and creation of a new defensible permanent boundary for the Green Belt.

Similarly, criteria in Policy LG4 fail to require the creation of a permanent defensible Green Belt boundary for sites removed from the Green Belt, and this is ineffective and contrary to national policy. Subsequent Policies LG5 to LG9 fail to provide supporting evidence, implying very special or exceptional circumstances which are unjustified.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Draft Local Plan should be re-structured to consider the role and function of the largest land use designation in the SACD i.e. the London Metropolitan Green Belt in appropriate detail. The lack of adequate consideration of the implications of this designation for physical development in the future renders the Local Plan unsound.

The total local housing need figure in policies SP1 and SP3 should be treated as a starting point and then be subject to reduction to reflect the application of Green Belt constraints as required by para 11(b) footnote 7 of the NPPF.

The Local Pan should be re-structured to consider the role and function of the largest land use designation in the SACD i.e. the London Metropolitan Green Belt in appropriate detail. The lack of adequate consideration of the implications of this designation for physical development in the future renders the Local Plan unsound in limiting the opportunities and constraints afforded by the land designation.

**290 - BRiCS Development**

Submission Number: 290 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: ET Planning Name: Tom Ryan

On Behalf Of Company/Organisation: C/O ET Planning Name: BRiCS Development

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Policy LG5**

As set out in our Regulation 18 representations, we support the Council's acknowledgement of the need to release Green Belt land.
As outlined above, it should be noted that the NPPF (December 2023) requires that:

- *"Strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas" (Paragraph 11b); and*
- *"To support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed, that the needs of groups with specific housing requirements are addressed and that land with permission is developed without unnecessary delay" (Paragraph 60).*

This provides the context in which the NPPF (December 2023) Chapter 13 (Protecting Green Belt Land) is drafted and highlights that the review of Green Belt boundaries should take place through the preparation or review of the Local Plan. Paragraph 147 states that:

*"When drawing up or reviewing Green Belt boundaries, the need to promote sustainable patterns of development should be taken into account. Strategic policymaking authorities should consider the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary."*

Paragraph 148 provides guidance for Councils about defining Green Belt boundaries, stating that they should:

*a) "Ensure consistency with the development plan's strategy for meeting identified requirements for sustainable development;*
*b) Not include land which it is unnecessary to keep permanently open;*
*c) Where necessary, identify areas of safeguarded land between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period;*
*d) Make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following an update to a plan which proposes the development;*
*e) Be able to demonstrate that Green Belt boundaries will not need to be altered at the end of the plan period; and*
*f) Define boundaries clearly, using physical features that are readily recognisable and likely to be permanent."*

A Stage 2 Green Belt Review has been undertaken by the Council, as assessed below. In accordance with the guidance in the PPG this exercise needs to be re-assessed with modified assumptions designed to ensure a better fit between capacity and need, in order to reflect the housing requirements of the District.

In terms of Policy LG5, the policy wording is not reflective of national policy as there is no consideration of Very Special Circumstances (VSC's), as required by paragraphs 147 and 148 of the NPPF (December 2023). It is considered that the following text should be added to make it consistent with national policy:

*"Inappropriate development will not be permitted unless very special circumstances can be demonstrated. Very special circumstances will not exist unless the potential harm to the Green Belt by reason of inappropriateness, and any other harm is clearly outweighed by other considerations."*

**SACDC Stage 2 Green Belt Review (June 2023)**

The Stage 2 Green Belt Review (GBR) follows the Stage 1 GBR (March 2019) undertaken as part of the evidence base in the previously withdrawn Local Plan (withdrawn in November 2020). SACDC note that *"the Green Belt evidence, in particular the Stage 2 GBR was questioned by the Inspectors"*. The new Stage 2 GBR, which forms part of the evidence base for the draft SALP, takes a more 'granular' approach to the study areas. Land West of Lamer Lane is assessed as a standalone site under site reference SA-43.

It is clear, as endorsed by the new Labour Government and the provisions set out in the consultation draft NPPF (July 2024), that sites that make limited contribution to the purposes of the Green Belt should be considered for their release in order to meet the identified housing needs across the country. This is part of Labours' reforms to the planning system in order to boost housing delivery to meet the new national target of 300,000 homes per annum.

In SACDC, where there is a significant housing supply shortfall, it will be even more important for the Council to assess the suitability of Green Belt sites for housing development.

As part of the Stage 2 GBR, SACDC assessed Land West of Lamer Lane (SA-43) against the following 4 Green Belt purposes:

a) to check the unrestricted sprawl of large built-up areas;
b) to prevent neighbouring towns merging into one another;
c) to assist in safeguarding the countryside from encroachment; and
d) to preserve the setting and special character of historic towns.
SACDC's Stage 2 Green Belt Review (June 2023) scoring for Land West of Lamer Lane (SA-43) is as follows (scoring has been provided on a scale from 0-5: where 0 equates to a limited contribution to the Green Belt purposes and 5 equates to a significant contribution to a Green Belt purpose):

- Purpose 1: 0
- Purpose 2: 0
- Purpose 3: 5
- Purpose 4: 0

In addition, the Stage 2 GBR also qualitatively assessed the role of the Site as part of the wider Green Belt, to determine if it performed an important strategic role. The Stage 2 GBR considered that Land West of Lamer Lane (SA-43) plays an 'important' contribution to the wider strategic Green Belt.
For ease of review, our comments on the Council's assessment of parcel SA-43 – Land West of Lamer Lane is provided in the table below *[please see attached document]*. ET Planning's interpretation and commentary of the Stage 2 GBR score is provided in the two far-right columns. Our commentary is evidenced through the Landscape Statement (Appendix 2) which has been submitted alongside these representations.

In summary, it is considered that SACDC's assessment of Land West of Lamer Lane (SA-43) hasn't been appropriately evidenced. The Site makes limited contribution to purpose 3 of the Green Belt, due to the well-contained nature of the Site and the fact that encroachment into the countryside has already occurred. In addition, the evidence to suggest that the Site plays an 'important' strategic contribution to the wider Green Belt hasn't been appropriately justified (given that the Site contributes 'weakly' to 3 out of the 4 Green Belt purposes assessed in the Stage 2 GBR).

It is therefore considered, given the housing land supply position and the assessment of the Site's contribution to the Green Belt purposes, that the Green Belt boundary should be reassessed in order to release the Site from the Green Belt. This will enable the Site to come forward to contribute towards meeting identified local housing needs.

We reserve the right to attend the Examination in Public once these have been confirmed by an Inspector.

## 292 - Leverstock Green Village Association

Submission Number: 292 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Troy Hayes

On Behalf Of Company/Organisation: Leverstock Green Village Association Name: Leverstock Green Village Association

Comment Number: 5

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

...

1.12. For the purposes of clarification, it is the Association's considered view that the Local Plan is unsound, and the Council has failed to discharge its Duty to Cooperate. The proposed scale and distribution of growth has not been justified, it has not been positively prepared, and the policies are ineffective. LGVA considers that the delivery of growth at the Hemel Garden Communities has not been demonstrated through technical evidence including the Council's Green Belt Review, Infrastructure Delivery Plan (IDP), Viability evidence and Transport evidence.

...

5.3. As we set out in our representations the Local Plan and particularly the Hemel Garden Communities allocations are not backed by sufficient or sound evidence to justify their inclusion in the Plan. Given that HGC is by far the most strategic development in the Local Plan and requires a very significant proposed release of Green Belt, the Local Plan should not be rushed through the way it has. This will only lead to the Local Plan either the Plan being at Examination for an extended period of time due to it requiring quite fundamental modifications to make it sound or it will be found unsound with no potential for its fundamental flaws to be modified leading to its withdrawal and SACDC will need to go back to the start of the process once again.

5. **Exceptional Circumstances and Green Belt**

6.1. Leverstock Green is defined by its semi-rural environment with Green Belt to the east, south and southwest of the built-up area. These areas are prime agricultural land which creates a green buffer around Leverstock Green and which needs to be protected wherever possible. The loss locally of such a significant amount of prime agricultural land is considered foolhardy in the current climate.

6.2. The Draft Local Plan (both Reg. 18 and Reg. 19 versions) fail to state what 'exceptional circumstances' there are for proposing the Draft Local Plan sites in the Green Belt.

6.3. The Green Belt Exceptional Circumstances Evidence Paper gives no evidence of discussions between SACDC and neighbouring authorities regarding meeting development need. It does not include demonstrated evidence of making as much use of brownfield and underutilised land, and there is a lack of demonstration of density optimisation. LGVA contests that the Council has demonstrated examining fully all reasonable options for meeting its identified need for development before concluding that exceptional circumstances exist to justify changes to Green Belt boundaries.

6.4. The site was considered as part of the 2014 Green Belt Review which looked at this area in the assessment of Site S2. Figure 1 shows the entirety of the site and highlights Site 2b in yellow as an area recommended as potentially suitable for release.

6.5. This area of the site infills development from the built-up boundary of the adjacent urban area up to the M1. The remainder of Policy S6 iii site 'East Hemel Hempstead (South)' is not recommended for Green Belt release in the Green Belt Review, as a result of the area being constrained by having an open landscape character which would make development visually prominent from both a local level but also from some mid-range views from land to the east of the M1 motorway. The study instead recommends that landscape features, planting and hedgerows should be retained in this area, in order to 'reduce the visibility of any future development from the key transport corridor and wider countryside' (para 4.6.10, Green Belt Review, 2014).

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 1***

*Figure 1: The yellow area indicates the area of East Hemel Hempstead (South) considered appropriate for Green Belt release with the rest of the site retained as recommended by the Green Belt Review (2014)*

6.6. The Green Belt Review Methodology (Section 4) includes an assessment of settlement area buffer zones. We suspect strongly the Green Belt Review was influenced by SADC to suit the purposes of the draft Plan. Despite Hemel Hempstead qualifying as a 'highest order settlement' with 400m buffer zones, the review uses the presence of the M1 to conveniently justify the removal of the buffer zones from the whole of the East Hemel area. If the buffer zones had stayed in place, the number of dwellings which could accommodated in East Hemel would be reduced considerably. This would also significantly reduce the HGC ambition to build 11,000 homes. We consider the 400m buffer zone should be applied to the whole of the Site H4 East Hemel (South) (Green Belt Review Sub-Area SA165).

6.7. The 2023 Part 2 Green Belt Review determines that the southern parcels (SA-162, 164 and 165) that all of the parcels perform 'strongly' against the NPPF purposes.

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 2***

*Figure 2: Part 2 Green Belt Review (2023) Figure 5.12 Overall performance against NPPF purposes – South*

6.8. The Part 2 Green Belt Review ultimately concludes the majority of the parcels are not considered any further.

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 3***

*Figure 3: Part 2 Green Belt Review (2023) Figure 5.18 Recommendations - South*

6.9. It is therefore perplexing to then see the Local Plan's allocation proposal to allocate (H4 – see below) the entirety of SA-164 and SA-165 and release the whole of the Green Belt within these parcels apart from the very southern tip

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 4***

*Figure 4: Local Plan Part B H4 - East Hemel Hempstead (South), HP2 4PA*

6.10. Therefore, exceptional circumstances have not been set out or justified by SCDC and its own Green Belt evidence since 2014 does not support the allocation of the East Hemel South yet SACDC has proposed it for allocation and Green Belt release in any case despite there being a lack of justification to do so.

6.11. **Green Belt Policy LG5:** We question part b) of this policy. It seems to be attempting to open the door for 'New state schools' in the Green Belt and we do not see where this is supported in the NPPF. It also includes "The creation of new transport infrastructure" in the Green Belt yet the wording in the NPPF is in relation to "local transport infrastructure which can demonstrate a requirement for a Green Belt location" and is only 'not inappropriate' in the Green Belt provided that it preserves its openness and does not conflict with the purposes of including land within it. **Policy LG5 is not consistent with national planning policy for the reasons explained above, therefore it is not a sound policy**.

...

7.4. The plan envisages 2,400 dwellings in the East Hemel South area adjacent to Leverstock Green. This represents 18% of SADC's total requirement. The proposed allocation extends from J8 of the M1 to the point where the A414 and A4147 cross the M1. We believe this area of 142 hectares is inadequate to accommodate over 2,000 dwellings at an acceptable level of density. Moreover, as already explained, the Green Belt Reviews recommends that only the smaller area adjacent to Junction 8 of the M1 should be considered for possible release. This equates to a gross housing density of 17 dwellings per hectare (dph) which does not even factor in the southern tip of the site which is within the allocation site yet is proposed to be retained as Green Belt. We have done a rough calculation of the amount of Green Belt appears to be retained at the southern tip of the allocation which is approximately 15.3 hectares. The potential developable area of the allocation is reduced from 142 hectares to 126.7 hectares as a result. The gross housing density is then increased to 19 dph.

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 5***

*Figure 5: Measurement of Green Belt retained in Allocation H4 - East Hemel Hempstead (South). Source: Google Maps*

...

7.8. The Local Plan Part B Allocation for site H4 includes a number of development requirements which we list below. We seriously question how all of these requirements can fit onto a site when its strategic constraints are considered. We list a number of these requirements below:

- SANG Requirements
- BNG Requirements (aims to exceed 10% minimum target)
- High quality design and buffer zones to mitigate adverse impacts from motorway noise and air pollution and address the Buncefield oil depot and pipelines
- There is a major surface water flow path across the centre of the broad location, and three associated smaller flow paths
- Three extra-care facilities comprising of 70-80 self-contained units in each facility, two 70-80 bed nursing homes and 9 supported living units for people with disabilities.
- One new 3FE and one new 2FE primary schools
- 15-20 pitches for Gypsy and Travellers using best practice on location and design
- Land will be safeguarded for access improvements associated with Junction 8 of the M1 motorway, in case it is required to come forward for junction improvements
- The layout and design of development should minimise any harm to the setting and significance of listed buildings

- Recreation space and other community facilities
- Take appropriate account of these Environmental Constraints: Source Protection Zone (SPZ) 1; Bedrock Aquifer.

7.9. Whilst one could suggest that it will 'all be solved' in the masterplanning work, this is setting the Local Plan up for failure and the delivery of 'over development' on previous Green Belt land.

...

7.11. **LGVA has reviewed the representations prepared by Redbourn Parish Council (RPC) and we endorse these representations as most of the points which RPC make also apply to Leverstock Green.**

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

For the purposes of clarification, it is the Association's considered view that the Local Plan is unsound, and the Council has failed to discharge its Duty to Cooperate.

The proposed scale and distribution of growth has not been justified, it has not been positively prepared, and the policies are ineffective. LGVA considers that the delivery of growth at the Hemel Garden Communities has not been demonstrated through technical evidence including the Council's Green Belt Review, Infrastructure Delivery Plan (IDP), Viability evidence and Transport evidence.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Reg 19 Leverstock Green Village Association vf_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Leverstock Green Village Association (LGVA) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Hemel Hempstead LGVA considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

## 304 - EDIT Land Ltd

Submission Number: 304 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land to the south of Burydell Lane, Park Street” have been discounted incorrectly.

**Representations**

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

SP1: A Spatial Strategy for St Albans District

SP3 — Land and the Green Belt

HOU 1- Housing Mix

HOU 2 — Affordable Housing

SP2 — Responding to the Climate Emergency

NEB 6 - Biodiversity and Biodiversity Net Gain — Comment

LG5 — Green Belt — Object

***Draft Policy LG5 - Green* Belt — Object**

EDIT Land understand the need and willingness for SADC to have a specific policy on Green Belt, given the large area of Green Belt within the authority boundary. Yet, currently the policy does not accurately reflect national policy, and wording can be amended as such.

Suggested wording is below — which reflects NPPF Chapter 13. An additional paragraph is suggested to reflect Very Special Circumstances:

*"The Green Belt boundary is defined shown on* the Policies *Map. In order to uphold* the *fundamental aims of the Green Belt* to *prevent urban sprawl and* to *keep land within its designation permanently open the five purposes as defined in NPPF Paragraph 138. Inappropriate development will / should not be approved unless except in very special circumstances can be demonstrated. Very special circumstances will not exist unless the potential harm* to the *Green Belt by reason of inappropriateness, and any other harm resulting from the proposal, is clearly outweighed by other considerations".*

*"Very Special Circumstances are essentially the benefits that arise from* the proposals *that can, collectively, be balanced against the identified harm* to the *Green Belt and other harm. There is no definition of what might or might not constitute VSC, and each proposal should be judged on their own merits and is a matter of judgement".*

EDIT Land also would suggest wording is amended in the supporting justification to also

better reflect national policy, particularly Paragraph 2 of the NPPF whereby planning policies should be read as a whole:

*"Proposals within the Green Belt will also be expected* to *comply with all other Local Plan policies when taken as a whole, particularly* those *that cover design,* amenity, *landscape, biodiversity and flooding".*

EDIT Land consider that the proposed modifications will deliver a policy which is positively framed which is implementable and sound. As outlined earlier in the representations, our client has concerns that the spatial strategy which is being implemented in the Local Plan will fail to deliver sufficient housing to meet the needs of the borough. Through the imposition of a moratorium on the release of green belt land outside of the Local Plan process this will exacerbate, not alleviate the housing crisis present in St Albans DC.

We would request that the council undertake an additional granular level green belt review prior to the progression of the Local Plan to examination stage. As outlined in the representations the team consider that there is scope for inclusion of a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

### 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

To be considered sound the plan must be effective and therefore capable of having a realistic possibility of delivery over the plan period and positively prepared by having a strategy to meeting its assessed needs.

The policies map shows four secondary schools at East Hemel Hempstead (North), East Hemel Hempstead (South), Land West of London Colney, and adjacent to Oaklands College. These are allocated under policy COM1 but retained in the green belt.

Secondary schools (except for natural turf playing fields) are inappropriate development in the green belt and will therefore applications for these schools will need to demonstrate Very Special Circumstances.

Policies COM1 and LG5 gives policy support to the provision of schools within the Green Belt in the planning balance. However these do not alter the need for applications for these schools to demonstrate Very Special Circumstances, which is the higher test and the test that will apply to these schools in accordance with national policy. This is implied within policy LG5, which qualifies the support that policy gives to the provision of schools within the green belt with firstly the need for proposals to be considered in accordance with national policy and secondly where Very Special Circumstances can be demonstrated. While it is recognised and welcomed that the LPA supports secondary school provision in these locations policies COM1 and LG5 do not and can not substitute for green belt release in a manner consistent with national policy.

NPPF paragraph 99 requires plans proactively meet their education need, including in the preparation of plans. To be considered sound the plan must meet its education need. It is therefore contradictory for the plan to rely on the delivery of schools but retain these schools in the green belt, as it could make the education strategy in the plan undeliverable. In practice this would mean that at development management stage these schools would need to meet a higher test (of Very Special Circumstances than) at development management stage than residential allocations. This would mean that necessary school places would not be delivered.

This issue was considered by the Inspector at the examination into the soundness of the Three Rivers Site Allocations document in 2014. They concluded that ‘The advantages of planning decisively by removing the building zones from the Green Belt for the specified purpose intended outweigh the disadvantages of the contradictory approach of leaving them within it, and by a very clear margin.’

To be considered effective and positively prepared the plan should remove schools that are likely to be required within the plan period so that the secondary education strategy is deliverable

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To be considered sound the plan should:

1. Remove the build zone for the secondary school at Land East of Hemel Hempstead (North) from the green belt; and
2. Safeguard the build zone for the secondary school at Land East of Hemel Hempstead (South) and land between the green belt and the urban area pending a local plan review.

Firstly, the plan should remove a 3.56ha minimum build zone for an 8FE secondary school (being the area of building and hard standing that is inappropriate development in the green belt) for the secondary school at Land East of Hemel Hempstead (North). This school is expected to be the first school delivered as part of the Land East of Hemel Hempstead planning application, is included within allocation H2, and is expected to come to HCC ownership through the section 106 legal agreement. It is therefore necessary for the school to be delivered as part of the residential application for the Land East of Hemel Hempstead allocations and therefore removed from the green belt. It is, however,

appropriate for the school playing fields to remain in the green belt as natural turf playing pitches are an acceptable use within the green belt. Equally policy COM1 remains an appropriate policy restriction.

Secondly, the plan should remove from the green belt and safeguard the 4.36 build zone for a 10FE secondary school adjacent to Land East of Hemel

Hempstead (South). This school is also required to deliver the wider Land East of Hemel Hempstead allocations and potential cumulative growth in Dacorum and therefore the same need for the school to be deliverable applies. However, as the Land East of Hemel Hempstead (South) allocation is expected to be delivered later in the plan period and the need for the school is also dependant on growth in Hemel Hempstead itself under the control of Dacorum, the school is unlikely to be needed within the current plan period. The school is also a separate allocation and will be acquired through a purchase than a s106 legal agreement. Therefore release from the green belt via safeguarding and a plan review is the most appropriate mechanism to secure this school through the planning process.

A similar approach can be seen in the delivery of the secondary school at HAT1 North West Hatfield, where the build zone for the school was removed from the green belt while the playing fields remain within both the allocation and the green belt.

Conversely, the need for the school at Oaklands College is likely to stretch further into the next plan period as many of the broad locations are not expected to deliver until the second half of the plan period and secondary pupil yield can take ten years to build up as parents move into new developments and have children who age through the school system. This school is also meeting a cumulative need rather than one individual site. Similarly delivery of a school at Land West of London Colney is highly dependant on the spatial pattern of growth in Hertsmere, which is currently uncertain. It is right that the plan identify school sites now to meet the long term demand from sites allocated in the St Albans local plan now. However as the timing, quantum, and spatial pattern of need is still uncertain and dependant on factors beyond the control of the local plan and HCC, removing both or either school from the green belt at this stage is unlikely to meet the exceptional circumstances test. Conversely, if the need for these schools were to occur earlier than planned

this would genuinely constitute Very Special Circumstances. It is therefore not necessary for the plan to release the schools at Oaklands College and Land West of London Colney from the green belt at this stage.

This approach best balances the need for the plan to meet its education need under NPPF paragraph 99, ensure that green belts are only revised in exceptional circumstances under paragraph NPPF paragraph 144, and ensure green belt boundaries are likely to be permanent under paragraph 148 (e)

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 2B Green Belt Secondary Schools_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Securing appropriate school provision is a statutory responsibility for the County Council and key to successful plan-making and as such HCC has an interest in ensuing that school provision is financially and operationally deliverable.

**335 - Michael Fearn**

Submission Number: 335 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: MFS Resolution Name: Michael Fearn

Comment Number: 19

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Draft Policy LG5***"Green Belt"*– as noted above there is no need for any 'local policy' on this matter at all (the Government agrees). Promoting a 'local policy' is only likely to be the cause of confusion with that of the NPPF (and/or the National Development Management Policy, when this emerges). As a further example of the potential clash between the NPPF and the emerging Local Plan is that many forms of appropriate development in Green Belt will still be routinely expected to demonstrate 'very special circumstances', even though there may be cases where this would not be necessary according to paragraphs 154 & 155 of the NPPF. This would include developments such as *"outdoor sport, outdoor recreation"*and *"local transport infrastructure"*. The policy is not positively prepared; justified; effective; or consistent with national policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**356 - Rachael Donovan**

Submission Number: 356 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Hertfordshire and West Essex ICB Name: Rachael Donovan

Comment Number: 5

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*LG5 –Green Belt*

The Local Plan should put health facilities on a level footing with education and public transport improvements in order to ensure that healthcare infrastructure and funding requirements arising from planned growth are appropriately represented given its strategic importance. Accordingly, it is requested that LG5 – Green Belt is amended as follows, to ensure the Local Plan can be found sound:

*b) Infrastructure provision identified in this Plan that is essential to ensure sustainable development across the District and beyond, that demonstrates 'very special circumstances', namely:*

*I. New state schools*

*II. The creation of new transport infrastructure; [deleted text]*

***III. New healthcare facilities and services; and***

*IV. Small scale, largely open forms of infrastructure development such as outdoor sport and recreation facilities and uses (including detached playing fields for schools), drainage areas and utilities installations.*

Please note, health facilities and services also include acute healthcare and ambulance services.

This omission is also considered to be contrary to para 100 of the NPPF, which requires faster delivery of hospitals, and para 20, which requires local authorities to make sufficient provision for healthcare facilities in general. Further, policy LG5 as currently worded does not aligned with paragraph 4.3.4 of the Infrastructure Delivery Plan that defines health facilities as essential infrastructure.

## 358 - St Albans School

Submission Number: 358 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: MFS Resolution Name: Michael Fearn

On Behalf Of Company/Organisation: Name: St Albans School

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Draft Policy LG5***"Green Belt"*– as noted above the Government is of the view that there is no need for any 'local policy' on this matter. Promoting a 'local policy' is only likely to be the cause of confusion with that of the NPPF (and/or the National Development Management Policy, when this emerges). As a further example of the potential clash between the NPPF and the emerging Local Plan is that many forms of appropriate development in Green Belt will still be routinely expected to demonstrate 'very special circumstances', even though there may be cases where this would not be necessary according to paragraphs 154 & 155 of the NPPF. This would include developments such as *"outdoor sport, outdoor recreation"*and *"local transport infrastructure"*.

The draft policy still differentiates its support for certain projects, such as *"new state schools"*. However, the NPPF recognises the contribution made by education to meeting the 'social' and 'environmental' roles of sustainable development and draws no distinction in its strong support between state provision, or any other form. In fact, the independent sector educates a large number of local children thereby reducing some of the pressure upon the state schools.

Furthermore, as explained above, the benefits of the independent sector often extend beyond the provision of education in terms of the contribution made to local economies and the maintenance of the natural, historic and built environment. Many schools in the independent sector are in the Green Belt and they are often custodians of important heritage assets, or make a contribution to managing valued landscapes. As significant enterprises that also employ considerable numbers of people and invest in the local economy, these schools must be able to adapt, modernise and improve their facilities in order for them to thrive and continue to invest in their premises (see NPPF, paragraph 99). The policy is not justified; effective; or consistent with National policy.

## 362 - EDIT Land Ltd

Submission Number: 362 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land at Roundhouse Farm, Colney Heath” have been discounted incorrectly

Representations

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

The Reg. 18 Draft Local Plan includes planning policies relating to various topics, which would become the principal consideration for the decision maker when determining planning applications.

EDIT Lands has not provided comment on a number of policies and advise which they are commenting on in the list below, but reserves the right to comment on others in the future.

However, SADC should consider whether all the policies as drafted are useful and necessary for decision making, and do not just repeat that which is already stated in the National Planning Policy Framework (NPPF), Planning Practice Guidance or legislation. Policies should also be unambiguous, clear and concise, without being overly onerous or stifle innovation or ambition.

EDIT Lands main concern with the Local Plan, as a whole, is the weak approach to the provision of much needed housing. Firstly, the level of housing planned for does not seek to address housing need adequately or provide any contingency, nor does it seek to address unmet need or positively plan for previous years of significant under-delivery.

Furthermore, the level of housing which is proposed as windfall, is unsound. 20% of the total housing supply to come forward on sites which do not have allocations, nor are formally identified is not positively prepared and is a huge outlier compared to neighbouring authorities. We consider the proportion of windfall to be wholly inappropriate given the borough's historic poor delivery and acute housing need.

It is also perverse for SADC to suggest that all brownfield sites have been exhausted to necessitate Green Belt release, whilst anticipating that such a high number will come forward via the windfall process. In addition, the Local Plan is heavily reliant on the delivery of a small number of broad growth areas and strategic extensions, namely the Hemel Garden Community which is allocated for net. 5,500 dwellings and 4,281 across the other strategic development sites which are subject to challenging land assembly and infrastructure delivery requirements which will constrain delivery of housing units within the early periods of the Local Plan. St Albans have acknowledged this situation in the reg.19 draft Local Plan where they are now asserting that only 4,300 dwellings will be delivered on the HGC sites within the LP period, a reduction of 450 dwellings from the LP trajectory and 1200 from the wider site allocation. Across all allocated sites within the borough, the council has lost net. 971 dwellings between Reg.18 and Reg.19 stage. There is no explanation, or justification on how the shortfall in housing delivery is accounted for within the revised housing trajectory, or local plan housing targets.

The housing trajectory places significant reliance on these strategic sites without due consideration to implications of these strategic sites not being delivered or brought online in line with the housing trajectory.

The emerging Local Plan is also not prepared positively as it fails to make any consideration to the need for natural growth (and deliverable) within the 'washed over villages' within the green belt, with no consideration paid in detail to areas for release from the green belt in these locations. As outlined in Section 3 of this document our client challenges the methodology which has been applied in the green belt review in light of a failure to apply a macro level analysis to the green belt parcels.

Furthermore the draft Local Plan fails to make provision for custom build and self-building housing typologies despite a clear need being identified in the National Planning Policy Framework no recognition is made to the contribution this typology makes to meeting established demand. We understand that there is a need locally for such housing and failure to plan for such housing, is not positive.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

- SP1: A Spatial Strategy for St Albans District
- SP3 – Land and the Green Belt
- HOU 1 – Housing Mix
- HOU 2 – Affordable Housing
- SP2 – Responding to the Climate Emergency
- NEB 6 – Biodiversity and Biodiversity Net Gain – Comment
- LG5 – Green Belt – Object

Draft Policy LG5 – Green Belt – Object

EDIT Land understand the need and willingness for SADC to have a specific policy on Green Belt, given the large area of Green Belt within the authority boundary. Yet, currently the policy does not accurately reflect national policy, and wording can be amended as such.
Suggested wording is below – which reflects NPPF Chapter 13. An additional paragraph is suggested to reflect Very Special Circumstances:
"The Green Belt boundary is defined shown on the Policies Map. In order to uphold the fundamental aims of the Green Belt to prevent urban sprawl and to keep land within its designation permanently open the five purposes as defined in NPPF Paragraph 138.
Inappropriate development will / should not be approved unless except in very special circumstances can be demonstrated. Very special circumstances will not exist unless the potential harm to the Green Belt by reason of inappropriateness, and any other harm resulting from the proposal, is clearly outweighed by other considerations".
"Very Special Circumstances are essentially the benefits that arise from the proposals that can, collectively, be balanced against the identified harm to the Green Belt and other harm.
There is no definition of what might or might not constitute VSC, and each proposal should be judged on their own merits and is a matter of judgement".
EDIT Land also would suggest wording is amended in the supporting justification to also better reflect national policy, particularly Paragraph 2 of the NPPF whereby planning policies should be read as a whole:
"Proposals within the Green Belt will also be expected to comply with all other Local Plan policies when taken as a whole, particularly those that cover design, amenity, landscape, biodiversity and flooding".
EDIT Land consider that the proposed modifications will deliver a policy which is positively framed which is implementable and sound. As outlined earlier in the representations, our client has concerns that the spatial strategy which is being implemented in the Local Plan will fail to deliver sufficient housing to meet the needs of the borough. Through the imposition of a moratorium on the release of green belt land outside of the Local Plan process this will exacerbate, not alleviate the housing crisis present in St Albans DC.
We would request that the council undertake an additional granular level green belt review prior to the progression of the Local Plan to examination stage. As outlined in the
representations the team consider that there is scope for inclusion of a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

## LG6 - Green Belt Compensatory Improvements

### 32 - John Whiting

Submission Number: 32 Submission Date: 27/10/24 09:00

Respondent: Company/Organisation: Radlett Society & Green Belt Association (RSGBA) Name: John Whiting

Comment Number: 5

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We naturally welcome the clear support for the preservation of the Green Belt at para 3.5; the processes outlined in LG5 & LG6 are helpful. We do think, however, that there needs to be stress on the reasons for the Green Belt, including in particular the prevention of nearby settlements merging. This to us is a key principle that must be part of Local Plans.

### 92 - The owner of land at Wood End, Hatching Green

Submission Number: 92 Submission Date: 06/11/24 13:02

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: The owner of land at Wood End, Hatching Green Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Policy LG6 – Green Belt Compensatory Improvements**

4.22 Policy LG6 is the Council's response to paragraph 147 of the NPPF, which encourages Local Plans to consider "ways in which the impact of removing land from the Green Belt can be offset through compensatory improvements to the environmental quality and accessibility of remaining Green Belt land".

4.23 Part a) of this policy requires a Green Belt compensation strategy to be provided for those Part B allocations facilitated by a Green Belt boundary change. The degree to which sites are able to facilitate compensation will vary depending on the specifics of the site and surroundings.

Many of the Broad Locations propose significant new areas of open space or country parks and these are exactly the sort of policy measures encouraged by the NPPF. However, on smaller sites or where sites do not adjoin existing rights of way, opportunities are likely to be limited.

4.24 In our view, the improvements to the environmental quality and accessibility of the remaining Green Belt proposed at the Broad Locations is sufficient to discharge paragraph 147 of the NPPF. Applying the obligation to smaller sites is not necessary and could to delay much-needed new housing.

4.25 Criteria b) to e) appear to be a rehash of policy requirements that are already set out elsewhere in the draft Plan. Specifically:

1. Part b) of this policy reiterates the requirements of policy NEB1 and should be deleted as unnecessary repetition.
2. Part c) of this policy reiterates the requirements of policies NEB5 and NEB12 and should be deleted as unnecessary repetition.
3. Parts d) and e) of this policy reiterate the requirements of policies TRA1 and SP10 and should be deleted as unnecessary repetition.

4.26 There does not appear to be any specific or unique obligations on the Part B sites that would not apply to other proposed development on the edge of the Green Belt. It would avoid confusion and repetition if these elements of the policy were deleted.

4.27 Part f) of Policy LG6 requires development of Part B sites to "Provide woodland buffer planting when adjacent to established urban areas overlooking what was once open countryside". This appears to be an attempt to limit the impact on the views from existing dwellings. We have two concerns with this. Firstly, protecting individual views is not typically the role of the planning. Secondly, this requirement could impact on overall site capacity. The requirement for "woodland buffer planting" suggests a depth of planting, rather than a single line of trees. How deep would this planting need to be to be considered "woodland"? This could be achievable on larger sites but on small sites adjacent to the urban area, the loss of a 10m strip to woodland planting could seriously impact the capacity of the site as a whole, and therefore threaten the Council's overall housing target. The need for buffer planting should be considered on a case-by-case basis at the planning application stage.

4.28 In summary, we consider Policy LG6 to be **legally compliant** but **not sound** on the basis that it fails the **effectiveness** test. The **modifications** necessary to make the Plan sound would be the deletion of Policy LG6 in its entirety.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The **modifications** necessary to make the Plan sound would be the deletion of Policy LG6 in its entirety.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Local Plan representations - November 2024 - FINAL_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

DLA Town Planning represents the owner and promoter of site M22 and our participation in the hearing sessions would assist the Inspector and help to respond to any queries raised

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

3. Parts d) and e) of this policy reiterate the requirements of policies TRA1 and SP10 and should be deleted as unnecessary repetition.

- There does not appear to be any specific or unique obligations on the Part B sites that would not apply to other proposed development on the edge of the Green Belt. It would avoid confusion and repetition if these elements of the policy were deleted.
- Part f) of Policy LG6 requires development of Part B sites to *"Provide woodland buffer planting when adjacent to established urban areas overlooking what was once open countryside"*. This appears to be an attempt to limit the impact on the views from existing dwellings. We have two concerns with this. Firstly, protecting individual views is not typically the role of the planning.
- Secondly, this requirement could impact on overall site capacity. The requirement for "woodland buffer planting" suggests a depth of planting, rather than a single line of trees. How deep would this planting need to be to be considered "woodland"? This could be achievable on larger sites but on small sites adjacent to the urban area, the loss of a 10m strip to woodland planting could seriously impact the capacity of the site as a whole, and therefore threaten the Council's overall housing target.

- Furthermore, the report site is adjacent to “established urban areas” on three sides – north, west and south. To the west is non-residential development, while to the north is residential development that is set at 90 degrees to the site so the property does not overlook the site. To the south, the rear of residential properties does face towards the site but a belt of existing trees separates any views and these trees would remain.
- The need for buffer planting should be considered on a case-by-case basis at the planning application stage, particularly given the context of this site. A blanket policy requirement is not appropriate.
- In summary, we consider Policy LG6 to be **legally compliant** but **not sound** on the basis that it fails the **effectiveness test.** The **modifications** necessary to make the Plan sound would be the deletion of Policy LG6 in its entirety.

### 202 - DLA Town Planning Ltd

Submission Number: 202 Submission Date: 07/11/24 17:04

Respondent: Company/Organisation: DLA Town Planning Name: Mr James Fitzpatrick

On Behalf Of Company/Organisation: DLA Town Planning Ltd Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy LG6 addresses NPPF paragraph 147, aiming to offset Green Belt land loss with environmental improvements, but its application is problematic. The policy's requirement for a Green Belt compensation strategy, while feasible for larger sites, is impractical for smaller sites, potentially delaying housing delivery. Criteria (b) to (e) merely repeat other policies, adding unnecessary redundancy, while Part (f) calls for woodland buffer planting, which may impact site capacity and overall housing targets—particularly on smaller sites. Policy LG6 is legally compliant but unsound due to lack of effectiveness, and deleting it would improve clarity and reduce redundancy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## 213 - Miller Homes

Submission Number: 213 Submission Date: 07/11/24 17:25

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: Miller Homes Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report for details**

**Policy LG6 – Green Belt Compensatory Improvements**

- Policy LG6 is the Council's response to paragraph 147 of the NPPF, which encourages Local Plans to consider *"ways in which the impact of removing land from the Green Belt can be offset through compensatory improvements to the environmental quality and accessibility of remaining Green Belt land"*.

- Part a) of this policy requires a Green Belt compensation strategy to be provided for those Part B allocations facilitated by a Green Belt boundary change. In respect of the North East Harpenden Broad Location, the arrangements for compensatory improvements to the remaining Green Belt are likely to be set out through the masterplanning framework, rather than at planning application stage.
- Criteria b) to e) appear to be a restatement of policy requirements that are already set out elsewhere in the draft Plan. Specifically:

1. Part b) of this policy reiterates the requirements of policy NEB1 and should be deleted as unnecessary repetition.
2. Part c) of this policy reiterates the requirements of policies NEB5 and NEB12 and should be deleted as unnecessary repetition.
3. Parts d) and e) of this policy reiterate the requirements of policies TRA1 and SP10 and should be deleted as unnecessary repetition.

- There does not appear to be any specific or unique obligations on the Part B sites that would not apply to other proposed development on the edge of the Green Belt. It would avoid confusion and repetition if these elements of the policy were deleted.
- Part f) of Policy LG6 requires development of Part B sites to *"Provide woodland buffer planting when adjacent to established urban areas overlooking what was once open countryside"*. This appears to be an attempt to limit the impact on the views from existing dwellings. We have two concerns with this. Firstly, protecting individual views is not typically the role of the planning.
- Secondly, this requirement could impact on overall site capacity. The requirement for "woodland buffer planting" suggests a depth of planting, rather than a single line of trees. It is not stated how deep this planting would need to be to be considered "woodland" so it is unclear what impact it would have on the capacity of the site as a whole. The need for buffer planting should be considered on a case-by-case basis at the planning application stage.
- In summary, we consider Policy LG6 to be **legally compliant** but **not sound** on the basis that it fails the **effectiveness** The **modifications** necessary to make the Plan sound would be the deletion of Policy LG6 in its entirety.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The **modifications** necessary to make the Plan sound would be the deletion of Policy LG6 in its entirety.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Local Plan representations - Lower Luton Road - Miller Homes - November 2024-FINAL_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

- LG6 – Green Belt Compensatory Improvements

1. a) Submit a Green Belt compensation strategy that sets out compensatory measures that align with national planning guidance, relating to:
   New or enhanced walking cycling or equestrian routes;
2. d) Maintain any Rights of Way across / through the site, ensuring provision of a route that is safe and overlooked, is sufficient in width to easily allow the passing of two people, and is carefully designed to become a positive landscape feature. Should a diversion to any Rights of Way be unavoidable, replacement routes must be provided to the satisfaction of the Council and the relevant highway authority;
   e) Ensure access to adjacent Rights of Way are facilitated in a safe and direct manner and maintain linkages that provide for appropriate utility and recreational use, and ensure that improvements are enabled so as to mitigate for the increased user impact of the development on the fabric of the network, including through good design;

**Comment** As above, this must include equestrians both ridden and carriage driven wherever practicable. The starting status should be Restricted Byway.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is**

Submission Number: 266 Submission Date: 08/11/24 08:47

Respondent: Company/Organisation: Stantec Name: Sarah Cross

On Behalf Of Company/Organisation: Crest Nicholson Partnerships and Strategic Land Name:

Comment Number: 9

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

5.13 This policy includes altered wording so that allocations within Part B which are facilitated by Green Belt boundary changes are required to provide a number of requirements that are now *"to a degree proportionate to the development"*. This additional wording is supported, as it reflects that not all sites will be able to provide the same degree of improvements.

5.14 The policy also includes additional wording at d) in relation to Public Rights of Way, so that where a diversion is unavoidable, replacement routes must be provided to the satisfaction of the Council / Highways Authority. There is no objection to this additional wording.

5.15 The additional wording at e) also refers to Public Rights of Way and now requires routes to have appropriate utility and recreational use to mitigate for the increased user impact. There is no objection to this additional wording.

5.16 The proposals at North East Harpenden will accord with Policy LG6 with an appropriate Green Belt compensation strategy which will include a number of new and enhanced green infrastructure elements, substantial planting, landscape and visual enhancements, improvements to biodiversity and habitat connectivity, new and enhanced walking and cycling routes and new and enhanced recreational provision. The existing Public Right of Way will also be maintained and enhanced as part of the proposals.

Submission Number: 283 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Troy Planning & Design Name: Mr Troy Hayes

On Behalf Of Company/Organisation: Redbourn Parish Council Name: Redbourn Parish Council

Comment Number: 21

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

*Refer to Attached submission letter for whole response and figures.*

Policy LG6 (Green Belt Compensatory Improvements) requires that the allocations in the Local where Green Belt boundaries are changed that 'proportionate' compensation is required. What assumptions have been made about this in the viability evidence base as this is clearly a costly requirement for Green Belt release allocations particularly that at Hemel.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

## 286 - Bloor Homes

Submission Number: 286 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Quod Name: Alex Hamlet

On Behalf Of Company/Organisation: Name: Bloor Homes

Comment Number: 15

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Draft Policy LG6 – Green Belt Compensatory Improvements**

3.6 Bloor welcome the additional text clarifying that where a development is required to submit both a Green Belt compensation strategy and provide Suitable Alternative Natural Greenspace ("SANG"), the Green Belt compensation strategy can incorporate features that are proposed within the SANG. Paragraph 5 of draft Site Allocation H1 – North Hemel Hempstead now aligns with LG1, LG3 and part A of Policy LG6.

3.7 Part B requires the retention of existing hedgerows and trees and other areas of biodiversity value. Bloor agree that protecting trees and hedgerows is an important element of conserving biodiversity. However, to successfully deliver the scale of development proposed on the Site and across HGC, there may be scenarios where some existing trees and hedgerows may need to be removed and may not be of high ecological value. Policy SP13 – Health and Wellbeing, part f), Policy SP2 – Responding to the Climate Emergency, part j) and Policy SP3 – Land and the Green Belt secure increased tree planting and support for biodiversity on sites where trees are removed. Bloor, therefore, proposes that the wording is amended as follows, so that it is more flexible (proposed text in **bold**):

“b) Retain existing hedgerows and trees **with the most ecological value (where possible),** as well as other areas of biodiversity value such as ponds;”

3.8 The HGC Strategic Design Code already provides this flexibility as it states that “the design of the site must take reasonable steps to ensure the retention of existing site features such as hedgerows, trees, woodland and watercourses”. However, for consistency it is requested that the wording within the Design Code mirrors the proposed wording change noted at paragraph 3.7.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. **288 - Chris Berry**

Submission Number: 288 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: CPRE Hertfordshire Name: Chris Berry

Comment Number: 7

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**The Draft Local Plan is neither legally compliant nor sound, due to its inadequate treatment of the Green Belt**

The treatment of the Green Belt in the Draft Local Plan is inadequate to the extent that it jeopardises the soundness of the Local Plan. For a Local Planning Authority where over 80% of the total land area is covered by a statutory designation affecting future development, the omission of appropriate policy and proposals renders the Local Plan ineffective.

We note the justification provided by the Sustainability Appraisal for the policy options relating to the classification and allocations of sites and locations for development. However, policies relating to the Green Belt are limited to guidance relating to development outcomes in all cases; omitting any positive treatment of the countryside and associated rural activities which may constrain and influence development form and function.

In failing to address the implications of the five purposes of the Green Belt as they relate to the SACD area, the Council fails to plan adequately for its protection and the contribution that it can make to future development options. Paragraph 180 of the National Planning Policy Framework (NPPF) specifies the need to contribute and enhance the local environment by indicating a range of policy options.

Draft Local Plan policies relate only to development within the Green Belt and not its protection and enhancement as required by the NPPF and noted in the Local Plan Objectives. The Draft Local Plan states that the Spatial Strategy is effectively required to deliver housing figures provided by the Standard Method which in turn requires the use of Green Belt.

This is a fundamental misinterpretation of national Green Belt policy and challenge to the soundness of the Draft Local Plan. The Draft Local Plan refers to legal requirements for housing and employment growth (paragraph 3.11) which ignores the Council's discretion to determine housing targets based on up to date information and national policy guidance, as provided in Paragraph 11b) and footnote 7 of the NPPF.

Paragraph 3.16 of the Draft Local Plan also implies, without evidence, that Green Belt protection inhibits development in sustainable locations. This assertion fails to recognise that development is likely to be more sustainable in urban areas than peripheral locations distant from town centres as proposed for Hemel Hempstead and elsewhere.

**Policies are ineffective and inconsistent with national policy, with regard to the Green Belt**

The Draft Local Plan is ineffective in meeting the aim of Policy SP3 "to protect the Green Belt from inappropriate development". The Plan proposes "select Green Belt boundary adjustments in the right areas to provide wider protection of 'the rest of the Green Belt", but without having established the scale of change that is necessary, or justifying the specific boundary changes.

For example, in the case of the SRFI site, the Draft Local Plan does not define a new Green Belt boundary. This is not consistent with national policy and would not be effective in meeting the Council's stated Green Belt objective. Similarly, policy relating to the Hemel Garden Communities appears only to be justified as a cross-boundary proposal without further evidence regarding specific St Albans requirements, and proposed by national Government.

In every case where "Broad Locations" and other smaller sites are proposed for removal from the Green Belt, these proposals are not justified collectively or individually, and are contrary to national policy in the absence of the demonstration of exceptional circumstances as required by the NPPF. Policy LG1 Broad Locations requires 22 criteria to be met for their development, but omits the requirement for the definition and creation of a new defensible permanent boundary for the Green Belt.

Similarly, criteria in Policy LG4 fail to require the creation of a permanent defensible Green Belt boundary for sites removed from the Green Belt, and this is ineffective and contrary to national policy. Subsequent Policies LG5 to LG9 fail to provide supporting evidence, implying very special or exceptional circumstances which are unjustified.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Draft Local Plan should be re-structured to consider the role and function of the largest land use designation in the SACD i.e. the London Metropolitan Green Belt in appropriate detail. The lack of adequate consideration of the implications of this designation for physical development in the future renders the Local Plan unsound.

The total local housing need figure in policies SP1 and SP3 should be treated as a starting point and then be subject to reduction to reflect the application of Green Belt constraints as required by para 11(b) footnote 7 of the NPPF.

The Local Pan should be re-structured to consider the role and function of the largest land use designation in the SACD i.e. the London Metropolitan Green Belt in appropriate detail. The lack of adequate consideration of the implications of this designation for physical development in the future renders the Local Plan unsound in limiting the opportunities and constraints afforded by the land designation.

**Policy LG6 –Green Belt Compensatory Improvements**

Paragraph 147 states that Plans should set out ways in which the impact of removing land from the green belt can be off set through compensatory improvements to the environmental quality and accessibility of the remaining Green Belt. This could include new or enhanced green infrastructure, woodland planting, improvements to biodiversity and new or enhanced walking and cycling routes, improved access to new/enhanced or existing recreational provision.

PPG Green Belts (updated 19th December 2023) provides guidance on compensatory improvements if land is removed from the Green Belt. Policy LG6 replicates the guidance in Paragraph: 002 Reference ID: 64-002-20190722

Throughout the preparation of the Local Plan Pegasus has promoted land at Harper Green (within St Albans), a number of options have been promoted from a new community, the most recent proposal was for approximately 470 dwellings set within extensive green infrastructure (64.06 hectares as illustrated in the Green Infrastructure Plan), adjacent to the Kingfisher Court Hospital and the former Harperbury Hospital. We are now proposing a smaller scheme of approximately 200 dwellings which would assist in meeting the shortfall in housing land supply in the early years of the plan.

The illustrative masterplan for the larger scheme and the concept plan for the smaller scheme has demonstrated delivery of a sustainable and healthy community. Both have been informed by the NHS Healthy Towns Initiative, Watling Chase Community Forest SPG and Greenways Strategy as well as Garden Village principles.

The various schemes each provide for a walkable neighbourhood with access to community facilities and supported by a new bus service.

There will be wider benefits to the existing local community in terms of the parkland and open space and green infrastructure.

The site is located in the Green Belt – but the extensive land ownership provides the opportunity to create a new definitive permanent boundary for the Green Belt and at the same time recognises the need to preserve the gap between existing settlements. The site provides the opportunity to contribute to the existing pattern of small settlements located in the Green Belt, whilst still maintaining the separation between settlements.

Bloor Homes and the Department of Health are committed to building homes and communities of the highest quality and believe they have the track record and experience to demonstrate this.

Through the technical work undertaken it has been demonstrated that the Harper Green proposal presents a highly sustainable option for development that follows the principles of the NHS Healthy Towns Initiative. The site should be considered through the Local Plan now as a ‘reasonable alternative’ for assisting in addressing housing need in St Albans. Furthermore, the site is available now and is capable of being delivered within the Local Plan period.

We have demonstrated through our evidence submitted to the Council that development at Harper Green adjacent to the former Harperbury Hospital site will enable housing needs to be met in a sustainable location and at the same time a substantial amount of community gain will be achieved. A settlement in this part of the district would contribute to the existing pattern of small settlements located in the Green Belt, whilst still maintaining the separation between settlements.

The landownerships provide the opportunity to create a new, well-defined and permanent green edge to the new community to ensure that the new community is well contained and that the physical separation with Radlett and Shenleybury is protected. There are opportunities to create a natural defensible boundary that could be enhanced through strategic landscaping.

Overall, it is considered that the location compares favourably against alternative growth locations of a scale that will allow Harper Green and the facilities and services it supports to thrive.

**Appendix 2: Concept Plan for Harper Green, adjacent to the former Harperbury Hospital.**

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Policy LG6 is in principle supported. The site that we have been promoting at Harper Green provides an alternative to the Broad Location B8 or given the shortfall in the early part of the plan period an additional site.

Furthermore, it is considered that there is a clear rationale for the St Albans Local Plan Review to go beyond the capped housing requirement (885) identified by the standard method for determining local housing need. An increase above the capped method would not only be consistent with national policy and guidance but would also assist in remedying the acute issues of affordability, affordable housing need, ageing population and economic growth with St Albans. **It is therefore not unreasonable that the housing target in St Albans should be more in line with the proposed standard method figure of 1,544 dpa.**

We have demonstrated in previous submissions to the Council how land at Harper Green would provide suitable compensatory improvements to the environmental quality and accessibility of remaining Green Belt land.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**329 - Mr Russell Crow**

Submission Number: 329 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Mr Peter Atkin

On Behalf Of Company/Organisation: Richborough Estates Name: Mr Russell Crow

Comment Number: 11

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Richborough acknowledges and welcomes the inclusion of the wording that the provisions 'are required, to a degree proportionate to the development…' which introduces an important element of flexibility. Richborough also welcome the confirmation that measures forming part of a Green Belt compensation strategy can incorporate Suitable Alternative Natural Greenspace (SANG) features where this is relevant.

However, LG6 remains unclear on the timing or trigger point for the submission of a Green Belt Compensation Strategy. It is assumed that an indicative Strategy would be provided at the outline planning stage, when the detail of a scheme is sometimes not yet known, with full details to be provided at the Reserved Matters stage when matters such as planting, provision of recreational routes and landscape mitigation measures are confirmed.

It is noted that LG1 twice references the need for new woodland planting, with criterion f) of the policy specifically seeking the delivery of 'woodland buffer planting when adjacent to established urban areas overlooking what was once open countryside'. Whilst the potential need for buffer planting is acknowledged, it may not be required or indeed be appropriate in all cases. It is contended that an additional blanket requirement for woodland planting could unnecessarily restrict developable areas, conflict with a site-specific landscaping strategy and negate the efficient use of land at an allocated site. The recommendations of a Landscape Visual Impact Assessment (LVIA) would provide the necessary guidance regarding the need to mitigate the impact of a development via new woodland planting.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Proposed remedy:

- Clarification should be provided on when the Green Belt Compensation Strategy would be required.
- It is also recommended that criterion f) of the policy is deleted as woodland planting may not be appropriate in all circumstances and recommendations for woodland planting will be captured in a LVIA at the planning application stage.
- Criteria b) to e) of Policy LG6 should each be amended to include 'Where possible' before each requirement. At present the policy strands are worded with no flexibility and indeed without a degree of certainty that an allocated site already possesses specific features such as blue infrastructure and public rights of way which are ready and capable of being enhanced. Clearly, this won't be the case on all sites and LG6 needs to be amended to reflect this.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**330 - Taylor Wimpey Strategic Land**

Submission Number: 330 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Sam Hollingworth

On Behalf Of Company/Organisation: Taylor Wimpey Strategic Land Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

4.6 Policy LG6 sets out the Green Belt compensatory improvements that are required to accompany sites that the DLP proposes be released and allocated for development.

4.7 We note the proposed improvements generally align with guidance set out within the PPG and we are broadly supportive of the policy. However, we consider that there are currently specific elements that will need to be amended to ensure the policy can be considered sound.

4.8 We consider it is necessary the policy retain reference to any compensatory measures demanded being proportionate to the development, as clearly impact will vary depending on the nature and scale of development. A such, this aspect of the policy is supported.

4.9 In addition, we consider it would be appropriate for the scale of compensatory improvements to also be linked to the contribution made by land proposed to be allocated to the purposes of the Green Belt. Clearly, where land currently makes a greater contribution to the purposes of the Green Belt it would be appropriate for its development to be required to set out a greater range of compensatory improvements, and vice versa.

4.10 As such we suggest the first line of the policy be amended to:

*The allocations in Part B that are facilitated by Green Belt boundaries changed by this Plan are required, to a degree proportionate to the development and to the contribution made to the Green Belt prior to their allocation for development, to:...*

4.11 In respect of Policy LG6 b), this currently could be inferred as an absolute requirement to retain any tree and hedgerow, regardless of their condition or the feasibility of doing so as part of development. There may be instances where, for example, trees on site include those which are dead, infected, or showing signs of significant, immediate, and irreversible decline (i.e. Category U trees). In a different vein, there may be cases where part of a hedgerow would be justifiably removed to facilitate access, with replacement hedgerow planted elsewhere.

4.12 We suggest Policy LG6 b) be amended such that it seeks to retain trees and hedgerows on site, subject to the desirability (having regard to the quality of these) and feasibility of doing so; and that where it is not feasible to do so, compensatory planting will be sought to replace these.

4.13 In respect of Policy LG6 c) and reference to development being required to connect any fragmented green links, we suggest this will need to be caveated with reference to where doing so is feasible and beneficial to do so. As currently worded we consider there is a risk a decision-maker could treat this as an absolute requirement regardless of other considerations.

4.14 Turning to Policy LG6 f), we are unclear what is meant by "*Provide woodland buffer planting when adjacent to established urban areas overlooking what was once open countryside*" neither in terms of what is meant by woodland buffer planting, nor in where it is intended to be provided.

4.15 If it is intended to require a woodland buffer between existing residential areas and the new development, such a requirement would not only be unjustified but would in our view be wholly inappropriate. It would risk undermining opportunities to integrate new development with the existing community, as well as potentially placing new dwellings further from existing services and facilities – running counter to sustainable development objectives in both instances.

4.16 Irrespective of where woodland buffers are envisaged, it is also unclear what is meant by a woodland buffer planting and to what extent this would be expected to differ (if at all) from a landscaped buffer. It is unclear what the potential land-take for woodland buffer planting might be.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

4.17 It is important to recognise that the DLP identifies a small number of sites for residential development on the basis of being the most sustainable and deliverable sites to help address acute housing shortages in the District, and with the least impact on the purposes of the Green Belt. Given that there is already evidence that the District's future housing requirements will be considerably greater than those the DLP plans to meet, it is imperative that an efficient use of these sites to provide housing is made. Failure to do so risk exacerbating housing shortage and / or necessitating allocation of further, potential less sustainable, land to meet needs.

4.18 If the policy is intended to help ensure a new, robust Green Belt boundary and ensure an appropriate transition between the new residential envelope and the countryside, we suggest the criterion simple states as such.

On Behalf Of Company/Organisation: Hill Residential Name:

Comment Number: 8

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Policy LG6: Green Belt Compensatory Improvements**

Policy LG6 sets out compensatory improvements for allocated sites in Appendix 1, where it is concluded that loss of Green Belt land for development is necessary.

In order for part b) to be effective, Hill consider that the following wording should be added to ensure flexibility where required and to reflect instances where there are dangerous or low quality trees on site: "*Where possible, retain existing hedgerows and trees and other areas of biodiversity value such as ponds and ensure any loss required is appropriately mitigated*".

Hill consider that part f) is an onerous requirement when woodland planting is already to be considered within part a), there is no justification to include woodland buffer planting over and above this. Further, this requirement will need a considerable amount of land to build a woodland buffer which could hinder the viability and delivery of sustainable allocated sites from coming forward. It should also be highlighted that the requirement would essentially isolate the site from surrounding urban areas and would not enable suitable integration with surrounding neighbourhoods, preventing the natural surveillance of the site. This part of the policy is not justified or effective and should be removed.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake

the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

## LG7 - Affordable housing in the Green Belt (rural exception sites)

### 200 - Lawes Agricultural Trust

Submission Number: 200 Submission Date: 07/11/24 16:49

Respondent: Company/Organisation: Montagu Evans Name: Mr Amran Nagra

On Behalf Of Company/Organisation: Lawes Agricultural Trust Name:

Comment Number: 14

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Emerging Policy LG5 seeks to protect the Green Belt in line with national policy and includes scenarios where the principle of development is supported and/or there is an acceptance that a “very special circumstance” (“VSC”) for development can be made to support proposals that may otherwise been seen as inappropriate development.

The Lawes Agricultural Trust encourages the inclusion of part a) iii which provides in principle support for productive and sustainable farming within the Green Belt.

We had previously written that in line with comments made on the effectiveness of Policy EMP4, the Lawes Agricultural Trust would welcome scope of LG5 expanded to highlight the role and function of the institution and the very special circumstances surrounding the research undertaken. Specifically, it was suggested that this could be achieved through an amendment to Part B of the policy to make reference to “research and development” activities as those which demonstrate very special circumstances.

The rationale for this amendment is grounded in the fact that a significant portion of the landholding is situated within the Green Belt, necessitating operational development that supports agricultural research. This encompasses not only research farm buildings and worker accommodations but also security measures, scientific monitoring equipment, and the development of future technologies or research buildings aimed at advancing sustainable farming techniques.

We maintain therefore that Incorporating recognition of VSC for these types of developments within the policy wording would help minimise potential conflicts during the application stage of Policies LG5 and EMP4. We would urge the Council to consider this addition for the Plan to be effective and sound.LG7 – Affordable Housing Development in the Green Belt (rural exception sites)

The Regulation 19 version of the policy still fails to clarify that not all rural exception sites are for affordable housing, as there is need to deliver accommodation for workers associated with surrounding land uses such as agriculture and farming.

The wording of emerging Policy LG7 does not include an allowance for such forms of development to come forward as rural exception sites, as the policy requires accommodation to be secured as social rented housing through a legal agreement. Consistent with our regulation 18 representations, we maintain that this approach does not align with agricultural tenancies as these would not be managed by a registered provider.

It is also noted that there is a specific need for housing for those in the scientific community who are unable to qualify for affordable housing / need specialist locations. These too represent a need that has to be met and presents very special circumstances for development in the green belt and should be recognised.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We still contend therefore, for the Local Plan to be effective and ensure that housing comes forward to meet housing requirements, Policy LG7 be revised to make specific reference to affordable accommodation in the green belt for agricultural and scientific workers if this plan is to be effective in supporting housing need and the ongoing work for Rothamsted Research.

## 288 - Chris Berry

Submission Number: 288 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: CPRE Hertfordshire Name: Chris Berry

Comment Number: 8

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**The Draft Local Plan is neither legally compliant nor sound, due to its inadequate treatment of the Green Belt**

The treatment of the Green Belt in the Draft Local Plan is inadequate to the extent that it jeopardises the soundness of the Local Plan. For a Local Planning Authority where over 80% of the total land area is covered by a statutory designation affecting future development, the omission of appropriate policy and proposals renders the Local Plan ineffective.

We note the justification provided by the Sustainability Appraisal for the policy options relating to the classification and allocations of sites and locations for development. However, policies relating to the Green Belt are limited to guidance relating to development outcomes in all cases; omitting any positive treatment of the countryside and associated rural activities which may constrain and influence development form and function.

In failing to address the implications of the five purposes of the Green Belt as they relate to the SACD area, the Council fails to plan adequately for its protection and the contribution that it can make to future development options. Paragraph 180 of the National Planning Policy Framework (NPPF) specifies the need to contribute and enhance the local environment by indicating a range of policy options.

Draft Local Plan policies relate only to development within the Green Belt and not its protection and enhancement as required by the NPPF and noted in the Local Plan Objectives. The Draft Local Plan states that the Spatial Strategy is effectively required to deliver housing figures provided by the Standard Method which in turn requires the use of Green Belt.

This is a fundamental misinterpretation of national Green Belt policy and challenge to the soundness of the Draft Local Plan. The Draft Local Plan refers to legal requirements for housing and employment growth (paragraph 3.11) which ignores the Council's discretion to determine housing targets based on up to date information and national policy guidance, as provided in Paragraph 11b) and footnote 7 of the NPPF.

Paragraph 3.16 of the Draft Local Plan also implies, without evidence, that Green Belt protection inhibits development in sustainable locations. This assertion fails to recognise that development is likely to be more sustainable in urban areas than peripheral locations distant from town centres as proposed for Hemel Hempstead and elsewhere.

**Policies are ineffective and inconsistent with national policy, with regard to the Green Belt**

The Draft Local Plan is ineffective in meeting the aim of Policy SP3 “to protect the Green Belt from inappropriate development”. The Plan proposes “select Green Belt boundary adjustments in the right areas to provide wider protection of ‘the rest of the Green Belt”, but without having established the scale of change that is necessary, or justifying the specific boundary changes.

For example, in the case of the SRFI site, the Draft Local Plan does not define a new Green Belt boundary. This is not consistent with national policy and would not be effective in meeting the Council’s stated Green Belt objective. Similarly, policy relating to the Hemel Garden Communities appears only to be justified as a cross-boundary proposal without further evidence regarding specific St Albans requirements, and proposed by national Government.

In every case where “Broad Locations” and other smaller sites are proposed for removal from the Green Belt, these proposals are not justified collectively or individually, and are contrary to national policy in the absence of the demonstration of exceptional circumstances as required by the NPPF. Policy LG1 Broad Locations requires 22 criteria to be met for their development, but omits the requirement for the definition and creation of a new defensible permanent boundary for the Green Belt.

Similarly, criteria in Policy LG4 fail to require the creation of a permanent defensible Green Belt boundary for sites removed from the Green Belt, and this is ineffective and contrary to national policy. Subsequent Policies LG5 to LG9 fail to provide supporting evidence, implying very special or exceptional circumstances which are unjustified.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Draft Local Plan should be re-structured to consider the role and function of the largest land use designation in the SACD i.e. the London Metropolitan Green Belt in appropriate detail. The lack of adequate consideration of the implications of this designation for physical development in the future renders the Local Plan unsound.

The total local housing need figure in policies SP1 and SP3 should be treated as a starting point and then be subject to reduction to reflect the application of Green Belt constraints as required by para 11(b) footnote 7 of the NPPF.

The Local Pan should be re-structured to consider the role and function of the largest land use designation in the SACD i.e. the London Metropolitan Green Belt in appropriate detail. The lack of adequate consideration of the implications of this designation for physical development in the future renders the Local Plan unsound in limiting the opportunities and constraints afforded by the land designation.

**290 - BRiCS Development**

Submission Number: 290 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: ET Planning Name: Tom Ryan

On Behalf Of Company/Organisation: C/O ET Planning Name: BRiCS Development

Comment Number: 6

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy LG7 sets out the Councils policy on affordable housing development in the Green Belt.

The Local Plan states that the District's house prices are amongst the highest in the whole country and discusses the acute problem of affordability within the District (Paragraph 4.8).

Whilst the NPPF (December 2023) paragraph 154 refers to 'limited affordable housing' as an exception to inappropriate development in the Green Belt, it seems illogical that criterion a) would cap such development at 9 dwellings and Policy LG5 would not allow for VSC's, in the context of the severe need for affordable housing.

As discussed above, there is no current policy basis to give merit to the overprovision of affordable housing.

Inspectors have allowed a number of Green Belt appeals for major housing sites across the UK where an over-delivery of affordable housing has been proposed. Examples are listed below:

- APP/X1925/W/21/3273701;
- APP/X0415/W/22/3303868;
- APP/B1930/W/20/3265925; and
- APP/G5180/W/18/3206569.

In each of these examples (where there was a notable shortfall in affordable housing delivery), the delivery of affordable housing was afforded the highest level of weight in the planning balance, and the determining factor in the appeals being allowed.

They show the ability for larger schemes in the Green Belt (all schemes were well in excess of 9 dwellings) to make a more meaningful contribution to affordable housing delivery. There is no current policy basis to give merit to the over-provision of affordable housing, either as a VSC in Policy LG5 or due to the 9 dwelling cap proposed by Policy LG7. We would suggest that both Policy LG5 and LG7 require amending for the policies to be effective.

As a separate point, the NPPF Annexe 2 (Glossary) provides a definition of 'rural exception sites' and states that *"A proportion of market homes may be allowed on the site at the local planning authority's discretion, for example where essential to enable the delivery of affordable units without grant funding"*. The policy in no way reflects circumstances where market housing is required to help deliver affordable units, and therefore is not considered to be in accordance with national policy.

**349 - Lisa Peters**

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 6

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Affordable housing in the Green Belt (rural exception areas)**

CHPC appreciates the intent of **Policy LG7** to address local affordable housing needs in the Green Belt through small-scale rural exception sites, as affordable housing is essential for sustaining community diversity and supporting local residents. However, the Parish Council raises concerns about the potential cumulative impact on both the character of Colney Heath Parish and the openness of the Green Belt if multiple sites are designated over time.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

CHPC acknowledges the requirement that such developments be small-scale, with nine or fewer dwellings on a site of under 0.5 hectares. However, CHPC Council suggests that additional guidance be included to ensure that the scale and design of these developments are in keeping with the surrounding rural character and do not lead to gradual urbanization. Clear criteria for “small-scale” should help limit the visual impact and preserve the areas character.

Regarding clause (c), CHPC recommends more precise wording to define and measure “limited harm” to the Green Belt’s purposes. This could include specific criteria or assessments for visual impact, landscape integration, and protection of natural habitats, to ensure that these developments genuinely respect the openness and character of the Green Belt.

Finally, CHPC supports clause (e) on the close relationship between the proposed site and existing built-up areas. However, CHPC emphasises that proximity alone should not be the deciding factor. Proposals should also demonstrate a strong integration with local amenities, pathways, and community services to avoid isolated developments that lack connection to the village fabric.

CHPC suggests that any affordable housing site designated in a made Neighbourhood Plan be rigorously assessed for its impact on village character, ensuring that affordable housing needs are met without compromising the rural identity and openness that define Colney Heath Parish and other small Green Belt communities.

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Rural exception sites provide a potential way of meeting Gypsy and Traveller residential needs, but as drafted, the policy can be read to imply that housing for Gypsies and Travellers would be excluded, which would be discriminatory.

**7.0 Legal Compliance**

7.1 The implication of the flaws in the Local Plan identified in the above paragraphs, not least in failing to making any allocations for Gypsies and Travellers, means that not only is the plan not sound, it is also not legally compliant on the basis:

- It indirectly discriminates against Gypsies and Travellers (whose ethnicity is a protected characteristic under the Equality Act) without adequate justification, contrary to s.19 of the 2010 Equality Act; and
- Its approach is contrary to the Public Sector Equality Duty under s.149 of the Act.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Add the words 'including Gypsy and Traveller residential pitches' to the first line of the policy so it reads:

*Proposals for affordable-only housing, including Gypsy and Traveller residential pitches, in the Green Belt for local needs must demonstrate that: …..*

## LG8 - Small Scale Development in Green Belt Settlements

### 162 - Notcutts Ltd

Submission Number: 162 Submission Date: 07/11/24 13:17

Respondent: Company/Organisation: Bidwells Name: Mr Mark Harris

On Behalf Of Company/Organisation: Notcutts Ltd Name:

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Related to points made in relation to the overall spatial strategy, Notcutts Ltd have a concern that the approach of policy LG8 is overly prescriptive and not reflective of recent case law around consideration of what constitutes limited infilling. The approach taken has an undue impact on the future evolution of an established commercial use in the Green Belt.

Whilst the overall restrictions on development are consistent with national policy, the restriction to allowing infilling and redevelopment only within Green Belt Settlement boundaries is not. Indeed, the approach is inconsistent with SADC's own identification of brownfield sites for allocation which are in the Green Belt but outside settlements.

Limiting infilling within settlement boundaries goes beyond what is necessary in terms of national policy which allows infilling within 'villages', with case law dictating that infilling should be considered by the on the ground position on a case-by-case basis. (See Julian Wood v SoS and Gravesham Borough Council [2015] which found that the term "village" is not necessarily the same as a settlement boundary, and that there is a need to consider the facts on the ground). SADC have lost several appeal decisions on this basis including appeal Ref: APP/B1930/W/22/3300239 in Smallford itself.

As mentioned within comments on the spatial strategy, Notcutts Ltd have a fundamental concern with the way that the infill boundaries have been established which excludes areas that when viewed 'on the ground' are clearly part of villages. This includes the exclusion of the Notcutts Garden Centre and the land within the curtilage from the boundary of Smallford. The implication of this approach is that it puts an undue constraint on the ability of Notcutts Ltd to maintain, adapt and grow a successful local business.

Despite concerns that policy LG8 goes too far in restricting what would otherwise be appropriate development in the Green Belt, if the use of boundaries to define the limits of Green Belt infilling is to be found sound, this should only be on the basis that a proper review of the extent of the built-up area/settlement is undertaken and the proper extent of 'villages' are defined.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Reconsider the need for infill boundaries to be included in the Local Plan to accord with case law.

If infill boundaries are found sound, review the approach to defining infill boundaries (as discussed in comments on the spatial strategy) to ensure they pick up the 'on the ground' extent of villages.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To discuss detailed matters around infill boundaries and the need for amendments to the policies.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**180 - Mr Brian Parker**

Submission Number: 180 Submission Date: 30/10/24 09:00

Respondent: Company/Organisation: MRP Planning Name: Mr Brian Parker

Comment Number: 1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**1 Introduction and Summary**

1.1 Paragraph 35 of the NPPF sets out the criteria by which a Draft Local Plan is tested for 'soundness':

*"Plans are 'sound' if they are:*

1. *Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*
2. *Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*
3. *Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*
4. *Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant."*

1.2 As set out in the following sections, Draft Policies LG8 'Small Scale Developments in Green Belt Settlements' and LG9 'Extension or Replacement of Buildings in the Green Belt' of the Draft Local Plan (the DLP), fail the second and fourth tests.

1.3 In particular, LG8 and LG9 seeks to restrict the principle of "limited infilling in villages" (NPPF [154e]), which is inconsistent with national policy and Appeal Decisions of which it is fully aware. This includes promoting Green Belt Settlement boundaries which defy common-sense.

1.4 Between them, therefore, Policies LG8 and LG9 are not 'justified' because more reasonable alternatives would have been to apply the approach employed by Planning Inspectors and to identify sensible village boundaries. Consequently, they are not 'consistent with national policy' because they would frustrate reasonable examples of "limited infilling in villages".

1.5 The Council would do well to recall that one of the reasons it was forced to Withdraw its previous Plan, in November 2020 is because of Inspectors Crosby and Worthington's criticism of the SKM Green Belt Review. The approach by Arup, on behalf of the Council, to identify the extent of village boundaries is so patently irrational that it, too, would likely be heavily criticised at Examination. It must be carried out again and re-consulted upon.

## 2 Village boundaries - a lack of common sense

2.1 Before considering how applications for small-scale development in the Green Belt should be treated differently depending on whether the site is in a village or not, it is necessary to consider the DLP's approach to "villages".

2.2 The long-established rule is that the extent of a village is as experienced on the ground[1].

[Footnote 1 - "It was also common ground that while a village boundary as defined in a Local Plan would be a relevant consideration, it would not necessarily be determinative, particularly in circumstances where the boundary as defined did not accord with the inspector's assessment of the extent of the village on the ground."**Wood v SoS for Communities and Local Government & Others [2015] EWCA Civ. 195]**

The Council commissioned Arup to establish which villages should be retained in the Green Belt and the extent of their boundaries. Under the sub-heading, 'Implications for Washed Over Villages Assessment' the Arup Green Belt Review (June 2023) (the Arup GBR), states [2.2]:

*"There is no definition of what constitutes a village in the NPPF. However, a review of Case Law has assisted in defining a "village" as a group of houses and associated building (sic), smaller than a town, situated in a rural area.* ***A common-sense approach should be used when identifying the extent of a village****. It should be physically and perceptually defined."*

(emphasis added)

2.3 However, whilst that statement accords with the long-standing principle established by the Courts, Arup has clearly failed to apply common-sense as can be seen by a review of its wholly inappropriate village boundary maps in Section 3 below.

2.4 Paragraph 4.8 of the Arup GBR, headed 'Step 2 – Defining Village Boundaries', states:

*"The Council's GIS shapefiles (for the settlements and Conservation Areas) were initially used to determine the spatial extent of the washed over villages."*

2.5 What "GIS shapefiles"? These should be published because it is unclear what Arup is referring to. Whilst there are GIS shapefiles for Conservation Areas[2] there are none for Green Belt Settlements. What is irrefutably clear is that there are no boundaries for the washed-over villages on the Council's GIS resource. The explanation for this is simple: there are no boundaries for the washed-over villages on the extant Policies Map, 1994. To be clear, formal boundaries for the washed-over villages have never been Adopted by the Council.

[Footnote 2: And for Article 4 Direction Areas, Neighbourhood Plan Areas, Landscape Conservation Areas and Parking Zones etc.]

2.6 Thus, instead of (apparently) relying on some unknown "shapefiles", Arup should have begun with a clean slate. It should have applied the long-standing rule (see paragraph 2.2 above) and the requirements of Paragraph 148 of the NPPF, in particular, that plans should:

*"b) not include land which it is unnecessary to keep permanently open; and*

1. ***f) define boundaries clearly, using physical features that are readily recognisable and likely to be permanent."***

2.7 However, as demonstrated in Section 3 below, Arup has a very unusual concept of "openness" and defines boundaries which frequently defy explanation, especially when readily recognisable and permanent physical features are available. Furthermore, Arup's illogical boundaries exclude buildings and areas which are obviously part of the villages both "physically and perceptually"– and, in many cases, very important parts such as a pub, a school, a church or a sports hall. It is vital to note that the NPPF at 154e refers to "limited infilling in villages", not to "limited infilling in parts of villages" or "on some streets in villages" or "on residential plots in villages".

2.8 In seeking to understand, Arup's lack of common-sense on this matter, it must be noted that in paragraph A.1.1.3 (p.96) of its GBR, Arup completely misinterprets the NPPF. Arup "explains" that if a village has an open character which justifies its retention within the Green Belt, then any development within it is inappropriate and can only be allowed if "very special circumstances" apply. This is nonsense. At Paragraph 154, the NPPF expressly states that "limited infilling in villages" (which quite obviously means limited infilling in a village and in the Green Belt), is a form of appropriate development, for which "very special circumstances" are not required. Under Arup's approach, limited infilling outside the village boundary would be inappropriate and limited infilling within the village boundary would be inappropriate, too!

2.9 Whatever the reasoning behind it, Arup's approach to excluding buildings and areas which are obviously part of the village is misplaced and the Council is wrong to adopt its proposed boundaries to define the extent of "Green Belt Settlements" on its Policies Map. Unchanged, this approach would frustrate the Government's permissive policy of allowing "limited infilling in villages". As it stands, the irrational Green Belt Settlement boundaries are neither 'Justified' nor 'Consistent with national policy'.

2.10 The Arup GBR must be revised to identify village boundaries as they are experienced by villagers and visitors on the ground. The Policies Map must be changed accordingly and the DLP consulted upon before being submitted for Examination.

## 3 A Review of Arup's Boundaries

3.1 This Section identifies the problems with the boundaries suggested by Arup and adopted by the Council on its draft Policies Map. For each village assessed by Arup's "Green Belt Review: Washed Over Villages Study", June 2023 (the WOVS), questions are asked about openness, the exclusion of particular buildings and/or the logic of boundaries.

3.2 **Annables / Kinsbourne Green**

3.8 **Sandridge**

[See Attachment for Image]

Fig. 7 Annotated extract of Arup's boundary for Sandridge.

[See Attachment for Table]

Table 7 – Why are these obvious parts of Sandridge excluded from Arup's assessment of the extent of the village?

3.9 Finally, on Sandridge, the aerial photograph below, raises a very simple question:

*"If Paragraph 148b instructs us that land should only be included if it is necessary to keep it "permanently open", why is Sandridge included in the Green Belt?"*

[See Attachment for Image]

*Photo 1 – Is Sandridge suitable for inclusion in the Green Belt? (© Google Earth)*

3.10 **Sleapshyde**

[See Attachment for Image]

Fig. 8 Annotated extract of Arup's map of Sleapshyde (left-hand image), with a view of the wider village from the Council's GIS resource.

[See Attachment for Table]

Table 8 – Why are these obvious parts of Sleapshyde excluded from Arup's assessment of the extent of the village?

3.11 **Smallford**

[See Attachment for Image]

Fig. 9 Annotated extract of Arup's map of Smallford (right-hand image), with a view of the wider village from the Council's GIS resource.

[See Attachment for Table]

Table 9 – Why are these obvious parts of Smallford excluded from Arup's assessment of the extent of the village?

3.12 **Napsbury Park**

3.13 When setting out the need for a "*common-sense approach"*, the Arup GBR refences a particular Appeal Decision (under "Implications for Washed Over Village Assessment" [paragraph 2.2 and footnote 17]). That Appeal Decision, Ref: APP/B1605/W/19/3225401, directly considered the basis on which a settlement could qualify as a village. In setting out why the settlement in that case did not constitute a village, the Inspector explained [DL (13)]:

*"A village would normally be expected to have its own visual separation from surrounding settlements and particularly nearby larger towns and cities. This rural aspect would mean it would most likely be surrounded by countryside."*

3.14 Whilst all the villages considered above benefit from such 'visual separation ... from larger towns' and are surrounded by countryside, Arup's map shows Napsbury Park abutting development to the east (see Fig. 10 below).

[See Attachment for Image]

Fig. 10 Development can be seen to the east of Arup's boundary for Napsbury Park

3.15 When seen in the wider context, that development to the east is confirmed to be London Colney (see Fig. 11 below), which the DLP identifies as a "Tier 3" settlement, i.e. a small town (on the District level, smaller only than St Albans and Harpenden).

[See Attachment for Image]

Fig. 11 Napsbury Park appears as an urban extension to the town of London Colney

3.16 Consequently, using the approach taken in the Appeal Decision to which the Arup GBR expressly refers, Napsbury Park should not be identified as a village.

## 4 LG8 Small-Scale Development in Green Belt Settlements

4.1 The serious, real-world implications of the Council's flawed approach to defining village boundaries on its Policies Map is made clear by Draft Policy LG8's insistence that proposals must be:

*"... within Green Belt Settlement boundaries".*

4.2 An obvious consequence of this would be for an applicant to submit a proposal for appropriate development on a site which is clearly within the village, only for the Council to argue that it is inappropriate development because it is not within the Arup-inspired village boundary. This is clearly demonstrated by considering an application for two dwellings on undeveloped land between 106 and 116 Tollgate Road (see front cover photo and item 8 in Fig. 2/Table 2). This was approved by the Council in 2021 under Ref: 5/2021/0758, with the Officer Report stating:

*"It is noted that the natural boundary of the village was found for the 2005 refused application to fall just outside the application site, but the current proposal is found to infill the frontage such as to effectively extend the 'village' boundary to include the application site, in terms of the new NPPF exception. As such, it is considered the development would fall within the exception of limited infilling in villages as stated in the NPPF."*

4.3 And yet, that now-developed Site sits outside the village boundary as defined on the proposed Policies Map – see Fig. 12 below:

[See Attachment for Image]

Fig. 12 The "limited infilling in villages" site (outlined in red) was approved in 2021 and has been built out (see front cover) but sits outside the village boundary proposed by Arup and the DLP.

4.4 Left unchanged, the Green Belt Settlement boundaries on the Policies Map are likely to cause confusion amongst residents and developers. Heads will be scratched and Appeals launched following refusals on the basis that a site which is clearly in a village is deemed by the Council to be outside the village boundary.

4.5 Finally, on LG8, the text should make clear that appropriate "small-scale development" in villages includes householder extensions and the replacement of dwellings: both of which can qualify as "limited infilling".

4.6 The Council is aware that extensions can qualify as "limited infilling in villages" following Appeal Ref: APP/B1930/D/20/3261569, at Langley Grove in the village of Sandridge, where a single-storey side extension was allowed. The Inspector's explanation was clear and should have been acknowledged and embraced by the DLP.

4.7 The Council is also aware that a replacement dwelling can qualify as "limited infilling in villages" following Appeal Ref: APP/B1930/W/23/3318561 at Little Bushes in Sleapshyde, where a scheme for a 3-bedroom bungalow to be replaced by a 6-bedroom, two-storey house incorporating an annexe was allowed. Once again, the Inspector's explanation was clear and should have been acknowledged and embraced by the DLP.

## 5 LG9 Extensions or Replacement Dwellings in the Green Belt

5.1 The key problem with this Draft Policy is that it does not distinguish between applications on sites within a village in the Green Belt and applications on sites in the Green Belt but outside (common-sense) village boundaries

5.2 Whilst a standard householder scheme such as a rear extension or a side extension can clearly be a reasonable example of "limited infilling" (of a plot or between buildings), that would only be appropriate development if the house in question is within a village rather than the middle of nowhere.

5.3 Equally, the replacement of a dwelling can qualify as "limited infilling" (its demolition creating a gap which can then be infilled), but would only be appropriate development if the house in question is within a village rather than beyond a village boundary.

5.4 These development options should be made clear in the text, directing potential applicants to Draft Policy LG8 (revised as set out in Section 4 above), if their site is within a village.

## 6 Conclusion

6.1 The plan-making process provides an opportunity for Councils to identify whether a village should be included or excluded from the Green Belt. Whilst Arup stated that a *"common-sense approach"*should be used to identify the extent of a village, many of the boundaries it proposes are nonsensical. Regrettably, however, the Council has adopted them for its Policies Map. In order to support rather than frustrate "limited infilling in villages", the boundaries for Districts' Green Belt Settlements must be changed to reflect the actual extent of the village and the rationale behind retaining some of the villages in the Green Belt must be reviewed.

6.2 As set out above, Policies LG8 and LG9 are neither justified nor consistent with national policy. They must be revised to help deliver sustainable development in the Green Belt.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

6.2 As set out above, Policies LG8 and LG9 are neither justified nor consistent with national policy. They must be revised to help deliver sustainable development in the Green Belt.

### 288 - Chris Berry

Submission Number: 288 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: CPRE Hertfordshire Name: Chris Berry

Comment Number: 9

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**The Draft Local Plan is neither legally compliant nor sound, due to its inadequate treatment of the Green Belt**

The treatment of the Green Belt in the Draft Local Plan is inadequate to the extent that it jeopardises the soundness of the Local Plan. For a Local Planning Authority where over 80% of the total land area is covered by a statutory designation affecting future development, the omission of appropriate policy and proposals renders the Local Plan ineffective.

We note the justification provided by the Sustainability Appraisal for the policy options relating to the classification and allocations of sites and locations for development. However, policies relating to the Green Belt are limited to guidance relating to development outcomes in all cases; omitting any positive treatment of the countryside and associated rural activities which may constrain and influence development form and function.

In failing to address the implications of the five purposes of the Green Belt as they relate to the SACD area, the Council fails to plan adequately for its protection and the contribution that it can make to future development options. Paragraph 180 of the National Planning Policy Framework (NPPF) specifies the need to contribute and enhance the local environment by indicating a range of policy options.

Draft Local Plan policies relate only to development within the Green Belt and not its protection and enhancement as required by the NPPF and noted in the Local Plan Objectives. The Draft Local Plan states that the Spatial Strategy is effectively required to deliver housing figures provided by the Standard Method which in turn requires the use of Green Belt.

This is a fundamental misinterpretation of national Green Belt policy and challenge to the soundness of the Draft Local Plan. The Draft Local Plan refers to legal requirements for housing and employment growth (paragraph 3.11) which ignores the Council's discretion to determine housing targets based on up to date information and national policy guidance, as provided in Paragraph 11b) and footnote 7 of the NPPF.

Paragraph 3.16 of the Draft Local Plan also implies, without evidence, that Green Belt protection inhibits development in sustainable locations. This assertion fails to recognise that development is likely to be more sustainable in urban areas than peripheral locations distant from town centres as proposed for Hemel Hempstead and elsewhere.

**Policies are ineffective and inconsistent with national policy, with regard to the Green Belt**

The Draft Local Plan is ineffective in meeting the aim of Policy SP3 "to protect the Green Belt from inappropriate development". The Plan proposes "select Green Belt boundary adjustments in the right areas to provide wider protection of 'the rest of the Green Belt", but without having established the scale of change that is necessary, or justifying the specific boundary changes.

For example, in the case of the SRFI site, the Draft Local Plan does not define a new Green Belt boundary. This is not consistent with national policy and would not be effective in meeting the Council's stated Green Belt objective. Similarly, policy relating to the Hemel Garden Communities appears only to be justified as a cross-boundary proposal without further evidence regarding specific St Albans requirements, and proposed by national Government.

In every case where "Broad Locations" and other smaller sites are proposed for removal from the Green Belt, these proposals are not justified collectively or individually, and are contrary to national policy in the absence of the demonstration of exceptional circumstances as required by the NPPF. Policy LG1 Broad Locations requires 22 criteria to be met for their development, but omits the requirement for the definition and creation of a new defensible permanent boundary for the Green Belt.

Similarly, criteria in Policy LG4 fail to require the creation of a permanent defensible Green Belt boundary for sites removed from the Green Belt, and this is ineffective and contrary to national policy. Subsequent Policies LG5 to LG9 fail to provide supporting evidence, implying very special or exceptional circumstances which are unjustified.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Draft Local Plan should be re-structured to consider the role and function of the largest land use designation in the SACD i.e. the London Metropolitan Green Belt in appropriate detail. The lack of adequate consideration of the implications of this designation for physical development in the future renders the Local Plan unsound.

The total local housing need figure in policies SP1 and SP3 should be treated as a starting point and then be subject to reduction to reflect the application of Green Belt constraints as required by para 11(b) footnote 7 of the NPPF.

The Local Pan should be re-structured to consider the role and function of the largest land use designation in the SACD i.e. the London Metropolitan Green Belt in appropriate detail. The lack of adequate consideration of the implications of this designation for physical development in the future renders the Local Plan unsound in limiting the opportunities and constraints afforded by the land designation.

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

See enclosed statement for full details, although as indicated, the plan fails the NPPF tests of soundness by failing to be sufficiently effective or justified given the availability of a reasonable and sound alternative in identifying the land in the manner advocated (see section 6 of the enclosed statement).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

That a Green Belt village could be identified covering the completed Hanstead Park development and the suggested extension of it (to include 60 dwellings) as advocated within these representations. Such an approach would be consistent with the various examples highlighted in section 6 of the statement. Further, the site has a functional relationship with a settlement in a higher tier settlement (Bricket Wood) and benefits from good availability of bus routes to provide

public transport opportunities. The site therefore performs equally if not better than the examples identified in the tier 6 Green Belt villages as referenced in Table 1.3 (Settlement Hierarchy) and can be identified as a Green Belt settlement as identified within this policy.

**349 - Lisa Peters**

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 7

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Small Scale Developments in Green Belt Settlements**

CHPC recognises the intent of **Policy LG8** to allow limited development within Green Belt settlements, which can support community needs for housing, local services, and small businesses. The Council appreciates that this policy aims to control development scale and respect the character of rural communities, aligning with sustainability and conservation principles. However, CHPC has several considerations regarding the criteria outlined.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Clause (a) requires that proposed developments be located on previously developed land or designated infill sites. CHPC supports this restriction, as it helps prevent unnecessary encroachment on Green Belt land. However, the Council recommends clear guidance on what constitutes a "small gap in an otherwise continuously built-up road frontage" to avoid potential overdevelopment and the cumulative impact on open spaces within the village. This clarity would help ensure that infill development remains truly limited and aligned with the areas character.

Clause (b), which limits developments to nine dwellings or fewer or a similar scale of non-residential development, is welcomed by CHPC as a safeguard against large-scale development that could overwhelm the infrastructure and disrupt the village atmosphere. CHPC, however, stresses that even small developments should be carefully assessed for their cumulative impact over time, as multiple small developments could gradually erode the open and rural feel of the area.

In reference to clause (c), CHPC strongly supports the requirement for design compatibility with the existing character of the settlement, as defined by any Neighbourhood Plan or Conservation Area Character Statement. The Council underscores that design standards should be stringent, particularly regarding materials, building scale, and landscaping, to ensure any new development or redevelopment integrates seamlessly with the established aesthetic of Colney Heath. CHPC recommends that developments also incorporate sustainable building practices and materials that align with both environmental goals and local character.

Overall, while CHPC supports the controlled approach of **Policy LG8**, the Council advocates for careful monitoring of small-scale developments to maintain the character and openness of Green Belt settlements like Colney Heath.

## LG9 - Extension or Replacement of Buildings in the Green Belt

### 162 - Notcutts Ltd

Submission Number: 162 Submission Date: 07/11/24 13:17

Respondent: Company/Organisation: Bidwells Name: Mr Mark Harris

On Behalf Of Company/Organisation: Notcutts Ltd Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy LG9 includes a table which seeks to link the acceptable scale of proportionate increases of buildings in the Green Belt to how well the proposal relates to five principles. There is no basis for such an approach in national policy with paragraph 154 of the NPPF simply setting out that extension or replacement buildings should not be disproportionally/materially larger than the existing building. At no point is this linked to the matters of design set out under criteria B of the policy.

Each development proposal will be individual and the prescriptive nature of the five criteria difficult to interpret consistently, making the policy very difficult to judge on a case-by-case basis. Therefore, Notcutts Ltd consider that the policy should be fundamentally altered to simplify the requirements around what is considered 'disproportionate'. Logically, this would be linked to the highest proportion of floorspace increase listed in the policy. If any guidance on design is to be included, this should only be included as a guide as to when developments in the Green Belt may not be justified in seeking the full percentage increase allowed by the policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The wording of policy LG9 should be revised to remove the explicit link between design and scale/proportionality

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To discuss detailed policy wording in more detail

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

Comment Number: 2

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**1 Introduction and Summary**

1.1 Paragraph 35 of the NPPF sets out the criteria by which a Draft Local Plan is tested for 'soundness':

*"Plans are 'sound' if they are:*

1. *Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*
2. *Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*
3. *Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*
4. *Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant."*

1.2 As set out in the following sections, Draft Policies LG8 'Small Scale Developments in Green Belt Settlements' and LG9 'Extension or Replacement of Buildings in the Green Belt' of the Draft Local Plan (the DLP), fail the second and fourth tests.

1.3 In particular, LG8 and LG9 seeks to restrict the principle of "limited infilling in villages" (NPPF [154e]), which is inconsistent with national policy and Appeal Decisions of which it is fully aware. This includes promoting Green Belt Settlement boundaries which defy common-sense.

1.4 Between them, therefore, Policies LG8 and LG9 are not 'justified' because more reasonable alternatives would have been to apply the approach employed by Planning Inspectors and to identify sensible village boundaries. Consequently, they are not 'consistent with national policy' because they would frustrate reasonable examples of "limited infilling in villages".

1.5 The Council would do well to recall that one of the reasons it was forced to Withdraw its previous Plan, in November 2020 is because of Inspectors Crosby and Worthington's criticism of the SKM Green Belt Review. The approach by Arup, on behalf of the Council, to identify the extent of village boundaries is so patently irrational that it, too, would likely be heavily criticised at Examination. It must be carried out again and re-consulted upon.

## 2 Village boundaries - a lack of common sense

2.1 Before considering how applications for small-scale development in the Green Belt should be treated differently depending on whether the site is in a village or not, it is necessary to consider the DLP's approach to "villages".

2.2 The long-established rule is that the extent of a village is as experienced on the ground[1].

[Footnote 1 - "It was also common ground that while a village boundary as defined in a Local Plan would be a relevant consideration, it would not necessarily be determinative, particularly in circumstances where the boundary as defined did not accord with the inspector's assessment of the extent of the village on the ground."**Wood v SoS for Communities and Local Government & Others [2015] EWCA Civ. 195]**

The Council commissioned Arup to establish which villages should be retained in the Green Belt and the extent of their boundaries. Under the sub-heading, 'Implications for Washed Over Villages Assessment' the Arup Green Belt Review (June 2023) (the Arup GBR), states [2.2]:

*"There is no definition of what constitutes a village in the NPPF. However, a review of Case Law has assisted in defining a "village" as a group of houses and associated building (sic), smaller than a town, situated in a rural area.* ***A common-sense approach should be used when identifying the extent of a village****. It should be physically and perceptually defined."*

(emphasis added)

2.3 However, whilst that statement accords with the long-standing principle established by the Courts, Arup has clearly failed to apply common-sense as can be seen by a review of its wholly inappropriate village boundary maps in Section 3 below.

2.4 Paragraph 4.8 of the Arup GBR, headed 'Step 2 – Defining Village Boundaries', states:

*"The Council's GIS shapefiles (for the settlements and Conservation Areas) were initially used to determine the spatial extent of the washed over villages."*

2.5 What "GIS shapefiles"? These should be published because it is unclear what Arup is referring to. Whilst there are GIS shapefiles for Conservation Areas[2] there are none for Green Belt Settlements. What is irrefutably clear is that there are no boundaries for the washed-over villages on the Council's GIS resource. The explanation for this is simple: there are no boundaries for the washed-over villages on the extant Policies Map, 1994. To be clear, formal boundaries for the washed-over villages have never been Adopted by the Council.

[Footnote 2: And for Article 4 Direction Areas, Neighbourhood Plan Areas, Landscape Conservation Areas and Parking Zones etc.]

2.6 Thus, instead of (apparently) relying on some unknown "shapefiles", Arup should have begun with a clean slate. It should have applied the long-standing rule (see paragraph 2.2 above) and the requirements of Paragraph 148 of the NPPF, in particular, that plans should:

*"b) not include land which it is unnecessary to keep permanently open; and*

1. ***f) define boundaries clearly, using physical features that are readily recognisable and likely to be permanent."***

2.7 However, as demonstrated in Section 3 below, Arup has a very unusual concept of "openness" and defines boundaries which frequently defy explanation, especially when readily recognisable and permanent physical features are available. Furthermore, Arup's illogical boundaries exclude buildings and areas which are obviously part of the villages both "physically and perceptually"– and, in many cases, very important parts such as a pub, a school, a church or a sports hall. It is vital to note that the NPPF at 154e refers to "limited infilling in villages", not to "limited infilling in parts of villages" or "on some streets in villages" or "on residential plots in villages".

2.8 In seeking to understand, Arup's lack of common-sense on this matter, it must be noted that in paragraph A.1.1.3 (p.96) of its GBR, Arup completely misinterprets the NPPF. Arup "explains" that if a village has an open character which justifies its retention within the Green Belt, then any development within it is inappropriate and can only be allowed if "very special circumstances" apply. This is nonsense. At Paragraph 154, the NPPF expressly states that "limited infilling in villages" (which quite obviously means limited infilling in a village and in the Green Belt), is a form of appropriate development, for which "very special circumstances" are not required. Under Arup's approach, limited infilling outside the village boundary would be inappropriate and limited infilling within the village boundary would be inappropriate, too!

2.9 Whatever the reasoning behind it, Arup's approach to excluding buildings and areas which are obviously part of the village is misplaced and the Council is wrong to adopt its proposed boundaries to define the extent of "Green Belt Settlements" on its Policies Map. Unchanged, this approach would frustrate the Government's permissive policy of allowing "limited infilling in villages". As it stands, the irrational Green Belt Settlement boundaries are neither 'Justified' nor 'Consistent with national policy'.

2.10 The Arup GBR must be revised to identify village boundaries as they are experienced by villagers and visitors on the ground. The Policies Map must be changed accordingly and the DLP consulted upon before being submitted for Examination.

## 3 A Review of Arup's Boundaries

3.1 This Section identifies the problems with the boundaries suggested by Arup and adopted by the Council on its draft Policies Map. For each village assessed by Arup's "Green Belt Review: Washed Over Villages Study", June 2023 (the WOVS), questions are asked about openness, the exclusion of particular buildings and/or the logic of boundaries.

### 3.2 Annables / Kinsbourne Green

[See Attachment for Table]

Table 7 – Why are these obvious parts of Sandridge excluded from Arup's assessment of the extent of the village?

3.9 Finally, on Sandridge, the aerial photograph below, raises a very simple question:

*"If Paragraph 148b instructs us that land should only be included if it is necessary to keep it "permanently open", why is Sandridge included in the Green Belt?"*

[See Attachment for Image]

*Photo 1 – Is Sandridge suitable for inclusion in the Green Belt? (© Google Earth)*

3.10 **Sleapshyde**

[See Attachment for Image]

Fig. 8 Annotated extract of Arup's map of Sleapshyde (left-hand image), with a view of the wider village from the Council's GIS resource.

[See Attachment for Table]

Table 8 – Why are these obvious parts of Sleapshyde excluded from Arup's assessment of the extent of the village?

3.11 **Smallford**

[See Attachment for Image]

Fig. 9 Annotated extract of Arup's map of Smallford (right-hand image), with a view of the wider village from the Council's GIS resource.

[See Attachment for Table]

Table 9 – Why are these obvious parts of Smallford excluded from Arup's assessment of the extent of the village?

3.12 **Napsbury Park**

3.13 When setting out the need for a "*common-sense approach"*, the Arup GBR refences a particular Appeal Decision (under "Implications for Washed Over Village Assessment" [paragraph 2.2 and footnote 17]). That Appeal Decision, Ref: APP/B1605/W/19/3225401, directly considered the basis on which a settlement could qualify as a village. In setting out why the settlement in that case did not constitute a village, the Inspector explained [DL (13)]:

*"A village would normally be expected to have its own visual separation from surrounding settlements and particularly nearby larger towns and cities. This rural aspect would mean it would most likely be surrounded by countryside."*

3.14 Whilst all the villages considered above benefit from such 'visual separation ... from larger towns' and are surrounded by countryside, Arup's map shows Napsbury Park abutting development to the east (see Fig. 10 below).

[See Attachment for Image]

Fig. 10 Development can be seen to the east of Arup's boundary for Napsbury Park

3.15 When seen in the wider context, that development to the east is confirmed to be London Colney (see Fig. 11 below), which the DLP identifies as a "Tier 3" settlement, i.e. a small town (on the District level, smaller only than St Albans and Harpenden).

[See Attachment for Image]

Fig. 11 Napsbury Park appears as an urban extension to the town of London Colney

3.16 Consequently, using the approach taken in the Appeal Decision to which the Arup GBR expressly refers, Napsbury Park should not be identified as a village.

## 4 LG8 Small-Scale Development in Green Belt Settlements

4.1 The serious, real-world implications of the Council's flawed approach to defining village boundaries on its Policies Map is made clear by Draft Policy LG8's insistence that proposals must be:

*"... within Green Belt Settlement boundaries".*

4.2 An obvious consequence of this would be for an applicant to submit a proposal for appropriate development on a site which is clearly within the village, only for the Council to argue that it is inappropriate development because it is not within the Arup-inspired village boundary. This is clearly demonstrated by considering an application for two dwellings on undeveloped land between 106 and 116 Tollgate Road (see front cover photo and item 8 in Fig. 2/Table 2). This was approved by the Council in 2021 under Ref: 5/2021/0758, with the Officer Report stating:

*"It is noted that the natural boundary of the village was found for the 2005 refused application to fall just outside the application site, but the current proposal is found to infill the frontage such as to effectively extend the 'village' boundary to include the application site, in terms of the new NPPF exception. As such, it is considered the development would fall within the exception of limited infilling in villages as stated in the NPPF."*

4.3 And yet, that now-developed Site sits outside the village boundary as defined on the proposed Policies Map – see Fig. 12 below:

[See Attachment for Image]

Fig. 12 The "limited infilling in villages" site (outlined in red) was approved in 2021 and has been built out (see front cover) but sits outside the village boundary proposed by Arup and the DLP.

4.4 Left unchanged, the Green Belt Settlement boundaries on the Policies Map are likely to cause confusion amongst residents and developers. Heads will be scratched and Appeals launched following refusals on the basis that a site which is clearly in a village is deemed by the Council to be outside the village boundary.

4.5 Finally, on LG8, the text should make clear that appropriate "small-scale development" in villages includes householder extensions and the replacement of dwellings: both of which can qualify as "limited infilling".

4.6 The Council is aware that extensions can qualify as "limited infilling in villages" following Appeal Ref: APP/B1930/D/20/3261569, at Langley Grove in the village of Sandridge, where a single-storey side extension was allowed. The Inspector's explanation was clear and should have been acknowledged and embraced by the DLP.

4.7 The Council is also aware that a replacement dwelling can qualify as "limited infilling in villages" following Appeal Ref: APP/B1930/W/23/3318561 at Little Bushes in Sleapshyde, where a scheme for a 3-bedroom bungalow to be replaced by a 6-bedroom, two-storey house incorporating an annexe was allowed. Once again, the Inspector's explanation was clear and should have been acknowledged and embraced by the DLP.

## 5 LG9 Extensions or Replacement Dwellings in the Green Belt

5.1 The key problem with this Draft Policy is that it does not distinguish between applications on sites within a village in the Green Belt and applications on sites in the Green Belt but outside (common-sense) village boundaries

5.2 Whilst a standard householder scheme such as a rear extension or a side extension can clearly be a reasonable example of "limited infilling" (of a plot or between buildings), that would only be appropriate development if the house in question is within a village rather than the middle of nowhere.

5.3 Equally, the replacement of a dwelling can qualify as "limited infilling" (its demolition creating a gap which can then be infilled), but would only be appropriate development if the house in question is within a village rather than beyond a village boundary.

5.4 These development options should be made clear in the text, directing potential applicants to Draft Policy LG8 (revised as set out in Section 4 above), if their site is within a village.

## 6 Conclusion

6.1 The plan-making process provides an opportunity for Councils to identify whether a village should be included or excluded from the Green Belt. Whilst Arup stated that a *"common-sense approach"*should be used to identify the extent of a village, many of the boundaries it proposes are nonsensical. Regrettably, however, the Council has adopted them for its Policies Map. In order to support rather than frustrate "limited infilling in villages", the boundaries for Districts' Green Belt Settlements must be changed to reflect the actual extent of the village and the rationale behind retaining some of the villages in the Green Belt must be reviewed.

6.2 As set out above, Policies LG8 and LG9 are neither justified nor consistent with national policy. They must be revised to help deliver sustainable development in the Green Belt.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

6.2 As set out above, Policies LG8 and LG9 are neither justified nor consistent with national policy. They must be revised to help deliver sustainable development in the Green Belt.

### 200 - Lawes Agricultural Trust

Submission Number: 200 Submission Date: 07/11/24 16:49

Respondent: Company/Organisation: Montagu Evans Name: Mr Amran Nagra

On Behalf Of Company/Organisation: Lawes Agricultural Trust Name:

Comment Number: 11

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Under our regulation 18 representations, we had requested that to support the application of Policy LG5, the wording of Policy LG9 be revised to include reference to the ability for Very Special Circumstances to be put forward to support the extension or replacement of buildings in the Green Belt.

Notwithstanding the requirements of Policy HE1, we wish to reiterate the importance of recognising designated heritage assets which may require extensions and adaptions to buildings (including outbuildings) to secure a viable long-term future.

As worded both in the regulation 18 and 19 versions of the Local Plan, this policy reads as though its application is focused on domestic residential dwellings within the green belt and does not account for the various building typologies that may need to be extended and/or replaced.

The Regulation 19 publication confirms that emerging Policy LG9, specifically Table 3.3, has been updated to distinguish between ‘moderate’ and ‘well’ performance against the criteria in points b) and c). However, we maintain that the policy adopts a binary approach to extensions that does not allow for adequate consideration of their effects on the Green Belt, especially in cases where a VSC argument is relevant.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Therefore, we believe the policy could be improved by more explicitly acknowledging the potential for VSC in the evaluation of proposals, particularly in relation to the application of Table 3.3, if this policy is to be effective in a development management scenario. Without this, the policy is considered unsound.

**288 - Chris Berry**

Submission Number: 288 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: CPRE Hertfordshire Name: Chris Berry

Comment Number: 10

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**The Draft Local Plan is neither legally compliant nor sound, due to its inadequate treatment of the Green Belt**

The treatment of the Green Belt in the Draft Local Plan is inadequate to the extent that it jeopardises the soundness of the Local Plan. For a Local Planning Authority where over 80% of the total land area is covered by a statutory designation affecting future development, the omission of appropriate policy and proposals renders the Local Plan ineffective.

We note the justification provided by the Sustainability Appraisal for the policy options relating to the classification and allocations of sites and locations for development. However, policies relating to the Green Belt are limited to guidance relating to development outcomes in all cases; omitting any positive treatment of the countryside and associated rural activities which may constrain and influence development form and function.

In failing to address the implications of the five purposes of the Green Belt as they relate to the SACD area, the Council fails to plan adequately for its protection and the contribution that it can make to future development options. Paragraph 180 of the National Planning Policy Framework (NPPF) specifies the need to contribute and enhance the local environment by indicating a range of policy options.

Draft Local Plan policies relate only to development within the Green Belt and not its protection and enhancement as required by the NPPF and noted in the Local Plan Objectives. The Draft Local Plan states that the Spatial Strategy is effectively required to deliver housing figures provided by the Standard Method which in turn requires the use of Green Belt.

This is a fundamental misinterpretation of national Green Belt policy and challenge to the soundness of the Draft Local Plan. The Draft Local Plan refers to legal requirements for housing and employment growth (paragraph 3.11) which ignores the Council's discretion to determine housing targets based on up to date information and national policy guidance, as provided in Paragraph 11b) and footnote 7 of the NPPF.

Paragraph 3.16 of the Draft Local Plan also implies, without evidence, that Green Belt protection inhibits development in sustainable locations. This assertion fails to recognise that development is likely to be more sustainable in urban areas than peripheral locations distant from town centres as proposed for Hemel Hempstead and elsewhere.

**Policies are ineffective and inconsistent with national policy, with regard to the Green Belt**

The Draft Local Plan is ineffective in meeting the aim of Policy SP3 "to protect the Green Belt from inappropriate development". The Plan proposes "select Green Belt boundary adjustments in the right areas to provide wider protection of 'the rest of the Green Belt", but without having established the scale of change that is necessary, or justifying the specific boundary changes.

For example, in the case of the SRFI site, the Draft Local Plan does not define a new Green Belt boundary. This is not consistent with national policy and would not be effective in meeting the Council's stated Green Belt objective. Similarly, policy relating to the Hemel Garden Communities appears only to be justified as a cross-boundary proposal without further evidence regarding specific St Albans requirements, and proposed by national Government.

In every case where "Broad Locations" and other smaller sites are proposed for removal from the Green Belt, these proposals are not justified collectively or individually, and are contrary to national policy in the absence of the demonstration of exceptional circumstances as required by the NPPF.

Policy LG1 Broad Locations requires 22 criteria to be met for their development, but omits the requirement for the definition and creation of a new defensible permanent boundary for the Green Belt.

Similarly, criteria in Policy LG4 fail to require the creation of a permanent defensible Green Belt boundary for sites removed from the Green Belt, and this is ineffective and contrary to national policy. Subsequent Policies LG5 to LG9 fail to provide supporting evidence, implying very special or exceptional circumstances which are unjustified.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Draft Local Plan should be re-structured to consider the role and function of the largest land use designation in the SACD i.e. the London Metropolitan Green Belt in appropriate detail. The lack of adequate consideration of the implications of this designation for physical development in the future renders the Local Plan unsound.

The total local housing need figure in policies SP1 and SP3 should be treated as a starting point and then be subject to reduction to reflect the application of Green Belt constraints as required by para 11(b) footnote 7 of the NPPF.

The Local Pan should be re-structured to consider the role and function of the largest land use designation in the SACD i.e. the London Metropolitan Green Belt in appropriate detail. The lack of adequate consideration of the implications of this designation for physical development in the future renders the Local Plan unsound in limiting the opportunities and constraints afforded by the land designation.

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

3.6. **Draft Policy LG9**–*"Extension or Replacement of Buildings in the Green Belt"*– this draft policy is not in accord with the NPPF. Extensions to an existing building in the Green Belt are one of the specified exceptions to the usual presumption against inappropriate development. There is nothing in the NPPF concerning this exception relating only to proposals which do not affect a building's character.

3.7. The floorspace and volume limits that the emerging Local Plan seeks to introduce are completely arbitrary and in many cases the policy would be seeking to impose controls over development which might be permitted by the GPDO anyway.

3.8. Finally, because of the considerable amount of subjectivity introduced, the policy provides no certainty. For instance, there is no definition as to what might be considered to be a *"valuable gap"*(what makes a gap valuable) or an alteration that *"detrimentally alter[s] the character of a building".* Differing quantities of floorspace might then be allowed depending upon the outcome of a further assessment of the performance ('poorly'; 'moderately/well'; & 'very well') of the proposal against such very subjective criteria. No reasoning is put forward to justify criterion f of the draft policy *"the replacement of a temporary dwelling, or short-life dwelling, with a permanent dwelling will be refused"*. There may be many occasions where there is benefit to the replacement of 'short-life' buildings with better constructed permanent structures; for instance, in the grounds of a listed building. As ever, each proposal needs to be considered upon its merits. The policy is not positively prepared; justified; effective; or consistent with national policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. **349 - Lisa Peters**

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 8

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Replacement Buildings in the Green Belt**

CHPC supports the intention of **Policy LG9** to protect the integrity and openness of the Green Belt by setting clear limits on the extension or replacement of buildings. The policy's stance on refusing the replacement of temporary or short-life dwellings with permanent structures is appropriate, as allowing such replacements could encourage gradual encroachment and urbanisation of Green Belt areas. CHPC believes this restriction is essential for maintaining the intended temporary nature of such dwellings and preventing incremental pressure on protected land.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Regarding clause (g), which allows for the removal of permitted development rights for replacement buildings larger than the original structures, CHPC considers this a prudent measure. The removal of these rights can help prevent future expansions that could further compromise the openness and rural character of the Green Belt. This clause is particularly relevant for Colney Heath, where incremental enlargements over time could alter the landscape and impact the visual openness cherished by the community.

CHPC recommends that SADC implement robust guidelines for determining when the removal of permitted development rights is necessary, based on factors such as visual impact, landscape sensitivity, and proximity to protected areas. This approach will ensure that replacement buildings are kept in harmony with Green Belt objectives and contribute positively to the rural character of the parish.

**358 - St Albans School**

Submission Number: 358 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: MFS Resolution Name: Michael Fearn

On Behalf Of Company/Organisation: Name: St Albans School

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

3.5. **Draft Policy LG9**–*"Extension or Replacement of Buildings in the Green Belt"*– this draft policy is not in accord with the NPPF. Extensions to an existing building in the Green Belt are one of the specified exceptions to the usual presumption against inappropriate development. There is nothing in the NPPF concerning this exception relating only to proposals which do not affect a building's 'character'.

3.6. The floorspace and volume limits that the emerging Local Plan seeks to introduce are completely arbitrary and in many cases the policy would be seeking to impose controls over development which might be permitted by the GPDO anyway.

3.7. Finally, because of the considerable amount of subjectivity introduced, the policy provides no certainty. For instance, there is no definition as to what might be considered to be a *"valuable gap"*(what makes a gap valuable) or an alteration that *"detrimentally alter[s] the character of a building"*. Differing quantities of floorspace might then be allowed depending upon the outcome

of a further assessment of the performance ('poorly'; 'moderately/well'; & 'very well') of the proposal against such very subjective criteria. No reasoning is put forward to justify criterion f of the draft policy *"the replacement of a temporary dwelling, or short-life dwelling, with a permanent dwelling will be refused"*. There may be many occasions where there is benefit to the replacement of 'short-life' buildings with better constructed permanent structures; for instance, in the grounds of a listed building. As ever, each proposal needs to be considered upon its merits. The policy is not positively prepared; justified; effective; or consistent with National policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Number:**

Chapter 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

- There are serious concerns that the Local Plan will not meet affordable housing requirements within the District. The Southwest Hertfordshire Local Housing Needs Assessment 2020 identifies a need for 443 affordable houses per annum. The Council are not currently delivering anywhere close to this figure. The Annual Monitoring Report 2022 states that between 1994/95 to 2021/22, an average of 18% of total dwelling completions were affordable units. This averages out at 73 affordable dwellings per annum.
- The emerging Plan seeks appropriately sized schemes to provide 40% affordable housing. Should all 14,063 dwellings seek 40% affordable (this will not be the case given smaller sites and windfalls, as well as viability concerns on larger sites), then only 330 affordable dwellings per annum would result (40% of 14,063, divided by 17 year plan period). The identified affordable housing need would not be met.

A more appropriate method to achieve this would be to allocate further sites. London Road St Albans would assist the Council by providing 40% affordable housing (120 units) to assist in meeting the clear shortfall. Further allocations will not only assist in meeting affordable housing demand, but would also secure delivery should any of the Broad Locations fail to deliver in line with its trajectory.

**5.0 Affordability & Unmet Need**

- South West Hertfordshire - Local Housing Needs Assessment Report (March 2024)

5.1 As part of the works associated with the South West Hertfordshire JSP, a Local Housing Needs

Assessment Report (LHNR was published in March 2024 and now forms part of the Regulation 19 Plan evidence base. This has been used to inform Policy HOU2 – Affordable Housing as well as wider housing polices in the draft Plan.

5.2 In these representations we examine the Plan's approach to deal with housing need and the relationship

this has to the tests of soundness and where applicable met the DtC.

Objectively Assessed Need

5.3 Table 1.1 of the LHNR indicates that the standard method requires the following requirements:

- 887 dwellings per annum based upon the standard method (SM) from 2023.
- 885 dwellings per annum based upon the updated SM from 2024.

5.4 SM (2024) takes account of the latest affordability ratios released in March 2024. We note that

Regulation 19 Plan is based upon the 885 dwellings figure SM (2024). Resulting in a (slight) reduction in housing requirement.

Annualised Affordable Housing Need

5.5 Table 1.2 of the LHNR indicates the following needs for affordable homes:

- Rented Affordable Need - 449 dwellings/year.
- Affordable Home Ownership Need - 353 dwellings/year.
- Total Affordable Need - **802 dwellings/year.**

5.6 The LHNR also indicated that StADC has a higher need for affordable home ownership so might look

towards a 60/40% split.

5.7 Currently Policy H02 Affordable Housing seeks a tenure mix which seems to reflect the

recommendation of the LHNR:

"*A tenure mix of 30% social rented, 30% affordable rented and 40% affordable home ownership, which includes 25% of all affordable housing for any nationally-mandated First*

*Homes requirement, with shared ownership preferred for the remainder*"

5.8 It should be noted that with regards to First Homes, it is the Government's intention to remove this

tenure as set out in the WMS 30th July 2024[1].

5.9 Paragraph 3.27 looking at New-Build Completions by Size, 2011/12 – 2021/22 states that "*all authorities*

*have seen delivery focused on smaller dwellings*".

5.10 The Iceni heat map of housing needs (Figure 4 below) clearly shows the areas of greatest ned within

the district. In it is noted that the Harpenden/Redbourn areas see the greatest pressure on house prices.

*Figure 4 - Figure 4.2 House Price Heat Map*

*Source: Iceni analysis of EPC data, South West Hertfordshire - LHNR (March 2024)*

5.11 Given the pressures that prevailing in the Harpenden/Redbourn area, the land at NE Redbourn already
has the potential to satisfy specific housing needs which we address in the Exceptional Circumstances Section (10.0) to these representations.

5.12 Housing need and housing requirement are different, and a requirement figure may be informed by

housing needs, in particular unmet need from neighbouring areas.

5.13 This is particularly pertinent given the approach to housing supply within the draft Plan and associated

Trajectory (2024) as we address in Section 4.0 above. The approach to maintaining a substantial under delivery of housing in the period to at least 2029/2030 has little or no regard to the needs-based aspects of housing policy.

5.14 It is unclear how StADC has determined the position or come to an understanding as to how its land

uses decisions have been informed by the unmet need in surrounding areas, given the statement in the LHNR.

5.15 Paragraph 6.70 of the LHNR states on unmet need:

"*There are no specific 'growth strategies' in place which affect the SW Herts local authorities and at the current time we are not aware that any of the 5 authorities have agreed to take on unmet need from adjoining area."*

5.16 StADC's overarching SCG provides little if any information as to how matters of unmet need have been

addressed within the JSP area or elsewhere and/or the degree to which co-operation has taken place to determine adequate housing requirements. Motivated by a keenness to submit a Local Plan that avoids addressing actual housing needs for both market and affordable (as demonstrated by the SM 2024), the DtC to ensure the proper planning to meeting both St Albans and the wider SW Joint Plan unmet housing needs has been overlooked.

5.17 Paragraph 35 of the NPPF (2023) states that for a plan to be legally sound, it must be:

"a*) Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs[19(36)]; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development*;"

5.18 Currently the Plan has not been positively prepared as it fails to adequately address matters of unmet

need both within and beyond StADC's administrative boundaries and fails to demonstrate how the DtC has been fulfilled in this regard. The Trajectory (2024) also clearly demonstrates that mitigating and addressing the housing needs is not integral to policy formulation in the draft Plan.

5.19 Table 5.1 of the LHNR shows that:

- The affordability ratio in StADC in 2022 was 90%, the highest in SW Hertfordshire area.
- the uncapped need in St Albans is 1,206 dwellings per annum, the capped need 887 dwellings.
- This was amended in Table 5.2 for 2024, to 85% and 1,169 dwellings respectively[37].

5.20 All the indicators within StADC area suggest that there is an urgent and accurate need for more housing

and currently the plan fails to fully acknowledge or address these needs and as such has not been prepared positively and lacks adequate justification. It is therefore unsound and fails in demonstrating that the DtC has been fulfilled.

Housing Need

5.21 Table 6.20 of the LHNR shows that Comparing Standard Method and Historical Completions, in StADC,
that the:

- 5 years average has been 455 dwellings.
- 10-year average 402 dwellings.
- which compares most unfavourably, to the Minimum Local Housing Need (2023) of 887 dwellings (885 in 2024).

*36 19 Where this relates to housing, such needs should be assessed using a clear and justified method, as set out in paragraph 61 of this Framework*

*37 ONS on 25th March 2024*

5.22 Table 6.20 of the LHNR shows that over the past 10 years, there has been inherent underperformance in terms of housing delivery, exacerbating the seriousness of the affordability within the district. Neither Part A nor Part B of the Local Plan full address the inherent levels of under delivery that have taken place within the district over the past decade – or three - since the last Local Plan was adopted.

5.23 Para 6.75 of the LHNR states that:

- *"The sub-region has seen sustained and consistent house price inflation, which has been strongest in St Albans but affects all local authorities'.*
- *House prices are now very significant, with the average house price now exceeding £0.5 million, presenting substantial barriers to local households from getting on the housing ladder. Prices are now almost 15 times earnings for those working locally; and households need £30,000+ in savings to be able to buy without financial support; ....*
- *The housing supply and affordability constraints which are evident have led to declining home ownership, with the rate of home ownership falling from 69.2% to 65.9% of households across the HMA. Growth has particularly been seen in the Private Rented Sector.*
- *Significant overcrowding is also evident, with 10% of households in rented tenures living in overcrowded homes*
- *When affordable housing provision is overlaid (as considered in the next section), it is clear that there is a very substantial need for affordable housing with the evidence pointing to a need for 2,279 rented affordable homes a year, and over 1,400 affordable home ownership properties. Whilst there is not a direct relationship to overall housing provision, and the affordable need is sensitive to changes in housing costs relative to incomes, there would be clear adverse consequences on affordable delivery from reducing overall housing need below the standard method levels which would not be justified on the evidence*."

*Underline Urbanissta emphasis*

5.24 To summarise the LHNR shows that:

- House prices exceed earnings by some 15 times.
- Home ownership rates are declining.
- Significant overcrowding.
- Very substantial needs for affordable housing.
- "*adverse consequences on affordable housing delivery from reducing overall need below the standard method*"

5.25 Notwithstanding these above tangible indicators of acute housing needs in both the market and affordable housing sector, the political motivation of StADC demonstrated by the publication of the Regulation 19 Plan in the manner that sees to redress the above indicators. In fact, it demonstrates that there is a direct intention to under provide housing further exacerbating the already significant problems experiences in the district and surrounding areas. This is not a basis on which to positively plan and cannot be considered a sound basis on which to progress.

Overall Need

*Figure 5 Overall Need Source: LHNR (2024)*

5.26 The identified overall housing need in StADC is 802 dwellings per annum as shown in Figure 5.

5.27 We note the position as set out in paragraph 7.122 of the LHNR which states:

"*Taking St Albans as an example, the affordable housing need identified exceeds the standard method LHN. This occurs because the two figures are derived from fundamentally different modelling approaches. The following factors need to be noted."*

- *"The affordable housing model is looking not just at the overall growth in the housing stock, but issues of tenure imbalance. It is not looking across tenures but looking at affordable housing specifically – part of the need shown is for instance from households in existing homes, who require an alternative tenure or size of home, but by moving would release the existing property for another household.*
- *The need shown is in part a factor of historical investment decisions, funding availability and losses, which have influenced the current stock of affordable housing available to meet needs.*
- *Some households would see their circumstances improve over time. One example would be a newly forming household with an income level that means they spend more than 30% of income on housing, as the household's income rises they would potentially pass the affordability test and therefore not have an affordable need. Additionally, there is the likelihood when looking over the longer-term that a newly-forming household will become an existing household in need and would be counted twice if trying to multiply the figures out for a whole plan period.*
- *In reality, some households 'in need' are accommodated within the Private Rented Sector with support through Local Housing Allowance (LHA). Whilst this is not genuine affordable housing or offer the same security of tenure, the 2011 Localism Act allows Councils to discharge their "homelessness duty" through providing an offer of a suitable property in the PRS. However there can be risks from reliance on this sector to meet need. Whilst housing delivery through the Local Plan can be expected to secure additional affordable housing it needs to be noted that delivery of affordable housing through planning obligations is an important, but not the only means, o f delivering affordable housing; and the Council should also work with housing providers to secure funding to support enhanced affordable housing delivery on some sites and through use of its own land assets.*

*The Planning Practice Guidance specifically sets out in Para 67-001 that the needs of specific groups (such as those needing affordable housing in this case) may well exceed, or be proportionally high in relation to the overall housing need figure calculated using the standard method. This is because the needs of particular groups will often be calculated having consideration to the whole population of an area as a baseline as opposed to the projected new households which forms the baseline for the standard method. It sets out that planning authorities will need to consider whether based on the evidence a higher level of housing provision might be considered, whether in effect there are constraints to additional housing delivery, as well as the anticipated deliverability, having regard to viability."*

5.28 Whist on some level it is accepted that the direct correlation between housing need and housing requirement cannot be made in numerical terms, it is noteworthy that StADC housing need and the level of provision anticipated is some 885 dwellings per annum, just 85 dwellings more.

5.29 We therefore question how housing need will be mitigated when the current level of provision proposed for at least the next 5 – 6 years will only deliver an average of some at best about **36%** of the required annual supply (885 dwellings (2023 standard method) or **22%** of the number of dwellings required by the 2024 standard method (1,544 dwellings), not least given that revised standard method (2024) would require provision of some 1,544 dwellings. This is not adequately addressed in Regulation 19 Plan Part A Policies SP1, SP3 and Table3. 1 and 3.2 and Part B Local Plan Table A1.1 and needs to be amended to demonstrate a positive approach to plan making has been pursued (paragraph 35 NPPF 2023).

5.30 The housing land supply for much of the next 5 years relies upon existing consents as we detail above.

5.31 We note that Table 7.54 of the LHNR (Figure 6) states that to meet the affordable housing need in full, StADC would need to deliver 2,005 dwellings per annum to meet housing need in full at 40%.

*Figure 6 - Table 7.54. - affordable housing need in full*

*Source- LHNR*

5.32 If the draft Plan were being positively planned, then a more positive approach to making a substantial

'dent' in housing need would be integral to Part A and Part B of the draft Plan (and its associated evidence base).

5.33 The overarching Statement of Common Ground[38] does not clarify how 'planning for housing needs

'within the JSP area has been taken into account. It simply identifies this as a factor that the parties are agreed upon as needed to be addressed jointly – but does not address how this might manifest or assess implications for the plan as whole. There is no evidence or references as to what matters have been addressed between the parties.

5.34 Unclear in the SCG how StADC has addressed via its plan making, the level of housing needs has

informed the decision taking on:

- Housing requirement (standard method from the NPPF (2023) vrs the new draft NPPF (2024).
- Influenced growth assessments for both.
- How has unmet need for surrounding local authorities (or St Albans) proposed to be addressed within the land use and housing provision assumption of the draft Plan.

5.35 Given the issues that StADC has had with meeting the DtC in previous iterations of plan making, caution

is required to ensure that the implications of the JSP cross boundary working are fully accounted of in this plan (albeit that the JSP is due to influence the housing provision of future plans).

5.36 We note aspects of Section 10 - Specialist Market Segments but note that the land at NE Redbourn has the potential to meet a very specific housing need, unique to Rothamsted Research.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

5.37 In the clamour to progress with a local plan that 'avoids' making difficult decisions on matters of housing supply, StADC has failed in the current Regulation 19 Plan to demonstrate how meeting housing needs has resulted in a draft Plan which has been positively prepared, justified, or effective. It is therefore not consistent with national policy (NPPF 2023 paragraph 35). There are also clear failures in compliance with the DtC.

5.38 In summary, the following changes should be made to the draft Plan to ensure it is sound and complies with the DtC:

- Amend provisions of Policy HOU2 in respect of First Homes to reflect the WMS[1]
- Given the greatest pressure on house prices is identified in the LHNR House Price Heat Map to be the Harpenden/Redbourn area, the land at NE Redbourn should be allocated given the role it can play in not only assisting in mitigating district wide housing needs, but also has the potential to satisfy specific housing needs in the local areas and Rothamsted Research as we address in the Exceptional Circumstances Section (10.0) to these representations.
- By demonstrating that the draft Plan and its associated evidence base mitigates housing need has been central driver to the draft Plan's assumptions and policy framework, especially in relation to Table 3.1 and 3.2 of Part A of the draft Local Plan, draft Policies LG1, LG2, LG3 and LG4 and Table A1.1 of Part B of the draft Local Plan. This is evidential link currently overtly lacking.
- Demonstrate in the draft Plan and its associated evidence base that inherent levels of under delivery that have taken place within the district over the past decade (or three) are being considered in policy decisions, to achieve sustainable development (paragraph 8 of the NPPF (2023).

**368 - Gee Smedley**

Submission Number: 368 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Save North St Albans Greenbelt Name: Gee Smedley

Comment Number: 8

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Housing a key requirement for a growing, equitable and stable society. We feel that repeatedly SADC do not have a handle on what constitutes local housing need, be it in the Local Plan process or in individual applications.

We would like to highlight SADC response to a Freedom of Information request to understand how the term “Net” affordable housing is calculated. SADC response differs from the evidence used by Inspector Masters at the Roundhouse Farm, Bullens Green Lane Inquiry in June 2021, which released Green Belt land to meet the housing need as calculated by the Standard Method using 2014 data. The SADC methodology which is consistent with NPPF and NPPG and disclosed in the regular SADC Authorities Monitoring Reports gives a higher figurer for Net Affordable Housing.

We were appalled at the inflammatory statements made by the Chair of the PP&CC on which can be viewed here. https://fb.watch/ner4HnxsOo/ . There is no way SADC can stop new residents purchasing housing from the open market.

St Albans is a vibrant and thriving commuter town, with in 30minutes train ride from one of the most economically powerful cities on Earth, London. As acknowledged in Chapter 5 of the DLP. We ask why para 5.7 is using data which is three years out of date? Post COVID has seen a rise of hybrid working and the District being an attractive place for those who do not have to go into an office every day.

The London Metropolitan Green Belt is part of the character of St Albans.

According to Estate Agents and Journalists who regularly publish in the local and national papers, the following are observed by prospective homeowners in St Albans, with St Albans regularly hitting the ten 10 of The Times Newspaper "Best Places to Live" index.

12 reasons why St Albans is the best place to live - HertsLive (hertfordshiremercury.co.uk)_Why St Albans, Hertfordshire, is one of the best places to live in 2022 (thetimes.co.uk)

- Looking excellent quality state and private schooling
- Looking for good transport links by rail and road to work
- Looking for easy access to the high-quality countryside for leisure and business including equestrian facilities
- Looking for high quality retail opportunities (as acknowledged in Chapter 6, para 6.2)
- Looking for high variety of quality leisure opportunities

SADC seems to have missed the long-term desirability of St Albans as being a key factor in it's popularity and marketability, having undoubtedly an impact on house price affordability of the area making it one of the most sort after affluent areas in the Country. Has SADC examined why a three bedroom detached property in St Albans cost over 40% more than in neighbouring Hatfield which has the same transport links and same Green Belt constraint? We feel the inflated land values are down to desirability based on the factors above marketed by newspapers and estate agents.

Recent years have seen short term tends including St Albans attractiveness to new immigrants from Hong Kong, periods of very low interest rates, and high wage growth in the service sector. These trends are now reversing with the national policy of inflation control via fiscal tightening.

Specifically to B1 "North St Albans" which straddles Bernards Heath and Marshalswick District Wards. The area has been described as popular due to access to countryside, popular and outstanding school St Albans Girls School with good road links for commuting, see the articles below. The articles do not mention that the roads are over capacity and traffic is unmanaged, we deal with those issues in our response to Chapter 8 – Transport.

Area Guide: The thriving Bernards Heath area of St Albans | Herts AdvertiserArea Guide: The historic Marshalswick area of St Albans | Herts Advertiser

We would also like to know how SADC can seek to influence house prices as is implied in the explanatory video St Albans City and District Council Local Plan Regulation 18 Consultation 2023 - YouTubethat accompanies the campaign? Housing moves on credit availability (interest rates and wage inflation), it is an illiquid asset that is slow released by developers and sold at a new build premium to maintain local house prices. There is also land banking. If SADC has economic data that can be shared to the contrary, we would like to see it. How can St Albans Green Belt be the main starting point for affordable or social housing in the strategy area?

## Strategic Policy SP4 - Housing

### 15 - Trans Link London Limited

Submission Number: 15 Submission Date: 18/10/24 12:13

Respondent: Company/Organisation: PJB Planning Name: Peter Biggs

On Behalf Of Company/Organisation: Trans Link London Limited Name:

Comment Number: 11

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Strategic Policy SP4 seeks to promote a suitable mix of housing, that promotes specialist housing to meet the needs of older people and with disabilities, along with diversifying the housing market through encouraging self-build and custom build homes in suitable sustainable locations. This housing policy is supported in principle and seeks to provide a range of housing that would cater for both District and Local housing needs. It is considered that the parcel of land promoted to the north of Napsbury Park Estate (Parcel 515) would be able to provide for this type and mix of housing proposed by Strategic Policy SP4, and, other supporting policies within this Chapter. Further consideration should be given to Parcel 515 inclusion as a housing allocation within the new Local Plan for up to 180 to 200 new dwellings.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To scrutinise the Council's policies in terms of the delivery of self-build and custom housebuilding.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 232 - Hertsmere Borough Council

Submission Number: 232 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Hertsmere Borough Council Name:

Comment Number: 2

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We acknowledge St Albans approach to meeting their housing need as set out by the Government Standard Methodology, a figure of 885 dwellings a year, a total of 14,603 by March 2041. The proposed strategy of 'Brownfield First' and targeting development towards larger towns before assessing and releasing Greenbelt Land is supported.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 262 - Watford Borough Council

Submission Number: 262 Submission Date: 08/11/24 08:23

Respondent: Company/Organisation: Watford Borough Council Name: Mr Thomas Shaw

On Behalf Of Company/Organisation: Watford Borough Council Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In line with paragraph 5.2 of SADC's Evidence Paper Meeting the Accommodation Needs of Gypsies and Travellers and Travelling Show people (September 2024), WBC confirms that it does not have any available sites to meet the Gypsy and Traveller accommodation need identified for St Albans.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

n/a

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**271 - Mr Ronan Leydon**

Submission Number: 271 Submission Date: 08/11/24 09:32

Respondent: Company/Organisation: Dacorum Borough Council Name: Mr Ronan Leydon

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Point 1:** A revised Gypsy and Traveller Accommodation Assessment (GTAA) has been produced for St Albans District Council by ORS consultants (September 2024). This shows a need for 80 pitches for households that meet the planning definition over the 2024-2041 Plan period, with 44 of these pitches required in the first five years (2024-2029). There is also a need for 7 plots for travelling show people, all within the first five years.

However, despite paragraphs 9 and 10 in the Planning Policy for Traveller Sites, Policy HOU6 does not set pitch/plot targets for the Plan period or a supply of sites for the first 5 years, years 6-10 or years 11-15.

As a result, the policy is unsound because it is not positively prepared or consistent with national policy. Dacorum recognises that the GTAA is very recent and St Albans Council has not been able to take it into account before submitting the Local Plan for public examination. Nevertheless, this matter needs to be rectified through the examination process.

**Point 2.** We also consider that Policy HOU6 is unsound, as it is not justified or effective, for the reasons explained below.

Dacorum is concerned that the only proposed new sites are both at East Hemel Hempstead, involving two sites for “up to 15-20 pitches”. This wording is not effective it means “up to 20 pitches”.

Furthermore, we consider that the proposed sites are too large, based on the advice in paragraphs 4.7 and 4.8 of the ‘Designing Gypsy and Traveller sites: good practice guide’ (2008) that sites should not normally have more than 15 pitches. Although that document was withdrawn in 2015, there is no further evidence more up to date in terms of design guidance for England.

The area close to the proposed new sites already has 62 pitches:

- Dacorum: 30 pitches at Three Cherry Trees Lane in Hemel Hempstead.

- St Albans: 17 pitches at Tullochside (off the B487 Hemel Hempstead-Redbourn Road) and 15 pitches at Ver Meadows, Redbourn.

Our view is that the existing and proposed provision would result in an over-concentration of gypsy and traveller sites to the east and north east of Hemel Hempstead and the Redbourn area.

We are also concerned that the East Hemel Hempstead (Central) Broad Location does not offer a suitable residential environment for a a gypsy and traveller site, as this broad location is proposed for employment development.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We consider that the following modifications are necessary to make Policy HOU6 sound:

- The policy should set pitch/plot targets for the plan period and include a supply of sites for the first 5 years, years 6-10 and where possible years 11+, based on the evidence in the Gypsy and Traveller Accommodation Assessment. This is necessary for the policy to be justified, effective and consistent with national policy.
- The number of pitches proposed on the East Hemel Hempstead (South and Central) Broad Location results in overconcentration in a particular area. At least one site should be deleted and the other, as a minimum, reduced in scale and not be located in close proximity to already established sites in the area. This is necessary for the policy to be justified and effective.
- Additional gypsy and traveller sites should be identified elsewhere in St Albans District, on strategic housing sites and/or in other locations, sufficient to deliver needs identified in the Gypsy and Traveller Accommodation Assessment. This is necessary for the policy to be justified and effective. It will also ensure clarity that St. Albans needs are being met in full within its administrative boundaries.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Covering letter DBC response to St Albans Draft Local Plan_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Gypsy and Traveller sites is a Duty to Co-operate matter. Also the two proposed gypsy and traveller sites are in Hemel Garden Communities, which is a key strategic issue for the Dacorum and St Albans Local Plans.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 273 - Hallam Land Management and St Albans School

Submission Number: 273 Submission Date: 08/11/24 09:33

Respondent: Company/Organisation: LRM Planning Name: Mr Owen Jones

On Behalf Of Company/Organisation: Hallam Land Management and St Albans School Name:

Comment Number: 29

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

7.2 Hallam and St Albans School support the intention to deliver good quality housing that meets the needs of all parts of the society. They do however note some concerns with the deliverability of certain aspects of the policy.

7.3 Specifically, the fifth bullet point of Strategic Policy SP4 states that the Council seeks to "to diversify the housing market and increase consumer choice through encouraging Self-build and Custom Housebuilding in sustainable locations". The North St Albans scheme allows for sufficient land to accommodate self and custom build plots to be provided, however the wording of the policy is strict in suggesting that housing diversity can only be encouraging through provision of such housing. This can be problematic on some sites due to viability, and therefore the policy should be appropriately worded to ensure that this is not the only option available. As a suggestion, the bullet point should be amended to add "where appropriate".

7.4 Similar conclusions are made in respect of Policy HOU5.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

## 315 - Bloor Homes and Department of Health & Social Care

Submission Number: 315 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Sarah Hamilton-Foyn

On Behalf Of Company/Organisation: Bloor Homes and Department of Health & Social Care Name:

Comment Number: 11

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Strategic Policy SP4 –Housing**

It is inevitable that in areas that have failed to build sufficient homes to meet identified needs will in future have lower levels of housing growth as the ability of households to form in those areas has been restricted.

It is noted (paragraphs 1.24 and 4.8 of the Reg 19 Plan and paragraph 2.3.7 of the SA) that the District's house prices are amongst the highest not only in Hertfordshire, but across the country, consequently the provision of affordable housing is a very significant issue.

**Strategic Policy SP4** duplicates issues that are subsequently covered in non- strategic policy, it is not a strategic policy as set out in the NPPF paragraph 20. Strategic policies should set out an overall strategy for the pattern, scale and design quality of places and make sufficient provision. Consequently, the matters in Policy SP4 should be addressed by the non- strategic policies in the Plan. It is, therefore, unclear as to the role and purpose of the policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The policy should be deleted as it is covered by policies in Chapter 4 of the Plan.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Representation_Form Policy SP4 Housing FINAL 5_11_2024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

The issues raised are fundamental to the preparation of the Local Plan.

Housing and development design
HCC Public Health support Strategic Policy SP4 - Housing which seeks to provide good quality housing that meets different needs, including the provision of specialist housing for older people and people with disabilities. This policy also requires developments to provide new accessible and adaptable housing to meet the changing lifestyle needs of all occupants.
We recommend that all new housing for older people of any tenure should be built to accessible and sustainable standards, conforming to HAPPI design standards6, be digitally enabled for assistive and other technology, and encourage developers to build to energy efficient and carbon neutral specifications, and thus promoting accessible, adaptable, and dementia friendly design.
In addition to the above, all new housing for older people should investigate options such as PassivHaus and other eco-build designs for specialist older persons housing, to reduce thermal variances and the associated costs, and assist in preventing poor health outcomes in older people.

The development should contribute to the priorities regarding public health and the built environment as set out in the Housing for Older People Strategy. They should be considered during the design stage and consideration of how they have been considered should be included in a planning application e.g. as part of the Health Impact Assessment or Design and Access Statement.

### 356 - Rachael Donovan

Submission Number: 356 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Hertfordshire and West Essex ICB Name: Rachael Donovan

Comment Number: 7

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*Strategic Policy SP4 –Housing and Policy HOU2- Affordable Housing*

The HWE ICB welcomes the inclusion in the explanatory text, that 'affordable housing' includes key worker access to affordable housing. It would be helpful for the Local Plan to also define 'key workers' in the glossary. At the very least the NPPF definition should be referenced which focusses on essential frontline workers in health, education and community safety.

On Behalf Of Company/Organisation: Gate Herts (Gypsy & Traveller Empowerment, Hertfordshire) Name:

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**3.0 St Albans City and District Council Gypsy & Traveller Accommodation Assessment, ORS, September 2024**

3.1 The 2024 GTAA is not consistent with national policy in two important ways.

3.2 Contrary to para 7 of Planning Policy for Traveller Sites (PPfTS) the report did not:

1. a) '*pay particular attention to early and effective community engagement with both settled and traveller communities (including discussing travellers' accommodation needs with travellers themselves, their representative bodies and local support groups*)' nor
2. b) '*cooperate with travellers, their representative bodies and local support groups; other local authorities and relevant interest groups to prepare and maintain an up- to-date understanding of the likely permanent and transit accommodation needs of their areas over the lifespan of their development plan, working collaboratively with neighbouring local planning authorities*.'

3.3 Given that Gate Herts is one of the most active and effective locally based Traveller organizations in the country, that Phil Dodshon, the St Albans officer then responsible for the Local Plan specifically asked ORS to liaise with GATE Herts in relation to carrying out the GTAA, and that there was a meeting between GATE and representatives of ORS on 10 November 2023 we find the absence of any reference to engagement with Gate Herts hard to understand. Nor is there any reference to ORS engaging with the Gypsy and Traveller team at the County Council who manage the local authority sites across Hertfordshire.

3.4 In work I have personally been involved in on a needs assessment elsewhere in the country we have interviewed prominent members of the community and those involved in Traveller education, community development among the Traveller communities, local authority site managers, and planning agents who represented Gypsies. Those people added significantly to our understanding of the issues impacting on the Travelling communities in that area. In our report, unlike that of ORS which treats local authority planners as the only stakeholders, we treated all of these parties as stakeholders.

3.5 This apparent failure to engage, or when engagement has occurred to make any reference to it, would appear to be contrary to the requirements of PPfTS para 7 a) and b). It means the needs assessment is not informed by evidence based on the lived experience of Gypsy people, as opposed to the data gathered from them. Had this been done, some of the weaknesses in the GTAA that we identify below could have been avoided.

3.6 Our second major concern with the GTAA is that contrary to para 7 c) of Planning Policy for Traveller Sites (PPfTS) it does not represent '*a robust evidence base to establish accommodation needs to inform the preparation of local plans and make planning decisions'.*

3.7 We have at least two significant concerns with the 2024 GTAA. We are also unclear on what the study is saying about the requirement to include need from unidentified households. The relevant sections of the report at paras 1.16, 3.26 - 3.32 and Appendix C are ambiguous. At para 4.18 we indicate how we recommend that the forecasts of need from unidentified households should be taken into account in the pitch targets.

3.8 We believe that the GTAA's approach to need from housed Gypsies and Travellers at paras 3.17 – 3.19 and 7.23 is unsound. According to the 2021 Census for England only 21.6% of those identifying as White Gypsy or Irish Traveller were living in caravans or other mobile or temporary structures. The remaining 78.4% were living in various types of bricks and mortar accommodation. We will check the St Albans figure but we would be very surprised if those in housing did not represent a majority of the Gypsy population in St Albans. Based on our experience leading a GTAA in another part of the country we would suggest that

- the failure to interview any housed Travellers is a profound weakness of the way the study was carried out;
- While housed Travellers can be 'hard to reach', they are more likely to be reached where the research team works closely with local Traveller organisations; and
- The implied assumption that housed Travellers will only require housing is not correct. Our research establishes that while many prefer housing, the preference of a significant number is for pitch accommodation (and following the December 2023 change in definition a significant number of them will meet the definition).[1]

3.9 One of the weaknesses of many GTAAs is the tendency to focus almost exclusively on the residents of established sites and one of the challenges in producing robust GTAAs is to identify need from the more mobile households who lack secure accommodation, and who by definition are more likely to be in need.

3.10 A related issue is the apparent assumption at paras 7.37 – 7.46 that there is no identifiable need for transit accommodation. Given the increasing draconian measures against unauthorised encampment through the Criminal Justice and Public Order Act 1994 and Police Act 2022, we should be cautious about using the '*historic low numbers of unauthorised encampments'* to conclude that there is limited current need for transit accommodation. More generally, we are surprised that discussions with members of the travelling communities did not bring out concerns with the lack of a range of transit opportunities, which in our experience is an issue which comes out strongly in discussions with Travellers.

3.11 It should have been possible for the GTAA to get some understanding of the need from mobile, roadside households and for transit accommodation by speaking to the Gypsy and Traveller team at the County Council who are responsible for the Mimms transit site in Hertsmere site, the very experienced gentleman who manages the site for the county, together with the temporary site residents. Finally we would have expected the research team to have spoken to the family living roadside in the area who are well known to the Gypsy and Traveller team at the County, St Albans Council, and to GATE Herts.

## 7.0 Legal Compliance

7.1 The implication of the flaws in the Local Plan identified in the above paragraphs, not least in failing to making any allocations for Gypsies and Travellers, means that not only is the plan not sound, it is also not legally compliant on the basis:

- It indirectly discriminates against Gypsies and Travellers (whose ethnicity is a protected characteristic under the Equality Act) without adequate justification, contrary to s.19 of the 2010 Equality Act; and
- Its approach is contrary to the Public Sector Equality Duty under s.149 of the Act.

[1] Once the GTAA I have been involved with is published, I will make its results on need from housed Gypsies and Travellers available.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Annex 1 Traveller Sites through Local Plan Allocations_[R].pdf
2. Annex 2 Inspectors letter to GNLP re GT sites 190122_[R].pdf
3. Herts Gate Reg 19 Rep 061124_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

GATE Herts is one of the leading locally based Gypsy and Traveller organizations in England and the only significant Gypsy & Traveller organization in Hertfordshire. In our submission the plan is unsound and not legally compliant in regard to provision for Gypsies. We would contribute the lived experience of Gypsies and Travellers and substantial experience of planning for Gypsies and Travellers to the hearings.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 83 - Affinity Water

Submission Number: 83 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Name: Lita Khazaka

On Behalf Of Company/Organisation: Name: Affinity Water

Comment Number: 10

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Affinity Water does not wish to engage in substantial dispute with the council at the forthcoming Examination-in-Public but observes a number of problems in the council's approach towards the provision of housing which further confirms its views that the housing target should be increased and more sites brought forward. It offers its observations to help the council as an interested party. At Policy HOU 1 – Housing Mix, the one size approach to housing mix on all schemes of 10 or more homes is too restrictive. More flexibility in mix would be appropriate especially for an ageing population. For example, an inner city flatted scheme is likely to be more suitable for smaller and older households (including downsizers) than a new build scheme on an edge of centre Broad Location allocation. The council is urged to adopt the same flexible approach to housing mix as it does when seeking to apply car parking standards in different parts of the district.

Policy HOU 6 – Gypsies, Travellers and Travelling Show People has more serious deficiencies. The evidence base the council has commissioned (the GTAA) directs the council to plan for 80 households who meet the "planning definition" of gypsy or traveller, a further 19 pitches for undetermined households and seven plots for travelling showpeople. The Draft Local Plan policy only allocates between 30 and 40 pitches for travellers on two site allocations and none for travelling showpeople. The council does not have an established track record of approving new sites for gypsies and travellers in the Green Belt or other windfall sites to make up the shortfall.

In the context of very high land prices and restrictive Green Belt policies, it is submitted that this draft Local Plan will be found unsound on this ground alone. Potentially the council may also be in breach of its Public Sector Equality Duty by not planning for the needs of this section of the population and, thus, its plan found to be legally defective too.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The council could address this defect by allocating more pitches and plots on all of its Broad Location (Policy LG1) site allocations (that is, sites of more than 250 homes), an established practice across the Home Counties. This would theoretically result in a reduction in overall "bricks and mortar" housing on these proposed site allocations but it further reinforces Affinity Water's view that other sites are needed for conventional housing to meet this widening shortfall.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Affinity Water does not wish to debate the matters raised in this part of its submission.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**114 - Hertfordshire County Council - Property Team**

Submission Number: 114 Submission Date: 06/11/24 23:21

Respondent: Company/Organisation: Vincent + Gorbing Name: George Sellers

On Behalf Of Company/Organisation: Hertfordshire County Council - Property Team Name:

Comment Number: 7

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

This policy as currently written is not consistent with national policy, thus enabling the delivery of sustainable development. The below suggested wording is intended to address this.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

- It is noted that HOU1 – Housing Mix, sets out a specific mix of both market and affordable housing. This policy will be in place for the 20 year life span of the Local Plan, and it is considered that some flexibility is built into this requirement to reflect changing needs over time and at a local level.
- It is therefore considered that the wording used in Policy LG1 criterion (k) is reiterated as part of Policy HOU1, to include the wording: *'but will also have regard to the most up-to-date evidence on housing need and be in general conformity with the Council's latest evidence base'.*
-

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

- The above requested change was previously submitted as part of the Regulation 18 submissions but has not been adopted as part of the current Regulation 19 Draft. It is therefore considered appropriate for this point to be discussed in the forum of the EiP to consider the right approach.
-

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

* Yes

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

We commend the plan for the strong commitment to a better housing mix and would see the current imbalance as a serious impediment to the local economy and a significant contributing factor to high vacancy rates, especially those in the caring, retail and education professions, with recruitment and retention challenges and increased traffic for those 'priced out' of the area and having to travel significant distances from beyond the District to serve in these roles.

## 166 - Denton Homes Ltd

Submission Number: 166 Submission Date: 07/11/24 13:49

Respondent: Company/Organisation: Nexus Planning Name: Georgia Goff

On Behalf Of Company/Organisation: Denton Homes Ltd Name:

Comment Number: 5

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* Yes

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

In line with Paragraph 4.6, the housing mix should not be applied to urban brownfield sites which may require an alternative housing mix to that set out in Table 4.1. For example, one and two bedroom houses are more suitable to a town centre site than family dwellings. Therefore, housing mix should be assessed on a site-by-site basis.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

It should be stated within Policy HOU2 that housing mix in urban areas should be assessed on a site-by-site basis.

### If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?

* No, I do not wish to participate in hearing session(s)

### I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:

**172 - Mr and Mrs Robert and Karen Choppin**

Submission Number: 172 Submission Date: 07/11/24 14:30

Respondent: Company/Organisation: Studio LK Name: Lita Khazaka

On Behalf Of Company/Organisation: Name: Mr and Mrs Robert and Karen Choppin

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

4.1. Studio LK observes other problems in the council's approach towards the provision of housing which further confirms its views that the housing target should be increased and more sites brought forward.

4.2. Studio LK's comments on Policy HOU 1 below are offered on the basis of the substantial amount of site appraisal and design the company does on sites across the South East of England.

4.3.HOU1 is inflexible. At Policy HOU 1 – Housing Mix, the one size approach to housing mix on all schemes of 10 or more homes is too restrictive. More flexibility in mix would be appropriate especially for an ageing population and in the context of a continued forecast drop in mean household size over the lifetime of the Draft Local Plan. For example, a flatted scheme in the centre of St Albans or Harpenden is likely to be more suitable for smaller and older households (including downsizers) than a new build scheme on an edge of centre location such as the Smallford Stables site (Site Allocation PX). Studio LK suggests that the council adopt the same flexible approach to housing mix as it does when seeking to apply car parking standards in different parts of the district.

4.4. Policy HOU 6 – Gypsies, Travellers and Travelling Show People has more serious deficiencies. The evidence base the council has commissioned (the GTAA) directs the council to plan for 80 households who meet the "planning definition" of gypsy or traveller, a further 19 pitches for undetermined households and seven plots for travelling showpeople. However, the Draft Local Plan policy only allocates between 30 and 40 pitches for travellers on two site allocations and

none for travelling showpeople. The council does not have an established track record of approving new sites for gypsies and travellers in the Green Belt or other windfall sites to make up the shortfall. The council's own evidence base confirms that neighbouring authorities will not take up the shortfall.

4.5. In the context of very high land prices and restrictive Green Belt policies, it is submitted that this draft Local Plan will be found unsound on this ground alone. Potentially the council may also be in breach of its Public Sector Equality Duty by not planning for the needs of this section of the population and, thus, its plan found to be legally defective too.

4.6. The council could easily address this defect by allocating the shortfall of pitches and plots on all of its Broad Location (Policy LG1) site allocations (that is, sites of more than 250 homes), an established practice across the Home Counties in recently adopted Local Plans. This would theoretically result in a reduction in overall "bricks and mortar" housing on these proposed site allocations but it further reinforces our client's view that other sites are needed for conventional family housing to meet this widening shortfall, especially those with easy access to existing social infrastructure such as the Smallford Stables site.

4.7. Studio LK therefore offers Smallford Stables (Site Allocation PX) on this basis.

Non compliance with national policy

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Policy HOU1 – Housing Mix**

The policy requires proposals of 10 or more dwellings to provide a housing mix as per Table 4.1 below.

The above housing mix relates to all housing developments of over 10 dwellings, yet this is clearly not appropriate for retirement living schemes. The subsequent text to the policy recognises that some adjustment may be needed for specialist housing schemes, but only in relation to Broad locations.

'*The delivery of specialist housing at Broad Locations could affect the housing mix by increasing the number of smaller units. Therefore the housing mix may be adjusted on sites that deliver specialist housing units to take account of an increased proportion of smaller units.'*

**Recommendation**

Amend the policy wording as follows:

*New residential development proposals (Use Class C3,**excluding specialist housing for older people**) should provide: …*

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

2.235 Bellway Homes Ltd largely support the intent of this policy, yet they consider that the framing of the policy is overly prescriptive and will hinder the ability to deliver an appropriate range of housing typologies to satisfy local demand.

2.236 It is considered that the percentages applied in Table 4.1 (Housing Mix by Size and Tenure) should be applied as indicative housing targets only, as this will provide a steer on the likely housing mix which could be supported. It should apply a range for each typology and dwelling size and the wording of the draft policy should make explicit reference to updated local evidence or market demand which will be published in the form of annual monitoring reports and updates to the Strategic Housing Market Assessment.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

2.237 The wording of the policy should be drafted in a manner which allows for flexibility to encourage rather than unnecessarily hinder delivery of housing within the borough to meet identified need.

2.238 The framing of the draft policy is imprecise and requires modification to enable the policy to be deliverable.

## 222 - Martin Grant Homes and Kearns Land Ltd

Submission Number: 222 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Marrons Name: David Pendle

On Behalf Of Company/Organisation: C/O Marrons Name: Martin Grant Homes and Kearns Land Ltd

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy HOU1 seeks the provision of a mix of dwelling types and sizes to meet the needs of current and future households. Criterion b includes a housing mix table and sets a requirement for proposals of 10 or more homes to accord with that mix. This requirement for full compliance with the identified housing mix does not provide for any flexibility to take account of local need, character or context or an ability to have regard to other changes in supply since the mix evidence was prepared. Strict application of criterion b would have the obvious effect of tension with criterion a which says proposals should provide a mix of dwelling types and sizes to meet the needs of current and future households. Furthermore, site specific constraints or viability may require a mix that differs from that set out in Table 4.1.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We would recommend the council amend Policy HOU1 to enable some flexibility in respect of the defined housing mix, size and tenure within criteria b to support the delivery of sustainable development across the District and to better reflect criterion a.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 224 - Redington Capital Limited & CALA Homes

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 6

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Redington Capital Limited and CALA Homes do not wish to make any fundamental comments on the contents of this chapter. That said, they support the flexibility given when apply dwelling mix to large sites to react to the market conditions, as set out within Policy HOU1 (Dwelling Mix). That said, more flexibility to considered.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

More flexibility should be included within Policy HOU1 (Dwelling Mix) to allow for:

- Consideration of additional or updated evidence, monitoring information on the mix of homes that has been delivered, the different needs of different areas and the type and location of the site being developed. The need for flexibility is partially recognised paragraph 4.6 of the Draft Local Plan, but in order to be effective flexibility needs to be introduced into the policy itself; and
- Further evidence as to whether this mix is deliverable on the basis of the densities that are being proposed in Policy DES3. The Council are proposing a minimum net density of 40dph, and it is not clear as to how these assumptions relate to the proposed housing mix in this policy.

### Please upload any supporting documents here. Do not include any signatures or other personal data.

*Refer to Attached submission letter for whole response and figures.*

14.2 We have reviewed the published South West Herts Local Housing Needs Assessment Update (March 2024) and we have concerns with the housing policies that we explain below.

**Policy HOU1**

14.3 Policy HOU1 states that new residential developments should provide a) a mix of dwelling types and sizes to meet the needs of current and future households. Unfortunately, this wording is not clear or specific enough, and it is only developed into a specific mix requirement in point b) of the policy, but it limits its application to developments of 10 and more dwellings.

14.4 In light of the above, we consider Policy HOU1 not being adequately worded where it refers to housing mix for developments of less than 10 dwellings, as it fails to require a specific mix that would contribute towards providing small and medium size homes. The supporting text of the policy acknowledges that St Albans District has a high proportion of large dwellings in its housing stock (paragraph 4.4), but regardless of this, policy HOU1 does not require any specific housing mix for small sites (less than 10 dwellings). The Draft Local Plan allocates development in SACDC for at least 190 dwellings which would fall within sites of less than 10 dwellings each, therefore the Council is missing the opportunity to correct the district's housing mix in 190 cases through its allocations only, to which one would have to add all small windfall sites that would be brought forward in the plan period.

14.5 It is worth to mention that the South West Herts Local Housing Needs Assessment Update Report is the only housing need assessment evidence provided by the Council. This report recommends a mix of homes for the whole South West Hertfordshire area, not making district-specific recommendations in terms of housing mix for St Albans.

14.6 The latest mix (Reg. 19 Draft Local Plan) has been amended from the previously proposed mix (Reg.18), and the proposed mix departs now further from the recommended mix in the table below. The Council has not provided any additional St Albans's district specific evidence that would inform this change in the mix and has not justified the change in the supporting text.

*Figure 14.1: South West Hertfordshire recommended housing mix. South West Herts Local Housing Needs Assessment Update Report (March 2024).*

14.7 In this regard, RPC considers that policy HOU1 is not being effective in addressing the housing mix need, raised by Council in their own evidence and supporting text of the policy, by not providing a housing mix that responds to the actual demand in terms of the size of homes, as it only requires a specific housing mix to developments of 10 dwellings and more. This would lead to a significant amount of development outside of the application of policy HOU1, with no justification or evidence to demonstrate the rationale for missing this. There are precedents elsewhere in the country where housing mix requirements in terms of size of homes applies to all new development proposals, proportionately, regardless of the scale of the development.

14.8 For the above reasons, due to the **lack of effectiveness and the insufficient justification and evidence to support the proposed policy text, RPC considers this policy to be unsound**.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

14.7 In this regard, RPC considers that policy HOU1 is not being effective in addressing the housing mix need, raised by Council in their own evidence and supporting text of the policy, by not providing a housing mix that responds to the actual demand in terms of the size of homes, as it only requires a specific housing mix to developments of 10 dwellings and more. This would lead to a significant amount of development outside of the application of policy HOU1, with no justification or evidence to demonstrate the rationale for missing this. There are precedents elsewhere in the country where housing mix requirements in terms of size of homes applies to all new development proposals, proportionately, regardless of the scale of the development.

14.8 For the above reasons, due to the **lack of effectiveness and the insufficient justification and evidence to support the proposed policy text, RPC considers this policy to be unsound**.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

**Draft Policy HOU1 – Housing Mix**

3.9 Draft Policy HOU1 stipulates that:

*New residential development proposals (Use Class C3) should provide:*

*a) A mix of dwelling types and sizes to meet the needs of current and future households; and*

*b) In the case of proposals of 10 or more homes to provide a housing mix as follows –*

***See supporting document: North Hemel Hempstead Regulation 19 Representation Bloor for table***

3.10 Diversity in housing is crucial to delivering mixed and balanced communities that cater to the different needs of the population. The demand for housing types may change over time to the end of the Plan period in 2041, or there may be a scenario where a neighbourhood may currently have an over-concentration of a particular size of dwelling type and a new development could help redress this balance. SADC should introduce more flexibility to draft Policy HOU1 to enable an alternative mix of housing where this is supported by local housing needs evidence and is appropriate. SADC should therefore add the following to draft Policy HOU1:

**"c) The Council may permit an alternative housing mix providing the applicant is able to provide up to date local market evidence, or up to date evidence from the Council's Housing Register, to justify the mix and ensure that the proposal will contribute towards the creation of mixed and balanced communities."**

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**290 - BRiCS Development**

Submission Number: 290 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: ET Planning Name: Tom Ryan

On Behalf Of Company/Organisation: C/O ET Planning Name: BRiCS Development

Comment Number: 7

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy HOU1 sets out the Council's policies on housing mix.

BRiCS object to the policy as currently drafted. In relation to part a), the policy wording is too vague and is not appropriately evidenced. There is a lack of detail within the policy wording as to what is required to meet the needs of current and future households.

In relation to part b), we have a number of points to make. Firstly, there is no full justification for the figures provided within the policy. Secondly, the table in the policy provides a district-wide picture from the SHMA. The policy as currently worded is too prescriptive, as it does not allow for more localised variations to housing mix. Development should comply with the Development Plan when read as a whole, and there are other determining factors in the assessment of mix, such as the requirement for a development to accord with an areas character.

Housing mix should also be partly driven by character-led considerations. For example, the surrounding character may be typified by larger 4+ bed properties, and it may not considered appropriate for a development to deliver smaller units.

Lastly, there is no flexibility in the policy wording: *"proposals of 10 or more homes to provide a housing mix as follows"*. In order to be effective and in accordance with national policy, the policy should encourage the provision of an appropriate housing mix in a way which balances need and character-led considerations.

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The policy requires proposals of 10 or more dwellings to provide a housing mix as per Table 4.1.

The [housing mix in Table 4.1] relates to all housing developments of over 10 dwellings, yet this is clearly not appropriate for retirement living schemes. The subsequent text to the policy recognises that some adjustment may be needed for specialist housing schemes, but only in relation to Broad locations.

'*The delivery of specialist housing at Broad Locations could affect the housing mix by increasing the number of smaller units. Therefore the housing mix may be adjusted on sites that deliver specialist housing units to take account of an increased proportion of smaller units.'*

**304 - EDIT Land Ltd**

Submission Number: 304 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land to the south of Burydell Lane, Park Street” have been discounted incorrectly.

**Representations**

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

SP1: A Spatial Strategy for St Albans District

SP3 — Land and the Green Belt

HOU 1- Housing Mix

HOU 2 — Affordable Housing

SP2 — Responding to the Climate Emergency

NEB 6 - Biodiversity and Biodiversity Net Gain — Comment

LG5 — Green Belt — Object

***Draft Policy HOW: Housing Mix - comment***

EDIT Land largely support the intent of this policy, yet they consider that the framing of the policy is overly prescriptive and will hinder the ability to deliver an appropriate range of housing typologies to satisfy local demand.

It is considered that the percentages applied in Table 4.1 (Housing Mix by Size and Tenure) should be applied as indicative housing targets only, as this will provide a steer on the likely housing mix which could be supported. It should apply a range for each typology and dwelling size and the wording of the draft policy should make explicit reference to updated local evidence or market demand which will be published in the form of annual monitoring reports and updates to the Strategic Housing Market Assessment.

The wording of the policy should be drafted in a manner which allows for flexibility to encourage rather than unnecessarily hinder delivery of housing within the borough to meet identified need.

The framing of the draft policy is imprecise and requires modification to enable the policy to be deliverable.

## 329 - Mr Russell Crow

Submission Number: 329 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Mr Peter Atkin

On Behalf Of Company/Organisation: Richborough Estates Name: Mr Russell Crow

Comment Number: 10

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy HOU1 - Housing Mix is very prescriptive and does not allow for any flexibility in approach. Market and affordable housing needs and demand will likely change over a plan period, Policy HOU1 should be alive to this potential for change and should be caveated to allow for more up to date evidence to be taken into account as part of the planning application process should it be forthcoming. Furthermore, in the case of Redbourn, the Parish Council have an adopted Neighbourhood Plan with its own local housing mix policy and requirements – which differ from the requirements set out in HOU1 which are based on the findings of the South West Herts Local Housing Needs Assessment Update (LHNA 2024).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Proposed remedy: This conflict clearly demonstrates the need for flexible wording to be inserted into HOU1 to allow the local planning authority to determine an appropriate mix in light of the latest evidence when a planning application is under preparation. The appropriateness of a housing mix is influenced by a range of factors. The policy should be clear that the housing mix suggested in Policy HOU1 will be a starting point for discussions on the appropriate housing mix for a certain site. The policy should be amended to allow for other evidence to be provided justifying deviations from the suggested housing mix, such as site specific constraints or up to date market research undertaken by the developer.

## 330 - Taylor Wimpey Strategic Land

Submission Number: 330 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Sam Hollingworth

On Behalf Of Company/Organisation: Taylor Wimpey Strategic Land Name:

Comment Number: 5

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

5.2 We support the provision of a policy setting which will provide a steer regarding housing mix that will be required in order to best address accommodation needs.

5.3 However, it is important that such a policy is imbued with appropriate flexibility to account for site-specific circumstances, potential variations in housing need across the District, and the likelihood for that needs will change over time.

5.4 As currently worded, we consider the policy is overly prescriptive and fails to account for the aforementioned.

5.5 Whilst we note the text at paragraph 4.6 in which it states that a limited number of urban brownfield sites may require a different mix, we do not consider this accounts for all the circumstances in which a different mix may be suitable and / or necessary.

5.6 Separately, the justification is unclear for requiring ***all*** one-bed dwellings to be two-person dwellings, and ***all*** two-bed dwellings four-person homes.

5.7 We suggest that the outcome of the Ipswich Local Plan Review Examination, and Schedule of Proposed Main Modifications (July 2021) prepared in order to address matters soundness, may provide a useful basis for the Council to consider policy wording in respect of housing mix. Following examination hearing sessions, and in order to make this Local Plan consistent with national policy and justified, the first part of the housing mix policy was amended such that it read as follows:

***The Council will plan for a mix of dwelling types to be provided, in order to achieve strong, vibrant and healthy communities. All major schemes of 10 dwellings or more will be expected to provide a mix of dwelling types and sizes.***

***Exceptions to this approach will only be considered where:***

1. ***A different approach is demonstrated to better meet housing needs in the area; or***
2. ***The site location, characteristics or sustainable design justify a different approach; or***
3. ***A different approach would expedite the delivery of housing needed to meet targets and is acceptable in other planning terms.***

***In considering the most appropriate mix of homes by size and type for major residential development proposals, the Council will take a flexible approach taking into account needs identified through the current Ipswich Strategic Housing Market Assessment and any other evidence of local needs supported by the Council and the policies of this plan...***

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

However the policy is amended, it is important that it provides the appropriate degree of flexibility to be able to respond to different and / or changing circumstances.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 24-203 TWSL LP Reg 19 Wheathampstead Final_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We consider it would be of benefit to discuss the proposed modifications as set out within our representations with the Council, Examining Inspector(s), and other stakeholders in the hearing sessions.

**334 - TT Group**

Submission Number: 334 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Knight Frank Name: Stuart Baillie

On Behalf Of Company/Organisation: TT Group Name:

Comment Number: 6

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Policy HOU1 (Housing Mix)**

Policy HOU1 sets out the Council's expectations on housing mix and tenures for new residential developments of 10 or more homes. The proposed housing mix is as follows:

| Tenure | Unit Size | | | |
|---|---|---|---|---|
| | 1-bed | 2-bed | 3-bed | 4+ beds |
| Market Housing | 5% | 20% | 45% | 30% |
| Affordable Housing (Home Ownership) | 25% | 40% | 25% | 10% |
| Affordable Housing (Rent) | 30% | 35% | 25% | 10% |

This Policy is, again, a reflection of SACDC's pre occupation with facilitating redevelopment of larger greenfield and suburban type sites where there is more space to deliver a range of housing types and tenures. This Policy must make provision for greater flexibility to achieve higher density residential formats in more constrained urban locations which are closer to urban amenities.

While it is noted that paragraph 4.6 of the Draft Local Plan acknowledges there will be a 'limited number' of urban brownfield sites which may require a different mix (e.g. more flatted homes and fewer larger units), this is not accounted for within the current wording of Policy HOU1 itself.

The redevelopment of previously developed sites in particular must overcome numerous constraints which often constrain the housing mix that can be achieved, including the Council's expectation that housing delivery on these sites will be maximised. Indeed, the Draft Local Plan consistently focuses on the importance of making efficient use of land. In this context, applying a restrictive Housing Mix on all sites will in many instances reduce the number of homes that can be brought forward. It is therefore contended that Policy HOU1 could frustrate the delivery of residential development, most notably on previously development land.

In addition, the proposed Housing Mix represents overall need for housing within SACDC. However, consideration should be given to the fact that different dwellings / sizes will be suited to specific areas. For example, flatted development would be considered more suitable in central urban areas and are more likely to incorporate a higher number of 1-bed and 2-bed dwellings as starter homes or indeed as downsize opportunities older residents.

Therefore, in order to ensure that previously developed sites can be optimised and be delivered effectively, our Client requests that Policy HOU1 be amended to allow flexibility in relation to the preferred Housing Mix for urban sites and reflective of Para 4.4 which acknowledges the need for one and two bedroom flats and two bedroom family accomodation. We propose the following wording be added to the Policy:

"For more constrained town centre and urban sites with very good access to amenities and public transport, there will be greater flexibility to offer a higher concentration of one and two bed homes subject to demonstrating high quality design and market demand."

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusions**

Our Client welcomes the preparation of the St Albans' new Local Plan, noting that those policies contained in the current adopted Local Plan (1994) are extremely outdated and do not accurately reflect current circumstances.

Our Client broadly supports the aspirations of the Plan, particularly that of prioritising residential development on previously developed sites, and ensuring the efficient use of such land in order to meet the significant housing need within the district. Our Client agrees this represents a sensible and effective way of providing much needed new homes in highly sustainable locations across the district which is otherwise constrained by Green Belt.

Nevertheless, our Client has significant concerns regarding specific policies of the Draft Local Plan. Most notably, our Client raises key concerns with the failure of the Draft Local Plan to identify Marlborough House as a site for future residential development. As discussed throughout this representation, Marlborough House represents an underutilised, highly accessible previously developed site, the comprehensive redevelopment of which to provide residential units would make a significant contribution towards meeting housing need within SACDC.

Furthermore, our Client contends that the Draft Local Plan are not legally sound and do not comply with the NPPF. Our Client has therefore made a number of recommendations, which if adopted would ensure consistency across the Draft Local Plan. Notably, our Client strongly contends that those policies within the Draft Local Plan must be sufficiently flexible in order to maximise the chances of meeting the significant housing need within the district. Failure to do so risks the Draft Local Plan stifling opportunities to meet housing need through the effective and efficient use of the highly sustainable brownfield sites.

Overall, it is concluded that in its current form the Draft Local Plan has areas of inconsistency, is not justified with appropriate evidence and is therefore at risk of not be legally compliant, and it is suggested that the Council take further review. We look forward to engaging further in the preparation of the St Albans Local Plan 2041.

Comment Number: 13

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Draft Policy HOU1**–*"Housing Mix"*– the addition of the arbitrary percentages within Table 4.1 renders it impossible to achieve a policy compliant scheme, as inevitably the calculation delivers a partial dwelling. The 5% limitation placed on 1 bed private sector dwellings would mean no such provision on any scheme of less than 20 dwellings. The issue is compounded by the requirement for overall 40% of the scheme to be affordable. The policy is not positively prepared; justified; effective; or consistent with national policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). **Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Policy HOU1: Housing Mix**

The supporting text sets out at paragraph 4.4 that the District has a high proportion of large dwellings in its housing stock and that longstanding trends and population forecasts show smaller average household size, including an increasing proportion of single person households. More small and small-medium sized homes are required which would lead to an increase in the proportion of relatively low-cost market housing available to buy, assisting those who are just able to afford to buy on the open market.

The updated LHNA sets out a slightly different suggested mix for affordable ownership and affordable rented units than the policy, however there is no explanation why the policy has deviated from this within the supporting text. Whilst the LHNA states that a flexible approach should be

adopted, it is unclear why the policy mix differs from that identified in the LHNA. To ensure the policy is fully justified and effective, the DLP should provide justification for the specific changes in policy mix.

Further, Hill are currently finding that there is a limit as to what registered providers will accept in terms of both 1 and 4+ bedroom homes, which is reflected in paragraph 8.70 of the LHNA. Hill therefore welcomes the fact the LHNA has considered input from registered providers on the proposed mix.

Hill wish to highlight that LHNA studies are undertaken at particular points in time and take a generalised view across the whole borough. In this case, it is recommended that the Council include some flexibility within the policy to ensure it is effective and can allow for consideration of additional or updated evidence as demand may change over time to reflect market conditions and the economic climate.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

**362 - EDIT Land Ltd**

Submission Number: 362 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land at Roundhouse Farm, Colney Heath” have been discounted incorrectly

Representations

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

The Reg. 18 Draft Local Plan includes planning policies relating to various topics, which would become the principal consideration for the decision maker when determining planning applications.

EDIT Lands has not provided comment on a number of policies and advise which they are commenting on in the list below, but reserves the right to comment on others in the future.

However, SADC should consider whether all the policies as drafted are useful and necessary for decision making, and do not just repeat that which is already stated in the National Planning Policy Framework (NPPF), Planning Practice Guidance or legislation. Policies should also be unambiguous, clear and concise, without being overly onerous or stifle innovation or ambition.

EDIT Lands main concern with the Local Plan, as a whole, is the weak approach to the provision of much needed housing. Firstly, the level of housing planned for does not seek to address housing need adequately or provide any contingency, nor does it seek to address unmet need or positively plan for previous years of significant under-delivery.

Furthermore, the level of housing which is proposed as windfall, is unsound. 20% of the total housing supply to come forward on sites which do not have allocations, nor are formally identified is not positively prepared and is a huge outlier compared to neighbouring authorities. We consider the proportion of windfall to be wholly inappropriate given the borough’s historic poor delivery and acute housing need.

It is also perverse for SADC to suggest that all brownfield sites have been exhausted to necessitate Green Belt release, whilst anticipating that such a high number will come forward via the windfall process. In addition, the Local Plan is heavily reliant on the delivery of a small number of broad growth areas and strategic extensions, namely the Hemel Garden Community which is allocated for net. 5,500 dwellings and 4,281 across the other strategic development sites which are subject to challenging land assembly and infrastructure delivery requirements which will constrain delivery of housing units within the early periods of the Local Plan. St Albans have acknowledged this situation in the reg.19 draft Local Plan where they are now asserting that only 4,300 dwellings will be delivered on the HGC sites within the LP period, a reduction of 450 dwellings from the LP trajectory and 1200 from the wider site allocation. Across all allocated sites within the borough, the council has lost net. 971 dwellings between Reg.18 and Reg.19 stage. There is no explanation, or justification on how the shortfall in housing delivery is accounted for within the revised housing trajectory, or local plan housing targets.

The housing trajectory places significant reliance on these strategic sites without due consideration to implications of these strategic sites not being delivered or brought online in line with the housing trajectory.

The emerging Local Plan is also not prepared positively as it fails to make any consideration to the need for natural growth (and deliverable) within the ‘washed over villages’ within the green belt, with no consideration paid in detail to areas for release from the green belt in these locations.

As outlined in Section 3 of this document our client challenges the methodology which has been applied in the green belt review in light of a failure to apply a macro level analysis to the green belt parcels.

Furthermore the draft Local Plan fails to make provision for custom build and self-building housing typologies despite a clear need being identified in the National Planning Policy Framework no recognition is made to the contribution this typology makes to meeting established demand. We understand that there is a need locally for such housing and failure to plan for such housing, is not positive.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

- SP1: A Spatial Strategy for St Albans District
- SP3 – Land and the Green Belt
- HOU 1 – Housing Mix
- HOU 2 – Affordable Housing
- SP2 – Responding to the Climate Emergency
- NEB 6 – Biodiversity and Biodiversity Net Gain – Comment
- LG5 – Green Belt – Object

Draft Policy H0U1: Housing Mix – comment
EDIT Land largely support the intent of this policy, yet they consider that the framing of the policy is overly prescriptive and will hinder the ability to deliver an appropriate range of housing typologies to satisfy local demand.
It is considered that the percentages applied in Table 4.1 (Housing Mix by Size and Tenure) should be applied as indicative housing targets only, as this will provide a steer on the likely housing mix which could be supported. It should apply a range for each typology and dwelling size and the wording of the draft policy should make explicit reference to updated local evidence or market demand which will be published in the form of annual monitoring reports and updates to the Strategic Housing Market Assessment.
The wording of the policy should be drafted in a manner which allows for flexibility to encourage rather than unnecessarily hinder delivery of housing within the borough to meet identified need.
The framing of the draft policy is imprecise and requires modification to enable the policy to be deliverable.

## HOU2 - Affordable Housing

### 36 - Mr Duncan Lewis

Submission Number: 36 Submission Date: 29/10/24 09:32

Respondent: Company/Organisation: Emmaus Hertfordshire Name: Mr Duncan Lewis

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

It is good to see that the plan addresses the huge need in the district for greater provision of affordable housing. Without this those looking to live independently and work in important, but modestly paid roles in the 'everyday economy' along with key workers in the social and voluntary sectors are forced out of district. The ability of organisations in those sectors to function effectively is then compromised, to the detriment of the district as a whole.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

NHSPS welcomes acknowledgement in Supporting Text Para 4.8 of the need for affordable housing for key workers.

As part of preparing additional guidance to inform detailed delivery of Policy HOU2, we suggest the Council consider the need for affordable housing for NHS staff and those employed by other health and care providers in the local authority area. The sustainability of the NHS is largely dependent on the recruitment and retention of its workforce. Most NHS staff need to be anchored at a specific workplace or within a specific geography to carry out their role. When staff cannot afford to rent or purchase suitable accommodation within reasonable proximity to their workplace, this has an impact on the ability of the NHS to recruit and retain staff.

Housing affordability and availability can play a significant role in determining people's choices about where they work, and even the career paths they choose to follow. As the population grows in areas of new housing development, additional health services are required, meaning the NHS must grow its workforce to adequately serve population growth. Ensuring that NHS staff have access to suitable housing at an affordable price within reasonable commuting distance of the communities they serve is an important factor in supporting the delivery of high-quality local healthcare services. We recommend that the Council:

- Engage with local NHS partners such as the local Integrated Care Board (ICB), NHS Trusts and other relevant Integrated Care System (ICS) partners.
- Ensure that the local need for affordable housing for NHS staff is factored into housing needs assessments, and any other relevant evidence base studies that inform the local plan (for example employment or other economic policies).
- Consider site selection and site allocation policies in relation to any identified need for affordable housing for NHS staff, particularly where sites are near large healthcare employers.

NHSPS considers Policy HOU2 sound as currently drafted.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). We need affordable housing for the long term

We support the significant volumes of affordable housing (40% of large developments). We would suggest that legal devices are employed to ensure that the affordability of such housing is protected when those homes are resold.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

The commitment to affordable housing in the Plan is also to be supported and commended. We would see this proportion as a bare minimum and the ideal for affordable housing would ideally be greater than this and sustained. This would help to address the current imbalance and inequality of access to good and affordable housing for significant sectors of our working demographic including, but not limited to, key workers, young working adults, single parents and

asylum seekers and refugees. We note that 80% of market rent in the local area is hardly affordable for many people in these lower paid roles and anything that can be done to address this would have our full support and encouragement. We believe that the current shortage and housing crisis will be best addressed in partnership, especially with housing association schemes.

## 180 - Mr Brian Parker

Submission Number: 180 Submission Date: 30/10/24 09:00

Respondent: Company/Organisation: MRP Planning Name: Mr Brian Parker

Comment Number: 3

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

### 1 Summary

1.1 The Draft Local Plan 2041 (the DLP) is St Albans Council's latest attempt to replace the 1994 Local Plan Review, Adopted 30 years ago next month. The five previous attempts all ended in failure:

- Local Development Framework 2006-2021 (consulted upon in 2009);
- The Core Spatial Strategy 2011-2028 (consulted upon in 2010);
- The Strategic Local Plan 2011-31 – Version 1 (consulted upon in 2012);
- The Strategic Local Plan 2011-31 – Version 2 (consulted upon in 2014); and, finally,
- The Local Plan 2020-36 (consulted upon in 2018) ... and Withdrawn in November 2020.

1.2 The one genuine spark of optimism associated with this latest attempt is that it may be the last time the Council is allowed to write one on its own. That is because in her Written Ministerial Statement, 30th July 2024, the Deputy Prime Minister wrote:

*"I will not hesitate to use my powers of intervention should it be necessary to drive progress – including taking over an authority's plan making directly."*

... here's hoping.

1.3 In the meantime, and as set out in the following pages, the Council, via this latest DLP, once again fails the thousands of local people who want and need more affordable housing (and for it to be more affordable). That is because, whilst Local Plans provide an opportunity for Councils to

"*provide a positive vision for the future of each area; a framework for addressing housing needs and other economic, social and environmental priorities; and a platform for local people to shape their surroundings"*(NPPF [15]) ...

if the Council's vision for the future is realised then at least 60% of all new houses will be affordable to only the top few percent of the population (think lawyers and fund managers rather than teachers and nurses). For the rest, the advice on the Council's 'Finding a Home' webpage is nothing if not direct:

*"To solve your housing difficulties please consider ... moving to a more affordable location."*

## 2 Soundness

2.1 Paragraph 35 of the NPPF sets out the criteria by which a Draft Local Plan is tested for 'soundness':

*"Plans are 'sound' if they are:*

1. *Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*
2. *Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*
3. *Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*
4. *Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant."*

2.2 For the reasons set out in the next four sections, the DLP fails each test.

## 3 Positively prepared

3.1 Whilst the NPPF requires Local Plans to provide a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, the DLP deliberately fails to meet the affordable housing need or mix identified by its housing evidence.

3.2 The NPPF states that housing strategies in a Local Plan should be based on an objective assessment of housing need using the Standard Method (NPPF, [61])1. The DLP is informed by the South-West Hertfordshire Local Housing Needs Assessment (the LHNA) (GL Hearn, 2020). For St Albans, its key figures and the subsequent targets in the DLP are set out below (informed by Draft Policies SP1 and HOU2):

[Footnote 1 - Unless exceptional circumstances justify a different approach, which the Council has not claimed applies here.]

[Please see attachment for Table]

3.3 So, whilst the 2020 LHNA (just like its 2016 predecessor and the Housing Market Assessments by Housing Vision which preceded that), found that the vast majority of the housing need was for different types of affordable housing, the DLP prioritises open market houses.

3.4 In October 2024, the average house price in St Albans was £648,387[2]. To purchase a house of that price, a typical two-income household would require a deposit of c.£65,000[3] and a combined annual income of £133,000[4]. As the average annual two-income household in St Albans is £67,790[5], it is obvious that the vast majority of the houses planned for in the DLP do not meet the area's objectively assessed needs.

[Footnotes 2-5:

[2] The mean of the "average house price in St Albans" on three websites: £653,398 on Zoopla; £630,000 on Plumplot; and £660,763 on Home.co.uk (October 2024)

[3]Based on a typical 10% deposit

[4] Based on a typical 4.5 multiple

[5] ONS House price to workplace-based earnings ratio England and Wales 1997-2023, Table 5b (March 2024)]

3.5 Consequently, the DLP has not been positively prepared.

**4 Justified**

4.1 The NPPF requires Local Plans to promote an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.

4.2 As set out in the previous section, the evidence in the LHNA does not support the housing mix proposed in the DLP.

4.3 Even if the Council thought it would be impossible to require 93% of all houses to be affordable, it must provide evidence to support this view and demonstrate why the affordable housing contribution could not be closer to the identified need than 40%. It has failed to do so.

4.4 Furthermore, even if the Council wishes to argue (as it appears to do) that 40% is the most that could be demanded from landowners and developers, it absolutely knows that is not the case. 45% of the new homes at the Bullens Green Lane scheme (Ref: 5/2020/1992) will be affordable and 100% of the new homes at Addison Park (Ref: 5/2021/3194) will be affordable. In a depressing sign of the Council's aversion to delivering more than 40% affordable housing, it refused both of these schemes and spent tens of thousands of pounds of taxpayers' money fighting them, unsuccessfully, at Appeal.

4.5 Finally, of course, the Council's lack of ambition for affordable housing will likely be undermined by the imminent publication of a new NPPF. Draft Paragraph 155 will require *"at least"*50% of homes on land released from the Green Belt through plan preparation to be affordable housing. However, rather than seize this opportunity to deliver more of the houses its proportionate evidence demonstrates is needed, the Council is desperately trying to preserve its strategy of prioritising open market housing by rushing to Examination. This clearly unsustainable strategy fails to meet the needs of the present generation whilst for future generations it reasserts the Council's advice that they should *"move to a more affordable location"*.

4.6 Consequently, the DLP is not justified.

**5 Effective**

5.1 The NPPF requires Local Plans to be based on *"effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground"*(emphasis added).

5.2 However, in its unseemly haste to avoid meeting the housing needs of its local communities, the Council has brought forward its Local Plan timetable. By doing so, not only did the Council fail to give sufficient time to review the Regulation 18 Consultation comments in full (particularly in respect of the Arup Green Belt Review and the Site Selection process), but it also acknowledged that it hadn't completed its job properly.

5.3 The Officer Report to the Planning Policy & Climate Committee on 23rd September – whose recommendation to proceed to Regulation 19 Consultation was accepted – expressly stated that as a direct result of its changed timetable (3.28 [1]), rather than evidence that cross-boundary strategic matters *"have been dealt with"* by statements of common ground:

*"There will realistically be fewer agreed and signed Statements of Common Ground to assist the Inspectors."*

5.4 The obvious consequence of this admission is that there can be no confidence that the DLP is effective.

## 6 Consistent with national policy

6.1 The NPPF requires Local Plans to enable the delivery of sustainable development in accordance with the policies in the Framework and other statements of national planning policy, where relevant.

6.2 Paragraph 7 of the NPPF states, in part:

*"... the objective of sustainable development can be summarised as meeting the needs of the present without compromising the ability of future generations to meet their own needs".*

6.3 As already demonstrated in Sections 3 and 4 above, by rejecting the evidence of its own Local Housing Needs Assessment (the LHNA) the Council has deliberately chosen not to meet the needs of either the present or future generations. Instead, the DLP prioritises very expensive open market houses over the proportion and mix of affordable houses that are actually required.

6.4 In particular, whilst the Glossary of the St Albans City & District Housing Needs Survey Update, 2006 (DCA) recognised that:

*"A Key Worker is any person who directly provides services that are* ***essential for the balanced and sustainable development*** *of the local community and local economy ..."*(emphasis added)

the LHNA (Sept 2020) did not even attempt to measure the housing needs of those members of society who are essential for the balanced and sustainable development of the local community.

6.5 Inexplicably and inexcusably, the DLP contains no specific policies for essential local workers[6]. Which bit of "essential" do St Albans' Councillors not understand?

[Footnote 6: Public sector employees who provide frontline services in areas including health, education and community safety – such as NHS staff, teachers, police, firefighters and military personnel, social care and childcare workers (NPPF [Glossary])]

6.6 The purpose of the planning system is to achieve sustainable development (NPPF [7]). The DLP clearly fails to achieve that goal. Consequently, it is unsustainable and inconsistent with national policy.

## 7 Conclusions

7.1 The Local Plan process offers an opportunity for Councils to "*provide a positive vision for the future"* of the area they serve and for the people they represent. For the sixth time in 15 years, St Albans Council has spurned that opportunity.

7.2 Planning policy tools already exist to allow Councils in areas where houses prices are high to deliver more of all types of affordable housing and to make home ownership more affordable. National policy is about to change, too, which will require at least half the new housing on large sites, such as the Broad Locations, to be affordable.

7.3 All the evidence tells us that St Albans is one of the most expensive Districts in the country where such tools should be deployed and where the minimum 50% affordable housing requirement should be embraced. And yet, those tools are not being used and the Council is rushing to Examination in an undignified attempt to dodge its responsibility to deliver more affordable homes.

7.4 Whilst the LHNA demonstrates that the clear majority of new homes needed should be affordable, the DLP is demanding only 40%, less than is already being promoted by landowners. Think about that for a moment: landowners and developers are more progressive and in tune with the needs of the community than St Albans City and District Council. A sad indictment of the Council's lack of ambition.

7.5 The Draft Local Plan 2041 is desperately unambitious and demonstrably unsustainable. It fails all four tests of soundness and should not proceed to yet another expensive and unsuccessful Examination. Instead, the Council should acknowledge it is incapable of producing a sound Local Plan and ask the Government to intervene.

**Policy HOU2 – Affordable housing**

The policy includes the following:

The Council will seek to meet the District's affordable housing needs by:

1. a) Requiring residential development proposals (Use Class C3) with a gain of 10 or more homes, or where the site has an area of 0.5 hectares or more, to provide:
1. 40% of homes as on-site affordable housing
1. e) Ensuring that development proposals which do not propose the full amount of required affordable housing must demonstrate the evidence on why this is the case, and to meet the full amount that is viable;
1. f) Only accepting a financial contribution for off-site affordable housing provision in exceptional circumstances where evidence demonstrates that on-site affordable housing provision would not be viable or feasible;

The policy applies to older persons' housing, as confirmed in Policy HOU3 – Specialist Housing, which states that '*The Council will support development proposals for specialist housing to meet the needs of older people and people with disabilities which are in accordance with the following requirements:*

1. *b) Provision of an appropriate proportion of affordable housing within the specialist housing development, in accordance with Policy HOU2 for proposals within Use Class C3 or C2;*

The policy does not elaborate on 'appropriate portion' but the supporting text introduces some flexibility when it says: "…*planning applications will need to take account of practical delivery arrangements, operator requirements and viability*."

Therefore, it is clear from both policies Hou2 and Hou3 that any proposal for specialist housing for older people would either need to deliver policy compliant affordable housing or to provide a viability assessment if policy compliant on-site affordable housing was not achievable.

The policies appear to be based on the BNG Paribas Viability Assessment September 2024 which concludes:

*Our appraisals indicate for retirement living and extra care units that between 25% to 40% affordable housing and all policy requirements can be supported across the 4 value areas with the highest percentages applying in Harpenden and St Albans.*

Firstly, we would comment that although the Appraisal results for all typologies have been published, the full appraisals have not been published so it is difficult to ascertain whether inputs used have been applied correctly. The council should note that Paragraph: 002 Reference ID: 10-002-20190509 of the PPG on Viability states that '*It is the responsibility of plan makers in collaboration with the local community, developers and other stakeholders, to create realistic, deliverable policies. Drafting of plan policies should be iterative and informed by engagement with developers, landowners, and infrastructure and affordable housing providers.'* Without publication

of the full appraisals, it is difficult to make an assessment as to whether the evidence that supports the policy requirements within the regulation 19 draft plan, especially with regard to specialist housing for older people, are correct and robust. These full appraisals must be published and consulted upon, and consideration be given to the responses prior to any plan being submitted to the Secretary of State for examination.

We would then direct the Council towards the Retirement Housing Consortium paper entitled 'A briefing note on viability' prepared for Retirement Housing Group by Three Dragons, May 2013 (updated February 2016 ('RHG Briefing Note'). The RHG Briefing Note establishes how sheltered housing and extra care development differs from mainstream housing and looks at the key variables and assumptions that can affect the viability of specialist housing for older people. These key variables include unit size, unit numbers and GIA, non-saleable communal space, empty property costs, external build cost, sales values, build costs, marketing costs and sales periods and significantly variable benchmark land values. We are also aware that the RHG Briefing Note is being updated and indeed we are informing that process.

The published assumptions on which the BNG Viability Assessment is based are at variance with the RHG briefing note. We therefore have the following comments on the assumptions that should be used within the Viability Assessment with respect to extra care and sheltered housing, as defined by the PPG on housing for older and disabled people Paragraph: 010 Reference ID: 63-010-20190626.

If the Viability Assessment was re-run using these assumptions extra-care and sheltered housing would be likely to be shown as less viable in terms of delivering affordable housing and would result in the council needing to consider a variable affordable housing target for specialist housing for older people or exempting it from affordable housing altogether.

**Recommendation**

We recommend that the Viability Report is run for sheltered and extra-care housing using the assumptions recommended below and the affordable housing policy amended accordingly.

***Unit numbers / GIA / Density***

We note that the Viability Assessment (Appendix 4) has modelled a unit density of 75 dwellings per hectare resulting in a 30-unit scheme being modelled on a 0.4 hectare site for the Retirement Housing typology, and a unit density of 75 dwellings per hectare resulting in a 80-unit scheme being modelled on a 1.1 hectare site for the Extra-Care typology.

However, we would question whether the densities used are correct given that para 4.16 of the viability study states '*As with retirement housing, Extra Care developments have significantly different viability considerations to standard residential dwellings. These arise due to an even lower gross to net ratio of such developments than retirement housing (due to the need for more communal facilities) as well as the additional time that it takes to sell the accommodation due to the restricted market for that type of unit. In our experience such units also achieve premium values*.'

In this regard, we would also question whether the Viability Assessment has in its consideration of density and facilities in effect incorporated flatted extra-care accommodation with integrated retirement communities given para 4.15 that states *'People who live in Extra Care Housing have their own self-contained homes and a legal right to occupy the property. It comes in many built forms, including blocks of flats, bungalow estates and retirement villages*.' Such developments are very different and need to be considered separately.

***Sales and marketing costs***

As detailed within the RHG Briefing Note sales and marketing costs for older persons housing schemes are typically 6% of GDV and this should be used within the older persons modelling rather than the 2.75% used.'

***Sales periods***

As discussed in the RHG Briefing Note, sales periods of older persons' housing schemes are typically longer for retirement and extra care housing than general needs housing. There is a typical 18 month build period before sales can commence. Sheltered and Extra care schemes cannot be phased but must be fully operational and completed from month 1 of sales / occupation. As detailed within the RHG Briefing Note, once sales commence a rough guide is that 40% of units will be sold at the end of the first year of sales, 30% during the second year of sales and 30% during the third period. This should be considered within the viability modelling and amended accordingly. These longer sales periods should therefore be incorporated into the Viability Assessment, especially for sheltered housing, rather than the 2 sales per month indicated which would for example show that the 30 unit scheme modelled would sell out in just 15 months. A 40 month sales period for an extra care scheme is more appropriate and even ambitious in the current climate where average sales rates have fallen below 1 sale on average per month for the older person housing sector.

***Empty property costs***

It is recommended that a standard allowance of £5,000 per unit is assumed as a typical average empty property cost – to cover Council Tax liability on unsold units and service charges (which will be applicable to the whole building from day first resident moves in). This increases to £10,000 for extra care accommodation to reflect higher costs particularly in maintaining care, communal and catering facilities, staff, and services and reflecting a slower sales rate than Retirement Living. We note that no allowance for empty property costs appears to have been made in the report.

***Developer Return***

PPG sets out that 'For the purpose of plan making an assumption of 15-20% of gross development value (GDV) may be considered a suitable return to developers. However, for specialist housing for older people there is a clear precedent for a return of not less than 20% of gross development value primarily because of the risks associated with such developments. This is consistent with the Inspector's conclusions for appeals such as McCarthy Stone proposal at Redditch (Appeal Ref: 3166677), Churchill Retirement Living proposal at Cheam (Appeal Ref: 3159137) and the Churchill Retirement Living scheme at West Bridgford (Appeal Ref: 3229412) in 2019. The most recent example is a McCarthy Stone appeal in Sale in 2023 for a smaller proposal of 25 units (Appeal Ref 3325034) where the inspector concluded that:

*As the Council has failed to account for the particular risks associated with developing a retirement living scheme, I consider that its base line of 17.5% is unsound and the uplift of 1% to reflect 2023 market conditions is no antidote. I therefore agree with the Appellant that a profit of 20% of gross development value should apply (Paragraph 83)*

20% profit should therefore be assumed for specialist housing for older people rather than the 17.5% base position used within the Report.

***Sales Values***

We note from Table 4.14.1 that the Viability Assessment has added a 10% premium over mainstream housing to average sales values that have been used for a number of geographic areas across the district for retirement housing. A 20% premium has been added for extra care housing, thus making an assumption that specialist housing for older people has a large premium over other housing. However, the council should note that the RHG briefing note has shown that the price of a 1 bed retirement living/sheltered property is approximately 75% of the price of an existing 3 bed semi-detached house and a 2-bed retirement living/sheltered property is

approximately 100% of the price of an existing 3 bed semi-detached. An extra care property is then approximately 25% more expensive than a retirement living/sheltered property. It is therefore advocated that the premium added to the average sales values in the Viability Appraisal has over inflated sales values for specialist housing for older people and the methodology for calculating sales values for older persons housing should be reconsidered. Pricing for affordability matters in respect of housing for older people given that to acquire such housing, no availability to mortgage lending will be available due to the age of purchasers. Instead, purchasers are entirely reliant upon the release of equity from existing housing. As a result, there is strong linkages between pricing of retirement housing and existing semi detached housing in an area (where purchasers will typically downsize from). Simply adding unchecked premiums to non-retirement comparable property is not appropriate.

**Unit mix**

Table 4.1.5 below shows the unit size that it assumes for older persons' housing

However, a typical retirement living scheme provides 1 and 2 bedroomed apartments using a mix of 60% 1 bed and 40 % 2 bed units on a development. This is the case for both sheltered (retirement) and extra care (retirement living plus) schemes. Table 4.1.5 of the viability report shows a 50:50 split between one and two bedroomed apartments and should be amended accordingly.

Recommended Older Persons' Unit Mix

| **Typology** | **1 Bed Flat** | **2 Bed flat** |
|---|---|---|
| Retirement Living | 60% | 40% |
| Extra care | 60% | 40% |

**Unit Size**

Table 4.1.5 above also shows the unit size that it assumes for older persons' housing.

The unit sizes should be amended to the sizes below which have evolved in recent years with the National Space Standards and M4 (2) requirements, and allow for additional storage and circulation space to facilitate downsizing, particularly in relation to retirement living:

Recommended Older Persons' Unit Size

| **Typology** | **1 Bed Flat** | **2 Bed flat** |
|---|---|---|
| Retirement Living | 55 sqm | 75 sqm |
| Extra care | 60 sqm | 80 sqm |

***Accessibility Standards M4 (3)***

Despite the draft plan requiring 5% of older persons housing to be built for M4(3) places additional cost on retirement housing over general market housing as the fixtures and fittings, services and controls and increased room dimensions and layout include up to 30% more floorspace with corresponding reduction in density, sales values, and affordability of such housing. While some value may be secured for larger units this is unlikely to mitigate the overall loss of units across the proposal as a result of the requirement.

**Biodiversity Net Gain**

Paragraph 4.25 of the Viability Assessment states that it has tested the requirement for a 10% enhancement to biodiversity in perpetuity in greenfield sites based on the 2019 DEFRA report *'Biodiversity net gain and local nature recovery strategies impact assessment',* and given a lower

build cost figure for brownfield sites*'as they typically have lower starting levels of biodiversity than greenfield sites'.* However, the Council should note that on 27th July 2023 the price of statutory biodiversity credits were published (available from . Statutory biodiversity credit prices - GOV.UK (www.gov.uk)). This has enabled it to be determined how much BNG may cost, and it is considered that the costs per dwelling put forward within the Viability Assessment have greatly underestimated the costs. In addition, brownfield site BNG costs are often more substantial than greenfield, but this very much depends on the site characteristics. For example, if an older persons' housing scheme consisting of 50 units on a 0.5 hectare site needed to purchase 1 off-site statutory credit, if this was for the cheapest low quality habitat type this would cost £42,000 or £840 per unit. Therefore, as a result of credit prices having been published, the Council should re-run the Viability Assessment that includes a realistic assessment of BNG costs and if necessary, reduce the BNG and affordable housing requirements accordingly.

**Point h of policy HOU 2**

We are also disappointed that our earlier comments in respect to the above policy have not been addressed and therefore we reiterate our comments from the Reg 18 consultation:

Point h of policy HOU 2 seeks an affordable housing review mechanism into planning permissions that may be delivering affordable housing below policy requirements. To burden development which has already been found to be not viable with a review mechanism is wholly inappropriate and inflexible.

Housing for older people, being specialist in nature as defined by Paragraph: 010 Reference ID: 63-010-20190626 of the PPG on Housing for Older and Disabled people, is often delivered on small brownfield sites separate to housing allocations or other development sites of around 0.5 hectares. Schemes tend to be high-density flatted developments located near town centres that have around 35 to 40 units. They tend to be delivered as a single phase. Sheltered housing and extra care development differ from mainstream housing and there are a number of key variables that affect viability. These include unit size, unit numbers and GIA, non-saleable communal space, empty property costs, external build cost, sales values, build costs, marketing costs and sales periods.

Once planning permission for specialist housing for older people is granted given the small size and single phase of schemes the objective is to commence the build and complete all units within one single phase. The build period usually takes around 18 months. Older person's housing, given its specialist nature and being built in one phase, then has a much longer sales period often up to 36 Months with 50% of the scheme often not being sold until year 2 of sales, despite being completed some years earlier. Given the completion of the whole scheme on the first flat occupation, empty property costs are then charged on properties that have not yet sold, this includes costs such as council tax and service charges.

For a large or multi-phase development which will be delivered over a long period it makes sense to check whether the scheme's viability has changed with market movements. However, for a small single phased site the Inspectorate have repeatedly noted that review mechanisms are unnecessary. For example, under Appeal decision reference APP/C4235/W/120/3256972 dated 1st April 2021, the Inspector noted in paragraph 17 that '*as the development would almost certainly be completed in a single phase with an estimated build time of 12-18 months, it is not the sort of large multi-phased scheme where stronger arguments for a review/clawback mechanism may otherwise exist'*.

**Recommendation:**

The following text should be added to point g to incorporate flexibility for smaller single phased schemes so such development is not subject to a review mechanism:

***'The review mechanism does not apply to smaller single phased schemes of less than 100 units'.***

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

**207 - Bellway Homes (North London) Limited**

Submission Number: 207 Submission Date: 07/11/24 17:11

Respondent: Company/Organisation: Bellway Homes (North London) Limited (C/O Savills) Name: Miss Dorothy Tsang

On Behalf Of Company/Organisation: Bellway Homes (North London) Limited Name:

Comment Number: 6

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

2.239 Bellway Homes Ltd largely support this policy, yet offer some additional wording to add clarity. This is to meet NPPF Paragraph 16 (d), being that policies are clearly written and unambiguous.

2.240 The Draft Policy requires that residential development deliver a minimum of 40% affordable housing on site with a tenure mix of 30% social rented, 30% affordable rented and 40% home ownership, which includes 25% of all affordable housing as First Homes. The policy needs to clarify which element of the affordable housing tenure First Homes will be taken from to align with provisions set forth in the NPPF. This modification will provide greater clarity for applicants.

2.241 Importantly, the draft policy should clarify how affordable housing provision will be measured, be it in unit, or habitable room basis.

2.242 We note that Part G, of Policy HOU2 requires a late stage review to be imposed on developments which do not provide a policy compliant affordable housing offering.

*"Ensuring that any planning obligations for affordable housing provision or contributions that are agreed as an exception to full policy compliance (on the basis of viability at the time the permission is granted) must include a financial review mechanism that is based on actual sales values at the time that the development, or development phase, is 80% occupied.*

*The review must allow for further provision, or financial contributions in lieu, when the outturn value of the development exceeds the initial viability assumptions or other circumstances enable increased viability of the scheme";*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

2.243 We have concerns about the framing of the late stage review mechanism which as currently drafted is imprecise and does not provide sufficient comfort. It is considered that the following modifications should be made to the wording as drafted:

- Should refer to a review taking place at 80% of homes sold (or at an appropriate point agreed with the LPA).
- Needs to refer to the values achieved and costs incurred, and any additional contributions arising from the development.
- The outcome should result in a financial contribution and not onsite affordable housing. This should be made clear.
- Any surplus profit should be split between developer and the borough (50:50).

2.244 Further to the above, the wording of the policy does not refer to the recent issue of buying credits to achieve biodiversity net gain where onsite provision is not sufficient and off-site mitigation is not deliverable. It is noted that the requirement to purchase biodiversity credits is routinely impacting on scheme viability which in turn effects the deliverability of affordable housing. It is requested that appropriate provisions are considered in the framing of any late stage review mechanisms.

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy HOU2 explicitly requires 40% affordable housing provision on sites of 10 or more dwellings. In line with the tenure mix set out within Policy HOU1, Policy HOU2 also explicitly requires a mix of 30% social rented, 30% affordable rented and 40% affordable home ownership. On the basis of the concerns raised in respect of HOU1, we would suggest that there is additional flexibility applied to this mix in circumstances where local housing need evidence, site specific constraints or viability may render a different proportion of affordable housing or tenure mix to be appropriate.

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

6.5 Policy HOU2 addresses affordable housing provision and requires 40% of new housing on major development sites to comprise affordable housing.

6.6 We support this policy in general, and note that our previous suggestion of removing the reference to the number of clustering of units has been actioned.

6.7 The updates have provided a new criterion at b) which encourages 3-bedroom affordable homes to address the Council's Housing Register. There is no objection to this addition as it is noted that any mix would still need to be in broad compliance with **Policy HOU1**, noting the comments above on this.

6.8 Criterion H still requires Shared Ownership and Discount Market Sales affordable housing to not exceed a final purchase price of the midpoint range recommended in the Local Housing Needs Assessment. This is still based upon a specific point in time (updated from 2020 to 2022), therefore it would be

unreasonable to continue to apply this figure across the Plan Period. As drafted, this element of the policy is not justified, and it should be acknowledged that this should be based upon up-to-date information for specific areas. It may be more appropriate amend this to require discount market sales homes to be provided at a rate at least 20% below market value so this can reflect any changes to the market at that time.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). **271 - Mr Ronan Leydon**

Submission Number: 271 Submission Date: 08/11/24 09:32

Respondent: Company/Organisation: Dacorum Borough Council Name: Mr Ronan Leydon

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Dacorum Borough Council supports Policy HOU2 (affordable housing) and considers that the policy is sound.

Dacorum and St Albans Councils have engaged effectively through the Duty to Co-operate in meeting housing needs in South West Hertfordshire. An effective outcome of this engagement relates to affordable housing in the Hemel Garden Communities Broad Locations within St Albans District i.e. Broad Locations H1 Hemel Hempstead North, H2 East Hemel Hempstead (North) and H4 East Hemel Hempstead (South).

Outside of policy development, the two councils have agreed in principle that a significant proportion of nomination rights in these Broad Locations will be offered in the first instance to households on Dacorum's Housing Register.

In order to demonstrate effective outcomes of Duty to Cooperate discussions on affordable housing provision, Dacorum would like to see this reflected in the supporting text to Policy HOU2. Dacorum considers this to be a minor modification that can be made on submission.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

As explained above, although not a matter of legal compliance or soundness, Dacorum would like to see text added to the supporting text to Policy HOU2 regarding affordable housing.

This text should reference the in-principle agreement for a significant proportion of nomination rights on affordable housing in the Hemel Garden Communities Broad Locations being offered in the first instance to households on Dacorum's Housing Register.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**273 - Hallam Land Management and St Albans School**

Submission Number: 273 Submission Date: 08/11/24 09:33

Respondent: Company/Organisation: LRM Planning Name: Mr Owen Jones

On Behalf Of Company/Organisation: Hallam Land Management and St Albans School Name:

Comment Number: 14

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

7.6 The provision of affordable housing is plainly important in the District given the low levels that have been provided historically and the evidence of local housing need in the Strategic Housing Market Assessment. Hallam and St Albans School are therefore supportive of this policy in overall terms.

7.7 To some degree it is over prescriptive. Criterion (b) notes that Council will seek to meet the District's affordable housing needs by "encouraging three bedroom affordable homes to address the priority needs of the Council's Housing Register and the needs of those in temporary accommodation". This has evidently been informed by the current needs of the Council's Housing Register, but may become outdated in the context of the plan period. It seems logical that the policy is amended to more broadly refer to the need to take into consideration the Council's Housing Register.

**Policy HOU2**

14.9 Policy HOU2 relates to affordable housing requirements and similarly to policy HOU1, we consider it to be ineffective due to the lack of a specific affordable housing requirement to development proposals below 10 dwellings.

14.10 There are 31 sites allocated for residential development in the Draft Local Plan for less than 10 dwellings. This means that the Council is purposedly not requiring affordable housing contributions to these 31 future development proposals, which could easily deliver affordable housing proportionately to remain viable. Other development plans in the country require specific affordable housing contributions to smaller sites, in a proportionate manner and with reduced requirements from the general 40% on-site affordable housing provision. However, SACDC has not explored this option.

14.11 St Albans District has the highest affordable housing need in South West Hertfordshire (see table below) but the SACDC has decided not to require affordable housing contributions from developments under 10 dwellings. This is not just unfortunate as there are 31 allocated sites that could potentially contribute towards affordable housing, (together with windfall sites), but also

because these smaller sites are usually infill sites. These are usually located in more sustainable and accessible locations that contribute towards the affordability of residents by having access to services, facilities, employment and public transport nearby, rather than being located on the edge of settlements where there is a higher dependency on car use.

14.12 It is also worth to mention that the affordable housing policy HOU2 does not set out a minimum amount of affordable housing to be provided during the plan period. There is no target informed by affordable housing need, and therefore it is not clear how the Council has arrived at the conclusion that policy HOU2 will be adequate to deliver the necessary affordable housing to meet the need. In this case of lack of evidence and transparency, we are of the view that **policy HOU2 is not based on sufficient evidence and lacks justification as currently worded. Furthermore, this policy is inefficient in delivering the affordable housing to meet the need. For the above reasons we consider policy HOU2 to be unsound.**

*Figure 14.2: Table 7.53 of the South West Herts Local Housing Needs Assessment Update Report (March 2024).*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Policy HOU2 relates to affordable housing requirements and similarly to policy HOU1, we consider it to be ineffective due to the lack of a specific affordable housing requirement to development proposals below 10 dwellings.

It is also worth to mention that the affordable housing policy HOU2 does not set out a minimum amount of affordable housing to be provided during the plan period. There is no target informed by affordable housing need, and therefore it is not clear how the Council has arrived at the conclusion that policy HOU2 will be adequate to deliver the necessary affordable housing to meet the need. In this case of lack of evidence and transparency, we are of the view that **policy HOU2 is not based on sufficient evidence and lacks justification as currently worded. Furthermore, this policy is inefficient in delivering the affordable housing to meet the need. For the above reasons we consider policy HOU2 to be unsound.**

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Inadequate treatment of affordable housing including social housing**

The promotion of “social housing” as a key priority in the St Albans City and District Council Plan 2024-2029 is inappropriately addressed by the Draft Local Plan, in a local planning authority with the highest land values in the country. According to L and C Mortgages research, St Albans is ranked second to the City of Westminster in terms of average house price and the Draft Local Plan fails entirely to address how “social housing” can be provided in such a context.

The suggestion that full satisfaction of Local Housing Need (LHN) will provide affordable housing at any level in St Albans is flawed. The Draft Local Plan allocates designated protected land (Green Belt) for private market housing which does not provide “social housing” and never can.

The justification for housing numbers in the Draft Local Plan is based on providing affordable housing which is unachievable in present conditions.

Recent analysis of average house prices and average household incomes in the County indicates the present inability of market housing to address in any meaningful way the demand for housing by average earning households in both St Albans and indeed Hertfordshire as a whole.

Given that the definition of affordable housing has become effectively irrelevant with regard to house purchase or rent by an average earning household in Hertfordshire, it is inappropriate to promote affordable housing as providing justification for use of the Green Belt for this purpose.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). Policy HOU2 sets out the Council's policies on affordable housing.

It is acknowledged that the District's house prices are amongst the highest in the country (Paragraph 4.8). However, the requirement in criterion c) for Use Class C2 schemes to deliver affordable housing is unjustified.

In requiring all retirement living schemes to provide affordable housing, the draft policy takes a 'broad brush' approach to the sector and does not recognise the difference between different retirement living products, some of which are affordable products in their own right such as sheltered housing. For large purpose built retirement villages, which are by their nature a managed, centralised product, the practicalities of offering an affordable product are extremely difficult.

The proposed requirement to provide affordable housing for Use Class C2 developments will reduce viability to the extent that a scheme and its benefits for the local area including meeting the identified need will not be delivered.

In summary, the evidence base does not appear to have fully assessed the viability of the affordable requirement for Class C2 uses, and as so current worded this policy would undermine the Plan's ability to deliver the outcomes of draft Policy HOU3 (i.e. meeting the identified need for specialist housing for older people).

**302 - McCarthy Stone and Churchill Living**

Submission Number: 302 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Jane Vlach

On Behalf Of Company/Organisation: McCarthy Stone and Churchill Living Name:

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The policy includes the following:

The Council will seek to meet the District's affordable housing needs by:

1. a) Requiring residential development proposals (Use Class C3) with a gain of 10 or more homes, or where the site has an area of 0.5 hectares or more, to provide:
2. 40% of homes as on-site affordable housing
3. Ensuring that development proposals which do not propose the full amount of required affordable housing must demonstrate the evidence on why this is the case, and to meet the full amount that is viable;
4. Only accepting a financial contribution for off-site affordable housing provision in exceptional circumstances where evidence demonstrates that on-site affordable housing provision would not be viable or feasible;

The policy applies to older persons' housing, as confirmed in Policy HOU3 – Specialist Housing, which states that '*The Council will support development proposals for specialist housing to meet the needs of older people and people with disabilities which are in accordance with the following requirements:*

1. *b) Provision of an appropriate proportion of affordable housing within the specialist housing development, in accordance with Policy HOU2 for proposals within Use Class C3 or C2;*

The policy does not elaborate on 'appropriate portion' but the supporting text introduces some flexibility when it says: "... *planning applications will need to take account of practical delivery arrangements, operator requirements and viability*."

Therefore, it is clear from both policies Hou2 and Hou3 that any proposal for specialist housing for older people would either need to deliver policy compliant affordable housing or to provide a viability assessment if policy compliant on-site affordable housing was not achievable.

The policies appear to be based on the BNG Paribas Viability Assessment September 2024 which concludes:

*Our appraisals indicate for retirement living and extra care units that between 25% to 40% affordable housing and all policy requirements can be supported across the 4 value areas with the highest percentages applying in Harpenden and St Albans.*

Firstly, we would comment that although the Appraisal results for all typologies have been published, the full appraisals have not been published so it is difficult to ascertain whether inputs used have been applied correctly. The council should note that Paragraph: 002 Reference ID: 10-002-20190509 of the PPG on Viability states that '*It is the responsibility of plan makers in collaboration with the local community, developers and other stakeholders, to create realistic, deliverable policies. Drafting of plan policies should be iterative and informed by engagement with developers, landowners, and infrastructure and affordable housing providers.*' Without publication of the full appraisals, it is difficult to make an assessment as to whether the evidence that supports the policy requirements within the regulation 19 draft plan, especially with regard to specialist housing for older people, are correct and robust. These full appraisals must be published and consulted upon, and consideration be given to the responses prior to any plan being submitted to the Secretary of State for examination.

We would then direct the Council towards the Retirement Housing Consortium paper entitled 'A briefing note on viability' prepared for Retirement Housing Group by Three Dragons, May 2013 (updated February 2016 ('RHG Briefing Note'). The RHG Briefing Note establishes how sheltered housing and extra care development differs from mainstream housing and looks at the key variables and assumptions that can affect the viability of specialist housing for older people. These key variables include unit size, unit numbers and GIA, non-saleable communal space, empty property costs, external build cost, sales values, build costs, marketing costs and sales periods and significantly variable benchmark land values. We are also aware that the RHG Briefing Note is being updated and indeed we are informing that process.

The published assumptions on which the BNG Viability Assessment is based are at variance with the RHG briefing note. We therefore have the following comments on the assumptions that should be used within the Viability Assessment with respect to extra care and sheltered housing, as defined by the PPG on housing for older and disabled people Paragraph: 010 Reference ID: 63-010-20190626.

If the Viability Assessment was re-run using these assumptions extra-care and sheltered housing would be likely to be shown as less viable in terms of delivering affordable housing and would result in the council needing to consider a variable affordable housing target for specialist housing for older people or exempting it from affordable housing altogether.

**Point h of policy HOU 2**

We are also disappointed that our earlier comments in respect to the above policy have not

been addressed and therefore we reiterate our comments from the Reg 18 consultation:

Point h of policy HOU 2 seeks an affordable housing review mechanism into planning permissions that may be delivering affordable housing below policy requirements. To burden

development which has already been found to be not viable with a review mechanism is wholly inappropriate and inflexible.

Housing for older people, being specialist in nature as defined by Paragraph: 010 Reference ID: 63-010-20190626 of the PPG on Housing for Older and Disabled people, is often delivered on small brownfield sites separate to housing allocations or other development sites of around 0.5 hectares. Schemes tend to be high-density flatted developments located near town centres that have around 35 to 40 units. They tend to be delivered as a single phase. Sheltered housing and extra care development differ from mainstream housing and there are a number of key variables that affect viability. These include unit size, unit numbers and GIA, non-saleable communal space, empty property costs, external build cost, sales values, build costs, marketing costs and sales periods.

Once planning permission for specialist housing for older people is granted given the small size and single phase of schemes the objective is to commence the build and complete all units within one single phase. The build period usually takes around 18 months. Older person's housing, given its specialist nature and being built in one phase, then has a much longer sales period often up to 36 Months with 50% of the scheme often not being sold until year 2 of sales, despite being completed some years earlier. Given the completion of the whole scheme on the first flat occupation, empty property costs are then charged on properties that have not yet sold, this includes costs such as council tax and service charges.

For a large or multi-phase development which will be delivered over a long period it makes sense to check whether the scheme's viability has changed with market movements. However, for a small single phased site the Inspectorate have repeatedly noted that review

mechanisms are unnecessary. For example, under Appeal decision reference APP/C4235/W/120/3256972 dated 1st April 2021, the Inspector noted in paragraph 17 that '*as the development would almost certainly be completed in a single phase with an estimated build time of 12-18 months, it is not the sort of large multi-phased scheme where stronger arguments for a review/clawback mechanism may otherwise exist'*.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**We recommend that the Viability Report** is run for sheltered and extra-care housing using the assumptions recommended below and the affordable housing policy amended accordingly.

***Unit numbers / GIA / Density***

We note that the Viability Assessment (Appendix 4) has modelled a unit density of 75 dwellings per hectare resulting in a 30-unit scheme being modelled on a 0.4 hectare site for the Retirement Housing typology, and a unit density of 75 dwellings per hectare resulting in a 80-unit scheme being modelled on a 1.1 hectare site for the Extra-Care typology.

However, we would question whether the densities used are correct given that para 4.16 of the viability study states '*As with retirement housing, Extra Care developments have significantly different viability considerations to standard residential dwellings. These arise due to an even lower gross to net ratio of such developments than retirement housing (due to the need for more communal facilities) as well as the additional time that it takes to sell the accommodation due to the restricted market for that type of unit. In our experience such units also achieve premium values*.'

In this regard, we would also question whether the Viability Assessment has in its consideration of density and facilities in effect incorporated flatted extra-care accommodation with integrated retirement communities given para 4.15 that states *'People who live in Extra Care Housing have their own self-contained homes and a legal right to occupy the property. It comes in many built forms, including blocks of flats, bungalow estates and retirement villages*.' Such developments are very different and need to be considered separately.

***Sales and marketing costs***

As detailed within the RHG Briefing Note sales and marketing costs for older persons housing schemes are typically 6% of GDV and this should be used within the older persons modelling rather than the 2.75% used.'

***Sales periods***

As discussed in the RHG Briefing Note, sales periods of older persons' housing schemes are typically longer for retirement and extra care housing than general needs housing. There is a typical 18 month build period before sales can commence. Sheltered and Extra care schemes cannot be phased but must be fully operational and completed from month 1 of sales / occupation. As detailed within the RHG Briefing Note, once sales commence a rough guide is that 40% of units will be sold at the end of the first year of sales, 30% during the second year of sales and 30% during the third period. This should be considered within the viability modelling and amended

accordingly. These longer sales periods should therefore be incorporated into the Viability Assessment, especially for sheltered housing, rather than the 2 sales per month indicated which would for example show that the 30 unit scheme modelled would sell

out in just 15 months. A 40 month sales period for an extra care scheme is more appropriate and even ambitious in the current climate where average sales rates have fallen below 1 sale on average per month for the older person housing sector.

***Empty property costs***

It is recommended that a standard allowance of £5,000 per unit is assumed as a typical average empty property cost – to cover Council Tax liability on unsold units and service charges (which will be applicable to the whole building from day first resident moves in). This increases to £10,000 for extra care accommodation to reflect higher costs particularly in maintaining care, communal and catering facilities, staff, and services and reflecting a slower sales rate than Retirement Living. We note that no allowance for empty property costs appears to have been made in the report.

***Developer Return***

PPG sets out that 'For the purpose of plan making an assumption of 15-20% of gross development value (GDV) may be considered a suitable return to developers. However, for specialist housing for older people there is a clear precedent for a return of not less than 20% of gross development value primarily because of the risks associated with such developments. This is consistent with the Inspector's conclusions for appeals such as McCarthy Stone proposal at Redditch (Appeal Ref: 3166677), Churchill Retirement Living proposal at Cheam (Appeal Ref: 3159137) and the Churchill Retirement Living scheme at West Bridgford (Appeal Ref: 3229412) in 2019. The most recent example is a McCarthy Stone appeal in Sale in 2023 for a smaller proposal of 25 units (Appeal Ref 3325034) where the inspector concluded that:

*As the Council has failed to account for the particular risks associated with developing a retirement living scheme, I consider that its base line of 17.5% is unsound and the uplift of 1% to reflect 2023 market conditions is no antidote. I therefore agree with the Appellant that a profit of 20% of gross development value should apply (Paragraph 83)*

20% profit should therefore be assumed for specialist housing for older people rather than the 17.5% base position used within the Report.

***Sales Values***

We note from Table 4.14.1 that the Viability Assessment has added a 10% premium over mainstream housing to average sales values that have been used for a number of geographic areas across the district for retirement housing. A 20% premium has been added for extra care housing, thus making an assumption that specialist housing for older people has a large premium over other housing. However, the council should note that the RHG briefing note has shown that the price of a 1 bed retirement living/sheltered property is approximately 75% of the price of an existing 3 bed semi-detached house and a 2-bed retirement living/sheltered property is approximately 100% of the price of an existing 3 bed semi-detached. An extra care property is then approximately 25% more expensive than a retirement living/sheltered property. It is therefore advocated that the premium added to the average sales values in the Viability Appraisal has over inflated sales values for

specialist housing for older people and the methodology for calculating sales values for older persons housing should be reconsidered. Pricing for affordability matters in respect of housing for older people given that to acquire such housing, no availability to mortgage lending will be available due to the age of purchasers. Instead, purchasers are entirely reliant upon the release of equity from existing housing. As a result, there is strong linkages between pricing of retirement housing and existing semi detached housing in an area (where purchasers will typically downsize from). Simply adding unchecked premiums to non-retirement comparable property is not appropriate.

**Unit mix**

Table 4.1.5 [of the Viability Assessment] shows the unit size that it assumes for older persons' housing.

However, a typical retirement living scheme provides 1 and 2 bedroomed apartments using a mix of 60% 1 bed and 40 % 2 bed units on a development. This is the case for both sheltered (retirement) and extra care (retirement living plus) schemes. Table 4.1.5 of the viability report shows a 50:50 split between one and two bedroomed apartments and should be amended accordingly.

Recommended Older Persons' Unit Mix:

Retirement living or Extra care: 1-bed flat - 60% / 2-bed flat - 40%

**Unit Size**

Table 4.1.5 above also shows the unit size that it assumes for older persons' housing. The unit sizes should be amended to the sizes below which have evolved in recent years with the National Space Standards and M4 (2) requirements, and allow for additional storage and circulation space to facilitate downsizing, particularly in relation to retirement living:

Recommended Older Persons' Unit Size

| **Typology** | **1 Bed Flat** | **2 Bed flat** |
|---|---|---|
| Retirement Living | 55 sqm | 75 sqm |
| Extra care | 60 sqm | 80 sqm |

***Accessibility Standards M4 (3)***

Despite the draft plan requiring 5% of older persons housing to be built for M4(3) places additional cost on retirement housing over general market housing as the fixtures and fittings, services and controls and increased room dimensions and layout include up to 30% more floorspace with corresponding reduction in density, sales values, and affordability of such housing. While some value may be secured for larger units this is unlikely to mitigate the overall loss of units across the proposal as a result of the requirement.

**Biodiversity Net Gain**

Paragraph 4.25 of the Viability Assessment states that it has tested the requirement for a 10% enhancement to biodiversity in perpetuity in greenfield sites based on the 2019 DEFRA report *'Biodiversity net gain and local nature recovery strategies impact assessment',* and given a lower build cost figure for brownfield sites *'as they typically have lower starting levels of biodiversity than greenfield sites'.* However, the Council should note that on 27th July 2023 the price of statutory biodiversity credits were published (available from . Statutory biodiversity credit prices - GOV.UK (www.gov.uk)).This has enabled it to be determined how much BNG may cost, and it is considered that the costs per dwelling put forward within the Viability Assessment have greatly underestimated the costs. In addition, brownfield site BNG costs are often more substantial than greenfield, but this very much depends on the site characteristics. For example, if an older persons' housing scheme consisting of 50 units on a 0.5 hectare site needed to purchase 1 off-site statutory credit, if this was for the cheapest low quality habitat type this would cost £42,000 or £840 per unit. Therefore, as a result of credit prices having been published, the Council should re-run the Viability Assessment that includes a realistic assessment of BNG costs and if necessary, reduce the BNG and affordable housing requirements accordingly.

**Recommendation (point h of Policy HOU2):**

The following text should be added to point g to incorporate flexibility for smaller single

phased schemes so such development is not subject to a review mechanism:

***'The review mechanism does not apply to smaller single phased schemes of less than 100 units'.***

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at "Land to the south of Burydell Lane, Park Street" have been discounted incorrectly.

**Representations**

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

SP1: A Spatial Strategy for St Albans District

SP3 — Land and the Green Belt

HOU 1- Housing Mix

HOU 2 — Affordable Housing

SP2 — Responding to the Climate Emergency

NEB 6 - Biodiversity and Biodiversity Net Gain — Comment

LG5 — Green Belt — Object

***Draft Policy HOU2: Affordable Housing - comment***

EDIT Land largely support this policy, yet offer some additional wording to add clarity. This is to meet NPPF Paragraph 16 (d), being that policies are clearly written and unambiguous.

The Draft Policy requires that residential development deliver a minimum of 40% affordable housing on site with a tenure mix of 30% social rented, 30% affordable rented and 40% home ownership, which includes 25% of all affordable housing as First Homes. The policy needs to clarify which element of the affordable housing tenure First Homes will be taken from to align with provisions set forth in the NPPF. This modification will provide greater clarity for applicants.

Importantly, the draft policy should clarify how affordable housing provision will be measured, be it in unit, or habitable room basis.

We note that Part G, of Policy HOU2 requires a late stage review to be imposed on developments which do not provide a policy compliant affordable housing offering.

*"Ensuring* that any *planning obligations for affordable housing provision or contributions* that *are agreed as an exception* to *full policy compliance (on the basis of viability at the time the permission is granted) must include a financial review mechanism* that *is based on actual* sales values at the time *that the development, or development phase, is 80% occupied. The review must allow for further provision, or financial contributions in lieu, when the outturn value of the development exceeds the initial viability assumptions or* other *circumstances enable increased viability* of the *scheme";*

We have concerns about the framing of the late stage review mechanism which as currently drafted is imprecise and does not provide sufficient comfort. It is considered that the following modifications should be made to the wording as drafted:

- Should refer to a review taking place at 80% of homes sold (or <u>at an appropriate point agreed with the LPA).</u>
- Needs to refer to the values achieved and costs incurred, and any additional contributions arising from the development.
- The outcome should result in a financial contribution and not onsite affordable housing. This should be made clear.
- Any surplus profit should be split between developer and the borough (50:50).

Further to the above, the wording of the policy does not refer to the recent issue of buying credits to achieve biodiversity net gain where onsite provision is not sufficient and off-site mitigation is not deliverable. It is noted that the requirement to purchase biodiversity credits is routinely impacting on scheme viability which in turn effects the deliverability of affordable housing. It is requested that appropriate provisions are considered in the framing of any late stage review mechanisms.

## 315 - Bloor Homes and Department of Health & Social Care

Submission Number: 315 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Sarah Hamilton-Foyn

On Behalf Of Company/Organisation: Bloor Homes and Department of Health & Social Care Name:

Comment Number: 12

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Policy HOU2 –Affordable Housing.**

It is noted that since we submitted representations to the Reg 18 Local Plan and in principle supported this policy, the LHNA has been prepared and also Viability evidence.

The policy states that all development of 10 or more homes, or where the site area is 0.5 hectares or more, it to provide 40% of the homes as on site affordable housing. The preceding paragraph to the policy refers to viability research being undertaken to inform the policy and establish a realistic level at which affordable housing can be delivered.

However, it is noted that the Viability Research under the heading key findings has concluded that there is some variation in the percentages of affordable homes that can be provided, depending on the private sales values, scheme composition and benchmark land value. The Viability Report recommends:

"***that the emerging target of 40% is adopted and applied on a 'maximum reasonable proportion' basis taking site-specific circumstances into account."***

Furthermore, the Viability Report does not take into account the Future Homes Standard which will potentially increase costs – therefore the report should have addressed this.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The policy should be amended to reflect the conclusions of the Viability report, so that some flexibility is included to take into account site specific circumstances.

The effect of the introduction of the Future Home Standard should also be reflected in the wording of the policy.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**HOU2 –Affordable Housing**

The policy is unsound as it is unjustified and inconsistent with national policy

1. The policy requires all development on 10 or more homes or large and 0.5 hectare to deliver 40% of the homes as affordable units. This is supported by the Council's viability assessment. However, in setting this standard the viability assessment notes in the key findings on page 4 of the local plan that the 40% is a "*maximum reasonable proportion*" on the basis that there are typologies that cannot meet the 40% being proposed in this policy. In addition, there are potential increases in costs that have not been considered in the council viability assessment such as the introduction of the Future Homes Standard. As such HBF are concerned that the policy as written does not provide sufficient flexibility should development be made unviable be this policy.
2. Whilst the policy refers to the use of offsite contributions in part g and alludes to reduced contributions in relation to review mechanisms the policy does not state that where development is made unviable by the policy the council will consider a reduced level of provision. National policy sets out in paragraph 58 that there may be circumstances where it is necessary to reduce contributions and HJBF consider it is important that this is clearly reflected in this policy. This cod be achieved by amending part a) to state "*Where viable requiring development proposals ...*". This would establish for the outset that viability is a consideration in decision making and then also ensure consistent with both parts f and h of the HOU2.

## 328 - Charlie Thompson

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 6

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Paragraph 35 and 36 of the 2023 NPPF require that local plans be justified to be considered sound. To do so its policies must be an appropriate strategy for the outcomes that they intend to secure.

Policy HOU3 provides policies against which applications for specialist housing for older people will be determined are set out in policy HOU3. Paragraph (b) sets out that applications for specialist housing for older people should deliver affordable housing in accordance with affordable housing policies in HOU2. This requires proposals falling within use class C3 and over 10 units or over 0.5ha should deliver 40% affordable housing over a particular set of tenures and those falling within use class C2 and over 10 units should deliver 40% affordable housing without specifying the affordable tenure or bedroom split.

The LPA's consideration of and attempts to secure policy in support of affordable housing on older person's accommodation is strongly welcomed and follows

engagement with HCC. However, the policies HOU2 and HOU3 as drafted ties the delivery of affordable units on specialist accommodation for older people to the policies to be applied to mainstream accommodation and to use classes, which is not deliverable.

Chapter 9 of the 2024 South West Hertfordshire Housing Needs Assessment sets out three broad categories of specialist older peoples' accommodation (which is also set out in HCC's own commissioned evidence on the need for specialist accommodation for older people):

1. Housing with support, such as supported living schemes and age restricted accommodation, which fall under use class C3;
2. Housing with care, such as flexi-care and extra-care schemes, which may fall under use class C2 or C3;
3. Residential care schemes, such as nursing homes and residential care homes, which fall under use class C2

This presents four issues:

1. Residential care schemes falling under use class C2 would be required to deliver 40% affordable housing. While HCC would like to encourage providers to deliver more beds that are affordable to HCC as a purchaser of beds, this is not an affordable housing tenure under Annex 2 of the NPPF. Residential care schemes do not offer residents a housing tenure that an NPPF definition of affordable housing would apply to, as residents rent beds rather than properties;
2. The affordable housing split is determined by whether the proposal falls under use class C2 or C3. For those falling within use class C3 the tenure split in HOU2 (b) (ii) may not be appropriate as schemes may in some circumstances be undeliverable when split between market and some affordable tenures is not appropriate for specialist accommodation for older people. For housing with care schemes falling under use class C2 policy wording in HOU2 (c) is suitably flexible;
3. The 2024 SWHHNA paragraphs 9.44-9.58 sets out that whether specialist older person's housing generates an affordable housing requirement should depend on the characteristics of the development itself rather than the use class it falls under. Housing with care schemes that have substantial communal facilities and give people the option of care may fall under use class C2 despite having the characteristics of dwellings. Case law (*Rectory Homes vs. SSHCLG)* indicates that policies may allow for C2 units to accrue an affordable housing requirement in this situation.

At present the local plan is also agnostic on the wider strategy for delivering a successful specialist older people's accommodation sector in Hertfordshire.

1. It does not give support to the types of specialist accommodation for older people that are most needed in Hertfordshire. HCC's strategy is in favour of the delivery of housing with care (with care providers on site) and nursing homes rather than other forms of older person's accommodation that do not provide on-site personal or medical care. This requires residents to move home rather than age in place, often at expense and short notice, as they age and accrue further medical or care needs.

It does not require proposals for specialist accommodation for older people to consider design and delivery criteria that ensure they deliver positive outcomes for their residents. Specialist accommodation for older people should be delivered to a high standard to make it an attractive and suitable alternative to mainstream accommodation where this becomes unsuitable.

To be considered an appropriate strategy and therefore sound the local plan should therefore include suitable policies in relation to affordable specialist accommodation for older people and facilitate HCC's strategy for a successful specialist accommodation for older people sector.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To be considered sound the local plan should:

1. Amend policy HOU3 to set out affordable housing requirements for specialist accommodation for older people independent of policy HOU3;
2. Set out affordable housing requirements for the types of specialist accommodation for older people based on their characteristics rather than the use class that it may fall under;

3. Set out a policy requirement for proposals for specialist accommodation for older people to have regard to HCC's guidance on their successful design and delivery; and
4. Set out the wider context and strategy for the delivery of specialist accommodation for older people in Hertfordshire in the supporting text so that this is known and understood when proposals are developed and brought forward.

Points 1 and 2 could be addressed by replacing HOU3 (b) with the following policy wording and inserting the definition of 'Care Home Accommodation' in the Glossary. This would firstly provide clarity that all specialist accommodation for older people other than care homes (which do not have the characteristics of dwellings and cannot provide an NPPF definition affordable housing tenure) accrue an affordable housing requirement irrespective of its use class in accordance with the 2024 SWHHNA and case law. This would secondly provide sufficient flexibility as to the tenures of affordable housing and bedroom sizes so these can have regard to the deliverability of each proposed scheme and, where appropriate, its wider development:

1. *[deleted text] requiring proposals (other than Care Home Accommodation) with a gain of 10 or more units to provide 40% of the units as on-site affordable housing (irrespective of whether it falls under use class C2 or C3); the mix of tenures should have regard to advice from the NHS or Hertfordshire County Council;*

And inserted into the Glossary:

*Care Home Accommodation: is accommodation where personal care and accommodation are provided together as a package with no clear separation between the two, the person using the service cannot choose to receive personal care from another provider, people using the service do not hold occupancy*

*agreements such as tenancy agreements, licensing agreements, licences to occupy premises, or leasehold agreements or a freehold, and likely CQC-regulated activity will be 'accommodation for persons who require nursing or personal care'.*

Point 3 could be addressed by inserting policy wording into HOU3 to give greater support in the planning balance to proposals that deliver housing with care on site and nursing homes that accord with HCC's guidance on the design and delivery of successful and high quality specialist accommodation for older people. This would allow development to come forward in such a way that that have a greater likelihood of addressing HCC's strategy for the area:

1. *f) Proposals for specialist older person's accommodation and people with disabilities should have regard to Hertfordshire County Council's Service Delivery and Placemaking Guide*

Point 4 could be addressed by inserting the following into the supporting text at paragraph 4.16. This would clarify HCC's overall strategy for the area, including on the issues of firstly the need for fully market, fully affordable, and split tenure housing with care schemes to be delivered on a case-by-case basis to deliver an overall affordable housing quantum and secondly the need for housing with care dwellings to provide a robust care package to have the maximum chance of enabling residents to age successfully in place.

*4.16 Hertfordshire County Council's approach to affordable housing has been reflected in the policy below. [deleted text]Planning applications will need to take account of practical delivery arrangements, operator requirements and viability. [deleted text] This includes the practicality of dividing some schemes into market and affordable tenures. This could mean the delivery of fewer affordable units on some schemes and 100% affordable units on others to provide an overall quantum of affordable specialist housing for older people across the plan.*

*4.17 The County Council's strategy for specialist older people's accommodation requires the delivery of housing with care units that include a CQC-registered care provider on site and nursing homes over other forms of specialist older person's accommodation. This is because there are*

*people in other forms of accommodation who have a medical or care need who would be better suited to accommodation with on site care or nursing care. Having care available on site also allows people to age in place without the need to move, often at short notice, when their needs exceed what other forms of older people's accommodation without on site care can offer. To deliver on this strategy proposals for housing with care should offer residents a medium to high level of care available if required, through an onsite care agency registered through the Care Quality Commission (CQC).*

1. 3A Older Persons Affordable Housing_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Appropriate specialist accommodation for older people is an important part of the overall housing need for the area within which HCC has a considerable interest in its role as provider and funder of adult care services. It is therefore necessary for HCC to participate in this aspect of the examination if this is considered necessary.

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

5.9 Our concerns in respect of proposed Policy HOU2 are confined to point a) ii) and are very similar to those in respect of Policy HOU1. We consider the policy requirement in respect of the mix of different forms of affordable housing to be overly prescriptive, and that it fails to allow for potential variations of housing needs over time and / or across the District.

5.10 In addition, we suggest the policy on affordable housing mix must acknowledge that viability and feasibility matters may impact on the mix of affordable housing types that can be provided on sites.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

5.11 We suggest that a) ii) should be amended to make clear that the DLP provides an indicative mix of affordable housing types that applicants should use to guide the 40% affordable housing component, and that variations in the proportions of social rented, affordable rented, and affordable homes ownership can be accepted where demonstrated to be appropriate.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**Policy HOU2 – Affordable Housing**

Similar to our above commentary in relation to Policy HOU1, Part b) of Policy HOU2 is focused on 3 bed homes which is not as relevant to urban sites where flexibility should be incorporated in the policy to reflect this need for flexibility in approach depending on site characteristics.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusions**

Our Client welcomes the preparation of the St Albans' new Local Plan, noting that those policies contained in the current adopted Local Plan (1994) are extremely outdated and do not accurately reflect current circumstances.

Our Client broadly supports the aspirations of the Plan, particularly that of prioritising residential development on previously developed sites, and ensuring the efficient use of such land in order to meet the significant housing need within the district. Our Client agrees this represents a sensible and effective way of providing much needed new homes in highly sustainable locations across the district which is otherwise constrained by Green Belt.

Nevertheless, our Client has significant concerns regarding specific policies of the Draft Local Plan. Most notably, our Client raises key concerns with the failure of the Draft Local Plan to identify Marlborough House as a site for future residential development. As discussed throughout this representation, Marlborough House represents an underutilised, highly accessible previously developed site, the comprehensive redevelopment of which to provide residential units would make a significant contribution towards meeting housing need within SACDC.

Furthermore, our Client contends that the Draft Local Plan are not legally sound and do not comply with the NPPF. Our Client has therefore made a number of recommendations, which if adopted would ensure consistency across the Draft Local Plan. Notably, our Client strongly contends that those policies within the Draft Local Plan must be sufficiently flexible in order to maximise the chances of meeting the significant housing need within the district. Failure to do so risks the Draft Local Plan stifling opportunities to meet housing need through the effective and efficient use of the highly sustainable brownfield sites.

Overall, it is concluded that in its current form the Draft Local Plan has areas of inconsistency, is not justified with appropriate evidence and is therefore at risk of not be legally compliant, and it is suggested that the Council take further review. We look forward to engaging further in the preparation of the St Albans Local Plan 2041.

1. 241107 - St Albans Local Plan Reg 19 - Representations - FINAL_[R]pdf.pdf

## 349 - Lisa Peters

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 9

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**Affordable Housing**

CHPC considers **Policy HOU2** and the approach in clause (d) to round up any partial dwelling in the 40% calculation is a practical measure to maximise affordable housing contributions. While this approach helps increase affordable housing stock, CHPC suggests considering how this rounding requirement might affect smaller developments and recommends that a balanced approach be used to ensure fair application across varying site scales.

Overall, CHPC endorses **Policy HOU 2's** comprehensive strategy for delivering diverse and well-integrated affordable housing but encourages continued sensitivity to the distinct needs and constraints of smaller rural communities.

CHPC supports clause (g) of **Policy HOU 2**, which seeks to prevent the artificial subdivision of sites to circumvent affordable housing requirements. CHPC recognises that some developers may attempt to fragment sites to avoid meeting the thresholds set out in this policy, which would ultimately reduce the provision of affordable housing within the community. Ensuring that land is not subdivided solely to bypass policy requirements is crucial for maintaining transparency and fairness in development practices.

CHPC also agrees with the stipulation that adjacent sites under the same landowner, when combined, should be treated as a single development for the purpose of calculating affordable housing contributions. This approach closes potential loopholes where landowners might otherwise avoid their obligations by proposing multiple small developments on contiguous plots, thereby undermining the Local Plan's objectives.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To further strengthen this clause, CHPC suggests that clear guidelines or criteria be established to determine when sites are considered "artificially subdivided." This clarity will aid in enforcement and provide developers with an upfront understanding of what is expected, reducing disputes and ensuring that all developments contribute equitably to the community's affordable housing needs.

Overall, CHPC believes that clause (g) is essential for preserving the integrity of the Local Plan and ensuring that development in the parish aligns with the goal of providing sufficient, well-integrated affordable housing across the district.

On Behalf Of Company/Organisation: Hill Residential Name:

Comment Number: 10

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Policy HOU2: Affordable Housing**

Part a(i) of the policy requires residential development proposals (Use Class C3) with a gain of 10 or more homes, or where the site has an area of 0.5 hectares or more, to provide 40% of homes as on-site affordable housing. The Local Plan Viability Assessment (2024) recommends that the emerging target of 40% is adopted and applied on a 'maximum reasonable proportion' basis taking site-specific circumstances into account. It is considered that the policy should incorporate wording to reflect the point on 'site specific circumstances', to ensure that the policy is justified and effective

and does not risk impacting sustainable sites from coming forward. It is crucial that all development costs are fully accounted for and that there is sufficient head room in development viability to take account of any uncertain costs.

Part b) of the policy encourages three bedroom affordable homes to address the priority needs of the Council's Housing Register and the needs of those in temporary accommodation. However, Policy HOU1 on Housing Mix already covers the proposed mix and so there is no need to repeat requirements in this policy. It is not justified and does not serve a clear purpose, in accordance with paragraph 16f of the NPPF, and should be removed.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake

the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

**356 - Rachael Donovan**

Submission Number: 356 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Hertfordshire and West Essex ICB Name: Rachael Donovan

Comment Number: 15

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*Strategic Policy SP4 –Housing and Policy HOU2- Affordable Housing*

The HWE ICB welcomes the inclusion in the explanatory text, that 'affordable housing' includes key worker access to affordable housing. It would be helpful for the Local Plan to also define 'key workers' in the glossary. At the very least the NPPF definition should be referenced which focusses on essential frontline workers in health, education and community safety.

**362 - EDIT Land Ltd**

Submission Number: 362 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at "Land at Roundhouse Farm, Colney Heath" have been discounted incorrectly

Representations

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

The Reg. 18 Draft Local Plan includes planning policies relating to various topics, which would become the principal consideration for the decision maker when determining planning applications.

EDIT Lands has not provided comment on a number of policies and advise which they are commenting on in the list below, but reserves the right to comment on others in the future.

However, SADC should consider whether all the policies as drafted are useful and necessary for decision making, and do not just repeat that which is already stated in the National Planning Policy Framework (NPPF), Planning Practice Guidance or legislation. Policies should also be unambiguous, clear and concise, without being overly onerous or stifle innovation or ambition.

EDIT Lands main concern with the Local Plan, as a whole, is the weak approach to the provision of much needed housing. Firstly, the level of housing planned for does not seek to address housing need adequately or provide any contingency, nor does it seek to address unmet need or positively plan for previous years of significant under-delivery.

Furthermore, the level of housing which is proposed as windfall, is unsound. 20% of the total housing supply to come forward on sites which do not have allocations, nor are formally identified is not positively prepared and is a huge outlier compared to neighbouring authorities. We consider the proportion of windfall to be wholly inappropriate given the borough's historic poor delivery and acute housing need.

It is also perverse for SADC to suggest that all brownfield sites have been exhausted to necessitate Green Belt release, whilst anticipating that such a high number will come forward via the windfall process. In addition, the Local Plan is heavily reliant on the delivery of a small number of broad growth areas and strategic extensions, namely the Hemel Garden Community which is allocated for net. 5,500 dwellings and 4,281 across the other strategic development sites which are subject to challenging land assembly and infrastructure delivery requirements which will constrain delivery of housing units within the early periods of the Local Plan. St Albans have acknowledged this situation in the reg.19 draft Local Plan where they are now asserting that only 4,300 dwellings will be delivered on the HGC sites within the LP period, a reduction of 450 dwellings from the LP trajectory and 1200 from the wider site allocation. Across all allocated sites within the borough, the council has lost net. 971 dwellings between Reg.18 and Reg.19 stage. There is no explanation, or justification on how the shortfall in housing delivery is accounted for within the revised housing trajectory, or local plan housing targets.

The housing trajectory places significant reliance on these strategic sites without due consideration to implications of these strategic sites not being delivered or brought online in line with the housing trajectory.

The emerging Local Plan is also not prepared positively as it fails to make any consideration to the need for natural growth (and deliverable) within the 'washed over villages' within the green belt, with no consideration paid in detail to areas for release from the green belt in these locations. As outlined in Section 3 of this document our client challenges the methodology which has been applied in the green belt review in light of a failure to apply a macro level analysis to the green belt parcels.

Furthermore the draft Local Plan fails to make provision for custom build and self-building housing typologies despite a clear need being identified in the National Planning Policy Framework no recognition is made to the contribution this typology makes to meeting established demand. We understand that there is a need locally for such housing and failure to plan for such housing, is not positive.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

- SP1: A Spatial Strategy for St Albans District
- SP3 – Land and the Green Belt
- HOU 1 – Housing Mix
- HOU 2 – Affordable Housing
- SP2 – Responding to the Climate Emergency
- NEB 6 – Biodiversity and Biodiversity Net Gain – Comment
- LG5 – Green Belt – Object

Draft Policy HOU2: Affordable Housing – comment
EDIT Land largely support this policy, yet offer some additional wording to add clarity. This is to meet NPPF Paragraph 16 (d), being that policies are clearly written and unambiguous.

The Draft Policy requires that residential development deliver a minimum of 40% affordable housing on site with a tenure mix of 30% social rented, 30% affordable rented and 40% home ownership, which includes 25% of all affordable housing as First Homes. The policy needs to clarify which element of the affordable housing tenure First Homes will be taken from to align with provisions set forth in the NPPF. This modification will provide greater clarity for applicants.
Importantly, the draft policy should clarify how affordable housing provision will be measured, be it in unit, or habitable room basis.
We note that Part G, of Policy HOU2 requires a late stage review to be imposed on developments which do not provide a policy compliant affordable housing offering.
“Ensuring that any planning obligations for affordable housing provision or contributions that are agreed as an exception to full policy compliance (on the basis of viability at the time the permission is granted) must include a financial review mechanism that is based on actual sales values at the time that the development, or development phase, is 80% occupied.
The review must allow for further provision, or financial contributions in lieu, when the outturn value of the development exceeds the initial viability assumptions or other circumstances enable increased viability of the scheme”;
We have concerns about the framing of the late stage review mechanism which as currently drafted is imprecise and does not provide sufficient comfort. It is considered that the following modifications should be made to the wording as drafted:
o Should refer to a review taking place at 80% of homes sold (or at an appropriate point agreed with the LPA).
o Needs to refer to the values achieved and costs incurred, and any additional contributions arising from the development.
o The outcome should result in a financial contribution and not onsite affordable housing. This should be made clear.
o Any surplus profit should be split between developer and the borough (50:50).
Further to the above, the wording of the policy does not refer to the recent issue of buying credits to achieve biodiversity net gain where onsite provision is not sufficient and off-site mitigation is not deliverable. It is noted that the requirement to purchase biodiversity credits is routinely impacting on scheme viability which in turn effects the deliverability of affordable housing. It is requested that appropriate provisions are considered in the framing of any late stage review mechanisms.

Respondent: Company/Organisation: PJB Planning Name: Peter Biggs

On Behalf Of Company/Organisation: Trans Link London Limited Name:

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The principles of Policy HOU3 are supported and in particular it is noted that part a. refers to good access to public transport and local facilities as a key requirement of the development proposed. The land north of Napsbury Park Estate could provide for this form of specialist housing accommodation, and, with a proposed new rail station on the Midland Main line into St Albans, could provide direct public transport into St Albans for the elderly occupants.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 183 - McCarthy & Stone Retirement Lifestyles Ltd, Jarvis Homes, and Wheathampstead Land

Submission Number: 183 Submission Date: 07/11/24 15:09

Respondent: Company/Organisation: The Planning Bureau Ltd Name: Ms Jane Vlach

On Behalf Of Company/Organisation: McCarthy & Stone Retirement Lifestyles Ltd, Jarvis Homes, and Wheathampstead Land Name:

Comment Number: 6

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Non compliance with national policy

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**HOU3 – Specialist Housing**

As explained above, it is our contention that if the Viability Assessment is re-run with more accurate assumptions, it will become clear that the viability of retirement and extra care living is significantly more challenging than currently shown. It would than be appropriate to reflect this position in the policy wording to prevent unrealistic policy expectations. Without this amendment to policy wording Council Members, Officers and the general public will assume that applications for sheltered or extra care housing will be able to support a policy compliant level of affordable housing. Our extensive experience in dealing with site specific viability discussions is that it is never appropriate to apply generic affordable housing requirements as this leads to confusion, misled expectations and delay.

**Off-site contributions**

The SW Herts LHNA Report update March 2024 Iceni at Para 9.64 says that "*Whilst recognising the benefits associated with mixed income/tenure development, in considering whether mixed tenure schemes can work it is important to consider the degree to which service charges will be*

*affordable to those on lower incomes and whether Registered Providers will want or be able to support access to the range of services/facilities on site. In a range of instances, this has meant that authorities have accepted off-site contributions to affordable housing provision.'*

In light of the above, and our own experience, it is our contention that recognition of the appropriateness of off-site affordable housing provision for older persons' housing should be reflected in Policy HOU3.

**Recommendation**

The policy should be amended as follows:

*The Council will support development proposals for specialist housing to meet the needs of older people and people with disabilities which are in accordance with the following requirements:*

1. *b) Provision of an appropriate proportion of affordable housing, **which is likely to be significantly lower than for general market housing**, within the specialist housing development, in accordance with Policy HOU2 for proposals within Use Class C3 or C2; **This can be provided through off-site contributions in recognition of the exceptional circumstances for this type of specialist housing. Levels of commuted sum will take account the viability characteristics of specialist housing for older persons as well as the housing need specific to the typology.***

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To provide additional context to the above comments and recommendations.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 206 - Jarvis Homes

Submission Number: 206 Submission Date: 07/11/24 17:11

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: Jarvis Homes Name:

Comment Number: 1

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**Policy HOU3 – Specialist Housing**

- Strategic Policy SP4 seeks to provide good quality housing that meets the needs of all parts of society, including the provision of specialist accommodation to meet the needs of older people and people with disabilities. This reflects national policy and guidance in the NPPF and NPPG, as acknowledged by the Local Plan.
- The plan acknowledges that accommodation for the elderly is evolving towards more flexible forms of provision including a range of accommodation types to suit different needs. Paragraph 4.14 outlines the approach to meeting the "demand" for specialist housing.

*"4.14 Specialist housing is allocated at sites listed in Appendix 1. Planning applications by specialist housing providers on ad hoc sites and on HCC land will deliver additional units of accommodation across the Plan period. Taken together, these sources should meet demand for specialist housing."*

- Policy HOU3 then specifies that in total, 1,963 specialist housing units are needed in the plan period comprising 1,154 units of housing with support and 809 units of housing with care. In addition, 377 bed spaces for nursing care (C2) are needed.
- In terms of allocations, 800 retirement/extra care units and 250 care home beds are allocated. This represents 41% and 66% of the HOU3 policy requirement respectively. There is also an emphasis on larger sites to deliver these specialist units. These will inevitably take longer to masterplan, obtain planning permission and develop, meaning that provision of specialist housing for the elderly will be backloaded in the plan period.
- Paragraph 4.14 of the Local Plan quoted above seems to suggest that ad hoc developments will fill the gap. This is a fairly broad assumption which appears to rely heavily on windfall development. This is considered to be a high-risk approach in a heavily constrained District such as St Albans. It also risks blocking the housing market at the "top" due to a lack of appropriate specialist accommodation, limiting downsizing and further exacerbating the problem with housing supply in the District. This situation will be further compounded by the reliance on large sites which will take longer to come forward.

- In summary, while we do not object to the principles of Policy HOU3, we object to the proposed implementation in terms of the lack of sufficient allocated sites and, in particular, the reliance on large strategic sites to deliver suitable accommodation for older people. The Beesonend Lane site should be allocated for older persons accommodation to help meet need in the short term.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Beesonend Lane site should be allocated for older persons accommodation to help meet need in the short term.

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

7.8 Hallam and St Albans School support the District Council's decision to support development proposals which provide specialist housing to meet the needs of older people and people with disabilities.

7.9 The introductory text of the policy states that "the Council will support development proposals for specialist housing to meet the needs of older people and people with disabilities" in accordance with the policy criteria. This eligibility is narrow in scope and does not consider other groups with specific socio-economic needs. The policy should be amended to increase the scope and definition of specialist housing.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). **290 - BRiCS Development**

Submission Number: 290 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: ET Planning Name: Tom Ryan

On Behalf Of Company/Organisation: C/O ET Planning Name: BRiCS Development

Comment Number: 3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Regulation 19 version of the SALP proposes changes to part c) of Policy HOU3. The policy wording now states (changes shown by a strikethrough and red text *[please see attached document]*):
*"Provision to be made for specialist housing to meet the needs of older people and / or people with disabilities within the Broad Locations and housing sites providing 500 dwellings or more. In larger sites, it may be appropriate to co-locate specialist housing provision and develop an Integrated Community;"*

It is evident that the Council's focus for specialist care housing (Use Class C2) is on strategic development sites of 500 or more dwellings. Part B of the SALP – Local Plan Sites (September 2024) does not allocate any housing sites specifically for specialist care provision. Instead, in line with Policy HOU3, the draft SALP – Part B includes specialist care housing as a proportion of the overall housing provision on larger strategic sites.

Planning Practice Guidance (PPG - as amended) for 'Housing for older and disabled people' was published on 26th June 2019 and acknowledges the need to provide housing for older people as "critical". The PPG acknowledges that people are now living longer lives, with the growth in the older population increasing. The PPG records that in mid- 2016 there were 1.6 million people aged 85 and over; by mid-2041 this is projected to double to 3.2 million.

The draft SALP however is not consistent with national policy, as the change in the trigger from 250 dwellings to 500 dwellings in Policy HOU3 has resulted in an overall reduction in the number of specialist care dwellings being provided in the draft SALP. The difference is highlighted through analysis of the proposed site allocations below, where: the difference in proposed specialist housing numbers between the Regulation 18 and Regulation 19 SALP are shown in bold/ brackets; and, allocations highlighted in red *[please see attached document]* show where the specialist care provision has been removed from the allocation policy altogether.

- H1 – North Hemel Hempstead – 1,125 units including at least two 70-80 unit extra-care schemes (previously 60+ extra-care units in the Regulation 18 SALP)
- H2 – East Hemel Hempstead – 1,235 units including at least two 70-80 unit extra-care schemes (previously 70+ extra-care units in the Regulation 18 SALP)
- H4 – East Hemel Hempstead – 1,940 units including at least three 70-80 unit extra-care schemes (previously 70+ extra-care units in the Regulation 18 SALP)
- B1 – North St Albans – 1,097 units including at least two 70-80 unit extra-care schemes (previously 50+ extra-care units in the Regulation 18 SALP)
- B2 – North East Harpenden - 738 units including at least one 70-80 unit extra-care schemes (previously 60+ extra-care units in the Regulation 18 SALP)
- B3 – West Redbourn, Redborn – 545 units now not including any specialist care provision. Regulation 18 SALP included at least two 60+unit nursing care schemes.
- B4 – East St Albans - 522 units including at least one 70-80 unit extra-care scheme (was previously 50+ units)
- B5 – Glinwell, Hatfield Road, St Albans – 484 units now not including any specialist care provision. Regulation 18 SALP included at least one 80+ unit nursing care scheme
- B6 – West of London Colney - 324 units now not including any specialist care provision. Regulation 18 SALP included at least one 60+ unit nursing care scheme.
- B7 – North West Harpenden - 293 units now not including any specialist care provision. Regulation 18 SALP included at least one 60+ unit nursing care scheme.
- B8 – Harper Lane, north of Radlett - 274 units now not including any specialist care provision. Regulation 18 SALP included at least one 50+ unit nursing care scheme.

The net difference in specialist care provision equates to a decrease of 170 units provided in the Regulation 19 SALP, compared with the allocation figures in the Regulation 18 SALP (taking the uppermost figures where ranges have been provided and assuming the maximum number of schemes would be delivered on the proposed allocation sites). The decrease in specialist care provision has not been justified in the SALP and therefore it is considered that this would result in a significant under-delivery of specialist care housing across the Plan period as a whole. This would lead to a large shortfall against the local housing needs of SACDC, especially in settlements such as Wheathampstead, which has a high proportion of elderly residents.

In addition, it is clear that the draft SALP would rely on large strategic sites to deliver specialist care accommodation. This approach is not considered to be positively prepared or effective, as it would mean that specialist housing would likely be delivered towards the end of the Plan period, due to the housing trajectory of the large strategic sites.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

This approach will therefore not address the need for specialist care housing in the short or medium term. Instead, it is considered that SACDC should allocate small-medium scale housing sites for specialist (Use Class C2) care in areas most at need (for example, Land West of Lamer Lane in Wheathampstead). This approach would be sound, as it responds appropriately to the local housing need requirements of Wheathampstead, rather than applying an arbitrary approach to housing growth on a district-wide scale.

Allocating specialist care housing (Use Class C2) as part of smaller mixed-use sites, such as BRiCS' offering at Land West of Lamer Lane, will enable the necessary delivery of C2 housing at the front end of the Plan period (as opposed to relying on strategic sites of 500+ units which will all be delivered towards the end of the Plan period). This modified approach is necessary to make the Plan sound given the absence of C2 housing delivery in recent years, in the context of a predominantly Green Belt authority with an outdated Local Plan.

**328 - Charlie Thompson**

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraph 35 and 36 of the 2023 NPPF require that local plans be positively prepared to be considered sound. To do so they must set out a strategy to meet the area's objectively assessed needs.

Policy HOU3 sets out the LPA's policies in respect of specialist accommodation. This only provides policies for determining applications for older person's accommodation. It does not provide policies for determining applications for children's homes. Similarly, the allocations set out in Part B of the plan make no provision for the needs of the section of the community reliant on this form of housing.

Children's homes are smaller units, usually indistinguishable in form from a standard residential dwelling, that provide accommodation for 1-5 children in care. They are a vital part of the care system in Hertfordshire, alongside fostering, adoption, and other more specialist forms of accommodation. Under the Children's Act 1989 Hertfordshire County Council (HCC) has a statutory duty to provide accommodation to children in care. The 2024 draft consultation National Planning Policy Framework at paragraph 63 also makes clear that local plans should make provision for this group and at footnote 29 makes clear that the local authority's sufficiency data should be considered suitable evidence of need. While it is expected that this local plan will be examined under the 2023 NPPF, this and HCC's statutory duties taken together mean the local plan ought to make provision for this cohort.

Since the Regulation 18 consultation HCC is seeking for local plans to address this shortfall. There is currently a shortfall of children's home bed places in Hertfordshire for children in care. The 2024 South West Hertfordshire Housing Needs Assessment at paragraphs 10.83-10.88 shows that there is a need for 19¬39 beds at children's homes. Hertfordshire County Council only has access to 15 beds in St Albans. Countywide sufficiency data shows that it cannot accommodate all its children in care within its boundaries. It currently accommodates 89 children in care within other authorities in England, which is less desirable for children in care and expensive to commission, has a further 70 children or young people on the 'waiting placement' list, and an average of 4-5 new requests each day. To be considered positively prepared and therefore sound the local plan should therefore make suitable provision for this section of the community within St Albans. This representation suggests modifications that if agreed, or similar, would make the plan sound

Paragraph 35 and 36 of the 2023 NPPF require that local plans be justified to be considered sound. To do so its policies must be an appropriate strategy for the outcomes that they intend to secure.

Policy HOU3 provides policies against which applications for specialist housing for older people will be determined are set out in policy HOU3. Paragraph (b) sets out that applications for specialist housing for older people should deliver affordable housing in accordance with affordable housing policies in HOU2. This requires proposals falling within use class C3 and over 10 units or over 0.5ha should deliver 40% affordable housing over a particular set of tenures and those falling within use class C2 and over 10 units should deliver 40% affordable housing without specifying the affordable tenure or bedroom split.

The LPA's consideration of and attempts to secure policy in support of affordable housing on older person's accommodation is strongly welcomed and follows

engagement with HCC. However, the policies HOU2 and HOU3 as drafted ties the delivery of affordable units on specialist accommodation for older people to the policies to be applied to mainstream accommodation and to use classes, which is not deliverable.

Chapter 9 of the 2024 South West Hertfordshire Housing Needs Assessment sets out three broad categories of specialist older peoples' accommodation (which is also set out in HCC's own commissioned evidence on the need for specialist accommodation for older people):

1. Housing with support, such as supported living schemes and age restricted accommodation, which fall under use class C3;

2. Housing with care, such as flexi-care and extra-care schemes, which may fall under use class C2 or C3;
3. Residential care schemes, such as nursing homes and residential care homes, which fall under use class C2

This presents four issues:

1. Residential care schemes falling under use class C2 would be required to deliver 40% affordable housing. While HCC would like to encourage providers to deliver more beds that are affordable to HCC as a purchaser of beds, this is not an affordable housing tenure under Annex 2 of the NPPF. Residential care schemes do not offer residents a housing tenure that an NPPF definition of affordable housing would apply to, as residents rent beds rather than properties;
2. The affordable housing split is determined by whether the proposal falls under use class C2 or C3. For those falling within use class C3 the tenure split in HOU2 (b) (ii) may not be appropriate as schemes may in some circumstances be undeliverable when split between market and some affordable tenures is not appropriate for specialist accommodation for older people. For housing with care schemes falling under use class C2 policy wording in HOU2 (c) is suitably flexible;
3. The 2024 SWHHNA paragraphs 9.44-9.58 sets out that whether specialist older person's housing generates an affordable housing requirement should depend on the characteristics of the development itself rather than the use class it falls under. Housing with care schemes that have substantial communal facilities and give people the option of care may fall under use class C2 despite having the characteristics of dwellings. Case law (*Rectory Homes vs. SSHCLG)* indicates that policies may allow for C2 units to accrue an affordable housing requirement in this situation.

At present the local plan is also agnostic on the wider strategy for delivering a successful specialist older people's accommodation sector in Hertfordshire.

1. It does not give support to the types of specialist accommodation for older people that are most needed in Hertfordshire. HCC's strategy is in favour of the delivery of housing with care (with care providers on site) and nursing homes rather than other forms of older person's accommodation that do not provide on-site personal or medical care. This requires residents to move home rather than age in place, often at expense and short notice, as they age and accrue further medical or care needs.

It does not require proposals for specialist accommodation for older people to consider design and delivery criteria that ensure they deliver positive outcomes for their residents. Specialist accommodation for older people should be delivered to a high standard to make it an attractive and suitable alternative to mainstream accommodation where this becomes unsuitable.

To be considered an appropriate strategy and therefore sound the local plan should therefore include suitable policies in relation to affordable specialist accommodation for older people and facilitate HCC's strategy for a successful specialist accommodation for older people sector.

Paragraph 35 and 36 of the 2023 NPPF require that local plans be justified to be considered sound. To do so its policies must be an appropriate strategy for the outcomes that they intend to secure.

Policy HOU3 includes policies against which applications for specialist housing for older people will be determined. Paragraph (c) states that 'In larger sites, it may be appropriate to co-locate specialist housing provision and develop an Integrated Community'. The Associated Retirement Community Operators, the professional body representing housing with care providers, defines Integrated Retirement Communities as a gold standard of housing with care, not as colocation of different types of specialist housing provision, such as housing with care and nursing homes. While HCC has no in-principle opposition to colocation it is not clear that this is indeed what the policy is intended to achieve.

There may be benefits to co-locating housing with care schemes (as opposed to other forms of specialist accommodation for older people) only on sites delivering a larger quantum of this form of specialist older person's accommodation. This may allow them to benefit from improved economies of scale and deliver improved communal facilities and services that smaller scheme would not be able to support themselves. Policy wording within the allocations at Part B, however, refers to delivery of discrete housing with care facilities of 70-80 units. This implies a requirement for separation. This is entirely appropriate for care homes, but there is no in principle reason why housing with care schemes cannot be co-located into a single larger scheme.

Therefore to deliver an appropriate strategy there needs to be clarity as to what the policy wording at HOU3 (c) is intended to achieve, and if there is no other rationale, the plan should clarify that HOU c and the allocations at Part B to permit multiple housing with care schemes to co-locate with each other rather than with other types of specialist accommodation for older people.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To be considered sound the local plan should:

1. Set out a positive policy against which applications for children's homes can be determined at HOU3;
2. Provide appropriate context at the supporting text; and
3. allocate land for the delivery of up to 24 beds in children's homes within the site allocations at Part B.

First, policy HOU3 or an additional policy under strategic policy SP4 should set out policies against which applications for children's homes can be determined. This policy should be supportive so that these can be given positive weight in the planning balance:

*The Council will support development proposals for Children's Homes to meet the needs of looked after children which are in accordance with the following requirements:*

1. *Located with good access to public transport, local facilities and on a through road and not located close to motorways/dual carriageways, railways, bodies of water or industrial sites;*
2. *Detached and externally indistinguishable from surrounding dwellings; and*

1. *c) Otherwise have regard to Hertfordshire County Council's Service Provision and Placemaking Guide.*

Secondly, the supporting text should appropriately contextualise the policy following paragraph 4.16. This should define children's homes, refer to the need for accommodation for children in care, and signpost Hertfordshire County Council's Service Provision and Placemaking Guide which specifies a successful children's home, so that this can positively influence proposals before they come forward as applications.

*1.1 Under the Children Act 1989, the County Council has a statutory duty to take steps that ensure, so far as reasonably practicable, that children (aged 18 and under) in their care are provided with suitable accommodation within the authority's area, unless this as a compelling reason that requires otherwise.*

*1.2 When a child enters the care system, the local authority acts as a corporate*

*parent. This means that the County Council, along with its elected members, employees and partner agencies, are responsible for providing the best possible care, protection and support for these children, nurturing them to be the best version of themselves, like any good parent would.*

*1.3 Often this requires the placement of children at children's homes. Children's homes are homes for 1-5 children in care and an adult manager. They should not look or feel like institutional settings, they should be single dwellings that resemble family homes. These homes should offer a safe and loving environment, improving the experiences and outcomes for young people in care. This approach should apply to both short-stay and longer-term accommodations, providing a positive environment until children can safely return to their families.*

*1.4 Hertfordshire County Council's Service Provision and Place-Making Guide sets out what a successful children's home should be designed and delivered, to provide a safe, nurturing and loving environment for the children who live there.*

Finally, table 3.1 in part A and policy wording in allocations H1, H2, H4, B2, B4, B5, B6, B7 in Part B should all require proposals for development include a children's home. Taken together these would ensure that the plan includes a strategy for the delivery of this unmet housing need:

1. In Part A table 3.1 North Hemel Hempstead, East Hemel Hempstead (North), East Hemel Hempstead (South), North East Harpenden, East St Albans, Glinwell, West of London Colney, and North West Harpenden should include within the main land uses column the following wording: *A children's home*; and
2. In Part B allocations H1, H2, H4, B2, B4, B5, B6, B7 should include the following wording: *A children's home to accommodate three children in care and one manager.*

This policy wording in Part B would deliver 24 (39 needed minus 15 existing) beds across the plan. The strategy will distribute children's homes across the district, which is crucial for encouraging children to integrate and avoiding impact on local schools and communities, while screening sites out that are generally unsuitable, such as industrial sites and those adjacent to railway lines. This therefore sets out an appropriate strategy for meeting the unmet needs for accommodation for children in care in St Albans. Changes to Part A will ensure this can be given positive weight and delivered at development management stage.

To be considered sound the local plan should:

1. Amend policy HOU3 to set out affordable housing requirements for specialist accommodation for older people independent of policy HOU3;
2. Set out affordable housing requirements for the types of specialist accommodation for older people based on their characteristics rather than the use class that it may fall under;
3. Set out a policy requirement for proposals for specialist accommodation for older people to have regard to HCC's guidance on their successful design and delivery; and
4. Set out the wider context and strategy for the delivery of specialist accommodation for older people in Hertfordshire in the supporting text so that this is known and understood when proposals are developed and brought forward.

Points 1 and 2 could be addressed by replacing HOU3 (b) with the following policy wording and inserting the definition of 'Care Home Accommodation' in the Glossary. This would firstly provide clarity that all specialist accommodation for older people other than care homes (which do not have the characteristics of dwellings and cannot provide an NPPF definition affordable housing tenure) accrue an affordable housing requirement irrespective of its use class in accordance with the 2024 SWHHNA and case law. This would secondly provide sufficient flexibility as to the tenures of affordable housing and bedroom sizes so these can have regard to the deliverability of each proposed scheme and, where appropriate, its wider development:

1. *b) [deleted text]requiring proposals (other than Care Home Accommodation) with a gain of 10 or more units to provide 40% of the units as on-site affordable housing (irrespective of whether it falls under use class C2 or C3); the mix of tenures should have regard to advice from the NHS or Hertfordshire County Council;*

And inserted into the Glossary:

*Care Home Accommodation: is accommodation where personal care and accommodation are provided together as a package with no clear separation between the two, the person using the service cannot choose to receive personal care from another provider, people using the service do not hold occupancy agreements such as tenancy agreements, licensing agreements, licences to occupy premises, or leasehold agreements or a freehold, and likely CQC-regulated activity will be 'accommodation for persons who require nursing or personal care'.*

Point 3 could be addressed by inserting policy wording into HOU3 to give greater support in the planning balance to proposals that deliver housing with care on site and nursing homes that accord with HCC's guidance on the design and delivery of successful and high quality specialist accommodation for older people. This would allow development to come forward in such a way that that have a greater likelihood of addressing HCC's strategy for the area:

1. *f) Proposals for specialist older person's accommodation and people with disabilities should have regard to Hertfordshire County Council's Service Delivery and Placemaking Guide*

Point 4 could be addressed by inserting the following into the supporting text at paragraph 4.16. This would clarify HCC's overall strategy for the area, including on the issues of firstly the need for fully market, fully affordable, and split tenure housing with care schemes to be delivered on a case-by-case basis to deliver an overall affordable housing quantum and secondly the need for housing with care dwellings to provide a robust care package to have the maximum chance of enabling residents to age successfully in place.

*4.16 Hertfordshire County Council's approach to affordable housing has been reflected in the policy below. [deleted text]Planning applications will need to take account of practical delivery arrangements, operator requirements and viability. [deleted text]This includes the practicality of dividing some schemes into market and affordable tenures. This could mean the delivery of fewer affordable units on some schemes and 100% affordable units on others to provide an overall quantum of affordable specialist housing for older people across the plan.*

*4.17 The County Council's strategy for specialist older people's accommodation requires the delivery of housing with care units that include a CQC-registered care provider on site and nursing homes over other forms of specialist older person's accommodation. This is because there are people in other forms of accommodation who have a medical or care need who would be better suited to accommodation with on site care or nursing care. Having care available on site also allows people to age in place without the need to move, often at short notice, when their needs exceed what other forms of older people's accommodation without on site care can offer. To deliver on this strategy proposals for housing with care should offer residents a medium to high level of care available if required, through an onsite care agency registered through the Care Quality Commission (CQC).*

To be considered sound the plan should:

1. Clarify at HOU3 (c) that co-location should apply to housing with care schemes rather than to other forms of specialist housing for older people; and
2. Amend the policy wording in the site allocations at part B to refer to a number of housing with care beds rather than a number of schemes.

Firstly, the policy wording at HOU3 c should be amended to refer to the delivery of larger co-located housing with care schemes rather than Integrated Communities as follows. This would enable, without explicitly requiring, the co-location of housing with care schemes into a larger single scheme on larger sites delivering more units as required in the site allocations at Part B:

Provision to be made for specialist housing to meet the needs of older people and / or people with disabilities within the Broad Locations and housing sites providing 500 dwellings or more. [deleted text] 'In larger sites, it may be appropriate to develop larger housing with care schemes.';

Secondly, the policy wording in the allocations at Part B should refer to the delivery of a number of beds rather than a number of discrete housing with care facilities. This would similarly remove the implication that these be separate facilities and enable the delivery of one larger scheme on larger sites. Opportunity should also be taken to ensure the language follows Part A for clarity by referring to housing with care rather than extra care (which are interchangeable terms).

H1: The 1,500 dwelling figure above includes[deleted text] 140-160 self-contained housing with care units [deleted text], one 70¬80 bed nursing home and 6 supported living units for people with disabilities

H2: The 1,600 dwelling figure above includes [deleted text]140-160 self-contained housing with care units [deleted text], one 70¬80 bed nursing home and 6 supported living units for people with disabilities

H4: The 2,400 dwelling figure above includes [deleted text]210-240 self-contained housing with care units [deleted text], two 70¬80 bed nursing home and 9 supported living units for people with disabilities

B1: [deleted text] 70-80 self-contained housing with care units, [deleted text], one 70-80 bed nursing home and 4 supported living units for people with disabilities (these units are included within the indicative dwellings figure)

B2: [deleted text]70-80 self-contained housing with care units (these units are included within the indicative dwellings figure)

B3: [deleted text]70-80 self-contained housing with care units (these units are included within the indicative dwellings figure).

It is not clear from the tracked changes version of the Regulation 19 draft whether the non-amended wording is included; if so

B4: [deleted text]

This site has fallen below 500 units and therefore should not be mandated to deliver a housing with care scheme in accordance with HCC's general strategy.

B6: 70-80 self-contained housing with care units and 10 supported living units for people with disabilities (these units are included within the indicative dwellings figure)

Taken together, these changes would permit the colocation of housing with care schemes on larger sites, which may allow for economies of scale, rather than other forms of specialist accommodation for older people.

2. 3A Older Persons Affordable Housing_[R].pdf
3. 3B Older Persons Accommodation Strategy_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Accommodation for children in care is an important and increasingly sensitive part of the HCC's statutory duties. It is therefore essential to HCC that this be addressed appropriately in the planning process and that officers be invited to discuss at Examination if this is necessary.

Appropriate specialist accommodation for older people is an important part of the overall housing need for the area within which HCC has a considerable interest in its role as provider and funder of adult care services. It is therefore necessary for HCC to participate in this aspect of the examination if this is considered necessary.

Appropriate specialist accommodation for older people is an important part of the overall housing need for the area within which HCC has a considerable interest in its role as provider and funder of adult care services. It is therefore necessary for HCC to participate in this aspect of the examination if this is considered necessary.

**329 - Mr Russell Crow**

Submission Number: 329 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Mr Peter Atkin

On Behalf Of Company/Organisation: Richborough Estates Name: Mr Russell Crow

Comment Number: 9

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

It is acknowledged that the LHNA sets out the importance of delivering accessible and adaptable homes. The LHNA also identifies a need for specialist older persons housing provision, although there is no agreed standard method for assessing the housing and care needs of older people. However, the relationship between the LHNA and requirements of HOU3 are not clear, particularly criterion c) which requires 'Broad Locations' of more than 500 dwellings to make provision for specialist housing to meet the needs of older people and / or people with disabilities. No clarification is provided on how this requirement relates to the need identified in Table 4.2.

This policy requirement contradicts the findings of the Infrastructure Delivery Plan (IDP, 2024) which refers to the LHNA when setting out specific requirements for the delivery of nursing homes, extra care facilities and other specialist housing at specific strategic sites. Based on this evidence, the relevant policy allocations have been amended to identify this up-to-date requirement with for

example B2 - North East Harpenden required to deliver one extra-care facility. At the same time, other allocations have been amended to remove requirements for extra-care facilities such as B3 – West Redbourn where the need is no longer supported by evidence.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Proposed remedy: On the basis that the specific policy allocations for strategic sites identify requirements to provide specialist housing provision in line with the latest evidence (i.e. the LHNA and IDP), criterion c) should be deleted from HOU3.

## HOU4 - Accessible and Adaptable Housing

### 207 - Bellway Homes (North London) Limited

Submission Number: 207 Submission Date: 07/11/24 17:11

Respondent: Company/Organisation: Bellway Homes (North London) Limited (C/O Savills) Name: Miss Dorothy Tsang

On Behalf Of Company/Organisation: Bellway Homes (North London) Limited Name:

Comment Number: 8

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

2.245 Bellway Homes Ltd welcomes the provisions under Policy HOU4 of the Draft Local Plan covering the delivery of a range of housing typologies that are adaptable and accessible to a range of users

2.246 However, we would question the inclusion of the following section within the draft policy, as summarised below:

*For all residential development (Use Class C3) achieve compliance with the required Building Regulations (Part M4(2)) except where this is not possible for viability or other reasons such as built form, topography and flooding; For residential development proposals for 10 homes or more (Use Class C3) 5% of market dwellings comply with Part M4(3)(a) of the Building Regulations and 10% of affordable (rent and home ownership) dwellings comply with Part M4(3)(b) (wheelchair user dwellings) of the Building Regulations; and d) For M4(2) and M4(3) housing are located, where possible, with good access to public transport and local facilities*

2.247 With regards to the requirement of M4(3) provision within the open market element, it is not clear from the supporting evidence base whether SADC is able to justify this requirement.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

2.248 In the event the emerging Policy is pursued, it is suggested that a clause should be included making reference to provisions for the marketing of the open market wheelchair units and potential for reversion to conventional open market housing typologies, if there is a lack of demand for wheelchair user dwellings within this typology. This will remove onerous restrictions on the disposal of open market units, in the absence of identified need.

2.249 SADC and Affordable Registered providers will hold evidence relating to the need and demand for Part M4(3)(2)(a) for those on the housing register and so for the affordable housing element of this policy is supported by Bellway Homes Ltd.

**222 - Martin Grant Homes and Kearns Land Ltd**

Submission Number: 222 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Marrons Name: David Pendle

On Behalf Of Company/Organisation: C/O Marrons Name: Martin Grant Homes and Kearns Land Ltd

Comment Number: 7

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We support the principles set out within Policy HOU4 - Accessible and Adaptable Housing. However, we feel that the entire policy must be cognisant of viability considerations and the necessary flexibility required to ensure development is deliverable. Criterion b notes that 'viability or other reasons such as built form, topography and flooding' may allow for a reduction in compliance with the required Building Regulations (Part M4(2)). However, Criterion c has no such provision in respect of compliance with Part M4(3)(a) and M4(3)(b). Therefore, the policy should recognise throughout that the potential for levels of accessible and adaptable housing can be reduced where appropriate viability evidence or other technical constraints is demonstrated.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. **304 - EDIT Land Ltd**

Submission Number: 304 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 10

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land to the south of Burydell Lane, Park Street” have been discounted incorrectly.

**Representations**

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

SP1: A Spatial Strategy for St Albans District

SP3 — Land and the Green Belt

HOU 1- Housing Mix

HOU 2 — Affordable Housing

SP2 — Responding to the Climate Emergency

NEB 6 - Biodiversity and Biodiversity Net Gain — Comment

LG5 — Green Belt — Object

***Draft Policy HOU4: Accessible and Adaptable Housing - Comment.***

EDIT Land welcomes the provisions under Policy HOU4 of the Draft Local Plan covering the delivery of a range of housing typologies that are adaptable and accessible to a range of users

However, we would question the inclusion of the following section within the draft policy, as summarised below:

For *all residential development (Use Class C3) achieve compliance with the required Building Regulations (Part M4(2)) except where this is not possible for viability or other reasons such* as *built form,* topography *and flooding; For residential development* proposals for *10* homes or more *(Use Class* C3) 5% *of market dwellings* comply *with Part M4(3)(a) of the Building Regulations and 10% of affordable* (rent *and home ownership) dwellings comply with Part M4(3)(b) (wheelchair user dwellings) of the Building Regulations; and d) For M4(2) and M4(3) housing are* located, *where possible, with good access* to *public transport and local facilities*

With regards to the requirement of M4(3) provision within the open market element, it is not clear from the supporting evidence base whether SADC is able to justify this requirement.

In the event the emerging Policy is pursued, it is suggested that a clause should be included making reference to provisions for the marketing of the open market wheelchair units and potential for reversion to conventional open market housing typologies, if there is a lack of demand for wheelchair user dwellings within this typology. This will remove onerous restrictions on the disposal of open market units, in the absence of identified need.

SADC and Affordable Registered providers will hold evidence relating to the need and demand for Part M4(3)(2)(a) for those on the housing register and so for the affordable housing element of this policy is supported by EDIT Land.

## 329 - Mr Russell Crow

Submission Number: 329 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Mr Peter Atkin

On Behalf Of Company/Organisation: Richborough Estates Name: Mr Russell Crow

Comment Number: 8

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Richborough acknowledge that the provision of a choice of attractive housing options to older households and persons with mobility issues is a component of achieving a good housing mix. In line with the comments made above in response to HOU3, SADC should ensure clear and robust evidence is available demonstrating the link between the need identified in the LHNA and the requirements in HOU4 for all new homes to comply with Building Regulations Part M4(2) standards. This evidence should also demonstrate why the optional Part M4(3)(a) standard will be required for 5% of market dwellings and Part M4(3)(b) for 10% of affordable dwellings. This will ensure the policy meets the relevant soundness tests.

It is noted that the definition provided of Part M4(3)(b) being 'wheelchair user dwellings' is incorrect, as this applies to all dwellings built to Part M4(3) standard. The difference is that M4(3)(a) dwellings are wheelchair adaptable, while M4(3)(b) dwellings are wheelchair accessible. This should be clarified in HOU4 to provide certainty.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**349 - Lisa Peters**

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 10

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Accessible and Adaptable Housing**

CHPC recognises the importance of **Policy HOU 4** in ensuring accessible and adaptable housing options, particularly the requirement in clause (d) that M4(2) (accessible) and M4(3) (wheelchair adaptable) housing be located with good access to public transport and local facilities. However, CHPC raises concerns that this stipulation could unintentionally disadvantage individuals with accessibility needs in rural areas, where public transport and proximity to local facilities may be limited.

In rural communities like Colney Heath Parish, strict adherence to this clause could restrict opportunities for accessible housing, effectively excluding people with accessibility needs from choosing to live in such areas. For many, living in a rural community is a personal preference or may even be essential due to family connections, support networks, or the health benefits associated with a quieter, less urban environment.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

CHPC suggests that SADC consider a more flexible interpretation of clause (d) for rural settings. Instead of limiting accessible housing to areas with high transport connectivity, SADC could encourage provisions for adaptable housing in all suitable developments, paired with incentives to enhance transportation and mobility services where needed. Additionally, facilitating improved support for on-demand or community-led transport options could help bridge the accessibility gap for residents with mobility needs who prefer a rural lifestyle.

### 350 - Hill Residential

Submission Number: 350 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: tor&co Name: Sophia Goodhead

On Behalf Of Company/Organisation: Hill Residential Name:

Comment Number: 11

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Policy HOU4: Accessible and Adaptable Housing**

The requirements of part c) of policy HOU4 requires justification in terms of where M4(3)(b) relates to wheelchair accessible housing, as it can only be required on affordable housing where the Council has nomination rights. This should be clearly stated through the DLP evidence base to accord with current guidance in PPG. This will ensure the policy is positively prepared, justified and effective.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

## 362 - EDIT Land Ltd

Submission Number: 362 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 11

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land at Roundhouse Farm, Colney Heath” have been discounted incorrectly

Representations

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

The Reg. 18 Draft Local Plan includes planning policies relating to various topics, which would become the principal consideration for the decision maker when determining planning applications.

EDIT Lands has not provided comment on a number of policies and advise which they are commenting on in the list below, but reserves the right to comment on others in the future.

However, SADC should consider whether all the policies as drafted are useful and necessary for decision making, and do not just repeat that which is already stated in the National Planning Policy Framework (NPPF), Planning Practice Guidance or legislation. Policies should also be unambiguous, clear and concise, without being overly onerous or stifle innovation or ambition.

EDIT Lands main concern with the Local Plan, as a whole, is the weak approach to the provision of much needed housing. Firstly, the level of housing planned for does not seek to address housing need adequately or provide any contingency, nor does it seek to address unmet need or positively plan for previous years of significant under-delivery.

Furthermore, the level of housing which is proposed as windfall, is unsound. 20% of the total housing supply to come forward on sites which do not have allocations, nor are formally identified is not positively prepared and is a huge outlier compared to neighbouring authorities. We consider the proportion of windfall to be wholly inappropriate given the borough’s historic poor delivery and acute housing need.

It is also perverse for SADC to suggest that all brownfield sites have been exhausted to necessitate Green Belt release, whilst anticipating that such a high number will come forward via the windfall process. In addition, the Local Plan is heavily reliant on the delivery of a small number of broad growth areas and strategic extensions, namely the Hemel Garden Community which is allocated for net. 5,500 dwellings and 4,281 across the other strategic development sites which are subject to challenging land assembly and infrastructure delivery requirements which will constrain delivery of housing units within the early periods of the Local Plan. St Albans have acknowledged this situation in the reg.19 draft Local Plan where they are now asserting that only 4,300 dwellings will be delivered on the HGC sites within the LP period, a reduction of 450 dwellings from the LP trajectory and 1200 from the wider site allocation. Across all allocated sites within the borough, the council has lost net. 971 dwellings between Reg.18 and Reg.19 stage. There is no explanation, or justification on how the shortfall in housing delivery is accounted for within the revised housing trajectory, or local plan housing targets.

The housing trajectory places significant reliance on these strategic sites without due consideration to implications of these strategic sites not being delivered or brought online in line with the housing trajectory.

The emerging Local Plan is also not prepared positively as it fails to make any consideration to the need for natural growth (and deliverable) within the ‘washed over villages’ within the green belt, with no consideration paid in detail to areas for release from the green belt in these locations.

As outlined in Section 3 of this document our client challenges the methodology which has been applied in the green belt review in light of a failure to apply a macro level analysis to the green belt parcels.

Furthermore the draft Local Plan fails to make provision for custom build and self-building housing typologies despite a clear need being identified in the National Planning Policy Framework no recognition is made to the contribution this typology makes to meeting established demand. We understand that there is a need locally for such housing and failure to plan for such housing, is not positive.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

- SP1: A Spatial Strategy for St Albans District
- SP3 – Land and the Green Belt
- HOU 1 – Housing Mix
- HOU 2 – Affordable Housing
- SP2 – Responding to the Climate Emergency
- NEB 6 – Biodiversity and Biodiversity Net Gain – Comment
- LG5 – Green Belt – Object

Draft Policy HOU4: Accessible and Adaptable Housing – Comment.
2.216 EDIT Land welcomes the provisions under Policy HOU4 of the Draft Local Plan covering the delivery of a range of housing typologies that are adaptable and accessible to a range of users However, we would question the inclusion of the following section within the draft policy, as summarised below:
For all residential development (Use Class C3) achieve compliance with the required Building Regulations (Part M4(2)) except where this is not possible for viability or other reasons such as built form, topography and flooding; For residential development proposals
for 10 homes or more (Use Class C3) 5% of market dwellings comply with Part M4(3)(a) of the Building Regulations and 10% of affordable (rent and home ownership) dwellings comply with Part M4(3)(b) (wheelchair user dwellings) of the Building Regulations; and d)
For M4(2) and M4(3) housing are located, where possible, with good access to public transport and local facilities
With regards to the requirement of M4(3) provision within the open market element, it is not clear from the supporting evidence base whether SADC is able to justify this requirement.
In the event the emerging Policy is pursued, it is suggested that a clause should be included making reference to provisions for the marketing of the open market wheelchair units and potential for reversion to conventional open market housing typologies, if there is a lack of demand for wheelchair user dwellings within this typology. This will remove onerous restrictions on the disposal of open market units, in the absence of identified need.
SADC and Affordable Registered providers will hold evidence relating to the need and demand for Part M4(3)(2)(a) for those on the housing register and so for the affordable housing element of this policy is supported by EDIT Land.

## HOU5 - Self-Build and Custom Housebuilding

### 15 - Trans Link London Limited

Submission Number: 15 Submission Date: 18/10/24 12:13

Respondent: Company/Organisation: PJB Planning Name: Peter Biggs

On Behalf Of Company/Organisation: Trans Link London Limited Name:

Comment Number: 8

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The principles of Policy HOU5 are supported, in particularly in relation to parts a. and b. that seek to bring forward developments of Self-build and Custom build dwellings to meet the District need. In relation to part b. of the policy further clarification could be given within the pre-amble to the policy as to what is considered to be "suitable, sustainable locations".

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Further clarifications is required as to what is defined in part b. of the policy in terms of "suitable, sustainable locations".

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To scrutinise the Council's policy on delivering Self-build and Custom house building across the District and in particularly within the Green Belt.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

### 23 - Mr Martin Holderness

Submission Number: 23 Submission Date: 24/10/24 06:08

Respondent: Company/Organisation: Hammond Land and Consulting Limited Name: mr James Hammond

On Behalf Of Company/Organisation: Name: Mr Martin Holderness

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Regulation 19 Local Plan does not meet the district's objectively assessed needs, and specifically in reference to self-build and custom housebuilding provision. The Local Plan is unsound/not legally complaint as drafted as it does not meet the tests of 'soundness' as set out in the National Planning Policy Framework (NPPF), paragraph 35.

The requirements of the NPPF 2023, and specifically paragraphs 60, 61, 63, 67 and 70 are of greatest relevance in the context of plan making requirements, and the process of local plan making now places significant emphasis on the ensuring that the Self Build and Custom Housebuilding (SBCH) statutory requirement is appropriately reflected in strategic policies, which are to be informed by a local Housing Need Assessment (HMA).

The clear and obvious attempt of St Albans District Council to speed up their plan preparation to avoid having to meet a higher housing need requirement should not be at the detriment of appropriately meeting the district's objectively assessed need for self-build and custom housebuilding.

Evidence that supports the representation comprises:

- The Bullens Green Lane appeal decision (references APP/B1930/W/20/3265925 and APP/C1950/W/20/3265926)

- South West Herts Local Housing Needs Assessment Update (March 2024)

- The South West Hertfordshire Local Housing Needs Assessment (September 2020)

- Email correspondence with Chris Briggs (Spatial Planning Manager) dated February 2024

The requirement of policy HOU5 for strategic sites to provide for SBCH provision will only yield 285 plots being permitted across the plan period to 2040/41. As a result, the shortfall against the statutory duty by 2040/41 has been modelled at 1,448 plots when applying the lowest demand figure for a single base period. The actual demand figure could, therefore, be materially higher at 2,168 plots. This figure does not take account of data provided by secondary sources.

Indeed, the number of permitted plots across the plan period (285) won't even satisfactorily address the shortfall in provision that persists at the end of base period 7 (October 2022), which stands at 593 plots. To express this in a different manner, the total amount of SBCH plots likely to be delivered through the implementation of policy HOU5 will only address 48% of the shortfall that persisted as of October 2022 (i.e. 285/593) *100 = 48%.

In accordance with Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012, the Regulation 19 draft of the St Albans Local Plan plainly fails to meet the test of 'soundness' as set out in the National Planning Policy Framework (NPPF) (2023), paragraph 35.

The Council must play its part by ensuring that when it submits its plan for examination the evidence base is complete. The evidence base that supports the Regulation 19 Local Plan is not complete.

Section 20(2) of the PCPA specifically states that the LPA must not submit the plan unless they think it is ready for independent examination. Having considered the Regulation 19 consultation responses, the LPA should only submit a plan if they consider it to be sound and there will not be delays of over 6 months during the examination because significant changes or further evidence work are required. It must not be assumed that examinations can always rectify significant soundness or legal compliance problems, which would require more than limited additional work to address. Before submission, the LPA must do all it can to resolve any substantive concerns about the soundness or legal compliance of the plan, including any raised by statutory undertakers and government agencies.

The legislation (PCPA, sections 20(7), (7A),(7B) & (7C)) allows for three possible outcomes to the examination. One of these outcomes is that Inspector finds the plan unsound and/or legally non-compliant as submitted, and that it is not possible to make it sound and legally compliant by making main modifications to it. In these circumstances the Inspector must recommend non-adoption of the plan. In practice, the LPA would be asked to consider withdrawing the plan before any such recommendation was made.

It is contended there is a high probability that such an outcome, whereby the LPA would be asked to consider withdrawing the plan, is a step that could be taken by the appointed Inspector to examine the emerging St Albans Local Plan if the Regulation 19 Local Plan in its current format is submitted for examination.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

St Albans City & District Council will need to undertake further work to appraise and identify (allocate) a sufficient number of sites to meet the statutory requirement for self-build and custom housebuilding through a revision to its Regulation 19 publication.

It is recommended that tackling the acute shortfall in provision would be most proactively achieved by maximising the number of small and medium-scale sites, and identifying opportunities for community-led self and custom build sites alongside provision of a sufficient number of serviced plots in line with the statutory duty will form a key part of this exercise.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Representation against policy HOU5 of the Regulation 19 Local Plan on behalf of M Holderness_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

### 69 - Trustees of the G A Simons Family Settlement

Submission Number: 69 Submission Date: 05/11/24 12:42

Respondent: Company/Organisation: Bidwells Name: MR Derek Bromley

On Behalf Of Company/Organisation: Trustees of the G A Simons Family Settlement Name:

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Policy Objections**

18) The policies LG4 h) and DES3 a) provide a density of 40 d.ph as a minimum, these are simply unrealistic and unobtainable when it comes to small sites (up to 9 dwellings) and to a lesser extent for medium sites. These sites are not of a size which can accommodate a housing mix to achieve this density. As an example, a site proposed for 9 self- build/custom build (Policy HOU5) would be for individual plots for detached dwellings, (such as the successful council scheme Graven Hill, Bicester, Oxfordshire). Building co -operatives would be needed where the plots are not for detached dwellings, these are fraught with challenges which deters interest. Whilst it is recognised there are proposed requirements for such plots in the Broad Locations, discussions with housebuilders indicate is they are seldom taken up. They are unattractive to the market. Cause many issues concerning site security/ health and safety procedures and responsibilities. A minimum density for small/ medium sites should be deleted from the policy wording.

19) Policy HOU5 d) needs further wording that where the custom/self- build plots have not sold in the open market, then if offered to the Council or Registered Provider it will be at the open market value and failing that sold to a small/medium enterprise housebuilder.

**Is the Plan Justified**

20) Given the above, the Plan is not justified as an appropriate strategy as it does not take into and its evidence base for not doing so is not proportionate or indeed reasonable. In respect of Sites A and B the Councils Green Belt study conclusions to not stand up to scrutiny.

21) The plan policy for minimum densities to be applied to small/medium sites should be deleted. New wording should be inserted where this is an aim, but to have regard to the surrounding character and density and uses.

22) Whilst the Government's final definition of Grey Belt and the inclusion of Grey Belt as not being inappropriate development within the Green Belt, has yet to be confirmed; the proposed wording for Grey Belt includes *'any other parcels and/or areas of Green Belt land that make a limited contribution to the five Green Belt purposes'.* The case for the Trustees is that Sites A and B do not contribute to the five purposes. It is not the case these sites make a "limited contribution" to Green Belt purposes, but rather they make "no contribution". The Government consultation "Proposed reforms to the NPPF and other changes to the planning system" 24/09/2024 suggests an effective way of providing guidance and refers

*"Grey Belt Land which makes a limited contribution to the Green Belt purposes will:*

1. *a) Not strongly perform against any Green Belt purpose; and*
2. *b) Have at least one of the following features : Land containing substantial built development or which is fully enclosed by built form.*

*ii Land which makes no or very little contribution to preventing neighbouring towns from merging into one another.*

*iii Land which is dominated by urban uses, including physical developments*

*iv Land which contributes little to preserving the setting and special character historic towns".*

Sites A and B satisfies all Grey Belt tests.

**Has The Plan Been Positively Prepared**

23) This is a qualified objection. Our client raises no objection to the overall housing provision based upon the current standard methodology, though has issues with the housing delivery during the plan period given the Council only has a 1.5 years housing land supply. Should the Governments new standard methodology apply for the purposes of this Plan, then there is a gross under provision of housing. The new methodology would increase the housing numbers from 885 d.p.a. to 1,554 d.p.a., a 75% increase.

24) Whilst there have been Ministerial Statements regarding when the new standard methodology for housing need will apply, nothing is certain as to the final wording and timing when it will apply.

25) The current expectation based upon the Council's programme is that the local plan will be submitted before the Government's proposed Standard Methodology for determining housing need takes effect. It is important a Plan is in place given the acute housing shortfall with only a 1.5 years housing land supply and to enable early new housing delivery. A further period of time without an up to date Plan will only add to an already difficult situation, so getting the Plan to Adoption is important. However, given the circumstances the Council has found itself, with a significant risk of unmet housing need, it is very important to identify and allocate in this plan more sites where possible and appropriate.

26) Given that planning policy and the plan process is a bit of a "moveable feast" the expectation in 25) above, may not be realised and there is no certainty. It is in any event clear the proposed housing provision will not meet the future development needs during the local plan period and an early review will be required.

27) In the event the new Standard Methodology does not apply to this Local Plan and the Council meets the deadline for submission, then our client is of the view the Council should commit to an immediate review following the Adoption of the Plan. There will a period between the Inspector's report and the Council's formal Adoption for Council officers to start the preliminary internal processes.

**Housing Trajectory**

28) The Council's housing trajectory (Table 3.2) for delivering housing from the Broad Locations is overly optimistic given the timelines for all the necessary planning approvals and lead in times for infrastructure.

29) Lichfields, produced a report in 2020 "Start to Finish" which reviewed build out rates of large housing sites across te country. This showed that nationally the average planning approval period for large sites of say 1,000 dwellings was 4.6 years. Given the local councils do not embrace new development but are reluctant participants when it comes to development on green fields, locally the time is longer. The Lichfield report also analyses tbuild out rate on large sites. The averages for sites 500-1 ,000 was 68 d.p.a., 1,000-1499 was 107 d.p.a. It is generally acknowledged that the early development years of schemes the completion rates are far less than the average. The build out rate in the early years for the Broad Locations is again overly optimistic.

30) My experience of the delivery of large sites in Hertfordshire, a county which has been reluctant to housing growth for decades, is that it will not be until the early/mid 2030's that many of the "Broad Locations" begin to deliver housing, the exceptions possibly being part of West Redbourn and part of North St Albans where permission has either granted or the application is well advanced. I set out below examples I have been involved with or are aware.

31) **Hemel Hempstead.** Allocated site for 900 dwellings in the Sites Allocations, Adopted 2017. Hybrid Planning Application submitted 21/12/2018. Granted 03/12/2021. Price negotiation with land owners and following approvals of pre- commencement conditions, start date on site November 2024. First dwelling for occupation November 2025. Total time for an allocated site from planning application to delivery of first dwelling 7 years.

32) **Stevenage.** Allocated site for 1,350 dwellings in Adopted Local Plan 22/05/2019. Hybrid planning application 07/04/2021 . Following Section 106 negotiations expected planning permission November 2024. There will be a period of negotiations on value which involves the Council and Homes England, with probable reference to an Expert, allow 18 months. Planning precommencement condition approvals, allow further 9 months. Lead in time for infrastructure to first dwelling allow further 18 months. Total time for an allocated site from planning application to first occupation just under 7.5 years.

33) **Hitchin.** Outline Planning Application for up to 700 dwellings submitted in advance of Local Plan on the 26/04/2018. Site allocated in the Adopted Local Plan November 2022 for 700 dwellings. Awaiting a decision. First occupation is likely to be in excess of 9 years from application.

34) On the basis of the above it is my view a reasonable expectation is that for large sites there is a 7 year gap between the submission of a planning application to first delivery of a completed dwelling. Given that to date with a couple of exceptions, applications on large sites have not been registered I think my estimate of early to mid 2030's is supported by the evidence. There are varied reasons why these sites have taken so long (continued public and councillor resistance, officer workload) .This will apply to all sites. That is why the timescales envisaged in the Housing Trajectory are not in some instances likely to be achieved. In my view based upon evidence, the first housing on most of the larger sites will not be delivered until the early/mid 2030's.

35) From the Councils own housing figures there is a substantial shortfall in delivery up to the 2030's. This under provision needs to be reduced with more small sustainable sites. Small sites are usually less constrained by infrastructure delivery because this is already available, or complicated Section 106 agreements involving both District and County. Early delivery is essential given the Council only has a 1.5 year housing land supply.

36) A greater number of smaller sites which do not have constraints to delivery need to be identified. Sites A and B are an obvious example.

37) The Council's identified urban sites include many which are Council owned comprising many garage blocks with poor access, city and town car parks and community buildings. It is very unlikely the total housing numbers indicated from these sites will be achieved. There will be objections to the loss of vehicle parking land, this loss of spaces creates further pressure for "on street" parking and in the case of public car parks the impact this will have upon the vitality and vibrancy of the town centres. Any loss of car parking provision or community buildings is likely to be strongly resisted by the local community. Access to many is substandard for residential development and comprise of back land plots out of character to the surrounding area.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**The Policy wording in LG4 h) and DES3 a) should be amended to provide greater flexibility for densities on small /medium sites.**

**The Policy wording in HOU5 d) should be amended to make it clear the price to be paid by the Council or Registered Provider will be at the open market value and failing that, the plots can be sold to small/medium enterprise housebuilders.**

1. G A Simons Reg 19 Subs 2024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

It is important that the Council is questioned upon its approach to Green Belt Release given the apparent inconsistences where some sites have been identified and other more obvious ones omitted. The Councils minimum density for all sites irrespective of size is not reasonably achievable for small sites. The housing trajectory is overly optimistic. It's reliance on urban sites delivering the numbers indicated, is not reasonably achievable given the constraints of many of the sites.

It is evident that more sites need to be allocated to meet the housing numbers, particularly in the short term.

The alterations to this policy reflect the requirement for 3% self-build and custom build homes out of the total number of homes within the site (rather than the total 'plots') is helpful as it adds clarity to this policy. The addition of wording to make clear that this is not required in entirely flatted developments is also considered useful clarity.

7.2 Hallam and St Albans School support the intention to deliver good quality housing that meets the needs of all parts of the society. They do however note some concerns with the deliverability of certain aspects of the policy.

7.3 Specifically, the fifth bullet point of Strategic Policy SP4 states that the Council seeks to "to diversify the housing market and increase consumer choice through encouraging Self-build and Custom Housebuilding in sustainable locations". The North St Albans scheme allows for sufficient land to accommodate self and custom build plots to be provided, however the wording of the policy is strict in suggesting that housing diversity can only be encouraging through provision of such housing. This can be problematic on some sites due to viability, and therefore the policy should be appropriately worded to ensure that this is not the only option available. As a suggestion, the bullet point should be amended to add "where appropriate".

7.4 Similar conclusions are made in respect of Policy HOU5.

**HOU5 –Self Build**

The policy is unsound as it is unjustified and into effective

1. The Council are suggesting that where self-build plots are not sold after 12 months of marketing they must remain on the open market or be offered to the Council or registered provider before being built out by the development for market housing. There is no justification for requiring plot sot be offered to registered providers or the council. These plots are for plots allocated for market housing and as such if there is no demand for this from self-builders after 12 months, they should automatically go back to the developer to be built out as market housing and reduce the delay in the delivery of much need new homes. HBF would also disagree that plots should remain on the market for self-build following 12 months of marketing. This provides too much uncertainty for the developer as to how those houses will be delivered and the need to schedule these into the build out of the site.

Richborough recognise that SADC has a duty to deliver self and custom build plots to meet the local need recorded on the local self-build register. In this regard Richborough is alive to the prospect of providing plots at West Redbourn.

Policy HOU5 b) encourages self and custom-building provision on development for 10 homes or more in suitable locations. Criterion a) of HOU5 requires Broad Location allocations to provide 3% of total dwellings to be self and custom build (CSB) plots.

The LHNA sets out a shortfall in CSB of 585 plots, which is based on a comparison of supply to October 2022 with need to October 2022. The need is based on the St Albans CSB register, although it is noted that the register does not include any specific eligibility criteria or a local connection test. This in itself throws into question whether an accurate assessment of need can be made using the register as a data source. Given the specific 3% need identified by Policy HOU5 a) SADC should publish evidence demonstrating how the requirement has been calculated with regard to both evidenced local need, the number and capacity of strategic sites and viability considerations.

This is important to ensure the policy is taking a sound approach in setting a specific requirement for strategic sites to deliver CSB plots, rather than taking a flexible approach and encouraging CSB provision so that delivery can be driven directly by local market demand.

**Policy HOU5 – Self Build**

*The Policy is unsound as it is not justified or effective.*

The DLP sets out where self-build plots are not sold after 12 months of marketing they must remain on the open market or be offered to the Council or a registered provider before being built out by the developer for market housing. We are not aware there is any justification for requiring plots to be offered to registered providers or the Council. These plots are for plots allocated for market housing: as such if there is no demand for this from self-builders after 12 months they should automatically go back to the developer to be built out as market housing and reduce the delay in the delivery of much need new homes. We also question the basis upon which the Council are seeking that plots should remain on the market for self-build following 12 months of marketing. This provides too much uncertainty for developers as to how those houses will be delivered and the need to schedule these into the build out of a site.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

**CONCLUSION**

These representations have been prepared on behalf of Moralis Group in response to the Council's draft Local Plan (Regulation 19), specifically in respect of Land to the South of Lye Lane (the "Site").

In the first instance, we are significantly concerned that the Council is deliberately speeding up its local plan process to benefit from the transitional arrangements set out in the proposed updated NPPF. By rushing to make this deadline, we are concerned there is insufficient time to properly review & submit a 'sound' local plan.

The Council's current standard methodology figure is 885dpa. This will be increasing to 1,544dpa - an uplift of +659dpa under the revised standard method. We therefore consider the Council is only delaying the inevitable by moving forward at pace with the DLP now. We consider it would be much more prudent for the Council to delay submission of this DLP and seek to proceed here on with an updated DLP which will be in line with the requirements of the new NPPF.

Regarding the Duty to Cooperate, no detail has been provided to whether St Albans has engaged with any of its neighbouring Council's or other parties to discuss these issues. We are therefore concerned that the Council has not worked proactively with its neighbours to address any cross-border issues such as honey needs across the sub region. Furthermore, it is clear that there is a significant shortfall of housing within the SWH HMA, and it is unclear if the Council has taken this into account and whether it could assist in delivering unmet need from elsewhere.

We are also concerned the Council is seeking to deliver a large majority of its housing through large scale strategic sites, which usually have long lead in times so do not contribute to the housing supply in the early years of the plan.

Considering the above, we consider the Council should leave no stone unturned through this current plan review and the DLP to identify and allocate appropriate additional sites that could contribute to delivering and meeting more of the areas housing requirement/needs.

We consider our client's site can make a meaningful contribution towards housing land supply such that it can form part of a *sound* spatial strategy. Whilst it currently lies within the Green Belt, it does not make a strong contribution to the purposes of including land within the Green Belt.

Given the significant housing shortfall within the HMA, significant affordable housing shortfall within St Albans, and the significant increase in the Council's housing targets within the proposed NPPF, we consider the Council should seek to release additional land from the Green Belt and allocate this for housing.

We therefore do not consider that the Council's currently local plan is 'sound' as it is not positive prepared, justified, effective or consistent with national policy.

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Policy HOU5: Self-Build and Custom-Build Housing**

The policy proposes that housing sites of 100+ homes would be required to provide 3% of developable plots for self and custom build housing. Hill consider that there are many practical issues with developing sites that include self and custom build plots as there are often multiple contractors and large machinery operating on-site. From both a practical and health and safety perspective, it is difficult to accommodate the development of single plots by individuals alongside the construction of market and affordable homes.

The Council should first consider other opportunities to meet this demand, including working with developers and land owners to identify additional sites suitable for self and custom build plots that can meet their needs, in accordance with paragraph 57-025 of the PPG. If the strategy for a blanket approach of 100+ dwellings to meet the requirement remains, then justification should be provided.

Part d) of the policy provides a mechanism as to when self and custom-build plots should return to the developer to be built out. Hill does not consider it necessary for these homes to be offered to the Council or a registered provider prior to being bult out by the developer. The plots are not part of the affordable housing provision on site, therefore following marketing they should return directly to the control of the developer. The 12-month period for marketing is more than sufficient to establish if there is a need for the plots as self/custom build.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

## 372 - Gate Herts (Gypsy & Traveller Empowerment, Hertfordshire)

Submission Number: 372 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Name: Michael Hargreaves

On Behalf Of Company/Organisation: Gate Herts (Gypsy & Traveller Empowerment, Hertfordshire) Name:

Comment Number: 6

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Self-build sites provide a potential way of meeting Gypsy and Traveller residential needs, but as drafted, the policy can be read to imply that housing for Gypsies and Travellers would be excluded, which would be discriminatory. Modifying the plan to include provision for Gypsies and Travellers would potentially be particularly valuable for at least two reasons: firstly on the basis that many Gypsies are self-builders: they have the construction skills and develop their sites themselves; and secondly because of the availability of the land, which Policy HOU5 states must be reserved for self-build provision within Broad Locations and housing sites with a capacity for 100 + dwellings.

**7.0 Legal Compliance**

7.1 The implication of the flaws in the Local Plan identified in the above paragraph, not least in failing to making any allocations for Gypsies and Travellers, means that not only is the plan not sound, it is also not legally compliant on the basis:

- It indirectly discriminates against Gypsies and Travellers (whose ethnicity is a protected characteristic under the Equality Act) without adequate justification, contrary to s.19 of the 2010 Equality Act; and
- Its approach is contrary to the Public Sector Equality Duty under s.149 of the Act.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Add the words 'including for Gypsies and Travellers' to the first line of the policy so it reads:

*With regard to Self-build and Custom Housebuilding, including for Gypsies and Travellers, the Council: ….*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Annex 1 Traveller Sites through Local Plan Allocations_[R].pdf
2. Annex 2 Inspectors letter to GNLP re GT sites 190122_[R].pdf
3. Herts Gate Reg 19 Rep 061124_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

GATE Herts is one of the leading locally based Gypsy and Traveller organizations in England and the only significant Gypsy & Traveller organization in Hertfordshire. In our submission the plan is unsound and not legally compliant in regard to provision for Gypsies. We would contribute the lived experience of Gypsies and Travellers and substantial experience of planning for Gypsies and Travellers to the hearings.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## HOU6 - Gypsies, Travellers and Travelling Show People

### 83 - Affinity Water

Submission Number: 83 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Name: Lita Khazaka

On Behalf Of Company/Organisation: Name: Affinity Water

Comment Number: 11

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Affinity Water does not wish to engage in substantial dispute with the council at the forthcoming Examination-in-Public but observes a number of problems in the council's approach towards the provision of housing which further confirms its views that the housing target should be increased and more sites brought forward. It offers its observations to help the council as an interested party. At Policy HOU 1 – Housing Mix, the one size approach to housing mix on all schemes of 10 or more homes is too restrictive. More flexibility in mix would be appropriate especially for an ageing population. For example, an inner city flatted scheme is likely to be more suitable for smaller and older households (including downsizers) than a new build scheme on an edge of centre Broad Location allocation. The council is urged to adopt the same flexible approach to housing mix as it does when seeking to apply car parking standards in different parts of the district.

Policy HOU 6 – Gypsies, Travellers and Travelling Show People has more serious deficiencies. The evidence base the council has commissioned (the GTAA) directs the council to plan for 80 households who meet the "planning definition" of gypsy or traveller, a further 19 pitches for undetermined households and seven plots for travelling showpeople. The Draft Local Plan policy only allocates between 30 and 40 pitches for travellers on two site allocations and none for travelling showpeople. The council does not have an established track record of approving new sites for gypsies and travellers in the Green Belt or other windfall sites to make up the shortfall.

In the context of very high land prices and restrictive Green Belt policies, it is submitted that this draft Local Plan will be found unsound on this ground alone. Potentially the council may also be in breach of its Public Sector Equality Duty by not planning for the needs of this section of the population and, thus, its plan found to be legally defective too.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The council could address this defect by allocating more pitches and plots on all of its Broad Location (Policy LG1) site allocations (that is, sites of more than 250 homes), an established practice across the Home Counties. This would theoretically result in a reduction in overall "bricks and mortar" housing on these proposed site allocations but it further reinforces Affinity Water's view that other sites are needed for conventional housing to meet this widening shortfall.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Affinity Water does not wish to debate the matters raised in this part of its submission.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**158 - Mr Myles Green**

Submission Number: 158 Submission Date: 07/11/24 12:28

Respondent: Company/Organisation: MH Planning Name: Mr Michael Hargreaves

On Behalf Of Company/Organisation: Name: Mr Myles Green

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

1. Through this representation Mr. Green is objecting to the failure to remove the site that is in his ownership to the south-east of Luton Lane, Redbourn, St Albans AL3 7PY from the Green Belt and to allocate it for Gypsy and Traveller residential use. The site is shown on the plan, Luton Lane Proposed Site Allocation. Mr Green is proposing that the site is allocated for a Gypsy and Traveller residential site with at least 15 pitches, together with a single house for the site warden.
2. Mr Green[redacted], James Cash proposed the site through the St Albans Local Plan 2041 Call for Gypsy and Traveller Sites. At that stage they proposed that the site should be allocated for either Gypsy and Traveller residential use or for housing development. Having reviewed the situation, they are now proposing that the site should be allocated for Gypsy and Traveller residential use plus a single warden's house.
3. Mr Green confirms that the site is available and can be brought forward for implementation within the next two to three years, and that it has capacity for at least 15 residential pitches, plus a warden's house and appropriate landscaping.
4. Green's representations complement and should be read with the representations on the Reg 19 St Albans Local Plan 2041 submitted by GATE Herts, which help to provide the justification for allocating Mr Green's land in the way he suggests. GATE Herts' representations provide evidence that:

- The St Albans Gypsy and Traveller Accommodation Needs Assessment, ORS, September 2024 is not consistent with national policy in its failure to engage effectively with Traveller organizations, and does not represent a robust evidence base to inform the preparation of the Local Plan;
- Policy HOU6 is profoundly inadequate and unsound, including in its failure to set pitch targets for Gypsies and Travellers and to identify a supply of specific deliverable or developable sites;
- Mr Green strongly supports GATE Herts' objection to the application of Policy 10 f), relating to contributions to the Chiltern Beechwoods SAMMS and SANG, to Gypsy and Traveller sites without evidence of whether such recreational activity is relevant to Gypsies and Travellers;
- Mr Green supports GATE's argument that the plan is not legally compliant because it is discriminatory.

5. Mr Green supports the actions and Modifications proposed by GATE to address the failures of the plan to be sound and legally compliant.
6. Mr Green makes the point that in the St Albans case his site is particularly important because of its ability to ensure the delivery of pitches at an early date. All the other sites identified through the Calls for Sites are in other people's ownership, and are dependent on confirmation of their willingness to bring the land forward for development. His land is available and he is fully committed to implementation at an early date.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**172 - Mr and Mrs Robert and Karen Choppin**

Submission Number: 172 Submission Date: 07/11/24 14:30

Respondent: Company/Organisation: Studio LK Name: Lita Khazaka

On Behalf Of Company/Organisation: Name: Mr and Mrs Robert and Karen Choppin

Comment Number: 6

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

4.1. Studio LK observes other problems in the council's approach towards the provision of housing which further confirms its views that the housing target should be increased and more sites brought forward.

4.2. Studio LK's comments on Policy HOU 1 below are offered on the basis of the substantial amount of site appraisal and design the company does on sites across the South East of England.

4.3. At Policy HOU 1 – Housing Mix, the one size approach to housing mix on all schemes of 10 or more homes is too restrictive. More flexibility in mix would be appropriate especially for an ageing population and in the context of a continued forecast drop in mean household size over the lifetime of the Draft Local Plan. For example, a flatted scheme in the centre of St Albans or Harpenden is likely to be more suitable for smaller and older households (including downsizers) than a new build scheme on an edge of centre location such as the Smallford Stables site (Site Allocation PX). Studio LK suggests that the council adopt the same flexible approach to housing mix as it does when seeking to apply car parking standards in different parts of the district.

4.4. Policy HOU 6 – Gypsies, Travellers and Travelling Show People has more serious deficiencies. The evidence base the council has commissioned (the GTAA) directs the council to plan for 80 households who meet the "planning definition" of gypsy or traveller, a further 19 pitches for undetermined households and seven plots for travelling showpeople. However, the Draft Local Plan policy only allocates between 30 and 40 pitches for travellers on two site allocations and none for travelling showpeople. The council does not have an established track record of approving new sites for gypsies and travellers in the Green Belt or other windfall sites to make up the shortfall. The council's own evidence base confirms that neighbouring authorities will not take up the shortfall.

4.5. In the context of very high land prices and restrictive Green Belt policies, it is submitted that this draft Local Plan will be found unsound on this ground alone. Potentially the council may also be in breach of its Public Sector Equality Duty by not planning for the needs of this section of the population and, thus, its plan found to be legally defective too.

4.6. The council could easily address this defect by allocating the shortfall of pitches and plots on all of its Broad Location (Policy LG1) site allocations (that is, sites of more than 250 homes), an established practice across the Home Counties in recently adopted Local Plans. This would theoretically result in a reduction in overall "bricks and mortar" housing on these proposed site allocations but it further reinforces our client's view that other sites are needed for conventional family housing to meet this widening shortfall, especially those with easy access to existing social infrastructure such as the Smallford Stables site.

4.7. Studio LK therefore offers Smallford Stables (Site Allocation PX) on this basis.

**232 - Hertsmere Borough Council**

Submission Number: 232 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Hertsmere Borough Council Name:

Comment Number: 6

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Following comments made by Hertsmere Borough Council it is noted that alterations to HOU6 – Gypsies, Travellers and travelling Show People following the recent Gypsy, Travellers and Travelling Show People the council have identified a need for 80 designated pitches. St Albans District has stated that many of these new pitches will come through the identified 12 Broad Locations, each of which can accommodate up to a maximum of 20 pitches. The determination of the number of pitches will rely on assessment of a variety of factors including proximity to road network and overall development site scale. Hertsmere supports the decision to plan to meet the full identified need for 80 pitches over the plan period (as identified in the GTAA).

### 233 - Central Bedfordshire Council

Submission Number: 233 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Central Bedfordshire Council Name:

Comment Number: 12

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

During the Regulation 18 consultation, CBC sought clarification on how the identified need for Gypsies and Travellers was to be met within St Albans given there were no proposed site allocations. We note that two allocations are now included in policy HOU6 with two 15 to 20 pitch sites to be delivered within the East Hemel Hempstead South and East Hemel Hempstead Central allocations. The allocation of these two sites is supported, as is the recognition and confirmation within the Gypsy and Traveller Accommodation Needs Evidence Paper, that the G&T Needs arising within St Albans, can and will be met in full within the District.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 271 - Mr Ronan Leydon

Submission Number: 271 Submission Date: 08/11/24 09:32

Respondent: Company/Organisation: Dacorum Borough Council Name: Mr Ronan Leydon

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Point 1:** A revised Gypsy and Traveller Accommodation Assessment (GTAA) has been produced for St Albans District Council by ORS consultants (September 2024). This shows a need for 80 pitches for households that meet the planning definition over the 2024-2041 Plan period, with 44 of these pitches required in the first five years (2024-2029). There is also a need for 7 plots for travelling show people, all within the first five years.

However, despite paragraphs 9 and 10 in the Planning Policy for Traveller Sites, Policy HOU6 does not set pitch/plot targets for the Plan period or a supply of sites for the first 5 years, years 6-10 or years 11-15.

As a result, the policy is unsound because it is not positively prepared or consistent with national policy. Dacorum recognises that the GTAA is very recent and St Albans Council has not been able to take it into account before submitting the Local Plan for public examination. Nevertheless, this matter needs to be rectified through the examination process.

**Point 2.** We also consider that Policy HOU6 is unsound, as it is not justified or effective, for the reasons explained below.

Dacorum is concerned that the only proposed new sites are both at East Hemel Hempstead, involving two sites for "up to 15-20 pitches". This wording is not effective it means "up to 20 pitches".

Furthermore, we consider that the proposed sites are too large, based on the advice in paragraphs 4.7 and 4.8 of the 'Designing Gypsy and Traveller sites: good practice guide' (2008) that sites should not normally have more than 15 pitches. Although that document was withdrawn in 2015, there is no further evidence more up to date in terms of design guidance for England.

The area close to the proposed new sites already has 62 pitches:

- Dacorum: 30 pitches at Three Cherry Trees Lane in Hemel Hempstead.

- St Albans: 17 pitches at Tullochside (off the B487 Hemel Hempstead-Redbourn Road) and 15 pitches at Ver Meadows, Redbourn.

Our view is that the existing and proposed provision would result in an over-concentration of gypsy and traveller sites to the east and north east of Hemel Hempstead and the Redbourn area.

We are also concerned that the East Hemel Hempstead (Central) Broad Location does not offer a suitable residential environment for a a gypsy and traveller site, as this broad location is proposed for employment development.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We consider that the following modifications are necessary to make Policy HOU6 sound:

- The policy should set pitch/plot targets for the plan period and include a supply of sites for the first 5 years, years 6-10 and where possible years 11+, based on the evidence in the Gypsy and Traveller Accommodation Assessment. This is necessary for the policy to be justified, effective and consistent with national policy.

- The number of pitches proposed on the East Hemel Hempstead (South and Central) Broad Location results in overconcentration in a particular area. At least one site should be deleted and the other, as a minimum, reduced in scale and not be located in close proximity to already established sites in the area. This is necessary for the policy to be justified and effective.
- Additional gypsy and traveller sites should be identified elsewhere in St Albans District, on strategic housing sites and/or in other locations, sufficient to deliver needs identified in the Gypsy and Traveller Accommodation Assessment. This is necessary for the policy to be justified and effective. It will also ensure clarity that St. Albans needs are being met in full within its administrative boundaries.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Covering letter DBC response to St Albans Draft Local Plan_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Gypsy and Traveller sites is a Duty to Co-operate matter. Also the two proposed gypsy and traveller sites are in Hemel Garden Communities, which is a key strategic issue for the Dacorum and St Albans Local Plans.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**283 - Redbourn Parish Council**

Submission Number: 283 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Troy Planning & Design Name: Mr Troy Hayes

On Behalf Of Company/Organisation: Redbourn Parish Council Name: Redbourn Parish Council

Comment Number: 15

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*Refer to Attached submission letter for whole response and figures.*

**Policy HOU6 (including Gypsy and Travellers)**

14.13 The supporting text to Policy HOU6 states: "Evidence shows that there are future accommodation needs of Gypsies and Travellers over the Plan period. The Plan therefore provides additional accommodation opportunities [...]". However, the supporting text and the Policy does not explain what evidence is being referred to and it does not state what the actual need is for Gypsies and Travellers and the need for Travelling Showpeople. The Policy states that the Council to provide for the accommodation needs of Gypsies and Travellers and Travelling Showpeople the Council will:

*“a) Consider proposals for new accommodation with regard to the potential and suitability of the following:*

1. *New sites as part of Broad Locations for development that should accommodate a maximum of 20 pitches (each pitch being designed to accommodate 1 family / household);*
2. *Reconfiguring or extending existing sites; and*
3. *Sites with temporary permissions.”*

14.14 It appears from this Policy that SACDC is not identifying sites and seeks to rely on a criteria-based policy. However, this criteria-based policy is not effective and not justified. Firstly, it does not set out a specific prioritisation of what constitutes the most suitable site: are new sites the priority over existing sites? Are new Broad Locations the Council’s priority to deliver new sites? Is the extension of existing sites a priority? And temporary permissions? In the case that the Council’s priority is the order of the three points (i, ii, and iii), which is not clear in the policy text, is the priority for Broad Locations first when there may be suitable extensions of existing sites or sites with temporary permission? What is the justification for this?

14.15 The Policy then goes on to state: *"Based on a variety of factors including proximity to the road network most used by Gypsies and Travellers; development site scale; area topography and landscaping opportunities; and the wide range of uses to be provided in the Broad Locations for development; require provision of the following new sites will be required:*

*East Hemel Hempstead (South) Broad Location - one 15-20 pitch site*
*East Hemel Hempstead (Central) Broad Location - one 15-20 pitch site"*

14.16 It appears from this section of the Policy that SACDC is attempting to concentrate all of the Gypsy, Traveller and Showpeople provision East of Hemel Hempstead. This would lead to even further concentration of sites already in the area including the existing site at Tullochside Farm,

which is between Hemel Hempstead and Redbourn. The suggestion that up to 40 pitches could be delivered at East Hemel Hempstead would be close to the existing Three Cherry Trees travellers' site in Dacorum.

14.17 It is important to note that the Regulation 19 Dacorum Local Plan also proposes 8 additional pitches at North Hemel (see paragraph 3.26 and Strategic Policy H5 - The Travelling Community below) :

*"However, more pitches are required to meet the need in full. Therefore, we have identified an additional site within the larger housing allocation at North Hemel for 8 pitches. This will be close to existing and newly emerging services and facilities, and is better placed to meet the needs arising locally from the Three Cherry Trees Lane site".* (paragraph 3.26)

*Figure 14.3 Dacorum Regulation 19 Local Plan Policy H5 – The Travelling Community*

14.18 This will clearly lead to an over concentration of new sites and pitches for Gypsies and Travellers without demonstration that this strategic location is in proximity to future needs.

14.19 As we establish in these representations, the delivery of Hemel Hempstead related development is likely to take much longer than the Draft Local Plan assumes. Therefore, seeking to locate the need at East Hemel Hempstead may not meet the need when it is required. SACDC should consider other locations for meeting the needs of the district.

14.20 For the reasons raised above, RPC considers policy HOU6 to be **unsound as it would not be effective, it is not positively prepared and justified.**

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

...

7.8. The Local Plan Part B Allocation for site H4 includes a number of development requirements which we list below. We seriously question how all of these requirements can fit onto a site when its strategic constraints are considered. We list a number of these requirements below:

- SANG Requirements
- BNG Requirements (aims to exceed 10% minimum target)
- High quality design and buffer zones to mitigate adverse impacts from motorway noise and air pollution and address the Buncefield oil depot and pipelines
- There is a major surface water flow path across the centre of the broad location, and three associated smaller flow paths
- Three extra-care facilities comprising of 70-80 self-contained units in each facility, two 70-80 bed nursing homes and 9 supported living units for people with disabilities.
- One new 3FE and one new 2FE primary schools
- 15-20 pitches for Gypsy and Travellers using best practice on location and design
- Land will be safeguarded for access improvements associated with Junction 8 of the M1 motorway, in case it is required to come forward for junction improvements

- The layout and design of development should minimise any harm to the setting and significance of listed buildings
- Recreation space and other community facilities
- Take appropriate account of these Environmental Constraints: Source Protection Zone (SPZ) 1; Bedrock Aquifer.

7.9. Whilst one could suggest that it will 'all be solved' in the masterplanning work, this is setting the Local Plan up for failure and the delivery of 'over development' on previous Green Belt land.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

For the purposes of clarification, it is the Association's considered view that the Local Plan is unsound, and the Council has failed to discharge its Duty to Cooperate.

The proposed scale and distribution of growth has not been justified, it has not been positively prepared, and the policies are ineffective. LGVA considers that the delivery of growth at the Hemel Garden Communities has not been demonstrated through technical evidence including the Council's Green Belt Review, Infrastructure Delivery Plan (IDP), Viability evidence and Transport evidence.

**Gypsies, Travellers and Travelling Show People**

CHPC supports the intent of **Policy HOU 6** to establish a positive and sustainable framework for accommodating the needs of Gypsies, Travellers, and Travelling Show People within the district. The policy's focus on guiding development to more sustainable locations, improving quality of life, and addressing issues like environmental impact and Green Belt protection aligns with broader goals for community cohesion and sustainable land use.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The inclusion of M4(2) and M4(3) accessibility standards, requiring that housing be located near public transport and local facilities where possible, reflects the Council's commitment to equitable access. However, as with accessible housing in rural areas, CHPC notes that this requirement may be challenging for Gypsy and Traveller sites, especially those in more rural or semi-rural locations where public transport and amenities are limited. A rigid application of this clause could restrict site options for these communities, potentially affecting their ability to settle in areas that

suit their cultural and social needs. CHPC suggests a degree of flexibility in applying these standards, with a focus on improving local transport links and access to amenities when rural or existing sites are utilised.

CHPC also appreciates the policy's emphasis in clause 4.21 on preventing unauthorised sites through proactive planning, which benefits both the Gypsy and Traveller communities and the wider community by reducing conflicts and supporting integration. The option to reconfigure or extend existing sites (clause ii) and to consider sites with temporary permissions (clause iii) offers practical solutions that can support stability while maintaining environmental and planning standards. However, the Council encourages SADC to ensure that any reconfigurations or extensions are carefully managed to respect the character of the surrounding area and avoid encroachment into Green Belt land.

Overall, CHPC supports the balanced approach of Policy HOU 6 but recommends ongoing consultation with Gypsy and Traveller communities to ensure that site allocations and accessibility standards reflect both their needs and the constraints of rural areas within the district.

**372 - Gate Herts (Gypsy & Traveller Empowerment, Hertfordshire)**

Submission Number: 372 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Name: Michael Hargreaves

On Behalf Of Company/Organisation: Gate Herts (Gypsy & Traveller Empowerment, Hertfordshire) Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy HOU6 is profoundly inadequate and unsound.

4.2 It ignores the para 9. PPfTS requirement to set pitch targets for Gypsies and Travellers which address likely permanent and transit needs.

4.3 It ignores the para 10 a) and b) PPfTS requirement to identify a supply of specific deliverable sites, and specific developable sites or broad locations for growth, although the proposals for two 15 -20 pitch sites in East Hemel Hempstead South and Central may be equated with broad locations for growth.

4.4 The principles in HOU6 a), b) and c) are too vague to represent adequate criteria to guide land supply allocations, as required by para 11 PPfTS.

4.5 We would also argue that criteria based policies are required to provide a basis for decisions on sites which are not allocated.

4.6 We do not support the degree of emphasis in the Plan on new sites within 'Broad Locations for development'. As we indicated in our Reg 18 reps:

- There is a huge gap between allocation in the Plan and getting sites delivered on the ground. As shown by the examples in Annex 1 across the country, the record on delivery of allocations in major urban extensions etc is extremely poor. The reasons for this include that site developers do not welcome Gypsy provision and will put efforts into avoiding, postponing, or watering down provision. At the same time, there is little political advantage for local planning authorities in promoting sites, and they may be open to being persuaded not to include or to delay provision;
- One of the starting points for developing sound proposals, will be through an understanding what Gypsy people actually want. Provision which does not take account of Gypsy & Traveller needs is unlikely to be successful..
- Among the questions that needs to be addressed in developing proposals for sites delivered as part of major urban extensions are: Will these sites be for private ownership by Gypsy & Traveller owner-occupiers, or social rented? Who will be responsible for implementation and disposal of private sites? How extensively will such sites be developed before sale? Could pitches be part rent part buy? In regard to social rented sites, who will manage the sites?
- There is a particular issue of the lack of housing providers willing to take on the management of new sites.

4.7 There is also a vagueness and ambivalence about what the plan proposing. Is it limiting provision to the East Hemel Hempstead sites for the reasons at HOU6 d), or is it also considering sites in the other broad locations as implied by HOU6 b)? It is also not clear why the East Hemel Hempstead sites should be identified over the other broad locations.

4.8 While the scale of need in St Albans may mean that sites delivered in association with major urban extensions may be required, for the following reasons they should only figure as part of a solution, together with sites owned by Gypsies and Travellers, which would need to provide all or most of the pitches in the early years of the plan:

- While the need is front loaded – see GTAA fig 12, Table 3.2 of the Draft Plan confirms that development from the Broad Locations will be back loaded towards the end of the Plan period. There is an important gap for years 1-5 and potentially years 6- 10 which development through the Broad Locations will not be able to fill;
- By contrast to the reticence of developers of major urban extensions etc Gypsy and Traveller site owners are strongly motivated to ensure sites are delivered.

4.9 The Council has failed to make use of para 17 PPfTS, which in the circumstances of St Albans is the obvious and appropriate way of making allocations and avoiding the need for high conflict and high cost (for all parties) planning appeals.

4.10 The fact that the plan fails to make adequate or indeed any allocations for Gypsies and Travellers means that the plan is contrary to the social objective of sustainable development at para 8 b) NPPF, that it ignores the NPPF objectives towards the supply of homes, and for different groups in the community at paras 60 and 63, NPPF, and that it is contrary to the objectives at paras 4 b., 4 e, 4 h, and 4 j. PPfTS, and to the sustainability objectives for Gypsy sites at paras 13. b, 13. c., 13. d, and 13. h PPfTS.

4.11 St. Albans' policy failure in regard to adequate provision for Gypsies and Travellers goes back many years. One indicator of this is the way that, notwithstanding the high bar to establish 'very special circumstances' to permit development in the Green Belt, a whole sequence of appeals have been allowed in St Albans in recent years.[1]

4.12 The policy failure is particularly unreasonable precisely because of the character of St Albans: the whole of the district is either within the footprint of the settlements where land values are very high or included within the Green Belt. Together with the cultural preference of Gypsy people to live in the countryside, (which is indirectly acknowledged at paras 14 and 25 PPfTS) this inevitably means that Traveller sites need to be in the current Green Belt.

**7.0 Legal Compliance**

7.1 The implication of the flaws in the Local Plan identified in the above paragraphs, not least in failing to making any allocations for Gypsies and Travellers, means that not only is the plan not sound, it is also not legally compliant on the basis:

- It indirectly discriminates against Gypsies and Travellers (whose ethnicity is a protected characteristic under the Equality Act) without adequate justification, contrary to s.19 of the 2010 Equality Act; and
- Its approach is contrary to the Public Sector Equality Duty under s.149 of the Act.

PPfTS, and to the sustainability objectives for Gypsy sites at paras 13. b, 13. c., 13. d, and 13. h PPfTS.

4.11 St. Albans' policy failure in regard to adequate provision for Gypsies and Travellers goes back many years. One indicator of this is the way that, notwithstanding the high bar to establish 'very special circumstances' to permit development in the Green Belt, a whole sequence of appeals have been allowed in St Albans in recent years.[1]

4.12 The policy failure is particularly unreasonable precisely because of the character of St Albans: the whole of the district is either within the footprint of the settlements where land values are very high or included within the Green Belt. Together with the cultural preference of Gypsy people to live in the countryside, (which is indirectly acknowledged at paras 14 and 25 PPfTS) this inevitably means that Traveller sites need to be in the current Green Belt.

**7.0 Legal Compliance**

7.1 The implication of the flaws in the Local Plan identified in the above paragraphs, not least in failing to making any allocations for Gypsies and Travellers, means that not only is the plan not sound, it is also not legally compliant on the basis:

- It indirectly discriminates against Gypsies and Travellers (whose ethnicity is a protected characteristic under the Equality Act) without adequate justification, contrary to s.19 of the 2010 Equality Act; and
- Its approach is contrary to the Public Sector Equality Duty under s.149 of the Act.

[1] 3259165 Nuckies Farm, November 2019; 3233561 Tullochside March 2020; 3259165 Ardens Rise October 2022; 3283105 Coursers Road February 2023; 3276551 Woodview Lodge April 2023:

Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

4.13 In this section we identify the minimum essential actions and modifications necessary to make Policy HOU6 of the plan sound. There are further issues that need to be addressed to make the plan fully compliant with Government policy and legal requirements, but it may not be not realistic to address within the time available for examination of the plan. For that reason, we suggest a number of modifications, which identify the remaining weaknesses in the plan's policy framework that would need to be addressed through subsequent review of the Plan (as well as being material to planning decisions in the interim).

4.14 We would ask the Inspector(s) appointed to examine the plan to indicate at the earliest possible point in the process that the plan cannot be found sound without adequate allocations for Gypsy and Traveller residential use. At Annex 2 is a letter from the Inspectors who examined the Greater Norwich Local Plan relating to the work involved in bringing forward allocations through modifications. Such work will take time, and we would expect it to make use of the sites we proposed to the Council through the call for Gypsy and Traveller sites.

4.15 As well as allocations, given the issues we identify at para 4.6 above with delivering pitches from the Broad Locations for Development, we would ask the Inspector(s) to require the Council to explain how such sites will be delivered. If the Council is unable to explain exactly how pitches will be delivered, such developments will not be able to bring forward the 'specific development sites' required by para 9 a) PPfTS and should not be included in the Plan.

4.16 As well as explaining how such sites will be able to guarantee the delivery of pitches, we would ask the Inspector(s) to require the Council to appraise which, if any, of the Broad Locations are the most appropriate to include allocations for Gypsies and Travellers, and the timescale for their delivery (which is needed to determine whether and when such sites would be able to deliver pitches to meet the timetable of need identified through the GTAA).

4.17 In the following paragraphs we suggest key elements of a sound replacement for HOU6. The paragraphs in italics represent suggested text. The paragraphs headed comments provide justification for the text we suggest.

4.18 ***a) Pitch Target***

*At least 98 additional Gypsy and Traveller residential pitches should be developed.*

*Figure – : Minimum need for additional Gypsy and Traveller pitches by time period and source of need* ***[PLEASE SEE ATTACHMENT AS OUR REPRESENTATION DATABASE IS UNABLE TO DISPLAY TABLES]***

*This is a minimum requirement, which should be met, rather than a ceiling which should not be exceeded.*

*The real level of need is likely to be higher because the 2024 needs assessment did not take account of need from Gypsies and Travellers in bricks and mortar housing, nor from homeless, mobile families. In addition, some pitches developed through this policy may be occupied by families who fall outside the definition, [1] and the stronger development constraints in neighbouring districts may mean that an approach to accommodating needs based on the duty to co-operate may require St Albans to contribute to accommodating some of their needs.*

*In order to maintain an up-to-date understanding of needs, the needs assessment should be reviewed regularly. Any review should address the needs of families in bricks and mortar housing, from homeless, mobile homeless families, for transit accommodation and potentially to contribute to meeting the needs of neighbouring districts through the duty to co-operate.*

Comment
While not all the undetermined households will meet the definition, given the very large sample size, it is reasonable to apply the local results from the interviews in St Albans that 79% met the definition to the undetermined households. The above figures are based on reading Figure 2 of the GTAA with Figure 12. The alternative to not include an allowance for need from the undetermined households would be to effectively assume that none would meet the definition, which is not credible.

4.19 ***b) Site Allocations***

*The need for a minimum of at least 98 pitches will be provided for by* ***[PLEASE SEE TABLE IN ATTACHMENT AS THE REPRESENTATION DATABASE IS NOT ABLE TO DISPLAY TABLES]****:*

Comment

In our submission to the Gypsy and Traveller Call for Sites we suggested a number of options for how the land in the vicinity of Caravan Site, Watling Street, could be developed to provide accommodation.

Sites developed as part of or in association with the Broad Locations for Development should only be included if the evidence establishes that the pitches will be delivered within the appropriate time-scale. Other councils in Hertfordshire are also proposing to secure pitches in this way. GATE has suggested to them that such a study should be taken forward jointly. Subject to resources, GATE would be willing to take part in such work.

4.20 ***c) Pitches developed as part of or in association with the Broad Locations for Development***

Comment

This part of the policy will only be needed if the Council is able to ensure that the pitches will be delivered within the appropriate time-scale.

The effectiveness of this type of policy, which is likely to be at least in part dependent on contributions from the developers of the sites, is likely to be increased if contributions linked to the development can be invested in sites elsewhere. In this context the land in the vicinity of Caravan Site, Watling Street may be particularly relevant.

4.21 ***d) Loss of Pitches***

*Planning Applications that result in the loss of pitches will not be permitted unless replaced by at least an equivalent number and quality of pitches*

*4.22* ***e) Planning applications on non-allocated sites.***

*Subject to the other policies of the Plan, proposals will be permitted where the site:*

- *Is within reasonable travelling distance of schools, services, and shops;*
- *Has suitable vehicular access;*
- *Is of a scale and character appropriate to the*

*Development in the Green Belt should not be regarded as inappropriate where the Council cannot show a five-year supply of deliverable sites.*

Comment

The approach to development in the Green Belt is based on applying the approach at para 152 of the Consultation Draft NPPF, July to Traveller development.

***f) Transit Pitches***

*Pending a more complete understanding of transit and related needs, which should be carried out through the next review of the GTAA, and subject to the other policies of the Plan, proposals for transit pitches and for a temporary stopping place will be supported, including where they represent subsidiary parts of larger Gypsy and Traveller residential sites.*

Comment

We have been involved in a number of schemes which propose transit pitches as a subsidiary element of site development proposals. Such an approach contributes to the need for transit accommodation on an interim basis, while providing the potential to accommodate the site owners' longer-term family needs.

[1] *For reasons including pitches on social rented sites being allocated on the basis of need, not planning status, and pitches being occupied by non-mobile households on the basis that denying them accommodation would break up an extended family who depend on each other for support.*

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Annex 1 Traveller Sites through Local Plan Allocations_[R].pdf
2. Annex 2 Inspectors letter to GNLP re GT sites 190122_[R].pdf
3. Herts Gate Reg 19 Rep 061124_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

GATE Herts is one of the leading locally based Gypsy and Traveller organizations in England and the only significant Gypsy & Traveller organization in Hertfordshire. In our submission the plan is unsound and not legally compliant in regard to provision for Gypsies. We would contribute the lived experience of Gypsies and Travellers and substantial experience of planning for Gypsies and Travellers to the hearings.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

## Chapter 5 - Economy and Employment

### 223 - Oaklands College and Taylor Wimpey

Submission Number: 223 Submission Date: 07/11/24 18:34

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Oaklands College and Taylor Wimpey Name:

Comment Number: 11

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

See attached representations for full submission.

**4.5 Chapter 5 – Economy and employment**

Oaklands College and Taylor Wimpey do not wish to make any substantive comments on the contents of this chapter. However, they reserve the right to make comments at a later stage.

In the meantime, it is worth noting the delivery of the Site Allocation B4 will enable the delivery of an enhanced Oaklands College, a small local centre, extra care facilities and other significant contributions the development will bring to the local area and economy during building and occupation phases.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

5.15

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

5.15 St Albans District has large rural areas and the Council fully supports a thriving farming sector, along with the leisure and visitor aspects of the rural economy. This includes farm shops and equestrian facilities along with the more flexible use of farm buildings, developing small-scale localised renewable energy projects and improving rural broadband.

**Comment** Equestrians make significant contributions to the rural economy and supports vets, tack and feed shops, farriers, saddlers and harness makers, equestrian centres, livery stables, grazing fees, business rates, engineering and agricultural equipment providers, etc. The equestrian industry is the second largest rural employer and offers diversification opportunities to farmers and land owners. DEFRA Horse Passport statistics indicate there are at least 2149 horses in the St Albans area. Each horse contributes around £5,000 per annum. This equates to an annual contribution to the St Albans rural economy of £10,745,000.

South West Herts Economic Study (2024)

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

*Refer to Attached submission letter for whole response and figures.*

**South West Herts Economic Study (2024)**

15.1 The South West Herts Economic Study (2024) is the key strategic evidence base for employment in the District and wider sub region.

15.2 Its findings are that the office market may not recover to reach 'a new normal' where demand for office space begins to increase again. It explains that:

*"This does not mean there will be no demand for offices. The study shows there is still demand for smaller offices, and particularly high quality offices in the main office markets of Central Watford and St Albans. However this is unlikely to be enough to offset the fall in demand for large floorplates".*

15.3 Therefore, there is effectively no strategic demand for new office space / land.

15.4 However, the picture is different for industrial and storage with the following two scenarios:

*"In Scenario 1, 53% of Radlett SRFI contributes to South West Herts' needs. This is considered a reasonable assumption on the basis of the evidence available to the study.* ***The result is a land requirement of 35.4 Ha over the 2021-41 period****.*

*In Scenario 2, Radlett SRFI makes a smaller contribution (24% of site) to meeting South West Herts needs. This is considered to be a more cautious approach which does not fully reflect drivers of demand for such sites and premises in South West Herts. The additional land requirement for industrial uses is estimated at* ***59.5 ha to 2041, and a further 58.9 ha between 2041 and 2050."***

15.5 It concludes that:

*"For industrial, storage and distribution uses, Scenario 1 indicates that South West Herts has no shortfall of land, with the additional land requirement of 35.4 Ha lower than the available supply of 50.4 Ha identified in the study.*

*In Scenario 2, the need for 59.5 Ha of land for industrial and storage & distribution development by 2041 overall implies that South West Herts has a shortfall of allocated land which is of sufficient quality to meet the level of need identified in this report. Over the period to 2041, the shortfall is around 9 Ha."*

15.6 The key element of this land supply is at East Hemel Hempstead (Central) with a site of **52.7 hectares** which makes up a very sizeable proportion of the overall supply in the sub region for the next 15+ years. The Study highlights the challenge and potential of this concentration of employment to not meet the NPPF's requirements for positive plan-making which encourages economic growth. RPC shares this concern that all the employment opportunities for the next 15 years are very much concentrated. In terms of the East Hemel (Central) site this issue makes the transportation issues even more severe and pressing in terms of the need to deliver the necessary infrastructure for sustainable travel as well as road infrastructure for commuters.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

5.1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

I'm deeply concerned about the amount of greenbelt around Park Street going to development. We know the monstrous SRFI will have a significant impact on traffic levels on the A414, A405 and local roads in the area.

I'm staggered that you have allowed the greenbelt opposite the BP garage on Watling Street, adjacent to Park Street roundabout, to go to housing when the queues onto the roundabout from Park Street can stretch beyond Park Street bridge in the rush hours and school run time. Not only is it dangerous as locals will have to contend with thousands of extra HGV's and vehicles from the SRFI descending onto the roundabout on the A414, there'll be more vehicles entering and exiting the site opposite the BP garage that could have terrible consequences for vehicles entering and exiting Park Street.

I also see land is now up for auction alongside the A405 approaching Tippendell Lane roundabout, which is again, dangerous for vehicles entering and exiting the site. The queues on Tippendell Lane can already stretch back to Penn Road.

The whole area is lacking in road infrastructure to support this huge increase in traffic movements.

With possible housing developments in Chiswell Green and London Colney our roads will become gridlocked with all the burden on local roads.

Why is so much greenbelt going to inappropriately located developments?

## 334 - TT Group

Submission Number: 334 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Knight Frank Name: Stuart Baillie

On Behalf Of Company/Organisation: TT Group Name:

Comment Number: 8

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Chapter 5 – Economy and Employment**

Chapter 5 of the Draft Local Plan seeks to encourage strong and resilient economic growth. It references the highly skilled workforce within St Albans, while recognising the district as a *"highly desirable residential location"*.

Chapter 5 also references the significant increase in homeworking that has been seen across the district as a result of the COVID-19 pandemic. Although the Draft Local Plan suggests that there are indications of increased homeworking becoming a long-term trend, the Draft Local Plan also states that *'Nevertheless, there continues to be a demand for office space and it is important that St Albans provides an appropriate supply of office uses to support growth, investment and employment in the District'.*

It is understood that a variety of Evidence Base documents have been produced in recent years in support of the preparation of the Draft Local Plan, and which have informed the policies contained within the Draft Local Plan. These documents have been published on the consultation page under 'Older Evidence Base', and include a number of employment related documents such as 'South West Herts Economic Study Update (2019)' and 'Economic Development and Employment Land Evidence (2016)'. The Evidence Base contains documents dating back to 2006.

Notably, all such documents were prepared prior to COVID-19 and therefore are not considered to present up to date evidence nor reflect the current state of the office market. Our Client is therefore concerned that the Draft Local Plan are not based on update evidence / need, and as a result is overly protective of employment floorspace. Consequently it is argued that the Draft Local Plan does not comply with the criteria of paragraph 35 of the NPPF which requires plans to be Positively Prepared and meet objectively assessed needs.

Our Client is particularly concerned that the Draft Local Plan maintains a focus on the need to increase supply of employment space, despite this being contrary to the Council's own admission that changing working patterns and increased homeworking are reducing the demand for purpose built office accommodation. Indeed, the Draft Local Plan references a 'significant increase in homeworking' and acknowledges indications of this being a long-term change, however this does not seem to be integrated into policy (discussed further below).

It is contended that the Draft Local Plan must be written in a way that is future proofed (i.e allowing for future flexibility should homeworking continue to increase) or to allow flexibility in the event that existing office accommodation becomes unviable.

The desire for the retention and expansion for business space must also be carefully balanced with the need for homes. Not building flexibility into the policy to account for future changes would not be Justified under the provisions of the NPPF which requires Local Plans to take into account reasonable alternatives.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusions**

Our Client welcomes the preparation of the St Albans' new Local Plan, noting that those policies contained in the current adopted Local Plan (1994) are extremely outdated and do not accurately reflect current circumstances.

Our Client broadly supports the aspirations of the Plan, particularly that of prioritising residential development on previously developed sites, and ensuring the efficient use of such land in order to meet the significant housing need within the district. Our Client agrees this represents a sensible and effective way of providing much needed new homes in highly sustainable locations across the district which is otherwise constrained by Green Belt.

Nevertheless, our Client has significant concerns regarding specific policies of the Draft Local Plan. Most notably, our Client raises key concerns with the failure of the Draft Local Plan to identify Marlborough House as a site for future residential development. As discussed throughout this representation, Marlborough House represents an underutilised, highly accessible previously developed site, the comprehensive redevelopment of which to provide residential units would make a significant contribution towards meeting housing need within SACDC.

Furthermore, our Client contends that the Draft Local Plan are not legally sound and do not comply with the NPPF. Our Client has therefore made a number of recommendations, which if adopted would ensure consistency across the Draft Local Plan. Notably, our Client strongly contends that those policies within the Draft Local Plan must be sufficiently flexible in order to maximise the chances of meeting the significant housing need within the district. Failure to do so risks the Draft Local Plan stifling opportunities to meet housing need through the effective and efficient use of the highly sustainable brownfield sites.

Overall, it is concluded that in its current form the Draft Local Plan has areas of inconsistency, is not justified with appropriate evidence and is therefore at risk of not be legally compliant, and it is suggested that the Council take further review. We look forward to engaging further in the preparation of the St Albans Local Plan 2041.

## Strategic Policy SP5 - Employment and the Local Economy

### 220 - Convene Construction Ltd

Submission Number: 220 Submission Date: 07/11/24 17:49

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: Convene Construction Ltd Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report for details**

**Strategic Policy SP5 - Overview**

5.1 The Report Site currently provides accommodation for around 15 small businesses, comprising car recovery and storage; car sales; removals and storage; construction plant storage and scaffolding yards. These uses are characterised by their need for open storage facilities and access to the motorway network. As set out in Section 6.0, consideration could be given to the continuation and regularisation of this unlawful use in some form, on the basis that it self-evidently meets an existing demand and would add to the mix of employment land in the District, rather than competing with or duplicating the proposed designations identified by Policy SP5. Such an approach would be supported by the landowner.

5.2 Policy SP5 designates the following 2 new industrial and business locations:

53 ha of Employment land at East Hemel Hempstead (Central) providing for a range of uses including offices, research and development, light industrial and distribution.

33.16 ha of the Government permitted Strategic Rail Freight Interchange at the former Radlett aerodrome - mostly B8 distribution / warehousing.

The landowner has no objection to the above allocations, however, a range of sizes, types and locations are needed to meet the needs of different employers.

5.3 With regard to the East Hemel Hempstead (Central) site, this would comprise an extension to the Maylands Business Park. Identified as Site H3 in Part B of the draft Plan, it is proposed to deliver integrated Enviro-Tech Businesses, environmentally friendly buildings and complementary uses. The uses currently operating at the Report Site would not be compatible with this approach, whilst in any event as an extension to the Mayland Business Park, this would primarily satisfy demand for employment space within Dacorum District, whilst similarly mainly providing jobs for Dacorum residents. Indeed, Policy SP5 states, with regard to the proposed designations as follows:

*"Due to these locations providing an agreed oversupply for St Albans District's own needs, the excess will assist Dacorum Borough and potentially other South West Herts local authorities in meeting some of their employment requirements."*

5.4. With regard to the Strategic Rail Freight Interchange site, this was granted permission by the Secretary of State under LPA Refs 5/2009/0708 (outline) and 5/2016/3006 (Reserved Matters) and would comprise 7 large warehouses yielding 331,665m$^2$. Despite yielding a substantial level of warehouse floorspace, this type and size of accommodation will not provide a viable alternative for the existing users of the Report Site, which require external storage areas, with good road, rather than rail links.

5.5 The need for the provision of employment accommodation such as that existing at the Report Site is recognised by the supporting text to Policy SP5. It firstly identifies the high proportion of smaller businesses in the District:

*"The District has a high proportion of small businesses, with figures for 2022 showing that out of 8,675 enterprises 91.4% were micro-businesses (employing up to 9 people), 7.1% were small businesses (employing 10 to 49 people)"*

5.6 It secondly acknowledges that there has been '*a steady loss of Industrial floorspace over recent years*' - as noted elsewhere, the Councils own figures demonstrate over the period 2004/05 to 2022/23 there has been a net loss of 141,293m$^2$ of general employment (B & E class uses) floorspace. The Draft Plan states that this is largely due to the number of residential conversions. This reflects the aforementioned significant shortfall in housing supply and delivery in the District and the disparity between residential and commercial land values, heightened by the fact that over 81% of the District is covered by the Metropolitan Green Belt.

5.7 With particular reference to sites that cater for the types of uses found at the Report Site, it is noted that locally a number of farmyards - where commercial uses such as scaffolders yards and vehicle repair uses have over time become established - have then been the subject of successful planning applications for residential redevelopment. Examples include Searches Farm, Searches Lane, Bedmond, St Albans WD5 0SB (LPA Refs 5/2012/2113, 5/2015/1841 & 5/20/0558) and Annables Farm, Annables Lane, Harpenden (LPA Ref 5/98/1720).

**Sites OS3 & OS4**

- The draft Local Plan and accompanying Policies Map Sites OS3 and OS4 are proposed extensions to the Rothamsted Research, Harpenden Campus of 186ha and 1.67ha respectively, to provide development of employment use associated in character with the research facilities. The proposed continuation of the existing employment uses at the Report Site would again ensure no duplication or conflict with these proposed allocations, but rather would add to the mix of site available.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The former Butterfly World site should be allocated in the Local Plan

**232 - Hertsmere Borough Council**

Submission Number: 232 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Hertsmere Borough Council Name:

Comment Number: 9

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Local Plan references the work currently being carried out as part of the jointly prepared South West Herts Economic Study update, and that such work will feed into the next version of the Draft Local Plan. The draft Local Plan also acknowledges that this could be above the required need for SADC, and that this provision will be shared with Dacorum Borough Council and potentially other South West Herts authorities. Hertsmere Borough Council supports the protection of existing employment site and creation of new employment space through Broad Development.

As stated in Hertsmere Borough Council's response to the Regulation 18 consultation we hope to continue the working relationship with St Albans District Council on the continued development of the Strategic Rail Freight Interchange north of Radlett especially as it would be contributing to the wider needs of the functional economic market area; the scale of the proposal and its delivery phasing mean that it will contribute to both local (including Hertsmere) and regional/national employment needs.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 233 - Central Bedfordshire Council

Submission Number: 233 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Central Bedfordshire Council Name:

Comment Number: 11

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We note the Council's strategic approach to employment land as set out in policy SP5 and generally support the approach of providing an oversupply within the allocations beyond St Alban's own needs, so that the excess will assist Dacorum Borough and potentially other South-West Herts local authorities in meeting some of their employment requirements.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

8. **Strategic Policy SP5 – Employment and the Local Economy**

15.7 The Policy states that these employment locations will provide "*an agreed oversupply for St Albans District's own needs, the excess will assist Dacorum Borough and potentially other South West Herts local authorities in meeting some of their employment requirements*". There is no logic to the Draft Local Plan including more employment land than is required when SACDC has stated that it cannot meet its own housing needs without releasing Green Belt. Surely any 'surplus' employment land should instead be used for housing - particularly where it is previously developed land. It is also worth noting that whilst the Council's intention is to support other authorities with an overprovision of employment land, there is no indication of any agreement with neighbouring authorities on this regard. A Statement of Common Ground (absent) should explain whether other authorities agree that they cannot meet their own need within their boundaries and agreeing for SACDC to provide land to compensate for this. As we explained in these representations, SACDC has failed to discharge their duty to cooperate and therefore we cannot agree that this approach for excess employment land is acceptable.

15.8 The Draft Local Plan does not actually state what its objectively assessed employment needs are nor does it state the amount it considers to be 'surplus' to requirements.

15.9 Strategic Policy SP5 (and the supporting text) fails to explain or include the number of jobs being planned in the District.

15.10 The proposed strategy to deliver all of the new employment in two strategic locations seems short-sighted compared to distributing employment across the District which will create more sustainable working patterns, enable more of the District's residents to work locally due to having a greater balance between housing and jobs across the District's settlements.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. **If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

**291 - SEGRO (Radlett) Limited**

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

5.1 Strategic Policy SP5 - Employment and the Local Economy will *'support economic growth and productivity by maintaining current employment areas and creating new ones such that there is sufficient land and floorspace to cater for full employment and provide for different kinds of employment use.'*

5.2 SEGRO (Radlett) Limited support this objective and highlight the contribution that SRFI will make to this aim. The SRFI is designated as a Protected Employment Area (PEA 12) in Table 5.1. The policy states that the Council will retain the Protected Employment Areas for *'appropriate business uses'*and the Council will *'encourage full use of designated employment sites and supports new businesses, business growth, and inward investment'*.

5.3 The SRFI will support economic growth and productivity by creating circa 3,400 jobs on site and circa 500 jobs off-site across the wider labour catchment areas, as well generating circa 500 construction sector jobs per year over a five-year period.

5.4 The scheme will also benefit the national and local economies, as well as help satisfy the demands of consumers and businesses for the sustainable movement of the goods and services that are increasingly relied upon.

5.5 Furthermore, a diverse range of employment opportunities such as managerial, administrative, IT, engineering, skilled warehousing personnel and driver staff will be provided through the SRFI. Ultimately, the scheme will generate economic funds which will in turn benefit SADC and Hertfordshire County Council. This opportunity to provide a significant economic contribution will be particularly important considering the current period of weak economic growth.

5.6 The policy also states in part (b) that two new industrial and business locations will be designated, one of which is the SRFI which is recognised as*: '33.16 ha of the Government permitted Strategic Rail Freight Interchange at the former Radlett aerodrome - mostly B8 distribution/warehousing'*in the policy.

5.7 The South West Hertfordshire Economic Study (September 2024) as part of the new evidence base has developed two scenarios to understand the balance of demand and commitments in establishing whether additional land supply would be required for industrial, storage and distribution. The two scenarios are driven by *"different assumptions about the contribution of Radlett Strategic Railfreight Interchange (331,665 sqm capacity) to meeting South West Herts needs".*

5.8 It should now be recognised that Radlett SRFI has been implemented and is in the process of being delivered on-site, with the intention of the full scheme being delivered. The current programme (provided in **Appendix 1** [see attached file]) has been accelerated and indicates when the employment units will be delivered. Any projections of employment land supply should therefore reflect this current programme and the commitment of SEGRO to deliver the full scheme.

5.9 Furthermore, it is noted that in addition to the consented and commenced SRFI and other major sites identified (Policy EMP4), the recently approved outline planning application (ref. 5/2022/2966) on a site of 7.57 hectares to provide 75,700 sqm flexible commercial/employment space falling within either Class B8 (Storage and Distribution) or a data centre in SADC will also make a contribution to local employment activity. The evidence base has therefore been updated to accurately assess need, in the context of committed and anticipated employment-related development.

5.10 Overall, the policy's recognition of the SRFI as a Protected Employment Area is supported. It is considered that the employment floorspace has been allocated appropriately in accordance with an updated evidence base which provides a policy that is justified and effective.

5.16 In conclusion, SEGRO (Radlett) Limited support the ambitions of SADC to ensure *'sufficient land and floorspace to cater for full employment and provide for different kinds of employment use'*, however, this can only be achieved through a deliverable and sustainable Plan that allocates employment floorspace appropriately in line with a recognition of the SFRI being delivered.

## 294 - Hemel Business Park Ltd

Submission Number: 294 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Alex Cole

On Behalf Of Company/Organisation: Hemel Business Park Ltd Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

{Please see attachment for full submission]

**Strategic Policy SP5 –Employment and The Local Economy**

The concerns set out above regarding the abbreviated time frame principally relates to St Albans' housing requirements and supply. However, the Plan's approach to employment is also subject to concerns around soundness.

**Employment Land Requirements**

The Plan does not set out employment requirements in either the its broad strategy for growth or its more detailed employment policies. An assessment of an area's need over the Plan period, along with the quantum of supply, are two central strategic pillars required of a sound, positively prepared strategy. Without this figure, established by a robust evidence base, the Plan cannot be considered sound. Employment need figures should be provided within the Plan.

Strategic Policy SP5 states that the amount of land allocated exceeds the District's own needs, and that the excess will 'assist Dacorum Borough and potentially other South West Herts local authorities in meeting some of their employment requirements'. This is considered to be insufficiently vague – nowhere in either the policy or the supporting text is the relevant requirement and oversupply detailed. In the interest of an effective and positively prepared Plan, St Albans' full requirement should be stated, alongside the full quantum of allocated land. In the event that there is overdelivery earmarked for another authority, the quantum of this should be clearly stated. Currently, it is unclear how much land St Albans requires, how much is being provided to meet Dacorum's unmet need, and what may be available to meet unmet need elsewhere.

An Economic study for South West Hertfordshire, prepared by Hatch, and dated September 2024, identified that St Albans had (under a labour supply scenario) a requirement of 6.7ha for industrial, and 22ha for storage and distribution.

The report does not give a requirement for office space on the basis that, in the years following Covid, demand has significantly reduced, but states that:

*To be clear, there is still expected to be demand for office space in the next few years but this is likely to be focused on smaller, high quality spaces in the FEMA's main office market (central Watford and St Albans).*

Notwithstanding the potential for office demand increasing over the course of the twenty year Plan period, the anticipated employment requirement for St Albans based on labour supply is anticipated to be 28.7ha. Being based on Labour Supply, this is tied to the Standard Method which as set out above, will see an increase in housing requirements across the FEMA under the draft NPPF.

**Employment Land Supply**

As set out in Policy SP5, the Plan's employment land supply consists of two strategic sites:

- 16ha at the former Radlett aerodrome – A Strategic Rail Freight Interchange (B8 distribution / warehousing); and
- 53ha at East Hemel Hempstead (Central) - A range of uses including offices, research and development, light industrial and distribution.

Nowhere does the Plan set out anticipated delivery timeframes for these sites, and it is not clear when they are expected to come forward, and whether they will be built out in full within the Plan period.

...

**Concluding comments on Employment Strategy**

**The Council's** strategy for delivering its employment requirements over the Plan period does not meet the test of soundness as set out in the NPPF for the following reasons:

- The Plan fails to identify the total employment need within St Albans over the Plan, as a result of which any claim of delivery cannot be verified within the Plan itself. The Plan states there is surplus land to meet unmet need elsewhere, but this is not quantified and a review of the evidence suggests that this could be an overestimate. This approach does not represent a positively prepared Plan as defined in national planning policy;
- The inclusion of the Strategic Rail Freight Interchange within the Local Plan for the purposes of meeting local employment requirements in in appropriate, and ought to be removed from the local supply;
- Supply is focussed on a single strategic site. If site delivery is frustrated, St Albans' allocated supply will consist only of a regionally and nationally significant Strategic Rail Interchange, which will not be sufficient to meet local market requirements within St Albans. This approach is neither justified nor effective, and additional sites should be identified for contingency;
- Qualitatively speaking, a single strategic site may not be able to meet the growth requirements of St Albans local economy, especially one that actively resists logistics uses. Smaller sites should be included in the supply pipeline to provide flexibility; and
- A lack of timeframe for the delivery of each site makes it unclear how much of the allocated land is expected to come forward with the Plan period.

Strategic Policy SP5, and Site Allocation Policy H3 should both be amended in order to address these concerns, and ensure that it is capable of meeting the test of soundness.

...

**Conclusion**

As set out above, the St Albans' Regulation 19 Draft Local Plan 2041 does not meet the tests of soundness, as set out in the NPPF, for the following reasons:

- **Positively prepared** – the Plan does not state its employment need at all, nor its supply in any detail. It is therefore not possible to establish whether it meets, as a minimum, the area's objectively assessed needs. The Plan also claims to have an oversupply of employment land that can contribute to neighbouring unmet need, but precise figures are not provided, an approach which lacks clarity. Further, a review of the relevant evidence suggests that the Plan's claim that it meets its need is subject to challenge.
- **Justified** – the chosen strategy for employment land delivery is to allocate a single strategic site. This leaves no space for contingency in the event that this site doesn't come forward, and the site itself may not provide enough land to delivery the necessary level of B2/B8 floorspace over the Plan period. Aside from the quantitative need, there are concerns that this site will not meet the qualitative requirements of the area, which is characterised by micro, small, and medium sized business. The allocation also resists logistics development, which throws into further doubt the Plan's ability to meet anticipated needs.
- **Effective** – the Plan seemingly puts forward no timelines for site deliveries, and it is therefore unclear whether or not the needs of the area can be met over the course of the Plan, this is particularly pertinent for employment need, which is principally tied to a single strategic allocation.
- **Consistent with national policy** – key requirements of national planning policy, such as the need to make effective use of land, are not met by the Plan's strategy, which has systematically reduced the capacity of a large number of residential allocations for reasons that appear to have little to do with the site's themselves. Rather, it appears that this has been driven by the desire to reduce the housing requirement (and consequently the supply) as much as possible.

Beyond concerns with the Plan's broad strategy, the Land at Appspond Lane ought to be allocated for employment development to further secure the Plan's soundness:

- **Positively prepared** – Allocating the site will go some way to ensuring that the Plan can meet its objectively identified quantitatively and qualitatively identified need.
- **Justified** – The site's status as a existing employment site, along with the sustained efforts to secure its redevelopment, make it clear that the site will come forward, and can be sustainably relied upon to contribute to the Plan's employment land supply
- **Effective** – The site is a previously developed site in active employment use, and ought to be supported and allocated for additional development in order to maximise the site's efficiency and ensure the best possible use of the site and its land.
- **Consistent with national policy** – allow for the stie to come forward, supported under a site allocation, to ensure that the best use is made of a poorly performing and previously development Green Belt site in active employment use, is considered to be a sound strategy that would be entirely in keeping with standards set by national planning policy.

Evidently, the Plan requires significant alteration if it is to be found sound under examination, and this should include:

- A clearly stated employment land requirement;
- Clearly identify employment land supply (including the indicative hectarage of all proposed employment uses set against their requirements);
- Clear timeframes for site delivery;
- A greater range of employment sites in order to provide *inter* alia flexibility and contingency;
- Greater efficiency in the use of allocated land in order to ensure that this tenet of national planning policy is met; and
- The inclusion of a site allocation for Land at Appspond Lane to identify the site for employment development.

Making these changes are necessary if the Plan is to be considered sound, and capable of progression through examination to formal adoption.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## 295 - Smallford Business Park Ltd

Submission Number: 295 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Alex Cole

On Behalf Of Company/Organisation: Smallford Business Park Ltd Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

[Please see attachment for full submission]

**Strategic Policy SP5 –Employment and The Local Economy**

The concerns set out above regarding the abbreviated time frame principally relates to St Albans' housing requirements and supply. However, the Plan's approach to employment is also subject to concerns around soundness.

**Employment Land Requirements**

The Plan does not set out employment requirements in either the its broad strategy for growth or its more detailed employment policies. An assessment of an area's need over the Plan period, along with the quantum of supply, are two central strategic pillars required of a sound, positively prepared strategy. Without this figure, established by a robust evidence base, the Plan cannot be considered sound. Employment need figures should be provided within the Plan.

Strategic Policy SP5 states that the amount of land allocated exceeds the District's own needs, and that the excess will 'assist Dacorum Borough and potentially other South West Herts local authorities in meeting some of their employment requirements'. This is considered to be insufficiently vague – nowhere in either the policy or the supporting text is the relevant requirement and oversupply detailed. In the interest of an effective and positively prepared Plan, St Albans' full requirement should be stated, alongside the full quantum of allocated land. In the event that there is overdelivery earmarked for another authority, the quantum of this should be clearly stated. Currently, it is unclear how much land St Albans requires, how much is being provided to meet Dacorum's unmet need, and what may be available to meet unmet need elsewhere.

An Economic study for South West Hertfordshire, prepared by Hatch, and dated September 2024, identified that St Albans had (under a labour supply scenario) a requirement of 6.7ha for industrial, and 22ha for storage and distribution.

The report does not give a requirement for office space on the basis that, in the years following Covid, demand has significantly reduced, but states that:

*To be clear, there is still expected to be demand for office space in the next few years but this is likely to be focused on smaller, high quality spaces in the FEMA's main office market (central Watford and St Albans).*

Notwithstanding the potential for office demand increasing over the course of the twenty year Plan period, the anticipated employment requirement for St Albans based on labour supply is anticipated to be 28.7ha. Being based on Labour Supply, this is tied to the Standard Method which as set out above, will see an increase in housing requirements across the FEMA under the draft NPPF.

The Plan (and the evidence base) also appears to ignore the loss of employment land under the emerging Plan. Smallford works, for example, represents 3.34 ha of employment land that is proposed to be lost to housing under allocation P1 (discussed further below). As has been previously set out in representations, the Smallford Works site is currently in active employment use and there are no plans to promote the site for residential development.

...

**Concluding comments on Employment Strategy**

**The Council's** strategy for delivering its employment requirements over the Plan period does not meet the test of soundness as set out in the NPPF for the following reasons:

- The Plan fails to identify the total employment need within St Albans over the Plan, as a result of which any claim of delivery cannot be verified within the Plan itself. The Plan states there is surplus land to meet unmet need elsewhere, but this is not quantified and a review of the evidence suggests that this could be an overestimate. This approach does not represent a positively prepared Plan as defined in national planning policy;
- The inclusion of the Strategic Rail Freight Interchange within the Local Plan for the purposes of meeting local employment requirements in in appropriate, and ought to be removed from the local supply;
- Supply is focussed on a single strategic site. If site delivery is frustrated, St Albans' allocated supply will consist only of a regionally and nationally significant Strategic Rail Interchange, which will not be sufficient to meet local market requirements within St Albans. This approach is neither justified nor effective, and additional sites should be identified for contingency;
- Qualitatively speaking, a single strategic site may not be able to meet the growth requirements of St Albans local economy, especially one that actively resists logistics uses. Smaller sites should be included in the supply pipeline to provide flexibility; and
- A lack of timeframe for the delivery of each site makes it unclear how much of the allocated land is expected to come forward with the Plan period.

Strategic Policy SP5, and Site Allocation Policy H3 should both be amended in order to address these concerns, and ensure that it is capable of meeting the test of soundness.

...

**Conclusion**

As set out above, the St Albans' Regulation 19 Draft Local Plan 2041 does not meet the tests of soundness, as set out in the NPPF, for the following reasons:

- **Positively prepared** – the Plan does not state its employment need at all, nor its supply in any detail. It is therefore not possible to establish whether it meets, as a minimum, the area's objectively assessed needs. The Plan also claims to have an oversupply of employment land that can contribute to neighbouring unmet need, but precise figures are not provided, an approach which lacks clarity. Further, a review of the relevant evidence suggests that the Plan's claim that it meets its need is subject to challenge.

- **Justified** – the chosen strategy for employment land delivery is to allocate a single strategic site. This leaves no space for contingency in the event that this site doesn't come forward, and the site itself may not provide enough land to delivery the necessary level of B2/B8 floorspace over the Plan period. Aside from the quantitative need, there are concerns that this site will not meet the qualitative requirements of the area, which is characterised by micro, small, and medium sized business. The allocation also resists logistics development, which throws into further doubt the Plan's ability to meet anticipated needs.
- **Effective** – the Plan seemingly puts forward no timelines for site deliveries, and it is therefore unclear whether or not the needs of the area can be met over the course of the Plan, this is particularly pertinent for employment need, which is principally tied to a single strategic allocation.
- **Consistent with national policy** – key requirements of national planning policy, such as the need to make effective use of land, are not met by the Plan's strategy, which has systematically reduced the capacity of a large number of residential allocations for reasons that appear to have little to do with the site's themselves. Rather, it appears that this has been driven by the desire to reduce the housing requirement (and consequently the supply) as much as possible.

Beyond concerns with the Plan's broad strategy, the details of the allocation at Smallford Works does not meet the test of soundness either:

- **Positively prepared** – the site will not be providing housing on the site. This reduces the Plan's overall housing supply figure, risking its ability to meet, as a minimum, its objectively assessed need for residential development. The Plan and its evidence base also seems to ignore the fact that delivering employment on the site would reduce the stock of employment land within St Albans, which would need to be addressed through appropriate allocation of replacement land. For reasons stated above, the allocation at Hemel Hempstead (Central) may be both quantitatively and qualitatively unable to accommodate this;
- **Justified** – the allocated use is inconsistent with representations previously submitted, clearly stating the site is being promoted for employment use and not residential development. In this, the Plan fails to account for clearly stated evidence regarding the site allocation;
- **Effective** – whilst allocating the site for development is wholly supported, a far more appropriate strategy for redeveloping the site would be to identify it for intensifying employment development consider its current status as an employment site in active use;
- **Consistent with national policy** – the principle of the site's allocation is consistent with relevant national policy, but the details are not: the proposed loss of employment floorspace without appropriate replacement, and the inefficient reduction of the site's developable capacity do not accord with central tenants of national planning policy.

Evidently, the Plan requires significant alteration if it is to be found sound under examination, and this should include:

- A clearly stated employment land requirement;
- Clearly identify employment land supply (including the indicative hectarage of all proposed employment uses set against their requirements);
- Clear timeframes for site delivery;
- A greater range of employment sites in order to provide *inter* alia flexibility and contingency;
- Greater efficiency in the use of allocated land in order to ensure that this tenet of national planning policy is met; and
- Alteration site allocation P3 (Smallford Works) to identify the site for intensifying employment development.

Making these changes are necessary if the Plan is to be considered sound, and capable of progression through examination to formal adoption.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**311 - BP Oil UK Ltd**

Submission Number: 311 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: BP Oil UK Ltd Name:

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The draft allocation of primary interest to bp is H3, which includes the currently agricultural land located between Punchbowl Lane to the north, the M1 to the east, the A414 to the south and Green Lane (and the boundary of the site) to its west. This is because the allocation is immediately adjacent to the subject site. It is noted H3 proposes around 6,000 new jobs (point 21).

Whilst the majority of the development in allocations to H1-H4 inclusive is anticipated by the draft plan to be delivered by 2041, the draft Local Plan horizon, it identifies that some delivery is likely to
take place post-2041.

**Impacts on bp's operations**
It should be noted that bp does not object to the principle of major housing and employment designations. However, the effect of the allocations, if built out, will result in significantly greater levels of residents, works and visitors in closer proximity to the subject site.

This is the case both in the construction phase as the development and associated infrastructure works are built out, and once the allocated developments are operational. The health, safety and security of bp's workforce and the communities in which they operate is of critical importance to the business.

The draft Local Plan allocations H1-H4 inclusive may:
• increase the number of people in close proximity to a COMAH regulated site, particularly with development proposed for agricultural land to the east of the site
• limit bp's ability for any potential future expansion in relation to the site such as new fuel storage tanks and equipment
• potentially compromise the long-term viability of bp's operations from its Hemel Terminal site

bp do not object to the principles of the allocations relating to the HGC, however, we seek to highlight to SADC issues that need to be carefully considered as the draft plan progresses.

bp request that the importance of its Hemel Terminal is recognised and that draft site allocations H1-H4 are amended as required to ensure the continued safe and viable operation of its facility, both now and in the future.

We welcome a collaborative approach on the drafting of the policy wording with SADC officers/Members in order to achieve this objective.

We assume the views of the Health and Safety Executive (HSE) and the Environment Agency have been sought on the allocations - in particular given the subject site is regulated under the Control of Major Accident Hazards (COMAH) Regulations 2015 - and will be fully considered as the draft Local Plan moves forward. We also urge you to consider the views of the downstream oil team (energy security) at the Department for Energy Security and Net Zero.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## 314 - Mrs Susan Taylor

Submission Number: 314 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Mrs Susan Taylor

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I'm deeply concerned about the amount of greenbelt around Park Street going to development. We know the monstrous SRFI will have a significant impact on traffic levels on the A414, A405 and local roads in the area.

I'm staggered that you have allowed the greenbelt opposite the BP garage on Watling Street, adjacent to Park Street roundabout, to go to housing when the queues onto the roundabout from Park Street can stretch beyond Park Street bridge in the rush hours and school run time. Not only is it dangerous as locals will have to contend with thousands of extra HGV's and vehicles from the SRFI descending onto the roundabout on the A414, there'll be more vehicles entering and exiting the site opposite the BP garage that could have terrible consequences for vehicles entering and exiting Park Street.

I also see land is now up for auction alongside the A405 approaching Tippendell Lane roundabout, which is again, dangerous for vehicles entering and exiting the site. The queues on Tippendell Lane can already stretch back to Penn Road.

The whole area is lacking in road infrastructure to support this huge increase in traffic movements.

With possible housing developments in Chiswell Green and London Colney our roads will become gridlocked with all the burden on local roads.

Why is so much greenbelt going to inappropriately located developments?

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Strategic Policy SP5 – Employment and the Local Economy**

**On of the key priorities of the Council Plan 2024-2029 is to "support our local economy".**

The district is reported to be "*an attractive location for businesses*" paragraph 5.1. "*The District is generally wealthy and a highly desirable residential location, reflected in the high average salaries of residents and high house prices."*paragraph 5.2. *"There is a low rate of unemployment in the District, ... A large portion of the well-paid jobs for the District's workforce are dependent on London, with above-average salaries compared to residents who work in the District. This leads to a relatively high level of daily out-commuting to London, largely using the fast Thameslink rail service..." paragraph 5.3*

However, paragraph 5.7 states:

**"***Despite these strengths, there was almost no growth in jobs in the District between 2016 and 2021, while employment growth was stronger in the other South West Hertfordshire local authorities during this period."*

Paragraph 5.10 states:

*"The Council supports the wider economic and employment aspirations of the Hertfordshire Growth Board and Hertfordshire Economic Board 'Hertfordshire Futures' with regard to South West Herts."*

From our analysis reported in **Appendix 1: Economic Overview and Housing Need,** in 2015 St Albans accounted for 23.7% of total employment in the South West Hertfordshire area (which includes Dacorum, Hertsmere, St Albans, Three Rivers and Watford). By 2022 this had declined to 18.4%.

Job numbers in St Albans declined over the period 2015-22, which starkly contrasts with the growth experienced at a regional and national level and in contrast to the aims of the Hertfordshire Futures – Hertfordshire's Inward Investment Plan which aims to shift the county from a reactive, district-by-district investment response to a proactive, coordinated and highly strategic response. The well-established knowledge of Hertfordshire's key sectors and investment opportunities will be utilised to develop closer

ties with within industries and with key stakeholders. Alongside the expansion of Hertfordshire's business opportunities, existing thriving businesses will be retained.

Key focus areas include expanding on Hertfordshire's strongest sectors, innovation and inward investment. Furthermore, significance will be placed on improving employment opportunities by enhancing employability skills and expanding the number of future jobs. Finally, Smaller businesses (including social enterprises) will be supported across Hertfordshire.

The BRES data highlights the need for St Albans to improve its labour market performance (as identified in the SW Herts Economic Study) and to create new jobs, which in turn will help to attract more working age people to the area and help to address the issue of an ageing population.

Taking the data analysis into account and along with the visions of Hertfordshire Futures and additional supporting documents to make Hertfordshire one of the UK's leading economics, more jobs need to be created in St Albans, as identified in the SW Herts Economic Study. This can help attract more working age people to the area and address the issue of an ageing population. If more people are attracted to St Albans, more homes will need to be built to accommodate them.

Policy SP5 states that the Council will deliver an oversupply of new industrial and business units for St Albans needs, in which case the policy states that this oversupply can assist in meeting some of the employment needs of Dacorum Borough Council and potentially other South West Herts local authorities.

The consequence of this is that unless corresponding housing provision is proposed in the Plan then the surplus employment opportunities could generate more commuting from outside the district which is not sustainable and/or pressure on the housing market. It is considered that the Council should be planning for a higher figure than 885 dwellings per annum and that there is clear justification for exceeding this figure and applying the uncapped figure of 1,169dpa.

Land at Harper Green is well placed to meet housing needs in the south of the authority, as an alternative or in addition to some of the proposed Broad Locations/sites and in close proximity to the Strategic Rail Freight Interchange on the former Radlett aerodrome.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Whilst we do not necessarily seek a modification to this policy – the point is that the surplus of locations providing employment needs could generate more commuting from outside the district and/or pressure on the housing market unless provision of housing is made commensurate with the employment opportunities in the district.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Appendix 1 - Economics Overview and Housing Need_[R].pdf
2. Representation Form Policy SP5 Employment & the Local Economy FINAL 5_11_2024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

The issues we have raised are interrelated with the provision of housing and as such are fundamental to the delivery of a sound plan.

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Policy SP5 (Employment and the Local Economy)**

Policy SP5 of the Draft Local Plan takes a strategic approach to employment land, protecting specific employment areas. Under the provisions of Policy SP5 existing employment floorspace in these areas will be 'retained for appropriate business uses' and the Council will encourage full use of the employment floorspace and support new businesses, business growth, and inward investment.

Paragraph 5.17 of the Draft Local Plan states that existing allocated employment sites are typically performing well with generally high levels of occupancy. This reflects the out of date Evidence Base which is being relied upon for this Chapter of the Draft Plan. As the owner of Marlborough House, an example of vacant, unviable office space, our Client strongly rejects this conclusion, and we contend as flawed the Council's approach to the blanket protection of existing employment

floorspace across designated areas. Indeed, our Client has significant concerns about the emphasis being placed on the retention / provision of employment space which is not supported by up-to-date evidence on the need for office floorspace across St Albans.

The proposed blanket restrictions on the loss of existing office accommodation (particularly where it is already vacant) results in the continued protection of uses where there is no demand, office accommodation is out-dated and it is unviable to redevelop such use. The Policy therefore serves to restrict residential use where there is significant need. Paragraph 122 of the NPPF states that planning policies and decisions need to reflect changes in the demand for land, and that as part of plan updates should reallocate land for a more deliverable use that can help to address the identified need. Therefore, Policy SP5 of the Draft Local Plan is considered to be inconsistent with the NPPF.

Our Client contends that the wording of Policy SP5 does not account for the individual circumstances of existing employment sites – for example, where there is no longer demand for employment on the site or where a site no longer meets market requirements and it would be unviable to meet market requirements – thus rendering the existing employment use unviable. As a minimum there should be flexibility within Policy SP5 to demonstrate viability reasons to justify alternative use.

This is particularly evident in the wording of paragraph 5.17 of the Draft Local Plan which references the Council's view that the employment areas are 'typically performing well' and 'generally high levels of occupancy'. It is contended that Policy SP5 represents a generalisation of all employment sites and does not account for individual site circumstances.

Furthermore, the demand for additional office accommodation is not clearly evidenced. Notably, Policy SP5 acknowledges that the new industrial and business locations provide an oversupply of St Albans own needs, and that the excess will assist other authorities to meet their needs. Our Client is therefore concerned that the desire to retain and increase employment sites has not been adequately balanced with the need for homes. This is particularly relevant in the context of a consistent under-delivery of housing within St Albans and a consequent urgent requirement for new homes, and also given SACDC's desire to make efficient use of previously developed land.

Our Client therefore requests that SACDC reconsider the unnecessarily restrictive wording of Policy SP5, which does not plan for the future, is not based on up to date evidence and would not meet the tests of soundness for the reasons outlined above.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

### Conclusions

Our Client welcomes the preparation of the St Albans' new Local Plan, noting that those policies contained in the current adopted Local Plan (1994) are extremely outdated and do not accurately reflect current circumstances.

Our Client broadly supports the aspirations of the Plan, particularly that of prioritising residential development on previously developed sites, and ensuring the efficient use of such land in order to meet the significant housing need within the district. Our Client agrees this represents a sensible and effective way of providing much needed new homes in highly sustainable locations across the district which is otherwise constrained by Green Belt.

Nevertheless, our Client has significant concerns regarding specific policies of the Draft Local Plan. Most notably, our Client raises key concerns with the failure of the Draft Local Plan to identify Marlborough House as a site for future residential development. As discussed throughout this representation, Marlborough House represents an underutilised, highly accessible previously developed site, the comprehensive redevelopment of which to provide residential units would make a significant contribution towards meeting housing need within SACDC.

Furthermore, our Client contends that the Draft Local Plan are not legally sound and do not comply with the NPPF. Our Client has therefore made a number of recommendations, which if adopted would ensure consistency across the Draft Local Plan. Notably, our Client strongly contends that those policies within the Draft Local Plan must be sufficiently flexible in order to maximise the chances of meeting the significant housing need within the district. Failure to do so risks the Draft Local Plan stifling opportunities to meet housing need through the effective and efficient use of the highly sustainable brownfield sites.

Overall, it is concluded that in its current form the Draft Local Plan has areas of inconsistency, is not justified with appropriate evidence and is therefore at risk of not be legally compliant, and it is suggested that the Council take further review. We look forward to engaging further in the preparation of the St Albans Local Plan 2041.

### 349 - Lisa Peters

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 14

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Protected Employment Areas**

CHPC acknowledges that **Policy SP5**, which aims to strengthen employment opportunities and the local economy, does not include any protected employment areas within Colney Heath Parish. The absence of designated employment zones presents both challenges and opportunities for the parish.

Without protected employment areas, Colney Heath Parish faces a heightened risk of losing existing commercial spaces, such as small businesses and local services, to residential or other non-commercial development. This lack of designated employment land could impact local job availability and reduce the economic diversity of the parish, potentially leading to increased commuting to nearby towns for employment. Such a trend could also strain local infrastructure and erode the community's self-sufficiency.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

CHPC suggests that SADC consider exploring options for small-scale, flexible employment zones that align with the rural character of Colney Heath Parish. Encouraging the development of small business hubs or live-work units could support local entrepreneurship and provide opportunities for residents to work within the parish. Additionally, planning policies that support the retention and appropriate use of existing commercial premises would help maintain local employment options and reduce the risk of complete conversion to residential uses.

CHPC also recognises that the flexibility afforded by the absence of protected employment areas can be advantageous, allowing for adaptive use of land as local needs evolve. However, CHPC believes that fostering a balanced approach — one that safeguards essential commercial spaces while allowing for measured development — will contribute to a sustainable local economy and protect Colney Heath's character as a rural community.

**350 - Hill Residential**

Submission Number: 350 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: tor&co Name: Sophia Goodhead

On Behalf Of Company/Organisation: Hill Residential Name:

Comment Number: 13

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Strategic Policy SP5: Employment and the Local Economy and Policy EMP1: Protected Employment Areas**

Hill is supportive of policies SP5 and EMP1 which seek to encourage economic growth, enhance productivity and inward investment of protected employment areas such as Rothamsted Research (site PEA-16).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without

proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

### 357 - Mrs Julia Warren

Submission Number: 357 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Wheathampstead Parish Council Name: Mrs Julia Warren

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Paragraph 5.16, SP5 - Employment and the Local Economy**

Wheathampstead Parish Council is proud of the regeneration of our High Street that has taken place over the past twenty years. It wishes to ensure that it remains a viable local retail area while also continuing to encourage the three hundred or more “off the High Street” businesses that make up our local economy. In 2003, the parish council supported the formation of our local businesses group, Wheathampstead Businesses Group, which has gone from strength to strength as it continues to promote, protect and support our local economy. We therefore support the concept of Protected Employment Areas and hope that St Albans District Council will provide or facilitate investment for appropriate employment creating development in this area (PEA 19).

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

---

**366 - Chrissie Chadney**

Submission Number: 366 Submission Date: 10/11/24 09:00

Respondent: Company/Organisation: Name: Chrissie Chadney

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I have been a resident in Wheathampstead for over forty years and read the proposed District Plan with interest. Whilst there are some good ideas in it, there are a number of things which give me concern. I have read the WDPS response and concur with it fully, but have a few additional things to say here.

Local Economy and Employment: The draft plan offers little in the way of creating employment opportunities within our community, potentially turning Wheathampstead into a dormitory village. Our local economy, especially our vibrant High Street, depends on local employment to sustain its footfall and economic activity. It is vital that any new development integrates employment solutions to maintain and enhance our community's vibrancy and self-sufficiency.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Conclusion: I firmly stand with the WDPS in urging a comprehensive reevaluation of the Draft Local Plan. It is essential that the plan not only reflects realistic population projections but also prioritizes environmental conservation, sustainable development, and the enhancement of local services and infrastructure. We need a balanced, forward-thinking approach that truly serves the interests and needs of all of the St Albans District's residents.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Chadney_C_[R].pdf

### 367 - Ms Julie Bell

Submission Number: 367 Submission Date: 10/11/24 09:00

Respondent: Company/Organisation: Name: Ms Julie Bell

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Local Economy and Employment:**
The Draft Local Plan currently does little to foster employment opportunities within our community, risking turning Wheathampstead into a mere bedroom community. Our local economy, particularly our vibrant High Street, relies heavily on local employment to maintain its vitality and activity. It is imperative that any new developments include employment opportunities that support and enhance the vibrancy and self-sufficiency of our community.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion:**
I stand firmly with the WDPS in calling for a thorough reevaluation of the Draft Local Plan. The plan must accurately reflect our realistic population growth projections and prioritize environmental protection, sustainable development, and the improvement of local services and infrastructure. A balanced and visionary approach is required to genuinely meet the needs and interests of the residents of the St Albans District.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 370 - Diane Black

Submission Number: 370 Submission Date: 09/11/24 09:00

Respondent: Company/Organisation: Wheathampstead District Preservation Society Name: Diane Black

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**WDPS comments on St Albans City and District Council Draft Local Plan**

Wheathampstead and District Preservation Society (WDPS) has approximately 400 households as members, and we therefore speak for around 15% of the population of the Wheathampstead area.

**Employment Opportunities**

The Plan does not make provision for the additional employment that an increased population will need other than in the Protected Employment Areas, both of which are remote from Wheathampstead. Only one existing employment area in Wheathampstead, Place Farm, is protected. (The reference to Codicote Road is presumably a mistake.)

In order to minimise any increase in commuter traffic, employment opportunities should be provided in larger new developments.

Our community has worked hard to regenerate our High Street over the past 20 years and wants to ensure it remains a viable local retail area as well as the 300 or more “off the High Street” businesses that make up our local economy.

Much of the life and character of Wheathampstead would be lost if a higher proportion of residents worked outside the village. If Wheathampstead were to become a dormitory village, footfall in the village centre would plummet and the High Street could become mainly residential.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Summary**

Considering the comments above, we urge the council to revisit the draft Local Plan, challenge the Government's Standard Method for calculating housing needs and produce a more equitable balanced plan that serves the needs of the St Albans District residents. We would like to see more detailed planning which includes funding allocation and addresses key issues on exactly how the plan is going to meet climate change targets, deal with extreme weather events, increase biodiversity by 10%, protect the Green Belt, improve transport networks including cycleways, improve water networks and prevent pollution of our rivers, improve services and facilities and protect secondary school placements.

## EMP1 - Protected Employment Areas

### 200 - Lawes Agricultural Trust

Submission Number: 200 Submission Date: 07/11/24 16:49

Respondent: Company/Organisation: Montagu Evans Name: Mr Amran Nagra

On Behalf Of Company/Organisation: Lawes Agricultural Trust Name:

Comment Number: 7

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Rothamsted Campus is allocated through Policy EMP1 and Table 5.1 as a Protected Employment Area (Site ref PEA16). We appreciate the updates to Table 5.1 which now reflect the proposed allocation OS3 and OS4, both of which relate to the 'Extension to Rothamsted Research, Harpenden Campus, AL5 2JQ'.

Below we set out the respective development requirements for allocations OS3 and OS4.

***OS3 Development requirements:***

1. *Development should be of employment use associated in character with the adjacent research facilities.*
2. *Connectivity to the Public Rights of Way adjacent to the site.*
3. *Contributions / enhancements to support relevant schemes in the LCWIP and GTPs.*
4. *The eastern part of the site lies within Harpenden Conservation Area and adjacent to Locally Listed Buildings. Development proposals should minimise any harm to, and where possible enhance, the setting and significance of these heritage assets.*
5. *Development proposals must take account of the existing trees on / adjacent to the site.*

***OS4 Development requirements:***

1. *Development should be of employment use associated in character with the adjacent research facilities, with new buildings in the eastern half of the site only.*
2. *Contributions / enhancements to support relevant schemes in the LCWIP and GTPs.*
3. *Connectivity to the Public Rights of Way adjacent to the site. To support improvements to Harpenden Bridleway 011 (Coach Lane) to enable use by people working at this site for active travel to access the town and train station.*

4. *Good quality access for all modes to key routes and relevant enhancement of schemes in the LCWIP will be necessary –for example, the A1081 corridor and improved access to the Rights of Way network.*
5. *Development proposals have the potential to impact the setting of the Grade I Listed Rothamsted Manor and associated Grade II Listed buildings. Development proposals should minimise any harm to, and where possible enhance, the setting and significance of these heritage assets. Development proposals must take account of the existing trees on / adjacent to the site.*

Part b emerging Policy EMP1 states that the use class for protected sites will "normally" fall within Classes B2, B8, or E(g). Additionally, Part c of the policy references ancillary uses that support employment activities.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Rothamsted Campus site features various primary and ancillary buildings and functions that are essential for delivering scientific work. We previously expressed concerns that the policy's wording could be overly restrictive by only referencing "creche or café." We welcome the inclusion of references to B2, B8, or E(g) uses, as this revision enhances flexibility and better encapsulates the diverse range of ancillary facilities and services necessary to support employment activities. However, as per the comments on policy LG7 – Affordable Housing Development in the Green Belt (rural exception sites), there is also a need for housing to be available for scientific workers in the area and in rural locations. This should also be reflected in the recognised list of ancillary uses under Policy EMP1(b) to fully support the work of Rothamsted Research as envisaged by the Plan.

**291 - SEGRO (Radlett) Limited**

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 9

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*5.11* Policy EMP1 – Protected Employment Areas states that*'to protect and enhance the designated Protected Employment Areas in the District, proposals that are within the locations set out in Table 5.1 must demonstrate:*

1. *a) No net loss of employment floorspace; redevelopment or intensification of existing employment uses will usually be supported;*
2. *That the use class will normally be B2, B8, or E(g); in the case of E(g) applications conditions may be applied to prevent a change of use to E(a-f) use classes; and*
3. *That small-scale services such as a creche or café are ancillary and do not compromise the functioning of the location for B2, B8 or E(g) uses.'*

5.12 The SRFI is identified as a Protected Employment Area (PEA 12) located between Frogmore and London Colney in Table 5.1. In line with the policy, the SRFI will not result in a net loss of employment floorspace, rather, new employment space up to 331,655 sqm comprising Use Classes B2, B8 and E(g) will be provided on the site. Any small-scale services on the site will be ancillary and do not compromise the functioning of the location. Therefore, SEGRO (Radlett) Limited welcome this designation and support the protection of the SRFI as an employment area that will comprise of B2, B8 or E(g) use classes and consider Policy EMP1 to be sound and justified.

5.16 In conclusion, SEGRO (Radlett) Limited support the ambitions of SADC to ensure *'sufficient land and floorspace to cater for full employment and provide for different kinds of employment use'*, however, this can only be achieved through a deliverable and sustainable Plan that allocates employment floorspace appropriately in line with a recognition of the SFRI being delivered.

## 334 - TT Group

Submission Number: 334 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Knight Frank Name: Stuart Baillie

On Behalf Of Company/Organisation: TT Group Name:

Comment Number: 10

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**Policy EMP1 (Protected Employment Areas) & EMP3 (St Albans City Core Principal Office Location)**

Policy EMP1 of the Draft Local Plan builds upon those strategic objectives of Policy SP5. In doing so Policy EMP1 sets out that proposals within Protected Employment Areas must demonstrate:

- *"No net loss of employment floorspace – redevelopment or intensification of existing employment uses will usually be supported;*
- *That the use class will normally be B2, B8, or E(g); in the case of E(g) applications conditions may be applied to prevent a permitted development change of use to E(a-f) use classes;*
- *That small-scale services such as a Creche or Café are ancillary and do not compromise the functioning of the location for commercial uses"*

Furthermore, Policy EMP3 of the Draft Local Plan introduces further restrictions on the loss of existing employment floorspace. Policy EMP3 states that development proposals within St Albans Core Principal Office Location must:

- *Avoid net loss of office floorspace that falls within Use Class E(g)(i);*
- *Provide an active frontage on the ground floor; that within the defined town centre boundary can include retail and leisure uses.*

As stated above, the presumption in favour of retaining employment floorspace is not supported by up-to-date evidence base. The overarching restrictions on the loss of existing employment floorspace afforded by Policies EMP1 and EMP3 therefore raises significant concerns, with the lack of exemptions posing a risk that the Draft Local Plan will result in the retention of vacant office accommodation that no longer meet market requirements and/or are unviable due to overly restrictive planning policy.

For example, the existing vacant office accommodation at Marlborough House is out-of-date and no longer meets the needs or expectations of office occupiers. Indeed, reflecting the dated accommodation, Marlborough House has an Energy Performance Certificate Rating of "E". As such, the existing office accommodation provided at Marlborough House does not currently meet the requirements of future occupiers and would require substantial and costly refurbishment if it is to meet requirements.

The proposed restrictions on the loss of existing employment floorspace are considered to be contradictory to the other objectives of the Draft Local Plan, in particular the need to meet the significant housing need through the effective and efficient use of previously developed sites that is reiterated throughout the document.

Our Client requests that SACDC revisit the wording of both Policies EMP1 and EMP3 in order to ensure consistency throughout the Draft Local Plan and to futureproof to account for any changes in the market. Failure to do so would stifle opportunities to meet housing need through the effective and efficient reuse of previously development sites where there is no prospect for the continued use of the site. As a minimum, there must be flexibility to justify alternative uses on redundant and unviable employment sites.

We note that Policy TCR1 Part c) seems to address alternative use for 'primary shopping areas' but it is not explicit to other town centre locations or to E(g), B2 or B8 use classes. We suggest this is considered more widely.

Also in the context of Policy TCR1 and whether a similar consideration could be expanded to EMP policies, we contend that the TCR1 requirement to demonstrate marketing of 12-18 months is out of touch with current market dynamics where vacancy for such long periods will put greater pressure on businesses and landlords where alternative uses may bring properties and sites back into meaningful alternative uses more quickly.

It is contended that Draft Policies EMP1 and EMP3 are not Justified or Effective, and therefore do not align with NPPF Paragraph 35. In addition, the Policies are inconsistent with the ambitions of the Draft Local Plan.

Those policies contained within Chapter 5 are not legally sound or compliant with the NPPF which, amongst other things, requires Local Plans to meet objectively assessed needs and be based on proportionate evidence.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusions**

Our Client welcomes the preparation of the St Albans' new Local Plan, noting that those policies contained in the current adopted Local Plan (1994) are extremely outdated and do not accurately reflect current circumstances.

Our Client broadly supports the aspirations of the Plan, particularly that of prioritising residential development on previously developed sites, and ensuring the efficient use of such land in order to meet the significant housing need within the district. Our Client agrees this represents a sensible and effective way of providing much needed new homes in highly sustainable locations across the district which is otherwise constrained by Green Belt.

Nevertheless, our Client has significant concerns regarding specific policies of the Draft Local Plan. Most notably, our Client raises key concerns with the failure of the Draft Local Plan to identify Marlborough House as a site for future residential development. As discussed throughout this representation, Marlborough House represents an underutilised, highly accessible previously developed site, the comprehensive redevelopment of which to provide residential units would make a significant contribution towards meeting housing need within SACDC.

Furthermore, our Client contends that the Draft Local Plan are not legally sound and do not comply with the NPPF. Our Client has therefore made a number of recommendations, which if adopted would ensure consistency across the Draft Local Plan. Notably, our Client strongly contends that those policies within the Draft Local Plan must be sufficiently flexible in order to maximise the chances of meeting the significant housing need within the district. Failure to do so risks the Draft Local Plan stifling opportunities to meet housing need through the effective and efficient use of the highly sustainable brownfield sites.

Overall, it is concluded that in its current form the Draft Local Plan has areas of inconsistency, is not justified with appropriate evidence and is therefore at risk of not be legally compliant, and it is suggested that the Council take further review. We look forward to engaging further in the preparation of the St Albans Local Plan 2041.

Respondent: Company/Organisation: MFS Resolution Name: Michael Fearn

Comment Number: 11

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Draft Policy EMP1**–*"Protected Employment Areas"*– the Council is again putting forward its own definition of 'employment' uses. The Use Classes Order (UCO) was deliberately amended to widen the range of commercial activities within Class E, so that it extends beyond traditional industry. If the change of use is within the same use class, then no justification is needed. The policy is not positively prepared; justified; effective; or consistent with national policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. **350 - Hill Residential**

Submission Number: 350 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: tor&co Name: Sophia Goodhead

On Behalf Of Company/Organisation: Hill Residential Name:

Comment Number: 14

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Strategic Policy SP5: Employment and the Local Economy and Policy EMP1: Protected Employment Areas**

Hill is supportive of policies SP5 and EMP1 which seek to encourage economic growth, enhance productivity and inward investment of protected employment areas such as Rothamsted Research (site PEA-16).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

### 291 - SEGRO (Radlett) Limited

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 10

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

5.13 Policy EMP2 – Strategic Rail Freight Interchange (SRFI) states that *'there is now a reasonable prospect that the SRFI will be delivered during the Plan period. All of the public benefits including all the country parks and community forest and the Park Street / Frogmore relief road and other requirements set out in the 2014 Planning permission must be delivered. On review of this Plan and once the SRFI has been completed, Green Belt boundaries in relation to the SFRI facility will be reviewed and revised as appropriate.'*

5.14 Whilst SEGRO (Radlett) Limited welcome and support the recognition of the SRFI through its site-specific policy, the effectiveness and soundness of Policy EMP2 should be strengthened. The policy wording of *'a reasonable prospect that the SRFI will be delivered'* is unjust in recognition that the SRFI planning permission has been implemented and was formally confirmed by SADC on 6th July 2021. Furthermore, the site acquisition process was complete in June 2023

and the site is now in single land ownership, which enables the development to progress within the programme. Therefore, there is a good prospect that the SRFI and its accompanying benefits, which are the subject of the 2014 planning permission, will be delivered during the Plan period. **Appendix 1** outlines the programme for delivery. This can be reviewed as the Local Plan preparation progresses. On the current target for adoption of 2026, the SRFI would have made significant progress in terms of delivery, preparing the site for indicative first occupation from Q4 2026 onwards. It is therefore reasonable for the policy to be amended and for the SRFI site to be removed from the Green Belt.

5.15 Policy EMP2 also states that the Green Belt boundaries will be reviewed and revised as appropriate once the SRFI is complete. Whilst SEGRO (Radlett) Limited support the review and revision of the green belt boundaries, it is arguably unjustified and ineffective to do this after the SRFI has been completed. Considering that the site is within the green belt, the site should be released from the green belt as part of this Local Plan review which reflects the reality that the development has been commenced and will be delivered during the life of the Local Plan. This has been addressed further in the preceding section of this representation.

5.16 In conclusion, SEGRO (Radlett) Limited support the ambitions of SADC to ensure *'sufficient land and floorspace to cater for full employment and provide for different kinds of employment use'*, however, this can only be achieved through a deliverable and sustainable Plan that allocates employment floorspace appropriately in line with a recognition of the SFRI being delivered.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Policy EMP2 –Strategic Rail Freight Interchange (SRFI)**

*"Development has commenced and there is now a<u>strong likelihood</u> that the SRFI will be delivered during the Plan period. All of the public benefits including all the country parks and community forest and the Park Street / Frogmore relief road and other requirements set out in the 2014 Planning permission must be delivered.*

*The Green Belt boundaries in relation to the SFRI facility<u>have been</u> reviewed and revised as appropriate <u>to release the SRFI from the Green Belt</u>.*

*The Strategic Rail Freight Interchange is shown on the Policies Map."*

## EMP4 - Hertfordshire Innovation Quarter (Herts IQ)

### 200 - Lawes Agricultural Trust

Submission Number: 200 Submission Date: 07/11/24 16:49

Respondent: Company/Organisation: Montagu Evans Name: Mr Amran Nagra

On Behalf Of Company/Organisation: Lawes Agricultural Trust Name:

Comment Number: 8

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraphs 5.5, 5.24-5.26 of the draft Local Plan provides a discussion on the Herts Innovation Quarter and mentions the Rothamsted Campus as one of 3 core locations for knowledge-based research and development activities. These are also reflected within draft Policy EMP4 – Hertfordshire Innovation Quarter (Herts IQ).

We welcome the support for the Rothamsted Campus, particularly the release of land to the south from the Green Belt to facilitate future expansion, ensuring it maintains its status as a centre of excellence for agricultural science.

We endorse the inclusion of employment allocations (Refs: OS3 and OS4) for the extension of the research facility and view these as integral to deliver new facilities required to secure the long-term successful operation of Rothamsted Research. While we acknowledge that the draft employment allocations referenced in Policy EMP4 will support development proposals for additional facilities and spin-off companies, we believe the supporting text could provide further commentary. Specifically, it should emphasise the importance of clustering research and business activities in this location, which is vital for the success of the scientific work and the creation of a world-class campus environment.

The amendments to Policy EMP4 in the Regulation 19 publication do not adequately reflect the facility's national and international significance or the nature of the work conducted there. As stated in our previous representation, we urge the Council to include more detailed information on the role and function of Rothamsted Research to ensure a robust policy framework that enables future proposals to advance. The Trust would be happy to provide any further input required to support this process.

Furthermore, we note that the revised policies map published under Regulation 19 does not delineate the full extent of the Lawes Agricultural Trust landholding beyond the core campus. Given that the majority of this land falls within the Green Belt, we believe this represents a missed opportunity in the latest Local Plan publication. Clearly demarcating the entire landholding on the

policy map and linking it to emerging Policy EMP4 would create a strong Very Special Circumstances case to support future operational development and the effective application of Policy LG5.

While we appreciate the references to new employment allocations at OS3 and OS4, we recommend that these allocations be updated to encompass the entirety of the landholding and identify the various areas designated for development and operational work supporting the scientific facilities. As we noted in our Regulation 18 representations, this approach would help resolve inconsistencies between emerging Policies EMP4, which supports the development of Rothamsted Research and the Rothamsted Campus, and Policy LG5 (Green Belt), which restricts development within the Green Belt without further amendments.

Finally, to adequately reflect the significance of the Rothamsted Campus, we feel there is merit in the Council collaborating with site owners to prepare a supplementary planning document aimed at supporting the long-term vision for the site.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The amendments to Policy EMP4 in the Regulation 19 publication do not adequately reflect the facility's national and international significance or the nature of the work conducted there. As stated in our previous representation, we urge the Council to include more detailed information on the role and function of Rothamsted Research to ensure a robust policy framework that enables future proposals to advance. ## Chapter 6 - City, Town and Village Centres and Retail

### 208 - TJ Morris Limited

Submission Number: 208 Submission Date: 07/11/24 17:13

Respondent:  Company/Organisation: Quod Name: Mr Adrian Fox

On Behalf Of Company/Organisation: TJ Morris Limited Name:

Comment Number: 1

**Type:**

* Policy

**Number:**

SP6

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

TJM, the parent company of the national retailer Home Bargains, is a key stakeholder in the district, being the freehold owners of the existing retail warehouse located at Alban Park on Hatfield Road. St Albans ('the Site). The retail warehouse is currently leased to the national DIY retailer. Homebase.

Summary

These representations demonstrate that draft Strategic Policy SP6 and Policy TCR2 of the enlarging Local Plan are not justified, effective and consistent with national policy. As currently worded, they are deemed to be unsound.

The emerging Local Plan recognises the important rote of existing out-of-centre retail parks, but this is not consistently applied by other policies contained within the Local Plan. Specifically, Strategic Policy SP6 should be revised as outlined above to acknowledge the role of retail parks in applying the Sequential approach - consistent with Policy TCR3.

Regarding draft Policy TCR2, for the reasons identified, the first criterion should be removed. Again, as currently worded this part of the policy is unsound and inconsistent with both other policies within the Local Plan and the NPPF.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

See attached representations for full submission.

### 4.6 Chapter 6 – City, town and village centres and retail

Oaklands College and Taylor Wimpey **support** the identification of new local centres within some of Broad Locations, particularly at East St Albans, within Table 6.1 (Centre Hierarchy). The local centres will not only cater for the needs of the new communities created in these broad locations, they will bring both social and economic benefits the needs of the existing and proposed local communities and help to reduce the need to travel by private vehicle to purchase basis provisions.

No suggested amendments are offered at this stage.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

See attached representations for full submission.

No suggested amendments are offered at this stage.

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

CHPC has reviewed the Centre Hierarchy **Table 6.1 of Policy SP6** and has the following comments and suggested amendments for clarity and accuracy

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

1. **Colney Heath - High Street:** The current listing for Colney Heath on the Centre Hierarchy Table includes addresses 11-15A & 14-18 High Street. This should be amended to accurately reflect the correct range of properties, which are 11-15 & 14-16 High Street. This adjustment ensures consistency with local knowledge and helps avoid any confusion regarding the identified area.
2. **Smallford:** Currently, Smallford is not listed as having any relevant facilities. However, Smallford could include both Notcutts Garden Centre, Shell Garage and Smallford Farm Shop, which are key local businesses contributing to the community's economic activity and offering essential services. The inclusion of these locations in the hierarchy better reflects the area's role in supporting local residents and visitors the inclusion of the Shell Garage would be consonant with the assessment made on Smallford works site.
3. **Sleapshyde:** There is no entry for Sleapshyde which is agreed upon by CHPC. No further amendments are required for this area, as it accurately reflects the lack of a designated local centre or key services.

By making these revisions, the Centre Hierarchy Table will more accurately reflect the true scope of local centres and businesses within Colney Heath, Smallford, and Sleapshyde, ensuring the Local Plan policies align with current local conditions and support the continued development of these rural areas.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 357 - Mrs Julia Warren

Submission Number: 357 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Wheathampstead Parish Council Name: Mrs Julia Warren

Comment Number: 6

**Type:**

* Paragraph

**Number:**

6.12, 6.17, 6.23 and Table 6.1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Paragraph 6.12, Table 6.1 Centre Hierarchy**

This hierarchy is not listed alphabetically and so we would query why Wheathampstead is last on the list. This might give the impression that the village is lower in the hierarchy

**Paragraph 6.17, TCR4 - Visitor Economy**

Wheathampstead has become more of a tourist destination through the development of our Heritage Trail. Building a Community Garden inside the Crinkle Crankle Wall adjacent to our Grade One Parish Church, the promotion of the River Lea, the restoration of the site of the local railway station and an extensive network of countryside footpaths have encouraged a growing number of visitors. Therefore, we expect St Albans District Council to include Wheathampstead in all initiatives to promote the Visitor Economy across the whole of the District and not just the city and town centres.

**Paragraph 6.23, TCR6 - St Albans City Centre Public Realm and movement**

Regarding points h) & i), as mentioned above, Wheathampstead Parish Council wants St Albans District Council to implement Safe Cycle Routes (also usable as Safe Accessible Routes) to link Wheathampstead to its neighbouring settlements. To this end, we ask for specific routes to be explicitly shown in the Local Plan. This should include collaboration with bordering districts, such as Welwyn & Hatfield, since a Safe Route to the main line train stations at Welwyn Garden City and Hatfield crosses the council border.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As paragraph 6.8 on pg62 points out during COVID there was a rise in online shopping. This has had a knock-on effect in terms of noise, as per household more people are having more items delivered. In high density areas with flats, this means the noise implication is getting really bad. Deliveries can begin at 6.30am and end at 10.30pm Monday-Sunday. This is not conducive to reducing noise pollution in high density areas or indeed any area. The policy could encourage a limitation on hours, say 8am-9pm at night. These are reasonable hours. Also, make housing less dense, as less people means less deliveries.

In terms of transport and parking, this entire local plan nseems to be written from the male point of view. It is therefore not inclusive.

[redacted], 24/7/365 I have to think about my safety. I now don't use public transport for safety reasons. I only walk or cycle in daylight hours. If I have to take a journey more than 1 mile and for work or lots of shopping, I'll use my car. I only use my car for all work journeys as not safe on public transport. Also, don't earn enough to use public transport.

ITV News commissioned a survey recently which said that 81% of young women aged 18-25 feel unsafe walking home in dark. I'm older, but I haven't felt safe for about 25 years walking in the dark. [redacted]

Women need parking. We can't reduce our reliance on cars, as we're not safe. There's an epidemic of violence against women.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Take into account women's point of view for safety and need to use cars. Unless of course, men will be on a curfew for night-time hours.

Reduce density of housing. Reduce delivery hours for online and home-delivered food shopping, which is incredibly noisy delivery process.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To make sure women's views are included.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Whilst the intent of the draft St Albans Local Plan 2041 is generally good, I do not agree to converting current car parking in Harpenden into housing sites.

The objective to build over the car parks in Harpenden will surely destroy the currently thriving and sought after centre of Harpenden. Harpenden and surrounding areas are currently a desirable place to live predominantly because it is an attractive town with fast rail links to London so that people can live in a countrified area whilst working in the city. If the Harpenden Railway Station Car Park (UC54) is turned into housing and there will be nowhere for commuters to park, which will eventually lead to people moving away from Harpenden and its inevitable decline.
Additionally, if the town centre car parks at Waitrose (UC14) and Bowers Way East (UC15) are no longer available, then people will not come to do their main shop in the town and will shop at out-of-town centres or elsewhere. This initiative combined with the St Albans City and District Council plans to enforce addition street parking fees in Harpenden will mean there is nowhere to park which will cripple local businesses. It is disappointing that the council have not learnt from previous similar initiatives that have resulted in killing the local community and facilities in towns and villages around the country. Shops are already struggling to compete with the internet for customers and so the reduction of parking opportunities with only add to their burden.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. **208 - TJ Morris Limited**

Submission Number: 208 Submission Date: 07/11/24 17:13
Respondent: Company/Organisation: Quod Name: Mr Adrian Fox
On Behalf Of Company/Organisation: TJ Morris Limited Name:

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

TJM, the parent company of the national retailer Home Bargains, is a key stakeholder in the district, being the freehold owners of the existing retail warehouse located at Alban Park on Hatfield Road. St Albans ('the Site). The retail warehouse is currently leased to the national DIY retailer. Homebase.

These representations demonstrate that draft Strategic Policy SP6 and Policy TCR2 of the enlarging Local Plan are not justified, effective and consistent with national policy. As currently worded, they are deemed to be unsound.

The emerging Local Plan recognises the important rote of existing out-of-centre retail parks, but this is not consistently applied by other policies contained within the Local Plan. Specifically, Strategic Policy SP6 should be revised as outlined above to acknowledge the role of retail parks in applying the Sequential approach - consistent with Policy TCR3.

Regarding draft Policy TCR2, for the reasons identified, the first criterion should be removed. Again, as currently worded this part of the policy is unsound and inconsistent with both other policies within the Local Plan and the NPPF.

As currently worded, Strategic Policy SP6 is not consistent with other polices within the Local Plan - including Policy TCR3.

Despite the supportive approach of Policy TCR3, in applying the sequential approach to site selection under Strategic Policy SP6, there is no recognition or support for existing retail parks as appropriate locations for large-format retailing. Such an approach is inconsistent.

It is entirely appropriate and sensible for policies to give preference to established retail destinations, which already form part of the retail hierarchy, over other out-of-centre locations that could lead to ad hoc and sporadic out-of-centre retail development being delivered.

Further details of the reasons for this are contained in the supporting letter.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Consistent with the approach of Policy TCR3 we believe that draft Strategic Policy SP6 should be revised to explicitly recognise existing out-of-centre retail parks as an appropriate location for large-format retailing when applying the sequential approach to site selection. Whilst we acknowledge the town centre first approach set by the National Planning Policy Framework ('NPPF') in line with other policies within the Local Plan we believe that Criterion a) of Strategic Policy SP6 should be revised as follows (new text in bold and underlined):

*"Applying a 'town centre first' approach to proposals for retail, services and other main town centre uses in accordance with the defined Centre Hierarchy and the sequential approach set out in the NPPF. When considering out-of-centre locations preference will be given to existing; out of centre retail parks as defined by the Policies Map under Policy TCR3 over other out-of-centre locations in applying the sequential approach to site selection."*

Entirely consistent with draft Policy TCR3. this proposed amendment recognises the important role existing retail parks can play in meeting future retail needs.

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

3.11 Hallam and St Albans School are supportive of the recognition placed on city, town and village centres as essential providers of retail, services, leisure, entertainment and other services. The fact that this policy considers both existing centres, and those which have the opportunity to be delivered through Broad Locations, is also supported.

3.12 Whilst criterion (h) specifically acknowledges the role of new local centres at Broad Locations and how they can contribute to the day-to-day needs of the wider resident population, it is considered that not enough recognition has been placed on the importance these centres can have in supporting the creation of new communities. There is a risk therefore that the functions and uses required to allow these centres to establish as community communities is overlooked. As such, it is suggested that a sentence is added to the end of the policy test to acknowledge the role such centres can have within new communities.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. ## 335 - Michael Fearn

Submission Number: 335 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: MFS Resolution Name: Michael Fearn

Comment Number: 42

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Draft Strategic Policy SP6**"*City, Town and Village Centres and Retail"*– The draft policy says that it maintains a town centres first approach, even though the recent changes to the UCO may have eroded this. In fact, the Council has itself developed most of its significant leisure developments outside designated centres and/or in the Green Belt (examples include Westminster Lodge, Batchwood, Cotlandswick, and Rothamsted Park) and the terms of this policy would only serve to frustrate other such community infrastructure improvements in future. A very large area of the City Centre still remains designated as the central area and this area has not been properly assessed since the time of the previous plan in the late 1980s. There is no encouragement given to making provision for other activities in these areas, particularly residential uses. The policy is not justified; effective; or consistent with national policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Reconsider the extent of the City Centre boundary and reword the policy to include a fuller range of uses.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 349 - Lisa Peters

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 12

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

CHPC has reviewed the Centre Hierarchy **Table 6.1 of Policy SP6** and has the following comments and suggested amendments for clarity and accuracy

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

1. **Colney Heath - High Street:** The current listing for Colney Heath on the Centre Hierarchy Table includes addresses 11-15A & 14-18 High Street. This should be amended to accurately reflect the correct range of properties, which are 11-15 & 14-16 High Street. This adjustment ensures consistency with local knowledge and helps avoid any confusion regarding the identified area.
2. **Smallford:** Currently, Smallford is not listed as having any relevant facilities. However, Smallford could include both Notcutts Garden Centre, Shell Garage and Smallford Farm Shop, which are key local businesses contributing to the community's economic activity and offering essential services. The inclusion of these locations in the hierarchy better reflects the area's role in supporting local residents and visitors the inclusion of the Shell Garage would be consonant with the assessment made on Smallford works site.
3. **Sleapshyde:** There is no entry for Sleapshyde which is agreed upon by CHPC. No further amendments are required for this area, as it accurately reflects the lack of a designated local centre or key services.

By making these revisions, the Centre Hierarchy Table will more accurately reflect the true scope of local centres and businesses within Colney Heath, Smallford, and Sleapshyde, ensuring the Local Plan policies align with current local conditions and support the continued development of these rural areas.

## 361 - Mohammad Ahmed

Submission Number: 361 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: The Environment Agency Name: Mohammad Ahmed

Comment Number: 7

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**Policies SP6 and TCR6**

As communicated in our Regulation 18 response, we believe that there is a missed opportunity in terms of provisions for environmental considerations. The regeneration and uplifting of town centres provide a great opportunity for environmental protection and enhancement.

We therefore recommend the inclusion of clause(s) related to safeguarding and protecting the environment. This could include the safeguarding of associated watercourses and priority habitat. Furthermore, we recommend the inclusion of a clause to explore environmental improvements such as creation of new habitats that will provide multiple benefits for example as part of green infrastructure, SuDS, flood alleviation, working with natural processes and natural flood management, increasing recreational opportunities, improving the economic and social value of the environment. St Albans town centre is in close proximity to the River Ver so consideration of development impact to the river should be included.

## 366 - Chrissie Chadney

Submission Number: 366 Submission Date: 10/11/24 09:00

Respondent: Company/Organisation: Name: Chrissie Chadney

Comment Number: 5

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

I have been a resident in Wheathampstead for over forty years and read the proposed District Plan with interest. Whilst there are some good ideas in it, there are a number of things which give me concern. I have read the WDPS response and concur with it fully, but have a few additional things to say here.

Local Economy and Employment: The draft plan offers little in the way of creating employment opportunities within our community, potentially turning Wheathampstead into a dormitory village. Our local economy, especially our vibrant High Street, depends on local employment to sustain its footfall and economic activity. It is vital that any new development integrates employment solutions to maintain and enhance our community's vibrancy and self-sufficiency.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Conclusion: I firmly stand with the WDPS in urging a comprehensive reevaluation of the Draft Local Plan. It is essential that the plan not only reflects realistic population projections but also prioritizes environmental conservation, sustainable development, and the enhancement of local services and infrastructure. We need a balanced, forward-thinking approach that truly serves the interests and needs of all of the St Albans District's residents.

### 367 - Ms Julie Bell

Submission Number: 367 Submission Date: 10/11/24 09:00

Respondent: Company/Organisation: Name: Ms Julie Bell

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Local Economy and Employment:**
The Draft Local Plan currently does little to foster employment opportunities within our community, risking turning Wheathampstead into a mere bedroom community. Our local economy, particularly our vibrant High Street, relies heavily on local employment to maintain its vitality and activity. It is imperative that any new developments include employment opportunities that support and enhance the vibrancy and self-sufficiency of our community.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion:**
I stand firmly with the WDPS in calling for a thorough reevaluation of the Draft Local Plan. The plan must accurately reflect our realistic population growth projections and prioritize environmental protection, sustainable development, and the improvement of local services and infrastructure. A balanced and visionary approach is required to genuinely meet the needs and interests of the residents of the St Albans District.

## 335 - Michael Fearn

Submission Number: 335 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: MFS Resolution Name: Michael Fearn

Comment Number: 32

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Draft Policy TCR1**"*Protecting Retail and Main Town Centre Uses"*–this type of policy had its roots in local plans dating from over 30 years ago. The changes to the UCO in the last few years will have rendered it ineffectual. The *"Primary Shopping Area"*includes extensive areas of the City Centre with no ground floor window display at all. The proposed 12 & 18 month marketing periods will only promote long-term vacancy, leading to further decline. The objective of the emerging plan should be to look to find alternative occupiers for empty properties, in order to encourage investment and strengthen vitality. Suitable alternative occupiers can also include institutional users, including education, as well as residential, both of which generate activity and lead to spending in retail outlets and these uses should be acceptable throughout the Central Area. The policy is not positively prepared; justified; effective; or consistent with national policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. ## TCR2 - Retail Uses outside Existing Centres

### 208 - TJ Morris Limited

Submission Number: 208 Submission Date: 07/11/24 17:13

Respondent:  Company/Organisation: Quod Name: Mr Adrian Fox

On Behalf Of Company/Organisation: TJ Morris Limited Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

TJM, the parent company of the national retailer Home Bargains, is a key stakeholder in the district, being the freehold owners of the existing retail warehouse located at Alban Park on Hatfield Road. St Albans ('the Site). The retail warehouse is currently leased to the national DIY retailer. Homebase.

As currently worded, Strategic Policy SP6 is not consistent with other polices within the Local Plan - including Policy TCR3.  Further details of the reasons for this are contained in the supporting letter.

These representations demonstrate that draft Strategic Policy SP6 and Policy TCR2 of the enlarging Local Plan are not justified, effective and consistent with national policy. As currently worded, they are deemed to be unsound.

The emerging Local Plan recognises the important rote of existing out-of-centre retail parks, but this is not consistently applied by other policies contained within the Local Plan. Specifically, Strategic Policy SP6 should be revised as outlined above to acknowledge the role of retail parks in applying the Sequential approach - consistent with Policy TCR3.

Regarding draft Policy TCR2, for the reasons identified, the first criterion should be removed. Again, as currently worded this part of the policy is unsound and inconsistent with both other policies within the Local Plan and the NPPF.

In reviewing the supporting text (at paragraph 6.15) it is apparent that the intention of Policy TCR2 is to protect local shops that provide a valuable role in the community. However, as currently drafted, the proposed wording to this policy (under criterion a) is such that proposals for all new town centre uses outside the Town Centre Hierarchy, which will including at existing out of centre retail parks, will be resisted by the Council. Such an approach is contrary to the NPPF. This identifies that proposals for main town centre uses outside defined centres will be acceptable subject to satisfying the relevant retail 'tests' — namely the sequential approach to site selection and, dependent on scale, the impact test.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

As currently worded, Policy TCR2 states that all proposals for main town centre uses, except those that meet the definition of Local Community Shop will be resisted. Given this, criterion a) of Policy TCR2 should be deleted. It is not needed, and as currently worded, is not consistent with national policy, making the emerging Plan unsound. Instead, proposals for retail and town centre uses outside defined centres will be addressed by other policies within the Local Plan — including Strategic Policy SP6 and Policy TCR3 — and by national policy.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Draft Policy TCR2***"Retail Uses outside Existing Centres"*– the LPA can no longer control many retail (and institutional uses) from occupying commercial premises outside central areas. We note the promotion of new retailing in *"isolated rural areas"*, although this would not necessarily sit easily with other policies in the draft Plan as such sites could only be in the Green Belt. Again, the imposition of a 12 month marketing period will only prolong vacancy. As stated above, the objective of the emerging plan should be to look to find alternative occupiers for empty properties, in order to encourage investment and strengthen vitality. The policy is not positively prepared; justified; effective; or consistent with national policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. ## TCR3 - Out-of-Centre Retail Parks

### 208 - TJ Morris Limited

Submission Number: 208 Submission Date: 07/11/24 17:13

Respondent: Company/Organisation: Quod Name: Mr Adrian Fox

On Behalf Of Company/Organisation: TJ Morris Limited Name:

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

TJM, the parent company of the national retailer Home Bargains, is a key stakeholder in the district, being the freehold owners of the existing retail warehouse located at Alban Park on Hatfield Road. St Albans ('the Site). The retail warehouse is currently leased to the national DIY retailer. Homebase.

As currently worded, Strategic Policy SP6 is not consistent with other polices within the Local Plan - including Policy TCR3. Further details of the reasons for this are contained in the supporting letter.

These representations demonstrate that draft Strategic Policy SP6 and Policy TCR2 of the enlarging Local Plan are not justified, effective and consistent with national policy. As currently worded, they are deemed to be unsound.

The emerging Local Plan recognises the important rote of existing out-of-centre retail parks, but this is not consistently applied by other policies contained within the Local Plan. Specifically, Strategic Policy SP6 should be revised as outlined above to acknowledge the role of retail parks in applying the Sequential approach - consistent with Policy TCR3.

Regarding draft Policy TCR2, for the reasons identified, the first criterion should be removed. Again, as currently worded this part of the policy is unsound and inconsistent with both other policies within the Local Plan and the NPPF.

The supporting text to this Policy (at paragraph 6.16) acknowledges that the district has a number of large retail parks, including at Hatfield Road. The Site and immediate area are identified on the supporting Policies Map as forming part of a defined 'Out-of-centre Retail Park'. An extract from the relevant Policies Map is provided at Figure 1.

Draft Policy TCR3 supports the role existing retail parks serve (including the Site) in providing large-scale retailing. Our client is supportive of this Policy approach. However, whilst this policy is supportive of existing retail parks, this is not reflected by other policies contained within the Local Plan.

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Paragraph 6.17, TCR4 - Visitor Economy**

Wheathampstead has become more of a tourist destination through the development of our Heritage Trail. Building a Community Garden inside the Crinkle Crankle Wall adjacent to our Grade One Parish Church, the promotion of the River Lea, the restoration of the site of the local railway station and an extensive network of countryside footpaths have encouraged a growing number of visitors. Therefore, we expect St Albans District Council to include Wheathampstead in all initiatives to promote the Visitor Economy across the whole of the District and not just the city and town centres.

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Paragraph 6.23, TCR6 - St Albans City Centre Public Realm and movement**

Regarding points h) & i), as mentioned above, Wheathampstead Parish Council wants St Albans District Council to implement Safe Cycle Routes (also usable as Safe Accessible Routes) to link Wheathampstead to its neighbouring settlements. To this end, we ask for specific routes to be explicitly shown in the Local Plan. This should include collaboration with bordering districts, such as Welwyn & Hatfield, since a Safe Route to the main line train stations at Welwyn Garden City and Hatfield crosses the council border.

### 361 - Mohammad Ahmed

Submission Number: 361 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: The Environment Agency Name: Mohammad Ahmed

Comment Number: 5

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Policies SP6 and TCR6**

As communicated in our Regulation 18 response, we believe that there is a missed opportunity in terms of provisions for environmental considerations. The regeneration and uplifting of town centres provide a great opportunity for environmental protection and enhancement.

We therefore recommend the inclusion of clause(s) related to safeguarding and protecting the environment. This could include the safeguarding of associated watercourses and priority habitat. Furthermore, we recommend the inclusion of a clause to explore environmental improvements such as creation of new habitats that will provide multiple benefits for example as part of green infrastructure, SuDS, flood alleviation, working with natural processes and natural flood

management, increasing recreational opportunities, improving the economic and social value of the environment. St Albans town centre is in close proximity to the River Ver so consideration of development impact to the river should be included.

Chapter 7

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

- Chapter 7 includes the requirements for cemeteries within the plan period. The emerging Strategy Policy SP7 encourages additional cemetery space where a deficit is identified, and supporting policy COM2, criteria b supports the extension of the London Road Cemetery, providing it complies with a Green Belt Impact Assessment. The supporting text to the policy confirms there is a requirement for additional cemetery space. This is informed by the Infrastructure Delivery Plan August 2024, which confirms there is insufficient land available to meet current and future demand without the allocation of additional land for cemetery use. The Infrastructure Delivery Plan confirms that the *'London Road Cemetery has been identified to be a suitable location'* for new cemetery space.
- Catesby Estates continues to control both land to the north and south of the cemetery. Land to the north is not available for cemetery extension as it forms the site of the proposed 300 dwellings forming land at London Road. Land to the south is available for the cemetery extension as part of a wider development at London Road, and as shown on the Vision Document masterplan (see **Appendix 1**). The land area shown is indicative, and there is potential to resize and reshape this in future discussions to ensure an efficient area of land. The cemetery can also be given appropriate boundaries to create the peaceful area required. The site would be an appropriate location for cemetery space as it can utilise the existing facility and therefore make land efficiency savings when compared to a new facility elsewhere.

The cemetery provides an attractive clear and defensible boundary to the built part of the proposal. It ensures that the Green Belt will remain open on the eastern side of London Road and would prevent coalescence between St Albans and London Colney.

**Response to Policy SP7 – Community Infrastructure**

**Object**

**Plan is not positively prepared and Justified**

Hertfordshire Constabulary have reviewed the Local Plan and are of the view not enough consideration has been given to the impact growth could have on emergency services.

Policy SP7 is supported by the Infrastructure Delivery Plan which identifies new infrastructure requirements. This recognises that there may be a need for a new police station.

Further work undertaken by the Constabulary has determined a new police station will be required.

As noted in our response to Table 1.3,we would be looking for both St Albans District Council and Dacorum Borough Council to allocate appropriate land for a new police station, potentially in a community hub providing a doctor's surgery, library and fire service facilities also.

Paragraph 100 of the NPPF states "*To ensure faster delivery of other public service infrastructure such as further education colleges, hospitals and criminal justice accommodation, local planning authorities should also work proactively and positively with promoters, delivery partners and statutory bodies to plan for required facilities and resolve key planning issues before applications are submitted (*emphasis added*)."*

In addition to a new police station, Hertfordshire Constabulary also request that funding is obtained through Section 106 payments by developers for the new police station and the increased overall police service required in all areas as a result of a 24.6% increase in the population.

It is important to emphasise at the outset that our approach to Section 106 requests to proposed residential developments is wholly in accordance with national best practice recommended by the National Police Chiefs' Council (NPCC). It has been tested at numerous public inquiries nationally and found to be in accordance with the statutory Community Infrastructure Levy (CIL) Regulation tests. A comprehensive list of appeal decisions supporting the principle of developer contributions towards policing is attached as **Appendix 1.**

This document includes 44 planning appeal decisions supporting police Section 106 contributions and represents a continuous positive legal precedent spanning over 11 years to the present day. Most recently, the case for policing contribution was assessed by the Secretary of State in the allowed appeal for the major development at Wisley Airfield (Guildford). In paragraph 473 the inspector concluded:

*"There is a financial contribution of £339,798 for staffing and equipment cost and other infrastructure relating to policing. There would also be an on-site office space of at least 24m2 plus dedicated WC facilities within the community building along with associated parking for the use of Surrey Police. This would comply with the Infrastructure Schedule and policy ID1 in the LPSS. An extremely detailed letter was submitted to the inquiry on behalf of the Police and Crime Commissioner for Surrey. This made clear the demands that a new development of this size would make on police resources and that these demands could not all be met by public funding. The contribution would be paid in four tranches with 50% before the commencement of the first residential unit. The final*

*10% would be paid prior to the occupation of the 1,600th residential unit. Whilst this would be quite late in the development there would remain sufficient value in the site to ensure that this final payment would be made".*

Furthermore, the national policy position to support our request exists in the National Planning Policy Framework (NPPF) (December 2023). Paragraphs 8, 26 and 96 together confirm that sustainable development means securing a safe environment through the delivery of social infrastructure needed by communities. In this respect, paragraph 20 specifically states policies should deliver development that makes sufficient provision for security infrastructure. Paragraphs 16, 26, 29 and 38 collectively envisage this being delivered through joint working by all partners concerned with new developments.

This is expanded on by paragraph 96, which states planning policies and decisions should promote public safety and security requirements by using the most up-to-date information available from the police, who are essential local workers providing frontline services to the public, according to Annex 2 of the NPPF.

The PPG also recognises the role that planning can play in preventing crime and malicious threats. It is noted that (009 Reference ID:53-009-20190722):

*Planning provides an important opportunity to consider the security of the built environment, those that live and work in it and the services it provides.*

Section 17 of the Crime and Disorder Act 1998 (as amended) *requires all local, joint and combined authorities (as well as National Parks, the Broads Authority and the Greater London Authority) to exercise their functions with due regard to their likely effect on crime and disorder, and to do all they reasonably can to prevent crime and disorder. Crime for these purposes includes terrorism.*

The above policy requirements are included because the NPPF and PPG seek environments where crime and disorder and the fear of crime do not undermine quality of life, the health of communities and community cohesion (NPPF paragraphs 96 and 135). Planning policies and decisions are expected to deliver this.

To ensure there is a full understanding of the scale of what comprises police infrastructure by developers, and an acknowledgement of the need to provide it through new developments, we would ask that the Local Plan is updated. We would welcome further discussions and input to ensure that the required increase in Police service can be funded. Central government and local funding has decreased, meaning the Police are reliant on developer contributions (S106/CIL) to mitigate the impact on policing of housing growth.

In this respect, policy SP7 will require developers to make agreed contributions to accommodate additional demands arising from new developments. Sufficient provision for security infrastructure should be made through using the most up-to-date information available from the police and involves direct investment in addition to any passive measures achieved through advisory design services (Secured by Design Initiatives).

The Police and Crime Commissioner for Hertfordshire is a major budget holder within the County and is dependent upon a precept on the Council Tax to maintain the level of existing policing. This level of support can only be provided for additional development if the appropriate infrastructure is in place,funded by developer contributions through section 106 and CIL payments. Without this policing for Hertfordshire as a whole will be compromised.

With the above context in mind, we have provided in Appendix 2 information based on the 11,000 homes originally planned in 2019. We have justified these against the tests of the statutory CIL Regulations. We will be submitting formal Section 106 requests for the larger planning applications once submitted.

Unless amendments are made, Hertfordshire Constabulary are of the view that the plan cannot be found sound as it has not been positively prepared in accordance with paragraph 35 of the NPPF (2023).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Modification requested to: **Policy SP7 – Community Infrastructure**

More consideration needs to be given to the impact growth could have on emergency services.

As noted in our response to Table 1.3,we would be looking for both St Albans District Council and Dacorum Borough Council to allocate appropriate land for a new police station, potentially in a community hub providing a doctor's surgery, library and fire service facilities also.

In addition to a new police station, Hertfordshire Constabulary also request that funding is obtained through Section 106 payments by developers for the new police station and the increased overall police service required in all areas as a result of a 24.6% increase in the population.

Reason:

The Police and Crime Commissioner for Hertfordshire is a major budget holder within the County, and is dependent upon a precept on the Council Tax to maintain the level of existing policing. This level of support can only be provided for additional development if the appropriate infrastructure is in place, funded by developer contributions through section 106 and CIL payments. Without this policing for Hertfordshire as a whole, will be compromised.

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Redington Capital Limited and CALA Homes continue to **object** to rationale set out in paragraph 7.6 (Education) of the Regulation 19 Publication Draft Local Plan of leaving all responsibility for education facilities delivery to Hertfordshire County Council (HCC).

In accordance with paragraph 99 of the NPPF, education authorities are to ensure that a sufficient choice of school places is available to meet the needs of existing and new communities. However, paragraph 7.6 forgets to acknowledge that Local planning authorities should take a proactive, positive and collaborative approach to meeting this requirement, and to development that will widen choice in education.

There is currently one school in Chiswell Green itself – Killigrew Primary School (KPS) – that as of the previous academic year accepted a full 60 pupils into Reception Year, meaning that this Year Group was full. Four of the seven Year Groups were at practical capacity.

HCC has confirmed that KPS can likely be expanded to accommodate further population growth, but is limited to only one form entry (1FE). However, this expansion is only likely to be able to accommodate the pupil yield generated by site allocations L1 (180 homes) and M1 (95 homes) but would not allow for any additional capacity to be provided in the area.

In addition to the above, there is a demonstrable shortfall of SEND places currently across Hertfordshire, especially with regards to Profound Neurological Impairment (PNI) provision. There is no sign of strategy agreed by HCC to accommodate the demand for new PNI pupil places, the funding for which is being collected from every development expected to generate children with SEND requirements in Hertfordshire through pooled Section 106 contributions.

HCC has previously agreed that the best form of future development mitigation is the reservation of school land on Land South of Chiswell Green Lane that would have the ability to provide a new 2FE school. This would accommodate the pupils of the housing development in the surrounding area, whilst also safeguarding provision for future growth which HCC confirmed is likely (and which is highly likely if the Council is to ensure an adequate supply of housing in the district). HCC agreed a Statement of Common Ground on this matter (see **Appendix 7**) which confirms that it is highly likely that the land for a new school facility on the Land South of Chiswell Green Lane is required - it's just a question of when (not if) and what format of school.

In terms of the format, these are the possibilities considered by HCC to date:

- A standalone 2FE primary school (including early years provision); or
- A standalone SEND facility; or
- A combination of 2FE primary and SEND facility, without having to compromise on space standards

A new school and / or SEND facility is not proposed as part of site allocations L1 and M1. This means that there is only one option currently available to HCC - accommodate new primary school pupil growth within the local areas through a very limited expansion of KPS. However, this will not cater for future demand generated from other sites in the local area.

New school provision on Redington Capital Limited and CALA Homes' site as part of a comprehensive masterplan for more homes and a 2FE school would provide additional capacity (including Early Years) for the surrounding areas, would help ensure that HCC is able to fulfil its statutory duty of providing sufficient pupil places for their area, and will increase the options for the wider community during the annual admissions window. On that basis, this offers a genuine and demonstrable benefit to the people of Chiswell Green and wider population of St Albans.

This is a rare opportunity, as school land is not easy to come by especially unencumbered, remediated, of an appropriate size, and without the need for Compulsory Purchase Order. The Council's Planning Officer was aware of this rare opportunity[4] when preparing paragraph 8.7.9 of the Council's Committee Report (see **Appendix 2**) which explains that:

*".... the provision of land for a new 2FE primary school is a benefit of the application. The provision of 1.89ha of land for a 2FE primary school meets the size requirements of BB103 ...[and]... a number of other education land specification requirements. The provision of land for a new 2FE primary school is therefore afforded substantial positive weight*".

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing and education land allocation in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

***Infrastructure Development Plan (IDP)***

Paragraph 7.3 of the Local Plan Part A refers to the IDP as a 'living document' that will continue to be updated and refined before and after the adoption of the new Local Plan.

This approach is supported by TCE. It enables the IDP to be updated, where necessary, to reflect additional information provided in evidence to support the Local Plan process, and can be adjusted as necessary if the way in which infrastructure is to be phased, delivered and funded (by Councils as well as by developers) changes over time without the need to seek changes to inflexible policy wording around infrastructure delivery, which would otherwise be the case.

We consider that there are elements of the IDP that require a more detailed review as the development proposals and infrastructure provision is refined through ongoing HGC activity, including the preparation of SPDs, to provide further guidance to support the policy context for the determination of application proposals.

Specifically, we suggest:

• there is a requirement for a collaborative exercise across HGC allocations to test the infrastructure items set out within the St Albans IDP and the Dacorum IDPs: the outcomes of this exercise may be able to be confirmed through aligned Examination processes should the DBC local plan progress in a similar timeframe, but otherwise should be reviewed as part of the ongoing update of the evidence base; and

• that, whilst there appears to be broad consistency between the IDP and the Council's viability assessment (undertaken by BNP), final conclusions will be heavily dependent upon understanding the make-up of costs within the BNP appraisal, aligned with the exercise in (i) above.

TCE wishes to maintain its involvement in the evolution of the IDP and SPDs, working with SADC, other landowners and the relevant authorities to input into any IDP discussions that may have an impact on East Hemel or the wider HGC allocations.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

The Crown Estate (TCE) is the landowner in respect of three of the four SADC Broad Allocation allocations within the Hemel Garden Communities programme area, namely H2 East Hemel Hempstead (North), H3 East Hemel Hempstead (Central) and H4 East Hemel Hempstead (South). TCE has made a significant commitment to supporting the work of HGC since its designation in 2019 and continues to work positively with both HGC and the planning authority of St Albans in order to progress emerging development proposals in line with the draft allocations. As landowner and promoter of these strategic site allocations we wish to participate fully in the Examination.

7.12

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

The Department for Education (DfE) welcomes the opportunity to contribute to the development of planning policy at the local level.

Local authorities have a statutory responsibility to ensure sufficient education provision, and have a key role in securing contributions from development to new education infrastructure. In this context, we aim to work closely with local authority education departments and planning authorities to meet the demand for new, expanding and redeveloped education facilities.

Given the requirement for all Local Plans to be consistent with national policy, DfE welcomes the explicit reference in paragraph 7.12 to the '*positive approach to school planning and development that will widen choice in education and support the growth identified in the local plan*.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

*Chapter 7 –Community Infrastructure*
Please amend para 7.4 to the following:

***Hertfordshire and West Essex Integrated Care Board is the commissioner of NHS health services. In line with the Health and Care Act 2022, the HWE ICB and partner NHS Trusts and NHS Foundation Trusts work in collaboration with local Health and Wellbeing Boards to provide NHS services to improve the general health and wellbeing of Hertfordshire and west Essex residents and improve health care services in the area****. [deleted text] Within the District there are a range of local healthcare facilities including an acute care hospital,* ***emergency ambulance,*** *GP surgeries,* ***community, mental health,*** *[deleted text]pharmacy, dentistry, and ophthalmology services. The District has one main NHS hospital at St Albans City Hospital operated by West Hertfordshire Teaching Hospitals NHS Trust (WHTHT) who are committed to enhancing*

*and upgrading the existing healthcare provision at the hospital. There is also the Kingsley Green mental health and learning disability site, which opened in 2014 and is operated by Hertfordshire Partnership Foundation Trust (HPFT). A limited number of services are also provided at Harpenden Memorial Hospital. [deleted text]* ***There are currently two ambulance station response posts in Harpenden and St Albans. More ambulance stations and response posts will be required in the St Albans District area to ensure EEAST can meet the Category 1 (life-threatening) incidents.***

Please amend para 7.7 to the following:

*The key emergency facilities in the District are two police stations at St Albans and Harpenden; four fire stations at St Albans, Redbourn, Harpenden and Wheathampstead; and two ambulance station* ***response posts (located at fire stations)*** *at Harpenden and St Albans.*

...

3. **Supporting Documentation**: **Infrastructure Delivery Plan (IDP)**

The HWE ICB and system partners have reviewed the detailed IDP and accompanying schedule and welcome further engagement in this iterative process to refine NHS project requirements and costs.

The HWE ICB seeks the following changes to the IDP:

*Table 1 Infrastructure Delivery Plan Scope by Topic*

*Health - NHS Herts and West Essex Integrated Care Board,* ***system partner NHS Trusts and NHS Foundation Trusts including the*** *West* ***Hertfordshire Teaching*** *Hospital NHS Trust and Hertfordshire County Council.*

*Primary Care Pages 28 & 29*

*Insert –'****The HWE ICB keeps up to date Primary Care Network (PCN) patient lists and closely monitors the current and future capacity of GP surgeries against Local Plan allocations/ housing trajectories. There are five PCNs in St Albans City and District where groups of GP practices work together with community, mental health, social care, pharmacy, hospital, and voluntary services in their local areas to meet the needs of the population.***

***PCNs are small enough to provide the personal care, valued by both patients and GPs, but large enough to have impact and economies of scale through better collaboration between GP practices and others in the local health and social care system.***

***PCNs are expected to deliver services at scale for its registered population whilst working collaboratively with acute, community, voluntary and social care services in order to ensure an integrated approach to patient care.***

*The Hertfordshire and West Essex ICB calculate the General Medical Services cost of the*

*additional infrastructure needed to deliver planed new home using the following formula.....*

*It should be noted that above costs are based on a single GP practice however, all GP surgeries vary in size. In circumstances where investments are made in larger buildings, economies of scale can reduce the overall impact per unit as there will be some common and shared areas. Despite this, space and technical guidance requires larger sized rooms than those in older premises; newer buildings are both larger and more costly.*

***For the purposes of long-term planning, the HWE ICB has also adopted an alternative calculation based on 18 patients per m2, which still has regard to national GMS space guidelines but also considers opportunities for economies of scale.***

[deleted text]

*Given that the exact primary care impact is difficult to assess due to uncertainty of timing of developments coming forward and the resulting increase in patient numbers, this is an average threshold that HWE ICB applies for planning purposes. Each case varies subject to specific area demographics, how a particular practice operates its business, number of sessions offered, workforce mix etc. It also depends on the nature of their building, e.g. age, type of build.'*

*Community and Mental Healthcare, Page 29*

[deleted text]'***In the context of the NHS'*** *integrated care model, community and mental health* ***will increasingly*** [deleted text]*be located with GP services. The HWE ICB will therefore explore with its community and mental health service providers the opportunities to bring forward "Health and Wellbeing Centres" alongside identified new GP surgeries needed to meet the proposed housing growth and resulting increased population within the plan period.'*

Source: [deleted text] ***Hertfordshire and West Essex Integrated Care Board***

*Add Acute Care*

The IDP is missing a section on Acute Care. Please add the following:

*'The West Hertfordshire Teaching Hospitals NHS Trust (WHTH) is a large teaching hospitals Trust and the main provider of hospital services in west Hertfordshire, with hospital sites in Watford, Hemel Hempstead and St Albans.*

*Funding for hospitals and mental health services is secured from a variety of sources in addition to Treasury funding, including developer contributions, providing related Community Infrastructure Levy (CIL) tests are met.'*

*5.2 Health and Social Care*

In reviewing the Local Plan, Infrastructure Delivery Plan and Schedule, the health impacts arising from 14,603 proposed new homes and their spatial distribution have been reassessed in terms of future local healthcare needs and health infrastructure provision.

Please note, the following sections, (similar to those included in the HWE ICB and system partner response to the Regulation 18 Local Plan) have been updated in line with this reassessment and will need incorporating into the next iteration of the IDP and IDP Schedule.

***Primary Healthcare***

The HWE ICB keeps up to date PCN patient lists and closely monitors the current and future capacity of GP surgeries against Local Plan allocations/ housing trajectories.

There are five PCNs in St Albans City and District. The PCNs, the practice membership and list size (as of October 2024) are detailed in the table below.

[Please see table in attachment]

Please note, this is a snapshot in time, PCN memberships can change, and practices may merge to share resources and improve their collective resilience.

The HWE ICB ranks PCNs using existing premises data and known development data. This will identify and rank hotspots across the PCN patch where there is a need to explore projects to increase capacity, for example, by either re-configuring, extending or relocating GP premises to provide sufficient space to increase resources and clinical services to keep patient lists open.

Table 1 below sets out the existing capacity/constraint at a surgery level as well as by settlement, showing how many additional patients can be accommodated before 18 patients per m2 is reached. It also shows the proposed new housing numbers and committed dwellings, as per the Regulation 19 consultation, the resulting increase in patient numbers, consequential capacity requirement in terms of net internal floor area and the corresponding capital impact.

Please note, the proposed dwelling figures in this table do not include the proposed new dwellings in East of Hemel Hempstead, Radlett & Park Street and Colney Heath. This is because growth in these locations affects practices in Dacorum Borough Council (East of Hemel Hempstead), Hertsmere Borough Council (Radlett & Park Street) and Welwyn Hatfield Borough Council (Colney Heath) Localities rather than St Albans District.

It is evident that collectively, GP surgeries in all settlements are operating either over capacity or are very close to reaching capacity, hence their ability to accept new patients is limited.

Data demonstrates that the settlements of Hemel Hempstead, St Albans and Harpenden will experience significant GP capacity constraints when factoring future housing growth to 2041. As such the HWE ICB requests that health infrastructure is provided, in the form of on-site provision for new medical centres in each settlement listed below:

- **Hemel Hempstead** - North Hemel Hempstead and East Hemel Hempstead
- **St Albans** - North St Albans

[Please see table in attachment]

To address current PCN capacity issues and hotspots, there have been recent investments in the GP estate to serve the residents of St Albans, which are listed below.

- **Summerfield Medical Centre in London Colney** – relocation of the (previously known as) Lattimore and Village surgeries. This is a modern, purpose-built facility that replaces two converted residential properties, one in St Albans and the other in London Colney. This facility has been built with sufficient capacity to absorb the planned growth in its vicinity. The HWE ICB will therefore apply for developer's contributions retrospectively on any new development that would impact on this surgery, in order to offset the increased cost burden on NHS.
- **Hatfield Road Surgery in St Albans** – within the building an additional area has been brought into General Medical Services use.

The following proposals have received HWE ICB support in principle.

- **Midway Surgery in Chiswell Green** - will be affected by significant development in and around St Albans. The former CCG approved a project for the extension and refurbishment of the Practice, however, due to the lack of capital, this project is currently on hold. The HWE ICB would therefore apply for developer's contributions on any new development that would impact on this surgery.
- **Harvey House Surgery** – potential to increase capacity in current location; Project Initiation Document received; full proposal yet to be developed.

The projects listed below are in early development, with the HWE ICB yet to receive a formal Project Initiation Document or Business Case:

- **New medical centre at North of St Albans a.k.a. Woollam Park** – consultation with the practices affected by this proposed major development has identified a need for additional primary care facilities.
- **The Maltings Surgery** – options to increase capacity have been considered in recent years and work continues to identify the best solution going forward.

Opportunities to expand have been identified in several existing GP surgeries and the HWE ICB is expecting to receive proposals as and when these practices are nearing their capacity. Given some projects are advanced and will be completed ahead of housing growth, please note that the HWE ICB will seek developer contributions, either through CIL or Section 106 agreements for projects listed above, to offset the forward investment from the HWE ICB, from residential planning applications, whether a Local Plan site allocation, windfall site or speculative planning application, in line with the legal tests for planning obligations.

*Impact of specific proposed site allocations and committed sites on Primary Care Infrastructure*

- **H1 - North Hemel Hempstead - 1,500 dwellings (1,125 by 2041)**
- **H2 - East Hemel Hempstead (North) – 1,600 dwellings (1,235 by 2041)**
- **H4 - East Hemel Hempstead (South) – 2,400 dwellings (1,940 by 2041)**

This is the St Albans District element of the cross-border Hemel Garden Community development, which is expected to deliver 10,500 units in total. 5,500 of these will be in St Albans District and 5,000 in Dacorum Borough.

Such unprecedented level of growth cannot be absorbed by the existing estate and options for an on-site medical centre in both North Hemel Hempstead and East Hemel Hempstead (North) need to be reserved, with the location of a new facility dependent on which of these strategic sites come forward first.

- **B1 – North of St Albans – 1,097 dwellings**
- **B4 – East of St Albans – 472 dwellings**

There will be circa 5,700 additional new homes in St Albans and Chiswell Green by 2041 and additional facilities will be required. These are to include an on-site medical centre at North of St Albans and extension/reconfiguration works to several existing GP surgeries – e.g. Grange Street Surgery, Lodge Surgery and Harvey House Surgery. Section 106 contributions will therefore be sought towards these projects in order to meet the needs of the growing population.

- **B2 – North East Harpenden – 738 dwellings**
- **B7 – North West Harpenden – 293 dwellings**

There will be circa 2,200 additional new homes in Harpenden and Wheathampstead by 2041 and additional capacity will be needed. There is a potential in the existing GP premises portfolio in Harpenden to create more capacity by extending and reconfiguring or by removing patient records and re-purposing the vacated space for clinical or administrative use. Section 106 contributions will therefore be sought towards these projects in order to meet the needs of the growing population.

- **B3 – West of Redbourn – 545 dwellings**

This development will impact on Redbourn Medical Centre and S106 funds will be required in order to increase the capacity by reconfiguring some of the existing space and digitising or storing the

patient records off-site. For this reason, developer contributions will be sought from new development proposals in and around Redbourn.

- **B5 – Glinwell, Colney Heath – 484 dwellings**

This development will impact on Northdown Surgery in Hatfield and Potterells Medical Centre. There is currently a proposal pending for the relocation of Northdown Surgery to the regenerated Highview development, subject to NHS governance and business case processes. The ICB has also engaged with Potterells Medical Centre to develop a long-term premises solution within the next 4 years to increase capacity to meet the needs of the growing population. Section S106 funds will therefore be required from any new development in and around Colney Heath towards these projects.

- **B6 – West of London Colney – 324 dwellings**

As described above, Summerfield Medical Centre in London Colney was constructed to not only replace two outdated surgeries with a modern purpose-built facility, but to also provide for future housing growth. The HWE ICB will therefore seek developer contributions on any new development in and around London Colney to offset the forward investment from the HWE ICB.

- **B8 – Radlett – 274 dwellings**

This development will impact on Red House Surgery, which is one of the most constrained practices in the locality. Early discussions have taken place regarding relocation to a new purpose-built facility. A detailed proposal is yet to be developed. As with any such proposal, it will be subject to NHS governance and business case processes. To mitigate the primary healthcare impact new developments in and around Radlett will have on Red House Surgery, developer contributions will be sought.

- **L2 – Park Street – 104 dwellings**

This development will impact on Red House Surgery branch in Park Street. Relocation of their main surgery will help to alleviate pressures in Park Street and for this reason, the HWE ICB will seek developer's contributions from any new development in and around Park Street towards the relocation of Red House Surgery.

- **L1 – Burston Nurseries – 180 dwellings**
  As per L2 above.
- **L3 – Chiswell Green – 101 dwellings**

This development will impact on Midway Surgery. As explained earlier in this document, the former CCG approved a proposal for the extension and refurbishment of the practice, however, due to the lack of capital, this project is currently on hold. The HWE ICB would therefore apply for developer contributions on the above and any other new development in and around Chiswell Green towards creating additional capacity at Midway Surgery.

*Forecasting Housing Growth and Planned Infrastructure*

The HWE ICB calculates the General Medical Services cost of the additional infrastructure needed to deliver planned new homes using the following formula (based on a 1,000 dwelling development).

1,000 dwellings x 2.4 (commonly accepted occupancy factor) = 2,400 new patients

2,400/ 2,000 = 1.2 GP (based on ratio of 2,000 patients per GP and 199m2 as set out in the

NHS England "Premises Principles of Best Practice Part 1 Procurement & Development")

1.2 x 199m2 = 238.8 m2 additional space required

238.8 x £7,000* (build costs including land, fit out and fees) = £1,671,600

£1,671,600 / 1,000 = £1,671.60 ~ £1,672 per dwelling (rounded up)

*Last updated 1 July 2024, subject to change in line with market movements

It should be noted that above costs are based on a single GP practice, however, all GP surgeries vary in size. In circumstances where investments are made in larger buildings, economies of scale can reduce the overall impact per unit as there will be some common and shared areas. Despite this, space and technical guidance requires larger sized rooms than those in older premises; newer buildings are both larger and more costly.

For the purposes of long-term planning, the HWE ICB has also adopted an alternative calculation based on 18 patients per m2, which still has regard to national GMS space guidelines but also considers opportunities for economies of scale.

Given that the exact primary care impact is difficult to assess due to uncertainty of timing of developments coming forward and the resulting increase in patient numbers, this is an average threshold that the HWE ICB applies for planning purposes. Each case varies subject to specific area demographics, how a particular practice operates its business, number of sessions offered, workforce mix etc. It also depends on the nature of their building, e.g. age, type of build.

**Community and Mental Healthcare**

HWE ICB commissions community and mental health care from multiple providers. These services are known as secondary services as patients will usually be referred into these services by their GP or on discharge from hospital. These services are delivered from day assessment units or clinics and inpatient facilities.

Adult community services are currently being provided by Central London Community Healthcare NHS Trust (CLCH) and children's services by Hertfordshire Community NHS Trust (HCT).

Community services would include (not exhaustive):

- Adult Community Nursing
- Specialist Long Term Condition Nursing
- Therapy Services
- Preventive Services such as Sexual Health and Smoking Cessation Clinics
- Child Health Service including Health visiting and School Nursing

Mental Health services are being provided by Hertfordshire Partnership Foundation NHS Trust (HPFT) and would include (not exhaustive):

- Schizophrenia
- Bipolar Disorder
- Anxiety Disorders
- Depression
- Eating Disorders
- Personality Disorders
- Drugs, Alcohol and Mental Health
- Post-Traumatic Stress Disorder (PTSD)

The Hertfordshire Community NHS Trust (HCT) is one of the principal providers of community-based healthcare services to more than 1.2 million people living in Hertfordshire and beyond, with some services extending into neighbouring areas. The HCT supports people at every stage of their lives from health visiting, school nursing and specialist dental or speech services to community nursing rehabilitation and palliative care. The HCT works closely with system partners, including the Primary Care Networks, to improve community services in the area, collaborate with partners to redesign services and integrate clinical pathways for the benefit of patients.

The Hertfordshire Partnership University NHS Foundation Trust provides mental health and learning disabilities inpatient care and treatment in the community for young people, adults and older people in Hertfordshire.

In the context of the NHS' integrated care model, community and mental health can be co-located with GP services. The HWE ICB will explore with its community and mental health service providers the opportunities to bring forward "Health and Wellbeing Centres" alongside the identified need for new GP surgeries needed to meet the proposed housing growth and resulting increased population within the plan period.

Indicative build costs are set out in the table below. However, please note, these build costs are currently being updated and will increase.

[Please see table in attachment]

**East of England Ambulance Service (EEAST)**

East of England Ambulance Service NHS Trust (EEAST) provides both emergency and non-emergency services across Hertfordshire, Bedfordshire, Essex, Norfolk, Suffolk and Cambridgeshire.

EEAST currently has 130 sites across the East of England and is establishing the Lord Carter recommendation to provide a Hub and Spoke Network. Eighteen Hubs are strategically placed near each of 17 local hospitals with good access to the surrounding road network. The Spokes (Ambulance Response Posts) need to be based at strategic locations from the Hub in order to meet the expected demand and meet NHS Contract Quality Indicator Response Times to incidents.

EEAST's purpose-built Ambulance Hubs require circa 1 ha of land and parking space for up to 50 ambulances/rapid response vehicles and support/operational staff (approx 200 staff working 24/7), close to the local hospitals and good road networks. The estates infrastructure can include fuel (including Electric Vehicle Charging). Services may include a local workshop (currently 8 across EEAST) to ensure patient facing vehicles are serviced every 6-weeks to ensure they remain road worthy during the 5-year life of the vehicle. Each Workshop also services and repairs essential capital medical equipment required in each ambulance in order to provide mobile emergency health diagnostic and patient care services. Pharmacy and Digital Technology equipment are also provided from each Hub.

Significant parts of EEAST's ambulance estates are no longer in the right place or of the right size/structure to meet modern ambulance service needs. Optimising the use of the current estate is integral to EEAST's Clinical and Sustainable Strategies to reduce unwarranted variation and make the best use of available resources.

EEAST is an essential social infrastructure provider and has an important role to play in contributing to the achievement of sustainable new places (and along with its health and blue light partners). Given the increasing demands on emergency services and the importance and timeliness required for emergency responses, new developments and Infrastructure Delivery Plans must consider the accessibility and adequacy of all emergency services.

Planned housing, population increases, along with deprivation, age and the increasing number of people living for longer with more complex long-term conditions, all impact on the level of ambulance service demand, in respect of both emergency and non-emergency patient transport services.

Age profile is a key factor, as people at both ends of the age spectrum consume a disproportionately large quantity of healthcare services and resource. Those aged over 75 years are most likely to have multiple long-term conditions and complex care needs.

Analysis of EEAST activity from 2019/20 indicates residents aged 65 years and over account for over 1/3 (35%) of Category 1 ambulance activity and 52% of all activity. Those aged 2-18 years account for 15% of Category 1 activity and 8% of all activity.

Planned development in St Albans of around 14,603 new homes will generate in the region of 35,047 additional residents, (assuming 2.4 residents per dwelling) and on the basis of an ambulance for every 10,000 people, an additional circa 4 ambulance vehicles and associated estate infrastructure will be required to support the population growth.

St Albans District area does not contain any of EEASTs proposed purpose-built Hubs which will serve residents in the District. Hubs currently supporting St Albans are located in Hemel Hempstead Luton, Watford and to a lesser extent Stevenage. However, Hemel Hempstead, Luton, Watford are already at capacity and unable to be expanded to deliver modern paramedic science-based services. Ideally new purpose-built Hubs are required for all four locations.

In addition, more ambulance stations, response posts will be required in the District to ensure EEAST can meet the Category 1 (life-threatening) incidents - a response arriving Mandated Mean Target of 7 Minutes. Our target is to get to the incident location ideally within 4 minutes.

Planned housing growth will therefore impact on EEAST's operations within the local area, which are already operating at capacity. Development in St Albans would therefore lead to an increased draw on ambulance service capacity.

EEAST therefore requires CIL/ section 106 contributions to mitigate the impacts arising from proposed strategic sites identified in the Regulation 19 Local Plan.

The range of infrastructure and facilities (ambulance facilities) required to mitigate and manage the impacts arising from planned growth are summarised below:

- Upgrading/ refurbishment of existing premises, or redevelopment/ relocation of existing ambulance stations to a more suitable location to meet the increased local demand arising from housing developments.
- An increase in the number & type of ambulances.

Indicative build costs are set out in the table below. However, please note, these build costs are currently being updated.

| **Type of Service Development** | **£/m2** |
|---|---|
| Ambulance Hub cost per £/m2 | £5,047 (Cost excludes land purchase, fees, VAT) |
| Ambulance Vehicle cost per vehicle/ fees, VAT) | £140,000 (Cost excludes maintenance, servicing, repairs, |

5-year period

**Acute Care – West Hertfordshire Teaching Hospitals NHS Trust**

Acute care is the branch of secondary health care where a patient receives active but short-term treatment for a severe injury or episode of illness, an urgent medical condition, or during recovery from surgery. It will also provide specialist input for those living with chronic / long term conditions. These services are usually provided in a hospital setting. Whilst within a specific geographical area acute care may be delivered by several different providers, the majority of care for the population of St Albans District is provided by the West Hertfordshire Teaching Hospitals NHS Trust (WHTH).

The Trust operates three hospitals in West Hertfordshire, all of which provide services to residents of St Albans:

- St Albans City Hospital – provides elective surgery, with an urgent care hub, an outpatients department, cancer and diagnostic services.
- Watford General Hospital – provides emergency care, with accident and emergency, inpatient services, an acute admissions unit and women's and children's services, as well as a full range of outpatient and clinical support services.
- Hemel Hempstead Hospital – provides urgent care, endoscopy, diagnostics and outpatient clinics. A small number of intermediate care beds are provided on the site as part of the community service.

The New Hospital Programme seeks to ensure the NHS' hospital estate supports the provision of world-class healthcare services for patients and is committed to a long-term programme for the delivery of 48 new hospitals across the NHS.

The West Hertfordshire Teaching Hospitals NHS Trust is one of the 48 new hospitals identified and prioritised in the New Hospitals Programme.

Population growth will create a significant uplift in the rates of attendance WHTH acute hospital departments over the Local Plan period. Some of this population growth will arise as a direct consequence of additional housing planned for in St Albans District.

WHTH is progressing a business case for redevelopment and investment at Watford Hospital where the greatest volume of patients from across the whole of west Hertfordshire with the most complex and urgent needs are treated. The preferred options for both Hemel Hempstead and St Albans Hospitals propose significant investment to resolve priority issues at each site.

Plans for the proposed new hospital are being progressed as part of the Government's New Hospital Programme. Further floorspace will be required to provide additional acute bed spaces and associated clinical care functions in elective surgery, emergency and maternity departments as a consequence of the additional planned growth in the District. It is therefore fair and reasonable to expect these impacts to be mitigated, in part, through developer contributions and supported via the Local Plan and IDP.

The business case for the new hospital is predicated on funding from a number of sources in addition to Treasury funding, including developer contributions, which national planning policy allows for, where it is possible to demonstrate a clear pathway of cause and effect upon hospital services and providing related Community Infrastructure Levey (CIL) tests are met.

As such, a suitable planning policy is the basis for and is required to enable WHTH to secure the necessary mitigation of impacts on acute healthcare facilities and services arising from future development growth.

The recognition in the IDP that planning for infrastructure is flexible and that changes to available funding streams (along with other factors) may require future updates of the IDP, is welcomed. This is particularly relevant to the funding for new hospitals in light of the previous Government's audit of the New Hospitals Programme and the current Government's review of the Programme's funding.

The IDP as drafted contains limited information on funding for acute and secondary healthcare facilities and services which needs to be addressed.

WHTH as an acute healthcare trust, receives funding via a range of contract arrangements. The Trust is also required to find year-on-year efficiency savings. The Department of Health and Social Care (DHSC) dictates the costs at which it thinks NHS health services should be priced. The National Tariff is broken down, with 65% for staffing costs, 21% for other operational costs, 7% for drugs, 2% for the clinical negligence scheme and 5% for capital maintenance costs. The 5% capital allowance within the Tariff is not sufficient to maintain existing and provide for new infrastructure. Furthermore, the capital costs of healthcare are not limited to buildings, but also include equipment and technology.

There is no routine eligibility for capital allocations from either the DHSC or local commissioners to provide new capital capacity to meet additional healthcare demands. Acute healthcare funding may be raised from a number of different sources, including Section 106 contributions where the related CIL tests are met.

The rationale for the new hospital at Watford and developments at Hemel Hempstead and St Albans is based on the need to modernise facilities and provide additional capacity to help meet current and future needs. Although WHTH receives HIP11[1] funding for the acute services it provides, based on demand from its catchment population and demographic projections, there remains a significant funding gap. The funding gap is directly and proportionally increased by the 'new' residents of planned growth in Southwest Hertfordshire. Therefore, developer contributions are needed to mitigate the additional impacts of planned growth on acute and secondary healthcare services provision.

It should also be noted that the National Audit Office's review of the NHP identified that, although the Government's announcement in October 2020 stated that all 40 named NHP schemes (cohorts 1-4) would be 'fully funded', the £3.7 billion allocated in the 2020 Spending Review was intended mostly for cohorts 1 and 2 – Watford Hospital falls within cohort 3. Paragraph 2.29 of the NAO Report states that:

"*It has been clear since the 2020 Spending Review that the schemes in cohorts 3 and 4 could not commence major capital works until after the start of the next Spending Review period in April 2025. The lack of an agreed programme scope and a clear indication of funding for the programme after 2024-25 limited the schemes' ability to carry out other useful work in 2021 and 2022 because there was no clarity about the scale of new construction that NHP could afford at each site.*"

In light of the above, it is requested that the IDP is amended to reflect the position regarding funding for acute and secondary healthcare.

## 368 - Gee Smedley

Submission Number: 368 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Save North St Albans Greenbelt Name: Gee Smedley

Comment Number: 9

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

There are no details provided in Chapter 7 of a delivery plan for Healthcare, which is failing already. This is one of the major issues for our supporters, lack of access to medical treatment in the District.

There is no strategic vision to provide or ringfence land for healthcare provision. There is a strong feeling amongst residents that West Herts Hospital Trust has engaged in asset striping activities on an extensive basis over the last 20 years and has repeatedly tried to reduce the services and land available for services in St Albans to capitalise on the high land values in the District. A recent planning decision saw St Albans Hospital remove access to part of a public playing field to accommodate a carpark for staff, they claim it will be temporary, the community is sceptical. This goes to show there is no available land to deliver the scale of healthcare infrastructure needed to accommodate services for a population increase equivalent to another Harpenden.

Most maternity care service are accessed via motorway outside the district and there is very little provision for any type of rigorous scanning or comprehensive treatments.

Residents are fed up having to spend hours driving or taking the train to and from hospitals outside of the District to access what should be the type of quality care we need to be present in St Albans, given the size of our population.

Why has SADC failed to provide any vision or guidance on these matters?

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Draft Policy SP7 seeks to protect existing community facilities which would include health facilities. NHSPS supports the provision of sufficient, quality community facilities. Where healthcare facilities are included within the Local's Plan definition of community facilities, policies aimed at preventing the loss or change of use of community facilities and assets can potentially have a harmful impact on the NHS's ability to ensure the delivery of essential facilities and services for the community.

The NHS requires flexibility with regards to the use of its estate to deliver its core objective of enabling excellent patient care and support key healthcare strategies such as the NHS Long Term Plan. In particular, the disposal of sites and properties which are redundant or no longer suitable for healthcare for best value (open market value) is a critical component in helping to fund new or improved services within a local area. Requiring NHS disposal sites to explore the potential for alternative community uses and/or to retain a substantial proportion of community facility provision adds unjustified delay to vital reinvestment in facilities and services for the community.

All NHS land disposals must follow a rigorous process to ensure that levels of healthcare service provision in the locality of disposals are maintained or enhanced, and proceeds from land sales are re-invested in the provision of healthcare services locally and nationally. The decision about whether a property is surplus to NHS requirements is made by local health commissioners and NHS England. Sites can only be disposed of once the operational health requirement has ceased. This does not mean that the healthcare services are no longer needed in the area, rather it means that there are alternative provisions that are being invested in to modernise services.

Where it can be demonstrated that health facilities are surplus to requirements or will be changed as part of wider NHS estate reorganisation and service transformation programmes, it should be accepted that a facility is neither needed nor viable for its current use, and policies within the Local Plan should support the principle of alternative uses for NHS sites with no requirement for retention of a community facility use on the land or submission of onerous information.

Whist we consider the Policy sound as currently drafted, we do request that Part D or the supporting text be amended to acknowledge that where healthcare facilities are declared surplus or identified as part of an estates strategy or service transformation plan by the NHS that this will be sufficient to demonstrate that the facility is no longer required and this will satisfy Part D without requiring reprovision of floorspace on or off site.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). ## 81 - Harpenden Society

Submission Number: 81 Submission Date: 06/11/24 10:20

Respondent: Company/Organisation: Harpenden Society Name: Mr Martyn Reed

On Behalf Of Company/Organisation: Harpenden Society Name:

Comment Number: 6

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Infrastructure needs improvement before development starts.

Due to previous expansion, and changing lifestyles, the infrastructure that makes Harpenden a pleasant place to live is already overwhelmed. In particular, congested roads, insufficient parking, surface water and sewerage systems, health services and a lack of sustainable transport options. The County and District Councils and NHS bodies must undertake a full review of the current infrastructure and commit to make improvements, before any major new developments (in particular B2 and B7) are considered.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**127 - Mr Roy Warren**

Submission Number: 127 Submission Date: 07/11/24 09:40

Respondent: Company/Organisation: Sport England Name: Mr Roy Warren

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The content of the policy is supported as the policy supports increased and improved community infrastructure (which includes sports facilities) and the protection of existing facilities. The policy would be considered to be justified by the Council's evidence base for outdoor sport (Playing Pitch Strategy) and paragraph 103 of the NPPF and the wording of the policy in relation to the protection of sports facilities would broadly align with paragraph 103. Please see separate representations about the evidence base that supports the policy.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

While the content of policy SP7 is supported (see separate representation), there is a concern that decisions about planning for meeting the current and future indoor sports facility needs of the community will not be based on an up-to-date, and therefore robust, evidence base in accordance with the requirements of paragraph 102 of the NPPF which specifically advises planning policies to be based on robust and up-to-date assessments of needs for open spaces, sports and recreation facilities and opportunities for new provision. A clear understanding of current and future community sports facility needs is essential for informing and justifying a local plan policy such as this which covers the protection, enhancement and provision of sports facilities. For example, how would the Council or an applicant be able to clearly demonstrate that an indoor sports facility is no longer required (as required by the policy) if there is no up-to-date objective evidence base available to assess the proposal against.

This concern is supported by the Council's continued reliance on their current evidence base for sport for supporting the local plan i.e. the Sport and Recreation Facilities Strategy which was published in 2005. The data collected on the supply and demand for sports facilities which informed the assessments in these strategies is now around 20 years old and is therefore considered to be substantially out-of-date for informing sports facility needs for the Local Plan period. The 2005 strategies were considered by Sport England to be robust at the time they were prepared and it acknowledged that the Council has made significant investment into its own indoor sports facilities since then to address needs that were identified in the strategies which is welcomed. However, this does not negate the need for the current local plan to be based on an up-to-date evidence base.

Sport England's advice is that assessments of sports facility needs should be prepared at least every five years. The reasons that assessments of need should be based on up-to-date data are as follows:

- The supply of facilities changes significantly over time. As well as new facilities opening and existing ones closing, access to facilities can change (e.g. on school sites), the quality of facilities changes over time as facilities become older (which influences the ability of facilities to meet the expectations of the community) and the format and operation of facilities can change.
- The demand for facilities changes significantly over time. Demand for sports facilities is affected by a number of factors including population growth, sports participation changes (both general and sport specific), local sports club infrastructure and local sports development

initiatives. The nature of the demand will also change over time (e.g. growth in participation by children, women and disabled groups) and the type of facilities required in response to changes in demand will have implications.

The previous assessment of indoor sports facility needs will not have accounted for the significant changes in both supply and demand that Sport England is aware has taken place in St Albans district since the data for the 2005 strategy was collected. It will also not have accounted for current projections of future population and sports participation growth in the area which will have changed. Furthermore, the lack of recent consultation with stakeholders such as sports clubs, sports governing bodies, schools, parish councils etc on supply and demand issues may result in current and future needs not being identified.

Since the previous assessments were prepared, it is also advised that the tools and guidance available for collecting data and undertaking assessments with respect to sports facilities has advanced considerably and Sport England has published a range of more recent guidance to help local authorities such as the Assessing Needs and Opportunities guidance and the Planning for Sport guidance https://www.sportengland.org/guidance-and-support/facilities-and-planning/planning-sport?section=planning_for_sport_guidance.

If the evidence base is not updated and continues to be used for determining planning applications, developers are likely to challenge the evidence base especially in the context of the need to protect existing facilities or provide for sport in new development through planning obligations or CIL. This has been exemplified by Sport England's recent experience with providing advice on major residential planning applications in the district where it has not been possible to justify developer contributions being sought to indoor sport due to the lack of a robust evidence base.

An additional concern is that the absence of an up-to-date evidence base for indoor sports facilities will have implications for planning community infrastructure in the Hemel Garden Communities. Dacorum Borough Council has an indoor sports facility strategy to inform needs and priorities while St Albans City & District Council does not. If no up-to-date needs assessment and strategy is prepared for St Albans, the indoor sports facility provision in the Garden Communities will not have regard to needs within St Albans district and therefore by default will have to focus on meeting needs identified in Dacorum Borough Council's strategy.

In view of the above, Policy SP7 would not be considered to accord with the 'positively prepared', 'justified' or 'consistent with national policy' tests of soundness.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It is requested that an amendment is made to the reasoned justification to policy SP7 to confirm that a new indoor sports facility strategy incorporating an assessment of needs will be prepared within a defined time period e.g. within 1 year of the Local Plan being adopted. This evidence base, when prepared, would provide the robust and up-to-date evidence to support policy SP7 and other relevant policies of the plan such as the policies relating to Broad Locations (LG1), Large, Medium and Small Sites (LG3), Community, Leisure and Sports Facilities (COM3). This approach would in principle allow the plan to accord with Government policy in paragraph 102 of the NPPF.

Detailed advice on the preparation of indoor sports facility strategies can be found on Sport England's website https://www.sportengland.org/guidance-and-support/facilities-and-planning/planning-sport?section=assessing_needs_and_playing_pitch_strategy_guidance and further advice can be provided upon request.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To provide specialist advice on sports facility planning considerations to the Planning Inspector

**273 - Hallam Land Management and St Albans School**

Submission Number: 273 Submission Date: 08/11/24 09:33
Respondent: Company/Organisation: LRM Planning Name: Mr Owen Jones
On Behalf Of Company/Organisation: Hallam Land Management and St Albans School Name:

Comment Number: 25

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

8.2 Hallam and St Albans School agree with the support the Council affords to community infrastructure as it relates to new development in the Broad Locations. Observations are made however in regard to the amendments which have been made to the policy wording since the Regulation 18 version was consulted on, which now includes the new following statement:

"In relation to sports facilities (and open space and recreation) such existing facilities can be built on if the development is for alternative sports and recreational provision, the needs for which clearly outweigh the loss (e.g. a dual use sports hall being built on a school playing field)".

8.3 This is a direct conflict with the allocation of North St Albans at B1 of Policy LG1 whereby one of the key development requirements includes the "replacement of the displayed playing fields". The District Council are aware of the need to relocate the playing fields on land to the north of the allocation to facilitate the development of the wider scheme; specifically, the land currently hosting the Old Albanian Sport facilities need to be relocated to allow for a suitable access to be provided to serve the other scheme components.

8.4 As currently drafted, Strategic Policy SP7 would prevent development of the existing sport pitch land for anything other than alternative sports and recreational provision, which conflicts with the wider aspirations of Policy LG1. It is therefore suggested that Strategic Policy SP7 is amended to read as follows:

"In relation to sports facilities (and open space and recreation) such existing facilities can be built on if the development is for alternative sports and recreational provision, or other suitable land is identified and secured as agreed by the District Council, the needs for which clearly outweigh the loss (e.g. a dual use sports hall being built on a school playing field)".

8.5 When defining "community infrastructure" within the policy, the list is definite and explicit, but there are concerns that this should be more flexible to acknowledge that some community spaces can be used for a variety of interchangeable uses. The Alban Arena is one such example of this type of space, as acknowledged at Policy TCR5. Community spaces have potential and scope to be used for a variety of day and evening activities, and can be used recreationally, for education purposes, and offer co-working and business spaces. As currently drafted, the policy does not allow for this flexibility of use.

8.6 Further to the point of rigid definitions, Hallam and St Albans School query whether the reference to "flood defences" should be amended to refer more broadly to "sustainable drainage systems".

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

8.5 When defining "community infrastructure" within the policy, the list is definite and explicit, but there are concerns that this should be more flexible to acknowledge that some community spaces can be used for a variety of interchangeable uses. The Alban Arena is one such example of this type of space, as acknowledged at Policy TCR5. Community spaces have potential and

scope to be used for a variety of day and evening activities, and can be used recreationally, for education purposes, and offer co-working and business spaces. As currently drafted, the policy does not allow for this flexibility of use.

8.6 Further to the point of rigid definitions, Hallam and St Albans School query whether the reference to “flood defences” should be amended to refer more broadly to “sustainable drainage systems”.

**328 - Charlie Thompson**

Submission Number: 328 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council (Growth and Infrastructure Unit) Name: Charlie Thompson

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Paragraph 35 and 36 of the 2023 NPPF require that local plans be positively prepared to be considered sound. To do so its policies must set out a strategy to meet the assessed needs of the area.

HCC has a statutory duty to secure sufficient early years provision under the Childcare Acts 2006 and 2016. This includes, but is not limited to, provision within day nurseries for 0-2 year olds, school nursery classes for 3-4 year olds, and school wraparound care for 5-11 year olds. HCC must therefore ensure sufficiency for all three early years cohorts that tend to receive care in different types of settings.

The 2023 Spring Budget increased parents' access to entitlement for early years support for all children under 3 by September 2025 and sets an expectation that all parents should be able to expect wraparound care by September 2026. This means that the plan needs to make sufficient provision for all of these early years cohorts (0-2, 3-4, and 5-11), with 0-2 being a particular area of need as these are often provided in private day nurseries rather than school settings.

The Regulation 19 draft plan includes childcare facilities within the list of land uses within some broad locations within the supporting text at Part A table 3.1. This follows engagement with HCC at Regulation 18 stage and is welcome. However, policy in Part B does not require that these be provided within the corresponding allocations themselves. While policy wording in Part B does include reference to early years provision within new primary schools for those sites that are delivering new primary schools, these only tend to provide care to 3-4 and 5-11 year olds and not 0-2 year olds. Therefore HCC does not have certainty that the strategy for sufficient early years for 0-2 year olds will be delivered.

Policy COM1 gives policy support to proposals delivering childcare for 0-2 year olds and nursery for 3-4 year olds. This is strongly welcomed. However this is not the only childcare cohort. As part of its statutory sufficiency duty HCC must also ensure sufficient wraparound care for 5-11 year olds. Similarly, policy strategic policy SP7 gives policy support to proposals including nursery provision, which could be taken that only proposals for provision for 3-4 year olds should be given policy weight (as this can refer only this is cohort in some contexts). Again while policy support is welcome, it should ensure that policy support is given to the full range of settings for different age groups.

To be considered positively prepared and therefore sound the local plan should therefore set out a strategy for childcare provision in the allocations in Part B and clarify policy support for all childcare cohorts in the policies at Part A. This representation suggests a modification that if agreed, or similar, would make the plan sound.

Draft Policy SP7 - Community Infrastructure seeks to support and protect existing community infrastructure. This policy also seeks to safeguard existing sport facilities by only permitted development on these facilities if the development is for an alternative sport and recreational

provision and the needs for which outweigh the loss. We support this policy to protect existing sport facilities and draft Policy NEB12, which provides guidance on how to determine sport pitch provision requirements for new housing developments.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To be considered sound the local plan should:

1. Allocate land within broad locations for childcare provision (primarily relating to 0-2 year olds)
2. Clarify that childcare provision needs to be made for all three age groups

Firstly, the local plan should set out a strategy for childcare for 0-2 year olds in the allocations at Part B in addition to provision for 3-4 and 5-11 year olds at new and expanded primary schools. This would ensure that there is a reasonable prospect of there being sufficient provision for this cohort when sites are delivered.

Policy in allocations H1 and H2 should each include:

*A childcare setting capable of providing 30 places including 0-2 year olds.*

Policy in allocations H4 should each include:

*A childcare setting capable of providing 50 places including 0-2 year olds.*

Policy in allocations B3 should include:

*A childcare setting capable of providing 30 places including 0-2 year olds.*

Taken together these would deliver a strategy for childcare across the St Albans plan.

The evidence base for assessing childcare has changed since the Regulation 18 consultation to better take account of existing supply, and the need for new facilities in Harpenden and in St Albans no longer exists. Therefore the references to childcare facilities in table 3.1 at East St Albans and North East Harpenden should be removed.

Secondly, the local plan at Part A should clarify that it gives policy support to all forms of early years provision. This would ensure positive weight can be given to the delivery of all early years settings irrespective of which age group to which they provide care.

Strategic policy SP7 should state:

1. *Secondary and primary schools, Sixth Forms and further education, early*

*education including nursery and childcare provision and special needs services;*

Policy COM1 should state:

1. *a) Major residential development will be required to make appropriate provision for new schools and early years facilities ([deleted text]including 0-2, 3–4, and 5-11-year-olds [deleted text]) either on-site or by making a suitable contribution towards the improvement or expansion of nearby existing facilities.*

Taken together these changes at Part B would include a strategy for meeting the demand for childcare places for 0-2 year olds and at part A give decision-makers supportive policy to ensure this can be delivered at development management stage

1. 1A Childcare Allocations_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Childcare sufficiency is a statutory HCC responsibility and therefore an area of significant interest.

**356 - Rachael Donovan**

Submission Number: 356 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Hertfordshire and West Essex ICB Name: Rachael Donovan

Comment Number: 10

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*Strategic Policy SP7 – Community Infrastructure*
Please amend to the following:

*In relation to the above, community infrastructure includes the following categories:*

*i. A range of local healthcare facilities including acute care hospitals,* ***emergency ambulance facilities,*** *GPs surgeries,* ***community, mental health,*** *dentists, [deleted text] pharmacy and ophthalmology services;*

*ii. [deleted text] Police & fire and rescue facilities;*

An essential element of supporting the wider transformation and modernisation of NHS services and the health estate is to ensure that NHS sites are not strategically constrained by restrictive local planning policies. As such it is important that policy SP7 does not restrict but enables flexibility and improvements within the NHS estate, where required by the NHS.

Where it can be demonstrated that health facilities will be changed as part of wider NHS estate reorganisation programmes, it should be accepted that a facility is neither needed nor viable for its current use, with planning policies within the Local Plan supporting the principle of alternative uses for NHS land and property. This will ensure that there is not a delay to vital reinvestment in facilities and services for the community.

The NPPF is clear in stating (para 100), '*to ensure faster delivery of other public service infrastructure such as further education colleges, hospitals and criminal justice accommodation, local planning authorities should also work proactively and positively with promoters, delivery partners and statutory bodies to plan for required facilities and resolve key planning issues before applications are submitted'.*

Where NHS testing and approval processes declare a surplus need, it should be accepted that this provides sufficient evidence that a facility is neither needed nor viable for its current use.

Comment Number: 9

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Draft Strategic Policy SP7** *"Community Infrastructure"*- the protection afforded to certain activities which the emerging Local Plan considers to be 'Community Infrastructure' has in some cases been overtaken by the UCO changes in September 2020. Furthermore, the draft policy seeks to prevent *"the loss of Community Infrastructure, or land or buildings previously used for such purposes, unless replacement of equivalent or better provision in terms of quality and quantity in a suitable location is provided".* However, the assessment of equivalent replacement is potentially very subjective. In some cases, for instance, a School might need to dispose of an existing community infrastructure facility, in order to fund the improvement of other facilities elsewhere, but there will still be an overall net loss of community buildings. Overall, this matter is already covered by the Government policy within such paragraphs as 97 of the NPPF. The policy is not positively prepared; justified by evidence; or consistent with National policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. ### 370 - Diane Black

Submission Number: 370 Submission Date: 09/11/24 09:00

Respondent: Company/Organisation: Wheathampstead District Preservation Society Name: Diane Black

Comment Number: 6

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**WDPS comments on St Albans City and District Council Draft Local Plan**

Wheathampstead and District Preservation Society (WDPS) has approximately 400 households as members, and we therefore speak for around 15% of the population of the Wheathampstead area.

**Schools**

Katherine Warington secondary school was built to ensure all children in Harpenden and surrounding villages would have a place at a secondary school in Harpenden. This followed an existing secondary school in Wheathampstead being demolished and housing built on the site at Butterfield Road. However, due to delays in agreeing the site and the eventual build of Katherine Warington School a huge amount of stress was put on placing children from Wheathampstead into secondary school in the years before the new school opened. This cannot be repeated.

However, there is no consideration given to the impact of new housing in Harpenden on school placements from the surrounding villages. In particular the large-scale development B2 North East Harpenden is likely to attract families who would be given priority to Katherine Warington School based on distance, meaning that Wheathampstead children will be impacted again.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Summary**

Considering the comments above, we urge the council to revisit the draft Local Plan, challenge the Government's Standard Method for calculating housing needs and produce a more equitable balanced plan that serves the needs of the St Albans District residents. We would like to see more detailed planning which includes funding allocation and addresses key issues on exactly how the plan is going to meet climate change targets, deal with extreme weather events, increase biodiversity by 10%, protect the Green Belt, improve transport networks including cycleways, improve water networks and prevent pollution of our rivers, improve services and facilities and protect secondary school placements.

## COM1 - Education

### 33 - Mr Nigel Smith

Submission Number: 33 Submission Date: 28/10/24 09:00

Respondent: Company/Organisation: North Hertfordshire District Council Name: Mr Nigel Smith

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Draft Policy COM1 (Education) states that major development will be required to make appropriate provision for new schools and the Plan makes provision for Secondary Schools (e.g. at East of Hemel Hempstead, St Albans and London Colney). We note that a growth of around 1,427 new dwellings is proposed in Harpenden, but no provision is made for a new secondary school there. Residents in Kimpton and Blackmore End in North Herts currently rely on Secondary School provision in Harpenden. Therefore, we are concerned that the additional growth proposed in Harpenden may lead to under provision in secondary school places for North Herts residents.
