1.3

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Strategic Policy SP1 sets out a proposed new settlement strategy for the District, with growth being located to make the most sustainable use of land in both the urban areas and then the Green Belt. The general principles of this statement is supported and it is noted that the approach seeks to develop brownfield land first, before then considering greenfield land.

It is also noted that London Colney has been identified as a Tier 3 settlement, where most growth is to be focussed within and adjacent to settlement boundaries. To the west of London Colney, Napsbury Park Estate has been identified in the Reg 19 Local Plan as a Tier 6 Green Belt village, where the land continues to be washed over by the Green Belt. The description of this tier of settlement (ie. Tier 6) does acknowledge that there is a general functional relationship to settlements in higher tiers within the hierarchy, which provides key services and higher order services. Whilst the principle of the hierarchy approach to settlement classification across the District is supported, in the case of the classification of Napsbury Park Estate, it is considered that this Estate with its proximity and links to London Colney and built-up nature, should also be considered part of that Tier 3 settlement. For that reason Napsbury Park Estate should itself be taken out of the Green Belt. Through reviewing this classification of Napsbury Park Estate and taking it out the Green Belt, this would then give greater weight to the consideration of sustainable urban extensions to both the south and also to the north of the Estate. As such, it is considered that the Council should review this land classification and consider removing Napsbury Park Estate out from the Green Belt and that the Estate form part of the Tier 3 settlement.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Strategic Policy SP1 and the settlement hierarchy should be amended to include Napsbury Park Estate as part of the Tier 3 Small Town allocation with London Colney, and for the Napsbury Park Estate to the removed from the Green Belt along with a sustainable housing allocation to the north of the estate.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to scrutinise further the Council's strategic approach to not removing Napsbury Park Estate from the Green Belt and including it as part of the Tier 3 Small Town category within the settlement hierarchy.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

I am deeply concerned that the feedback provided during the Local Plan consultation has been largely ignored. After reviewing the 16 pages of comments regarding site L2 (pages 114 to 130 in the "Local Plan Consultation Summary Response Table"), it's clear that my input, as well as the concerns raised by others, has been met with dismissive and standardized responses.

For instance, when I raised specific issues during the Regulation 18 consultation last year regarding [insert specific concerns, such as environmental impact, infrastructure strain, etc.], they were essentially dismissed with stock phrases like "Noted," or "The inclusion of this site is in line with the methodology in the Arup Green Belt Review 2023," or "The Council is working with Herts County Council as the Highway Authority to undertake the transport impact assessments for the Reg 19 draft Plan."

This approach makes me question the genuine purpose of these consultations. What is the point of asking for public feedback if it is not going to be meaningfully addressed? It's disheartening to see that other residents who raised similar concerns have also received the same generic responses, with no real engagement from the Council.

I urge the Council to reconsider its approach and take the concerns of its residents seriously. A proper consultation process should include thoughtful responses and clear actions, not just dismissive acknowledgments. We deserve more than "noted" when the future of our community is at stake.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

I have significant concerns regarding the flaws in the Regulation 18 consultation process, which have hindered proper public engagement and scrutiny of the Local Plan.

Firstly, I was not made aware of the consultation about site allocations last year. Now I'm being told that it's too late to raise objections about specific site allocations. This feels like a failure in communication, as many residents, including myself, would have participated if the consultation had been more widely publicized.

Additionally, the consultation took place during the summer of 2023, a time when many people, including myself, were away. This limited my opportunity to comment, and I suspect many others were similarly affected. It's unreasonable to expect comprehensive engagement from the community when the consultation is held at a time when participation is likely to be lower.

Furthermore, I'm concerned by the lack of scrutiny that preceded the Regulation 18 process. It appears that there was no formal examination of the Draft Plan prior to this stage, and now the comments made during the consultation have been largely ignored. The dismissive responses given in the summary table are evidence of this.

Looking ahead, the timeline for Regulation 19 is also troubling. With the Council planning to proceed to Examination only three weeks after the Regulation 19 consultation ends, it's clear there won't be enough time for a thorough review of the public's feedback. This undermines the credibility of the entire process.

Finally, the choice of Green Belt sites seems to have been driven by speculative developers through the "call for sites" process, rather than being based on a transparent and systematic assessment. This raises concerns about whether these locations were chosen with the best interests of the community in mind or simply to appease development pressures.

In reviewing the webcasts of PP&CC meetings since December 2023, it's apparent that there has been little opportunity for proper consideration of individual site issues. It appears that planning officers have pushed the Plan through without giving these concerns the attention they deserve.

In summary, the Regulation 18 consultation process has been deeply flawed, and I urge the Council to address these shortcomings before moving forward.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

I have serious concerns that the site allocation process for L2 has breached the Council's own methodology, particularly in relation to the Arup Green Belt Review. The standard response from Planning Officers, which states, *"The inclusion of this site is in line with the methodology in the Arup Green Belt Review 2023, which recommends the site for further consideration,"* is dismissive and fails to address the real issues raised in the consultation.

Firstly, it appears that Planning Officers have not properly scrutinized the Arup Green Belt Review. During the Regulation 18 consultation, several flaws in the methodology were highlighted, yet none of these concerns seem to have been addressed. Despite detailed feedback from the public, including myself, pointing out specific issues with the way Arup evaluated Green Belt sub-areas, defensible boundaries, and buffers concerning site L2, these issues have been ignored.

Moreover, the methodology itself is flawed. The criteria used by Arup to assess Green Belt boundaries, including for L2, do not seem to follow a systematic or transparent process. For example, the identification of defensible boundaries and the establishment of appropriate buffers are critical elements in any Green Belt review, yet Arup appears to have neglected these when evaluating site L2. This raises the question of why these critical aspects were not applied, despite being part of the established methodology.

Additionally, the concerns raised in the Regulation 18 process regarding the flaws in the Arup Green Belt Review have not been addressed in the Regulation 19 process. Instead, the same proposals have been brought forward with no visible effort to correct the shortcomings identified earlier.

In summary, the site allocation process for L2 has not followed the Council's own methodology. The failure to scrutinize Arup's recommendations, address public feedback, and correct the methodological flaws undermines the legitimacy of the entire process. I urge the Council to revisit these concerns and provide a more thorough and transparent evaluation of site L2.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

The document is based on 2014 housing numbers which are out of date.

You have not provided sufficient justification for changing Green Belt boundaries.

The combination of the Hemel Hempstead Garden Community development and the St Albans City and District Council developments will lead to urban sprawl and towns are very close to merging.

Your policy takes little note of the Green Belt review that you commissioned.

I see no apparent response to the results of the consultation undertake after 18 in the document 19.

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

Mine and other people objections as raised last year in the Regulation 18 consultation have been simply brushed aside by the planners with the dismissive comment "The inclusion of this site is in line with the methodology in the Arup Green Belt Review 2023". Did they actually bother to read the objections or was this response simply a copy and paste exercise on their part.

It seems to me the consultation about Site allocation in the Local Plan last year was not very well advertised. At best I consider it incompetent that this consultation was such low profile, at worst deliberate. Now I am told that it is too late to object to object to the inclusion of site L2.

### If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?

* No, I do not wish to participate in hearing session(s)

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

My concerns previously raised have not been addressed: The Plan generally appears to have taken ARUPs Green Belt review and just used these sites, without further consideration of other important factors, such as traffic, schools, doctors and other sustainabilty aspects. In addition, there appears a general desire to concrete over the Green Belt, rather than redeveloping Brownfield sites.

### If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?

* No, I do not wish to participate in hearing session(s)

### I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:

* Yes

### I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

We are encouraged to see suitable mention of the 'Duty to Cooperate' with neighbouring boroughs on 'strategic planning matters' (para 1.9). We hope this is interpreted to mean cooperation on all matters that cross or impact boundaries. If St Albans is to designate a major site on Harper Lane as suitable for development, this must be carried out in liaison with Hertsmere and Aldenham Parish Council, as any such development will have a significant impact on Radlett, as the neighbouring settlement, and hence Hertsmere. This liaison must include joint consideration of infrastructure issues, together with the impact on schooling, shopping and medical provision, and of course transport aspects.

Leading on from that, we note that para 1.13 says:
'The Local Plan must be read in conjunction with the statutory Local Transport Plan (LTP) prepared by the Local Highways Authority, Hertfordshire County Council.'
We find it a little surprising that the Local Plan and Local Transport Plan are seemingly prepared independently. Surely there must be an obligation to prepare them in conjunction?

We commend the list of Objectives at para 1.28. These seem appropriate in range and number. We do wonder if all the objectives are in effect equal or does St Albans see some as more important than other? To put it another way, if a proposed development or other action in favour of one objective goes against another objective, what mechanism is there for resolving the conflict?

The consultation process was not undertaken with any intention to take feedback and therefore was not proper consultation. As a resident of Redbourn I went to the Reg 18 public consultation meeting on 4/9/23. There were no District Councillors present. There was only one employee from the District Council present. He wasn't taking any notes. He couldn't answer questions on why, for instance, the Rothamsted site had been excluded when they had put themselves forward (he said they he thought they hadn't, which we know from speaking to Rothamsted representatives is not true). He couldn't explain why the plan disproportionately affected Redbourn as he wasn't involved in those discussions. The plan more than doubles the Redbourn population with inadequate infrastructure proposals (in particular, the narrow roads in and around the village that cannot sustain regular 2 way cars, the impact on Harpenden rail station where car parks are already full mid-week, and the lack of regular 7 days a week bus services to St Albans and, in particular, Harpenden). Before we could ask further questions on subjects like, what account had been taken of the Redbourn Neighbourhood Plan that had been adopted in a vote by residents the previous May, or how more cycling and walking paths would benefit our local population given that it is disproportionately elderly compared to national averages, he walked out!! He said he wanted a break. I don't know if/when he came back but I was there for a further 20 mins and saw nothing more of him.

It is also quite clear from the fact that little or no change has been made between the Reg 18 draft and the Reg 19 draft that none of the written submissions were properly considered. Indeed, there are rumours that the Council Leader wants to retire and so instructed the other Councillors to carry on the process unchanged as having to re-draft the plan would set his retirement plans back!!

The National Planning Policy Framework prohibits councils from meeting housing needs in full where doing so would mean building densities are significantly out of character with the existing area. The proposals for Redbourn - more than doubling its population without commensurate changes to infrastructure, would at the very least destroy the character of the village. Moreover the plan does not provide sufficient justification for the use of Green Belt land, The National Planning Policy Framework requires the plan to "fully" evidence and justify the use of Green Belt land and explain the "exceptional" circumstances - including the absence of viable alternatives - that have lead to these proposals. The Plan has not done this.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

This plan needs to be re-drafted from scratch, taking proper account of the feedback submitted to date, and ensuring it is properly consistent with the National Planning Policy Framework and the adopted Neighbourhood plans. The planning process should follow applicable rules, regulations and legal requirements in substance as well as form, which has not been the case to date.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

Legally Compliant

A lot of the proposed developments are on Green Belt land. It does not appear that the “very special circumstances” required for development have been proven. The Green Belt would suffer major (and irreversible) harm should development proceed. At least some of the proposed areas for development have an important role in protecting the countryside from urban encroachment.

Positively prepared

The draft local plan does not meet the area’s objectively assessed needs if the consequences of the major developments are not tackled at the same time. I am concerned that the traffic, lack of sufficient public transport, overwhelming pressure on schools and local health services and sustainability have not been addressed fully. Developments should not be approved without all these issues being resolved and the funding made available for them. Overdevelopment could also drive business away from the towns to other areas.

Justified

The local plan cannot be justified if it does not fully meet all the reasonable needs of both existing and new residents, such as access to health services, schools and public transport options. I am also concerned that the proposed development of car parks in urban areas cannot be justified when there is already such pressure on parking, and there would be even more pressure with additional housing on the scale proposed.

It does not appear that the local plan is consistent with national policy where development on the Green Belt is concerned. “Very special circumstances” have not been demonstrated and even if they were I do not believe they would outweigh the major harm they would do.

Housing numbers: section 1.21 states that population has increased by 6% since 2011. The Dwelling Stock Estimates ((www.gov.uk/government/collections/dwelling-stock-including -vacants) (Table 125)) shows that the housing stock for St Albans District in 2011 was 58000. This had increased to 63000 by mid-2023. This increase in the housing stock is 8.26%, suggesting that there has been a diminution of housing need in the District since 2011. There is no mention of this in Regulation 19. This makes the plan unsound.

“The Local Plan sets out the planning policies and proposals for the future development of the City and District of St Albans” (Reg 19 para 1.2). Table 1.3 Settlement Hierarchy – Settlement “St Albans, Hemel Hempstead (currently in Dacorum Borough but expansion into District planned)” There are no published proposals to change the boundary between Dacorum Borough and St Albans City and District to give effect to this “expansion”. NPPF (December 2023) section 61 states “ In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for”. The housing numbers applied to the sites included in Hemel Garden Communities within the District are solely to meet the housing need of the residents of St Albans C&DC. Under the heading Duty to Co-operate, (Reg 19) Section 1.11 states that “St Albans is also working jointly with Dacorum on proposed cross boundary development at Hemel Garden Communities”. Under the heading “Hemel Garden Communities” Section 3.34 states “The Hemel Garden Communities (HGC) Programme is an ambitious proposal to transform Hemel Hempstead through the

regeneration of the existing town…". Thus, the allocation of housing numbers to HGC is for the benefit of Dacorum Borough and, as such, fails to meet the opening declaration in section 1.1. This make the plan unsound

The "St Albans Green Belt Review Final Report June" 2023, Ove Arup and Partners, Table 5.8 Recommendations, sets out those sites that are not recommended released from the Green Belt because of the "Strong" overall performance and "Important" as making a contribution to the wider Green Belt". Sites SA-168, SA-170, SA-171 and SA-172 are all included in the HGC proposal. The NPPF December 2023 states (para 145) "Authorities may choose to review and alter Green Belt boundaries where exceptional circumstances are fully evidenced and justified"…. There is no such fully evidenced and justified exceptional circumstances. As such, the plan is unsound

In the event was HGC is allowed to proceed, the location would act as a furtherance of the sprawl of Hemel Hempstead. Thus this is breach of the first purpose of the Green Belt. In addition, the distance between the eastern edge of the proposed development (housing) and the western edge of Redbourn (village) would be less than that between the land between Redbourn (village) and Harpenden which SADC stated was inappropriate for development as it would breach the second purpose, to prevent neighbouring towns merging into one another. Accordingly, any proposal to include a site for development west of Redbourn would not be in accordance with section 143 of the NPPF and so is unsound.

Also, in the event that HGC is allowed to proceed, it must meet the requirement of the NPPF December 2023, section 7. This states "The purpose of the planning system is to contribute to the achievement of sustainable development…" The Reg 19 section 1.24 states that the average house price within the District is £619567. There is nothing in the Reg 19 that suggests that this average will not apply to the proposed housing at HGC. Reg 19 Section 1.23 states" The rail options to London underpin the popularity of commuting out of the District." The location of HGC is as distant as possible from the railway stations at Hemel Hempstead, St Albans City and Harpenden. Unless and until there is local employment that pays London salaries, or public transport to and from the railway stations mentioned is transformed, the HGC proposal is not sustainable and so unsound.

The consultation on the "Proposed reforms to the National Planning Policy Framework and other changes to the planning system" sets out (section 9) "Grey Belt: for the purposes of Plan-making grey belt is defined as land in the Green Belt comprising Previously Developed Land and any other parcels and/or areas of Green Belt land that make a limited contribution to the five Green Belt purposes…" Whilst the Reg 19 has been prepared in accordance with the current NPPF, assuming the draft Plan goes forward to implantation, it will be reviewed five years later. At that time, the review will take place in accordance with the NPPF then current. The sites west of Redbourn, SA-168, SA-170, SA-171 and SA-172 could not be regarded making a "limited contribution" as they have been declared by Ove Arup as making a "strong" contribution. For this reason, this plan is unsound.

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

The Proposals Map as currently presented is not consistent with national policy, thus enabling the delivery of sustainable development. The below suggested changes are intended to address this.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The following changes are sought to Policy Map 4 in connection with Broad Location B6 at West of London Colney.

These changes are sought to provide a consistent plan:

- It is considered that the area of land identified for the delivery of the entire secondary school provision, including sports pitches should also be removed from the Green Belt. The proposed built form would mean that this land no longer meets the tests of including land within the Green Belt, and the continued designation of the sports pitches as Green Belt would limit the extent that such facilities could serve a dual community / Sport England level of use. It would also mean that any minor extensions or alterations to the school buildings cannot be delivered without the need to demonstrate very special circumstances.
- The land to the south of the secondary school, previously earmarked for a primary school, should be removed from the Green Belt and included within the beige housing allocation designation in order that the site can accommodate the necessary homes to meet the 405 target. Whilst it is currently designated as Green Belt, once the secondary school is built, this piece of land will no longer perform against any of the principles of including land within the Green Belt and would not represent a strong and robust Green Belt boundary.
- It is requested that the Significant Publicly Accessible Green Space (proposed) is removed from the area to the south of Bridleway 4. It is currently unclear whether this will form part of the development scheme, and it is currently not publicly accessible land. Should it become so during the course of the further evolution of the West of London Colney proposals, there is nothing to stop this from happening even without such an allocation.

Further details regarding this site are set out at Chapter 2 of the attached document.

Chapter 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

- Chapter 1 sets out the timeline for the Local Plan moving forward. It is acknowledged that the timeline aims for the submission of the plan ahead of the publication of a new National Planning Policy Framework (NPPF). It is noted that the consultation runs until 8 November 2024, yet the St Albans City & District Full Council meeting held on 16 October 2024 agreed to submit the Local Plan for examination in its current form. There are therefore concerns that there will be a missed opportunity to consider responses received to this Regulation 19 consultation ahead of its submission for Examination.
- The rationale behind the eagerness to submit relates to the proposed changes to the NPPF as set out within the July 2024 draft document. That proposes a change to how the standard methodology for calculating housing need is undertaken. As a result, the identified need for the Council area would increase from the current 885 dwellings per annum to 1,544 dwellings per annum. The Local Plan therefore seeks to be submitted under the transitional arrangements, using the current housing need figure.

- Should the Inspector consider the Local Plan could move forward, it is highly likely to be with a series of main modifications in order to meet the tests of soundness. In order to meet the tests, it is considered necessary for the Local Plan to identify additional land for the early delivery of sustainable and deliverable sites, given more clarity that the identified housing need, based against the Council's poor delivery record, can be met. Identification of sites that can be delivered early in the process will assist in the demonstration of a five year housing land supply through the early period of the Local Plan, as well as delivering early affordable housing.
- The implications of providing an unsound Local Plan are clearly set out within the letter exchange between the Minister of State and the Planning Inspectorate. This correspondence states that it is not the role of the examination to make plans sound and that Inspectors will be allowed *'to focus their valuable time and resources on those plans that are capable of being found sound and can be adopted quickly to provide certainty to local communities'*.
- Should the Local Plan be adopted, it is considered essential that an immediate review policy is factored into the Plan to take into account the rising identified housing need. This will ensure a mechanism is formally in place to guarantee that a timely review comes forward. The policy should set time parameters for the review to take place and a target for submission.
- An example of an appropriate review policy can be viewed within the adopted Bedford Local Plan 2030. The text for that policy is considered appropriate to requirements at St Albans City & District Council. Policy 1 of the Bedford Local Plan 2030 states the following:

***'The Council will undertake a review of the Local Plan 2030, which will commence no later than one year after the adoption of the plan. An updated or replacement plan will be submitted for examination no later than three years after the date of adoption of the plan. In the event that this submission date is not adhered to, the policies in the Local Plan 2030 which are most important for determining planning applications for new dwellings will be deemed to be 'out of date' in accordance with paragraph 11 d) of the National Planning Policy Framework 2019.***

***The plan review will secure levels of growth that accord with government policy and any growth deals that have been agreed. The planning and delivery of strategic growth will be aligned with the delivery of planned infrastructure schemes including the A421 expressway, Black Cat junction, East West Rail link and potentially the A1 realignment.***

***The review will also serve to build stronger working relationships with adjoining and nearby authorities and may result in the preparation of a joint strategic plan based on a wider geography'.***

- Strategic Policy SP1 sets out the spatial strategy for the St Albans District to inform the Local Plan. As set out within the Regulation 18 representations, there are concerns regarding the specific wording within paragraph 2 of the policy and particularly the sentence that states 'The approach seeks first to develop Brownfield Land'. The reference to developing 'first' implies that brownfield sites would need to be built-out before any greenfield sites can come forward.

The Local Plan seeks the delivery of 'at least' 14,603 net additional houses, at a rate of 885 dwellings per annum for the period of October 2024 to 31 March 2041. The reference to this being a minimum figure is welcomed. This is a key factor in providing affordability to the District, which has suffered from low delivery and resultant rising house prices. Increasing the figure above the minimum will assist in providing a wider range of housing for all different groups. For example, additional sites will equal more affordable housing, as well as specialist housing for the elderly, disabled etc.

On Behalf Of Company/Organisation: Notcutts Ltd Name:

Comment Number: 2

**Type:**

* Policy

**Number:**

SP1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Notcutts Ltd welcome recognition at paragraph 1.31 of the draft Local Plan that there is a clear need for more homes because of the national situation and that there is a need for more local people to live and work where they were brought up.

They also welcome recognition that there is a need to prioritise the redevelopment of brownfield land, whilst recognising that the scale of the housing crisis both locally and nationally requires the development of greenfield sites and the release of land from the Green Belt.

However, Notcutts Ltd are concerned that the process undertaken by the St Albans District Council (SADC) to identify suitable housing sites in the Green Belt is not robust and has led to suitable sites being missed.

They also have a concern with the settlement hierarchy and, in particular, the categorisation of Smallford as a washed over settlement in the Green Belt which has an impact on the operation of the garden centre. These points are elaborated on below.

The Settlement Hierarchy Table 1.3

At Regulation 18 stage, Notcutts Ltd made representations that Smallford should be a higher order settlement in the Settlement Hierarchy and inset from the Green Belt or, as a minimum, the infill boundary amended to include the garden centre, which is clearly part of the built-up area. This point has not been addressed in the draft Local Plan, with the Settlement still classified as a tier 6 Green Belt Village and the boundary not being adjusted.

The Settlement Hierarchy Study (touched on further below) is clear that the assessment of the relative sustainability of the settlements identified is based on the availability of services and facilities within the defined settlement boundary. However, at no point is it clearly set out how this settlement boundary has been established. There are no settlement boundaries on the adopted polices map, with only indicative details provided on Figure 4 of the 1994 Local Plan to work from. The Settlement Hierarchy Paper simply states:

*'Given that development of existing settlements has encroached into the Green Belt, the first stage of the study was to consider how to map and define the settlement areas in the District. GIS data layers were used to map the settlements, and included the Green Belt and Address Gazeteer Data'.*

No further detail is provided to make it clear why the boundary was drawn to exclude the garden centre as well as the Three Horseshoes pub to the south of Hatfield Road from the settlement boundary. Whilst historically, there could have been an argument that gardens centres would have been rural in nature and therefore best considered as part of the 'open countryside' beyond settlement boundaries, this is no longer the case. Notcutts Garden Centre is such an example and is clearly commercial in nature, forming both physical and function parts of Smallford, meaning it should lie within the settlement boundary.

Notcutts therefore contend that the approach taken is not robust and is therefore not justified, failing the test of soundness. This could be rectified by carrying out a more robust, criteria-based assessment, of the characteristics of the built-up area, which should include ensuring all built up areas of the settlement are within the identified boundary.

The implication of not including the Garden Centre within the settlement boundary is that any limited developments that are needed to support the growth and development of the business do not benefit from the provisions of draft policy LG8, which sets the parameters for small scale development within Green Belt settlements. This policy is discussed in more detail in our response to the Development Management policies. However, at this stage we would note that the approach

of the Council and the lack of proper consideration of the extent of the built-up area, limits the evolution of a business which clearly forms part of the built-up area of Smallford and is an important employer in the District.

In addition to this point, Notcutts Ltd consider that the process undertaken to assess the relative sustainability of settlements across St Albans is not robust and downplays the sustainability of Smallford, particularly given:

- It's functional relationship with St Albans
- The provision of employment (within the garden centre, garage, pub, Glinwell and the Hatfield Road industrial estate which is c.600m from the centre of the village and therefore walkable)
- Location on a key public transport route

If factored into the assessment process properly, these characteristics would elevate Smallford above other higher order settlement despite its limited size.

Finally SADC have not given any consideration to the implications that development proposals within the Local Plan, have on the characteristics of an area and the sustainability of settlements. In the case of Smallford, the process does not reflect the fact that as a result of the proposed allocation of Glinwell in the Local Plan, Smallford effectively becomes part of St Albans, with the settlement boundaries adjoining each other. Therefore, it would appear illogical to continue to classify Smallford as a separate settlement for the purpose of the settlement hierarchy.

Given this close relationship, when combined with the other sustainability benefits noted above, it is illogical that Smallford is still characterised as a washed over village in the Green Belt. It is clearly a sustainable location, with urban characteristics that Notcutts Ltd suggest should lead to the settlement being inset from the Green Belt as part of St Albans. Notcutts Ltd therefore suggest an amendment is necessary to the draft Local Plan and the policies map to ensure the settlement hierarchy and the settlement boundary of Smallford/St Albans is properly justified.

Green Belt Washed Over Villages Assessment

Notwithstanding the points made above, the Green Belt 'washed over villages' assessment concludes that the 'settlement' has an open character and makes an important contribution to Green Belt openness.

The assessment is flawed in concluding that the settlement has a strong linear development pattern with the Garden Centre and two recent developments to the north and south clearly providing depth to the east of Oaklands Lane. The settlement is also generally built up with limited gaps between buildings that would constitute the settlement form and pattern being considered of 'open character'. Notcutts Ltd therefore suggest a 'low' assessment score would be appropriate.

The assessment recognises that there are no large key open spaces in the defined settlement boundary of Smallford but still assesses the settlement as having a moderate score under the 'Key Open Spaces' criteria due to the minimal amount of green spaces along the length of the settlement. This score is given despite there only being one small open space adjacent to the Hatfield Road roundabout. This green space cannot justify the same 'moderate' conclusion given to places such as Sandridge, which has a large number of interlinked green spaces which clearly contribute to the openness of the settlement. This assessment process is therefore clearly inconsistent, flawed and needs to be reviewed before it can be considered sound.

As explained on Page 43 of the Green Belt Assessment, only sites with a majority of moderate or above scores are taken to stage 2 of the washed over village assessment. A 'low' assessment score, which would have been more appropriate, would therefore have led to a conclusion that Smallford does not have an open character and led to part 2 of the assessment of Green Belt openness, not being necessary.

Therefore, even in the event that the Inspector were to take a view that Notcutts Ltd comments on Smallford forming part of the built-up area of St Albans were not accepted, as a minimum, the washed over status of the settlement needs to be properly assessed and reconsidered to ensure the conclusions are justified and the Local Plan sound.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Review of the Settlement Hierarchy Study to properly consider the sustainability of Smallford, with consequential changes to the Settlement Hierarchy in table 1.3

Proper review of the settlement boundaries to reflect the extent of built form (existing and proposed) and and consequential changes to the proposals map.

Review of the Washed Over Villages Green Belt Assessment and consequential changes to the infill boundary (if Smallford not to be inset from the Green Belt as suggested)

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To discuss in more detail the specific concerns with the evidence based which undermine the soundness of the spatial strategy

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 172 - Mr and Mrs Robert and Karen Choppin

Submission Number: 172 Submission Date: 07/11/24 14:30

Respondent: Company/Organisation: Studio LK Name: Lita Khazaka

On Behalf Of Company/Organisation: Name: Mr and Mrs Robert and Karen Choppin

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

1.1. The Draft Local Plan 2041 is accompanied by an extensive evidence base.

1.2. The Inspector appointed to examine this Draft Local Plan and consider Mr and Mrs Choppin's submission is directed to have regard to the Call for Sites exercise in 2021 for this Local Plan, the council's first appraisal of the site and the subsequent assessment of its merits thereafter (extracts of which are supplied in Appendices 1 to 4 – *see attachment*).

1.3. Despite this prolific amount of evidence, it is noted that the Regulation 19 draft does not include a statement showing how the council is addressing its Duty to Cooperate with neighbouring authorities and other public bodies either. The council purports to support other authorities on the matter with regard to the supply of employment land (refer Policy SP5) but not on housing matters. This was a legal matter on which the last Draft Local Plan failed when it was submitted to examination in 2020.

1.4. This failure is especially pertinent with regard to new challenges this new Draft Local Plan faces and in particular the need to protect the Chiltern Beechwoods SAC including whether neighbouring Dacorum can meet its housing needs from within its district boundaries as a result of this constraint. The council has not confirmed either whether multi agency commitments are in place to fund and/ or deliver the substantial amounts of new infrastructure to support the Local Plan especially around the Hemel Garden Communities project.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

These are set out in our representations on Chapter 4.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 241106 Reg 19 submission[2]_reva final_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

The reasons are set out in our submission.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

## 178 - LIH

Submission Number: 178 Submission Date: 07/11/24 14:48

Respondent: Company/Organisation: Urbanissta Name: Mrs Jo Hanslip

On Behalf Of Company/Organisation: LIH Name:

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**2.0 Policy Environment for Regulation 19 Plan**

- National Context for Housing Delivery – Draft NPPF (2024)

2.1 On the 4th July 2024, the Labour Party were elected to form the Government across Britain. A cornerstone of Labour policy is to increase and encourage housing growth across the Country to support economic and social change.

2.2 On the 30th July 2024, consultation on proposed changes to the NPPF were announcement to achieve '*sustainable growth in our planning system'*.

2.3 These proposed changes to the NPPF (2024) where supported by a Written Ministerial Statement (WMS) by Angela Rayner, Deputy Prime Minister and Secretary of State for Housing Communities and Local Government [1]. The WMS is a material planning consideration for the determination of planning applications and the preparation of Local Plans.

2.4 We highlight below some key themes of the WMS which are then addressed in detail as they pertain to the draft NPPF (2024).

*"Our manifesto was clear: sustained economic growth is the only route to improving the prosperity of our country and the living standards of working people.*

*Our approach to delivering this growth will focus on three pillars; stability, investment and reform. But this growth must also be generated for everyone, everywhere across the country – and so nowhere is decisive reform needed more urgently than in housing.*

*.... turbocharge growth and build the 1.5 million homes we have committed to deliver over the next five years.*

*We are therefore reversing last year's changes which loosened the requirement for local authorities to plan for and meet their housing needs, and we are going further still, by mandating that the standard method is used as the basis for determining local authorities' housing requirements in all circumstances.*

*..... The new method provides a stable and balanced approach.....*

*As such, local authorities will be expected to make every effort to allocate land in line with their housing need as per the standard method, and will need to demonstrate that they have done so at examination of their plan.*

*....for plans at an advanced stage of preparation (Regulation 19), allowing them to continue to examination unless there is a significant gap between the plan and the new local housing need figure, in which case we propose to ask authorities to rework their plans to take account of the higher figure; and....*

*....While this will delay the adoption of some plans, it is important to balance keeping plans flowing to adoption with making sure they plan for sufficient housing....*

*There is no time to waste. It is time to get on with building 1.5 million homes."*

*Underline Urbanissta emphasis*

2.5 In the Budget Statement on 30th October 2024 [2] the following statement at Paragraph 3.22 is made in relation to the draft NPPF (2024) and planning reforms:

*"The government will continue to take action to ensure that the planning system supports public and private investment. This includes:*

- *Responding to the National Planning Policy Framework consultation before the end of the year to confirm pro-growth reforms to the planning syste*
- *Implementing legislative changes to ensure a simplified and streamlined planning system, through the Planning and Infrastructure Bill to be introduced in Parliament early next year.*

1 https://questions-statements.parliament.uk/written-statements/detail/2024-07-30/hcws48

2 https://assets.publishing.service.gov.uk/media/672232d010b0d582ee8c4905/Autumn_Budget_2024__web_accessible_.pdf

- *Providing an additional £5 million to deliver improvements to the planning regime for Nationally Significant Infrastructure Projects, as well as £46 million to boost capacity and capability in local planning authorities.*
- *Allocating £70 million in 2025-26 to support infrastructure and housing development while boosting nature's recovery."*

*Underline Urbanissta emphasis*

2.6 The Government's need and intention to deliver economic growth and the critical role that boosting the supply of housing plays in this is clear.

2.7 It is our contention (for the reasons set out In these representations), that StADC are intentionally cherry picking the aspects of the WMS and draft NPPF proposed changes to suit a local political objective, which is to limit and constrain the level of housing provided and planned for within the district. We assert that their approach runs directly counter to the WMS objectives and applying paragraph 35 is clearly unsound. These representations relate primarily to Draft Policies SP1, SP3, Polices GL 1 – 4 and Table 3.1 of Reg 19 Local Plan Part A Part B Local Plan Table A1.1 and its associated site allocations, and the draft Plan's evidence base including in particular (and for present purposes) the Green Belt Review (2023), the SA (2024) and IDP (2023 & 2024).

2.8 This underlying political objective of StADC to unjustifiably limit the delivery of the necessary supply of homes is a recurring theme that we return to throughout these representations as it goes, among other things, to the heart of the extent and degree to which StADC have sought to fulfil their DtC and the extent to which the Draft Plan can be considered sound. This political objective we assert creates a dangerous (undermining) precedent for plan making generally which will negatively impact upon the Government's intentions to 'turbo charge' housing delivery and, as such, this and other failings which we identify in these representations should be addressed robustly by StADC prior to the Submission of the draft Plan.

2.9 For present purposes, the proposed changes in the NPPF (2024) include:

- A new standard method for calculating housing targets.
- Reviewing Green Belt boundaries, placing emphasis upon housing delivery on brownfield, 'grey belt' land and where required undeveloped land within it.
- Delivering affordable, well-designed homes and places.
- Increasing emphasis upon Local Plan preparation to achieve up-to -date plans as soon as possible.
- Strengthening cross boundary cooperation where necessary.

2.10 Based upon the current standard methodology (NPPF December 2023), StADC has a requirement of 885 dwellings per annum. Indeed, the Regulation 18 Plan (July 2023) proposed some 888 dwellings as its annual target. Based upon the new standard method (draft NPPF 2024) this would indicate an annual housing requirement for StADC of some 1,544[3] dwellings an increase of some 659 dwellings per annum more than is currently planned for. This uplift, set against the current level of annual delivery of circa 400 dwellings is acknowledged to represent a required significant and proactive step change by StADC in its planning for the delivery of a sufficient supply of homes, which will require StADC to find additional sites to allocate for housing.

2.11 The new two-step standard method is mandatory, and Council's such as StADC may not argue 'exceptional circumstances' to reduce assessments of need. If a reduction is proposed due to National Landscape or other such designations, clear and demonstrable evidence will be required to justify this, including efforts such as sharing need with neighbouring Local Authorities' (LPAs') and reviewing Green Belt boundaries.

2.12 The proposed affordability indicator of house prices exceeding average earnings of 4:1, would certainly be a highly material consideration in StADC, where affordability issues are at their most acute. Indeed, the Council's own housing needs assessment identifies that house prices exceeding average earnings of 15:1[4].

2.13 In relation to the exceptional circumstances test at the plan making stage for releasing sites from the Green Belt, paragraph 142 of the consultation draft NPPF (2024) states:

*"Once established, Green Belt boundaries should only be altered where exceptional circumstances are fully evidenced and justified, through the preparation or updating of plans. Exceptional circumstances include, but are not limited to, instances where an authority cannot meet its identified need for housing, commercial or other development through other means. In these circumstances authorities should review Green Belt boundaries and propose alterations to meet*

*3* outcome-of-the-proposed-revised-method. www. gov.uk*. July 2024.*

*4 South West Hertfordshire - Local Housing Needs Assessment Report (LHNR) para 6.75.*

*these needs in full, unless the review provides clear evidence that such alterations would fundamentally undermine the function of the Green Belt across the area of the plan as a whole. .... "*

*Underline Urbanissta emphasis*

2.14 As to green belt sites at the decision-making stage, paragraph 152 of the consultation draft NPPF continues and states:

*"In addition to the above, housing, commercial and other development in the Green Belt should not be regarded as inappropriate where:*

1. *The development would utilise grey belt land in sustainable locations, the contributions set out in paragraph 155 below are provided, and the development would not fundamentally undermine the function of the Green Belt across the area of the plan as a whole; and*
2. *The local planning authority cannot demonstrate a five-year supply of deliverable housing sites (with a buffer, if applicable, as set out in paragraph 76) or where the Housing Delivery Test indicates that the delivery of housing was below 75% of the housing requirement over the previous three years; or there is a demonstrable need for land to be released for development of local, regional or national importance.*
3. *Development is able to meet the planning policy requirements set out in paragraph 155."*

2.15 StADC has a well-documented housing shortfall being unable to demonstrate a 5-year supply of housing (at circa 1.7/1.9 years)[5] and has a HDT score of 55% which does not exceed the above 75% threshold. The presumption in favour of sustainable development therefore applies. The Council has undertaken a review of its Green Belt boundaries most recently, in 2023, but it is anticipated that further pressure will be brought to bear on StADC considering the proposed NPPF (2024) changes.

2.16 We will show in Section 6.0 to these representations that StADC have failed in undertaking a robust and well evidenced Green Belt review on which it has underpinned its land use decisions and, as such, the draft Plan is based upon fatal evidential flaws which undermine its potential soundness.

2.17 It is evidence that with the Government's agenda being on housing delivery that additional land for housing will need to be found by StADC if the objective of achieving the delivery of 1.5 million homes in the next 5 years is to be achieved.

2.18 In avoiding addressing the main objectives of the WMS and draft NPPF (2024), StADC are intentionally avoiding dealing with the implications of the revised standard method, circumventing the system by seeking to unduly expedite draft Plan delivery which relies upon the 'transitional arrangements' in the draft NPPF (2024) and a position that 'a plan is better than no plan'. This

cannot be effective or justified as an approach to plan making, and if such a precedent is set, runs the risk of undermining the Government's main policy objective of increasing housing supply and generating growth within the economy. This is not sustainable development and clearly runs counter to the government's intentions as set out in the Autumn Budget 2024.

Transitional Arrangement for Plan Making

2.19 Whilst StADC wishes to delay and defer the delivery of increased housing provision as clearly stated in the WMS and draft NPPF (2024), the authority appears to have placed great stock on the draft transitional arrangements and as such, are expediting their progression of their Local Plan in a clearly stated position directly to avoid providing - or even contemplating the provision of, the level of housing required by the WMS and draft NPPF (2024).

2.20 Paragraph 226 and 227 of the draft NPPF (2024) state:

"*For the purposes of plan-making*

*226. The policies in this Framework (published on [publication date]) will apply for the purpose of preparing local plans[82] from [publication date + one month] unless one or more of the following apply:*

*227. the emerging annual housing requirement[83] in a local plan that reaches or has reached Regulation 1984 (pre-submission stage) on or before [publication date + one month] is no more than 200 dwellings below the published relevant Local Housing Need figure 85;*

*228. the local plan is a Part 2 plan that does not introduce new strategic policies setting the housing requirement unless the relevant Local Plan Part 1 has been prepared applying the policies in this version of the Framework;*

*5 StADC Annual Monitoring Report 2023 (1April 22 to 31st March 23) para 3.16.*

1. *the local plan is or has been submitted for examination under Regulation 22[86] on or before [publication date + one month].*

*Where a, b or c applies, the plan will be examined under the relevant previous version of the Framework[87]*

*227. Where paragraph 226c) applies, local plans that reach adoption with an annual housing requirement[84] that is more than 200 dwellings lower than the relevant published Local Housing Need figure[86] will be expected to commence plan-making in the new plan-making system at the earliest opportunity to address the shortfall in housing need.*

*228. After applying the policies of this version of the Framework, local plans that have reached Regulation 19 (pre-submission stage) on or before [publication date + one month] with an emerging[88] annual housing requirement[84] that is more than 200 dwellings lower than the relevant Local Housing Need[86] figure should proceed to examination[89] within a maximum of 18 months from [publication date]. "*

*80 As an exception to this, the policy contained in paragraph 76 and the related reference in footnote 8 of this Framework should only be taken into account as a material consideration when dealing with applications made on or after the date of publication of this version of the Framework.*

*81 Unless these strategic policies have been reviewed and found not to require updating. Where local housing need is used as the basis for assessing whether a four year supply of specific deliverable sites exists, it should be calculated using the standard method set out in national planning guidance.*

*82 Under the Town and Country Planning (Local Planning) (England) Regulations 2012*

*83 Defined as the total housing requirement, divided by the number of years in the plan period. The housing requirement can include any unmet need arrangements. Where a joint local plan is in preparation, to determine whether a shortfall exists between the emerging annual housing*

*requirement and the relevant Local Housing Need figure, any shortfall should be apportioned to each local authority equally to determine whether a shortfall exceeds 200 dwellings per annum. Where there is an operative Spatial Development Strategy (SDS) that is less than 5 years old, the SDS will continue to provide the housing requirement for relevant emerging local plans.*

*84 Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012*

*85 As published on [insert date] at [insert web link].*

86 Regulation 22 of the Town and Country Planning (Local Planning) (England) Regulations 2012

87 The policies in the version of this Framework (published on 19 December 2023) may apply for the purpose of preparing plans that reach or reached Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012 (pre-submission) stage between 19 March 2024 and [publication date plus one month].

88 Set out in the most recent Regulation 19 (pre-submission stage) consultation.

89 Meaning the plan has reached Regulation 22 of the Town and Country Planning (Local Planning) (England) Regulations 2012.

2.21 We address StADC's response to the transitional arrangements in more detail in below but reiterate here, the selective way the Council is having regard to Government policy. We contend, StADC's approach undermines both the soundness of the Plan and the robustness in which the Council can exercise its obligations effectively under the DtC, resultant from the unseemly 'scramble' to secure a position under the existing NPPF provisions (2023).

2.22 The word 'turbocharge' is a clear and decisive statement and direction of travel for national policy in respect of the need for housing delivery across the Country, which will have implications for the extent and nature of housing delivered within StADC as well as more widely across the country. StADC should at the very least, pause, reflect, and demonstrate regard to the changing policy position and assess robustly with its members the implications of emerging policy guidance.

2.23 Whilst it is acknowledged that the consultation draft NPPF (2024) might be subject to refinement prior to its final issue, what is evident from the extracts of policy above as well as the Autumn Budget (2024) and the WMS[1] that the national agenda has shifted significantly and that the focus on delivering sustainable, well-designed homes in places (in greater number) where necessary on land which makes a limited contribution to the purposes of the Green Belt, is clear. StADC, in its desperation to avoid reviewing its housing provision seems to be completely ignoring the principal objective of Government policy to increase the provision of housing.

- NPPF (December 2023)

2.24 Turning to matters of current national policy, paragraph 16 of NPPF (December 2023) states with respect

to plan-making that:

*"Plans should:*

1. *be prepared with the objective of contributing to the achievement of sustainable development[9];*
- *) be prepared positively, in a way that is aspirational but deliverable;*
1. *be shaped by early, proportionate and effective engagement between plan- makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;*
1. *contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;*

2. *be accessible through the use of digital tools to assist public involvement and policy presentation; and*
3. *serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).”*

2.25 This provision remains unchanged in the draft NPPF (July 2024)

2.26 Paragraphs 26 and 27 of NPPF (December 2023) states, with respect to maintaining effective cooperation, that:

26 “*Effective and on-going joint working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy. In particular, joint working should help to determine where additional infrastructure is necessary, and whether development needs that cannot be met wholly within a particular plan area could be met elsewhere.*

27 *In order to demonstrate effective and on-going joint working, strategic policy- making authorities should prepare and maintain one or more statements of common ground, documenting the cross-boundary matters being addressed and progress in cooperating to address these. These should be produced using the approach set out in national planning guidance, and be made publicly available throughout the plan-making process to provide transparency*.”

2.27 The Statement of Common Ground (Overarching)[37] is very limited in scope in seeking to demonstrate that StADC have had constructive, active and on-going discussions with any other planning authorities (including Dacorum) in relation to their draft Local Plan. As we note above, this failure to cooperate with surrounding authorities was a reason for the failure of the 2017 Local Plan[6] and in 2020.[7] It is abundantly clear that StADC has not learnt Its lesson from its 2 previous plan-making failures.

2.28 The draft NPPF (July 2024) includes a new paragraph which states:

*27 “Once the matters which require collaboration have been identified, strategic policy-making*

*authorities should make sure that their plan policies are consistent with those of other bodies where a strategic relationship exists on these matters, and with the relevant investment plans of infrastructure providers, unless there is a clear justification to the contrary. In particular their plans should ensure that:*

1. *a consistent approach is taken to planning the delivery of major infrastructure, such as major transport services/projects, utilities, waste, minerals, environmenta l improvement and resilience, and strategic health, education and social infrastructure (such as hospitals, universities, major schools, major sports facilities and criminal justice accommodation);*
2. *unme development needs from neighbouring areas are accommodated in accordance with paragraph 11b; and*
3. *any allocation or designation which cuts across the boundary of plan areas, or has significant implications for neighbouring areas, is appropriately managed by all relevant authorities”.*

2.29 Clearly, in progressing the Regulation 19 Plan in line with the exiting NPPF (2023) and in seeking to ‘avoid’ the draft NPPF (2024) mandates, StADC have had little or no regard to addressing unmet need that might arise from neighbouring areas. There is no evidence currently in the public domain, to show that StADC have had any such discussions let alone the required constructive, active and on an on-going basis discussion with any other planning authorities.

2.30 StADC have failed to provide evidence to demonstrate:

- what the level of unmet need is - either within StADC area – or within neighbouring authorities with whom StADC must cooperate

- Key to the draft Plan is demonstrating that the spatial and land use decision in the plan have been informed by an understanding of the level of unmet needs that exist within the plan area.
- London's unmet housing need also seems to have been completely overlooked in the plan's formulation and evidence base.

6R on the Application of StADC City and District Council v Secretary of State for Communities and Local Government. Case Number: CO/26/2017

7 https://www.stalbans.gov.uk/sites/default/files/attachments/ED40%20%20Inspectors%20Post%20Hearings%20Letter%2014.4.20.pdf

2.31 Paragraph 35 of NPPF (December 2023) states:

*"Local plans and spatial development strategies are examined to assess whether they have been prepared in accordance with legal and procedural requirements, and whether they are sound. Plans are 'sound' if they are:*

1. *Positively prepared–providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs...; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*
2. *Justified–an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*
3. *Effective–deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*
4. *Consistent with national policy–enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant.*

*Underline Urbanissta emphasis*

2.32 This key soundness test remains unchanged in the draft NPPF (July 2024) other than paragraph 35 being renumbered to 36.

- St Albans Position on draft NPPF (2024)

2.33 We address in Section 3.0 below matters of the DtC and soundness in detail, so in this Section we provide details of the 'context' in which StADC has been advising Council members and taking decisions in respect of the Regulation 19 Plan. We will relate these aspects back to matters of soundness in Section 3.0. For the reasons states, we assert that StADC has pre-determined the outcome of the consultation of the Regulation 19 Plan which is a fundamental failing in the process.

2.34 In a press release[8] issued on the 29th August 2024, StADC Council indicated that following the proposed changes to the standard method associated with the consultation on the draft NPPF by the new Government, that the Council intended to expedite preparation of their Local Plan so as to avoid '*identifying sites for a further 11,000 homes*'.

2.35 Cllr Paul de Kort, Chair of the Council's Planning Policy and Climate Committee (PPC) states in the pre release[8] that:

"*By bringing forward the timetable for the Local Plan, the Council has the best chance of getting a new Local Plan agreed ahead of the government's new deadline. This will set the strategic foundation needed both to defend StADC District from ad hoc building in the Green Belt and to set out the policies that will mean any future development meets strict guidelines for sustainable development. "*

2.36 The press release[8] continues:

"*StADC City and District Council planned to submit its draft Local Plan by April 2025. However, in light of the proposed changes to national planning law, the Council now plans to bring the timing forward.*

*Without doing so, the Council would be forced to delay submission by 2-3 years in order to identify sites for a further 11,000 homes that the new government proposals require. "*

2.37 The timetable set out in the press release states:

"*To achieve this accelerated timetable for submission, the Planning Policy and Climate Committee meeting scheduled for 3 October will be brought forward to 23 September. Should the Committee agree, the draft Local Plan Regulation 19 technical consultation will begin on 26 September and continue for 6 weeks. Feedback from the Regulation 19 technical consultation will be considered by the Planning Policy and Climate Committee on 28 November, when it will also consider submission of the Plan to government.*

*Full Council will consider the content of the draft Plan in the autumn. "*

2.38 We make the following observations in relation to these publicly stated views:

- The Council are deliberately seeking to avoid positively planning for some 11,000 dwellings that would be required by the new standard method, directly contrary to the WMS of the 30th July 2024

8 https://www.stalbans.gov.uk/news/council-speeds-its-local-plan-process

objectives, which as a statement of intent as to the direction of travel for national policy is a material consideration for plan making.

- There is no evidence to demonstrate that meeting the requirement of the draft NPPF (2024) would result in a delay of 2 – 3 years in plan making. No detailed assessments to what the implications for programme would be in dealing with emerging Government policy were provided to members.
- Much of the technical evidence has already been undertaken, a grey belt study might be required and possibly a further call for sites exercise could be held, but this would not need to take anything like 2 – 3 years and otherwise a review and updated of submitted material might be needed to address to substantiate increased allocations.
- Given the extent of wider flaws in the assumptions and evidence base underpinning the draft plan (as set out in sections 3.0. – 10.0 of these submissions), it is evident that substantial revisions to the draft Plan and its evidence base are already required prior to submission if indeed it is capable of being made sound.
- There is no information about the potential cost to the tax payer of having to do an immediate review and a whole new plan (which is an as opposed to reworking current plan.

2.39 These concerns are **further** supplemented by discussions at the Planning Policy & Climate Committee (PPC) on the 12th and 23rd September 2024.

Planning Policy & Climate Committee - Thursday, 12th September, 2024 9

2.40 In summary, the meeting considered the:

- Draft NPPF & Government Announcements.
- Local Plan evidence base.
- Heritage Impact.
- Transport Impact Assessment.
-

2.41 Officers indicated that the implications for the spatial strategy for dealing with the additional homes required by the draft NPPF (2024) would (if the same spatial strategy be applied) result in the following requirements:

- 6,000 more homes in St Albans Green Belt.
- 3,000 more homes in Harpenden Green Belt.
- 2,000 more homes London Colney, Redbourn and Wheathmapstead green belt.

2.42 Papers for the PPC Committee identify that StADC in not within the top 20 of 'most affected' local Authorities in the Country and emphasised that the transitional arrangements applied as at the date of publication plus one month of the new NPPF (2024).

2.43 The NPPF transitional arrangements were summarised for members and three options were presented to members as being the way forward available:

- "*Option 1 – continue with the current plan and expedite the delivery and submission timetable in advance of the NPPF publication (plus one month)*
- *Option 2 – continue with the current plan and add capacity to 200 homes fewer than new standard method (1,344 dw/yr) 'purely theoretical' for StADC, as a 'no reasonable way to introduce 460/yr dwellings without a long period of time needed to progress the technical and infrastructure work' to get to Regulation 19 stage before the cut-off date of NPPF adoption plus one month.*
- *Option 3 – recommence plan at evidence gathering stage plan to go back 2 – 3 years to launch plan on basis of delivery 1,544 dwellings. "*

2.44 No evidence or explanation was provided to members as to why the Local Plan would be delayed by 2 – 3 years if Option 3 was taken forward. These timescales were simply presented as a statement of fact. No risk analysis or assessment was offered to members or available for public scrutiny to enable them to fully consider the implications of selecting Option 1, 2 or 3. This cannot be a robust or positively prepared way to undertake plan making.

2.45 StADC's approach seems to be that 'a plan is better than no plan', however this is counter to Government policy and demonstrates a clear intention to circumvent the system which at its heart is an unsound basis on which to progress a Local Plan. The lack of consistency with the clear direction of travel for Government policy coupled with a lack of justification or effectiveness in the process is of great concern. The failure to engage with authorities within the JSP area and more widely and to demonstrate how the implications of

*9* https://stalbans.moderngov.co.uk/ieListDocuments.aspx?CId=615&MId=10957

emerging Government policy can be addressed is clearly lack and is a self-evident failure in compliance with the DtC.

2.46 Officers highlighted to members that in Matthew Pennycook MP's letter to the CEO of the Planning Inspectorate (PINS)[10] on the 31st July 2024, the Government had made clear that long local plan examinations in an attempt to make an unsound plan sound during the examination process should not continue. It was highlighted that one-year long local plan examinations should be the new norm. Officers indicated that PINS have said they will do this, and the bar will be raised and indicated that this will result in more plans being rejected at examination stage.

2.47 Several risks to the Local Plan process were identified by officers during this PPC meeting (but identified as risks '*well worth*' taking) namely the:

- Impact of the revised standard method figure (increase of 75%) from 885 dwellings to 1,544 dwellings
- Dacorum do not progress with their Local Plan at the same rate as StADC which may cause problems for Hemel Garden Community (HCG) delivery.
- Joint sessions had been anticipated on HGC, it is not impossible, but less likely now.
- Dacorum indicated they will support the StADC Plan and HGC as far as possible.
- Regulation 19 accelerated by one month which has a minimal risk profile
- The proposed submission of the local plan coming forwards from the end of March 2025 to 2nd Dec 2024 will result in:

- Fewer agreed and signed Statements of Common Ground ('SCG') when submitted (including neighbouring authorities and statutory bodies) *(goes to DtC)*
- Content is well progressed and agreed. Internal processes however must be gone through and unlikely to be in the accelerated timescale.
- Fewer and less extensive topic papers to assist Inspectors. Less comprehensive rigorous. *(Goes to soundness)*
- Less time to review and consider representations made at the Reg 19 stage. '*Officers will read the reps'*, but their ability to summarise the key issues that Inspectors might consider might need to be examined will be restricted. *(Goes to Soundness and DtC)*
- Lack of regard to public consultation – a tracked change version only, no reference to changes. *(Goes to soundness and DtC)*
- The 100-page document in December 23 to which officers refer as 'really detailed'[11] on representations received at Regulation 18 stages for North East Redbourn site was curtly responded to as "*Site was not recommended for further consideration in the Arup GBR*." We assert that officers are misleading members in saying their review of representations was 'very detailed'. These concerns regarding the level of regard to representations received at Regulation 18 stage, were even reiterated by members at Full Council on the 16th October 2024[12]

2.48 In summary, for the reasons set out above, at the PPC Committee on the 12th September 2024, members were:

- Mislead in relation to timescales for the delay to the Local Plan.
- Provided with limited or no evidence to substantiate the delay of 2-3 years in plan making.
- Given no financial evidence to inform the costs implications to StADC of pursuing Option 1, 2 or 3.
- Advised of specific flaws in the plan making process that result from proceeding with the expedited Plan which go to the heart of compliance with the DtC and soundness generally.

2.49 The proposed means by which to mitigate the identified risks were cited to include:

- Working exclusively on Local Plan.
- Reduced annual monitoring (on shopping).
- Article 4 directions.
- Less responsive to some emails.
- Call to arms for assistance which will be secured by wider Council officers.

2.50 Members highlighted concerns during the meeting on a couple of additional key matters. These concerns:

- highlighted the need for StADC to be clear on communications as StADC will be open to criticisms for '*pushing things through'*.

*10* https://assets.publishing.service.gov.uk/media/66aa157b0808eaf43b50dad5/minister-pennycook-to-chief-executive-of-planning-inspectorate.pdf

*11 Public reports pack 12122023 1900 Planning Policy Climate Committee p30 - p205*

12 https://stalbans.public-i.tv/core/portal/webcast_interactive/876899/start_time/751000

- Questioned StADC's relationship to London – asking if the Authority's position can be robustly defended? Officers advised that there was no direct dialogue/mechanism for London need to be addressed outside London but as addressed below this is relevant to assessments of unmet need.

2.51 During the PPC Committee meeting on the 12th September 2024, the PPC Chair (Cllr De Kort) referred to his DtC in his letter to Baroness Taylor [13] indicating that he had highlighted that:

- '*NPPF changes could jeopardise the delivery of HGC'*– although the Chair's letter does not specify how or why this might happen.
- '*Three local planning authorities and cross boundary working'*– although the Chair's letter is unclear about how or why this would be affected?
- *'Impact on Crown Estates'*– again Chair's letter provides no details as to what or why this would be.
- '*Dealing with proposed changes would take 2 years with a green belt study taking 18 months'*– the Chair's letter provides no reference on how the existing work could be revising and how the timescale had been derived.
- '*Substantially delay the Local Plan which is contrary to the Government's stated* objectives' - Again, this assertion is not substantiated in evidence or fact in the Chair's letter.

2.52 We consider that the PPC Committee Chair is not being clear or transparent in his advice to Baroness Taylor[13] or members as he does not specify how or why:

- HGC or cross boundary working would be impacted or jeopardised.
- The Crown Estate would be impacted upon.
- Dealing with the proposed changes would take 2- 3 years.
- A potential delay to the Local Plan would be contrary to the Government objectives.

2.53 We note that the advantage identified by Cllr De Kort, is that StADC will secure protection Local Plan from speculative applications. This is only true if a draft Plan can be found sound and has fully addressed the DtC (which is highly questionable in its current iteration) and also fails to reflect the fact that even if the draft Plan could possibly be made sound that once adopted it would be out of date immediately for the purposes of decision making applying paragraphs 224 and 225 of the NPPF as it would be inconsistent with the new NPPF. Under the local plan making system, an immediate review of the local plan would also be triggered. Pressing ahead regardless on accelerated timescales is, therefore, a highly misconceived strategy for StADC to be adopting.

2.54 Cllr Mitchell asked specifically as to whether StADC should not pursue further Option 3 as it could be' quicker and cheaper' and indicated that if Dacorum select an 'Option 2 or 3' approach, resulting in a big drift which would impact upon the HGC project.

2.55 Officers indicated that the process '*couldn't be quicker but might be cheaper'*– possibly. Again, we highlight that this is the subjective view of officers, that there is no robust objective basis offered to members on which to assess the implications of the available options in progressing or not with the Regulation 19 Plan. No tangible evidential basis substantiates the response and has the potential to misrepresent the position to members.

2.56 Officers advised members that '*a day after the current plan is adopted StADC start on preparing new plan meeting 1,544 dwellings per annum'*, stating that Government officials have indicated that they want StADC to get on with plan preparation. We return to this assertion by officers when we look at matters of housing supply and whether this suggestion is demonstrated in the approach to the Housing Trajectory (2024) and housing allocations aspects of the draft Plan in both Part A and B as well as it's associated and evidence base.

2.57 It is acknowledged that StADC has been without a plan for far too long, having not had a plan in place since 1994 – some 30 years. The Authority has also been 'designated'[14] for poor performance in development management (March 2024), however in seeking to move forwards more positively as an authority, this should not be at the expense of proper plan making.

2.58 As detailed above, the Council has twice previously had to withdraw its Local Plan due to spurious decision making – some might argue motivated by a determination to avoid taking more challenging planning decisions – which meant that serious flaws in compliance with the DtC and the soundness of the plan

*13 Public reports pack 12092024 1900 Planning Policy Climate Committee.pdf p50-51 paragraph 3*

*14* https://www.gov.uk/government/publications/st-albans-city-and-district-council-notice-of-designation

approach transpired. StADC seem to be falling into the same trap again which we address further in Section 3.0.

2.59 Indeed, the Authorities track record should provide an enhanced note of caution to decision taking, 'a plan may not be better than no plan' if the draft Plan is unsound and has been informed by flawed procedural processes.

Planning Policy & Climate Committee (PPC) - 23rd September, 2024[15]

2.60 At the PPC Committee on the 23rd September, members were being asked to:

- approve for publication the Regulation 19 version of the Local Plan; and
- to recommend to Full Council the approval for the purpose of Submission.

2.61 The Local Authorities (Committee System) (England) Regulations 2012 requires StADC to approve the content of the draft Local Plan for the purpose of Submission to the Secretary of State.

2.62 The supporting PPC Committee Report highlights that on the 28th November 2024 StADC will decide whether to submit the draft Plan or not following consultation on the Regulation 19 Plan has concluded on the 8th November 2024. This only provides StADC with 20 days to consider and have regard to the Regulation 19 representations and adjust the draft local plan accordingly which seriously calls into question how StADC can possibly have time to conscientiously consider the Regulation 19 responses.

2.63 It was noted that Full Council was due to meet on the 16th October 2024 - during the consultation period - to approve the Submission of the Local Plan, as such pre-determining an outcome prior to the conclusion of the Regulation 19 consultation process. StADC indicate that following PPC on the 28th November, if no 'showstoppers' have been identified through consultation the Regulation 19 Plan that it will be submitted to the Inspectorate, if major changes are required then the Local Plan would need to be reconsidered by Full Council prior to Submission.

2.64 What is evident clearly by the above approach is that StADC are trying to cut as many corners as possible to avoid dealing with the increased standard method (2024) and are even compromising on Full Council consideration of both the proposed Submission version of the Plan and Regulation 19 representations. This super accelerated timetable call into question whether the Regulation 19 Plan can possibly be considered to have been the subject of any meaningful dialogue and reviewed based upon stakeholder representations prior to Submission. The expedited process suggests an element of pre-determination on behalf of the Council.

2.65 With the approach that the Council has set out, the Regulation 19 Plan will not be (materially) amended following consultation. This undermined the Council's own Statement of Community Involvement (SCI) 16 published in February 20203 which states:

*"3.5 The Council are committed to involving communities and other stakeholders in the planning process. The Council will: .....Consult in a timely, and appropriate way with stakeholders; ensuring people are invited to participate in the development of planning policy and comment on major planning applications before major decisions have been made....; "*

*Underline Urbanissta emphasis*

2.66 It is difficult to see how the Council can realistically determine at Full Council on the 16th October 2024, that the Regulation 19 Plan should be Submitted when they do not have the benefit of details of representations made on the draft Plan as consultation does not conclude on this until the 8th November 2024.

2.67 This is a fundamental procedural error which not only undermines the Council's stated objectives in its SCI to consult meaningfully but fails to comply with the Council's legal and procedural responsibilities under the DtC. It also breaches the 4th Gunning principle[17] for a fair consultation process which requires public authorities to give conscientious consideration to consultation responses before a decision is made.

2.68 StADC's eagerness to Submit the Plan in advance of the NPPF (2024) changes taking effect, suggest that it is compromising its integrity in pursuing a process that fails to undertake any meaningful consultation and are overly trying to circumvent due process.

15 https://stalbans.moderngov.co.uk/ieListDocuments.aspx?CId=615&MId=10958&Ver=4. Draft Local Plan for Regulation 19 Public Consultation published for committee 23rd September 2024

[1 6] https://www.stalbans.gov.uk/sites/default/files/attachments/Statement%20of%20Community%20Involvement%20Adopted%20Februar y%202023.pdf

*17 Laid down by Stephen Sedley QC in the case of R v London Borough of Brent ex parte Gunning*

2.69 Surely, this cannot be the intention of existing or emerging Government policy or a sound way in which to undertake plan making.

2.70 StADC hang much stock on the need to get on with plan making, and it is worth noting that on at least two occasions (2017 and 2020), StADC has failed to produce a local plan due to inherent failings in process – principally on these occasions the DtC, and associated errors in judgement in trying to progress spatial strategies which failed to fully address the areas' housing requirements and needs. As such, we question whether the Council is falling into the same trap again and trying to '*plough on regardless'*resulting in humiliation, delay and additional costs to the Authority which could be avoided by pausing and taking stock of the situation that presents itself.

2.71 In terms of identified risks of the Council approach, we note that the Committee reports [9/15] and associated Committee discussions note: 18

- 1 - There will realistically be fewer agreed and signed Statements of Common Ground to assist the Inspectors.
- 2 – There will realistically be fewer and less extensive Topic Papers to assist the Inspectors.
- 3 – There will realistically be less time preparing responses to Objections or concerns raised at Regulation 19 stage to assist the Inspector(s).

2.72 We address these risk items above as they duplicate the risks noted on the 12th September 2024 PPC meeting.

2.73 Again, however the PPC Committee were not provided with any evidence of any cooperation by StADC with surrounding Local Authorities within the JSP area – or otherwise, to consider and assess the implications of the Government's intended housing requirement increases which impact upon StADC 75% increase under the revised standard method but other authorities significantly also. This surely is a failure in the DtC.

2.74 As evidenced in detail in Section 4.0 below, in its haste to progress to Submission, a draft Plan StADC has already shown that errors in process are taking place as for example, the Housing Evidence Paper housing supply and Trajectory (at Table 3.2 of the Part A of the Plan and/or Appendix A to the Topic Paper) sources do not correspond with the provisions as set out in Part B of the draft Plan. Numerous mathematical errors have occurred and substantive changes in approach remain completely unevidenced. Surely, with such basic errors, the draft Plan's

assumptions and approach calls into question the soundness of the Plan and the Authorities approach. If officers are working at such breakneck speed, they are unable to check key Local Plan documents correspond with each other, this cannot be an indication of soundness in Plan making.

2.75 If StADC are failing to even consider and reflect with neighbouring authorities on the implications of emerging Government policy and its impact upon on their respective plan strategies and approaches and are unable to even demonstrate such matters have been reviewed in a SCG or otherwise, this is a failure in the DtC.

2.76 Similarly, if StADC does not have sufficient time to fully review representations by stakeholders in advance of the Submission of the Regulation 19 Plan and advise members effectively of the responses received this also strikes at the heart of soundness too.

2.77 Officers indicated in the 23rd September 2024 PPC meeting[15] that they would '*read all representations'*. What is the purpose of consultation if representations made by third parties are not read, reviewed, reflected upon and changes made to the Regulation 19 Plan to reflect on any comments made. How can a Council determine to submit a Plan when they have not had sight of representations as the consultation has not concluded let alone conscientiously considered them?

2.78 StADC are demonstrating clearly that they are prejudging the content and nature of any representations by 'ploughing on regardless' to Submission unless any 'showstoppers' come to light. The intention however is clear that, if possible, the Council will submit the draft Plan to avoid taking difficult decisions and undertaking Plan making in a justified and effective manner. It is plain, that this is an abuse of the proposed transitional provisions in the new draft NPPF.

2.79 As StADC makes clear at paragraph 3.31 of their Report [15] that:

*18* https://stalbans.public-i.tv/core/portal/webcast_interactive/873339

"*...following correspondence between Matthew Pennycook, Minister for Housing and Planning and the Chief Executive of the Planning Inspectorate. In simple terms, Inspectors will be more likely to reject Plans at Examination outright rather than try to 'pragmatically' resolve issues through the Examination process. "*

2.80 In its eagerness to bypass the WMS[1] and draft NPPF (2024) (except for the transitional arrangements), StADC is not pursuing a sound approach to plan making and risks the Inspectorate rejecting the Local Plan due to the failings in approach. There is a substantial risk of 'loosing time and money' which as we detail above, is yet unevidenced in time, resources, or associated costs. If such work had been undertaken, it might contradict officers' assertions to members on the 12th and 23r1 September 2024.

2.81 As StADC makes clear at paragraph 3.35 of their Report 15

*"In the overall circumstances of SADC, all of the feedback supports the SADC draft Local Plan approach, and the associated timetable outlined in this report "*

2.82 Nowhere in the Report[15] does StADC advise members of the potential implications of the proposed 'trial and error' approach to plan making.

2.83 The East of England LGA Planning Policy Review 2021 highlights the role of Councillors at 4.4 in their report (underlining added):

*"In this context, local democratic decision making is highly bounded. <u>It is remarkable that two successive Local Plans have failed in part due to administrations of the day making decisions on matters that risked full compliance with Local Plan making rules</u> against advice of their officers and legal opinion. With the benefit of hindsight, <u>the lesson to be learned by the next generations of administrations is to recognise their community leadership role in Local Plan making is to oversee</u>*

*full compliance with the Government's rules. To do otherwise is reckless, a failure of local community leadership with loss of opportunity to protect and promote the community's social, economic, and environmental wellbeing. "*

*Underline Urbanissta emphasis*

2.84 We suggest the StADC officers and members review whether in their current eagerness to push on with the current plan, they run the risk of repeating old mistakes.

2.85 Neither for the 12th or 23r1 September committee meeting is the '2 – 3 years delay' to the Local Plan's preparation explained to members or justified. No critical analysis of the implications on programme have been provided for undertaking a review of the Regulation 19 Plan in line with the draft NPPF (2024) are publicly available or have been discussed with members. Officers have simply advised members that this is the anticipated delay and that the current route is the preferred route.

Full Council 16th October 2024 19

2.86 Councillor de Kort (Chair, man of PPC Committee) opened the debating, indicating that dealing with the Government's proposed changes to the NPPF (2024) is "*too bleak to contemplate"18*

2.87 Several concerns were expressed by members in relation to the plan, including (we summarise): Councillor Cowley

- Can't support as rushing plan through. No thought on what the Labour Government might do next.
- All knew change in administration would mean increase in housing.
- Should work to the new Labour targets

Councillor Mitchell (Redbourn)

- Many unanswered questions.
- Only discussed sites at PPC on 23r1 Sept far too late to make revisions as the draft Plan was scheduled to go to consultation.
- HGC concerns – 11,000 new dwellings. Size of Harpenden. Impacts upon Redbourn.
- No evidence of viability and deliverability of the programme.
- More work is needed in relation to site allocations.
- Can't vote on draft Plan to be sent to examination as it is intrinsically flawed.

Councillor Emma Turnbull (London Colney)

- London Colney scheme is subject of an appeal.

19 https://stalbans.public-i.tv/core/portal/webcast_interactive/876899/start_time/751000

- Don't agree with Local Plan choices and Labour group will not support.

Council Heritage

- Will not be supporting the Plan as that there has been enough information provide to members on feedback from the Regulation 18 consultation or what officers responses to the submissions were.
- Not heard all the answers or reviewed if the right sites have been included.

2.88 Full Council voted to approve the Local Plan for submission with 43no. councillors voting in favour 5no. voting against and 3 no. abstentions.

2.89 StADC's rushed approach is leading to significant oversights in process by officers, which undermine the soundness of the Plan and provides little or no material for third parties to review and reflect upon or for the Inspectorate to be reassured that the Council has robustly challenged itself in determining to progress with submitting its draft Plan having been positively prepared, justified, effective and is consistent with Government policy.

2.90 Members and indeed stakeholders are being advised that to submit the draft Plan in early December 2024, is the preferred route, however inadequate justification or evidence has been made available to either PPC Committee or even, Full Council. The Council has seemingly pre-determined that the Plan is to be submitted, a questionable approach which does not meet the tests of paragraph 35 of the NPPF (2023) (or 36 of the draft NPPF 2024).

2.91 Again, this would suggest that a single-minded approach to the direction of travel has been (pre)determined and the extent and way the Regulation 19 Plan has been progressed has been developed in a way to substantiate this.

- Other Relevant Planning Policy

<u>New South West Herts Joint Strategic Plan (2050)</u>

2.92 The South West Hertfordshire Joint Strategic Plan (JSP) will cover the five council areas of Dacorum Borough Council, StADC City and District Council, Three Rivers District Council, Hertsmere Borough Council and Watford Borough Council.

2.93 It is not clear to what degree StADC has had regard to the need and aspriations of its partners within the joint area and conisdered the implications of the straegic framework that might emerge within the Joint Strategic Plan area.

2.94 Figure 3 shows the current timeline for the JSP which will consult upon the options for the scale and pattern of future growth in the area, which will no doubt be proogressed in a manner consistent with the new NPPF (once published). StADC therefore seem to be pushing on regardless and will therefore run the risk of falling foul of the issues that faced them in 2017/2020, regarding the failure to co-operate with surrouding local authorties effectively or adequately.

*Figure 3 – JSP Timeline*

*Source:* https://www.swhertsplan.com/our-programme

2.95 Dacorum acknowledge that in their Local Plan preparation the need to ensure consistency with progress of the JSP. StADC at 1.10 and 1.11 of the Part A Regulation 19 Plan, state what the JSP's role is and state that they have worked with Dacorum in relation to the HGC. There is no other reference to the relevance of significance of the JSP except in the Glossary (at page 142)

2.96 The Regulation 19 Plan is almost entirely inward looking and clearly does not meet the requirements of paragraph 26 and 27 of the NPPF (2023) or 26, 27 and 28 draft NPPF (2024) as to maintaining effective cooperation. This clearly shows failings in the compliance with the DtC on behalf of StADC.

<u>Dacorum Local Plan (2041)</u>

2.97 StADC have made great play of their 'exemplar' cooperation that has been undertaken with Dacorum, and this may be the case, however as noted by members at committee on the 23rd September[15] there are specific timing and cost implications of pursuing Option 1 over Options 2 and 3 (as detailed above). There has however been no evidence, justification or transparency associated with this decision making.

2.98 Members have also highlighted that delays to Dacorum's Plan could cause delay to the delivery of the Hemel Garden Community (HGC) site. No risk assessment has been undertaken by StADC to examine the possible implications of such on their Regulation 19 Plan assumptions.

2.99 Dacorum, acknowledge that they are seeking to move forward with their draft Plan under the existing NPPF (2023).

2.100 In a report for the Dacorum Strategic Planning and Environment Overview and Scrutiny Committee held on the 9th October 2024[20], details of the Pre-Submission version of the New Dacorum Local Plan to 2041 – Regulation 19 have been published.

2.101 Dacorum indicate that:

"*The Dacorum Local Plan would qualify under transitional arrangement (b), if submitted to the Secretary of State for examination within one month of the new NPPF being published*."

2.102 The Dacorum LDS[21] which is published in amended form alongside the Pre-Submission Local Plan (Appendix B) indicates the current timetable:

- November 2024 Formal Publication of Regulation 19 version of Plan.
- March 2025 – Submission of Plan.
- May 2025 – Examination.

2.103 It is unclear whether Dacorum can comply with element b) of the transitional arrangements if the NPPF is published before the end of 2024 (plus one month). What is clear is that Dacorum is behind StADC in terms of progress with their draft Local Plan but did vote in favour of launching a Regulation 19 consultation on their draft Plan on the 15th October 2024. The process will commence on the 4th November 2024 and concludes on the 17th December 2024.

2.104 This lack of parity will inevitably have a bearing upon the delivery of HGC which to date has not been risk assessed or evidenced by StADC.

**3.0 Legal Compliance**

- Legal Compliance

3.1 Section 20 (2) of the Planning and Compulsory Purchase Act 2004 (PCPA 2004) confirms that at examination

the Inspector will be required to consider whether, with respect to the draft Plan:

- The relevant legal and procedural requirements in the PCPA 2004 and Local Plan Regulations 2012 ('2012 Regulations) have been complied with.
- The plan is sound.
- The duty to cooperate has been complied with.

3.2 The legal requirements are those in section 17 (plan content) and section 19 (preparation) in accordance with

the LDS, regard to policies, compliance with the Statement of Community Involvement (SCI) sustainability appraisal) of the Planning and Compulsory Purchase Act 2004 (PCPA 2004) and the 2012 Regulations.

3.3 Some Authorities prepare a Local Plan Self-Assessment of their legal Compliance. We see no evidence that

StADC has undertaken or anticipates undertaking such an assessment.

- Duty to Co-operate (DtC)

3.4 The DtC is set out in section 33A of the PCPA 2004 and requires StADC as the plan making authority to co-

operate with other plan making authorities and bodies on any strategic matters arising in relation to the draft Plan.

3.5 In addition to the relevant provisions of the PCPA 2004 and 2012 Regulations, the NPPF and Planning Practice

Guidance (PPG) are also pertinent, not least in relation to the Maintaining Effective Cooperation and Evidence Base sections of the PPG.

3.6 In reviewing whether StADC have met it's DtC, we set out several key aspects of the guidance below.

3.7 Paragraph 26 of the NPPF (2023), requires that an authority must have:

*"Effective and on-going joint working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy'*

3.8 The DtC requires authorities to engage constructively, actively and on an on-going basis in relation to the

preparation of the draft Plan in relation to strategic matters.

3.9 Paragraph 1.9 and 1.10 of the Regulation 19 Plan refer to the DtC. Paragraph 1.9 sets out the obligations and

paragraph 1.10 deals with JSP related matters.

3.10 Paragraph 1.11 of the draft Plan states that StADC is working with Dacorum in relation to HGC matters. This

is the extent of information provided by StADC in respect of the DtC.

3.11 StADC are seeking to demonstrate, on this occasion, with this draft Plan that they are complying with the

DtC in Section 33A of the Planning and Compulsory Purchase Act 2004. We note that the Regulation 18 Plan indicated that '*a meeting was held with all neighbouring planning authorities and Hertfordshire County Council in September 2021 (Para 1.12 of the Local Plan) and following this 'workshop'certain authorities were asked if they could help St Albans meets its need for housing and a Strategic Rail Freight Interchange (SFRI*)'. This has been removed and no updated or additional material has been provided in the Regulation 19 Plan.

3.12 It is also noted that StADC is part of the proposed joint South West Hertfordshire Joint Strategic Plan (JSP)

area with Dacorum Borough Council, Hertsmere Borough Council, Three Rivers District Council and Watford Borough Council. The JSP seeks to provide a vision of the sub region to 2050.

Statement of Common Ground (Overarching) September 2024

3.13 Government Guidance on Statements of Common Ground (SCG) [22] indicates that:

"*Statements of common/uncommon ground are essential to ensure that the evidence considered focuses on the material differences between the appellant and the local planning authority. They provide a commonly understood context to inform the subsequent production of proofs of evidence*."

*22* https://www.gov.uk/government/publications/statement-of-common-ground/statements-of-commonuncommon-ground-for-inquiries

- 29 -

3.14 To summarise, the overarching SCG fails to address several key matters:

- There is no mention of discussions or cooperation with Watford Borough Council in relation to the Local Plan spatial approach, infrastructure provision, employment, or housing provision in the Regulation 19 Plan. There is mention of work undertaken with Watford BC in 2018 on flooding, no details as to how this has been progressed or further considered.

- There is no mention of discussions or cooperation with Three Rivers Council in relation to the Local Plan spatial approach, infrastructure provision, employment, or housing provision in the Regulation 19 Plan. There is mention of work undertaken with Three Rivers in 2018 on flooding, no details as to how this has been progressed or further considered.
- There is no mention of discussions or cooperation with Three Rivers Council in relation to the Local Plan spatial approach, infrastructure provision, employment, or housing provision in the Regulation 19 Plan.
- There is no mention as to how spatial issues of the JSP have been or will be addressed in the StADC Local Plan (Regulation 19).

3.15 The PPG states that a SCG is expected to contain several items as listed in column 1 of Table 1. In column 2 we identify whether this has been addressed within the SCG published alongside the Regulation 19 Plan.

Table 1

| **PPG Expectations** | **StADC SCG** |
|---|---|
| a. a short-written description and map showing the location and administrative areas covered by the statement, and a brief justification for these area(s); | Provided |
| b. the key strategic matters being addressed by the statement, for example meeting the housing need for the area, air quality etc.; | Provided |
| c.the plan-making authorities responsible for joint working detailed in the statement, and list of any additional signatories (including cross-referencing the matters to which each is a signatory); | Provided |
| d. governance arrangements for the cooperation process, including how the statement will be maintained and kept up to date; | Very limited information |
| e. if applicable, the housing requirements in any adopted and (if known) emerging strategic policies relevant to housing within the area covered by the statement; | Not Included |
| f. distribution of needs in the area as agreed through the plan-making process, or the process for agreeing the distribution of need (including unmet need) across the area; | Not Included |
| g. a record of where agreements have (or have not) been reached on key strategic matters, including the process for reaching agreements on these; and | Not Included |
| h. any additional strategic matters to be addressed by the statement which have not already been addressed, including a brief description how the statement relates to any other statement of common ground covering all or part of the same area. | Not Included |

3.16 The PPG at paragraph 11 requires that:

"*The level of cooperation detailed in the statement is expected to be proportionate to the matters being addressed. The statement is expected to be concise and is not intended to document every occasion that strategic policy-making authorities meet, consult with each other, or for example, contact prescribed bodies under the duty to cooperate. The statement is a means of detailing key information, providing clear signposting or links to available evidence on authorities' websites*."

3.17 The SCG does not provide any signposting or links to evidence. The current SCG is lacking in several key areas. No evidence from the SCG substantiates the activities that may – or may not - have been undertaken. This is a specific failure in demonstrating the DtC.

3.18 The PPG at paragraph 12 sets out the information that is required within a SCG including:

"....*b) the extent of any unmet need within the strategic policy-making authority area(s); and*

1. d) *agreements (or disagreements) between strategic policy-making authorities about the extent to which these unmet needs are capable of being redistributed within the wider area covered by the statement.... "*

- 30 -

3.19 The SCG refers to the Planning Advisory Service (PAS) guidance[23] to Local Planning Authorities in 2019, to guide the scope and content of SCG and provide guidance on the material that should be prepared by Local Authorities, the key aspects are set out in Table 2 which assesses the level and nature to which the SCG has regard to the identified aspects:

Table 2

| **Key Element of SCG** | |
|---|---|
| A list of the planning authorities and any additional organisations that are signatories to the SCG. | |
| · A list of individual signatories; names and roles of planning authority's political leaders and the relevant representatives of other strategic organisations. | |
| · A list of the key strategic matters being covered, | |
| . A short description and map showing the geography that the SCG covers and brief justification of the area. | |
| · A description of the governance arrangements for cooperation and how the SCG will be kept up-to-date. | |
| · A list of the housing requirements in any adopted and emerging plans, if applicable to the key strategic matters. | |
| . An agreement of how housing need will be distributed across the area, including unmet need, or the process for agreeing the distribution across the area. | |
| . A list of agreements that have or have not been reached on | |

the key strategic matters and the activities undertaken to reach agreement. If no agreement has bee reached, the proposed process and date for reaching agreement, or how this has affected the relevar strategic issues and the content of the plan.

.

Any additional strategic matters that are deemed as required
in the SCG, such as a brief description how the SCG relates to any other SCG covering all or part of th same area.

3.20 In their overarching SCG, StADC have not fully addressed several key requirements, including:

- Not providing a plan of the SCG area.
- Failing to provide a description of governance arrangements.
- Omitting details on how agreement has been reached on housing need will be distributed across the area, including unmet need, or the process for agreeing the distribution across the area, not least acknowledging between the parties on the implications of dealing (in the future if not now) with the revised NPPF (2024) for the area (JSP area in particular).
- Lack of a list of agreements that have or have not been reached on the key strategic matters.
- Omission of detail of additional strategic matters that require a SCG.
- No details have been provided in relation to where Memorandums of Understanding (MoU) will be prepared.

3.21 No details on timescales, activities, or ongoing collaboration are provided. No details as to the extent of

activity that has taken place is provided in the form of meeting minutes, memorandums of understanding or more detailed SCG with individual authorities or bodies.

3.22 StADC's SCG indicates that:

"*No matters of disagreement between SADC and the Duty to Co-operate partners on the strategic geography or what comprises the strategic cross-boundary matters. "*

3.23 It is unclear whether there are any areas still in discussion, or where MoU's may be required, not least given

the recent draft NPPF (2024) which raises challenges on matters associated with:

- Unmet housing need.
- Draft NPPF (2024) standard method and implications for cross boundary working.
- Timescales and programme for plan making, review and coordination either within the JSP area or otherwise.

[2] [3] https://www.local.gov.uk/sites/default/files/documents/PAS`X20Statement`X20of`X20Common`X20Ground`X20Advice`X20and`X20Temp late.pdf

- 31 -

3.24 The SCG provides limited evidence as to how matters have been discussed or agreed and does not indicate

the matters that are (or have been) in dispute between the parties. There is no evidence to show that from any the discussions that have occurred, what work was needed to resolve any areas of conflict.

3.25 Turning to matters as set out in the 2012 Regulations in relation to the publication of a local plan:

"*19. Before submitting a local plan to the Secretary of State under section 20 of the Act, the local planning authority must—*

*(a)make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation35, and*

*(b)ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation18(1).”*[24]

3.26 Regulation 19 of the 2012 Regulations[25] goes on to state (so far as is material for these purposes) as set out

in Table 3:

Table 3 – Compliance with 2012 Regulations

| **2012 Regulations** | **Urbanissta Review of StADC Position** |
|---|---|
| *“Submission of documents and information to the Secretary of State: 22.*[26]*—* | |
| *(1) The documents prescribed for the purposes of section 20(3) of the Act are—* | |
| *(a)the sustainability appraisal report;* | Provided at Reg 19, |
| *(b)a submission policies map if the adoption of the local plan would result in changes to the adopted policies map;* | Provided at Reg 19, |
| *(c)a statement setting out—* | |
| *(i)which bodies and persons the local planning authority invited to make representations under regulation 18,* | No Statement provided for Full Council 16th October 2024. |
| *(ii)how those bodies and persons were invited to make representations under regulation 18,* | No Statement provided for Full Council 16th October 2024. |
| *(iii)a summary of the main issues raised by the representations made pursuant to regulation 18,* | No Statement provided for Full Council 16th October 2024. |
| *(iv)how any representations made pursuant to regulation 18 have been taken into account;* | No Statement/evidence provided for Full Council 16th October 2024. |
| *(v)if representations were made pursuant to regulation 20, the number of representations made and a summary of the main issues raised in those representations; and* | Required in response to consultation at Regulation 19 stage. It is unclear how this can adequately be done in current timeframes. |
| *(vi)if no representations were made in regulation 20, that no such representations were made;* | / |
| *(d)copies of any representations made in accordance with regulation 20; and* | / |
| *(e)such supporting documents as in the opinion of the local planning authority are relevant to the preparation of the local plan.* | These should also be published alongside the Regulation 19 Plan. |

3.27 Given that StADC determined at Full Council on the 16th October 2024[18] to submit their Regulation 19 Plan

for examination during the Reg.19 consultation period, it is unclear how due consideration can possibly have been taken to representations on the draft Plan when the consultation period has not concluded. This procedural error should be rectified prior to submission of the Plan. In summary, StADC needs to pause, reflect, review, and assess representations and fully advise members of the implications of such at the requisite Committees, before proceeding to Submission, thus ensuring that the Authority's legal obligations are met, and it can fulfil its requirements under the DtC.

3.28 Given the undue haste that StADC are working to, there appears to be no comprehensive details of certain

key aspects required for submission including:

- Omitting certain key aspects of the SCG as detailed above.

24 https://www.legislation.gov.uk/uksi/2012/767/regulation/19/made

25 https://www.legislation.gov.uk/uksi/2012/767/regulation/22/made

- Failure to take key documents to Full Council in advance of the intended Submission of the Plan on 2nd December 2024.
- Failure to provide an adequate DtC Statement.

3.29 The overarching SCG is not sufficiently evidenced and substantiated and fails in demonstrating that the DtC

has been effectively complied with. No details on actual cooperating and collaboration with surrounding LPA's on unmet housing needs for example, or other strategic issues highlighted.

3.30 Failings in the DtC cannot be rectified following Submission.

**Other Consideration's:** Local Development Scheme

3.31 The Regulation 19 Plan was being prepared in line with the updated Local Development Scheme (Sept 2024)[27]
(LDS) which has been amended to reflect the Councils current timetable for expediting Plan delivery following the publication of the draft NPPF (2024).

3.32 Officers have advised members that dealing with the draft NPPF (2024) implications will cause at least a 2 –

3 year's year delay to the draft Plan however we have no evidence as to any reasonable basis for justification of these proposed timescales, either in the LDS, the committee reports, or the draft Plan's evidence base.

3.33 StADC have been overt in their justification for expediting the plan making process and bringing forward the

Plan Submission by 4-5 months being motivated solely by a desire to unduly take advantage of the proposed transitional arrangements and to avoid and defer dealing with the implications of the new draft NPPF (2024).

3.34 As we detail above, StADC has identified a series of risks associated with expediting the draft Plan which

include potential risks associated with the DtC and, which also further bring into question the Plan's soundness.

Publication and Engagement

3.35 As detailed in Section 1.0 above, StADC published an SCI and undertook consultation to Regulation 18 and
now Regulation 19 stages of the Local Plan. It is of great concern that the Full Council resolved on the 16th October 2024, to Submit their Local Plan before the cessation of the Regulation 19 process and without any due regard to any representations made by third parties through consultation, ongoing until the 8th November 2024.

3.36 This cannot be meaningful l engagement or consultation as anticipated by the SCI and is also contrary to the

Gunning Principles for a fair consultation which requires, in summary, conscientious consideration of representations made before a decision Is made. We contend that the approach being undertaken is motivated by a desire to avoid difficult decisions and is in effect, pre-determining the outcome of proper consultation and engagement which is otherwise simply a tick-box exercise for StADC.

Sustainability Appraisal (SA) September 2024

3.37 We address fundamental concerns in respect of the DtC in relation to the SA in Section 7.0 below.

- Soundness

3.38 The requirements of paragraph 35 of NPPF (December 2023) are to ensure that a Local Plan is positively
prepared, justified effective and consistent with national policy as detailed above.

3.39 We set out in Sections 4.0 to 10.0 of these representations. matters of soundness in relation to the Regulation

19 Plan and its associated evidence base.

- Evidence Base

3.40 At 10.00am on the 26th September 20204 when the consultation launched, not all of the Council's evidence
was publicly available. When this error was noticed and advised to the Council, the following response was received:

"*Thank you for your email. I can confirm that all the evidence base supporting the Local Plan Regulation 19 Publication was uploaded on 26 September 2024. You are right that whilst most of it was uploaded by 10.00 am on the 26, because of the volume of material and our IT system capacity, it did take until the afternoon for some documents to arrive on the public facing page. "*

*27* https://www.stalbans.gov.uk/sites/default/files/attachments/SADC%20Local%20Development%20Scheme%20-%20Sep%202024%20-%20Final.pdf

- 33 -

3.41 At Regulation 18 stage we highlighted significant concerns about the quality and nature of the evidence base

to support the draft Plan. These concerns were reiterated by TTown Legal LLP in their letter to StADC on the 18th June 2024 on behalf of LIH.

Town Legal Letter & St Albans Response

1.1 Table 4 below extracts the key aspects of the Town Legal letter to St Albans District Council dated 18th June

2024 (column 1), StADC perfunctory response (13th September 20204) (Column 2) and a brief synopsis of the position as at the Regulation 19 Plan (column 3).

Table 4

| Town Legal Letter 18th June 2024 | St Albans response 13th September 2024 | LIH Position October 2024 |
|---|---|---|
| 1.8b) fundamentally unsound and<br>contrary to Paragraph 35 of the NPPF Does not seek to achieve sustainable development<br>Is not positively prepared or effective Fails to adequately account for acute unmet housing need<br>Not justified as reasonable alternative sites have been discounted incorrectly, unfairly and unjustifiably | Assertion not evidenced | We address in Regulation 19 Reps evidence |
| C - Exceptional circumstances | 1 & 2 Site has some benefits not enough for allocation<br>iii) LIH evidence is not credible | Allocations & omission sites have not been accurately or consistently appraised. |
| 3 – Duty to Co-operate | Statement of Compliance will be Submitted | No Statement of Compliance is available at Regulation 19. |
| 4 – Current Evidence Base | d) Local Housing Needs published at Regulation 19 stage<br>e) Site Selection Methodology - Reg 19<br>g) Viability Assessment - Reg 19<br>h) Landscape Assessment - Reg 19 | Local Housing Needs has been published with the Regulation 19 plan.<br>Viability Assessment provided. LVIA has only been undertaken of the draft allocated sites. No testing of alternatives has been evidenced. |
| 4.9 Interim SA fails to fully address reasonable alternatives | Disagree | SA reviewed at Regulation 19 – flawed. |
| 4.10 – Flaws in ISA | Disagree | SA reviewed at Regulation 19 |
| 4.11 – Housing Needs Assessment | Local Housing Needs published at Regulation 19 stage | Reviewed at Regulation 19 -lack of regard to unmet need in spatial strategy |
| 4.12 - Site Selection Methodology | Site Selection Methodology - Reg 19 | Reviewed at Regulation 19 - flawed. |
| 4.19 - Exceptional Circumstances | Green Belt Evidence Paper at<br>Regulation 19 stage | Reviewed at Regulation 19 |
| 5 - Housing Supply | No need to exceed Standard<br>method<br>Windfalls at Regulation 19 | WMS and draft NPPF (2024) not addressed.<br>Reviewed Regulation 19 |

| | | |
|---|---|---|
| | | Housing Evidence Paper - flawed. |
| | Evidence Paper on HLS at Regulation 19 | Reviewed at Regulation 19 - flawed. |
| 6 - IDP | Updated IDP at Regulation 19 | IDP reviewed at Regulation 19 Position in CIL unclear. |
| 7 - Site Vision and Exceptional Circumstances | Green Belt Review, Spatial Strategy in the Plan and the Sustainability Appraisal, the evidence does not support the allocation of the site. | All decisions predicated upon the GB review |
| 8 - Conclusion | As above<br>Polices to Support Rothamsted/LAT | Additional site allocations included without consultation with LAT. |

3.42 It is evident from the Table 4 that there are still substantial and comprehensive concerns about the legal robustness of the evidence base supporting the draft Plan at Regulation 18 stage and we turn to examine below the position in relation to the Regulation 19 Plan.

- 35 -

3.46 In addition to the elements that have been omitted we explore in Sections 4.0 to 10.0 the qualitative aspects

of the evidence base evidence base as it pertains to soundness.

Procedure Guide for Local Plan Examinations (9th Edition) 29

3.47 The Procedure Guide for Local Plan Examinations (9th Edition) (Procedure Guide) was updated in updated
28th August 2024. We set out the basis of the Government's guidance on Local Plan examinations drawing particular emphasis on certain key aspects we consider pertinent to the Regulation 19 Plan in moving towards submission and highlight key considerations which appear to have been overlooked or ignored which in our opinion undermine the soundness of the Plan.

3.48 Section 1: Before submission the guidance outlines that:

"*paragraph 1.2 - Having considered the Regulation 19 consultation responses, the LPA should only submit a plan if they consider it to be sound and there will not be delays of over 6 months during the examination because significant changes or further evidence work are required. It must not be assumed that examinations can always rectify significant soundness or legal compliance problems, which would require more than limited additional work to address. Before submission, the LPA must do all it can to resolve any substantive concerns about the soundness or legal compliance of the plan, including any raised by statutory undertakers and government agencies. Particular attention should be given to the DtC. Statements of Common Ground can be very helpful in this regard."*

*Underline Urbanissta emphasis*

3.49 Several key issues here include:

- Comprehensively reviewing Regulation 19 representations –*as detailed above officers suggest they will have 'read' representations but perhaps done little more at Submission*.
- We identify a range of significant areas where further work or evidence are required.
- The LPA need to seek to resolve substantive concerns, which StADC should be able to demonstrate at the time of Submission.

3.50 Adequacy of the evidence base is addressed at paragraph 1.10:

*"1.10. The purpose of the evidence base is to support and justify what is in the plan. Before preparing or commissioning evidence, therefore, the LPA should be very clear about what they need it for, how they are going to use it and how much detail they need to go into. They must explain what conclusions they have come to from the evidence and how the choices they have made are based on it. It is often useful to prepare topic papers for this purpose. The plan should avoid assertions of fact that are not supported by evidence. Nor should evidence be collected retrospectively in an attempt to justify pre-conceived conclusions."*

*Underline Urbanissta emphasis*

3.51 Several key issues here include (in summary):

- StADC have not set out the conclusions that have been arrived at for evidence clearly and the choices they have made upon, in fact they appear to have used their evidence base to justify a particular outcome to substantiate their position. We highlight concerns in this regard in relation to the Sustainability Appraisal (SA) and Infrastructure Development Plan (IDP).
- The SA and IDP (2023 & 2024) seems to justify preconceived conclusions, and limited evidence has been prepared to demonstrate otherwise.
- Part A, Part B and the Housing Evidence Paper (2024) to the Local Plan do not correlate numerically.
- Significant changes have been made to the draft Plan's Trajectory (2024) assumptions and rationale without proper explanation.
- The Green Belt Review (2023), SA and IDP (2024) we identify are technically flawed and have been prepared with a pre-determined objective in mind.

3.52 Paragraph 1.11 states:

*"1.11. ..... Plans which allocate sites for development will need to be supported by evidence demonstrating that the LPA has followed a logical and consistent method to identify and select the allocated sites, and to reject alternatives. "*

*Underline Urbanissta emphasis*

3.53 As set out in the Green Belt Review (Section 6.0) and Appendix 3 to these representations, this shows that the

approach to the Regulation 19 Plan's preparation assessment of constraints – or opportunities arising from development - have not been applied consistently.

29 https://www.gov.uk/government/publications/examining-local-plans-procedural-practice/procedure-guide-for-local-plan-examinations#section-1-before-submission

3.54 In addition, the speed and blinkered approach to the progression of the draft Plan has led to errors in

evidence, as well as misleading members on the implications and risks associated with the prevailing changes in national policy.

3.55 Paragraph 1.15 of the Procedure Guide states:

"*1.15.... statement of compliance with the duty... The statement of compliance should identify any relevant strategic matters and how they have been resolved – or if they have not, why not. It should detail who the LPA has co-operated with and on which strategic matter(s), the nature and timing of the co-operation (e.g. by including meeting notes), and the outcomes of the co-operation, including how it has influenced the plan. As part of this process, NPPF paragraph 27 advises that the LPA should prepare one or more statements of common ground with relevant bodies. The PPG on Plan-making contains guidance on preparing such statements. "*

*Underline Urbanissta emphasis*

3.56 StADC have not prepared or published a statement of compliance and the current overarching SCG is

inadequate for the following reasons which are, in summary:

- It fails to provide sufficient detail on the nature and extent of engagement with partners
- Offers no details on the timing of such cooperation.
- Provides no detail as to how the draft Plan has been influenced by such engagement

3.57 Paragraph 1.16 continues...:

*"1.16. The Inspector will need to be satisfied that the LPA has met the duty to co-operate by engaging with neighbouring authorities and other bodies constructively, actively and on an ongoing basis, in order to maximise the effectiveness of the plan preparation process (See PCPA, section 33A and Regulation 4 which define the duty to co-operate and the bodies with which the LPA is required to co-operate). "*

3.58 StADC have not evidenced that the interactions that have taken place have been constructive, active, and

ongoing in either the overarching SCG or other draft Plan evidence base material.

3.59 Prescribed documents are addressed at paragraph 1.18 of the Procedure Guide 9th Edition:

"*1.18. It is well worth the LPA investing time in producing a focussed and comprehensive statement of the main issues raised in the representations made in response to consultation at Regulation 19 stage. This will help the Inspector gain an early understanding of issues that are likely to need addressing in the examination. While not a legal requirement, it will also be very helpful to the Inspector if the LPA provides brief responses to the main issues, it has identified and to any substantial concerns about soundness or legal compliance raised in the representations. The Planning Advisory Service provide a helpful advice note and template on their website. "*

*Underline Urbanissta emphasis*

3.60 Given the proposed draft Plan acclerated submission timescales, it is hard to see how StADC will be able to

*produce "a focussed and comprehensive statement of the main issues raised in the representations made in response to consultation at Regulation 19 stage."*Indeed, officers have already indicated to members that this will be lacking given the timescales associated around the Plan as detailed in Section 2.0 above.

3.61 Finally, Paragraph 1.24 of the Procedure Guide 9th Edition states:

*"1.24. Before submission, the LPA may find it helpful to carry out a self-assessment of the soundness and legal compliance of the plan, although this is not compulsory. The Planning Advisory Service's website provides comprehensive advice to help ensure the plan is robust. This includes their Local Plan Route Mapper and Toolkit. The Planning Inspectorate also provides 'advisory visits' which LPAs are encouraged to request during plan preparation. These are informal discussions chaired by an experienced Inspector on a without prejudice basis. Their aim is to*

*assist LPAs to prepare effectively for the examination process. In the interests of impartiality, Inspectors who conduct advisory visits on a plan would not be subsequently appointed to examine it. "*

*Underline Urbanissta emphasis*

3.62 Given StADC's significant issues of compliance to date with two failed local plans behind it focussed upon

the DtC and lack of soundness, it is considered that such a self-assessment should be undertaken prior to submission. No such assessment has been undertaken to date.

3.63 Section 2: Submission

*"2.2. It is of paramount importance that the Programme Officer [POI is in post by the time the plan is submitted."*

*"2.4. It is also vital that an examination website has been set up by the time of submission. "*

3.64 There is no evidence to suggest that StADC has a programme officer in post, or an examination website set

up.

3.65 Officers have indicated [9/15] that their efforts to cooperate with neighbouring authorities (Dacorum) have been

exemplar. It is unclear to what degree any collaboration has taken place with other surrounding local authorities such as those part of to the 2017 high court challenge which StADC lost in 2017[6] and/or with neighbouring authorities within the JSP.

3.66 StADC has provided limited or no details as to the way cooperation within the JSP area has taken place,

including, Hertsmere, Three Rivers, Watford, or more widely, with Welwyn Hatfield, Hertfordshire County Council, Central Bedfordshire, and North Hertfordshire. No evidence to indicate what if anything has been undertaken with surrounding authorities has been provided.

3.67 It is therefore wholly misleading and unsubstantiated for officers to suggest to members that StADC approach

is exemplar. On the contrary, the SCG and evidence base are lacking in many respects. It is hard to see how the requirements of paragraph 26 and 27 of the NPPF (2023) or 26, 27 and 28 draft NPPF (2024) can or have been complied with.

3.68 Once again, StADC is simply progressing with its own flawed agenda with limited If any regard to the

prevailing wider national or local planning environment.

3.69 In Sections 4.0 to 10.0 we now look at matters of soundness in relation of aspects of the evidence base.

- Section 4.0 – Housing Supply & Allocations
- Section 5.0 – Affordability & Unmet Need
- Section 6.0 – Green Belt
- Section 7.0 – Sustainability Appraisal
- Section 8.0 – Transport/Settlement Hierarchy
- Section 9.0 – Infrastructure Delivery Plan
- Section 10.0 - Exceptional Circumstances

3.70 We examine in turn if the various matters have been positively prepared; are justified, effective and are consistent with national policy and as such determine whether the Regulation 19 Plan can possibly be considered sound.

**8.0 Spatial Strategy & Settlement Hierarchy**

- Spatial Strategy

8.1 We set out below the latest available population data regarding the Tiers of settlement as defined in

Table 1.3, Figure 1.2, and Policy SP 1 of Part A of the Draft Plan.

8.2 Populations

Tier 1 – City/Large Town

- **Hemel Hempstead** - 95,961 Population Census 2021-03-21
  Population Density [2021] 0.89%
- **St Albans** - 75,537 Population Census 2021-03-21
  Population Density [2021] 0.63%

Tier 2 - Town

- **Harpenden** - 30,966 Population Census 2021-03-21
  Population Density [2021] 0.37%

Tier 3 - Small Town

- **London Colney** - 7,932 Population Census 2021-03-21
  Population Density [2021] 0.29%

Tier 4 - Medium Sized Village

- **Redbourn** - 5,453 Population Census 2021-03-21
  Population Density [2021] 0.20%
- **Wheathampstead** - 4,527 Population Census 2021-03-21
  Population Density [2021] 0.46%

8.3 We note that in looking at the way land use allocations have been made and the way the land at NE

Redbourn has been assessed that Tier 3 – Small Towns – London Colney.

8.4 It should be noted that an inconsistent application of constraints has been applied to Redbourn as,

London Colney does not:

- have a secondary school.
- have a train station, with St Albans Station being some 3.1 miles away.

8.5 With regards to Tier 4 settlements, Redbourn is acknowledged to have a functional relationship with

Harpenden (and station) which is located some 3.3 miles to Harpenden Station.

8.6 Table 6.1 Centre Hierarchy (Part A Local Plan sets out the following hierarchy:

- City centre - St Albans City Centre
- Town centre - Harpenden Town Centre
- District centres (Small towns, villages and large suburban) - London Colney, Fleetville (St Albans), The Quadrant, Marshalswick (St Albans), Verulam Estate (St Albans), Southdown (Harpenden), Redbourn, Wheathampstead.

- Local centres within Broad Locations
- Local centres

8.7 It is pertinent to note that Redbourn and London Colney are in the settlement hierarchy here, which is

inconsistent with the hierarchy set out in Table 1.3 of Part A of the Plan.

- Transport

8.8 We have assessed whether the draft Plan's approach on movement and infrastructure are justified,

effective, consistent with national policy and positively prepared and, as such, firstly review the framework provided by Hertfordshire's Local Transport Plan 4 (2018-2031), specifically Policies 1 and 2 which state that:

*Policy 1: Transport User Hierarchy*

*"To support the creation of built environments that encourage greater and safer use of sustainable transport modes, the county council will in the design of any scheme and development of any transport strategy consider in the following order:*

- *Opportunities to reduce travel demand and the need to travel.*
- *Vulnerable road user needs (such as pedestrians and cyclists).*
- *Passenger transport user needs.*
- *Powered two-wheeler (mopeds and motorbikes) user needs.*
- *Other motor vehicle user needs. "*

*Policy 2: Influencing land use planning*

*"The county council will encourage the location of new development in areas served by, or with the potential to be served by, high quality passenger transport facilities so they can form a real alternative to the car, and where key services can be accessed by walking and cycling. "*

8.9 In assessing the Council's site selection methodology and approach to site allocation the several

inconsistencies in approach and evidence have been identified which undermine the draft Plans' justification and effectiveness.

8.10 A demonstration of the inconsistencies in approach to allocation and omission site selection and the

Council's methodology, culminating in the site allocations as defined in draft Policies SP1, SP3 and Table3. 1 and 3.2 of the draft Plan Part A as well as Part B Local Plan Table A1.1 and Site allocations, is addressed below.

West Redbourn (Site B3)

8.11 The closest bus stops to this site are located "7 minutes walk", equating to circa 560m at 80 metres per
minute. Based on a review of the area, we assume that the stops in question are the Church End stops on Hemel Hempstead Road. This would put the stops at circa 550m from the closest corner of the site and therefore the walking distance for future residents would be greater.

8.12 Hertfordshire County Council's Place and Movement Design Guidance states that "*A minimum service*

*provision level of 4 buses per hour peak / 2 buses per hour off peak (06:30 to 22:00) is considered as appropriate for most development with the walking distance to bus stops being no longer than 400m*".

8.13 In this context, the entire site is beyond the acceptable walking distance as set out in HCC's latest

guidance. It is unclear whether the proposed allocation would divert or provide a new service, in the context of the scale and of the proposed allocation (circa 600 dwellings) and the routing of existing services/the local highway network, it is unlikely that a diversion could be agreed with a local bus operator. In particular, a bus services onto Lybury Lane or Flamsteadburry Lane would likely be inappropriate for buses considering the width is limited.

8.14 Should a standalone service come forward as part of the proposals, the frequency is likely to be low due

to the journey length likely required to make the route attractive (i.e. a service to Hemel Hempstead or Harpenden Town Centres) and the associated cost per bus per annum. Assuming a new route is provided to Hemel Hempstead, the journey time to the town centre would be circa 20-30 minutes (subject to the quantum of stops provided), which would result in an hourly service. We do not consider this to be adequate to make public transport an attractive modal choice.

8.15 It is noted that bus stops are provided along the North East Redbourn site's southern and western

boundaries, which results in a considerable area of the site being within 400m walking distance of a bus stop without the need for new or diverted services. This is particularly important when bus is cited as having potential for longer journeys.

8.16 The site B3 is located 17 minutes (1,360m) from Redbourn District Centre and 12 minutes from the

closest primary school (960m) where the majority of services and amenities are located for the village. In this context it is unclear how the site encourages the use of active modes of travel instead of the car (noting LTP4 policy 1 above).

8.17 The Appendix 1 Transport evidence on Redbourn[42] states that the roads in the area are "*relatively wide*"

with many "*high quality footways*" which we disagree with, particularly when looking at the pedestrian routes towards with village centre. North Common has narrow unlit footways with limited tactile paving. It is unclear if a scheme in relation to site B3 has been proposed to mitigate against this. Similarly, it is stated that an LTP compliant access for all moves is deliverable, but this seems to ignore some of the existing constraints.

*42 Appendix 1 2024 REDBOURN MERGED*

8.18 It is welcome that the Comet model (the County Council's strategic model) has found no showstoppers

given that this would impact upon the deliverability of the North East Redbourn site as well.

South of Harpenden Lane (M6)

8.19 Overall, site M6 appears to be better located than the site B3. Most services and amenities are closer,
except for the primary school which is 14 minutes (1.1km) away.

8.20 The text in relation to site M6 also appears to be very similar to West Redbourn which doesn't seem

appropriate given the differences between the two locations for pedestrian/ cycle access. Perhaps this is an error in the assessment.

8.21 The NE Redbourn site is well located to support Redbourn's existing services and amenities (including

local bus stops within circa 400m of each dwelling as per the latest HCC guidance) and can deliver an access that accords with both LTP4 and HCC's Place and Movement Design Guidance.

8.22 The aspects of the NE Redbourn site's credentials have been overlooked in both the site selection methodology, SA (2024) and IDP (2024) and the inconsistent application to site selection is evident. The draft Plan's evidence base is clearly not fully justified or effectively evidenced and should be review ed in advance of the Plan being submitted.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

2.105 The required changes to the draft Plan are procedural in nature and include:

- Due process should be following prior to submission of the Regulation 19 Plan.
- Accurate and comprehensive evidence should be provided to members of both PPC and Full Council on the options, costs, and timescale implications available to them of pursuing different courses of action regarding the Regulation 19 Plan, following the draft NPPF consultation in 2024.
- Ensure the PPC and Full Council have not been misled on key matters pertaining to the draft Plan. Full Council consideration of Regulation 19 which should be informed by comprehensive review of representations, after the consultation period has concluded.
- The Council constitution should be appropriately followed, and Full Council consider the draft Plan and associated representations in full prior to submission of the Plan.

*20* https://democracy.dacorum.gov.uk/documents/s44436/2024_10_01%20Scrutiny%20Report_Local%20Plan%20Reg19.pdf

*21* https://democracy.dacorum.gov.uk/documents/s44438/Appendix%20B_LDS%20Update%20-%20October2024_Approvals.pdf

- Transitional Arrangements of the draft NPPF (2024) are material considerations – however so are the wider aspects of the Autumn Budget 2024, WMS[1] and draft NPPF (2024). The Regulation 19 Plan should be reviewed more comprehensively considering these matters.
- The Governments' objective of 'turbocharging' housing delivery should be central to the:
- Spatial strategy (Draft Policy SP1, Table 1.3 and Figure 1.2) and, as such, additional allocations including the Site are required.
- The housing aspects of the Plan Table 3.1 and 3.2 of Part A of the draft Local Plan should be updated and amended to reflect these themes.
- Part B of the draft Local Plan Table A1.1 and Sites H 1 – H4; B1 – B8; M2 – M23; P1. – P3; U2 – U4; UC1 – UC57 should be reviewed, amended, and supplemented for the reasons addressed subsequently in these representations in order to achieve sustainable development.
- The Trajectory at Table 3.2 of Part A of the Plan should be substantially revisited to include additional allocations such as the land at NE Redbourn, to address the identified shortfalls in supply.
- With regards to the SCG, further details on the manner, means and processes of engagement with the JSP authorities as well as the representative bodies is essential to determine whether the DtC has been properly complied with.
- Further details as to the 'exemplar' way engagement with Dacorum has taken place.

3.71 Changes to the draft Plan in this regard are procedural and include:

- Evidence surrounding the DtC requires supplementing to show constructive, active, and ongoing co-operation.
- Statement of compliance to be prepared prior to Submission.
- Procedural concerns regarding Full Council consideration of Regulation 19 should be informed by comprehensive review of representations to draft Plan (and not pre-determined).
- Part A, Part B and evidence base to draft Plan should be brought in line and errors and inconsistencies amended.
- Self-Assessment of their legal compliance, given the Council's previous track record of failures in soundness and DtC.
- The overarching SCG is lacking and requires supplementing as detailed in these representations.
- SCG should detail on timescales, activities, constructive, active, and ongoing collaboration is demonstrated.
- Additional MOUs should be included as part of the submission material to substantiate StADC's position.
- Undertake due process with Full Council being able to consider all representations received (adequately) at Regulation 19 stage.
- Evidence base should be supplemented as detailed in these representations.
- Errors in decision making should be regularised.

8.23 Changes required to make the spatial strategy of the draft Plan sound, include (in summary):

- The spatial strategy should be amended to reflect the housing land supply and unmet need failing that have been identified. Additional allocations (Part A and Part B of the draft Plan) should be made to address the deficiencies in supply that arise.
- Table 1.3, Figure 1.2 and Policy SP 1 should be reviewed and revised based upon the procedural and housing supply anomalies identified within these representations, to make good the shortfalls anticipated.
- Consistent application of transportation assessment across omission and draft site allocations should be addressed and the Plan and associated allocations in Part a and Part B of the draft Plan amended accordingly.
- The transportation constraints and opportunities of site identified in Part A and Part B of the draft Plan (B3 and M6) have not been undertaken on a consistent or policy compliant manner.
- Sites B3 and M6 should be removed from the draft Plan as allocations due to their respective constraints and land at NE Redbourn site allocated given is availability, deliverability and sustainability credentials which would be of benefit to both Redbourn and Rothamsted Research.

**Number:**

Site B2 North East Harpenden

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Our clients land is proposed as part of the Broad Location Site B2 shown in the Regulation 19 Plan Our clients support this allocation subject to the qualification/caveat below.

Is the Plan justified ?

Whilst the Site B2 north-east Harpenden remains as part of the Local Plan allocation through to its Adoption. our clients will work together with the other land interests in the delivery of a comprehensive scheme Having regard to the recommendations of the Arup Green Belt Study there is a "planning balance" to be drawn between the benefits derived from the wider scheme which includes the provision of a two-form entry primary school, care home, neighbourhood centre and sports facilities against the Green Belt impacts identified in the ARUP Green Belt Study in relation to the whole allocation ( SA 24) which was not recommended That planning balance is a matter for others to decide and our clients make no judgement on this point but recognise the benefits which will accrue from the wider allocation.

The M E Simons land and most of the Wimms land, together with land to the south known as Sauncey View Lodge was separately identified in the ARUP Green Belt study as RC-3 and recommended for further consideration.

It is reasonable that our clients land could either deliver an independent scheme or as a phase of development within the wider strategic location In Appendix 2 we have shown how an access can be delivered off Common Lane which serves our clients land and to provide a link to the north The development of our client's land as a phase would not be prejudicial to the strategic allocation, in fact quite the reverse. It is complimentary and provides benefits which could enable the faster delivery of housing. A development of our client's land would be designed so that it overlaps and integrates with a wider Masterplan. As part of the Broad Location, contributions would be made towards the key development requirements education, community and sporting facilities via Section 106 obligations.

Sustainability

The site is in a sustainable location, adjoins the settlement edge of Harpenden and is in close proximity to education facilities of nursery, primary, junior and secondary schools, bus transport links. local facilities of shops. pubs, petrol filing station and employment areas.

Key Development Requirements

As part of the wider allocation it is envisaged that there would be an indicative overarching Masterplan (attached as Appendix 3 is the latest iteration of the Master Plan where clients land edged in bold red). There have been joint meetings with the representatives of the respective interests comprising Crest Nicholson. Miller Homes, Octagon Homes, [redacted](the owners of Sauncey Lodge) and our clients regarding this Master Plan and the earlier iterations. There is nothing which the parties have discussed in respect of the overarching indicative Masterplan which would prevent a phasing of the development.

Statement of Common Ground

Pursuant to the delivery of Site B2 allocation, the owners have agreed a Statement of Common Ground with St Albans Council, on a without prejudice basis. The agreed common ground is that the Council and the owners generally support what is set out in the Local Plan Part A and the Local Plan Part B, including subject to the alterations indicated above the key development requirements for Site B2.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Changes to the Plan**

As part of the proposed B2 allocation the key development requirements should make provision for a phasing of the development in accordance with a Masterplan approved by the parties and the Council.

In the event the 82 allocation in *its* present form is not accepted, then our clients land identified in the Green Belt Study as RC -3 should be nevertheless shown as a Green Belt release for housing.

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

**Local Plan Process**

As mentioned above in our Introduction we have significant concerns over the Council's decision to suddenly speed up the preparation of the Local Plan following the Government's consultation on a draft NPPF and related transitional arrangements. The Council's Planning Policy & Climate (PP&C) Committee has scrutinised the plan across two committee meetings, but it has not been scrutinised by full Council. The local members and local community will feel that the Council have not followed due process when making decisions on progressing the Plan.

Furthermore, a full Council meeting was held on 17th October 2024, halfway through the consultation period to ratify the PP&C Committee's decision to publish the draft Local Plan for this Regulation 19 consultation. The decision by full Council to ratify the Planning Policy & Climate Committees decision has no weight due to the fact that the consultation had already began.

At the full Council meeting on 17 October the Local Plan was also approved for submission to the Secretary of State, even though significant risks were highlighted in relation to the Plan being found unsound at Examination. Members were advised that if the Plan was to be found unsound, due to a lack of evidence available to properly apply the test of soundness, then a revised Plan would need to be prepared. The new Plan would need to plan for a significantly higher level of growth as a result of the updates to the Standard Method, which could amount to a 75% increase in housing need across the District.

This raises the question, why doesn't the Council delay the regulation 19 consultation on the draft Local Plan and prepare a Plan that allocates sufficient land to accommodate this new growth. This is in the light of the 16.8% unaffordability ratio and severe housing shortage, the lack of strategic planning since 1993 and that the Sustainability Appraisal concludes that a higher housing target can be accommodated without significant adverse impacts.

Finally, the approach to plan preparation post-Reg 19 consultation presents a concern that representations made to this consultation will not be fully considered due to the accelerated timetable. The Plan is being considered for Submission by the PP&C Committee just 20 days after the close of the Reg 19 consultation. It has already been decided that it will then be formally submitted for Examination on 2nd December 2024. This is insufficient time for the Council to digest all of the representations made during the Reg 19 consultation and to consider if there are overwhelming 'showstoppers' or other significant concerns before the Plan is progressed.

Duty to Cooperate

It has been highlighted in documents provided to full Council that the accelerated timescale to Submission means that there will be less time to undertake the work to support

Submission of the Plan at Examination, which raises the risk of the Plan being found unsound and the Plan having to be withdrawn.

One of the risks that has been highlighted in the Committee Report[1], taken to the Planning Policy & Climate Committee on the 24th September, is that there will be '*fewer agreed and signed Statements of Common Ground to assist the inspector*' in determining whether the plan is '*sound',* in accordance with the tests set out in paragraph 35 of the NPPF. Without agreed and signed SoCGs the Inspector will not be able to determine if the plan is '*positively prepared*' and '*effective*'.

This is an extremely risky strategy particularly in the light of the failure of this Council's previous attempts to adopt a Local Plan. In both instances the Inspectors have found the plans 'unsound' due to the lack of evidence of effective cooperation with neighbouring authorities.

The Council has published an Overarching Statement of Common Ground with this consultation, which summarises the cross-boundary issues but does not specify where parties agreed or disagree and ultimately how issues will be addressed moving forward. This is particularly important in relation to unmet need from neighbouring authorities, which is a point of discussion in the Sustainability Appraisal. It is highlighted that there is likely to be unmet need arising from Dacorum Borough Council, Welwyn Hatfield District Council, Watford City Council, Three Rivers District Council and Hertsmere Borough Council.

With the preparation of the South West Hertfordshire Joint Spatial Plan (JSP) coming forward slower than expected, and now lagging behind the St Albans Local Plan, it will not be adopted in time for this Plan to align with the JSP emerging strategy. Further DtC information will need to be submitted at Examination to confirm that appropriate cooperation has taken place on cross boundary matters in the absence of the JSP.

Local Plan Intervention

We have considerable concerns about the soundness of the Reg 19 Local Plan and given housing minister Matthew Pennycook's letter to the chief executive of the Planning Inspectorate (PINS)[2] stating that "pragmatism should not be used to address fundamental issues with the soundness of a plan, which would be likely to require pausing or delaying the examination process for more than six months overall" and the recent experience at North Lincolnshire and Elmbridge Local Plan examinations, it would be more expeditious to devise a robust Local Plan now.

South West Hertfordshire Joint Strategic Plan (JSP) and other Hertfordshire Local Plans

The St Albans Local Plan is being prepared in advance of the South West Hertfordshire Joint Strategic Plan as the JSP delivery has been delayed. The work on the JSP gave the platform to effectively cooperative on strategic matters such as unmet housing need within the SW Hertfordshire region. This would have provided the evidence to justify the effective cooperation with neighbouring authorities and therefore discharge the duty to cooperate, overcoming the issues that have held up previous iterations of the Plan at Examination.

Due to the acceleration of the timetable for St Albans the local plans in neighbouring authorities will be at different stages of the plan-making process. Therefore, making discussions about unmet need more challenging as plan periods and evidence will not align. On 17th October, Three Rivers District Council[3] made the decision to pause with the progress of its local plan, to take account of the proposed revisions to the standard method and increased housing targets proposed by the Government in the draft NPPF. There was also a recognition that the Council was proposing a severely reduced housing requirement, which would result in unmet need within the District and ultimately lead to the plan being found 'unsound' at Examination. The Three Rivers local plan is now going to be prepared under the new system with increased housing targets.

This raises concerns that there will be unmet need from Three Rivers District Council, which the St Albans Local Plan 2041 is unable to address or adequately consider, due to its hurried preparation.

In a full Council meeting on 15th October 2024, Dacorum Borough Council decided to move forward with the preparation of its Local Plan and undertake a Regulation 19 consultation starting on 4th November 2024. The published Sustainability Appraisal[4] outlines that the Council's preferred spatial strategy is to plan for its Local Housing Need (LHN) in full. There is, however, a similar discussion related to a justification for a higher growth scenario, given the unmet need arising from elsewhere in the region. There is a consistent recognition that there will be unmet housing needs in the SW Hertfordshire sub-region, which should be addressed through the effective cooperation of neighbouring authorities. The evidence of effective cooperation is however missing from both the Dacorum and St Albans Local Plan consultation documents.

Hertsmere Borough Council conducted a Regulation 18 consultation on their draft local plan in Aril 2024 and the Council has not yet decided on the timetable for the next stage of the preparation of its local plan. The Local Development Scheme[5] states that a Regulation 19 consultation will be conducted in November and December of 2024, with submission in June 2025.

We draw attention to the programmes for other Plans in Hertfordshire to emphasise how the hurried preparation of the St Albans Plan will not promote a co-ordinated approach to Planning for Housing across the County. It also ignores and undermines the purpose of preparing a SW Herts JSP and is contrary to the interests of strategic planning and of achieving an effective and meaningful Duty to Cooperate.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Please see attached representation.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

4. SW Herts JSP_Windridge Farm_Vision Document_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**General comments**

Stonebond have noted that the at its full Council meeting on October 16th SADC gave approval to submit the Local Plan for examination. This is three weeks prior to the end of the consultation period on the 8th of November. Stonebond have a concern that approval has been given with no consideration of any comments that have been made through the consultation. Whist the committee report sets out that should a show-stopper emerge from the consultation then the decision will return to full Council, Stonebond consider that it is for all members of the Council to properly consider the comments made and make their own determinations on this matter and the soundness of the Local Plan before making a decision to vote for its submission. The decision suggests that SADC will submit the Local Plan for examination regardless of the comments made by representors and as such have predetermined the outcome of the Reg 19 consultation. The approach taken by SADC to effectively beat the transitional arrangements under the new NPPF, consulted on earlier in the year, therefore runs a high risk of legal challenge and Stonebond consider the decision to submit should be made once the consultation has ended and the responses made can be reported to all members of the Council.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 203 - Hertfordshire Constabulary

Submission Number: 203 Submission Date: 07/11/24 17:06

### Number:

1.2

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

**Response to Table 1.2**

**Object**

**Plan is not positively prepared**

Hertfordshire Constabulary have reviewed the Local Plan and are of the view that not enough consideration has been given to the impact growth could have on emergency services.

We have looked through the plan and note the significant increase in households proposed in St Albans. Over the next 16.5 years 14,603 additional homes are to be built, with the largest concentration being adjacent to Hemel Hempstead, in Harpenden, St Albans and London Colney. Taking an average of 2.5 people per household, this could see an increase of 36,507 in the population of the St Albans district.

The 2021 census showed a population of 148,200, although this increased by approximately 7,500 people (5.4%) from 2011. The estimated increase in population by 36,507, based on the proposed developments in the Local Plan is a 24.6% increase.

It is therefore essential that that the new Local Plan recognises the impact this could have on emergency servicing. We therefore request that Table 1.2 is amended to take account of the following:

**Infrastructure- Safety & Security** Emergency Services needs to be referred to as safety and security of the district will be compromised if they are not included.

With a 24.6% increase in population, both fire and police services will be significantly under resourced.

**Healthy Places and High Quality Design**– Need to mention safe and secure within the design requirements – The Police can provide security and design advice for safer neighbourhoods.

Unless amendments are made, Hertfordshire Constabulary are of the view that the plan cannot be found sound as it has not been positively prepared in accordance with paragraph 35 of the NPPF (2023).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We request that Table 1.2 is amended to take account of the following:

**Infrastructure- Safety & Security** Emergency Services needs to be referred to as safety and security of the district will be compromised if they are not included. With a 24.6% increase in population, both fire and police services will be significantly under resourced.

**Healthy Places and High Quality Design**– Need to mention safe and secure within the design requirements – The Police can provide security and design advice for safer neighbourhoods.

Reason:

Unless amendments are made, Hertfordshire Constabulary are of the view that the plan cannot be found sound as it has not been positively prepared in accordance with paragraph 35 of the NPPF (2023).

## 222 - Martin Grant Homes and Kearns Land Ltd

Submission Number: 222 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Marrons Name: David Pendle

On Behalf Of Company/Organisation: C/O Marrons Name: Martin Grant Homes and Kearns Land Ltd

Comment Number: 1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

3.1. The Local Plan 2041 establishes the Council's long term spatial planning strategy for delivering and managing development and infrastructure, and for environmental protection and enhancement across the emerging plan period. Upon adoption the Local Plan 2041 will supersede the District Local Plan Review 1994.

**Vision**

3.2. The plan contains a succinct Vision for the District through to 2041 alongside a number of supporting objectives. These objectives include, inter alia:

- Provide a sufficient amount of good quality housing which meets the needs of all sections of society in sustainable locations;
- Make sufficient provision for and access to community infrastructure in sustainable locations; and
- Promote active, healthy and sustainable communities and a high quality of life.

3.3. We are broadly supportive of the local plan objectives and it is positive that the needs of all sections of society are being appropriately considered in respect of good quality housing.

3.4. The Spatial Strategy remains shaped by the need to address the Climate Emergency and a part of that is generally concentrating new development on the basis of the Settlement Hierarchy. The Council's approach gives priority to the larger urban centres which can provide a greater range of services and facilities to reduce the need to travel.

**Settlement Hierarchy**

3.5. The draft Settlement Hierarchy contains 7 tiers with St Albans and an expanded Hemel Hempstead recognised as principal settlements (the first tier). Redbourn is categorised as a 'Large Village' (the fourth tier). These settlements are recognised as 'relatively self-contained settlements with provision of key services and employment sites' and Redbourn itself is clearly a sustainable location.

3.6. The Settlement Hierarchy correctly recognises that there are functional relationships with adjacent settlements including Harpenden, a Tier 2 settlement and 'Town', which

supplements the available services within Redbourn itself. Furthermore, Redbourn is also located in close proximity to the key settlements of St Albans and Hemel Hempstead with multiple bus services between Redbourn and these settlements. Overall, we remain in broad agreement with the settlement hierarchy and the categorisation of Redbourn.

## 223 - Oaklands College and Taylor Wimpey

Submission Number: 223 Submission Date: 07/11/24 18:34

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Oaklands College and Taylor Wimpey Name:

Comment Number: 1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

See attached representations for full submission.

### 1 Introduction

This document contains representations prepared by Stantec UK Limited, on behalf of Oaklands College and Taylor Wimpey, in response to the contents of the Regulation 19 Publication Draft St Albans Local Plan and its associated evidence base documents.

These representations follow the representations previously submitted by VRG Planning Ltd on 22nd September 2023 in response to the Regulation 18 Consultation Draft Local Plan.

Oaklands College and Taylor Wimpey are generally very supportive of the draft Local Plan.

**Scope of Representations**

These representations:

- Provide a context for the long-term future of the Oakland College masterplan (see Section 2);

- Are submitted in **support** of the draft Local Plan, however, they also include a technical objection to the indicative housing capacity indicated in Site Allocation B4 (East St Albans) and to other policies; and
- Set out suggested amendments which can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public (EiP).

We trust these representations are helpful and if you require clarification on any of the matters raised, please do not hesitate to get in contact.

## 2 Background Context

Oaklands College carries out a vital economic and social role that should be fully taken into consideration in preparing the Draft Local Plan. It is a significant employer in its own right, employing over 1,000 people directly. The College also provides enhanced training provision for local people in a wide range of trades and professions, supporting their learning and development and helping to improve the skills base of the local workforce.

The Oaklands College site is the only strategic site where all the receipts from the sale of the residential land will be re-invested in community infrastructure. All the receipts would be used to contribute towards improvements to the College's facilities. These facilities represent not only an important education resource, but also a community resource to St Albans.

The Oaklands College site has long been proposed for an expanded strategic housing allocation with associated College improvements. As long ago as 2007, the Draft Local Plan proposed that the site be allocated for 1,200 dwellings. Similar proposals have continued to the current date, for example 1,000 dwellings were proposed in 2016. The current Regulation 19 Publication Draft Local Plan has therefore significantly reduced the proposed allocation against historic levels that were consulted upon many times. This is against a backdrop of ever increasing housing needs and lack of housing delivery in the District.

Oaklands College has selected Taylor Wimpey (which is part of Taylor Wimpey UK Ltd) as its development partner for the East St Albans development. This will ensure that the proposals are deliverable. Taylor Wimpey will also bring valuable local knowledge from the previous masterplan development prepared in partnership with the College and other developments within St Albans.

Previous proposals for College improvements and 348 dwellings were granted planning permission in 2017, following a 'Call-In Inquiry'. The receipts from this development have significantly improved the condition of the college site, much of which was in danger of failing prior to the investment. However, further investment would bring significant benefits, including the ability to:

1. Secure the future growth aspirations of the College - The ability to access significant additional capital would allow further investment to improve the quality and suitability of its buildings, and the provision of additional facilities, to allow them to remain competitive in the long term; and
2. Deliver a collection of benefits to the College and the wider community – To significantly grow the social value the College is able to provide to the area and wider economic benefits, allowing the College to support the Herefordshire Economic Growth Strategy.

It is over 10 years since the previous College masterplan planning application was submitted in 2013. As a result, many of the buildings that were not addressed under that plan have fallen into disrepair and are no longer fit for purpose.

The College's business case shows how funds from the future residential-led development would be re-invested to significantly contribute towards generating new education, sports and community benefits. Some of the key elements of the College's future proposals are as follows:

- An Education Hub, delivering an improved range of education facilities around the centre of the campus;

- A sports centre of excellence, located to the south east side of the campus, with state-of-the-art facilities that would be accessible to the local community;
- Specialist teaching facilities to support the creative industries, which are so prevalent in the Hertfordshire area;
- A High Needs Centre (HNC), to educate post-16 learners. This is an initiative with Hertfordshire County Council (HCC) and involves consolidating special needs requirements that are currently spread and much of which is delivered outside the county; and
- Providing an expanded professional services and hospitality education offering, which would be accessible to the local community.

In order to support the delivery of these proposals with sufficient capital, any allocation for the site will need to ensure it makes the most efficient use of the land, supporting delivery of a minimum of 472 units plus approximately 60 to 80 extra care units, similar to that originally set out in the Regulation 18 Draft Local Plan and supported by the College at that time.

The College and Taylor Wimpey strongly supports the Regulation 19 Publication Draft Local Plan in principle, the proposed strategic site allocation and the delivery of much needed new homes, but is seeking changes to ensure that the housing needs of St Albans are met through efficient utilisation of available land and that the content of the local plan aligns with the future ambitions of the College.

**History of the Oakland's College Campus in the Draft Local Plan**

Oaklands College has been the subject of a draft site allocation within the Council's draft Local Plan since September 2003, when the Council published the Second Review Local Plan Pre-Deposit for consultation purposes. It was subsequently included within the:

- May 2006 - Issues and Option Consultation;
- July 2007 – Core Strategy Issues and Option document (in the order of **1,200** new homes);
- August and September 2009 – Emerging Core Strategy consultation (in the order of **800 to 1,000** new homes);
- June and July 2021 – Substantially revised Core Strategy;
- November 2012 – Pre-submission Strategic Local Plan (SLP);
- January 2016 – Draft SLP (in the order of **1,000** new homes); and
- October 2018 – Local Plan 2020-2036 Publication Draft (in the order of **1,250** new homes, including the 348 homes already delivered on the Oaklands Grange site).

The St Albans District Council Local Plan Viability Study – Strategic Site Testing: East St Albans' (September 2024) supports Site Allocation B4 (East St Albans). It confirms that development on the site is financially viable, assuming the necessary funds for the College improvements are delivered via the construction of **552** new homes (not 472 new and 70 to 80 extra care units) alongside the delivery of two new schools and a new local centre.

The College and Taylor Wimpey note that quantity of development to be delivered in this location has significantly reduced in the current Regulation 19 Publication Draft Local Plan. This would unnecessarily limit the ability of the site to deliver its full housing potential, contrary to the ever-increasing need for housing and the lack of housing delivery in the District. It would further have a direct impact on the College's ambitions for the future and its ability to remain competitive.

## 3 Representations: Evidence Base Documents

The evidence base published by the Council influences the objectives of the policies contained within the Regulation 19 Publication Draft Local Plan. This section of Oaklands College and Taylor Wimpey's representations will review the findings of the evidence documents and set out suggested amendments for the Council to consider.

### 3.1 Strategic Site Testing: East St Albans

Gerald Eve (GE) have been appointed to review the viability evidence submitted with the Regulation 19 consultation. Accordingly, they have reviewed the information contained within the 'St Albans District Council Local Plan Viability Study – Strategic Site Testing: East St Albans' (September 2024) which has been prepared by BNP Paribas, on behalf of the Council. We note that the residential development capacity for Site B4, as set out in Table 3.1, is 472 homes (including extra care provision). This is less than the amount of development assessed by BNP Paribas, which included 552 new homes.

Although Oaklands College and Taylor Wimpey support the conclusions of BNP Paribas' report, they would welcome the opportunity to query the contents and assumptions made in this report. Until this discussion takes place, Oaklands College and Taylor Wimpey must reserve their position by submitting a technical objection to the report. The matters to be discussed are set out in GE comments found at **Appendix 1**.

### 3.1.1 Suggested Amendments

Oaklands College and Taylor Wimpey seek the Council's agreement to ask BNPP to resolve any queries raised in relation to the 'testing' of East St Albans, as set out in GE's comments (see **Appendix 1**). Any subsequent amendment can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public (EiP).

## 3.2 Green Belt Buffer Sites Recommended – Broad Location Proformas (September 2024)

This is the very first time that this information has been released by the Council for consultation purposes.

Oaklands College and Taylor Wimpey are very **supportive** of the conclusion for Site Ref: M-026 (HELAA ref: SAN-06-21) on the Proforma Sheet (pages 21 and 22) and the subsequent conclusion reached by ARUP –'recommended to progress'.

No suggested amendments are offered at this stage.

## 3.3 IDP Infrastructure Schedule & Infrastructure Delivery Plan

Primary and secondary schools are shown in Appendix A.1 (SADC Infrastructure Schedule) of the SADC Infrastructure Development Plan (IDP, 2024). Oaklands College requests that this document is updated to acknowledge that the College would deliver and retain ownership of the schools at Site Allocation B4. The document currently refers to Hertfordshire County Council (HCC) doing so.

Oaklands College proposes to deliver and operate the proposed primary and secondary schools. This is something that other colleges have done and would bring substantial benefits for the District. The College is in discussions with HCC about this.

### 3.3.1 Suggested Amendments

The College is seeking for Appendix A.1 of the IDP to acknowledge that the College will deliver and retain ownership of the primary and secondary schools forming part of Site Allocation B4. This amendment can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public.

## 3.4 Local Cycling and Walking Infrastructure Plan

Oaklands College proposes improvements to rights of way routes across its campus, in conjunction with proposed Site Allocation B4. This would deliver improved access for rights of way users, whilst also being sensitive to the education functions within certain parts of the campus.

### 3.4.1 Suggested Amendments

The College believes that the Local Cycling and Walking Infrastructure Plan (LCWIP) should acknowledge that proposed rights of way across the College land, as shown in Figures 5-3, 6-1, 7-1, 77 and 7-8 for example, will need to be carefully considered in discussions with the College, to ensure that education safeguarding requirements are taken into consideration. This amendment can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public.

### 3.5 Playing Pitch & Outdoor Sport Strategy & Action Plan

Oaklands College's proposals in connection with Site Allocation B4 would deliver substantial benefits for the community, including in relation to delivering a sports centre of excellence. Oaklands College is keen to input into the Planning Pitch & Outdoor Sports Strategy & Action Plan (January 2023), so that it reflects the sports provision that the College is keen to improve and deliver, as well as understanding the needs and other proposals within St Albans.

#### 3.5.1 Suggested Amendments

Part 8 of the Playing Pitch & Outdoor Sport Strategy & Action Plan should acknowledge that Oaklands College is a 'relevant partner' that should be consulted as part of the process of agreeing the future Action Plan. As such, the report should acknowledge that its content has not yet been discussed with Oaklands College and alignment will be needed with the College's proposals for its future education and sporting priorities. This amendment can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public.

### 3.6 Landscape & Visual Appraisal Sheet

It is appreciated that the Council has taken a conservative approach to development capacity and these estimates are inactive. That said, page 45 of the Broad Locations Landscape & Visual Appraisal (November 2023) assumes that the development capacity for Site B4 is 472 homes. This is significantly less than the Site's development potential of at least 472 units plus approximately 60 to 80 extra care units, as explained Section 3.1 above.

#### 3.6.1 Suggested Amendments

Oaklands College and Taylor Wimpey seek the Council's agreement to take account of the conclusions of GE's report (**Appendix 1**) and increase the residential development capacity of shown on page 45 of the Landscape & Visual Appraisal Sheet from 472 (including 70 to 80 extra care units) to at least 472 units plus approximately 60 to 80 extra care units. This amendment can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

See attached representations for full submission.

#### 3.1.1 Suggested Amendments

Oaklands College and Taylor Wimpey seek the Council's agreement to ask BNPP to resolve any queries raised in relation to the 'testing' of East St Albans, as set out in GE's comments (see **Appendix 1**). Any subsequent amendment can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public (EiP).

### 3.3.1 Suggested Amendments

The College is seeking for Appendix A.1 of the IDP to acknowledge that the College will deliver and retain ownership of the primary and secondary schools forming part of Site Allocation B4. This amendment can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public.

### 3.4.1 Suggested Amendments

The College believes that the Local Cycling and Walking Infrastructure Plan (LCWIP) should acknowledge that proposed rights of way across the College land, as shown in Figures 5-3, 6-1, 7-1, 77 and 7-8 for example, will need to be carefully considered in discussions with the College, to ensure that education safeguarding requirements are taken into consideration. This amendment can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public.

### 3.5.1 Suggested Amendments

Part 8 of the Playing Pitch & Outdoor Sport Strategy & Action Plan should acknowledge that Oaklands College is a 'relevant partner' that should be consulted as part of the process of agreeing the future Action Plan. As such, the report should acknowledge that its content has not yet been discussed with Oaklands College and alignment will be needed with the College's proposals for its future education and sporting priorities. This amendment can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public.

### 3.6.1 Suggested Amendments

Oaklands College and Taylor Wimpey seek the Council's agreement to take account of the conclusions of GE's report (**Appendix 1**) and increase the residential development capacity of shown on page 45 of the Landscape & Visual Appraisal Sheet from 472 (including 70 to 80 extra care units) to at least 472 units plus approximately 60 to 80 extra care units. This amendment can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public.

## 4 Representations: Part A - Draft Local Plan

This section of Oaklands College and Taylor Wimpey's representations focus on the policy objectives and associated supporting main text contained within Part A of Regulation 19 Publication Draft Local Plan. It will:

- Cross-refer to the matters discussed in Sections 2 and 3 above; and
- Set out suggested actions and / or amendments for the Council to consider.

### 4.1 Chapter 1 – spatial strategy For St Albans City and District & Strategic Policy 1

Oaklands College and Taylor Wimpey **support**:

- The spatial strategy set out in paragraph 1.33;
- The inclusion of St Albans as a Tier 1 settlement in Table 1.3 and Figure 1.2; and
- Locating most growth within and adjacent to the larger and most sustainable urban centres that are Tier 1 settlements, as set out in Strategic Policy SP1 and Figure 1.3.

This is because they support the principle of locating new development in sustainable locations, near to socio-economic infrastructure and transport links facilities.

No suggested amendments are offered at this stage.

**Number:**

1.3

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

### 4.1.5 KEY DIAGRAM

Redington Capital Limited and CALA Homes object to Key Diagram (Figure 1.3) of the Regulation 19 Publication Draft Local Plan for the reasons explained in Sections 3 and 4 of these representations.

In Redington Capital Limited and CALA Homes' opinion the Council has wrongly chosen to identify housing sites that are located on the edge of 'higher tier settlements' that are located further away from transport services and other facilities, than some of the more sensible and logical sites located in lower tier settlements, such as the Land South of Chiswell Green Lane. Therefore, in reality the spatial strategy approach and the resulting Key Diagram adopted by the Council (using the site's identified for development in Part B) will not deliver the key objectives – to locate new development in locations that will reduce the need to travel and to provide a greater range of services and facilities.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Redington Capital Limited and CALA Homes recommends that the Council considers including more housing sites in areas that benefit from better access to transport services and other services (such as Land south of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and other services.

Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified by the Council as a new broad location site (for 391 homes and new school) in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

The concerns I had submitted about the Plan in the Regulation 18 consultation appear not to have been addressed. Why have these issues been ignored.

It has not been made clear that a consultation about site allocation in the Local Plan took place last year. It is therefore no surprise that it is now too late to submit objections.

I understand that flaws in the methodology used by Arup's Green Belt Review were brought to the attention of Planning Officers. However, I believe that these issues have not been addressed.

Wailing Street development planning application, site L2 was rejected by the council earlier in the year, however, it is still part of the Reg 19 process.

The traffic issue has to be considered in line with the development of the Strategic Rail Freight Terminal. SRFT is designed to have 10,000 movements per day. Many of these will use Watling Street and further clog an already very busy Park Street Round. Not to mention the air pollution. Yet no traffic assessment has been completed for L2.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

## 233 - Central Bedfordshire Council

Submission Number: 233 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Central Bedfordshire Council Name:

Comment Number: 2

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**General Comments**

The recent consultation on proposed changes to the National Planning Policy Framework (NPPF) set out a proposed new Standard Methodology as well as transitional arrangements that would come into effect once the new NPPF is published. In accordance with proposed paragraph 226, the policies in the Framework will apply for the purpose of preparing local plans from the publication date + one month, unless one or more criteria apply. Criteria C states: the local plan is or has been submitted for examination under Regulation 22 on or before [publication date + one month].

Central Bedfordshire Council recognises the importance for St Albans District Council to have an up-to-date Local Plan in place – indeed, with the current Local Plan dating back to 1994, it is one of the oldest plans in place and is no longer fit for purpose. CBC therefore supports the progression of the St Albans Local Plan under the current version of the NPPF. For clarity, CBC would suggest explicitly stating within the Local Plan, which version of the NPPF the plan has been prepared under – for example at paragraph 1.26.

It is recognised that following adoption of the St Albans Local Plan, it is likely that the Council will need to undertake an immediate review in line with the proposed Transitional Arrangements set out in the recent consultation to reflect the proposed new Standard Methodology for calculating Housing Need as well as any future National Development Management Policies that may arise in the interim.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

The council did not listen to new evidence regarding the selection of North St Albans and this site does not meet sustainable development due to factors such as elevated severe flood risk, No safe delivery option for sustainable active travel highway plus it goes against the recommendations of the second Green Belt Review ARUP.

This local plan fails the people of the district it allows over development, our roads will become permanent long traffic jams.

There is no strategy to deliver social housing operated by the council, instead to be run by Housing associations offering investors 15% profit. This is not good for those in most need within our community.

In the case of North St Albans the Local Cycling and walking plan is high level and has not been adequately evidenced.

This local plan fails our community as vast areas of productive farmland, open spaces and valuable wildlife habitats will be lost.

I do not see evidence that the proposed number of houses are required and I wonder why the council is so keen to push ahead with this flawed plan.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

The planning system in England and Wales is a plan-led system, in conformance with the National Planning Policy Framework (NPPF).

NPPF (December 2023 edition) says at para 104,

"Planning policies and decisions should protect and enhance public rights of way and access, including taking opportunities to provide better facilities for users, for example by adding links to existing rights of way networks including National Trails."

The Plan often includes reference to footpaths and cycling, and to the Local Cycling and Waking Infrastructure Plan (LCWIP), but doesn't mention the Rights of Way Improvement Plan (ROWIP) for the area. Because of the extensive public consultation that the County Council must go through to finalise its ROWIP, this surely counts as at least worthy of being considered as supplementary planning guidance.

In addition, LCWIPs are only really considering foot and cycle routes. However the ROWIP considers all public rights of way and so encompasses footpaths (users on foot), bridleways (users on foot, horse or cycle) and restricted byways (users on foot, horse, cycle, horse-drawn vehicle) so allowing better targeting of equestrian rights where appropriate (i.e. for those developments where bridleway provision is more appropriate than a footpath or cycle track). This is the case in large parts of St Albans District as we have rural as well as city areas, and large horse populations.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To ensure its results are taken into account in planning decisions, all references in the plan to 'LCWIP' should be replaced by 'LCWIP and ROWIP'.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

I am indicating that if the inspector wishes to hear more on the subject I will make myself available to explain in more detail or to provide counter information should the council reject the request.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

i don't know the precise legal requirements so I cannot say whether it is legally compliant. I don't consider it sound, however, as it appears the council has not taken any notice of the comments submitted by its electorate in relation to the last draft. According to the objectives, sustainable use of land and protecting the green belt are your top two priorities, even ahead of housing, but the proposed redrawing of green belt boundaries shows that this has not been implemented. it simply is not sustainable to concrete over the green belt. and even if you do go ahead and redraw the boundaries (which would be reckless) it will not make those sites suitable for building on. many of the sites you have indicated will be developed have got notes against them showing they contain protected species (eg M3), gas pipelines (M3), protected trees (m7), are atop the aquifer (B7) are at risk of flooding (M6) are on an SSSI (m15) ETC, ETC. these sites need to be protected and to do otherwise is not sustainable: it will not result in St Albans being a great place to live and work, quite the contrary. Some of the proposed development sites are on car parks which will only make the parking situation worse than it already is.

if you were serious about strategic policy 10, you would not be proposing to release plot M3 from the green belt. at the very least you would have excluded the bit north of the public footpath which includes the grass land and the orchids. I fundamentally disagree with the current proposal

overall I don't think this plan is in the best interests of the people of st albans as it is not justified as defined in the introduction to the revised draft plan

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. We would like to make the following representations:

- St Albans Council have not adapted their plan following feedback from the regulation 18 consultation. The feedback given by local communities has been completely ignored. It appears that no changes have been made. This is unlike other councils (e.g. Dacorum) who actually listened to public opinion and made amendments accordingly.
- Proposed West Redbourn (B3) and Hemel Garden Communities developments will completely remove the current green belt buffer between Redbourn and Hemel Hempstead (only 1km remaining). The whole purpose of the green belt is to prevent urban sprawl, these developments completely go against this policy. Even though the ARUP report commissioned by the council rejected the Hemel Garden Communities development due to coalescence, they have decided to proceed anyway – ignoring the findings. An explanation as to why "exceptional circumstances" exist that justify building on this greenbelt land has still not been provided.
- Have the West Redbourn (B3) site and the Hemel Garden Communities developments been considered together? We haven't seen evidence of this – especially when it comes to the greenbelt.
- Loss of arable land when government should be prioritising self-sufficient food chain. Also damaging to the chalk stream network.
- The West Redbourn (B3) site in particular is a complete abomination; even local housing associations have objected to it. The access proposed will create a huge increase of traffic volume throughout the village – making it lose its village identity and putting significant pressure on already over stretched services and road network.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

There appears to be a set of standard responses regarding concerns raised previously, which would indicate that concerns have not been taken seriously. The suggestion that the council is working with the CC on highways does not seem to be bourne out by the lack of consideration of the impact on local highways of the development of the Strategic Rail Freight Terminal.

It seems that the allocation of green belt locations for development has been influenced by property developers through the “call for site” processes rather than using a systematic process.

Thank you for providing Watford Borough Council (WBC) the opportunity to comment on the St Albans Draft Local Plan 2041 Regulation 19 Consultation.

Watford and St Albans both form part of the wider area of South West Hertfordshire. Consequently, Watford Borough Council (WBC) and St Albans City and District Council (SADC) share several strategic planning issues including being within the same Housing and Economic Market Areas, and infrastructure provision that promotes sustainable development across the area.

WBC is encouraged by the progress made by SADC on its Local Plan and supports its objectives for sustainable growth. WBC has worked closely with SADC throughout the evolution of the draft Plan on a range of cross boundary issues and a position of agreement on these issues has been reached. This is to be reflected in a signed Statement of Common Ground between the Councils.

WBC will continue to work with SADC and HCC to plan and deliver cross boundary infrastructure projects, such as the HERT and improvements to the Abbey Line. Efforts to enhance the Abbey Line, which currently provides a key, but irregular, sustainable transport connection between Watford and St Albans, are fully supported and it is pleasing to see references to this in the draft Plan.

These cross boundary sustainable transport projects will further improve regional connectivity and improve access to economic opportunities across South West Hertfordshire.

The Council is pleased to see that the Plan continues to meet its housing need in full. This is an ambitious approach that is welcomed and supported in light of the Watford Local Plan (adopted October 2022) which also sought to meet its housing needs in full.

Watford has a shortfall of available land to support investment in new industrial and logistical premises. WBC is pleased that the Local Plan acknowledges that SADC could meet other LPAs' needs as part of a strategic approach to employment provision in the South West Hertfordshire area.

In line with paragraph 5.2 of SADC's Evidence Paper Meeting the Accommodation Needs of Gypsies and Travellers and Travelling Show people (September 2024), WBC confirms that it does not have any available sites to meet the Gypsy and Traveller accommodation need identified for St Albans.

WBC supports the ongoing work on the Joint Strategic Plan and values collaboration on shared evidence base documents to ensure consistency across the sub-region.

**266 - Crest Nicholson Partnerships and Strategic Land**

Submission Number: 266 Submission Date: 08/11/24 08:47

Respondent: Company/Organisation: Stantec Name: Sarah Cross

On Behalf Of Company/Organisation: Crest Nicholson Partnerships and Strategic Land Name:

Comment Number: 2

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

3.1 Section 11 of the Localism Act 2011 introduced a requirement for Planning Authorities to cooperate with

neighbouring Local Planning Authorities on cross boundary issues.

3.2 Para 1.9 of the Reg 19 DLP recognises this statutory duty and sets out the background to the Joint

Planning approach under the South West Hertfordshire Joint Strategic Plan, which covers Dacorum Borough Council, Hertsmere Borough Council, Three Rivers District Council and Watford Borough Council. It also identifies the joint working with Dacorum Borough Council on the cross-boundary development at Hemel Garden Communities.

3.3 The previous Local Plan was withdrawn following the Inspector's letter of 14 April 2020 which set out

concerns regarding Duty to Cooperate and the ability to accommodate the Council's housing needs outside of the Green Belt.

3.4 The updated Evidence Base as part of this new Reg 19 DLP process includes a response to the

Inspector's letter. It aims to set out how the Council has responded to the concerns raised.

3.5 The response sets out that the Council engaged in a Duty to Cooperate matrix approach with

neighbouring Councils and key stakeholders which had been endorsed by Planning Advisory Service throughout 2022 and 2023. It is noted this will feed into Statements of Common Ground (SoCG) with such parties prior to the submission of the Local Plan.

3.6 In addition, the Evidence Base includes an Overarching SoCG which sets out an overview of the

common ground on the strategic geography and cross boundary matters and identifies that currently there are no matters of disagreement.

3.7 The Overarching SoCG is very broad and it is noted that further bilateral SoCGs will be provided in due

course. However, it will be necessary for ongoing and effective cooperation to be demonstrated to have taken place, particularly with regard to housing matters and it is not known at this stage how effective this will have been as there are no specifics provided within the Evidence Base.

3.8 As the current content of the Overarching SoCG is too broad, this raises some concern about whether all stakeholders, including neighbouring authorities, are in agreement, particularly regarding housing numbers. It is noted that this lack of information at this stage may be due to the accelerated nature of the Local Plan process, so it is recommended that the specific SoCGs anticipated with the various stakeholders are robust and ready for the Examination process.

**268 - St Michael Parish Council**

Submission Number: 268 Submission Date: 08/11/24 09:05

Respondent: Company/Organisation: St Michael Parish Council Name: Julia Reading

On Behalf Of Company/Organisation: St Michael Parish Council Name:

Comment Number: 1

**Type:**

* Policy

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Please note that the following comments represent a consensus of individual opinions among the St Michael Parish Councillors, and are offered subject to retrospective formal approval at the Parish Council's next meeting, scheduled for January 2025.

Without detailed technical knowledge it is difficult for the Parish Council to decide, within the confines of the Regulation 19 consultation requirements, whether on balance to endorse or censure the draft Local Plan. It must also be stated that there is a real dilemma in the potential outcomes offered between hurrying through a flawed plan as it stands and the threat of further inflated housing quotas being imposed by central government if the plan is rejected.

We do find some positive, but mainly negative, aspects of the draft Local Plan. Primarily there is a lack of thoroughness and transparency around the methodology for Green Belt release and the lack of planning and thought for road infrastructure to support an even bigger population in the district.

What is clear is that preservation of Green Belt status now carries very little weight in determining planning considerations. We accept that St Albans City and District Council (SADC) has lamentably had some of its local decisions, i.e. of refusal on Green Belt grounds, overturned on appeal. There is however an intention in the draft Local Plan, in defiance of the National Planning Policy Framework, to sacrifice Green Belt areas to meet quotas without either an Agricultural Land Classification or any demonstration that all other site options have been properly considered and found to be unsuitable for housing development.

We also remain deeply concerned about the validity of the transport modelling which is predicated on a population (existing and incoming) voluntarily undertaking vastly increased numbers of trips by public transport services and via pedestrian and cycle routes. While this may be a desirable scenario, we do not see any solid evidence and analysis of projected demographic behaviour and consumers' appetite for change. The plan relies too heavily on existing transport infrastructure, without demonstrable improvements in quality or capacity to cope with increased population numbers, even in the short term, let alone the demographics leading up to 2041, all on top of what are already congested thoroughfares throughout the district. No new cycle routes to connect the sites on the A1081 have been approved and we find this to be a great oversight in the evidence base.

The Parish Council is indebted to Redbourn Parish Council which has shared some of its technical knowledge with us in order for us to make a more informed submission.

## 269 - Acre St Albans Ltd

Submission Number: 269 Submission Date: 08/11/24 09:15

Respondent: Company/Organisation: Savills Name: Mr Kieran Wheeler

On Behalf Of Company/Organisation: Acre St Albans Ltd Name:

Comment Number: 1

### Type:

* Paragraph

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

In summary, Acre supports the allocation of the 'East and West of Miriam Lane' site but objects to a number of the criteria set out in site specific policy wording within the allocation. Amendments have been proposed to the wording which would make it acceptable and these are detailed above and with Appendix 3.

'East and West of Miriam Lane' represents an appropriate, sustainable and deliverable allocation in the new Local Plan. This is emphasised by Acre's involvement with the scheme, the pre-application dialogue which is in process of taking place with the authority and the intention to submit a planning application in Spring 2025. Should full planning permission be granted by Autumn 2025, delivery on site could reasonably commence in early 2026. The emerging Local Plan is therefore of significant relevance to Acre and, given the deliverable and readily available nature of the scheme, the site is highly relevant to the LPA's five-year housing land supply and housing pipeline.

In this regard, it is hoped that these representations are considered carefully by SADC to ensure that the Local Plan and the key development requirements for allocations L3 do not present unreasonable challenges or complications to the planning process. SADC should therefore approach site allocations positively and seek the efficient use of site. Addressing the proposed uplift on the allocation and taking on board the changes to the Key Development requirements would go a way toward this and would contribute to the delivery of the site.

Please refer to the cover letter prepared by Savills.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Part B

L3 – East and West of Miriam Lane, Chiswell Green, AL2 3NY

revised proposed use: **140 residential units and a care home (land use class C2/C3)**

Delete 1

Amend 2 Footpath access along Noke Lane and alongside the North Orbital to Watford Road is narrow, and development must provide new or make sufficient
contributions to make improvements to the existing highways, including widening, providing safety, and sufficient lighting **within the boundaries of the site along NokeLane and the North Orbital road only.**

Delete 3

Amend 5 Development proposals must take appropriate account of trees covered by Tree Preservation Order **dependent on their quality and status, within the site.**

Delete 6

## 273 - Hallam Land Management and St Albans School

Submission Number: 273 Submission Date: 08/11/24 09:33

Respondent: Company/Organisation: LRM Planning Name: Mr Owen Jones

On Behalf Of Company/Organisation: Hallam Land Management and St Albans School Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**5 Sustainable use of land and green belt**

5.1 One of the Local Plan objectives is to "prioritise the effective use of land by locating new development on previously developed land first, where appropriate; and protecting and enhancing the Green Belt".

5.2 The emphasis on focusing development opportunities on previously developed land in the first instance is reiterated throughout the consultation document, and has consistently been made clear in previous versions. However, it is acknowledged that the Council cannot solely rely on development in such locations to meet the District's development requirements. As such, the second limb of the objective remains crucial.

5.3 It is right that this continues to be acknowledged, with the Local Plan noting that "this approach above favours meeting need within or close to existing settlements to draw on existing infrastructure and reduce the need to travel" (para 3.4), and recognising that "it may be necessary to meet the need by considering other available land; in St Albans District this includes looking at Green Belt land and its boundaries" (para 3.5).

5.4 This is consistent with Strategic Policy SP1 which identifies Broad Locations for development in

locations adjacent to the city of St Albans as the main urban area in the District, amongst other places.

5.5 What is absent from the objective is a recognition of this circumstance (i.e., there is no second limb to follow the first.) This objective should be recast accordingly to reflect that development will also occur at locations presently within the Green Belt (but to be removed through this Local Plan process) that contribute to a sustainable pattern of development.

**REQUIREMENTS FOR GROWTH**

5.6 The representations submitted by Hallam and St Albans School as part of the Regulation 18 consultation process commented on the local housing requirement and the need to increase the supply of new homes. The District Council's intent to "provide a sufficient amount of good quality housing which meets the needs of all sections of society in sustainable locations", was, and is, supported, and it was acknowledged that the Local Plan rightly uses the standard method to calculate the number of new homes required. It remains instructive that the Council has not sought to argue that there are exceptional circumstances to justify an alternative approach as is permissible by the NPPF (§61).

**SOURCES OF DEVELOPMENT LAND**

5.7 The Local Plan identifies two sources of development land in the District. First, previously developed land, and second, greenfield land, which, because of the extent of the designation, equates to Green Belt land. The Regulation 19 version of the Plan continues to fairly refer to the tension between competing objectives of protecting the Green Belt and achieving a sustainable pattern of development.

5.8 The representations previously submitted explained that the Green Belt in St Albans has not been subject to substantive amendment since 1985 and save for where very special circumstances have existed it has endured for nearly four decades. In this regard, very special circumstances have increasingly been proven to exist in recent years, because of the absence of a plan-led approach to its review and the concomitant lack of supply of development land.

5.9 It is therefore unsurprising that in trying to resolve this tension, the District Council is again finding that as a matter of principle, the Green Belt boundary should be amended to contribute to meeting

local housing need. It remains pertinent and appropriate that the Sustainability Appraisal confirms that there is a "clear strategic case for Green Belt release at St Albans" (para 5.4.34).

5.10 This aligns and responds with the NPPF which acknowledges that "the supply of large numbers of new homes can often be best achieved through planning for larger scale development, such as new settlements or significant extensions to existing villages and towns, providing they are well located and designed, and supported by the necessary infrastructure and facilities" (§73) and "the planning system should actively manage patterns of growth in support of these objectives. Significant development should be focused on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes" (§105).

5.11 Hallam and St Albans School therefore are still of the opinion that the critical mass of new

development that large scale strategic allocations at St Albans can achieve means that they should underpin the Local Plan's strategy, not least because they can contribute to meeting the established housing requirement and positively contribute to a range of Local Plan objectives and also support the provision of new infrastructure. The role of North St Albans as a Broad Location is crucial in this respect.

**GREEN BELT REVIEW**

5.12 It is well known that St Albans is tightly constrained by the Metropolitan Green Belt, one of the fundamental aims of which is to prevent urban sprawl by retaining the openness of land. Its initial purpose was to prevent the outward expansion of greater London, but there has been a recognition of the proximity of other towns in relation to the greater London area and the need to prevent them from merging.

5.13 Locally, its primary purpose is to prevent settlements within and adjoining the District merging, which is a crucial factor when assessing the role of the Green Belt at different locations.

5.14 The Green Belt was assessed in 2013/14 by SKM and more recently in 2023 by Arup. The previous representations explained that they adopted very different approaches, with SKM adopting a strategic consideration of the role of the Green Belt and potential locations which could accommodate large scale development, and Arup rather considering individual field parcels which make up the potential larger strategic sites. As such, it was concluded they are not comparable and conclusions from the Arup work cannot be read to supersede SKM's conclusions. Hallam and St Albans School maintain this position and therefore are of the opinion that limitations of the Arup work mean that, alone, it cannot properly or singularly inform the Local Plan policies and proposals.

**HOUSING TRAJECTORY**

5.15 Commentary was previously provided on the District's housing trajectory as part of the Regulation 18 consultation, and Hallam and St Albans School continue to agree with the conclusions made at that time. It is notable that the existing housing supply is limited with a very obvious need for new development opportunities to be brought forward. On this occasion, the trajectory appears to delay the contribution of Broad Locations until 2031 and beyond. However, in doing so, it adopts a stepped trajectory with low levels of housing completions between now and 2031. There is no good reason for this where North St Albans is able to deliver housing sooner.

5.16 Most significantly, Hallam and St Albans School previously raised concerns about the resilience of the housing supply position. At the time, the Regulation 18 Local Plan identified a total potential supply of 15,938 new homes against a requirement of 15,096. This was calculated to equate to a flexibility allowance of some 5.5%. It was noted that although no specific guidance exists in this regard, it is commonplace to see flexibility allowances of 10% or greater. The Regulation 19 Local Plan reduces this flexibility allowance even further; Strategic Policy SP3 confirms that the standard methodology identifies a total need for 14,603 dwellings whilst the housing trajectory contained at Table 3.2 identifies a total housing land supply of 14,989 dwellings. This equates to a flexibility

allowance of just 2.6%. Hallam and St Albans School are increasingly concerned that the housing supply position is delicate and insufficient.

**SITE SELECTION**

5.17 The Regulation 19 document proposes a number of development locations which are within the Green Belt presently. There are several steps that the District Council must consider before concluding, as it has, that there are exceptional circumstances to amend the Green Belt. As an approach, this is no different to the conclusion reached in 2014, 2018, and 2023 as to how future development needs are to be met

5.18 In 2023, Hallam and St Albans School concluded that the process accords with the national guidance on plan preparation set out at §32 of the NPPF, and that the selection process also responds to the objectives of the Local Plan, and this position remains unchanged.

5.19 It is for this reason that it remains unquestionable that the site selection process quite rightly leads to the proposed allocation of North St Albans.

Arup Green Belt review not sound Ref SA45

The site lies to the East of Waddling Lane. Wheathampstead, Hertfordshire, comprising gentle sloping ground falling from the North to the River Lea.

Conclusion

This statement has demonstrated how Land to the East of Waddling Lane should come forward as a mixed-use housing and employment site meeting the golden thread of the NPPF 2023 promoting sustainable development in relation to economic, environmental, and social progress.

The statement has described how historic national infrastructure interventions for railways and highways have blighted any sustainable agricultural uses for the land. These historic interventions separated the site from rural farming landing effectively blighting the land for commercial agriculture.

It has described how mineral extraction has been exhausted leaving the land 'grey belt' or previously developed for those purposes. The Local authority must take account of brownfield or grey belt land and land that is currently underutilised. Both these exceptions are evident for this site and for these reasons exceptional circumstances exist that would allow the land to come forward in a form that makes best use of the land for development.

The statement has identified the shortcomings of the Arup Green Belt review where the review assessed the entirety of SA45 rather than this smaller portion of land abutting the built environment of Waddling Lane.

The statement has shown how the site will deliver a range of public benefits in addition to assisting with the shortfall in housing supply. For these additional reasons exceptional circumstances exist that would allow the land to come forward in a form that makes best use of the land for development.

The statement has demonstrated how a comprehensive offer of public benefits would support to review of Green Belt boundaries that promote sustainable patterns of development and for these reasons the subject areas SA44 and SA45 should be considered when setting out the District Nan.

In these circumstances a titled balance Should be applied when considering
Green Belt boundaries and site allocations to meet the shortfall in housing supply in the St Albans District on previously developed grey belt land.

For all those above reasons the Land East of Waddling Lane should be included in the emerging St Albans District Plan making process by a way of site allocation or Green Belt boundary adjustment.

See attached for more information

1. **Introduction**

1.1 These representations provide a response, on behalf of Redbourn Parish Council (RPC), to the St Albans Draft Local Plan (Regulation 19).

1.2 RPC considers the Local Plan to not be legally compliant due to St Albans City and District Council's (SACDC) failure to discharge its Duty to Cooperate.

1.3 RPC considers the Local Plan's proposed spatial strategy and the proposed development within Redbourn Parish to be unsound as the plan fails all the tests of soundness set out in the National Planning Policy Framework (NPPF) (paragraph 35) which are set out below:

- *"**Positively prepared** - providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*
- ***Justified** - an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*
- ***Effective** – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*
- ***Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in this Framework."*

We provide an overview of our conclusions on legality and soundness below which are expanded on in our detailed representations including our review and critique of key evidence base documents as well as the Sustainability Appraisal (SA).

...

2. **Plan Period**

2.1 The Draft Local Plan proposes a plan period of 2024/25 to 2040/41; however, it provides no justification for why this plan period has been selected. As we set out below SACDC has selected the very minimum plan period based on its current Local Development Scheme (Sep 2024) which does not appear to be adequate time to allow for the planning application and development process to take place as set out in the Local Plan's Housing Trajectory (Table 3.2 below).

2.2 The National Planning Policy Framework (NPPF) requires a minimum 15-year period from the adoption of the Local Plan. SACDC's LDS indicates a Local Plan adoption date of March 2026 so the minimum Local Plan period would end in March 2041. The proposed Draft Local Plan period would only be within the NPPF plan period requirement if it were indeed adopted by March 2026

which is a very narrow margin and assumes the Local Plan process (including examination) will stick to schedule with no margin for error. This is particularly relevant and concerning, as the Council admits in paragraph 3.5 of the Local Development Scheme that some aspects of the timetable are not within the control of the Council. Any delay in the adoption of the Local Plan would entail failure to comply with the 15-year rule of paragraph 22 NPPF.

*Figure 2.1: Local Plan programme until adoption (Local Development Scheme, September 2024)*

2.3 However, this assumes that the requirement for policies to be set within a vision that looks ahead at least 30 years imposed by paragraph 22 of the NPPF would not be required. The NPPF states:

*"Strategic policies should look ahead over a minimum 15 year period from adoption, to anticipate and respond to long-term requirements and opportunities, such as those arising from major improvements in infrastructure. Where larger scale developments such as new settlements or significant extensions to existing villages and towns form part of the strategy for the area, policies should be set within a vision that looks further ahead (at least 30 years), to take into account the likely timescale for delivery."*

2.4 There are clearly a number of options in the Draft Local Plan that do propose 'larger scale developments'. In this case, Local Plan policies should look further ahead and at least 30 years to account for the likely delivery time required for delivering strategic development. One need to look no further than the proposals at the 'Hemel Garden Communities' which, despite SACDC's optimistic development start dates and delivery rates, requires 750 dwellings to be delivered beyond the proposed plan period. In order to be effective and consistent with the NPPF, the Local Plan must extend its plan period to include the full development it is proposing.

2.5 Therefore, the plan and its policies clearly need to develop a vision which covers at least 30 years from the point of Local Plan adoption. If one assumes that the Local Plan adoption date is in 2025/26 then the policies and vision will need to extend to at least 2055/2056.

2.6 MHCLG introduced this change to the NPPF in response to the Building Better Building Beautiful Commission recommendations to clarify that councils need to take into account the likely timescale for delivery of larger scale developments which take considerable time to plan and deliver.

2.7 The proposed Draft Local Plan Housing Trajectory identifies broad locations for growth to be delivered from year 6 since the adoption of the Local Plan, until year 15 of the Local Plan. The trajectory also expects some smaller and specific sites to be delivered within the first 5-year period since the adoption of the Local Plan. However, the Local Plan only expects specific sites allocated in the Local Plan to be delivered in years 4 and 5. The expectation, according to the submitted trajectory, is that 482 new dwellings will be delivered in year 4 and 778 on year 5.

*Figure 2.2: Table 3.2 (Draft Local Plan Housing Trajectory)*

2.8 Whilst the Housing Trajectory suggests compliance with paragraph 69 of the NPPF with regards to broad locations between years 6-15, it fails to demonstrate specific, deliverable sites for the first 5 years since the intended date of adoption of the Local Plan.

2.9 We provide a detailed analysis and critique of the Housing Trajectory in relation to the Hemel Garden Communities covered under Policy LG2 (Support for Transformation of Hemel Hempstead).

**South West Hertfordshire Joint Strategic Plan**

2.10 The South West Hertfordshire Joint Strategic Plan (JSP), which covers the districts of St Albans, Dacorum, Three Rivers and Watford) is set to provide a long-term blueprint for South West Hertfordshire to 2050. It will be a document that will consider cross-boundary issues and will set out a strategic vision for the area, guiding future plans, setting out high level policies, coordinating the following matters:

- Climate change

- Strategic approach to Green Belt and AONB
- Net zero carbon
- Strategic growth opportunities
- Strategic infrastructure
- Economic opportunities
- Housing need

2.11 Given the failure of SACDC to discharge its Duty to Cooperate in its previous two Local Plan attempts, it is troubling to read in SACDC's LDS that there is no agreed nor coordinated timetable for the future preparation of the JSP. Given the clear requirement for cross-boundary strategic planning it would appear that any timetable for the St Albans Local Plan needs to be considered within the context of the JSP.

*Figure 2.3: The most up-to-date board programme for the preparation of the preparation of the JSP. Source: JSP website.*

*Figure 2.4: The most up-to-date board programme for the preparation of the preparation of the JSP. Source: SACDC Local Development Scheme (September 2024).*

2.12 It is also worth noting that the JSP timetable differs depending on the source. The JSP website does not determine the timetable for future stages, whilst the Local Development Scheme states that the Regulation 18 consultation for the JSP will take place in the Autumn 2025.

2.13 RPC suggests that SACDC should reconsider its timetable for production of the Local Plan so that it can prepare sound evidence base and properly align with the JSP whilst working closely with its neighbouring authorities and prescribed bodies on transport modelling, infrastructure delivery, phasing and housing and employment delivery.

2.14 that SACDC should reconsider its timetable for production of the Local Plan so that it can prepare sound evidence base and properly align with the JSP whilst working closely with its neighbouring authorities and prescribed bodies on transport modelling, infrastructure delivery, phasing and housing and employment delivery.

...

## 3. Duty to Cooperate

3.1 RPC considers the St Albans Draft Local Plan to not be legally compliant due to St Albans City & District Council's (SACDC) failure to discharge its Duty to Cooperate.

3.2 SACDC has not complied with the Government's legal test for discharging its Duty to Cooperate. Local authorities must fulfil the legal requirement to cooperate with the Duty to Cooperate prescribed bodies by *"engaging constructively, actively and on an ongoing basis"*[1] on cross boundary strategic matters from the commencement of preparing the Local Plan to submission of the Local Plan to the Secretary of State for examination.

3.3 Section 33A of the Planning and Compulsory Purchase Act 2004, as inserted by section 110 of the Localism Act 2011[2] requires the council to cooperate with other local planning authorities and other 'prescribed bodies' in preparing and developing development plan documents and other local development documents so far as it relates to a strategic matter.

3.4 The Town and Country Planning (Local Planning) (England) Regulations 2012 states that:

*"(6) Where a local planning authority have co-operated with another local planning authority, county council, or a body or person prescribed under section 33A of the Act, the local planning authority's monitoring report must give details of what action they have taken during the period covered by the report."*

3.5 The NPPF is clear about the role and requirements imposed by the Duty to Cooperate which states:

*"Effective and on-going joint working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy. In particular, joint working should help to determine where additional infrastructure is necessary, and whether development needs that cannot be met wholly within a particular plan area could be met elsewhere."*[3]

3.6 There is no supporting evidence provided by the Council in the Draft Local Plan Regulation 19 Publication or associated evidence base to help demonstrate that its legal requirements to discharge the Duty to Cooperate, as part of the plan-making process, have been fulfilled. Given the previous two failures of the St Albans Local Plan at Examination on Duty to Cooperate grounds and the development proposed in proximity and adjacent to neighbouring authorities with clear cross-boundary strategic matters, one would expect cross-boundary working on these matters to be active, ongoing and constructive from the commencement of Local Plan preparation to be set out transparently and in full.

3.7 The only meaningful reference to the Duty to Cooperate can be found in the latest Authority's Monitoring Report 2023, which covers the period between April 2022 and March 2023. There is no further record of the Authority's monitoring since March 2023 onwards and RPC is unable to understand whether any joint working has taken place with neighbouring authorities and Prescribed Bodies since then in the preparation of the Draft Local Plan.

3.8 The Authority's Monitoring Report 2023 refers to several meetings and a workshop that took place with neighbouring authorities and Prescribed Bodies between 2021 and 2022 to discuss strategic cross boundary matters and a follow-up letter. However, the report does not explain what joint work has taken place since then in the following two years, to inform the currently proposed Draft Local Plan Publication (2024).

3.9 In order to demonstrate that effective and on-going joint working, Statements of Common Ground must be prepared and maintained with Prescribed Bodies and the PPG guidance on preparing a Statement of Common Ground (SOCG) is to be followed including the need for these to be publicly available through the plan making process for transparency:

*"In order to demonstrate effective and on-going joint working, strategic policy-making authorities should prepare and maintain one or more statements of common ground, documenting the cross-boundary matters being addressed and progress in cooperating to address these. These should be produced using the approach set out in national planning guidance, and be made publicly available throughout the plan-making process to provide transparency."*[4]

3.10 There are no published SOCGs with any prescribed bodies for communities and other stakeholders to view which help demonstrate that SACDC has fulfilled the legal and policy requirements of Government with relevant bodies since commencing with the preparation of the Local Plan.

***South Hertfordshire Joint Strategic Plan SOCG***

3.11 There is a SOCG on the South West Hertfordshire Joint Strategic Plan (JSP) website dated August 2021. It is unclear from the Draft Local Plan what the status of this JSP SOCG is. According to SACDC's Authority Monitoring Report (2022) this SOCG is in draft (see para 1.24 of the AMR). Regardless of existing a draft SOCG, this would only relate to the emerging JSP and not the St Albans Draft Local Plan 2041 in question.

3.12 Furthermore, whilst the JSP SOCG would be an essential element in the making of the JSP, it is only signed by the Local Planning Authorities that cover the South West Hertfordshire area but it is not signed by any of the Prescribed Bodies of Section 33A of the Planning and Compulsory Purchase Act 2004.

3.13 The published Overarching SOCG refers to the relationship between emerging Local plans and the JSP but it fails to identify how the Council and Prescribed Bodies have worked and continue to work jointly to ensure consistency and alignment in the production of local plans alongside the JSP.

*Statement of Common Ground*

3.14 RPC raises concerns with the high-level and insufficiently detailed SOCG that has been published together with the Draft Local Plan. The statement fails to include a plan showing the area of the SOCG and a justification for the selected area of application.

3.15 Furthermore, it does not include a timetable or programme for the development of the SOCG or subsequent individual statements with relevant bodies. There is no indication of expected milestones, stages or when reviews or updates to the SOCG would be required. This would be the normal case as the SOCG would evolve as joint working with Prescribed Bodies progress.

3.16 RPC is also concerned with the parties involved in the 'Planning for Infrastructure' and 'Hemel Garden Communities' Strategic Matters in the SOCG. These seem insufficient and relate mainly to highways and use of car as mode of transportation. It is no consideration of rail as one of the main modes of transport in the area, and Network Rail and Transport for London (and other rail service operators) have not been included in the list of bodies involved in the transport matter. Clearly, SACDC should have a more complete consideration of transport beyond car use and highway capacity and safety, including sustainable and active transport as part of the strategic matters in the SOCG. This is particularly relevant, as the Local Plan sets out climate change and low carbon as the first objective of the Local Plan. It would be reasonable to include sustainable transport and active travel in the SOCG and involve all relevant parties that contribute to deliver the necessary strategic cross-boundary infrastructure and services.

3.17 The SOCG is also ambiguous and provides no evidence of meaningful collaboration between SACDC and neighbouring authorities and Prescribed Bodies as there is no meaningful common ground between bodies in the SOCG. The common only common ground identified in the statement relates to the "*strategic geography and what comprises the strategic cross-boundary matters".* This is clearly an insufficient common ground and only sets out minimal preliminary work of eventual joint working, which has not demonstrated yet.

3.18 Planning Practice Guidance (PPG) states that authorities should make any statements of common ground (SOCG) available on their website **by the time they publish their draft plan so that communities and stakeholders have a transparent picture of how they have collaborated**:

*"Authorities should have made a statement of common ground available on their website by the time they publish their draft plan, in order to provide communities and other stakeholders with a transparent picture of how they have collaborated".*[5]

3.19 PPG states that the purpose of the SOCG is to demonstrate that plans are deliverable over the plan period:

*"It documents where effective co-operation is and is not happening throughout the plan-making process, and is a way of demonstrating at examination that plans are deliverable over the plan period, and based on effective joint working across local authority boundaries".*[6]

3.20 Despite SACDC's attempt to evidence that it has discharged the duty in its Statement of Common Ground (Overarching) (Autumn 2024), there is lack of substantive and up to date evidence that 'active', 'ongoing' and 'constructive' cooperation took place from the start of the preparation of the Local Plan. If further evidence of cooperation were to be submitted by SACDC in the lead up to, or after submission of the Local Plan then this would clearly demonstrate that the Local Plan and its policies were not informed by this engagement – which is, after all, the entire reason for

the Duty to Cooperate as explained in the NPPF: *"effective and on-going joint working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy"*[7].

3.21 The SOCG only establishes as common ground with SACDC's strategic partners: the strategic geography and what comprises the strategic cross-boundary matters. Unfortunately, **the SOCG does not contain any substance on what constitutes the material cooperation between parties on the agreed strategic matters**.

3.22 RPC considers that SADC fails to provide the necessary evidence to demonstrate that it has discharged its Duty to Cooperate for the following reasons:

- The SACDC's statement simply outlines the Duty to Cooperate bodies and the potential strategic cross boundary issues.
- There is no evidence provided of meeting minutes, emails or letters between SACDC and Prescribed Bodies. This makes it impossible for one to understand what sort of engagement, if any, has taken place between bodies.
- SACDC does not identify the stage of progress of any individual SOCG with any of the prescribed bodies.
- There is no indication of any governance arrangement for the cooperation process is in place.
- There is no indication of the distribution of needs in the area, or the process for agreeing the distribution of need (including unmet need) with partners.

3.23 **There is no SADC's Duty to Cooperate Statement of Compliance accompanying the Draft Local Plan (Regulation 19).**.

3.24 Based on the evidence currently provided, it is not clear what activities SACDC has undertaken to demonstrate discharging its legal Duty to Cooperate. Critically, SACDC cannot demonstrate that the Local Plan's policies have been developed through effective, ongoing and constructive engagement with Prescribed Bodies and that the additional necessary infrastructure is determined according to proposed growth needs.

3.25 The Duty to Cooperate cannot be rectified post-submission so if the Inspector finds that the Duty has not been complied with the examination will not proceed any further[8]. SACDC should not be proceeding with this Regulation 19 consultation given that all indications are that the Duty to Cooperate has not been discharged.

..

## 5. Vision and Objectives

### Vision

5.1 Redbourn Parish Council provides several comments on the Vision and Objectives.

5.2 RPC considers that the proposed Vision and Objectives should be rooted to the local context and give a greater 'sense of place' of the District and a clear vision for its future that is both aspirational and realistic. We consider that it is important that the vision and objectives relate to St Albans District and they are not of an 'anywhere' place. The Vision and Objectives, as currently worded, do not relate directly to local context and the strategic policies in the Local Plan.

5.3 The proposed Vision states as follows:

***"A thriving, inclusive and sustainable community which is a great place to live and work and has a vibrant economy"***

5.4 Whilst RPC considers that the proposed vision is pleasant and it supports it generally, it requires more local context about what a thriving, inclusive and sustainable community means in St Albans District. What is the Local Plan envisaging when stating the district will be a great place to live and work? What is a vibrant economy in the context of St Albans? These should be better defined and

put into context to ensure that the proposed aspiration is clear but also that objectives and policies feed from an unambiguous and contextually clear vision. The vision should be amended to better reflect what the aspiration is in terms of thriving, inclusivity, sustainability, etc.

5.5 The proposed vision, does not help, at this high level in setting out a clear design vision and expectations, as per paragraph 132 of the NPPF. Although design is not necessarily required to be included or mentioned in the Local Plan Vision, the proposed vision statement and supporting text fails to refer to the quality of place, which, in view of RPC, should be an important aspiration for the Local Plan.

5.6 Currently the Vision is void of talking about any places, settlements, special qualities or assets in the district, lacking any 'sense of place'. RPC would recommend amendments to the Vision so it makes meaningful connections to St Albans District and to include supporting text that would give context to where the vision comes from and where it relates to. Overall, it would be important to provide a spatial connection to what currently is a positively worded and simple aspiration.

5.7 For example, the Redbourn Neighbourhood Plan (2023) sets out locally distinctive Vision Statement and Objectives. This includes the following from its Vision Statement:

- *It has retained its village feel along with its particular individual characteristics including its high quality built heritage, high street and its green and spacious setting;*
- *Where development has taken place, this has been focused on providing for Redbourn's changing needs. The barrier created by not having enough of the type of properties that people want has been broken down. Additional affordable housing (for rent) and smaller dwellings have been built, enabling both young first-time buyers and older 'downsizers' to remain in the village (with all new dwellings built to Lifetime Homes standards so that they are capable of adaptation as people's needs change through their lives). This has been achieved with development that is in keeping with the character of Redbourn, in particular ensuring that historic and listed buildings remain protected;*
- *Redbourn has become a thriving hub for small, start-up businesses. More residents now work locally';*
- *"The High Street is thriving in both daytime and evening and the appearance of the High Street reflects that. This has been anchored by the re-location of the Co-op to provide greater retail floorspace and parking provision at the former Bull Inn; and the re-location of the Redbourn Library to co-locate with the Fire Station at the northern end of the High Street, providing additional car parking for easy access to both the Library and High Street shops; and*
- *Redbourn remains a village with a distinct identity sitting in a rural setting. Development has served to improve access to the countryside surrounding Redbourn, which itself is protected from inappropriate development. This means that more Redbourn residents are able to enjoy the countryside including the Ver Valley's Nature Reserve which is run by a local community group of volunteers."*

**South West Hertfordshire Vision**

5.8 The emerging South Hertfordshire JSP has an agreed shared vision and set of principles that will be used to inform the JSP as it progresses. The document 'South West Hertfordshire 2050 – Our Vision for Realising our Potential (December 2023) sets out a general vision for the area and six pillars that contain specific principles that are designed to shape future policies. The vision states as follows:

*"South West Herts will realise its full potential of being globally connected, nationally recognised and locally cherished. Known for its creative spirit, collaborative working and willingness to accelerate positive change, it will be a place where sustainable growth provides a better and healthy future for both people and the environment."*

5.9 Unfortunately, the Draft Local Plan does not acknowledge the JSP's vision nor develops it into a locally contextual and specific St Albans Local Plan Vision. Both visions are separate and uncoordinated, not sharing aspirations. How is this good plan making, if two plans applicable to the same area and in preparation at the same time, are not coordinated even in their most basic aspirations?

5.10 Furthermore, the JSP sets out six pillars that will guide future policies:

- Living green in a healthy natural environment.
- Growing opportunities to work locally.
- Living in healthy, thriving local communities.
- Moving easily in well-connected places.
- Building homes and places that people are proud of.
- Delivering robust and sustainable infrastructure.

5.11 Notwithstanding the above, the proposed Local Plan Vision does not cover the above pillars and matters such the natural environment, health, connectivity and infrastructure are not part of the vision.

**Objectives**

5.12 RPC considers the Objectives to have severe faults. As a general point about the Plan's Objectives, they are not measurable and are therefore ineffective both in terms of the Local Plan Policies prepared to help deliver the respective objectives and in terms of decision making. Another problem with the proposed objectives, is that they do not directly relate to the pillars and objectives in the emerging South West Hertfordshire Joint Strategic Plan.

5.13 The Climate Change and Spatial Strategy objective is welcomed insofar as it follows from a global and national aspiration to tackle climate change. Notwithstanding this, there are several questions on whether this objective is realistic, effective and adequate, as currently worded.

5.14 The promotion of adaptation to and mitigation of climate change is not a strong objective, as 'promoting' only, in the absence of clear targets, could fall very short of the necessary measures to address mitigation of and adaptation to climate change. This objective is not ambitious, and it is not measurable, therefore not being effective.

5.15 Furthermore, the objective is aimed to achieve net zero carbon emissions by 2030, but the Local Plan covers the period from 2024 until 2041: the early years of the adopted plan would have very limited impact, as the spatial strategy would not be materially delivered with allocated sites until year 4 from adoption, meaning 2029/2030. How is the Local Plan going to achieve net zero by 2030 if the bulk of its spatial strategy won't start being delivered until that same year when net zero is supposed to be achieved? Furthermore, the plan period extends until 2041, but the objective does not set out targets beyond 2030.

5.16 The climate change objective is also ineffective and ambiguous where it states that the Council will do everything reasonably within its power. The text should set out a target that is clear and that could be followed by strategic policies for achieving of the objective. The current text is only aspirational, unmeasurable and non-committal.

5.17 None of the objectives set out in the Draft Local Plan are measurable and whilst they are good aspirations for the Local Plan, they do not seem to inform the policies contained within the plan. We raise concerns with the constant conflict between proposed policies and the objectives, as these are not aligned. RPC considers that the overall objectives are supported, but their content is unsound due to these being ineffective when being translated into planning policy and ambiguous.

...

6. **Spatial Strategy**

**Policy SP1 (A Spatial Strategy for St Albans District)**

6.1 RPC considers this policy to be **unsound** due it **not being justified, effective or consistent with national policy**. We explain the reasons for concluding this below.

6.2 Strategic Policy SP1 (A Spatial Strategy for St Albans District) is a confusing policy that fails to clearly set out the Spatial Strategy for the District in a coherent manner and is factually incorrect in many places. We make the following general points and then discuss the settlement hierarchy in more detail.

**Key points:**

6.3 Stating that "*The Spatial Strategy positively plans for the future to ensure that by 2041 St Albans District is a great place to live, work and visit*" is effectively just repeating the Vision and is not required and add clutter to an already confusing policy text.

6.4 Stating that "Growth must be supported by the necessary community infrastructure, transport improvements, green spaces and tree planting" appears to be very limited in scope of what SACDC expects to support 'growth' and what communities need. The terminology of using 'growth' is outdated and should instead use and reflect National Policy wording including 'Sustainable Development' and its overarching economic social and environmental objectives as set out in the NPPF.

6.5 Policy SP1 states that "growth will be located to make the most sustainable use of land in urban areas and then the Green Belt" and that "the approach seeks to develop Brownfield Land first".

- Firstly, the policy says nothing about the need for exceptional circumstances to be present before any release of Green Belt through the Local Plan and what exceptional circumstances SACDC purports there to be.
- Secondly, the policy is unclear in terms of differentiating between ‘land in urban areas’ and ‘Brownfield Land’. Not all brownfield land is in urban areas, it can often be located outside of urban areas in the Green Belt. What does SACDC consider to be ‘urban areas’– does this include all settlements or just Tier 1, Tier 2 and Tier 3 settlements for example? It is unclear. This should be clarified, and there should be, ideally, a cascade of preferred location for development, that gives consideration to sustainability according to the settlement hierarchy, Green Belt location, urban area location, and previously developed land (or Brownfield Land).
- Thirdly, it is apparent from the Draft Local Plan Housing Trajectory (Table 3.2) that ‘Hemel Garden Communities’ (Green Belt location), ‘Medium and Small Sites’ (599 homes), are assumed to start delivery in 2029/2030 the same year that ‘Sites Within Urban Settlements’ (HELAA and UCS) and ‘Green Belt – Previously Developed Land’. Furthermore, the contribution of dwellings through allocations in previously developed land is very limited (1,040 homes) when compared to allocations in greenfield sites (9,613 homes), and very brief, with a trajectory between 2-7 years (brownfield sites), instead of 6-12 years (greenfield sites). So, it simply not the case that the Local Plan is planning for development in urban areas and brownfield land first.

6.6 This policy also identifies different thresholds of site allocations, but it does not justify where the type and size of allocations and these thresholds come from and what the definition of broad locations, other broad locations, large, medium and small sites is. A clearer policy wording is required, setting out the spatial strategy and allocation of development per parish/area and settlement, and it should be clearly visualised for the public and future users of the Local Plan to understand the policy without doubt. Any supporting text should include contextual information, such as the definition of settlement tiers and the size of allocations.

6.7 The measures stated to address the climate emergency do not fully reflect the Local Plan's draft Climate Emergency Policy. For example, it refers to 'layouts' yet this is not in the Climate Emergency Policy. It does not mention biodiversity net gain despite this being in the Climate Emergency Policy.

6.8 It is not necessary to state in the Policy wording that larger settlements provide a more comprehensive range of services etc. as it adds no substance to the policy.

6.9 The last paragraph of Policy SP1 relates to matters that the Local Plan supports, but this long paragraph and its 10 bullet points do not add substance to the spatial strategy, and some are irrelevant to the purpose of the policy. How is the building sustainability standards related to the spatial strategy of the Local Plan? This should be better included in a climate change and sustainable construction policy. Furthermore, the wording of the policy in this section is not strong enough as to be applicable and enforceable: "*The Local Plan supports...*" is not a robust wording of the policy and would lead to its ineffectiveness.

6.10 The Local Plan supports matters such "significant new employment space provision", significantly increasing tree cover..." or "Green Belt compensatory measures", but it should clarify whether these are general aspirations or whether these are expectations that are tied to broad or specific locations and developments. Whilst the Policy SP1 specifically identifies development areas for housing in broad and specific locations, other matters are relegated to mere Local Plan "support". A clearer and more robust policy is needed so this is effective and leads to unambiguous interpretation.

**Key diagram**

6.11 The Key Diagram has a number of deficiencies that result in the Local Plan being unsound as it is not effective and not consistent with national policy.

6.12 It is a very messy diagram for the District of St Albans (which boundary is not shown), to the point where it is not possible to make out what is being proposed, we suggest that it is simplified and clarified.

*Figure 6.1: Key Diagram*

**The Settlement Hierarchy**

6.13 The Draft Local Plan does not set out the overall housing planned by settlement, so we have taken the initiative to undertake this exercise to better understand how SACDC is proposing to distribute housing, with special interest in Redbourn. We have based our calculations on Part B of the Local Plan (Local Plan Sites) and the development assumptions set out in Table 3.1 of the Draft Local Plan.

6.14 We have included the Draft Local Plan's proposed Settlement Hierarchy allocation for each settlement in the table below. Redbourn is clearly an anomaly as the proposed location of a disproportionate amount of housing for its place in the Settlement Hierarchy as a Tier 4 (Large Village). Furthermore, Redbourn is allocated significantly more residential development than London Colney, which sits higher in the Settlement Hierarchy. This is explained in more detail in the section below.

*Figure 6.2: Settlements, housing proposed and place in settlement hierarchy*

6.15 We note that Policy SP1 states that "The City of St Albans will continue to be the pre-eminent focus in the District for housing, employment, services, retail, the evening economy, education and healthcare". However, according to our calculations the City of St Albans is not the pre-eminent focus of this Plan by a considerable margin; it is Hemel Hempstead that is the focus as the proposed location for 45% of the Draft Local Plan's housing growth (on broad locations and allocations). In contrast St Albans is the proposed location for 24% of the housing growth.

*Figure 6.3: Pie chart illustrating the percentage of dwellings allocated per settlement*

6.16 Within the Parish boundary of Redbourn, the Draft Local Plan proposed to allocate 3,718 homes across 5 sites. This includes sites H1 North Hemel Hempstead, H2 East Hemel Hempstead (North), and B3 West Redbourn, M6 South of Harpenden Lane and UC33 Land Rear of 53 Snatchup. 17 hectares of the Hemel Hempstead related growth of the site is located within the Parish of Redbourn.

6.17 Approximately 30% of housing growth in the St Albans District is proposed within the Parish of Redbourn. The map below shows the Policies Map and the key allocations around Redbourn village and on the edge of Hemel Hempstead.

*Figure 6.4: Local Plan Policies Map showing the allocated sites within the Redbourn area.*

6.18 Despite the Policy's claim that St Albans is the 'pre-eminent' focus for housing and employment development in the District this is clearly a false statement as the Draft Local Plan is proposing substantially less housing in St Albans compared to Hemel Hempstead and Hemel Hempstead is the focus of 53 hectares of strategic employment land in the District. The growth proposed at Redbourn Village (and Parish) is disproportionate for its place in the Settlement Hierarchy as a Tier 4 settlement. It is a Village with a rural setting and does not have the services and facilities to support the level of proposed growth.

6.19 The supporting text of Policy SP1 (paragraph 1.33) states that the spatial strategy has been shaped by the need to address the climate emergency and that new development will be generally concentrated on the basis of the Settlement Hierarchy, giving priority to larger urban centres, which can provide a greater range of services and facilities, supports the re-use of land, can reduce the need to travel and offer greater accessibility to active travel and public transport. Redbourn Parish Council supports this approach, however it is concerned with the actual Settlement Hierarchy on Table 1.3 of the Draft Local Plan and the allocations proposed, as these do not reasonably comply with the aspiration of the policy in paragraph 1.33.

6.20 Whilst the supporting text of Policy SP1 (paragraphs 1.36-1.38) explains the general rationale for the proposed growth according to the Settlement Hierarchy with regards to St Albans City, Hemel Garden Communities, Harpenden and London Colney, it fails to explain the reasons why the Council considers that Redbourn should accommodate the fourth highest figure of dwellings for a single village (618 dwellings), and the highest figure for a single parish: 3,718 dwellings.

6.21 According to the data from the Office for National Statistics[9], the UK average household size is formed by 2.36 residents, which would mean that the proposed housing figure for Redbourn could result in approximately 1,500 new residents. According to the Settlement Hierarchy Study, Redbourn village (not parish) has a population of 5,000 residents. Therefore, the proposed allocations would result in an increase of population of the village by 30% in a period of 12 years (as expected in the proposed Housing Trajectory). This 30% increase in population in such a short period is unsustainable and would be difficult to achieve social sustainability in the village as a result.

9 https://www.ons.gov.uk/peoplepopulationandcommunity/birthsdeathsandmarriages/families/bulletins/familiesandhouseholds/2022#:~:text=Households-,There%20were%20an%20estimated%2028.2%20million%20households%20in%20the%20UK,both%202012%2 0and%20in%202022.

6.22 Redbourn Parish Council is also concerned with the implication that such increase in housing numbers would have in terms of sustainability. As set out throughout our representations, Redbourn is not an area that is well located to other uses and nor is it serviced by any choice of transport modes apart from the private automobile and poor bus services. Furthermore, whilst the village is served by the Nickey Line (cycle way), the general infrastructure and public realm in the village is not suitable for inclusive and safe cycling. This means that car usage in Redbourn is high.

6.23 There is a heavy reliance on the Nickey Line throughout SACDC's documentation in terms of its role in delivering a modal shift away from the car to sustainable modes. However, the HGC Transport Vision and Strategy (2024) states the following, indicating that its deliverability is yet to be determined and it should not be assumed that its delivery is certain:

*"work remains ongoing to further understand how the route can be improved further to increase the number of people using it for active travel purposes and enhance its strategic importance to HGC; this includes:*

- *"The HGC Nickey Line Strategy and Feasibility Study (Hemel Hempstead to Harpenden);*
- *The HCC Nickey Line Cycle Connectivity and Accesses Study; and*

6.24 *Sustrans Nickey Line Feasibility Study (Redbourn to Harpenden)"*The Settlement Hierarchy Study states that Redbourn is located at a 15-minute drive to Luton Airport, but this is not a service, or an infrastructure used by residents on a regular basis nor necessary for daily live. Rail services are not available in Redbourn, but they are in Harpenden, 3 miles to the east, which could be accessed conveniently by private automobile, and less so by an infrequent bus service or by cycle via the Nickey Line that is not accessible nor inclusive for all users. Therefore, the only reasonable option to travel to the nearest railway station is by private automobile.

6.25 The Nickey Line is an excellent cycle route for recreation, also serving for commuting for some cyclists for travelling from Redbourn to Harpenden and Hemel Hempstead. Notwithstanding its benefits, the cycle line is not lit at night and it is not surfaced appropriately. Moreover, the line is isolated and detached from what should be a wider and complete cycle network. In the absence of a cycle network that connects the Nickey Line to different areas of the village (centre, common, school, etc.), there will be difficulties in the Nickey Line being a meaningful commuting route for all. All the above means that the Nickey Line is not an attractive infrastructure for all potential users, as it is a convenient and convenient use to all users. That is all potential users regardless of age, background, gender, health, etc.

6.26 There is no justification provided by SACDC for the selected Spatial Strategy in relation to Redbourn and to the disproportionate housing figure allocated in such unsustainable location. The proposed Policy SP1 is difficult to follow, considering the existing evidence (Settlement Hierarchy Study and Sustainability Appraisal) and it fails to effectively justify SACDC's decision to look to Redbourn for additional housing. The objectives of the Draft Local Plan regarding climate change and spatial strategy, housing and infrastructure state the following:

*"Promote adaptation to and mitigation of the Climate Emergency; seek to achieve net zero by 2030, including through the Council doing everything reasonably within its power; promote the use of renewable resources, reduce greenhouse gas emissions, protect natural resources and reduce waste. [...]*

*Provide a sufficient amount of good quality housing which meets the needs of all sections of society in sustainable locations. [...]*

*Prioritise and enable the safe and attractive use of active and sustainable means of transport and reduce the need for people to travel."*

6.27 Redbourn is a village that is not sustainable due to having limited services and facilities and residents depend on private automobile for transportation. How is the proposed disproportionate housing figure proposed for Redbourn village aligned with the above-mentioned objectives of the Draft Local Plan? The Council has not provided any meaningful explanation.

6.28 Redbourn has a poor bus service, which poses a barrier to the proposed housing allocations, necessitating a comprehensive review of the Draft Local Plan's proposed site allocations and distribution of development. This revaluation is essential to ensure that future residents have viable and accessible means of public transportation within the Parish of Redbourn and to surrounding settlements.

6.29 The Settlement Hierarchy Study (2023) states that the three highest scoring settlements: St Albans, Harpenden and London Colney, whilst not scoring equally, they all score relatively well against settlement size, sustainable modes of transport, access to key services and facilities and employment. The study also states (paragraph 6.39) that Redbourn does not contain higher order services such as supermarket or leisure centre and has fewer employment sites than London Colney. Furthermore, Redbourn is a self-contained village detached from any other settlement, poorly connected to other settlements by public transport with a deficient bus service. Whilst London Colney benefits from better public transport and shorter distances to other settlements' services by foot and cycle.

6.30 Therefore, RPC considers that there is not enough justification for Redbourn being allocated a high amount of development in the settlement (and parish) where there are other locations that perform higher in the settlement hierarchy and are more sustainable in their location.

6.31 RPC considers the proposed settlement hierarchy to be ineffective not based on robust evidence, as the submitted Settlement Hierarchy Study (2023) is flawed. We explain the reasons below.

6.32 Policy SP1 states that the Settlement Hierarchy (Table 1.3) provides the basis for allocation and location of growth generally within and adjacent to the larger and most sustainable urban centres that are Tier 1 (St Albans and Hemel Hempstead) Tier 2 (Harpenden), and Tier 3 (London Colney). Redbourn and Wheathampstead are identified as Large Villages in Tier 4.

*Figure 6.5: Draft Local Plan Settlement Hierarchy (Table 1.3)*

6.33 The current policy in the Adopted Local Plan (1994) has Bricket Wood, Chiswell Green, How Wood, London Colney, Park Street / Frogmore, Redbourn and Wheathampstead designated as 'Large Villages'. We note that the Green Belt Review (Stage 1) (2013) which SACDC seeks to retain as part of its Local Plan evidence base, includes Bricket Wood, Chiswell Green, How Wood, London Colney, Park Street/Frogmore, Redbourn and Wheathampstead as part of the 'Interpretation of the Local Settlement Hierarchy' (Table 3.2).

6.34 There is no explanation in the Draft Local Plan for why there is such a fundamental proposed change to the Settlement Hierarchy in terms of Redbourn and Wheathampstead remaining as Large Villages and the other settlements being downgraded.

6.35 We have reviewed the Settlement Hierarchy Study (June 2023) yet its methodology is quite crude and simplistic. The study uses a quantitative approach to assessing settlements in St Albans District, with regards to the following factors:

- Population
- Accessibility
- Services and facilities
- Employment

6.36 Population is an important factor but should not be decisive in the Settlement Hierarchy Study, as this document is designed to inform future growth in sustainable locations. Should a settlement have a relatively low population but score very high in terms of sustainability of its location, the low population factor should not score the settlement down, and vice versa. Appendix 3 of the Settlement Hierarchy Study gives 0.5 points to Redbourn due to its population. We contest that this scoring is necessary, as the assessment of settlements, when focused towards identifying sustainability and adequacy for future growth, should not necessarily be informed by the population (quantitative data), but the qualitative data of accessibility and availability of services, transport, etc.

6.37 The approach to assessing and scoring accessibility, for instance, is too simplistic and does not consider accessibility to transport options, but merely the presence of a service in a particular location. The study should provide points according to the distance of residential and

employment areas to services, facilities and transport hubs. For example, the presence of a Nickey Line and other cycle routes in Redbourn means that the settlement scores 3 points in the transport assessment but given the route's location on the edge of the village, the conditions of the route, the limited destinations available and the intrinsic physical nature of cycling, the transportation service of the cycle route is limited. The Nickey Line is only suitable for recreational cycling currently and as highlighted previously the extension of this line is not yet evidenced so it should not be used in assumptions regarding accessibility scores.

6.38 Unfortunately, the study does not refer to these relevant accessibility factors, but merely scores the settlement based on the presence of the cycle route. A qualitative assessment would be required as well as a quantitative check.

6.39 In terms of transport, the Settlement Hierarchy Study scores equivalently different transport options. For example, the presence of five cycle routes within/between settlements is equivalent to the presence of a main line railway station. Clearly, these two cannot be compared and scored equally in principle, as railway services provide transportation services normally to nearby settlements, London and the rest of the country. On the other side, cycle infrastructure is limited as a transport option insofar as medium and large distances cannot be reasonable travelled by bicycle. Cycling is also not a feasible option for many people in the district due to disabilities, age, health, safety, etc. Rail and cycle are two different transport options that whist they are complementary to each other, cannot be compared with similar or equal scores. Similarly, bus lines are given a single point in the assessment, if there is a bus line present in a settlement. However, it is worth to question what the actual service of this bus line (and other transport option) provides. Clearly an infrequent bus line connecting two small villages should not score equally to a frequent and regular bus service that connects a village to a city or a railway hub. The approach taken in the Settlement Hierarchy Study to assess accessibility and transport is too simplistic and therefore it is flawed.

6.40 We are concerned with the scoring given to Redbourn for cycling as it is not realistic. Appendix 4 (Accessibility Audit Scoring Table and Maps) identify three cycle routes and a confused picture of what cycling infrastructure is in Redbourn:

- Bridleway Flamstead 039 – a public right of way that meanders the countryside with no large settlement destination.
- Gaddesden Lane – a road with no dedicated cycle infrastructure, shared with vehicular traffic and leading to the countryside, not relevant destinations nor larger settlements.
- The Nickey Lane – national cycle route 57 along the south edge of Redbourn, connecting it to Hemel Hempstead and Harpenden.

6.41 The above gives a more realistic picture of the deficient cycle infrastructure in Redbourn, which should not be given 3 points in the scoring as the reality is that the aren't "*three to four strategic cycle routes within or between/connecting settlements*", which is the methodology requirement for scoring 3 points. Redbourn should score 1 point only as there is a single strategic cycle route that connects the village to other settlements.

*Figure 6.6: The Nickey Line or National Cycle Route 57 shown in yellow/orange. The only strategic cycle route serving Redbourn.*

6.42 RPC is also concerned with the scoring of buses in the Settlement Hierarchy Study. Redbourn scores 3 points in this field, as there are three bus lines offering services in Redbourn. We consider that this is a very simplistic assessment of the bus services in the settlement and that is flawed by not assessing the services qualitatively.

6.43 For instance, Bus 34 does not offer service all days of the week and the last service available during the week to travel to St Albans is at 18:10. The last service to return from St Albans is at 18:25.

*Figure 6.8: Bus 34 timetable from St Albans to Redbourn (*Intalink.org.uk*)*

6.44 Similarly, the 46 bus offers hourly services between Luton and Hemel Hempstead. The service to Luton operates between 06:58 to 20:14, Monday through Saturday. The service to Hemel Hempstead operates between 07:22 and 19:32, Monday through Saturday. There is no service on Sundays.

*Figure 6.10: Bus 46 timetable to Hemel Hempstead (*Intalink.org.uk*)*

6.45 The 357 Red Rose bus offers a 'Sunday only' convoluted and slow service between Redbourn and Borehamwood via Harpenden and St Albans. The service to Borehamwood operates at 10:06, 12:36, 16:06, and 18:36. The service from Borehamwood to Redbourn arrives and terminates at 10:04, 12:34, 16:04 and 18:32.

*Figure 6.11: Bus 357 timetable to Borehamwood (*Redrosetravel.com*)*

*Figure 6.12: Bus 357 timetable of arrivals in Redbourn (*Redrosetravel.com*)*

6.46 In summary, the public transport in Redbourn is insufficient with a shortage of evening buses timetabled throughout the week, especially poor connectivity between Redbourn and Harpenden and a lack of Sunday bus services including no services between Redbourn, Hemel Hempstead or Luton and a slow and convoluted service to St Albans. The lack of available routes and the constrained frequency of services should be better reflected in the Settlement Hierarchy Study, as these services are not adequate nor sufficient to score 3 points. Other settlement hierarchy studies' methodology would normally score points if buses provide frequent services all week. This would be a more realistic and complete approach to assessing bus services in Redbourn. In the current context of bus services in Redbourn, the Settlement Hierarchy should score buses lower or zero points, instead of 3 points.

6.47 The Services and Facilities Audit (Appendix 5 of the Settlement Hierarchy Study) looks very basically at 'higher order services' and 'key services' (see below). We are concerned that this assessment is also flawed and misses several services and facilities normally found in settlements that haven't been accounted for, such as village halls, libraries, nurseries, public houses, places of worship, outdoor leisure facilities, hospitals, etc. Unfortunately, the study only refers to the following incomplete list of services and facilities:

- High order services: secondary school, supermarket, leisure centre.
- Key services: primary school, playground, convenience food shop, GP surgery

6.48 Redbourn scores the same as Bricket Wood, Chiswell Green and How Wood.

*Figure 6.13: Appendix 5 – Services and Facilities Audit Scoring (Settlement Hierarchy Study).*

6.49 Considering that How Wood and Chiswell Green were previously classified as 'Large Villages' individually there has clearly been merit in this designation. The Settlement Hierarchy (2023) gives an overall score for Chiswell Green as 9.3 and How Wood 7.4. The two settlements are functionally one settlement with a combined population of 7,557 which is greater than Redbourn (5,098). These settlements have access to a railway station whereas Redbourn is solely reliant on a bus service. We consider that How Wood and Chiswell Green should be considered as one settlement in the settlement hierarchy and at least Tier 4 as a 'Large Village'.

*Figure 6.14: Satellite Image of How Wood and Chiswell Green (Source: Google Maps)*

6.50 It is also concerning that Redbourn is given 2 points on the employment section due to having an employment allocation within the settlement area (Redbourn Industrial Park). Similarly to the comments above, the assessment is too simplistic and does not go into the detail of assessing the quality and amount of employment generation. How many work spaces are available? What typology of businesses are there?

6.51 Paragraph 6.27 of the Settlement Hierarchy Study states that "it is important that the quantitative outputs from this study are compared with qualitative data and local knowledge with regard to access to employment either within a settlement or by commuting to nearby settlements".

This has not taken place and there is no evidence in the study that the qualitative data of Redbourn has been considered in the scoring. There is only reference to the points given to Redbourn based on the presence of one built out and functioning employment allocation in the area. This assessment is also blind of any other employment areas, such as the high street businesses.

6.52 In light of all the above, we are of the view that the Settlement Hierarchy Study (2023) is flawed, overly simplistic and it is not based on robust evidence. Therefore, the study is not an adequate tool to inform the Spatial Strategy of the Draft Local Plan, and it has compromised the spatial strategy. Consequently, **Policy SP1 (Spatial Strategy) is not unsound due to it being ineffective in delivering sustainable development, it is not justified and based on proportionate evidence and it is inconsistent with national policy**.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Plan Period**

Local Plan policies should look further ahead and at least 30 years to account for the likely delivery time required for delivering strategic development. Therefore, the plan and its policies clearly need to develop a vision which covers at least 30 years from the point of Local Plan adoption. If one assumes that the Local Plan adoption date is in 2025/26 then the policies and vision will need to extend to at least 2055/2056.

**Duty to Cooperate**

There is no supporting evidence provided by the Council in the Draft Local Plan Regulation 19 Publication or associated evidence base to help demonstrate that its legal requirements to discharge the Duty to Cooperate, as part of the plan-making process, have been fulfilled.

In order to demonstrate that effective and on-going joint working, Statements of Common Ground must be prepared and maintained with Prescribed Bodies and the PPG guidance on preparing a Statement of Common Ground (SOCG) is to be followed including the need for these to be publicly available through the plan making process for transparency.

Based on the evidence currently provided, it is not clear what activities SACDC has undertaken to demonstrate discharging its legal Duty to Cooperate. Critically, SACDC cannot demonstrate that the Local Plan's policies have been developed through effective, ongoing and constructive engagement with Prescribed Bodies and that the additional necessary infrastructure is determined according to proposed growth needs.

**Housing Trajectory**

Whilst the Housing Trajectory suggests compliance with paragraph 69 of the NPPF with regards to broad locations between years 6-15, it fails to demonstrate specific, deliverable sites for the first 5 years since the intended date of adoption of the Local Plan.

**South West Hertfordshire Joint Strategic Plan**

RPC suggests that SACDC should reconsider its timetable for production of the Local Plan so that it can prepare sound evidence base and properly align with the JSP whilst working closely with its neighbouring authorities and prescribed bodies on transport modelling, infrastructure delivery, phasing and housing and employment delivery.

**SADC Vision**

RPC would recommend amendments to the Vision so it makes meaningful connections to St Albans District and to include supporting text that would give context to where the vision comes from and where it relates to.

**South West Hertfordshire Vision**

Unfortunately, the Draft Local Plan does not acknowledge the JSP's vision nor develops it into a locally contextual and specific St Albans Local Plan Vision. Both visions are separate and uncoordinated, not sharing aspirations.

**SADC Objectives**

RPC considers the Objectives to have severe faults. As a general point about the Plan's Objectives, they are not measurable and are therefore ineffective both in terms of the Local Plan Policies prepared to help deliver the respective objectives and in terms of decision making. Another problem with the proposed objectives, is that they do not directly relate to the pillars and objectives in the emerging South West Hertfordshire Joint Strategic Plan.

The objective is aimed to achieve net zero carbon emissions by 2030, but the Local Plan covers the period from 2024 until 2041: the early years of the adopted plan would have very limited impact, as the spatial strategy would not be materially delivered with allocated sites until year 4 from adoption, meaning 2029/2030. How is the Local Plan going to achieve net zero by 2030 if the bulk of its spatial strategy won't start being delivered until that same year when net zero is supposed to be achieved? Furthermore, the plan period extends until 2041, but the objective does not set out targets beyond 2030.

None of the objectives set out in the Draft Local Plan are measurable and whilst they are good aspirations for the Local Plan, they do not seem to inform the policies contained within the plan. We raise concerns with the constant conflict between proposed policies and the objectives, as these are not aligned. RPC considers that the overall objectives are supported, but their content is unsound due to these being ineffective when being translated into planning policy and ambiguous.

**SP1**

Policy SP1 states that "growth will be located to make the most sustainable use of land in urban areas and then the Green Belt" and that "the approach seeks to develop Brownfield Land first".

- Firstly, the policy says nothing about the need for exceptional circumstances to be present before any release of Green Belt through the Local Plan and what exceptional circumstances SACDC purports there to be.
- Secondly, the policy is unclear in terms of differentiating between 'land in urban areas' and 'Brownfield Land'. Not all brownfield land is in urban areas, it can often be located outside of urban areas in the Green Belt. What does SACDC consider to be 'urban areas'– does this include all settlements or just Tier 1, Tier 2 and Tier 3 settlements for example? It is unclear. This should be clarified, and there should be, ideally, a cascade of preferred location for development, that gives consideration to sustainability according to the settlement hierarchy, Green Belt location, urban area location, and previously developed land (or Brownfield Land).
- Thirdly, it is apparent from the Draft Local Plan Housing Trajectory (Table 3.2) that 'Hemel Garden Communities' (Green Belt location), 'Medium and Small Sites' (599 homes), are assumed to start delivery in 2029/2030 the same year that 'Sites Within Urban Settlements' (HELAA and UCS) and 'Green Belt – Previously Developed Land'. Furthermore, the contribution of dwellings through allocations in previously developed land is very limited (1,040 homes) when compared to allocations in greenfield sites (9,613 homes), and very brief, with a trajectory between 2-7 years (brownfield sites), instead of 6-12 years (greenfield sites). So, it simply not the case that the Local Plan is planning for development in urban areas and brownfield land first.

The last paragraph of Policy SP1 relates to matters that the Local Plan supports, but this long paragraph and its 10 bullet points do not add substance to the spatial strategy, and some are irrelevant to the purpose of the policy. How is the building sustainability standards related to the spatial strategy of the Local Plan? This should be better included in a climate change and sustainable construction policy. Furthermore, the wording of the policy in this section is not strong enough as to be applicable and enforceable: "*The Local Plan supports...*" is not a robust wording of the policy and would lead to its ineffectiveness.

This policy also identifies different thresholds of site allocations, but it does not justify where the type and size of allocations and these thresholds come from and what the definition of broad locations, other broad locations, large, medium and small sites is. A clearer policy wording is required, setting out the spatial strategy and allocation of development per parish/area and settlement, and it should be clearly visualised for the public and future users of the Local Plan to understand the policy without doubt. Any supporting text should include contextual information, such as the definition of settlement tiers and the size of allocations.

**Key diagram**

The Key Diagram has a number of deficiencies that result in the Local Plan being unsound as it is not effective and not consistent with national policy.

It is a very messy diagram for the District of St Albans (which boundary is not shown), to the point where it is not possible to make out what is being proposed, we suggest that it is simplified and clarified.

**Settlement Hierarchy Study**

We are of the view that the Settlement Hierarchy Study (2023) is flawed, overly simplistic and it is not based on robust evidence. Therefore, the study is not an adequate tool to inform the Spatial Strategy of the Draft Local Plan, and it has compromised the spatial strategy. Consequently, **Policy SP1 (Spatial Strategy) is not unsound due to it being ineffective in delivering sustainable development, it is not justified and based on proportionate evidence and it is inconsistent with national policy**.

RPC considers that there is not enough justification for Redbourn being allocated a high amount of development in the settlement (and parish) where there are other locations that perform higher in the settlement hierarchy and are more sustainable in their location.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

## 287 - Hertfordshire County Council Minerals and Waste Planning Policy Team

Submission Number: 287 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Hertfordshire County Council Name: Hertfordshire County Council Minerals and Waste Planning Policy Team

Comment Number: 1

**Type:**

* Paragraph

**Number:**

1.14

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**General Comments**

The Minerals and Waste Planning Authority welcomes the text at Paragraph 1.14 of the Draft Plan, which identifies St Albans City & District Council's (the District Council) statutory responsibility for waste management and the safeguarding of mineral resources and that the Draft Plan must be read in conjunction with the adopted Minerals and Waste Local Plan documents.

**Soundness**

The Minerals and Waste Planning Authority finds the Draft Plan to be **generally sound**, however please note our comments in relation to proposed allocation UC47 which we deem to be **unsound** in its current form. Wording has been suggested in order to address the soundness concerns identified.

**Legal Compliance**

The Minerals and Waste Planning Authority engages with the District Council on an ongoing and constructive basis throughout the year, with regular meetings (biannually) addressing progress with our respective Local Plans and covering matters relating to upcoming development proposals, any changes to national policy and guidance, and general matters of a shared strategic nature.

The Minerals and Waste Planning Authority also attends meetings a minimum of three times per year with Policy Officers from the District Council, along with Policy Officers from all of the other Local Planning Authorities (LPAs) within Hertfordshire. Similar meetings are held a minimum of three times per year with the Development Managers of all of the LPAs within the county, including the Minerals and Waste Planning Authority.

The Minerals and Waste Planning Authority therefore deems the Draft Plan to be legally compliant.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. **288 - Chris Berry**

Submission Number: 288 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: CPRE Hertfordshire Name: Chris Berry

Comment Number: 1

**Type:**

* Paragraph

**Number:**

1.5, 1.7 to 1.8, 1.28

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Inadequate and incomplete consideration of Reg 18 Draft Local Plan consultation responses**

The Council's consideration of the responses to the public consultation at the Regulation 18 stage appears to have been inadequate and incomplete. Specific major concerns were raised by CPRE Hertfordshire in its Reg 18 consultation submission which required a comprehensive response. The tabulation of consultation results presented to the Council's Planning Policy and Climate Committee on 12th December 2023 listed a total of six minimal responses to specific issues raised, amounting to fifteen lines of text in a 190 page document.

We raised significant concerns including the formulation of housing targets, the role and significance of the countryside and the ineffectiveness of the Draft Local Plan in protecting the Green Belt from inappropriate development. The Draft Local Plan continues to incorporate policy and proposals based on an unjustified housing need calculation which is assumed to form the minimum housing requirement and this major concern has not been satisfactorily addressed, leading to non-compliance with national planning policy.

The lack of an appropriate response to the previous CPRE Hertfordshire submission may suggest that comprehensive responses from other institutions and individuals have been similarly dismissed which would indicate that legitimate concerns have not been considered adequately, thereby jeopardising the soundness of the Plan. Our further representations in this Reg 19 consultation identify specific inadequacies which lead to non-compliance of the Local Plan with national policy.

**Inadequate opportunity for involvement and scrutiny by elected Council Members through the preparation stages of the Draft Local Plan**

CPRE Hertfordshire is aware that there has been a significant lack of involvement by elected Members in the consultation stages of the preparation of the Draft Local Plan which we believe amounts to a lack of compliance with best local government practice.

For a Local Plan preparation process which has been subject to failure historically, specifically at the most recent Examination in Public in 2019, the extensive and transparent involvement of democratically elected Members should be a priority for the Council. The accelerated programme of the Draft Local Plan to the Regulation 19 submission and consultation is a concern with regard to the scrutiny by Members, most of whom are new to the planning process (40 out 56 Members elected in 2022 were new councillors) and did not have the opportunity to scrutinise the Regulation 19 Local Plan adequately prior to its publication for this consultation.

The implications of this inadequate opportunity for involvement and scrutiny by Members include the late provision of extensive technical data for the Regulation 18 consultation, and an inappropriate site scoring system to inform site allocations, together with undue pressure on elected Members to make decisions without sufficient participation. We believe this has prejudiced the site selection and allocation process for the Draft Local Plan leading to unsound and unjustified decisions regarding site allocations.

**Significant inconsistencies between the District Council Plan 2024-2029 and the Draft Local Plan, particularly with respect to the role of the countryside**

Significant inconsistencies exist between the key priorities for the St Albans and City District Council Plan 2024-2029 (Combat the Climate Emergency; Deliver more social housing; Support our local economy; Enhance the District's cultural offer; Promote equality, inclusion and fairness) and the elaboration of the planning objectives for the Draft Local Plan. In recognising that the Local Plan is the means of facilitating and controlling the physical development implications of the District Council Plan, the lack of consideration of the Green Belt – which is the most significant land use designation in the SACD area - for uses other than development is a major omission in both the Council Plan and the Local Plan.

The Council Plan's identification of the Climate Emergency as a key priority is elaborated initially in objectives in Table 1.2 and subsequently in Chapter 2 Climate Emergency. There is no spatial treatment of the implications of the climate emergency nor any indication of the role of the countryside in the amelioration of climate change effects.

Similarly, Chapter 3 Sustainable Use of Land and Green Belt comprises an incomplete and partial treatment of development policy relating to the Green Belt in terms of environmental and other constraints. The Sustainability Appraisal seeks to identify the factors influencing policy options for the Draft Local Plan and choices regarding future development allocations.

The justifications provided in the Sustainability Appraisal for the selection of policy options relate solely to the provision of housing allocations which bear no relation to achievement of the "social housing" key priority of the Council Plan. Further, there is no substantive assessment of countryside protection nor enhancement, nor of the opportunities offered for appropriate economic development outside the built-up areas as the countryside appears to be regarded simply as a resource for development with no cost nor implication assigned to it in the planning balance.

This leads to an imbalanced treatment of development and planning policy and a lack of policy consistency between the Council Plan and Draft Local Plan in key areas. As another example, the Draft Local Plan fails to consider in policy terms the health and wellbeing benefits of access to the countryside.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Significant amendments are required in Draft Local Plan policies to reflect national policy as indicated in previous consultation responses. Further details are provided in specific representations to policies and paragraphs.

Further consultation will be necessary to correct the lack of Councillor involvement in the Draft Local Plan preparation.

Addition of policies and proposals to ensure consistency between the Council Plan and the Draft Local Plan.

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

Settlement Hierarchy

Policy SP1 is underpinned by the settlement hierarchy set out in Table 1.3 of the draft SALP.

The settlement hierarchy is divided into 7 tiers, with Wheathampstead falling within Tier 4 ('Large Village'). The settlement hierarchy however notes that Wheathampstead has a *"functional relationship with Harpenden for higher order services"*. Harpenden is categorised as a Tier 2 settlement ('Town').

The Settlement Hierarchy Report (June 2023) confirms that Wheathampstead has a *"population of approximately 4,500 residents, comprised of a high percentage of residents aged 65+ and a lower population of working age than the District average"*. There is therefore a clear market need for specialist care (Use Class C2) provision in Wheathampstead, despite there being no allocated sites for this use in the settlement area.

In addition, it is considered that the Settlement Hierarchy Report (June 2023) does not give appropriate weighting to the proximity of settlements and their cross-boundary relationships to services, facilities and employment. The settlement hierarchy approach for Wheathampstead has therefore not been appropriately justified, as Wheathampstead is sustainably located and well-connected to Harpenden, and therefore has the ability to contribute towards Harpenden's housing need and accommodate growth that more closely resembles the extent seen at larger settlement areas.

**294 - Hemel Business Park Ltd**

Submission Number: 294 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Alex Cole

On Behalf Of Company/Organisation: Hemel Business Park Ltd Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

[Please see attachment for full submission]

**Re: Representations to the Regulation 19 Consultation on the Draft Local Plan 2041 –Appspond Lane, St Albans, Hertfordshire**

These representations are submitted on behalf of Hemel Business Park Ltd. (hereafter 'HBP') who own and are promoting land at Appspond Lane, St Albans, Hertfordshire, in response to the St Albans Draft Local Plan 2041 Regulation 19 Consultation.

Overall, HBP consider that the Plan as drafted is in need of significant change in order to demonstrate soundness under public examination as required by paragraph 35 of the National Planning Policy Framework (2023). This is in the context of the Local Planning Authority accelerating its programme to prepare the Plan which in our view if it is to be found sound under public examination. The programme towards adoption has been accelerated in order to avoid the increased housing requirement arising from proposed changes to national planning policy, and this acceleration comes at the risk of the Plan's soundness. Alongside the Plan's approach to housing strategy, HBP also has concerns around the proposed strategy for meeting employment needs over the Plan period.

...

**National Planning Policy requirements**

These representations have been prepared in the context of national planning policy and legislation setting out the necessary approach to plan-making and the tests of "soundness." Section 20(5) of the Planning and Compulsory Purchase Act 2004 requires that all development plan documents

must be submitted for independent examination to assess whether they are “sound”. Further to this, Section 19 of the 2004 Act requires local planning authorities to have regard to various matters, including national policies, such as those set out in the National Planning Policy Framework (“NPPF”), alongside other advice contained in guidance issued by the Secretary of State.

There is no statutory definition of soundness, however paragraph 35 of the NPPF states that to be sound, a Local Plan should be:

- **Positively prepared** – providing a strategy which, as a minimum, seeks to meet the area’s objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- **Effective** – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant.

**Proposed Changes to National Planning Policy**

On 30 July 2024, the new Labour Government published a draft of the revised NPPF. The new draft emphasises, amongst other things, accelerating housing delivery and supporting economic development.

A revised Standard Method, which sets out each Local Planning Authority’s (LPA’s) housing requirement has been published alongside the draft NPPF. For both clarity, a spreadsheet has been published that sets out the new target alongside the previous one. For St Albans, the requirement has increased from 885 dwellings per annum (dpa) to 1,544 dpa, an uplift of 656 dpa.

Appendix 1 of the draft NPPF sets out the implementation timeline. For the purposes of Plan making, the document will become effective (with all Local Plans subject to both it and the new housing figure) on the Implementation Date: this is precisely one month after the Publication Date of the final version. There are three exceptions:

a) If a Local Plan has been submitted for examination by the Implementation Date;

b) If the Local Plan is at Regulation 19 stage by the Implementation Date, and has a housing requirement
no more than 200 dpa fewer of the revised requirement; or

c) Plan is a ‘Part 2’ document that does not introduce new strategic policies setting the housing requirement.

**On the Regulation 19 consultation process**
**Timeline and Scope**

The current Local Plan for St Albans was adopted in 1994, and the need for a new Plan is significant. The previous timetable for the Plan anticipated a Regulation 19 consultation in October/December 2024, with submission to the Secretary of State three months later in March 2025. This was set out in the Local Development Scheme (LDS) published in February 2024. As recently as the Council’s Planning Policy and Climate Committee meeting on 25 June 2024, St Albans were working towards the timetable.

At a meeting of the Planning Policy and Climate Change Committee on 12 September 2024, the Council assessed the likely impact of the draft NPPF on their emerging Plan, and considered three options for their emerging Plan going forwards:

1. Submit for examination before the Implementation Date (housing target 885 dpa);
2. Publish Regulation 19 draft before the Implementation Date (housing target of 1,344 dpa [within 200 of the revised Standard Method figure]); or
3. Restart Plan making process (housing target of 1,544 dpa).

The Council resolved to pursue Option A, which has brought forward both the Regulation 19 consultation by one month, and the submission of the Plan by three to December 2024. The table below compares the LDS from February 2024 with the timeline currently available on the Council's website.

[Please see attachment for Table]

Considering the need for a new Plan, an ambitious timeframe that seeks the earliest possible adoption date is to be welcomed (though we note that the adoption date is unchanged in the revised LDS). However, seeking rapidly to progress the Plan must not come at the cost of its soundness. Such haste risks the Plan being withdrawn from examination, further delaying the ultimate adoption of a much needed and up-to-date Local Plan.

Under the current timeframe, St Albans are planning to submit the Plan within a month of the Regulation 19 consultation ending. St Albans need to review the responses to Regulation 19 carefully, attending to feedback on both soundness and legal compliance. This is essential to ensuring that the Plan as submitted has the best possible chance of being adopted.

In our view, a submission date of December 2024 allows insufficient time to ensure that this process is appropriately carried out.

There are additional concerns around the scope of the consultation being undertaken As set out in legislation, the local authority 'must invite [stakeholders] to make representations to the local planning authority about what

a local plan [...] ought to contain'[1]. Generally speaking, council's rarely impose constraints on what consultees can (or ought to) submit. However, guidance issued by St Albans for this consultation states that it is a 'technical exercise', and that 'all representations on the draft Local Plan must related to a matter of legal compliance or a matter of soundness.'

[Footnote 1: Town and Country Planning (Local Planning) (England) Regulations 2012, Section 18(1)(b). Regulation 19 of the statutory instrument make reference S.18(1)(b) in setting out what the Regulation 19 consultation ought to]

In practical terms, the 'test of soundness' (set out in paragraph 35 of the NPPF and described above) is sufficiently broad to allow for a searching assessment of the draft Plan, but it is considered to be an unnesecary constraint that risks preventing stakeholders from providing meaningful comment on the Plan's strategy and approach that, if appropriately considered, could ensure that the Plan is adopted.

In order to ensure that the Regulation 19 process is as effective as possible, helping to developed a robust Plan for submission, St Albans ought to welcome all comments relating to the Plan, and making sure they give themselves enough time to review responses and make changes to the Plan where necessary.

**Differences from Regulation 18 Draft**

The Regulation 18 draft provided for 15,066 dwellings, in contrast to which the Regulation 19 version plans for only 14,603 dwellings. This reduction has been achieved via two changes from the previous drafting:

- The annual target is 885 units, rather than 888 (a reduction of 51 dwelling over the Plan period); and
- 'Year 1' of the Plan covers only six months (October 2024 to March 2041). The requirement for Year 1 is therefore only 443 units (removing an additional 442 dwellings from the housing requirement).

This reduction has been achieved by lowing the indicative capacity of draft housing allocations. There is nothing in the evidence base to suggest that this reduction has been driven by revised sustainability appraisals, nor any other evidence-based site assessments.

**On The Council's approach to the Regulation 19 process**

St Alban's have brought forward the Regulation 19 process, following a meeting of the Planning Policy and Climate Change Committee on 12 September 2024. Faced with a rising housing requirement under emerging national policy, St Albans reviewed options and resolved to advance with the current draft of the Plan at pace instead of being obliged to accommodate increased housing requirements set out in emerging national planning policy.

Beyond this, they have reduced the housing target to the greatest possible degree: taking advantage of the latest Standard Method requirement to lower the housing target by three dwellings a year, and removing six months from beginning of the Plan to remove an additional 442 dwellings.

These reductions have not been driven by a reduction in available sites, nor updated evidence on site capacities. As a strategy, this is neither positively prepared nor is it effective. It is also not consistent with national policy.

Paragraph 128 of the current NPPF states that planning policies should support development that make efficient use of land. As per paragraph 129:

*Where there is an existing or anticipated shortage of land for meeting identified housing needs, it is especially important that planning policies and decisions avoid homes being built at low densities, and ensure that developments make optimal use of the potential of each site.*

St Alban's housing requirement under emerging national policy is set meaningfully to increase, and despite the fact that the Council are not yet beholden to this figure, they are in no position to reduce site capacities in the short term and ought to plan positively and sustainably for future growth. By reducing the capacity of sites subject of draft allocations with capacities previously considered sustainable in the former consultation document, the Plan does not make efficient use of land, and fails to meet a key requirement of national policy.

In order to be considered justified, a Plan needs to advance an appropriate strategy that takes into account the 'reasonable alternatives' Clearly, there is a reasonable alternative (as set out in the previous draft of the Plan) which could allow for the delivery of an additional 463 dwellings over the Plan period without increasing the total quantum of allocated land.

This additional capacity could, if included within the Plan strategy, serve to aid unmet need in other authorities, who will not necessarily be able to avoid increased housing requirements, and may not be able to meet these requirements in full. A set out above, recent revisions to the Plan-making time frame risks delivering a rushed Plan that neither properly considers *inter alia* the needs of the wider area, nor makes appropriate changes prior to submission. In this the Plan is not positively prepared.

For these reasons alone, the Plan cannot be considered sound, and significant revisions are required.

...

**Conclusion**

As set out above, the St Albans' Regulation 19 Draft Local Plan 2041 does not meet the tests of soundness, as set out in the NPPF, for the following reasons:

- **Positively prepared** – the Plan does not state its employment need at all, nor its supply in any detail. It is therefore not possible to establish whether it meets, as a minimum, the area's objectively assessed needs. The Plan also claims to have an oversupply of employment land that can contribute to neighbouring unmet need, but precise figures are not provided, an approach which lacks clarity. Further, a review of the relevant evidence suggests that the Plan's claim that it meets its need is subject to challenge.
- **Justified** – the chosen strategy for employment land delivery is to allocate a single strategic site. This leaves no space for contingency in the event that this site doesn't come forward, and the site itself may not provide enough land to delivery the necessary level of B2/B8 floorspace over the Plan period. Aside from the quantitative need, there are concerns that this site will not meet the qualitative requirements of the area, which is characterised by micro, small, and medium sized business. The allocation also resists logistics development, which throws into further doubt the Plan's ability to meet anticipated needs.
- **Effective** – the Plan seemingly puts forward no timelines for site deliveries, and it is therefore unclear whether or not the needs of the area can be met over the course of the Plan, this is particularly pertinent for employment need, which is principally tied to a single strategic allocation.
- **Consistent with national policy** – key requirements of national planning policy, such as the need to make effective use of land, are not met by the Plan's strategy, which has systematically reduced the capacity of a large number of residential allocations for reasons that appear to have little to do with the site's themselves. Rather, it appears that this has been driven by the desire to reduce the housing requirement (and consequently the supply) as much as possible.

Beyond concerns with the Plan's broad strategy, the Land at Appspond Lane ought to be allocated for employment development to further secure the Plan's soundness:

- **Positively prepared** – Allocating the site will go some way to ensuring that the Plan can meet its objectively identified quantitatively and qualitatively identified need.
- **Justified** – The site's status as a existing employment site, along with the sustained efforts to secure its redevelopment, make it clear that the site will come forward, and can be sustainably relied upon to contribute to the Plan's employment land supply
- **Effective** – The site is a previously developed site in active employment use, and ought to be supported and allocated for additional development in order to maximise the site's efficiency and ensure the best possible use of the site and its land.
- **Consistent with national policy** – allow for the stie to come forward, supported under a site allocation, to ensure that the best use is made of a poorly performing and previously development Green Belt site in active employment use, is considered to be a sound strategy that would be entirely in keeping with standards set by national planning policy.

Evidently, the Plan requires significant alteration if it is to be found sound under examination, and this should include:

- A clearly stated employment land requirement;
- Clearly identify employment land supply (including the indicative hectarage of all proposed employment uses set against their requirements);
- Clear timeframes for site delivery;
- A greater range of employment sites in order to provide *inter* alia flexibility and contingency;
- Greater efficiency in the use of allocated land in order to ensure that this tenet of national planning policy is met; and
- The inclusion of a site allocation for Land at Appspond Lane to identify the site for employment development.

Making these changes are necessary if the Plan is to be considered sound, and capable of progression through examination to formal adoption.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

[Please see attachment for full submission]

### 295 - Smallford Business Park Ltd

Submission Number: 295 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Alex Cole

On Behalf Of Company/Organisation: Smallford Business Park Ltd Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

[Please see attachment for full submission]

**Re: Representations to the Regulation 19 Consultation on the Draft Local Plan 2041 –Smallford Works, Smallford Lane, St Albans, AL4 0SA**

These representations are submitted on behalf of Smallford Business Park Ltd. (hereafter 'SBP') who own and are promoting land at Smallford Works, Smallford Lane, St Albans, AL4 0SA, in response to the St Albans Draft Local Plan 2041 Regulation 19 Consultation.

Overall, SBP consider that the Plan as drafted is in need of significant change in order to demonstrate soundness under public examination as required by paragraph 35 of the National Planning Policy Framework (2023). This is in the context of the Local Planning Authority accelerating its programme to prepare the Plan which in our view if it is to be found sound under public examination. The programme towards adoption has been accelerated in order to avoid the increased housing requirement arising from proposed changes to national planning policy, and this acceleration comes at the risk of the Plan's soundness. Alongside the Plan's approach to housing strategy, SBP also has concerns around the proposed strategy for meeting employment needs over the Plan period.

These representations follow on from previous submissions made to past consultations, including to the Regulation 18 draft of the Local Plan in September 2023.

**The Site**

Smallford Works is a brownfield site, measuring approximately 3.34 ha (8.25 ac), currently in employment use. It is located to the west of Smallford Lane, three miles east of St Albans City Centre. The North Orbital Road (A414 dual carriageway) is access less than half a mile to the south. Smallford village is located on the other side of Smallford Lane, and extends to the A41.

Built development on the site comprises a complex of industrial uses and storage yards, partitioned and providing a variety of open storage type uses (Use Class B8). This includes the storage of construction materials, plant, portacabins, commercial vehicles, and other related items.

The site is designated within both the Metropolitan Green Belt and the Colney Heath Farmland Landscape Character Area.

The site is designated within the draft Plan as previously developed land within the Green Belt, and has an allocation for residential development, with an indicative capacity of 58 units. It is important to note that this is an unexplained reduction from the 80 unit capacity in the Regulation 18 draft, and appears to ignore previous representations to the Regulation 18 consultation, in which SBP clearly stated their intention to retain the site in its existing employment use with potential to deliver intensified employment development on the site in the future.

**National Planning Policy requirements**

These representations have been prepared in the context of national planning policy and legislation setting out the necessary approach to plan-making and the tests of "soundness." Section 20(5) of the Planning and Compulsory Purchase Act 2004 requires that all development plan documents must be submitted for independent examination to assess whether they are "sound". Further to this, Section 19 of the 2004 Act requires local planning authorities to have regard to various matters, including national policies, such as those set out in the National Planning Policy Framework ("NPPF"), alongside other advice contained in guidance issued by the Secretary of State.

There is no statutory definition of soundness, however paragraph 35 of the NPPF states that to be sound, a Local Plan should be:

- **Positively prepared** – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;

- **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- **Effective** – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant.

**Proposed Changes to National Planning Policy**

On 30 July 2024, the new Labour Government published a draft of the revised NPPF. The new draft emphasises, amongst other things, accelerating housing delivery and supporting economic development.

A revised Standard Method, which sets out each Local Planning Authority's (LPA's) housing requirement has been published alongside the draft NPPF. For both clarity, a spreadsheet has been published that sets out the new target alongside the previous one. For St Albans, the requirement has increased from 885 dwellings per annum (dpa) to 1,544 dpa, an uplift of 656 dpa.

Appendix 1 of the draft NPPF sets out the implementation timeline. For the purposes of Plan making, the document will become effective (with all Local Plans subject to both it and the new housing figure) on the Implementation Date: this is precisely one month after the Publication Date of the final version. There are three exceptions:

a) If a Local Plan has been submitted for examination by the Implementation Date;

b) If the Local Plan is at Regulation 19 stage by the Implementation Date, and has a housing requirement no more than 200 dpa fewer of the revised requirement; or

c) Plan is a 'Part 2' document that does not introduce new strategic policies setting the housing requirement.

**On the Regulation 19 consultation process**
**Timeline and Scope**

The current Local Plan for St Albans was adopted in 1994, and the need for a new Plan is significant. The previous timetable for the Plan anticipated a Regulation 19 consultation in October/December 2024, with submission to the Secretary of State three months later in March 2025. This was set out in the Local Development Scheme (LDS) published in February 2024. As recently as the Council's Planning Policy and Climate Committee meeting on 25 June 2024, St Albans were working towards the timetable.

At a meeting of the Planning Policy and Climate Change Committee on 12 September 2024, the Council assessed the likely impact of the draft NPPF on their emerging Plan, and considered three options for their emerging Plan going forwards:

A. Submit for examination before the Implementation Date (housing target 885 dpa);

B. Publish Regulation 19 draft before the Implementation Date (housing target of 1,344 dpa [within 200 of the revised Standard Method figure]); or

C. Restart Plan making process (housing target of 1,544 dpa).

The Council resolved to pursue Option A, which has brought forward both the Regulation 19 consultation by one month, and the submission of the Plan by three to December 2024. The table below compares the LDS from February 2024 with the timeline currently available on the Council's website.

[Please see attachment for Table]

Considering the need for a new Plan, an ambitious timeframe that seeks the earliest possible adoption date is to be welcomed (though we note that the adoption date is unchanged in the revised LDS). However, seeking rapidly to progress the Plan must not come at the cost of its soundness. Such haste risks the Plan being withdrawn from examination, further delaying the ultimate adoption of a much needed and up-to-date Local Plan.

Under the current timeframe, St Albans are planning to submit the Plan within a month of the Regulation 19 consultation ending. St Albans need to review the responses to Regulation 19 carefully, attending to feedback on both soundness and legal compliance. This is essential to ensuring that the Plan as submitted has the best possible chance of being adopted.

In our view, a submission date of December 2024 allows insufficient time to ensure that this process is appropriately carried out.

There are additional concerns around the scope of the consultation being undertaken As set out in legislation, the local authority 'must invite [stakeholders] to make representations to the local planning authority about what a local plan [...] ought to contain'[1]. Generally speaking, council's rarely impose constraints on what consultees can (or ought to) submit. However, guidance issued by St Albans for this consultation states that it is a 'technical exercise', and that 'all representations on the draft Local Plan must related to a matter of legal compliance or a matter of soundness.'

[Footnote 1: Town and Country Planning (Local Planning) (England) Regulations 2012, Section 18(1)(b). Regulation 19 of the statutory instrument make reference S.18(1)(b) in setting out what the Regulation 19 consultation ought to]

In practical terms, the 'test of soundness' (set out in paragraph 35 of the NPPF and described above) is sufficiently broad to allow for a searching assessment of the draft Plan, but it is considered to be an unnesecary constraint that risks preventing stakeholders from providing meaningful comment on the Plan's strategy and approach that, if appropriately considered, could ensure that the Plan is adopted.

In order to ensure that the Regulation 19 process is as effective as possible, helping to developed a robust Plan for submission, St Albans ought to welcome all comments relating to the Plan, and making sure they give themselves enough time to review responses and make changes to the Plan where necessary.

**Differences from Regulation 18 Draft**

The Regulation 18 draft provided for 15,066 dwellings, in contrast to which the Regulation 19 version plans for only 14,603 dwellings. This reduction has been achieved via two changes from the previous drafting:

- The annual target is 885 units, rather than 888 (a reduction of 51 dwelling over the Plan period); and
- 'Year 1' of the Plan covers only six months (October 2024 to March 2041). The requirement for Year 1 is therefore only 443 units (removing an additional 442 dwellings from the housing requirement).

This reduction has been achieved by lowing the indicative capacity of draft housing allocations. There is nothing in the evidence base to suggest that this reduction has been driven by revised sustainability appraisals, nor any other evidence-based site assessments.

**On The Council's approach to the Regulation 19 process**

St Alban's have brought forward the Regulation 19 process, following a meeting of the Planning Policy and Climate Change Committee on 12 September 2024. Faced with a rising housing requirement under emerging national policy, St Albans reviewed options and resolved to advance with the current draft of the Plan at pace instead of being obliged to accommodate increased housing requirements set out in emerging national planning policy.

Beyond this, they have reduced the housing target to the greatest possible degree: taking advantage of the latest Standard Method requirement to lower the housing target by three dwellings a year, and removing six months from beginning of the Plan to remove an additional 442 dwellings.

These reductions have not been driven by a reduction in available sites, nor updated evidence on site capacities. As a strategy, this is neither positively prepared nor is it effective. It is also not consistent with national policy.

Paragraph 128 of the current NPPF states that planning policies should support development that make efficient use of land. As per paragraph 129:

*Where there is an existing or anticipated shortage of land for meeting identified housing needs, it is especially important that planning policies and decisions avoid homes being built at low densities, and ensure that developments make optimal use of the potential of each site.*

St Alban's housing requirement under emerging national policy is set meaningfully to increase, and despite the fact that the Council are not yet beholden to this figure, they are in no position to reduce site capacities in the short term and ought to plan positively and sustainably for future growth. By reducing the capacity of sites subject of draft allocations with capacities previously considered sustainable in the former consultation document, the Plan does not make efficient use of land, and fails to meet a key requirement of national policy.

In order to be considered justified, a Plan needs to advance an appropriate strategy that takes into account the 'reasonable alternatives' Clearly, there is a reasonable alternative (as set out in the previous draft of the Plan) which could allow for the delivery of an additional 463 dwellings over the Plan period without increasing the total quantum of allocated land.

This additional capacity could, if included within the Plan strategy, serve to aid unmet need in other authorities, who will not necessarily be able to avoid increased housing requirements, and may not be able to meet these requirements in full. A set out above, recent revisions to the Plan-making time frame risks delivering a rushed Plan that neither properly considers *inter alia* the needs of the wider area, nor makes appropriate changes prior to submission. In this the Plan is not positively prepared.

For these reasons alone, the Plan cannot be considered sound, and significant revisions are required.

...

**Conclusion**

As set out above, the St Albans' Regulation 19 Draft Local Plan 2041 does not meet the tests of soundness, as set out in the NPPF, for the following reasons:

- **Positively prepared** – the Plan does not state its employment need at all, nor its supply in any detail. It is therefore not possible to establish whether it meets, as a minimum, the area's objectively assessed needs. The Plan also claims to have an oversupply of employment land that can contribute to neighbouring unmet need, but precise figures are not provided, an approach which lacks clarity. Further, a review of the relevant evidence suggests that the Plan's claim that it meets its need is subject to challenge.
- **Justified** – the chosen strategy for employment land delivery is to allocate a single strategic site. This leaves no space for contingency in the event that this site doesn't come forward, and the site itself may not provide enough land to delivery the necessary level of B2/B8 floorspace over the Plan period. Aside from the quantitative need, there are concerns that this site will not meet the qualitative requirements of the area, which is characterised by micro, small, and medium sized business. The allocation also resists logistics development, which throws into further doubt the Plan's ability to meet anticipated needs.

- **Effective** – the Plan seemingly puts forward no timelines for site deliveries, and it is therefore unclear whether or not the needs of the area can be met over the course of the Plan, this is particularly pertinent for employment need, which is principally tied to a single strategic allocation.
- **Consistent with national policy** – key requirements of national planning policy, such as the need to make effective use of land, are not met by the Plan's strategy, which has systematically reduced the capacity of a large number of residential allocations for reasons that appear to have little to do with the site's themselves. Rather, it appears that this has been driven by the desire to reduce the housing requirement (and consequently the supply) as much as possible.

Beyond concerns with the Plan's broad strategy, the details of the allocation at Smallford Works does not meet the test of soundness either:

- **Positively prepared** – the site will not be providing housing on the site. This reduces the Plan's overall housing supply figure, risking its ability to meet, as a minimum, its objectively assessed need for residential development. The Plan and its evidence base also seems to ignore the fact that delivering employment on the site would reduce the stock of employment land within St Albans, which would need to be addressed through appropriate allocation of replacement land. For reasons stated above, the allocation at Hemel Hempstead (Central) may be both quantitatively and qualitatively unable to accommodate this;
- **Justified** – the allocated use is inconsistent with representations previously submitted, clearly stating the site is being promoted for employment use and not residential development. In this, the Plan fails to account for clearly stated evidence regarding the site allocation;
- **Effective** – whilst allocating the site for development is wholly supported, a far more appropriate strategy for redeveloping the site would be to identify it for intensifying employment development consider its current status as an employment site in active use;
- **Consistent with national policy** – the principle of the site's allocation is consistent with relevant national policy, but the details are not: the proposed loss of employment floorspace without appropriate replacement, and the inefficient reduction of the site's developable capacity do not accord with central tenants of national planning policy.

Evidently, the Plan requires significant alteration if it is to be found sound under examination, and this should include:

- A clearly stated employment land requirement;
- Clearly identify employment land supply (including the indicative hectarage of all proposed employment uses set against their requirements);
- Clear timeframes for site delivery;
- A greater range of employment sites in order to provide *inter* alia flexibility and contingency;
- Greater efficiency in the use of allocated land in order to ensure that this tenet of national planning policy is met; and
- Alteration site allocation P3 (Smallford Works) to identify the site for intensifying employment development.

Making these changes are necessary if the Plan is to be considered sound, and capable of progression through examination to formal adoption.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

### 308 - Look! St Albans

Submission Number: 308 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Look! St Albans Name: Look! St Albans

Comment Number: 3

**Type:**

* Table

**Number:**

1.1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

The Officers of Look! St Albans have wrestled with the question should we make a representation or not at this stage, given St Albans is in desperate need of an up-to-date Local Plan. The last being dated 1994. As that Local Plan ran its course St Albans District has undergone unprecedented development pressure and continues today to be subject of speculative development, including

substantial changes of use to meet the demand for new homes. There are many within the wider community who naturally feel concerns at such rapid change and feel they have little control or say in these changes which have manifested into trenchant positions, by some, against any development. Local groups such as CLASH, STRIFE and RAGE have come together to oppose new development which we agree makes life even harder for our LPA.

*However, this should not mean that we should not strive for quality community engagement. There should be a realization that step changes are needed to finally bring forward a Local Plan which the community can, in the main part, support.* We know from experience that this is not naturally an easy road, however the rewards of the effort are incalculable.

Regulation 18 took place in high summer 2023. Apart from a report to the Planning and Climate Change Committee of selected salient comments from the community, were in the most part merely noted. There appear very few changes to the Local Plan policies before us today to those that went out to consultation at Regulation 18. *It was reported to Councillors that the Regulation 18 consultation produced no 'red flags' or 'showstoppers'. We cannot see any evidence that any community views were taken on board.*

Regrettably it appears and has been widely reported that this Local Plan has been accelerated from its previous timetable to try and beat the expected rise in number of new homes the Council will need to plan for within the Local Plan period.

This was a political decision and the LPA has acknowledged there are 'heightened risks' in submitting this Local Plan for examination now. However they are considered to be 'risks well worth taking'. We understand that the Council proposes a review of the Plan, if passed, in 5 years' time. However, given our history on this process we think it not unreasonable to have doubts on the Council's ability to stick to this timetable.

**Our reason for submitting a representation at Regulation 19**

**Justified: There is insufficient evidence of participation or influence by the local community on matters of design post Consultation 18.**

We cannot see material evidence that the participation of the community post Regulation 18 has been included and reflected in the Local Plan on design, which will be submitted for Examination immediately after the closure of the Regulation 19 Consultation.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Justified: There is insufficient evidence of participation or influence by the local community on matters of design post Consultation 18.**

We cannot see material evidence that the participation of the community post Regulation 18 has been included and reflected in the Local Plan on design, which will be submitted for Examination immediately after the closure of the Regulation 19 Consultation.

## 309 - Kelly Brown

Submission Number: 309 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Kelly Brown

Comment Number: 1

### Type:

* Policy

### Number:

SP1

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

I have a number of objections to the proposed local plan which I would like logged please.

- It doesn't appear like there has been any systematic process regrading the identification of green belt locations, they have just been selected at random.
- The regulation 18 consultation was snuck through during the summer last year where multiple residents, myself included, were on holiday, so had little opportunity to object.
- I've been informed that the council intend to go to Examination of the regulation 19 plan in 3 weeks time. How on earth are you intending to do a properly examination of the comments and objections to the plan in this time frame? As a resident of St Albans, it feels like this is another attempt to undermine residents and 'sneak the plan through' as quickly as possible. This is simply unacceptable.

Relating to site L2 - Watling Street

- Flaws around the Arup Green Belt review process - these have not been addressed, yet the proposals have been brought forward again in the Regulation 19 process.
- The Watling street site has received strong objection from many people, indeed the planning application was rejected in January(by the council). It is completely nonsensical that it is included in the regulation 19 process.

Thank you for taking these objections into account, and I look forward to you listening to the residents of St Albans as opposed to forcing this plan through.

On Behalf Of Company/Organisation: Bloor Homes and Department of Health & Social Care Name:

Comment Number: 1

### Type:

* Paragraph

### Number:

1.9 and 1.16

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

**Duty to Cooperate Paragraph 1.9**

There is at this stage no documentation in terms of the evidence base of any discussions that have taken place with neighbouring authorities or statutory consultees, although we understand that discussions have taken place with Dacorum in respect of the HGC.

The Duty to Co-operate is a legal requirement on submission of the Plan. The lack of any evidence was an issue at the Reg 18 of the Local Plan in September 2023 upon which we submitted representations.

Paragraph 24 of the NPPF (December 2023) states that local authorities and councils are under a duty to cooperate with each other and with other prescribed bodies on strategic matters that cross administrative boundaries. Furthermore, this duty to be effective requires on-going joint working between strategic policy making authorities and relevant bodies, this is considered to be integral to the production of a positively prepared and justified strategy.

Paragraph 26 states:

***"In particular, joint working should help to determine where additional infrastructure is necessary, and whether development needs that cannot be met wholly within a particular plan area could be met elsewhere."***

Paragraph 27 states:

***"In order to demonstrate effective and on-going joint working, strategic policymaking authorities should prepare and maintain one or more statements of common ground, documenting the cross-boundary matters being addressed and progress in cooperating to address these. These should be produced using the approach set out in national planning guidance and be made publicly available throughout the plan-making process to provide transparency."***(my emphasis)

The Statements of Common Ground and evidence of the Duty to Cooperate should be produced by the time the Draft Plan is published so that it can provide stakeholders and the community with a transparent picture of how they have collaborated. The PPG Plan Making states:

***"Inspectors will expect to see that strategic policy making authorities have addressed key strategic matters through effective joint working, and not deferred them to subsequent plan updates..."***Paragraph: 022 Reference ID: 61-022-20190315 Revision date: 15 03 2019

The only available document at the Reg 19 consultation stage is a Statement of Common Ground (S of CG) which is based on a template produced by the Planning Advisory Service. This S of CG acknowledges that more evidence is required and states:

"***More detailed matters specific to SADC and individual Duty to Co-operate partner organisations will be covered by individual Statements of Common Ground between SADC and the relevant organisation****."*

Once again, the Council is failing to demonstrate that it is fulfilling the Duty to Cooperate, this one of the key issues the Inspector's identified previously in their letter of 14th April 2020.

It is noted in the document "*New SADC Local Plan – Responding to Issues Raised by Inspectors in 2020 – Evidence Paper" that reference is made to "during Reg 19 DtC Councillor meetings are proposed for October 2024*". However, this is taking place during the current Reg 19 consultation, so the outcome is unknown, but the document simply states, *"will update further at submission stage".* Consequently, there is no transparency in the preparation of the Plan in respect of the legal Duty to Cooperate being fulfilled.

Without any evidence as to the discussions between the authorities as to their position with regard to housing supply against identified needs it is not possible to say whether or not the Council has met the Duty to Cooperate. Before the Plan is submitted in December 2024 the evidence will need to have been prepared so that it can be submitted with the Plan for examination.

The PPG Plan Making sets out at paragraph 011 Reference ID: 61-011-20190315 what is expected to be included in the Statement of Common Ground: in particular, "*a record of where agreements have (or have not) been reached on key strategic matters, including the process for reaching agreements on these; and"*

Most recently this has been raised as in issue in Inspectors preliminary questions to Bristol City Council (18th July 2024) the Council has not submitted a specific 'Duty to Cooperate' statement as advocated by paragraph 1.15 of the Local Plan Procedure Guide. The Inspectors state:

"***PQ1. It would be helpful if the Council could provide, or point us to, specific***

***evidence relating to when and how the Council engaged constructively, actively and on an on-going basis with other local authorities on strategic matters, including but not limited to the matter of unmet housing need? In responding, the Council should clearly set out the timing and chronology of engagement, the main mechanisms used and what matters are outstanding, if any, and what the latest position is on these. PQ2. Could the Council also provide, or point us to, evidence relating to how the requirements of the Duty have been***

***met with respect to prescribed bodies other than local authorities? Any response should also include details of the strategic matters the Council needed to address, what was done to discharge the Duty, what was agreed and what matters, if any, are outstanding****."*

This was also raised again in the Inspectors Supplementary Questions in October 2024. The Inspectors have specifically requested that in order to:

"***assist in our consideration of this issue, we would benefit from a specific Duty to Cooperate Topic Paper or Statement, which provides a more detailed and structured account of how the Council has engaged constructively, actively and on an on-going basis to maximise the effectiveness of the Plan. We would again draw your attention to paragraph 1.15 of the Local Plan Procedure Guide for advice on what such a statement should include."***

At present the SADC have not provided the appropriate evidence. There is a concern that this will be retrofitted in order to make the submission in advance of the publication of the new NPPF and in order to take advantage of the proposed transition arrangements.

It is acknowledged that there is an urgent need to progress a new Local Plan, given the Council's history of being unable to prepare and adopt a Plan since 1994. In this context the Council received from the Secretary of State for Housing Communities and Local Government in December 2023 a letter directing the Council to revise its LDS within 12 weeks of the publication of the revised NPPF.

The Council revised the LDS with a date of March 2025 for submission of the Local Plan for examination.

It is evident that since the publication of the NPPF for consultation in July 2024 which proposed a number of significant changes and the proposed changes to the Standard Method (SM) which increases the housing requirement from 885 dwellings per annum to 1,544 dwellings per annum i.e. a 75% increase, that the Council have decided to bring forward the consultation and submission of the local plan in order to take advantage of the transition arrangements. The transition arrangements as currently proposed enable a Council to submit its Local Plan for examination within one month of the date of the publication of the NPPF. (The NPPF is expected to be published before the end of 2024).

The proposed revisions will make significant changes to the current NPPF and there is a strong possibility that many of St Albans District Council (SADC) neighbours, will be required to prepare plans that are consistent with the changes being proposed to the NPPF, should they be adopted.

The report to Full Council on 16th October outlines the implications of the proposed changes to the SM:

"***Of all the authorities in Hertfordshire SADC is the most affected by the housing***

***numbers***

***change:***

- ***St Albans +75%***
- ***Hertsmere +31%***
- ***Dacorum +29%***
- ***Broxbourne +16%***
- ***Three Rivers +15%***
- ***East Herts +13%***
- ***North Herts +9%***
- ***Stevenage +6%***
- ***Watford -6%***
- ***Welwyn Hatfield -8%"***

As stated in paragraph 3.18 of the report to Full Council, “This would mean an extra 11,220 homes in the District to 2041, all in the Green Belt.”

It is noted that the Council have already pre-approved the Local Plan for submission to the Secretary of State at its meeting of Full Council on 16th October 2024, which at this stage was only three weeks into the consultation on the Reg 19 Plan and three weeks prior to the end of the consultation period on the 8th November. This is somewhat unusual for a Council to give approval of a local plan for submission prior to the end of the consultation period and with no consideration of the comments that have been put forward by all members of the Council and without consideration of the representations from statutory consultees, organisations and the local community submitted during the Reg 19 consultation.

While the paper to Full Council states that should a “show stopper” emerge from the consultation then the decision will return to full Council, the approach taken by the Council would suggest that the Council will submit regardless of the comments made by representors and as such they have predetermined the outcome of the Reg 19 consultation. As set out in the representations submitted by the HBF the approach taken by the Council runs a high risk of legal challenge.

The risks of accelerated submission of the Local Plan are set out in the report to Full Council on 16th October at paragraph 3.3.1:

- Less time to undertake work to support the submission of the plan and examination, which raises the risk of having to withdraw the Plan at examination
- Realistically be fewer agreed and signed Statements of Common Ground (at the time of the Reg 19 consultation there are none)
- Realistically there will be fewer and fewer and less extensive Topic Papers to assist the Inspectors.
- there will realistically be less time to prepare extensive responses to Objections or concerns raised at Regulation 19 stage to assist the Inspectors.

It should also be noted that since the publication of the proposed changes to the NPPF in July 2024, that the Minister State wrote to the Planning Inspectorate regarding the process of examining local plans and the role of the planning inspectors and highlighting that “*an authority should not be submitting ·tor examination a deficient plan believing the Inspector will use significant time and resource during the examination to 'fix' it*.”

It is clear that if the Local Plan is submitted under the proposed transitional arrangements the Council cannot just disregard all of the proposed changes. For example, the Council will need to consider and take into account the impact of any changes from the NPPF on

plan making in neighbouring areas as part of its Duty to Cooperate. As set out above this work must be done prior to submission for the Council to show that they have fulfilled their Duty to Cooperate.

While the proposed amendments to the NPPF can only be given limited weight with regard to the Local Plan at this point in time, it is important to note that Inspectors are already asking local plans at examination for comment on the proposed changes and the Written Ministerial Statement ‘Building the Homes We Need’ (30th July 2024 Deputy Prime Minster and Secretary of State for Housing, Communities and Local Government)

- ***“For plans at examination, allowing them to continue, although where there is a significant gap between the plan and the new local housing need figure, we will expect authorities to begin a plan immediately in the new system;***

- ***for plans at an advanced stage of preparation (Regulation 19), allowing them to continue to examination unless there is a significant gap between the plan and the new local housing need figure, in which case we propose to ask authorities to rework their plans to take account of the higher figure; and***
- ***areas at an earlier stage of plan development should prepare plans against the revised version of the National Planning Policy Framework and progress as quickly as possible.*"**

If the Local Plan is submitted under the proposed transition arrangement it will be necessary for SADC to consider the need for an immediate review.

Paragraph 227 in the draft NPPF which states:

"***Where paragraph 226 c) applies, local plans that reach adoption with an annual housing requirement that is more than 200 dwellings lower than the relevant published Local Housing Need figure will be expected to commence plan-making in the new plan-making system at the earliest opportunity to address the shortfall in housing need.*"**

However, immediate reviews of recently adopted Local Plans are rarely undertaken. It is therefore considered that if this situation transpires then there is a need for a review policy which is effective and includes clearly set out dates as to when a new plan should be submitted and particularly sets out the consequences should that plan not come forward in the agreed timescale.

In these circumstances we support the HBF submission that a policy should be included in the Local Plan that specifically addresses the need for an immediate review. The adopted Bedford Local Plan 2030 includes such a policy, (in this case it was included when the NPPF was amended in 2018 requiring the use of the SM to assess housing need).

**Sustainability Appraisal**

Reference is made to paragraph 1.16 of the Local Plan Reg 19 which refers to the Sustainability Appraisal and Habitats Regulation Assessment.

The SA (September 2024) considers the LHN and whether a higher or lower figure should be included in the Plan.

The SA paragraph 2.2.13 states that:

"***Essentially, there is a need to positively strike a balance between development needs and constraints to development. Also, as part of this process of striking a balance, <u>there is a need to consider the implications of any unmet housing need that might be generated</u> (by setting the housing requirement at a figure below defined need) and any unmet need not provided for (noting that two or three neighbouring local authorities in South West Hertfordshire are proposing to generate significant unmet need). In order to strike a balance there is a need to explore reasonable alternatives, and that is the focus of Part* 1"**

The SA finds at paragraph 5.2.8 that:

"***When affordable housing provision is overlaid... it is clear that there is a very substantial need for affordable housing... land] there would be clear adverse consequences on affordable delivery from reducing overall housing need below the standard method levels... We do not therefore find that the evidence points towards... deviation from the standard method as a means of assessing housing need.***"

The SA paragraph 5.2.10 considers SADC is heavily constrained by NPPF policies that protect areas of particular importance and that this provides a "strong reason" for restricting the overall scale, type and distribution of development. The Green Belt is seen as a key constraint.

The SA acknowledges that there is a strong argument for ruling out very low growth, given the extent of housing need locally and in respect of the need for affordable housing.

Unmet need is considered to be an issue, paragraph 5.2.15 of the SA (September 2024). "***The fact that St Albans sits within a constrained sub-region where unmet housing need is already an issue,... Neighbouring local authorities have objected to past versions of the St Albans Local Plan (pre-2023; i.e. versions that failed and were not progressed) due to concerns around generation of unmet housing need. Furthermore, the situation in respect of unmet need within the sub-region has worsened since 2023***."

The SA considers whether it is reasonable to set the housing requirement above the LHN, having considered the SM, affordable housing need and wider arguments about unmet need from neighbouring areas, the SA concludes at paragraph 5.2.25:

*"**there is a high level case for exploring growth scenarios involving setting the housing requirement above LHN, particularly given latest understanding of unmet housing need within the subregion. A high level case was similarly acknowledged in 2023, but then higher growth scenarios were ultimately judged to be unreasonable in light of wider factors Section 5.5 of the ISA Report). At the current time there is an opportunity to revisit wider factors (see below) and, in turn, the conclusion (Section 5.5)."***(my emphasis)

*Box 5.1 provides a discussion of unmet housing need.*

Reference is made to the SW Herts Joint Strategic Plan, which is being prepared, however it is fair to say that progress on this plan has stalled and it was only ever intended to meet longer term development needs post the current round of local plan preparation. The SA correctly acknowledges that there is a risk of the SW Herts JSP facing unforeseen issues, given that the JSP is being prepared voluntarily (and noting recent examples of JSPs elsewhere failing), so this cannot be relied upon as a vehicle to address unmet needs and longer term needs.

Unmet need risk typically emanates outwards from London, and the current situation for the St Albans Local Plan is no exception. There is a risk of unmet need arising from the south of the district, from Three Rivers District. The information in the SA needs to be updated and the risks are unknown since the preparation of the Reg 19 Local Plan has been delayed (this was agreed at the Council meeting on 17th October).

Previously*"**in 2023 the Council published a consultation document proposing that central to the Local Plan should be a strategy described as "Low Housing Growth and Green Belt Restraint". The consultation document identifies supply totalling -4,850 homes, which is -6,600 homes short of LHN (which is understood from the standard method). However, it could transpire that there is a need to set the housing requirement below 4,850, such that there is a supply buffer, hence unmet need could easily be -7,000 homes."***

At a recent meeting of the Three Rivers Council on 17th October 2024, the Council agreed to delay the publication of the Reg 19 Local Plan. They noted that there was a significant gap over a 200 dwellings per annum between the LPA's revised LHN figure and its proposed housing requirement. Similar to SADC's previous LDS, the Council's LDS set out that the emerging Local Plan would be submitted for examination by the end of March. Councillors at Three Rivers agreed instead of continuing with the Reg 19 consultation:

***"As part of an ongoing effort to protect the local green belt whilst building an appropriate number of homes, Three Rivers District councillors have agreed to delay***

***publishing its final Local Plan in order to gather more evidence to protect the area's green belt."***

***"We have agreed to pause the current plan in order to get more evidence to back up our claims of the harmful effect of releasing large acres of green belt. The new government planning regulations say we must now provide clear evidence that allowing the release of***

***a lot of our green belt for development will fundamentally undermine its function in Three Rivers. We need to get expert evidence to support our case. We want to prevent merging communities and protect areas but need thus extra work is needed to show that. We also now have to do further work updating our sustainability appraisal, open space study and other background work. This also gives us the opportunity to again look at and call for more brownfield sites to be released for development and reassess housing needs****."*

Whilst the SA assumed an unmet need of about 7,000 dwellings from Three Rivers Council against the current Standard Method of 640 dwellings per annum, the delay to the Local Plan will mean that the Council will need to prepare the Local Plan in line with the new NPPF and new Standard Method, the new SM proposes a higher figure of 739 dwellings per annum for Three Rivers DC. The issue of the extent of unmet need, from Three Rivers therefore remains uncertain.

Whilst there appears to be no unmet need arising from the recently adopted Watford Local Plan, the SA reports that the recent AMR Nov 2024 reports that delivery is challenging and only 12% of homes delivered in the last year were affordable.

Hertsmere Borough Council published a Reg 18 consultation April 2024, with a supply of approximately 9,400 homes, which is a shortfall of about 2,200 homes. This could well increase since the Local Plan as proposed relies on a new settlement which would deliver late in the plan period increasing the amount of unmet need.

There is the unmet need of the London Boroughs, which the SA acknowledges may have worsened since the London Plan was adopted.

Dacorum Council have recently agreed the Reg 19 Local Plan for consultation commencing on 4th November until 17th December and are making provision to meet the housing needs in full based on the current Standard Method of 1,016 dwellings per annum.

Welwyn Hatfield Borough Local Plan, although recently adopted includes a supply of 13,400 homes which is below the LHN (not calculated using the SM which generates a significantly higher figure) and the plan runs only to 2036.

As the evidence in respect the Duty to Cooperate is at this stage is absent, it is not clear how the issue of unmet need is to be addressed. The SA correctly states that waiting for the outcome of the South West Herts JSP is not a realistic option, particularly as this Plan has been delayed and elsewhere JSPs have failed to come forward.

An objection is made to the conclusion in the SA (paragraph 5.2.28 that the strategic arguments for the housing requirement being above and below the LHN assessment ultimately cancel each other out and lead to a strategic argument for settling the housing requirement at precisely the LHN).

There are sound arguments for supporting a higher level of growth as set out in both the Interim SA paragraph 5.2.16 and the SA in September 2024 and also as the most recent SA states at paragraph 5.2.28 that:

*"**With regards to higher growth, the conclusion here is that whilst such scenarios were ultimately ruled out as unreasonable in 2023, there is now increased strategic argument, particularly given unmet need, but also noting the Government's direction of travel at the time of writing (August 2024)."**(my emphasis)*

Also at paragraph 5.2.32 *"It is also prudent to remain open to higher growth scenarios in light of the volume of calls for this from the development industry."*

Despite these issues being raised in the SA and that housing affordability is a major issue locally (paragraph 2.3.7 of the SA), there is no evidence of the Duty to Cooperate or the quantum of unmet need.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Paragraph 1.9**

If no evidence is provided that the Duty to Cooperate has been undertaken in accordance with the NPPF and policy guidance, then non-compliance with the Duty to Cooperate is incapable of modification at examination.

In accordance with the Procedural Guide for Local Plan Examinations (August 2024) para 1.15

***"In order to demonstrate compliance with the duty to co-operate (section 33A of the PCPA), the most helpful approach is for the LPA to submit a statement of compliance with the duty. The statement of compliance should identify any relevant strategic matters and how they have been resolved – or if they have not, why not. It should detail who the LPA has co-operated with and on which strategic matter(s), the nature and timing of the co-operation (e.g. by including meeting notes), and the outcomes of the co-operation, including how it has influenced the plan. As part of this process, NPPF paragraph 27 advises that the LPA should prepare one or more statements of common ground with relevant bodies."***

If however, the plan proceeds then a policy needs to be included that that specifically addresses the need for an immediate review and we recommend the inclusion of a Policy similar to the Bedford Local Plan above.

**Paragraph 1.16**

Our main concern relates to the Duty to Cooperate and that there is no evidence to support the Reg 19 consultation that demonstrates how the Council has worked on an ongoing basis with neighbouring authorities to address housing needs across the sub region and reflect this in the SA.

The Council must provide evidence as to when SADC has engaged with its neighbours with regard to housing needs during the period covered by this local plan and, if necessary, how any unmet needs could be addressed. Without this evidence the Plan is therefore not effective, neither is it consistent with national policy and as such does not satisfy the test of soundness.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Representation_Form para 1_9 Duty to Cooperate FINAL 5_11_2024_[R].pdf
2. Representation_Form para 1_16 SA unmet needs FINAL 5_11_2024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

The issues raised are fundamental to the preparation of the Local Plan.

The issues we have raised are fundamental to the consideration of the strategy in the Local Plan.

---

### 318 - Mr Mark Behrendt

Submission Number: 318 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Home Builders Federation Ltd Name: Mr Mark Behrendt

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Consultation on amendments to the NPPF**

1. At the end of July, the Government commenced a consultation on a number of amendments to the NPPF. The proposed revisions will make significant changes to the current document and there is a strong possibility that many of St Albans District Council (SADC) neighbours, will be required to prepare plans that are consistent with the changes being proposed to the NPPF, should they be adopted. Alongside the changes to the NPPF the Government have also consulted on a new standard method. While our comments will be based on the current NPPF we will refer to the potential impact of the proposed changes within our representations.
2. HBF are concerned that Councils such as SADC will, in the face of increases in its housing needs, seek to move quickly to submission in order to benefit from the transitional arrangements. Whilst it is for the council to decide on the timescale for the submission of its local plan it is being proposed to submit this local plan in December 2024, less than 2 months after the consultation closes. While HBF welcomes the speed at which the council is now preparing the local plan we are concerned that there is insufficient time to not only consider all the representations made on the local plan, complete the evidence base, address any issues with the duty to co-operate and complete the necessary committee cycle.
3. If submitted under the proposed transitional arrangements the council cannot just disregard all of the proposed changes. For example, they will need to take into account the impact of any changes resulting from the NPPF on plan making in neighbouring areas as part of its duty to co-operate. The Council will be aware that this work must be done prior to submission for the council to show that they have fulfilled their duty to co-operate, a point we discuss in more detail below. While the proposed amendments can only be given limited weight with regard to the local plan at this point in time, it is important to note that inspectors are already

asking local plans at examination for comment on the proposed changes and the Written Ministerial Statement 'Building the Homes We Need' that was published early this year and it will be necessary for SADC to consider the need for an immediate review should it be submitted prior to the implementation of any changes.

4. In addition to these concerns HBF also notes that the local plan was agreed for submission at its full council meeting on October 16th – three weeks prior to the end of the consultation period on the 8th of November. It is unusual for full council to give approval of a local plan for submission prior to the end of the consultation and with no consideration of the comments that have been put forward by all members of the council and not just those on a particular committee. While the paper to full council states that should a show stopper emerge from the consultation then the decision will return to full council, HBF are concerned that it should not necessarily be for one committee to determine a show stopper but for all members to properly consider the comments made and make their own determinations on this matter and the soundness of the local plan. The approach taken by the council would suggest that the council will submit regardless of the comments made by representors and as such have predetermined the outcome of the reg 19 consultation. The approach taken by the council runs a high risk of legal challenge and HBF would recommend that any decision on submission is made at full council.

*Review*

1. The plan will require modification to set out an immediate review of the plan to take account of proposed changes to the NPPF that are currently being consulted on, should they be adopted. While these changes are still out for consultation should the remain as currently presented consideration will need to be given to paragraph 227 in the draft NPPF which states:

*"Where paragraph 226 c) applies, local plans that reach adoption with an annual housing requirement that is more than 200 dwellings lower than the relevant published Local Housing Need figure will be expected to commence plan-making in the new plan-making system at the earliest opportunity to address the shortfall in housing need."*

1. The proposed standard method would see SADC's housing needs, across the whole of the Borough, increase from 885 dpa to 1,544 dpa and will require the council to prepare a new plan immediately. However, it is the HBF's experience that without an incentive to review a recently adopted plan these are rarely undertaken rapidly. Therefore, a strong review policy is required that set out clear dates as to when a new plan will be submitted, and the consequences should that plan not come forward in the agreed timescale. HBF would recommend a policy is included in the local plan along the lines of that adopted in the Bedford Local plan 2030 (reproduced in appendix A). This policy was included in the Bedford Local Plan in similar circumstances when the NPPF was amended in 2018 requiring the use of the Standard Method to assess housing needs.

**Duty to Co-operate**

2. The only evidence the HBF could find with regard to co-operation in the preparation of this local plan is the overarching statement of common ground. This provides a very high-level assessment as to the of the issues on which the council need to co-operate and who their key partners are with regard to each issue but no provide no details as to when the council engaged with these partners and whether there was a realistic chance for this to have had any impact on the preparation of the local plan. Given that the council has now failed the duty to co-operate in its previous attempts to adopt a local plan this is concerning.
3. HBF's main concern with regard to co-operation is that there is no indication as to how the Council has worked proactively with its neighbours in order to address housing needs across the sub region through this round of plan making. The HBF are aware that SADC are working with neighbouring LPAs on the preparation of the SW Hertfordshire Joint Strategic Plan, but

it has been made clear to the HBF in correspondence with the Councils that the JSP is being prepared in relation to longer term development needs post these local plans. As such the co-operation in preparing the JSP is considered by the HBF to be irrelevant to the preparation of this local plan. The Council must provide evidence as to when SADC has engaged with its neighbours with regard to housing needs during the period covered by this local plan and, if necessary, how any unmet needs could be addressed.

4. HBF are aware that Dacorum have recently agreed to go out to regulation 19 consultation with a local plan that meets housing needs in full, albeit with a very small buffer of just 92 homes. This still leaves both Three Rivers and Hertsmere who in recent regulation 19 consultation were expecting to fall short of meeting housing needs by 367 dpa and 141 dpa respectively. These are significant shortfalls in the delivery of new homes and should have been taken into account when preparing this local plan. As with Dacorum there may well be a change in circumstances regarding these local plans. For example, Three Rivers District Council are considering recommendations by officers to delay the consultation of their local plan and prepare a plan on the basis of an amended NPPF. From committee reports and comments at committees however it would still appear to be the case that there will be unmet needs in Three Rivers and St Albans will need to clarify this position, as well as those in Hertsmere, as part of their duty to co-operate.
5. However, without any evidence as to the discussions between the authorities as to their position with regard housing supply against identified needs it is not possible to say whether or not the council has met the duty to co-operate. This evidence will need to be assembled and submitted as part of its evidence base. It will need to clearly show not only that discussions on housing needs have taken place, but when they took place, who attended and the general frequency of any interactions on these matters between the relevant bodies. In short it must be able to show that the Council has engaged constructively with its partners in order to maximise the effectiveness of plan making. This level of evidence is also expected by Inspector examining local plans and we would point the council to the supplementary questions[1] asked by the Inspectors examining the Bristol City Local Plan who requested:

*"a specific Duty to Co-operate Topic Paper or Statement, which provides a more detailed and structured account of how the Council has engaged constructively, actively and on an on-going basis to maximise the effectiveness of the Plan."*

**Type:**

* Paragraph

**Number:**

1.10

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Duty to Cooperate**

One of the key tests of legal compliance for a Local Plan is the Duty to Cooperate ('DtC'), as set out in the National Planning Policy Framework December 2023 ('the NPPF'). SADC will be fully aware of this requirement, given the failure of the Local Plan 2018 which was withdrawn in 2020 due to a failure to discharge the DtC. It is therefore concerning that the detail provided by SADC thus far on the DtC remains light. Paragraph 1.10 of the draft Local Plan makes reference to the South West Hertfordshire Joint Strategic Plan ('JSP') but this has been a slow process. Additionally, the JSP is clearly focused on longer term opportunities for growth of housing, economic and infrastructure which is not of direct relevance to the draft Local Plans requirements to meet short term needs. This is therefore currently not sufficient to demonstrate compliance with the DtC, as evidence is needed that present housing needs are deliverable across the plan period.

The draft Local Plan evidence base does include an overarching Statement of Common Ground ('SoCG', undated) agreed with adjoining authorities. This SoCG does not provide any detail on the matters that SADC is cooperating with other authorities on, such as whether there is a need to consider the distribution of potential unmet housing needs arising from authorities like Hertsmere

and Three Rivers. The SoCG does not provide detail on the progress of emerging Local Plans and positions therein on housing requirements in this context, providing the impression that this has not been considered in detail from a DtC perspective. As acknowledged in the Sustainability Appraisal, this is a matter that requires careful consideration in the context of the increase in housing requirement figures resulting from the new standard method accompanying the draft NPPF 2024. Richborough understands that this matter is also raised in detail in the HBF's representations to the Regulation 19 consultation; it is an important matter that should be considered by SADC in partnership with neighbouring authorities.

On the matter of cross-boundary growth locations. The Site boundary for allocation B3 currently excludes a small area of land adjoining the M1 motorway (see Site Location Plan at **Appendix 2**) *[please see attached document]* as it is located within Dacorum Borough Council's (DBC) administrative boundary. This small parcel represents a logical inclusion as part of the proposed allocation B3 and Richborough will be engaging with and submitting representations to DBC's Regulation 19 consultation for the removal of this parcel from the Green Belt. SADC should also engage with DBC on this matter through the DtC to ensure opportunities for cross-boundary housing delivery are maximised and a bilateral Statement of Common Ground prepared on the matter. This should be done in advance of the submission of the Local Plan for Examination.

SADC is strongly encouraged to produce additional detail to demonstrate that the DtC has been complied with, and engage further with neighbouring authorities as required. This should be done prior to submission of the draft Local Plan, to ensure the Plan is capable of withstanding scrutiny at Examination. The Housing Minister Matthew Pennycook's letter of 30 July 2024 to the Planning Inspectorate made it clear that Inspectors will not tolerate long or drawn out Examinations. SADC should ensure it is satisfied that robust evidence has been provided demonstrating compliance with the DtC to minimise risks of issues being raised post submission.

### 334 - TT Group

Submission Number: 334 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Knight Frank Name: Stuart Baillie

On Behalf Of Company/Organisation: TT Group Name:

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

## Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

### Representations

### Tests of Soundness

This section considers those policies and allocations contained within the Draft Local Plan. Paragraph 35 of the National Planning Policy Framework (hereinafter 'NPPF') requires that any Local Plan submitted to the Secretary of State for Examination must be capable of being found both legally compliant and sound. This places various duties on the Council including, but not limited to, ensuring the Plan is:

- **Positively Prepared -** Providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- **Justified -** An appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- **Effective -** Deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- **Consistent with National Policy -** Enabling the delivery of sustainable development in accordance with the policies in this Framework.

If the Local Plan fails to accord with any of the above requirements, it is incapable of being legally compliant and/or sound.

## Draft Local Plan

Overall, our Client welcomes the preparation of the Draft Local Plan, however, our Client concludes that in its current form the Draft Local Plan is neither legally compliant or sound. Our Client therefore makes a number of recommendations that would ensure the Draft Local Plan is capable of delivering the Council's vision for the future development of the borough, and meet the identified needs, within the changing economic climate. The ability of the Draft Local Plan to meet housing need through the effective and efficient use of previously development land within St Albans is key to meeting these objectives. Our recommendations are set out below.

### Objectives

The Draft Local Plan sets out a number of overarching 'Objectives' which are split into six themes and which have been used to form the structure for the Local Plan. These objectives include (inter alia):

- *Prioritise the effective use of land by locating new development on previously developed land first, where appropriate; and protecting and enhancing the Green Belt;*
- *Provide a sufficient amount of good quality housing which meets the needs of all sections of society in sustainable locations;*
- *Encourage the use of active and sustainable means of transport and reduce the need for people to travel.*

Our Client agrees with, and acknowledges the importance of, the abovementioned 'objectives' and believe that these represent sensible objectives to meet the needs of St Albans and the wider district. Our Client is well placed to assist SACDC in meeting these objectives, including the delivery of high quality housing on previously developed land in a highly sustainable location.

Indeed, our Clients proposals at Marlborough House align with those objectives that are at the heart of the Draft Local Plan, with the proposed redevelopment of Marlborough House providing high quality residential development in a highly sustainable location. The comprehensive

redevelopment of Marlborough House would represent the effective and efficient reuse of a highly sustainable previously developed brownfield site within St Albans, therefore enhancing the sustainability and long-term viability of a currently vacant site.

Our Clients commitment to the redevelopment of Marlborough House, as evidenced by the current Full Planning Application, directly supports those objectives of the Draft Local Plan. Nevertheless, our Client note that the ability of SACDC to meet their objectives is dependent upon those specific policies and allocations contained within the Draft Local Plan. As discussed throughout these Representations, our Client contends that the specific policies and allocations, as currently drafted, do not effectively achieve these objectives.

**Spatial Strategy**

Housing delivery is the key national challenge of the planning system, with the NPPF placing a huge emphasis on the importance of the delivery of residential development. Section 5 of the NPPF underlines the importance of delivering a sufficient supply of homes to meet local needs. More specifically, paragraph 119 of the NPPF states that *'planning decisions should promote an effective use of land in meeting the need for homes'* and paragraph 120(d) adds that decisions should *'promote and support the development of under-utilised land and buildings, especially if this would help to meet identified needs for housing where land supply is constrained and available sites could be used more efficiently'*.

The Spatial Strategy that is at the heart of the Draft Local Plan recognises there is a 'clear need' for new homes given the significant local and national need for housing.

The Spatial Strategy states that in meeting housing need, the Council acknowledge the role that providing opportunities for downsizing, custom and self-build will perform in meeting housing need. Our Client appreciate the recognition of the importance of providing greater choice in the market will perform in meeting overall housing need. However, it is contended that those specific policies of the Draft Local Plan, as currently worded, could frustrate opportunities to provide opportunities for downsizing which would in turn free up family sized housing stock for families wishing to stay within the District.

The Spatial Strategy adopts an approach of identifying and prioritising development sites on previously developed land, with the Council utilising the Settlement Hierarchy (set out in Table 1.3) to direct new development to the most sustainable parts of the district. The Settlement Hierarchy identifies 'City / Large town' as being within 'Tier 1', which includes St Albans City.

Therefore, the Spatial Strategy identifies St Albans as being the most sustainable location within the district, and therefore the focal point where the concentration of new development should be focused (Para 1.33). This is supported by our Client.

Finally, the Spatial Strategy states that development should make efficient use of land by increasing the density and potentially the height of development, where appropriate and with regards to constraints such as Conservation Areas, Listed Buildings, protected trees etc. The efficient use of previously developed land through increasing density and building heights is particularly encouraged within the most accessible parts of main urban settlements (i.e. St Albans).

Our Client supports the recognition of the need for new homes and agrees that developments should make efficient use of land by increasing density and height, where appropriate. It is contended that only through the efficient use of previously developed sites will the Council be able to meet the significant housing need within the district. This is particularly key given the scarcity of suitable brownfield land within the district.

The approach of identifying and prioritising previously developed land as development sites is encouraged by our Client, and is consistent with Chapter 13 of the NPPF which seeks to protect the Green Belt and make as much use as possible of suitable brownfield sites and underutilised

land. This is particularly relevant in the context of 81% of the district falling within the Green Belt – thus emphasising the importance of identifying and maximising previously developed land that is suitable for development to meet housing need.

Despite this approach of meeting housing need through proactively identifying, and prioritising, development on brownfield sites within St Albans, the Draft Local Plan fails to identify Marlborough House as a site suitable for residential development, despite Marlborough House being subject to a Full Planning Application for residential development.

The Site represents an underutilised, highly accessible previously developed site, and the comprehensive redevelopment to provide residential units will perform a significant role in meeting housing need within SACDC. The principle of residential development has been supported by Planning Officers through multiple pre application meetings and with a positive recommendation to Planning Committee.

Furthermore, the provision of apartments in this location would provide opportunity for downsizing and thus directly aligning with the Spatial Strategy which acknowledges the need for SACDC to provide such opportunities. Brownfield sites close to the city centre provide valuable opportunity for the provision of higher density, smaller units which can contribute to an overall balanced housing market.

Our Client strongly contends that Marlborough House represents an exceptional opportunity to deliver much needed housing through the effective and efficient use of a highly sustainable brownfield site within the heart of St Albans. Our Client must therefore raises significant concerns that the Draft Local Plan has failed to identify all suitable brownfield sites to meet housing need.

Our Client considers that the failure of the Council to allocate Marlborough House for future residential development is contrary to the Spatial Strategy that is at the heart of the Draft Local Plan, which encourages the efficient use of previously developed land to meet the significant housing need within the borough. Our Client therefore requests that the Draft Local Plan is amended to incorporate the allocation of Marlborough House for residential development. In doing so, the Draft Local Plan would ensure the effective use of a highly sustainable brownfield site and ensure that the Draft Local Plan is consistent and effective, in line with Paragraph 35 of the NPPF.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusions**

Our Client welcomes the preparation of the St Albans' new Local Plan, noting that those policies contained in the current adopted Local Plan (1994) are extremely outdated and do not accurately reflect current circumstances.

Our Client broadly supports the aspirations of the Plan, particularly that of prioritising residential development on previously developed sites, and ensuring the efficient use of such land in order to meet the significant housing need within the district. Our Client agrees this represents a sensible and effective way of providing much needed new homes in highly sustainable locations across the district which is otherwise constrained by Green Belt.

Nevertheless, our Client has significant concerns regarding specific policies of the Draft Local Plan. Most notably, our Client raises key concerns with the failure of the Draft Local Plan to identify Marlborough House as a site for future residential development. As discussed throughout this representation, Marlborough House represents an underutilised, highly accessible previously developed site, the comprehensive redevelopment of which to provide residential units would make a significant contribution towards meeting housing need within SACDC.

Furthermore, our Client contends that the Draft Local Plan are not legally sound and do not comply with the NPPF. Our Client has therefore made a number of recommendations, which if adopted would ensure consistency across the Draft Local Plan. Notably, our Client strongly contends that those policies within the Draft Local Plan must be sufficiently flexible in order to maximise the chances of meeting the significant housing need within the district. Failure to do so risks the Draft Local Plan stifling opportunities to meet housing need through the effective and efficient use of the highly sustainable brownfield sites.

Overall, it is concluded that in its current form the Draft Local Plan has areas of inconsistency, is not justified with appropriate evidence and is therefore at risk of not be legally compliant, and it is suggested that the Council take further review. We look forward to engaging further in the preparation of the St Albans Local Plan 2041.

## Introduction

Keep Chiswell Green (KCG) is a local volunteer-led campaign group, formed in March 2022 in response to the planning applications submitted for large-scale development of the Metropolitan Green Belt to the west of Chiswell Green. Chiswell Green is a medium-sized village of approximately 1,250 households, located to the south of St Albans and just north of the M25 at junction 21a, close to the southern boundary of the District.

The group's objectives include informing local residents about applications and appeals, and representing their views to St Albans City and District Council (SADC) and to the Planning Inspectorate. This is achieved through extensive two-way communication.

KCG has been an active advocate for the residents of Chiswell Green and St Stephen Parish, including acting as a Rule 6 Party in the Chiswell Green Inquiry, participating in the Hearing for the Ragged Hall Lane appeal, and speaking as an interested party at the Lye Lane (Bricket Wood) Inquiry.

In this capacity, KCG has attended all Planning Policy and Climate Change committee meetings since July 2023 as a public spectator, usually in person, occasionally via the webcast of the meetings.

Chiswell Green is the target of intense speculative development; in the 2021 "call for sites" as part of the local plan preparation, land was put forward by local landowners for 2,057 new houses in Chiswell Green's Green Belt immediately around the village. Since then, speculative applications have been submitted for a total of 1,266 new houses across these sites, of which 1,259 have been granted permission, with an appeal decision still outstanding on the final 7 units. This already represents a doubling of the number of households in the village, but without the co-ordinated improvements in our existing, critically-deficient, infrastructure that could come from development through a Local Plan.

A further 98 new houses are proposed for Chiswell Green under the draft Local Plan.

Once the site for these 98 is allocated under the local plan or approved via a speculative application, two more applications will be submitted for yet another 503 new houses, concreting over what little will remain by then of Chiswell Green's Green Belt.

Residents of Chiswell Green are desperate for a new local plan – one that will protect us from further years of speculative development. However, with a very heavy heart, KCG must object to this draft local plan. The St Albans District needs a local plan, but not *any* local plan, not the *wrong* local plan, and not at the expense of sacrificing the ability of future generations to meet their own needs.

As a result of door-to-door canvassing of in excess of 1,000 properties in the village, KCG can confidently say it speaks for approximately 98% of local residents. KCG therefore submits this response with the weight of the support of over 2,000 local residents.

## Legally compliant, positively prepared, justified, effective, consistent with national policy

In our opinion, the draft Local Plan has **not** been prepared to be *legally compliant, positively prepared, justified, effective or consistent with national policy* :

## Lack of consideration for the Regulation 18 Public Consultation

The Regulation 18 public consultation was scheduled to run largely during the schools' summer holidays and was poorly publicised, resulting in a very low response rate; there were fewer than 2,000 responses to the consultation from across the whole District, when a number of single planning applications have each individually generated in the region of 1, 500 objections.

Appeals in June 2023 to the then Leader of the Council, Cllr Chris White, for the dates of the consultation to be changed so as to avoid the summer holidays, when the majority of residents are most distracted and busy, were rejected.

Feedback from local residents has highlighted the inaccessibility of the Draft Local Plan documents to those with no previous experience of the Planning process. The documents were extremely long and verbose, and, for those who attempted to read the documentation, it was difficult for residents to understand the implications of the document content.

The requirement to register on the SADC portal in order to submit any comments was found to be onerous and off-putting, especially as some residents already had accounts for Council services such as council tax or refuse collection, but found that they were unable to use these to comment as part of the Regulation 18 consultation.

Residents have reported to us that the SADC questionnaire was too narrow and the prescribed choice of answers resulted in a poor reflection of the respondents' views, forcing them to select responses that did not accurately represent their views.

The "response to each chapter" format was also off-putting as most residents did not want to comment on each individual chapter, but to comment overall. Whilst this was an option for respondents, coming at the end of the response template meant that some respondents did not reach that point in the template.

We believe that it is the lack of publicity, the poor timing of the Consultation and the difficulty in registering comments that have led to a poor response from local residents – not a lack of interest. This consultation has been poorly conducted and we submit that it would be wrong to assume that a low number of responses means that there is a high level of approval of the Draft Local Plan.

Residents would be justified, however, in thinking that their participation in the Regulation 18 Consultation was of little worth as there has been little more than acknowledgement that comments were made from SADC. The majority of responses received a comment saying "noted".

To reinforce the lack of regard that has been had for the responses to the Regulation 18 Consultation, there has been little change in the Plan between the Regulation 18 Draft and the Regulation 19 Draft, and certainly no evidence that feedback through the Regulation 18 process has been incorporated.

**Site selection based just on the Arup Green Belt Review**

It is clear from plan-making guidance that the selection of sites for development under the plan should be based on the full range of relevant evidence of site suitability. The sites that have been selected for this Plan have been based solely on the Arup Green Belt Review. This comment is not to criticise the Arup Review, but the Arup Review has its purpose – to assess the performance of sites in the District's Green Belt against the 5 Green Belt Purposes, to consider their role in the performance of the wider Green Belt, and to suggest whether each site assessed could, should or should not be considered for release. The Arup Review does not, and does not purport to, consider important aspects of site suitability such as flooding, highways, education provision, biodiversity etc. Furthermore, the Arup Review cannot be expected to consider the economic or socio-political implications of site selections.

The selection of sites for the Regulation 18 draft was based solely on the recommendations of the Arup Green Belt Review. When challenged as to why the selection process had not included other relevant evidence, the response given by the Spatial Planning team to councillors was that the statutory consultees did not have time to comment on all sites that might be considered in order to refine the selection, but that the consultees would be asked to comment on the sites selected prior to the Regulation 19 Consultation. This, of course, makes a mockery of the site selection process.

**Councillors were not given time to consider documents or debate the sites selected**

Councillors were given very little time in the schedule of meetings leading up to, first, the Regulation 18 and, then, the Regulation 19 consultations. Those who raised concerns were told that their concerns would be noted and considered, but there was no opportunity for debate. In reality, there

was only one major change made to the site selection between the Regulation 18 and 19 drafts - a site that did not have good access was deselected due to limitations on putting a road across common land which was a point that had been raised by the ward councillor for that ward.

Whilst there was little time during the PP&CC meetings for consideration of the various sites, there was also very little time given to the councillors to consider the thousands of pages of appendices they were expected to read and digest in the 10 days between the issue of the agenda pack for the meeting and the meeting itself. As a result, the councillors were highly dependent on the 5-10 minute briefings given by the Spatial Planning team during every meeting for their understanding of the subjects on which they were being asked to vote at each meeting. Inevitably, a 5-10 minute briefing cannot compensate for sometimes over 2,000 pages of background material, so councillors were frequently making decisions from a position of relative ignorance.

This situation was particularly pertinent in the meeting at which it was requested that councillors give their authorisation to progress the Regulation 19 Draft Plan to consultation. The agenda pack consisted of in excess of 2,000 pages and included an important report commissioned by SADC from respected consultants AECOM. This report detailed and evaluated 8 different scenarios for Green Belt release, each of which could provide the basis for a local plan in the District. The various scenarios differed in the quantum of housing development that could be accommodated – some scenarios of smaller magnitude than the level selected by SADC, some of greater magnitude. This report was not highlighted to councillors and there was no discussion as to which scenario was the better scenario for the District. For example, under 4 of the scenarios, there would be no Green Belt release in the south of the District. This is a critically important discussion and one which was not offered to the councillors.

In addition, there has been no justification for the level of development proposed, and more particularly, the level of Green Belt release proposed, when considered against the District's Green Belt and Heritage constraints. The only justification for Green Belt release is to meet housing targets. Whilst this may become the only consideration under any future NPPF, the December 2023 NPPF still expects planning authorities to justify changing their Green Belt boundaries in consideration of a wider range of priorities – not just meeting housing targets.

### 343 - Moralis Group

Submission Number: 343 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Boyer Planning Name: Stuart Crickett

On Behalf Of Company/Organisation: Name: Moralis Group

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**INTRODUCTION**

These representations have been prepared on behalf of Moralis Group in response to the Council's consultation on the Draft Local Plan (Regulation 19) (DLP).

The purpose of these representations is to assist the Council in formulating an approach within the DLPA that is both consistent with national planning policy and the tests of soundness.

In this regard, our representations relate to the tests of soundness set out at paragraph 35 of the NPPF (December 2023) states that for Local Plan's to be found sound they should be:

- **a) Positively prepared** – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- **b) Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;
- **c) Effective** – deliverable over the plan period, and based on effective joint working on cross boundary strategic matters that have been dealt with rather than deferred: and
- **d) Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant.

These representations are also made with respect to Moralis Group's specific interest in the land to the south of Lye Lane, St Albans (the Site) (see **Appendix 1**).

Our representations are structured as follows:

- Section 2 sets provides our comments on timing of this emerging local plan;
- Section 3 provides an overview of the housing content & overall spatial strategy;
- Section 4 provides an overview of the Council's Green Belt Assessment;
- Section 5 summarises the history of the Site & the potential of the site to deliver new residential development; and
- Section 6 sets out our conclusions.

We trust our comments are of assistance TO THE Council in formaulting an approach that is positively prepared, effective, justified and consistent with national policy.

**TIMING OF THE REGULATION 19 PLAN CONSULTATION**

At the end of July this year, the Government commenced a consultation on several amendments to the NPPF. The proposed amendments will make significant changes to ways local plans are examined. In addition, the Government are seeking to introduce a new standard methodology for calculating minimum overall housing needs. While our comments are based on the current NPPF (December 2023), we will refer to the potential impact of the proposed changes where these are salient within our representations.

By way of general context, in light of the proposed changes to the National Planning Policy Framework (the NPPF") we note with some concern the Council has brought forward the timings of its Local Plan review process seemingly in response to the increases in it housing needs which have been consulted on by the Government. Housing needs which the Government have identified as being appropriate toward seriously addressing the housing crisis – and specifically seeking to meet more of the Country's, and each local planning authorities' communities, affordable housing needs.

Within the draft NPPF transitional arrangements for those Local Plans that are currently in the middle of the local plan process have been set out. These arrangements allow Council's to still be assessed under the old system (December 2023 NPPF) dependent upon what stage their emerging local plan has reached at the date of publication of the new NPPF (plus one month). In the case of St Albans District, the Council has confirmed it is aiming to submit its plan in December 2024, before the new NPPF is adopted, meaning it would benefit from the transitional arrangements set out in paragraph 226(c).

Whilst we support the Council's desire to get an up-to-date Local Plan in place, we are concerned the Council is deliberately speeding up its local plan process in order to benefit from these transitional arrangements. The main incentive for the Council is that by submitting prior to the new NPPF being adopted, the Council's housing target would be considerably lower than that which it would be via the new standard methodology.

By rushing to make this deadline, we are concerned there is insufficient time to properly review & submit a 'sound' local plan. Following the end of this consultation, the Council is giving itself less than two months to not only consider all the representations made on the local plan, but to complete the evidence base & address any issues with the duty to co-operate. We do not consider there is sufficient time to for the Council to ensure all of the above is robustly considered & undertaken. And is accordingly setting itself/the emerging new plan into a trajectory toward failure.

Furthermore, if the Council does retain its decision to expedite submitting the current emerging plan, if adopted the Council will in any event be required to undertake an immediate review, to take account of the proposed amendments to the NPPF. Draft paragraph 227 within the draft NPPF clearly stating:

*"Where paragraph 226 c) applies, local plans that reach adoption with an annual housing requirement that is more than 200 dwellings lower than the relevant published Local Housing Need figure will be expected to commence plan-making in the new plan-making system at the earliest opportunity to address the shortfall in housing need."*

The Council's current standard methodology figure established a minimum housing need for 885dpa. Under the new standard method, the minimum housing figure will be materially different - increasing to 1,544dpa. An uplift of +659dpa which is significantly more than 200 dwellings difference. We therefore consider the Council is only delaying the inevitable, as it will need to address its significant housing shortage at the earliest opportunity following adoption of this proposed plan – assuming the submitted plan is capable of being found sound.

We consider it would now be more prudent for the Council to delay this plan review, and to here on seek to bring it in line with the requirements of the new NPPF. This would save both the Council expense and time (in the long run) by submitting a plan in accordance with the updated regulations and only having to go through one Examination in Public (EiP) in the coming years in order to achieve a plan which is capable of remaining *up to date*.

We are also aware, and note with concern, the DLP was agreed for Submission at the Council's Full Council Meeting on October 16, 2024 – three weeks prior to the end of the consultation period on the 8 of November. This approach is most unusual to give approval of a local plan for submission prior to the end of the consultation, and with no consideration of the comments that have been put forward by all members of the Council and not just those on a particular committee. While the

paper to Full Council states that should a showstopper emerge from the consultation the decision will return to Full Council, we are concerned that it should not necessarily be for one committee to determine a showstopper. It should be for all members to properly consider the comments made and make their own determinations on this matter and the soundness of the DLP. The approach taken by the Council would suggest the Council will be submitting regardless of the comments made by representors. As such, predetermination of the outcome of the Reg.19 consultation has already occurred. This approach appears to be exposing the Council to the risk of legal challenge.

Notwithstanding the above, should the Council intend to continue with this current plan we consider this plan will need to contain a robust policy setting out clear timeframes for when the new local plan (to be developed in line with the new NPPF & standard methodology) is to be adopted. And as importantly the consequences of failing to undertake and complete a full plan review to ensure sufficient incentive is established.

Without such a firm policy in place, in our experience this results in genuine risk that council's may well not commence and complete a timely and full review – with the consequences of this experienced by the council's communities. Specifically, by those needing new homes in locations where there are sustained and significant housing shortfalls that have arisen and where these are continuing to arise under the current national policy context.

Therefore, a strong review policy is required setting out clear dates as to when a new plan will be submitted, and the consequences should that plan not come forward in the agreed timescale. We recommend a policy is included in the local plan along the lines of that adopted in the Bedford Local plan 2030 (reproduced here for ease). This policy was included in the Bedford Local Plan in similar circumstances when the NPPF was amended in 2018 requiring the use of the Standard Method to assess housing needs.

**SPATIAL STRATEGY OVERVIEW**

**Duty to Co-operate**

Paragraph 1.9 of the DLP states "*St Albans Council has a statutory Duty to Cooperate (DtC) with other local planning authorities and the county council and with other prescribed bodies, on strategic planning matters that cross administrative boundaries*."

The Statement of Common Ground, within the Council's published Reg.19 evidence base, sets out the potential strategic cross boundary issues that need to be considered, and the Council/Body that needs to be liaised with on each (see Issues Matrix on pages 9,10 & 11).

To ensure the Council's emerging Local Plan can satisfy the Duty to Cooperate (DtC) legal test (which cannot be remedied post submission) we would expect the Council to have ongoing discussions with neighbouring authorities in order that cross-boundary strategic matters are adequately addressed, one of which is the delivery of new housing. And for these discussions to be demonstrated by appropriate documented evidence.

St Albans forms part of the South West Hertfordshire (SWH) HMA alongside Dacorum, Three Rivers, Watford & Hertsmere. In terms of the HMA, within Three Rivers recent consultation (Regulation 18), it was proposing a housing figure of 270dpa, against is standard methodology figure of 637 dpa. A shortfall of -367dpa. Within Hertsmere's most recent consultation (Regulation 18), it proposed 590 dpa against its standard methodology figure of 726 dpa. A shortfall of -136dpa. It is therefore clear there are significant unmet housing needs being planned to be generated within the SWH HMA, totalling a combined shortall of -508dpa.

However, we have not been able to identify any published detail(s) as to whether St Albans has engaged with any of its neighbouring Council's or other parties to discuss these issues. We are therefore concerned that the Council has not worked proactively with its neighbours to address any cross-border issues such as housing needs across the sub region. Noting the Council has previously failed the duty to co-operate through attempts to achieve a new local plan before, this is very concerning.

As a minimum, the Council needs to evidence how it has engaged with its neighbours to discuss each of the issues, and the outcomes of these conversations. Without this information, there is no way of understanding if the Council has engaged constructively with its neighbours and therefore the emerging plan is as effective as it can be. Absent this evidence the Council cannot demonstrate the DtC has been satisfied leading to a procedural and legal failing which cannot be remedied once a plan has been submitted under Regulation 22.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**CONCLUSION**

These representations have been prepared on behalf of Moralis Group in response to the Council's draft Local Plan (Regulation 19), specifically in respect of Land to the South of Lye Lane (the "Site").

In the first instance, we are significantly concerned that the Council is deliberately speeding up its local plan process to benefit from the transitional arrangements set out in the proposed updated NPPF. By rushing to make this deadline, we are concerned there is insufficient time to properly review & submit a 'sound' local plan.

The Council's current standard methodology figure is 885dpa. This will be increasing to 1,544dpa - an uplift of +659dpa under the revised standard method. We therefore consider the Council is only delaying the inevitable by moving forward at pace with the DLP now. We consider it would be much more prudent for the Council to delay submission of this DLP and seek to proceed here on with an updated DLP which will be in line with the requirements of the new NPPF.

Regarding the Duty to Cooperate, no detail has been provided to whether St Albans has engaged with any of its neighbouring Council's or other parties to discuss these issues. We are therefore concerned that the Council has not worked proactively with its neighbours to address any cross-border issues such as honey needs across the sub region. Furthermore, it is clear that there is a significant shortfall of housing within the SWH HMA, and it is unclear if the Council has taken this into account and whether it could assist in delivering unmet need from elsewhere.

We are also concerned the Council is seeking to deliver a large majority of its housing through large scale strategic sites, which usually have long lead in times so do not contribute to the housing supply in the early years of the plan.

Considering the above, we consider the Council should leave no stone unturned through this current plan review and the DLP to identify and allocate appropriate additional sites that could contribute to delivering and meeting more of the areas housing requirement/needs.

We consider our client's site can make a meaningful contribution towards housing land supply such that it can form part of a *sound* spatial strategy. Whilst it currently lies within the Green Belt, it does not make a strong contribution to the purposes of including land within the Green Belt.

Given the significant housing shortfall within the HMA, significant affordable housing shortfall within St Albans, and the significant increase in the Council's housing targets within the proposed NPPF, we consider the Council should seek to release additional land from the Green Belt and allocate this for housing.

We therefore do not consider that the Council's currently local plan is 'sound' as it is not positive prepared, justified, effective or consistent with national policy.

**349 - Lisa Peters**

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Colney Heath Parish Council (CHPC) submits this response to the St Albans City and District Council (SADC) Local Plan (LP), generally supporting its approach toward sustainable development, infrastructure improvement, and environmental conservation within the district. CHPC's comments, detailed in Appendix 1, offer support on several policy areas but also identify specific concerns regarding the implications of development on Colney Heath. The Council seeks to ensure that future growth respects the unique character and infrastructure limitations of the parish.

**Sustainable Development and Location Strategy**

CHPC appreciates the Local Plan's emphasis on sustainability, especially its strategy to prioritise development in areas with established infrastructure, public transportation, and essential services. This approach is vital to supporting managed growth within the district. CHPC stresses, however, that Colney Heath's limited transport links and essential services make it unsuitable for major development. As such, the Council strongly advocates for the prioritisation of brownfield land for new housing and commercial developments, aiming to minimize the encroachment on Green Belt areas and protect the parish's rural character.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

The Colney Heath Parish Council (CHPC) has carefully reviewed the draft Local Plan provided under the St Albans District Council (SADC) Regulation 19 consultation, offering a detailed response that raises significant concerns, particularly about the implications for Green Belt land and the potential impacts on rural communities. The council has focused its feedback on the protection of the area's natural environment and its capacity to support sustainable growth without compromising the quality of life for its residents.

CHPC acknowledges the necessity of development in certain areas but stresses that such projects must be coupled with substantial infrastructure improvements. These include ensuring that the local roads, utilities, and services can adequately support the increase in population, as well as emphasising environmental sensitivity. CHPC pointed out that developments should only consider housing needs but should integrate sustainable design that respects the local ecology, such as the preservation of hedgerows and natural habitats.

In particular, CHPC has raised concerns about the proposed Strategic Rail Freight Interchange in Park Street. It is anticipated that the development would result in heightened traffic congestion, especially along the A414, which is already under pressure. The potential for increased lorry movements associated with the freight interchange could exacerbate road usage, affecting both local residents and commuters. CHPC has called for a more thorough evaluation of the environmental and transportation impacts.

In conclusion, CHPC acknowledges the importance of development within the Local Plan to address housing demand and supports a balanced, well-considered approach. The Parish Council strongly believes that growth must be carefully managed to respect Colney Heath's unique character and capacity, ensuring that it enhances quality of life for existing residents. We call for a thorough examination of the potential impacts on infrastructure, traffic, and Green Belt preservation to safeguard these essential aspects of our community. With these considerations, CHPC fully supports the Plan's commitment to sustainable and beneficial growth for both current and future generations.

## 351 - Lichfields on behalf of Legal & General

Submission Number: 351 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Name: Adam Donovan

On Behalf Of Company/Organisation: Legal and General (Strategic Land Harpenden) Ltd Name: Lichfields on behalf of Legal & General

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

[Please see attachment for full submission]

**1.0 Introduction**

1.1 This consultation response has been prepared and submitted by Lichfields on behalf of Legal and General (Strategic Land Harpenden) ('L&G'). This document comprises a formal response to the St Albans City and District Council's ('SACDC') Draft Local Plan 2041 Regulation 19 Publication which commenced on 26th September and runs until Friday 8th November.

1.2 This document builds upon other reports and representations previously submitted by Lichfields on behalf of L&G throughout the current and previous Local Plan processes including; a response to the Regulation 18 consultation on the Local Plan (September 2023); Vision Document prepared by LDA Architects; Review of St Albans Stage 2 Green Belt prepared by LDA Architects and Site Accessibility Information prepared by TPP. These documents are referred within this submission. Where comments have not yet been addressed, they have been included again within these representations for completeness.

**Background**

1.3 L&G has a long-term interest in the land at North West Harpenden ('NWH') and has engaged with SACDC over many years with regard to the site, part of which is a draft allocation in the emerging Local Plan. The whole of the NWH site has been assessed as suitable in the evidence base underpinning successive emerging Local Plans and proposed for release from the Green Belt and allocation for new housing. Previously, the whole of NWH was identified for development in the (later withdrawn) SACDC Draft Local Plan (2020-2036) and prior to that in the draft Strategic and Detailed Local Plans, also withdrawn.

1.4 Land at NWH is the subject of a live planning application (ref. 5/2023/0327) for up to 550 dwellings including c. 130 C2 integrated retirement homes, 40% affordable housing, early years setting, public open space, allotments and publicly accessible recreation space (including junior sports pitches).

1.5 In the Regulation 19 Draft Local Plan, part of the NWH site is identified as a draft allocation (ref. B7) for c. 293 units and community facilities. The allocation has been updated since the Regulation 18 consultation took place and the requirement for a 60+ nursing care home has been removed. However, the extent of the allocation and the overall housing numbers identified within the draft site allocation has not changed since the Regulation 18 consultation.

**Structure of the report**

1.6 The whole of the NWH site - previously identified as a suitable allocation and the subject of the current planning application - is not included within the emerging Local Plan which instead proposed the allocation of a smaller part of the site. This results in a reduction in the number of homes which could be accommodated and the planning benefits which could be derived from any future redevelopment. In this context, our representations – and objections - focus on three principle matters that we have identified following a review of the emerging Local Plan:

- **Section 2** considers the housing need and requirement in St Albans, including consideration of affordable housing need and housing mix;
- **Section 3** discusses the Council's identified housing supply and trajectory in the emerging Local Plan;
- **Section 4** considers the specific draft allocation at North West Harpenden;
- **Section 5** concludes the consultation response with an outline of what L&G considers is necessary for a sound Local Plan.

...

**6.0 Summary and Conclusions**

6.1 Whilst L&G support elements of the Draft Local Plan, our review of the plan and the supporting evidence leads our client to conclude that the draft Local Plan does not meet the tests of soundness required for a Local Plan. In particular:

- The plan has not been *positively prepared* as it does not meet the area's objectively assessed need, including unmet need from neighbouring areas.
- The plan is not *effective* in delivering over the plan period by providing the appropriate number of homes.
- The assumptions around housing trajectory are not *justified* and are not based on proportionate evidence.
- The Green Belt assessment is deficient and as such the plan is not *justified* in terms of how the evidence has informed the production of the plan.
- The plan is not *consistent with national policy* as it does not deliver sustainable development in accordance with the policies in the framework.

6.2 L&G believes the proposed North West Harpenden allocation should be increased in scale, so that it reverts back to that which was proposed in previous emerging Local Plans, consistent with previous Green Belt reviews and the current application boundary. This approach is justified by the following:

1 The current standard method figure for St Albans is capped and has been calculated as 885dpa. The 'uncapped' figure is 285 dwellings per year more than the capped figure. PPG is clear that the cap does not reduce need, and that Councils should consider whether uncapped need can be accommodated (if not, an early review may be required). The Council's own evidence shows an acute affordable housing need, amounting to over 90% of overall need. At the current level of overall delivery, the plan would meet (at most) less than half its affordable needs. PPG is clear that an increase in housing numbers in the plan should be considered where it can help deliver more affordable housing.

2 Recent delivery levels, from both St Albans and elsewhere, show that it is wholly achievable for the district to see housing growth well above its current standard method figure. Market signals show that St Albans is the area of highest housing demand outside London (as indicated by the affordability ratio), and this has become even more acute in recent years; There is an existing amount of known unmet need in the HMA, primarily arising in Three Rivers and Hertsmere, amounting to nearly 9,000 homes. Despite being known, these needs are being deferred, contrary to NPPF para 35(c).

3 The Sustainability Appraisal has not explored reasonable alternatives, insofar as it is entirely reasonable (and indeed necessary) for the Council to explore even higher housing growth options. Notwithstanding, the highest housing growth scenarios currently in the SA have been ruled out despite having very limited negative effects. The plan is therefore contrary to NPPF para 35(b).

4 A review of the housing trajectory within the draft Local Plan concludes that some of the assumptions are not realistic or robust, particularly on the Garden Community proposals. On these, the assumed rates of lead-in and build out rates are overly ambitious when compared against evidence of housing delivery on a national scale. When applying more realistic assumptions to the trajectory the total delivery during the plan period reduces by 1,925 which clearly has significant implications for SACDC's ability to meet the housing requirement over the plan period and leaves a shortfall.

5 We agree with the Council's conclusion that exceptional circumstances exist to justify the release of Green Belt land to meet the acute housing need. However, it is considered that SACDC is overly reliant on HGC to deliver almost a third of the total housing requirement over the plan period. In order to justify the quick lead-in times and high delivery rates proposed, very robust evidence must be provided to demonstrate that these are achievable. It is important that the trajectory is robust, supported by the best available evidence and realistic, to give SACDC and in due course, the Inspector, confidence in its conclusions. On this basis the trajectory is considered to be unsound in its current form and needs to be reconsidered.

6 It is considered that SACDC has not established an appropriate tipping point (i.e. the maximum amount of Green Belt release on potential site allocations. In the case of NWH, the draft plan recognises that it is a sustainable location for development but, by proposing to allocate only part of the site that was promoted (and which had been a proposed allocation in previous draft plans), it infers that the Council has identified a 'strong reason' related to the unallocated part of the site that justifies why it should not be released to help address those needs (either now, or in the future, based on permanent Green Belt boundaries). L&G does not believe the evidence supports the Council's tipping point.

7 In the case of NWH, L&G's view – supported by evidence it has submitted with its current planning application – is that the site boundary in the planning application is the most suitable boundary for the emerging allocation; it has been determined with regard to a detailed assessment of the landscape and Green Belt considerations. It is a boundary consistent with, and supported by, previous Council assessments undertaken to inform previous drafts of the Local Plan. To not allocate the whole of the site for development does not make optimal use of the potential of the site, as required by para 129 of the NPPF.

8 L&G is committed to the delivery of NWH and the creation of a high quality residential scheme which will meet the need of Harpenden and St Albans. NWH is a self-contained development without major upfront infrastructure costs, and L&G is able to deliver the scheme quickly and make a contribution to SACDC's housing supply in the short term. This is demonstrated through the submission of the planning application which has been informed by analysis of the existing site, its context, landscape and Green Belt impact. The benefits to be gained – both locally and strategically - by allocating the wider site for development are significant and outweigh any additional harm to the Green Belt that might arise.

6.3 Therefore, taking in the above into account it is therefore requested that draft site allocation for NWH (B7) is extended so that it aligns with the current planning application and previous draft allocations. The allocation of the whole of the site for residential development is appropriate and consistent with national policy and an assessment of the Green Belt. The benefits which will be delivered by the larger site are considerably greater than the current draft allocation.

6.4 Finally, it is noted that it is SACDC's intention to Submit the Plan for Examination on 29 November 2024. The consultation on the plan closes on 8 November 2024. This therefore only allows 15 working days between the receipt of consultation responses and the submission of the final plan for examination. Firstly, it is not clear how SACDC could feasibly review all of the consultation comments which would be expected in response to the draft Local Plan within this time period. The Regulation 18 consultation attracted 955 individual responses from residents, resident organisations, groups and organisations, landowners and Councillors. It is considered that 15 days is a wholly inadequate amount of time to allow for the review of this level of consultation responses alongside a consideration of potential changes to the plan. Secondly, based on the inadequate amount of time being allocated for this review of consultation responses, it is questioned whether SACDC intend to make any further changes to the local plan and whether this consultation is meaningful.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

[Please see attachment for full submission]

## 6.0 Summary and Conclusions

6.1 Whilst L&G support elements of the Draft Local Plan, our review of the plan and the supporting evidence leads our client to conclude that the draft Local Plan does not meet the tests of soundness required for a Local Plan. In particular:

- The plan has not been *positively prepared* as it does not meet the area's objectively assessed need, including unmet need from neighbouring areas.
- The plan is not *effective* in delivering over the plan period by providing the appropriate number of homes.
- The assumptions around housing trajectory are not *justified* and are not based on proportionate evidence.
- The Green Belt assessment is deficient and as such the plan is not *justified* in terms of how the evidence has informed the production of the plan.
- The plan is not *consistent with national policy* as it does not deliver sustainable development in accordance with the policies in the framework.

6.2 L&G believes the proposed North West Harpenden allocation should be increased in scale, so that it reverts back to that which was proposed in previous emerging Local Plans, consistent with previous Green Belt reviews and the current application boundary. This approach is justified by the following:

1 The current standard method figure for St Albans is capped and has been calculated as 885dpa. The 'uncapped' figure is 285 dwellings per year more than the capped figure. PPG is clear that the cap does not reduce need, and that Councils should consider whether uncapped need can be accommodated (if not, an early review may be required). The Council's own evidence shows an acute affordable housing need, amounting to over 90% of overall need. At the current level of overall delivery, the plan would meet (at most) less than half its affordable needs. PPG is clear that an increase in housing numbers in the plan should be considered where it can help deliver more affordable housing.

2 Recent delivery levels, from both St Albans and elsewhere, show that it is wholly achievable for the district to see housing growth well above its current standard method figure. Market signals show that St Albans is the area of highest housing demand outside London (as indicated by the affordability ratio), and this has become even more acute in recent years; There is an existing amount of known unmet need in the HMA, primarily arising in Three Rivers and Hertsmere, amounting to nearly 9,000 homes. Despite being known, these needs are being deferred, contrary to NPPF para 35(c).

3 The Sustainability Appraisal has not explored reasonable alternatives, insofar as it is entirely reasonable (and indeed necessary) for the Council to explore even higher housing growth options. Notwithstanding, the highest housing growth scenarios currently in the SA have been ruled out despite having very limited negative effects. The plan is therefore contrary to NPPF para 35(b).

4 A review of the housing trajectory within the draft Local Plan concludes that some of the assumptions are not realistic or robust, particularly on the Garden Community proposals. On these, the assumed rates of lead-in and build out rates are overly ambitious when compared against evidence of housing delivery on a national scale. When applying more realistic assumptions to the trajectory the total delivery during the plan period reduces by 1,925 which clearly has significant implications for SACDC's ability to meet the housing requirement over the plan period and leaves a shortfall.

5 We agree with the Council's conclusion that exceptional circumstances exist to justify the release of Green Belt land to meet the acute housing need. However, it is considered that SACDC is overly reliant on HGC to deliver almost a third of the total housing requirement over the plan period. In order to justify the quick lead-in times and high delivery rates proposed, very robust evidence must be provided to demonstrate that these are achievable. It is important that the

trajectory is robust, supported by the best available evidence and realistic, to give SACDC and in due course, the Inspector, confidence in its conclusions. On this basis the trajectory is considered to be unsound in its current form and needs to be reconsidered.

6 It is considered that SACDC has not established an appropriate tipping point (i.e. the maximum amount of Green Belt release on potential site allocations. In the case of NWH, the draft plan recognises that it is a sustainable location for development but, by proposing to allocate only part of the site that was promoted (and which had been a proposed allocation in previous draft plans), it infers that the Council has identified a 'strong reason' related to the unallocated part of the site that justifies why it should not be released to help address those needs (either now, or in the future, based on permanent Green Belt boundaries). L&G does not believe the evidence supports the Council's tipping point.

7 In the case of NWH, L&G's view – supported by evidence it has submitted with its current planning application – is that the site boundary in the planning application is the most suitable boundary for the emerging allocation; it has been determined with regard to a detailed assessment of the landscape and Green Belt considerations. It is a boundary consistent with, and supported by, previous Council assessments undertaken to inform previous drafts of the Local Plan. To not allocate the whole of the site for development does not make optimal use of the potential of the site, as required by para 129 of the NPPF.

8 L&G is committed to the delivery of NWH and the creation of a high quality residential scheme which will meet the need of Harpenden and St Albans. NWH is a self-contained development without major upfront infrastructure costs, and L&G is able to deliver the scheme quickly and make a contribution to SACDC's housing supply in the short term. This is demonstrated through the submission of the planning application which has been informed by analysis of the existing site, its context, landscape and Green Belt impact. The benefits to be gained – both locally and strategically - by allocating the wider site for development are significant and outweigh any additional harm to the Green Belt that might arise.

6.3 Therefore, taking in the above into account it is therefore requested that draft site allocation for NWH (B7) is extended so that it aligns with the current planning application and previous draft allocations. The allocation of the whole of the site for residential development is appropriate and consistent with national policy and an assessment of the Green Belt. The benefits which will be delivered by the larger site are considerably greater than the current draft allocation.

6.4 Finally, it is noted that it is SACDC's intention to Submit the Plan for Examination on 29 November 2024. The consultation on the plan closes on 8 November 2024. This therefore only allows 15 working days between the receipt of consultation responses and the submission of the final plan for examination. Firstly, it is not clear how SACDC could feasibly review all of the consultation comments which would be expected in response to the draft Local Plan within this time period. The Regulation 18 consultation attracted 955 individual responses from residents, resident organisations, groups and organisations, landowners and Councillors. It is considered that 15 days is a wholly inadequate amount of time to allow for the review of this level of consultation responses alongside a consideration of potential changes to the plan. Secondly, based on the inadequate amount of time being allocated for this review of consultation responses, it is questioned whether SACDC intend to make any further changes to the local plan and whether this consultation is meaningful.

## 353 - Greenbelt

Submission Number: 353 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Greenbelt Name: Greenbelt

Comment Number: 1

### Type:

* Policy

### Number:

SP1

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

1. **Summary**

1.1 The Regulation 18 public consultation process that St Albans City and District Council (SADC) conducted was flawed.

1.2 SADC failed to follow the LGA's Good Planning Guide Paragraph 6.2, and instead allowed speculative development to drive the Plan. In addition, it did not provide the necessary objectively-assessed evidence for the appropriate appraisal of sites to be undertaken. It was therefore proposing to authorise building in unsustainable locations.

1.3 SADC is failing to ensure that the houses that would be built would be truly "affordable", instead allowing vast tracts of the Green Belt to be sacrificed for the building of larger properties that are not required, under the misapprehension that this will reduce house prices.

1.4 Inappropriate duress was applied to the Councillors prior to the vote to launch the Regulation 18 process, which meant that minimal scrutiny took place, causing flaws in Arup's Green Belt Review to be incorporated into the Draft Plan.

1.5 The consultation was not well advertised, with inadequate presentations being undertaken. This consultation took place through the summer holidays when many residents were away or otherwise distracted, which led to a relatively small response.

1.6 The portal established for the community to make comments was difficult to use, and involved a misleading "short questionnaire". The Council failed to make it clear that responses could be made by email outside the portal framework. This prevented many more comments being made.

1.7 The vast majority of respondents expressed their objection to building on the Green Belt, which directly conflicts with the path that the Council is taking.

1.8 Specific issues highlighted by the public as part of the Regulation 18 process, were not adequately addressed.

1.9 The rapid progress of the Draft Plan at the Regulation 19 stage, is being driven by a fear of larger housing targets being imposed on the district, which is causing fundamental underlying problems with the Plan to be disregarded.

1.10 Inadequate is being taken of feedback from the Regulation 19 process.

1.11 The current Plan is not sound and should be withdrawn.

2. **Formulation of the Plan**

2.1 We are extremely concerned about the strategy and the formulation of the Draft Local Plan, in relation to the Green Belt.

2.2 The Green Belt locations earmarked in the Plan, have been driven by speculative developers via the various “call for sites” processes, and are often not located in the most sustainable locations or, in many cases, not located in areas that could be described as sustainable at all. This makes them the least suitable in meeting the needs of lower-income households and will drive up car usage, in a district where there is already a chronic traffic issue, with the associated pollution, exacerbated by the District being sandwiched between three major motorways. This is creating a “demand” led plan, rewarding speculative developers.

2.3 The Council has adopted a policy that new developments of over 10 units must include 40% “affordable” dwellings. As many developments comprise fewer than 10 units, this would make it likely that in excess of 70% of houses built in the District (the figure will always be over 60%), would be market price houses, in most cases large properties, built at low densities. The District does not need these executive homes, so c70% of the Green Belt that would be surrendered, would be sacrificed needlessly.

2.4 When the sizes of these units are assessed, the actually percentage of unwanted executive homes by bedrooms will actually be higher, since the “affordable” units tend to be the smaller ones.

2.5 Property prices within the District are high, therefore the concept of allowing a 60% build as an “enabling” development, to help finance the “affordable” element of a site, does not stand up to scrutiny.

2.6 The term “affordable” has been used liberally in the Plan, however no mechanism exists in the Draft Local Plan to ensure that these properties are within the renting or purchasing limitations of low-income households.

2.7 The Council is under the misapprehension that by building more houses, property values will fall. In their promotional video for the Regulation 18 process, they stated *“shortage of housing is helping to drive up house prices, young people can no longer afford to buy their first home”*, but this disregards the reality in the market. The availability of additional privately available houses has consistently attracted more people to the District, especially from London. This increased demand absorbs any additional supply, thus neutralising any effect on prices.

2.8 The proposed sites were just “lifted” from a Green Belt review produced by Arup, with no assessment of site sustainability, having been undertaken. It therefore disregarded: site access, traffic or transport assessments, viability of proposed transport improvements, proximity to employment, leisure, schools and shops, availability and capacity of other facilities such as water and other utilities, GP and dental services etc.

2.9 There are flaws in the methodology used for Arup's Green Belt Review, which have not been addressed prior to their proposals being adopted "wholesale" into the Draft Plan. Examples of this are:

1. The inclusion of sub-areas the rural side of defensible boundaries, which according to Arup's own methodology, should be excluded from consideration
2. The disregarding of buffers that Arup itself determined

- Subjectively defining the 250/400m buffers in the first place, without a firm basis for the selection of these sizes.

3. **Flaws in the Regulation 18 consultation process**

3.1 The Regulation 18 consultation process was flawed in its preparation and implementation:

3.2 There was negligible scrutiny applied to the Plan prior to the approval of the Regulation 18 process and only limited discussion was permitted at the two committee meetings on 26 June and 10 July 2023. Despite a number of serious concerns having been raised by Committee Councillors, no alterations were made to any of the 82 pages of site allocations. Councillors were only shown the 42 and 82-page Draft Local Plan documents, and the Green Belt Assessment documents of 146 (Final Report) and 762 pages (Annex), a few days before the first meeting. This appears to have been designed to restrict them from being able to properly assess the documents.

3.3 The Committee was required to vote on entering the Regulation 18 process only 2 weeks after the Draft Local Plan was first presented to them, under the threat that if they did not proceed in accordance with the proposed timetable, it would result in the plan-making process being taken away from SADC and the Council being put into "special measures". Unnecessary duress was therefore applied to the Committee.

3.4 The process for determining potential sites for development in the Regulation 18 process was not undertaken in an objective manner, since it was not based on a comprehensive evidence base. Paragraph 6.2 of the Local Government Association's Good Plan Making Guide, states:

*"Evidence should inform what is in the plan, rather than being collected retrospectively in an attempt to justify the plan. You should have a clear idea about what the evidence is needed for, how it is going to be used and how much detail is needed".*

3.5 With the exception of a Green Belt Review, which was not properly scrutinised, little other evidence had been collected. Not collecting the evidence first clearly does not conform to these guidelines, so decisions about site selection cannot be objectively justified.

3.6 Only a very small proportion of the District's residents were aware that the consultation was taking place, due to inadequate publicity by SADC.

3.7 Public presentations were made at a handful of locations over a two-week period before the deadline. However, no presentations were made in Chiswell Green, Park Street, North St Albans and many other areas that had proposals for large scale Green Belt release, or where there were on-going applications for large scale Green Belt developments. These were poorly attended since they were not well advertised and took place during the working week, making it particularly difficult for the many commuters with families to attend. There was no static exhibition at any centrally located Council office for any of the consultation period which residents could view independently. The Council recognised that it was not appropriate to hold any presentations during the summer holidays.

3.8 Many of those who tried to use the Council web portal struggled with it, and many gave up, preventing them from making comments. The portal was prohibitively complicated to use, as is illustrated by a comment from a Mount Drive resident:

*"Not user friendly at all - may be why there isn't a lot of objections - funny that.. !! "*

3.9 On the “Survey Details” introduction page, it stated that all comments must be made through the portal:

*“This event requires you to first Login or Register before providing a response.”*

Then:

*“To make comments in the questionnaire you will need to sign in or register.”*

3.10 This was not correct, since email responses were being accepted, but much of the public was unaware of this. Therefore, many of those who were unable to cope with the complexities of the portal believed that they could not make a comment at all. Nowhere on the portal did it make clear that responses could be emailed, or even posted, to the Council.

3.11 Many residents found that the short questionnaire was too restricted; the prescribed choice of answers constituted a poor reflection of the respondents’ opinions, forcing them to select responses that did not accurately represent their views. Some felt that it was “biased”, forcing residents to make binary choices, for example between housing or protecting the environment as a priority.

3.12 The widespread belief that the Council would do what it wants, irrespective of the public’s opinions, caused many not to take the time to submit their thoughts. The level of this disengagement went beyond the common cynicism prevalent with such matters, and appeared to be driven by the perceived arrogance of the Council and planning department leaders, through actions such as those highlighted in “3.2” and “3.3” above.

3.13 In addition to the technical difficulties and the misleading advice given about submitting a comment, this process was commenced at the beginning of the summer holidays, adding another impediment to the task of obtaining extensive resident feedback. Whilst Cllr White stated that the minimum 6-week consultation had been extended for this reason, the reality is that the consultation on such an important document should never have been as short as the statutory minimum of 6 weeks. The minimal extension beyond the statutory period was inadequate compensation for the loss of the 6-week summer holiday period.

3.14 There was only a 3-week period subsequent to the school holidays during which the Council felt it was appropriate to hold public presentations. This is akin to recognising that, realistically, there was only a meaningful consultation period of about this duration.

3.15 The lack of engagement throughout the holidays was further evidenced by the insignificant number of responses made in that period. Approximately 90% of all responses were made in the final week. Whilst there is always a “last minute rush” with any consultation with a deadline, this was particularly extreme.

3.16 The SADC Regulation 18 public consultation was deeply flawed because of the above reasons. Only 955 responses were received, and this included statutory consultees, making the number of responses from the public even smaller. This is out of approximately 115,000 adults in the District, many of whom have very strong views about aspects of the plan, in particular building on Green Belt land. The vast majority of those who did respond expressed their opposition to Green Belt development, which is the overriding theme of the responses.

3.17 The Council has continued on this trajectory, despite the high proportion of objections from respondents to building on the Green Belt. This reaffirms the public’s belief that it is pointless contributing to a consultation process such as this.

3.18 Examples of the public’s comments being dismissed can be seen in relation to site L2. On pages 114 to 130 in the Local Plan Consultation Summary Responses Table, buried within the Public Pack for the PP&CC meeting on 12th December 2023. There are a very considerable number of public comments, which are merely responded to with a standard word or phrase eg “noted”.

3.19 Where the public have highlighted flaws, for example in respect of the Arup Green Belt Review, no examination of the stated flaws has been made, rather the following standard phrase has been repeatedly quoted in the responses table:

*"The inclusion of this site is in line with the methodology in the Arup Green Belt Review 2023, which recommends the site for further consideration".*

## 4. Flaws in the Regulation 19 consultation process

4.1 A similar approach has been taken with the Regulation 19 process, as with the Regulation 18 process, in terms of haste.

4.2 Following the new Government's publication of the draft NPPF, the timetable for the Regulation 19 process and presentation of the document for Examination, was brought forward.

4.3 The revised timetable meant that there was no scrutiny of the Draft Plan prior to the Regulation 19 process being entered into. This was under the threat that if the Plan did not reach the Examination stage prior to the adoption of the new NPPF, that the District's housing requirement would rise from 885 units per year to 1,544, a 70% increase.

4.4 Councillors therefore supported the Plan, not because it was sound, but rather that the consequences of not doing so would be a housing target that would not be achievable without a completely different policy approach.

4.5 Officers accepted that the undue haste may cause concerns with the soundness of the plan at Examination. Under "Risk Management" at 3.28 on page 19 in the Public Reports Pack for the 23rd September 2024 meeting, they state:

*"The accelerated timescale to Submission (intended on 2 December 2024) means that there will be less time to undertake work to support Submission of the Plan and Examination, which raises the risk of having to withdraw the Plan at Examination. This is primarily because, at(the) point of Submission in(is) December 2024, rather than the end of March 2025".*

4.6 Additionally at 3.40 it is stated:

*"To meet the planned Publication launch date of 26 September 2024, Councillors will need to note that limited editorial changes will be possible within the 2-day turnaround time".*

Then under: "***4. Alternative Options Considered and Not Recommended***", pressure is exerted on Councillors to approve the plan at the meeting when it is first presented:

*"To not bring this report at this time would not allow Councillors to take forward the Local Plan at this time. This will increase the length of time necessary until a new Local Plan can be adopted and will raise the likelihood of Government intervention in the Local Plan process and/or having to go back 2-3 years to bring forward a new draft Plan in line with the proposed new NPPF."*

4.7 In short, this Regulation 19 process is being fast-tracked without adequate scrutiny in order to beat the publication date of the new NPPF, all under the threat of Government intervention.

4.8 On 16th October, only half way through the Regulation 19 Consultation, the Full Council voted to approve the Local Plan. Considerable concerns were expressed by elected councillors at that meeting, regarding the soundness of the Plan.

4.9 Approving the Plan prior to the conclusion of the consultation, completely undermines the concept of requesting input from Stakeholders, and taking this into consideration within the decision making process.

4.10 As a result of the decision having already been made ahead of the close of the consultation, many interested parties did not bother raising any comment.

4.11 The timetable which was approved by the Planning Policy and Climate Change Committee at their meeting on 12th September, endorsed going to Examination immediately after their meeting on 28th November, rather than the previous planned date in March. This short timeframe re-affirms the Council's Policy not to make changes to the Plan based on opinions received through the consultation.

4.12 As a result of "4.7" and "4.9" above, the Regulation 19 consultation is a sham.

**5. Conclusion**

5.1 The Regulation 18 process should not have taken place with such haste. It appeared designed to intentionally circumvent the opportunity for scrutiny, and meant that the Evidence Base was incomplete.

5.2 It was badly organised at a strategic level and poorly implemented on a technical level.

5.3 We believe that our elected councillors and the community should have had the opportunity for the resulting Draft Local Plan to be properly scrutinised prior to the commencement of the Regulation 18 process.

5.4 Where flaws were highlighted with site selections or methodology, these were disregarded, quoting standard phrases.

5.5 The Regulation 19 process has been expedited in an attempt to circumvent the new government's anticipated higher housing targets imposed by the draft NPPF. In doing so, this consultation has become a sham, through the lack of consideration of feedback and undermining the public's contribution of that feedback.

5.6 The Council's actions in circumventing proper procedures in an attempt to have a Local Plan adopted quickly, has deprived the local community from having the opportunity of being presented with a robust Plan, which represents their desires for the future shape of their community.

5.7 We therefore believe that the current Plan should be rejected at the earliest opportunity, so that work can commence as soon as possible on one that better represents the community's views.

5.8 The District has been repeatedly let down by planning officers and Council heads in the formulation of Local Plans over many years, which has led to the current untenable situation. The mistakes of the past have been repeated several times, with planning officers failing to consider the views and needs of the community. The top down approach from the very same officers is unsurprisingly likely to result in yet another inadequate and inappropriate Plan being presented for Examination.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The current Plan is not sound and should be withdrawn.

## 356 - Rachael Donovan

Submission Number: 356 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Hertfordshire and West Essex ICB Name: Rachael Donovan

Comment Number: 1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

1. **Local Plan Policies**

In responding to this consultation, the HWE ICB has reassessed and reviewed the impact of the spatial strategy against health infrastructure needs, and against the NHS' long term health planning and pipeline projects, to determine whether these projects spatially meet the distribution of housing growth and the quantum of need in the Local Plan. Please see comments in relation to the Infrastructure Delivery Plan in section 3.

*The Vision for St Albans District in 2041*

The way places are planned, designed, built and managed will have a significant influence over whether communities are able to live healthy lives. The Vision as worded omits reference to creating places that *are safe, inclusive and accessible and which promote health and well-being.* In line with the NPPF, Chapter 8. Promoting healthy and safe communities and para. 135. f), minor amendments to the vision are sought which incorporate creating places that are ***safe*** and which ***promote health and well-being.***

*Table 1.2 - Local Plan Objectives*

The HWE ICB supports the Local Plan objectives to make sufficient provision for community infrastructure in sustainable locations and the delivery of healthy places and high-quality design. In relation to the provision of community infrastructure, the HWE ICB notes that the Local Plan includes policies (LG1- Broad Locations & IMP1 Additional Infrastructure Requirements for Strategic Scale Development) that seek proactive, early engagement with infrastructure providers before planning applications are submitted, in line with NPPF para. 100, and this is supported.

## 357 - Mrs Julia Warren

Submission Number: 357 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Wheathampstead Parish Council Name: Mrs Julia Warren

Comment Number: 1

**Type:**

* Figure

**Number:**

1.3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Submissions concerning the St Albans Draft Local Plan PART A**

Wheathampstead Parish Council has studied the Draft St Albans Local Plan and wish to make the following submissions. We are aware that development across the whole district is an inevitability, but would suggest that local knowledge and concerns should be considered when producing a final plan.

**Paragraph 1.38, Figure 1.3 - re Cycleways**

In the Wheathampstead Neighbourhood Plan we highlighted the lack of safe cycle routes linking our village to all neighbouring settlements. Key routes to Welwyn Garden City and Harpenden would provide ideal

cycling commuter routes by connecting them to major railway stations. These should be included in the Local Plan as “Cycleways proposed routes” in figure 1.3.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

When the Local Plan is approved and the District is eligible for the Community Infrastructure Levy, Wheathampstead, should be allocated a significant share for cycling infrastructure since a failure to do so is likely to perpetuate the use of private cars. Consideration should be given to using Section 106 funding from major development to create cycling infrastructure by creating Safe Cycleways for Wheathampstead.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### Number:

1.17

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* Yes

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

**Habitats Regulation Assessment**

Natural England Regulation 18 Comments: *Having reviewed the Habitats Regulations Assessment (HRA) submitted as well as the details within Appendix 1 of the Local Plan we are in agreement with the screening in of sites within the Chilterns Beechwoods SAC 12.6km zone of influence (ZOI). Should those sites come forward for allocation, Natural England must be consulted and provided with a project-level HRA. These sites will need to secure appropriate mitigation through contributions to Strategic Access Management and Monitoring Measures (SAMM) and provision of Suitable Alternative Natural Greenspace (SANG).*

Additional sites that fall within the Chilterns Beechwoods SAC 12.6km ZOI have been identified and we are satisfied that these have been included in updated allocation policies and the Habitats Regulations Assessment (HRA). Natural England is satisfied that, subject to the Chilterns Beechwoods SAC SANG and SAMM mitigation measures being secured as part of planning consent, the HRA conclusion is correct.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

n/a - Natural England is satisfied that, subject to the Chilterns Beechwoods SAC SANG and SAMM mitigation measures being secured as part of planning consent, the HRA conclusion is correct.

We can confirm that we have no concerns regarding the ... Habitats Regulations Assessment.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 489319 NE RESPONSE St Albans Local Plan Reg 19 consultation_[R].pdf

---

**368 - Gee Smedley**

Submission Number: 368 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Save North St Albans Greenbelt Name: Gee Smedley

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Foreword**

We believe that the Local Plan needs to deliver a better plan for residents, better for the environment, better future development and better for communities.

We believe the Local Plan is not legally compliant and therefore unsound when assessed against the Nation Planning Policy Framework (NPPF) Para 35:

- ***"Positively prepared*** *- providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;"*

- ***"Justified*** *- an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;"*

- ***"Effective*** *– deliverable over the plan period, and based on effective joint working on crossboundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and"*

- ***"Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in this Framework."*

The evidence base used in the previous Regulation 18 consultation was not wide enough and failed to comply with LGA guidance. There has been little change in the sites selected with the latest evidence. We cannot understand how weak, or no evidence can be used to justify site selection at regulation 18 and be relied upon in Regulation 19?

**The principal issues of our concern:**

- The delivery of a finalised site selection without a full and thorough evidence base

  - Inadequate flood sequential testing
  - Inadequate highways assumptions and modelling (clearly evidence of failure to properly disclose evidence in the site selection methodology)
  - Over reliance on the sites where promoters and developers have been paying developer contributions and lacking the necessary scrutiny to achieve the core basis of the NPPF ie Sustainability
  - The Urban Capacity study is adequate and the Council has failed to keep the Brownfield register updated.

- No objectively assessed housing need evidence and only the use of the Standard Method using the 2014 household growth projections for England rather than the more up to date projections compiled for 2018, 2021 or more recent. It is clear that the use of the 2014 projections is not mandatory and by pushing ahead and using them, St Albans will lose maximum amount of limited and valuable green belt.

- Simple urban delivery and re-utilisation of land such as rationalising the swathes of under used flat roof garages owned by the Council and privately have been ignored. The Officer in charge of the delivery of the Local Plan went as far as calling the Brownfield Register in St Albans a "damp sqibb" as a public meeting an claimed he had delivered a review of urban capacity "where no stone was left unturned". We fail to see evidence of this.

The Government's National Planning Policy Guidance (NPPG) sets out a standard methodology to ensure that the number calculated is objective: the Objectively Assessed Housing Need (OAHN). However, a calculation can only be objective, in any true sense, if it is based on parameters that are relevant; to be relevant, a parameter must be timely, and representative. A calculation that is derived using parameters that have been superseded by more representative estimates, cannot be objective. We are not referring here to a small rounding error, but to a multiple of 3 times, from circa 15,000 down to circa 5,000 new homes. To meet the criteria of objectivity, we believe that SACD would be justified in submitting a Local Plan based on the most up to date projections that reflect the real need, following correspondence between SADC former Council Leader Chris White and the then Secretary of State Michael Gove, see Appendix 5a and 5b.

The NPPF (Dec 2023) and NPPG are explicit that the use of the standard method for strategic policy making is not mandatory. In fact **RACHEL MACLEAN MP, Minister of State for Housing and Planning in 2023**, said in writing to Gareth Bacon MP, President of London Green Belt Council, in relation to St Albans: "that the housing need figure has always been a starting point, not a mandatory target". Our assessment is that SACD is treating the housing need figure derived from 2014 projections as mandatory for delivery. See Appendix 2, for the full letter.

If a Local Plan based on 2014 projections is adopted, more Green Belt will be built on than is necessary. We do not believe that any green belt needs be built on to meet a truly objective assessment of need. SADC should at least be having the argument with Government and taking them to task on their avowed criteria of objectivity. If SACD does not do this, we fear that far from

protecting St Albans and its surrounding Green Belt from speculative development, the Local Plan will be doing developers' work for them. This will be a failure of leadership for which St Albans will be paying the price for generations and decades to come.

The draft Local Plan timetable has been accelerated to ensure it is reviewed against the current NPPF (Dec 2023). That NPPF is very clear on several factors. Chapter 13 is clear and It affords great wight to Green Belt and it's permanence. Para 11 footnote 7: which has always been maintained, states clearly the Green Belt is strategic constraint. We believe SADC have failed to deliver a through cross border strategic review as the focus is almost entirely on relations within the South West Herts Joint Strategic Partnership an little to no cooperation with other neighbouring authorities.

We feel that SADC should have been more collaborative and transparent I the Local Plan process with Councillors and communities at the heart of the decision making process.

**Response to CHAPTER 1 - A SPATIAL STRATEGY FOR ST ALBANS CITY AND DISTRICT**

This iteration of the Local Plan over promises and under delivers. The Local Plan process states clearly that the step "Collecting Evidence" goes ahead of the stage, "First Draft Local Plan, this did not happen.

A Local Plan should be a full spectrum comprehensive plan for effective land use emphasising economic, social, housing and environmental issues in a balanced and objectively assed way. This DLP is none of those. The process has been progressed hastily and at the time of the Regulation 18 there is no evidence base for the following, breaching the LGA Guidelines:

- There is no traffic and highways modelling or data
- There is no evidence that SADC has worked to ensure the best projections for objectively assessed housing need have been used
- There is no mention of Heartwood Forest in the ARUP Green Belt review
- There is no agreed or published methodology to assess ecological corridors for important green infrastructure, such as Heartwood Forest
- There is no agreed or published methodology to assess the carbon cost of water sourced from outside the area

Para 1.13 of this chapter states that the Local Plan should be read in conjunction with the Local Transport Plan. But there is no evidenced Local Transport Plan from the Local Highways Authority, HCC. The COMET modelling and data are not being relied upon by HCC and there is no further assessment framework to provide the evidence base to justify site selection.

Table 1.1 of the DLP, shows a process which we feel has failed. The evidence was not collected early enough to inform the site selection process. Bringing another DLP forward with substantive errors is costing St Albans taxpayers millions of pounds in wasted money and wasted time is immeasurable.

We see no evidence of the Local Plan protecting and enhancing Green Belt. As claimed in Table 1.2.

Figure 1.3 of the Local Plan incorrectly shows a cycle route running the full length of the A1081. It does not. Any such proposal has been deemed as an unsafe proposal by an independent transport consultant. See Appendix 4, for the full report from THaT Consultancy in relation to the provision of the cycle lane going north on the A1081 and categorically making a clear and defendable case for the lack of safety if delivered in anyway. See Figure 5 [in the attached file] which circles the area of error in the Local Plan map.

The current towns of Central Hertfordshire (population); Hatfield (39k), Welwyn Garden City (48k), Harpenden (31k), St Albans (72k) and Hertford (27k) have a combined population of circa 184,000, this is a level comparable with the like of Oxford or Cambridge. Indeed, the combined population of the three Central Hertfordshire Districts of St Albans (145k), Welwyn Hatfield (110k) and East Herts (140k) is 395,000 which is comparable with populations in Liverpool, Manchester or Bristol.

Growing within existing large settlements is a top priority for residents, as noted by the results of the recent Regulation 18 consultation in 2022 (see charts from the Council report below (Public Pack)Agenda Document for Local Plan Advisory Group, 24/01/2023 19:00 (moderngov.co.uk)), see some key views from that report in the graphic in Figure 6 [in attached file].

We need our Green Belt to remain in the current boundary and not cannibalized by developers with the support and recommendation of Officers. St Albans is already part of the biggest and most densely populated area in the County. Our services and infrastructure are already failing to deliver what is needed for the current population, our district does not even have a 24hr medical urgent care centre, instead we have to go to Hemel, Luton or Watford, yet we are proposing a massive increase in population and residents over the plan period of over 30% compared the current population of the District. We do not believe this to be an evidenced and sound way of approaching housing deliver, especially with the back of a collapsed birth rate.

## 372 - Gate Herts (Gypsy & Traveller Empowerment, Hertfordshire)

Submission Number: 372 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Name: Michael Hargreaves

On Behalf Of Company/Organisation: Gate Herts (Gypsy & Traveller Empowerment, Hertfordshire) Name:

Comment Number: 8

**Type:**

* Paragraph

**Number:**

1.9 - 1.11

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

## 6.0 Duty to Co-operate

6.1 The reference to the Duty to Co-operate and Joint Planning at paras 1.9 -1.11 of the Reg 19 Local Plan makes no reference to planning for Gypsies and Travellers. We wonder if this is because, notwithstanding the joint working with Dacorum on the Hemel Garden Communities that the Council does not regard planning for Gypsies and Travellers as a strategic planning matter. While the numbers and scale of land involved is small, for the following reasons we would suggest that in the St Albans and Hertfordshire context that provision for Travellers should be treated as a strategic matter which should be addressed through the duty to co-operate:

- The significant difficulties that all the Hertfordshire local planning authorities have had in providing enough accommodation for Gypsies and Travellers over many years;
- That the change in definition in the 2023 version of PPfTS has resulted in a substantial increase in the numbers meeting the definition and in need;
- That to meet those needs, a number are proposing that sites should be provided through garden villages, urban extensions and the like, but as far as we are aware they are not addressing the substantial delivery challenges we identify at para 4.6 of this submission (and have identified to all of them) ;
- That to meet those needs a number of them are proposing green belt releases to accommodate garden villages etc, and, in our submission, should also considering Green Belt releases on the basis of para 17 PPfTS; and
- In regard to St Albans, that the extent of undeveloped land, and of land not within the Chilterns AONB, may mean it has more potential to accommodate Traveller than some neighbouring areas.

## 7.0 Legal Compliance

7.1 The implication of the flaws in the Local Plan identified in the above paragraphs, not least in failing to making any allocations for Gypsies and Travellers, means that not only is the plan not sound, it is also not legally compliant on the basis:

- It indirectly discriminates against Gypsies and Travellers (whose ethnicity is a protected characteristic under the Equality Act) without adequate justification, contrary to s.19 of the 2010 Equality Act; and
- Its approach is contrary to the Public Sector Equality Duty under s.149 of the Act.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We would ask the Inspector(s) appointed to examine the plan to ask the Council to explain whether it considers provision for Gypsies and Travellers is a strategic matter, and what action it is taking under the Duty to Co-operate.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Annex 1 Traveller Sites through Local Plan Allocations_[R].pdf
2. Annex 2 Inspectors letter to GNLP re GT sites 190122_[R].pdf
3. Herts Gate Reg 19 Rep 061124_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

GATE Herts is one of the leading locally based Gypsy and Traveller organizations in England and the only significant Gypsy & Traveller organization in Hertfordshire. In our submission the plan is unsound and not legally compliant in regard to provision for Gypsies. We would contribute the lived experience of Gypsies and Travellers and substantial experience of planning for Gypsies and Travellers to the hearings.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## Strategic Policy SP1 - A Spatial Strategy for St Albans District

### 15 - Trans Link London Limited

Submission Number: 15 Submission Date: 18/10/24 12:13

Respondent: Company/Organisation: PJB Planning Name: Peter Biggs

On Behalf Of Company/Organisation: Trans Link London Limited Name:

Comment Number: 12

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Strategic Policy SP1 sets out a proposed new settlement strategy for the District, with growth being located to make the most sustainable use of land in both the urban areas and then the Green Belt. The general principles of this statement is supported and it is noted that the approach seeks to develop brownfield land first, before then considering greenfield land.

It is also noted that London Colney has been identified as a Tier 3 settlement, where most growth is to be focussed within and adjacent to settlement boundaries. To the west of London Colney, Napsbury Park Estate has been identified in the Reg 19 Local Plan as a Tier 6 Green Belt village, where the land continues to be washed over by the Green Belt. The description of this tier of settlement (ie. Tier 6) does acknowledge that there is a general functional relationship to settlements in higher tiers within the hierarchy, which provides key services and higher order services. Whilst the principle of the hierarchy approach to settlement classification across the District is supported, in the case of the classification of Napsbury Park Estate, it is considered that this Estate with its proximity and links to London Colney and built-up nature, should also be considered part of that Tier 3 settlement. For that reason Napsbury Park Estate should itself be taken out of the Green Belt. Through reviewing this classification of Napsbury Park Estate and taking it out the Green Belt, this would then give greater weight to the consideration of sustainable urban extensions to both the south and also to the north of the Estate. As such, it is considered that the Council should review this land classification and consider removing Napsbury Park Estate out from the Green Belt and that the Estate form part of the Tier 3 settlement.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Strategic Policy SP1 and the settlement hierarchy should be amended to include Napsbury Park Estate as part of the Tier 3 Small Town allocation with London Colney, and for the Napsbury Park Estate to the removed from the Green Belt along with a sustainable housing allocation to the north of the estate.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to scrutinise further the Council's strategic approach to not removing Napsbury Park Estate from the Green Belt and including it as part of the Tier 3 Small Town category within the settlement hierarchy.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**33 - Mr Nigel Smith**

Submission Number: 33 Submission Date: 28/10/24 09:00

Respondent: Company/Organisation: North Hertfordshire District Council Name: Mr Nigel Smith

Comment Number: 1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The St Albans draft Local Plan sets a target of 14,603 new homes or 885 dwellings per annum (for the period 1 October 2024 to 31 March 2041). This figure is based on the current standard method for assessing housing need. Under the draft consultation NPPF 2024, the standard

methodology is proposed to change and the new housing target for St Albans is likely to rise to 1,544 dwellings per annum (above the 200-home threshold in the proposed transitional arrangements). St Albans should consider how they might accommodate this additional growth.

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The consultation process for Regulation 18 was flawed, with the inevitable result that Regulation 19 is also flawed. It took place over the summer of 2023, while I was away, and unaware of the local "plan" for the site up the road from my home. Now I'm being told it's too late to object. Reading Council responses to other objections, it seems to me that there is no will to take citizen objections seriously. There has been no proper assessment of the Regs 19 comments, it is all being rushed through so that speculative developers can make money out of the destruction of our Green Belt fields in and and around Park Street, specifically site L2.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We need a plan

Harpenden is an attractive town and housing is in high demand. This makes it a very attractive proposition for developers. Without a current Local Plan we are in a perilous position which could result in inappropriate developments being forced upon us with little local control. We support the need to have a plan to be agreed swiftly.

We need more homes
As a country, and as a district, we need more homes and it is right that Harpenden has its share. Overall we support the number of homes that are being proposed for Harpenden but have concerns about the size and impact on our community of the two largest – B2 and B7

## 83 - Affinity Water

Submission Number: 83 Submission Date: 06/11/24 09:00
Respondent: Company/Organisation: Name: Lita Khazaka
On Behalf Of Company/Organisation: Name: Affinity Water

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The spatial strategy places great reliance on the role of the Hemel Garden Communities project in delivering 30% of the borough's stated housing target. It is unclear if it is viable to "put so many eggs in one basket" especially as there is no published evidence that other agencies will commit to deliver the substantial amount of infrastructure required with it. For example, the Infrastructure Schedule spreadsheet refers to Department for Transport (DfT) RIS3 funding for improvements to the M1 at Junctions 8 and 9 (projects 104 and 105) but the Arup Infrastructure Delivery Plan makes clear that DfT funding will be limited to maintenance only. Until this matter is sorted – including identifying who will pay for upgrading the road infrastructure in the absence of DfT funding - the Hemel Garden Communities project may be at risk of not being delivered or at least not delivered to the scale proposed.

Notwithstanding this matter, the housing target in Policy SP1 is unsound. The council has reduced its housing target from at least 15,096 homes in the Regulation 18 draft to at least 14,603 homes and has now put back yet again the start date of 1 October 2024 for the delivery of these new homes. The proposed buffer in terms of sites that will deliver this target (refer Table 3.2) has been reduced from 5% to 2.6% too between the Regulation 18 and 19 drafts of the Local Plan.

The council's revised approach is unsound because it cannot be justified based on current government guidance. Put simply, the housing target is too low and the proposed housing trajectory (refer Table 3.2) makes overly ambitious assumptions about windfalls and unallocated sites delivering new homes while putting off the delivery of much needed housing until the 2030s. This approach is not consistent with national policy in the National Planning Policy Framework (the NPPF).

Affinity Water notes the following four grave deficiencies with regard to the Draft Local Plan's housing numbers and trajectory.

First, the housing target in the Draft Local Plan is too low. The Regulation 19 Draft Local Plan housing target is for at least 14,603 net new homes. This appears to be based on a multiplication of the annual housing target (885 net new homes, a correction to the figure of 888 in the Regulation 18 draft) over a 16.5 year period (that is, 885 x 16.5). As the Draft Local Plan states that it is planning until 2041, this implies a start date for the Local Plan of October 2024 . This start date cannot be correct as work on the draft Local Plan actually started in January 2021 when the council issued a Call for Sites, the Sustainability Appraisal Scoping Report5 and the updated Statement of Community Involvement/ Local Development Scheme. Indeed the Regulation 18 draft of the Local Plan incorporated housing completions from 2021 into its published housing trajectory.

Assuming this New Local Plan is to run until 2041, the housing target therefore needs to be for housing delivered over a 20 year period, on the basis that work on the Local Plan started in 20216 , or else the Local Plan needs to run from 2021 to 2038. Assuming an annual figure of 885 net new homes and that the Local Plan is to run until 2041, this would mean that the housing target should be at least 17,700 net new homes (that is, 885 x 20). It is clear that the council recognises this defect because, although it states that the Local Plan start date is 1 October 2024, its latest Housing Trajectory (Table 3.2) still includes 1,080 housing completions from 2021/22, 2022/23 and 2023/24 (7.2% of the total trajectory).

A housing target of at least 17,700 homes may be conservative as the council still has a Duty to Cooperate with other local authorities. It may have to take some unmet housing need from either a near neighbour in South West Hertfordshire (possibly Dacorum if that authority cannot satisfactorily mitigate the environmental damage to the Chiltern Beechwoods SAC associated with the need to plan for new housing7 or one of the London boroughs given that the district is in the Travel to Work Area of both Greater London and Watford Junction and enjoys fast, frequent rail links from Harpenden and St Albans (Abbey and Central).

Second, the housing buffer in the Housing Trajectory is too low. It needs to be a 20% buffer to be consistent with the NPPF (paragraph 77). Even if one were to assume a start date of 2024 for the Draft Local Plan (which the council cannot for the reasons set out above), the local planning authority must also plan for all the years when there was no up-to-date Local Plan in place and the council was not meeting Government set housing delivery test targets (refer Table 1 in attachment).

The council has consistently underperformed in this respect in recent years. Figure 1 (in attachment) shows that the council has not met the standard housing method target in any of the past five years for which statistics have been published.

In recent years, the pipeline of new housing sites has increasingly relied on unplanned for releases of Green Belt land (refer Figure 2 in attachment) approved either on appeal or through the application of "material considerations".

In such situations, the NPPF requires a 20% buffer. Assuming that the council must plan for a higher housing target of at least 17,700 net new homes over a 20 year period (from 2021 when work on this Local Plan actually began until 2041 following the withdrawal of the 2018 iteration of the Local Plan), this would mean that the council should plan for a housing trajectory that will deliver at least 21,240 net new homes.

Third, this flawed housing trajectory is flawed. The new Table 3.2 has re-categorised sources of future housing delivery relative to the Regulation 18 draft version. These three sources are: Windfall allowances (2,013 net); Harpenden NP allocations (57); and Part B site allocations (10,653). In total, this amounts to 12,723 homes and not 14,603 as the Regulation 19 draft is planning for. There is a missing 1,880 homes in the trajectory. The council is urged to prepare a paper clarifying the trajectory it has published and correct any errors in it.

Fourth, the trajectory is overly ambitious in some respects and unreasonable in others. The revised Table 3.2 of the Draft Local Plan contains very ambitious targets for housing delivery. For example, it assumes that 2,103 homes (13%) will be delivered on windfall sites. It is unclear how the council has reached this figure and it is inappropriate to “gamble” on such a high figure coming from sites that it is not aware of. It is submitted that opportunities for new homes through the prior approval process and on previously developed land in urban areas will dry up. Moreover, the council has imposed Article 4 directions on most of its employment stock that will prevent their easy conversion to housing. A further defect in the trajectory is that it assumes no sites coming forward for development in the periods 2023/4 to 2027/8 and the bulk being delivered in the period 2031/2 to 2035/6 delivering levels of housing never experienced in the district (1,255 homes a year for five years). This trajectory is putting off the acute local problems of housing affordability because it effectively restricts supply for a further seven years. This is wholly inconsistent with the NPPF (paragraph 69a) which requires councils to identify “specific, deliverable sites” in the first five years of a Local Plan.

Further, the Draft Local Plan proposes some housing allocations that run contrary to other strategies. For example, Site Allocations B5 (Glinwell), B6 (land west of London Colney) and B8 (Harper Lane) are in areas where the council believes there are minerals deposits and, thus, their allocation would be contrary to the Hertfordshire Minerals Plan. Other parts of this draft Local Plan (Policy SP7) seek to protect existing community infrastructure yet the council is seeking to allocate church sites - Site Allocations P3 (Friends Meeting House) and U3 (former Brocket Wood United Reformed Church) when these sites should be considered in the first place for other community use given the problems of high land prices locally.

Finally, the submission below identifies other deficiencies on housing numbers. Most notably, the draft Local Plan does not address its need for gypsy and traveller housing This is not only a soundness matter but potentially a legal deficiency in the whole of the Local Plan process in that the council does not appear to be addressing its Public Sector Equality Duty under the Equality Act 2010.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

To remedy these many defects in the council's approach to its housing target numbers, trajectory and sites chosen, Affinity Water urges the inspector and council to support the allocation of additional sites for housing that could be delivered quickly and specifically identify them in the Local Plan to help address uncertainty about the Plan's housing trajectory and plan for what is likely to be a much higher housing target. Table 2 (in attachment) summarises the aforementioned problems with the approach taken so far by the council against the four tests of soundness in paragraph 35 of the NPPF.

While not specifically a soundness matter, Affinity Water submits that the Strategic Policy SP1 would be improved if the first bullet point in the policy were amended as follow: The Local Plan also supports: • Raising standards and requirements for sustainability of all new buildings including water efficiency;

This amendment would emphasise the importance of water efficiency at the heart of a spatial strategy that seeks to secure new housing and employment space in a local authority area likely to face water stress in years to come as a result of climate change.

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

My concerns have not been taken on board they are dismissed with a standard cut & paste non committal response.

It seems you are not interested in the local people who live in the area, who know the area intimately and the challenges it faces.

There is a strong local opinion "enough is ennough", greenbelt abuse & opening the floodgates to further greenbelt development, traffic volumes spirralling out of control, causing commercial costs and enviromnetal damage and increased safety concerns.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

## 167 - Mr Richard Walker

Submission Number: 167 Submission Date: 07/11/24 13:52

Respondent: Company/Organisation: Lightwood Strategic Name: Mr Richard Walker

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy SP1 is the headline strategic policy of the proposed Local Plan. Two primary soundness issues are identified:

1. The base date of the plan period, and therefore the whole plan period, and the level of housing need to be planned for, and;
2. The absence of any reference to the uncapped local housing need (LHN) in policy or supporting text or of any policy commitment to early plan review to address the uncapped LHN.

**SP1, Soundness Issue 1: The Plan Period**

*Headline*

The plan is not positively prepared because the plan period does not include the years between the withdrawal of the previously submitted Local Plan from examination and the submission of the proposed plan, i.e. 2020/21, 2021/22, 2023/23 and 2023/24, nor the first half of 2024/25. It is also valid to include 2018/19 and 2019/20 to include the years following the introduction of the standard method, especially as the adopted Local Plan dates from 1994.

The proposed 2024 (October) to 2041 Plan does not positively plan for needs in previous years. Recorded delivery in this period is significantly less than capped need (and by implication uncapped need), and the shortfall is not absorbed within the proposed plan. The standard method only captures housing shortfall prior to its introduction in 2018, not after it.

*Discussion*

The previous Local Plan was submitted for examination in March 2019, following the previous pre-submission consultation in September 2018. After the first week of examination hearings, in January 2020, the Inspectors identified a Duty to Cooperate failure. This was confirmed in a further letter in April 2020, which also raised other, but not all, soundness issues. After a period of coming to terms with this outcome, the Council withdrew the Plan in December 2020. A new plan making process commenced in the first quarter of 2021 with a call for sites consultation. Thus, during 2020/21 the previous plan failed, and the preparation of the new plan commenced. Pre-submission consultation stage on the new Plan was reached at the end of September 2024, approximately 3.5 years later. As with many Councils, there was a 'go-slow' in plan preparation on account of the previous government's proposed changes to the NPPF. Preparation sped up after new government's proposals were announced. The 'go-slow' period contributes to a later base date than could otherwise have been achieved.

The submitted plan is base dated on 1st October 2024 (halfway through 2024/25) and extends to the end of 2040/41. The capped LHN figure of 885 is applied to generate a total requirement of 14,603 over 16.5 years. The uncapped need is 1,169 per annum, which is 19,288 over the same period (+4,685, or rising to over 5,000 once the additional half year for 2024/25 is included). Soundness comments on the uncapped level of housing need are reserved for issue 2.

Table 3.2 (following Policy SP3) of the proposed Local Plan is the housing trajectory which forecasts delivery of 14,989 homes (+386 against capped need).

The plan is not positively prepared because the plan period does not include the years between withdrawal and further submission i.e. 2020/21, 2021/22, 2023/23 and 2023/24, nor the first half of 2024/25. This has the effect of sweeping away housing need (both capped and uncapped), that would have been planned for had the previous Plan not been withdrawn. This 4.5-year period prior to the proposed plan period can be broken down into three components, namely:

- The first half of 2024/25
- 2020/21–2023/24
- 2018/19-2019/20

Focusing first on 2024/25, Table 3.2 (the housing trajectory), includes all forecast delivery for 2024/25 (of 432 homes) against a capped half year requirement (of 443 homes). It is unsound to base date a plan halfway through a monitoring year. A full years' worth of completions for 2024/25 should be monitored against the full capped housing requirement for that year (of 885 homes). The inclusion of 2024/25 as a full year in the plan period increases the overall capped housing requirement to 15,045 and removes the slight (2.6%) supply buffer. To recover a 2.6% buffer, land for another 400 homes would need to be identified. At Regulation 18 stage, the interim sustainability appraisal promoted a 5% buffer (800 homes) and the Plan provided it, but as 5% no longer suits the Council, its previously stated value to sound planning has faded.

Even if it was appropriate to base date the plan to 1st October 2024, only completions recorded during the second part of 2024/25 should be attributed to the housing trajectory. Unless the Council undertakes precise six-monthly monitoring (which to our knowledge it does not), it would have to apply half the overall completions figure for 2024/25 (as an estimate). Therefore, an estimate of 216 homes might be attributable to a half year requirement of 443. On this basis, the overall supply for the proposed plan period would 226 fewer than set out in Table 3.2. The Plan clearly can't count all completions for 2024/25 against a half year requirement for that year. The resolution must really be to include 2024/25 as a full year within the plan period.

When the preceding four years following the Inspectors' letters and withdrawal are also included in a revised plan period, alongside the first half of 2024/25, the capped LHN increases by 3,982 homes (4 x 885 + 442). This increases the overall capped requirement to 18,585 to 2041.

Table 1 of these comments identifies that across the four full years since withdrawal, 1,596 homes were delivered, against a capped LHN of 3,450, resulting in a supply gap of 1,944 homes against capped need. The submitted plan sweeps this supply gap under the carpet. This housing need would have been planned for (even if under a stepped trajectory) had the previous Local Plan not been withdrawn. Table 1 also presents a row for the inclusion of 2024/25 as a full year in the plan period, which increases the shortfall since the year of withdrawal to 2,397.

It is not positive planning for an authority that fails to progress a previous plan through examination to 'lose' housing need that should be planned on account of withdrawing and starting again.

[See attachment for Table]

It is also valid to include to include the two additional years following the introduction of the standard method (2018/19 and 2019/20), especially as the adopted plan dates from 1994. This increases the overall shortfall against uncapped need since the inception of the standard method. Prior to the base year,half the capped need has been met and the shortfall is 2,639. Once the base year,as a full year,is also included, the shortfall increases to 3,376.

[See attachment for table]

In order not to over complicate this soundness issue, the equivalent table for uncapped need is not presented here and is reserved for soundness issue 2.

When the standard method was introduced in July 2018, the PPG was updated. It stated then, and states now,that:

*The affordability adjustment is applied to take account of past under-delivery. The standard method identifies the minimum upli that will be required and therefore it is not a requirement to specifically address under-delivery separately.*

This paragraph requires careful inspection. When introduced, the standard method, absorbed pre-2018 under delivery for all authorities. It methodologically wiped the slate clean as regards any under delivery against adopted plans up to its introduction, but that's as far as it can logically go.

Where the adoption of a post-2018 Local Plan has yet to take place, it does not follow that under-delivery against LHN since 2018/19 is accounted for by an evolving affordability ratio and an evolving LHN. For StAlbans, the application of the most up-to-date standard method output from 2024/252040/41 does not capture under delivery after since 2018. This is especially the case as the LHN is capped, such that even if the uncapped LHN was increasing, the act of capping acts as a 'brake' on the absorption of past under delivery 'since' 2018. As set out in Table 3, the uncapped need for St Albans has also been stable since 2018 despite under delivery. The most recent uncapped LHN is just 21 homes per annum higher than in 2018/19 (a difference of 350 if applied over 16.5 years). As set out in Table 4 under soundness issue 2, that is a tiny fraction of unmet need in St Albans since the standard method was introduced.

[See attachment for table]

For St Albans, the minor variability in its LHN (capped and uncapped) does not absorb under supply since the last plan was withdrawn in 2020/21 (or since 2018). There is no logical way to argue that the shortfall in delivery represents homes for which there was no need, nor that they are otherwise accounted by planning for the capped LHN from 2024/25.

All the PPG says is that the slate was wiped clean in 2018. It does not follow that it can be wiped clean year on year since 2018. The base date of the Plan is critical to positive planning and soundness. Positive planning would have been for the submitted plan to be base dated at 2018/19 as the logic of our case extends back this far, with 2020/21 just being interim 'event' year concerning withdrawal.

***Changes Sought***

- Modify SP1 to amend the base date of the plan period to 2018 (or 2020) and introduce additional land supply to meet capped need, focusing first on reasonable alternative strategic sites identified in spatial strategy optioneering at St Albans, and then any other sites deemed suitable.

or

- Modify SP1 so that it commits to an early 'update' to achieve the same outcome (NB: at this stage we are identifying the need for an early update to address capped need since 2018, but soundness issue 2 identifies the need to address uncapped need since 2018, and from 2024).

**Policy SP1, Soundness Issue 2: Uncapped Need & Early Review**

*Headline*

Policy SP1 is not positively prepared as is does not contain a clause requiring an early review of the Plan to address uncapped housing need. An early review clause is justified as the PPG ultimately requires the uncapped level of housing need to be planned for over the plan period. Our comments on early review are focused on current national policy and guidance. The proposed changes to national policy would command an early review in any case, but the final form of the NPPF has yet to be released. The national policy context will evolve during the examination.

*Discussion*

Although the LHNA (Iceni Projects, 2024) identifies the uncapped level of housing need (1,169 per annum) it is not presented in the SA or in the supporting text of the plan itself. The capped figure for housing need is presented as if it is 'the need', in both documents, which is false.

Ultimately, in this phase of plan review, the Council is choosing not to plan for all need (or more of it). It is planning for the minimum capped need. We recognise that it is entitled to make that choice, however, the presentation of the proposed housing requirement for the Plan, within the Plan itself, should be made by reference to the uncapped need so that outcomes of the Plan can be properly understood.

The supporting text is the place to do this. The annualised and plan period LHN for both capped and uncapped need should be identified. This information enables Policy SP1 to be understood in its full and proper context.

- The annualised LHN figures are 885 per annum against 1,169 per annum (+284 per annum)
- The figures for the submitted plan period are and 14,600 [for 16.5 years] against 19,290 (+4,690). The housing land supply policies of the submitted Plan identify around 15,000 homes and a 2.5% 'cushion' meaning that it achieves 78% of actual (uncapped) housing need for its proposed plan period.

Here we do not refer to soundness issue 1 (the plan period), but the examination findings on this matter could further affect the information that should be included in the plan to contextualise Policy SP1. If the plan period is extended (going backwards) the proportion of uncapped need that is not being met will increase.

In respect of the SA, the evaluation of the performance of the preferred option, against the housing objective, should be more explicit in that although it meets a minimum national policy 'floor', in pure sustainability appraisal terms it results in under delivery against need. Spatial strategy alternatives that exceed the preferred option are already assessed as performing more strongly for the housing objective, however, that positivity needs to be more grounded as even these alternatives fall short of actual need. The SA's exploration of spatial strategies that would deliver more than the minimum level of need is not made explicitly on account of addressing the uncapped figure, although, implicitly, higher options would contribute to getting closer to this figure.

Based on the discussion below, there is a ‘positively prepared’ soundness issue in respect of the absence of any early review clause in Policy SP1 to address the uncapped level of need.

5

Reference ID: 2a-007-20190220 of the PPG is titled ‘Why is a cap applied?’. It explains that:

*The standard method may identify a minimum local housing need figure that is significantly higher than the number of homes currently being planned for. The cap is applied to help ensure that the minimum local housing need figure calculated using the standard method is as deliverable as possible.*

*The cap reduces the minimum number generated by the standard method, but does not reduce housing need itself. Therefore strategic policies adopted with a cap applied may require an early review and updating to ensure that any housing need above the capped level is planned for as soon as is reasonably possible.*

*Where the minimum annual local housing need figure is subject to a cap, consideration can still be given to whether a higher level of need could realistically be delivered. This may help prevent authorities from having to undertake an early review of the relevant policies.*

The PPG is clear in that ‘the need is the need’. It is the intention of national policy that authorities with an uncapped figure do ultimately have to try and plan for it. Effectively, authorities are offered a grace period for their first standard method-based Local Plan whereby they can plan for the capped need. This is part of a general push to increase the coverage of up-to-date development plans (by making plan-making more manageable). Authorities do not ‘have to’ consider planning for the uncapped figure but where they don’t, they can expect to have to undertake an early review.

The PPG applies the phrase ‘may require’ which requires some consideration of why an early review would not be required. We suggest that an early review might not be required if the evidence base was clear that early review would result in any further suitable and deliverable land supply being identified (for example, authorities such as Worthing cannot as they are contained by the sea and a national park) or that any additional land supply (whether for all or some uncapped need just was not deliverable). We do not see either set of circumstances in St Albans. The proposed supply is not the limit of suitable or deliverable supply. The 8 spatial strategy options in the SA identified two reasonable alternative strategic sites at St Albans totalling 2,200 homes and there are other sites, although not forming part of the spatial strategy options, that are deemed suitable at the site sequencing stage for each settlement

The Council has not really given consideration as to whether a higher level of need could realistically be delivered. We recognise that is does not ‘have to’ do this; it is only invited to consider doing so, as it may prevent the need for an early review if more land supply is adopted immediately.

Authorities that ‘do’ explicitly consider whether the uncapped figure could realistically be delivered (presumably wholly or partly), when preparing their first standard method-based plan, but conclude ‘that it isn’t’ (yet where there are reasonable alternative sites) must expect to undertake an early review and update.

Based on the wording of the PPG, anyjudgement on whether the uncapped need can ‘realistically be delivered’ made during the preparation of the first plan, would not have a determinative bearing on the outcome of the early review/update itself. In the early review/update the authority would be expected to plan for the higher level of need (and from the base date of the adopted Plan as opposed to the update/revision date). The early review/update would have to look back to the base date of the Plan, otherwise uncapped need housing will be ‘lost’ from the system that is capable of being planned

6

for. This resonates with the nonsensical argument that under delivery against need 'since' 2018/19 is somehow captured by the application of the capped or uncapped standard method from 2024/25. Moving the plan period forward to October 2024 is nothing more than 'creative accountancy' to hide 'bad debts'.

On the issue of 'realistically deliverable', we assess that this relates primarily to absorption rates. We do not assess that the pre-submission housing trajectory presents maximum absorption rates and make the following observations.

The stepped 'requirement' peaks at 1,255 per annum in years 6-10 and then drops off to 1,025 in years 11-15. The figure of 1,255 is not claimed as being a district-wide maximum. The fact the current peak drops off in years 11-15 indicates a 'minimum' additional absorption capacity of 1,150 in these years. The market could clearly also deliver more in years 1-5 when the stepped trajectory is much lower; that fact it will not is on account of the last plan being withdrawn.

Beyond the district wide level of analysis, consideration can also be given to each settlement. The district-wide trajectory is the agglomeration of settlement level/local market delivery. The emerging South West Hertfordshire Joint Strategic Plan identifies Hemel Hempstead (86,820) and St Albans (74,900) as the County's two sub-regional centres. When looking at both the emerging Dacorum and St Albans Local Plans, Hemel Hempstead is being planned to grow at a stronger rate. There is no reason why the rate of growth at the city of St Albans could not be higher than currently planned.

*Changes Sought*

Policy SP1 should be modified to include a new clause that commits the Council to an early review and focused/partial update of the Local Plan to address uncapped need (as far as possible under NPPF:11) from the base date of the plan (currently October 2024) to 2041. Based on the Plan as submitted, this would mean the Council attempting to identify:

- The difference between uncapped need and capped need for the second half of 2024/25 (142 homes).
- The difference between 16 years of uncapped need and capped need form 2025/26 (16 x 284 = 4,544 homes)
- Around 4,686 additional homes in total from the submitted base date of October 2024.

As set out under Soundness Issue 1, the base date of the plan is contested (in terms of 2025 as a half year and looking back to withdrawal of the previous Local Plan and the introduction of the standard method). The examination's assessment of the sound policy position in respect of the base date of the Local Plan could increase the level of uncapped need to be addressed (beyond 4,686) in an early review.

Table 4 identifies the additional shortfall that accrues to end of 2023/24 under an uncapped need scenario. The key figure is the difference between the figures highlighted in yellow (which is -1,549). The equivalent figure when only looking back to the year of the withdrawal of the previous plan is -981.

Currently, the first half of 2024/25 is not in the plan period at all, and so a half year of uncapped housing need also needs to be accounted for in early plan review, i.e. 585 (1,169 / 2).

In total, up to another 2,000 homes need to be sourced in early plan review (when looking backwards) in addition to 4,686, looking forwards.

[See attachment for table]

It is essential that the main modification should identify when the Council should begin the update process (we suggest within 12 months of adoption) and when it should submit the update for examination (we suggest within 3 years of adoption). It should further qualify that policies for the supply of housing will be regarded as out of date if a three-year resubmission date is not achieved,

and that very special circumstances will be deemed as being triggered for land in the Green Belt. In addition, amended supporting text should identify the residual level of housing need that the early review will have to address. In addition, any safeguarded land should be regarded as an allocation with the general provisions of LG1 (Broad Locations) being applicable to guide planning applications and their determination, alongside all the adopted 'in-date' policies of the Plan

Due regard will need to be had to emerging national policy during the examination and whether new transitional arrangements affect the wording of a main modification. At the time of the Regulation 19 consultation, the proposed changes to the NPPF would require Local Plans that are adopted with a housing requirement that is more than 200 below the relevant LHN (assumed to be the new LHN) to undertake a new plan-making process as soon as possible. This may command a fuller review/update and timing provisions, to address as far as possible, a new,very high housing need figure (around 1,500 per annum at consultation stage of the revised NPPF). There may be revised PPG guidance (or not) that advises that this new figure once again wipes the slate clean regarding under delivery before its formal establishment.

Notwithstanding, the proposed changes to national policy and transitional arrangements, reference to early review is required for soundness based on current national policy guidance in the PPG.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

***Soundness issue 1 - Changes Sought***

- Modify SP1 to amend the base date of the plan period to 2018 (or 2020) and introduce additional land supply to meet capped need, focusing first on reasonable alternative strategic sites identified in spatial strategy optioneering at St Albans, and then any other sites deemed suitable.

or

- Modify SP1 so that it commits to an early 'update' to achieve the same outcome (NB: at this stage we are identifying the need for an early update to address capped need since 2018, but soundness issue 2 identifies the need to address uncapped need since 2018, and from 2024).

***Soundness issue 2 - Changes Sought***

Policy SP1 should be modified to include a new clause that commits the Council to an early review and focused/partial update of the Local Plan to address uncapped need (as far as possible under NPPF:11) from the base date of the plan (currently October 2024) to 2041. Based on the Plan as submitted, this would mean the Council attempting to identify:

- The difference between uncapped need and capped need for the second half of 2024/25 (142 homes).
- The difference between 16 years of uncapped need and capped need form 2025/26 (16 x 284 = 4,544 homes)
- Around 4,686 additional homes in total from the submitted base date of October 2024.

As set out under Soundness Issue 1, the base date of the plan is contested (in terms of 2025 as a half year and looking back to withdrawal of the previous Local Plan and the introduction of the standard method). The examination's assessment of the sound policy position in respect of the base date of the Local Plan could increase the level of uncapped need to be addressed (beyond 4,686) in an early review.

Table 4 identifies the additional shortfall that accrues to end of 2023/24 under an uncapped need scenario. The key figure is the difference between the figures highlighted in yellow (which is -1,549). The equivalent figure when only looking back to the year of the withdrawal of the previous plan is -981.

Currently, the first half of 2024/25 is not in the plan period at all, and so a half year of uncapped housing need also needs to be accounted for in early plan review, i.e. 585 (1,169 / 2).

[See attachment for table]

It is essential that the main modification should identify when the Council should begin the update process (we suggest within 12 months of adoption) and when it should submit the update for examination (we suggest within 3 years of adoption). It should further qualify that policies for the supply of housing will be regarded as out of date if a three-year resubmission date is not achieved, and that very special circumstances will be deemed as being triggered for land in the Green Belt. In addition, amended supporting text should identify the residual level of housing need that the early review will have to address. In addition, any safeguarded land should be regarded as an allocation with the general provisions of LG1 (Broad Locations) being applicable to guide planning applications and their determination, alongside all the adopted 'in-date' policies of the Plan

Due regard will need to be had to emerging national policy during the examination and whether new transitional arrangements affect the wording of a main modification. At the time of the Regulation 19 consultation, the proposed changes to the NPPF would require Local Plans that are adopted with a housing requirement that is more than 200 below the relevant LHN (assumed to be the new LHN) to undertake a new plan-making process as soon as possible. This may command a fuller review/update and timing provisions, to address as far as possible, a new,very high housing need figure (around 1,500 per annum at consultation stage of the revised NPPF). There may be revised PPG guidance (or not) that advises that this new figure once again wipes the slate clean regarding under delivery before its formal establishment.

Notwithstanding, the proposed changes to national policy and transitional arrangements, reference to early review is required for soundness based on current national policy guidance in the PPG.

## 172 - Mr and Mrs Robert and Karen Choppin

Submission Number: 172 Submission Date: 07/11/24 14:30

Respondent: Company/Organisation: Studio LK Name: Lita Khazaka

On Behalf Of Company/Organisation: Name: Mr and Mrs Robert and Karen Choppin

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Summary**

The trajectory is flawed. E.g. new Table 3.2 has re-categorised sources of future housing delivery relative to the Regulation 18 draft version. These three sources are: Windfall allowances (2,013 net); Harpenden NP allocations (57); and Part B site allocations (10,653). In total, this amounts to 12,723 homes and not 14,603 as the Regulation 19 draft is planning for.

There is a missing 1,880 homes in the trajectory. The council is urged to prepare a paper clarifying the trajectory it has published and correct any errors in it.

Moreover, the trajectory is overly ambitious in some respects and unreasonable in others. The revised Table 3.2 of the Draft Local Plan contains very ambitious targets for housing delivery. For example, it assumes that 2,103 homes (13%) will be delivered on windfall sites. It is unclear how the council has reached this figure and it is inappropriate to “gamble” on such a high figure coming from sites that it is not aware of. Past opportunities of new homes through the prior approval process and on previously developed land in urban areas will dry up. Much of the recent windfall has come from the release of Green Belt land on appeal. These opportunities will disappear once the council has a new adopted Local Plan.

Moreover, the council has re-imposed Article 4 directions on most of its employment stock that will prevent their easy conversion to housing and its employment policies (Policy SP5) seek specifically to protect the remaining stock.

A further defect in the trajectory is that it assumes no sites coming forward for development in the period 2023/4 to 2027/8 and the bulk being delivered in the period 2031/2 to 2035/6 delivering levels of housing never experienced in the district (1,255 homes a year for five years).

This trajectory is putting off the acute local problems of housing affordability because it effectively restricts supply for a further seven years. This is wholly inconsistent with the NPPF (Paragraph 69a) which requires councils to identify “specific, deliverable sites” in the first five years of a Local Plan.

**Planning for new homes in the spatial strategy**

2.1. The spatial strategy places great reliance on the role of the Hemel Garden Communities project in delivering 30% of the borough’s stated housing target. It is unclear if it is viable to “put so many eggs in one basket” especially as there is no published Duty to Cooperate evidence that other agencies will commit to deliver the substantial amount of infrastructure required with it. For example, the Infrastructure Schedule spreadsheet refers to Department for Transport (DfT) RIS3 funding for improvements to the M1 at Junctions 8 and 9 (projects 104 and 105) but the Arup Infrastructure Delivery Plan1 makes clear that DfT funding will be limited to maintenance only. Until this matter is sorted – including identifying which body will pay for upgrading the road infrastructure in the absence of DfT funding and which one will cover any cost overrun of the works - the Hemel Garden Communities project may be at risk of not being delivered or at least not delivered to the scale proposed.

**Housing numbers and trajectory**

2.2. Notwithstanding this matter, the housing target in Policy SP1 is unsound. The council has reduced its housing target from at least 15,096 homes in the Regulation 18 draft to at least 14,603 homes and has now put back yet again the start date of 1 October 2024 for the delivery of these new homes. The proposed buffer in terms of sites that will deliver this target (refer Table 3.2) has been reduced from 5% to 2.6% too between the Regulation 18 and 19 drafts of the Local Plan.

2.3. The council’s revised approach is unsound because it cannot be justified based on current government guidance and the council has not identified an alternative method. Put simply, the housing target is too low and the proposed housing trajectory (refer Table 3.2) makes overly ambitious assumptions about windfalls and unallocated sites delivering new homes while putting off the delivery of much needed housing until the 2030s. This approach is not consistent with national policy in the National Planning Policy Framework (the NPPF)2.

2.4. Studio LK notes the following four grave deficiencies with regard to the Draft Local Plan’s housing numbers and trajectory.

2.5. First, the housing target in the Draft Local Plan is too low. The Regulation 19 Draft Local Plan housing target is for at least 14,603 net new homes. This appears to be based on a multiplication of the annual housing target (885 net new homes, a correction to the figure of 888 in the Regulation 18 draft) over a 16.5 year period (that is, 885 x 16.5). As the Draft Local Plan states that it is planning until 2041, this implies a start date for the Local Plan of October 2024. This start date cannot be correct as work on the draft Local Plan actually started in January 2021 when the council issued a Call for Sites, the Sustainability Appraisal Scoping Report and the updated Statement of Community Involvement/ Local Development Scheme. This was when Mr and Mrs Choppin first engaged professional assistance to participate in this consultation.

2.6. It is to be remembered that the council has been the subject of a number of Intervention Letters from successive Secretaries of State because of its inability to prepare a sound plan. It has given repeated promises that a Local Plan would be prepared promptly. Work began on this Draft Local Plan immediately after the 2018 Draft Local Plan was withdrawn in November 2020

2.7. Assuming this New Local Plan is to run until 2041, the housing target therefore needs to be for housing delivered over a 20 year period, on the basis that work on the Local Plan actually started in 2021, or else the Local Plan needs to run from 2021 to 2038. Assuming an annual figure of 885 net new homes and that the Local Plan is to run until 2041, this would mean that the housing target should be at least 17,700 net new homes (that is, 885 x 20). It is clear that the council recognises this defect because, although it states that the Local Plan start date is 1 October 2024, its latest Housing Trajectory (Table 3.2) still includes 1,080 housing completions from 2021/22, 2022/23 and 2023/24 (7.2% of the total trajectory).

2.8. A housing target of at least 17,700 homes may be conservative as the council still has a Duty to Cooperate with other local authorities. The council may be meeting the employment land needs of some of its neighbouring authorities but it may also have to take some unmet housing need from either a near neighbour in South West Hertfordshire (possibly Dacorum if that authority cannot satisfactorily convince an Inspector or Natural England that it can mitigate the environmental damage to the Chilterns Beechwoods SAC associated with the need to plan for new housing) or one of the London boroughs given that the district is in the Travel to Work Area of both Greater London and Watford Junction and enjoys fast, frequent rail links from Harpenden and St Albans (Abbey and Central).

2.9. Second, the housing buffer in the Housing Trajectory is too low. It needs to be a 20% buffer to be consistent with the NPPF (Paragraph 77). Even if one were to assume a start date of 2024 for the Draft Local Plan (which the council cannot for the reasons set out above), the local planning authority must also plan for all the years when there was no up-to-date Local Plan in place and the council was not meeting Government-set housing delivery test targets (refer Table 1 –*see attachment*).

2.10. The council has consistently underperformed in this respect in recent years. Figure 1 –*see attachment*– shows that the council has not met the standard housing method target in any of the past five years for which statistics have been published.

2.11. In recent years, the pipeline of new housing sites has increasingly relied on unplanned for releases of Green Belt land (refer Figure 2 –*see attachment*) approved either on appeal or through the application of "material considerations".

2.12. In such situations, the NPPF requires a 20% buffer. Assuming that the council must plan for a higher housing target of at least 17,700 net new homes over a 20 year period (from 2021 when work on this Local Plan actually began until 2041 following the withdrawal of the 2018 iteration of the Local Plan), this would mean that the council should plan for a housing trajectory that will potentially deliver at least 21,240 net new homes.

2.13. Third, this flawed housing trajectory is flawed. The new Table 3.2 has re-categorised sources of future housing delivery relative to the Regulation 18 draft version. These three sources are: Windfall allowances (2,013 net); Harpenden NP allocations (57); and Part B site allocations (10,653). In total, this amounts to 12,723 homes and not 14,603 as the Regulation 19 draft is planning for. There is a missing 1,880 homes in the trajectory. The council is urged to prepare a paper clarifying the trajectory it has published and correct any errors in it.

2.14. Fourth, the trajectory is overly ambitious in some respects and unreasonable in others. The revised Table 3.2 of the Draft Local Plan contains very ambitious targets for housing delivery. For example, it assumes that 2,103 homes (13%) will be delivered on windfall sites. It is unclear how the council has reached this figure and it is inappropriate to “gamble” on such a high figure coming from sites that it is not aware of. Past opportunities of new homes through the prior approval process and on previously developed land in urban areas will dry up. As has been shown above (at Figure 2), much of the recent windfall has come from the release of Green Belt land on appeal. These opportunities will disappear once the council has a new adopted Local Plan. Moreover, the

council has re-imposed Article 4 directions on most of its employment stock that will prevent their easy conversion to housing and its employment policies (Policy SP5) seek specifically to protect the remaining stock.

2.15. A further defect in the trajectory is that it assumes no sites coming forward for development in the period 2023/4 to 2027/8 and the bulk being delivered in the period 2031/2 to 2035/6 delivering levels of housing never experienced in the district (1,255 homes a year for five years). This trajectory is putting off the acute local problems of housing affordability because it effectively restricts supply for a further seven years. This is wholly inconsistent with the NPPF (Paragraph 69a) which requires councils to identify "specific, deliverable sites" in the first five years of a Local Plan.

**Flaws in the council's approach to site allocations**

2.16. Studio LK submits that the council's approach to site allocations in general is flawed and inadequate in other respects too.

2.17. By way of a starting point, the Draft Local Plan proposes some housing allocations that run contrary to other strategies. For example, Site Allocations B5 (Glinwell), B6 (land west of London Colney) and B8 (Harper Lane) are in areas where the council believes there are minerals deposits and, thus, their allocation would be contrary to the Hertfordshire Minerals Plan.

2.18. Other parts of this Draft Local Plan (Policy SP7) seek to protect existing community infrastructure yet the council is seeking to allocate church sites for housing - Site Allocations P3 (Friends Meeting House) and U3 (former Brocket Wood United Reformed Church) - when these sites should be considered in the first place for other community use given the problems of high land prices locally.

2.19. Further, it seems illogical for the council to release the nearby Smallford Works on Smallford Lane (Site Allocation P1) for housing while seeking at the same time to take out of the Green Belt substantial areas for employment land elsewhere (55 ha in Policy SP5), much of it in the Green Belt north and east of Hemel Hempstead at the same time. Moreover, it is an isolated site and not as suitable for housing as Mr and Mrs Choppin's site which adjoins housing on three sides.

2.20. Finally, the submission below identifies other deficiencies on housing numbers. Most notably, the draft Local Plan does not address its need for specialist housing groups. It has not allocated sufficient sites for gypsies and travellers. This is not only a soundness matter but potentially a legal deficiency in the whole of the Local Plan process too in that the council does not appear to be addressing its Public Sector Equality Duty under the Equality Act 2010.

2.21. That the Draft Local Plan has not allocated any pitches for travelling showpeople either despite the advice in the GTAA reinforces Studio LK's view that the council's approach to site allocations overall is illogical and flawed.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Revised trajectory that makes adequate provision for a larger buffer and the need to meet a higher housing target.

To remedy these many defects in the council's approach to its housing target numbers, trajectory and sites allocation, Mr and Mrs Choppin urge the Inspector and council to support the allocation of additional sites for housing that could be delivered quickly and specifically identify them in the

Local Plan to help address uncertainty about the Plan's housing trajectory and plan for what is likely to be a much higher housing target. Table 2 [in attachment] summarises the aforementioned problems with the approach taken so far by the council against the four tests of soundness in paragraph 35 of the NPPF.

Submission Number: 180 Submission Date: 30/10/24 09:00

Respondent: Company/Organisation: MRP Planning Name: Mr Brian Parker

Comment Number: 4

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**1 Summary**

1.1 The Draft Local Plan 2041 (the DLP) is St Albans Council's latest attempt to replace the 1994 Local Plan Review, Adopted 30 years ago next month. The five previous attempts all ended in failure:

- Local Development Framework 2006-2021 (consulted upon in 2009);
- The Core Spatial Strategy 2011-2028 (consulted upon in 2010);
- The Strategic Local Plan 2011-31 – Version 1 (consulted upon in 2012);
- The Strategic Local Plan 2011-31 – Version 2 (consulted upon in 2014); and, finally,
- The Local Plan 2020-36 (consulted upon in 2018) ... and Withdrawn in November 2020.

1.2 The one genuine spark of optimism associated with this latest attempt is that it may be the last time the Council is allowed to write one on its own. That is because in her Written Ministerial Statement, 30th July 2024, the Deputy Prime Minister wrote:

*"I will not hesitate to use my powers of intervention should it be necessary to drive progress – including taking over an authority's plan making directly."*

... here's hoping.

1.3 In the meantime, and as set out in the following pages, the Council, via this latest DLP, once again fails the thousands of local people who want and need more affordable housing (and for it to be more affordable). That is because, whilst Local Plans provide an opportunity for Councils to

"*provide a positive vision for the future of each area; a framework for addressing housing needs and other economic, social and environmental priorities; and a platform for local people to shape their surroundings"*(NPPF [15]) ...

if the Council's vision for the future is realised then at least 60% of all new houses will be affordable to only the top few percent of the population (think lawyers and fund managers rather than teachers and nurses). For the rest, the advice on the Council's 'Finding a Home' webpage is nothing if not direct:

*"To solve your housing difficulties please consider ... moving to a more affordable location."*

## 2 Soundness

2.1 Paragraph 35 of the NPPF sets out the criteria by which a Draft Local Plan is tested for 'soundness':

*"Plans are 'sound' if they are:*

1. *Positively prepared – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*
2. *Justified – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*
3. *Effective – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*
4. *Consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant."*

2.2 For the reasons set out in the next four sections, the DLP fails each test.

## 3 Positively prepared

3.1 Whilst the NPPF requires Local Plans to provide a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, the DLP deliberately fails to meet the affordable housing need or mix identified by its housing evidence.

3.2 The NPPF states that housing strategies in a Local Plan should be based on an objective assessment of housing need using the Standard Method (NPPF, [61])1. The DLP is informed by the South-West Hertfordshire Local Housing Needs Assessment (the LHNA) (GL Hearn, 2020). For St Albans, its key figures and the subsequent targets in the DLP are set out below (informed by Draft Policies SP1 and HOU2):

[Footnote 1 - Unless exceptional circumstances justify a different approach, which the Council has not claimed applies here.]

[Please see attachment for Table]

3.3 So, whilst the 2020 LHNA (just like its 2016 predecessor and the Housing Market Assessments by Housing Vision which preceded that), found that the vast majority of the housing need was for different types of affordable housing, the DLP prioritises open market houses.

3.4 In October 2024, the average house price in St Albans was £648,387[2]. To purchase a house of that price, a typical two-income household would require a deposit of c.£65,000[3] and a combined annual income of £133,000[4]. As the average annual two-income household in St Albans is £67,790[5], it is obvious that the vast majority of the houses planned for in the DLP do not meet the area's objectively assessed needs.

[Footnotes 2-5:

[2] The mean of the "average house price in St Albans" on three websites: £653,398 on Zoopla; £630,000 on Plumplot; and £660,763 on Home.co.uk (October 2024)

[3]Based on a typical 10% deposit

[4] Based on a typical 4.5 multiple

[5] ONS House price to workplace-based earnings ratio England and Wales 1997-2023, Table 5b (March 2024)]

3.5 Consequently, the DLP has not been positively prepared.

**4 Justified**

4.1 The NPPF requires Local Plans to promote an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.

4.2 As set out in the previous section, the evidence in the LHNA does not support the housing mix proposed in the DLP.

4.3 Even if the Council thought it would be impossible to require 93% of all houses to be affordable, it must provide evidence to support this view and demonstrate why the affordable housing contribution could not be closer to the identified need than 40%. It has failed to do so.

4.4 Furthermore, even if the Council wishes to argue (as it appears to do) that 40% is the most that could be demanded from landowners and developers, it absolutely knows that is not the case. 45% of the new homes at the Bullens Green Lane scheme (Ref: 5/2020/1992) will be affordable and 100% of the new homes at Addison Park (Ref: 5/2021/3194) will be affordable. In a depressing sign of the Council's aversion to delivering more than 40% affordable housing, it refused both of these schemes and spent tens of thousands of pounds of taxpayers' money fighting them, unsuccessfully, at Appeal.

4.5 Finally, of course, the Council's lack of ambition for affordable housing will likely be undermined by the imminent publication of a new NPPF. Draft Paragraph 155 will require *"at least"*50% of homes on land released from the Green Belt through plan preparation to be affordable housing. However, rather than seize this opportunity to deliver more of the houses its proportionate evidence demonstrates is needed, the Council is desperately trying to preserve its strategy of prioritising open market housing by rushing to Examination. This clearly unsustainable strategy fails to meet the needs of the present generation whilst for future generations it reasserts the Council's advice that they should *"move to a more affordable location"*.

4.6 Consequently, the DLP is not justified.

**5 Effective**

5.1 The NPPF requires Local Plans to be based on *"effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground"*(emphasis added).

5.2 However, in its unseemly haste to avoid meeting the housing needs of its local communities, the Council has brought forward its Local Plan timetable. By doing so, not only did the Council fail to give sufficient time to review the Regulation 18 Consultation comments in full (particularly in respect of the Arup Green Belt Review and the Site Selection process), but it also acknowledged that it hadn't completed its job properly.

5.3 The Officer Report to the Planning Policy & Climate Committee on 23rd September – whose recommendation to proceed to Regulation 19 Consultation was accepted – expressly stated that as a direct result of its changed timetable (3.28 [1]), rather than evidence that cross-boundary strategic matters *"have been dealt with"*by statements of common ground:

*"There will realistically be fewer agreed and signed Statements of Common Ground to assist the Inspectors."*

5.4 The obvious consequence of this admission is that there can be no confidence that the DLP is effective.

## 6 Consistent with national policy

6.1 The NPPF requires Local Plans to enable the delivery of sustainable development in accordance with the policies in the Framework and other statements of national planning policy, where relevant.

6.2 Paragraph 7 of the NPPF states, in part:

*"... the objective of sustainable development can be summarised as meeting the needs of the present without compromising the ability of future generations to meet their own needs".*

6.3 As already demonstrated in Sections 3 and 4 above, by rejecting the evidence of its own Local Housing Needs Assessment (the LHNA) the Council has deliberately chosen not to meet the needs of either the present or future generations. Instead, the DLP prioritises very expensive open market houses over the proportion and mix of affordable houses that are actually required.

6.4 In particular, whilst the Glossary of the St Albans City & District Housing Needs Survey Update, 2006 (DCA) recognised that:

*"A Key Worker is any person who directly provides services that are **essential for the balanced and sustainable development** of the local community and local economy ..."*(emphasis added)

the LHNA (Sept 2020) did not even attempt to measure the housing needs of those members of society who are essential for the balanced and sustainable development of the local community.

6.5 Inexplicably and inexcusably, the DLP contains no specific policies for essential local workers[6]. Which bit of "essential" do St Albans' Councillors not understand?

[Footnote 6: Public sector employees who provide frontline services in areas including health, education and community safety – such as NHS staff, teachers, police, firefighters and military personnel, social care and childcare workers (NPPF [Glossary])]

6.6 The purpose of the planning system is to achieve sustainable development (NPPF [7]). The DLP clearly fails to achieve that goal. Consequently, it is unsustainable and inconsistent with national policy.

## 7 Conclusions

7.1 The Local Plan process offers an opportunity for Councils to "*provide a positive vision for the future"*of the area they serve and for the people they represent. For the sixth time in 15 years, St Albans Council has spurned that opportunity.

7.2 Planning policy tools already exist to allow Councils in areas where houses prices are high to deliver more of all types of affordable housing and to make home ownership more affordable. National policy is about to change, too, which will require at least half the new housing on large sites, such as the Broad Locations, to be affordable.

7.3 All the evidence tells us that St Albans is one of the most expensive Districts in the country where such tools should be deployed and where the minimum 50% affordable housing requirement should be embraced. And yet, those tools are not being used and the Council is rushing to Examination in an undignified attempt to dodge its responsibility to deliver more affordable homes.

7.4 Whilst the LHNA demonstrates that the clear majority of new homes needed should be affordable, the DLP is demanding only 40%, less than is already being promoted by landowners. Think about that for a moment: landowners and developers are more progressive and in tune with the needs of the community than St Albans City and District Council. A sad indictment of the Council's lack of ambition.

7.5 The Draft Local Plan 2041 is desperately unambitious and demonstrably unsustainable. It fails all four tests of soundness and should not proceed to yet another expensive and unsuccessful Examination. Instead, the Council should acknowledge it is incapable of producing a sound Local Plan and ask the Government to intervene.

**190 - Julie Bennett**

Submission Number: 190 Submission Date: 07/11/24 15:42

Respondent: Company/Organisation: Woods Hardwick Planning Name: Talys Nikan

On Behalf Of Company/Organisation: Name: Julie Bennett

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Policy SP1 suggests that "*the Spatial Strategy positively plans for the future to ensure that by 20241 St Albans District is a great place to live, work and visit*".

Paragraph 1.31 of the supporting text confirms that:

*"There is a clear need for more new homes because of the national situation, high house prices and also a need for more local people to have the opportunity to live and work where they were brought up. To do this the District needs in particular a supply of first family homes to purchase, affordable homes to rent and buy, and to provide opportunities for downsizing and Self-build and Custom Housebuilding…..".*

Table 1.2 sets out the Local Plan Objectives, of which one is *"provide a sufficient amount of good quality housing which meets the needs of all sections of society in sustainable locations.*

It is difficult to rationalise these statements with the Council's decision to accelerate its Local Plan preparation timetable in a clear and deliberate attempt to delay meeting the increased housing requirement under the new Government's proposed amendments to the Standard Methodology ("SM) for calculating local housing need that were the subject of recent consultation.

The Briefing Note on proposed reforms to the NPPF and other changes to the planning system that was presented to the Planning Policy & Climate Committee meeting of 12 September 2024 set out the implications of the revised Standard Methodology proposed, with the annual housing requirement for St Albans District increasing from 885 to 1,544.

The principal reason the SM figure becomes as high at is does for St Albans, is that the Council has for decades failed to deliver the required level of growth to meet the needs arising in the District, primarily due to the fact that it last adopted an up-to-date Development Plan 30 years ago, and that only planned to meet housing need to 2021. The chronic undersupply that has a resulted has directly contributed to the affordability issues that beset the District.

The framework for formulating strategic policies since the last Plan was adopted has drastically changed – particularly given the NPPF as a policy instrument did not even exist in 1994 at the time of the current, albeit out-of-date, Plan's adoption and indeed has even undergone several iterations since its first implementation in 2012.

Affordability has always been a key factor in the SM formula, and given St. Albans district has consistently tracked as one of the least affordable places in the entire country it only accentuates the dire circumstances households in the District finds themselves in with respect to securing not just affordable homes, but homes in general.

The crux of the issue, therefore, is that the progression of the current emerging Local Plan (eLP) will result in a situation whereby the development plan will remain "out-of-step" with national policy and a strategy that properly seeks to address housing need and affordability issues will be delayed again.

The new Government was elected in July 2024 with a clear mandate to address the housing crisis that has been plaguing the nation for years. The Government swiftly announced they would be seeking to reform the NPPF and the planning system as a whole to facilitate positive change across the country with a consultation on the proposed changes announced in the same month. Whilst the outcome of the public consultation on the proposed changes is yet to be announced, it has recently been confirmed by Government that the new NPPF will be in place by the end of the year, which is only weeks away, and it is evident in the objectives and aspirations of this Government there will be a step-change in the amount of housing it seeks for Councils to deliver and, critically, *when* it will be delivered.

It is unfathomable, therefore, that this Council is actively seeking to accelerate the timetable for its eLP to take advantage of the transitional arrangements in the consultation draft NPPF. Certainly, the Council's case for this is flawed. It argues that were it to consider the outcome of the proposed changes then it would be forced to delay adoption of a new Plan by some 2-3 years at a time when housing is much needed in the District (as already noted that is hardly a new situation) and the vehicle for delivery of those homes is the eLP in its current form. However, in accelerating the

Plan this Council would be seeking to deliver substantially short of its local housing need under the proposed methodology and would then have to immediately commence a review of the new Local Plan to make up shortfall, which would take considerably longer than 2-3 years to put in place.

Continuing with the eLP would not address the clear direction of travel in terms of the new approach to calculating need that is likely to be adopted by Government in the coming months, which in turn will have untold years of impact upon the those in need of housing now in this District. The Council intends to commit itself to this current eLP thereby delaying when it would take the time to formulate a strategy to meet the needs of a revised SM, and take further time still to implement that strategy, and even further time thereafter to see that level of growth being delivered.

Such an approach is contrary to even the current December 2023 version of the Framework, which sets out at paragraph 7 that the purpose of the planning system is to contribute to the achievement of sustainable development, including through the provision of new homes.

Paragraph 8b) adds that part of the social objective of sustainable development is *"…. ensuring that a sufficient number and range of homes can be provided to meet the needs of present and future generations…."*

Paragraph 11a) of the presumption in favour of sustainable development requires all plans to promote a sustainable pattern of development that seeks to meet the development needs of the area.

Paragraph 16 requires local plans to a) be prepared with the objective of contributing to the achievement of sustainable development and b) be prepared positively.

Paragraph 22 requires strategic polices, of which SP1 is one, to look ahead over a minimum of 15 years period from adoption, to anticipate and respond to long-terms requirements.

Paragraph 35a) on examining plans, requires plans to be positively prepared, providing a strategy which as a minimum, seeks to meet the area's objectively assessed needs. Footnote 19 sets out that needs for housing should be assessed using a clear and justified method, as set out in paragraph 61 of the Framework. Paragraph 61 requires strategic polices, such as Policy SP1, to be informed by a local housing needs assessment, conducted using the current standard method in national planning guidance. It adds that outcome of the standard method is an advisory starting-point for establishing a housing requirement for the area. It refers to paragraph 67, which confirms that housing requirement can be higher than the standard method figure.

Paragraph 35b) requires Local Plans to be justified, meaning they are an appropriate strategy, taking into account the reasonable alternatives, and base on proportionate evidence.

Paragraph 35d) requires plans to be consistent with national policy.

Having regard to the above, particularly, the impending substantial increase in housing need under the new proposed approach to the SM, our client considers Policy SP1, and the approach of meeting only the current SM figure of 885 dpa, to be unsound. It cannot be considered positively prepared or consistent with national policy in this context, nor is it the most appropriate strategy.

The only course of action this Council should be considering is how to align the objectives of any forthcoming Plan with those of the new Government. That can only be achieved if an amended draft Plan is formulated to take account of changes to the NPPF and the SM when they are introduced later this year. Work on this eLP should therefore be suspended effective immediately or this Council will continue to damage the social, economic, and environmental fabric of the District in an effort to defer again facing up to its substantial housing need. The consequences of which will be monumental when considering the time lag for addressing any revised SM through a new Local Plan as part of a review post-adoption of the current plan, assuming it is found sound, which seems highly questionable and the eLP cannot be considered positively prepared, is not justified and will not be effective as required by paragraph 35 of the NPPF.

**Spatial Strategy**

Sustainability Appraisal – Local Housing Need

The Local Plan seeks to deliver 14,603 dwellings over a 17 year period and includes a 5% uplift to account for unaffordability. The Council's Sustainability Appraisal Report[6] in paragraphs 5.2.16 – 5.2.25 discusses the main reasons for considering a local housing need requirement higher than the standard method and concludes the subsequent affordable housing need is a lot higher than the present Reg 19 Plan is providing for.

Furthermore, the draft revised Standard Method outlined in the consultation on the draft NPPF has increased the weight afforded to affordability in the calculation. This results in a 74% increase in the housing targets for St Albans district, as referenced in Council papers[7]. The housing requirement would be 26,248 dwellings rather than 14,603 over the 17 year plan period. Given this increase, the higher figure is likely to be a more accurate representation of the actual housing needs within St Albans. **It would be a more effective and responsible strategy to plan for more growth than is required, in an attempt to address the severe under provision that has occurred for many years both for affordable housing and needs generally.**

In addition to local housing need there is also a discussion about the affordable housing needs of the district. The Local Housing Needs Assessment[8] identifies a need for 802 affordable homes per annum, which is a very high number relative to LHN of 885. Given that the PPG states that "an increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes" it seems unachievable in the present version of the Plan to deliver the required affordable homes in the district given that the need figure is 90.6% of the total annual housing provision being planned for. This supports a higher growth scenario, as this will lower the proportion of affordable housing that needs to be delivered and increase the opportunity for affordable housing being provided for in cross-subsidy schemes with general market housing.

Finally, there is a discussion, in Box 5.1, about unmet housing need from the other authorities in the wider South West Hertfordshire sub-region and neighbouring authorities. The discussion points out that there is likely to be unmet need arising from Dacorum and Hertsmere Borough Councils and significant unmet need from Three Rivers District Council and Welwyn Hatfield District Council.

The discussion concludes that there is a 'high level case for exploring growth scenarios involving setting the housing requirement above the LHN, particularly given the latest understanding of unmet housing need within the sub region'. Why have St Albans chosen not to meet any of these unmet housing needs when it is clear from the SA that a higher level of growth could be accommodated without significant adverse effects? It is furthermore acknowledged that a higher growth level could unlock transport upgrades, which the region urgently requires. This is not a positive strategic, cross boundary planning and it is irresponsible for the Council to not bring forward an ambitious strategy that will more effectively address housing need and affordability across the district and the sub region.

Without the overarching presence of the JSP it is incumbent on the individual planning authorities in the South West Hertfordshire region to effectively cooperate in relation to unmet housing needs and this acknowledgement of their remaining unmet needs without proper evidence of effective engagement between authorities throws into question whether this Plan and other Local Plans across the sub region have been positively prepared. This puts much of the County of Hertfordshire at risk of having no adopted or up to date local plans if plans are found unsound and subsequently withdrawn from Examinations.

Sustainability Appraisal – Growth Scenarios

It is recognised within the SA that planning for 'higher growth at St Albans could unlock or facilitate the delivery of strategic transport infrastructure upgrades'. Later in the discussion it is highlighted that the A414 corridor needs upgrades in order to accommodate the higher level of traffic that will be generated from new development and to fix existing issues at strategic junctions. There is also a recognition that supporting strategic growth locations in the areas where housing is needed, such as St Albans City, would provide the opportunities to develop 'walkable neighbourhoods' through a master planning approach.

Increasing the number of homes being delivered on the urban edge of St Albans would improve the prospects of not only creating new 'walkable neighbourhoods' on allocated sites but also integrating with and improving the connectivity of existing communities to the city centre and new services and facilities.

It is highlighted that a factor for discussion regarding the higher growth option is '*that exporting unmet need may well lead to increased car-miles' (page 136)* however, there is no consideration within the appraisal of the impacts on the transport network of delivering a significant portion of homes across the plan period at Hemel Hempstead. Delivering approximately 38% of the District's growth remotely from its Tier 1 settlement will increase the number of car-miles between Hemel Hempstead and St Albans and will only increase pressure on the A414 corridor, which is the main route between the two settlements, as there is no train link between St Albans and Hemel.

This approach does not align with the objectives of the Local Plan to 'reduce greenhouse gas emissions' and 'prioritise and enable the safe and attractive use of active and sustainable means of transport and reduce the need for people to travel'. It is also contradictory to discounting a higher growth scenario with further allocations on the urban edge of St Albans City.

It is our view that the appraisal fails to highlight the opportunities that would be presented from planning for a higher growth scenario, such as:

- Increased developer contributions towards infrastructure to provide more school provision, health care facilities, highways upgrades and open space provision, all of which have been identified as being required through the Infrastructure Delivery Plan[9].
- Opportunities for biodiversity enhancements and contributing to the emerging Hertfordshire Local Nature Recovery Strategy[10].
- Increase delivery of housing, and affordable housing, increasing the supply of homes and improving affordability across the District.
- Contributing to the unmet needs of neighbouring authorities, helping to address housing delivery at a regional scale.

These additional benefits should be given more weight in the decision on the local housing requirement as the higher growth scenario could contribute significantly to alleviating several of the District's planning issues. **It is our view that the Council should be planning for a higher level of housing that the standard method LHN figure.**

Housing Trajectory

The Council sets out it's housing trajectory on page 26 of the draft Local Plan[11]. It is outlined that a stepped approach is being taken to 'allow for sufficient time for the significant uplift in housing delivery to be realistically delivered'. The stepped approach on housing delivery assumes that none of the allocated sites will deliver in the first 3 years after adoption of the Plan and that the housing requirements will be met through existing permissions and windfall development.

The stepped requirement sets out that the annual housing requirement will be 485 dwellings in the first 5 years of the plan, increasing to 1,255 dwellings in years 6-10 and 1,025 dwellings in years 11-15. The St Albans Housing Delivery Test Action Plan 2022[12] shows that since 1994 an average of 395 dwellings per annum have been delivered and of those years the maximum level of housing delivery was 624 dwellings in 2018/19. The Council should be identifying and allocating

sufficient amounts of deliverable sites to ensure that the annual housing requirement is met from the start of the plan period and to ensure that there is a sufficient supply of land from the point of adoption.

Furthermore, there is a requirement within the plan to deliver 885 dwellings per annum, which amounts to 4,425 dwellings over a five year period, with a 20% buffer, required by para 77 of the NPPF, this figure amounts to 5,310 dwellings over a 5 year period. The current stepped housing trajectory is wholly inadequate as it results in a 2,885 dwelling shortfall in housing delivery within the first 5 years of the plan. This is surely a completely unwanted outcome given the failure of planning for housing in St Albans over the last 30 years or more.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

We would therefore conclude that the Plan is not *effective* as it relies on a strategy that is inadequate over the plan period. Allocating additional broad locations and small to medium sites that are deliverable before year 6 in the plan period would increase the number of homes being delivered early in the plan and help to ensure a consistent five years supply from the point of adoption.

Phase one (Part A) of Land at Windridge Farm can be delivered early in the plan period and provide circa 450 homes, 180 of which could be affordable. It's location means that it could form a new well integrated urban boundary to St Albans with significant landscaping improvements and the creation of community spaces and new woodland. The scheme would be delivered consistently and help to achieve other policy objectives within the plan.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We object to this current iteration of the Local Plan, and we believe it is wholly inadequate. Given the lack of strategic planning in the wider region, this plan is not sufficiently ambitious, and falls a long way short of addressing the severe shortage of market or affordable housing within the District.

We challenge the way in which the Council has move forward the local plan and tried to rush it to examination, as well as challenging the site selection process and the spatial strategy which we feel is inadequate.

It is our view that the draft St Albans Local Plan in its current form is unsound and it should therefore not continue to Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**194 - Stonebond Properties Ltd (Gustard Wood)**

Submission Number: 194 Submission Date: 07/11/24 16:05

Respondent: Company/Organisation: Bidwells Name: Mr Mark Harris

On Behalf Of Company/Organisation: Stonebond Properties Ltd (Gustard Wood) Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Stonebond welcome recognition at paragraph 1.31 of the draft Local Plan that there is a clear need for more homes because of the national situation and that there is a need for more local people to live and work where they were brought up.

They also welcome recognition that there is a need to prioritise the redevelopment of brownfield land, whilst recognising that the scale of the housing crisis both locally and nationally requires the development of greenfield sites and the release of land for the Green Belt.

<u>The Housing Requirement</u>

The latest affordability ratio (Ratio of median house price to median gross annual workplace-based earnings) for St Albans (2023) sits at 17.61. This makes St Albans the fourth least affordable place to live in the country behind the London Boroughs of Kensington and Chelsea, Westminster and Richmond upon Thames. This highlights the drastic need to provide opportunities for new housing locally, particularly given the lack of any new planning policy for the District since 1994.

Policy SP1 (the Spatial Strategy for St Albans) sets out the Council will identify land to delivery at least 885 dwellings per annum in the period from October 2024 to March 2041 – a total of 14,603. As per paragraph 61 of the NPPF (December 2023), this figure should be informed by a local housing needs assessment, utilising the standard method, and provides an '*advisory starting point'* for establishing a housing requirement for the area.

Paragraph 61 goes on to state that there can be exceptional circumstances where an alternative approach could be utilised, which should take into account future demographic trends and market signals, with the Planning Practice Guidance (ID: 2a-010-20201216) going on to state that '*there will be circumstances where it is appropriate to consider whether actual housing need is higher than the standard method indicates'* and that *'an increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes'* (Reference ID: 2a-024-20190220).

These matters are addressed in an updated Housing Needs Assessment (NHA) that covers St Albans and the other South West Hertfordshire Local Authorities. Whilst it is agreed that the economic drivers and infrastructure investment do not indicate a higher level of need, it is abundantly clear that there is a significant affordability issue in St Albans and that the level of affordable housing need (802 dwellings per year) justifies an increase in the overall housing figure to enable a greater proportion of this affordable need to be met.

This point is analysed in the HNA (from paragraph 7.120) without giving a clear answer. Whilst it is explained that there is a complicated relationship with the existing population and that the 802 home figure does not relate solely to new homes, by simply looking at the affordability ratio for the area, it can be concluded that there is a significant affordability issue that justifies an increase in the housing requirement to help deliver a greater proportion of the affordable housing need of the area. Stonebond cannot see where any consideration has been given to this point by SADC.

In addition to this point, the NPPF sets out that the test of soundness on consistency with national policy requires plans to '*enable the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant'.*

The Written Ministerial Statement of Angela Rayner on 30th July 2024 is therefore a statement of national policy and it needs to be considered if the draft Local Plan is consistent with it.

Although the transitional arrangements are clear that a local plan can be examined in accordance with the NPPF (December 2023) provided it is submitted prior to the publication of the revised NPPF, this does not takeaway from the fact that the Written Ministerial Statement makes it clear that there is a direction of travel in terms of the increased level of housebuilding that is expected nationally, the robustness of the current standard method and the approach to Green Belt release (which is covered in separate representation on other parts of the draft Local Plan).

Stonebond do not believe that SADC have given due regard to the intent of the changes set out in the Written Ministerial Statement and therefore the draft Local Plan fails the test of Soundness on consistency with national policy.

This position can only be remedied by undertaking a review of the draft Local Plan and ensuring updates are provided which seek to maximise housing delivery in line with the intention of national policy, which will clearly require areas such as St Albans to increase the level of homes they plan for. This could be achieved by allocating suitable sites such as The Slype, Gustard Wood which have been unjustifiably removed from the Local Plan.

<u>The Settlement Hierarchy</u>

At Regulation 18 stage, Stonebond made representations that Gustard Wood was rightly identified as a tier 6 settlement. Although the village itself has a limited range of services and facilities, it's functional relationship with the higher order settlements mean it is a sustainable location for growth. The settlement has access to public transport as well as a range of active travel connections which make it a suitable location for some residential development.

Stonebond note that Blackmore End, which is effectively the northern half of the settlement in North Hertfordshire, is inset into the Green Belt, unlike Gustard Wood. This position appears to be inconsistent across the two authorities and indicates that the approach taken by SADC is potentially overly cautious in terms of the assessment of washed over settlements and the conclusion that it is necessary to keep them permanently open.

The fact that North Hertfordshire have inset Blackmore End reinforces the limited contribution the built-up area makes to the purposes of the Green Belt and reinforces the Stonebond's position that sites in the area could be suitable to help meet the development pressures of the area.

although Stonebond understand why Gustard Wood is identified as a Teir 6 Settlement due to the level of access to services and facilities, the fact that Blackmore End in North Hertfordshire to the north is insert from the Green Belt highlights the inconsistency in the approach to taken between the authorities in considering the need for built up areas to be washed over by the Green Belt.

At the moment, all Teir 6 Settlements are washed over by the Green Belt, which effectively implies a link between openness and the sustainability of settlements, which is the other main consideration in the settlement hierarchy. This is not always the case. Stonebond suggest that if openness is to be a consideration in the settlement hierarchy, there should be a consistent approach to the matter across the boundaries with neighbouring authorities. If this were to be the case, it is suggested that the settlement hierarchy would need to be adjusted to ensure that Gustard Wood is referred to as a settlement inset from the Green Belt, consistent with the approach to the neighbouring authority.

This may require further adjustment of the overall settlement hierarchy and how the settlements are organised into the tiers but is necessary to ensure an effective and coherent strategy across the area.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Increase the housing requirement to take account of the clear need to uplift the housing figure to respond to local affordability issues and the direction of travel set out in the Written Ministerial Statement of 3oth July,

Update the Settlement Hierarchy to be consistent with the approach of North Hertfordshire which insets Blackmore End (adjoined to Gustard Wood) into the Green Belt.

Re-consider the Settlement Hierarchy in the contest of the unjustified link between openess and and sustainability.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To discuss concerns regarding the approach of the Council in setting the housing requirement.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

Stonebond welcome recognition at paragraph 1.31 of the draft Local Plan that there is a clear need for more homes because of the national situation and that there is a need for more local people to live and work where they were brought up.

They also welcome recognition that there is a need to prioritise the redevelopment of brownfield land, whilst recognising that the scale of the housing crisis both locally and nationally requires the development of greenfield sites and the release of land for the Green Belt.

<u>The Housing Requirement</u>

The latest affordability ratio (Ratio of median house price to median gross annual workplace-based earnings) for St Albans (2023) sits at 17.61. This makes St Albans the fourth least affordable place to live in the country behind the London Boroughs of Kensington and Chelsea, Westminster and Richmond upon Thames. This highlights the drastic need to provide opportunities for new housing locally, particularly given the lack of any new planning policy for the District since 1994.

Policy SP1 (the Spatial Strategy for St Albans) sets out that the Council will identify land to deliver at least 885 dwellings per annum in the period from October 2024 to March 2041 – a total of 14,603. As per paragraph 61 of the NPPF (December 2023), this figure should be informed by a local housing needs assessment, utilising the standard method, and provides an 'advisory starting point' for establishing a housing requirement for the area.

Paragraph 61 goes on to state that there can be exceptional circumstances where an alternative approach could be utilised, which should take into account future demographic trends and market signals, with the Planning Practice Guidance (ID: 2a-010-20201216) going on to state that '*there will be circumstances where it is appropriate to consider whether actual housing need is higher than the standard method indicates'* and that *'an increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes'* (Reference ID: 2a-024-20190220).

These matters are addressed in an updated Housing Needs Assessment (NHA) that covers St Albans and the other South West Hertfordshire Local Authorities. Whilst it is agreed that the economic drivers and infrastructure investment do not indicate a higher level of need, it is abundantly clear that there is a significant affordability issue in St Albans and that the level of affordable housing need (802 dwellings per year) justifies an increase in the overall housing figure to enable a greater proportion of this affordable need to be met.

This point is analysed in the HNA (from paragraph 7.120) without giving a clear answer. Whilst it is explained that there is a complicated relationship with the existing population and that the 802 home figure does not relate solely to new homes, by simply looking at the affordability ratio for the area, it can be concluded that there is a significant affordability issue that justifies an increase in the housing requirement to help deliver a greater proportion of the affordable housing need of the area. Stonebond cannot see where any consideration has been given to this point by SADC.

In addition to this point, Stonebond would also note that there does not appear to give any consideration to the unmet needs from other areas, which should be subject to discussion under the Duty to Co-operate. This includes likely unmet need from Hertsmere and Three Rivers, with both Authorities most recent consultations suggesting an under allocation of land to meet minimum needs, as well as from London, where housing requirements have consistently been undershot. Whilst the Duty to Cooperate is a legal issue for more general discussion, the implications for the housing requirement need to be noted.

Finally, the NPPF sets out that the test of soundness on consistency with national policy required plans to '*enable the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant'.*

The Written Ministerial Statement of Angela Rayner on 30th July 2024 is therefore a statement of national policy and it needs to be considered if the draft Local Plan is consistent with it.

Although the transitional arrangements are clear that a local plan can be examined in accordance with the NPPF (December 2023) provided it is submitted prior to the publication of the revised NPPF, this does not takeaway from the fact that the Written Ministerial Statement makes it clear that there is a direction of travel in terms of the increased level of housebuilding that is expected nationally, the robustness of the current standard method and the approach to Green Belt release (which is covered in separate representation on other parts of the draft Local Plan).

Stonebond do not believe that SADC have given due regard to the intent of the changes set out in the Written Ministerial Statement and therefore the draft Local Plan fails the test of Soundness on consistency with national policy.

This position can only be remedied by undertaking a review of the draft Local Plan and ensuring updates are provided which seek to maximise housing delivery in line with the intention of national policy, which will clearly require areas such as St Albans to increase the level of homes they plan

for. This could be achieved by allocating sites such as Stonebond's site at Notcutts Garden Centre which could make a positive contribution to the supply of housing land in the early years of the new Local Plan.

The Settlement Hierarchy

At Regulation 18 stage, Stonebond made representations that Smallford should be a higher order settlement in the Settlement Hierarchy. This point does not appear to have been addressed in the draft Local Plan, with the Settlement still classified as a tier 6 Green Belt Village.

To reiterate the points made at Regulation 18 stage, Stonebond do not think this is an accurate reflection of the status of the site, with the Settlement Hierarchy Paper failing to consider:

- All local facilities, such as the convenience store at the petrol station, or the employment opportunities offered by the garden centre.
- The accessibility of the location and proximity of the Settlement to St Albans and Hatfield.
- The fundamental change that will take place in the area as a result of the proposed Glinwell development.

Stonebond consider that Smallford should be classified as a Teir 5, medium sized Village given that it has a good range of key services, has good public transport connections and has a clear functional relationship with St Albans. Indeed, there is an argument that the changes proposed in the Local Plan, specifically the allocation of land at Glinwell to the southwest, will effectively make Smallford a part of St Albans itself. This is demonstrated by the fact that Smallford adjoins St Albans on the polices map.

This distinction is important as it has knock on impacts on the way that the suitability of sites for Green Belt release (covered in later representations) has been considered by SADC. The failure to accurately recognise the sustainability of Smallford means that clear opportunities to allocate sustainable sites for development has been missed, such as Stonebond's site at Notcutts Garden Centre. .

On this basis, Stonebond do not believe that the draft Local Plan is justified, with a review of the Settlement Hierarchy and subsequent update to other evidence base papers, including the Green Belt Assessment, necessary to ensure soundness.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Review the housing requirement to ensure that it addressees the acute affordability issue in St Albans which will not be addressed by the current strategy, as well as picking up unmet needs from other areas, which has not been properly considered.

Review the housing requirement to reflect the need to give consideration to the direction of travel for national policy set out in the Written Ministerial Statement of July 2024.

Review the Settlement Hierarchy Assessment to accurately reflect the sustainability of Smallford.

Reclassify Smallford as a Tier 5 settlement, reflective of it's relative sustainability, or make it part of St Albans given the impact of the proposed allocations in the Local Plan and their removakl of any sepetaion between the settlement boundaries.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To discuss matters around the methodology for categorising sites within the settlement hierarchy.

**Settlement hierarchy and approach to green belt release (Policy SP1)**

2.15 We do not consider that the spatial strategy and the approach to the distribution of development is

supported by up an up to date evidence base. The reason for this is two-fold, firstly that St Alban District Council's (SADC) approach to Green Belt, which has been informed by the Green Belt Assessment[1] prepared by Arup, has not been positively prepared and the methodology is brought into question.

2.16 Without undertaking a detailed review of all Green Belt sites at a more local level, it is not effective in

informing the Local Plan with correct number of suitable sites for development across the Borough. This, in the context that the majority of the Borough is Green Belt (81%).

2.17 Given that there is a limited supply of readily developable brownfield sites in the Borough, we recognise

that this provides a significant constraint on the delivery of housing, as demonstrated by the proposed housing numbers. There is no doubt that the housing targets cannot be accommodated solely on brownfield land within the borough and, as such, there is a demonstrable need for Green Belt release to facilitate sustainable development, which will contribute to meeting the established housing need in the Borough.

2.18 Table 1.3 of the DRLP defines a settlement hierarchy based on 7 tiers with Tier 1, being Cities and large

towns and Tier 7 being Hamlets, with the respective classification of various settlements within the borough predicated on their population size, accessibility to services and connectivity in the form of public transportation. Colney Heath which lies approximately 6 miles from St Albans town centre is classified as Tier 6 – Green Belt Village which is classified as a settlement 'washed over by the green belt' with functional connection to settlements in the higher tiers, services and reasonable levels of accessibility to modes of public transportation. We would query the categorisation of Colney Heath as a Tier 6 settlement given that some of the settlements included in Tier 5 namely Bricket Wood (4.1k population), How Wood (3.5k population), Park Street (6.7k population) and Chiswell Green (2.8k population), are not materially larger than Colney Heath by demographic base as evidenced by census data. Notably the Colney Heath parish has a population of net.6.3k[2], of which anecdotal evidence places the population of the Colney Heath settlement, inclusive of the arm off Roestock Lane at approximately 2-3k[3]. This differs from the census record, which appears to be an error based on the fact that this omits the northern arm of the settlement[4].

2.19 The population of the Colney Heath settlement is not materially different to the settlement at Chiswell Green and others. Notably, the settlement has a similar level of accessibility to a range of services, employment opportunities, medical facilities and public transportation as these other sites. Given the scale of the settlement and the wider parish it is considered that further consideration should be paid to the need to plan for incremental growth across the plan period.

2.20 The census data for the Colney Heath Parish had reported a 9% growth (2001-2011)(net +513

dwellings) and further 5% growth within the period from 2011-2021 (net. +311 dwellings). If similar trends are forecast into the future it is apparent that requirement for growth within the parish will far exceed housing delivery of 95 dwellings within Colney Heath over the next 17 years which equates to 5 dpa, all of which will be delivered within the first 5 years of the plan period. It is assumed that these are being delivered from the Bullens Green lane development, if this is the case the projections on delivery timescales do not align with progression on site. If it is not reliant on the aforementioned, it is unclear how, if any of these dwellings will be delivered. More importantly,

the plan trajectory in the sustainability appraisal (2023) makes no provision for delivery of housing within the latter period period. Application of a no-growth approach for the period from 2032 to 2041 will result in the strangulation of the settlement in the long term, which will have knock on impacts for the vitality and viability of the wider settlement.

2.21 The Green Belt Review updated report prepared by Arup (June 2023) has informed the draft site

allocations which necessitate release of green belt land and consequential compensation.

2.22 As set out in NPPF Paragraph 140, *"Once established, Green belt boundaries should only be altered*

*where exceptional circumstances are fully evidenced and justified, through the preparation or updating of plans".*

2.23 The Methodology and Assessment to the Green Belt Review (Arup), states that "*it is anticipated that*

*weakly performing Local Areas and Local Area for potential sub-division will be considered further by St Albans District Council in terms of whether there are 'exceptional circumstances' for such amendments to the Green Belt."*

2.24 Whilst the Draft Local Plan has acknowledged that the housing need cannot be satisfied solely from

brownfield development and greenbelt release as outlined in our Reg.18 representations and reiterated in these representations we would question the validity of the approach which has been implemented by St Albans District Council and Arup in the failure to undertake granular level analysis of the green belt parcels as part of the Stage II review.

2.25 The Green Belt parcels within Arup's Green Belt Assessment were so large and included varied

characteristics within, that it was not possible for potential sites to be fully examined (for example the Land to the North of Roestock Lane) comprises 5 ha of greenfield land within a parcel which covers 419 ha (Parcel 34).

2.26 Further, the Stage II assessment fails to pay meaningful consideration to Parcel 34 which is identified

as only satisfying two of the core principles for green belt land namely, contribution towards safeguarding the countryside and maintenance of the existing settlement pattern, with the remaining criteria adjudged to be at partial or limited contribution.

- Figure 7.1 – Contribution towards checking urban sprawl – Limited or no contribution
- Figure 7.2 – Contribution towards preventing merging – partial contribution
- Figure 7.3 – Contribution towards safeguarding the countryside – significant contribution
- Figure 7.5 – Contribution towards preserving setting – partial contribution
- Figure 7.7 – Contribution towards maintaining the settlement pattern – significant contribution

2.27 The 2013 Stage 1 review identifies that the whilst the parcel is predominantly open character the

north and eastern portion of Sub parcel GB34 is characterised by built form in villages to the north and east of the parcel, around Colney Heath, Bullens Green and Roestock Lane. The Stage 1 review is flawed in that it does not adequately undertake a macro level analysis of Parcel GB34. This has resulted in inaccurate conclusions where the specifics of individual land parcels have been overlooked; we would anticipate that SADC would be able to demonstrate Exceptional Circumstances on a number of additional sites had the methodology in the initial Green Belt

Assessment allowed it, given that the character of Parcel GB34 and its function in preserving the openness of the green belt varies significantly across this parcel. This approach is therefore **not justified.**

2.28 The Stage II review prepared by ARUP (June 2023) classifies Colney Heath as a settlement which

is considered to contribute moderately to the 'open character of the green belt' and in light of this contribution should be retained as a washed over green belt site. The green belt review fails to take into consideration the committed development for land at Bullens Green Lane for delivery of net. 100 residential dwellings. It is understood that following the grant of reserved matters approval, construction is commencing on the delivery of the site. The green belt assessment should be updated to reflect the infill to the settlement as a result of the delivery of the Bullens Green Lane development.

2.29 The green belt review makes no consideration to the prospect of growth occurring within the

settlement, in the form of additional housing to meet local need to foster the long term sustainability of the village. This approach results in the prohibition of housing development in any form in this location and will detrimentally impact on the vitality and viability of the settlement. This approach is not appropriate and should be reconsidered, as we consider Bellway's site could deliver housing in a sustainable manner without having a detrimental impact on the Green Belt purposes. We would query the validity of the green belt assessment as the development on Bullens Green Lane links two of the key parcels on site, has altered the character of these parcels and the assessment should be reviewed on this basis. As outlined within the Reg.18 representations, progression of the Local Plan without a finer analysis of the parcels is innapropriate

2.30 It is notable that the Uttlesford Local Plan advocated a similar approach to release of green belt sites

with a focus on a smaller number of larger strategic sites and garden city style extensions with a limited buffer in the form of small and medium sized green belt sites. In January 2020, the Inspector wrote to Uttlesford District Council outlining that they deemed the SLP to be unsound on a number of grounds, not limited to but including a failure to allocate a sufficient supply of deliverable green belt sites to meet the future housing needs of smaller settlements across the plan period:

*However, the scale of the need for housing for the next plan period is currently unknown and uncertain. We are concerned that the Council's chosen strategy would mean that other sites in the district would not be developed or permitted for a significant period of time in the future. This would be likely to* ***adversely affect the vitality and viability of services in 7 existing towns and villages and result in a lack of housing choice in the market****. It would also be* ***difficult to accommodate changes in demand for certain types of development/services required over the very long period being committed to within the current strategy*** (Para 31, Letter from Inspector Elaine Worthington to Uttlesford District Council, **Appendix 3**)

2.31 Application of a similar approach for the washed over villages within the green belt would adversely

impact on the vitality and viability of the smaller settlements in the borough. This approach is therefore **not justified.**

2.32 SADC recognise the housing need in the Borough and therefore it is important that more housing

sites should be included in the Plan, rather than just the bare minimum, to provide greater flexibility in terms of delivery. Without this, it will **not be effective**, and the objectives of Policy SP1 and SP3 cannot be delivered in full.

2.33 Table 3.2 of the Reg 19 Draft Local Plan identifies that 9,750 residential units are planned to be

delivered on sites which are currently in the Green Belt, with delivery across 12 broad locations which have been demarcated for strategic level development in excess of 1000 units and large sites (100249 units) and medium / small sites (5-99 units). The housing trajectory over relies on the delivery of the Hemel Hempstead Garden Extension and the Broad Location sites to meet the housing need across the plan period, with this equating to 78% of deliverable sites on green belt land and 58% of the overall housing need across the plan period. We would query whether the figures reflected in the Local Plan spatial strategy area and draft allocations are accurate as the housing trajectory is currently based on the delivery of net 4077 dwellings from the broad locations. It is noted that release of these strategic green belt sites necessitates delivery of appropriate green belt compensation in the form of wildlife reserves and nature conservation areas. The requirement to deliver appropriate compensation and deliver a masterplan led approach to delivery of these strategic sites will inevitably result in delays to the housing trajectory, which are not mitigated for through allocation of a greater proportion of green belt sites.

2.34 It is requested that further consideration is paid to the release of land at Roundhouse Farm, to the

north of Roestock Lane as a site allocation within the draft Local Plan as a site which could be brought online early in the plan period to provide resilience to the housing targets and trajectory set forth in the draft Local Plan. As outlined on the illustrative masterplan included in **Appendix 2** delivery of this site would have a minimal effect on the openness of the site beyond reducing the overall harm.

2.35 This section of GB Parcel 34 makes a very limited contribution to the purposes of including land in

the Green Belt in paragraph 134 of the Framework. It is essentially “captured” land that was included within the Green Belt along with large swathes of Hertfordshire at the time the boundaries were first defined, with little, if any, consideration given to the actual contribution it makes to the Green Belt purposes.

2.36 This specific site is situated within Colney Heath. Colney Heath itself is bordered very closely to the

east by the A1(M). There is a virtually nil likelihood any coalescence with any settlement beyond the A1(M), nor any capacity for Colney Heath itself to ‘sprawl’ out in this direction and thereby contribute poorly to GB purposes.

2.37 This particularly so given that in between the A1(M) to the east and the site, as well as to the south of the site, there is very dense woodland which inherently limits the visual openness of views outward - even if we were to ignore the A1(M) further beyond.

2.38 As detailed in preceding sections, the site is perfectly bordered to the south, east, west and 50% of

the north edge by existing residential development, formalised open space and other built development including two former pubs, a scrap yard, a hairdressers, an ex-coffee shop/ now bathroom shop, a former timber yard, a second hand car dealership and is wrapped by roads on three sides’. In essence, development of this tract of land forms a very logical and assuredly reasonable expansion of Colney Heath which has experienced virtually non-existent levels of growth in recent decades.

2.39 It is a settlement that within the draft Local Plan will be left to stagnate as the failure to plan in a

proactive manner to facilitate the longevity of the settlement will exacerbate the housing affordability crisis and could result in key workers moving away from the settlement to find housing. As aforementioned, it is captured land that has inhibited natural growth of the surrounding rural settlement. Few sites within the Green Belt bordering Green Belt settlements can claim to be readily integrated within said rural settlements that invariably define them.

2.40 The Site is enclosed by settlement on three and a half sides and development of it would therefore

effectively be 'infill' development. Development would be well contained by the landscape and there would be no harm to any qualities which contribute to the distinct identity of Colney Heath. Development of the Site could be accommodated without giving rise to a perception of excessive encroachment into the wider countryside.

2.41 The Proposed Development would provide a new settlement edge which would be complementary

to the existing situation and defensible in landscape terms, separating the Site from the wider countryside, arguably securing it from further encroachment in the future. In the determination of application LPA ref. 2022/2736 for redevelopment of land at Roestock Lane the landscape officers comments dated 10th August 2023 indicated that the landscape officer was content with the landscaping and visual mitigation strategy for the proposed development, subject to final details at reserved matters stage:

*"In conclusion the Parameter Plans now work harder to protect the important existing site features and their buffer zones, and deliver the mitigation assumed in the LVIA. There are still some outstanding concerns with regards to open space provision and landscaping throughout the development parcels however suggest this can be addressed at the next stage".*

2.42 The new permanent, defensible boundary would be defined by a physical feature – a reinstated field

boundary marked by a native hedgerow – which would be readily recognisable and permanent, as required in paragraph 143 of the NPPF, and would provide a clear distinction between 'town' and 'country'.

2.43 In terms of the effects of development on the Green Belt Purposes, the Site is located on the edge of a settlement, which wraps around the Site on three and a half sides. Development of the Site would not therefore result in unrestricted sprawl. The settlement boundary would not be extended beyond the existing boundary and, as a relatively enclosed parcel of land, development would not significantly encroach on the wider countryside and delivery of the proposed scheme would not affect the setting of any historic towns.

2.44 The Site is considered to currently make a weak contribution to Green Belt purposes and

development of it should not weaken the integrity of adjacent Green Belt land and the contribution of the neighbouring land would not be weakened were the Site to be developed.

2.45 Development would affect the openness of the Site but not of the wider Green Belt. The Site is

contiguous with the settlement boundary and development of it would not have an impact on openness or a significant increase in urbanising influences and would not diminish the extent to which the adjacent Green Belt would be considered countryside

2.46 Visual openness is relevant to a consideration of openness. The visibility of the proposed scheme

has been assessed in a Landscape and Visual Impact Appraisal (LVIA) prepared by Liz Bryant supporting the submitted Outline application (**Appendix 4**) which concludes that from the wider area there would be limited to no visual effects resulting from development of the Site. Where there would be views of built form, it would be experienced within the context of the existing settlement. It is considered that the Site currently makes a weak contribution to Green Belt purposes as defined in the NPPF. It is concluded that development of the Site could be compatible in terms of design, form, scale and appearance with the character of the surrounding area and would not result in unacceptable harm to the contribution made by the wider Green Belt to Green Belt purposes. In the determination of the current application LPA ref. 2022/2736 it had been noted that the visual impacts generated from the release of the site to the wider impact would be very limited and the mitigation delivered in the form of the landscaped buffer to the northern boundary of the site should be sufficient to address concerns on the visual impact of the proposed development. The landscape officers comments dated 10th August 2023 indicated that the landscape officer was content with the landscaping and visual mitigation strategy for the proposed development

2.47 As noted in the sustainability appraisal dated September 2024, the application for land to the north

of Roestock Lane is currently live and being determined by officers at SADC. In October 2024 and following engagement with officers additional information had been presented to officers which responds to the comments that had been received from HCC querying the sustainability credentials of the proposed scheme. A copy of the updated highways response has been appended to these representations **(Appendix 5)** and are summarised below for completeness.

2.48 The highways technical response prepared by Ardent demonstrates that the site is accessible to a

range of educational facilities, medical facilities and local amenities servicing occupants of the development.

2.49 The proposed site is within 2km (25min) walking distance of the recently completed Highview Rise shopping precinct where residents will have access to a new doctors surgery, a NHS dentist and a pharmacy, all accessible via good quality pedestrian routes. Additionally, as part of the review of the scheme the applicant has consulted the Integrated Care Board. At a meeting on the 17th July 2024, it had been confirmed verbally that the healthcare network in the surrounding area had capacity to accommodate the delivery of 155 residential dwellings on this site.

2.50 Whilst it has been demonstrated through the new evidence contained within the transport note

**(Appendix 5**) that the site is within walking distance of medical facilities an audit has been undertaken of the accessibility of the site to other medical facilities via public transport, including those accessible via the 305 route. As evidenced in Section 3, the 305 bus route provides access to 9 no. GP surgeries (including both those in and out of catchment currently accepting new patients as per NHS website info), 6 x Dentists (currently accepting new patients in this catchment as per NHS website info) & St Albans City Hospital making the route a suitable option providing direct access to a range of medical facilities. Our site lies within walking distance of bus stops on Roe Hyde Way (routes 602,614,644 and 653), or via cycle to the Forum at Hertfordshire University where service (635, 341, 641, 610/12 & X10) routes which provide access to a range of medical facilities. In totality, the evidence set forth within Section 3 demonstrates that the site is accessible via walking, or a combination of walking, cycling and public transport to 14 x GP facilities, 8 x dentist and 5 x hospitals in the local area. The evidence set forth within this updated technical note demonstrates that the site has suitable accessibility to a range of medical facilities with capacity to accommodate occupants of the development.

2.51 A concern which had been raised in the determination of the application was the accessibility of the

site to primary and secondary schools in the locality. Evidence has been provided of a new audited route providing access to the Samuel Ryder Academy that is segregated from public highway once it passes Colney Heath Lane. Whilst we consider that this route is serviceable to meet the cycling needs from the development consideration has also been paid to alternatives. An alternative route which utilises Nightingale Lane that has been audited by Ardent could be viable for cyclists during the majority of the year. HCC have been 'advised' that Samuel Ryder Academy is currently the allocated school for the site's catchment area and so this Technical Note provides further details on safe and suitable cycling routes to this school in particular.

2.52 The Academy have also expressed support for the proposals and potential future improvements to

the cycling route to the school, as evidenced in their recent representations on the planning application. In addition, it is important to note that this allocation is not set in perpetuity and other schools are likely to come forward in the future as the allocated Secondary School for the site's catchment. Therefore, in this Technical Note we have evidenced that 11 (eleven) Secondary schools from the site are within the 8km Cycle Isochrone, including same sex schools (Loretto College, Verulam School, St Albans Girls School) and Faith schools (Nicholas Breakspear School) offering a number of alternative options for future residents.. The evidence set forth within this technical response demonstrates that the site has accessibility via active travel and public transport modes to 12no. secondary schools, 2 no. higher education facilities and 1 no. University. It is considered that the site has a good level of connectivity to education facilities to facilitate delivery of the site, offering a genuine choice of sustainable travel options.

2.53 Additionally, officers at HCC had queried the suitability of the walking routes to local amenities and therefore, Ardent have previously undertaken an audit of the key pedestrian routes in the immediate vicinity of the site in Colney Heath itself, as provided in earlier submissions.

2.54 In the previous versions of the report we had provided evidence that it was possible to walk to a

Convenience Store/Post Office, local takeaway, Hair Salon, Coffee Shop) Public House, Car Sales, Village Hall, Colney Heath School and Nursery, Colney Heath Football Club & 305 Bus Stops. All which had been accepted by previous Inspectors as sufficient. In the determination of the cojoined appeals for Chiswell Green Lane the Inspectorate and the Secretary of State had been minded to consider that walking distances of 800m to amenities is not an absolute and walking distances of up to 2km to amenities represent a 'realistic option' in place of car based journeys, for locations outside of London.

2.55 Taking the advice within Manual for Streets and the principles established under the Chiswell Green

Lane appeal decision, we have identified that the recently completed Highview Rise Shopping Precinct lies within an acceptable walking distance from the site (this is new evidence not previously submitted to HCC). Within a 2km walking distance it is possible to access the following amenities:

- New Doctor Surgery
- New NHS Dentist
- Pharmacy
- 2nd Post Office
- Barbers
- Launderette
- 10 x retail shops including a Tesco Express, hardware store, takeaway/restaurants.
- Community facilities including a Public House and the Jim Macdonald Community Centre

2.56 The range of amenities accessible from the site and within the walking distances prescribed under

the Manual for Streets and cited in the Chiswell Green Lane appeal decision are far superior to those accessible in the aforementioned scheme. Details of the walking route to these amenities have been included in the appendices of this report. We trust that the information provided demonstrates that the site has suitable access via pedestrian route to a range of amenities necessary to service the development and is acceptable in planning terms.

2.57 With regard to wider sustainability we provide additional information that demonstrates that the

development site has accessibility to a range of active travel and public transport modes of travel including but not limited to the 305 route. It has been demonstrated in the additional response that there is access to a further 10 bus routes providing Transport options for employment, leisure, education & retail to (but not exclusively) St Albans, Radlett, Bushey, Watford, Barnet, Hatfield, Welwyn Garden City & Edgware. Hitchin, Watford, Stevenage, Hatfield, Ware, Hareford, Luton (inc. Luton Airport), Cockfosters & Potters Bar. Due to the site's location in close proximity to The University of Hertfordshire, which facilitates journeys for 32,000 students and over 3,000 employees daily the proposed development site arguably has access to the largest concentration of Public Bus Transportation in the district offering routes to an array of destinations.

2.58 It is considered that the site has a suitable level of access to a range of amenities and services via active travel and public transportation modes of travel. In the determination of the scheme for land at Tollgate Road HCC had been minded to attribute weight to a financial contribution for the enhancement of the 305 Bus service for a period of 3 years.

2.59 Bellway and EDIT Land are open to negotiate with HCC on mirroring the S106 commitment agreed

in the Tollgate Rd application to increase the frequency of the 305 Bus Service for a period of 3 years. This TTN provides evidence that the 305 Bus Route is a highly sustainable route providing access to many of the key local facilities that local residents may need to reach, offering a genuine alternative to the private car for many of these destinations.

2.60 The commitment to increase the frequency of this route will not only benefit the Colney Heath

residents but all persons along the route making the option of Public Transport a more reliable, accessible and attractive option. As with the SoS stance on the Chiswell Green Appeal the improved bus service potentially sets a precedent to be considered as a positive weight in the decision making.

2.61 It is also important to reiterate, that as has been evidenced it is possible to access 4 (four) train

stations from the site which is highly unique. The stations provide access to three separate train lines providing transport routes to major employment area including London, Watford, Cambridge and other major destinations further afield. In Section 5 of this report it is detailed how Welham Green is not, and will not be for future residents, the primary choice for commuters as overall journey times, along with more frequent and direct trains available at the Primary hub of Hatfield Station will provide a quicker overall journey time into London at only 45mins. This report provides evidence that the proposed site has access to a Public Bus Network of 11 (Eleven) bus routes as well as 4 (Four) Train Stations, 2 of which are considered primary transport hubs in St Albans City Thameslink and Hatfield Stations. This should be afforded significant weight in the deliberations on the sustainability of the development site and the potential for the inclusion of the site as an allocated site within the emerging Local Plan.

2.62 The Draft Local Plan fails to pay regard to recently consented schemes located within the 'Washed

over villages' such as the land at Bullens Green Lane and the contribution that delivery of these sites makes to the provision of housing to meet established local need to sustain and enhance the longevity of these settlements[5].

2.63 In summary, it is not considered that the Plan has been positively prepared, is not justified and it will

not be effective. The spatial strategy and the approach to the distribution of development (namely disregarded sustainable Green Belt sites) has not been justified. It is therefore concluded, by taking into account the St Albans District Council Green Belt Review that the Site's conflict with these purposes is limited and the site offers sustainable opportunities for development whilst maintaining a defined green belt boundary to the north of the site.

2.64 Bellway Homes Limited considers that strong exceptional circumstances exist to justify the release of Land at Roundhouse Farm, to the north of Roestock Lane. This is summarised as below:

- The heavily constrained nature of the Borough (SPA, SSSI and flooding);
- Housing need – need for open market housing and affordable housing to address significant historic shortfall in delivery which is cataclysmic;
- The unavailability of suitable brownfield sites and underutilised land within settlement boundaries (on the basis of SADC's own evidence), necessitating release
    - Moderate performing Green Belt when assessed in isolation, with limited contribution to the Green Belt when consider on the basis of the emerging proposals and controls by policy. The emerging proposals or the site have positive consequential effects on character and perceived openness;
    - Provision of employment benefits;
    - Opportunity for Sustainable Development well served by public transport;
    - Surrounded by development on 3 sides, site is in a truly sustainable location.

2.65 Other surrounding authorities which have recently been through new Development Plan documents

include Welwyn Hatfield BC. The key exceptional circumstances identified in the various Inspector's Reports can be summarised as:

- Inability for Unmet Need to be accommodated elsewhere in the Borough;
- Alternative Sites – Brownfield;
- Alternative Sites – Greenfield Non Green Belt;
- Overall Scale of Under-provision if only non-Green Belt Land utilised;
- Other Landscape Constraints e.g. AONB;
- Recent Under-delivery of Housing; Employment need.

2.66 Bellway Homes Limited assert that the spatial settlement hierarchy implemented by St Albans District

Council and Arup set forth in the Reg.18 draft local plan and its evidence base is fundamentally flawed and has been shown to be unsound in previous examination of a now withdrawn Local Plan in Uttlesford.

2.67 The Extant Local Plan dates back to 1994 and is the oldest Local Plan in the country. Through a

paralysis in leadership within St Albans the Council have failed to adopt a replacement Local Plan. When paragraph 33 of the NPPF states that Local Plans are meant to be reviewed every 5 Years, the St Albans Local Plan effectively expired 22 years ago. It is comprised of policies which have been un-reviewed since they were adopted in 1994.

2.68 As outlined in the evidence put forth in the Chiswell Green Appeal scheme there have been four

unsuccessful attempts taken by the St Albans District Council to replace the extant Local Plan. The most recent attempt had been found unlawful and withdrawn following the inspectors determination that the council had failed to adhere to the requirements for the 'duty to cooperate' and adequately plan for release of green belt land to contribute to achieving the boroughs housing need. The absence of a joined up strategic vision for the borough has contributed to the dire housing crisis present in the borough, a failure to deliver a robust spatial strategy will further exacerbate this problem.

The current version of the Local Plan is exhibiting the same key flaws that had rendered previous iterations unsound. The authority are still failing to plan in a pro-active manner and seek to promote delivery of necessary sites to meet their housing need. As outlined in the representations our client has reservations on the suitability of the current housing trajectory, which is based on the current standard methodology. It is considered that St Albans District Council should be making provision for delivery of a broader range of smaller and medium scale housing allocations to provide contingency and a delivery buffer to accommodate the requirements of the emergent NPPF and standard methodology.

2.69 It is requested that further consideration is paid to the need for incremental growth within the washed

over villages to enable long term sustainability of these communities. It is considered that the landholding which Bellway are promoting for the reasons set forth in this statement could make a tangible contribution to the delivery of new housing in this location to meet the evolving needs of the settlement, whilst appropriately mitigating its impact on the wider green belt.

**Grey Belt and the Revised NPPF**

2.70 The Draft NPPF makes reference to potential for sites within the green belt that provide limited

contribution to the core purposes of the green belt and are located in sustainable areas could be considered appropriate for release for housing, or other forms of development, as summarised below:

*"In addition to the above, housing, commercial and other development in the Green Belt should not be regarded as inappropriate where:*

1. *The development would utilise grey belt land in sustainable locations, the contributions set out in paragraph 155 below are provided, and the development would not fundamentally undermine the function of the Green Belt across the area of the plan as a whole; and*
2. *The local planning authority cannot demonstrate a five year supply of deliverable housing sites (with a buffer, if applicable, as set out in paragraph 76) or where the Housing Delivery Test indicates that the delivery of housing was below 75% of the housing requirement over the previous three years; or there is a demonstrable need for land to be released for development of local, regional or national importance.*
3. *Development is able to meet the planning policy requirements set out in paragraph 155" (Para 152 of the Draft NPPF July 2024)*

2.71 With regards to Part a) of Para 152, it has been evidenced through the material provided as part of

the representations and as part of the twin tracked application (LPA ref. 2022/2736) that development could constitute grey belt. The core justification on how this position has been arrived at are set out below:

**Assessment against the core purposes of the Green Belt**

2.72 The Planning Statement and Green Belt Statement included within the submission for (LPA ref.

2022/2736) includes an assessment of the proposed scheme against the core purposes of the Green Belt. The section below summarises the core

1. ***to check the unrestricted sprawl of large built-up areas;***
2. ***to prevent neighbouring towns merging into one another;***
3. ***to assist in safeguarding the countryside from encroachment;***

2.73 As outlined in the green belt statement and landscape and visual impact assessment prepared by

Liz Bryant, it can be demonstrated that the settlement of Colney Heath is locationally distinct from the wider agglomeration of St Albans and the neighbouring large settlements; and as such it has been demonstrated that the release of land at Roestock Lane will not impact purposes a), b) and c).

2.74 The release of land to the north of Roestock Lane will not result in the expansion of built form beyond
the confines of the wider settlement of Colney Heath. The site is enclosed on three and a half sides, with the landscape mitigation strategy in the form of delivery of new enhanced structural landscaping to the northern boundary, a new permanent edge to the settlement will be established which will prevent further expansion. It has been evidenced that officers at SADC are content that the structural mitigation strategy is sufficient to offset the impact of the development.

- ***) to preserve the setting and special character of historic towns; and***

1. ***to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.***

2.75 As outlined in the green belt statement and landscape and visual impact assessment prepared by

Liz Bryant, purposed d) and e) are not applicable to this site. Delivery of a residential scheme on this site will not impact these core purposes.

2.76 Development would affect the openness of the Site but not of the wider Green Belt. The Site is

contiguous with the settlement boundary and development of it would not have an impact on openness or a significant increase in urbanising influences and would not diminish the extent to which the adjacent Green Belt would be considered countryside

2.77 Visual openness is relevant to a consideration of openness. The visibility of the proposed scheme

has been assessed in a Landscape and Visual Impact Appraisal (LVIA) prepared by Liz Bryant supporting the submitted Outline application (**Appendix 4**) which concludes that from the wider area there would be limited to no visual effects resulting from development of the Site. Where there would be views of built form, it would be experienced within the context of the existing settlement. It is considered that the Site currently makes a weak contribution to Green Belt purposes as defined in the NPPF.

2.78 It is concluded that development of the Site could be compatible in terms of design, form, scale and

appearance with the character of the surrounding area and would not result in unacceptable harm to the contribution made by the wider Green Belt to Green Belt purposes. In the determination of the current application LPA ref. 2022/2736 it had been noted that the visual impacts generated from the release of the site to the wider impact would be very limited and the mitigation delivered

in the form of the landscaped buffer to the northern boundary of the site should be sufficient to address concerns on the visual impact of the proposed development. The landscape officers comments dated 10th August 2023 indicated that the landscape officer was content with the landscaping and visual mitigation strategy for the proposed development.

2.79 As outlined in Section 2.46 – 2.60 of this statement, it has been demonstrated that the site has good connectivity to a range of public transportation connections, medical facilities, education facilities and local amenities. It is considered that development in this location could represent a sustainable form of development.

2.80 In line with Para 152, of the Draft NPPF an assessment has been made against the current scheme

based on the provisions of Para 155, as outlined below:

155 *Where major development takes place on land which has been released from the Green Belt through plan preparation or review, or on sites in the Green Belt permitted through development management, the following contributions should be made:*

156 *In the case of schemes involving the provision of housing, at least 50% affordable housing [with an appropriate proportion being Social Rent], subject to viability;*

157. *Necessary improvements to local or national infrastructure; and*

158 *The provision of new, or improvements to existing, green spaces that are accessible to the public. Where residential development is involved, the objective should be for new residents to be able to access good quality green spaces within a short walk of their home, whether through onsite provision or through access to offsite spaces.*

2.81 With regards to **Part a)** of Para 155 of the revised NPPF, the submitted application LPA ref.

2022/2736 delivers 45% affordable housing and 5% custom build housing, which is well in excess of the requirements of the adopted development plan, and the affordable housing threshold set within the emergent Local Plan.

2.82 With regards to **Part b)** the scheme will deliver a significant package of financial and nonfinancial

contributions to SADC and HCC to facilitate enhancements to infrastructure in the locality to offset impacts generated from the development. The section below outlines the contributions which have been sought from the development, based on the requirements of SADC and HCC guidance and the relevant care and education boards:

- Medical facilities contribution: £200,600
- Ambulance contribution: £57,491
- Transport contribution: £1,058,000
- Leisure and cultural facilities contribution: £107,659
- Primary education contribution: £1,120,500
- Secondary education contribution: £1,216,633
- Childcare services contribution: £1,256
- Special education needs and disabilities contribution: £156,035
- Library service contribution: £31,280
- Youth service contribution: £32,529
- Waste service recycling centre contribution: £44,800
- Waste transfer contribution: £9,123

2.83 In addition to the contributions that had been requested from the development the applicant is liaising

with HCC Highways team on potential for enhancements to bus services in the locality as part of the mitigation strategy for the development.

2.84 Under Part c), the scheme will deliver new open space and child play space provision as part of the scheme servicing the requirements of end user of the development. The scheme will provide sufficient public open space servicing the end users of the development.

2.85 As outlined in the section above, it has been demonstrated that the proposed development would

satisfy the requirements of Para 152 and 155 and could constitute 'grey belt' as defined under the NPPF. It is requested that further consideration is paid to the release of land at Roundhouse Farm, to the north of Roestock Lane as a site allocation within the draft Local Plan for up to 155 dwellings.

**Approach to Standard Methodology in the Draft Local Plan**

2.86 The NPPF and its accompanying guidance make clear that the Standard Method, incorporating the

2014-based subnational household projections (SNHP), should be used to determine the minimum housing requirements for Local Plans, unless exceptional circumstances justify an alternative approach.

2.87 This is despite two sets of official projections (2016 and 2018-based having subsequently been

published and providing more up-to-date data. The explanation for this stance set out in the PPG confirms that the Standard Method is a policy-driven approach to calculating housing need:

"*The 2014-based household projections are used within the standard method to provide stability for planning authorities and communities, ensure that historic under-delivery and declining affordability are reflected, and to be consistent with the Government's objective of significantly boosting the supply of homes*."[6]

2.88 Given the comments at paragraph 3.12, we consider it important for the authority to understand the

background to the introduction of the Standard Method and, specifically, the requirement to utilise the 2014-based SNHP in calculating local housing need using it.

2.89 The introduction of the Standard Method for calculating local housing need through the NPPF 2018

– followed by clarification that alternatives should only be used in exceptional circumstances – marked a fundamental change in the calculation of housing need for the purposes of planning.

2.90 Prior to this, the NPPF 2012 had called for Local Planning Authorities to meet their objectively assessed housing need, but without expressly setting out how precisely how this should be calculated. The thrust of the NPPF 2012 and its accompanying guidance very about seeking to identify a demographically 'correct' housing need figure for Local Authorities, through Strategic Housing Market Assessments prepared in conjunction with their neighbours. The result was a lack of consistency as to how factors such as market signals should be accounted for and, particularly relevant in the case of authorities such as St Albans, how household projections had likely be suppressed due to historic under provision of housing.

2.91 Rather than directing Local Authorities to seek to identify a demographically 'correct' housing needs

figure, the NPPF 2018 and the introduction of the Standard Method represented a shift towards the calculation of local housing needs as a policy-driven response to the national housing crisis – a policy-driven response aimed at boosting housing land supply, and providing consistency and

certainty. Such an interpretation is evident through both current Planning Practice Guidance as well as the Government's response to consultation on the proposed methodology for calculating local housing need, as well as confirmed through S78 appeal decisions[7].

2.92 It is also relevant to consider the Government's approach vis-à-vis the release of the 2016-based

SNHP and the Standard Method. The 2016-based SNHP were released in September 2018, and applying these projections to the Standard Method would have resulted in a significant reduction to the overall numbers of new homes Local Authorities would be required to deliver (although for a minority of Local Authorities, applying the 2016-based SNHP to the Standard Method would have resulted in a higher calculation of local housing need). Use of these projections would evidently have been inconsistent with the Government's objective of delivering 300,000 additional homes per year by the mid-2020s.

2.93 In response to this, the Government published Technical Consultation on Updates to National

Planning Policy and Guidance in October 2018 ('the Technical Consultation Paper').

2.94 This confirmed that, in light of the updated SNHP, the Government had considered whether it needed

to revise its goal of the delivery of 300,000 homes per year, but that it concluded it did not. In determining to retain the aim of delivery of 300,000 additional homes per year, the Government noted:

- ONS' view that the lower projections did not mean fewer homes were needed;
- Household projections are constrained by housing supply;
- Historic under-delivery means there is a case for supporting delivery in excess of projections;
- Declining housing affordability, and a more response supply of homes through Local Planning Authorities will help address the effects of increasing demand;
- Population changes are only one aspect of determining housing demand. Factors such as rising incomes and changing social preferences are also relevant

2.95 The Technical Consultation Paper confirmed that the Government intended to specify that the 2014-

based SNHP should be used in the Standard Method, rather than the more up-to-date 2016-based projections; and that the 2016-based projections would not constitute exceptional circumstances justifying a departure from this approach.

2.96 There were significant concerns that the use of the period 2001 and 2011 by the 2016-based SNHP to determine headship rates was inherently problematic, as this period saw very low levels of housebuilding, and a dramatic worsening of affordability. This resulted in an increase in concealed families, and fewer young adults leaving their parents' home. The consequent concern with the 2016-based SNHP household formation rates used in the 2016-based SNHP was that they would have suppressed household formation rates, particularly within the 25-44 age cohort, resulting in the projections understating actual need.

2.97 Within this Technical Consultation Paper, the Government also noted that the change in the 2016-

based SNHP was driven by a combination of both lower household projections and changes in household formation rates, with the former responsible for the majority of the reduction. This is an important point – it is not *just* that the use of more up-to-date projections would be incompatible with Government housing objectives. It was also the case that whilst the projections were more up-to-date, this did not mean they would provide a more accurate basis for projecting actual housing need.

2.98 The 2018-based SNHP were published in 2020. If the Government had felt it appropriate it to do so,

it again had opportunity to do utilise more up-to-date projections. However, as with the 2016-based SNHP, there were concerns that the 2018-based SNHP underestimated household growth due to the same issues that affected the 2016-based SNHP.

2.99 Paragraph 3.12 of the Draft Local Plan implies the Council will seek to utilise more up-to-date

projections when these become available for plan-making. This would be wholly inappropriate as, for the reasons set out above, such projections will not necessarily a) present a more accurate picture of actual local housing need (as the 2016 and 2018-based SNHP did not); or b) align with the Government's policy objective to significantly boost housing land supply.

2.100 In respect of how suitable more up-to-date projections will be for use in planning to meet the District's housing needs, it is relevant to consider that the District has experienced a significant worsening of affordability in recent years, and a very poor housing delivery record. In such circumstances, it would be expected that updated projections would suggest a lower number of additional households, but as a result of household growth having been constrained by affordability issues and a lack of housing supply, rather than due to a lack of actual need.

2.101 Separately, it is also pertinent to note that the Standard Method incorporates a cap on the

assessment of housing need, set at 40% and "*applied to help ensure that the minimum local housing need figure calculated using the standard method is as deliverable as possible*[8]." i.e. the calculation of a local housing need of 885 dpa for the District is one which has been artificially constrained.

2.102 If one were to disregard the cap – removing this artificial constraint on the calculation of need – but otherwise apply the Standard Method, it would result in a local housing need – and a minimum housing requirement for which to plan – of 11,169dpa.

2.103 As such, if there were to be changes to the Standard Method, it cannot be assumed that this would result in a lower figure. Having regard to all of the above, it is considered that the implied criticisms of the use of the Standard Method – including its requirement to use the 2014-based SNHP – are misplaced.

2.104 On 30th July 2024, a letter from the Deputy Prime Minister, Rt Hon Angela Rayner MP, was addressed to all local authority leaders in England. The correspondence indicated that the government intends to reinstate the standard method for assessing housing needs and planning for residential developments, while reversing the broader modifications made to the National Planning Policy Framework (NPPF) in December 2023, which have been detrimental to housing supply.

2.105 The Labour Government has determined that merely reverting to the 2018 standard method is inadequate. Therefore, a new standard method is proposed to ensure a substantial and ambitious increase in housing delivery figures for most boroughs and district councils in England, including SADC. This initiative aims to comply with the housing targets established by the government and to enhance overall housing delivery efforts.

2.106 Draft Policies SP1 and SP3 refers to a local housing need of 885 dpa having been calculated using the current Standard Method, Under the new standard method, SADC housing figures have a substantially increased -1,544 dpa, which is a 74% increase compared with the figure – 885 dpa. The letter also stated that "*local authorities will be expected to make every effort to allocate land in line with their housing need as per the standard method*."

2.107 However, it is unclear how the Council has determined the housing requirement is the same as the local housing need– the PPG expressly confirms that the Standard Method does *not* identify a housing requirement figure, simply the *minimum* annual housing need[9].

2.108 Whilst the PPG gives examples of where it might be appropriate to go beyond the bare minimum in term of housing provision, it confirms that this list is not exhaustive.

2.109 There are a number of reasons why it is considered the new Local Plan should seek to deliver a greater number of new homes for the District than the absolute minimum.

2.110 Firstly, the PPG is clear that the reason for the imposition of a cap restricting the local housing need figure calculated using the Standard Method is to ensure that this figure is as deliverable as possible. Where the cap is engaged (as is the case in St Albans) it follows that, at the very least, the potential to deliver a greater number of new homes should be explored.

2.111 In the case of St Albans, it is considered particularly important to explore a greater number, given the degree to which the cap suppresses the calculation of need for the District. The difference between the capped and uncapped figures for the District is vast: 1,169 dpa is the calculation of need without the cap - 32% greater than the capped figure of 885 dpa. Over the plan period, the equates to a difference of 4,828 dwellings.

2.112 We note the South West Hertfordshire Local Housing Needs Assessment (2020) (LHNA) which has been undertaken on behalf of the Council and the other South West Hertfordshire authorities. This stated that "*there are some **severe** affordability issues in South West Hertfordshire"*(emphasis added) but concludes there is no requirement to uplift the figures calculated using the Standard Method to account for this is, as this is "*addressed through the standard methodology, specifically the 40% uplift*".

2.113 The Update South West Hertfordshire LHNA, published in March 2024, provided an up-to-date evidence base on overall housing needs in SW Hertfordshire. The analysis demonstrates that the sub-region has undergone sustained and consistent increases in house prices. Currently, these prices present significant barriers for local households attempting to enter the housing market. A decline in affordability, coupled with constrained housing supply, has contributed to a reduction in homeownership rates and a notable incidence of overcrowding in rental accommodations.

2.114 This is a somewhat problematic stance to carry forward into the new Local Plan, in our view.

2.115 As noted above, the 40% uplift represents the cap on the uplift to be applied to calculating the *minimum* housing requirement, and is only in place – as confirmed through the PPG – to maximise deliverability. The requirement to apply a 40% uplift through the Standard Method is reached when the affordability ratio[10] reaches 10.4. However, in the case of St Albans affordability is significantly worse. The latest affordability ratio is 18.44 – 77% greater than the number at which the Standard Method's cap is engaged. If the Local Plan is to help address the severe affordability issues in the District it is critical the strategy for growth explores providing more homes than the bare minimum, based on a housing figure which would apply if the affordability issues were significantly less severe than they are in the District.

2.116 In terms of arriving at a housing requirement, we consider there a number of other issues the new Local Plan needs to consider and should address.

2.117 Firstly, it is important to recognise that the District does not exist in a vacuum insofar as concerns housing provision, but is part of the wider South West Hertfordshire housing market area. In addition to St Albans, the identified housing market area includes the administrative areas of Dacorum, Hertsmere, Three Rivers and Watford. The average latest affordability ratio across the housing market area is 14.81 (an increase on the average of 13.9 identified by the LHNA, and used to inform its conclusions) , and ranges from 13.17 to 18.4. Severe affordability issues evidently exist across the whole of the housing market area.

2.118 At the same time, there is a consistent and significant shortfall in housing delivery across the housing market area in the SW Herts LHNA.. The latest (2022) Housing Delivery Test (HDT) measurements confirm that none of the authorities within the housing market area is meeting housing needs.

2.119 The 2021 HDT measurement (percentage of housing requirement met over the last three years) averages just 68% for the housing market area authorities. The 2022 HDT result with a slightly lower average with 64% of the SW Herts authorities It is a matter of fact that those local authorities are unable to deliver housing that meets the local housing needs, resulting in a persistent acute housing need and shortage of delivery across the whole of the housing market area. It is not the case that a shortfall in housing delivery within one part of the housing market area is being balanced by strong delivery within another part.

2.120 The housing shortage across the housing market area risks putting further pressure on St Albans, and potentially making it even harder for the District's communities to access the housing market. Beyond the immediate housing market area, the impact of London on St Albans cannot be overlooked.

2.121 The Greater London Authority (GLA) reports as of 1 September 2023[11] that for the period 2019 – 2023, only 60% of the total housing target for London Boroughs – a shortfall of over 80,000 homes over a four-year period. Furthermore, the London Plan 2021 acknowledges that its needs will not be met:

*"The [London] Plan does not meet all of London's identified development needs. Work will need to be undertaken to explore the potential options for meeting this need sustainably in London and beyond. This is a matter for a future Plan, and requires close collaboration with local and strategic authorities and partners".* (Paragraph 0.0.22).

2.122 In short, London's housing needs are not being met, and the strategy in place for its development admits it will not meet needs. This clearly has the potential to impact on housing market areas that have a relationship with London, such as South West Hertfordshire.

2.123 A separate, additional factor that should be considered in determining the overall housing requirement is affordable housing. The PPG states that "*An increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes*[12]." In the case of St Albans, the 2024 LHNA identifies a net affordable housing need of 449 affordable dpa, compared with the 2020 LHNA with only increase 6 affordable dpa. It should be noted that since this figure was calculated, affordability in the District has worsened, but accepting this as the scale of affordable housing need, it represents 50% of the total annual housing requirement the Draft Local Plan proposals.

2.124 The Draft Local Plan (Policy HOU2) proposes requiring 40% of dwellings on developments that would deliver a gain of 10 or more homes to be provided as affordable housing.

2.125 As such, even if the entirety of the housing requirement proposed by the Draft Local Plan were to be delivered in full each year and through developments required to provide affordable housing (and which were viable to do so), it would still only deliver 355 affordable homes per year. Whilst a vast improvement on the recent record of affordable housing deliver in the District, this would still fall significantly short of meeting affordable housing need in full.

2.126 However, the requirement to provide 40% affordable housing will not apply to all developments – many will comprise fewer than 10 dwellings, and some may not be viable to provide the full 40% affordable housing.

2.127 Whilst difficult to quantify, it is notable that the housing trajectory provided in Table 3.2 of the Reg 19 Draft Local Plan suggests 145dpa will be delivered through windfall developments, which previously in the Reg18 Local plan suggested 180 dpa through windfall developments.

| % of first 5 years Windfall Allowance to the Annual Housing Requirement | |
|---|---|
| Reg 18 | Reg 19 |
| **25.4%** | **26.9%** |

Table 2.1 % of First 5 years Windfall Allowance to the Annual Housing Requirement (Stepped) comparison between Reg 18 and Reg 19.

2.128 Whilst the supply from these is, by definition, unknown, this source of supply is likely to include a significant proportion of developments comprising fewer than 10 homes. Other sources of supply projected to make varying (in some cases, in some years, very significant) contributions to the District's future housing land supply include previously developed land within urban areas as well as the Green Belt. Again, such sources of supply are likely to include a significant number of developments of fewer than 10 dwellings. Having regard to the above, it is evident that the Reg 19 Draft Local Plan will, as currently proposed, deliver far fewer affordable homes than the local community requires. The District represents a clear case of one where there is a need to consider a greater number of new homes in order to better meet affordable needs, as the PPG instructs to do so. It should not be overlooked that an increase in an overall housing requirement in order to facilitate more affordable homes for the District will help maximise the social benefits of the new Local Plan to the local community.

2.129 In terms of the potential to sustainably deliver a greater number of new homes for the District than the minimums local housing needs figure, we note that the Draft Local Plan is accompanied by the September 2024 Sustainability Appraisal (SA). From the previous interim SA published in July 2023, acknowledged that a higher growth scenario of 1,200 dpa represents a reasonable option which merits testing. Whilst this option is subject to a high level appraisal, as the Interim SA acknowledges: "*appraisal is inherently limited, because it is undertaken with no assumptions regarding spatial strategy / distribution of growth, let alone specific sites that would be allocated*" (paragraph 5.2.22). Other options identified include 300 dpa, 600 dpa and 900 dpa.

2.130 However, The SA published in 2024, paragraph 5.4.50 clearly stated that even though the low growth scenarios considered in 2023 were considered reasonable, this is now being judged to be unreasonable. Low growth scenarios, focused on limiting housing developments and preserving Green Belt lands, were largely ruled out as unreasonable due to high unmet housing needs, increased affordability pressures, and the potential for government intervention. Whilst there has been a change to the overarching spatial strategy at Reg.19 stage, this is not a meaningful revision as the authority are still overly reliant on a small number of greenfield allocations and does not include contingency..

2.131 Colney Heath is designated as a lower-tier settlement according to both Regulation 18 and Regulation 19 of the local plan. This area is washed over by Green Belts as indicated in the 2024 SA and the 2023 Interim SA. The 2024 Sustainability Appraisals identify Colney Heath as a focal point for forthcoming planning applications in relation to the Local Plan and emphasise the necessity of avoiding piecemeal growth. However, the sustainability appraisal or the wider spatial strategy make no consideration to the provision of housing within the settlement to support the long term growth and vitality of the settlement in the long term. Given the current housing affordability crisis in the area and the need for incremental growth to provide housing for local workers and key workers, this vision for growth is imbalanced and completely innapropriate. The authority should provide a vision for growth which can sustain the vitality and viability of the washed over settlements. It is imperative to consider higher growth scenarios that would assist the St. Albans District Council (SADC) in alleviating pressure on lower-tier settlements.

2.132 It would be inappropriate to have a blanket ban on development in Colney Heath and disregard their possible contribution to providing the housing that the Council would need in the first 5 years of adapting the new local plan. Whilst the Hemel Hempstead Garden Community and

the Broad Locations are capable of delivering a significant portion of the housing need for the authority, there are periods in the housing trajectory where there is a minor shortfall in housing provision namely at the start of the plan period, before these strategic sites are brought online.

2.133 As outlined in the commentary on housing trajectory it is noted that within the first three years of the first five year block (early stage) of the Local Plan, projected housing delivery will not meet the reduced stepped housing target of 485 dpa. This is innapropriate and will likely be found unsound at examination stage. The authority should be allocating a broader range of smaller and medium sites as part of the Local Plan to provide a buffer at the outset of the LP window to ensure that the authority have a deliverable housing land supply within the early stage of the LP. At present, the draft Local Plan provides the bare minimum and fails to provide a vision which positive addresses the historic deficit of housing provision within the borough, instead it is reliant on windfall sites and un-evidenced (future permissions and delivery), which is either a double count of delivery from the allocated sites, or represents an attempt to present an overly healthy supply of housing provision within the borough.

2.134 Importantly, the borough is currently progressing a Local Plan under the existing standard methodology. In the short term, this is applicable but as the government progress the revised NPPF to adoption and implementation the revised methodology will be applicable. Given that the NPPF will be adopted prior to the publication of the submission version of the Draft Local Plan, we consider that St Albans DC review their spatial strategy and make provision for delivery of sufficient housing supply to address the enhanced housing target contained within the revised standard methodology. We note that St Albans have been attempting to produce a Local Plan for the past 20 years and have failed to produce a LP which meets the tests of soundness at examination stage. Without modification to the current iteration of the LP there is a tangible risk that the current iteration will be found unsound at examination stage.

2.135 As outlined in the Highways technical note prepared by Ardent **(Appendix 5)** it has been evidenced that the site at Roestock Lane is accessible to a range of amenities, medical facilities and education facilities via a range of modes of travel including public transport, pedestrian and cycling routes. In line with recent appeal decisions in the borough, it is considered that there could be scope for delivery of a minor extension to the settlement of Colney to provide a tangible contribution to housing supply in the short term, which will assist SADC in meeting established housing need.

**Strategic Policy SP1 / SP3 - Housing delivery**

2.136 Bellway Homes (North London) Limited recognise that the housing requirement for St Albans District Council given in draft policy SP1 and SP3 is 885 dwellings per annum (dpa) over the plan period, a total of 14,603dwellings. This reflects the minimum figure set out in the Governments Standard Methodology for calculating local housing needs under the NPPF 2023. However, with the new proposed Standard Methods, SADC will see a significant increase of the housing number with 1,544 dpa and with a sum of 26,248 dwellings to be delivered over the plan period.

2.137 The Standard Method figure only calculates a minimum need, and it is often applicable for Authorities to plan for a higher number and provide some contingency in their plan to account for under delivery and delays in allocations coming forward throughout the plan period. The PPG makes explicit that the need derived from the Standard Method identifies a minimum figure, and it is encouraged for Local Authorities to seek to exceed this. Relying solely on the minimum housing need as set out in the Standard Methodology means the level of housing planned for also fails to allow for non-implementation of strategic sites. The PPG states that assumptions can include lapse/non-implementation rates in permissions, lead-in times and build rate.

2.138 In the Reg.18 draft Local Plan the housing delivery target included a buffer of 20% for the first five years and 5% for the remainder of the plan period which equates to a total of 15,938 dwellings across the plan period. It is unclear whether the housing targets contained within the Local Plan are reflective of unmet housing demand from the historic shortfall in delivery across the past decade.

2.139 In the Reg.19 Local Plan no reference is made to the historic shortfall in housing delivery which had resulted in central government applying the 'presumption in favour' of sustainable development and the application of a 20% buffer to the housing delivery target. Conditions in the borough hadn't suddenly changed in the period since publication of the Reg.18 consultation draft.

2.140 In fact, in the period from 2022 – 2024, the authority had cumulatively delivered net. 766 dwellings against the target of 1066 dpa which represents a shortfall of 65% of the required housing across that period. It is unclear why St Albans DC deem it appropriate to discount government guidance and omit undelivered housing supply from the revised housing target, and their housing trajectory.

2.141 The NPPF outlines a requirement that councils should maintain a supply of housing and monitor progress in building out sites (paragraph 76). The Housing Delivery Test (HDT) was introduced by Government to assist in monitoring delivery of sites.

2.142 The 2021 Housing Delivery Test results were published in January 2022 and indicated that SADC's score was 69%. The SADC's 2022 HDT result was 55%, compared with the result in 2021. Given the historic shortfall in housing provision across the borough there is an acute housing crisis. In response to the failure of the Council to maintain deliverable supply of housing St Albans District Council were required to adopt an action plan to seek to remedy historic underprovision.

2.143 The SADC Housing delivery action plan (2021) indicated that across the period from 1994-5 to 20202021 approximately 1,962 affordable housing units had been completed which equates to 73 units per annum; compared with 10,372 total completions across the same period. The figures cited in the action plan were challenged in the appeal decision for Bullens Green Lane where it was deemed that delivery across the period from 2012/13-2020 has worsened in recent years.

*"In SADC, the position is equally as serious. Since the period 2012/13, a total of 244 net affordable homes have been delivered at an average of 35 net dwellings per annum. Again, this equates to a shortfall also in the region of 4000 dwellings (94%) which, if to be addressed in the next 5 years, would require the delivery of 1185 affordable dwellings per annum". (Para 55 of the Bullens Green Lane Appeal Decision*

2.144 This position has been confirmed in the March 2022 annual monitoring report which indicated that across the period from April 2021 to March 2022 a total of 314, net additional dwellings had been delivered taking account a loss of 64 consented units.

*"The overall figure of 314 net additional dwellings completed for 2021/2022 is lower than the figure of 1,068 dwellings per annum (890 dwellings per annum plus 20% Buffer), calculated using the standard methodology"*

2.145 This position represents a shortfall of 754 dwellings against the housing target for this period.

2.146 The evidence set forth in the Appeal Decision for Bullens Green Lane and the Councils own annual monitoring report clearly demonstrates that there is a significant shortfall in provision of both market housing and affordable housing which should be adequately addressed through the housing targets for the replacement Local Plan. It is unclear from the figures set forth within the Reg. 18 draft of the Local Plan whether this historic shortfall is taken into account within the current draft. This position has not improved in the period between publication of the reg.18 and reg.19 publication draft Local Plan.

2.147 It is noted that the withdrawn Local Plan outlined a defined need for net. 14,608 dwellings across the plan period 2019-2036, which equated to 903 dwellings per annum. It is notable that whilst the housing trajectory for the Reg.19 Local Plan covers the period from 2024-2041, its operational lifecycle is 17 years a similar plan period to the withdrawn draft Local Plan. The current drafting does not appear to take into account any shortfall in provision incurred in the period covering the withdrawal of the previous draft Local Plan and present date.

2.148 As a result of the failure of St Albans District Council to deliver sufficient housing to meet housing demand within the borough, central government had mandated the application of a 20% buffer to the OAN housing target to remedy shortfall in provision. In December 2023, central government published the revised version of the NPPF which revised the approach to implementation of OAN and the standard methodology in local plan making. For Councils with an advanced draft Local Plan (Reg.18b) or Reg.19 a provision had been included allowing for an assessment of housing land supply based on a 4 year need rather than 5 year need.

2.149 In the AMR dated 31st March 2023, the council had produced two scenarios based on four year and five year housing land supply calculation.

Four year housing supply

2.150 Applying the four year housing supply methodology, on the basis of SADC having a Reg.18b draft Local Plan in advance of the replacement NPPF being adopted it has been demonstrated that the authority would have a 4YHLS of **1.7 years**. This had been based on a supply of 1802 dwellings across the period from 2023/2024 to 2026/2027, which equated to a shortfall of net. 2,462 dwellings across this period.

Five year housing supply

2.151 In parallel, SADC had undertaken an estimation of the housing land supply position based on a requirement to deliver a 5YHLS. Across the period from 2023/24 to 2027/2028, it had been demonstrated that the authority would have a deliverable housing supply of net. 2060 dwellings, which equates to a 5YHLS of **1.93 years**. This equates to a shortfall of net. 3273 dwellings overall.

2.152 The housing figures cited in Table 3.2 does not accurately reflect the actualised housing need when the 20% buffer is taken into account for the period from 2023/2024 to 2026/27. The 20% buffer for this period equates a requirement for **1068** dwellings per annum within this period before gradation to **888** across the remainder of the plan period.

2.153 The evidence set forth in Table 3.2 is misleading as the housing trajectory set forth in the Council's annual monitoring report 31st March 2023 (Table 3, page 33) **(Appendix 6)** outlined across the period from 2022/23 to 2040/41 a minimum of **16,696 dwellings would be required to meet objectively assessed housing need, based on the 4 YHLS scenario, or 16874 dpa based on the 5YHLS position.** The figures cited in the Reg.19 draft of the Local Plan represent a **shortfall of between 2,093 dwellings** This is broken down as follows:

- **4,264** dwellings across the first **4** years of the plan period (2023/24 – 2026/27) (**1066 dpa**)
- **12,432** dwellings across the remaining **14** years of the plan period (2027/28 – 2040/41) (888 dpa)

2.154 It is unclear, why or how the authority **are discounting net 14% of the evidenced housing need from the Local Plan trajectory.** Given that SADC had only delivered 305 dwellings in the period from 2023-2024, it is questioned how the projections within the two AMR'S have omitted net. 926 dwellings given that housing delivery across the same period would not match the variance

2.155 The figures set forth within the Reg. 198 draft of the Local Plan represent a clear contradiction to the evidence published by St Albans District Council. It is clear that the evidence set forth in the evidence base for the draft Local Plan is unsound as the **current housing target represents a shortfall of 14% against evidenced need set forth within the Councils own evidence base**.

2.156 The housing trajectory acknowledges that the housing need cannot solely be accommodated on

brownfield land and green belt land is required to meet established housing targets.

2.157 The deterioration of the housing land supply position of the past two decades has placed increasing pressure on housing affordability with demand significantly outstripping supply resulting in an exponential rise in house price to affordability ratio in St Albans. The evidence set forward in support of the Chiswell Green Lane cojoined appeals measures this as follows:

*10. In 2003, it was 10.28 –already the highest in the East of England*
*11. By 2010, it had grown to 12.36 (Parker CD 4.77 [3.20]);*
*12. By 2012, it had grown yet further to 12.47*
*13. By 2017, it was 16.62 (Parker CD 4.77 [3.36]); and*
*14. In July 2021, it was 17.32 (Parker CD 4.77 [3.44]).*

*"To put that into context, it means that individuals on median incomes now need to find more than 17 times their annual salary to buy a median priced property in St Albans (Gingell CD 4.80 [10.5]). That is the housing reality facing ordinary people on ordinary earnings, hoping to buy a home of their own in St Albans today* ***(Land North of Chiswell Green –Closing Statement –May 2023)*** [13]

2.158 It is clear that the inability of SADC to prepare a plan which positively addresses the needs of the housing market is having a catastrophic impact on the local housing market and housing affordability which unaddressed will result in a significant portion of the employment market relocating outside the borough to secure home ownership with associated knock on to the wider employment market.

2.159 As evidenced in our representations. we would strongly challenge the housing need target set forth in the Reg.19 DRLP. Without appropriate modification to the housing targets to align with evidence previously published by SADC the DRLP will be unsound and will exacerbate a deepening of the housing crisis in St Albans DC.

2.160 We would also question the approach to housing distribution and deliverability of housing sites which are relied on in the Reg. 19 DRLP.

Distribution of Housing with St Albans District Council

2.161 Table 3.2 of the Draft Local Plan identifies that 9,905 residential units are planned to be delivered on sites which are currently in the Green Belt, with delivery across 12 broad locations which have been demarcated for strategic level development in excess of 1000 units and large sites (100-249 units) and medium / small sites (5-99 units).

2.162 The housing trajectory over relies on the delivery of the Hemel Hempstead Garden Extension and the Broad Location sites to meet the housing need across the plan period, with this equating to 86% of deliverable sites on green belt land and 58% of the overall housing need across the plan period.

2.163 Conversely, the draft Local Plan indicates that 8% (1378 units) of the housing need will be met from other large and small / medium development sites across the borough, **a further reduction from Reg. 18 stage which included provision for delivery of net. 1725 units (11%) housing supply**.

2.164 Para 3.24 of the draft Local Plan acknowledges that land assembly, physical and social infrastructure provision represent a significant challenge to unlock delivery of these strategic sites.

2.165 It is conceivable that infrastructure constraints to unlock these strategic sites could hinder delivery of housing units in line with the targets set out in the housing trajectory for the DRLP. This constraint has been acknowledged by SADC with the omission of net. 450 residential dwellings

between Reg. 18 and Reg. 19 stage on the Hemel Hempstead garden city. The Local Plan trajectory does not take account of real term challenges to the delivery of housing units on these sites, namely the economic downturn and challenges to supply market as a result of geopolitical issues.

2.166 At present, it is understood that on strategic land sites, housing sales can be as low as 0.8 units per week. This level of sale is not conducive to housebuilders bringing forward applications, or commencing delivery of consented units. Given the current geopolitical instability and the impact of market slow down impacting delivery rates, it is conceivable that St Albans could struggle to demonstrate a deliverable housing land supply, within the mid to latter stages of the Local Plan period given the stepped housing requirement to net. 1250 and 1050 dpa respectively. Given very little contingency has been built into the LP housing land supply it is considered that there is a tangible risk that without modification, SADC could find that they are unable to demonstrate a deliverable housing land supply.

2.167 Therefore we consider that a broader range of green belt sites should be allocated within the DRLP to provide contingency in the event that there are delays in the delivery of the strategic sites.

2.168 It would assist parties responding to the consultation if St Albans DC were to publish either full or interim figures in respect of housing delivery to 31st March 2024, to provide an accurate overview to current housing delivery at present date. **We do not consider that the housing needs will be met in SADC, nor do we consider that the timing of the delivery trajectory is achievable.**

2.169 The current calculation of the local housing need using the Standard Method for SADC sets out that the minimum figure for St Albans is 885 homes per annum, which across the plan period equates to a need of 16,874 homes, as set forth in the AMR 2023.

2.170 Table 3.2 in the draft Local Plan calculated 14,603 units within its sources of supply. **This leaves a very small, if any, adequate buffer, to account for non-delivery** This position is worsened when you take into account that **14% of the housing target** will be delivered from **unsecured windfall sites** within the borough The Local Plan is fundamentally flawed as the council are artificially reliant on an arbitrary number of windfall sites to be delivered each annum to hit their targets. As outlined in the section below, for the first five years of the Local Plan the proportion of windfall sites contributing to housing delivery is at 26% (net. 653 dwellings) which represents an unsustainable level of windfall provision.

2.171 There is no guarantee that any of these sites will come forward, or on the timeline envisaged. This fact is evidenced by SADC's appalling housing delivery record across the past two decades. Without allocation of additional brownfield sites or green field sites in the Local Plan, a lack of clarity will unduly compromise the ability for these sites to be brought forward; which will create a shortfall in housing delivery and an ability to meet established housing targets.

2.172 This position is fundamentally flawed and innapropriate. As outlined in our reg. 18 representations and reiterated in these comments; our client contends that the authority should be seeking to include a broader range of smaller, medium and larger scale sites within the housing supply to provide contingency within the early stages of the Local Plan period to ensure that the authority are able to demonstrate a deliverable housing land supply, in advance of the housing units coming online from the strategic housing sites.

2.173 When examining the details of this calculation, it is possible to comment further on the following specific points:

Past Delivery

2.174 **885 dwellings per annum is well in excess** of the recent built rates. On average, 360 **net additional dwellings** have been built over the last three years (2021/22 – 2023/); which had been preceded by deliver of net 483 dpa between the period from April 2019 – 31st March 2022.

2.175 Furthermore, the St Albans District Council AMR 2023 indicates that across the period from 1994/95 to 2023 a total of 11,447 dwellings had been delivered across the borough equating to **395 dpa.** This already demonstrates that the targets are optimistic, in part, on the basis of the present entirely brownfield approach to housing, and high proportion of windfalls, which the DRLP should be seeking to address.

2.176 On a more granular level, the AMR (2023) outlines that across the period from 2019-2023/4, SADC delivered 2292 dwellings, which equates to net. 458 dpa. As evidenced in the housing delivery test results, the authority is consistently underperforming against the housing need.

2.177 More critically housing delivery within the borough has been centred around development on previously developed land with net**. 9,439 dwellings (392 dpa**), equating to **87% (on average)** of the borough's housing supply. Given that SADC has a limited supply of brownfield land being comprised of 81% green belt this situation is unsustainable and represents a symptom of the chronic failure of SADC to meet the established housing needs of the borough over a substantial period of time. The housing situation in St Albans DC is dire and without appropriate intervention will be unsustainable.

2.178 It is noted that the Local Plan includes a range of brownfield allocations, which are formerly employment land. The Local Plan fails to provide a robust justification outlining that the release of these employment sites will not result in a shortfall of employment floorspace within the borough.

2.179 The evidence base supporting the brownfield allocations is dated and does not adequately demonstrate that this level of brownfield release could be supported in planning terms. With regards to the deliverability of the brownfield land housing allocations for residential use, the Local Plan is lacking on evidence that the housing allocations proposed within the draft Plan are financially viable and are realistic development opportunities.

Green Belt sites

2.180 The housing trajectory over relies on the delivery of the Hemel Hempstead Garden Extension and the Broad Location sites to meet the housing need across the plan period, with this equating to 83% of deliverable sites on green belt land and 58% of the overall housing need across the plan period.

2.181 It is unclear what capacity studies have been undertaken for each of these strategic sites and consideration on deliverability. This is already unrealistic when it is considered they would have to wait for the adoption of the Local Plan, and associated Green Belt adjustments before the principle would not require the high test of very special circumstances. Further, it is likely that area wide masterplans or design briefs / design codes will need to be adopted and implemented as supplementary guidance for the larger sites before delivery can commence. This will result in significant delays in delivery.

2.182 However, an important message is being portrayed in this trajectory: the importance of Green Belt sites in terms of housing delivery. Although it is considered that the timescales mentioned above are unrealistic, it is acknowledged that Green Belt sites do usually progress at a faster rate than more complicated brownfield sites that are more likely to have existing use value, remediation, demolition and land assembly considerations. They are also more likely to incur additional costs and given the current state of the market this may slow down the progress of development even further on brownfield sites.

2.183 The most effective way of forecasting housing numbers would be to allocate a greater number of sites as contingency, and have a greater number of Green Belt sites coming forward at even periods across the plan period. As outlined below, year 6-15 of the Local Plan delivery rates barely meet the annualised housing targets of 1250 dwellings and 1050 dwellings respectively. The framing of the housing targets for the three cycles is symptomatic of a failure to plan positively

to meet the housing needs for borough. It is conceivable that reliance on a small number of sites within the back end of the plan period will result in the Council failing to demonstrate a deliverable housing supply.

2.184 It is considered that further consideration should be paid to the inclusion of a greater range of smaller / medium scale green belt sites in sustainable locations which have shorter lead in times for delivery as a contingency. It is requested that further consideration is paid to the inclusion of land at Roundhouse Farm as an allocated site within the DRLP. Inclusion of this site will contribute to the early delivery of net. 155 residential units.

Reliance on Effective Windfalls

2.185 Within the DRLP Table 3.2, SADC has identified that c.20% of the total sources of supply would come from Windfall sites; these are not identified as allocations in the Local Plan. As set forth in these representations it has been evidenced that SADC have consistently failed to deliver sufficient housing to meet established demand, resulting in significant shortage which is exacerbating the housing crisis in SADC.

2.186 On average, **4583 net additional dwellings** have been built over the last three years (2019/20 to 2023/24). Furthermore, the AMR 2022 indicates that across the period from 1994 to 2023 a total of 11,447 dwellings had been delivered across the borough equating to **395 dpa which falls significantly below the target of 885 dwellings per annum. The heavy reliance on windfall sites with no guarantee on deliverability is fundamentally unsound.**

2.187 To rely so heavily on this level of unallocated sites coming forward which are not formally identified in a plan is overly ambitious, not robust, and not based on past trends. As indicated by the past delivery, SADC has consistently failed to plan in positive manner to deliver anywhere near to the up to date housing requirements. It is unclear how the figure of 145 dpa has been arrived at as this appears to have been arbitrarily chosen to seek to artificially meet the boroughs housing target. It is also worth repeating that SADC is heavily constrained by Green Belt, which will make delivery of this proportion of windfall development even more challenging given that the majority of readily deliverable greenfield land has already been delivered, or is allocated within the draft Local Plan. This is not positive planning and there is no certainty that these levels are deliverable and directly contradicts with the priorities of Para 15 and 16 of the NPPF 2023.

2.188 This must also be seen in the context of SADC also indicating that they require Green Belt land to be released to meet development needs, as not enough can be accommodated within the urban area. Where, and how, this level of windfall development over and above what has already been identified can realistically be delivered is questioned.

Housing trajectory

2.189 The section below summarises the core comments which are being made on the housing trajectory for the early, mid and end period of the Local Plan process.

*Early stage*

2.190 According to the Housing Trajectory in the first five years there would be a 5.0 years housing supply and this is based on a stepped housing requirement of 485 dwellings within the first five years of the plan period. The trajectory assumes that within the first three years of the operational plan period (2026/27, 2027/28 and 2028/29) a **31% shortfall** against the **requirement of 1455 dwellings (deficit of 389 units).** This shortfall is planned to be offset by over provision within the remaining 2 years of the first five years of the plan period to achieve a 5 year housing supply of 2941 dwellings (588 dpa) within this period, but this is contingent on an over delivery of in excess of 1875dwellings for the remaining 2 years. This level of delivery is predicated on the large strategic development sites starting to be brought online, no contingency has been made for delays in delivery of these larger allocated sites which often have infrastructure and land acquisition

complications that often delay progression. It is already evident that there are challenges to the delivery of the strategic sites within the borough, with the prospect for delivery of an element of housing on these sites into the next plan period.

2.191 The housing trajectory within this period is heavily reliant upon the delivery of net. 1077 dwellings from **existing permissions present within the borough, which equates to net 36%** of the housing supply for this period. Our client would query the validity of this approach and the figures that have been cited. Namely, the figures cited in the Local Plan bear no relationship to the figures set forth within the AMR (2023) as summarised in the table below:

2.192 There is an unexplained variance in 'Permissions (Estimated Future Completions)' of net. 305 dwellings within the first five years of the LP plan period alone. There is no explanation within the supporting documentation to the LP on where the additional dwellings have been derived from. Given that this equates to net.10% of the housing requirement for the first five years, our client would query where the evidence is to substantiate this position. The additional provision does not appear to be substantiated on an evidential basis in the information that has been published with the Reg.19 consultation draft.

2.193 Given that the Local Plan period already includes a windfall allowance of 653 dwellings across this period (26%) it is unclear why a further 305 dwellings (10%) of unsecured provision has been forecast within the Local Plan housing trajectory**. Overall, this would equate to approximately 26% of the total housing supply within this plan period, which represents an unsustainable level of reliance on speculative development**.

*Mid Period housing trajectory*

2.194 Our client expresses reservations over the methodology which has been applied in the preparation of the housing trajectory for the middle years of the Local Plan period.

2.195 Across the mid period (second 5 year cycle) of the LP period, planned delivery is for net. 6,298 dwellings (1259 dpa) against an annualised target of 1250 dpa. Targeted provision across this period just meets the 1250 dpa threshold and is contingent on delivery of the Hemel Hempstead Garden community (1635) and the Broad Locations (2240) with limited contribution from other green belt sites, comprising net. 892 dwellings in this period.

2.196 **This stage of the housing trajectory does not allow for any contingency in the eventuality that delivery rates on the strategic sites falls below the accelerated delivery rate of 1250 dwellings per annum.** This approach is fundamentally unsound and is likely to result in a shortfall in housing provision and failure to demonstrate a 5 year housing land supply within year 6-10.

2.197 Again, the housing trajectory is reliant on net. 612 dwellings (10%) which are delivered from the existing or future permissions. For the Local Plan to be delivering units from extant permissions this late into the Local Plan period, is questionable. This represents a departure from the evidence contained within the Annual Monitoring Report (2023) which includes provision for net. 215 dwellings within this period. **It is unclear where the additional 400 dwellings are being generated from, as this has not been substantiated with evidence contained in the Reg. 19 Draft Local Plan**.

2.198 Given that the Local Plan period already includes a windfall allowance of 725 dwellings across this period (12%) it is unclear why a further 400 dwellings (6%) of unsecured provision has been forecast within the Local Plan housing trajectory. **Overall, this would equate to approximately 18% of the total housing supply within this plan period, which represents an unsustainable level of reliance on speculative development.**

*Late stage plan period*

2.199 Similar issues are present within period 11-15 whereby it is anticipated that 4952 dwellings (990 dpa) will be delivered against an annualised target of 1050 dpa, which equates to a **shortfall of net. 298 dwellings against the stepped housing requirement.** As with the mid stage of the

plan period, the f**ailure to identify a sufficient range of medium and larger scale greenfield sites to provide contingency** results in the situation where **SADC are not able to demonstrated a deliverable 5 year housing land supply within the end period of the LP (4.9 YHLS).**

2.200 Housing delivery within this period of the Local Plan lifecycle is contingent on delivery of 85% ( units) from the Hemel Hempstead extension (2,390 units) and the Broad Locations (1837 units), with the residual amount drawn from the windfall sites. As outlined in these representations, reliance on delivery of a smaller number of large and strategic allocations to provide the majority of the housing in this plan period is ill advised. It has already been demonstrated through the councils own evidence that on one site HGC, 10% of the housing provision forecasted at R.18 stage had been lost in R.19 stage and will now fall within the next plan period. It is likely that similar issues could arise on the other Broad Locations sites. **Given that SADC cannot demonstrate a deliverable 5YHLS in this period, any residual loss of units being delivered from these sites will result in the need for SADC to refresh the spatial strategy and allocate additional sites to compensate for the shortfall in provision. It is therefore requested that evidence is provided on the anticipated delivery timescales for each of the site allocations, to enable a robust review of SADC's housing land supply position.**

*Overarching comments on housing trajectory*

2.201 The housing trajectory is overly weighted towards strategic sites and large scale development sites which are all subject to requirement for the preparation of area wide masterplans, design codes and design briefs which require approval and adoption before delivery of these sites can start to commence.

2.202 The formulation of area wide masterplans and design codes can historically be an incredibly time intensive action given the need for extensive community engagement in their preparation, in some instances this extends across several years. This is all before applications can be progressed which given the nature of these sites will either be in hybrid or outline form. It is not uncommon for strategic sites to experience multiple year delays passing through the planning system before outline permission is established, which is likely given the nature of these sites. Once outline approval is established reserved matters approval will be required before work can commence on delivery of the initial phases of these sites.

2.203 It has been evidenced that a number of strategic sites across the country have stalled as a result of land assembly, financial viability, environmental constraints and site mobilisation. A small number of examples have been set out below:

*Otter pool – Folkestone*

2.204 In Folkestone BC, the authority had sought to deliver a new garden community to deliver net. 10,000 dwellings as part of their spatial strategy, as part of the 2018 Local Plan review adopted in Feb 2022. In 2023, outline planning permission had been granted at committee for the first 8500 units, but the S106 has not been completed. It had originally been intended that the first phases would be brought online in 2025. Places for People had come online as development partner responsible for taking on the residential land. In October 2024 it had been reported that Places for People have withdrawn from the development partnership, over concerns that the scheme was unviable.

2.205 The outline application has yet to have a completed S106 agreement, and there is no clear sign that another strategic partner has the appetite to take this site on. It has been reported that the council are seeking to reengage with the landowners to bring meanwhile uses back on site while the council considers their options for the disposal of the site. **As of November 2024, more than 6 years from inception of the draft Local Plan and 2 years from the adoption of the replacement Local Plan, outline permission has not been formally executed, reserved**

**matters approval has not been secured for preliminary phases and no units have been delivered.** There is no guarantee that this will come online in the coming years, despite investment of net. 119 million by Folkestone BC.

1. Years in inception –**6 years, 2 post plan adoption**
2. Outline permission secured –**No**
3. Reserved matters approval secured –**No**
4. housing units delivered - **Zero**

*North Horsham*

2.206 In 2018, Horsham DC granted permission for an extension to the settlement of North Horsham to deliver 2,750 new houses alongside new employment floorspace and education campus and associated development. Legal and General whom are acting as the development partner for HDC secured approval for the first 390 dwellings in 2021, as of April 2024, 100 occupations had progressed on site.

2.207 The borough has been plagued by water neutrality constraints which have resulted in the borough retrospectively seeking a water neutrality solution that has significantly delayed progression on site. As it stands HDC are still seeking a water neutrality solution and progression of future phases of the development have not been brought online.

1. Years in inception –**9 years post plan adoption (November 2015)**
2. Outline permission secured –**2018 (3 years post plan adoption)**
3. Reserved matters approval secured – 2021, (6 years post plan adoption)
4. housing units delivered – 100 occupations as of April 2024 **(9 years post plan adoption)**

2.208 Delivery of this strategic site is so challenging that the vast majority of the housing units to be delivered on this site will now fall within the housing trajectory for the replacement local plan. A small fraction of the housing units proposed to be delivered in the plan period have been.

*Deepcut Barracks*

2.209 In 2011, Surrey Heath Borough Council adopted their Local Plan which included the redevelopment of Deepcut Barracks site as a strategic housing allocation for net.1100 dwellings. Hybrid planning permission was granted in 2012 for the preliminary phases of the development. As of January 2024, net Across the wider masterplan, net. 363 residential dwellings benefit from either detailed planning permission or are currently under construction, or complete. When combined with the 81 dwellings delivered under the detailed element, this equates to 444 dwellings or 37% of the quantum of housing to be delivered on the Mindenhurst site. Delivery of the site has been complicated by infrastructure delivery and land assemblage constraints.

1. Years in inception –**13 years post plan adoption (November 2011)**
2. Outline permission secured –**2012 (1 year post plan adoption)**
3. Reserved matters approval secured for first residential phase – 2018, (7 years post plan adoption)
4. housing units delivered – 363 occupations / permissions as of October 2024 **(13 years post plan adoption)**

2.210 Delivery of this strategic site has been so significantly delayed that the majority of the housing units were submitted to Surrey Heath BC in January / Feb 2024, to prevent the outline permission from lapsing. **This site contributed less than 444 dwellings to the boroughs housing land supply within the plan period (37%) with 63% now falling within the housing trajectory for the replacement Local Plan.**

2.211 We could provide numerous other examples where constraints in the delivery of strategic housing sites has resulted in housing units being brought online significantly later than envisaged under the Local Plan. As outlined earlier in this statement, it is evident that there is scepticism on

the roadmap for the delivery of the Hemel Hempstead Garden Community, which is complicated given that this is being delivered in partnership with Dacorum BC whom are progressing on divergent timescales to SADC.

2.212 This is further complicated by the requirement of Draft Policy LG6 that all sites released from the green belt will be required to provide a green belt compensatory strategy which details the approach to delivery of "new or enhanced infrastructure, woodland planting, landscape and visual enhancements, improvements to biodiversity, new or enhanced walking routes and improved access to recreational facilities'. The detail of the compensation strategy will need to be worked up in detail as part of the initial site masterplan stage.

2.213 The expectation that housing units from the larger 'broad location' and strategic sites will be completed within the first 7 years of the Local Plan period is overly optimistic and unrealistic, based on current trends. This is particularly relevant given the acute economic circumstances present in the UK where housing delivery rates are plummeting in response to adverse market conditions. The over reliance on a small number of large scale and strategic sites and failure to **integrate appropriate contingency is unsound**.

2.214 In summary, it is evident that SADC is heavily reliant on the Hemel Hempstead urban extensions and strategic development sites and windfall sites to meet its housing requirement, with very little allowance in the final 10 years of the plan period to rectify shortfall in delivery. Given the complexity of delivery of strategic sites, predicating the boroughs housing land supply on a small number of sites is incredibly risky, as there is no tolerance to compensate for shortfall. Based on previous delivery rates associated with large complicated sites, some of the targets are not only unachievable but they are based on flawed calculations. As such, it is evident that additional Green Belt land needs to come forward to provide greater certainty with the delivery of additional housing. It is possible to conclude therefore that the Plan has not been **positively prepared nor is it effective.**

Stepped Housing Trajectory

2.215 Whilst not clear from proposed policies in the Draft Local Plan, it is noted that the Table at 3.2 of the Draft Local Plan implies the Draft Local Plan is proposing a stepped housing requirement.

2.216 It suggests the housing requirement will be set at a mere 398 dpa during the early years of the plan period (2024-2026); rising to 485 dpa for the period 2026-2031. Only after 2031 does the Draft Local Plan set a requirement above the minimum 888 dpa.

2.217 Table 3.2 indicates that even by 2032, the average number of dwelling completions since 2024 will still be below 888 dpa.

2.218 The PPG[14] is clear that, whilst a stepped housing trajectory may be permissible in certain circumstances, the need for such an approach must be evidenced. It stresses that strategic policy-makers should not seek to unnecessarily delay meeting identified housing needs. A stepped trajectory should be the exception, and the new Local Plan will need to justify such an approach if it is to be pursued.

2.219 The stepping of the trajectory is inherently problematic: the housing shortage is a current and acute issue facing the District. To delay the delivery of much-needed homes, with the resultant negative social and economic impacts for the District, is something that the new Local Plan should seek to avoid if at all practicable.

2.220 In the case of St Albans District and its Draft Local Plan, before concluding that a stepped trajectory is necessary (and if it is, the degree to which it should be stepped) it is important the Council explores all sustainable options for meeting needs earlier in the plan period, i.e. to consider whether there are additional sustainable, deliverable sites the new Local Plan does not currently

support, but which could deliver homes early in the plan period if they were to be allocated through the new Local Plan. Failure to do so would mean the new Local Plan is unnecessarily delaying the delivery of homes, contrary to the PPG.

Duty to Cooperate – Context with Welwyn Hatfield BC

2.221 It is recognised that SADC shares a Functional Economic Area with neighbouring Welwyn Hatfield Borough Council. SADC might well consider it is accommodating its own needs (as we question), though it is apparent that Welwyn Hatfield share many of the similar green belt conditions which hinder delivery of housing. It is unclear what effort has been made by SADC and WHBC to plan in a collaborative manner to meet objectively assessed housing need.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Summary**

2.222 In summary, Bellway Homes Limited has strong concerns with draft Policy SP3. The crux of the objections are as follows:

- **Level of housing proposed (Standard Method) does not allow for contingency** and is therefore not robust or positively prepared;
- **Lack of recent delivery, 5YHLS,** and lack of contingency warrant a higher housing requirement;
- **Level of windfall sites anticipated is unachievable and speculative**, most sites need to be formally allocated to be sure the level of housing proposed is achievable**.**
- **Green Belt Assessment is flawed due to it not being fine-grain,** and no exceptional circumstances report published;
- Further sites should therefore be **allocated to account for excessive windfall provision and over reliance on a small number of strategic development sites.**

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Representations to the Reg_19 consultation on St Albans Draft Local Plan_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Our client has significant concerns regarding the soundness of this policy. Given that they have landholdings within the borough, we assert our right to participate in discussions regarding the draft policies during the Examination in Public (EIP) stage

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**209 - Mr Chris Martin**

Submission Number: 209 Submission Date: 07/11/24 17:17

Respondent: Company/Organisation: Name: Mr Chris Martin

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

At all previous stages of the planning process where public comment has been invited, I have put forward arguments as to why this development should not be allowed. These arguments are as valid for this specific development as they are for the Local Plan as a whole.

Those submitted comments have been ignored by the council or have been insultingly dismissed with ‘cut and paste’ stock answers which feature time and time again throughout the Local Plan Consultation Summary Response Table.

“The inclusion of this site is in line with the methodology of the ARUP Green Belt Review 2023…”. Previous documentation submitted with regard to this proposal has shown that that if ARUP’s methodology had been correctly implemented, this site should not be considered for release. ( Statement of Case from Greenbelt (Rule 6 Party), appendix B). The council cannot rely on the ARUP review process as an argument to support the Local Plan, and yet dismiss the results of the ARUP review process when it is used to show why this land should not be included. As of March 2023, just 12.6% of all the land area of England is designated as Green Belt. This needs to be protected at all costs.

“The Local Plan in Chapter 10 seeks to protect and enhance the natural environment and biodiversity”. This is just an oxymoron in itself, that releasing land from Green Belt, to be built upon, will ‘enhance the natural environment and biodiversity”. In my own previous submissions, I have

shown that the Biodiversity Metric used for the Environmental Impact Assessment is a flawed process, and that Biodiversity Net Gain is an equally flawed measure; that is even 'IF' the developers were to make good on their environmental promises once the money is in the bank. Nationally there is a trend of developers failing in this regard.

"The Council is working with Herts County Council as the Highways Authority to undertake the transport impact assessment for the Reg 19 Draft Plan". Every submitted comment that makes any mention of any aspect of the road or traffic is met with this same stock response. Working how? What is being done? Not only that, but a comment which make no mention of traffic also receives this same stock reply. Comment 234 makes a point solely focussed on the loss of the environment and the effect on the wildlife, yet receives this same response of The Council working with Herts County Council as the Highway Authority…. If the council are going to do local residents the injustice of repeatedly using stock answers to valid points raised, at least cut and paste them into the correct section.

I could go on. This document is nothing more than insulting 'lip service' to many members of public who have genuine concerns about the ongoing devastation to our environment.

Many contributors have submitted reasoned and rational arguments highlighting the errors in the council's plans, yet the council has failed to provide any meaningful answers, and have largely dismissed all comments with apathy.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

### 222 - Martin Grant Homes and Kearns Land Ltd

Submission Number: 222 Submission Date: 04/11/24 09:00

Respondent: Company/Organisation: Marrons Name: David Pendle

On Behalf Of Company/Organisation: C/O Marrons Name: Martin Grant Homes and Kearns Land Ltd

Comment Number: 2

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

3.7. The Policy seeks to locate growth to make the most sustainable use of land in urban areas and then in the Green Belt with a brownfield first approach.

3.8. St Albans City and District have utilised the Standard Method in calculating housing need and consider there to be a need for at least 14,603 net additional new houses at a rate of 885 per annum (1st October 2024 - 31st March 2041). This is also reflected in Strategic Policy SP3.

**224 - Redington Capital Limited & CALA Homes**

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Redington Capital Limited and CALA Homes continue to **object** to the spatial strategy set out in paragraph 1.33, Table 1.3, Figure 1.2 and Strategic Policy SP1 for the main reasons discussed below.

When examining Table 1.3 it is evident that the new tiering system adopted by the Council is predominantly based on population size and less to do with proximity to public transport facilities and other services. Redington Capital Limited and CALA Homes therefore question the justification behind the changes to the settlement hierarchy.

If the Council is to create a hierarchy that is based upon those settlements that are 'most accessible', with the widest range of 'services and facilities', then Chiswell Green should not be identified as a lower tier settlement. It benefits from access to public transport and other local services and facilities that are normally associated with a Tier 1 settlement.

It is located on the edge of St Albans City and is within 2.5m of its city centre and its facilities and services. In essence, Chiswell Green is an extension of St Albans, a Tier 1 settlement, similar to Batford / Southdown / West Common being an extension to Harpenden but regarded to be part of Harpenden for the purposes of the settlement hierarchy.

When comparing Redington Capital Limited and CALA Homes' site (at Land south of Chiswell Green Lane) to some of the Tier 1 to 5 sites allocation included in Part B (Site Allocation) of the Regulation 19 Publication Draft Local Plan, it is evidently more accessible with a wider range of services and facilities than some of those sites put forward for housing development in Part B. The reason why this has happened is because of the 'approach' adopted in the Settlement Hierarchy Study (Part 1) does not reflect reality. For example, Table 6 (Settlement Hierarchy Scores) of the Settlement Hierarchy Study (Part 1) has given Chiswell Green a score of 9.3, however, this score should be much higher for the following reasons:

- The bus route score (1) on page 46 only indicates that one bus route is accessible to Chiswell Green residents. There are in fact four bus routes (no 321, 361, 635 and 724) within 10-minutes walking distance;
- The train station score (0) on page 48 does not reflect that fact that How Wood railway station and Park Street railway station are within a 10-minute walk or 2-minute cycle away and residents have access to train stations in St Albans Abbey station which is a 25 minute walk or a 10-minute cycle ride or a 5-minute bus ride away;
- There are existing Public Rights of Way (PROW) walking routes in the vicinity of the Chiswell Green, including no's 82, 80, 21, 39 and 28;
- The supermarket score (0) on page 50 does not reflect the fact that there is a co-op supermarket located within Chiswell Green and residents have access to supermarket facilities located on the west side of St Albans (Sainsburys and Lidl at the Abbey View Retail Park) which is a 25 minute walk or 10-minute cycle ride away or 5-minute bus ride away [this is assuming that the residents will not be ordering their shopping on-line];
- The leisure centre score (0) on page 50 does not reflect the fact that residents of Chiswell Green have access to Westminster Lodge Leisure Centre located on the west side of St Albans which is a 25 minute walk or 10-minute cycle ride away or 5-minute bus ride away. Residents also have access to Watford Leisure Centre;
- There are eight GP practices located within a 4km radius of Chiswell Green and a further two GP practices located just beyond a 4km radius, in London Colney;
- St Albans City Hospital is also located less than 4km to the north of Chiswell Green; and
- There are public open spaces within proximity to Chiswell Green, including allotments, playing fields, public parks, play space and religious grounds. In terms of the public open spaces with play facilities, these include:
- Playing fields at Cherry Hill and Mayflower Road which are within 500m;
- Greenwood Park allotments; and
- Four existing play areas within 900m, one of which (Greenwood Park Play Area) has an extensive provision of play equipment for children up to the age of 14 years, with a new range of play equipment for children under 6 years installed in 2019.

Maps illustrating the location of the Redington Capital Limited and CALA Homes' site in Chiswell Green in comparison to the above is attached as **Appendix 4.**

Notwithstanding where Chiswell Green is located within the settlement hierarchy, it is a location that can and should accommodate more homes because of its excellent access to transport facilities and local services. Additional housing should not be rejected in this location because it is a lower tier settlement (with less population), the Council should be identifying Redington Capital Limited and CALA Homes' site (Land south of Chiswell Green Lane) as a new broad location site

(for housing and education purpose) in Part B (Site Allocations) of the Regulation 19 Publication Draft Local Plan. It is a highly accessible site with a wider range of services and facilities locally and benefits from access to other services located within a Tier 1 settlement.

### 4.1.1 WRONG LOCATIONS IDENTIFIED

Paragraph 1.33 explains that:

"*The Spatial Strategy has been shaped by the need to address the Climate Emergency and new development will generally be concentrated on the basis of the Settlement Hierarchy in Table 1.3 below. This approach gives priority to the larger urban centres which can provide a greater range of services and facilities, supports the re-use of land within the urban areas, and can reduce the need to travel. These larger urban centres also offer greater accessibility by walking, cycling and public transport*"

The above strategy is appropriate as the first starting point. However, Redington Capital Limited and CALA Homes highlight that unwavering compliance to this approach (which has occurred when preparing the Draft Local Plan) has resulted in obvious and more accessible / sustainable greenfield sites in lower tier settlements to be automatically rejected.

These sites should not be automatically rejected by the Council but considered on their own merits, as demonstrated in Section 3 above.

In Redington Capital Limited and CALA Homes' opinion, the Council has chosen to identify development sites that are located on the edge of 'higher tier settlements' but are located further away from transport services and other facilities, rather than some of the more sensible, logical sites located in lower tier settlements, such as the Land south of Chiswell Green Lane, which benefit from better access to transport facilities and services. Therefore, the spatial strategy adopted by the Council (using the sites identified for development in Part B of the Draft Local Plan) will not deliver the key objectives quoted above – to locate new development in locations that will reduce the need to travel and to provide a greater range of services and facilities.

In addition to the above, Redington Capital Limited and CALA Homes notes the findings of the HELAA (2021) and Draft Strategic Site Selection Evaluation undertaken as part of the Strategic Housing Land Availability Assessment (SHLAA, 2018). These documents are evidence base documents that support the Regulation 19 Publication Draft Local Plan.

Annex 15 (St Stephens) of the HELAA indicates at pages 45 to 46 that the Land South of Chiswell Green Lane (reference STS-10-21) is:

"...*considered to be potentially suitable subject to absolute and non-absolute constraints being reasonably mitigated. Evidence base work, including a Green Belt Review, is underway and may change the site suitability in the future*" and

"*The site is considered be potentially suitable, available and achievable subject to further assessment as part of the site selection process.*"

The Draft Strategic Site Selection Evaluation (appendixes 1 and 3) confirms that Redington Capital Limited's and CALA Homes' site at Land South of Chiswell Green Lane (site ref: CG-561) should be taken forward for the site selection stage. The following RAG conclusions were reached:

1. Green Belt Review evaluation (RAG rating = Green);
2. Suitability (RAG rating = Green)
3. Availability (RAG rating = Green)
4. Unique contribution to improve public services and facilities (RAG rating = Green)
5. Unique contribution to enhancing local high quality job opportunities (RAG rating = Green)
6. Unique contribution to other infrastructure provision or community (RAG rating = Green)
7. Deliverable / Achievable (RAG rating = Green)
8. Overall Evaluation (RAG rating = Green)

These evidence base documents demonstrate that Redington Capital Limited's and CALA Homes' site at Land South of Chiswell Green Lane does not have any constraints and is deemed by the Council to be suitable and achievable for development purposes.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA (2021), should be identified by the Council as a new broad location site (for 391 homes and new school) in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

- Green Belt compensatory improvements - including significant new country parks, better access to the countryside via new and improved rights of way, new and improved habitat connectivity;

**Comment** Fully support this aspiration. However there is little evidence that this has been applied to equestrians in this plan, ridden horse and horse carriage drivers, although there is mention of equestrian access in the Transport Strategy. I suggest wherever a right of way is included, more thought should be given to accommodate these users.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. ### 231 - Mrs Tania Martin

Submission Number: 231 Submission Date: 07/11/24 20:17

Respondent: Company/Organisation: Name: Mrs Tania Martin

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Having read the Local Plan Consultation Summary Response Table, which is supposed to contain the council's response to many of the issues raised with the Local Plan, I can see that very little thought has gone into the council's response for what is such an important matter. The overwhelming majority of the responses provided are repeated time and again throughout with little regard being made to the point raised. It appears wholly that comments have been ignored and contributors provided with nothing more than 'sound-bites'. However, in comparison, this is a vast improvement on 'Noted', which is what many contributors received. How can this show that the council has given any thought or consideration to the issues raised.

There appears to have been no systematic process when deciding which sites should be included in the Local Plan. The sites included are largely those that have been out forward by unscrupulous developers, often with no links to the area, but specialise in identifying Green belt land and throwing their financial weight at forcing through planning applications.

The council make much of the fact that they have used the ARUP Green Belt Review to assist in the formulation of this plan, yet ARUP themselves have demonstrated that they failed to abide by their own methodology in conducting this review with regard to site L2.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The plan is not a complete plan. It does not address the following issues:

It creates increased traffic in Hemel Hempstead/Leverstock Green and around St Albans. It assumes wishful thinking with regard to people using cycling or walking and does not include sufficient infrastructure creation. A new motorway junction north of Hemel is required. The planning of this needs to be included rather than passed of to another party. It should be ONE plan/strategy.

There is no plan to tackle the insufficient health provision across the area. Building surgeries is not sufficient, they need staffing and the hosipital situation for the whole of Herts has not been addressed. You cannot add thousands of houses without the required services.

I am not confident that significant investigation has been carried out of potential flooding caused by the large number of houses proposed around Leverstock Green/Hemel Hempstead. Questions raised at the consultation regarding this were not answered sufficiently.

How will the new schools be staffed and funded. Building schools is only part of the problem, they need staff and fudning. There are already issues fudning current schools and getting staff in Hertfordshire. Placement of the schools so children are not travelling across Hemel Hemsptead or St Albans is also key. This again shows it is only addressing some of the issues, not all of them.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

There has been significant flaws in the Regulation 18 process, lack of scrutiny of the draft plan prior to the regulation 18 process and the comments from those who live and work in St Albans are being ignored and pushed away. It feels like there has been no due process for the identification of potential greenbelt sites, rather more driven by speculative developer interest in an effort to shortcut previous council failures to keep pace with housing delivery. As impacted residents we have very little confidence there will be any valid assessment of these Regulation 19 comments, since the Council intend to go to Examination only three weeks after the Regulation 19 consultation ends.

The Arup Green Belt Review methodology is flawed in relation to sub-areas, defensible boundaries and buffers with respect to L2, this has been pointed out by many within the Regulation 18 consultation process - the planning team continue to ignore these comments. When will these be addressed, if ever?

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I believe that there are major issues over the soundness of the plan as it currently exists.

The procedures followed from the outset in early 2023 took an approach where Officers formulating a list of potential sites for release from the Green Belt, based on responses from developers in the various “call for sites” processes. A Green Belt Review was commissioned, and the sites that were suggested for further consideration, were essentially placed in the draft plan wholesale. This was despite Arup warning that this should not be done, and suggesting that other aspects such as sustainability needed to be considered.

The evidence was pushed through the Planning Policy and Climate Committee very rapidly, without the Councillors on that committee having adequate opportunity to scrutinise the material. A vote then followed to enter the Regulation 18 process, with the promise that the missing evidence base would be formulated over the next year to support the proposal.

Producing “evidence” to justify a decision, is not the same as basing a decision on firm evidence that has been gathered. This is a flaw with the procedure followed.

The number of responses from the community was poor, mainly because only a small proportion of the district’s adult population were aware that it was taking place. Added to this was the complexity of the portal site to submit a response, which has been significantly worse for the Regulation 19 submissions.

The “Local Plan Consultation Summary Responses Table” that was produced, lists all comments. It is very notable that the comments shown have a one word “noted” or a short phrase alongside them, which is the same for numerous of the comments. The inclusion of L2 as a site allocation in the plan appeared to attract a substantial number of comments, expressing a desire that it be removed, however it remained in the plan, indicating that these comments were disregarded.

There has been a race to Examination, such that the timeframe for consideration of any comments is very small, which raises the question to what extent the public’s views will be considered. This is particularly the case, since the Full Council voted to approve the plan prior to the conclusion of the consultation, let alone any review of the points made in it.

The haste appears to be to reach Examination prior to the publication of a revised NPPF, which is expected to significantly increase the housing requirement for the district. This haste is circumventing the full procedures, thus undermining the soundness of the plan.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

**266 - Crest Nicholson Partnerships and Strategic Land**

Submission Number: 266 Submission Date: 08/11/24 08:47

Respondent: Company/Organisation: Stantec Name: Sarah Cross

On Behalf Of Company/Organisation: Crest Nicholson Partnerships and Strategic Land Name:

Comment Number: 8

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

4.1 Chapter 1 of the Reg 19 DLP sets out a spatial strategy for the City and District of St Albans up to 2041.

The Plan, once adopted, would supersede the current adopted Local Plan Review (1994).

4.2 The Reg 19 DLP continues to recognise (at Para 1.31) that there is:

"*...a clear need for more new homes because of the national situation, high house prices and also a need for more local people to have the opportunity to live and work where they were brought up. To do this the District needs in particular a supply of first family homes to purchase, affordable homes to rent and buy, and to provide for opportunities for downsizing, Self-build and Custom Housebuilding. It is also important to maintain a healthy local economy and high quality local jobs that offer genuine alternatives to commuting into London or elsewhere outside the District*"

4.3 To achieve this, and meet needs which are not currently being met, the Reg 19 DLP sets out the Spatial

Strategy at **Policy SP1**. This policy has remained similar to the Reg 18 version, but has been updated. These updates include: making clear that growth should seek to first develop Brownfield land; that community facilities such as healthcare should be provided; and alterations to the housing requirement figures.

4.4 Therefore, the policy now identifies that growth should (amongst other requirements):

- Be supported by necessary community infrastructure, transport improvements, green spaces and tree planting;
- Make the most sustainable use of land in urban areas and then the Green Belt, seeking for a “Brownfield Land” first approach;
- Be located within and adjacent to the larger and most sustainable urban centres in accordance with the settlement hierarchy; and
- Meet local housing need, following the ‘standard method’ calculation to deliver at least 14,603 homes across the Plan period (885 dwelling per annum).

4.5 We are generally supportive of the spatial strategy.

1. **i) Housing Requirements**

4.6 It is noted the housing requirement has changed from the Reg 18 version, as follows:

*Table 4.1: Housing Requirement Changes from Reg 18 to Reg 19 LP version*

| **Previous Requirement** | **New Requirement** |
|---|---|
| 888 homes per annum | 885 homes per annum |
| 15,096 homes over Plan Period | 14,603 homes over Plan period |
| Plan Period 1 April 2020 – 1 April 2036 | Plan Period 01 October 2024 – 31 March 2041 |

4.7 The housing requirement has been reduced by 493 homes over the Plan Period and appears to relate

to the changes to Standard Methodology between 2023 and 2024. In addition, it is noted the Plan Period is now 17 years, rather than the previous 16 years.

4.8 The Interim Sustainability Appraisal (Interim SA, July 2023) identified the “uncapped” figure for Local

Housing Needs would be 1,165 dwellings per annum, much higher than the “capped” standard method figure of 888 per annum at that time. This was considered within the Interim SA at that time, but it was concluded that these higher growth scenarios were not reasonable in light of wider factors.

4.9 This interim position has now been replaced by the Sustainability Appraisal (September 2024) which

now identifies that there is a reasonable case for considering a scenario for housing requirements above Local Housing Need. The Sustainability Appraisal therefore identifies Growth Scenario 3 as the ‘preferred approach’.

4.10 Table 5.2 sets out that this preferred approach would see a total of 14,989 homes over the Plan Period,

which would be an increase in 3% over the figure contained within **Policy SP1.** This Growth Scenario sees more sites within the Green Belt being released, but as smaller sites, with less housing within them (which has been favoured over large areas of Green Belt release to the south-east and north of St Albans).

4.11 We therefore note that the Council has taken account of our previous recommendations that growth

scenarios would need to look at above housing needs level. However, while consideration has been given to whether a higher level of need could be realistically delivered (as required by the PPG Paragraph: 007 Reference ID: 2a-007-20190220), there are some clear indications within the Sustainability Appraisal and outside factors that mean the Council should consider looking beyond just a 3% increase over the Local Housing Need.

4.12 In particular, the Local Housing Needs Assessment (2024) identifies a need for 802 affordable homes per annum, which, when considered against the overall figure within **Policy SP1** of 885 homes per

annum highlights the potential discrepancy with what should actually be delivered within the Plan Period to meet all types of housing need. The Sustainability Appraisal notes this is 'a complex matter', but does not then go into further detail on this. In our view, this does not fully address consideration of this higher need within the overall proposed housing requirement.

4.13 It is considered that the Council should review whether a higher growth option is possible given that the

housing supply position has worsened since the Reg 18 version of the LP was published (2 year supply) and is now at 1.9 years supply. In addition, the latest Housing Delivery Test (HDT, 2022) identified only 55% of homes were delivered in the preceding 3-year period. This is a decrease of 10% compared to the 2021 HDT which was at 65%.

4.14 It is therefore surprising that the housing numbers have been altered for the Broad Locations, including

the site at North East Harpenden. In most cases, the suggested indicative capacities have been reduced. The source of this appears to be the Housing Land Supply, Windfall and Housing Capacity Evidence Paper (September 2024) which sets out that indicative capacities have been based upon 40dph and that in some cases the allocated sites have seen reduced 'site areas' to take account of required infrastructure or constraints to development, which has then had a knock-on impact on capacities. However, it is not clear within the evidence base which specific constraints or infrastructure affects each Broad Location. It is recommended this is made clear within the evidence base as otherwise these reduction in numbers may not be considered "positively prepared", "effective" or "justified".

4.15 It is acknowledged that the housing number provided within **Policy SP1** is an "at least" figure, however

it is recommended the Council has regard to the above observations, as well as the clear message from Government that the Local Plan will need to be immediately reviewed once adopted to take account of the potential housing number changes through the Standard Method changes within the emerging NPPF, particularly in light of the declining housing land supply and HDT within the City and District.

4.16 We therefore highly recommend commitment to the early review of the Local Plan once it is adopted,

and that the Sustainability Appraisal is used more rigorously to look at the higher growth scenarios in more detail to help address future unmet need and help increase housing and affordable housing delivery particularly in light of the expected Standard Method changes through the NPPF.

1. **ii) Other Requirements**

4.17 With regard to the other requirements, we continue to support the requirement that development should be accompanied by the necessary infrastructure to facilitate growth. The continued Reg 19 DLP approach of pursuing larger-scale development, i.e. Broad Locations, will help achieve this, providing the necessary economies of scale to support on-site and, where necessary, off-site provision. As

detailed in Section 7.0, Land at North East Harpenden is a prime example of how a Broad Location can achieve sustainable growth through supporting infrastructure.

4.18 The focus on brownfield land is supported, as this is consistent with the NPPF. However, the altered

wording does not resolve our previous comments on this section at Reg 18, that prioritising this "first" could be misconstrued as progressing brownfield allocations/sites ahead of greenfield allocations/sites. There may be instances where brownfield sites are wholly unsustainable and unfeasible, whereas alternative greenfield sites are more sustainable and make logical places for development. We consider this wording should be reviewed again to ensure this policy is "effective", "positively prepared" and would be "consistent with national policy".

4.19 Para 1.36 of the Reg 19 DLP notes the Spatial Strategy has been shaped by the need to address the Climate Emergency, which 'gives priority' to the larger urban centres which provide a greater range of services and facilities and can reduce the need for travel by private vehicle usage. This reflects the Settlement Hierarchy at Table 1.3 where growth has been focused within Tier 1 (St Albans and Hemel Hempstead), Tier 2 (Harpenden) and Tier 3 (London Colney). The focus of growth within such hierarchies is supported.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

4.15 It is acknowledged that the housing number provided within **Policy SP1** is an "at least" figure, however it is recommended the Council has regard to the above observations, as well as the clear message from Government that the Local Plan will need to be immediately reviewed once adopted to take account of the potential housing number changes through the Standard Method changes within the emerging NPPF, particularly in light of the declining housing land supply and HDT within the City and District.

4.16 We therefore highly recommend commitment to the early review of the Local Plan once it is adopted, and that the Sustainability Appraisal is used more rigorously to look at the higher growth scenarios in more detail to help address future unmet need and help increase housing and affordable housing delivery particularly in light of the expected Standard Method changes through the NPPF.

## 273 - Hallam Land Management and St Albans School

Submission Number: 273 Submission Date: 08/11/24 09:33

Respondent: Company/Organisation: LRM Planning Name: Mr Owen Jones

On Behalf Of Company/Organisation: Hallam Land Management and St Albans School Name:

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

3.1 The Local Plan has continuously promoted St Albans as the pre-eminent settlement of the District since work on the plan commenced. As part of the Regulation 18 response, Hallam and St Albans School acknowledged that the Part 1 of the Settlement Hierarchy Study places St Albans at top of the hierarchy, noting that it scores almost twice as high as Harpenden, which sits second in the tier. They supported the recognition of the role of St Albans and continue to agree that St Albans City itself is a sustainable location and should continue to be the focus for new development in the District.

3.2 The Sustainability Appraisal reiterates this position, stating that “As the district’s primary town there is a clear need to direct a good proportion of growth to St Albans”, with no headline reasons to direct growth away from the city to other locations (page 121 refers).

3.3 In the context of the above, Hallam and St Albans School continue to firmly support the approach of Strategic Policy SP1, where St Albans will “continue to be the pre-eminent focus in the District for housing, employment, services, retail, the evening economy, education and healthcare”.

3.4 Noting the relative performance of St Albans as the principal settlement, the hierarchy in Strategic Policy SP1 that intends to distribute new development by “locating most growth generally within

and adjacent to the larger and most sustainable urban centres”, is also very much supported.

3.5 These policy objectives are entirely consistent with and will contribute towards a sustainable pattern of growth which is the cornerstone of the NPPF (§105).

3.6 Strategic Policy SP1 continues to encourage growth on land in urban areas “and then the Green Belt”, in order to make the most sustainable use of land. In this context, “growth” is understood to mean “new development”. Whilst as a matter of approach the consultation document is right to afford an importance to the use and re-use of land in urban areas, it is clear that future development needs cannot be met by only relying on previously developed land. This is a widely understood characteristic that was acknowledged within the 2014, 2018, and 2023 draft Local Plans, and circumstances are no different at the present time. Therefore, for the city of St Albans to perform the role that Strategic Policy SP1 intends, new development will need to be located adjacent to the existing urban area. Consequently, enlarging the urban area is a legitimate proposition if the overarching principle of a sustainable pattern of development is to be achieved.

3.7 As is explained in the consultation document, St Albans is enclosed by the Green Belt. The designation is tightly drawn and new development will therefore need to be located on land that is presently subject to that designation. Amending the Green Belt is permissible by national policy where exceptional circumstances exist (§140).

3.8 For this reason, the District Council has long understood that the Green Belt constrains the extent to which its existing urban areas are able to grow, and that the designation will need to be amended in order for future development needs to be met in a manner that achieves a sustainable pattern of development. Crucially, as highlighted in the representations to the Regulation 18 version of the Local Plan, Hallam and St Albans School would reiterate that the Sustainability Appraisal notes that there is “a clear strategic case for Green Belt release at St Albans” (para 5.4.34).

3.9 In this context, it is no surprise that the consultation document maintains the approach set out in previous draft Local Plans. Hallam and St Albans School firmly support the principle of amending the Green Belt and the identification of North St Albans in Strategic Policy SP1. This is discussed North St Albans is discussed specifically in Section 6 of these representations.

3.10 Strategic Policy SP1 also identifies the housing requirement for the plan period, and Hallam and St Albans School support the fact that the Council aspires to identify and allocated land for the delivery of at least 14,603 net additional new houses, which equates to 885 dwellings per annum. It is noted that this provision is slightly less than was previously set out in Regulation 18 version of the Local Plan, which intended to identify land for 15,096 net additional new houses (888 per annum), however it is appreciated that this reflects the updated plan period and the standard methodology in the NPPF. The Regulation 18 Local Plan referred to a plan period of 17 years, whilst the Regulation 19 version refers to a 16.5 year plan period. The difference of 493 net new dwellings is therefore understood to reflect the six month reduction of the plan period, rather than being an actual reduction of housing numbers. As such, Hallam and St Albans School continue to support the overall level of housing growth proposed. There are however indicators that suggest a greater amount of new housing should be provided In the District.

6. **Spatial Strategy**

**Policy SP1 (A Spatial Strategy for St Albans District)**

6.1 RPC considers this policy to be **unsound** due it **not being justified, effective or consistent with national policy**. We explain the reasons for concluding this below.

6.2 Strategic Policy SP1 (A Spatial Strategy for St Albans District) is a confusing policy that fails to clearly set out the Spatial Strategy for the District in a coherent manner and is factually incorrect in many places. We make the following general points and then discuss the settlement hierarchy in more detail.

**Key points:**

6.3 Stating that "*The Spatial Strategy positively plans for the future to ensure that by 2041 St Albans District is a great place to live, work and visit*" is effectively just repeating the Vision and is not required and add clutter to an already confusing policy text.

6.4 Stating that "Growth must be supported by the necessary community infrastructure, transport improvements, green spaces and tree planting" appears to be very limited in scope of what SACDC expects to support 'growth' and what communities need. The terminology of using 'growth' is outdated and should instead use and reflect National Policy wording including 'Sustainable Development' and its overarching economic social and environmental objectives as set out in the NPPF.

6.5 Policy SP1 states that "growth will be located to make the most sustainable use of land in urban areas and then the Green Belt" and that "the approach seeks to develop Brownfield Land first".

- Firstly, the policy says nothing about the need for exceptional circumstances to be present before any release of Green Belt through the Local Plan and what exceptional circumstances SACDC purports there to be.
- Secondly, the policy is unclear in terms of differentiating between ‘land in urban areas’ and ‘Brownfield Land’. Not all brownfield land is in urban areas, it can often be located outside of urban areas in the Green Belt. What does SACDC consider to be ‘urban areas’– does this include all settlements or just Tier 1, Tier 2 and Tier 3 settlements for example? It is unclear. This should be clarified, and there should be, ideally, a cascade of preferred location for development, that gives consideration to sustainability according to the settlement hierarchy, Green Belt location, urban area location, and previously developed land (or Brownfield Land).
- Thirdly, it is apparent from the Draft Local Plan Housing Trajectory (Table 3.2) that ‘Hemel Garden Communities’ (Green Belt location), ‘Medium and Small Sites’ (599 homes), are assumed to start delivery in 2029/2030 the same year that ‘Sites Within Urban Settlements’ (HELAA and UCS) and ‘Green Belt – Previously Developed Land’. Furthermore, the contribution of dwellings through allocations in previously developed land is very limited (1,040 homes) when compared to allocations in greenfield sites (9,613 homes), and very brief, with a trajectory between 2-7 years (brownfield sites), instead of 6-12 years (greenfield sites). So, it simply not the case that the Local Plan is planning for development in urban areas and brownfield land first.

6.6 This policy also identifies different thresholds of site allocations, but it does not justify where the type and size of allocations and these thresholds come from and what the definition of broad locations, other broad locations, large, medium and small sites is. A clearer policy wording is required, setting out the spatial strategy and allocation of development per parish/area and

settlement, and it should be clearly visualised for the public and future users of the Local Plan to understand the policy without doubt. Any supporting text should include contextual information, such as the definition of settlement tiers and the size of allocations.

6.7 The measures stated to address the climate emergency do not fully reflect the Local Plan's draft Climate Emergency Policy. For example, it refers to 'layouts' yet this is not in the Climate Emergency Policy. It does not mention biodiversity net gain despite this being in the Climate Emergency Policy.

6.8 It is not necessary to state in the Policy wording that larger settlements provide a more comprehensive range of services etc. as it adds no substance to the policy.

6.9 The last paragraph of Policy SP1 relates to matters that the Local Plan supports, but this long paragraph and its 10 bullet points do not add substance to the spatial strategy, and some are irrelevant to the purpose of the policy. How is the building sustainability standards related to the spatial strategy of the Local Plan? This should be better included in a climate change and sustainable construction policy. Furthermore, the wording of the policy in this section is not strong enough as to be applicable and enforceable: "*The Local Plan supports...*" is not a robust wording of the policy and would lead to its ineffectiveness.

6.10 The Local Plan supports matters such "significant new employment space provision", significantly increasing tree cover..." or "Green Belt compensatory measures", but it should clarify whether these are general aspirations or whether these are expectations that are tied to broad or specific locations and developments. Whilst the Policy SP1 specifically identifies development areas for housing in broad and specific locations, other matters are relegated to mere Local Plan "support". A clearer and more robust policy is needed so this is effective and leads to unambiguous interpretation.

....

6.52 In light of all the above, we are of the view that the Settlement Hierarchy Study (2023) is flawed, overly simplistic and it is not based on robust evidence. Therefore, the study is not an adequate tool to inform the Spatial Strategy of the Draft Local Plan, and it has compromised the spatial strategy. Consequently, **Policy SP1 (Spatial Strategy) is not unsound due to it being ineffective in delivering sustainable development, it is not justified and based on proportionate evidence and it is inconsistent with national policy**.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**SP1**

Policy SP1 states that "growth will be located to make the most sustainable use of land in urban areas and then the Green Belt" and that "the approach seeks to develop Brownfield Land first".

- Firstly, the policy says nothing about the need for exceptional circumstances to be present before any release of Green Belt through the Local Plan and what exceptional circumstances SACDC purports there to be.
- Secondly, the policy is unclear in terms of differentiating between 'land in urban areas' and 'Brownfield Land'. Not all brownfield land is in urban areas, it can often be located outside of urban areas in the Green Belt. What does SACDC consider to be 'urban areas'– does this

include all settlements or just Tier 1, Tier 2 and Tier 3 settlements for example? It is unclear. This should be clarified, and there should be, ideally, a cascade of preferred location for development, that gives consideration to sustainability according to the settlement hierarchy, Green Belt location, urban area location, and previously developed land (or Brownfield Land).

- Thirdly, it is apparent from the Draft Local Plan Housing Trajectory (Table 3.2) that 'Hemel Garden Communities' (Green Belt location), 'Medium and Small Sites' (599 homes), are assumed to start delivery in 2029/2030 the same year that 'Sites Within Urban Settlements' (HELAA and UCS) and 'Green Belt – Previously Developed Land'. Furthermore, the contribution of dwellings through allocations in previously developed land is very limited (1,040 homes) when compared to allocations in greenfield sites (9,613 homes), and very brief, with a trajectory between 2-7 years (brownfield sites), instead of 6-12 years (greenfield sites). So, it simply not the case that the Local Plan is planning for development in urban areas and brownfield land first.

The last paragraph of Policy SP1 relates to matters that the Local Plan supports, but this long paragraph and its 10 bullet points do not add substance to the spatial strategy, and some are irrelevant to the purpose of the policy. How is the building sustainability standards related to the spatial strategy of the Local Plan? This should be better included in a climate change and sustainable construction policy. Furthermore, the wording of the policy in this section is not strong enough as to be applicable and enforceable: "*The Local Plan supports...*" is not a robust wording of the policy and would lead to its ineffectiveness.

This policy also identifies different thresholds of site allocations, but it does not justify where the type and size of allocations and these thresholds come from and what the definition of broad locations, other broad locations, large, medium and small sites is. A clearer policy wording is required, setting out the spatial strategy and allocation of development per parish/area and settlement, and it should be clearly visualised for the public and future users of the Local Plan to understand the policy without doubt. Any supporting text should include contextual information, such as the definition of settlement tiers and the size of allocations.

**Settlement Hierarchy Study**

We are of the view that the Settlement Hierarchy Study (2023) is flawed, overly simplistic and it is not based on robust evidence. Therefore, the study is not an adequate tool to inform the Spatial Strategy of the Draft Local Plan, and it has compromised the spatial strategy. Consequently, **Policy SP1 (Spatial Strategy) is not unsound due to it being ineffective in delivering sustainable development, it is not justified and based on proportionate evidence and it is inconsistent with national policy**.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

### 288 - Chris Berry

Submission Number: 288 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: CPRE Hertfordshire Name: Chris Berry

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**The Draft Local Plan is neither legally compliant nor sound, due to its inadequate treatment of the Green Belt**

The treatment of the Green Belt in the Draft Local Plan is inadequate to the extent that it jeopardises the soundness of the Local Plan. For a Local Planning Authority where over 80% of the total land area is covered by a statutory designation affecting future development, the omission of appropriate policy and proposals renders the Local Plan ineffective.

We note the justification provided by the Sustainability Appraisal for the policy options relating to the classification and allocations of sites and locations for development. However, policies relating to the Green Belt are limited to guidance relating to development outcomes in all cases; omitting any positive treatment of the countryside and associated rural activities which may constrain and influence development form and function.

In failing to address the implications of the five purposes of the Green Belt as they relate to the SACD area, the Council fails to plan adequately for its protection and the contribution that it can make to future development options. Paragraph 180 of the National Planning Policy Framework (NPPF) specifies the need to contribute and enhance the local environment by indicating a range of policy options.

Draft Local Plan policies relate only to development within the Green Belt and not its protection and enhancement as required by the NPPF and noted in the Local Plan Objectives. The Draft Local Plan states that the Spatial Strategy is effectively required to deliver housing figures provided by the Standard Method which in turn requires the use of Green Belt.

This is a fundamental misinterpretation of national Green Belt policy and challenge to the soundness of the Draft Local Plan. The Draft Local Plan refers to legal requirements for housing and employment growth (paragraph 3.11) which ignores the Council's discretion to determine housing targets based on up to date information and national policy guidance, as provided in Paragraph 11b) and footnote 7 of the NPPF.

Paragraph 3.16 of the Draft Local Plan also implies, without evidence, that Green Belt protection inhibits development in sustainable locations. This assertion fails to recognise that development is likely to be more sustainable in urban areas than peripheral locations distant from town centres as proposed for Hemel Hempstead and elsewhere.

**The Draft Local Plan is neither legally compliant nor sound due to the omission of critical national policy guidance on constraints re housing targets.**

The application of policy constraints to the formulation of housing targets, included at para 3.16 in the 2023 Regulation 18 Draft Local Plan, has been removed from the Reg 19 version, specifically the reference to paragraph 11 (which includes footnote 7) of the National Planning Policy Framework (NPPF) which identifies designated land including Green Belt and National Landscapes (formerly Areas of Outstanding Natural Beauty (AONB)) as comprising policy constraints relating to the formulation of housing targets for Local Plans.

This jeopardises the soundness of the Draft Local Plan, together with further inconsistences in the treatment of housing figures and their implications. Notwithstanding the present consideration of amendments to the NPPF and associated proposed planning reforms by the Government, the critical requirements of the NPPF are increasingly over-ridden by Local Planning Authorities, in both local plan-making and decision-making on planning applications, and by Planning Inspectors in planning inquiries and appeals decisions.

**Inadequate treatment of brownfield / previously developed land**

There is entirely inadequate treatment of "brownfield" and previously developed land as a potential contribution to housing provision as a significant topic for consideration in the Draft Local Plan. Notwithstanding the welcome identification of circa 60 sites for development within the built-up area, and the brief mention of "Brownfield…." in Policy SP1, there is no further consideration of this crucial element of development potential for a Local Planning Authority whose principal land designation is protected Green Belt.

The lack of housing capacity assessments and out of date information on brownfield land as presented in the Brownfield Register comprises a significant omission in the Local Plan affecting its soundness. Specifically, para 3.19 states that the Council must "make as much use as possible of suitable PDL sites and underutilised land" but this is self-evidently not what is proposed in the Local Plan, as the redevelopment of employment sites and tall buildings are to be resisted.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Draft Local Plan should be re-structured to consider the role and function of the largest land use designation in the SACD i.e. the London Metropolitan Green Belt in appropriate detail. The lack of adequate consideration of the implications of this designation for physical development in the future renders the Local Plan unsound.

The total local housing need figure in policies SP1 and SP3 should be treated as a starting point and then be subject to reduction to reflect the application of Green Belt constraints as required by para 11(b) footnote 7 of the NPPF.

The Plan should include reference to policy constraints relating to the formulation of housing targets as set out in paragraph 11 (which includes footnote 7) of the National Planning Policy Framework (NPPF), as previously referenced in the Reg 18 Draft Local Plan para 3.16.

The total local housing need figure in policies SP1 and SP3 should be treated as a starting point and then be subject to reduction to reflect the application of Green Belt constraints as required by para 11(b) footnote 7 of the NPPF.

An updated and more comprehensive Brownfield Register would provide further information for the identification of opportunities for development sites throughout the SACD area. This issue was raised at Regulation 18 stage and has not been adequately considered.

Area capacity studies would provide relevant information for the assessment of development potential throughout the SACD area. Their omission jeopardises the soundness of the Draft Local Plan.

## 290 - BRiCS Development

Submission Number: 290 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: ET Planning Name: Tom Ryan

On Behalf Of Company/Organisation: C/O ET Planning Name: BRiCS Development

Comment Number: 2

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Strategic Policy SP1

BRiCS' main concern with the Local Plan as a whole, relates to the provision of housing. Firstly, the level of housing planned for does not provide sufficient contingency, nor does it seek to address unmet need or positively plan for previous years of significant under-delivery. In addition, SACDC has adopted an arbitrary approach to housing growth across the District as a whole, with housing growth not provided per settlement area.

It is evident that the overall housing requirement has decreased from the Regulation 18 SALP from 15,096 (888 dpa) to 14,603 (885 dpa) net additional dwellings (a decrease of 493 homes over the Plan period), with the period for delivery confirmed as 1 October 2024 to 31 March 2041. There has however been no evidence or justification published for this decrease in housing numbers across the Plan period.

In addition, in light of the new consultation draft NPPF (July 2024), it is clear that the SALP has not been positively prepared in the context of 75% uplift proposed by the draft Standard Method. The recently published 'outcome of the proposed revised method' (30 July 2024) indicates that the proposed Standard Method for SACDC will be 1,544 dpa (659 dpa higher than the proposed SALP Regulation 19 figure). This would equate to a housing need of 25,475 dwellings across the 16.5-year Plan period horizon (an increase of 10,673 dwellings over the whole Plan period compared with the draft SALP).

Although, the consultation draft NPPF (July 2024) hasn't come into effect yet (anticipated for December 2024), it should still be given material weight when determining the soundness of the emerging SALP. In particular, the transitional arrangements set out within paragraph 227 of the consultation draft NPPF (July 2024) confirm that:

*"Where paragraph 226 c) applies [in the case of the SALP assuming the Plan is submitted for Examination within one month from the publication of the new NPPF], local plans that reach adoption with an annual housing requirement that is more than 200 dwellings lower than the relevant published Local Housing Need figure will be expected to commence plan-making in the new plan-making system at the earliest opportunity to address the shortfall in housing need."*

Firstly, we question whether it is realistic for SACDC to submit their Plan for Examination within one month from the publication of the new NPPF. In which case, the SALP would need to make additional allocations to account for the 75% uplift proposed by the draft Standard Method. Secondly, even if the transitional arrangements are met, SACDC will be required to review the proposed SALP *"at earliest opportunity to address the shortfall in housing need"* between the current Standard Method and proposed Standard Method housing need figures.

Given SACDC's track record of being slow to review their Local Plan, with the current Local Plan more than 30 years old, SACDC should be planning for this uplifted need now, rather than deferring this to a future Plan period.

In addition, SACDC's latest Authority Monitoring Report (2023) confirms that the Council can only demonstrate 1.7 years of deliverable housing land supply against their four-year requirement. The housing need shortfall is therefore exacerbated when compared to the additional 10,673 dwellings required by the Standard Method over the Plan period as a whole.

It is therefore necessary for SACDC to begin planning for additional housing growth in order to demonstrate a deliverable supply of housing sites, whether or not they meet the transitional arrangements of the draft NPPF (July 2024). Land
West of Lamer Lane should therefore be strongly considered for allocation for the reasons set out in these representations.

**291 - SEGRO (Radlett) Limited**

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

2.1 Strategic Policy SP1: A Spatial Strategy for St Albans District states that *'growth must be supported by the necessary community infrastructure, transport improvements, green spaces and tree planting'*. The Local Plan also supports *'significant new employment space provision'*and *'green belt compensatory improvements including significant new country parks'*.

2.2 SEGRO (Radlett) Limited support the spatial strategy of the Local Plan, particularly the provision of new employment space. The SRFI scheme will provide significant new employment space associated with the rail terminal comprising up to 331,655 sqm of logistics floorspace (Class B8 use with ancillary Class B1/B2 uses). To note, Use Class B1 is now classified as Use Class E in accordance with the updated The Town and Country Planning (Use Classes) (Amendment) (England) Regulations 2020 which came into force on the 1st of September 2020.

2.3 Policy SP1 states that Green Belt compensatory improvements include significant new country parks, better access to the countryside via new and improved rights of way, and new and improved habitat connectivity. As part of Areas 3 to 8 of the SRFI scheme, a Country Park comprising 247 hectares of land with new areas of woodland and managed countryside will be provided. Off-site footpath, bridleway and cycleway improvements will also be provided in the south and west of the site. Therefore, SEGRO (Radlett) Limited support the obligation for green belt compensatory improvements to include significant new country parks and better access to countryside and habitat connectivity which are already reflected in and are part of the approved SRFI scheme.

2.4 Additionally, growth will be supported through the delivery of the SRFI scheme which will provide the necessary community infrastructure, transport improvements, green spaces and tree planting associated with the development. This includes the provision of an intermodal terminal, Park Street/Frogmore Relief Road, a landscape setting with perimeter landscaped mounds, and a Country Park for public access to open land and community forest. Area 2 of the Development Site will also be similar in appearance and character to the Country Park with landscape mounds, ponds for great crested newts and green space adjacent to the development platform accommodating the rail terminal and associated B8 floorspace. Additionally, more than 86 hectares of land, which comprises 50% of the Development Site, will be landscaped.

2.5 Policy SP1 supports development which will address the Climate Emergency with regard to sustainable movement that reduces reliance on private car use. The SRFI will assist in a modal shift in distribution transport from road to rail, which in turn will reduce carbon emissions and can help to meet national net zero and decarbonisation targets.

2.6 Overall, Policy SP1 is considered to be positively prepared and provides a strategy which seeks to meet the area's objectively assessed need and is consistent with achieving sustainable development.

2.7 The policy is also justified with an appropriate strategy, effective through its deliverability over the plan period, and consistent with national policy. Therefore, SEGRO (Radlett) Limited consider Strategic Policy SP1 to be in accordance with paragraph 35 of the National Planning Policy Framework (NPPF) 2021 and the updated version of the NPPF published on 20th December 2023.

### 292 - Leverstock Green Village Association

Submission Number: 292 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Troy Hayes

On Behalf Of Company/Organisation: Leverstock Green Village Association Name: Leverstock Green Village Association

Comment Number: 8

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

1.12. For the purposes of clarification, it is the Association's considered view that the Local Plan is unsound, and the Council has failed to discharge its Duty to Cooperate. The proposed scale and distribution of growth has not been justified, it has not been positively prepared, and the policies are ineffective. LGVA considers that the delivery of growth at the Hemel Garden Communities has not been demonstrated through technical evidence including the Council's Green Belt Review, Infrastructure Delivery Plan (IDP), Viability evidence and Transport evidence.

...

4. **Sustainability Appraisal**

4.1. We have a number of points regarding the Sustainability Appraisal (SA) which are in line with those made by Redbourn Parish Council. The SA is clearly These are summarised below:

...

- As we set out in our response to Policy LG2 below there are serious concerns regarding the existing air and noise pollution in the area including east of Hemel. The Sustainability Appraisal is very dismissive of this serious threat to human health and what the potential impact is of proposing development closer to the main source of the air and noise pollution – the M1. The SA states the following about this topic which demonstrates that the SA and the Local Plan has not really taken this key matter into consideration writing it off saying that air quality concerns are decreasing over time and focusing on the modal shift assumptions in the transport evidence.

- *"Hemel Garden Communities – there are two AQMAs at Hemel Hempstead, but these are relatively distant from HGC (associated with north-south road corridors close to the western edge of the town). HGC is considered to be associated with a considerable opportunity in respect of masterplanning in support of trip internalisation and modal shift away from the private car (albeit this remains a focus of ongoing work), plus the A414 strategy / HERT represents a considerable opportunity to address air quality hotspots across the sub-region (for example, Hertford is constrained). However, benefits would be felt in the long term, and air quality concerns are decreasing nationally over time (albeit concerns will remain, particularly in respect of particulates from roads, brakes and tiers given the weight of EVs)."*(Paragraph 9.3.2)
- *"In conclusion, a broadly neutral effect is predicted on the baseline, as per the conclusion in 2023. There is little reason to suggest that the proposed growth strategy will conflict with air quality objectives, particularly noting the location of AQMAs within the District and in surrounding areas. HGC is supported, but there is inherently an element of uncertainty and risk around achieving the high levels of modal shift (away from use of the private car) that are being assumed for the purposes of traffic modelling*." (Paragraph 9.3.4)

5. **Overall Timing and Housing Needs**

5.1. LGVA is concerned that the Regulation 19 Local Plan has been prepared in haste in order to avoid higher housing need / requirements through the proposed NPPF consultation.

5.2. We question whether SACDC has used the South West Hertfordshire Local Housing Needs Assessment (September 2020) to arrive at its housing need figure? This study was undertaken four years ago (2020) which is a considerable time ago and should be considered by SACDC to be an out-of-date evidence base document. Policy HOU2 (Affordable Housing) refers to a Local Housing Needs Assessment (LHNA) dated 2019 however this does not appear in the Draft Local Plan Evidence Base on SACDC's website

5.3. As we set out in our representations the Local Plan and particularly the Hemel Garden Communities allocations are not backed by sufficient or sound evidence to justify their inclusion in the Plan. Given that HGC is by far the most strategic development in the Local Plan and requires a very significant proposed release of Green Belt, the Local Plan should not be rushed through the way it has. This will only lead to the Local Plan either the Plan being at Examination for an extended period of time due to it requiring quite fundamental modifications to make it sound or it will be found unsound with no potential for its fundamental flaws to be modified leading to its withdrawal and SACDC will need to go back to the start of the process once again.

...

7. **Policy SP1 (A Spatial Strategy for St Albans District)**
   **Policy LG2 (Support for Transformation of Hemel Hempstead) Site Allocation H4 (East Hemel Hempstead (South)**
   **Policy LG3 (Hemel Garden Communities Growth Areas Place Principles)**
   **Policy HOU6 (Gypsies, Travellers and Travelling Showpeople) Policy TRA2 (Major Transport Schemes)**

...

**Hemel Garden Communities**

7.2. We recognise the vision of HGC, but we are concerned there is no comprehensive infrastructure and transport plan to support the proposals. We also have misgivings that such a large-scale project involving two local authorities and multiple other agencies over such a protracted period is deliverable.

7.3. We appreciate the planning is at an early stage, but the task of coordinating all aspects of the HGC will be a major challenge. The timely delivery of infrastructure and particularly roads will be essential.

...

7.5. As already set out in relation to the Sustainability Appraisal the matter of noise and air quality have not been properly assessed as part of the plan making process. The above gross housing density calculations do not take account of the other parts of the site that will need to be 'netted off 'due to other constraints with a key constraint being the M1 which clearly has an air and noise pollution factor that requires considerable mitigation. We have reviewed Defra's 2019 Road Traffic Noise Levels mapping to see what this means for the Local Plan Area given the heavy traffic and congestion in the area including the presence of the M1.

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 6***

*Figure 6: Defra (2019) Road Traffic Noise Levels Lden (day-evening-night) 24 hour annual average noise level in decibels with weightings applied for the evening and night periods Accessed:* http://www.extrium.co.uk/noiseviewer.html

***See attached 'Reg 19 Leverstock Green Village Association vf' for Figure 7***

*Figure 7: Defra (2019) Road Traffic Noise Levels Lden (day-evening-night) 24 hour annual average noise level in decibels with weightings applied for the evening and night periods. Source:* http://www.extrium.co.uk/noiseviewer.html

7.6. As one can clearly see from the above mapping the noise levels east of Hemel do not appear to be safe and high density housing and employment in the area is going to further exacerbate this issue. It is very difficult to see how mitigation measures could greatly impact the noise and air pollution from the M1. In any case this area appears to be an unsafe and unsuitable location to allocate strategic housing that is meant to be 'sustainable' when its future residents will be exposed to unhealthy levels of pollution.

7.7. As a consequence of these strategic issues alone, as outlined above, the number of residential units in the H4 area should be drastically reduced, probably to less than 1,000 dwellings.

7.8. The Local Plan Part B Allocation for site H4 includes a number of development requirements which we list below. We seriously question how all of these requirements can fit onto a site when its strategic constraints are considered. We list a number of these requirements below:

- SANG Requirements
- BNG Requirements (aims to exceed 10% minimum target)
- High quality design and buffer zones to mitigate adverse impacts from motorway noise and air pollution and address the Buncefield oil depot and pipelines
- There is a major surface water flow path across the centre of the broad location, and three associated smaller flow paths
- Three extra-care facilities comprising of 70-80 self-contained units in each facility, two 70-80 bed nursing homes and 9 supported living units for people with disabilities.
- One new 3FE and one new 2FE primary schools
- 15-20 pitches for Gypsy and Travellers using best practice on location and design
- Land will be safeguarded for access improvements associated with Junction 8 of the M1 motorway, in case it is required to come forward for junction improvements
- The layout and design of development should minimise any harm to the setting and significance of listed buildings
- Recreation space and other community facilities
- Take appropriate account of these Environmental Constraints: Source Protection Zone (SPZ) 1; Bedrock Aquifer.

7.9. Whilst one could suggest that it will 'all be solved' in the masterplanning work, this is setting the Local Plan up for failure and the delivery of 'over development' on previous Green Belt land.

7.10. Furthermore, LGVA has serious doubts about the sound planning of infrastructure of HGC in terms of SACDC and on cross boundary infrastructure with neighbouring authorities. The Infrastructure Delivery Plan, Housing Trajectory and Viability Evidence provide us with no confidence that there is a coherent and sound plan for the coordination and delivery of the infrastructure to deliver the HGC and the quality of place-making set out in Policy LG3 (Hemel Garden Communities Growth Area Place Principles).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

For the purposes of clarification, it is the Association's considered view that the Local Plan is unsound, and the Council has failed to discharge its Duty to Cooperate.

The proposed scale and distribution of growth has not been justified, it has not been positively prepared, and the policies are ineffective. LGVA considers that the delivery of growth at the Hemel Garden Communities has not been demonstrated through technical evidence including the Council's Green Belt Review, Infrastructure Delivery Plan (IDP), Viability evidence and Transport evidence.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Reg 19 Leverstock Green Village Association vf_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Leverstock Green Village Association (LGVA) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Hemel Hempstead LGVA considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**303 - Phil Escritt**

Submission Number: 303 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Open Space Society Name: Phil Escritt

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Consultation Need to explicitly refer to the HCC Rights of Way improvement Plan (ROWIP)**

The Open Spaces Society welcomes the emphasis in strategic policy SP1 - A Spatial Strategy for St Albans District, on the need for better accessibility by walking and cycling, better access to the countryside via new and improved rights of way and significantly improved infrastructure for walking and cycling. We also welcome the way in which these strategic requirements are reflected in subsequent policies.

We note the emphasis in policies LG1, LG4, SP8 and TRA1, and in the individual site requirements in Part B, on the Local Cycling and Walking Infrastructure Plan (LCWIP) as a vehicle for specifying detailed infrastructure requirements. The St Albans District LCWIP is almost exclusively concerned with the infrastructure required for utility journeys e.g. to shops, schools, transport hubs and places of work and leisure activity.

It does not cover the paths needed to enable the public to access the countryside and the existing rights of way network in order to walk and cycle as leisure activities in their own right. It does not cover the infrastructure needs of equestrians at all. It does not therefore meet the requirement in policy SP1 for better access to the country and does not adequately support the needs of policy SP13, Health and Wellbeing.

In addition the current edition of the LCWIP concentrates largely on existing urban areas, particularly central St Albans. It does not cover all of the allocated sites or many of the requirements of the smaller settlements in the district. In all these respects the plan is neither proportionate nor effective.

These gaps would be substantially filled by reference to the Herts County Council's Rights of Way improvement Plan (ROWIP). The ROWIP is a statutory requirement of the Countryside and Right of Way Act (CROW) 2000. The Hertfordshire ROWIP is in two parts. The first part, the policy document, is an assessment of the current situation and a statement of action. It is supplemented by a database of "suggestions" for improvements. This database is a living document which is added to over time based on input from councillors, officers and members of the public.

The St Albans Access Forum which comprises representatives of walking, cycling and horse riding organisations has systematically reviewed the situation in the district's parishes and submitted suggestions which have been included in the ROWIP database. The ROWIP suggestions now cover a large proportion of the selected sites in this plan.

The HCC ROWIP is a daughter document of the Local Transport Plan LTP4 and is therefore implicitly covered by paragraph a) of strategic policy SP8, Transport Strategy which requires alignment with the HCC "Local Transport Plan (LTP) and other evidence and supporting documents, as relevant."

The Local Plan will be made more effective and proportionate by explicitly referencing the ROWIP in the following policies.

- Policy LG1 – Broad Locations. In paragraph l) after "LCWIP" add "and ROWIP"
- Policy LG4 – Large, Medium and Small Sites. In paragraph j) after "LCWIP" add "and ROWIP"
- Policy SP8 – Transport Strategy. In paragraph a) after "supporting documents as relevant" add "e.g the ROWIP"
- Policy TRA1 – Transport Considerations for New Development. In paragraph b) sub paragraph x) after "LCWIP" add "and ROWIP"

The Society strongly recommends that the district council should adopt these changes.

**304 - EDIT Land Ltd**

Submission Number: 304 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land to the south of Burydell Lane, Park Street” have been discounted incorrectly.

**Representations**

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

The Reg. 18 Draft Local Plan includes planning policies relating to various topics, which would become the principal consideration for the decision maker when determining planning applications.

EDIT Lands has not provided comment on a number of policies and advise which they are commenting on in the list below, but reserves the right to comment on others in the future. However, SADC should consider whether all the policies as drafted are useful and necessary for decision making, and do not just repeat that which is already stated in the National Planning Policy Framework (NPPF), Planning Practice Guidance or legislation. Policies should also be unambiguous, clear and concise, without being overly onerous or stifle innovation or ambition.

EDIT Lands main concern with the Local Plan, as a whole, is the weak approach to the provision of much needed housing. Firstly, the level of housing planned for does not seek to address housing need adequately or provide any contingency, nor does it seek to address unmet need or positively plan for previous years of significant under-delivery.

Furthermore, the level of housing which is proposed as windfall, is unsound. 20% of the total housing supply to come forward on sites which do not have allocations, nor are formally identified is not positively prepared and is a huge outlier compared to neighbouring authorities. We consider the proportion of windfall to be wholly inappropriate given the borough's historic poor delivery and acute housing need.

It is also perverse for SADC to suggest that all brownfield sites have been exhausted to necessitate Green Belt release, whilst anticipating that such a high number will come forward via the windfall process. In addition, the Local Plan is heavily reliant on the delivery of a small number of broad growth areas and strategic extensions, namely the Hemel Garden Community which is allocated for net. 5,500 dwellings and 4,281 across the other strategic development sites which are subject to challenging land assembly and infrastructure delivery requirements which will constrain delivery of housing units within the early periods of the Local Plan. St Albans have acknowledged this situation in the reg.19 draft Local Plan where they are now asserting that only 4,300 dwellings will be delivered on the HGC sites within the LP period, a reduction of 450 dwellings from the LP trajectory and 1200 from the wider site allocation. Across all allocated sites within the borough, the council has lost net. 971 dwellings between Reg.18 and Reg.19 stage. There is no explanation, or justification on how the shortfall in housing delivery is accounted for within the revised housing trajectory, or local plan housing target.

The housing trajectory places significant reliance on these strategic sites without due consideration to implications of these strategic sites not being delivered or brought online in line with the housing trajectory.

The emerging Local Plan is also not prepared positively as it fails to make any consideration to the need for natural growth (and deliverable) within the 'washed over villages' within the green belt, with no consideration paid in detail to areas for release from the green belt in these locations. As outlined in Section 3 of this document our client challenges the methodology which has been applied in the green belt review in light of a failure to apply a macro level analysis to the green belt parcels.

Furthermore the draft Local Plan fails to make provision for custom build and self-building housing typologies despite a clear need being identified in the National Planning Policy Framework no recognition is made to the contribution this typology makes to meeting established demand. We understand that there is a need locally for such housing and failure to plan for such housing, is not positive.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

SP1: A Spatial Strategy for St Albans District

SP3 — Land and the Green Belt

HOU 1- Housing Mix

HOU 2 — Affordable Housing

SP2 — Responding to the Climate Emergency

NEB 6 - Biodiversity and Biodiversity Net Gain — Comment

LG5 — Green Belt — Object

In summary, EDIT Land considers the plan fails on Paragraph 35 of the NPPF, and is fundamentally unsound. Reasons why the plan is not positively prepared and deliverable is discussed in this representation, yet is summarised as below (yet not limited to):

The baseline housing need figures cited in Table 3.2 and Policy SP1 and SP3 do not appear to be correct and directly contradict the housing need figures published in the AMR 2022, equating to a **shortfall of between 2,271 dwellings.**

**Level of housing proposed (Standard Method) does not allow for contingency** and is therefore not robust or positively prepared;

**Lack of recent delivery, 5YHLS,** and lack of contingency warrant a higher housing requirement;

**Level of windfall sites anticipated is unachievable and speculative,** most sites need to be formally allocated to be sure the level of housing proposed is achievable.

**Green Belt Assessment is flawed due to it not being fine-grain,** with no consideration to the need for natural growth of the washed over settlements within the green belt, which has been deemed to be unsound in the case of the Uttlesford BC Local Plan examination;

Further sites should therefore be **allocated to account for excessive windfall provision and over reliance on a small number of strategic development sites.** Reasonable alternative sites, such as Land at Burydell Lane, Park Street have been **discounted and assessed incorrectly;**

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

EDIT Land suggest that these significant changes are made to the emerging Local Plan, most notably:

Greater number of sites allocated, including allocation of a broader range of medium and large size green belt sites within the borough to provide contingency within the early stages of the Local Plan process.

Green Belt Review to review smaller parcels of land such as Land at Burydell Lane, Park Street

Less reliance on speculative windfall sites replaced with a mixture of housing allocations; and

Need for further Green Belt release to accommodate for the objectively assessed need (including Land at Burydell Lane, Park Street ) to ensure the plan is positively prepared and ultimately sound in accordance with NPPF paragraph 35;

**306 - St ALbans and District Footpaths Society**

Submission Number: 306 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: St ALbans and District Footpaths Society Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

St Albans and District Footpaths Society supports the provision, preservation and protection of public rights of way over footpaths in St Albans and adjoining areas. It also aims to preserve and enhance the beauty of the countryside for the benefit of the public.

We welcome the recognition in the Local Plan of the importance of enabling public access to the countryside. We support its commitment to improve the need for larger settlements to provide better accessibility and connectivity by walking, cycling and public transport (SP1).

And (also in SP1) its support for better access to the countryside via new and improved rights of way and improved infrastructure for walking, cycling and public transport).

We have seen the submission by the Open Spaces Society (OSS) and agree with their comments. In particular, we think it would strengthen the Plan if it explicitly references the Hertfordshire County Council's Rights of Way Improvement Plan in the policies set out by the OSS in their submission. We also support their view that new footpaths should be designated as public rights of way in order to ensure permanent public access.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

### 314 - Mrs Susan Taylor

Submission Number: 314 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Mrs Susan Taylor

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I'm deeply concerned about the amount of greenbelt around Park Street going to development. We know the monstrous SRFI will have a significant impact on traffic levels on the A414, A405 and local roads in the area.

I'm staggered that you have allowed the greenbelt opposite the BP garage on Watling Street, adjacent to Park Street roundabout, to go to housing when the queues onto the roundabout from Park Street can stretch beyond Park Street bridge in the rush hours and school run time. Not only is it dangerous as locals will have to contend with thousands of extra HGV's and vehicles from the SRFI descending onto the roundabout on the A414, there'll be more vehicles entering and exiting the site opposite the BP garage that could have terrible consequences for vehicles entering and exiting Park Street.

I also see land is now up for auction alongside the A405 approaching Tippendell Lane roundabout, which is again, dangerous for vehicles entering and exiting the site. The queues on Tippendell Lane can already stretch back to Penn Road.

The whole area is lacking in road infrastructure to support this huge increase in traffic movements.

With possible housing developments in Chiswell Green and London Colney our roads will become gridlocked with all the burden on local roads.

Why is so much greenbelt going to inappropriately located developments?

## 315 - Bloor Homes and Department of Health & Social Care

Submission Number: 315 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Sarah Hamilton-Foyn

On Behalf Of Company/Organisation: Bloor Homes and Department of Health & Social Care Name:

Comment Number: 4

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**Strategic Policy SP1: A Spatial Strategy for St Albans**

Policy SP1 is in part supported although the housing provision provides the minimum housing need, it does not address the unmet needs of neighbouring authorities and given the application of a stepped housing trajectory it does not seek to significantly boost housing supply.

The NPPF clearly articulates the Governments objective that Local Plans should provide a framework to significantly boost housing supply, using the figure provided by the LHN Standard Method as a minimum.

There are some key factors which should be noted in St Albans DC:

- In 2021, the majority of households own their home either outright or with a mortgage. However, between 2011 and 2023, there has been a decline in the proportion of households that own their own home outright or with a mortgage and an increase in the proportion of households that are renting.

- Between 2013 and 2023, the median affordability ratio in St Albans increased from 13.92 to 17.61. The affordability ratio in the LPA is currently above the ratio in the East of England (9.76) and England and Wales (8.14).
- change in dwelling stock between 2011 and 2021 across all SW Herts local

authorities. In St Albans, the dwelling stock increased from 57,891 to 62,022, a rise of 6.7%. This increase was below the increase seen in the whole SW Herts Housing Market Area (HMA) which saw dwelling stock increase by 7.3%, the East of England where there was an increase of 8.3% and England where dwelling stock increased by 7.8%

- Between 2001/02 and 2022/23, the average net additional dwellings per annum in St Albans was 367 dpa. This was below the standard method housing need figure set for St Albans (885). The number of net additional dwellings delivered in St Albans over more recent years has remained well below this target.
- In terms of population, between 2013 and 2023, the population of St Albans increased at a slower rate than regional and national comparators with the majority of this increase accounted for by an increase in people aged 65 and over. This trend of an ageing population in projected to continue between 2024 and 2041, with the number of people aged 65 and over projected to increase by 39.1% in this time.
- As of 2022, there were around 65,000 jobs in St Albans. This is a decrease of 16.7% since 2015.
- As of August 2024, the claimant count rate in St Albans was 2.6% which was below the rate in the East of England (3.4%) and England (4.3%).

Paragraph 61 of the NPPF states that "

"***To determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance. The outcome of the standard method is an advisory starting-point for establishing a housing requirement for the area (see paragraph 67 below). There may be exceptional circumstances, including relating to the particular demographic characteristics of an area which justify an alternative approach to assessing housing need; in which case the alternative approach should also reflect current and future demographic trends and market signals. In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for.*"**(my emphasis)

The National Planning Practice Guidance (PPG) provides guidance upon the interpretation of the NPPF. It currently sets a four-stage process to identifying the LHN for an area.

The current minimum local housing need for St Albans based on 2023 affordability ratios is 885 dwellings per annum (dpa), this equates to 14,603 dwellings over the plan period (1st October 2024 to 31st March 2041). In accordance with the NPPF, the 885dpa target should be met, as a minimum, in St Albans, unless exceptional circumstances dictate otherwise. The figure of 14,603 dwellings is as a result of the cap being applied.

Under the current NPPF and PPG the cap is not intended to be a permanent fixture of the LHN calculation as it is not considered a true reflection of the need within an area. The National Planning Practice Guidance identifies that:

*"**The cap reduces the minimum number generated by the standard method but does not reduce housing need itself. Therefore, strategic policies adopted with a cap applied may require an early review and updating to ensure that any housing need above the capped level is planned for as soon as is reasonably possible.***

***Where the minimum annual local housing need figure is subject to a cap, consideration can still be given to whether a higher level of need could realistically be delivered. This may help prevent authorities from having to undertake an early review of the relevant policies."***(ID 2a-007-20190220, our emphasis).

**Removal of the cap significantly increases the housing need. In the case of SADC, the uncapped figure is 1,169 dwellings per annum (Table 5.2 South West Herts LHNA March 2024). This is 284dpa greater than the capped figure and in accordance with the PPG represents the true need as calculated via the standard method.**

Whilst it is noted that in the proposed reforms to the NPPF and other changes to the planning system (July 2024) the proposed changes to the SM remove the cap. "***the new standard method does not have a cap applied to limit the level of increase for individual authorities. Under the current method, numbers are capped at 40% above either the previous local plan figure or the projection-derived baseline. To significantly boost the supply of homes and address the past undersupply as quickly as possible, a significant change of approach is needed. An artificial cap of the levels of housing need does not align with these ambitions. In no longer applying a cap, the resultant housing need is the level of need that authorities should be planning to release land for, according to their specific circumstances***." (paragraph 17 of the Proposed reforms to the National Planning Policy Framework and other changes to the planning system – July 2024).

**Under the proposed Standard Method, the housing need for St Albans DC increase to 1,544 dwellings per annum.**

However, it is noted that the intention of the Council it progress the SADC LP based upon the current NPPF (December 2023) and the current SM, therefore the reference to the PPG above is relevant in terms of the uncapped figure. The Council assume that they will fulfil paragraph 226 c for the purposes of transition i.e. "*the local plan is or has been submitted for examination under Reg 22 on or before the publication date of the NPPF plus one month*."

If the Council pursues the current plan to adoption, it will in accordance with the currently proposed transition arrangements (paragraph 227) with an annual housing requirement that is more than 200 dwellings lower than the relevant published Local Housing Need figure and will therefore be expected to commence plan-making in the new plan-making system at the earliest opportunity to address the shortfall in housing need.

In this context we would suggest that the plan needs to include a policy for the review of the plan with trigger mechanisms to ensure that an early review does take place. The adopted Bedford Local Plan 2030 includes such a Policy - Policy 1.

Paragraph 67 of the NPPF provides examples of circumstances where a housing

requirement figure may be greater than the identified LHN. This includes, but is not limited to:

- provision for neighbouring areas,
- reflects growth ambitions linked to economic development, or
- infrastructure investment.

These examples are replicated and expanded upon within the PPG (ID: 2a-010-20201216). Other situations identified within the PPG include previous levels of housing delivery in an area, or previous assessments of need (such as a recently produced SHMA). The PPG also notes (ID: 2a-024-20190220) that:

"...***An increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes."***

Both the NPPF and PPG identify that the local housing need calculated via the standard method is a minimum requirement. Housing requirements set below the minimum requirement will require exceptional circumstances to be demonstrated. The PPG (ID: 2a010-20201216 and 67-008-20190722) also identifies a non-exhaustive list of instances where the minimum requirement should be exceeded. These include:

- Growth strategies for the area that are likely to be deliverable, for example where funding is in place to promote and facilitate additional growth (e.g., Housing Deals).
- Strategic infrastructure improvements that are likely to drive an increase in the homes needed locally.

- An authority agreeing to take on unmet need from neighbouring authorities, as set out in a statement of common ground.
- Past levels of delivery or previous assessments of need; or
- To assist in meeting the need for affordable housing

The PPG (2a-024) identifies that where an increase in the overall figure could help to meet affordable housing needs, consideration will need to be given to increasing the housing requirement.

Both the NPPF and PPG are, therefore, clear that the LHN calculated via the standard method is the advisory minimum housing requirement for an area.

Therefore, the LHN calculated using the standard method represents the minimum advisory starting point for identifying the housing requirement for St Albans providing this does not conflict with other policies within the NPPF.

The Standard Method identifies a minimum annual housing need figure, it does not produce a housing requirement. As stated in the NPPF (December 2023) paragraph 11,

***"b) strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas[6], unless:***

1. ***the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area[7]; or***
2. ***any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole."***

**Sustainability Appraisal and LHNA**

The SA reviews the housing need and refers to the LHNA which found that the actual household growth had been lower than projected by the 2014 household projections. This is not surprising given that there has been an absence of an adopted Local Plan in the district since 1994. Paragraph 6.39 of the LHNA states that there is a correlation between lower relative delivery and the progress of development plans.

In terms of housing growth over the last few years St Albans has delivered an average of just 458 homes per year between 2018/19 and 2022/23. This is just 51.6% of the capped need identified by the standard method and less than 43.0% of the uncapped need. Over the longer timeframe of 2001-02 to 2022/23, this falls to an average of 367 homes per annum. This is woefully below the minimum local housing need requirement of 885 dwellings per annum.

This is evidenced by the results from the 2022 Housing Delivery Test for SACD28 (published in December 2023) indicated a HDT measurement of 55%. This result was calculated for the period 2019/20 to 2021/22, with 1,273 net homes delivered against the HDT housing requirement of 2,307 dwellings. Consequently, the Council are required to produce an Action Plan to address the underperformance and to identify measures that the Council will undertake to increase/maintain delivery of new housing in the district. An Action Plan was produced in 2022. However, since then the Minister of State for Housing on 6th March 2024 designated St Albans and City District Council under the powers conferred by section 62A of the Town and Country Planning Act 1990 because of its poor performance in determining planning applications.

**The LHNA concludes** that there has been below average growth in SW Herts and over the period 2011-2021 **housing affordability has deteriorated which has contributed to a decline in home ownership from 66% to 69%.**

The LHNA (March 2024) found that affordable housing need in SADC is the highest in the SW Herts area (Table 1.2) LHNA at 802 dwellings per annum. The PPG states that

***"An increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes."*** Paragraph: 024 Reference ID: 2a-024-20190220***.***

It is noted that the South West Herts Local Housing Needs Assessment (LHNA, March 2024) identifies a need for 449 affordable homes to rent per annum plus a need for 353 per annum affordable home ownership. The combined figure is very high in comparison to LHN, particularly given that market-housing led schemes typically deliver affordable housing at a rate of up to ~40%.

Analysis of affordable housing delivery in St Albans identifies that this level of delivery has not been achieved since 1994/95. Indeed, the highest recorded level of affordable housing delivery was 243 dwellings in 2004/05 and an average since 1994/95 of just 72 affordable dwellings per annum. Whilst this has increased to an average of 84 affordable dwellings per annum over the last 5 monitoring years, it remains nowhere near short of the identified need for affordable dwellings.

Delivery of affordable housing has not met the target (AMR 2023 Table 6 Target: 200 affordable dwellings per annum / 35% of gross dwellings completed as affordable, 68 gross affordable dwellings completed / 15% of gross dwellings completed as affordable). This is less than in the AMR 2022.

In terms of economic growth, the 2024 SW Herts LHNA recommends that: ***"Having regard to the balance between jobs and homes, the analysis does not therefore identify specific considerations which have an immediate bearing on conclusions on the overall need for homes in SW Herts."*** However, if left unchecked without additional migration it is anticipated by the population projections that there will be a significant ageing of the population in St Albans. This will reduce the labour supply within the area and could have a destabilising impact upon economic growth. To ensure economic growth will, therefore, require an increase in the resident working age population.

The delivery of housing over the recent and distant past has been significantly below the capped requirement set by the LHN standard method (885dpa). This lack of delivery averaging just 458dpa over the last 5-years and 367 since 2001/02 has created significant pressures within the housing market leading to St Albans having some of the worst median and lower-quartile workplace-based affordability ratios of anywhere in the country.

The affordability issues are exacerbated by the high level of affordable housing need within the area, representing circa 50% of the overall LHN. Once again delivery of affordable housing has fallen woefully short of the identified need.

Furthermore, there is a clear ageing of the population within St Albans which if left unchecked will have impacts upon the size of the working age-population and potential for economic growth.

In 2015 St Albans accounted for 23.7% of total employment in the South West Hertfordshire area (which includes Dacorum, Hertsmere, St Albans, Three Rivers and Watford). By 2023 this had declined to 17.8%. The BRES data highlights the need for St Albans to improve its labour market performance (as identified in the SW Herts Economic Study) and to create new jobs, which in turn will help to attract more working age people to the area and help to address the issue of an ageing population. If more people are attracted to St Albans, it follows that more homes will need to be built to accommodate them.

Job numbers in St Albans declined over the period 2015-23, which starkly contrasts with the growth experienced at a regional and national level. Taking the data analysis into account and along with the visions of Hertfordshire Futures and additional supporting documents to make Hertfordshire one of the UK's leading economics, more jobs need to be created in St Albans, as identified in the

SW Herts Economic Study. This can help attract more working age people to the area and address the issue of an ageing population. If more people are attracted to St Albans, more homes will need to be built to accommodate them.

These indicators provide a clear rationale for St Albans to plan beyond the capped LHN requirement of 885dpa. This would not be contrary to policy, as set out within the PPG. It must also be recognised that this capped requirement does not reduce housing need itself. The PPG is clear that where the cap is applied an early review may be required to ensure housing need is being met.

**Appendix 1: Economic Overview and Housing Need provides a socio-economic review of the St Albans economy and reviews the evidence bas that has been used to inform the Local Plan Reg 19 and its housing target.**

**Plan period** – it is noted that this is 16.5 years i.e. from 1st Oct 2024 to 31st March 2041, (the information required for the HDT will need to be adjusted), however, this assumes that the plan is submitted before the end of December 2024 and moves swiftly into examination in 2025. As alluded to in representations on paragraph 1.9 Duty to Cooperate if there is insufficient evidence submitted with the Plan to the Secretary of State this will lead the Inspectors to question the Plan and request the evidence, therefore protracting the period of examination. Even on the Council's anticipated timescale for adoption at March 2026 this provides the absolute minimum of 15 years post adoption.

The NPPF is clear at paragraph 22 that "***strategic policies should look ahead over a minimum 15 year period from adoption to anticipate and respond to long term requirements and opportunities***." It is considered the Plan Period should be extended and kept under review in order to ensure that there is a minimum 15-year period post adoption of the Plan. It is considered that the extended Plan period will alone necessitate the identification of additional sites for housing and to recognise the unmet need in neighbouring authorities as discussed in our representations to the SA.

**In summary**, to meet the housing needs of the local population and ensure housing is affordable to more households within St Albans, more homes need to be delivered above the annual housing target of 885 dpa. An increase above the capped method would not only be consistent with national policy and guidance but would also assist in remedying the acute issues of affordability, affordable housing need, ageing population and economic growth with St Albans. The delivery of 885 dpa over the 16.5-year plan period would deliver a total of 14,603 dwellings. The uncapped figure of 1,169dpa over the 16.5 years would deliver a total of 19,289 dwellings. However, the direction of travel in terms of the proposed new standard method would require the delivery of 1,544 dpa and would deliver 25,476 dwellings over the plan period, which is an additional 10,873 dwellings over what is currently proposed. Based on the average household size in St Albans from the 2021 Census of 2.5, this would increase the population by an additional 27,086 people. A proportion of this number would likely be people of working age which will help towards ensuring sustainable population growth in St Albans.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The District Council Plan 2024-2029 sets out five key priorities, which includes delivery more social housing and supporting the local economy. Policy SP1 includes a housing requirement of at least 14,603 dwellings based on the current Standard Method for St Albans DC i.e. a minimum of 885 dwellings per annum and over the plan period of 16.5 years.

As proposed the Plan provides a minimum housing need but this has not been informed by agreements with neighbouring authorities, so it is not clear what the level of unmet need is and whether it is possible for St Albans to accommodate some of the unmet needs, as a consequence the Plan is neither effective or consistent with national policy and therefore it is considered to be unsound.

Furthermore, given the true scale of need identified is 1,169 dwellings per annum (with the cap removed) and the proposed new standard method calculation increasing the minimum housing need to 1,544 dwellings per annum, and provision of significant new employment space; it is considered that it is incumbent upon the Council to consider if a further increase above the capped requirement to address local or sub-regional issues, including issues such as affordability and the ageing nature of the population and meeting some of the unmet need from neighbouring authorities. **It is therefore not unreasonable that the housing target in St Albans should be more in line with the proposed standard method figure of 1,544 dpa.**

**316 - Linden Wates (Bricket Wood) Limited**

Submission Number: 316 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Woolf Bond Planning Ltf Name: Thomas Rumble

On Behalf Of Company/Organisation: Linden Wates (Bricket Wood) Limited Name: Linden Wates (Bricket Wood) Limited

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

See enclosed statement for full details, although in summary the approach of the Plan in policy SP1 is not sound for the following reasons:

a) It is not **positively prepared** as it does not seek to address the Plan area's housing needs.

b) It is not **justified** with regard to the timeframe that the examination of the Local Plan will take which will result in a delayed adoption of the document. The approach is also **inconsistent with national planning policy** in failing to comply with paragraph 22 of the NPPF.

c) It is not **justified** through the reliance on unexplained assumptions, especially regarding the sources of supply which do not align with data on permissions and other components.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The necessary changes to Draft Policy SP1 to address the matters of soundness are (additions shown underlined and deletions struck through) *[please see attached document]*. The changes only apply to the first and eight paragraphs of the policy. As no changes are advocated to these, they are not shown below.

In the first paragraph:
The Spatial Strategy positively plans for the future to ensure that by 2042 St Albans District is a great place to live, work and visit. The Council requires new growth that enhances the attractiveness and unique character of the District through high quality design that respects local heritage. Growth must be supported by the necessary community infrastructure, transport improvements, green spaces and tree planting.

In the eighth paragraph:
Following the Government's required 'Standard Method' for calculating local housing need, the Council will identify and allocate land for the delivery of at least 16,853 net additional new houses, or 887 per annum in the period 1 April 2023 - 31 March 2042

As indicated in the representations, further allocations should be added to the Plan which would include our clients land at the former HSBC site for around 60 dwellings.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Representation_Form - former HSBC Bricket Wood_[R].pdf
2. Apps 01 - 04_[R].pdf
3. Reg 19 Reps - Linden Wates Bricket Wood Limited - 7 Nov 2024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To clarify and explain why the plan is unsound and the reasons why the land at the former HSBC site must be included as an additional allocation, as detailed in section 6 of the statement.

**317 - Taylor Wimpey Strategic Land**

Submission Number: 317 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Sam Hollingworth

On Behalf Of Company/Organisation: Taylor Wimpey Strategic Land Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

2.1 Policy SP1 sets out the proposed spatial strategy for the District up to 2041. Our comments on this

can be divided into the following three elements: the plan period; the settlement hierarchy and distribution of growth; and the approach to calculating minimum housing needs.

**Plan period**

2.2 In order to be capable of being found sound the new Local Plan must *inter alia* be consistent with

national policy. The National Planning Policy Framework (NPPF) requires strategic policies to address a period of at least 15 years *from adoption* of the Local Plan.

2.3 The DLP proposes a plan period which runs until 2041. In order to address the minimum 15-year

period, the new Local Plan will need to be adopted before the end of March 2026.

2.4 The Council's Local Development Scheme suggests the new Local Plan will be adopted in March

2026.

2.5 Consequently, the Council appears to have no room for any slippage in the Local Plan timetable.

This constitutes a risk, in our view, particularly as a) the Council will not be in control of the Local Plan timetable from submission of the plan for examination; and b) based on the experience of other Local Plans recently, it is likely that a need for some main modifications will be identified through the examination of the submitted Local Plan. Such modifications will need to be agreed by the Council, appraised, and consulted upon, delaying adoption.

2.6 We suggest it would be prudent to extend the plan period, and ensure the spatial strategy and other

strategic policies look to address the period up to at least 2042.

2.7 We suggest the only realistic alternative to extending the plan period proposed by the DLP would be

to incorporate a policy requiring an immediate review of the Local Plan upon adoption. This was the approach considered proportionate in the case of the Brentwood Local Plan, when the submitted version was not able to address the requisite minimum 15-year period. In the case of the Brentwood Local Plan, the Examining Inspectors concluded that specific deadlines for the Council to progress to the submission stage needed to be incorporated into the policy.

2.8 Like St Albans City & District, Brentwood Borough is predominantly Green Belt. This policy designation constrains opportunities to meet development needs when the Local Plan becomes out-of-date. Consequently, if an immediate review policy were to be used to address the plan period issue, we consider that there would need to be similar deadlines for submission contained within it.

2.10 We consider that it is appropriate to use a settlement hierarchy to help determine the sustainability of a settlement to accommodate growth. It is important the spatial strategy is also informed by other factors such as constraints to development, the pattern of employment development, and the availability of appropriate sites[1]. The DLP appears to account for the aforementioned, and as entirely appropriate, does not slavishly follow the settlement hierarchy.

2.11 In terms of the approach to establishing the settlement hierarchy, this is informed by the Council's two-part Settlement Hierarchy Study (June 2023) ('the SHS')

2.12 The SHS applies a quantitative scoring system to establish a settlement hierarchy for the District. It is acknowledged that attempts to quantify the characteristics of such settlements, considering a

range of varied features, is inherently problematic. However, the approach is considered proportionate, particularly, as noted above, the DLP has not sought to distribute growth in an overly simplistic manner having regard to the outcome of such an assessment.

2.13 Harpenden is proposed to be a second-tier settlement in the SHS, below only the city of St Albans City. The DLP follows this recommendation, as per its Table 1.3.

2.14 Notably, within the current Development Plan, Harpenden is a first-tier settlement alongside St Albans.

2.15 This difference is not necessarily problematic, provided the DLP appropriately responds to the fact that, as the SHS identifies, Harpenden is a far more sustainable location to accommodate growth than all other settlements within the District with the exception of St Albans.

2.16 The proposed settlement hierarchy also reflects the Centre Hierarchy (Table 6.1 of the DLP), which identifies St Albans City Centre as the only city centre in the District; then Harpenden as the only town centre; followed by other lower order centres.

2.17 The proposed settlement hierarchy is supported, and policies / allocations within the DLP should reflect this.

2.18 In relation to Harpenden, this means the settlement has been evidenced as being well-placed to be able to accommodate significant additional growth.

2.19 It is unclear how decision-makers are intended to respond to reference to the settlement hierarchy having informed the spatial strategy within Strategic Policy SP1. As currently worded, it reads as the justification for other policies / allocations with the DLP, as opposed to a policy in its own right. We suggest that it is reworded such that the policy states growth will be directed to settlements having regard to the settlement hierarchy, as well as other factors.

**Local housing needs**

2.20 We welcome the use of the Standard Method as per the PPG[2]. The NPPF is clear that this should be used to determine the minimum number of new homes strategic policies should plan for (NPPF paragraph 61); and that seeking to meet housing needs, as a minimum, is a prerequisite of a sound Local Plan (paragraph 35).

2.21 The PPG confirms that the Standard Method does not generate a housing requirement for use in plan-making, merely the ***minimum*** housing requirement[3]. Consequently, reference to the number this generates being a minimum within Policy SP1 is supported and, indeed, considered necessary.

2.22 We suggest that the new Local Plan also need to include a policy in which the housing requirement is set, and the PPG notes there will be circumstances where it is appropriate to plan for more housing than the Standard Method suggests.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

2.22 We suggest that the new Local Plan also need to include a policy in which the housing requirement is set, and the PPG notes there will be circumstances where it is appropriate to plan for more housing than the Standard Method suggests.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 24-208 TWSL LP Reg19 Pipers Lane - FInal_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We consider it would be of benefit to discuss the potential need for modifications as set out within our representations with the Council, Examining Inspector(s), and other stakeholders in the hearing sessions.

### 318 - Mr Mark Behrendt

Submission Number: 318 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Home Builders Federation Ltd Name: Mr Mark Behrendt

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Strategic Policy SP1 –A Spatial Strategy for St Albans**

The policy is unsound as it is not justified, effective or consistent with national policy

1. This policy sets out the housing requirement for SADC as 885 dwellings per annum (dpa) a total of 14,603 homes over the whole plan period and is consistent with the local housing needs assessment calculated using the current standard method. However, this is the starting point for assessing housing needs. Paragraph 11 and 61 of the NPPF also require councils to take into account housing needs that cannot be met in other areas when establishing the number of homes to be planned for. Despite this clear requirement of national policy HBF could not find anywhere in the Council's evidence where an assessment of unmet need has been made. Reference to unmet needs is made in both the SA and in the overarching statement of common ground but no attempt seems to have been made to quantify this figure. As set out above HBF recognise there is uncertainty as to whether neighbouring authorities in Hertfordshire can meet their own housing needs, but it remains a key part of plan making to ascertain whether there are any unmet needs in the area and whether it is possible for these to be met within St Albans.
2. In addition to the unmet needs in Hertfordshire the Council will also need to take into account the unmet needs arising in London. Following the examination of the London Plan reductions in the targets across London Borough's means that there is a shortfall of some 140,000 homes compared to what is needed between 2019 and 2029 across the capital placing additional pressure on areas around London. However, it must also be recognised that London is not even meeting its lower target of circa 52,000 homes per annum. Between 2019 and 2023 London has failed to meet this target, delivering on average 37,200 homes each year[2]. As

such there remain a substantial shortfall in a neighbouring housing market area (HMA) to South West Hertfordshire HMA within which St Albans is located. These unmet needs, alongside any others within neighbouring LPAs should have been taken into account when considering how many homes the Council should plan for. HBF recognises that such significant shortfalls cannot be addressed by one authority, however if they are continually ignored by all LPAs that surround the capital the impacts of this undersupply in market across the wider south east will never be addressed.

*Housing supply*

1. The HBF welcome the Council's decision to amend green belt boundaries in order to meet its housing needs in full and agree there are the exceptional circumstances required to support the proposed amendments. However, HBF consider that the high cost of housing in the area, the pressure of under supply on market due to unmet housing needs in London and the lack of development opportunities in urban areas are sufficiently severe to warrant further releases in order to address some of the unmet needs in neighbouring areas and to provide a more significant buffer between housing needs and supply.
2. Turning to the supply trajectory over the local plan HBF are concerned that the buffer between housing needs and supply is just 385 homes, a little over 2% of the overall housing requirement. This level of buffer between needs and supply is insufficient for the council to show, as required by paragraph 35c of the NPPF, that the plan is deliverable over the plan period and as such is effective. Given the reliance of the Council on delivery from strategic sites HBF would have expected to see supply exceed needs by at least 10% due to the uncertainty that strategic sites of the scale proposed by the council will deliver as expected. The Council state that they have in their assessment of delivery rates on the strategic site allocations used the latest iteration of Start to Finish published by Lichfields. While the use of this information is welcomed as it provides a reasonable starting point on which to set delivery rates it also shows that some sites deliver much more slowly than others and why a buffer between overall need and supply is necessary.
3. With regard to the trajectory in provided in table 3.2 HBF would have expected further information to be provided on the expectations for each site. On the basis that the Council has broken down supply into broad categories of site this evidence must be readily available and is necessary for all parties to properly consider whether the rate of delivery on each site is justified. It is our experience that where site by site trajectories are not provided, they are asked for by inspectors in order to ensure effective scrutiny of the local plan. For more information on what is expected we would refer the Council to the Preliminary Questions published recently by the inspector examining the Bristol Local Plan[3]. Question 62 and Appendix 1 provide some indication of the detail required. Rather than wait to be asked we would suggest that such a trajectory as part of the evidence supporting the submitted local plan.
4. In particular HBF would expect further evidence to be provided as to the deliverability of the sites identified through the urban capacity study (UCS). The site proformas do not appear to have any indication as to the availability of these sites and the Methodology Paper states at paragraph 1.10 that these were identified through "*a desktop review of maps, aerial photographs and online street photography and in some cases site visits. Sources of sites included under-utilised sites such as garage blocks and car parks, vacant and derelict land and buildings, and public sector land*". Unless further work has been undertaken to ascertain their availability the UCS alone is insufficient for their inclusion in the local plan. In addition to evidence to support the availability of these sites evidence will also be needed with regard to their deliverability.
5. Turning to Hemel Garden Community, HBF could not find any evidence supporting the trajectory for this site in table 3.2. The Council state in 6.3 of the Housing Supply and Windfall Paper that a bespoke piece of work has been completed to inform the delivery rates being

for HGC, but we could not find this in the council's evidence base. HBF would have expected that this evidence would have been provided to support the delivery rate for this allocation, especially given that it is expected to start delivering homes within five years of the plan being adopted. The Council will need to provide the necessary evidence showing how and when each phase of this new community would come forward and the evidence supporting these delivery expectations.

*Windfall*

3. The Council have included a windfall rate of 145 dpa from 2027/28. This is based on windfall delivery between 2013 and 2023. However, HBF are concerned that there could be significant overlap between windfall rates on the sites identified in the UCS which are expected to deliver 860 home over the plan period. If there is sufficient evidence regarding the availability of the sites identified in the UCS to allocate these sites, then the Council will need to reduce the level of windfall to avoid the risk of double counting of these sites in its housing supply estimates.

*Exclusion of sites due to the potential expansion of the Chilterns National Landscape*

4. Finally, we note that four sites have been removed between the Regulation 18 and Regulation 19 consultation on the basis of possible expansion of the Chilterns National landscape. This would seem premature given that no evidence has been presented as to the potential extent and reasons for any proposed expansion. HBF does not promote sites, but we are concerned that potential development sites are being discarded from the local plan on the basis of an expansion that has not been published has had no consultation. HBF considers that without any evidence minimal weight can be attached to the expansion of the national landscape and that the Council should revisit the decision to remove these sites from the regulation 19 local plan.

*Smaller sites of less than 1 ha*

1. HBF could not find any evidence to show that at least 10% of the Council's housing needs will be delivered on sites of less than one hectare as required by paragraph 70 of the NPPF. The delivery of such sites is important in ensuring that SME house builders are able to gain allocations within local plans and the certainty this brings with regard to its future development. The current Government continue to recognise the importance of this sector stating the recent consultation on the proposed reforms to national planning policy.

*"Small and medium sized builders are essential to meeting our housing expectations and supporting local economies. They also build out the majority of small sites. Their business models often rely on identifying and securing small sites and building them out quickly. The Government is concerned that SME housebuilders are not able to access the small sites that they need, and that local planning authorities are not bringing forward small sites in their plans to the level set out in the NPPF".*

2. The HBF agrees, a thriving SME sector increases choice and competition within the housing market as well as enabling more homes to come forward early in any plan period – which given the level of supply in the early years of the plan is some 2,400 homes short of meeting what is needed. The trajectory for the first five years makes no attempt to boost supply despite the severe shortfalls in housing delivery due to the failure of the Council to adopt a local plan. The proposed trajectory merely continues the trend from previous years which saw just 395 dwelling delivered each year over the last 20 year. The delays to the delivery of new homes over this period will inevitably exacerbate affordability concerns in an area where the median house price being over 17 times local median salary.

3. Instead of recognising this the Council have chosen a strategy which relies on large sites coming forward at the end of the plan period and seemingly ignored the important contribution smaller sites can make to supply early in a plan period. Therefore, whilst the HBF recognise that a stepped trajectory may be needed we would question whether such a significant step is justified given that it delays meeting identified development needs.
4. The Council must do more to identify more small and medium sized sites that would ensure the council meet the requirements of paragraph 70 as well as increasing delivery in the first five years of the plan.

*The stepped trajectory.*

2. HBF does not consider he stepped trajectory to be sound. As set out above in our comments on small sites the trajectory for the first five years makes no attempt to boost supply despite the severe shortfalls in housing deliver. The Council have alighted on a strategy that delivers a significant number of homes at the end of the plan period but the consequences of this is limited delivery in the early years of the plan. More can be done to address this though allocation of small and medium sized sites. The strong housing market in St Albans would suggest that such sites would come forward quickly on the adoption of the plan and begin delivering the homes St Albans needs in the short term. This would also support the Government's ambitions of delivering 1.5 million homes in the next five years and which are considered essential in addressing the housing crisis the country is currently in.

## 327 - Gary lees

Submission Number: 327 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Tom Beardsmore

On Behalf Of Company/Organisation: Clowes Developments Name: Gary lees

Comment Number: 1

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

These submissions to the Regulation 19 Draft Local Plan consultation are made on behalf of Clowes Developments who has an interest in circa 74 hectares of land either side of the M25 motorway west of Junction 21a, the northern parcel lying south of Noke Lane, Chiswell Green and the southern parcel lying west of Bricket Wood. The land parcels are identified on the enclosed site location plan.

**Chapter 1 Spatial Strategy**

It is contended that the draft plan fails all four tests of soundness in not giving sufficient consideration to plan for more homes or more employment floorspace, given the clear evidence of increased needs for both of these in St Albans and across the South West Hertfordshire Market Area (HMA).

Housing Need

Whilst the draft plan is seeking to provide for the Standard Method housing figure, it should be noted that:

1. This is a capped figure, and thus below actual housing need;
2. There is a very high, local affordable housing need; and
3. There is unmet need from neighbouring authorities in the Housing Market Area.

The Sustainability Appraisal (SA) notes that the PPG states: "*Where the minimum annual local housing need figure is subject to a cap, consideration can still be given to whether a higher level of need could realistically be delivered*". The uncapped housing need figure is 1,165 dpa and would result in the need to allocate land for a further 4,709 dwellings.

The SA also acknowledges that the PPG states: "*An increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes.*" The Local Housing Needs Assessment (LHNA, 2024) identifies a need for 449 affordable homes to rent per annum plus a need for 353 per annum affordable home ownership, a total affordable housing need over the plan period of 13,233 dwellings. There is thus a desperate affordable housing need that planning for additional homes would help alleviate.

The Duty to Cooperate (DtC) requires strategic policy-making authorities to cooperate with each other, and other bodies, when preparing policies which address strategic matters (such as meeting housing needs) and to produce Statements of Common Ground (SoCG). The SoCG published alongside this Regulation 19 consultation is unsigned, but identifies that an approach to

accommodating unmet housing needs that may exist within the wider Housing Market Area is a Strategic Matter to be addressed. Given the decision of Three Rivers to not proceed with their new local plan, there exists significant unmet need across the HMA. There is no evidence of any 'effective' joint work to address this strategic issue; just noting this issue in the SoCG fails to meet the DtC requirement of engaging effectively.

Whilst the SA acknowledges there are implications for the matter of planning for unmet need across the sub-region as a consequence of the proposed changes to the NPPF (including a 75% increase on the present standard method calculation for St Albans), this is also evidentially the case under the existing NPPF as well.

The SA does not consider a growth option higher than 12% above the (capped) standard method requirement. In light of the actual housing and affordable housing needs in St Albans being substantially higher than the standard method figure, it is a failure of the SA to not test a higher growth option as a reasonable alternative.

NPPF paragraph 61 sets out circumstances where a figure higher than the standard method might be justified; not only does the plan fail to respond positively to these and also fails to take account of unmet need from elsewhere in the HMA, the plan's housing figure also fails to provide for an appropriate flexibility allowance. This should be at least 10% of the standard method figure to allow for potential non-delivery and ensure the quantum of housing being planned for is actually delivered over the plan period.

Plan period: it would be confusing for monitoring purposes to have a plan that does not start and end at the same point in the year. 31st March is an accepted start and finish point and it would therefore be logical for this local plan to start at 31st March 2024.

Employment Need

The SA is quite dismissive of testing a higher growth strategy with increased employment land on the basis that 'none of the sites in question would deliver new employment land'. The northern parcel of the land as identified on the attached site location plan is subject to a Planning Performance Agreement with the City Council to consider the merits of the site to deliver a new stadium for St Albans City Football Club along with enabling development. The principle of a new stadium for the football club is supported by the New Local Plan at Policy COM5. One of the enabling development options being considered is employment. The site has been put forward for consideration as a potential employment site and the HELAA 2021/22 Report Annex 17 Employment includes this site as STS 19-21. There then appears to be no further assessment of the site for employment purposes as part of the plan making process.

The South West Herts Economic Study (SWHES) 2024 identifies a need for just 1.5 ha of industrial and storage & distribution land within St Albans over a 20-year period. However, Savills has considered this study and do not agree with its findings on the following grounds:

The SWHES sets out a range of demand estimation methods and identifies the Net Absorption method as its preferred. This scenario relies in part on elements of the Savills demand estimation method outlined in the "Levelling Up – The Logic of Logistics" report prepared for the BPF. Savills consider this estimation method the strongest because it is based directly on market indicators.

The three other estimation methods (past completions, labour demand and labour supply) have significant limitations which typically result in inaccurate estimates of future land demand, particularly in the Industrial and Logistics (I&L) sector. These methods have no direct relationship to market realities and the growth drivers that support demand.

Whilst the fact that the SWHES has stated a preference for the Net Absorption method for estimating need is welcome, it has not been applied entirely correctly or to its fullest. There are several reasons why the estimation method falls short. It does not take account of current and future growth drivers that will continue to underpin I&L demand such as online retailing and housing growth. Also, given

St. Albans proximity to Greater London, and its excellent transport infrastructure, it doesn't account for how new I&L floorspace in St Albans could help to address the loss of land in Greater London. Finally, the plot ratios uses in the SWHES are too high at 40%. From Savills' experience, a plot ratio of around 35% is more reflective of modern I&L occupier requirements.

Based on Savills' own demand methodology, apportioning FEMA down to St Albans results in demand for between 43 ha and 71 ha of land over a 20-year period. This is a significantly higher demand requirement than that estimated in the SWHES. I consider Savills' demand estimates demonstrate that the Council has not allocated enough of the right land for I&L uses, and that quantitatively a strong needs case can be made for further I&L development in the FEMA and St Albans specifically. The Subject Site will help to meet this demand.

Although the Council has allocated two large sites for employment, neither is fully oriented towards meeting the Council's need for new I&L premises. The East Hemel Hempstead draft allocation is located in the Herts Innovation Quarter and primarily oriented towards office and R&D activities. The SRFI is nationally significant infrastructure and its capacity to meet local or even sub-regional need is limited. The Subject Site is uniquely positioned to provide St Albans and the sub-region with highly deliverable, strategically located Class A I&L premises.

Whilst the study confirms that hyperscale data centres fall outside of its scope, it does recognise that Herts is an attractive location for these uses and that the development of data centres is now established as critical national infrastructure, with the evidence demonstrating there is significant demand for large scale centres and that this should be expected to continue to increase.

Notwithstanding the plan will not be assessed against the new version of the NPPF, and thus does not need to identify strategic sites for data centre uses as proposed in the NPPF changes to paragraphs 84 & 85, the ministerial statement of Chris Bryant MP of 12th September 2024 is now government policy that plan will need to have regard to. This statement confirms UK Data Infrastructure, including data centres, as Critical National Infrastructure. The statement also confirms the government's commitment to explore further how to ensure the right conditions are in place to drive necessary capacity expansion to support economic growth and innovation. The plan does not provide any policies or proposals to assist in ensuring data centre demand – which is known to be high in Hertfordshire – is provided for or to assist in directing such uses to appropriate locations.

The SA in support of the Reg 19 draft local plan fails to consider any reasonable alternatives in relation to employment growth – including the northern parcel of the subject site that has been put forward for employment development. It is also noted that employment levels actually decreased in St Albans between 2015 and 2021, an alarming statistic that points to an unsustainable, aging population and one that requires a local plan to plan positively to meet the needs of younger generations by providing the homes and jobs to enable them to stay and prosper in the District.

For all the above reasons, the Spatial Strategy of the draft Plan fails the Duty to Cooperate and all four tests of soundness.

## 329 - Mr Russell Crow

Submission Number: 329 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Mr Peter Atkin

On Behalf Of Company/Organisation: Richborough Estates Name: Mr Russell Crow

Comment Number: 17

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Housing Requirement and the Sustainability Appraisal

Richborough supports in principle the starting point established in Policy SP1 of a minimum housing requirement of at least 14,603 homes across the Plan period (equating to 885 dwellings per annum) calculated using the current standard method. This approach is in accordance with the current NPPF (paragraph 61), but does deviate from the emerging NPPF 2024 as discussed further below.

The draft Local Plan is supported by a Sustainability Appraisal (SA, September 2024) which sets out a consideration of the growth strategy and testing of reasonable alternative growth scenarios. While paragraph 5.2.28 of the SA suggests that the arguments for delivering either above or below the standard method 'cancel out', the argument provided in favour of a low growth option is weak, and relies solely on the Green Belt constraint. The argument in favour of growth above standard method is much stronger, not least because of the ability to address the significant shortfall in housing delivery and enduring issues with housing affordability (as considered in the South West Herts Local Housing Needs Assessment Update 2024), but also the substantial 'secondary benefits' that could be realised including provision of infrastructure and supporting economic growth.

SADC has ambitious employment and economic policies (Policy SP5) which would yield significant job creation in the district. New homes will be needed to support new jobs and business in the district, particularly in light of the dominant trends in growth in residents aged 65+ and the implications this has for economic growth unless a younger population is able to afford to live and work in the area.

Since publication of the draft NPPF 2024, Inspectors have made it clear that Local Plans (that have reached Examination stage) need to at the very least plan for housing requirements derived from the current standard method. As seen at the Solihull Examination in September 2024, a deficit in housing requirement that falls below the standard method is not accepted and in the case of Solihull resulted in the Local Plan being withdrawn from Examination. The Inspectors letter of 24 May 2024 post-Examination of the North Norfolk Local Plan that a deviation below the standard method requires strong and robust justification.

The draft Local Plan has therefore taken the correct approach of planning for a minimum housing requirement based on the standard method, when considered against the current NPPF 2023. The qualification of this being a minimum housing requirement is important, and Richborough encourage SADC to give detailed consideration of a higher housing requirement, particularly in the context of the Duty to Cooperate and the requirement to address unmet needs arising from neighbouring authorities; to address housing affordability; and support the ambitious employment policies SADC is pursuing. This is needed because, while the SA supports SADC's preferred growth strategy as being well balanced in respect of sustainability objectives, the SA does not

categorically demonstrate that the higher growth scenarios tested would have significant adverse impacts. In addition to delivering the benefits set out at paragraph 2.6 above, higher housing growth would also enable a contribution to be made towards the unmet housing needs of neighbouring areas – if such needs are identified through the additional DtC work that has been recommended above.

SADC also need to be cognisant of the draft NPPF 2024, which provides an additional reason to consider increasing the housing requirement. The draft Local Plan's housing requirement is more than 200 dwellings per annum below the emerging standard method (difference of 659 dwellings per annum). It is noted that SADC are seeking to submit the Local Plan for Examination as soon as possible after the Regulation 19 consultation closes, ostensibly to avoid being 'caught' by the transitional arrangements of the draft NPPF 2024. While proactive progress on the Local Plan is welcomed, it is for SADC to provide confidence that this timescale allows for sufficient consideration of consultation responses and for a sound Local Plan to be submitted to avoid delays in the long term.

Notwithstanding when the Local Plan is submitted, the new housing requirements cannot be ignored. The Government has clearly iterated its commitment to increasing the delivery of housing on a national level; resulting in a significant increase in housing requirements not only for SADC, but also neighbouring authorities like Hertsmere (increase by 228 dwellings per annum), Three Rivers (increase by 99 dwellings per annum), Dacorum (increase by 297 dwellings per annum) and North Hertfordshire (increase by 82 dwellings per annum). These increases in requirements are even more profound when compared to existing delivery levels; taking North Hertfordshire as just one example, its average delivery over the period 2020/21 – 2022/23 was only 467 dwellings, which is 525 dwellings below the new standard method requirement.

In this context, it is questioned whether the approach proposed by SADC is the most effective when considered from a strategic plan making perspective. The requirement in the draft NPPF 2024 for SADC to undertake an immediate review (if the Plan is adopted with the current housing requirement) would still apply. Not only will this mean SADC having to immediately start a new Local Plan process, but planning for only the minimum homes required by the current standard method now will mean that SADC will still be faced with having to plan for a significant increase in housing requirement.

In addition, SADC's neighbouring authorities are preparing new Local Plans, and will be subject to the transitional arrangements in the NPPF 2024 in terms of planning for increased housing requirements. The DtC matter is therefore again relevant here and it is vital to consider the potential for unmet needs in this context, to ensure it can be demonstrated to the Inspector at Examination that all matters have been assessed.

Other points on Policy SP1

It is not clear why Policy SP1 refers to large urban extensions like West of Redbourn as 'Broad Locations'. This term implies that site boundaries and quantum have not been identified yet. This is clearly not the case, as all of these sites are identified as proposed allocations in Part B with clearly defined requirements.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Proposed remedy: It is recommended that 'Broad Locations' is replaced with 'Large Urban Extensions', which would fit with the other categories of development SADC have provided for smaller sites.

The draft Local Plan also needs to be consistent throughout on the definition of Broad Locations. For example, SP1 identifies sites of more than 250 homes as being strategic, while IMP1 defines these as developments of more than 100 homes.

The final criterion of Policy SP1 suggests 'Broad Locations' will be required to provide a comprehensive approach to renewable energy such as wind and solar. There is no clarity provided for this requirement. Notwithstanding whether it is appropriate and supported by evidence, this criterion repeats requirements that are detailed in Policy SP2 in particular e) which encourages provision of on-site renewables. Proposed remedy: Delete the final criterion from SP1.

As a minor point, the colours utilised in Figure 1.2 make it difficult to differentiate between the Tier 4 and 5, and 6 and 7 settlements. This should be amended.

**330 - Taylor Wimpey Strategic Land**

Submission Number: 330 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Name: Sam Hollingworth

On Behalf Of Company/Organisation: Taylor Wimpey Strategic Land Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

2.1 Policy SP1 sets out the proposed spatial strategy for the District up to 2041. Our comments on this can be divided into the following three elements: the plan period; the settlement hierarchy and distribution of growth; and the approach to calculating minimum housing needs.

**Plan period**

2.2 In order to be capable of being found sound the new Local Plan must *inter alia* be consistent with national policy. The National Planning Policy Framework (NPPF) requires strategic policies to address a period of at least 15 years *from adoption* of the Local Plan.

2.3 The DLP proposes a plan period which runs until 2041. In order to address the minimum 15-year period, the new Local Plan will need to be adopted before the end of March 2026.

2.4 The Council's Local Development Scheme suggests the new Local Plan will be adopted in March 2026.

2.5 Consequently, the Council appears to have no room for any slippage in the Local Plan timetable. This constitutes a risk, in our view, particularly as a) the Council will not be in control of the Local Plan timetable from submission of the plan for examination; and b) based on the experience of other Local Plans recently, it is likely that a need for some main modifications will be identified through the examination of the submitted Local Plan. Such modifications will need to be agreed by the Council, appraised, and consulted upon, delaying adoption.

2.6 We suggest it would be prudent to extend the plan period, and ensure the spatial strategy and other strategic policies look to address the period up to at least 2042.

**Settlement hierarchy and spatial distribution of growth**

2.7 We consider that a settlement hierarchy can be used to help determine the sustainability of a settlement to accommodate growth. However, the DLP's spatial strategy should also be informed by factors such as constraints to development, the pattern of employment development, and the availability of appropriate sites. It is also important to recognise that St Albans City & District contains a number of distinct settlements, each with their own identities – the new Local Plan and in particular the spatial distribution of growth should ensure it supports the vitality of these communities, helping to ensure local services remain viable, etc.

2.8 Having regard to the above, it is considered that the DLP's approach of utilising a settlement hierarchy as a basis for the distribution of growth, without slavishly following it in terms of the actual scale of growth directed to various settlements, is a sound approach.

2.9 In terms of the approach to establishing the settlement hierarchy, this is informed by the Council's two-part Settlement Hierarchy Study (June 2023) This applies a quantitative scoring system to establish a settlement hierarchy for the District. It is acknowledged that attempts to quantify the characteristics of such settlements, considering a range of varied features, is inherently problematic. However, the approach is considered proportionate, particularly, as noted above, the DLP has not sought to distribute growth in an overly simplistic manner having regard to the outcome of such an assessment.

2.10 In respect of Wheathampstead, we consider it has been appropriately identified as a Large Village, Tier 4 settlement, to which it is sustainable to direct proportionate growth. This reflects the size of the settlement and, perhaps more importantly, the services and facilities it contains, as the Settlement Hierarchy evidences.

2.11 Wheathampstead benefits from a range of facilities and services to meet people's daily needs. It is home to two primary schools, a nursery, library, fire station, post office, GP surgery, and dentist. Other facilities include public houses, allotments and sports pitches. The village also contains a variety of shops, businesses and services with a pharmacy, convenience stores, restaurants, cafes and takeaways, generally concentrated along the High Street.

2.12 In addition to facilities and services within the village itself, Wheathampstead also benefits from a good bus service providing links with neighbouring centres.

2.13 It will be important for the new Local Plan to support the vitality of settlements such as Wheathampstead, which have their own identities as well as a range of services and facilities important to their communities and those within the surrounding area.

2.14 The approach of utilising the settlement hierarchy to inform the distribution of growth is considered justified and consistent with national policy; and justifies directing a proportion of growth to villages such as Wheathampstead.

2.15 Notwithstanding the above, in our view it is unclear how decision-makers are attended to respond to reference within the policy text itself that "*Settlement Hierarchy (Table 1.3) provides the basis for allocation and location of growth, locating most growth generally within and adjacent to the larger and most sustainable urban centres that are Tier 1 - St Albans and Hemel Hempstead; Tier 2 – Harpenden, and Tier 3 - London Colney".* This reads more as *justification* for policy /

strategy, as opposed to policy in itself. We suggest this would benefit from modifications such that the policy states that growth directed to the settlements will reflect the settlement hierarchy, without slavishly adhering to it and factoring in a range of other sustainability considerations, including the need to support the vitality of smaller settlements. Existing text regarding how the settlement hierarchy has helped inform the spatial strategy would be better placed within the supporting text.

2.16 Separately, we also consider it important that the new Local Plan proposes a range of scales of development, as the DLP does. It includes a mixture of what it categorises as Large Sites (100-249 homes), Medium Sites (10-99 homes) and Small Sites (5-9 homes).

2.17 The Council will doubtless be mindful that one of the failings of the Local Plan previously submitted for examination was the lack of smaller sites, and the undue reliance on sites capable of accommodating over 500 dwellings, unjustifiably ruling out a potential source of housing supply that may have a lesser impact on the purposes of the Green Belt. The DLP's spatial strategy has evidently avoided this potential soundness issue through allocating sites of a range of sizes for development.

**Local housing needs**

2.18 We welcome the use of the Standard Method as per the PPG. The NPPF is clear that this should be used to determine the minimum number of new homes strategic policies should plan for (NPPF paragraph 61); and that seeking to meet housing needs, as a minimum, is a prerequisite of a sound Local Plan (paragraph 35).

2.19 The PPG confirms that the Standard Method does not generate a housing requirement for use in plan-making, merely the *minimum* housing requirement. Consequently, reference to the number this generates being a minimum within Policy SP1 is supported and, indeed, considered necessary.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

2.20 We suggest that the new Local Plan will also need to include a policy in which the housing requirement is set, and the PPG notes there will be circumstances where it is appropriate to plan for more housing than the Standard Method suggests.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 24-203 TWSL LP Reg 19 Wheathampstead Final_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

We consider it would be of benefit to discuss the proposed modifications as set out within our representations with the Council, Examining Inspector(s), and other stakeholders in the hearing sessions.

### 332 - Beechwood Homes Contracting and Verulam Golf Club

Submission Number: 332 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Ceres Property Name: James Firth

On Behalf Of Company/Organisation: C/O Ceres Property Name: Beechwood Homes Contracting and Verulam Golf Club

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Plan Period**

For the Local Plan to be sound, it must adhere to national policy requirements. The National Planning Policy Framework (NPPF) mandates that strategic policies should address a minimum period of 15 years from the Local Plan's adoption.

The current plan period running until 2041, would require adoption by March 2026 to meet the 15-year requirement.

The Council's Local Development Scheme currently anticipates adoption by this deadline, allowing no room for potential delays. This tight timeline presents a potential risk, to address this, we suggest extending the plan period to at least 2042 to allow for more flexibility and ensure that the spatial strategy covers an adequate timeframe.

**Settlement Hierarchy and Distribution of Growth**

Policy SP1 highlights the importance of directing growth to the most sustainable locations 3.1.6 Policy SP1 emphasises that larger settlements provide a comprehensive range of services, employment, retail, and other facilities, as well as better accessibility and connectivity by walking, cycling, and public transport. It designates the City of St Albans as the primary focus in the District for housing, employment, services, retail, the evening economy, education, and healthcare.

The focus on St Albans as a sustainable location for growth is strongly supported, and this should of course then be reflected with the allocation of suitable sites to meet housing needs as part of the distribution. The site at M8 Verulam Golf Club is a key example of this.

The plans approach of using a settlement hierarchy as the basis for growth distribution is therefore also supported.

St Albans, as a Tier 1 settlement, is the District's most sustainable location for growth and should therefore be apportioned the highest levels of development. By directing the largest share of growth here, the Local Plan can more effectively support sustainable development objectives while protecting the distinct character of smaller settlements within the District.

## Housing Needs

We support the application of the Standard Method, as outlined in the Planning Practice Guidance (PPG), for calculating housing needs. In accordance with the National Planning Policy Framework (NPPF), this method establishes the minimum number of homes required for strategic planning purposes (NPPF para. 61) and is fundamental to a sound Local Plan (para. 35).

It is essential that this draft plan remains adaptable to future increases in housing needs, especially considering the proposed NPPF reforms and the implications of a revised standard method for St. Albans' minimum housing requirements.

The forthcoming standard method, anticipated under the revised NPPF, would set St. Albans' housing requirement at a figure of 1,544, compared to the current Standard Method figure of 885 homes per annum, which translates to 14,603 net additional homes across the plan period. This represents an increase of 659 homes per annum (10,874 in total), which is currently not addressed by the Regulation 19 Local Plan.

Whilst it is recognised the Local Plan may be covered by transitional arrangements in the NPPF, it would likely require an immediate review of the Local Plan following adoption to address any updated housing targets. We therefore consider the current Regulation 19 Local Plan should seek to maximise the potential of all sites as far as possible. This should include maximising unit numbers on any sites proposed for allocation.

...

## 2 BACKGROUND & CONTEXT

### Planning Policy Context

**2.1** In preparing this representation, consideration has been had for Chapter 3 of the National Planning Policy Framework (NPPF) (2021) which relates to 'plan-making'.

**2.2** Paragraph 15 of the NPPF promotes a plan-led system, and that succinct and up-to-date plans should provide a positive vision for the future of each area; a framework for addressing housing needs and other economic, social and environmental policies; and a platform for local people to shape their surroundings.

**2.3** Paragraph 16 states that plans should:

1. be prepared with the objective of contributing to the achievement of sustainable development;
2. be prepared positively, in a way that is aspirational but deliverable;
3. be shaped by early, proportionate and effective engagement between plan makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;
4. contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;
5. be accessible through the use of digital tools to assist public involvement and policy presentation; and
6. serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).

**2.4** As identified at paragraph 35, local plans are examined to assess whether they have been prepared in accordance with legal and procedural requirements, and whether they are 'sound'. The test for soundness as set out within the NPPF is as follows:

**2.5** Plans must be:

- Positively prepared
- Justified

- Effective
- Consistent with national policy

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Plan Period**

For the Local Plan to be sound, it must adhere to national policy requirements. The National Planning Policy Framework (NPPF) mandates that strategic policies should address a minimum period of 15 years from the Local Plan's adoption.

The current plan period running until 2041, would require adoption by March 2026 to meet the 15-year requirement.

The Council's Local Development Scheme currently anticipates adoption by this deadline, allowing no room for potential delays. This tight timeline presents a potential risk, to address this, we suggest extending the plan period to at least 2042 to allow for more flexibility and ensure that the spatial strategy covers an adequate timeframe.

**Settlement Hierarchy and Distribution of Growth**

Policy SP1 highlights the importance of directing growth to the most sustainable locations 3.1.6 Policy SP1 emphasises that larger settlements provide a comprehensive range of services, employment, retail, and other facilities, as well as better accessibility and connectivity by walking, cycling, and public transport. It designates the City of St Albans as the primary focus in the District for housing, employment, services, retail, the evening economy, education, and healthcare.

The focus on St Albans as a sustainable location for growth is strongly supported, and this should of course then be reflected with the allocation of suitable sites to meet housing needs as part of the distribution. The site at M8 Verulam Golf Club is a key example of this.

The plans approach of using a settlement hierarchy as the basis for growth distribution is therefore also supported.

St Albans, as a Tier 1 settlement, is the District's most sustainable location for growth and should therefore be apportioned the highest levels of development. By directing the largest share of growth here, the Local Plan can more effectively support sustainable development objectives while protecting the distinct character of smaller settlements within the District.

**Housing Needs**

We support the application of the Standard Method, as outlined in the Planning Practice Guidance (PPG), for calculating housing needs. In accordance with the National Planning Policy Framework (NPPF), this method establishes the minimum number of homes required for strategic planning purposes (NPPF para. 61) and is fundamental to a sound Local Plan (para. 35).

It is essential that this draft plan remains adaptable to future increases in housing needs, especially considering the proposed NPPF reforms and the implications of a revised standard method for St. Albans' minimum housing requirements.

The forthcoming standard method, anticipated under the revised NPPF, would set St. Albans' housing requirement at a figure of 1,544, compared to the current Standard Method figure of 885 homes per annum, which translates to 14,603 net additional homes across the plan period. This represents an increase of 659 homes per annum (10,874 in total), which is currently not addressed by the Regulation 19 Local Plan.

Whilst it is recognised the Local Plan may be covered by transitional arrangements in the NPPF, it would likely require an immediate review of the Local Plan following adoption to address any updated housing targets. We therefore consider the current Regulation 19 Local Plan should seek to maximise the potential of all sites as far as possible. This should include maximising unit numbers on any sites proposed for allocation.

## 334 - TT Group

Submission Number: 334 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Knight Frank Name: Stuart Baillie

On Behalf Of Company/Organisation: TT Group Name:

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Policy SP1 (A Spatial Strategy for St Albans District) and SP2 (Responding to the Climate Emergency)**

Policy SP1 sets out the Council's approach towards meeting future development needs through a 'brownfield land first' approach and reiterates that St Albans will continue to be the pre-eminent focus for future development including housing.

Policy SP2 maintains the above sentiment, stating that in order to help combat Climate Change, development proposals will need to prioritise the development of previously developed land and use the most sustainable locations for growth to minimise the need for travel.

To reiterate what is stated above, the recurring theme of supporting the development of brownfield land is supported by our Client and is consistent with the overarching objectives of the NPPF. Support for the revitalisation of previously developed and underutilised sites within the Draft Local Plan is encouraged, and directly aligns with our Client's aspirations for Marlborough House.

Our Client also supports the Council's aspirations to utilise the most sustainable locations for future development in order to minimise the need to travel. Our Client agrees that developments must be located in areas which are well served by public transport in order to minimise the need to travel by car, with development prioritised in urban locations close to amenities (thereby reducing the need to travel) and public transport (thereby prioritising sustainable transport).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusions**

Our Client welcomes the preparation of the St Albans' new Local Plan, noting that those policies contained in the current adopted Local Plan (1994) are extremely outdated and do not accurately reflect current circumstances.

Our Client broadly supports the aspirations of the Plan, particularly that of prioritising residential development on previously developed sites, and ensuring the efficient use of such land in order to meet the significant housing need within the district. Our Client agrees this represents a sensible and effective way of providing much needed new homes in highly sustainable locations across the district which is otherwise constrained by Green Belt.

Nevertheless, our Client has significant concerns regarding specific policies of the Draft Local Plan. Most notably, our Client raises key concerns with the failure of the Draft Local Plan to identify Marlborough House as a site for future residential development. As discussed throughout this representation, Marlborough House represents an underutilised, highly accessible previously developed site, the comprehensive redevelopment of which to provide residential units would make a significant contribution towards meeting housing need within SACDC.

Furthermore, our Client contends that the Draft Local Plan are not legally sound and do not comply with the NPPF. Our Client has therefore made a number of recommendations, which if adopted would ensure consistency across the Draft Local Plan. Notably, our Client strongly contends that those policies within the Draft Local Plan must be sufficiently flexible in order to maximise the chances of meeting the significant housing need within the district. Failure to do so risks the Draft Local Plan stifling opportunities to meet housing need through the effective and efficient use of the highly sustainable brownfield sites.

Overall, it is concluded that in its current form the Draft Local Plan has areas of inconsistency, is not justified with appropriate evidence and is therefore at risk of not be legally compliant, and it is suggested that the Council take further review. We look forward to engaging further in the preparation of the St Albans Local Plan 2041.

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In July 2024 the Luton Council Executive approved a timetable for the production of a new Local Plan for Luton and a public consultation (Regulation 18) is planned to take place before the end of 2024.

Luton Council considers that the draft Local Plan is a sound, positive approach to plan making, however given the influence of Luton airport, planned future growth, the generation of travel movements and the commuting relationship between St Albans and the airport, it is considered that the Local Pan could be more effective in relation to the need for integrated strategic transport measures and opportunities afforded by the HERT proposals and Luton's own DART mass transit scheme.

Changes could be made to strategic policies SP8 (Transport strategy) TR1 (Transport Considerations for New Development) and TR2 (Major Transport Schemes) and the SADC Infrastructure Development Plan to further recognise these influences and relationships and the need for improved public transport provision in the context of the need to improve inter-urban connectivity.

Luton Council and SADC are producing a Statement of Common Ground for the St Albans Local Plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). ## 341 - Higgins Group

Submission Number: 341 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Name: Alexandra Milne

On Behalf Of Company/Organisation: Higgins Group Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Spatial Strategy and Settlement Hierarchy** (Policy SP1)

As set out in paragraph 1.33 of the Draft Local Plan "The Spatial Strategy has been shaped by the need to address the Climate Emergency and new development will generally be concentrated on the basis of the Settlement Hierarchy. This approach gives priority to the larger urban centres which can provide a greater range of services and facilities, supports the re-use of land within the urban areas, and can reduce the need to travel. These larger urban centres also offer greater accessibility by walking, cycling and public transport."

The Settlement Hierarchy retains St Albans City as the key settlement in the District and roughly 30% of new residential growth will be in Hemel Garden Communities ('HGC'), an urban extension to Hemel Hempstead (currently all in Dacorum Borough Council's administrative area), lying in the west of St Albans District and bordering the M1. Harpenden is the next level of choice for growth. Growth delivered in these three key areas comprise 78% of the homes over the plan period.

In addition to the four HGC sites, the allocated “Broad Locations” for growth identify eight sites which will provide 250+ dwellings (amounting to roughly 40% of the total dwellings from the site allocations). The reliance on very large and large-scale sites to delivery such a significant proportion of the housing requirement is concerning. Such sites are inherently complex and time consuming and, as concluded by the Letwin Review (2018), the proportion of site build out each year is likely to be small. The housing trajectory does not build in a sufficient supply of homes to account for any shortfall in delivery should these sites face delays (as discussed in further detail below) and should identify further sites to ensure an appropriate housing supply over the plan period.

Paragraph 3.38 of the Draft Local Plan states that “Within St Albans District, the HGC Growth Areas will deliver at least 4,300 new homes by 2041, with a further 1,200 homes by 2050, providing a total of 5,500 new homes. Further housing growth within the area north and east of Hemel Hempstead, Two Waters and Hemel Hempstead Town will be set out in Dacorum’s Local Plan.” The Sustainability Appraisal (dated September 2024) notes that “support for HGC has crystalised in the Draft Plan stage (2023), and the reality is that the St Albans Local Plan would have to ‘go back to the drawing board’ without it, which would lead to major issues, as discussed.” The plan’s success is therefore wholly reliant on progress with and the deliverability of the HGC Growth Areas.

This overreliance risks undermining the Draft Local Plan’s ability to meet its housing requirement and should be remedied through the identification and allocation of additional housing sites.

## 342 - Campaign Team

Submission Number: 342 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Keep Chiswell Green Name: Campaign Team

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

### Introduction

Keep Chiswell Green (KCG) is a local volunteer-led campaign group, formed in March 2022 in response to the planning applications submitted for large-scale development of the Metropolitan Green Belt to the west of Chiswell Green. Chiswell Green is a medium-sized village of approximately 1,250 households, located to the south of St Albans and just north of the M25 at junction 21a, close to the southern boundary of the District.

The group's objectives include informing local residents about applications and appeals, and representing their views to St Albans City and District Council (SADC) and to the Planning Inspectorate. This is achieved through extensive two-way communication.

KCG has been an active advocate for the residents of Chiswell Green and St Stephen Parish, including acting as a Rule 6 Party in the Chiswell Green Inquiry, participating in the Hearing for the Ragged Hall Lane appeal, and speaking as an interested party at the Lye Lane (Bricket Wood) Inquiry.

In this capacity, KCG has attended all Planning Policy and Climate Change committee meetings since July 2023 as a public spectator, usually in person, occasionally via the webcast of the meetings.

Chiswell Green is the target of intense speculative development; in the 2021 "call for sites" as part of the local plan preparation, land was put forward by local landowners for 2,057 new houses in Chiswell Green's Green Belt immediately around the village. Since then, speculative applications have been submitted for a total of 1,266 new houses across these sites, of which 1,259 have been granted permission, with an appeal decision still outstanding on the final 7 units. This already represents a doubling of the number of households in the village, but without the co-ordinated improvements in our existing, critically-deficient, infrastructure that could come from development through a Local Plan.

A further 98 new houses are proposed for Chiswell Green under the draft Local Plan.

Once the site for these 98 is allocated under the local plan or approved via a speculative application, two more applications will be submitted for yet another 503 new houses, concreting over what little will remain by then of Chiswell Green's Green Belt.

Residents of Chiswell Green are desperate for a new local plan – one that will protect us from further years of speculative development. However, with a very heavy heart, KCG must object to this draft local plan. The St Albans District needs a local plan, but not *any* local plan, not the *wrong* local plan, and not at the expense of sacrificing the ability of future generations to meet their own needs.

As a result of door-to-door canvassing of in excess of 1,000 properties in the village, KCG can confidently say it speaks for approximately 98% of local residents. KCG therefore submits this response with the weight of the support of over 2,000 local residents.

**Legally compliant, positively prepared, justified, effective, consistent with national policy**

In our opinion, the draft Local Plan has **not** been prepared to be *legally compliant, positively prepared, justified, effective or consistent with national policy* :

**Lack of consideration for the Regulation 18 Public Consultation**

The Regulation 18 public consultation was scheduled to run largely during the schools' summer holidays and was poorly publicised, resulting in a very low response rate; there were fewer than 2,000 responses to the consultation from across the whole District, when a number of single planning applications have each individually generated in the region of 1, 500 objections.

Appeals in June 2023 to the then Leader of the Council, Cllr Chris White, for the dates of the consultation to be changed so as to avoid the summer holidays, when the majority of residents are most distracted and busy, were rejected.

Feedback from local residents has highlighted the inaccessibility of the Draft Local Plan documents to those with no previous experience of the Planning process. The documents were extremely long and verbose, and, for those who attempted to read the documentation, it was difficult for residents to understand the implications of the document content.

The requirement to register on the SADC portal in order to submit any comments was found to be onerous and off-putting, especially as some residents already had accounts for Council services such as council tax or refuse collection, but found that they were unable to use these to comment as part of the Regulation 18 consultation.

Residents have reported to us that the SADC questionnaire was too narrow and the prescribed choice of answers resulted in a poor reflection of the respondents' views, forcing them to select responses that did not accurately represent their views.

The "response to each chapter" format was also off-putting as most residents did not want to comment on each individual chapter, but to comment overall. Whilst this was an option for respondents, coming at the end of the response template meant that some respondents did not reach that point in the template.

We believe that it is the lack of publicity, the poor timing of the Consultation and the difficulty in registering comments that have led to a poor response from local residents – not a lack of interest. This consultation has been poorly conducted and we submit that it would be wrong to assume that a low number of responses means that there is a high level of approval of the Draft Local Plan.

Residents would be justified, however, in thinking that their participation in the Regulation 18 Consultation was of little worth as there has been little more than acknowledgement that comments were made from SADC. The majority of responses received a comment saying "noted".

To reinforce the lack of regard that has been had for the responses to the Regulation 18 Consultation, there has been little change in the Plan between the Regulation 18 Draft and the Regulation 19 Draft, and certainly no evidence that feedback through the Regulation 18 process has been incorporated.

**Site selection based just on the Arup Green Belt Review**

It is clear from plan-making guidance that the selection of sites for development under the plan should be based on the full range of relevant evidence of site suitability. The sites that have been selected for this Plan have been based solely on the Arup Green Belt Review. This comment is not to criticise the Arup Review, but the Arup Review has its purpose – to assess the performance of sites in the District's Green Belt against the 5 Green Belt Purposes, to consider their role in the performance of the wider Green Belt, and to suggest whether each site assessed could, should or should not be considered for release. The Arup Review does not, and does not purport to, consider important aspects of site suitability such as flooding, highways, education provision, biodiversity etc. Furthermore, the Arup Review cannot be expected to consider the economic or socio-political implications of site selections.

The selection of sites for the Regulation 18 draft was based solely on the recommendations of the Arup Green Belt Review. When challenged as to why the selection process had not included other relevant evidence, the response given by the Spatial Planning team to councillors was that the statutory consultees did not have time to comment on all sites that might be considered in order to refine the selection, but that the consultees would be asked to comment on the sites selected prior to the Regulation 19 Consultation. This, of course, makes a mockery of the site selection process.

**Councillors were not given time to consider documents or debate the sites selected**

Councillors were given very little time in the schedule of meetings leading up to, first, the Regulation 18 and, then, the Regulation 19 consultations. Those who raised concerns were told that their concerns would be noted and considered, but there was no opportunity for debate. In reality, there was only one major change made to the site selection between the Regulation 18 and 19 drafts - a site that did not have good access was deselected due to limitations on putting a road across common land which was a point that had been raised by the ward councillor for that ward.

Whilst there was little time during the PP&CC meetings for consideration of the various sites, there was also very little time given to the councillors to consider the thousands of pages of appendices they were expected to read and digest in the 10 days between the issue of the agenda pack for the meeting and the meeting itself. As a result, the councillors were highly dependent on the 5-10 minute briefings given by the Spatial Planning team during every meeting for their understanding of the subjects on which they were being asked to vote at each meeting. Inevitably, a 5-10 minute briefing cannot compensate for sometimes over 2,000 pages of background material, so councillors were frequently making decisions from a position of relative ignorance.

This situation was particularly pertinent in the meeting at which it was requested that councillors give their authorisation to progress the Regulation 19 Draft Plan to consultation. The agenda pack consisted of in excess of 2,000 pages and included an important report commissioned by SADC from respected consultants AECOM. This report detailed and evaluated 8 different scenarios for Green Belt release, each of which could provide the basis for a local plan in the District. The various scenarios differed in the quantum of housing development that could be accommodated – some scenarios of smaller magnitude than the level selected by SADC, some of greater magnitude. This report was not highlighted to councillors and there was no discussion as to which scenario was the better scenario for the District. For example, under 4 of the scenarios, there would be no Green Belt release in the south of the District. This is a critically important discussion and one which was not offered to the councillors.

In addition, there has been no justification for the level of development proposed, and more particularly, the level of Green Belt release proposed, when considered against the District's Green Belt and Heritage constraints. The only justification for Green Belt release is to meet housing targets. Whilst this may become the only consideration under any future NPPF, the December 2023 NPPF still expects planning authorities to justify changing their Green Belt boundaries in consideration of a wider range of priorities – not just meeting housing targets.

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Housing Need – Policy SP1 – A Spatial Strategy for St Albans**

*The policy is unsound – it is not justified, effective or consistent with national policy*

Strategic Policy SP1 sets out the housing requirement for St Albans is 885 dpa (14,603 homes across the plan period). This is consistent with the existing standard methodology calculation. However as referenced above, the proposed new standard methodology will increase the Council's required figure from 885 dpa to 1,544 dpa, a significant increase of 74%

The Council is therefore going to need to allocate a significant number of additional residential sites in order to meet this figure in the immediate future. It appears the Council are simply delaying the inevitable and should seek to address this now rather than once this plan has been adopted.

The above notwithstanding, the standard method figure is the starting point for assessing housing needs and should not be used as a ceiling. Paragraph 61 of the NPPF states:

*"To determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance. The outcome of the standard method is an advisory starting-point for establishing a housing requirement for the area".*

We therefore consider the Council should be taking a forensic and proactive approach in allocating residential development across this District, utilising every opportunity, and leaving no stone unturned.

The NPPF is also clear that Councils are required to take into account housing needs that cannot be met in other areas when establishing their housing figures. Paragraph 11 of the NPPF states:

*"b) strategic policies should, as a minimum, provide for objectively assessed needs for housingand other uses, as well as any needs that cannot be met within neighbouring areas".*

N.B emphasis added.

Paragraph 61 of the NPPF states:

*"In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for".*

As referred to above, we have not been able to identify any reference of the Council liaising with any of its neighbouring authorities to establish whether the Council could assist in delivering unmet need from elsewhere. Moreover, as set out above, there is clearly a significant shortfall of housing within the SWH HMA, and it is unclear if the Council has taken this into account when arriving at its understanding of the appropriate housing need for the DLP.

In addition to the unmet needs in Hertfordshire the Council will also need to take into account the unmet needs arising in London. Following the examination of the London Plan reductions in the targets across London Borough's means that there is a shortfall of some 140,000

homes compared to what is needed between 2019 and 2029 across the capital placing additional pressure on areas around London. We recognise that such significant shortfalls cannot be addressed by one authority. However, if they are continually ignored by all LPAs that surround the capital the impacts of this undersupply across the wider southeast will never be addressed.

**Housing Supply**

We support the Council's decision to amend the current Green Belt boundaries in order to meet housing needs in full and agree there are exceptional circumstances required to support making amendments. However, we consider the high cost of housing in the area, the pressure of under supply in the market due to unmet housing needs in London, and the lack of development opportunities in urban areas are sufficiently severe to warrant further releases to address some of the unmet needs in neighbouring areas and to provide a more significant buffer between housing needs and supply. Furthermore, the impending uplift to the District's minimum housing need requirement adds further impetus and importance to assessing and identifying further appropriate land to be released to meet housing needs.

Paragraph 35 of the NPPF sets out to be found 'sound' local plans need to be *effective*, in that the polan should be deliverable over the plan period. Regarding its housing supply, the Council is proposing a buffer of just 385 homes (2%) above its housing requirement.

We are concerned that this buffer is not sufficient to ensure that the DLP can be found to be deliverable over the plan period (required by paragraph 35(c) of the NPPF). This is especially concerning given the Council's reliance on the delivery of strategic sites. The Council's supply contains the following components:

- Existing Permissions –*2,176*
- Windfall Allowance –*2,103*
- Harpenden NP Allocations –*57*
- Hemel Garden Communities –*4,300*
- Broad Locations (250+) – *4,077*
- Large Sites (100-249) - *385*
- Medum & Small Sites –*851*
- Green Belt (PDL) - *137*
- Sites within urban settlements (HELAA) - *43*
- Sites within urban settlements (UCS) - *860*

Out of the 14,989 homes within its supply, the Council is seeking to deliver 8,377 through large scale strategic sites (Garden Communities & Broad Locations). This raises several concerns.

The first of relates to issues arising from Council's relying on larger strategic sites being delivered and the long lead in times associated with these. The Council state they have in their assessment of delivery rates on the strategic site allocations used the latest iteration of Start to Finish (3rd Edition) published by Lichfields. While the use of this information is welcomed, as it provides a reasonable starting point on which to set delivery rates, it also shows that some sites – and specifically strategic scale sites, deliver much more slowly than others: and why an appropriate buffer between overall need and supply is necessary.

We therefore consider that to reduce the risks associated with larger scale strategic developments, the Council should be seeking to allocate additional smaller/medium/large scale developments, across the plan area, providing a range of developments (housing types, sizes, locations) to ensure sufficient flexibility is built-in to the DLP and ensuring it can deliver on its housing target and address the District's required housing needs.

This point is set out at paragraph 70 of the NPPF which states "...*small and medium sized sites can make an important contribution to meeting the housing requirement of an area and are often built-out relatively quickly*". We would therefore advocate that the DLP's buffer should be increased from the current 2% to between 5 – 10% for this purpose.

We also note the supply includes 2,103 units from windfall. This equates to 14% of the DLPs total supply. At the time of writing, we have not been able to fully interrogate the evidence for this source's level of delivery. We will continue to review the evidence following conclusion of the consultation period and respectfully reserve the right to make further submissions on this aspect of the plan through the Examination stage if appropriate.

With regard to the trajectory provided in Table 3.2 of the DLP, we would have expected further information to be provided on the expectations for each site. On the basis the Council has broken down supply into broad categories of site this evidence must be readily available and is necessary for all parties to properly consider whether the rate of delivery on each site is justified. It is our experience that where site-by-site trajectories are not provided, they are asked for by inspectors in order to ensure effective scrutiny of the local plan. Rather than wait to be asked we would suggest the trajectories are published from the outset as part of the evidence supporting the submitted local plan.

**Stepped-Trajectory**

We do not consider the stepped trajectory to be sound. For the first five years the DLP makes no attempt to boost supply despite the severe shortfalls in housing deliver. The Council have alighted on a strategy that delivers a significant number of homes at the end of the plan period with the consequences of this being limited delivery in the early years of the plan.

More can be done to address this though allocation of small, medium and appropriate larger sized sites. The strong housing market in St Albans would suggest that such sites would come forward quickly on the adoption of the plan and begin delivering the homes St Albans needs in the short term. This would also support the Government's ambitions of delivering 1.5 million homes in the next five years and which are considered essential in addressing the housing crisis the Country is currently in.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**CONCLUSION**

These representations have been prepared on behalf of Moralis Group in response to the Council's draft Local Plan (Regulation 19), specifically in respect of Land to the South of Lye Lane (the "Site").

In the first instance, we are significantly concerned that the Council is deliberately speeding up its local plan process to benefit from the transitional arrangements set out in the proposed updated NPPF. By rushing to make this deadline, we are concerned there is insufficient time to properly review & submit a 'sound' local plan.

The Council's current standard methodology figure is 885dpa. This will be increasing to 1,544dpa - an uplift of +659dpa under the revised standard method. We therefore consider the Council is only delaying the inevitable by moving forward at pace with the DLP now. We consider it would be much more prudent for the Council to delay submission of this DLP and seek to proceed here on with an updated DLP which will be in line with the requirements of the new NPPF.

Regarding the Duty to Cooperate, no detail has been provided to whether St Albans has engaged with any of its neighbouring Council's or other parties to discuss these issues. We are therefore concerned that the Council has not worked proactively with its neighbours to address any cross-border issues such as honey needs across the sub region. Furthermore, it is clear that there is a significant shortfall of housing within the SWH HMA, and it is unclear if the Council has taken this into account and whether it could assist in delivering unmet need from elsewhere.

We are also concerned the Council is seeking to deliver a large majority of its housing through large scale strategic sites, which usually have long lead in times so do not contribute to the housing supply in the early years of the plan.

Considering the above, we consider the Council should leave no stone unturned through this current plan review and the DLP to identify and allocate appropriate additional sites that could contribute to delivering and meeting more of the areas housing requirement/needs.

We consider our client's site can make a meaningful contribution towards housing land supply such that it can form part of a *sound* spatial strategy. Whilst it currently lies within the Green Belt, it does not make a strong contribution to the purposes of including land within the Green Belt.

Given the significant housing shortfall within the HMA, significant affordable housing shortfall within St Albans, and the significant increase in the Council's housing targets within the proposed NPPF, we consider the Council should seek to release additional land from the Green Belt and allocate this for housing.

We therefore do not consider that the Council's currently local plan is 'sound' as it is not positive prepared, justified, effective or consistent with national policy.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

**PARTICIPATION AT THE EXAMINATION**

In the event the Council do proceed to submit the DLP for examination, we can confirm we would welcome the opportunity to participate in the Examination – through written hearing position statements and participation at Hearing Sessions in order to articulate, and if considered appropriate to expand upon on, the representations provided in this statement.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Ref. Invitation to help scrutinise our Draft Local Plan
1. 'the population is growing':
The population has been decreasing since 1965. Why do we need more homes, schools etc.
2. 'The population is growing'. 'where will people live':
The population grew from 1946 to 1964 (baby boomers) by 2044 they will most be all dead. What's left will be either dying in some home, hospice or hospital trolley in some corridor. This will leave plenty houses, flats and ever growing numbers of housing for over 60 | retired, empty and available. With less population no need for schools, doctors, homes etc, etc.

## 349 - Lisa Peters

Submission Number: 349 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Housing Need Calculations**

In its regulation 18 response, CHPC questions the reliability of the housing need calculations within the Local Plan (LP), particularly those based on outdated 2014 data projections. Given the evolving demographics and changing housing demands, CHPC urges SADC to update these figures using the most recent data from the Office for National Statistics. The Council also recommends that future Local Plan updates include regular revisions of housing need assessments to ensure they reflect current and projected population and economic trends.

Regarding **PolicySP1**, CHPC acknowledges that the Government's required 'Standard Method' for calculating local housing need has been followed. However, the Council raises concerns about the accuracy of the proposed target of at least 14,603 net additional new houses, or 885 per annum, in the period from 1 October 2024 to 31 March 2041. CHPC recommends that SADC consider recalculating the housing need in line with updated demographic data, as the current projections may not fully reflect the parish's capacity, infrastructure limitations, or the specific needs of the local population.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Strategic Policy SP1: A Spatial Strategy for St Albans District**

The settlement hierarchy is set out at Table 1.3 of the DLP. Harpenden is identified as a tier 2 settlement, being one of the most sustainable locations for growth and development, and has been rightly placed above London Colney in the settlement hierarchy. Its key characteristics include provision of employment and high order services such as secondary education, retail and leisure, offering bus routes, cycle lane provision and connectivity by mainline train. Notwithstanding that St Albans and Hemel Hempstead are larger and defined in Tier 1 of the hierarchy, the size and nature of Harpenden means that there is a need to release land from the Green Belt (such as site M7) and allocate it for housing to meet Harpenden's needs for affordable housing and to support the town's economy. Hill continues to strongly support this approach.

It is noted that the policy sets out that "*Growth will be located to make the most sustainable use of land in urban areas and then the Green Belt.*". Hill agrees with this as a general approach, as it is consistent with paragraph 146 part (a) of the NPPF. Specifically, given that there is insufficient capacity to meet the LHN within the urban area, it is clear that exceptional circumstances do exist for Green Belt review. Further, it should be fully acknowledged that the brownfield-first strategy remains unchanged from previous years. There has always been a presumption in favour of the redevelopment of brownfield land and the pipeline of brownfield sites located within the urban area and coming forward for development is unchanged. Hence, in the context of the record of under delivery and low housing land supply, Green Belt release is now essential and the only remaining option for SADC to meet their LHN.

Hill therefore reiterates the point made in their Regulation 18 representation and considers that the reference to "*the approach seeks first to develop Brownfield Land*" should be removed as it is confusing, and if read in plain terms, is not effective or consistent with national policy. Meeting the identified need and requiring housing delivery to be made on all brownfield sites first, if that is to be interpreted as some form of phasing, will not deliver a sufficient supply of housing sites in the early part of the plan period and will not redress the results of the Housing Delivery Test. Clearly the statement 'seeks first to develop' Brownfield Land would hinder the deliverability of the plan by delaying the delivery of sustainable allocated sites on greenfield land.

Hill strongly supports SADC's proposal to meet at least the identified housing need of 885 dwellings per annum (dpa) over the plan period, as calculated by the standard method. However, it is noted that the policy states SADC will identify and allocate 14,603 net additional houses over the plan period which equates to only 16.5 years. The Regulation 18 consultation calculated housing need on a full 17 year plan period and it is not clear or justified in the evidence base why this has now reduced. The most recent South West Herts Local Housing Needs Assessment Update (LHNA, 2024) is based upon 17 years and states in Table 2.1 that the SADC plan period is 2024-2041.

The identified housing need of 885 dpa over the plan period (17 years) would be 15,045 net additional houses, therefore the policy should reflect this in order to be consistent with the objective to meet LHN and be positively prepared and justified.

Notwithstanding the above, it is highly relevant that before the Regulation 19 consultation was published for consultation, new proposed changes to the NPPF were published and there is no mention of this or the government's direction of travel within the DLP. As part of the proposed changes, the draft NPPF removes reference to the housing target as 'an advisory starting point', requiring local planning authorities (LPAs) to plan for their identified housing need as calculated under the new standard methodology, published alongside the draft NPPF.

Under the new standard method, SADC's LHN would increase from 885 dpa to 1,544 dpa, representing an additional 659 dpa (75% increase). The draft Local Plan 2041 seeks to accommodate only 14,603 homes over the plan period, as referred to above. The new SM LHN would increase this requirement to 26,248 homes over the 17 year plan period.

Given the Council's identified LHN figure could rise significantly if the draft NPPF is published in line with the consultation version, it is important to consider the potential implications for SADC's DLP. On 29th August 2024, the Council announced that it would accelerate its timetable for consultation and examination of its DLP "in light of the proposed changes to national planning law". The reason given was to avoid being "forced to delay submission by 2-3 years in order to identify sites for a further 11,000 homes that the new government proposals require".

Subsequently, on 23rd September 2024, the Planning Policy and Climate Committee met, at which:

1. the Green Belt Review and Regulation 18 Site Allocations – and the hundreds of critiques of them – were reviewed for the first time; and
2. the Committee voted to proceed to Regulation 19 Consultation, with the aim of submitting the DLP for examination in December 2024.

Such haste, however, would not diminish the Council's responsibility to meet its obligations under the new NPPF changes if adopted as proposed, as even if the DLP qualifies as being "at examination" within a month of the NPPF being published. The proposed transitional arrangements state (Appendix 3, Chapter 12 [5]):

*"... if the revised LHN figure is more than 200 dwellings per annum higher than the annual housing requirement set out in the adopted version of the plan, upon introduction of the new plan-making system, the local planning authority will be required to begin preparation of a plan under the new system as soon as possible, or in line with any subsequent arrangements set out to manage the roll-out of the new system*."

Furthermore, there can be no confidence that the latest DLP will be found to be sound given the significant and serious objections to the Regulation 18 DLP and the Council's admission at the Planning Policy and Climate Committee on 23rd September that:

"*The accelerated timescale to Submission (intended on 2 December 2024) means that there will be less time to undertake work to support Submission of the Plan and Examination, which raises the risk of having to withdraw the Plan at Examination. This is primarily because, at point of Submission in December 2024, rather than the end of March 2025:*

*1 - There will realistically be fewer agreed and signed Statements of Common Ground to assist the Inspectors.*

*2 – There will realistically be fewer and less extensive Topic Papers to assist the Inspectors.*

*3 – There will realistically be less time preparing responses to Objections or concerns raised at Reg 19 stage to assist the Inspectors*."

Hill is concerned that by accelerating the submission of the DLP for examination and the clear issues raised by the Committee above, there is a risk that the plan is not positively prepared or justified. The letter from Matthew Pennycook to the Chief Executive of the Planning Inspectorate (dated 30 July 2024), urged inspectors to be "pragmatic" in reviewing plans and to refuse to review plans which are likely to be found unsound. This is a significant consideration in the timing of and level of preparation for submission. The plan could be rejected if the necessary preparatory work and evidence base as listed above has not been undertaken and is intended to be backfilled during the examination process.

Notwithstanding the above concerns, in the event the DLP is accepted for examination with the current standard method housing need figure (885 dpa) the below matters are raised for the Council's consideration.

The level of housing requirement must be set as an absolute minimum, with flexibility provided through site allocations over and above the requirement because of the context and historic record of delivery performance. There has been a failure to build sufficient homes to meet needs over preceding years. This lack of supply in St Alban's and across south west Hertfordshire has meant, as the Council note in paragraph 1.24 of the DLP, that average house prices are very high throughout the district, with St Albans being amongst the least affordable areas to live in the UK. This position is unsustainable and must be redressed through this local plan.

We would highlight that, as a result of the affordability crisis in the District, it is not only a challenge for prospective buyers, but also for employers like Rothamsted to attract and retain staff. The most recent LHNA (2024) indicates that for St Albans, there is an net annual need of 449 affordable homes for rent and 353 affordable homes for ownership, which totals a net need of 802 affordable homes per annum, which accounts for 90% of the total annual housing need figure. This significant level of affordable need reflects the under delivery of housing in general which has resulted in an average annual delivery of affordable homes since 1994/95 of just 73 dpa.

Further, the LHNA states at paragraph 6.76 that the Councils should consider (amongst other factors) the effects of different growth options on the delivery of affordable housing in line with the PPG which sets out that an increase in total housing figures in plans may be considered when this approach could help to deliver the required number of affordable homes.

Despite strong housing pressures and demands, there has historically been significant under-delivery of new homes to meet LHN in SADC. As evident from the most recent 2022 Housing Delivery Test (HDT) results, covering the period 2018-2021, only 55% of the identified need has been achieved in SADC, and the 2023 HDT is expected to worsen still to 52%.

Given the significant affordability pressures in SADC, there is an urgent need to put in place an adopted plan, releasing land from the Green Belt to ensure that a significant uplift in delivery (to at least 885 dpa) can be achieved. Early delivery of sites must be maximised and made a priority in order to begin to help stabilise and improve affordability as early as possible. On this point it is of concern that the housing trajectory still shows a stepped requirement, as proposed at Table 3.2. Given the points above, there is clearly a need to bring forward at least the 885 dpa needed from the outset i.e. to help redress historic significant under-delivery. This point is considered in further detail under Policy SP3.

In addition to the above, and the approach to meeting LHN as an absolute minimum, it is noted that there is no mention of unmet housing need within the policy or supporting text and how this might impact the housing requirement. The LHNA stipulates at paragraph 6.70 that at the current time they are not aware that any of the 5 authorities (Dacorum, Hertsmere, St Albans, Three Rivers and Watford) have agreed to take on unmet need from adjoining areas, including SADC.

The Statement of Common Ground document includes a table that indicates SADC has considered the approach to accommodating unmet housing needs that may exist within the wider Housing Market Area for Dacorum, Hertsmere, Three Rivers and Watford, albeit there is no information

about any discussions or conclusions on this matter, with the statement advising that "*More detailed matters specific to SADC and individual Duty to Co-operate partner organisations will be covered by individual Statements of Common Ground between SADC and the relevant organisation*". Further, there is no indication of any consideration or discussion regarding unmet need with other neighbouring authorities such as North Hertfordshire, Welwyn Hatfield and Central Bedfordshire.

As noted in the Sustainability Appraisal (SA) (2023), there will in fact be a significant level of unmet housing need from neighbouring authorities (e.g c.7,000 homes for Three Rivers, c.3,000 homes for Hertsmere, c.2,800 homes for Dacorum and as yet an unidentified but significant level of unmet need for Welwyn Hatfield and London boroughs such as Enfield, Harrow and Barnet). As such, the SADC should consider the unmet need position now. It will be important that these needs, and those of London, are considered through this Local Plan in accordance with paragraphs 61-010 – 61-012 of the Planning Practice Guidance (PPG) and should not be delayed or rely on it being addressed at examination or through the preparation of the South West Herts Joint Strategic Plan.

Currently the Duty to Cooperate is still a legal requirement and whilst the proposed Levelling-up and Regeneration Act 2023 will revoke the Duty to Cooperate in relation to the reformed plan making system, in due course, the proposed NPPF changes seek to retain and strengthen the Duty to Cooperate policy. As such it will be important for SADC to consider how it could increase its own housing requirement/supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

It is noted that the SA recognises that there are strategic arguments for considering a housing requirement both above and below LHN, testing 8 growth scenarios from 14,517 homes at the lowest level to 16,389 homes at the highest level over the plan period. However, it should be highlighted that the preferred growth scenario (Scenario 3) provides for 14,989 homes and does not meet the LHN of 15,045 (based upon the full 17 year plan period). This approach is inconsistent with SADC's objective and proposed spatial strategy to meet the LHN over the plan period and as a result, is not positively prepared or justified.

The summary appraisal of the reasonable growth scenarios set out in Table B from the SA Non-Technical Summary shows that a higher level of growth (Scenario 4) has a higher number of best performing topics than the preferred Scenario 3 option. The summary discussion even states that the appraisal matrix shows a very mixed picture, suggesting that the choice between the reasonable alternative growth scenarios is finely balanced. This is a strong indication of their 'reasonableness', in that all or most could arguably deliver on key objectives and their performance varies 'at the margins'.

Consequently, the SA assessment does not suggest that higher levels of growth are unreasonable and should be dismissed. In fact, it states that the lowest growth scenarios would generate unmet need, whilst the highest growth scenarios would allow for: A) a generous 'supply buffer' as a contingency for delivery issues; and/or B) flexibility to consider a housing requirement modestly above LHN. This could provide further flexibility and help to address affordability issues and some of the unmet housing needs of neighbouring areas.

Further, with regards to higher growth, paragraph 5.2.31 of the SA concludes that there is now an increased strategic argument for higher growth, particularly given unmet need, but also noting the Government's direction of travel at the time of writing (August 2024), which is focused on a strengthened drive to meet housing and other development needs.

As a result, Hill consider that the assessment indicates the higher growth options to be reasonable alternatives, especially in the context of significant unmet need in neighbouring authorities, acute affordability issues and proposed NPPF changes. Further detailed consideration should be undertaken of the higher growth options as reasonable alternatives within the SA to ensure that a sufficiently justified, appropriate and positive strategy is put forward and ensure it accommodates the LHN over the full 17 year plan period.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

## 352 - Cllr Mike Hobday

Submission Number: 352 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: St Albans Council Labour Group Name: Cllr Mike Hobday

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We wish to object to the Reg 19 Local Plan.

We believe that it is unsound (National Planning Policy Framework, section 35) insofar as its contents are not justified given the alternatives and that it is not consistent with national policy.

Our primary objection is that the plan insufficiently follows the brown-field – grey-belt – green belt sequence. This is contrary to numerous parts of the National Planning Policy Framework, including:

- Para 123: “makes as much use as possible of previously-developed or ‘brownfield’ land”
- Para 124 (c): “give substantial weight to the value of using suitable brownfield land”
- Para 146 (a): “make[s] as much use as possible of suitable brownfield sites and underutilised land”
- Para 147: “Where it has been concluded that it is necessary to release Green Belt land for development, plans should give first consideration to land which has been previously-developed”

This failing has both district-wide and local consequences:

- At a District level, table 3.2 (page 26 of main document) suggests that only 903 homes (6% of 14,989) are explicitly built on brownfield land and only 137 (0.9%) on grey belt land (previously developed land in the green belt). While both these figures are likely to rise through windfall sites, this may well not reach a reasonable expectation of avoidance of green belt development.
- At a local level, individual sites have been proposed which prioritise development on high-quality agricultural green belt over brownfield and grey belt land. In London Colney, which we represent as councillors, this has led to the prioritisation of development on prime agricultural land on Shenley Lane, south of Napbsury Park (site B6) and decisions not to propose development on brownfield land at the increasingly derelict Riverside Industrial estate or on the previously developed grey-belt land at and behind the Pastoral Centre further south along Shenley Lane.

The council’s process to determine sites for development was flawed. A scoring system was used to assess the suitability of different sites for development, but the results were ignored. Each site was considered and scored as a weak, medium or strong development case under 31 criteria.

- The “broad location site” West of London Colney and South of Napsbury Park scored: 10 weak, 10 medium, 11 strong. This is recommended by the council for development.
- In contrast, the site south-west of Willowside, London Colney scored: 8 weak, 9 medium, 14 strong. Land at the corner of the A1081 and Courser’s Road scored: 4 weak, 13 medium, 14 strong. Land south of the A414, north of the London Colney by-pass scored: 6 weak, 12 medium, 13 strong. The All Saints Pastoral Centre, mentioned above, scored: 11 weak, 11 medium, 9 strong. Land east and south of the A414 scored: 4 weak, 13 medium, 14 strong. The rural estate north of Napsbury scored: 4 weak, 1 medium, 16 strong. All of these sites score higher, yet none are recommended for development.

We are not advocating for development on specific sites, but simply saying that the council adopted a flawed methodology.

The council has ignored its scoring system in favour of a political preference to build on the outskirts of existing settlements. This runs counter to the primary purpose of the green belt, to check the unrestricted sprawl of large built-up areas. We believe that the most valuable green belt land is that which the public see and have access to, namely that adjacent to built-up areas. The council’s approach deliberately targets the most valuable green belt in the district for development.

The council’s consideration of development sites, at its planning policy committee in September, was flawed in that it did not include the Riverside Industrial Estate in London Colney, recommended for housing development by the London Colney Parish Council. This was rejected by the council at Reg 18 stage on the basis that employment land is required in London Colney. Yet this decision to protect dated and mainly unused employment land did not account for the high-quality employment land being developed at the Strategic Rail Freight Interchange a few minutes’ drive away. Given the railfreight development, the case to retain the Riverside Industrial Estate is weaker.

The council's determination to find the simple route of allocating green belt agricultural land for massive development came as a result of consistently down-playing options for brown-field development. For example:

- The council has been slow to redevelop council housing garage sites, which would be suitable for social housing. The garage site around the former Cotlandswick Community in London Colney is in poor repair and has no garages let. Planning permission for redevelopment for flats was granted in 2013, but the garages remain derelict. Other large garage sites, such as that behind 80-82 Five Acres in London Colney remain unused.
- The council has taken too restrictive an approach to the development of taller buildings. It is entirely reasonable, indeed laudable, to protect views of St Albans Abbey. But views of other protected buildings, such as Trinity URC Church, St Alban and St Stephen Catholic Church and Christ Church may not merit this same level of protection. The purpose of expressing this concern is not to advocate tall buildings on individual sites, but to show that the council has taken an extreme approach to discouraging brownfield development.

We further wish to object to the settlement hierarchy, table 1.3, which seeks to redesignate London Colney from a village to a town. There is no evidence that this matches the understanding, vision or aspirations of local residents who repeatedly say that they see London Colney as a village. It is believed by many that this is an inappropriate and artificial device, designed purely to facilitate future development proposals.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

It is important that the Inspector hears and can question objections to the council's failure to brownfield - greybelt - greenbelt principle

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 354 - Kitewood

Submission Number: 354 Submission Date: 14/11/24 09:00

Respondent: Company/Organisation: Name: Miss Sara Sweeney

On Behalf Of Company/Organisation: Name: Kitewood

Comment Number: 5

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

***Policy SP1- A Spatial Strategy for St Albans District***

We maintain our support for Strategic Policy SP1: *A Spatial Strategy for St Albans District*, which recognises the importance of Hemel Garden Communities as a well-planned sustainable development and we recognise that policy requires that *"Growth must be supported by the necessary community infrastructure, transport improvements, green spaces and tree planting."*

In order for development in the HGC Growth Area to be delivered in the plan period, the infrastructure requirements identified within the Infrastructure Delivery Plan (IDP) need to be provided to facilitate comprehensive and sustainable development. These include the M1 Jtc 8 Enhancement Phase 2 (which includes the 'Sustainable Transport Corridor') and the M1 Jtc 8 Enhancement Phase 3 which are both noted in the IDP as being critical delivery items.

*We consider that for the policy to be effective a joined-up approach is required by St Albans City & District and Dacorum Borough to ensure the infrastructure items that relate to the Growth Area that are set out in the Councils' respective Infrastructure Delivery Plans are fully aligned, and these accord with the HGC Infrastructure Delivery Plan.*

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

*We consider that for the policy to be effective a joined-up approach is required by St Albans City & District and Dacorum Borough to ensure the infrastructure items that relate to the Growth Area that are set out in the Councils' respective Infrastructure Delivery Plans are fully aligned, and these accord with the HGC Infrastructure Delivery Plan.*

1. Kitewood Estates letter to SACDC Reg 19 Local Plan Consultation Final 08112024_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Kitewood is a development company and landowner of part of the proposed Hemel Garden Communities (HGC) Growth Area to the north and east of Hemel Hempstead. Our landholding falls wholly to the north within Dacorum Borough, and abuts the boundary with the St Albans City & District, adjacent to the Reg 19 Local Plan proposed allocation H1- north Hemel Hempstead.

Kitewood considers that the *Draft Local Plan 2041 Regulation 19 is Legally compliant*, has been *Positively prepared*, is *Justified*, and is *consistent with national policy*.

However, we do not consider that Policies SP1, SP8 and TR1 are effective because all the evidence does not yet exist to demonstrate effective joint working on cross-boundary strategic matters.

***Kitewood therefore request participation in the forthcoming Examination in Public to discuss policy matters relating to the Proposed site allocations H1, H2, H3 and H4***

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 356 - Rachael Donovan

Submission Number: 356 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Hertfordshire and West Essex ICB Name: Rachael Donovan

Comment Number: 6

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

*Strategic Policy SP1: A Spatial Strategy for St Albans District*

The HWE ICB notes the Spatial Strategy is based on the Government's required 'Standard Method' for calculating local housing need and allocates 885 dwellings per annum in the period 1 October 2024 to 31 March 2041. In this response, the HWE ICB has reassessed and reviewed the impact of the spatial strategy against health infrastructure needs, which can be found in section 3.

The proposed changes to the Standard Housing Methodology as set out in the July NPPF consultation, will substantively uplift local housing requirements in St Albans, which in turn will have health infrastructure implications for St Albans, and bring significant challenges to the NHS. Under these new proposals where the new standard methodology uplifts annual housing requirements, further speculative planning applications are likely to come forward, compounded by the proposed transitional arrangements.

Within Hertfordshire and west Essex, where Local Plans are in preparation, the HWE ICB has seen a significant increase in the number of speculative planning applications. Where this happens, it has happened at the expense of properly planned for health services and infrastructure to support housing growth. Infrastructure planning is a precursor to the successful delivery of housing and employment growth. Therefore, the absence of proper infrastructure planning can detrimentally impact existing and new communities and businesses and lead to negative perceptions of new development.

The HWE ICB responded to the NPPF consultation suggesting where Hertfordshire and west Essex local authorities are vulnerable to speculative planning applications, it would be sensible to allow these local planning authorities to progress their Regulation 19 Local Plans on lower housing targets, but in parallel to revisiting evidence on land supply and delivery constraints to identify where the shortfall in housing can be met.

## 359 - Betsy Brown

Submission Number: 359 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Natural England Name: Betsy Brown

Comment Number: 14

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

**Summary of Natural England's advice**

**Whilst Natural England has recommended some further modifications to a number of core and site allocation policies, we do not find the Plan unsound on any grounds relating to our remit.**

Natural England has reviewed the Regulation 19 consultation version of the St Albans Local Plan (SALP) and accompanying appendices, together with the Sustainability Appraisal (SA). Our detailed comments on the polices and site allocations are provided in Appendix 1 of this letter. In our Regulation 18 response, we commented in detail on the Evidence base reports made available for this consultation, including a Habitats Regulation Assessment (HRA) provided at the Regulation 18 stage. In this letter, we have commented on new or revised Evidence Base reports that have been published since the Regulation 18 consultation. These comments can also be found in Appendix 1.

Please note that we have not provided comments on all policies, but only those which have the most influence on matters within our natural environment remit. Natural England has no comment to make on the policies not covered in this response. We can confirm that we have no concerns regarding the Sustainability Appraisal or Habitats Regulations Assessment.

The SALP has many positive aspects, and it is good to see that comments made at Regulation 18 stage have been taken on board and expanded in the updated Local Plan. This includes detailed polices on green and blue infrastructure (GI), a climate change policy, integrating of the Local Nature Recovery Strategy (LNRS) into development plans, and a commitment to achieving minimum 10% biodiversity net gain with an aim to exceed this where practicable.

The Plan also acknowledges the Chilterns Beechwoods Special Area of Conservation (SAC) strategic solution and mitigation strategy in light of increased recreational pressures from new development. This has it's own dedicated policy and is referenced for relevant allocations which we are pleased to see.

We have some comments in relation to air quality and the need to consider air pollution issues on the natural environment, both in the Core Policy for Air Quality, and in relation to policies TRA3 (Development Generating New Lorry Movements) and Strategic policy SP8 (Transport Strategy). It is important that in addition to human health, environmental considerations including air quality impacts on air quality sensitive protected sites are included in policy wording.

We have suggested some amendments to policies and allocations in the SALP, specifically around strengthening wording in regards to National Landscape policies, cross-referencing policies, and clarifying certain aspects of the plan. In our view, all our comments in Appendix 1 could all be taken forward as minor modifications, but if they were all acted upon, would leave the SALP much stronger and more coherent in delivering for the natural environment, one of the three central tenets of genuinely sustainable development as set out in the National Planning Policy Framework.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It would be beneficial to create a clear distinction between SANG and Biodiversity Net Gain (BNG) as a mechanism for achieving habitat creation and required SANG criteria.

Despite this, we encourage and are pleased to see innovative approaches to climate mitigation and are happy to review such schemes in the future.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 489319 NE RESPONSE St Albans Local Plan Reg 19 consultation_[R].pdf

---

**362 - EDIT Land Ltd**

Submission Number: 362 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land at Roundhouse Farm, Colney Heath” have been discounted incorrectly

Representations

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

The Reg. 18 Draft Local Plan includes planning policies relating to various topics, which would become the principal consideration for the decision maker when determining planning applications.

EDIT Lands has not provided comment on a number of policies and advise which they are commenting on in the list below, but reserves the right to comment on others in the future.

However, SADC should consider whether all the policies as drafted are useful and necessary for decision making, and do not just repeat that which is already stated in the National Planning Policy Framework (NPPF), Planning Practice Guidance or legislation. Policies should also be unambiguous, clear and concise, without being overly onerous or stifle innovation or ambition.

EDIT Lands main concern with the Local Plan, as a whole, is the weak approach to the provision of much needed housing. Firstly, the level of housing planned for does not seek to address housing need adequately or provide any contingency, nor does it seek to address unmet need or positively plan for previous years of significant under-delivery.

Furthermore, the level of housing which is proposed as windfall, is unsound. 20% of the total housing supply to come forward on sites which do not have allocations, nor are formally identified is not positively prepared and is a huge outlier compared to neighbouring authorities. We consider the proportion of windfall to be wholly inappropriate given the borough's historic poor delivery and acute housing need.

It is also perverse for SADC to suggest that all brownfield sites have been exhausted to necessitate Green Belt release, whilst anticipating that such a high number will come forward via the windfall process. In addition, the Local Plan is heavily reliant on the delivery of a small number of broad growth areas and strategic extensions, namely the Hemel Garden Community which is allocated for net. 5,500 dwellings and 4,281 across the other strategic development sites which are subject to challenging land assembly and infrastructure delivery requirements which will constrain delivery of housing units within the early periods of the Local Plan. St Albans have acknowledged this situation in the reg.19 draft Local Plan where they are now asserting that only 4,300 dwellings will be delivered on the HGC sites within the LP period, a reduction of 450 dwellings from the LP trajectory and 1200 from the wider site allocation. Across all allocated sites within the borough, the council has lost net. 971 dwellings between Reg.18 and Reg.19 stage. There is no explanation, or justification on how the shortfall in housing delivery is accounted for within the revised housing trajectory, or local plan housing targets.

The housing trajectory places significant reliance on these strategic sites without due consideration to implications of these strategic sites not being delivered or brought online in line with the housing trajectory.

The emerging Local Plan is also not prepared positively as it fails to make any consideration to the need for natural growth (and deliverable) within the 'washed over villages' within the green belt, with no consideration paid in detail to areas for release from the green belt in these locations. As outlined in Section 3 of this document our client challenges the methodology which has been applied in the green belt review in light of a failure to apply a macro level analysis to the green belt parcels.

Furthermore the draft Local Plan fails to make provision for custom build and self-building housing typologies despite a clear need being identified in the National Planning Policy Framework no recognition is made to the contribution this typology makes to meeting established demand. We understand that there is a need locally for such housing and failure to plan for such housing, is not positive.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

- SP1: A Spatial Strategy for St Albans District
- SP3 – Land and the Green Belt
- HOU 1 – Housing Mix
- HOU 2 – Affordable Housing
- SP2 – Responding to the Climate Emergency
- NEB 6 – Biodiversity and Biodiversity Net Gain – Comment
- LG5 – Green Belt – Object

In summary, EDIT Land considers the plan fails on Paragraph 35 of the NPPF, and is

fundamentally unsound. Reasons why the plan is not positively prepared and deliverable is discussed in this representation, yet is summarised as below (yet not limited to):

- The baseline housing need figures cited in Table 3.2 and Policy SP1 and SP3 do not appear to be correct and directly contradict the housing need figures published in the AMR 2022, equating to a **shortfall of between 2,271 dwellings**.
- **Level of housing proposed (Standard Method) does not allow for contingency** and is therefore not robust or positively prepared;
- **Lack of recent delivery, 5YHLS,** and lack of contingency warrant a higher housing requirement;
- **Level of windfall sites anticipated is unachievable and speculative**, most sites need to be formally allocated to be sure the level of housing proposed is achievable**.**
- **Green Belt Assessment is flawed due to it not being fine-grain,** with no consideration to the need for natural growth of the washed over settlements within the green belt, which has been deemed to be unsound in the case of the Uttlesford BC Local Plan examination;
- Further sites should therefore be **allocated to account for excessive windfall provision and over reliance on a small number of strategic development sites.**
- Reasonable alternative sites, such as Land at Roundhouse Farm, to the north of Roestock Lane have been **discounted and assessed incorrectly;**

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

EDIT Land suggest that these significant changes are made to the emerging Local

Plan, most notably:

- Greater number of sites allocated, including allocation of a broader range of medium and large size green belt sites within the borough to provide contingency within the early stages of the Local Plan process.
- Green Belt Review to review smaller parcels of land such as Land to the north of Roestock Lane

- Less reliance on speculative windfall sites replaced with a mixture of housing allocations; and
- Need for further Green Belt release to accommodate for the objectively assessed need (including Land at Roundhouse Farm / to the north of Roestock Lane) to ensure

the plan is positively prepared and ultimately sound in accordance with NPPF paragraph 35;

**363 - D'Arblay Investments**

Submission Number: 363 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Ceres Property Name: Rory Baker

On Behalf Of Company/Organisation: Name: D'Arblay Investments

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Please refer to Section 2 of the enclosed representation.

**2 POLICY SP1 – SPATIAL STRATEGY**

**Plan Period**

2.1 To be considered sound, the new Local Plan must align with national policy, which requires a minimum 15-year planning horizon from adoption, per the National Planning Policy Framework (NPPF). The Draft Local Plan (DLP) targets 2041, meaning it must be adopted by March 2026 to meet this requirement.

2.2 The Council's Local Development Scheme also anticipates a March 2026 adoption. However, any delays pose a risk, as the Council won't control the timeline after submission, and main modifications, likely required during examination, could delay adoption.

2.3 We recommend extending the plan period to at least 2042. Alternatively, a policy for an immediate review upon adoption, as used in Brentwood's Local Plan, could be included. Given Green Belt constraints, deadlines for submission in this scenario would be essential.

2.4 Since the DLP is not yet submitted, extending the plan period now could remove the need for an immediate review policy.

**Settlement hierarchy and spatial distribution of growth**

2.5 The Settlement Hierarchy Study primarily uses a quantitative approach based on population size, accessibility, available services and facilities, and employment allocations. This method overlooks critical contextual factors that contribute to the role and sustainability of settlements, particularly Green Belt villages like Sandridge. Specifically, it does not adequately account for Sandridge's strategic proximity to St Albans, a larger urban area that provides essential services, employment, and transport connectivity that enhance Sandridge's sustainability. As such, the current methodology fails to provide a justified or accurate representation of Sandridge's functional role within the hierarchy.

2.6 While the Study considers public transport availability in its accessibility assessment, it fails to fully integrate the significance of Sandridge's bus links, specifically route 357, which provides regular and direct access to St Albans, Wheathampstead, and Harpenden. These connections provide access to higher-order services and amenities not present in Sandridge, reducing reliance on car travel. By underweighting this connectivity, the Study's approach is inconsistent with the NPPF's objective of

promoting sustainable development and fails to recognize the potential of well-connected settlements for accommodating modest growth.

2.7 The Study does not factor in the role that larger nearby settlements play in providing key services to smaller Green Belt settlements. For example, Sandridge has a close functional relationship with St Albans, making it more appropriate for a higher classification than settlements with fewer such connections. The omission of this consideration is contrary to the NPPF's requirement for policies that recognize the interdependency of settlements in delivering sustainable development. A more nuanced methodology, considering Sandridge's functional relationship with St Albans, would likely position it at a higher tier and better support modest, sustainable growth.

2.8 By failing to capture Sandridge's potential for modest housing growth—given its proximity and connectivity to St Albans—the Study's methodology restricts sustainable development opportunities, contrary to the NPPF's emphasis on positively planning for the future. A re-evaluation of Sandridge's designation could support proportionate growth that respects Green Belt constraints while enhancing local sustainability.

2.9 In summary, the Settlement Hierarchy Study's methodology is unsound as it lacks justification, does not align with the NPPF's sustainable development objectives, and fails to consider Sandridge's unique context and potential for modest growth. We recommend a review of the methodology to incorporate contextual factors, inter-settlement relationships, and the role of sustainable transport. Reclassifying Sandridge to a higher tier would more accurately reflect its sustainability and suitability for modest development, consistent with NPPF policy.

**Local housing needs**

2.10 We support the use of the Standard Method as outlined in the Planning Practice Guidance (PPG). The NPPF is clear that this method should be applied to determine the minimum number of new homes that strategic policies should plan for (NPPF paragraph 61) and that meeting housing needs as a minimum is essential for a Local Plan to be considered sound (paragraph 35).

2.11 The PPG specifies that the Standard Method generates only a minimum housing figure, not a definitive housing requirement for plan-making. Therefore, we support the reference in Policy SP1 to this figure as a minimum, which we consider essential.

2.12 We suggest that the new Local Plan should also include a policy setting out the housing requirement. The PPG acknowledges that in some cases, it may be appropriate to plan for a higher housing target than the Standard Method suggests.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Please refer to Section 2 of the enclosed representation.

## 2 POLICY SP1 – SPATIAL STRATEGY

### Plan Period

2.1 To be considered sound, the new Local Plan must align with national policy, which requires a minimum 15-year planning horizon from adoption, per the National Planning Policy Framework (NPPF). The Draft Local Plan (DLP) targets 2041, meaning it must be adopted by March 2026 to meet this requirement.

2.2 The Council's Local Development Scheme also anticipates a March 2026 adoption. However, any delays pose a risk, as the Council won't control the timeline after submission, and main modifications, likely required during examination, could delay adoption.

2.3 We recommend extending the plan period to at least 2042. Alternatively, a policy for an immediate review upon adoption, as used in Brentwood's Local Plan, could be included. Given Green Belt constraints, deadlines for submission in this scenario would be essential.

2.4 Since the DLP is not yet submitted, extending the plan period now could remove the need for an immediate review policy.

### Settlement hierarchy and spatial distribution of growth

2.5 The Settlement Hierarchy Study primarily uses a quantitative approach based on population size, accessibility, available services and facilities, and employment allocations. This method overlooks critical contextual factors that contribute to the role and sustainability of settlements, particularly Green Belt villages like Sandridge. Specifically, it does not adequately account for Sandridge's strategic proximity to St Albans, a larger urban area that provides essential services, employment, and transport connectivity that enhance Sandridge's sustainability. As such, the current methodology fails to provide a justified or accurate representation of Sandridge's functional role within the hierarchy.

2.6 While the Study considers public transport availability in its accessibility assessment, it fails to fully integrate the significance of Sandridge's bus links, specifically route 357, which provides regular and direct access to St Albans, Wheathampstead, and Harpenden. These connections provide access to higher-order services and amenities not present in Sandridge, reducing reliance on car travel. By underweighting this connectivity, the Study's approach is inconsistent with the NPPF's objective of

promoting sustainable development and fails to recognize the potential of well-connected settlements for accommodating modest growth.

2.7 The Study does not factor in the role that larger nearby settlements play in providing key services to smaller Green Belt settlements. For example, Sandridge has a close functional relationship with St Albans, making it more appropriate for a higher classification than settlements with fewer such connections. The omission of this consideration is contrary to the NPPF's requirement for policies that recognize the interdependency of settlements in delivering sustainable development. A more nuanced methodology, considering Sandridge's functional relationship with St Albans, would likely position it at a higher tier and better support modest, sustainable growth.

2.8 By failing to capture Sandridge's potential for modest housing growth—given its proximity and connectivity to St Albans—the Study's methodology restricts sustainable development opportunities, contrary to the NPPF's emphasis on positively planning for the future. A re-evaluation of Sandridge's designation could support proportionate growth that respects Green Belt constraints while enhancing local sustainability.

2.9 In summary, the Settlement Hierarchy Study's methodology is unsound as it lacks justification, does not align with the NPPF's sustainable development objectives, and fails to consider Sandridge's unique context and potential for modest growth. We recommend a review of the methodology to incorporate contextual factors, inter-settlement relationships, and the role of sustainable transport. Reclassifying Sandridge to a higher tier would more accurately reflect its sustainability and suitability for modest development, consistent with NPPF policy.

**Local housing needs**

2.10 We support the use of the Standard Method as outlined in the Planning Practice Guidance (PPG). The NPPF is clear that this method should be applied to determine the minimum number of new homes that strategic policies should plan for (NPPF paragraph 61) and that meeting housing needs as a minimum is essential for a Local Plan to be considered sound (paragraph 35).

2.11 The PPG specifies that the Standard Method generates only a minimum housing figure, not a definitive housing requirement for plan-making. Therefore, we support the reference in Policy SP1 to this figure as a minimum, which we consider essential.

2.12 We suggest that the new Local Plan should also include a policy setting out the housing requirement. The PPG acknowledges that in some cases, it may be appropriate to plan for a higher housing target than the Standard Method suggests.

2 STRATEGIC POLICIES

2.1 The following commentary relates to policies and elements of the Council's recently published Regulation 19 PDLP 2041.

Strategic Policy SP1 – Spatial Strategy

2.2 Policy SP1 in the Publication PDLP (PDLP) establishes the proposed spatial strategy for the District through to 2041. Our comments on this policy address three main areas: the plan period, the settlement hierarchy and distribution of growth, and the approach to calculating minimum housing needs.

Plan Period

2.3 For the Local Plan to be sound, it must adhere to national policy requirements. The National Planning Policy Framework (NPPF) mandates that strategic policies should address a minimum period of 15 years from the Local Plan's adoption.

2.4 The PDLP proposes a plan period running until 2041, which would require adoption by March 2026 to meet the 15-year requirement. The Council's Local Development Scheme currently anticipates adoption by this deadline, allowing little room for potential delays. This tight timeline presents a risk, particularly as the Council will not control the schedule once the plan is submitted for examination. Additionally, recent experiences with other Local Plans suggest that main modifications are often required during examination, which could delay adoption due to Council approval processes, appraisals, and consultations. If one refers to Elmbridge Borough Council and Barking Dagenham, the entire process from submission to adoption typically takes 12-24 months for a Green Belt authority, though complex plans or issues can extend this timeline. For example, Spelthorne Borough Council agreed to pause their Local Plan examination in July 2023 to consider implications of revised national planning policy on Green Belt allocations. Overall, while 12-24 months is typical, Green Belt authorities should be prepared for the process to potentially take longer due to the complexities and sensitivities around Green Belt release. Applying a 24 month period from submission of the PDLP to adoption, this means adoption may not take place before December 2026.

2.5 To address this, we suggest that the Council considers extending the plan period to at least 2042 to
allow for more flexibility and ensure that the spatial strategy covers an adequate timeframe.

Settlement Hierarchy and Distribution of Growth

2.6 Policy SP1 highlights the importance of directing growth to the most sustainable locations, prioritizing urban areas before considering the Green Belt. Policy SP1 emphasises that larger settlements provide a comprehensive range of services, employment, retail, and other facilities, as well as better accessibility and connectivity by walking, cycling, and public transport. It designates the City of St Albans as the primary focus in the District for housing, employment, services, retail, the evening economy, education, and healthcare—a recognition welcomed by stakeholders such as Pigeon.

2.7 The PDLP's approach of using a settlement hierarchy as the basis for growth distribution, while not rigidly applying it to growth scales in each settlement, is sound. The hierarchy was developed through the Council's Settlement Hierarchy Study (June 2023), which used a quantitative scoring system to classify settlements within the District. Although quantifying settlement characteristics can be challenging, this method is proportionate, especially since growth allocation avoids oversimplification by incorporating a balanced view of each settlement's attributes.

2.8 St Albans, as a Tier 1 settlement, is the District's most sustainable location for growth and other Tier 1 settlements along with the Hemel Garden Community, should therefore be apportioned the highest levels of development. As the primary urban centre, St Albans offers a wide range of essential services, facilities, employment opportunities, and excellent transport links, making it well suited to support substantial levels of new housing and employment space. By directing a larger share of growth here, the Local Plan would more effectively support sustainable development objectives while protecting the distinct character of smaller settlements within the District.

2.9 SP1 also applies the Settlement Hierarchy in Table 3.1 as the foundation for growth allocation, seeking to locate growth within and adjacent to the larger, more sustainable urban centres in Tier 1 (St Albans and Hemel Hempstead), Tier 2 (Harpenden), and Tier 3 (London Colney). Pigeon endorses this approach, recognizing St Albans' infrastructure and accessibility to housing, employment, retail, and public transport. However, the Council should consider the distribution proportions, as some higher-tier settlements may receive less growth than they are capable of supporting (i.e. St Albans City), while some lower-tier settlements many receive higher growth allocations relative to their hierarchy position.

2.10 For greater clarity in Policy SP1, we recommend refining the text to clarify that growth allocations will reflect the settlement hierarchy with a focus on sustainability and community vitality. Detailed reasoning on how the hierarchy informed the spatial strategy could be placed in the supporting text, rather than the policy itself.

2.11 Policy SP1 further elaborates on the scale and location of growth allocations across the District, which comprise broad locations for large urban extensions of 250+ homes, as well as Large Sites (100-249 homes), Medium Sites (10-99 homes), and Small Sites (5-9 homes). While broad locations primarily target Hemel Garden Communities, they also include, among others, North and East St Albans, areas identified as suitable for higher housing levels. Pigeon supports the identification of St Albans, particularly East St Albans, as a principal area for increased housing.

2.12 This approach avoids over-reliance on very large sites, addressing a previous plan's soundness issue by diversifying housing supply.

Housing Needs

2.13 We support the application of the Standard Method, as outlined in the Planning Practice Guidance (PPG), for calculating housing needs. In accordance with the National Planning Policy Framework (NPPF), this method establishes the minimum number of homes required for strategic planning purposes (NPPF para. 61) and is fundamental to a sound Local Plan (para. 35). Since the Standard Method offers a baseline figure, we fully support Policy SP1 of the PDLP referencing housing numbers as a foundational measure.

2.14 While we are fully supportive of using the Standard Method's minimum housing requirement, it is essential that this draft plan remains adaptable to future increases in housing needs, especially considering the proposed NPPF reforms and the implications of a revised standard method for St. Albans' minimum housing requirements.

2.15 The forthcoming standard method, anticipated under the revised NPPF (published for consultation in July 2024), would set St. Albans' housing requirement at a figure of 1,544, compared to the current Standard Method figure of 885 homes per annum, which translates to 14,603 net additional homes across the plan period. This represents an increase of 659 homes per annum (10,874 in total), which is currently unaddressed in the PDLP. Given that the council aims to submit the PDLP for examination by December 2024—likely preceding the adoption of the new NPPF and proposed Standard Method—the PDLP could initially benefit from the transitional arrangements. However, it would necessitate an immediate review of the Local Plan following adoption to address any updated housing requirements.
2.16 The Council now has an opportunity to refine the PDLP before its submission by including additional sites in sustainable locations which would help to ensure that St Albans' anticipated housing requirements are met without delay, acknowledging the scale of increase between the correct and anticipated local housing requirement. While timely progress on plan-making is encouraged, proactively accounting for anticipated increased housing needs within this draft would enhance certainty around meeting district-wide housing requirements throughout the plan period.
2.17 This goal could be achieved by allocating additional land for housing around the district's most sustainable settlements, particularly within St. Albans as a Tier 1 settlement. This location, as the highest tier in the settlement hierarchy, has the capacity to support substantial, sustainable development, enabling the district to meet higher housing targets effectively.
2.18 Should the council decide to proceed with submitting the PDLP for examination ahead of the new NPPF and Standard Method, we suggest that St. Albans adopt an immediate review policy within the Local Plan to address any additional housing needs arising from the proposed standard method. A policy akin to the Bedford Borough Council Local Plan 2030 policy which commits to an immediate review no later than one year after the adoption of the plan and that an updated or replacement plan will be submitted for examination no later than three tears after the date of adoption of the Local Plan 2030.
2.19 Furthermore, incorporating a supply buffer into the minimum housing requirement would help bolster housing delivery across the district throughout the plan period. This approach aligns with national policy, as the NPPF calls for Local Plans to not only meet their objectively assessed development needs but also to adopt strategies with sufficient flexibility to adapt to rapid changes.
2.20 To ensure flexibility, the Local Plan must accommodate the inevitable fluctuations in housing need and supply that occur over the plan period due to factors such as changing population projections, affordability ratios, and potential site delivery challenges. Incorporating sufficient headroom will enable the Plan to respond effectively to these variations.
2.21 A supply buffer is, therefore, instrumental in addressing fluctuations in housing need and supply, making it essential for an effective, nationally consistent, and positively prepared Local Plan.

2.22 Lastly, the new Local Plan should include a policy that sets a clear housing requirement with the flexibility to consider circumstances where it might be appropriate to exceed the minimum standard. This would further align the Plan with national policy, promoting resilience and adaptability in housing provision across the district
2.23 While Policy SP1 provides a strategic framework in line with the NPPF's soundness tests, adjustments—such as extending the plan period, incorporating a supply buffer, and enabling early review options—would enhance the plan's effectiveness and flexibility. Ensuring that SP1 adapts to potential future housing requirements will help the Local Plan meet both current and evolving demands, securing soundness across all four NPPF criteria.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Please refer to Section 2 of the enclosed representation.

2 STRATEGIC POLICIES

2.1 The following commentary relates to policies and elements of the Council's recently published Regulation 19 PDLP 2041.

Strategic Policy SP1 – Spatial Strategy

2.2 Policy SP1 in the Publication PDLP (PDLP) establishes the proposed spatial strategy for the District through to 2041. Our comments on this policy address three main areas: the plan period, the settlement hierarchy and distribution of growth, and the approach to calculating minimum housing needs.

Plan Period

2.3 For the Local Plan to be sound, it must adhere to national policy requirements. The National Planning Policy Framework (NPPF) mandates that strategic policies should address a minimum period of 15 years from the Local Plan's adoption.

2.4 The PDLP proposes a plan period running until 2041, which would require adoption by March 2026 to meet the 15-year requirement. The Council's Local Development Scheme currently anticipates adoption by this deadline, allowing little room for potential delays. This tight timeline presents a risk, particularly as the Council will not control the schedule once the plan is submitted for examination. Additionally, recent experiences with other Local Plans suggest that main modifications are often required during examination, which could delay adoption due to Council approval processes, appraisals, and consultations. If one refers to Elmbridge Borough Council and Barking Dagenham, the entire process from submission to adoption typically takes 12-24 months for a Green Belt authority, though complex plans or issues can extend this timeline. For example, Spelthorne Borough Council agreed to pause their Local Plan examination in July 2023 to consider implications of revised national planning policy on Green Belt allocations. Overall, while 12-24 months is typical, Green Belt authorities should be prepared for the process to potentially take longer due to the complexities and sensitivities around Green Belt release. Applying a 24 month period from submission of the PDLP to adoption, this means adoption may not take place before December 2026.

2.5 To address this, we suggest that the Council considers extending the plan period to at least 2042 to
allow for more flexibility and ensure that the spatial strategy covers an adequate timeframe.

Settlement Hierarchy and Distribution of Growth

2.6 Policy SP1 highlights the importance of directing growth to the most sustainable locations, prioritizing urban areas before considering the Green Belt. Policy SP1 emphasises that larger settlements provide a comprehensive range of services, employment, retail, and other facilities, as well as better accessibility and connectivity by walking, cycling, and public transport. It designates the City of St Albans as the primary focus in the District for housing, employment, services, retail, the evening economy, education, and healthcare—a recognition welcomed by stakeholders such as Pigeon.

2.7 The PDLP's approach of using a settlement hierarchy as the basis for growth distribution, while not rigidly applying it to growth scales in each settlement, is sound. The hierarchy was developed through the Council's Settlement Hierarchy Study (June 2023), which used a quantitative scoring system to classify settlements within the District. Although quantifying settlement characteristics can be challenging, this method is proportionate, especially since growth allocation avoids oversimplification by incorporating a balanced view of each settlement's attributes.

2.8 St Albans, as a Tier 1 settlement, is the District's most sustainable location for growth and other Tier 1 settlements along with the Hemel Garden Community, should therefore be apportioned the highest levels of development. As the primary urban centre, St Albans offers a wide range of

essential services, facilities, employment opportunities, and excellent transport links, making it well suited to support substantial levels of new housing and employment space. By directing a larger share of growth here, the Local Plan would more effectively support sustainable development objectives while protecting the distinct character of smaller settlements within the District.

2.9 SP1 also applies the Settlement Hierarchy in Table 3.1 as the foundation for growth allocation, seeking to locate growth within and adjacent to the larger, more sustainable urban centres in Tier 1 (St Albans and Hemel Hempstead), Tier 2 (Harpenden), and Tier 3 (London Colney). Pigeon endorses this approach, recognizing St Albans' infrastructure and accessibility to housing, employment, retail, and public transport. However, the Council should consider the distribution proportions, as some higher-tier settlements may receive less growth than they are capable of supporting (i.e. St Albans City), while some lower-tier settlements many receive higher growth allocations relative to their hierarchy position.

2.10 For greater clarity in Policy SP1, we recommend refining the text to clarify that growth allocations will reflect the settlement hierarchy with a focus on sustainability and community vitality. Detailed reasoning on how the hierarchy informed the spatial strategy could be placed in the supporting text, rather than the policy itself.

2.11 Policy SP1 further elaborates on the scale and location of growth allocations across the District, which comprise broad locations for large urban extensions of 250+ homes, as well as Large Sites (100-249 homes), Medium Sites (10-99 homes), and Small Sites (5-9 homes). While broad locations primarily target Hemel Garden Communities, they also include, among others, North and East St Albans, areas identified as suitable for higher housing levels. Pigeon supports the identification of St Albans, particularly East St Albans, as a principal area for increased housing.

2.12 This approach avoids over-reliance on very large sites, addressing a previous plan's soundness issue by diversifying housing supply.

Housing Needs

2.13 We support the application of the Standard Method, as outlined in the Planning Practice Guidance (PPG), for calculating housing needs. In accordance with the National Planning Policy Framework (NPPF), this method establishes the minimum number of homes required for strategic planning purposes (NPPF para. 61) and is fundamental to a sound Local Plan (para. 35). Since the Standard Method offers a baseline figure, we fully support Policy SP1 of the PDLP referencing housing numbers as a foundational measure.

2.14 While we are fully supportive of using the Standard Method's minimum housing requirement, it is essential that this draft plan remains adaptable to future increases in housing needs, especially considering the proposed NPPF reforms and the implications of a revised standard method for St. Albans' minimum housing requirements.

2.15 The forthcoming standard method, anticipated under the revised NPPF (published for consultation in July 2024), would set St. Albans' housing requirement at a figure of 1,544, compared to the current Standard Method figure of 885 homes per annum, which translates to 14,603 net additional homes across the plan period. This represents an increase of 659 homes per annum (10,874 in total), which is currently unaddressed in the PDLP. Given that the council aims to submit the PDLP for examination by December 2024—likely preceding the adoption of the new NPPF and proposed Standard Method—the PDLP could initially benefit from the transitional arrangements. However, it would necessitate an immediate review of the Local Plan following adoption to address any updated housing requirements.

2.16 The Council now has an opportunity to refine the PDLP before its submission by including additional sites in sustainable locations which would help to ensure that St Albans' anticipated housing requirements are met without delay, acknowledging the scale of increase between the correct and anticipated local housing requirement. While timely progress on plan-making is encouraged, proactively accounting for anticipated increased housing needs within this draft would enhance certainty around meeting district-wide housing requirements throughout the plan period.

2.17 This goal could be achieved by allocating additional land for housing around the district's most sustainable settlements, particularly within St. Albans as a Tier 1 settlement. This location, as the highest tier in the settlement hierarchy, has the capacity to support substantial, sustainable development, enabling the district to meet higher housing targets effectively.
2.18 Should the council decide to proceed with submitting the PDLP for examination ahead of the new NPPF and Standard Method, we suggest that St. Albans adopt an immediate review policy within the Local Plan to address any additional housing needs arising from the proposed standard method. A policy akin to the Bedford Borough Council Local Plan 2030 policy which commits to an immediate review no later than one year after the adoption of the plan and that an updated or replacement plan will be submitted for examination no later than three tears after the date of adoption of the Local Plan 2030.
2.19 Furthermore, incorporating a supply buffer into the minimum housing requirement would help bolster housing delivery across the district throughout the plan period. This approach aligns with national policy, as the NPPF calls for Local Plans to not only meet their objectively assessed development needs but also to adopt strategies with sufficient flexibility to adapt to rapid changes.
2.20 To ensure flexibility, the Local Plan must accommodate the inevitable fluctuations in housing need and supply that occur over the plan period due to factors such as changing population projections, affordability ratios, and potential site delivery challenges. Incorporating sufficient headroom will enable the Plan to respond effectively to these variations.
2.21 A supply buffer is, therefore, instrumental in addressing fluctuations in housing need and supply, making it essential for an effective, nationally consistent, and positively prepared Local Plan.

2.22 Lastly, the new Local Plan should include a policy that sets a clear housing requirement with the flexibility to consider circumstances where it might be appropriate to exceed the minimum standard. This would further align the Plan with national policy, promoting resilience and adaptability in housing provision across the district
2.23 While Policy SP1 provides a strategic framework in line with the NPPF's soundness tests, adjustments—such as extending the plan period, incorporating a supply buffer, and enabling early review options—would enhance the plan's effectiveness and flexibility. Ensuring that SP1 adapts to potential future housing requirements will help the Local Plan meet both current and evolving demands, securing soundness across all four NPPF criteria.

2 STRATEGIC POLICIES

2.1 The following commentary relates to policies and elements of the Council's recently published Regulation 19 PDLP 2041.

Strategic Policy SP1 – Spatial Strategy

2.2 Policy SP1 in the Publication PDLP (PDLP) establishes the proposed spatial strategy for the District through to 2041. Our comments on this policy address three main areas: the plan period, the settlement hierarchy and distribution of growth, and the approach to calculating minimum housing needs.

Plan Period

2.3 For the Local Plan to be sound, it must adhere to national policy requirements. The National Planning Policy Framework (NPPF) mandates that strategic policies should address a minimum period of 15 years from the Local Plan's adoption.

2.4 The PDLP proposes a plan period running until 2041, which would require adoption by March 2026 to meet the 15-year requirement. The Council's Local Development Scheme currently anticipates adoption by this deadline, allowing little room for potential delays. This tight timeline presents a risk, particularly as the Council will not control the schedule once the plan is submitted for examination. Additionally, recent experiences with other Local Plans suggest that main modifications are often required during examination, which could delay adoption due to Council approval processes, appraisals, and consultations. If one refers to Elmbridge Borough Council and Barking Dagenham, the entire process from submission to adoption typically takes 12-24 months for a Green Belt authority, though complex plans or issues can extend this timeline. For example, Spelthorne Borough Council agreed to pause their Local Plan examination in July 2023 to consider implications of revised national planning policy on Green Belt allocations. Overall, while 12-24 months is typical, Green Belt authorities should be prepared for the process to

potentially take longer due to the complexities and sensitivities around Green Belt release. Applying a 24 month period from submission of the PDLP to adoption, this means adoption may not take place before December 2026.

2.5 To address this, we suggest that the Council considers extending the plan period to at least 2042 to allow for more flexibility and ensure that the spatial strategy covers an adequate timeframe.

Settlement Hierarchy and Distribution of Growth

2.6 Policy SP1 highlights the importance of directing growth to the most sustainable locations, prioritizing urban areas before considering the Green Belt. Policy SP1 emphasises that larger settlements provide a comprehensive range of services, employment, retail, and other facilities, as well as better accessibility and connectivity by walking, cycling, and public transport. It designates the City of St Albans as the primary focus in the District for housing, employment, services, retail, the evening economy, education, and healthcare—a recognition welcomed by stakeholders such as Pigeon.

2.7 The PDLP's approach of using a settlement hierarchy as the basis for growth distribution, while not rigidly applying it to growth scales in each settlement, is sound. The hierarchy was developed through the Council's Settlement Hierarchy Study (June 2023), which used a quantitative scoring system to classify settlements within the District. Although quantifying settlement characteristics can be challenging, this method is proportionate, especially since growth allocation avoids oversimplification by incorporating a balanced view of each settlement's attributes.

2.8 St Albans, as a Tier 1 settlement, is the District's most sustainable location for growth and other Tier 1 settlements along with the Hemel Garden Community, should therefore be apportioned the highest levels of development. As the primary urban centre, St Albans offers a wide range of essential services, facilities, employment opportunities, and excellent transport links, making it well suited to support substantial levels of new housing and employment space. By directing a larger share of growth here, the Local Plan would more effectively support sustainable development objectives while protecting the distinct character of smaller settlements within the District.

2.9 SP1 also applies the Settlement Hierarchy in Table 3.1 as the foundation for growth allocation, seeking to locate growth within and adjacent to the larger, more sustainable urban centres in Tier 1 (St Albans and Hemel Hempstead), Tier 2 (Harpenden), and Tier 3 (London Colney). Pigeon endorses this approach, recognizing St Albans' infrastructure and accessibility to housing, employment, retail, and public transport. However, the Council should consider the distribution proportions, as some higher-tier settlements may receive less growth than they are capable of supporting (i.e. St Albans City), while some lower-tier settlements many receive higher growth allocations relative to their hierarchy position.

2.10 For greater clarity in Policy SP1, we recommend refining the text to clarify that growth allocations will reflect the settlement hierarchy with a focus on sustainability and community vitality. Detailed reasoning on how the hierarchy informed the spatial strategy could be placed in the supporting text, rather than the policy itself.

2.11 Policy SP1 further elaborates on the scale and location of growth allocations across the District, which comprise broad locations for large urban extensions of 250+ homes, as well as Large Sites (100-249 homes), Medium Sites (10-99 homes), and Small Sites (5-9 homes). While broad locations primarily target Hemel Garden Communities, they also include, among others, North and East St Albans, areas identified as suitable for higher housing levels. Pigeon supports the identification of St Albans, particularly west St Albans, as a principal area for increased housing.

2.12 This approach avoids over-reliance on very large sites, addressing a previous plan's soundness issue by diversifying housing supply.

Housing Needs

2.13 We support the application of the Standard Method, as outlined in the Planning Practice Guidance (PPG), for calculating housing needs. In accordance with the National Planning Policy Framework (NPPF), this method establishes the minimum number of homes required for strategic planning purposes (NPPF para. 61) and is fundamental to a sound Local Plan (para. 35). Since the Standard Method offers a baseline figure, we fully support Policy SP1 of the PDLP referencing housing numbers as a foundational measure.

2.14 While we are fully supportive of using the Standard Method's minimum housing requirement, it is essential that this draft plan remains adaptable to future increases in housing needs, especially considering the proposed NPPF reforms and the implications of a revised standard method for St. Albans' minimum housing requirements.

2.15 The forthcoming standard method, anticipated under the revised NPPF (published for consultation in July 2024), would set St. Albans' housing requirement at a figure of 1,544, compared to the current Standard Method figure of 885 homes per annum, which translates to 14,603 net additional homes across the plan period. This represents an increase of 659 homes per annum (10,874 in total), which is currently unaddressed in the PDLP. Given that the council aims to submit the PDLP for examination by December 2024—likely preceding the adoption of the new NPPF and proposed Standard Method—the PDLP could initially benefit from the transitional arrangements. However, it would necessitate an immediate review of the Local Plan following adoption to address any updated housing requirements.

2.16 The Council now has an opportunity to refine the PDLP before its submission by including additional sites in sustainable locations which would help to ensure that St Albans' anticipated housing requirements are met without delay, acknowledging the scale of increase between the correct and anticipated local housing requirement. While timely progress on plan-making is encouraged, proactively accounting for anticipated increased housing needs within this draft would enhance certainty around meeting district-wide housing requirements throughout the plan period.

2.17 This goal could be achieved by allocating additional land for housing around the district's most sustainable settlements, particularly within St. Albans City as a Tier 1 settlement. This location, as the highest tier in the settlement hierarchy, has the capacity to support substantial, sustainable development, enabling the district to meet higher housing targets effectively.

2.18 Should the Council decide to proceed with submitting the PDLP for examination ahead of the new NPPF and Standard Method, we suggest that St. Albans adopt an immediate review policy within the Local Plan to address any additional housing needs arising from the proposed standard method. A policy akin to the Bedford Borough Council Local Plan 2030 policy which commits to an immediate review no later than one year after the adoption of the plan and that an updated or replacement plan will be submitted for examination no later than three years after the date of adoption of the Local Plan 2030.

2.19 Furthermore, incorporating a supply buffer into the minimum housing requirement would help bolster housing delivery across the district throughout the plan period. This approach aligns with national policy, as the NPPF calls for Local Plans to not only meet their objectively assessed development needs but also to adopt strategies with sufficient flexibility to adapt to rapid changes.

2.20 To ensure flexibility, the Local Plan must accommodate the inevitable fluctuations in housing need and supply that occur over the plan period due to factors such as changing population projections, affordability ratios, and potential site delivery challenges. Incorporating sufficient headroom will enable the Plan to respond effectively to these variations.

2.21 A supply buffer is, therefore, instrumental in addressing fluctuations in housing need and supply, making it essential for an effective, nationally consistent, and positively prepared Local Plan.

2.22 Lastly, the new Local Plan should include a policy that sets a clear housing requirement with the flexibility to consider circumstances where it might be appropriate to exceed the minimum standard. This would further align the Plan with national policy, promoting resilience and adaptability in housing provision across the district

2.23 While Policy SP1 provides a strategic framework in line with the NPPF's soundness tests, adjustments—such as extending the plan period, incorporating a supply buffer, and enabling early review options—would enhance the plan's effectiveness and flexibility. Ensuring that SP1 adapts to potential future housing requirements will help the Local Plan meet both current and evolving demands, securing soundness across all four NPPF criteria.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Please refer to Section 2 of the enclosed representation.

2 STRATEGIC POLICIES

2.1 The following commentary relates to policies and elements of the Council's recently published Regulation 19 PDLP 2041.

Strategic Policy SP1 – Spatial Strategy

2.2 Policy SP1 in the Publication PDLP (PDLP) establishes the proposed spatial strategy for the District through to 2041. Our comments on this policy address three main areas: the plan period, the settlement hierarchy and distribution of growth, and the approach to calculating minimum housing needs.

Plan Period

2.3 For the Local Plan to be sound, it must adhere to national policy requirements. The National Planning Policy Framework (NPPF) mandates that strategic policies should address a minimum period of 15 years from the Local Plan's adoption.

2.4 The PDLP proposes a plan period running until 2041, which would require adoption by March 2026 to meet the 15-year requirement. The Council's Local Development Scheme currently anticipates adoption by this deadline, allowing little room for potential delays. This tight timeline presents a risk, particularly as the Council will not control the schedule once the plan is submitted for examination. Additionally, recent experiences with other Local Plans suggest that main modifications are often required during examination, which could delay adoption due to Council approval processes, appraisals, and consultations. If one refers to Elmbridge Borough Council and Barking Dagenham, the entire process from submission to adoption typically takes 12-24 months for a Green Belt authority, though complex plans or issues can extend this timeline. For example, Spelthorne Borough Council agreed to pause their Local Plan examination in July 2023 to consider implications of revised national planning policy on Green Belt allocations. Overall, while 12-24 months is typical, Green Belt authorities should be prepared for the process to potentially take longer due to the complexities and sensitivities around Green Belt release. Applying a 24 month period from submission of the PDLP to adoption, this means adoption may not take place before December 2026.

2.5 To address this, we suggest that the Council considers extending the plan period to at least 2042 to allow for more flexibility and ensure that the spatial strategy covers an adequate timeframe.

<u>Settlement Hierarchy and Distribution of Growth</u>

2.6 Policy SP1 highlights the importance of directing growth to the most sustainable locations, prioritizing urban areas before considering the Green Belt. Policy SP1 emphasises that larger settlements provide a comprehensive range of services, employment, retail, and other facilities, as well as better accessibility and connectivity by walking, cycling, and public transport. It designates the City of St Albans as the primary focus in the District for housing, employment, services, retail, the evening economy, education, and healthcare—a recognition welcomed by stakeholders such as Pigeon.

2.7 The PDLP's approach of using a settlement hierarchy as the basis for growth distribution, while not rigidly applying it to growth scales in each settlement, is sound. The hierarchy was developed through the Council's Settlement Hierarchy Study (June 2023), which used a quantitative scoring system to classify settlements within the District. Although quantifying settlement characteristics can be challenging, this method is proportionate, especially since growth allocation avoids oversimplification by incorporating a balanced view of each settlement's attributes.

2.8 St Albans, as a Tier 1 settlement, is the District's most sustainable location for growth and other Tier 1 settlements along with the Hemel Garden Community, should therefore be apportioned the highest levels of development. As the primary urban centre, St Albans offers a wide range of essential services, facilities, employment opportunities, and excellent transport links, making it well suited to support substantial levels of new housing and employment space. By directing a larger share of growth here, the Local Plan would more effectively support sustainable development objectives while protecting the distinct character of smaller settlements within the District.

2.9 SP1 also applies the Settlement Hierarchy in Table 3.1 as the foundation for growth allocation, seeking to locate growth within and adjacent to the larger, more sustainable urban centres in Tier 1 (St Albans and Hemel Hempstead), Tier 2 (Harpenden), and Tier 3 (London Colney). Pigeon endorses this approach, recognizing St Albans' infrastructure and accessibility to housing, employment, retail, and public transport. However, the Council should consider the distribution proportions, as some higher-tier settlements may receive less growth than they are capable of supporting (i.e. St Albans City), while some lower-tier settlements many receive higher growth allocations relative to their hierarchy position.

2.10 For greater clarity in Policy SP1, we recommend refining the text to clarify that growth allocations will reflect the settlement hierarchy with a focus on sustainability and community vitality. Detailed reasoning on how the hierarchy informed the spatial strategy could be placed in the supporting text, rather than the policy itself.

2.11 Policy SP1 further elaborates on the scale and location of growth allocations across the District, which comprise broad locations for large urban extensions of 250+ homes, as well as Large Sites (100-249 homes), Medium Sites (10-99 homes), and Small Sites (5-9 homes). While broad locations primarily target Hemel Garden Communities, they also include, among others, North and East St Albans, areas identified as suitable for higher housing levels. Pigeon supports the identification of St Albans, particularly west St Albans, as a principal area for increased housing.

2.12 This approach avoids over-reliance on very large sites, addressing a previous plan's soundness issue by diversifying housing supply.

Housing Needs

2.13 We support the application of the Standard Method, as outlined in the Planning Practice Guidance (PPG), for calculating housing needs. In accordance with the National Planning Policy Framework (NPPF), this method establishes the minimum number of homes required for strategic planning purposes (NPPF para. 61) and is fundamental to a sound Local Plan (para. 35). Since the Standard Method offers a baseline figure, we fully support Policy SP1 of the PDLP referencing housing numbers as a foundational measure.

2.14 While we are fully supportive of using the Standard Method's minimum housing requirement, it is essential that this draft plan remains adaptable to future increases in housing needs, especially considering the proposed NPPF reforms and the implications of a revised standard method for St. Albans' minimum housing requirements.

2.15 The forthcoming standard method, anticipated under the revised NPPF (published for consultation in July 2024), would set St. Albans' housing requirement at a figure of 1,544, compared to the current Standard Method figure of 885 homes per annum, which translates to 14,603 net additional homes across the plan period. This represents an increase of 659 homes per annum (10,874 in total), which is currently unaddressed in the PDLP. Given that the council aims to submit the PDLP for examination by December 2024—likely preceding the adoption of the new NPPF and proposed Standard Method—the PDLP could initially benefit from the transitional arrangements. However, it would necessitate an immediate review of the Local Plan following adoption to address any updated housing requirements.

2.16 The Council now has an opportunity to refine the PDLP before its submission by including additional sites in sustainable locations which would help to ensure that St Albans' anticipated housing requirements are met without delay, acknowledging the scale of increase between the correct and anticipated local housing requirement. While timely progress on plan-making is encouraged, proactively accounting for anticipated increased housing needs within this draft would enhance certainty around meeting district-wide housing requirements throughout the plan period.

2.17 This goal could be achieved by allocating additional land for housing around the district's most sustainable settlements, particularly within St. Albans City as a Tier 1 settlement. This location, as the highest tier in the settlement hierarchy, has the capacity to support substantial, sustainable development, enabling the district to meet higher housing targets effectively.

2.18 Should the Council decide to proceed with submitting the PDLP for examination ahead of the new NPPF and Standard Method, we suggest that St. Albans adopt an immediate review policy within the Local Plan to address any additional housing needs arising from the proposed standard method. A policy akin to the Bedford Borough Council Local Plan 2030 policy which commits to an immediate review no later than one year after the adoption of the plan and that an updated or replacement plan will be submitted for examination no later than three years after the date of adoption of the Local Plan 2030.

2.19 Furthermore, incorporating a supply buffer into the minimum housing requirement would help bolster housing delivery across the district throughout the plan period. This approach aligns with national policy, as the NPPF calls for Local Plans to not only meet their objectively assessed development needs but also to adopt strategies with sufficient flexibility to adapt to rapid changes.

2.20 To ensure flexibility, the Local Plan must accommodate the inevitable fluctuations in housing need and supply that occur over the plan period due to factors such as changing population projections, affordability ratios, and potential site delivery challenges. Incorporating sufficient headroom will enable the Plan to respond effectively to these variations.

2.21 A supply buffer is, therefore, instrumental in addressing fluctuations in housing need and supply, making it essential for an effective, nationally consistent, and positively prepared Local Plan.

2.22 Lastly, the new Local Plan should include a policy that sets a clear housing requirement with the flexibility to consider circumstances where it might be appropriate to exceed the minimum standard. This would further align the Plan with national policy, promoting resilience and adaptability in housing provision across the district

2.23 While Policy SP1 provides a strategic framework in line with the NPPF's soundness tests, adjustments—such as extending the plan period, incorporating a supply buffer, and enabling early review options—would enhance the plan's effectiveness and flexibility. Ensuring that SP1 adapts to potential future housing requirements will help the Local Plan meet both current and evolving demands, securing soundness across all four NPPF criteria.

**366 - Chrissie Chadney**

Submission Number: 366 Submission Date: 10/11/24 09:00

Respondent: Company/Organisation: Name: Chrissie Chadney

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I have been a resident in Wheathampstead for over forty years and read the proposed District Plan with interest. Whilst there are some good ideas in it, there are a number of things which give me concern. I have read the WDPS response and concur with it fully, but have a few additional things to say here.

Population Growth and Housing Needs: Firstly, the statistics in the first section. I am in agreement with the Wheathampstead and District Preservation Society (WDPS). I must express my concern regarding the Draft Local Plan's projection of a 26% increase in dwellings, totaling 14,603 new houses, within St Albans District. The Office for National Statistics projects a mere 0.6% population

growth by 2043, with the majority occurring in the 65+ age demographic. This projection makes it clear that such a significant increase in housing is unwarranted and disproportionate to our actual growth needs.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Conclusion: I firmly stand with the WDPS in urging a comprehensive reevaluation of the Draft Local Plan. It is essential that the plan not only reflects realistic population projections but also prioritizes environmental conservation, sustainable development, and the enhancement of local services and infrastructure. We need a balanced, forward-thinking approach that truly serves the interests and needs of all of the St Albans District's residents.

### 367 - Ms Julie Bell

Submission Number: 367 Submission Date: 10/11/24 09:00

Respondent: Company/Organisation: Name: Ms Julie Bell

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Population Growth and Housing Needs:**
As a representative of the Wheathampstead and District Preservation Society (WDPS), I wish to express our profound concerns about the projections outlined in the Draft Local Plan, which anticipates a 26% increase in housing stock, equivalent to 14,603 new dwellings in St Albans District. With the Office for National Statistics projecting a modest population growth of just 0.6% by 2043, predominantly among those aged 65 and over, it becomes evident that the proposed scale of housing expansion is both unnecessary and disproportionate to our actual needs.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion:**
I stand firmly with the WDPS in calling for a thorough reevaluation of the Draft Local Plan. The plan must accurately reflect our realistic population growth projections and prioritize environmental protection, sustainable development, and the improvement of local services and infrastructure. A balanced and visionary approach is required to genuinely meet the needs and interests of the residents of the St Albans District.

## 370 - Diane Black

Submission Number: 370 Submission Date: 09/11/24 09:00

Respondent: Company/Organisation: Wheathampstead District Preservation Society Name: Diane Black

Comment Number: 1

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**WDPS comments on St Albans City and District Council Draft Local Plan**

Wheathampstead and District Preservation Society (WDPS) has approximately 400 households as members, and we therefore speak for around 15% of the population of the Wheathampstead area.

**Population Growth Projections**

The plan currently assumes that a 26% increase in the number of dwellings is required in the District, 14,603 new houses in total. Using the average number of people per household of 2.43 this equates to a population increase of 23%.

The Office for National Statistics projects a 0.6% growth in population of St Albans District from 2024 to 2043 with the main growth coming from the 65+ age range. Therefore, there is no justification for the target of 14,603 new houses.

We appreciate there is requirement across the UK for additional housing but there seems to be a completely disproportionate allocation given to St Albans City and District.

There is limited provision for additional employment in the district and therefore any population increase of this scale will mean people having to travel outside the district to work, adversely impacting the environment and putting additional pressure on a transport network already at breaking point. Over 81% of the district is also covered by Metropolitan Green Belt which needs to be protected.

We believe that the Council should challenge the Governments 'Standard Method' for calculating local housing needs as there is no justification given their own population growth projections for the district and the adverse impact the proposed plan will inevitably have on the environment, local services and facilities and the Metropolitan Green Belt.

**Green Belt Protection**

All the sites for development that are proposed around Wheathampstead would be on Green Belt land. The protection of the Green Belt should be a major concern for the Council, but there is little evidence of this throughout the Plan.

The Council has failed to take account of the National Planning Policy Framework (NPPF) as revised in July 2021, paragraph 11, footnote 7. This permits local planning authorities to restrict the scale of development due to planning constraints including protection of Green Belt and other designated areas and sites.

The proposed development at Amwell Top Field (M9) is within the Green Belt, which is designed to reduce the impact of existing development on the character of the Green Belt. This reduction of impact would be lost as a result of this development.

The St Albans Stage 2 Green Belt Review completed by Ove Arup & Partners in 2023 concluded that the Green Belt around Wheathampstead contributes significantly to purpose 4 of the Green Belt, namely, to safeguard the countryside from encroachment. Only one of the Wheathampstead sites proposed for development in the Plan, the area south of Hilldyke Road, is identified by Arup as one of the areas in the District that contributes least to the Green Belt purposes. The need to provide affordable housing should not be seen as a justification for building on the Green Belt, as the average house price at the proposed sites would almost certainly be beyond the means of those for whom affordable housing is designed.

Preventing coalescence is also a critical element of the Green Belt policies so it is essential that the Local Plan prevents Wheathampstead coalescing with Harpenden along the Lower Luton Road and Harpenden Rd/Wheathampstead Rd.

Equally important is the protection of distinct communities in discrete areas within the Parish of Wheathampstead, such as The Folly, Lea Valley Estate, Amwell, and these must continue to be protected by current Green Belt policies.

We support the Green Network Vision and the creation of Green Corridors that are shown as part of the Hemel Garden Communities initiative and we would like to see similar Green Corridors allocated around Wheathampstead to provide safe links to neighbouring settlements. Wheathampstead Parish Council recently formed an "Inclusive Wheathampstead Working Group" with an initial focus on Accessibility. Green Corridors incorporating Safe Cycle Routes would also provide a safe route for Mobility Scooter users to reach nearby settlements which is important for mental and physical health and other activities.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is**

**incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Summary**

Considering the comments above, we urge the council to revisit the draft Local Plan, challenge the Government's Standard Method for calculating housing needs and produce a more equitable balanced plan that serves the needs of the St Albans District residents. We would like to see more detailed planning which includes funding allocation and addresses key issues on exactly how the plan is going to meet climate change targets, deal with extreme weather events, increase biodiversity by 10%, protect the Green Belt, improve transport networks including cycleways, improve water networks and prevent pollution of our rivers, improve services and facilities and protect secondary school placements.

**4.2 Chapter 2 – Climate emergency**

Oaklands College and Taylor Wimpey do not wish to make any comments on the contents of this chapter. However, they reserve the right to make comments at a later stage.

In the meantime it is worth noting that Taylor Wimpey is one of the largest national housebuilders, selling over 10,000 homes every year and their purpose is to build great homes and create thriving communities. They have committed to becoming a Net Zero business, publishing their Net Zero Transition Plan in 2023, committing to building all electric, net zero carbon ready homes from 2025 with a net zero operations build process from 2035, on their path to becoming a net zero business. These new homes will all be net zero carbon ready and have the ability to benefit from modern sustainable technologies and use significantly less energy than comparable existing homes. Alongside more sustainable housing, their projects also provide significant support to the local areas - in 2023 they invested over £405 million for new or improved facilities, providing wider long-term benefits. Taylor Wimpey will be taking the same approach on Site Allocation B4 in partnership with the College.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is**

**288 - Chris Berry**

Submission Number: 288 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: CPRE Hertfordshire Name: Chris Berry

Comment Number: 2

**Type:**

* Paragraph

**Number:**

2.1-2.10

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Significant inconsistencies between the District Council Plan 2024-2029 and the Draft Local Plan, particularly with respect to the role of the countryside**

Significant inconsistencies exist between the key priorities for the St Albans and City District Council Plan 2024-2029 (Combat the Climate Emergency; Deliver more social housing; Support our local economy; Enhance the District's cultural offer; Promote equality, inclusion and fairness) and the elaboration of the planning objectives for the Draft Local Plan. In recognising that the Local Plan is the means of facilitating and controlling the physical development implications of the District Council Plan, the lack of consideration of the Green Belt – which is the most significant land use designation in the SACD area - for uses other than development is a major omission in both the Council Plan and the Local Plan.

The Council Plan's identification of the Climate Emergency as a key priority is elaborated initially in objectives in Table 1.2 and subsequently in Chapter 2 Climate Emergency. There is no spatial treatment of the implications of the climate emergency nor any indication of the role of the countryside in the amelioration of climate change effects.

Similarly, Chapter 3 Sustainable Use of Land and Green Belt comprises an incomplete and partial treatment of development policy relating to the Green Belt in terms of environmental and other constraints. The Sustainability Appraisal seeks to identify the factors influencing policy options for the Draft Local Plan and choices regarding future development allocations.

The justifications provided in the Sustainability Appraisal for the selection of policy options relate solely to the provision of housing allocations which bear no relation to achievement of the "social housing" key priority of the Council Plan. Further, there is no substantive assessment of countryside protection nor enhancement, nor of the opportunities offered for appropriate economic development outside the built-up areas as the countryside appears to be regarded simply as a resource for development with no cost nor implication assigned to it in the planning balance.

This leads to an imbalanced treatment of development and planning policy and a lack of policy consistency between the Council Plan and Draft Local Plan in key areas. As another example, the Draft Local Plan fails to consider in policy terms the health and wellbeing benefits of access to the countryside.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Addition of policies and proposals to ensure consistency between the Council Plan and the Draft Local Plan.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**368 - Gee Smedley**

Submission Number: 368 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Save North St Albans Greenbelt Name: Gee Smedley

Comment Number: 3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

There is no joined up strategic approach to manage and mitigate for the declared climate emergency.

This chapter is weak and fails to combine the delivery of economic growth, housing, sustainable development, sustainable infrastructure and sustainable utilities: against a requirement for net zero. There are no measurable outputs. There are no targets for policies within the Plan period.

The failure to consider properly the supply – demand balance of water needed for the delivery of the scale of housing that is proposed will require water to be bought into the region from hundreds of miles away and no account of the energy and carbon footprint of such a strategy has been shared. This is the biggest glaring climate related issue that has not been addressed. The currently consultation on delivering water from Birmingham via the Grand Union Canal, does not form part of the strategy and there is no assessment of the impact that this water will have on the delicate habitat of the chalk streams and chalk bed aquifer filtration.

We welcome the inclusion of several sites of ecological interest which are within the Green Belt, including Heartwood Forest. The focus seems to be on public access to green sites. This focus should be balanced with the need to preserve the natural environment within the Green Belt regardless of public access. Openness and views are across land, not from within it.

The failure to coordinate a strategic approach to protecting the ecological corridors as required by Hertfordshire Landscape and fails to uphold NPPF Para 180 “Planning Polices and decisions should contribute to and enhance the natural and local environment...”. In North St Albans, the ecological corridors are specifically Woodland Trust site Heartwood Forest and ancient woodland on the edges of the B1 North St Albans Site. The lack of measurable policy is a deep failure. The four pages are mainly high-level statements with some minor inclusions of consideration for bat & swift boxes and hedgehog gaps. This is not affective Climate Crisis mitigation and do not accord with any published climate policy.

## Strategic Policy SP2 - Responding to the Climate Emergency

### 15 - Trans Link London Limited

Submission Number: 15 Submission Date: 18/10/24 12:13

Respondent: Company/Organisation: PJB Planning Name: Peter Biggs

On Behalf Of Company/Organisation: Trans Link London Limited Name:

Comment Number: 6

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Strategic Policy SP2 sets out a strategy to ensure that development during Plan period (and beyond) responds to the increasing demands of Climate Change through mitigation and adaption. The policy emphasises that it will support proposals that help combat Climate Change through promoting development of previously developed land and promoting the most sustainable locations for growth. Objective d. of Policy SP2 emphasises the need to minimise travelling while encouraging walking, cycling and the use of public transport.

In the case of promoting the land to the north of Napsbury Park Estate (Parcel 515), it is highlighted in this representation that the Council have missed an opportunity in the Reg 19 version of the Local Plan to future proof this objective by promoting a rail station within parcel 515 along the Midland Mainline that would connect London Colney/Napsbury Park Estate into St Albans, as well as connecting further north and south into London.

Figure 1.3 - Key Diagram highlights diagrammatically how London Colney and Napsbury Park Estate is not connected to the rail service even though London Colney is categorised as a Tier 3 small town. It is also proposed to allocate housing and secondary school to the south of Napsbury Park Estate and west of London Colney (Allocation 9 on the Key Diagram), with no connection to the Midland Mainline.

Parcel 515 (land north of Napsbury Estate Park) includes both the historic sidings for the hospital and has historic links to the rest of the Napsbury Park Estate, so has elements of brownfield (previous development) land within the parcel and also a direct historic relationship to the Estate. This historic context of the original sidings should be drawn upon through the provision of a new station in the historic location of the sidings and promotion of an urban extension (south and north of Napsbury Park Estate) that promotes sustainable rail travel connections into Napsbury and London. Details of the railway sidings at Napsbury Park are included in the Council's Conservation Area Character Statement dated February 2019.

The Council is therefore requested to give further consideration to the land north of Napsbury Park Estate (Parcel 515) as a potential site for a rail station along the Midland Mainline along with additional housing allocation site. The new housing in the location of Parcel 515 would be within walking distance of the new Secondary schools site proposed to the south of the Estate (west of London Colney) and would promote both a sustainable form of development and effective use of land, as promoted by the objectives of the new Local Plan.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Greater emphasis through Policy SP2 should be given to providing a new railway station in the historic location of the sidings to the north of Napsbury Park Estate and Figure 1.3 - Key Diagram (and Proposals Map). This approach will therefore promote a strategic sustainable form of transport for Napsbury Park Estate, proposed urban extension (north and south), the proposed new secondary school to the south of Napsbury Park Estate and London Colney.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

In order to scrutinise the Council's response to the Climate Emergency agenda in that it does not go far enough to promote sustainable forms of development and consideration of a railway station along the Midland Mainline to the north of Napsbury Park Estate.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 114 - Hertfordshire County Council - Property Team

Submission Number: 114 Submission Date: 06/11/24 23:21

Respondent: Company/Organisation: Vincent + Gorbing Name: George Sellers

On Behalf Of Company/Organisation: Hertfordshire County Council - Property Team Name:

Comment Number: 16

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

This policy as currently written is not consistent with national policy, thus enabling the delivery of sustainable development. The below suggested wording is intended to address this.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The underlined wording is requested to be added to the second sentence of this policy.

*The Council will support proposals that help to combat climate change, <u>including development proposals for renewable and low-carbon energy generation at appropriate locations in the District</u>, where the proposals:*

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

A number of representations have been made on behalf of HCC Property, which would benefit from discussion within the forum of the EiP.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

### 119 - Mr Roy Warren

Submission Number: 119 Submission Date: 07/11/24 09:01

Respondent: Company/Organisation: Sport England Name: Mr Roy Warren

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The policy is supported especially criteria d) and f) as they promote active travel which contributes to improving physical activity as well as responding to climate change. Sport England's Uniting the Movement strategy https://www.sportengland.org/about-us/uniting-movement recognises that Sport England has a contribution to make to tackling climate change by influencing how people live and travel.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

---

### 273 - Hallam Land Management and St Albans School

Submission Number: 273 Submission Date: 08/11/24 09:33

Respondent: Company/Organisation: LRM Planning Name: Mr Owen Jones

On Behalf Of Company/Organisation: Hallam Land Management and St Albans School Name:

Comment Number: 28

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

4.1 Hallam and St Albans School acknowledge and support the District Council's declaration of a Climate Emergency made in 2019. They believe that development in the right location, which is designed and constructed responsibly, can make a strong contribution to climate change mitigation and adaptation.

4.2 Both Hallam and St Albans School broadly support the objectives of Strategic Policy SP2, but given the importance of addressing the climate emergency, a number of suggested amendments and/or enhancements are proposed to improve its effectiveness and soundness.

4.3 It is disappointing that Strategic Policy SP2 does not go so far as to say the Council will "strongly" support proposals that help combat climate change. In order to achieve the sustainable development that the Local Plan seeks to achieve, the District should offer greater support to developers who prioritise combatting climate change, and Strategic Policy should be amended to reflect this.

4.4 Hallam and St Albans School are of the opinion that the most effective mechanism to mitigate large quantities of carbon emissions is to ensure that new development is located in the most sustainable locations, where the use of walking, cycling and public transport can provide the principal means of travel as an alternative to private car use. Although they support the changes made to the wording of criterion (f) to "prioritise" the use of sustainable and active travel rather than just "support" it, there remain some areas where the policy could be strengthened.

4.5 It was previously suggested that Policy SP2 should be amended to recognise the carbon emission savings which can be secured through the use of more sustainable modes of transport. Greater weight should be afforded to this criterion given that transport emissions typically account for over a third of local and national emissions, and therefore locating development in the most sustainable locations would be one of the most powerful actions to reduce greenhouse gas emissions. It is suggested that the policy is reworded as follows to offer developers another mechanism for promoting sustainable travel. It is therefore reiterated that the following sentence should be added, as below:

"Use the most sustainable locations for growth and so minimising the need to travel while encouraging walking, cycling and the use of public transport. Development proposals are encouraged to demonstrate carbon savings secured through the switch to more sustainable modes of transportation".

4.6 Criterion k is also confusing in that it requires “the combination of environmental payments through stacking of different types of credits on sites”. It is unclear exactly what the District Council are trying to achieve with this policy; it should be clarified how they intend to secure carbon credits on site, or how they can be meaningfully and practically secured, in the absence of a carbon offsetting policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

1. 241108 St Albans Local Plan Reg 19 response_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Our representations are of strategic importance to the Local Plan and the delivery of our scheme will contribute to its objectives.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

## 283 - Redbourn Parish Council

Submission Number: 283 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Troy Planning & Design Name: Mr Troy Hayes

On Behalf Of Company/Organisation: Redbourn Parish Council Name: Redbourn Parish Council

Comment Number: 34

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

*Refer to Attached submission letter for whole response and figures.*

**Policy SP2 (Responding to the Climate Emergency)**

7.1 RPC considers this policy to be **unsound** due it **not being justified, effective or consistent with national policy**. We explain the reasons for concluding this below.

7.2 Strategic Policy SP2 (Responding to the Climate Emergency), as currently drafted, is not effective, and is not justified. The Policy is a mix of a strategic policy and development management policy without providing an effective policy for plan-making or for determining planning applications.

7.3 The supporting text to the Policy does not provide suitably detailed context for the actual climate change issues facing the District. We refer SACDC to the Redbourn Neighbourhood Plan which sets out the approach at the Redbourn Parish-level highlighting key issues in relation to climate in the Parish in relation to the River Ver (chalk stream), the River Red (main groundwater drainage route for the area west of Redbourn and a main tributary of the River Ver) and the need to conserve and strengthen the Upper Ver Valley through the reversal of habitat fragmentation and the creation of and improvement of habitat links to create eco-corridors as set out in the Hertfordshire Landscape Character Assessment.

7.4 This importance of the River Ver and its tributaries is set out throughout SACDC's own Sustainability and Climate Crisis Strategy; for example it states:

*"Locally, water levels in the River Ver and lakes make clear the impact of climate change on our District" (Page 3 - Joint statement from St Albans District political party group leaders)*

*"One of the most important habitats in the District is the River Ver, a chalk stream habitat rarely found outside of southern and eastern England. Chalkstreams are important habitats for species such as crayfish and kingfishers"(Page 35)*

*"Currently our chalk streams, such as the River Ver, are at risk from over abstraction, pollution and climate change" (Page 40)*

7.5 We would expect this Strategic Policy to first set out the strategic measures the Local Plan is doing to respond to the Climate Emergency.

7.6 The Policy and supporting text fail to refer to the Government's Environment Act (2021) or its requirement for a Local Nature Recovery Strategies and how this is being delivered in the District.

7.7 The Policy uses the text ‘the Council will support’ before listing what development proposals will need to do in order to comply with the policy. However, the Policy does not explain in which instances the Policy requirements would not be appropriate. This should be clarified. Furthermore, the ‘support’ does not specifically mean whether the list of climate change-related criteria (a-k) are actually required in order to gain planning consent. The wording selected for the policy is not clear and strong enough and would lead to ambiguous interpretations of the policy and its ineffectiveness.

7.8 In terms of the Policy criteria (a-k) we make the following points:

a) This criterion is not specific about what is required to "demonstrate mitigation and adaption to climate change". Requiring an applicant to demonstrate it is simply"pursing the reduction of whole life-cycle carbon emissions" will not deliver the urgent changes required. This criterion should be measurable.

b) As we have set out in these representations, whilst SACDC claims to be prioritising the use of previously developed land it is not actually doing this. The NPPF requires that strategic policies set out a clear strategy for accommodating objectively assessed needs in a way that makes as much use possible of previously developed or 'brownfield land'. (NPPF para 119). There is no such clear strategy in this policy or other Local Plan policies. Furthermore, simply allocating development in previously developed land would not make it more sustainable or would necessarily contribute to tackle climate change. Policy should refer to previously developed land in sustainable locations.

c) This criterion is not specific enough about what design measures should be used to 'improve resilience to climate change'.

d) One would expect this to be part of the Strategic Policy regarding how the Local Plan itself is responding to the Climate Emergency and it does not provide any specifics about where it considers the 'most sustainable locations for growth' are in the District.

e) This criterion is vague in terms of stating what is meant by 'high standards of energy efficiency and low carbon energy'. It is also not measurable, as currently worded and it is not proportionate to the nature and size of development.

f) This criterion is not specific enough about what it considers to be sustainable and active transport modes of travel and includes no metrics that can be monitored or measured. The use of ‘prioritise’ as a criterion is too weak and would not contribute to secure the necessary infrastructure and design. This criterion should be more clearly worded.

g) This criterion is silent on the amount of biodiversity net gain that will be delivered.

h) Mitigating flood risk is already a national and local policy requirement. How is this criterion adding anything new with regards to tackling climate change? Could the mitigation be done through nature-based solutions?

i) SuDS should be a requirement for all new development, where it is technically feasible. This criterion should be strengthened to ensure that all developments include SuDS. It should not be left to future interpretation when SuDS are appropriate or not, as it would lead to policy ambiguity.

j) Criterion simply states 'demonstrate tree planting’ with no specifics of the quantum, location or any other details.

k) The combination of environmental payments could lead to the offset of most of the climate change and environmental expectations of a development. This criterion could make all other requirements ineffective as currently worded.

7.9 For the reasons outlined above, RPC considers Policy SP2 to be unsound due it **not being justified, effective or consistent with national policy**.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Strategic Policy SP2 (Responding to the Climate Emergency), as currently drafted, is not effective, and is not justified. The Policy is a mix of a strategic policy and development management policy without providing an effective policy for plan-making or for determining planning applications.

We would expect this Strategic Policy to first set out the strategic measures the Local Plan is doing to respond to the Climate Emergency.

In terms of the Policy criteria (a-k) we make the following points:

a) This criterion is not specific about what is required to "demonstrate mitigation and adaption to climate change". Requiring an applicant to demonstrate it is simply"pursing the reduction of whole life-cycle carbon emissions" will not deliver the urgent changes required. This criterion should be measurable.

b) As we have set out in these representations, whilst SACDC claims to be prioritising the use of previously developed land it is not actually doing this. The NPPF requires that strategic policies set out a clear strategy for accommodating objectively assessed needs in a way that makes as much use possible of previously developed or 'brownfield land'. (NPPF para 119). There is no such clear strategy in this policy or other Local Plan policies. Furthermore, simply allocating development in previously developed land would not make it more sustainable or would necessarily contribute to tackle climate change. Policy should refer to previously developed land in sustainable locations.

c) This criterion is not specific enough about what design measures should be used to 'improve resilience to climate change'.

1. REDBOU~4.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

## 291 - SEGRO (Radlett) Limited

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

3.1 Strategic Policy SP2 – Responding to the Climate Emergency states that the Council will support proposals that help to combat climate change, including *'pursuing the reduction of whole life-cycle carbon emissions (both operational and embodied)'*and providing *'on-site renewables, high standards of energy efficiency, and low carbon energy'*.

3.2 Policy CE1 - Promoting Sustainable Design, Construction and Building Efficiency sets out how *'new buildings should be designed and constructed to ensure efficient use of energy, water and materials'*. Part (a) requires proposals to take into account any nationally adopted standards.

3.3 SEGRO (Radlett) Limited are supportive of new buildings to be designed and constructed efficiently in order to minimise carbon emissions. The design of the SRFI will meet the requirements of The Building Futures Sustainable Design Toolkit (BFSDT) including a commitment to a BREEAM 'very good' standards, in accordance with adopted policy objectives at the time of approval.

3.4 Policy CE2 - Renewable and Low Carbon Energy seeks to *'increase the use of renewable and low carbon energy in the District*'. Part b of the policy requires major developments to set out at the planning application stage how they will make use of renewable or low carbon energy within the site through (i) submitting and agreeing an Energy Statement with the Council and (ii) agreed measure will be secured through conditions.

3.5 Segro support Policy CE2 which seeks to maximise the use of renewable or low carbon energy where appropriate is supported. In line with Policy CE2, an Energy Statement was submitted and approved for the SRFI.

## 304 - EDIT Land Ltd

Submission Number: 304 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 6

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land to the south of Burydell Lane, Park Street” have been discounted incorrectly.

**Representations**

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

The Reg. 18 Draft Local Plan includes planning policies relating to various topics, which would become the principal consideration for the decision maker when determining planning applications.

EDIT Lands has not provided comment on a number of policies and advise which they are commenting on in the list below, but reserves the right to comment on others in the future. However, SADC should consider whether all the policies as drafted are useful and necessary for decision making, and do not just repeat that which is already stated in the National Planning Policy Framework (NPPF), Planning Practice Guidance or legislation. Policies should also be unambiguous, clear and concise, without being overly onerous or stifle innovation or ambition.

EDIT Lands main concern with the Local Plan, as a whole, is the weak approach to the provision of much needed housing. Firstly, the level of housing planned for does not seek to address housing need adequately or provide any contingency, nor does it seek to address unmet need or positively plan for previous years of significant under-delivery.

Furthermore, the level of housing which is proposed as windfall, is unsound. 20% of the total housing supply to come forward on sites which do not have allocations, nor are formally identified is not positively prepared and is a huge outlier compared to neighbouring authorities. We consider the proportion of windfall to be wholly inappropriate given the borough's historic poor delivery and acute housing need.

It is also perverse for SADC to suggest that all brownfield sites have been exhausted to necessitate Green Belt release, whilst anticipating that such a high number will come forward via the windfall process. In addition, the Local Plan is heavily reliant on the delivery of a small number of broad growth areas and strategic extensions, namely the Hemel Garden Community which is allocated for net. 5,500 dwellings and 4,281 across the other strategic development sites which are subject to challenging land assembly and infrastructure delivery requirements which will constrain delivery of housing units within the early periods of the Local Plan. St Albans have acknowledged this situation in the reg.19 draft Local Plan where they are now asserting that only 4,300 dwellings will be delivered on the HGC sites within the LP period, a reduction of 450 dwellings from the LP trajectory and 1200 from the wider site allocation. Across all allocated sites within the borough, the council has lost net. 971 dwellings between Reg.18 and Reg.19 stage. There is no explanation, or justification on how the shortfall in housing delivery is accounted for within the revised housing trajectory, or local plan housing target.

The housing trajectory places significant reliance on these strategic sites without due consideration to implications of these strategic sites not being delivered or brought online in line with the housing trajectory.

The emerging Local Plan is also not prepared positively as it fails to make any consideration to the need for natural growth (and deliverable) within the 'washed over villages' within the green belt, with no consideration paid in detail to areas for release from the green belt in these locations. As outlined in Section 3 of this document our client challenges the methodology which has been applied in the green belt review in light of a failure to apply a macro level analysis to the green belt parcels.

Furthermore the draft Local Plan fails to make provision for custom build and self-building housing typologies despite a clear need being identified in the National Planning Policy Framework no recognition is made to the contribution this typology makes to meeting established demand. We understand that there is a need locally for such housing and failure to plan for such housing, is not positive.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

SP1: A Spatial Strategy for St Albans District

SP3 — Land and the Green Belt

HOU 1- Housing Mix

HOU 2 — Affordable Housing

SP2 — Responding to the Climate Emergency

NEB 6 - Biodiversity and Biodiversity Net Gain — Comment

LG5 — Green Belt — Object

1. Land at Burydell Lane - Reg 19 Rep Rev a_[R].pdf

## 329 - Mr Russell Crow

Submission Number: 329 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Mr Peter Atkin

On Behalf Of Company/Organisation: Richborough Estates Name: Mr Russell Crow

Comment Number: 16

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Richborough recognises and supports the Council's corporate objective of mitigating the impacts of climate change and the need for policies in the draft Local Plan to positively and proactively address the matter.

There is currently unnecessary duplication of policy requirements between SP1 and SP2 such as the provision of biodiversity net gain, tree planting, and renewable energy and energy efficiency measures. SP2 also repeats principles that are set out in more detail in later policies, or repeats the provisions of the NPPF. Appropriate modifications would ensure that the spatial strategy is more clearly and succinctly set out, and that unnecessary repetition of other policies is avoided.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Proposed remedy: The NPPF (paragraph 17) requires Local Plans to include strategic policies that address the strategic priorities for the development and use of land, with regard to relevant national policy and guidance. It is recommended that this could be achieved more effectively through a consolidation of the relevant provisions of Policies SP1 and SP2 into a single 'Sustainable Development' policy.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**Responding to Climate Emergency**

CHPC generally supports Policy SP2 of the Local Plan, particularly its focus on using the most sustainable locations for growth and minimising the need to travel. However, the Parish Council emphasises that Colney Heath's limited transport links present a challenge in fully meeting these objectives. While encouraging walking, cycling, and the use of public transport is crucial for sustainable development, CHPC highlights the current lack of infrastructure and services in the parish, which may hinder the success of such initiatives.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

The Council urges SADC to ensure that any proposed development is accompanied by significant improvements to local transport infrastructure, including enhanced bus services and safe pedestrian and cycling routes. Additionally, CHPC supports the prioritisation of sustainable and active modes of travel in new developments, as outlined in **PolicySP2**. However, the Council stresses that this should not be at the expense of ensuring sufficient access to essential services and amenities. For Colney Heath Parish, this may require a more tailored approach to transport planning, ensuring that any new development provides realistic alternatives to car use, especially given the rural context and limited public transport options available in the area.

## 350 - Hill Residential

Submission Number: 350 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: tor&co Name: Sophia Goodhead

On Behalf Of Company/Organisation: Hill Residential Name:

Comment Number: 3

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Strategic Policy SP2: Responding to the Climate Emergency**

Ahead of setting out the policy requirements, Hill notes at the start of the policy text that the reference to "*Where appropriate, development proposals will need to:*" has been removed. Hill consider this reference should be reinstated to ensure the policy is sufficiently flexible and effective and can take into account various development scenarios and scales, particularly given that the policy and its requirements take no account of the existing nature of sites.

The policy still states at part b) that development proposals will need to '*prioritise the development of previously developed land*'. As set out in our comments on Policy SP1 above, the prioritisation of brownfield land is part of the preparation of the Local Plan but should not form part of the decision-making process. As such, the inclusion of part b) would not be effective or consistent with national policy and should be removed.

It is welcomed that in Part j) of the policy, the reference to planting trees 'at scale' has been removed. This wording was not effective or particularly clear in terms of what level was required. Part k) sets out that the Council will support proposals where they '*Combine environmental payments through stacking different types of credits on sites (e.g. carbon, biodiversity, Suitable Alternative Natural Green Space (SANG) etc) where appropriate'*. The wording is not sufficiently clear and it appears that the word 'stacking' should be amended to state 'seeking', in order that it is clearly written and unambiguous in accordance with NPPF paragraph 16d. Further, 'where appropriate and viable' should be added to the end to ensure the policy does not overly burden sustainable sites from coming forward where this is not feasible.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

### 359 - Betsy Brown

Submission Number: 359 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Natural England Name: Betsy Brown

Comment Number: 11

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Strategic Policy SP2 –Responding to the Climate emergency

Natural England welcomes the strong focus on climate change throughout the local plan as well as inclusion of a specific policy incorporating green infrastructure, mitigating flood risk through SuDS and promoting onsite renewables. It is good to see inclusion of Suitable Alternative Natural Green space (SANGs) within this policy. However, it would be beneficial to create a clear distinction between SANG and Biodiversity Net Gain (BNG) as a mechanism for achieving habitat creation and required SANG criteria. BNG can only be stacked/included in calculations within a SANG site(s) once the minimum SANG criteria have been met. Despite this, we encourage and are pleased to see innovative approaches to climate mitigation and are happy to review such schemes in the future.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

It would be beneficial to create a clear distinction between SANG and Biodiversity Net Gain (BNG) as a mechanism for achieving habitat creation and required SANG criteria.

Despite this, we encourage and are pleased to see innovative approaches to climate mitigation and are happy to review such schemes in the future.

## 362 - EDIT Land Ltd

Submission Number: 362 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: EDIT Land Ltd Name:

Comment Number: 7

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

As set out in the Reg.18 representations it is our clients opinion that the authority should be seeking to include a broader range of allocated sites within the Local Plan to provide contingency and provide early delivery of housing to meet the established needs of the borough.

The plan is not justified as reasonable alternative sites such as their interests at “Land at Roundhouse Farm, Colney Heath” have been discounted incorrectly

Representations

Section 2 of the attached document sets out EDIT Lands comments and objections to relevant policies. Where EDIT Land has concerns or object to the policies as drafted, alternative wording is suggested where appropriate to ensure the Local Plan is sound.

The Reg. 18 Draft Local Plan includes planning policies relating to various topics, which would become the principal consideration for the decision maker when determining planning applications.

EDIT Lands has not provided comment on a number of policies and advise which they are commenting on in the list below, but reserves the right to comment on others in the future.

However, SADC should consider whether all the policies as drafted are useful and necessary for decision making, and do not just repeat that which is already stated in the National Planning Policy Framework (NPPF), Planning Practice Guidance or legislation. Policies should also be unambiguous, clear and concise, without being overly onerous or stifle innovation or ambition.

EDIT Lands main concern with the Local Plan, as a whole, is the weak approach to the provision of much needed housing. Firstly, the level of housing planned for does not seek to address housing need adequately or provide any contingency, nor does it seek to address unmet need or positively plan for previous years of significant under-delivery.

Furthermore, the level of housing which is proposed as windfall, is unsound. 20% of the total housing supply to come forward on sites which do not have allocations, nor are formally identified is not positively prepared and is a huge outlier compared to neighbouring authorities. We consider the proportion of windfall to be wholly inappropriate given the borough’s historic poor delivery and acute housing need.

It is also perverse for SADC to suggest that all brownfield sites have been exhausted to necessitate Green Belt release, whilst anticipating that such a high number will come forward via the windfall process. In addition, the Local Plan is heavily reliant on the delivery of a small number of broad growth areas and strategic extensions, namely the Hemel Garden Community which is allocated for net. 5,500 dwellings and 4,281 across the other strategic development sites which are subject to challenging land assembly and infrastructure delivery requirements which will constrain delivery

of housing units within the early periods of the Local Plan. St Albans have acknowledged this situation in the reg.19 draft Local Plan where they are now asserting that only 4,300 dwellings will be delivered on the HGC sites within the LP period, a reduction of 450 dwellings from the LP trajectory and 1200 from the wider site allocation. Across all allocated sites within the borough, the council has lost net. 971 dwellings between Reg.18 and Reg.19 stage. There is no explanation, or justification on how the shortfall in housing delivery is accounted for within the revised housing trajectory, or local plan housing targets.

The housing trajectory places significant reliance on these strategic sites without due consideration to implications of these strategic sites not being delivered or brought online in line with the housing trajectory.

The emerging Local Plan is also not prepared positively as it fails to make any consideration to the need for natural growth (and deliverable) within the 'washed over villages' within the green belt, with no consideration paid in detail to areas for release from the green belt in these locations. As outlined in Section 3 of this document our client challenges the methodology which has been applied in the green belt review in light of a failure to apply a macro level analysis to the green belt parcels.

Furthermore the draft Local Plan fails to make provision for custom build and self-building housing typologies despite a clear need being identified in the National Planning Policy Framework no recognition is made to the contribution this typology makes to meeting established demand. We understand that there is a need locally for such housing and failure to plan for such housing, is not positive.

EDIT Lands has also commented, where applicable, on the development management policies and proposed allocations as below:

- SP1: A Spatial Strategy for St Albans District
- SP3 – Land and the Green Belt
- HOU 1 – Housing Mix
- HOU 2 – Affordable Housing
- SP2 – Responding to the Climate Emergency
- NEB 6 – Biodiversity and Biodiversity Net Gain – Comment
- LG5 – Green Belt – Object

## 249 - Dr Phil Wadey

Submission Number: 249 Submission Date: 07/11/24 22:06

Respondent: Company/Organisation: Patchetts Green Bridleways Trust Name: Dr Phil Wadey

Comment Number: 3

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

Promoting Sustainable Design, construction and building efficiency is only part of the climate change solution. It is necessary not just to consider such aspects at the design and building stage, but throughout the lifetime of the development, in order to reduce carbon overall.

Accordingly, how people will access the buildings is important, since it is easy and perhaps the default option to design based around the car/motor vehicle.

When developments are created, if a network of paths to enable residents to get to the shops, get to local employment opportunities, get to public transport or get tout to the countryside are provided, the use of the car is reduced and walking, cycling and (in places) riding will be encouraged.

It follows that to maximise long-term sustainable design, policy CE1 needs an additional para (g) detailed below.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

In Policy CE1, add new para (g):

g. Creating travel options for non-motorised users (walkers, riders, cyclists) to encourage longer-term sustainable travel options to shops, amenities, public transport nodes and to places of recreation.

### If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?

* Yes, I wish to participate in hearing session(s)

### I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

4.7 The provision of key indicators and targets for promoting sustainable design and construction techniques at Policy CE1 is generally supported. However it is considered that the inclusion of rainwater harvesting weakens the policy by relying on a technique which has many technical challenges, particularly for residential development, when compared against other water efficiency measures such as flow restrictors. Furthermore, the target requirement for 110l per person per day should be the main focus with compliance judged against the measures to meet this target, as opposed to specifying specific routes to compliance such as rainwater harvesting. There is also a risk that the strict requirements of this policy could be quickly outdated through national legislative changes, meaning that these local provisions could be overtaken by national requirements.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

On this basis, it is suggested that the reference to new development requiring rainwater harvesting is removed.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

*Refer to Attached submission letter for whole response and figures.*

**Policy CE1 (Promoting Sustainable Design, Construction and Building Efficiency)**

7.10 Policy CE1 is ineffective insofar as it fails to set out clear and measurable requirements for development proposals, making it impossible to apply in the development management stage.

7.11 RPC is concerned with the lack of clarity on how the Council expects applicants to "demonstrate sustainable design and construction and a high degree of resource efficiency". What is the evidence required by the Council? Furthermore, the policy states that this requirement would be to a degree of proportionality to the proposal. However, it does not explain what the requirement for each typology or size of proposal would be. Is the Council leaving this proportionality issue to be interpreted in the future? By whom? RPC considers that the Council should be setting out in the Local Plan policy clear requirements for different development proposals, according to their principles of proportionality, as well as identify the evidence documents that would be required at planning application stage.

7.12 Criterion a) of the policy is not measurable, and this is a problem. The policy should establish the thresholds allowed and not permitted when it refers to carbon emissions, pollution, energy, etc.

7.13 Therefore, RPC considers this policy to be **unsound due to not being effective**.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. ## 291 - SEGRO (Radlett) Limited

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 7

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

3.1 Strategic Policy SP2 – Responding to the Climate Emergency states that the Council will support proposals that help to combat climate change, including *'pursuing the reduction of whole life-cycle carbon emissions (both operational and embodied)'*and providing *'on-site renewables, high standards of energy efficiency, and low carbon energy'*.

3.2 Policy CE1 - Promoting Sustainable Design, Construction and Building Efficiency sets out how *'new buildings should be designed and constructed to ensure efficient use of energy, water and materials'*. Part (a) requires proposals to take into account any nationally adopted standards.

3.3 SEGRO (Radlett) Limited are supportive of new buildings to be designed and constructed efficiently in order to minimise carbon emissions. The design of the SRFI will meet the requirements of The Building Futures Sustainable Design Toolkit (BFSDT) including a commitment to a BREEAM 'very good' standards, in accordance with adopted policy objectives at the time of approval.

3.4 Policy CE2 - Renewable and Low Carbon Energy seeks to *'increase the use of renewable and low carbon energy in the District*'. Part b of the policy requires major developments to set out at the planning application stage how they will make use of renewable or low carbon energy within the site through (i) submitting and agreeing an Energy Statement with the Council and (ii) agreed measure will be secured through conditions.

3.5 Segro support Policy CE2 which seeks to maximise the use of renewable or low carbon energy where appropriate is supported. In line with Policy CE2, an Energy Statement was submitted and approved for the SRFI.

Air Quality
We support draft Policy HW1 – Air and Noise Pollution, which requires air and noise pollution assessments for developments located in areas which may exceed national legislative air quality limits. To strengthen this policy, we recommend the following should be included:

•
Enforcement of no development granted permission in an Air Quality Management Area.

•
considers unfavourably any applications for schools, care homes and other vulnerable communities that are within an AQMA or immediately adjacent to known traffic hotspots;

•
requires a detailed Air Pollution Modelling for Major developments to ensure that more mitigation, additional to the default for such developments, is required where 'adverse impacts' are predicted.

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Draft Policy CE1***"Promoting Sustainable Design, Construction and Building Efficiency"*–all proposals, including *"building conversions, refurbishments and extensions must also minimise carbon and energy impacts. Proposals must demonstrate that they are seeking to limit greenhouse gas emissions through location, building orientation, design, landscape and planting, taking into account any nationally adopted standards".* It is not clear which policies prevail when the requirements for minimising carbon and energy impacts conflict with the impacts upon the historic environment, or upon the Green Belt. The proposed restriction upon water use of 110 litres would also be difficult to achieve through land-use planning control. As stated above, such matters are best left to other means of delivery, such as Building Control.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Amend the policy.

**350 - Hill Residential**

Submission Number: 350 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: tor&co Name: Sophia Goodhead

On Behalf Of Company/Organisation: Hill Residential Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Policy CE1: Promoting Sustainable Design, Construction and Building Efficiency**

Hill welcomes the removal of the alternative standards previously set out within Part a)i of the Regulation 18 DLP for the reasons provided in its Regulation 18 response.

It is noted that part b) of the policy still requires water conservation measures to reduce household consumption to under 110 litres per person per day. Paragraph 2.8 of the supporting text states that Building Regulations Part G2 sets a higher option standard for new development of 110 litres per person per day that can be applied where there is an evidence based need that the area is water stressed. If the council is to adopt this lower standard it must ensure that it has the necessary justification as required by paragraph 56-014 of the PPG. Further, it appears the policy wording goes further than the Building Regulations to state 'under' 110 litres per person per day. If the requirement is shown to be sufficiently justified and remains, the reference to 'under' should be removed so that it aligns with Building Regulations.

Hill is committed to tackling Climate Change and has a target to reach net zero carbon in its business operations and the homes it builds by 2030. However, Hill continues to object to the current wording of Part d), which requires the adoption of sustainable construction and demolition methods, including the use of materials with low embodied carbon. Hill recognises the importance of minimising waste and reducing the use of material with high embedded carbon, however, this must be left to the developer to decide on, based on the nature of the site and the type of development proposed. To take into account a variety of development scenarios and ensure the policy is sufficiently flexible (and thus effective), it is suggested that the Council encourages the use of sustainable construction and demolition methods and '*where possible*' the use of materials with low embodied carbon.

Part e) requires applicants to minimise waste during the construction and operation phases of development by using the Circular Economy approach. Again, whilst Hill recognises the importance of reusing and recycling materials there are limits as to how much of the industry's materials can come from such sources at present. To ensure the policy is effective, it is suggested that the phrase '*as far as possible'* is included in this policy.

Finally, Part f) requires proposals to include Sustainable Drainage Systems (SuDS) in new developments and to ensure the policy is sufficiently flexible and effective for various development scenarios, the policy should include '*where appropriate'* at the end of the policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.

- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

### 356 - Rachael Donovan

Submission Number: 356 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Hertfordshire and West Essex ICB Name: Rachael Donovan

Comment Number: 2

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

*Policy CE1 –Promoting Sustainable Design, Construction and Building Efficiency*

The HWE ICB supports the policy ambition of draft Policy CE1 to ensure new build development can demonstrate sustainable design, construction and resource efficiency. However, the policy and supporting text could be clearer what evidence an applicant is required to submit to demonstrate sustainable design, construction and resource efficiency and clearer how *'to a degree proportionate to the proposal'*, will be measured.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 361 - Mohammad Ahmed

Submission Number: 361 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: The Environment Agency Name: Mohammad Ahmed

Comment Number: 2

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Policy CE1: Promoting Sustainable Design, Construction and Building Efficiency** We welcome the inclusion of water efficiency in clause (c) related to retrofitting of existing buildings.

However, we note that sub-clauses i-ii (around BREEAM standards etc.) have been omitted since the Regulation 18 draft. We would recommend re-introducing them to make the policy more effective.

As recommended in our comments to the Regulation 18 draft, please provide clarity on the text ‘degree proportionate to the proposal’ of the above policy. We recommend that all developments within the St Albans Local Planning Authority’s (LPA) area should be subject to this policy.

We are pleased to see the inclusion of clause (f) related to Sustainable Drainage Systems (SuDS).

As communicated in our Regulation 18 response, we would also recommend editing the CE1 policy to include the requirement for significant housing developments (i.e., those which require an Environmental Impact Assessment) to conduct a site-specific water cycle study. This more detailed analysis can take account of new evidence and consider the phasing of a development to support any necessary infrastructure upgrades. This could then be incorporated into the relevant Infrastructure Delivery Plan.

Water cycle studies

Given the scale of the water resources challenges, we also strongly recommend St. Albans District Council to conduct a water cycle study as part of your new local plan. This would be an update to the Hertfordshire Water Study 2017, which identified immediate (2021), medium term (2031), and long term (2051) considerations. Our understanding of the challenges around water supply, climate change scenarios and environmental need have improved. Additionally, the specific requirements on water companies to meet their environmental obligations have changed, therefore, the above study requires an update and is not considered adequate. This should encompass a thorough assessment of drinking water supply, ideally considering specific network arrangements and where water is being obtained from to meet demand. Wastewater infrastructure and treatment constraints should also be included, as well as options to address emerging issues. Strong engagement with the relevant water companies will ensure this is comprehensive.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## CE2 - Renewable and Low Carbon Energy

### 32 - John Whiting

Submission Number: 32 Submission Date: 27/10/24 09:00

Respondent: Company/Organisation: Radlett Society & Green Belt Association (RSGBA) Name: John Whiting

Comment Number: 2

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Chapter 2 gives appropriate coverage to the Climate Emergency. However, whilst the listing at CE2 does mention solar power, it does not, to us, make it clear that the Council will support – or indeed call for – solar panels on all new housing and encourage their fitting to existing housing. Can that be made more explicit – or explained if it is not the case?

---

### 114 - Hertfordshire County Council - Property Team

Submission Number: 114 Submission Date: 06/11/24 23:21

Respondent: Company/Organisation: Vincent + Gorbing Name: George Sellers

On Behalf Of Company/Organisation: Hertfordshire County Council - Property Team Name:

Comment Number: 12

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

- This policy as currently written is not consistent with national policy, thus enabling the delivery of sustainable development. The below suggested wording is intended to address this.
- This policy should refer more explicitly to large scale renewable energy generation and how proposals should be assessed in order for the Plan to be sound.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The following wording should be added as criterion d) before the current criterion d) point:

1. *d) the Council will support proposals for large scale renewable energy production subject to demonstration of no unacceptable impacts on the following:*

*- visual amenity and landscape character;*

*- Heritage assets;*

*- designated landscapes and protected ecological areas;*

*- residential amenity and human health.*

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

A number of representations have been made on behalf of HCC Property which would benefit from being discussed within the forum of the EiP.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**155 - St Albans Cathedral**

Submission Number: 155 Submission Date: 07/11/24 12:19

Respondent: Company/Organisation: St Albans Cathedral Name: The Revd Will Gibbs

On Behalf Of Company/Organisation: St Albans Cathedral Name:

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We welcome a strong commitment in the Plan to renewable and low carbon energy in consideration of new developments but would urge that the same strong commitment and support be given to improvements to renewable and low carbon energy options on all existing sites and buildings. Notwithstanding heritage and conservation area considerations, we believe that the visibility of solar PV cells and other renewable and low carbon energy options should be celebrated rather than compromised or resisted.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. 0155_St Albans Cathedral [R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**183 - McCarthy & Stone Retirement Lifestyles Ltd, Jarvis Homes, and Wheathampstead Land**

Submission Number: 183 Submission Date: 07/11/24 15:09

Respondent: Company/Organisation: The Planning Bureau Ltd Name: Ms Jane Vlach

On Behalf Of Company/Organisation: McCarthy & Stone Retirement Lifestyles Ltd, Jarvis Homes, and Wheathampstead Land Name:

Comment Number: 7

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Non compliance with national policy

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Policy CE2**

This policy seeks to increase the use of renewable and low carbon energy in the District. Whilst the Council's commitment to meeting both its and the UK Government's target of net zero carbon emissions is commendable, it appears that the Council is going to achieve this through having mandatory carbon and climate standards from adoption of the plan that may go beyond government targets. However, it is our view that any requirement should be 'stepped' in line with Government targets and the proposed changes to the building regulations.

This approach is confirmed within the Ministerial Statement (statement no : Statement UIN HCWS123 available from Written statements - Written questions, answers and statements - UK Parliament) released on 13th December 2023. The ministerial statement confirms that with respect to the net zero goal….

'*The improvement in standards already in force, alongside the ones which are due in 2025, demonstrates the Government's commitment to ensuring new properties have a much lower impact on the environment in the future. In this context, the Government does not expect plan-makers to set local energy efficiency standards for buildings that go beyond current or planned buildings regulations. The proliferation of multiple, local standards by local authority area can add further costs to building new homes by adding complexity and undermining economies of scale. Any planning policies that propose local energy efficiency standards for buildings that go beyond current or planned buildings regulation should be rejected at examination if they do not have a well-reasoned and robustly costed rationale'* and '*To be sound, local plans must be consistent with national policy – enabling the delivery of sustainable development in accordance with the policies in the National Planning Policy Framework and other statements of national planning policy, including this one'*.

**Recommendation**

1. *b) Major development proposals must set out at the planning application stage how they will make use of renewable or low carbon energy within the site through submitting and agreeing an Energy Statement with the Council,* ***in line with government targets****. Agreed measure will be secured through conditions.*

-

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To provide additional context to the above comments and recommendations.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

---

**200 - Lawes Agricultural Trust**

Submission Number: 200 Submission Date: 07/11/24 16:49

Respondent: Company/Organisation: Montagu Evans Name: Mr Amran Nagra

On Behalf Of Company/Organisation: Lawes Agricultural Trust Name:

Comment Number: 6

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

The Lawes Agricultural Trust supports the principles of Policy CE2 in supporting the transition to a low-carbon energy network, however, does not feel that the opportunities available are fully reflected and further work is required to make this effective if it is to be considered Sound.

We note the updated draft plan does make additional reference to solar panels, specifically at point d) which states *'To maintain the public benefits of renewable power, proposals which overshadow existing solar panels should be avoided and / or mitigated'.*

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

However, in our view, the policy wording could still go further, specifically, by discussing the role of solar farms and supporting infrastructure such as Battery Energy Storage Systems (BESS) has in moving to a more sustainable future. Part c) i of the emerging policy remains the only reference to the use of solar power solely through the inclusion of panels, thermal-heaters and passive heating on south-facing designs.

We maintain our recommendation that the policy should discuss solar farms and the associated benefits. As currently worded, this is a notable omission from the Policy, and if the Council are to meet this sustainability objective the policy should be developed further to include reference to solar farms. We would also take the opportunity to reiterate that this amendment would assist in the implementation of Strategic Policy SP3 which specifically makes reference to renewable and low carbon energy generation.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

## 283 - Redbourn Parish Council

Submission Number: 283 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Troy Planning & Design Name: Mr Troy Hayes

On Behalf Of Company/Organisation: Redbourn Parish Council Name: Redbourn Parish Council

Comment Number: 6

### Do you consider the St Albans Local Plan to be legally compliant?

* No

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

*Refer to Attached submission letter for whole response and figures.*

**Policy CE2 (Renewable and Low Carbon Energy)**

7.14 Similarly to Policy CE1 above, Policy CE2 lacks sufficient clarity on what the Council's requirements are for new development. Whilst the expectations of the Council are the maximisation of use of renewable or low carbon energy, it is not clear how these requirements would apply to minor development. Is the Council's intention, according to criterion b), that only major development is required to submit an energy Statement demonstrating the proposed use of renewable and low carbon energy sources? The Council has not defined what low carbon energy means.

7.15 The above questions highlight that **Policy CE2 is unsound, as it lacks clarity, measurable requirements and leads to ambiguity of interpretation, not being effective**.

### Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Policy CE2 lacks sufficient clarity on what the Council's requirements are for new development. **291 - SEGRO (Radlett) Limited**

Submission Number: 291 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: RPS Consulting Name: Simon Peake

On Behalf Of Company/Organisation: c/o RPS Name: SEGRO (Radlett) Limited

Comment Number: 8

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

3.1 Strategic Policy SP2 – Responding to the Climate Emergency states that the Council will support proposals that help to combat climate change, including *'pursuing the reduction of whole life-cycle carbon emissions (both operational and embodied)'*and providing *'on-site renewables, high standards of energy efficiency, and low carbon energy'*.

3.2 Policy CE1 - Promoting Sustainable Design, Construction and Building Efficiency sets out how *'new buildings should be designed and constructed to ensure efficient use of energy, water and materials'*. Part (a) requires proposals to take into account any nationally adopted standards.

3.3 SEGRO (Radlett) Limited are supportive of new buildings to be designed and constructed efficiently in order to minimise carbon emissions. The design of the SRFI will meet the requirements of The Building Futures Sustainable Design Toolkit (BFSDT) including a commitment to a BREEAM 'very good' standards, in accordance with adopted policy objectives at the time of approval.

3.4 Policy CE2 - Renewable and Low Carbon Energy seeks to *'increase the use of renewable and low carbon energy in the District*'. Part b of the policy requires major developments to set out at the planning application stage how they will make use of renewable or low carbon energy within the site through (i) submitting and agreeing an Energy Statement with the Council and (ii) agreed measure will be secured through conditions.

3.5 Segro support Policy CE2 which seeks to maximise the use of renewable or low carbon energy where appropriate is supported. In line with Policy CE2, an Energy Statement was submitted and approved for the SRFI.

**329 - Mr Russell Crow**

Submission Number: 329 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Mr Peter Atkin

On Behalf Of Company/Organisation: Richborough Estates Name: Mr Russell Crow

Comment Number: 14

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

CE1 refers to a requirement for evidence to be provided in support of planning applications, to demonstrate energy and resource efficiency. Criterion b) of CE2 appears to expand on this requirement by suggesting that this detail should be provided through an Energy Statement.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Proposed remedy: Incorporate criterion b) from CE2 into CE1, which will make the scope required of these Energy Statements clearer, and at the same time also clarify what supporting evidence SADC are expecting from Applicants to demonstrate compliance with CE1.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**Representation on draft policies**

The following section presents representations on specific draft strategic policies within the DLP for the Council's review and consideration.

**Policy CE2: Renewable and Low Carbon Energy**

Part b) of the policy requires major developments to set out how proposals will make use of renewable or low carbon energy within the site through an Energy Statement at application stage, and that agreed measures will be secured through conditions.

It is welcomed that the requirement to undertake this work prior to developing detailed designs has been removed. However, the requirement for deliverables such as an Energy Statement is part of the application process which can be set out separately within the Council's validation list. In addition, the final part of the text is already a mechanism that can be used to secure agreed

proposals through planning conditions and shouldn't be set out separately within planning policy. Consequently,, part b) of policy CE2 is not justified and does not serve a clear purpose, in accordance with paragraph 16f of the NPPF, and should be removed.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusion**

Hill welcomes the DLP's overarching spatial strategy as a general approach and strongly supports the proposed allocation of the land at Townsend Lane (under site M7). While it supports identifying and focussing development at the most appropriate and sustainable settlements, such as Harpenden, and making as much use as possible of brownfield sites, Hill considers that greenfield sites in the Green Belt such as M7 will also be required to meet housing need.

Hill considers that exceptional circumstances exist to justify the Site's release for the following reasons:

- The Site is suitable and available for development purposes, and delivery is fully achievable.
- The development of the Site would present the opportunity for a 'strong green edge' to the western side of the Site, adjoining the open countryside, which would strengthen the boundary between the settlement and the Green Belt.
- Development of this section of land from Green Belt would not harm the purposes of the wider Green Gelt given its visual containment and the fact that it is developed on three sides.
- The site assessed on its own merits makes a limited or no contribution towards checking sprawl, preventing merging, recycling urban land, preserving setting or maintaining local gap.
- The site itself is not subject to physical or environmental constraints that would affect development.
- It is anticipated that it would be possible (based on the current local plan timetable) to deliver new homes by Q1 2028, and therefore the Site could contribute to meeting the housing needs of St Albans City and District, including the local needs of Harpenden, early in the plan period.

On their own, it is considered that the above provide the exceptional circumstances necessary to justify the Site's removal from the Green Belt and its allocation for residential development. However, the Site also offers an opportunity to increase the supply at a range of tenures in a sustainable growth location, with an appropriate form of development in keeping with the residential character of the area, and without unduly affecting the objective and function of the wider Green Belt. The Site is available now and, subject to the confirmation of the Green Belt release and allocation, would meet the definition of deliverable in the NPPF.

Hill has some concerns regarding the accelerated submission of the DLP for examination (anticipated in December 2024), which aims to submit ahead of the proposed NPPF changes and updated new standard method being published. This would delay SADC's requirement to address the proposed increase in housing need and means that there will be less time for SADC to undertake the necessary work to support the submission of the DLP and examination (including preparing responses to objections or concerns raised at Reg 19 stage). Indeed, these representations suggest a number of areas where further justification and evidence are considered necessary. Without

proper consideration and justification, SADC is exposed to an increased risk of the DLP being found unsound and having to withdraw from examination. Clearly this would be a regrettable outcome resulting in an avoidable delay to the plan process.

Hill fully supports SADC's approach in applying the standard method as an absolute minimum housing requirement, with flexibility provided through site allocations over and above the requirement. This is an appropriate response to the Council's historic record of delivery performance and unmet housing need. However, as noted in response to Policy SP1, the total housing need figure needs to be updated to reflect the full 17 year plan period.

It will be vital that the Council demonstrates they have actively engaged with neighbouring authorities as part of the duty to co-operate and consider how it could increase its own housing requirement and supply to address some of these unmet needs, otherwise there is a risk that the plan will not be considered to be legally compliant or positively prepared.

Due to the nature of the District, development of Green Belt land in the most sustainable locations will be necessary to meet housing need, whether that is based on the current DLP housing numbers or an increased figure using the anticipated new standard method. The pressure for housing in the District is not going to diminish. Hill strongly supports SADC's decision to amend Green Belt boundaries to meet this housing need, including the release of M7 specifically, and to promote sustainable patterns of development in accordance with the NPPF (paragraph 147). Hill agrees that exceptional circumstances exist to justify this, irrespective of when the plan is submitted for examination.

## Chapter 3 - Sustainable Use of Land and Green Belt

### 15 - Trans Link London Limited

Submission Number: 15 Submission Date: 18/10/24 12:13

Respondent: Company/Organisation: PJB Planning Name: Peter Biggs

On Behalf Of Company/Organisation: Trans Link London Limited Name:

Comment Number: 13

**Type:**

* Paragraph

**Number:**

3.29

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Paragraph 3.29 refers to Broad Location are considered to be large developments of 250 or more homes (or equivalent of employment use). Policy LG1 then provides criteria that the development should comply with. In particular, criteria l. requires that it is demonstrated how proposals integrate with and where appropriate seeks to improve the existing transport network, including public transport services upgrades/improvements.

Whilst criteria for Broad Locations set out by Policy LG1 are supported, it is considered that the definition for Broad Locations set out in paragraph 3.29, should be widened to include situations where the cumulative total of a number of parcels of housing within the same locality would provide for 250 or more homes.

This approach could then be applied to the 405 unit proposed site allocation west of London Colney (south of Napsbury Park Estate) and proposed additional 200 unit to the north of Napsbury Park Estate (Parcel 515), which would assist with promoting and providing a new railway station on the Midland Main line on land north of Napsbury Park Estate. This would therefore comply with criteria l. of Policy LG1 and provide significant infrastructure improvements and provision of a sustainable mode of transport for residents of the new development, Napsbury Park Estate and London Colney.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Paragraph 3.29 and Policy LG1 should be widen the definition of Broad Location to include situations where the cumulative total of a number of parcels of development/housing delivery within the same locality would provide for 250 or more homes and potential for significant infrastructure improvements.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To scrutinise the Council approach to defining Broad Locations and to ensure that the sustainability credentials and objectives of Policy LG1 are achieved.

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

It looks like there are failings in the Regulation 18 Consultation steps in the Plan as it appears that the sites for the Green Belt have been led by speculative developers through 'call for site' processes and have not been ascertained by an orderly undertaking.

The council has neglected their own procedures for site allocation processes. The council consistently state the same phrase response -' The inclusion of this site is in line with the methodology in the Arup Green Belt Review 2023, which recommends the site for further consideration.' However, I cannot see how the faults that were pointed out in Regulation 18 process with Arup's Green Belt Review were dealt with particularly with reference to sub-area, defensive boundaries and buffers (with respect to L2). Why have these not been addressed?

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

**30 - MS REGINE JEANNIN**

Submission Number: 30 Submission Date: 27/10/24 20:26

Respondent: Company/Organisation: Name: MS REGINE JEANNIN

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

My concerns previously raised have not been addressed: The Plan generally appears to have taken ARUPs Green Belt review and just used these sites, without further consideration of other important factors, such as traffic, schools, doctors and other sustainabilty aspects. In addition, there appears a general desire to concrete over the Green Belt, rather than redeveloping Brownfield sites.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**32 - John Whiting**

Submission Number: 32 Submission Date: 27/10/24 09:00

Respondent: Company/Organisation: Radlett Society & Green Belt Association (RSGBA) Name: John Whiting

Comment Number: 3

**Type:**

* Paragraph

**Number:**

3.5

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

We naturally welcome the clear support for the preservation of the Green Belt at para 3.5; the processes outlined in LG5 & LG6 are helpful. We do think, however, that there needs to be stress on the reasons for the Green Belt, including in particular the prevention of nearby settlements merging. This to us is a key principle that must be part of Local Plans.

---

### 83 - Affinity Water

Submission Number: 83 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: Name: Lita Khazaka

On Behalf Of Company/Organisation: Name: Affinity Water

Comment Number: 9

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Much of this chapter clarifies how the council will deliver its reduced housing target.

Affinity Water has already demonstrated why the trajectory (Table 3.2) in this chapter of the Local Plan is unsound.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Affinity Water also seeks to add a further allocation to the list of sites – Site P4 Affinity Water depot, Roestock Lane, Colney Heath - that would be covered by Local Plan Policy LG4 Large, Medium and Small Sites to be inserted into Part B Site Allocations. In promoting this alternative site, Affinity Water wishes to highlight shortcomings in the Arup Green Belt studies which has informed the final allocation of sites.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To highlight the shortcomings of the research that has underpinned this Local Plan (housing and other matters) and to point out changes in the area since the Arup Green Belt review was undertaken that make the Affinity Water depot appropriate to bring forward for much needed housing development.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

---

**99 - St Congar**

Submission Number: 99 Submission Date: 06/11/24 13:56

Respondent: Company/Organisation: Andrew Black Consulting Name: Mr Andrew Black

On Behalf Of Company/Organisation: St Congar Name:

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

*Please see attachment for tables and images referenced below:*

St Congar have an interest in the Land at Smug Oak Lane in Bricket Wood as set out within these representations.

The representations are made in the context of the tests of soundness as set out in paragraph 35 of the current National Planning Policy Framework (NPPF). This states that plans are 'sound' if they are:

***Positively prepared*** *– providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;*

***Justified*** *– an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;*

***Effective****–deliverable over the plan period, and based on effective joint working on crossboundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and*

***Consistent with national policy*** *– enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant.*

The wider context is that an up-to-date local plan for St Albans is long overdue. The council has one of the oldest Local Plans in the country which dates back to 1994. The previous attempt to adopt a local plan came to a halt in April 2020 when the Inspector found significant issues of soundness including:

- Failure to engage constructively and actively with neighbouring authorities.
- The preparation of the plan was not in accordance with Council's Statement of Community Involvement.
- Failure of the Sustainability Appraisal to consider some seemingly credible and obvious reasonable alternatives to the policies and proposals of the plan.
- Failure of the plan to meet objectively-assessed needs.
- Absence of key pieces of supporting evidence for the plan.

Since the publication of the regulation 18 version of the plan for consultation last year, the Labour Government announced a significant consultation on the revised NPPF. Alongside this the government has proposed significant changes to the standard method of housing calculation which would see the housing need for St Albans increase from 885 dwellings per annum (dpa) under the current standard method to 1,544 dpa under the new method. The consultation for the NPPF and Standard Method ended in September 2024 and the new NPPF is expected to be released by the end of this year.

This increase in housing requirement was made clear to council members as part of the briefing on the regulation 19 consultation version at the full council meeting on 16 October 2024. Annex 1 of the draft NPPF sets out the proposed Implementation/Transition Arrangements. Paragraph 226 states that from the publication date of the new NPPF (+ 1 month) the policies set out within the new NPPF will apply unless one or more of the following apply with emphasis added:

1. *the emerging annual housing requirement in a local plan that reaches or has reached Regulation 19 (pre-submission stage) on or before [publication date + one month] is no more than 200 dwellings below the published relevant Local Housing Need figure;*

2. *the local plan is a Part 2 plan that does not introduce new strategic policies setting the housing requirement unless the relevant Local Plan Part 1 has been prepared applying the policies in this version of the Framework;*
3. ***the local plan is or has been submitted for examination under Regulation 22 on or before [publication date + one month].***

In order to meet the proposed transition arrangements under the emerging NPPF, the council has set out an ambitious programme for the adoption of the new local plan by early December which involves approval of submission of the plan for examination by full council at the end of November.

Paragraph 3.31 of the briefing paper to full council in October clearly set out the risks of the accelerated time frame for submission as follows:

*3.31. The accelerated timescale to Submission (intended on 2 December 2024, rather than as previously envisaged at the end of March 2025) means that there will be less time to undertake work to support Submission of the Plan and Examination, which raises the risk of having to withdraw the Plan at Examination. This is primarily because of the accelerated point of Submission in December 2024, rather than the end of March 2025:*

*1 – There will realistically be fewer agreed and signed Statements of Common Ground to assist the Inspectors.*

*2 – There will realistically be fewer and less extensive Topic Papers to assist the Inspectors.*

*3 – There will realistically be less time to prepare extensive responses to Objections or concerns raised at Regulation 19 stage to assist the Inspectors.*

In an important aspect of the local plan process is set out in Section 20 of the Planning and Compulsory Purchase Act 2004 sets out the process for independent examination and states that a local planning authority must not submit a development plan document to the Secretary of State for independent examination unless (with emphasis added)

1. *a) They have complied with any relevant requirements contained in regulations under this part, and*
2. ***b) They think the document is ready for independent examination.***

It is clear that a fastracked submission of a local plan would breach the requirements in this regard and the points of risk raised by council officers are highly pertinent. In any event, even if the plan was to be found sound, such an approach would mean that preparation of a new plan would be required under the provisions of paragraph 227 of the draft NPPF which states:

***Where paragraph 226 c) applies, local plans that reach adoption with an annual housing requirement that is more than 200 dwellings lower than the relevant published Local Housing Need figure will be expected to commence plan-making in the new plan-making system at the earliest opportunity to address the shortfall in housing need.***

It is patently clear that the council is attempting to subvert a justified and effective plan making process which could properly meet housing needs in favour of a short-lived victory of a plan meeting an outdated housing requirement which will need to be immediately updated and addressed in any event.

**Site Details and Background**

The site is located to the south of Smug Oak Lane to the west of Bricket Wood. The site is approximately 2.5 hectares in size and is currently used as open grazing land.

The site is outside of the settlement and within the green belt but has no other environmental or landscape designations. However, it adjoins existing built form on two sides with residential housing to the east and St Stephen Parish Council Hall and car park to the west.

St Congar has had an interest in the site for some time and dialogue took place with St Stephen Parish Council in April 2023.

Two options were presented to them:

**Option 1** – 75 homes with 100% affordable housing (owned and manged by a Registered Provider) with a policy compliant level of 17 affordable / social rent houses.

- 58nr intermediate / shared ownership houses
- No “for market sale” houses.

**Option 2** – 33 homes with 50% affordable housing.

- 16nr 3 and 4 bedroom market houses
- 11nr 2 and 3 bedroom affordable / social rent houses • 6nr 3 bedroom intermediate / shared ownership houses

The site is identified as site reference C-183 and STS-02-18/STS-02-21 in the Housing and Economic Land Availability Assessment and was previously noted as being *potentially suitable, available, and achievable subject to further assessment as part of the site selection process.*

Further analysis of the site selection process through the Sustainability Appraisal and Green Belt Review is set out within these representations.

**Sustainability Appraisal**

Paragraph 32 of the framework requires that Local Plans and Spatial Development Strategies should be informed **throughout** their preparation by a Sustainability Appraisal (SA) that meets the relevant legal requirements.

The legal frameworks for SAs are set out within section 19 of the Planning and Compulsory Purchase Act 2004 which states that the authority must prepare a plan *with the objective of contributing to the achievement of sustainable development.* Moreover, the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004 states that SAs must ensure the potential environmental effects are given **full consideration** alongside social and economic issues.

Paragraph 32 of the framework goes on to state that the SA should *demonstrate how the plan has addressed relevant economic, social, and environmental objectives (including opportunities for net gains). Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered).*

In support of the regulation 19 version of the plan, the council has undertaken a Strategic Environmental Assessment (SEA) and Sustainability Appraisal (SA) (September 2024) in accordance with the requirements of Planning and Compulsory Purchase Act 2004.

Table B of Appendix 4 of the Sustainability Appraisal assesses the individual development sites as set out in the HELAA against the objectives of the site selection / sustainability objectives. This includes an assessment of the site as identified as STS-02-18/STS-02-21. The findings of the assessment are set out [in the attachment] and commentary provided against each in turn.

It is unclear through the Sustainability Assessment to what extent sites were not taking forward on this basis alone or whether other factors such as the green belt review had influence.

It is considered that the assessment of sites within the Sustainability Assessment is unsound as it is not effective or justified. Further commentary is set out on the site selection process and green belt review process within the representations.

**Housing Requirement**

The Housing Requirement for St Albans is derived from the Standard Method and sets out that the council must identify and allocate land for at least 15,096 net additional homes over the plan period or 888 dwellings per annum. The Local Housing Need derived from the Standard Method is a capped figure and it should be noted that the uncapped figure for St Albans is considerably higher at 1,165 dwellings per annum. The housing requirement under the proposed amendments to the standard method would see a further increase to 1,544 dpa. In several recent local plan examinations (Mid Sussex, Bournemouth and Elmbridge) inspectors have placed weight on the emerging standard method as a material consideration which indicates the direction of travel for government policy and have sought further consideration of a higher housing need accordingly.

As set out in the table [in the attachment], the council has consistently failed to deliver housing at the rate expected within the draft local plan.

The South West Herts Local Housing Needs Assessment indicates that 443 affordable rented dwellings and 385 affordable home ownership dwellings per annum would be needed in St Albans District to meet demand. This would represent a total of 825 dwellings per annum which is almost the entire annual housing target in the plan. It is therefore considered that the use of the capped current standard method masks the true and pressing affordable housing need in the district which will continue to grow without consideration of a higher housing target.

St Albans is in a wider region of significant unmet need from other nearby/adjoining authorities. Three Rivers District Council is advancing with a revised plan which is described as *Low Housing Growth and Green Belt Restraint* and 6,600 homes short of Local Housing Need (LHN). Hertsmere Council published a draft plan in April 2024 which is 2,200 homes short of LHN. Dacorum Borough Council set out a consultation document in October 2023 which gives rise to an unmet need figure in the region of 2,800 homes. There is also a requirement for further consideration of unmet need from adjoining London Boroughs (Barnet, Enfield and Harrow) which are all progressing with local plans. Specifically, the draft Enfield Local Plan states that there could be a shortfall of 38,000 homes in the borough by the end of the plan period. The unmet need in the surrounding areas is of a substantial magnitude which also gives rise to further requirements in terms of Duty to Cooperate which are set out below.

Finally, as set out, the adoption of an up-to-date plan has been considerably delayed for St Albans and it is vital that a sound a robust plan is put in place which would allow for the delivery of much needed market and affordable housing to be delivered in the early part of the plan period.

**Duty to Co-operate**

Paragraph 26 and 27 of the National Planning Policy Framework emphasises the importance of maintaining effective co-operation throughout the plan making process and states (with emphasis added):

***Effective and on-going*** *joint working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy. In particular, joint working should help to determine where additional infrastructure is necessary, and whether development needs that cannot be met wholly within a particular plan area could be met elsewhere.*

*In order to demonstrate* ***effective and on-going joint working****, strategic policy- making authorities should prepare and maintain* ***one or more*** *statements of common ground, documenting the cross-boundary matters being addressed and progress in cooperating to address these. These should be produced using the approach set out in national planning guidance and be made publicly available throughout the plan- making process to provide transparency.*

Section 33A(3) of the Planning and Compulsory Purchase Act 2004 sets out the activities which bodies subject to the duty to co-operate must co-operate on. Paragraph (3)(d) of section 33A of that Act provides that such bodies will be subject to the duty when undertaking activities that can

reasonably be considered to prepare the way for the preparation of development plan documents, marine plans, and other local development documents, in this case the regulation 18 version of the Local Plan.

The Statement of Community Involvement for St Albans Council (February 2023) sets out a list of Specific Consultation Bodies in appendix A and lists the prescribed bodies as follows:

- Hertfordshire County Council
- Adjoining / neighbouring local planning authorities (Three Rivers District Council, Dacorum Borough Council, North Hertfordshire District Council, Welwyn Hatfield Council, Hertsmere Borough Council, Watford Borough Council, Central Bedfordshire District Council, Luton Borough Council)
- All town and parish councils in St Albans City and District Parish Councils in other Districts, where the Parish Council boundary adjoins St. Albans City and District

There has been no such update produced as part of the evidence base for the regulation 19 consultation.

Paragraph 1.12 of the Local Plan states:

*A Duty to Cooperate workshop for all prescribed bodies, including all neighbouring planning authorities and Hertfordshire County Council, was held in September 2022. Following the workshop follow-up letters were sent, with a specific request being sent to those neighbouring authorities that could potentially help to meet St Albans' need, including for land for housing and for a potential Strategic Rail Freight Interchange (SRFI).*

However, there is no evidence base document which sets out the outcomes of the workshop or any indication that engagement with the neighbouring planning authorities has been *ongoing* in the past year since the initial workshop. The Evidence Paper published in September 2024 sets out the response to the issues raised by the inspectors of the previous SADC local plan. In relation to DtC which was a key failing of the plan the council sets out that:

*The Council wrote to neighbouring authorities regarding Local Plan Vision, Strategic Priorities and Objectives, the Green Belt Methodology, and the SA Scoping Report in 2022 and the draft Local Plan Reg 18 in 2023. Pre-Reg 18 DtC Councillor meetings held 2022 during Reg 18 DtC Councillor meetings held Sept 2023 and during Reg 19 DtC Councillor meetings proposed for October 2024. SADC 'Can you help us meet our need' letters sent November 2022 and follow up letters on 'can you help us meet our need' sent 24.10.23 after Reg 18 and DtC Councillor meetings. Letters focus on the key issue of potential unmet housing need and approach to the Green Belt, and other cross boundary issues (including the SRFI, employment need, education provision etc.).*

It then states that this will be updated further at the Submission Stage and Statements of Common Ground will be prepared at the time of the plan submission and notes that an *Overarching Statement of Common Ground [will be] published with Reg 19.* No such overarching SOCG has been published with this regulation 19 consultation pointing to a lack of progress in this regard which is required to be remedied ahead of submission. In any event, letters sent to adjoining authorities asking for need to be met does not satisfy actions required under the DtC and it is clear that the plan is fatally unsound on this basis alone.

Given that a failure of the Duty to Co-operate was one of the primary reasons the previous Local Plan was found unsound, then it is highly surprising that this matter has not been adequately evidenced from the outset of the plan making process. In its current form the plan is not effective, justified nor has it been positively prepared and is therefore unsound on this basis. This is a matter which must be remedied before the draft Local Plan can proceed to any next steps.

**Reasonable Alternatives**

The Planning Practice Guidance sets out the way in which the Sustainability Appraisal should assess reasonable alternatives and identify likely significant effects as follows:

*The sustainability appraisal needs to consider and compare all reasonable alternatives as the plan evolves, including the preferred approach, and assess these against the baseline environmental, economic, and social characteristics of the area and the likely situation if the plan were not to be adopted. In doing so it is important to:*

- *outline the reasons the alternatives were selected, and identify, describe, and evaluate their likely significant effects on environmental, economic, and social factors using the evidence base (employing the same level of detail for each alternative option). Criteria for determining the likely significance of effects on the environment are set out in schedule 1 to the Environmental Assessment of Plans and Programmes Regulations 2004;*
- *as part of this, identify any likely significant adverse effects and measures envisaged to prevent, reduce and, as fully as possible, offset them;*
- *provide conclusions on the reasons the rejected options are not being taken forward and the reasons for selecting the preferred approach in light of the alternatives.*

*Any assumptions used in assessing the significance of the effects of the plan will need to be documented. Reasonable alternatives are the different realistic options considered by the plan-maker in developing the policies in the plan. They need to be sufficiently distinct to highlight the different sustainability implications of each so that meaningful comparisons can be made.*

*The development and appraisal of proposals in plans needs to be an iterative process, with the proposals being revised to take account of the appraisal findings.*

*[Paragraph: 018 Reference ID: 11-018-20140306 Revision date: 06 03 2014]*

Table 5.2 of the SA sets out the Reasonable Alternative Growth Scenarios which are tested as part of the regulation 19 consultation.

There are two significant failings in the testing of reasonable alternatives in the plan. The first being that only figure marginally in excessive of the Local Housing Need (+12%) has been tested. No testing has been undertaken on a substantially increase housing figure which would take in to account the emerging NPPF requirements or would address the significant unmet need from local authorities. It is not suggested that there would not be significant impacts with this approach, but it would also give rise to substantial economic and social benefits. There is no justification to not testing this approach at all as part of reasonable alternatives.

Secondly, it is only a higher delivery from St Albans or Redbourn which are tested in the growth scenarios. The figures from Bricket Wood are consistently either 127dpa or alternatively 0dpa. It is not considered that this approach adequately tests credible reasonable alternatives with particular focus on the wording of the PPG which requires the alternatives *to be sufficiently distinct to highlight the different sustainability implications of each so that meaningful comparisons can be made.*

Paragraph 75 of the Inspector Report for the previous Local Plan set out the following in relation to Reasonable Alternatives:

*Based on our concerns set out above, we consider that there are a number of obvious and seemingly credible reasonable alternatives that have not been considered. This being so, we are not convinced that either the SA or the SA addendum has considered and compared reasonable alternatives as the Plan has evolved, including the preferred approach, and assessed these against the baseline environmental, economic and social characteristics of the area and the likely situation if the Plan were not to be adopted.*

Overall, it is not considered that the Sustainability Appraisal has adequately considered Reasonable Alternatives and the plan is therefore not justified or effective in that regard.

**Hemel Garden Communities**

The Draft Local Plan has a strong reliance on the delivery of at least 4,750 new homes as part of the Hemel Garden Communities programme by 2041 under policy LG2. This represents just over 31% of the entire housing requirement. The delivery of the Hemel Garden Communities is reliant on cross boundary working with Dacorum Council.

The Housing Trajectory as set out in Table 3.2 of the Local Plan indicates that delivery of dwellings from the Garden Communities will start in 2029/30 then continue to the end of the plan period as [set out in the attachment]:

Even with the expedited timeframe for the local plan as now envisaged it is considered overly ambitious to expect delivery of dwellings from a site of this scale only three years after adoption of the plan.

The second edition of the *Start to Finish Report* prepared by Lichfields in September 2024 sets out key figures based on actual examples of large developments across the country. The report states that the average time from validation of the first planning application to the completion of the first dwelling on schemes of more than 2,000 dwellings is 6.6 years, considerably more than the 3 years being predicted in the housing trajectory.

The *Start to Finish* report also examines the average build out rates for large schemes of 2,000+ dwellings and puts this at 100-188dpa. Again, this is considerably less that the delivery rate predicted in the housing trajectory.

The speed of delivery of housing within the plan period from garden communities is a matter which has led to findings that plans produced by other local authorities were not sound with the most recent examples being Tandridge District Council and the North Essex Authorities.

Overall, it is accepted that the development of a garden community at Hemmel Hempstead is required and could deliver sustainable places in the much longer term. However, the overly ambitious expectations for the delivery of housing from the garden communities within this plan are not considered to be effective and the plan would not be sound in its current form.

**Site Selection Process**

The site at Smug Oak Lane was assessed in the Green Belt Review in the wider Strategic Land Parcel 27 as site SA-121. Overall, the review sets out the following scores [see attachment] against the individual purposes of the green belt:

The assessment sets outs out detailed commentary on the impact of development of the site on each of the individual purposes.

The scores against purpose 1 are considered appropriate given the location of the site.

Regarding purpose 2 (to prevent neighbouring towns merging into on another) the assessment sets out the following commentary (with emphasis added):

*The sub-area is not located at the edge of the settlement. The sub-area would introduce a new area of built form, which would perceptually and physically narrow the existing gap between Bricket Wood and How Wood; and between Bricket Wood and Radlett and reduce the overall openness and scale of these gaps.* ***It is judged that there may be some scope for development without significant physical or perceptual erosion of the gap between neighbouring built-up areas. The M25 provides an additional barrier to the merging of settlements.***

The view that there is some scope for development is supported. On this basis it is considered that the score against this green belt purposes should in fact be lower. Regarding purpose 3 (to assist in safeguarding the countryside from encroachment) the assessment sets out the following commentary: *The sub-area is not covered by any built form. The sub-area comprises an open field. It is bounded by intermittent tree lines and has a flat topography which limits views into wider countryside. There are some views onto neighbouring residential buildings. Overall, the subarea has a strongly unspoilt rural character.*

It is considered that the site is capable of being developed in such a way that the views into the wider countryside and corresponding rural character would not be harmed. Accordingly, the scoring of the parcel to this purpose of the green belt should be revised down.

Overall, it is considered that the council has taken an overly cautious approach to the protection of individual green belt sites which are highly appropriate for development. This concern was raised in the inspector report to the previous Local Plan at paragraph 49 which states:

*We also have concerns regarding the strategic site selection process. At Stage 1 a high number of sites were immediately discounted from further assessment on the basis of their Green Belt Review evaluation (and were rated red). The 4 identified amber sites all had only 1 or zero effects on the Green Belt Purposes (as identified for the relevant parcels in the 2013 Green Belt Review). However, representors refer to a number of sites that were rejected at Stage 1 despite also having zero or only 1 significant impact on Green Belt purposes (in the same way as the amber and green rated sites).*

As set out, it is considered that it is justified for the council to seek to meet a higher housing target for a number of reasons. These representations also set out significant concerns over the delivery of dwellings from Hemel Garden Communities within the lifetime of the plan. It is therefore considered that the council will need to seek to allocate other suitable and deliverable sites in order to meet the pressing need in the early part of the plan period.

The Planning Practice Guidance sets out what should happen if there are insufficient sites to meet housing need as follows:

*When preparing strategic policies, it may be concluded that insufficient sites / broad locations have been identified to meet objectively assessed needs, including the identified local housing need.*

*In the first instance, strategic policy-making authorities will need to revisit their assessment, for example to carry out a further call for sites, or changing assumptions about the development potential of particular sites to ensure these make the most efficient use of land. This may include applying a range of densities that reflect the accessibility and potential of different areas, especially for sites in town and city centres, and other locations that are well served by public transport. If insufficient land remains, then it will be necessary to investigate how this shortfall can best be planned for. If there is clear evidence that strategic policies cannot meet the needs of the area, factoring in the constraints, it will be important to establish how needs might be met in adjoining areas through the process of preparing statements of common ground, and in accordance with the duty to cooperate. If following this, needs cannot be met then the planmaking authority will have to demonstrate the reasons why as part of the plan examination. ]Paragraph: 025 Reference ID: 3-025-20190722 Revision date: 22 07 2019]*

It is considered highly appropriate that the council should consider the allocation of other sites in order to meet established housing need through both unmet need from adjoining authorities and/or the emerging increased housing need figures as a result of the standard method calculation.

**Comparisons with Other Allocations in Bricket Wood**

It is noted that three sites in Bricket Wood are identified in the local plan for release from green belt:

- M4 – North of Oakwood Road, Bricket Wood – 74 dwellings
- M15 – Bucknalls Drive, Bricket Wood – 44 dwellings
- M23 Ashdale Lye Lane, Bricket Wood – 9 dwellings

A further site (OS1 – Land to North of Bricket Wood) which adjoins site M4 is identified for the delivery of community uses including allotments, a new medical centre, relocated scout hut, community centre and associated outdoor/recreation facilities.

Appendix E of the Site Selection Methodology, Outcomes and Site Allocations sets out the conclusions of the sites in respect of each of the sites and this is compared to the assessment of the land at Smug Oak Lane: [See attachment for more details]

It is therefore clear that the land at Smug Oak Lane performs at least as well, if not better, against key sustainability objectives than the allocations in the plan for Bricket Wood. In the absence of further justification and reasoning for the discounting of the land at Smug Oak at Lane it is considered that this represents a logicial opportunity for allocation in the plan.

**Conclusions**

These representations set out considerable concern on the soundness of the regulation 18 version of the local plan in a number of areas.

The land at Smug Oak Lane represents an appropriate site for housing development and engagement with the parish council has indicated there would be support for this to come forward. It is considered that additional sites will be needed in order to make the plan sound and that this site represents a suitable site for allocation within a future iteration of the plan.

St Congar is able to provide any further information on the site that the council require.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Housing numbers: section 1.21 states that population has increased by 6% since 2011. The Dwelling Stock Estimates ((www.gov.uk/government/collections/dwelling-stock-including -vacants) (Table 125)) shows that the housing stock for St Albans District in 2011 was 58000. This had increased to 63000 by mid-2023. This increase in the housing stock is 8.26%, suggesting that there has been a diminution of housing need in the District since 2011. There is no mention of this in Regulation 19. This makes the plan unsound.

“The Local Plan sets out the planning policies and proposals for the future development of the City and District of St Albans” (Reg 19 para 1.2). Table 1.3 Settlement Hierarchy – Settlement “St Albans, Hemel Hempstead (currently in Dacorum Borough but expansion into District planned)” There are no published proposals to change the boundary between Dacorum Borough and St Albans City and District to give effect to this “expansion”. NPPF (December 2023) section 61

states " In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for". The housing numbers applied to the sites included in Hemel Garden Communities within the District are solely to meet the housing need of the residents of St Albans C&DC. Under the heading Duty to Co-operate, (Reg 19) Section 1.11 states that "St Albans is also working jointly with Dacorum on proposed cross boundary development at Hemel Garden Communities". Under the heading "Hemel Garden Communities" Section 3.34 states "The Hemel Garden Communities (HGC) Programme is an ambitious proposal to transform Hemel Hempstead through the regeneration of the existing town…". Thus, the allocation of housing numbers to HGC is for the benefit of Dacorum Borough and, as such, fails to meet the opening declaration in section 1.1. This make the plan unsound

The "St Albans Green Belt Review Final Report June" 2023, Ove Arup and Partners, Table 5.8 Recommendations, sets out those sites that are not recommended released from the Green Belt because of the "Strong" overall performance and "Important" as making a contribution to the wider Green Belt". Sites SA-168, SA-170, SA-171 and SA-172 are all included in the HGC proposal. The NPPF December 2023 states (para 145) "Authorities may choose to review and alter Green Belt boundaries where exceptional circumstances are fully evidenced and justified"…. There is no such fully evidenced and justified exceptional circumstances. As such, the plan is unsound

In the event was HGC is allowed to proceed, the location would act as a furtherance of the sprawl of Hemel Hempstead. Thus this is breach of the first purpose of the Green Belt. In addition, the distance between the eastern edge of the proposed development (housing) and the western edge of Redbourn (village) would be less than that between the land between Redbourn (village) and Harpenden which SADC stated was inappropriate for development as it would breach the second purpose, to prevent neighbouring towns merging into one another. Accordingly, any proposal to include a site for development west of Redbourn would not be in accordance with section 143 of the NPPF and so is unsound.

Also, in the event that HGC is allowed to proceed, it must meet the requirement of the NPPF December 2023, section 7. This states "The purpose of the planning system is to contribute to the achievement of sustainable development…" The Reg 19 section 1.24 states that the average house price within the District is £619567. There is nothing in the Reg 19 that suggests that this average will not apply to the proposed housing at HGC. Reg 19 Section 1.23 states" The rail options to London underpin the popularity of commuting out of the District." The location of HGC is as distant as possible from the railway stations at Hemel Hempstead, St Albans City and Harpenden. Unless and until there is local employment that pays London salaries, or public transport to and from the railway stations mentioned is transformed, the HGC proposal is not sustainable and so unsound.

The consultation on the "Proposed reforms to the National Planning Policy Framework and other changes to the planning system" sets out (section 9) "Grey Belt: for the purposes of Plan-making grey belt is defined as land in the Green Belt comprising Previously Developed Land and any other parcels and/or areas of Green Belt land that make a limited contribution to the five Green Belt purposes…" Whilst the Reg 19 has been prepared in accordance with the current NPPF, assuming the draft Plan goes forward to implantation, it will be reviewed five years later. At that time, the review will take place in accordance with the NPPF then current. The sites west of Redbourn, SA-168, SA-170, SA-171 and SA-172 could not be regarded making a "limited contribution" as they have been declared by Ove Arup as making a "strong" contribution. For this reason, this plan is unsound.

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Although the NPPF permits that local authorities "may choose to review and alter Green Belt boundaries where exceptional circumstances are fully evidenced and justified, in which case proposals for changes should be made only through the plan-making process", St Albans District Council has failed to evidence these exceptional circumstances, especially in regard to the proposal H1-H4, collectively Hemel Garden Communities.

The Hemel Garden Communities sites include those identified as making the "most important" contribution to Green Belt aims in the Council's own Green Belt Review, namely:

To check the unrestricted sprawl of large built-up areas
To prevent neighbouring towns merging into one another
To assist in safeguarding the countryside from encroachment
To preserve the setting and special character of historic towns

Sites of far less significance to those Green Belt aims were identified in the earlier call for sites, and not taken forward.

To justify de-classification of Green Belt sites, the LPA is required to consider the development potential of all existing urban areas. St Albans District Council have not done this, confining their consideration to brownfields sites.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Proper consideration of all urban sites, not just brownfields sites, is required before de-classification of Green Belt sites on the scale required for Hemel Garden Communities is considered. Any de-classifcation should respect the core aims of Green Belt legislation and avoid the sites identified as most significant in the Green Belt review.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Proper engagement with communities has been absent from SADC's approach to deveoping this plan

Chapter 3

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

- Chapter 3 sets out the housing trajectory to support the Local Plan. Of concern, the trajectory relies upon a broad categorisation of sites rather than providing a trajectory for each individual allocated site. As such, it is not possible for the reader to assess the assumptions of delivery anticipated for each site. For example, the Broad Locations are expected to commence delivery in 2031/32 at a rate of 240 dwellings in that year. However, it is not clear which of the sites this relates too. The same issue arises from the Large Sites and the Medium and Small sites.
- The Council is reliant upon a stepped housing trajectory. This commences at 485 dwellings per annum from 2026/27 for the first five year period. The latest Annual Monitoring Report 2023 (1 April 2022 to 31 March 2023) provides annual rates and makes the following statements:
- Average delivery per year (1994/95 to 2022/23) – 395 dwellings per annum

- Average delivery per year (2018/19 to 2022/23) – 458 dwellings per annum
- The size of the increase within the stepped trajectory from 485 dwellings per annum to 1,255 dwellings per annum from 2031/32, which represents a 159% increase, is a serious concern. Given the history of delivery levels and the lack of detail on individual trajectories, there is no evidence to justify this significant increase in annual provision is achievable. The trend of housing delivery within the District suggests it would be a very difficult jump to achieve. Rather than retain the stepped trajectory, an approach of including additional sites that can be realistically delivered within the first five years will reduce the risk of failing to achieve the large step jump in numbers. It will also greatly enhance the likelihood that the full housing requirement can be achieved over the plan period.
- The Local Plan is focusing development towards the end of the plan period. This does not allow for immediate provision of the much-needed market and affordable dwellings, and will not assist in meeting the Government's goal of building 1.5 million dwellings in the next five years.
- The Local Plan should therefore include additional sites to meet shorter term delivery at the commencement of the plan period. This will assist in early delivery and ensure the stepped trajectory changes can be bridged. The Catesby Estates site at London Road can provide circa 300 dwellings and is available immediately. It can therefore assist in guaranteeing short term delivery.
- The housing trajectory also demonstrates that the Local Plan seeks to provide 14,989 dwellings. Whilst this is beyond the minimum housing needs target of 14,603 dwellings, it is only 386 dwellings above this target. Given the history of poor delivery within the District and the current five year housing land supply status, this figure of 386 dwellings is not considered appropriate and is not likely to keep a five year housing land supply through the plan period. The fluctuation between the annual housing requirement and the total housing land supply as set out in table 3.2 of the Reg 19 Local Plan suggests that achieving a five year supply throughout the period would be difficult. Again, it is reliant upon a large increase between 2028/29 (316 dwellings) to 2029/30 (822 dwellings) and 2030/31 (1,053 dwellings).
- There is significant inconsistency between the information within the Part A and Part B elements to the Local Plan, specifically regarding the content of table 3.1 within Part A and how that aligns with the assessments or table A1.1 in Part B. Table 3.1 provides a minimum capacity for each site, whereas Part B provides an indicative capacity. As an example, site B3 (West Redbourn) shows a minimum number of 593 dwellings in Part A, but an indicative figure of 545 dwellings in part B. Given the trajectory does not provide guidance on delivery within individual sites, it is not clear what number of dwellings the site is proposed to bring forward. There is also no explanation as to why the two documents differ. There are numerous other examples of this inconsistency as shown in the table below:

| Site | Part A Minimum Capacity (from table 3.1) | Part B indicative capacity |
|---|---|---|
| North Hemel Hempstead | 1,125 | 1,125 |
| East Hemel Hempstead (North) | 1,235 | 1,235 |
| East Hemel Hempstead (South) | 1,940 | 1,940 |
| North St Albans | 1,146 | 1,097 |
| North East Harpenden | 762 | 738 |
| West Redbourn | 593 | 545 |
| East St Albans | 522 | 472 |
| Glinwell, St Albans | 436 | 484 |
| West of London Colney | 405 | 324 |
| North West Harpenden | 293 | 293 |

| | | |
|---|---|---|
| Harper Lane, nr Radlett | 274 | 274 |
| Total | 8,731 | 8,527 |

These inconsistencies need to be rectified ahead of the submission of the Local Plan for Examination. It appears the Part B studies are based on average lower housing numbers than the emerging allocations, which suggests the sites have not been assessed against the minimum quantum proposed

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

SADC have included a stepped housing trajectory in their draft Local Plan. Whilst Notcutts Ltd do not disagree that an element of 'stepping' in the trajectory given the number of strategic sites and their likely lead in times, the PPG (Reference ID: 68-021-20190722) is clear that '*strategic policy-makers will need to identify the stepped requirement in strategic housing policy, and to set out evidence to support this approach, and not seek to unnecessarily delay meeting identified development needs. Stepped requirements will need to ensure that planned housing requirements are met fully within the plan period'*

The only justification given for the stepped trajectory is that it is necessary to *'allow sufficient time for the significant uplift in housing delivery to be realistically delivered'.* This does not constitute the necessary evidence to satisfy the PPG requirements.

Notcutts Ltd also believe the approach taken by SADC unnecessarily delays the delivery of housing by not identifying all suitable small/medium sites for allocation, the development of which could be realised sooner in the plan period. Land to the rear of the garden centre is an example of such a site.

Further, the trajectory does not show any scope for slippage in the supply of sites, with the backloading of delivery of major sites in the plan period. Whilst an allowance has been made for the lead in times to commence development on major sites, there is only a very small contingency on the supply side (295 dwellings – equivalent to 2% of the requirements) to account for any unforeseen delays in delivery.

It is standard practice for at least a 10% buffer in the supply of sites to be allowed in the development of Local Plans to allow for unforeseen delays in delivery. This would suggest that a buffer in supply of closer to 1,460 dwellings should be allowed making a shortfall in identified supply of 1,165 dwellings (notwithstanding later points made in relation to sites).

The nature of the proposed allocations means that there is no scope to realise the development of sites sooner in the plan period. It is therefore essential for the soundness of the Local Plan that additional small/medium sized sites are identified for delivery earlier in the Plan period, otherwise it is highly unlikely that the planned housing need will be delivered as required, making the plan ineffective. Such sites could be introduced as main modifications to the draft Local Plan to allow them to come forward now.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Review of the housing trajectory (supported by additional evidence) which will lead to the need to allocate additional small/medium sized site so support short term delivery.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To discuss matters around the housing trajectory in more detail

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

Two primary soundness issues are identified relating to the housing trajectory at the end of this Chapter and the effectiveness of the Plan.

1. Potential double counting within the housing trajectory regarding for medium and large windfalls.
2. A housing trajectory for Hemel Garden Communities that assumes 1,000 more completions to 2041 than is reasonable.

**Chapter 3, Soundness Issue 1: Potential double counting within the housing trajectory**

*Headline*

The plan period windfall allowance of 2,103 is not adequatelyjustified. The evidence behind the allowance is presented within Section 5 of a September 2024 evidence paper,and barely covers a page, with no appendices. Further evidence needs to be provided to ensure that the rate is justified and that there is not double counting with planning permissions (2,365) and the 54 urban capacity allocations (860). Any double counting will harm the effectiveness of the Plan.

*Discussion*

The key issue is 'in-settlement' delivery on medium and large sites, and these are the focus of our soundness concerns. The key outputs of Section 5 of the September 2024 evidence paper are presented below:

[See attachment for table]

70 completions a year are expected on medium and large windfalls sites. The Council has determined not to roll forward the rate of completions from office to residential conversions.

We 'assume', but it does not clear from the Council's evidence, that the 70 unit per annum rate results from the following process of analysis:

1. Assess the annual trend for medium and large site in-settlement supply during 2013/14 to 2022/23

- This is all windfall given that no new Local Plan as been adopted since 1994.

2. Deduct office to residential conversions, to form a 'control' level of in-settlement supply for medium and large sites that can reasonably be assumed to be developed in the new plan period.

- This rate is not explicitly presented in the evidence paper.

3. Deduct medium and large in-settlement and large sites that are already permitted (within the 2,365 stock of permissions).

- The trajectory applies a zero or half year allowance for the first 2.5 years post adoption (this is equivalent to 363 homes in-settlement sites of all sizes, of which some will be medium and large sites). The evidence says that these homes "are already likely to be known", i.e. they have planning permission and are part of the stock of 2,365 permissions. The figure of 363 needs to be corroborated, as it leaves 2,000 permissions elsewhere in an authority without a recent Local Plan. Of the 363, some will be medium to large and windfall, and this figure

also needs to corroborate. The key risk here, unless further data proves otherwise, is that the allowance is introduced too early into the trajectory, and the stock of relevant permissions is higher.

4. Deduct medium and large medium and large urban capacity supply (860).
5. The windfall allowance of 70 per annum should be the supply that is left if past rates are to be achieved to 2041.

*Change Sought*

At present, the evidence base is not considered to be transparent enough to justify the conclusion on medium and large windfalls. It may be the case that the release of further data will support the Council's position.

**Chapter 3, Soundness Issue 2: Housing trajectory for Hemel Garden Communities**

*Headline*

For all the reams of evidence on HGC, there is little in-depth assessment of the pathway from site allocation in an adopted plan, SPD adoption, the preparation, submission and determination of applications, a joint IDP,committee stages for outline permission, S106 timescales, land sales, design coding and RM stages, early infrastructure, pre-requisites and triggers. Whilst the full picture cannot be known until planning applications stage, the Local Plan needs to make valid assumptions, including on any inter relationships between the three sites. Based on the Plan as submitted, the trajectory regarding the start date for first completions at HGC is not justified and therefore the Plan cannot be relied on not delivering what it says it will at HGC by 2041, and is not effective.

*Discussion*

The trajectory presents a combined row for the three residential component parts of HGC with St Albans (H1, H2 and H4). The combined trajectory can only be the agglomeration of a trajectory for each site, but these are not provided in the Plan or the evidence base. All that is provided is the overall capacity of each site and the overall assumed level of delivery in the plan period. Masking the site/specific phased relationship between each component part of HGC within St Albans does not enable the trajectory to be properly evaluated.

Section 6 or the September 2024 Housing Land Supply Windfall & Capacity Evidence Paper focuses on HGC, but it is light touch. It focuses on delivery rates and seeks to distance HCC from the well-used, third version of Lichfield's report 'Start to Finish' on the build out of large sites, particularly in terms of the rate of delivery once started. Paragraph 6.3 refers to a bespoke piece of work on extremely large sites, rather than 'Lichfields', but this does not appear to have been presented in the evidence base. The Lichfield's report also presents information on the planning journey to first completions, and the Council's evidence accompanying the pre-submission plan does not push back against this.

Our concern mostly relates to the start date for first completions, linked to planning processes and infrastructure prerequisites and the absence of a disaggregated trajectory for HGC against which to examine the Council's assumptions. The 'rate' for H4 also requires investigation.

The first 100 completions within HGC are assumed in 2029/30 monitoring year,the beginning of which at the time of the Regualtion 19 consultation is in just over 5 years' time. For every 12 months of delay at the beginning of the trajectory, 450-500 homes will be pushed out of the back end of the trajectory. The Council's evidential pathway to the first 100 completions, and the next 175 completions is opaque and the output is optimistic in relation to 'Lichfields'. This report observes that for sites over 1,000 homes a period of 6.5 years is the average time between the submission of the first application and first completions. No planning application has yet been submitted, but the trajectory of the proposed Plan assumes a little over 5 years to first completions from November 1st 2024. This is unrealistic.

We observe that the trajectory assumes it will take an additional 2 years (to 2031/32) for delivery to commence on any of the other strategic sites of 250+ homes, but that HCC benefits from an accelerated assumption, even though it is more complex, with more complex governance.

Other questions that need to be answered to test the trajectory are:

- Why is it the case that H1 (1,125 of 1,500 homes) and H2 (1,235 of 1,600 homes) are not assessed as being able to fully deliver to 2041, whilst H4 is assumed as being able to deliver 1,940 of 2,400 homes?
- Will Site H4 have call on the off-site/near site Bunkers Hill SANG in Dacorum or is this reserved for other sites in Dacorum. If the latter then how does the assumed delivery of H4 relate to SANG within H1 and H2. Does the Crown Estate have all the SANG land it needs for H2 and H4 within those allocations or is there a need for SANG in H1 (Pigeon Land)?

*Changes Sought*

- Housing Trajectory for HGC to show first completions in 2031/32, therefore shifting right by 2 years (with the removal of 960 homes).
- HGC to be assumed to deliver 3,340 homes to 2041
- Replacement land supply (for 960 homes in the plan period) to be sourced at St Albans (City of) as the sub-regional settlement of the district.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

*Soundness issue 1 - Change Sought*

At present, the evidence base is not considered to be transparent enough to justify the conclusion on medium and large windfalls. It may be the case that the release of further data will support the Council's position.

*Soundness issue 2 - Changes Sought*

- Housing Trajectory for HGC to show first completions in 2031/32, therefore shifting right by 2 years (with the removal of 960 homes).
- HGC to be assumed to deliver 3,340 homes to 2041
- Replacement land supply (for 960 homes in the plan period) to be sourced at St Albans (City of) as the sub-regional settlement of the district.

**Type:**

* Table

**Number:**

3.2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Summary**

The trajectory is flawed. E.g. new Table 3.2 has re-categorised sources of future housing delivery relative to the Regulation 18 draft version. These three sources are: Windfall allowances (2,013 net); Harpenden NP allocations (57); and Part B site allocations (10,653). In total, this amounts to 12,723 homes and not 14,603 as the Regulation 19 draft is planning for.

There is a missing 1,880 homes in the trajectory. The council is urged to prepare a paper clarifying the trajectory it has published and correct any errors in it.

Moreover, the trajectory is overly ambitious in some respects and unreasonable in others. The revised Table 3.2 of the Draft Local Plan contains very ambitious targets for housing delivery. For example, it assumes that 2,103 homes (13%) will be delivered on windfall sites. It is unclear how the council has reached this figure and it is inappropriate to "gamble" on such a high figure coming from sites that it is not aware of. Past opportunities of new homes through the prior approval process and on previously developed land in urban areas will dry up. Much of the recent windfall has come from the release of Green Belt land on appeal. These opportunities will disappear once the council has a new adopted Local Plan.

Moreover, the council has re-imposed Article 4 directions on most of its employment stock that will prevent their easy conversion to housing and its employment policies (Policy SP5) seek specifically to protect the remaining stock.

A further defect in the trajectory is that it assumes no sites coming forward for development in the period 2023/4 to 2027/8 and the bulk being delivered in the period 2031/2 to 2035/6 delivering levels of housing never experienced in the district (1,255 homes a year for five years).

This trajectory is putting off the acute local problems of housing affordability because it effectively restricts supply for a further seven years. This is wholly inconsistent with the NPPF (Paragraph 69a) which requires councils to identify "specific, deliverable sites" in the first five years of a Local Plan.

**Planning for new homes in the spatial strategy**

2.1. The spatial strategy places great reliance on the role of the Hemel Garden Communities project in delivering 30% of the borough's stated housing target. It is unclear if it is viable to "put so many eggs in one basket" especially as there is no published Duty to Cooperate evidence that other agencies will commit to deliver the substantial amount of infrastructure required with it. For example, the Infrastructure Schedule spreadsheet refers to Department for Transport (DfT) RIS3 funding for improvements to the M1 at Junctions 8 and 9 (projects 104 and 105) but the Arup Infrastructure Delivery Plan1 makes clear that DfT funding will be limited to maintenance only. Until this matter is sorted – including identifying which body will pay for upgrading the road infrastructure in the absence of DfT funding and which one will cover any cost overrun of the works - the Hemel Garden Communities project may be at risk of not being delivered or at least not delivered to the scale proposed.

**Housing numbers and trajectory**

2.2. Notwithstanding this matter, the housing target in Policy SP1 is unsound. The council has reduced its housing target from at least 15,096 homes in the Regulation 18 draft to at least 14,603 homes and has now put back yet again the start date of 1 October 2024 for the delivery of these new homes. The proposed buffer in terms of sites that will deliver this target (refer Table 3.2) has been reduced from 5% to 2.6% too between the Regulation 18 and 19 drafts of the Local Plan.

2.3. The council's revised approach is unsound because it cannot be justified based on current government guidance and the council has not identified an alternative method. Put simply, the housing target is too low and the proposed housing trajectory (refer Table 3.2) makes overly ambitious assumptions about windfalls and unallocated sites delivering new homes while putting off the delivery of much needed housing until the 2030s. This approach is not consistent with national policy in the National Planning Policy Framework (the NPPF)2.

2.4. Studio LK notes the following four grave deficiencies with regard to the Draft Local Plan's housing numbers and trajectory.

2.5. First, the housing target in the Draft Local Plan is too low. The Regulation 19 Draft Local Plan housing target is for at least 14,603 net new homes. This appears to be based on a multiplication of the annual housing target (885 net new homes, a correction to the figure of 888 in the Regulation 18 draft) over a 16.5 year period (that is, 885 x 16.5). As the Draft Local Plan states that it is planning until 2041, this implies a start date for the Local Plan of October 2024. This start date cannot be correct as work on the draft Local Plan actually started in January 2021 when the council issued a Call for Sites, the Sustainability Appraisal Scoping Report and the updated Statement of Community Involvement/ Local Development Scheme. This was when Mr and Mrs Choppin first engaged professional assistance to participate in this consultation.

2.6. It is to be remembered that the council has been the subject of a number of Intervention Letters from successive Secretaries of State because of its inability to prepare a sound plan. It has given repeated promises that a Local Plan would be prepared promptly. Work began on this Draft Local Plan immediately after the 2018 Draft Local Plan was withdrawn in November 2020

2.7. Assuming this New Local Plan is to run until 2041, the housing target therefore needs to be for housing delivered over a 20 year period, on the basis that work on the Local Plan actually started in 2021, or else the Local Plan needs to run from 2021 to 2038. Assuming an annual figure of 885 net new homes and that the Local Plan is to run until 2041, this would mean that the housing target should be at least 17,700 net new homes (that is, 885 x 20). It is clear that the council recognises this defect because, although it states that the Local Plan start date is 1 October 2024, its latest Housing Trajectory (Table 3.2) still includes 1,080 housing completions from 2021/22, 2022/23 and 2023/24 (7.2% of the total trajectory).

2.8. A housing target of at least 17,700 homes may be conservative as the council still has a Duty to Cooperate with other local authorities. The council may be meeting the employment land needs of some of its neighbouring authorities but it may also have to take some unmet housing need from either a near neighbour in South West Hertfordshire (possibly Dacorum if that authority cannot satisfactorily convince an Inspector or Natural England that it can mitigate the environmental damage to the Chilterns Beechwoods SAC associated with the need to plan for new housing) or one of the London boroughs given that the district is in the Travel to Work Area of both Greater London and Watford Junction and enjoys fast, frequent rail links from Harpenden and St Albans (Abbey and Central).

2.9. Second, the housing buffer in the Housing Trajectory is too low. It needs to be a 20% buffer to be consistent with the NPPF (Paragraph 77). Even if one were to assume a start date of 2024 for the Draft Local Plan (which the council cannot for the reasons set out above), the local planning authority must also plan for all the years when there was no up-to-date Local Plan in place and the council was not meeting Government-set housing delivery test targets (refer Table 1 –*see attachment*).

2.10. The council has consistently underperformed in this respect in recent years. Figure 1 –*see attachment*– shows that the council has not met the standard housing method target in any of the past five years for which statistics have been published.

2.11. In recent years, the pipeline of new housing sites has increasingly relied on unplanned for releases of Green Belt land (refer Figure 2 –*see attachment*) approved either on appeal or through the application of "material considerations".

2.12. In such situations, the NPPF requires a 20% buffer. Assuming that the council must plan for a higher housing target of at least 17,700 net new homes over a 20 year period (from 2021 when work on this Local Plan actually began until 2041 following the withdrawal of the 2018 iteration of the Local Plan), this would mean that the council should plan for a housing trajectory that will potentially deliver at least 21,240 net new homes.

2.13. Third, this flawed housing trajectory is flawed. The new Table 3.2 has re-categorised sources of future housing delivery relative to the Regulation 18 draft version. These three sources are: Windfall allowances (2,013 net); Harpenden NP allocations (57); and Part B site allocations (10,653). In total, this amounts to 12,723 homes and not 14,603 as the Regulation 19 draft is planning for. There is a missing 1,880 homes in the trajectory. The council is urged to prepare a paper clarifying the trajectory it has published and correct any errors in it.

2.14. Fourth, the trajectory is overly ambitious in some respects and unreasonable in others. The revised Table 3.2 of the Draft Local Plan contains very ambitious targets for housing delivery. For example, it assumes that 2,103 homes (13%) will be delivered on windfall sites. It is unclear how the council has reached this figure and it is inappropriate to "gamble" on such a high figure coming from sites that it is not aware of. Past opportunities of new homes through the prior approval process and on previously developed land in urban areas will dry up. As has been shown above (at Figure 2), much of the recent windfall has come from the release of Green Belt land on appeal. These opportunities will disappear once the council has a new adopted Local Plan. Moreover, the council has re-imposed Article 4 directions on most of its employment stock that will prevent their easy conversion to housing and its employment policies (Policy SP5) seek specifically to protect the remaining stock.

2.15. A further defect in the trajectory is that it assumes no sites coming forward for development in the period 2023/4 to 2027/8 and the bulk being delivered in the period 2031/2 to 2035/6 delivering levels of housing never experienced in the district (1,255 homes a year for five years). This trajectory is putting off the acute local problems of housing affordability because it effectively restricts supply for a further seven years. This is wholly inconsistent with the NPPF (Paragraph 69a) which requires councils to identify "specific, deliverable sites" in the first five years of a Local Plan.

**Flaws in the council's approach to site allocations**

2.16. Studio LK submits that the council's approach to site allocations in general is flawed and inadequate in other respects too.

2.17. By way of a starting point, the Draft Local Plan proposes some housing allocations that run contrary to other strategies. For example, Site Allocations B5 (Glinwell), B6 (land west of London Colney) and B8 (Harper Lane) are in areas where the council believes there are minerals deposits and, thus, their allocation would be contrary to the Hertfordshire Minerals Plan.

2.18. Other parts of this Draft Local Plan (Policy SP7) seek to protect existing community infrastructure yet the council is seeking to allocate church sites for housing - Site Allocations P3 (Friends Meeting House) and U3 (former Brocket Wood United Reformed Church) - when these sites should be considered in the first place for other community use given the problems of high land prices locally.

2.19. Further, it seems illogical for the council to release the nearby Smallford Works on Smallford Lane (Site Allocation P1) for housing while seeking at the same time to take out of the Green Belt substantial areas for employment land elsewhere (55 ha in Policy SP5), much of it in the Green Belt north and east of Hemel Hempstead at the same time. Moreover, it is an isolated site and not as suitable for housing as Mr and Mrs Choppin's site which adjoins housing on three sides.

2.20. Finally, the submission below identifies other deficiencies on housing numbers. Most notably, the draft Local Plan does not address its need for specialist housing groups. It has not allocated sufficient sites for gypsies and travellers. This is not only a soundness matter but potentially a legal deficiency in the whole of the Local Plan process too in that the council does not appear to be addressing its Public Sector Equality Duty under the Equality Act 2010.

2.21. That the Draft Local Plan has not allocated any pitches for travelling showpeople either despite the advice in the GTAA reinforces Studio LK's view that the council's approach to site allocations overall is illogical and flawed.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Revised trajectory that makes adequate provision for a larger buffer and the need to meet a higher housing target.

To remedy these many defects in the council's approach to its housing target numbers, trajectory and sites allocation, Mr and Mrs Choppin urge the Inspector and council to support the allocation of additional sites for housing that could be delivered quickly and specifically identify them in the Local Plan to help address uncertainty about the Plan's housing trajectory and plan for what is likely to be a much higher housing target. Table 2 [in attachment] summarises the aforementioned problems with the approach taken so far by the council against the four tests of soundness in paragraph 35 of the NPPF.

Mr and Mrs Choppin seek to add a further allocation to the list of sites – Site PX Smallford Stables, 187 Colney Heath Lane, AL4 0TP - that would be included within Policy LG4 Large, Medium and Small Sites and inserted into Part B Site Allocations.

In promoting this alternative site, Studio LK has highlighted shortcomings in the way this site was first screened in but not taken forward for inclusion in the list of sites for allocation. To assist the appointed Inspector to understand this point, relevant extracts from the council's evidence base are attached in the Appendices 1 to 4 [see attachment] of this submission.

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

**4.0 Housing Supply & Allocations**

- Part A Table 3.1 and 3.2 & Part B Local Plan Housing Sites

4.1 At Regulation 18 (September 2023) LIH submitted detailed representations in relation to the suitability,

deliverability, and availability of several of the proposed site allocations in the Local Plan. We asserted that the Council's approach was unsound as it had not been suitably justified, effective or positively prepared and as such was not consistent with national policy. These concerns remain and have not been addressed adequately by the Council in the Regulation 19 Plan.

4.2 We rely in part in these representations on the Identified Sites Deliverability Assessment – FINAL - 25th

Sept 23 submission made at Regulation 18 stages, as it pertains to the sites retained as allocations in the Regulation 19 Plan and as applicable to additional identified sites, where these are pertinent.

4.3 We have set out in Sections 2.0 and 3.0 the prevailing national policy agenda and lack of regard to which

StADC have placed upon this, which we consider means that the draft Plan cannot be sound as it is not consistent with national policy. We now turn to the specifics of the Plan and its supporting evidence base.

4.4 Limited information has been provided in relation to the Council's updated position on site allocations

and housing supply, however we do note that a Housing Evidence Paper with Trajectory (2024) has been published which we address below. The same Trajectory is also provided at Table 3.2 of Part A of the Regulation Plan.

4.5 The focus of our representations relates to:

- Draft Policies SP1 and SP3 Key diagram 1.3, paragraph 3.7 – 3.11, Policy.
- Table 3.1 and 3.2 of Part A of the draft Local Plan.
- Draft Policies LG1, LG2, LG3, LG4, LG5 and LG6.
- Part B of the draft Local Plan Table A1.1.
- Part B - Sites H 1 – H4; B1 – B8 ; M2 – M23; P1. – P3; U2 – U4; UC1 – UC57.
- Green Belt Review (2023).
- Sustainablity Appraisal (2024).
- Infrastructure Delivery Plan (2023 & 2024).
- Lack of due regard to the South West Hertfordshire - Local Housing Needs Assessment Report.

4.6 Substantial revisions are required to the draft Plan and for additional housing allocations to be included

on land such as the land at NE Redbourn which has the potential to provide a sustainable and timely contribution to the housing supply position within the first 5 years of the plan period (following adoption).

4.7 In terms of context, Table 6 identifies housing requirement as detailed in the Regulation 18 Plan and

sets this against the position as now set out in Part B Local Plan Sites (Part B). The final column in Table 6 indicates the change in position (based upon the Part B Local Plan Sites figures).

Table 6 – Regulation 18 and Regulation 19 Housing Supply

| | **Regulation 18 Identified Supply** | **Regulation 19 Identified Supply** | **Difference** |
|---|---|---|---|
| 1 - Hemel Garden Community | 4,750 | 4,300 | -450 |
| 2 - Broad Locations | 4,431 | 4,227 | -204 |
| 3 - Large Sites | 284 | 385 | +101 |
| 4 - Medium and Small Sites | 1,302 | 856 | -446 |
| 5 – PDL Green Belt | 144 | 137 | -7 |
| 6 - HELAA Sites | 93 | 43 | -50 |
| 7 - Urban Capacity Sites | 775 | 860 | +85 |
| 8 - Other | 0 | 0 | / |
| Total | **11,779** | **10,808** | **-971*** |

4.8 It is evident that the identified supply of housing has been substantially reduced in the Regulation 19 Plan.

- Housing Land Supply & Allocated Sites

4.9 Several mathematical errors were identified in the supply position at Regulation 18 stage which appear

to have been duplicated at Regulation 19 stage, perhaps due to the undue speed in which the Plan has been prepared.

4.10 Table 7 highlights the inconsistencies identified at Regulation 18 stage and now again at Regulation 19

stage. We highlight inconsistencies and errors that have occurred in red in Table 7 which relate to:

- Part A Broad Locations as set out in Table 3.1.
- Trajectory as at Table 3.2 of Part A of the Draft Plan (and Appendix A to the Housing Land Supply Windfall & Capacity Evidence Paper[30] (Housing Evidence Paper)
- Part B Local Plan Sites Table A1.1 when compared Trajectory in the Housing Evidence Paper (Trajectory 2024).

4.11 Table 7 – Table 3.2/Appendix A Trajectory Supply

| | **Regulation 18 Trajectory Supply** | **Regulation 19 Trajectory Supply** | **Difference** |
|---|---|---|---|
| 1 - Hemel Garden Community | 4,750 | 4,300 | -450 |
| 2 - Broad Locations | 4,281 | 4,077 | -204 |
| 3 - Large Sites | | 385 | |
| | 1,581* | 851 | -345 |
| 4 – Medium and Small Sites | | | |
| 5 – PDL Green Belt | 144 | 137 | -7 |
| 6 – HELAA Sites | 78 | 43 | -35 |
| 7 – Urban Capacity Sites | 847 | 860 | +13 |
| 8 - Other | 0 | 0 | / |
| Harpenden Neighbourhood Plan | | 57 ** | |
| Total | **11,681** | **10,653** | **-1,028*** |
| **Identified Shortfall** | **4,606** | **3,690** | |

**Assumes that 3 and 4 are added together 1,581 in Trajectory mathematically it = 1,586 ** Harpenden NP dwellings excluded from Allocation figure*

4.12 The mathematical errors show a difference of 160 dwellings between the Part B Table A1.1 and the

Table 3.2 Part A or Housing Evidence Paper/Appendix A Trajectory. This is confusing and suggests a lack of time has been allowed to fully review the material pursuant to the Regulation 19 Plan consultation. It also undermines the soundness of approach if such errors are taking place in a process that the Council themselves indicate is swift.

4.13 In addition to the mathematical errors that we note above, Table 3.1 in Part A of the Local Plan, sets out

the follow different housing requirements for the Broad Locations from the assumptions set out in Part B of the Local Plan:

- North St Albans – 1,146 dwellings (Part B states 1,097)
- North East Harpenden – 762 dwellings (Part B states 738)

- West Redbourn – 593 dwellings (Part B states 545)
- East St Albans – 522 dwellings (Part B states 472)
- Glinwell, St Albans – 436 dwellings (Part B states 484)
- West of London Colney – 405 dwellings (Part B states 324)
- North West Harpenden - 293 dwellings (Part B the same)
- Harper Lane, near Radlett 274 dwellings *(Part B the same)*

4.14 The supply position on sites in Part's A and B of the Regulation 19 Local Plan and its evidence base, is

inconsistent and confusing. StADC should take the time required to ensure that the Regulation 19 Plan and its associated evidence base is accurate, consistent, and consequently sound in basis and fact.

4.15 Given the numerical anomalies and as there is more detail on the sites in the Trajectory (2024), our

representations continue to be based upon a comparison against the Trajectory (2024) for consistency purposes.

*30 Appendix A to the SADC Housing Land Supply Windfall & Capacity Evidence Paper - Sep 2024 V5.*

4.16 The Housing Evidence Paper is scant in detail in explaining the Council's position in moving from

Regulation 18 to Regulation 19, not least given the concerns raised in representations at Regulation 18

stage and given the substantial deficit that was identified, which appear to have been ignored.

4.17 We summarise below the apparent changes in the Council's Position on housing land supply as set out

in the Trajectory (2024). The change in overall supply elements is set out in Table 8 below:

Table 8

| **Regulation 18 to 19 Position Change** | **Change** |
|---|---|
| · **Completions** | |
| o Regulation 18 – 1,267dw 2019/20 to 2021/22. | |
| o Regulation 19 –1,080dw for 2021/22 to 2023/24. | |
| o Reduction 187 dwellings. | -187 |
| · **Future Completions** | |
| o Regulation 18 –2,273 dw. Starting in 2022/23, ending 2030/31. | |
| o Regulation 19 – 2,365 dw. Starting in 2024/25, ending 2035/36. | |
| o Increase 92 dwellings. | +92 |
| · **Losses** | |
| o Regulation 18 –155 losses | |
| o Regulation 19 -157 losses | |
| o Increase 2 losses | -2 |
| o Both ending in 2030/31 | |
| · **Windfalls** | |
| o Regulation 18 – 180dw/year for 16 years (2,880dw) | |

- Regulation 19 – 145/year/ 14 years + 73 in yr 1 (2,103dw)
- 73 in yr 1 2026/2027
- 1 year deferral in delivery
- Reduction of 777 dwellings. -777

· **Harpenden NP**

- Regulation 18 – 0 dwellings
- Regulation 19 – 57 dwellings
- Increase 57 dwellings +57

· **Site Allocations Overall**

- Regulation 18 – 11,681, Delivering from 28/29
- Regulation 19 – 10,563 delivering from 29/30
- Reduction of 1,113 dwellings -1,113

· **Annual Requirement**

- Regulation 18 – 888 dw/yr (15,096)
- Regulation 19 – 885 dw/yr (14,603)
- Only $^{1}/_{2}$ year assumed for 2024/2025 (482dw)
- Reduction 493 dw. -493

· **Stepped Trajectory**

- Regulation 18 – 15,096, Delivering from 24/25
- Regulation 19 – 14,603 delivering from 24/25
- Reduction 493 dw -493
- 2024/25 – 25/26 – Same 389/yr
- 2026/27 – 2030/31 – 225 dw/yr reduction (710 to 485dw)
- 2031/32 – 2035/36 – 55dw/yr increase (1,200 – 1,255dw)
- 2026/37 – 2040/41 – 75dw increase (950 to 1,025dw)

· **Total Supply:**

- Regulation 18 – 15,938, Delivering from 22/23
- Regulation 19 – 14,989 delivering from 21/22
- Reduction of 949 dwellings -949
- 107 dwellings different from Stepped Trajectory.

· **Overall, Buffer**

- Regulation 18 – 5%
- Regulation 19 – 2.6%
- Reduction of 2.4% (on lower figure)

4.18 Except for the Harpenden Neighbourhood Plan sites (57 dwellings) and increase in future completions

(92 dwellings) the overall supply position has reduced significantly in all regards:

- Completions – reduced.
- Windfalls - reduced.
- Site allocations – reduced.
- Annual requirement – reduced.

- Stepped Trajectory reduced by 42% for years 1 – 5 following Plan adoption.
- Total supply – reduced.
- Overall buffer – reduced.

4.19 These changes have been taken with the knowledge of the wider national political picture on housing

supply. It is questionable as to whether the approach is a positive approach to plan making and is plainly inconsistent with adopted and emerging national policy.

**Site Allocations Assessment**

4.20 At Appendix 1 to these representations, we assess the Regulation 19 position on site allocations as
compared to the draft Regulation 18 position.

4.21 At columns 1 to 4 of Appendix 1 we identify:

- Site name and category additional sites at Regulation 19 are in red
- Appendix A housing requirement Regulation 18 Plan.
- Part B of Local Plan housing requirement Regulation 19 Plan.
- The difference between the two assumptions.

4.22 Appendix 1 to these representations shows that:

- HCG allocations – dwelling provision has been reduced (-450 dwellings).
- Broad Locations - dwelling provision has been reduced (-204 dwellings).
- Large Sites – minor amendment (+3 dwellings).
- Medium & Small Sites – dwelling provision has been reduced (-338 dwellings).
- Green Belt PDL - minor amendment (-7 dwellings).
- HELAA Sites - dwelling provision has been reduced (-50 dwellings).
- Urban Capacity Sites – dwelling provision has been increased (+76 dwellings).
- Other sites - N/A.

4.23 Neither in Part B Table A1.1 of the Local Plan or in the Housing Evidence Paper (or Trajectory at Appendix

1. A) do StADC explain the justification for the current assumptions or provide reasoning as to the basis for the substantial reductions in supply that have been made.

4.24 We identify that for Broad Locations, Part B Table A1.1 does not mirror the actual capacity of the sites

when their individual capacity figures are reviewed, and this does not match the broad location capacity indications in Table 3.1 in Part A of the Local Plan and in other instances does not mirror the Trajectory (2024).

4.25 This is confusing, poorly prepared and demonstrated a lack of proper review in respect of the housing

supply position which is perhaps resultant from the rush to publish the draft Plan. The consistency in errors however undermine the justification of the Council's supply position. Part A, Part B and the supporting evidence base should be reviewed by StADC and brought into line to demonstrate the consistency of approach and a robustness in evidential basis to be effective.

4.26 At columns 5 to 6 of Appendix 1 to these representations we identify that:

- The housing figure as set out in the Trajectory at Appendix A of the Housing Evidence Paper
- Detail the differential between this figure and that in Part B Table A1.1

4.27 In undertaking this assessment, we show that the Part B Table A1.1 and the Trajectory assumptions at

Appendix A of the Housing Evidence Paper do not match up, resulting in a difference of 160 dwelling (shortfall).

4.28 At columns 7 and 8, we identify:

- The LIH Regulation 18 representations, identified shortfall in housing provision.
- The sum differential between the LIH assumptions on deliverability and the Regulation 18 draft Plan.

4.29 At columns 9 and 10, we identify:

- The LIH identified shortfall in housing provision at Regulation 19 (based upon Regulation 18 assessments)
- The differential between the LIH assumptions on deliverability and the Regulation 19 draft Plan.

4.30 Appendix 1 to these representations shows that the Council's assumptions at Regulation 19 Plan

overestimates capacity by almost 3,700 dwellings and that only 7,180 dwellings are likely to be delivered within the plan period to 2041 from the identified supply sites and sources. Clearly there is a need for additional sites such as NE Redbourn to be included as allocations to ensure that the draft Plan can at least meet its housing targets within the first 5 years - and beyond, following adoption.

4.31 We caveat some of this due to the anomalies in the Council's housing figures across documents, it does

make assessing the accuracy of the baseline confusing, but broadly even if these mathematical anomalies were overlooked the shortfall in supply is still in the region of 3,500-3,700 dwellings.

4.32 We now turn to other supply side aspects as substantiated by Policies SP1, SP3 and Table 3.2 of Reg 19

Local Plan Part A and Part B Local Plan Table A1.1, Housing Evidence Paper and Trajectory (2024) specifically.

**Housing Trajectory Within the Local Plan Document**

4.33 Sets out new assumptions. No explanation for why any changes have taken place from Regulation 18
assumptions. Appendix 2 – Trajectory Comparison shows that the Plan has dropped two years from the Trajectory 19/20 and 20/21 from Regulation 18 Plan to Regulation 19 Plan.

**Period Covered by the Housing Trajectory**

4.34 The revised plan period has been adjusted to 1st October 2024 to 31st March 2041. 15 years from the
estimated point of adoption of the Plan in March 2026.

4.35 No explanation or justification for altering the base date or how previous under delivery in previous

years has been addressed has been provided.

**Non-implementation rate / Lapse assumption**

4.36 We note that the Housing Evidence Paper refers to the Litchfield's Report [31] as justification for its
approach.

**Windfall Rate**

4.37 Reduction in rates has been identified justified by revised trend data:

- 180dw/yr based upon completions 2010/11 – 2019/20
- 145dw/yr based upon completions 2013/14 – 2022/23

4.38 The justification of the reduction also indicated to relate to a decrease office conversion, but no

evidence is provided to substantiate this. The AMR 2024 has not been prepared (or published).

**Build Out Rates**

4.39 Reference to Litchfield's Report [32] and indicates that a '*conservative approach to build out has been*
*applied given housing market is attractive*' however, no details as to the assumptions or rationale for each site's anticipated delivery, which underpins the assumptions has been provided.

4.40 With regards to HGC , we note that an alternative approach has been taken due to the site's scale, but

this is not fully explained based upon the sites deliverability trajectory and associated logical considerations associated with the site 'coming on stream'.

4.41 We note that with regards to infrastructure delivery mix of housing it is stated that "*the development*

*can meet the complete range of different housing needs simultaneously*." Again, this might be

*31 Feeding the Pipeline, Lichfields (November 2021)* https://lichfields.uk/content/insights/feeding-the-pipeline

*32 Start to Finish (third edition), Lichfield's (March 2024)*https://lichfields.uk/content/insights/start-to-finish-3)

achievable, but no information is provided as to the rationale and approach to such across a site as large as HGC which straddles Local Authority boundaries and has significant infrastructure requirements with associated substantial lead times.

**Housing Capacity**

4.42 This appears from the Housing Evidence Paper to have been based upon HELAA and UCS assumptions
however as Appendix 1 to this submission shows many of the capacity assumptions have been amended without explanation. Our representations at Regulation 18 stage indicated significant concerns over the assumptions in this regard.

4.43 We note that the Housing Evidence Paper indicates that the assumptions on Green Belt sites – based

upon work done in 2014 from the Councils Residential Density Report 2014 [33]. This is historic data and would benefit from further consideration and review to substantiate the site capacity assumptions – perhaps having more regard to specific site context and capacity.

4.44 We have noted above that the draft Plan and associated evidence base are lacking in relation to matter

of Hertfordshire and London's unmet need and assessing the role that StADC is able to play a role in meeting either its own, or wider unmet housing needs.

4.45 We note the gross to net assumptions as detailed below:

| Area (hectares) | Gross to net ratio |
|---|---|

| | |
|---|---|
| Sites up to 0.4ha | 100% |
| Sites between 0.4 to 2ha | 85% |
| Sites greater than 2ha | 60% |

4.46 No explanation has been provided in relation to wider supply changes of aspects of the Trajectory

(2024) which is at Table 3.2 of Part A of the draft Plan and Appendix A to the Housing Evidence Paper, which we address below.

**Trajectory**

4.47 At paragraph 74 of the NPPF (2023) it states:

*"Strategic policies should include a trajectory illustrating the expected rate of housing delivery over the plan period, and all plans should consider whether it is appropriate to set out the anticipated rate of development for specific sites. Local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum o f five years' worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old.*

*The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:*

1. *5% to ensure choice and competition in the market for land; or*
2. *10% where the local planning authority wishes to demonstrate a five-year supply o f deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or*
3. *20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply. "*

4.48 We have already addressed above several aspects of the Trajectory Table 3.1 in Part A of the Local Plan

and Appendix A of the Housing Evidence Paper (2024) on matters such as pipeline, windfalls, large and medium site assumptions. We deal with some more detailed aspects associated with the Trajectory below.

4.49 At this stage, it is not clear whether assumptions in the Trajectory (2024) are deliverable or not due to

the lack of supporting evidence being provided. We provide a comparison on the Trajectory's from the Regulation 18 and 19 Plans for comparison at Appendix 2 - Trajectory Comparison to these representations.

4.50 We note the Council's most recent AMR (2023) (published since the Regulation 18 consultation in later

2023, whist not in the evidence base for the Plan, is on the Council's website and this shows a completely different 4/5-year HLS approach, assumptions, and rationale, that is not addressed with the

*33 para 7.4 Housing Land Supply Windfall & Capacity Evidence Paper*

Housing Evidence Paper (2024) or elsewhere within the draft Plan. No 2024 AMR has been published to support the Regulation 19 Plan assumptions.

4.51 No details have been provided as to the changes in the Trajectory assumptions from Regulation 18 to

19 these include:

- Delay of the HGC dwelling commencement
- Reduction of the stepped trajectory from 710 dwellings per annum to 485 dwellings in the first 5 years.
- Reduction in the first 5 years period (25/26 – 2030/31) of completions from 4,285 dwelling to 2,941 dwellings.
- Significant alteration in the first 5 years period (25/26 – 2030/31) from PDL land in urban areas.

4.52 It is unclear how StADC has made its decisions in relation to its Trajectory (2024), approach to the use

of a stepped method, and the approach to the revised delivery rates from its identified sites. What is evident is that the approach for the next 7 years appeals to be to defer housing delivery as far as possible.

Allocations Overview

4.53 We consider that the following polices, and aspects of the draft Plan are unsound, the reasons for which
we address below:

- Draft Policy SP1, SP3 and Table 3.1 of Reg 19 Local Plan Part A
- Part B Local Plan Table A1.1 and Sites H 1 – H4, Sites B1 – B8; M2 – M23; P1. – P3; U2 – U4; UC1 – UC57
- Part A Policies LG1 – LG4

4.54 Appendix 2 – Trajectory Comparison to these representations, explores the changes undertaken in

housing supply between Regulation 18 and 19 stages of the Plan. No substantiation has been provided to the changes that we identified in Table 9 below.

4.55 Table 9 summarises the changes in housing supply from Regulation 18 to 19 identified in Appendix A in

respect of site allocation assumptions in the Trajectory (2024). No explanation or justification is provided for the following amendments, which leads to uncertainty around the basis and reasoning for decision making in the draft Plan on site delivery and allocation requirements.

Table 9 – Changes in Site Allocation Assumptions in Trajectory (2023) and Trajectory (2024)

| **Supply Element** | **Regulation 19 Position** |
|---|---|
| Hemel Garden Communities | -450 |
| · Regulation 18 to 19 – deferred 1 year from delivery. | |
| · Annual delivery profile remains the same. | |
| · 1 year delay causes 450 dwellings to fall off beyond plan period. | |
| · Reduction 450 dw (4,750 to 4,300dw) | |
| Broad Locations | -204 |
| · Regulation 18 to 19 – deferred 1 year from delivery. | |
| · Changes to delivery profile over most years. | |
| · Reduction of 204 dwelling in period (4,281 – 4,077dw) | |
| Large Sites | / |
| Regulation 18 to 19: | |

· Was within ‘Other GB Locations’ at Reg 18

· Total 385 dwellings to supply

· 150 dwellings first delivered in 32/33, 7 years after adoption.

Medium & Small Sites /

Regulation 18 to 19:

· Was within ‘Other GB Locations’ at Reg 18

· 851 dwellings to supply

· 152 completions starting in 29/30, 4 years after adoption

Combined Large & Medium/Small Sites -345

· Other GB Locations Regulation 18 = 1,581 dwellings

· Combines L&M Sites Regulation 19 – 1,236 dwellings

· Reduction of 345 dwellings

Previously Developed Green Belt -7

· Regulation 18 to 19 – 144 dw to 137.

· Starting in same year 29/30.

· Small changes to delivery profile.

· Reduction of 7 dwellings

PDL in Urban Area (HELAA) -35

· Regulation 18 to 19 – 78 to 43 dw.

· 1 year delay in delivery, starting in 29/30.

· Small changes to delivery profile.

· Reduction of 35 dwellings.

Other in Urban Area (UCS) +13

· Regulation 18 to 19 – 847dw to 860dw.

· Starting 1 year later and significant reduction in delivery rates spread out more by an additional year (over the deferral year (so two years).

· Increase of 13.

**Previously Developed Land within Urban Areas**

4.56 At Regulation 18, in 2028/2029 is a strange entry which suggests that 547 dwellings were identified as
being delivered in that one year. There was no detail on lead times provided in relation to the delivery rates and no site details provided to suggest what sites might be delivering this significant one off, contribution, which formed part of the stepped trajectory for the five-year period after the plan’s adoption (2026/2027 – 2030/2031).

4.57 This has been amended at Regulation 19 stage but with no explanation as to the change that have been

made. Sites have been repositioned between the large, medium, and small sites categories and some small sites have been removed but it is unclear as to the basis for the change in approach and rationale.

4.58 Again, no delivery is anticipated from this source until 2029/2030. No justification for the rationale has

been provided.

**Delivery Rates**

4.59 At Regulation 18 stage, delivery in the past 3 years was averaging 422 dwellings per annum. In the
Regulation 19 Plan, this is reduced to 360 dwellings[34]. This is just **40%** of the required annual supply going forwards (885 dwellings (2023 standard method) and **23%** of the (1,544 dwellings 2024 standard method).

4.60 Delivery from future completions average in the period from now until 2030/31 (5 years after anticipated

plan adoption) totals some 1,944 dwellings (or 1,787 including lapse rates) – an average of 297-324 dwellings (based upon 6 years average) or 255 - 277 dwellings based upon 7 years. At best this represents about **36%** of the required annual supply (885 dwellings (2023 standard method) and **22%** of the (1,544 dwellings 2024 standard method).

4.61 No draft allocated sites are identified in the Trajectory (2024) to be delivering any dwellings until

2029/2030 which represents year 4 after the Draft Plan is adopted, 5.5 years from now. Based upon the current assumptions the housing supply position will be significant below the standard method (2023), further increasing issues of unmet need and affordability within the district. We question on this basis whether 'no plan is better than a plan'.

4.62 An additional buffer of sites is required to ensure that a suitable range and breadth of sites are identified

to ensure that the StADC is able (should delays on large sites arise) to meet in target housing projections.

4.63 The significant reduction in housing delivery is not assessed within the context of identified housing

need in the district of some 802 dwellings per annum and/or the draft NPPF (2024) requirement for 1,544 dwellings per annum.

4.64 In effect, for the next 5 years, StADC is relying upon the delivery from sites with existing planning

permissions, and 363 dwellings being delivered from windfall sites. This does not appear to be a plan lead system and is not the way in which either a stepped or incremental Trajectory should work.

*34 Appendix 2 – Trajectory Comparison years 2021/22 – 2023/24*

**Stepped Trajectory**

4.65 The Trajectory (2024) of the Draft Plan indicates delivery targets:

- 2024 – 2026– an average of 398 dwellings/year.
- 2026/2031 (5 years after the plan adoption) - 710 dwellings per annum at Regulation 18, now 485 dwellings per annum.
- 2031 – 2036 (6 – 10 years post adoption)– 1,200 dwellings per annum at Regulation 18, now 1,255 dwellings per annum.
- 2036 – 2041 - 950 dwellings per annum at Regulation 18, now 1,025 dwellings per annum.

4.66 We note that from 2030/31 StADC anticipated the stepped trajectory increasing from 485 dwellings per

annum (which is only exceeds the standard method housing requirement in year 5 from adopted (2030/31) to 1,255 dwellings per annum in 2031/32. No explanation has been given for the reduction of the stepped trajectory from 710 dwellings per annum to 485 dwellings in the first 5 years from adoption or the increased provision in the final 5-year period from 950 to 1,025 dwellings per annum.

4.67 There is no explanation given in the Housing Evidence Paper for these changes, not least the 42%

reduction in the stepped Trajectory and it's rational as set against the SM (2023) requirement of 885 dwellings.

4.68 What is wholly apparent is that in almost all areas of housing supply, provision is being reduced,

deferred, and delayed, an approach which is completely counter to the NPPF (2023) WMS and draft NPPF (2024).

**Buffer**

4.69 With a 20% buffer applied to years 1 – 5 and the 5% buffer at Regulation 18 has been reduced to 2.6%
overall as detailed above (as required by the NPPF), several anomalies result including:

- Delivery only exceeds the standard method (2023) in 20930/31 the final year of the plan period. In all years prior to that performance substantially falls below the requirement.
- 2031 – 2036 (6 – 10 years post adoption)- in this period it appears in the assumption is that more than 500 dwellings/ year will be delivered from Broad Locations to year 9 of 10.
- HGC delivery assumptions appear overly ambitious and highly unrealistic as summarised above and detailed in the Identified Sites Deliverability Assessment (2023).

4.70 Moreover, no regard has been had for infrastructure capacity or delivery and how this relates to the

assumed delivery rates from identified sites.

**Unmet Need**

4.71 As already set out, StADC in an area of very high market demand, low affordability and is close to
London. It is an area which has not has properly planned for growth for circa 30 years. Such is the acute level of unmet need within the district. We set out in Section 5.0 the significant gaps in the evidence base regarding housing need and market evidence and, as such, greater evidence is required in this regard to support the draft plan's policies around matters such as quantum and spatial decision making for example.

4.72 In addition to StADC's acute unmet housing need for market and affordable housing, the district's

relationship to London and the extent of unmet housing need in the capital, should be acknowledged or addressed within the draft Regulation 19 evidence base.

4.73 For the reasons noted above it is evident that a significant amount of further work is needed to ensure

that the draft Plan's land supply targets and assumptions can actually be achieved and that sufficient sites have been identified which are capable of delivering within the plan period.

4.74 Accordingly, we consider that the current housing land supply assumptions in the Regulation 19 Plan

are significantly lacking in evidential support, and it clear that the land at NE Redbourn (being available, deliverable and suitable in NPPF terms) should be allocated in the draft Plan to help address some of the major deficiencies that have been identified in the land supply position.

**Mathematical Anomalies**

4.75 We have detailed above the mathematical anomalies between the Trajectory (2024) details of site
delivery and Part B Local Plan Sites Table A1.1.

- Alternative Supply Position

Hemel Garden Community & Broad Locations

4.76 HGC straddles both Dacorum and St Albans administrative districts and, as such, there will be certain
aspects of the HGC's delivery which will not be within the control of the StADC. Dacorum's plan is currently lagging. StADC will, on some level, be constrained by the progress made – or not made - in Dacorum. This could be a major factor in restricting delivery, not least in relation to securing outline planning permission (resolutions) and entering the necessary s106 agreements; but also matters of infrastructure delivery, SANG's and other shared aspects of the HGC concept plan.

4.77 To achieve the delivery of 100 dwellings per year occupations by 2028/2029 the following aspects all

need to take place within a 3-year period from plan adoption which, from our experience, seems highly unrealistic:

- Securing outline planning approval and completion of (complex) s106 agreement.
- Sale of land parcel, submission and approval of reserved matters details and discharge of relevant pre commencement conditions.
- 
- Construction of enabling works.
- Development of land parcels to deliver units.

4.78 As such, assuming the Local Plan is adopted as proposed in March 2026 (LDS Sept 2024)[35] for a large

strategic scheme of this nature, we would anticipate (at best) the following time considerations for these requirements, namely:

- Preparation of masterplan – 18 months (mid-late 2027)
- Planning application & s106 execution - 2 years for complex site (mid - end 2029)
- Pre commencement condition submission and discharge – 12 months (mid - end 2030)
- Commencement of early enabling Infrastructure works – 12 months (mid - end 2031)

4.79 Indeed, the Crown Estate own (best case) work programme suggests that it is unlikely that 100 dwellings

can be delivered by 2028.

4.80 StADC provide no details on:

- Condition discharge
- Land sales and procurement
- Reserved matters submissions

4.81 The allocation of HGC is accepted as per Policy SP1, SP3 and Table 3.1 of Part Local Plan and Part B Local

Plan Table A1.1 and Sites H 1 – H4, however concerns relate to the level of assumed delivery within the draft Plan period and the lack of evidence to substantiate the proposed delivery rates set out in the Trajectory (2024) and timeline. The lack of justification around the delivery timeframes for HGC, given the cross-boundary nature draws into question the soundness of the plan's spatial strategy. These concerns also link to draft policies LG1, LG2 and lG3 which fail to demonstrate the deliverability framework of the site.

4.82 Appendix 1 to these representations indicates that the capacity of these sites is likely to result **in a**

**reduction of supply of circa 935 dwellings**.

Other Broad Locations

4.83 Broad locations are not delivering houses until 2031/32, HGC is anticipated to deliver 275 dwellings by
2030/31. No allocated sites are identified to deliver any houses in the period from 2024/25 to 2028/29 – 5 years.

4.84 For the next 5 years, St Albans anticipate delivering some 1,863 dwellings, an average of 372 dwellings

per annum, or within 3 years from adoption. In the first four years from adoption based upon StADC's own trajectory, only 1,888 dwellings will be delivered which represents just 472 dwellings per annum. If a Local Plan review is to commence in 2026/207 looking to deliver a housing requirement in line with the revised standard method (2024) the assumptions in the stepped trajectory should be orientated to facilitate this, and not be reduced to defer delivery in line with the standard method for (2023) until years 4/5 after adoption.

*35* https://www.stalbans.gov.uk/sites/default/files/attachments/SADCX20LocalX20DevelopmentX20SchemeX20-X20SepX202024X20-X20Final.pdf

4.85 The basis for 500 dwellings per annum (from 2031/32) being delivered from Broad Locations is

unevidenced.

4.86 The lack of justification around the delivery timeframes for the Broad Locations set out in Table 3.1 of

Reg 19 Local Plan Part A and in Part B Local Plan Table A1.1 - Sites B1 – B8, given the cross-boundary nature draws into question the soundness of the draft Plan's spatial strategy. No evidence has been provided as to the deliverability of the anticipated supply to provide confidence that the assumptions can or will be achieved.

4.87 Appendix 1 to these representations indicates that the capacity of these sites is likely to result **in a**

**reduction of supply of circa 1,487 dwellings**.

Large Medium & Small Sites

4.88 The Large Medium & Small sites allocated via Policy LG4 in Part A Plan and Part B Local Plan Table A1.1
- Sites L1 – L3; M2 – M23, in many instances have significant deliverability constraints as detailed in our Regulation 18 representations (Identified Sites Deliverability Assessment - FINAL - 25th Sept 23).

4.89 Appendix 1 to these representations indicates that the capacity of these sites is likely to result **in a**

**reduction of supply of circa 374 dwellings**.

Greenbelt Previously Developed Land

4.90 We assert that the Part B Local Plan Table A1.1 – Sites P1 – P3 have questionable deliverability that has
not been fully substantiated by the evidence base to the Regulation 19 Plan is likely to result **in a reduction of supply of circa 73 dwellings**.

HEELA Sites

4.91 We assert that the Part B Local Plan Table A1.1 – Sites U2 – U4 have questionable deliverability that has
not been fully substantiated by the evidence base to the Regulation 19 Plan is likely to result **in a reduction of supply of circa 33 dwellings**.

Urban Capacity Sites

4.92 We assert that the Part B Local Plan Table A1.1 – Sites UC1 – UC57 have questionable deliverability that
has not been fully substantiated by the evidence base to the Regulation 19 Plan is likely to result **in a reduction of supply of circa 788 dwellings**.

4.93 Appendix 1 to these Representations shows supply which assessed based upon our Regulation 19

assessment (where applicable) results in the following revised supply position as defined in Table 10:

Table 10 Alternative Supply Position:

| | **Regulation 19 Identified Supply** | **Questionable/Non-Deliverable** | **Deliverable** |
|---|---|---|---|
| Harpenden NP Sites | 57 | 0 | 57 |
| Hemel Garden Community (Policy LG2, 3,4) | 4,300 | -935 | 3,365 |
| Broad Locations (Policy LG1) | 4,232 | -1,487 | 2,740 |
| Large Sites (Policy LG4) | 385 | -110 | 275 |
| Medium and Small Sites (Policy LG4) | 866 | -264 | 602 |
| Greenbelt Previously Developed Land | 137 | -73 | 64 |
| HELAA Sites | 43 | -33 | 10 |
| Urban Capacity Sites | 855 | -788 | 67 |
| Other | 0 | 0 | 0 |
| Total | **10,875** | | **7,180** |
| **Shortfall** | | **-3,690** | |

4.94 The above Table 10 highlights that a 3,690 dwellings shortfall from the target figure of 10.875 (or 10,653

in the Trajectory) and notwithstanding the other mathematical anomalies we identity above.

4.95 The Regulation 19 Plan is therefore unsound for the reasons detailed above which include (in summary):

- Mathematical errors across Part A, B and associated evidence base to the Plan resulting from a lack of time to review the draft Plan material.
- Lack of justification of delivery assumptions.

- Lack of justification for a reliance for the first 4 years of the Plan following adoption on existing commitments, resulting in a substantial under delivery of housing.
- Approach to Green Belt review (2023) has been inconsistent and haphazard.
- Delivery assumptions from HGC have been inflated.
- Delivery assumptions from Broad Locations have been inflated.
- Delivery assumptions for medium and small site lack robust justification.
- Delivery assumptions from Urban Capacity site lack rigour, design input and comprehensive understanding of capacity and availability of sites, to deliver housing in the plan period
- The Trajectory fails to properly plan for housing delivery in the 5 year period after adoption with only 485 dwellings per annum being targeted (when set against a requirement in the NPPF (2024) of 1,544 dwellings per annum, and contrary to officers advice to member at Committee on the 12th and 23rd September that on the day after adoption they will need to be planning for 1,544 dwellings – this is not evidenced in the land us allocation decisions made in the plan.
- Provides circa 3,690 fewer dwellings than is required by the standard method (2023).
- Additional housing allocation such as the land at NE Redbourn, are required to address the imbalance and ensure sustainable development of homes across the district.

4.96 Given the comprehensive failings in the Part B Local Plan Sites, the supporting Housing Evidence Paper,

Trajectory and associated assumptions of the draft Plan, the current basis for which is unsound as it fails to have been positively prepared, lacks justification. It is not effective or consistent with national policy as we demonstrate above. Additional allocations should therefore be made in Part B of the Local Plan.

**Monitoring & Review**

4.97 Part A of the draft Plan provides little if any guidance on the manner and extent to which the policies of
the Plan (in respect of housing) affordability and otherwise, will be monitored and reviewed. We note Appendix 6 of Part A which sets out some monitoring indicators, as there is no provision for regular monitoring and review of the Plan. This is particularly important given the way StADC is wishes to progress - ignoring the WMS[1] and draft PPF (2041 provisions – but with an intention to review their Local Plan on day one following adoption (See Sections 2.0 and 3.0 above).

4.98 In recent times, due to concerns in relation to housing supply, Bedford Local Plan (2020) through Main

Modification 1 introduced a review mechanism for the Local Plan which resulted in the adopted Local Plan, having the following requirement as Policy 1.

4.99 Bedford Local Plan Adopted Plan (January 2020) has an implementation and review policy which states:

*“Policy 1 - Reviewing the Local Plan 2030*

*The Council will undertake a review of the Local Plan 2030, which will commence no later than one year after the adoption of the plan. An updated or replacement plan will be submitted for examination no later than three years after the date of adoption of the plan. In the event that this submission date is not adhered to, the policies in the Local Plan 2030 which are most important for determining planning applications for new dwellings will be deemed to be ‘out of date’ in accordance with paragraph 11 d) of the National Planning Policy Framework 2019.*

*The plan review will secure levels of growth that accord with government policy and any growth deals that have been agreed. The planning and delivery of strategic growth will be aligned with the delivery of planned infrastructure schemes including the A421 expressway, Black Cat junction, East West Rail link and potentially the A1 realignment.*

*The review will also serve to build stronger working relationships with adjoining and nearby authorities and may result in the preparation of a joint strategic plan based on a wider geography. "*

4.100 This potential provides a framework should the draft Plan be found sound on which to hold StADC to account in respect of its intentions.

4.101 However, a word of caution should also exist as even with such provisions, opportunities for delay and

prevarication have arisen in Bedford, as highlighted in the 'Effectiveness of Review Mechanisms (Planning Policy Briefing Note) April 2024':

"*Policy 1 of Local Plan 2030 requires the council to submit a review of the plan within three years after the date of adoption. The submission of Local Plan 2040 in January 2023 fulfils this requirement. The draft plan is still at examination and the Inspector has agreed to a pause in*

*the examination until at least January 2025. The council anticipates adoption of the plan by December 2025...*"

4.102 This shows, firstly, that whilst the Submission of a revised Local Plan was achieved within the target of

3 years, the examination process has then been substantially protracted with the revised Plan not being in place (as at the time of these representations). If similar mechanisms are to be contemplated for StADC, then whilst sanctions are helpful, they need to avoid scope for evasion.

3.72 Currently the Regulation 19 Plan's implementation and monitoring policies and mechanisms are virtually non-existent and so fail to be effective, justified, and consistent with national policy.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

3.73 The required changes to draft Plan include:

- Reconcile various mathematical errors and inconsistencies which affect Part A (Table 3.1 and 3.2), Part B Table A1.1 and the Trajectory (2024) also at Table 3.2 Part A/Appendix A to the Housing Evidence Paper.
- Housing Trajectory (Tables 3.1 and 3.2 and Appendix A to Housing Evidence Paper) to be amended to prioritise supply as soon as possible within plan period – not defer provision as far as possible.
- Draft Policy SP1, SP3 and Policies LG 1 – 4 alongside Tables 3.1 and 3.2 of Reg 19 Local Plan Part A should be amended. Part B of the Plan updated accordingly to address.
- Delivery assumptions from HGC has been inflated and should be adjusted.
- Delivery assumptions from Broad Locations have been inflated.
- Delivery assumptions for medium and small site lack robust justification.
- Delivery assumptions from Urban Capacity site lack rigour, design input and

comprehensive understanding of capacity and availability of sites, to deliver housing in the plan period.

- Housing supply is questionable a level of circa 3,690 fewer dwellings than is required by the (current) standard method (2023) and the Plan should be amended, and additional allocations made such as the land at North East Redbourn to address these shortcomings.
- The Trajectory (2024) should be amended to address significant proposed shortfalls in the 5-year period following adoption.
- Revise the assumptions underpinning Draft Policies SP1, SP3 and Table 3.1 and Table 3.2 of Reg 19 Local Plan Part A and Part B Local Plan Table A1.1 and Sites H 1 – H4
- Mitigate the identified shortfall of 3.690 dwellings in supply through the identification and allocation of further Broad Locations at Policy SP1, SP3 and Table 3.1/3.2 of Part Local Plan and Part B Local Plan Table A1.1.
- The Trajectory (2024) fails to properly plan for housing delivery in the 5 year period after adoption with only 485 dwellings per annum being targeted (when set against a requirement in the NPPF (2024) of 1,544 dwellings per annum, and contrary to officers advice to member at Committee on the 12th and 23rd September 2024, that on the day after adoption they will need to be planning for 1,544 dwellings – this is not evidenced in the land us allocation decisions made in the draft Plan.
- Trajectory (2024) revisions and assumptions require evidence and verification, including maters such as dwelling delivery commencement, amendments to the stepped trajectory for the first 5 years of the plan period, significant reduction in assumed dwellings completions for the first 5 year following adoption (25/26 – 2030/31) from 4,285 dwelling to 2,941 dwellings – against a requirement figure of 4,425 dwellings, a shortfall of 1,484 dwellings.
- Revise the assumed delivery rates in the first 5 years of the Plan to address the current position where only about **36%** of the required annual supply (885 dwellings (2023 standard method) and **22%** of the (1,544 dwellings 2024 standard method) will be delivered. This will require additional allocations to achieve sustainable development.
- Reviewing the stepped trajectory assumptions for the first 5 years of the plan to ensure greater supply of housing in the early years of the plan, whilst larger sites come on stream.
- Increased buffer from 2.6%
- Additional allocations are required to address the identified shortfall in supply, sites include those which have the potential to make a tangible contribution within the first 5 years of the Plan as well as offering a range of sustainable development benefits, this plainly includes the land at NE Redbourn.
- Provide additional details as to the basis for the revised windfall assumptions
- Provide greater detail as to the assumptions underpinning assumed build out rates and lead times to provide necessary clarity on the identified supply position.
- 2024 AMR is required to provide additional substantiate to the Regulation 19 supply assumptions.
- Greater regard to levels of housing need in addressing the housing requirements and in determining the way supply is manged over the plan period. The deferral of delivery seeks only to exacerbate matter of housing need and increasing level of unmet need.
- Suitable implementation, monitoring and review policies should be provided to ensure that strict oversight is provide in respect of the Plans delivery aspirations and performance. Detailed review polices as detailed above should be included to ensure sanctions apply if performance is not achieved.

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Grey Belt**

An additional proposed change in the Government's recent consultation that adds further weight to the case for SADC to stop work on the eLP and to prepare an amended Regulation 19 Plan that alignes with the requirements of the new NPPF as soon as it is adopted later this year, is the inclusion of a new designation for land: "grey belt".

This designation would be distinct from, yet inextricably linked to, Green Belt in that the function of existing Green Belt – when measured against its contribution to the five identified purposes in the NPPF – would lead to a judgement on whether specific areas of currently existing Green Belt would be better identified as Grey Belt, i.e. land that performs poorly against the five purposes and therefore deemed as locations where certain types of development would not be considered inappropriate and should also be deemed sequentially preferrable for release as part of plan-making.

The eLP confirms that over 80% of St Albans District is Green Belt. Consequently, the introduction of a Grey Belt designation has significant implications for plan-making, in respect of the potential for additional land, such as that being promoted by our client, to be deemed suitable for release from the Green Belt and allocated to meet the substantial shortfall in housing in St. Albans District. This further accentuates the need to suspend the current eLP and for this Council to commence a review of its existing evidence as soon as the new NPPF is adopted later this year.

This would invariably need to include consideration of what Grey Belt land exists as part of an updated Green Belt Review, which in turn would significantly influence the supply of sites deemed suitable for allocation.

In respect of other aspects of the spatial strategy, our client supports the proposed Settlement Hierarchy at Table 1.3. It is appropriate that St Albans City sits at the top of the hierarchy. That said, as will be elaborated on in representations on Policy SP3 of the plan and its supporting evidence, the Council has failed to include sustainable sites on the edge of St Albans as allocations that could help it meet the huge shortfall in housing against the proposed new standard methodology referred to above.

**Green Belt Review**

Green Belt Review

Earlier representations at the Regulation 18 Stage have been submitted on behalf of Ms. Bennett objecting to the Stage 2 GBR. It is not that these have not been addressed and no up date to the GBR has been undertaken to deal with the flaws identified. This is likely to be, at least partly, a consequence of the Council's rush to progress this Regulation 19 Plan to avoid meeting any increased housing need under the new Government's proposed SM.

Our client's objections therefore stand and are reiterated below. However, it should also be noted that with the proposed changes to the NPPF, particularly the introduction of the Grey Belt classification, a new Green Belt Review will need to be undertaken such that it remains consistent with the objectives of the Framework.

The Grey Belt classification is a fundamental change to the approach toward Green Belt development in that those areas which are constrained by Green Belt in securing the required levels of housing and economic growth, land which would be considered Grey Belt can be developed for those purposes without being deemed "inappropriate". Furthermore, the proposed changes set out that first consideration should be given to Green Belt land for release where is previously developed land (as is the present case), followed by Grey Belt land (proposed change), and only then should consideration be to other Green Belt sites (proposed change).

Evidently, the objective here is that opportunities for previously developed land and Grey Belt sites should be exhausted before any consideration is given to other land in the Green Belt – functionally, this would be a new approach to sustainable development within the Green Belt. Should this emerging Plan progress in current form a substantial proportion of the evidence base which underpins the strategic policies may very well conflict with a future iteration of the Framework that would demand a new Plan altogether. It is in this Council's interested, therefore, to undertake the relevant work for updating the evidence base once the proposed changes have been confirmed rather than continue to avoid its responsibility to positively prepare a plan.

The following objectives of the current NPPF support our client's position on the matter:

Paragraph 7 confirm that the purpose of the planning system is to contribute to the achievement of sustainable development, including through the provision of new homes.

Paragraph 8b) add that part of the social objective of sustainable development is *"…. ensuring that a sufficient number and range of homes can be provided to meet the needs of present and future generations…."*

Paragraph 11a) of the presumption in favour of sustainable development requires all plans to promote a sustainable pattern of development that seeks to meet the development needs of the area.

Paragraph 16 requires local plans to a) be prepared with the objective of contributing to the achievement of sustainable development and b) be prepared positively.

Paragraph 35a) on examining plans, requires plans to be positively prepared.

Paragraph 35b) requires Local Plans to be justified, meaning they are an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.

Paragraph 35d) requires plans to be consistent with national policy.

For the above reasons, failure to give due consideration to Grey Belt land within any of the evidence, let alone as a component of the Green Belt Review, can only lead to this Plan being found unsound.

Returning to the aforementioned points regarding our client's prior representations on the Green belt Review, there are three principal areas of objection which remain relevant and to which the above paragraphs of the NPPF also bear relevance in the consideration of these points:

1. The inconsistent approach to the scale of parcels assessed. For example, parcels SA-92 and SA-93 have been assessed at a site level, whereas parcel SA-91, which our client's site has been assessed as part of, comprises a much larger area. That directly impacts on the conclusions reached on its contribution to Green Belt purposes. The site has been assessed and rejected as a direct consequence.
2. The approach to defining parcels. FPCR Landscape Architects have reviewed the Stage 2 GBR in their Landscape and Visual Appraisal and Green Belt Assessment ("LVAGBA") prepared as part of an outline planning application submitted for our client's site for up to 190 dwellings, a copy of which is enclosed with these representations. They assessed the

contribution a parcel of land containing our client's site, but with different boundaries to SA-91, based on more logical features on the ground, makes to the Green Belt purposes. They found the parcel they assessed to contribute at a low level to the Green Belt purposes.

3. When FPCR assessed the contribution the site itself would make to Green Belt purposes, this was at a lower level still, with the harm from the proposed development limited. As per the proposed changes to the NPPF, it is highly possible that this site would be classified as Grey Belt. It is therefore considered the ARUP assessment not only over-estimates the harm, but will in some respects be outdated should the Grey Belt classification be formally included within national policy later this year. Ultimately, the findings by ARUP appear to have directly led to the site being rejected and overlooked for inclusion as a large site allocation in Part B of the eLP.

As a result, the list of Large, Medium and Small Sites included in Part B of the ELP is not considered an appropriate strategy when considering the reasonable alternatives. Our client's site has been omitted in place of less sustainable and appropriate locations for new housing. The eLP should therefore have included the allocation of our client's site between Alban Way and Colney Heath Lane, St Albans.

As noted, it is currently the subject of an outline planning application for up to 190 dwellings. This has been supported by a full suite of application plans and documents demonstrating both the suitability of the site and its deliverability. This information is available directly on the Council's own website. Enclosed with these representations is a copy of the submitted illustrative concept masterplan and landscape masterplan submitted with the application. These demonstrate that the site can be developed to form an appropriate extension to St Albans.

**Site Selection Methodology**

The eLP sets out that in addition to the Green Belt Review (GBR) a site selection assessment has considered constraints such as environmental considerations like flood risk and wildlife conservation, and other planning factors such as distance to facilities, heritage and access, in the plan-making process to determine suitable sites for allocation.

The methodology for the site selection assessment is outlined in the Site Selection – Proforma Methodology Paper (SSM) published in September 2024. Specifically, Tables 1 (Green Belt and PDL considerations) and 2 (Major Policy and Environmental Considerations) of the SSM establishes the site assessment criterion and, thus, whether a site is considered suitable as a potential allocation.

In respect of the site our client is promoting through the emerging Local Plan process (site ref: C-013), and for which there is a currently a live outline planning application for residential development of up to 190 dwellings (ref: 5/2023/1923), there are serious concerns with the chosen methodology and whether it is suitable in practice given it is our position that the site is a suitable one to include as a potential allocation.

Site C-013 was assessed as performing strongly against 14 of the criteria set out in table 2, moderately against 9, and weakly against 8. These ratings are comparable with other sites that were recommended to progress, nonetheless the site selection process drew the conclusion this site is not recommended to progress. This appears to be on the basis that the Green Belt Review stage 2 Report did not recommend the site for further consideration, in addition to the site's performance against the Table 2 criteria which it performs poorly on raise technical considerations that would not justify a positive recommendation.

In terms of the latter, the site is recorded as performing weakly against:

- Distance to a railway line;
- Distance to a local/town/village centre;
- Agricultural Land Classification;

- Local or Regional Nature Conservation sites;
- Priority Habitats;
- Access to Open Space;
- TPO trees; and
- Contamination.

Firstly, the inclusion of multiple criteria that are proximity based is counterintuitive. The SSM sets out that the criteria include other measurements such as distance to schools, bus stops and GP surgeries. The site performs moderately or strongly against all these other criteria and, yet, to include separate criterions for different methods of sustainable transport as well as a local/town/village centre when accessibility to facilities and services can give rise to contradictory assessments on a site's locational sustainability.

The site has already been identified as being with the Green Belt settlement buffer for St. Albans city – in this respect, it is well-related to the city and indeed has sustainable transport links such as bus services and the Alban Way cycleway within a reasonable distance to access the city centre and the railway. Distance in this context is less of concern, therefore, than the actual time that would be taken to access these key facilities and services within the city and serves only to skew the outcomes of the site selection assessment If this latter approach were taken it would be clear that the site in practicality would perform than better than it first seems with regards to its locational sustainability.

On the matter of agricultural land quality it is simply not enough to determine a site's classification in isolation – it must instead be considered in the considered of total land suitable and available for development to determine to the true extent of loss of any best and most versatile land. Certainly, in a district where majority of the housing to be delivered is from Green Belt release there is expected to be significant quantity of land released on what may be BMV land to facilitate growth that otherwise may not be achievable. The failure to contextualise this criterion in terms of the agricultural land quality of submitted sites does not provide an accurate assessment as to the site's impact to or loss of BMV land.

Turning to the site's assessment against ecological considerations, there has been no effort made to quantify the scale of the site which comprises designations such as woodland, priority habitats, etc. under the rating scale of Table 2 of the SSM, therefore no accurate assessment as to whether there will be a significant impact on these features.

The proforma notes the site is over 11 hectares in size. It is a given that not of all the site will be developable, and indeed the scale in reality allows room to provide a suitable scale of residential development such that any ecological features of importance that require preservation can be suitably accommodated as part of a scheme, or the impact mitigated or compensated. The SSM in this respect only provides an indication of proximity to these features rather than the impact to them and is therefore vague and ambiguous in its application for plan-making purposes. Equally, the criterion relating to contamination does little to provide a qualitative assessment on whether a contaminated site can be remediated to facilitate development. As will be detailed in other sections of our responses to this consultation, a suite of supporting documents has been produced to support the planning application at this site which suitably addresses the aforementioned technical considerations on ecology, contamination, etc.

In short, the SSM appears to be formulated from a risk or constraints perspective but has left very little room to give consideration to opportunities that certain sites might provide, include specifically site C-013. This, coupled with the SSM's own repeated and contradictory assessments on location sustainability, does lend itself to being a suitable frame for site selection. Evidently, this is a process which would require significant review on the basis that many sites may have not been appropriately assessed.

The Green Belt Assessment

In searching for sites, the approach of the Council has been to look at sites within a buffer around settlements. This is clarified in section 4.2.1 of the Green Belt Assessment (2023) where it is stated '*the GBR Stage 2 feeds directly into SACDC's site selection process. It was therefore appropriate to undertake a more spatially focussed piece of work. The initial area of search was defined by applying a buffer around each settlement inset from the green belt, which would assist in encouraging sustainable pattern of development accessible to existing settlements and maintain the integrity of the Green Belt. This approach ensured a proportionate and focused study.'*

On page 21, it is set out that '*it was agreed that the character of the urban settlements and the approach for a finer grain assessment leant itself to a 400m buffer for the main settlements while a 250m buffer was considered reasonable buffer for lower order settlements (Table 4.1, Figure 4.2). These buffers indicate the likely maximum extent of sustainable development and vary accordingly to the position of the built-up area in the settlement hierarchy'.*

Whilst Stonebond have some concern with this approach and its consistency with national policy, particularly the lack of consideration of access to public transport set out at paragraph 147, they recognise the positive steps that SADC have taken to identify areas within the Green Belt that may be suitable to accommodate development.

There is clearly merit in reviewing the edge of settlements to see if there are appropriate small sites that do not meet the purposes of the Green Belt and could be utilised to meet local development needs as part of the Green Belt review process. In the case of Gustard Wood, this includes looking within 200m of the settlement boundary – but only because of the classicisation on Blackmore End to the north which, as set out above, is inset from the Green Belt. Stonebond support the approach of the Council in utilising the relationship with Balckmore End, but would point out that the search area would be widened if Gustard Wood was inset in the Green Belt as suggested above. If this change were made, it would reinforce the location of a site they control (north of the Slype, Gustard Wood – HELAA reference WH-10-18) as lying well within the 250m buffer zone used to identify potential sites.

The Green Belt Assessment concludes that the site is recommended for further consideration. Stonebond do not seek a change to the Green Belt Assessment with regards to site WH-10-18, with the points above made for context. However, the do seek a change in response to how the Site Selection process has been made which has led to the non-allocation of their site

Site Selection in the Green Belt

As note above site WH-10-18 is noted in the Green Belt Assessment as being suitable for further consideration. This led to the proposed allocation of the site within the Regulation 18 consultation, with no other issues raised that would precede the allocation of the site. To back up this conclusion, Stonebond have prepared further technical work in the form of a Transport Statement (prepared by Motion) and Landscape Visual Impact Technical Note (prepared by Ramboll) which confirm how emerging development proposals on the site can be sustainably delivered without adverse impacts on the landscape or highway network.

Despite this positive position, the site has been taken out of the draft Local Plan at Regulation 19 stage with the revised Site Assessment Work noting '*Technical work undertaken by Natural England, regarding the characteristics of land that meets their criteria for an extension to the Chilterns National Landscape into St Albans City & District, includes this site'.* A number of other sensitives have been identified with the site, but Stonebond would note that these were all known at Regualtion18 stage and were not considered to justify not taking the site forward to allocation.

The tests of soundness are clear that the preparation of Local Plans sound be based on proportionate evidence. However not one piece of evidence has been published by SADC to support their position and inform those with an interest in the development of the Local Plan how they have come to their conclusion. The revised Site Assessment Report does not reference a particular report to back up the position taken by SADC and there is no visibility of any of the work that has been undertaken to inform the boundary review. Therefore, there is no way of being able to say that the approach adopted by SADC meets the test of being informed by a proportionate evidence base.

The approach of SADC effectively pre-empts the outcome of a statutory process. There is no way of SADC knowing what the outcome of the process will be, making the decision to remove the site premature.

According to the FAQs paper prepared by Natural England (attached), there is still extensive work and consultation to be undertaken. As of July 2024, the FAQs note the dates for of '*identifying proposed boundary changeswere yet to be confirmed'*. The June 2024 update to the Planning Policy Committee confirmed that Officers were *'aware that the general extent of the Natural England recommended National Landscape Extension is in the northern part of the District'*. This information is not published anywhere and is not publicly available.

What is publicly available is the Regulation 18 response of Natural England to SADC in September 2023 which sets out that 22 sites lie within the proposed area of search that they are considering for a *'possible'* variation to the Chilterns Area of Outstanding Natural Beauty. Given this position, it is not clear why only four sites have been removed as draft allocations since the Regulation 18 consultation, suggesting an inconsistency in the approach of SADC.

Within their response, Natural England are very clear on the position with regard to these sites and what work the SADC need to do to inform their Local Plan. The letter states:

*Although the assessment process does not confer any additional planning protection, the impact of the proposal on the natural beauty of this area may be a material consideration in the determination of the development proposal. Natural England considers the Chilterns to be a valued landscape in line with paragraph 174 of the National Planning Policy Framework (NPPF). Furthermore, paragraph 176 of the NPPF states that development in the settings of AONBs should be sensitively located and designed to avoid or minimise impacts on the designated areas. An assessment of the landscape and visual impacts of the proposal on this area should therefore be undertaken, with opportunities taken to avoid or minimise impacts on the landscape and secure enhancement opportunities. Any development should reflect or enhance the intrinsic character and natural beauty of the area and be in line with relevant development plan policies.*

*An extension to an existing AONB is formally designated once a variation Order, made by Natural England, is confirmed by the Defra Secretary of State. Following the issue of the designation order by Natural England, but prior to confirmation by the Secretary of State, any area that is subject to a variation Order would carry great weight as a material consideration in planning decisions.*

From this response, it is clear the ongoing assessment process does not give any protection to sites identified as being in the area of search. This would only be the case from the point a Variation Order is made by Natural England. What is relevant is the fact that Natural England consider the area to be a valued landscape and therefore require an assessment of the landscape and the visual impacts of proposals on the area.

This process would allow opportunities to minimise impacts on the landscape and possibly secure enhancements. From a review of the evidence base prepared by the Council, this has only happened (after site selection has already taken place) for the 12 broad locations identified for development in the draft Local Plan and therefore backs up the position of Stonebond that the evidence base to justify their draft Local Plan is deficient and the Local Plan fails the test of soundness.

The FAQs provided by Natural England reaffirm the relationship between the planning process and the variation process, setting out '…*if land has been identified in an adopted local plan or if there is a planning proposal has been submitted, then this would most likely result in the land not being proposed for designation.'* This indicates that the Local Plan process should continue in advance of any review, rather than the review unduly impacting on the plan making process until it is sufficiently advanced.

To inform their position, Stonebond have instructed Ramboll to prepare a Landscape and Visual Technical Note for their site at Gustard Wood, which is submitted with this representation. This assessment concludes that the site:

- Does not display the special qualities that have been identified for the Chilterns National Landscape
- Does not adversely affect the purposes of the Green Belt
- Can be delivered without adversely affecting the valued landscape character of the area
- Can accommodate the proposed development of c.50 dwellings through appropriate massing, material use and landscape screening

On this basis, Stonebond do not believe that a landscape assessment of the site would justify the non-allocation of Site WH-10-18. Without SADC undertaking this work as part of the Site assessment process, the approach of the Council is flawed and the plan cannot be considered sound. Stonebond consider that this can only be resolved by revisiting the Site Assessment Process.

Related to this point, Stonebond note that paragraph 145 of the NPPF sets out that when Green Belt boundaries are to be redrawn, the boundary should be able to be '*endure beyond the plan period'.* Paragraph 148 goes on to state that *'plans should be able to demonstrate that Green Belt boundaries will not need to be altered at the end of the Plan period'.*

In the St Albans case, it is known that there will need to be an early review of the Local Plan to meet the transitional arrangements for plan making set out in the recent consultation on the NPPF. Although weight cannot be given to the proposed revisions to the NPPF, the consultation document and Written Ministerial Statement, which are material planning considerations, clarify the position meaning SADC are going ahead with the Local Plan in the knowledge that they will have to carry out an early review to meet a significantly higher housing number which will inevitably lead to further Green Belt release.

Given this context and the requirement in the current NPPF for Green Belt boundaries to have longevity, Stonebond do not believe that the approach of SADC meets the soundness test of compliance with national policy. This can be addressed through a more evidence-based assessment of all alternative sites to allow all suitable Green Belt sites to be identified and allocated for development.

<u>Housing Trajectory</u>

SADC have included a stepped housing trajectory in their draft Local Plan. Whilst Stonebond do not disagree that an element of 'stepping' in the trajectory given the number of strategic sites and their likely lead in times, the PPG (Reference ID: 68-021-20190722) is clear that '*strategic policy-makers will need to identify the stepped requirement in strategic housing policy, and to set out evidence to support this approach, and not seek to unnecessarily delay meeting identified development needs. Stepped requirements will need to ensure that planned housing requirements are met fully within the plan period'*

The only justification for the stepped trajectory is that it is necessary to *'allow sufficient time for the significant uplift in housing delivery to be realistically delivered'.* This does not constitute the necessary evidence to satisfy the PPG requirements.

Stonebond also believe the approach taken by SADC unnecessarily delays the delivery of housing by not identifying all suitable small/medium sites for allocation, the development of which could be realised sooner in the plan period. Stonebond's site at Gustard Wood (WH-10-18) is an example of such a site.

Further, the trajectory does not show any scope for slippage in the supply of sites, with the backloading of delivery of major sites in the plan period. Whilst an allowance has been made for the lead in times to commence development on major sites, there is only a very small contingency on the supply side (295 dwellings – equivalent to 2% of the requirements) to account for any unforeseen delays in delivery.

It is standard practice for at least a 10% buffer in the supply of sites to made allowed in the development of Local Plans to allow for unforeseen delays in delivery. This would suggest a buffer in supply of closer to 1,460 dwellings should be allowed making a shortfall in identified supply of 1,165 dwellings (notwithstanding later points made in relation to sites).

The nature of the proposed allocations means that there is no scope to realise the development of sites sooner in the plan period. It is therefore essential for the soundness of the Local Plan that additional small/medium sized sites such as WH-10-18 are identified for delivery in the earlier years of the Plan period, otherwise it is highly unlikely that the planned housing need will be delivered as required, making the plan ineffective. Such sites could be introduced as main modifications to the draft Local Plan.

Windfall

Stonebond note that there is no proper explanation to justify the 145-dwelling windfall allowance shown in the trajectory. The NPPF (paragraph 72) sets out that 'w*here an allowance is to be made for windfall sites as part of anticipated supply, there should be compelling evidence that they will provide a reliable source of supply. Any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends'.*

SADC have prepared an updated paper (Housing Land Supply, Windfall and Housing Capacity Evidence Paper, September 2024) which includes a section on windfall. This sets out that a reduced windfall requirement of 145 dwellings per annum is now included in the housing trajectory, down from 180 at Regulation 18 stage. This is because of a review of the previous report to take account of latest completion rates.

However, at no point is there any proper analysis of the trends in supply and whether the past rate of development, which is what the windfall allowance is solely based on, is likely to continue going forward. Without this analysis, it cannot be said that there is 'compelling evidence' that the windfall will continue to provide a reliable source of supply in the future as required by national policy. This is particularly the case given the 45-dwelling reduction from Regulation 18 stage, which implies a falling rate of windfall completions.

Further, it is unclear whether there is double counting within the allowance. Although it was made clear at paragraph 3.56 of the 2020 HELAA (where the previous windfall figure was justified) that Green Belt sites were excluded from the windfall allowance based on the fact such sites are to be allocated, paragraph 3.56 went on to state that '*Previously Developed Land (PDL) in the Green Belt has been included in the windfall calculations because the evidence demonstrates it consistently makes up part of annual completions in the District'*. The limited analysis in the new Windfall Paper does not make this point clear as there is no proper analysis of the figures.

This suggests a clear double counting in supply given Part B of the Local Plan clearly allocates brownfield sites in the Green Belt for development.

It is also unclear how the contribution that other small/medium allocations will make to future land supply has been factored in the assessment of windfall. The draft Local Plan includes a number of brownfield sites within settlements that could reasonably be expected to be realised as windfall

development if the Local Plan were not to be adopted. We would have expected to see a discussion around this point in Windfall Paper and without it, it cannot be concluded if the contribution of allocated sites within the draft Local Plan has effectively been double counted.

Therefore, Stonebond consider that the windfall allowance shown in the housing trajectory is neither justified nor compliant with national policy and needs to be amended to make the Local Plan sound. This is likely to lead to a position where there is a shortfall in housing land supply within the Local Plan to meet the minimum housing need of the area. This is a particular issue in the early years of the Plan where there is a high reliance on the delivery of windfall sites to meet the housing needs. This issue could be resolved by identifying more housing allocations on Small and Medium sites such as MH-10-18. Without further justification, it is not clear where these windfall development sites will be located as following the adoption of the Local Plan, the development of new Green Belt sites through windfall is unlikely.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Update the Green Belt assessment to reflect the role of the existing area of Gustard Wood as part of the higher order settlement Blackmore End.

Prepare landscape assessment work to inform the site selection process for Green Belt sites in line with the advice of Natural England at regulation 18 stage.

Amend the site selection process to remove the potential for sites to possible be included within a revised national landscape designation as a reason to rule sites out. This appears contrary to Natural England advice on the status of the ongoing review.

Publish any evidence that justifies the identification of sites within a potential expansion of the Chilterns National Landscape area.

Carry out a thorough review of the Green Belt boundary in the context of the known increase in housing need to allow the boundary to endure beyond the plan period.

Provide additional site specific information and justification for the Housing Trajectory,

Make additional small/medium sized allocations to address the shortfall in short term delivery, reducing the need for an unnecessary stepped trajectory.

Provide additional housing sites to add to the buffer in supply, which is too small to be effective.

Provide additional justification for the windfall allowance, specifially ruling out any double counting as a resutl of the allcoation of brownfield sites in the Local Plan.

**Table 3.1 – Broad Locations**

**Object**

**Plan is not positively prepared and Justified**

Hertfordshire Constabulary have reviewed the Local Plan and are of the view that not enough consideration has been given to the impact growth could have on emergency services.

We currently have a main response base located at St Albans Police Station, and a Safer Neighbourhood Team located at Harpenden. Additionally, there are community police hubs in Redbourn and Wheathampstead within the parish and community halls. The proposed increase in population (see our response to Table 1.2) is significant enough to require a new larger police station to cover Hemel Hempstead and St Albans, to replace the existing ones. (Dacorum also has a potential population increase of 24% to 2040 with the number of proposed new homes).

It is noted in the Infrastructure Delivery Plan (July 2023) that:

"Additional housing provision in SADC has implications for police services, with the number of staff and facilities needed to police an area based on criminality rather than population. This is influenced by housing, population density, and whether there is a stable population. This makes it difficult to assess future demand for policing services as a result of housing growth".

The Hertfordshire Constabulary would like full consideration to be given to the provision of a replacement police station in the St Albans area considering the large increase in housing in the area and the increased population. The current Police station is at full capacity in terms of size, and a large facility will be required in the city. This is at early planning stages and further analysis needs to be undertaken to identify the scale of redevelopment, costings, phasing and other critical information.

On the basis of the above, as part of the Joint Planning – South West Hertfordshire Joint Strategic Plan and Hemel Garden Communities,we would be looking for both St Albans District Council and Dacorum Borough Council to allocate appropriate land for a new police station, potentially in a community hub providing a doctor's surgery, library and fire service facilities also.

It is important to acknowledge that in accordance with paragraph 98 of the draft NPPF (2024), a new amendment is proposed as follows:

*"Significant weight should be placed on the importance of new, expanded or upgraded public service infrastructure when considering proposals for development."*

Whilst it is acknowledged that this Local Plan is likely to be examined against the December 2023 NPPF, this proposed amendment clearly emphasises that there is a need for local planning authorities to consider public service infrastructure both at the plan making and decision-making stages.

We therefore request that Table 3.1 in respect of the North and East Hemel Hempstead allocations, include provision for land for a new police station.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Modification requested to Table 3.1:

The Hertfordshire Constabulary request that Table 3.1 in respect of the North and East Hemel Hempstead allocations, include provision for land for a new police station.

Reason:

The Hertfordshire Constabulary would like full consideration to be given to the provision of a replacement police station in the St Albans area considering the large increase in housing in the area and the increased population. The current Police station is at full capacity in terms of size, and a large facility will be required in the city. This is at early planning stages and further analysis needs to be undertaken to identify the scale of redevelopment, costings, phasing and other critical information.

Please note - we could only add one comment on Chapter 3- we have another comment to make on SP3 but the portal only allows a comment on one part of the chapter. We will email this comment separately.

**204 - Stonebond Properties Ltd (Smallford)**

Submission Number: 204 Submission Date: 07/11/24 17:07

Respondent: Company/Organisation: Bidwells Name: Mr Mark Harris

On Behalf Of Company/Organisation: Stonebond Properties Ltd (Smallford) Name:

Comment Number: 2

**Type:**

* Table

**Number:**

3.2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

SADC have included a stepped housing trajectory in their draft Local Plan. Whilst Stonebond do not disagree that an element of 'stepping' in the trajectory given the number of strategic sites and their likely lead in times, the PPG (Reference ID: 68-021-20190722) is clear that '*strategic policy-makers will need to identify the stepped requirement in strategic housing policy, and to set out evidence to support this approach, and not seek to unnecessarily delay meeting identified development needs. Stepped requirements will need to ensure that planned housing requirements are met fully within the plan period'*

The only justification for the stepped trajectory is that it is necessary to *'allow sufficient time for the significant uplift in housing delivery to be realistically delivered'.* This does not constitute the necessary evidence to satisfy the PPG requirements.

Stonebond also believe the approach taken by SADC unnecessarily delays the delivery of housing by not identifying all suitable small/medium sites for allocation, the development of which could be realised sooner in the plan period. Stonebond's site at Notcutts Garden Centre is an example of such a stie.

Further, the trajectory does not show any scope for slippage in the supply of sites, with the backloading of delivery of major sites in the plan period. Whilst an allowance has been made for the lead in times to commence development on major sites, there is only a very small contingency on the supply side (295 dwellings – equivalent to 2% of the requirements) to account for any unforeseen delays in delivery, or indeed sites not coming forward at all.

It is standard practice for at least a 10% buffer in the supply of sites to made allowed in the development of Local Plans to allow for unforeseen delays in delivery. This would suggest a buffer in supply of closer to 1,460 dwellings should be allowed making a shortfall in identified supply of 1,165 dwellings (notwithstanding later points made in relation to sites).

The nature of the proposed allocations means that there is no scope to realise the development of sites sooner in the plan period. It is therefore essential for the soundness of the Local Plan that additional small/medium sized sites are identified for delivery earlier in the Plan period, otherwise it is highly unlikely that the planned housing need will be delivered as required, making the plan ineffective. Such sites could be introduced as main modifications to the draft Local Plan, Plan such as Stonebond's site at Notcutts Garden Centre.

Finally, Stonebond note that the approach to grouping sites in broad categories means that it is difficult to fully assess the robustness of the trajectory. To allow proper consideration by the Inspector, we would expect more detail and supporting evidence to be provided by SADC, otherwise there is a risk the approach is not justified.

<u>Windfall</u>

Stonebond note that there is no proper explanation to justify the 145-dwelling windfall allowance shown in the trajectory. The NPPF (paragraph 72) sets out that 'w*here an allowance is to be made for windfall sites as part of anticipated supply, there should be compelling evidence that they will provide a reliable source of supply. Any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends'.*

SADC have prepared an updated paper (Housing Land Supply, Windfall and Housing Capacity Evidence Paper, September 2024) which includes a section on windfall. This sets out that a reduced windfall requirement of 145 dwellings per annum is now included in the housing trajectory, down from 180 at Regulation 18 stage. This is because of a review of the previous report to take account of latest completion rates.

However, at no point is the any proper analysis of the trends in supply and whether the past rate of development, which is what the windfall allowance is solely based on, is likely to continue going forward. Without this analysis, it cannot be said that there is 'compelling evidence' that the windfall will continue to provide a reliable source of supply in the future as required by national policy. This is particularly the case given the 45-dwelling reduction from Regulation 18 stage, which implies a falling rate of windfall completions.

Further, it is unclear whether there is double counting within the allowance. Although it was made clear at paragraph 3.56 of the 2020 HELAA (where the previous windfall figure was justified) that Green Belt sites were excluded from the windfall allowance based on the fact such sites are to be allocated, paragraph 3.56 went on to state that '*Previously Developed Land (PDL) in the Green Belt has been included in the windfall calculations because the evidence demonstrates it consistently makes up part of annual completions in the District'*. The limited analysis in the new Windfall Paper does not make this point clear as there is no proper analysis of the figures.

This suggests a clear double counting in supply given Part B of the Local Plan clearly allocates brownfield sites in the Green Belt for development.

It is also unclear how the contribution that other small/medium allocations will make to future land supply has been factored in the assessment of windfall. The draft Local Plan includes a number of brownfield sites within settlements that could reasonably be expected to be realised as windfall development if the Local Plan were not to be adopted. We would have expected to see a discussion around this point in Windfall Paper and without it, it cannot be concluded if the contribution of allocated sites within the draft Local Plan has effectively been double counted. This is particularly the case if the Spatial Strategy leaves 'no stone unturned' in the search for housing allocations, which would leave only very limited windfall completions if true.

Therefore, Stonebond consider that the windfall allowance shown in the housing trajectory is neither justified nor compliant with national policy and needs to be amended to make the Local Plan sound. This is likely to lead to a position where there is a shortfall in housing land supply within the Local Plan to meet the minimum housing need of the area.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Provide additional site specific information and justification for the Housing Trajectory,

Make additional small/medium sized allocations to address the shortfall in short term delivery, reducing the need for an unnecessary stepped trajectory.

Provide additional housing sites to add to the buffer in supply, which is too small to be effective.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To discuss details around the trajectory and role of windfall and the implications for the delivery of the overall housing requirement in the plan period.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

See attached representations for full submission.

### 4.3 Chapter 3 – Sustainable use of land and green belt

Oaklands College and Taylor Wimpey **supports**:

- The current new additional dwellings per annum target (885 dwellings per annum) as set out in paragraph 3.8, Strategic Policies SP3 and Table 3.2 of the Regulation 19 Publication Draft Local Plan; and
- The inclusion of East St Albans (including at least 522 homes) as a Site Allocation in Table 3.1.

No suggested amendments are offered at this stage, albeit Oaklands College and Taylor Wimpey request that he site capacity is adjusted to 472 units plus approximately 60 to 80 extra care units (as discussed in section 3.1 above).

### 4.3.1 HOUSING TRAJECTORY

Although Oaklands College and Taylor Wimpey **support** the housing trajectory (Table 3.2, page 28) set out in the Regulation 19 Publication Draft Local Plan, Site Allocation B4 (East St Albans) is available and deliverable now and is capable of being delivered well before 2031/32. With Taylor Wimpey on board, delivery would be in the early years of the new Local Plan period, addressing the significant need for new housing in St Albans.

### 4.3.2 SUGGESTED AMENDMENTS

Oaklands College and Taylor Wimpey seek the Council's agreement to adjust its housing trajectory to show housing delivery on Site B4 from 2026/27 onwards [approx. 100 units per year]. This amendment can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

See attached representations for full submission.

### 4.3.2 SUGGESTED AMENDMENTS

Oaklands College and Taylor Wimpey seek the Council's agreement to adjust its housing trajectory to show housing delivery on Site B4 from 2026/27 onwards [approx. 100 units per year]. This amendment can be included as a 'modification' to be considered by an Inspector in the lead up to the Publication Draft Local Plan being Examined in Public.

## 224 - Redington Capital Limited & CALA Homes

Submission Number: 224 Submission Date: 07/11/24 18:39

Respondent: Company/Organisation: Stantec UK Ltd Name: Mr Justin Kenworthy

On Behalf Of Company/Organisation: Redington Capital Limited & CALA Homes Name:

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

*All appendices, tables and figures referenced in the representation can be viewed in the attached file.*

Redington Capital Limited and CALA Homes **object** to:

- The current dwellings per annum target (885 dwellings per annum) as set out in paragraph 3.8, Strategic Policies SP3 (and SP1) and Table 3.2 of the Regulation 19 Publication Draft Local Plan; and
- The speed at which the Council is progressing with its plan-making process simply to avoid the potential increase in its annual housing target which would be applied once the new Standard Methodology is adopted (plus the transition period). By progressing the draft local plan through the process so quickly, the Council is:
- Opening up opportunities for 'risk' which could result in the plan being made unsound and/or being the subject of a judicially review; and
- Wasting the Council's money and resources (and the tax payer's money) on having to undertake an early review of the Draft Local Plan to reflect the new Standard Methodology when it is adopted, delaying much needed housing delivery.

It would be far more sensible and more cost efficient for the Council to wait for the new Standard Methodology (and changes to the NPPF) to be adopted and then adjust the Draft Publication Local Plan to reflect the new annual housing targets figure and have a second Regulation 19 consultation

In addition, for the reasons explained above and in Sections 3 and 4 of these representations, Redington Capital Limited and CALA Homes continue to **object** to the development strategy that has result in the following:

- Table 3.1 (Board Locations) and Table 3.2 (Housing Trajectory);

- Policies SP3 (Land and the Green Belt), LG1 (Broad Locations), LG2 (Transformation of Hemel Hempstead), LG3 (Hemel Hempstead), Policy LG4 (Large, Medium and Small Sites); and
- Paragraph 3.8, Paragraphs 3.20 to 3.21 (Categorisation of Sites), Paragraphs 3.25 to 3.27 (Housing Trajectory), Paragraphs 3.28 to 3.53 (Broad Locations), Paragraphs 3.54 to 3.55 (Large, Medium and Small Sites).

Finally, Redington Capital Limited and CALA Homes **object** to the way Policy LG5 (Green Belt) has been written with 'plan-making' in mind. Policy LG5 should include direct reference to the guidance contained within the paragraph 1.52 of the NPPF for 'decision -making', including reference to development being allowed in the Green Belt when 'Very Special Circumstances' can be demonstrated, rather than adding this as a secondary text in paragraph 3.59.

### 4.3.2 HOUSING TRAJECTORY

For the reasons set out in Section 4 above, Redington Capital Limited and CALA Homes **objects** to the housing trajectory (Table 3.2, page 28) prepared in support of the Regulation 19 Publication Draft Local Plan.

### 4.1.2 UNDELIVERABLE SITES IDENTIFIED

The Council's housing strategy heavily relies on the delivery of 5,500 homes on the eastern edge of Hemel Hempstead (Broad Location sites H1, H2 and H4) to cater for the demand for new homes of the district between 2031/32 and 2040/41.

Even if these homes can be delivered within the lifetime of the plan, in reality, the homes that will be constructed on the eastern edge of Hemel Hempstead will in fact be occupied by residents within Dacorum. As such, the new homes to be constructed on Site Allocations H1, H2 and H4 are highly unlikely to help to meet the housing needs of the district which has now reached a critical level.

Notwithstanding this point, there are legitimate question marks over the deliverability of these sites and some of the other site allocations included in Part B (Site Allocations). This is discussed in greater detail on Section 5 below. Additional broad location sites should be identified to replace these undeliverable sites.

The Joint Delivery Statement submitted to the Council in February 2018 and in March 2021 (see **Appendix 5**) explains that the landowners of the Land South of Chiswell Green Lane have a common interest in bringing forward for development and they will continue to co-ordinate in the delivery of the wider site and promote its identification as an allocation in the emerging Local Plan.

Redington Capital Limited and CALA Homes also wrote to the Council on 8th March 2021 (see **Appendix 6**) to explain that the Site is immediately available for development. This letter was supported

by several documents, including a HELAA 'Call for Sites 2021 Site Identification Form' which explained that their Site is available for delivery within the 1-5 years category.

Redington Capital Limited and CALA Homes note that the Council's Committee Report (see **Appendix 2**) prepared by the Council in relation to their outline planning application (ref: 5/2022/0927) explains that "...*there is no reason to think that the Appeal Site cannot come forward immediately thereby significantly boost local housing supply*". Accordingly, the officer gave 'very substantial weight' to the delivery of market sale and affordable housing, and 'substantial weight' to the delivery of self-build plots on the basis that they would make a clear contribution to Council's shortfall in supply within the next five years.

It is clear that the Chiswell Green Lane site to be 'available', it is free from constraint with development being 'achievable' and 'deliverable' (at the density proposed within less than 5-years) and is sustainably located close to existing facilities and infrastructure within the settlement of Chiswell Green and in close proximity to other facilities in St Albans City.

### 4.1.3 NEED EARLY HOUSING DELIVERY SITES

The Council's housing trajectory (Table 3.2) assumes a 'stepped delivery approach'. This will result in:

- A significantly reduced amount of housing delivery in the first five-years (only 2,425), as demonstrated in Table 3.2 of the Regulation 19 Publication Draft Local Plan; and
- An overall shortfall of homes within the first 5-years (2,885 shortfall) compared to the annual housing requirement of 5,310 (4,425 + 20% buffer).

Consequently, Redington Capital Limited and CALA Homes **object** to the Council's stepped delivery approach particularly when:

- There is no sound justification to demonstrate this stepped trajectory is necessary to meet the test set out in paragraph 68-021 of the PPG; and
- The Council has persistently underdelivered on its housing needs since 2012/13, as illustrated in Figure 1 [see attachment].
- Figure 1 confirms that the Council has only met or exceeded its housing target 8 times since 1994/95.

  The Council must not let its chronic and persistent shortfall situation be exacerbated any further over the first five years of the local plan. It must aim to exceed its 5-year requirement (plus 20% buffer) in accordance with the NPPF and the Government's Housing Delivery Test requirements. In order to do this the Council must identify more deliverable broad location sites for delivery in the earlier years of its trajectory.

### 4.1.4 NEED MORE HOUSING SITES TO DELIVER AFFORDABLE HOUSING

Paragraph 63 of the NPPF explains the need for different types, sizes and tenures of housing, specifically in respect of affordable housing where a need for it is established.

The Council has published various committee reports[2] which explain that there is "...*a clear and pressing need for affordable housing within the District*". Crucially, in addition to the above, a recent 2021 planning appeal at Roundhouse Farm (paragraph 54) reports a "...*persistent under delivery of Affordable Housing*" in St Albans and the Inspector attaches "*very substantial weight*" to the provision of affordable housing in the district. In another 2021 planning appeal decision at the Old Electricity Works in St Albans (paragraph 23) the district is referred to as an area of "*affordable housing stress.*"

The Council's Annual Monitoring Report (AMR, 2022) explains at paragraph 3.22 that 71 affordable dwellings were completed in the district in 2021/22. Paragraph 3.23 of the AMR explains that a total of 395 affordable dwellings have been granted planning permission and are yet to be completed. Given the size of the affordable housing shortfall (-4000 affordable dwellings) in the district, recent completions

(71 homes) and future completions (395 homes[3]) from historic decisions will not materially alter the 'affordable housing stress' position in the district.

In terms of future supply figures, Redington Capital Limited and CALA Homes note that unless significant additional affordable housing supply sources are identified in the 2022/23 to 2026/27 five-year period a shortfall of 8,641 affordable homes will accrue in the district [this increases further to 10,254 across the district if existing shortfalls in unmet affordable housing need are

assumed to be addressed over a 5-year period as opposed to over 16 to 23 years (as in the LHNA and SHMA, respectively)]. Looking at the housing trajectory (Table 3.2) no new site allocations are expected within this 5-year period meaning that the above shortfall remains the same.

Chapter 4 of the Regulation 19 Publication Draft Local Plan does not explain how the existing affordable housing shortfall and its future affordable housing needs will be adequately met during the plan period.

In the context of the Council's consistent failure to deliver sufficient affordable housing to meet its own housing needs, combined with the significant shortfalls that will continue to accumulate against the planned affordable housing supply (as explained above) and given the overall housing land supply shortfall (currently at around 2 years), Redington Capital Limited and CALA Homes do not consider the affordable housing needs of the district will be met using the current housing delivery strategy / trajectory during the plan period. The Council, therefore, needs to identify more sites that will:

1. Deliver more affordable homes in the district to meet the demand generated by its existing backlog and future need; and
2. Actually deliver affordable homes.

In terms of the first point, if the affordable housing backlog and future needs is estimated to be between 8,641 and 10,254 homes at the point at which the Local Plan is adopted (in 2026/27), the following affordable housing delivery scenarios are likely to occur using the current trajectory (Table 3.2):

- 765 affordable homes over the first 5-year period (2026/27 to 2030/31), assuming 40% delivery from the site allocations + windfall (40% delivery) – see Figure 2 below. This leaves a shortfall of between 7,876 to 9,489 affordable homes;
- 5,101 affordable homes over the plan period, assuming 40% delivery from the site allocations + windfall – see Figure 2 below. This leaves a shortfall of between 3,540 and 5,153 affordable homes;

This is not enough affordable housing delivery in the first 5-years and over the plan period, thereby requiring more sites that can deliver affordable housing to be identified.

In terms of the second point (actually delivering affordable homes), Redington Capital Limited and CALA Homes note that the Council has taken a global figure of housing delivery and assumed that 40% of this figure will be attributed to affordable housing. This is the wrong assumption to make for the following reasons:

- A large number of the small sites assumed in the housing delivery trajectory are unlikely to be delivered (or at the capacity assumed), as demonstrated in Section 5 below;
- Even if these small sites are deliverable, they are highly unlikely to deliver any on-site affordable homes (or make any meaningful financial contribution towards affordable housing); and
- Not every broad location site will be able to deliver 40% for financial viability reasons.

Therefore, the Council must adjust its housing delivery strategy to find more reliable and deliverable sources of affordable housing in the district which adequately deals with its backlog as well as its future needs.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

#### 4.3.1.1 SUGGESTED AMENDMENTS

Redington Capital Limited and CALA Homes recommends that the Council:

- Seriously considers delaying the plan-making process in order to capture the standard methodology changes (potentially setting a higher / alternative housing target for new homes per annum) to meet it's own local housing needs and possibly help meet the unmet housing needs of other areas; or
- Abandons its stepped housing delivery approach and prepares a housing delivery programme that secures the minimum 885 homes per annum from the first five-years and onwards.

[The Council should allocate other new housing sites around the settlements contained within the district, including Redington Capital Limited and CALA Homes site at Land south of Chiswell Green Lane which is available and deliverable now and can increase the amount of housing delivery in the first 5-years (post adoption). Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified as a new housing allocation in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP]

#### 4.3.2.1 SUGGESTED AMENDMENTS

Redington Capital Limited and CALA Homes recommends that the Council:

- Adjusts its housing trajectory so as to meet or exceed its first 5-year requirement (plus buffer) in accordance with the NPPF and Housing Delivery Test requirements.
- Must identify more broad location sites for delivery in the earlier years of the trajectory. These broad location sites must be located in areas that benefit from better access to transport services and other services (such as Land south of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and other services.

Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified by the Council as a new broad location site (for 391 homes and new school) in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP.

#### 4.1.3.1 SUGGESTED AMENDMENTS

Redington Capital Limited and CALA Homes recommends that the Council:

- Adjusts its housing trajectory so as to meet or exceed its first 5-year requirement (plus buffer) in accordance with the NPPF and the Government's Housing Delivery Test requirements.
- Must identify more deliverable housing delivery sites in Table 3.1, Policy LG1 (or LG4) and Part B of the Draft Local Plan for delivery in the earlier years of the trajectory. The new broad location sites must be able to be delivered immediately in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and other services.

#### 4.1.4.1 SUGGESTED AMENDMENTS

Redington Capital Limited and CALA Homes recommends that the Council:

- Acknowledges the affordable housing stress situation in the supporting text relating to Chapter 4, particularly the chronic shortfall in affordable housing delivery in the district.
- Include more housing sites that can immediately deliver 40% affordable homes in areas that benefit from better access to transport services and other services (such as Land South of Chiswell Green Lane), rather than sites located on the edge of 'higher tier settlements' that benefit from far less access to transport and other services.

Land South of Chiswell Green Lane, as identified as site reference STS-10-21 in Annex 15 of the Council's HELAA and site reference CG-561 in the Draft Strategic Site Selection Evaluation, should be identified by the Council as a new broad location site (for 391 homes and new school) in the Draft Local Plan. This can be achieved via a 'minor modifications to the Local Plan' during 2025 in the lead up EIP. Redington Capital Limited and CALA Homes have already committed to delivering 40% affordable housing on this Site.

3.49 The HGC Green Loop is a strategic figure-of-8 cycle and walking route offering connections between places and key locations within Hemel Hempstead and beyond. The loop will be formed by making new routes and enhancing and integrating existing 33 routes such as the Quietway, Grand Union canal towpath, country lanes and Public Rights of Way. Projects include significant improvements to the greenways, health and play on the way routes, new parks and a variety of play areas, sport and leisure facilities and community food growing. There are synergies with many of the projects outlined in the Health and Wellbeing Strategy and wider projects, which can be found in the Infrastructure Delivery Plans (IDPs).

**Comment** This Green Loop is for walkers and cyclists and so discriminates against equestrians. As a minimum the Green Loop should be a bridleway to allow a wider range of user which includes links to existing rights of way. This is reinforced by the statement on **Page 36**– Pillar 1 Green Network h) Enhance and improve Public Rights of Way including to existing local footpath links and wider countryside access;

1. Draft St Albans Local Plan 2041_[R].pdf

## 250 - Mr Laurence Pilgrim

Submission Number: 250 Submission Date: 07/11/24 22:23

Respondent: Company/Organisation: Name: Mr Laurence Pilgrim

Comment Number: 2

### Type:

* Paragraph

### Number:

Chapter 3

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

The plan places a large element of the housing on the edge of Leverstock Green/Hemel Hempstead as opposed to on the edge of St Albans. This means in reality Hemel Hempstead will have to provide the services to the people in the area, yet St Albans will be getting the council tax.

This placement of hosuing also provides all of the disruption and traffic of the new housing on Leverstock Green and Hemel Hempstead and not St Albans. A nice result for St Albans but not Dacorum.

There is already a signifcant amount of traffic and resultant air polution in the areas proposed around Leverstock Green, this proposal will only increase this and increase the noise polution.

The proposed hosuing is not near any railway stations so is not appropriate for London commuters. Transport across Hemel and St Albans to stations takes too long during rush hours.

The plan continues to put the large elements of housing development on the edge of the St Albans district rather that closer in near the transport hubs and services already existant in St Albans. It also is moving the problems away from St Albans and putting them on neighbouring boroughs, this not not sound or cooporative.

### If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?

**268 - St Michael Parish Council**

Submission Number: 268 Submission Date: 08/11/24 09:05

Respondent: Company/Organisation: St Michael Parish Council Name: Julia Reading

On Behalf Of Company/Organisation: St Michael Parish Council Name:

Comment Number: 2

**Type:**

* Policy

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Please note that the following comments represent a consensus of individual opinions among the St Michael Parish Councillors, and are offered subject to retrospective formal approval at the Parish Council's next meeting, scheduled for January 2025.

Without detailed technical knowledge it is difficult for the Parish Council to decide, within the confines of the Regulation 19 consultation requirements, whether on balance to endorse or censure the draft Local Plan. It must also be stated that there is a real dilemma in the potential outcomes offered between hurrying through a flawed plan as it stands and the threat of further inflated housing quotas being imposed by central government if the plan is rejected.

We do find some positive, but mainly negative, aspects of the draft Local Plan. Primarily there is a lack of thoroughness and transparency around the methodology for Green Belt release and the lack of planning and thought for road infrastructure to support an even bigger population in the district.

What is clear is that preservation of Green Belt status now carries very little weight in determining planning considerations. We accept that St Albans City and District Council (SADC) has lamentably had some of its local decisions, i.e. of refusal on Green Belt grounds, overturned on appeal. There is however an intention in the draft Local Plan, in defiance of the National Planning Policy

Framework, to sacrifice Green Belt areas to meet quotas without either an Agricultural Land Classification or any demonstration that all other site options have been properly considered and found to be unsuitable for housing development.

We also remain deeply concerned about the validity of the transport modelling which is predicated on a population (existing and incoming) voluntarily undertaking vastly increased numbers of trips by public transport services and via pedestrian and cycle routes. While this may be a desirable scenario, we do not see any solid evidence and analysis of projected demographic behaviour and consumers' appetite for change. The plan relies too heavily on existing transport infrastructure, without demonstrable improvements in quality or capacity to cope with increased population numbers, even in the short term, let alone the demographics leading up to 2041, all on top of what are already congested thoroughfares throughout the district. No new cycle routes to connect the sites on the A1081 have been approved and we find this to be a great oversight in the evidence base.

The Parish Council is indebted to Redbourn Parish Council which has shared some of its technical knowledge with us in order for us to make a more informed submission.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Spatial Extent of Green Belt**

The approach taken by SADC in relation to the overall justification for the review and proposed release of Green Belt land to provide the necessary new homes, employment and critical infrastructure for the district is supported by TCE, and it is considered that the exceptional circumstances required to release Green Belt land are justified.

The Policies Map and Part B of the Local Plan sets out the allocated sites and defines the associated Green Belt boundaries to be redrawn as a result of the sites' allocation for development.

We support the rolling of the Green Belt boundary westwards to the M1 as a defensible boundary for EHH. However, we note that whilst the M1 forms a common eastern extent of all three of the draft EHH site allocations, it is not proposed by the Council as a consistent and common boundary for a new Green Belt over the same area.

We question the justification for the inconsistent approach to Council's selection of a new Green Belt boundary in this location, noting the inconsistencies in the Green Belt assessment in this respect, and particularly in respect of the decision to use the overhead electricity pylons as a new defensible GB boundary within the H2 allocation rather than either well established field boundaries or indeed, the M1 as for the remainder of the allocations.

NPPF Paragraph 142 expresses that "*The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence."*Supporting this is NPPF Paragraph 146 which states that boundaries for Green Belt should be defined "*using physical features that are readily recognisable and likely to be permanent."*

We understand the recommendation to use the overhead pylons as the Green Belt boundary was first presented in the *Green Belt Review Sites and Boundaries Study (February 2014)* which was produced by SKM on behalf of SADC. Paragraph 3.5.3 of the Study states "*The rationale for this is that the overhead lines are likely to restrict development further east."*

We make two points in this respect; first that pylons are not considered to be permanent features as they can be rationalised and removed or placed underground, and second, that the

presence of an overhead line is visually permeable and therefore does not generally affect the openness of the landscape.

We consider that other physical features - such as the level of vegetation cover, hedgerows or built form – are more of an indication of the openness of a landscape. In respect of EHH, considering how physical features appear on site, rather than on plan, confirms how field boundaries and roads (in this case the M1 motorway) are more permanent, legible, and robust boundaries which successfully take account of landscape character.

This matter was first raised in TCE representations to the previous local plan in 2018, where the same approach to GB release was proposed by the Council. A report produced by SLR on behalf of TCE in October 2018 (and which was submitted as part of the previous SADC Local Plan's Regulation 19 consultation in that year) provided a critique of the Council's 2014 *Green Belt Study,* noting that the "*electricity pylon corridor does not represent a strong and permanent boundary."*[para 3.16]. The conclusions of this report remain valid, including the recommendation that the M1 is used as a strong and appropriate Green Belt boundary due to its permanency, clear alignment and boundary presence that would clearly define the edge of East Hemel Hempstead.

Paragraph 143 of the NPPF remains unchanged since 2018, in respect of defining one of the five Green Belt purposes as "*to prevent neighbouring towns merging into one another".* We acknowledge that protecting the separation between settlements (in this case, the north-eastern edge of Hemel Hempstead and the southern edge of Redbourn east of the M1) is a legitimate purpose of the defined Green Belt boundary in this location. This is reinforced in the *North Hemel Landscape Study* [September 2024] which comments that that *"Restricting development to west of the pylons* ***and/or*** *setting houses back from Hemel Hempstead Road would assist in maintaining a sense of separation between Hemel Hempstead and Redbourn as experienced along the road."*(our emphasis)

The evidence base document, *Broad Locations – Landscape + Visual Appraisal* (page 11) makes a notable distinction between site allocations H1 and H2 in respect of the use of the overhead pylons as a defining feature for GB purposes, stating that for H1 (HH North): "*The existing pylon line easement provides a logical limit to the extent of built development eastwards, helping to maintain the open gap between Hemel Hempstead and Redbourn to the east*", whereas for H2 (East Hemel Hempstead (North), it is *…"****the M1 corridor that provides a logical limit to the extension of development eastwards."***(page 18, our emphasis).

The *Broad Locations – Landscape + Visual Appraisal* also recognises the potential impact of overhead pylons as a dominant feature in the landscape, suggesting that one should *"Consider how development* ***addresses pylon easements*** *and no-build areas, in line with National Grid Guidelines … setting clear design objectives such as* ***to break down the linearity*** *of the transmissions route into inter-related places rather than treating the route as one continuous strip…" (Page 6).* Having a Green Belt edge which mirrors the straight alignment of the pylons (on the ground and in the air) reinforces a contrived straight development edge which does not sensitively respond to topographical or landscape features or character. It draws attention to the linear overhead pylon lines, contradicting best practice design guidance and disregarding more suitable opportunities for defining and establishing a permanent Green Belt boundary on the ground.

On this basis, although the overarching approach to releasing Green Belt land to support the Local Plan allocations is fully supported by TCE, we object to the extent of the H2, East Hemel Hempstead (North) allocation proposed to remain within the Metropolitan Green Belt as currently shown on the Policies Map. This also applies to H4 as the Green Belt boundary follows the M1 except for in the south-east corner of the site. Instead, it is suggested that the Green Belt boundary is adjusted to follow the M1 along the entirety of the H2-H4 allocations.

It is important to note that should our representations be supported by the Council through Modification or by an independent Inspector at Examination, this would not mean that the need or desire to provide open green infrastructure as part of the development proposed within site H2 is diminished in any way. The draft Local Plan Policy, Concept Plan and Framework Plan evidence

base for the HGC Growth Areas requires the provision of a Country Park, sports hub and SANG in the eastern part of H2 as part of the creation of a new landscaped edge to Hemel Hempstead; this design requirement would not be altered simply by the removal of the land from the Green Belt and TCE would be happy to agree policy restrictions to agree an appropriate eastern extent of built development in this part of the allocated site if needed.

Further, it should be noted that given the NPPF requirement to periodically review Green Belt boundaries as part of local plan reviews in order to accommodate development needs, the designation of land as SANG which comes with a requirement for its designation 'in perpetuity' has arguably more permanence, and thus might be seen as a preferable alternative policy and practical tool to ensure openness and a green setting ensuring separation of settlements over the long term.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

On this basis, although the overarching approach to releasing Green Belt land to support the Local Plan allocations is fully supported by TCE, we object to the extent of the H2, East Hemel Hempstead (North) allocation proposed to remain within the Metropolitan Green Belt as currently shown on the Policies Map. This also applies to H4 as the Green Belt boundary follows the M1 except for in the south-east corner of the site. Instead, it is suggested that the Green Belt boundary is adjusted to follow the M1 along the entirety of the H2-H4 allocations.

It is important to note that should our representations be supported by the Council through Modification or by an independent Inspector at Examination, this would not mean that the need or desire to provide open green infrastructure as part of the development proposed within site H2 is diminished in any way. The draft Local Plan Policy, Concept Plan and Framework Plan evidence base for the HGC Growth Areas requires the provision of a Country Park, sports hub and SANG in the eastern part of H2 as part of the creation of a new landscaped edge to Hemel Hempstead; this design requirement would not be altered simply by the removal of the land from the Green Belt and TCE would be happy to agree policy restrictions to agree an appropriate eastern extent of built development in this part of the allocated site if needed.

Further, it should be noted that given the NPPF requirement to periodically review Green Belt boundaries as part of local plan reviews in order to accommodate development needs, the designation of land as SANG which comes with a requirement for its designation 'in perpetuity' has arguably more permanence, and thus might be seen as a preferable alternative policy and practical tool to ensure openness and a green setting ensuring separation of settlements over the long term.

1. TCE Reg 19 Reps SADC 07_11_24 FOR ISSUE_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

The Crown Estate (TCE) is the landowner in respect of three of the four SADC Broad Allocation allocations within the Hemel Garden Communities programme area, namely H2 East Hemel Hempstead (North), H3 East Hemel Hempstead (Central) and H4 East Hemel Hempstead (South). TCE has made a significant commitment to supporting the work of HGC since its designation in 2019 and continues to work positively with both HGC and the planning authority of St Albans in order to progress emerging development proposals in line with the draft allocations. As landowner and promoter of these strategic site allocations we wish to participate fully in the Examination.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

Comment Number: 2

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**2 Vision and Local Plan objectives**

2.1 The Vision for St Albans remains the same as it was drafted for the Regulation 18 version of the Local Plan. This simply seeks to achieve “A thriving, inclusive and sustainable community which is a great place to live and work and has a vibrant economy”. This has consistently aligned with the Vision set out in the Council’s Corporate Strategy, and, whilst unobjectionable, it is likely to mean different things to different people in the District.

2.2 The Vision can only be properly understood by reviewing the supporting Local Plan objectives, which are grouped around six themes which are similarly aligned to the Corporate Strategy priorities. Its sub-sections also reflect the extent of strategic policies required by §20 of the NPPF. The Local Plan objectives remain unchanged for the most part, save for minor alterations to wording. For this reason, Hallam and St Albans School continue to support:

- the adaptation for and mitigation of climate change and reduction of greenhouse gas emissions;
- the efficient and best use of land;
- the provision of a sufficient amount of good quality housing which meets the needs of all sections of society in sustainable locations;
- making provision for accessible community infrastructure in sustainable locations;
- encouraging the use of active and sustainable means of transport and reduce the need for people to travel;
- protecting and conserving the natural and historic environments; and
- achieving high-quality, inclusive, active and distinctive places and sustainable communities.

2.3 These objectives give rise to a number of important considerations for the Plan’s spatial strategy and the proposals that flow from this.

2.4 As the consultation document acknowledges, meeting future development needs cannot be achieved simply on previously developed land. In fact, meeting those needs at accessible locations which enable active travel and promote a reduction in private care use and carbon emissions affords an importance to new development being located adjacent to the District’s main settlement.

2.5 Greenfield development is therefore an entirely legitimate proposition. As is evident from the Sustainability Appraisal, this necessitates and justifies the Green Belt being amended.

2.6 In turn, this requires a positive approach to plan-making and the allocation of land for development

as is proposed in the form of Broad Locations. This, and in particular the proposed allocation at North St Albans, is welcomed by Hallam and St Albans School.

2.7 Moreover, several of the development management policies contribute towards placemaking and environmental enhancements.

2.8 Taken together, the policies and proposals contribute to the objectives that underpin the Vision.

2. **Plan Period**

2.1 The Draft Local Plan proposes a plan period of 2024/25 to 2040/41; however, it provides no justification for why this plan period has been selected. As we set out below SACDC has selected the very minimum plan period based on its current Local Development Scheme (Sep 2024) which does not appear to be adequate time to allow for the planning application and development process to take place as set out in the Local Plan's Housing Trajectory (Table 3.2 below).

2.2 The National Planning Policy Framework (NPPF) requires a minimum 15-year period from the adoption of the Local Plan. SACDC's LDS indicates a Local Plan adoption date of March 2026 so the minimum Local Plan period would end in March 2041. The proposed Draft Local Plan period would only be within the NPPF plan period requirement if it were indeed adopted by March 2026 which is a very narrow margin and assumes the Local Plan process (including examination) will stick to schedule with no margin for error. This is particularly relevant and concerning, as the Council admits in paragraph 3.5 of the Local Development Scheme that some aspects of the timetable are not within the control of the Council. Any delay in the adoption of the Local Plan would entail failure to comply with the 15-year rule of paragraph 22 NPPF.

*Figure 2.1: Local Plan programme until adoption (Local Development Scheme, September 2024)*

2.3 However, this assumes that the requirement for policies to be set within a vision that looks ahead at least 30 years imposed by paragraph 22 of the NPPF would not be required. The NPPF states:

*"Strategic policies should look ahead over a minimum 15 year period from adoption, to anticipate and respond to long-term requirements and opportunities, such as those arising from major improvements in infrastructure. Where larger scale developments such as new settlements or significant extensions to existing villages and towns form part of the strategy for the area, policies should be set within a vision that looks further ahead (at least 30 years), to take into account the likely timescale for delivery."*

2.4 There are clearly a number of options in the Draft Local Plan that do propose 'larger scale developments'. In this case, Local Plan policies should look further ahead and at least 30 years to account for the likely delivery time required for delivering strategic development. One need to look no further than the proposals at the 'Hemel Garden Communities' which, despite SACDC's optimistic development start dates and delivery rates, requires 750 dwellings to be delivered beyond the proposed plan period. In order to be effective and consistent with the NPPF, the Local Plan must extend its plan period to include the full development it is proposing.

2.5 Therefore, the plan and its policies clearly need to develop a vision which covers at least 30 years from the point of Local Plan adoption. If one assumes that the Local Plan adoption date is in 2025/26 then the policies and vision will need to extend to at least 2055/2056.

2.6 MHCLG introduced this change to the NPPF in response to the Building Better Building Beautiful Commission recommendations to clarify that councils need to take into account the likely timescale for delivery of larger scale developments which take considerable time to plan and deliver.

2.7 The proposed Draft Local Plan Housing Trajectory identifies broad locations for growth to be delivered from year 6 since the adoption of the Local Plan, until year 15 of the Local Plan. The trajectory also expects some smaller and specific sites to be delivered within the first 5-year period since the adoption of the Local Plan. However, the Local Plan only expects specific sites allocated in the Local Plan to be delivered in years 4 and 5. The expectation, according to the submitted trajectory, is that 482 new dwellings will be delivered in year 4 and 778 on year 5.

*Figure 2.2: Table 3.2 (Draft Local Plan Housing Trajectory)*

2.8 Whilst the Housing Trajectory suggests compliance with paragraph 69 of the NPPF with regards to broad locations between years 6-15, it fails to demonstrate specific, deliverable sites for the first 5 years since the intended date of adoption of the Local Plan.

2.9 We provide a detailed analysis and critique of the Housing Trajectory in relation to the Hemel Garden Communities covered under Policy LG2 (Support for Transformation of Hemel Hempstead).

...

## 6. Spatial Strategy

### Policy SP1 (A Spatial Strategy for St Albans District)

...

6.5 Policy SP1 states that "growth will be located to make the most sustainable use of land in urban areas and then the Green Belt" and that "the approach seeks to develop Brownfield Land first".

..... it is apparent from the Draft Local Plan Housing Trajectory (Table 3.2) that 'Hemel Garden Communities' (Green Belt location), 'Medium and Small Sites' (599 homes), are assumed to start delivery in 2029/2030 the same year that 'Sites Within Urban Settlements' (HELAA and UCS) and 'Green Belt – Previously Developed Land'. Furthermore, the contribution of dwellings through allocations in previously developed land is very limited (1,040 homes) when compared to allocations in greenfield sites (9,613 homes), and very brief, with a trajectory between 2-7 years (brownfield sites), instead of 6-12 years (greenfield sites). So, it simply not the case that the Local Plan is planning for development in urban areas and brownfield land first.

6.6 This policy also identifies different thresholds of site allocations, but it does not justify where the type and size of allocations and these thresholds come from and what the definition of broad locations, other broad locations, large, medium and small sites is. A clearer policy wording is required, setting out the spatial strategy and allocation of development per parish/area and settlement, and it should be clearly visualised for the public and future users of the Local Plan to understand the policy without doubt. Any supporting text should include contextual information, such as the definition of settlement tiers and the size of allocations.

...

### Hemel Garden Communities Trajectory

11.5 Policy LG2 states that "*the Hemel Garden Communities programme will deliver at least 4,300 new homes by 2041 and 5,500 homes in total by 2050, delivering this through a network of new garden communities to the north east and east of the town within St Albans District".*

11.6 Paragraph 75 of the NPPF states that: *"Strategic policies should include a trajectory illustrating the expected rate of housing delivery over the plan period, and all plans should consider whether it is appropriate to set out the anticipated rate of development for specific sites".*

11.7 The Draft Local Plan fails to include a housing trajectory for specific sites (including those in the Hemel Garden Communities) so that consultees can comment on the potential timing of housing delivery and the need for supporting infrastructure that needs to be delivered in close coordination for each site. This makes it rather difficult to comment on any delivery assumptions for particular sites when the Council has not considered this even though it has selected the sites as allocations.

11.8 However, the Draft Local Plan does include a high level housing trajectory (Table 3.2) and we have analysed this due to a lack of more detailed information presented by SACDC.

11.9 Furthermore, we seriously question what the Housing Trajectory is not only for the HGC sites in St Albans District but for those in Dacorum – this is not set out in the Local Plan and is clearly a critical missing piece of information for the overall Local Plan.

11.10 As the Lichfields 'From Start to Finish' evidence (Editions 1 -3) and the Letwin Review (2018) highlight, the delays with the delivery of large development proposals should not be underestimated as there will be many aspects of the housing trajectory that are beyond the immediate control of a local planning authority. We provide an analysis of this below.

**Development Lead in Times**

11.11 The trajectory is particularly unrealistic in terms of when it assumes that housing delivery will commence at the Hemel Garden Communities. The first delivery year assumed is 2029/30 with 100 dwellings. This is in four years from now.

11.12 In the recently published *'Start to Finish – How quickly do large-scale housing sites deliver"* 3rd Edition, September 2024 (Lichfields) (see Appendix B of these representations) provides an update on important research on the delivery of strategic sites across England. Its findings are that for sites of 2,000 dwellings or more (like Hemel Garden Communities) that it takes between 4 and 7.9 years from the validation of the first planning application to the first dwelling being delivered (see Table below).

*Figure 11.3: 'Start to Finish – How quickly do large-scale housing sites deliver" 3rd Edition, September 2024 (Lichfields)*

11.13 The Report updates the previous report on the average time taken from gaining outline permission to the completion of the first dwelling on site (see below). This indicates that it takes on average around 3 to 4.6 years from the grant of outline planning permission to deliver the first dwelling. It concludes that at the time of its granting, an outline permission will deliver limited housing in a five-year period.

*Figure 11.4: 'Start to Finish – How quickly do large-scale housing sites deliver"* 3rd Edition, September 2024 (Lichfields)

11.14 As Policy LG2 (Support to Transformation of Hemel Hempstead) states all development in the HGC Programme Area must follow a planned and coordinated approach to growth and infrastructure and is expected to be in accordance with:

- *Local Plan Infrastructure Delivery Plans (IDPs)*
- *Hemel Garden Communities Spatial Vision*
- *HGC Framework Plan evidence base*
- *HGC Concept Plan*
- *HGC Local Plan Policies,*
- *Supporting SPDs and Design Codes.*

11.15 It requires that "Developers and promoters in the HGC Growth Areas must work together and closely with the Councils to secure a collaboration agreement which ensures an integrated and seamless approach across site boundaries. Critical infrastructure necessary to support development must be delivered ahead of occupation. Proposals must not prejudice or impede the provision of wider infrastructure required within the HGC Programme Area. Infrastructure, contributions and wider funding will be required to deliver on and offsite infrastructure, in accordance with the above documents."

11.16 Clearly the HGC is highly complex with many authorities and parties involved in the planning and delivery process. There is also rightly a commitment to working closely with the local communities as part of this process. All of this suggests that the

Lichfields research is very much a 'best case scenario' in relation to the HGC Broad Locations.

11.17 **So, we ask, what is SACDC's assumption about each of the proposed four Broad Locations at Hemel Garden Communities (H1, H2, H3, H4) in terms of the following:**

- When will the Design Codes and SPDs will be prepared and approved?
- When will the pre-application process take place including consultation and engagement with relevant consultees and stakeholders?
- When will the preparatory site works, to be informed by site-specific survey recommendations and monitoring before commencement take place?
- When will an outline application be submitted and approved for each Broad Location?
- When will a full application will be submitted and approved?
- When will reserved matters applications be submitted and approved?
- There is reference in Policy LG3 (Hemel Garden Communities Growth Areas Place Principles) to the potential need to use Compulsory Purchase Orders (CPO) powers to ensure infrastructure is provided in a timely manner. What are the time estimates made for this in the housing trajectory?
- When will the S106 for each parcel is expected to be agreed?
- When will the pre-commencement conditions for each parcel be agreed by SACDC?
- What are SACDC's assumptions for the opening up works required for each of the sites and combined?
- What infrastructure is required to be funded and / or delivered prior to commencement for each of the broad locations?
- What is the planning approval process and timing for each piece of infrastructure?
- When will conditions be discharged?

11.18 SACDC needs to answer these questions so that a realistic housing trajectory can be prepared as the current version will lead to a shortfall in housing in the District over the first five years upon adoption. As a result, the borough will be subject to planning appeals due to a lack of a five-year housing land supply. With the Local Plan still yet to be submitted to the Secretary of State there is still an opportunity for SACDC to allocate additional housing sites to ensure that the shortfall of anticipated delivery is addressed.

*Figure 11.6: Timeline for the delivery of strategic housing sites – Start to Finish Lichfields (2024)*

11.19 The additional and important benefit of this approach is that the SPDs and planning applications at Hemel are not 'rushed through' in hopes that the development will meet unrealistic commencement dates.

11.20 The report concludes that for schemes of 2,000+ dwellings the mean years from validation of the first planning application to the first dwelling being completed is 6.6 years.

11.21 Therefore, considering this research, RPC is concerned with the proposed housing trajectory, as it would not be realistic to rely on the Hemel Garden Communities development (over 4,300 dwellings) would deliver its first homes in year 6 since the adoption of the Local Plan.

*Figure 11.5: Overall lead-in times for sites of 100 dwellings or more, including time taken for outline consent size by size. Source: Lichfields report 'Start to Finish' (2024).*

11.22 Hemel Garden Communities is clearly a cross-boundary joint working project between SACDC, Dacorum, Herts County Council and others. The South West Hertfordshire Joint Strategic Plan is being prepared with Dacorum, Hertsmere, Three River and Watford Councils and there is no agreed timetable for taking this forward (as set out earlier in our representations). This complexity and cross-boundary working is likely to slow the process down even further so the assumptions above should be considered a 'best case' scenario.

**Housing Delivery Rates**

11.23 We also question the delivery rates in the housing trajectory based on the amount of infrastructure required at each phase which still remains unclear. Linked to this is the question about how the funding of infrastructure will work? Are the developers going to forward fund infrastructure costs?

11.24 The housing delivery rates have been updated in the Lichfields report which concludes that the build-out rates for schemes of 2,000 dwellings or more is 100 to 188 dpa using the lower and upper quartiles of their analysis. SACDC's housing trajectory assumes the following delivery rates by year for HGC which are clearly well in excess of what should be considered achievable delivery rates.

- 2029/30: 100
- 2030/31: 175
- 2031/32: 250
- 2032/33: 315
- 2033/34: 340
- 2034/35: 365
- 2035/36: 365
- 2036/37: 440
- 2037/38: 490
- 2038/39: 500
- 2039/40: 495
- 2040/41: 465

11.25 This equates to 4,300 dwellings over twelve years which is an average of 358 dwellings per annum. This takes no account of market or economic changes or the fact that there will be additional competing sites in the neighbouring authorities and settlements all building at the same time flooding the local market. The assumptions are simply unrealistic and are setting SACDC and its communities up for housing shortfall over the of the plan period.

11.26 This demonstrates that the Hemel Garden Communities sites cannot be delivered within the stated plan period of 2041 and would not make any meaningful contribution to the Council's housing needs for many years to come.

11.27 As highlighted, delivery will also rely on cooperation with adjoining authorities and liaison and negotiation with statutory consultees. Even the slightest delay in the start date will result in a slower performance, which is then likely to render the assumed delivery rates unachievable.

11.28 Overall, we consider that the preparation of a realistic housing trajectory is urgently needed, considering a more realistic start date and rate of delivery than the crude assumptions included in the Draft Local Plan.

11.29 The Council's poorly thought-out assumptions regarding housing delivery and an unrealistic housing trajectory result in the Draft Local Plan being currently unjustified and requiring much further evidence looking closely at what could realistically be viably delivered.

...

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Housing Trajectory**

Whilst the Housing Trajectory suggests compliance with paragraph 69 of the NPPF with regards to broad locations between years 6-15, it fails to demonstrate specific, deliverable sites for the first 5 years since the intended date of adoption of the Local Plan.

Overall, we consider that the preparation of a realistic housing trajectory is urgently needed, considering a more realistic start date and rate of delivery than the crude assumptions included in the Draft Local Plan.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. REDBOU~4.pdf
2. APPEND~2.pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

Redbourn Parish Council (RPC) confirms that it wishes to participate in the Local Plan Examination hearing sessions. Given the scale of strategic development proposed at Redbourn and Hemel Hempstead RPC considers it critical that it has the opportunity to provide further input into the Local Plan Examination process including the hearing sessions to elaborate on its representations, respond to other evidence and arguments put forward as part of the hearings and Examination.

**288 - Chris Berry**

Submission Number: 288 Submission Date: 06/11/24 09:00

Respondent: Company/Organisation: CPRE Hertfordshire Name: Chris Berry

Comment Number: 3

**Type:**

* Paragraph

**Number:**

3.1-3.63

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Significant inconsistencies between the District Council Plan 2024-2029 and the Draft Local Plan, particularly with respect to the role of the countryside**

Significant inconsistencies exist between the key priorities for the St Albans and City District Council Plan 2024-2029 (Combat the Climate Emergency; Deliver more social housing; Support our local economy; Enhance the District's cultural offer; Promote equality, inclusion and fairness) and the elaboration of the planning objectives for the Draft Local Plan. In recognising that the Local Plan is the means of facilitating and controlling the physical development implications of the District Council Plan, the lack of consideration of the Green Belt – which is the most significant land use designation in the SACD area - for uses other than development is a major omission in both the Council Plan and the Local Plan.

The Council Plan's identification of the Climate Emergency as a key priority is elaborated initially in objectives in Table 1.2 and subsequently in Chapter 2 Climate Emergency. There is no spatial treatment of the implications of the climate emergency nor any indication of the role of the countryside in the amelioration of climate change effects.

Similarly, Chapter 3 Sustainable Use of Land and Green Belt comprises an incomplete and partial treatment of development policy relating to the Green Belt in terms of environmental and other constraints. The Sustainability Appraisal seeks to identify the factors influencing policy options for the Draft Local Plan and choices regarding future development allocations.

The justifications provided in the Sustainability Appraisal for the selection of policy options relate solely to the provision of housing allocations which bear no relation to achievement of the "social housing" key priority of the Council Plan. Further, there is no substantive assessment of countryside protection nor enhancement, nor of the opportunities offered for appropriate economic development outside the built-up areas as the countryside appears to be regarded simply as a resource for development with no cost nor implication assigned to it in the planning balance.

This leads to an imbalanced treatment of development and planning policy and a lack of policy consistency between the Council Plan and Draft Local Plan in key areas. As another example, the Draft Local Plan fails to consider in policy terms the health and wellbeing benefits of access to the countryside.

**The Draft Local Plan is neither legally compliant nor sound, due to its inadequate treatment of the Green Belt**

The treatment of the Green Belt in the Draft Local Plan is inadequate to the extent that it jeopardises the soundness of the Local Plan. For a Local Planning Authority where over 80% of the total land area is covered by a statutory designation affecting future development, the omission of appropriate policy and proposals renders the Local Plan ineffective.

We note the justification provided by the Sustainability Appraisal for the policy options relating to the classification and allocations of sites and locations for development. However, policies relating to the Green Belt are limited to guidance relating to development outcomes in all cases; omitting any positive treatment of the countryside and associated rural activities which may constrain and influence development form and function.

In failing to address the implications of the five purposes of the Green Belt as they relate to the SACD area, the Council fails to plan adequately for its protection and the contribution that it can make to future development options. Paragraph 180 of the National Planning Policy Framework (NPPF) specifies the need to contribute and enhance the local environment by indicating a range of policy options.

Draft Local Plan policies relate only to development within the Green Belt and not its protection and enhancement as required by the NPPF and noted in the Local Plan Objectives. The Draft Local Plan states that the Spatial Strategy is effectively required to deliver housing figures provided by the Standard Method which in turn requires the use of Green Belt.

This is a fundamental misinterpretation of national Green Belt policy and challenge to the soundness of the Draft Local Plan. The Draft Local Plan refers to legal requirements for housing and employment growth (paragraph 3.11) which ignores the Council's discretion to determine housing targets based on up to date information and national policy guidance, as provided in Paragraph 11b) and footnote 7 of the NPPF.

Paragraph 3.16 of the Draft Local Plan also implies, without evidence, that Green Belt protection inhibits development in sustainable locations. This assertion fails to recognise that development is likely to be more sustainable in urban areas than peripheral locations distant from town centres as proposed for Hemel Hempstead and elsewhere.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Addition of policies and proposals to ensure consistency between the Council Plan and the Draft Local Plan.

The Draft Local Plan should be re-structured to consider the role and function of the largest land use designation in the SACD i.e. the London Metropolitan Green Belt in appropriate detail. The lack of adequate consideration of the implications of this designation for physical development in the future renders the Local Plan unsound.

The total local housing need figure in policies SP1 and SP3 should be treated as a starting point and then be subject to reduction to reflect the application of Green Belt constraints as required by para 11(b) footnote 7 of the NPPF.

2. St Albans LP Reg 19 RF4_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

To address the omission of appropriate treatment of the countryside in the Draft Local Plan and inconsistences with the Council Plan.

To explain our concerns about the lack of appropriate treatment of the Green Belt and the implications for the Draft Local Plan and its inconsistency with national planning policy.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**Re: Representations to the Regulation 19 Consultation on the Draft Local Plan 2041 –Smallford Works, Smallford Lane, St Albans, AL4 0SA**

These representations are submitted on behalf of Smallford Business Park Ltd. (hereafter 'SBP') who own and are promoting land at Smallford Works, Smallford Lane, St Albans, AL4 0SA, in response to the St Albans Draft Local Plan 2041 Regulation 19 Consultation.

Overall, SBP consider that the Plan as drafted is in need of significant change in order to demonstrate soundness under public examination as required by paragraph 35 of the National Planning Policy Framework (2023). This is in the context of the Local Planning Authority accelerating its programme to prepare the Plan which in our view if it is to be found sound under public examination. The programme towards adoption has been accelerated in order to avoid the increased housing requirement arising from proposed changes to national planning policy, and this acceleration comes at the risk of the Plan's soundness. Alongside the Plan's approach to housing strategy, SBP also has concerns around the proposed strategy for meeting employment needs over the Plan period.

These representations follow on from previous submissions made to past consultations, including to the Regulation 18 draft of the Local Plan in September 2023.

**The Site**

Smallford Works is a brownfield site, measuring approximately 3.34 ha (8.25 ac), currently in employment use. It is located to the west of Smallford Lane, three miles east of St Albans City Centre. The North Orbital Road (A414 dual carriageway) is access less than half a mile to the south. Smallford village is located on the other side of Smallford Lane, and extends to the A41.

Built development on the site comprises a complex of industrial uses and storage yards, partitioned and providing a variety of open storage type uses (Use Class B8). This includes the storage of construction materials, plant, portacabins, commercial vehicles, and other related items.

The site is designated within both the Metropolitan Green Belt and the Colney Heath Farmland Landscape Character Area.

The site is designated within the draft Plan as previously developed land within the Green Belt, and has an allocation for residential development, with an indicative capacity of 58 units. It is important to note that this is an unexplained reduction from the 80 unit capacity in the Regulation 18 draft, and appears to ignore previous representations to the Regulation 18 consultation, in which SBP clearly stated their intention to retain the site in its existing employment use with potential to deliver intensified employment development on the site in the future.

**National Planning Policy requirements**

These representations have been prepared in the context of national planning policy and legislation setting out the necessary approach to plan-making and the tests of "soundness." Section 20(5) of the Planning and Compulsory Purchase Act 2004 requires that all development plan documents must be submitted for independent examination to assess whether they are "sound". Further to this, Section 19 of the 2004 Act requires local planning authorities to have regard to various matters, including national policies, such as those set out in the National Planning Policy Framework ("NPPF"), alongside other advice contained in guidance issued by the Secretary of State.

There is no statutory definition of soundness, however paragraph 35 of the NPPF states that to be sound, a Local Plan should be:

- **Positively prepared** – providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development;
- **Justified** – an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence;

- **Effective** – deliverable over the plan period, and based on effective joint working on cross-boundary strategic matters that have been dealt with rather than deferred, as evidenced by the statement of common ground; and
- **Consistent with national policy** – enabling the delivery of sustainable development in accordance with the policies in this Framework and other statements of national planning policy, where relevant.

**Proposed Changes to National Planning Policy**

On 30 July 2024, the new Labour Government published a draft of the revised NPPF. The new draft emphasises, amongst other things, accelerating housing delivery and supporting economic development.

A revised Standard Method, which sets out each Local Planning Authority's (LPA's) housing requirement has been published alongside the draft NPPF. For both clarity, a spreadsheet has been published that sets out the new target alongside the previous one. For St Albans, the requirement has increased from 885 dwellings per annum (dpa) to 1,544 dpa, an uplift of 656 dpa.

Appendix 1 of the draft NPPF sets out the implementation timeline. For the purposes of Plan making, the document will become effective (with all Local Plans subject to both it and the new housing figure) on the Implementation Date: this is precisely one month after the Publication Date of the final version. There are three exceptions:

a) If a Local Plan has been submitted for examination by the Implementation Date;

b) If the Local Plan is at Regulation 19 stage by the Implementation Date, and has a housing requirement no more than 200 dpa fewer of the revised requirement; or

c) Plan is a 'Part 2' document that does not introduce new strategic policies setting the housing requirement.

**On the Regulation 19 consultation process**
**Timeline and Scope**

The current Local Plan for St Albans was adopted in 1994, and the need for a new Plan is significant. The previous timetable for the Plan anticipated a Regulation 19 consultation in October/December 2024, with submission to the Secretary of State three months later in March 2025. This was set out in the Local Development Scheme (LDS) published in February 2024. As recently as the Council's Planning Policy and Climate Committee meeting on 25 June 2024, St Albans were working towards the timetable.

At a meeting of the Planning Policy and Climate Change Committee on 12 September 2024, the Council assessed the likely impact of the draft NPPF on their emerging Plan, and considered three options for their emerging Plan going forwards:

A. Submit for examination before the Implementation Date (housing target 885 dpa);

B. Publish Regulation 19 draft before the Implementation Date (housing target of 1,344 dpa [within 200 of the revised Standard Method figure]); or

C. Restart Plan making process (housing target of 1,544 dpa).

The Council resolved to pursue Option A, which has brought forward both the Regulation 19 consultation by one month, and the submission of the Plan by three to December 2024. The table below compares the LDS from February 2024 with the timeline currently available on the Council's website.

[Please see attachment for Table]

Considering the need for a new Plan, an ambitious timeframe that seeks the earliest possible adoption date is to be welcomed (though we note that the adoption date is unchanged in the revised LDS). However, seeking rapidly to progress the Plan must not come at the cost of its soundness. Such haste risks the Plan being withdrawn from examination, further delaying the ultimate adoption of a much needed and up-to-date Local Plan.

Under the current timeframe, St Albans are planning to submit the Plan within a month of the Regulation 19 consultation ending. St Albans need to review the responses to Regulation 19 carefully, attending to feedback on both soundness and legal compliance. This is essential to ensuring that the Plan as submitted has the best possible chance of being adopted.

In our view, a submission date of December 2024 allows insufficient time to ensure that this process is appropriately carried out.

There are additional concerns around the scope of the consultation being undertaken As set out in legislation, the local authority 'must invite [stakeholders] to make representations to the local planning authority about what a local plan [...] ought to contain'[1]. Generally speaking, council's rarely impose constraints on what consultees can (or ought to) submit. However, guidance issued by St Albans for this consultation states that it is a 'technical exercise', and that 'all representations on the draft Local Plan must related to a matter of legal compliance or a matter of soundness.'

[Footnote 1: Town and Country Planning (Local Planning) (England) Regulations 2012, Section 18(1)(b). Regulation 19 of the statutory instrument make reference S.18(1)(b) in setting out what the Regulation 19 consultation ought to]

In practical terms, the 'test of soundness' (set out in paragraph 35 of the NPPF and described above) is sufficiently broad to allow for a searching assessment of the draft Plan, but it is considered to be an unnesecary constraint that risks preventing stakeholders from providing meaningful comment on the Plan's strategy and approach that, if appropriately considered, could ensure that the Plan is adopted.

In order to ensure that the Regulation 19 process is as effective as possible, helping to developed a robust Plan for submission, St Albans ought to welcome all comments relating to the Plan, and making sure they give themselves enough time to review responses and make changes to the Plan where necessary.

**Differences from Regulation 18 Draft**

The Regulation 18 draft provided for 15,066 dwellings, in contrast to which the Regulation 19 version plans for only 14,603 dwellings. This reduction has been achieved via two changes from the previous drafting:

- The annual target is 885 units, rather than 888 (a reduction of 51 dwelling over the Plan period); and
- 'Year 1' of the Plan covers only six months (October 2024 to March 2041). The requirement for Year 1 is therefore only 443 units (removing an additional 442 dwellings from the housing requirement).

This reduction has been achieved by lowing the indicative capacity of draft housing allocations. There is nothing in the evidence base to suggest that this reduction has been driven by revised sustainability appraisals, nor any other evidence-based site assessments.

**On The Council's approach to the Regulation 19 process**

St Alban's have brought forward the Regulation 19 process, following a meeting of the Planning Policy and Climate Change Committee on 12 September 2024. Faced with a rising housing requirement under emerging national policy, St Albans reviewed options and resolved to advance with the current draft of the Plan at pace instead of being obliged to accommodate increased housing requirements set out in emerging national planning policy.

Beyond this, they have reduced the housing target to the greatest possible degree: taking advantage of the latest Standard Method requirement to lower the housing target by three dwellings a year, and removing six months from beginning of the Plan to remove an additional 442 dwellings.

These reductions have not been driven by a reduction in available sites, nor updated evidence on site capacities. As a strategy, this is neither positively prepared nor is it effective. It is also not consistent with national policy.

Paragraph 128 of the current NPPF states that planning policies should support development that make efficient use of land. As per paragraph 129:

*Where there is an existing or anticipated shortage of land for meeting identified housing needs, it is especially important that planning policies and decisions avoid homes being built at low densities, and ensure that developments make optimal use of the potential of each site.*

St Alban's housing requirement under emerging national policy is set meaningfully to increase, and despite the fact that the Council are not yet beholden to this figure, they are in no position to reduce site capacities in the short term and ought to plan positively and sustainably for future growth. By reducing the capacity of sites subject of draft allocations with capacities previously considered sustainable in the former consultation document, the Plan does not make efficient use of land, and fails to meet a key requirement of national policy.

In order to be considered justified, a Plan needs to advance an appropriate strategy that takes into account the 'reasonable alternatives' Clearly, there is a reasonable alternative (as set out in the previous draft of the Plan) which could allow for the delivery of an additional 463 dwellings over the Plan period without increasing the total quantum of allocated land.

This additional capacity could, if included within the Plan strategy, serve to aid unmet need in other authorities, who will not necessarily be able to avoid increased housing requirements, and may not be able to meet these requirements in full. A set out above, recent revisions to the Plan-making time frame risks delivering a rushed Plan that neither properly considers *inter alia* the needs of the wider area, nor makes appropriate changes prior to submission. In this the Plan is not positively prepared.

For these reasons alone, the Plan cannot be considered sound, and significant revisions are required.

...

**Conclusion**

As set out above, the St Albans' Regulation 19 Draft Local Plan 2041 does not meet the tests of soundness, as set out in the NPPF, for the following reasons:

- **Positively prepared** – the Plan does not state its employment need at all, nor its supply in any detail. It is therefore not possible to establish whether it meets, as a minimum, the area's objectively assessed needs. The Plan also claims to have an oversupply of employment land that can contribute to neighbouring unmet need, but precise figures are not provided, an approach which lacks clarity. Further, a review of the relevant evidence suggests that the Plan's claim that it meets its need is subject to challenge.
- **Justified** – the chosen strategy for employment land delivery is to allocate a single strategic site. This leaves no space for contingency in the event that this site doesn't come forward, and the site itself may not provide enough land to delivery the necessary level of B2/B8 floorspace over the Plan period. Aside from the quantitative need, there are concerns that this site will not meet the qualitative requirements of the area, which is characterised by micro, small, and medium sized business. The allocation also resists logistics development, which throws into further doubt the Plan's ability to meet anticipated needs.

- **Effective** – the Plan seemingly puts forward no timelines for site deliveries, and it is therefore unclear whether or not the needs of the area can be met over the course of the Plan, this is particularly pertinent for employment need, which is principally tied to a single strategic allocation.
- **Consistent with national policy** – key requirements of national planning policy, such as the need to make effective use of land, are not met by the Plan's strategy, which has systematically reduced the capacity of a large number of residential allocations for reasons that appear to have little to do with the site's themselves. Rather, it appears that this has been driven by the desire to reduce the housing requirement (and consequently the supply) as much as possible.

Beyond concerns with the Plan's broad strategy, the details of the allocation at Smallford Works does not meet the test of soundness either:

- **Positively prepared** – the site will not be providing housing on the site. This reduces the Plan's overall housing supply figure, risking its ability to meet, as a minimum, its objectively assessed need for residential development. The Plan and its evidence base also seems to ignore the fact that delivering employment on the site would reduce the stock of employment land within St Albans, which would need to be addressed through appropriate allocation of replacement land. For reasons stated above, the allocation at Hemel Hempstead (Central) may be both quantitatively and qualitatively unable to accommodate this;
- **Justified** – the allocated use is inconsistent with representations previously submitted, clearly stating the site is being promoted for employment use and not residential development. In this, the Plan fails to account for clearly stated evidence regarding the site allocation;
- **Effective** – whilst allocating the site for development is wholly supported, a far more appropriate strategy for redeveloping the site would be to identify it for intensifying employment development consider its current status as an employment site in active use;
- **Consistent with national policy** – the principle of the site's allocation is consistent with relevant national policy, but the details are not: the proposed loss of employment floorspace without appropriate replacement, and the inefficient reduction of the site's developable capacity do not accord with central tenants of national planning policy.

Evidently, the Plan requires significant alteration if it is to be found sound under examination, and this should include:

- A clearly stated employment land requirement;
- Clearly identify employment land supply (including the indicative hectarage of all proposed employment uses set against their requirements);
- Clear timeframes for site delivery;
- A greater range of employment sites in order to provide *inter* alia flexibility and contingency;
- Greater efficiency in the use of allocated land in order to ensure that this tenet of national planning policy is met; and
- Alteration site allocation P3 (Smallford Works) to identify the site for intensifying employment development.

Making these changes are necessary if the Plan is to be considered sound, and capable of progression through examination to formal adoption.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

[Please see attachment for full submission]

**Number:**

3.1 and 3.2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Table 3.1 Broad Locations**

An objection is made to Broad Location B8 Harper Lane, Radlett, which is proposed for 274 dwellings as part of a mixed-use development.

**Broad Location B8 Harper Lane, near Radlett**

Paragraph 5.4.146 considers the Broad Location B8 North of Radlett – it is noted that the appraisal concludes from a transport perspective that:

***"the site does not relate very well to the edge of Radlett, and the nearest primary school would be some way distant, but Radlett Station (with a good service to London St. Pancras) would be ~ 2km distant. There is already a good footpath. footpath along Watling Street into Radlett, and there is an opportunity to enhance this as a cycle route; however, the issue is that access to Watling Street would be at the northern extent of the site (via Harper Lane), which is the part of the site most distant from Radlett."***

Paragraph 9.2.3 states

"**At Harper Lane there is a need to closely consider school capacity, as discussed in Section 5, but otherwise the site benefits from reasonable accessibility to Radlett, where there is a very good offer."**

It is not clear why Broad Location B8 has been proposed over and above Land at Harper Green, particularly given all the evidence supplied to the Council in respect of promoting a scheme at Harper Green. It is noted that the SA under the Transport heading on page 47 previously referred to concerns being raised about safety at the adjacent Watling Street/Harper Lane Junction for Broad Location B8.

The SA in acknowledges that the proposed Broad Location B8 Harper Lane, near Radlett, does not relate well to the edge of Radlett and the nearest primary school is some distance away, but then states that Radlett station is under 2km away –"with a good service to London St Pancras". The site would not contribute to the settlement of Radlett and thus build upon the existing community. Unlike land at Harper Green which would provide a new primary school and provide the opportunity to build upon the permitted development of the former Harperbury Hospital site which is under construction.

The Broad Location B8 is a site included in the HELAA and appears to have come forward as a result of the Green Belt review (part of the site is a storage and parking of vehicles, plant and machinery and storage equipment formerly part of a waste transfer station and in the SA referred to as comprising light industrial area/trading estate, whilst the southern part of the site is greenfield), however, we consider that the Green Belt Review is fundamentally flawed for reasons outlined below in respect of land at Harper Green. There is no other evidence to support the proposed allocation and indeed the SA acknowledges the site is associated with a certain number of drawbacks/challenges. These are set out in the Broad Locations Sites – Recommended to Progress:

*"Part of the site is within flood zones, 3, 3a, 3a + 35% climate change and 3a + 70% climate change. The Strategic Flood Risk Assessment Level 2 requires this site to pass the exception test.*

*The site contains an area of Ancient Woodland, which is also designated as a County Wildlife Site and a deciduous woodland Priority Habitat. The site is adjacent to other deciduous woodland Priority Habitats and an archaeological area subject to recording conditions. The site contains a listed building and is within the 100 metres buffer of another.*

*The site contains two areas of contaminated land and an Existing Safeguarded Site. Some of site lies within the buffer zone of a Rail Aggregates Depot."*

It appears to have been considered as it is within the Green Belt buffer of Radlett (400m buffer) and adjoins the settlement which provides a wide range of economic and social benefits. However, the SA concludes that the proposed Broad Location B8 Harper Lane, near Radlett, does not relate well to the edge of Radlett and the nearest primary school is some distance away (paragraph 5.4.147 of the SA September 2024),

The inclusion of Broad Location B8 (HELAA ref STS-51-23 below) is unsound.

Harper Green HELAA reference is STS-34-18 and STS-33-18. The SA has not considered a smaller option at Harper Green which has been promoted to the Council, a reduced option showing concept plan for approximately 200 dwellings has recently been prepared which builds on the already completed scheme on the former Harperbury Hospital site.

The SA at paragraph 5.4.150 dismisses the location of Harper Green adjacent to the former Harperbury Hospital as poorly connected in transport terms, yet this location is approximately 4mins by cycle and 17 minutes walking distance from the proposed location B8 North of Radlett. There is already a bus service from Harper Green that connects to Radlett railway station and also to Colney Fields Retail Park and a solution to the Harper Lane/Watling Street has been proposed.

Bloor Homes has provided a thorough evidence-led promotion of the Harper Green site. In transport terms, this has included formal document submissions as part of their Local Plan Promotion Transport Strategies to St Albans and Hertsmere in October 2018 and February 2020 respectively. These have demonstrated the credentials of the site considered for a range of prospective housing levels with supporting infrastructure.

Attached at **Appendix 7 to our Reg 18 reps provided** an update of the report we submitted to Hertsmere Council in response to the Reg 18 consultation in November 2021, importantly this report addresses concerns raised by Hertfordshire County Council following a meeting they had with Hertsmere Borough Council and St Albans City and District Council.

**Harper Green –alternative site to Broad Location B8**

The St Albans SA has only considered a new settlement as an option adjacent to the former Harperbury Hospital despite previous submissions for a smaller scheme located within St Albans.

We have previously submitted a proposal for development at Land at Harper Green comprises approximately 470 dwellings and would provide a 2 FE primary school. The primary school not only benefits the new residents in terms of being able to walk to school, but also the existing residents (children would be able to walk to school instead of being transported to London

Colney) The proposal provides an opportunity to build and consolidate on existing and committed development. We have since revised the proposal to a smaller scheme of 200 dwellings. Development at Harper Green would further support the new public transport service to the area implemented in September 2020 as part of the planning permission for the first scheme for 206 dwellings. This service carries 11 years of guaranteed subsidy through to towards the end of 2030 and hence plenty of time to grow within the context of further development. The service will also enable those travelling to and from the adjacent Healthcare site to use public transport. (The vehicle size has been chosen to allow for steadily growing patronage.)

There is an existing direct walking route via a Public Right of Way and quiet neighbourhood streets from the site to Radlett town centre and the rail station. As part of the proposals, the existing footpath along Harper Lane have taken place, providing a dedicated footpath / cycle path to Radlett. The new proposals would build on that and deliver improvements to Watling Street.

On foot this journey takes about 20 minutes, and to cycle about 10 minutes.

There may be other sites within the locality which would also benefit from and support the facilities and services provided at Harper Green. The proposed development will be set within large areas of green infrastructure, for informal and formal recreation and will provide benefits for the wider community, with enhanced facilities and services.

Conceptually the approach adopted to assess the propensity to travel by active travel and passenger transport modes as presented by WSP is valuable but in the context of a workplace travel plan where the home and workplace trips ends are fixed and mode choice is the only variable. In the consideration of a development plan, however, the home and workplace trip ends are not fixed and indeed their spatial distributions are being directly assessed. In this respect the evidence basis is incomplete in three important respects.

1. The methodology promotes locations where car trips could be made by active or passenger travel modes but are not, over locations where car trips are already lower than average. Several communities, such as Radlett and adjacent villages, already show very high rail passenger travel mode shares (2011 Census) largely by virtue of being served by trains on the Thameslink route which provides direct access across London including to the City. Such communities should perform better than is reported particularly over other communities either without access to a nearby station or on other railway lines which run only to a terminus station in London. Demonstrable opportunities to support sustainable travel are therefore not being identified.
2. The methodology does not consider differences in infrastructure provision including the existing quality of active travel routes and the nature and extent of public transport services. In practice the provision of infrastructure is uneven but in locations such as Harper Green there has already been investment in dedicated active travel routes including along Harper Lane that can support further development within the community. With respect to passenger transport, the methodology is weakened by being based on existing service levels, as is acknowledged in the reporting, but again in respect to rail services does not differentiate the geography of the network. This is compounded by a generalised cost proxy of travel time which does not consider end constraints such as the ability/cost to park.
3. The methodology is overly focused on the peak hours periods as reported in the COMET model and therefore will not be balanced in terms of journey purposes. Journey-to-work trips are likely to be dominant but in practice only represent 20% of trips overall. By not addressing the 80% of trips, the benefits of allowing communities to growth in a proportionate manner will not be identified.

In summary from a highways/infrastructure perspective the site is characterised by:

- Comprehensive on-site permeable footway/cycleway routes;
- Continuous footway and cycle route facilities between site and Radlett;
- Provision off site for a separate bridge on Harper Lane over the railway line;
- Proposed Harper Lane footway widening to link with B5378 bus stops;
- On-site bus service linking Radlett, including rail station throughout the day and Colney Fields Retail Park off-peak (including weekends);
- Link to frequent rail services to London and other commuting destinations;
- Reasonable walking distance to frequent further bus services linking site to St Albans, Hatfield and Watford;
- On-site primary school facility; and
- Linkage to off-site rural PROW network

Land at Harper Green will provide a wide range of high-quality housing, including affordable housing.

The development will provide benefits for the wider community, with enhanced facilities and services, parkland and green infrastructure opportunities.

The location is well located with ready access to services and best able to support economic objectives.

There are local school, sports clubs and residential development along Harper Lane.

There are existing employment opportunities at the adjacent Kingsley Green Hospital, at the Hertfordshire Business Centre, London Colney. The National Autistic Society - Radlett Lodge School is located nearby. There is also a Veterinary Practice, Houndswood Care Home, Stage School Business, and further along Harper Lane is Radlett Golf Centre and Ivory's Trading Estate leading to Watling Street and the Radlett and Colney Industrial Estates.

The site is located within the Green Belt – but the extensive landownership provides the opportunity to create a new definitive permanent boundary for the Green Belt and preserves the gap between existing settlements.

With either proposal because of the land ownership there is an opportunity to design into the proposals a permanent "stop" in the form of a well-defined green edge to protect the setting of Shenley and Radlett and prevent any potential for future coalescence.

Such an approach meets the requirements of the PPG Green Belt (December 2023) as the impact of removing land from the Green Belt will be offset by compensatory improvements to the environmental quality and accessibility of the remaining Green Belt land, for example given the extensive land ownership provides an opportunity for new and enhanced infrastructure, new or enhanced walking and cycling routes, and improved access to new and enhanced or existing recreational and playing field provision e.g. the relocation of the Bowls club and the relocation of the football pitches.

This approach is also consistent with the NPPF in particular paragraph 74c where the emphasis is on the quality of place making and creating well designed and beautiful homes to meet different needs of the community and providing a genuine choice of transport modes. Paragraph 96b refers to the need to create attractive, clear and legible pedestrian and cycle routes. The proposed development at Harper Green is also consistent with NPPF (paragraph 102) as the scheme will deliver wider benefits for nature and address climate change, given the large areas of public open space and green infrastructure. This is also consistent with paragraph 180, with retained areas of woodland and new areas created including new community parkland, including areas of tree planting.

Bloor Homes controls wider land holdings in both St Albans and Hertsmere. The land controlled by the company amounts to some 83 hectares and is adjacent to land in public sector ownership. Bloor Homes have indicated in their response to the Hertsmere consultation that the nature of their arrangements with the former owners (Department of Health and Social Care) means that the proceeds would be reinvested in the National Health Service, as supported in previous Government statements.

**Table 3.2 Housing Trajectory**

Table 3.2 sets out a housing trajectory over the plan period commencing in year 1 post adoption i.e., 2026/27, however, there is no detailed breakdown year by year of anticipated delivery for the proposed allocations.

Paragraph 75 of the NPPF (December 2023) states that strategic policies should include a trajectory illustrating the expected rate of housing delivery over the plan period. The specific sites that make up the trajectory are not identified as required by paragraph 75 of the NPPF. The five-year tranches identified in the trajectory do not provide sufficient detail to enable fair and open consideration of the delivery anticipated from each site as a total figure for each category of development e.g., the

individual Broad Locations are not included for each year. Sites will come forward at different rates, depending on local circumstances etc and deliverability, such information is important to understanding the trajectory.

As the Council has provided the supply in broad categories of site, they must have the information readily available. This information is necessary for all parties to understand and consider the assumptions that have been made for each site in respect to the rate of delivery and to consider whether this is justified.

Inspectors at Local Plan examinations have requested such information, most recently (18th July 2024) the Inspectors for the Bristol Local Plan examination have requested:

***"...to assist in our preparation and subsequent discussions at hearings, we ask that the Council provide us with a detailed spreadsheet setting out how many dwellings each committed and allocated site is expected to deliver in each year of the plan period,.. This should look back to the start of the plan period and include data on completions. The spreadsheet should also include evidence to justify the delivery information it contains. Appendix 1 to this letter sets out the minimum information we expect to see in this schedule."***

The latest housing delivery test for St Albans (published December 2023) shows that the Council has failed to deliver the housing requirement, in fact the situation has deteriorated from the previous year where 69% was delivered in the years 2018-2021 to 55% being delivered in the years 2019-2022. Consequently, there is a presumption in favour of sustainable development.

The PPG *Housing Supply and Delivery* (February 2024) states that:

***"In plan-making, strategic policies should identify a 5-year housing land supply from the intended date of adoption of the plan."***

Paragraph: 004 Reference ID: 68-004-20190722. The evidence needs to be tested at examination to ensure that there is a 5-year housing land supply when the Plan is adopted.

Paragraph 76 of the NPPF states:

"***Local planning authorities are not required to identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing for decision making purposes if the following criteria are met[40]:***

1. ***their adopted plan is less than five years old; and***
2. ***that adopted plan identified at least a five year supply of specific, deliverable sites at the time that its examination concluded."***

The PPG provides advice on how the 5 year housing land supply can be identified as part of the examination of plan policies:

***"In accordance with paragraph 69(a) of the National Planning Policy Framework, planning policies should identify a supply of specific, deliverable sites for five years following the intended date of adoption.***

***A 5 year supply of specific, deliverable sites at the time of the conclusion of its examination is one of the criteria under paragraph 76 of the National Planning Policy Framework which a plan must meet in order for a local authority to not be required to demonstrate a 5 year housing land supply for the purposes of decision-making.***

***When identifying a supply of sites through this process, local planning authorities will need to apply a 20% buffer where the Housing Delivery Test indicates that delivery has fallen below 85% of the requirement."***

Paragraph: 059 Reference ID: 68-058-20240205

Consequently, in order to demonstrate 5 years' worth of deliverable housing sites, robust, up to date evidence needs to be available to support the preparation of strategic policies and planning decisions which requires detailed information to be included in the trajectory.

Table 3.2 indicates a stepped trajectory, assuming that on adoption of the Plan an annual requirement of 485 dwellings per annum for the first five years (this is considerable less than in the Reg 18 version of the Local Plan which envisaged 710 dwellings per annum and considerable less than the current Standard Method 885 dwellings per annum). The trajectory increases to 1,255 dwellings per annum in years 2031/32 to 2035/36, then reduces to 1,025 dwellings per annum for the last five years of the Plan.

However, an average of 395 net dwellings per year have been completed in the District between 1994/95 and 2022/23 (AMR March 2023). The average delivery over the past 5 years (between 2018/19 and 2022/23) has been 458 net dwellings per year.

Currently from the last AMR 2022/23 a total of 401 net dwellings were completed in 2022/23. This is a shortfall on the stepped trajectory in the early years of the Plan, in fact it is not until 2029/30 that the total supply including the 20% buffer in years 1 – 5 is exceeded (when 822 dwellings are anticipated).

The PPG Housing Supply provides guidance on a stepped trajectory and when it is appropriate.

***"Strategic policy-makers will need to identify the stepped requirement in strategic housing policy, and to set out evidence to support this approach, and not seek to unnecessarily delay meeting identified development needs. Stepped requirements will need to ensure that planned housing requirements are met fully within the plan period. In reviewing and revising policies, strategic policy-makers should ensure there is not continued delay in meeting identified development needs.***

***Where there is evidence to support a prioritisation of sites, local authorities may wish to identify priority sites which can be delivered earlier in the plan period, such as those on brownfield land and where there is supporting infrastructure in place e.g. transport hubs. These sites will provide additional flexibility and more certainty that authorities will be able to demonstrate a sufficient supply of deliverable sites against the housing requirement."***

***Paragraph: 021 Reference ID: 68-021-20190722***
***Revision date: 22 July 2019***

Given the Council's record of housing completions in the last 20 years averaging only 395 dwellings per annum it is not clear how the Council envisage that the delivery will increase, even to the supressed figure of 485 dwellings per annum in the stepped trajectory. The highest number of completions according to the Council's AMR in 2018/19 was 624 dwellings (Table 2) which although is above the stepped trajectory in the first five years of the plan period, it is significantly below the dwellings anticipated in years 6-10.

There are lead in times to housing delivery and whilst these vary according to the size of the site, the national research documented in Lichfields (Start to Finish Second Edition March 2024) provides robust evidence on typical lead-in times and build-rate, based on approximately 179 sites of over 500 dwellings.

Average time from obtaining outline permission on sites of 500+ homes is 3.4 years.

"***On the average time taken from gaining outline permission to the completion of the first dwelling on site. This indicates that it takes on average around 3 - 4.6 years from the grant of outline planning permission to deliver the first dwelling*.**"

***"The average time from validation of an outline application to the delivery of the first dwelling for large sites of 500 dwellings or more ranges from 4.9 to 6.7 years depending on site size, i.e. beyond an immediate five-year period for land supply calculations.***

***When combining the planning approval period and planning to delivery period only sites comprising 99 dwellings or less will – on average – deliver anything within an immediate five-year period"***

One of the key findings from the latest Lichfield report is that "*only site below 100 dwellings on average begin to deliver within a five year period from validation of an outline application with delivery of the first dwelling on average taking 3.8 years."*

Large scale brownfield sites deliver at a slower rate than their greenfield equivalents: the average rate of build out for greenfield sites in the Lichfield research is 34% greater than the equivalent brownfield.

There is a concern that if brownfield sites deliver at a slower rate and there is a stepped trajectory then the housing need will not be met in a timely manner. Furthermore, it is not clear in the trajectory which sites are brownfield. It is noted that the Housing Delivery Test Action Plan 2022 paragraph 4.2.2 acknowledges that "*Redeveloping brownfield sites provides its own challenges, such as clearance/ demolition and remediation costs which can make development less attractive to developers."*

Table 3.2 indicates that the broad locations are not envisaged to deliver until 2031/32 i.e., in years 6-10, and a figure of 240 dwellings is included for that year. None of the Broad Location sites are included in the five-year supply and as they are over 250 dwellings it would be difficult to justify any delivery from this source of supply.

It is not clear if the Broad Locations have reasonable trajectories and are deliverable in the plan period.

Given delivery of housing over the recent and distant past has been significantly below the capped requirement set by the LHN standard method (885dpa) there is a clear need to provide a range and choice of sites to meet needs as the over reliance on strategic sites will result in less needs being met. There is a concern that the use of a stepped trajectory should not seek to unnecessarily delay meeting identified development needs. As set out in paragraph 68-021 of PPG the Council need to provide evidence as to why they consider the use of a stepped trajectory is necessary and that the proposed trajectory does not seek to unnecessarily delay meeting identified development needs.

It is noted in Table 3.2 that over the plan period the Plan expects 14,989 dwellings to be delivered, giving a buffer between needs and supply of just under 400 homes, i.e., 2.6%. This buffer is less than included in the Reg 18 version of the Local Plan. It is considered to be insufficient to take into account the risks that some of the larger allocations will not come forward as expected.

Whilst there is no guidance on what the buffer should be over the whole plan period, a buffer of at least 10% to 15% would be effective (in accordance with paragraph 35 c) of the NPPF December 2023) and provide the necessary certainty that the Plan will meet its objectives over the plan period and also provide some headroom for changes in assumptions about delivery which will undoubtedly occur over the plan period.

It is noted that the SA Appraisal Summary Section 6.15 paragraph 6.15.10 concludes:

***"–there is a need to factor-in not only total growth quantum, but also the mix of sites, particularly with a focus on minimising the need for a stepped requirement. Ensuring a good supply of smaller sites is very important from a housing perspective, and there is also a case to be made for the higher growth scenarios that could potentially (subject to***

***consideration of an appropriate supply buffer) allow for the housing requirement to be set modestly above LHN as a response to levels of affordable housing need locally and/or in order to make modest provision for unmet need from elsewhere."***

*Paragraph 9.10.1 of the SA*

**"*..A stepped requirement is not supported from a pure 'housing' perspective, because providing for housing needs is an immediate priority (e.g. given a very high affordability ratio and very high need for affordable housing). However, there is a clear case for a stepped requirement given reliance on HGC and limited realistic small site options, particularly on the basis of the evidence provided by the HELAA, Green Belt Review and the Urban Capacity Study."*In order to avoid a stepped trajectory, it is necessary to allocate more sites below the threshold of 250 dwellings to ensure delivery.**

Overall, the buffer is only 2.6%, the boost supply does not occur until years 6 -10 and falls in the latter years of the plan, such that the plan is reliant upon a review to boost supply.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Table 3.1**

Broad Location B8 is not justified.

In recognition of the unmet needs and the trajectory for the early years of the plan additional sites should be included which can deliver in the timescale. Land at Harper Green has been promoted to the Council in various options and can deliver a range and choice of housing to meet needs.

**Table 3.2**

The approach the Council have included in the Plan is not consistent with the NPPF (Dec 2023) and the Government's objective to significantly boost the supply of housing. The housing trajectory provides a stepped trajectory for the first 5 years of only 485 dwellings per annum, when average dwelling completions over the last 20 yrs have been 395 dpa, and over the last 5yrs the average has been 458 dwellings per annum. The figure of 485 dwellings per annum is only 27 dwellings more per annum, this is not boosting the supply of housing in the district as required by the NPPF paragraph 61.

The justification for the stepped trajectory appears to be "*to allow sufficient time for the significant uplift in housing delivery to be realistically achieved."*

In order to deliver more dwellings a greater range and choice of sites should be included in the Plan; this would assist in meeting housing needs including much needed affordable housing. (Between 2013 and 2023 the median affordability ratio in St Albans increased from 13.92 to 17.61. The affordability ratio in the LPA is currently above the ratio in the East of England (9.76) and England and Wales (8.14)).

The housing trajectory provides insufficient information as there is no detailed breakdown year by year of anticipated delivery for the proposed allocations. Therefore, the Plan is not justified and effective and neither is it consistent with national policy.

*Housing supply*

1. The HBF welcome the Council's decision to amend green belt boundaries in order to meet its housing needs in full and agree there are the exceptional circumstances required to support the proposed amendments. However, HBF consider that the high cost of housing in the area, the pressure of under supply on market due to unmet housing needs in London and the lack of development opportunities in urban areas are sufficiently severe to warrant further releases in order to address some of the unmet needs in neighbouring areas and to provide a more significant buffer between housing needs and supply.

2. Turning to the supply trajectory over the local plan HBF are concerned that the buffer between housing needs and supply is just 385 homes, a little over 2% of the overall housing requirement. This level of buffer between needs and supply is insufficient for the council to show, as required by paragraph 35c of the NPPF, that the plan is deliverable over the plan period and as such is effective. Given the reliance of the Council on delivery from strategic sites HBF would have expected to see supply exceed needs by at least 10% due to the uncertainty that strategic sites of the scale proposed by the council will deliver as expected. The Council state that they have in their assessment of delivery rates on the strategic site allocations used the latest iteration of Start to Finish published by Lichfields. While the use of this information is welcomed as it provides a reasonable starting point on which to set delivery rates it also shows that some sites deliver much more slowly than others and why a buffer between overall need and supply is necessary.
3. With regard to the trajectory in provided in table 3.2 HBF would have expected further information to be provided on the expectations for each site. On the basis that the Council has broken down supply into broad categories of site this evidence must be readily available and is necessary for all parties to properly consider whether the rate of delivery on each site is justified. It is our experience that where site by site trajectories are not provided, they are asked for by inspectors in order to ensure effective scrutiny of the local plan. For more information on what is expected we would refer the Council to the Preliminary Questions published recently by the inspector examining the Bristol Local Plan[3]. Question 62 and Appendix 1 provide some indication of the detail required. Rather than wait to be asked we would suggest that such a trajectory as part of the evidence supporting the submitted local plan.
4. In particular HBF would expect further evidence to be provided as to the deliverability of the sites identified through the urban capacity study (UCS). The site proformas do not appear to have any indication as to the availability of these sites and the Methodology Paper states at paragraph 1.10 that these were identified through "*a desktop review of maps, aerial photographs and online street photography and in some cases site visits. Sources of sites included under-utilised sites such as garage blocks and car parks, vacant and derelict land and buildings, and public sector land*". Unless further work has been undertaken to ascertain their availability the UCS alone is insufficient for their inclusion in the local plan. In addition to evidence to support the availability of these sites evidence will also be needed with regard to their deliverability.
5. Turning to Hemel Garden Community, HBF could not find any evidence supporting the trajectory for this site in table 3.2. The Council state in 6.3 of the Housing Supply and Windfall Paper that a bespoke piece of work has been completed to inform the delivery rates being for HGC, but we could not find this in the council's evidence base. HBF would have expected that this evidence would have been provided to support the delivery rate for this allocation, especially given that it is expected to start delivering homes within five years of the plan being adopted. The Council will need to provide the necessary evidence showing how and when each phase of this new community would come forward and the evidence supporting these delivery expectations.

*Windfall*

3. The Council have included a windfall rate of 145 dpa from 2027/28. This is based on windfall delivery between 2013 and 2023. However, HBF are concerned that there could be significant overlap between windfall rates on the sites identified in the UCS which are expected to deliver 860 home over the plan period. If there is sufficient evidence regarding the availability of the sites identified in the UCS to allocate these sites, then the Council will need to reduce the level of windfall to avoid the risk of double counting of these sites in its housing supply estimates.

*Exclusion of sites due to the potential expansion of the Chilterns National Landscape*

4. Finally, we note that four sites have been removed between the Regulation 18 and Regulation 19 consultation on the basis of possible expansion of the Chilterns National landscape. This would seem premature given that no evidence has been presented as to the potential extent and reasons for any proposed expansion. HBF does not promote sites, but we are concerned that potential development sites are being discarded from the local plan on the basis of an expansion that has not been published has had no consultation. HBF considers that without any evidence minimal weight can be attached to the expansion of the national landscape and that the Council should revisit the decision to remove these sites from the regulation 19 local plan.

*Smaller sites of less than 1 ha*

1. HBF could not find any evidence to show that at least 10% of the Council's housing needs will be delivered on sites of less than one hectare as required by paragraph 70 of the NPPF. The delivery of such sites is important in ensuring that SME house builders are able to gain allocations within local plans and the certainty this brings with regard to its future development. The current Government continue to recognise the importance of this sector stating the recent consultation on the proposed reforms to national planning policy.

*"Small and medium sized builders are essential to meeting our housing expectations and supporting local economies. They also build out the majority of small sites. Their business models often rely on identifying and securing small sites and building them out quickly. The Government is concerned that SME housebuilders are not able to access the small sites that they need, and that local planning authorities are not bringing forward small sites in their plans to the level set out in the NPPF".*

2. The HBF agrees, a thriving SME sector increases choice and competition within the housing market as well as enabling more homes to come forward early in any plan period – which given the level of supply in the early years of the plan is some 2,400 homes short of meeting what is needed. The trajectory for the first five years makes no attempt to boost supply despite the severe shortfalls in housing delivery due to the failure of the Council to adopt a local plan. The proposed trajectory merely continues the trend from previous years which saw just 395 dwelling delivered each year over the last 20 year. The delays to the delivery of new homes over this period will inevitably exacerbate affordability concerns in an area where the median house price being over 17 times local median salary.
3. Instead of recognising this the Council have chosen a strategy which relies on large sites coming forward at the end of the plan period and seemingly ignored the important contribution smaller sites can make to supply early in a plan period. Therefore, whilst the HBF recognise that a stepped trajectory may be needed we would question whether such a significant step is justified given that it delays meeting identified development needs.
4. The Council must do more to identify more small and medium sized sites that would ensure the council meet the requirements of paragraph 70 as well as increasing delivery in the first five years of the plan.

*The stepped trajectory.*

2. HBF does not consider he stepped trajectory to be sound. As set out above in our comments on small sites the trajectory for the first five years makes no attempt to boost supply despite the severe shortfalls in housing deliver. The Council have alighted on a strategy that delivers a significant number of homes at the end of the plan period but the consequences of this is limited delivery in the early years of the plan. More can be done to address this though allocation of small and medium sized sites. The strong housing market in St Albans would suggest that such sites would come forward quickly on the adoption of the plan and begin delivering the homes St Albans needs in the short term. This would also support the Government's ambitions of delivering 1.5 million homes in the next five years and which are considered essential in addressing the housing crisis the country is currently in.

2. **Chapter 3 – Sustainable Use of Land and Green Belt**

**Strategic Policy SP3 – Land and the Green Belt**

**Housing Needs**

2.1. Policy SP3 details that the Local Plan will seek to deliver its housing need as calculated by the Government's Standard Method. The policy states that as a minimum the Plan will seek to deliver 14,603 new dwellings over the plan period to 2041. Longbourn Estates support the Council's view that meeting this target is a 'minimum' requirement. Paragraph 11 and 61 of the National Planning Policy Framework (December 2023) also require councils to take into account housing needs that cannot be met in other areas when establishing the number of homes to be planned for. St Albans will need to work with its neighbours to address the unmet needs currently arising in Dacorum and Three Rivers and potentially others.

2.2. In addition, St Albans is experiencing some of the worst median and lower-quartile workplace-based salary affordability ratios of anywhere in the country, meaning house prices in the district are now 18.4 times average salary. The knock-on negative effects for the local population and economy are severe and requires careful and evidenced consideration to address as part of the plan-making process. Accordingly, the affordability issues and suppression of housing growth in the district over recent decades highlight the need for the Local Plan to look positively upon housing need targets and the opportunity they provide to improve the lives of SADCs residents.

2.3. The Council’s ambitious employment and economic development policies (Policy SP5) are supported. However, it must be noted that significant numbers of new homes will be needed to support new jobs and business in the district, particularly in light of the dominant longterm trends in the growth of less economically active residents aged 65+. The 2023 Census population estimates outline that these trends are now accelerating across the region, which may have significant implications for economic growth unless younger, economically active groups are able to afford to live and work in the area. The need to deliver not only sufficient housing for current needs, but also reflect future need and to meet the ambitious economic growth aspirations of the district should be considered thoroughly. Failure to plan for sufficient homes will only worsen the already extreme affordability ratios in the district and will hold back economic growth.

2.4. The Council should keep an open-minded and flexible approach, so that the Local Plan is capable of responding to rising housing needs in the district as the plan-making process continues. Indeed, the plan will require modification to set out an immediate review of the plan to take account of the proposed NPPF reforms. The proposed revision to the NPPF standard method anticipates SADCs housing needs increasing from 885dpa to 1,544dpa and will require the council to prepare a new plan immediately, which should be secured through an appropriate policy requirement consistent with national planning policy.

**Green Belt Review**

2.5. In light of the above, and to meet the housing needs of the district and wider south west

Hertfordshire sub-region, the Green Belt Review must be thorough, reasoned and complete in its assessment of potential sites. These representations are made to support the promotion of Land North of Sandridge for residential-led mixed use development of up to 150 dwellings. The land has been promoted consistently as deliverable (being suitable, available and achievable) for a number of years, including throughout the preparation of the previous iterations of draft Local Plans. The land under the control of Longbourn Estates still remains available for residential-led development.

2.6. To accommodate the proposed 14,603 dwellings over the plan period, the Local Plan

proposes amendments to existing Green Belt boundaries which are supported. The National Planning Policy Framework (NPPF) makes clear that alterations to Green Belt boundaries should only be proposed in 'exceptional circumstances' which are fully evidenced and justified. Paragraph 3.18 of the draft Plan, to some extent, begins to set out the 'exceptional circumstances', however, moving forward it is vital that the Council provides further evidence to demonstrate the exceptional circumstances in the district more clearly. Longbourn Estates contend that there is a significant and robust exceptional circumstances case to be made in respect of the overwhelming need to deliver significant housing and economic growth in the district. If the Green Belt boundaries remained unchanged, the Council would oversee a significant shortfall in housing supply and an accelerating backlog of affordable housing. The Green Belt is a significant constraint to delivery and the lack of any changes to the Green Belt boundaries since 1994 has significantly constrained supply over an extended period. The Council's ambition to review the Green Belt as part of preparing the Local Plan to enable much needed housing delivery is therefore supported.

2.7. The 1994 Local Plan designates Sandridge as a 'Small Village' meaning it is washed over by

Green Belt, rather than being inset. The Regulation 19 draft Plan is proposed to retain this designation, and is now proposed to classify Sandridge as a 'Tier 6 *Green Belt Village'.* Whilst most larger sites are reviewed in detail, sites within or adjacent to these washed over villages are not. Instead, an arbitrary 400m buffer around the largest settlements and a 250m buffer around the mid-tier settlements has been used to quickly filter sites out of the assessment – including land to the north of Sandridge. This approach fails to recognise the sustainability credentials of Sandridge, which benefits from a range of services and amenities and is also just 4km north-east of St Albans City Centre, contrary to the objectives of the NPPF to promote sustainable patterns of development and could harm the continued vitality and viability of local services within the district's villages.

2.8. Whilst retention of Green Belt between Sandridge and St Albans is supported, as it demonstrably contributes to maintaining the separation of the settlements and to check the spread of St Albans city; the same purposes are not true of the Green Belt north of the village. The natural boundary for Sandridge, formed of the permanent boundary of the maturing Heartwood Forest, is therefore slightly further north than the existing edge of the existing

built form. This logical expansion of the village has been overlooked in favour of carrying forward the 'washed over' designation from the previous 1994 local plan.

2.9. The positive contribution Heartwood Forest has upon maintaining a physical and permanent

boundary north of the village is overlooked. Longbourn Estates consider the forest acts as a natural edge to the village, which then allows for consideration as to the appropriate boundary of the settlement as shown in Figure 1 below.

**Figure 1: Land North of Sandridge in Context with Heartwood Forest**

[Please see attachment for Figure]

2.10. If inset from the Green Belt, the village, with the inclusion of Land North of Sandridge,

Heartwood Forest would represent a natural, logical and permanent boundary to the north Sandridge. The forest would serve many of the purposes of the Green Belt, by checking unrestricted sprawl, preventing coalescence, and safeguarding further countryside from encroachment. Clearly in this event, the justification for washing over Sandridge is weakened, as Green Belt protection would be unnecessary. Indeed, Land North of Sandridge is now effectively enclosed on all sides,

creating a significant natural and defensible boundary between the urban and rural surroundings. As a result, the site no longer forms a contiguous element within the wider Green Belt countryside due to its effective isolation created by the maturing Heartwood Forest.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

[Please see attachment for full submission including Appendices]

**Conclusions**

- The site is suitable for residential development with no insurmountable environmental, technical or social infrastructure constraints;
- The site is located within a sustainable location, suitable to accommodate new development;
- The site is available for development now and is being actively promoted by a willing landowner;
- Residential development is confirmed to be a viable opportunity at this site; and
- The enclosed Illustrative Masterplan (**Appendix 5**) represents a deliverable, sympathetic and sustainable vision for the site for up to 150 high-quality new homes and for the purposes of preparing the new Local Plan, the site should be treated as a deliverable source of housing land with an expectation of completions achievable in the early part of the new plan period, subject to the removal of the Green Belt designation.

### 327 - Gary lees

Submission Number: 327 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Pegasus Group Name: Tom Beardsmore

On Behalf Of Company/Organisation: Clowes Developments Name: Gary lees

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Chapter 3 – Sustainable Use of Land and Green Belt**

The Green Belt Review appears to have been determinative in the allocation of sites for development as part of the Regulation 19 draft local plan. It is contended that the Green Belt Review, Parts 1 & 2, are flawed for the following reasons.

The Green Belt Review Part 1 is an assessment of GB purposes at a high level dating from 2013, used in support of the previous, now withdrawn draft local plan. Our objections then remain the same now, particularly with regard to the parcel north of the M25, the table below providing a summary of likely impacts on Green Belt purposes:

***Table 1: Summary of likely impacts on Green Belt purposes [see attached file]***

The 2023 Green Belt Review Part 2 by Arup provides a more granular assessment of sites and locations. This review is based on the application of buffers of 250m and 400m from existing built form as the key factors informing the consideration of sites. Indeed, the Part 2 report states at 4.2.1 "*Sites that were not adjacent to existing urban areas (or the buffers) were thus excluded for the assessment on the basis that their release would (a) not contribute to a sustainable pattern of development; and (b) undermine the integrity of the Green Belt by creating hole(s) within its fabric*". This arbitrary approach without proper regard to Green Belt openness or purposes has thus unfairly constrained the site selection process.

The assessment of land parcels against the five Green Belt purposes is also questioned, particularly with regard to my client's land interests at parcels SA-137 and SA-160. GB purpose 2 is to prevent neighbouring towns from merging, but as Chiswell Green and Bricket Wood are not towns, it is difficult to understand how SA-137 and SA-160 preform so poorly. In respect of GB purpose 3 to assist in safeguarding the countryside from encroachment, parcel SA-160 is both physically and visually constrained by the M25 and M1 motorways, yet the score in the report is the most harmful. Whilst the western part of parcel SA-137 is considered to perform poorly, the eastern part is not (as noted above in respect of comments submitted to the Part 1 review). These are just a few examples of questionable scoring.

As a consequence, the Green Belt Review is considered to fail the justified and effective tests of soundness.

**334 - TT Group**

Submission Number: 334 Submission Date: 07/11/24 09:00

Respondent: Company/Organisation: Knight Frank Name: Stuart Baillie

On Behalf Of Company/Organisation: TT Group Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Chapter 3 – Sustainable Use of Land and Green Belt**

In accordance with the NPPF, Chapter 3 of the Draft Local Plan focuses on supporting development that makes efficient use of land through the adoption of a 'brownfield first' approach.

Reference is also made to the important contribution that small and medium sites perform in meeting housing need. This broadly reflects the requirements of Paragraph 69 of the NPPF which encourages local authorities to accommodate at least 10% of their housing requirement on sites no larger than one hectare.

Regarding the 'Search for Development Sites' and brownfield first approach, the Draft Local Plan states that *'The approach has been underlain by the concept of 'leaving no stone unturned'*(para 3.12) *in the search for appropriate sites on brownfield land'*.

Our Client welcomes the reference to the significant contribution made by small and medium sized sites in meeting housing need, and agrees that the delivery of such sites will be a key factor the Council's ability to meet the significant housing need. Small and medium sites perform a particularly importance role in meeting short-term need as they are quicker to deliver than larger schemes. In a District with a limited supply of brownfield land, all available sites should be utilised as far as possible in order to meet needs whilst protecting undeveloped land.

In order to effectively do so, our Client requests that the wording of the Draft Local Plan should be amended to make reference to important role that windfall sites will perform in meeting housing need. As currently written, the Draft Local Plan ignores the role of windfall sites, instead focusing only on housing delivery from site allocations most notably those within the Green Belt.

It is strongly contended that the Council have failed to identify all available brownfield sites that could contribute towards meeting housing need, before relying on Green Belt sites. Notably, our Client's site at Marlborough House, which represents an available and underutilised brownfield site where residential development is already proposed, is not allocated for residential development within in the Draft Local Plan.

In this context our Client questions the effectiveness of the *"no stone left unturned"* approach adopted by the Council and would contest that the failure to allocate Marlborough House for future residential development suggests that this has not been the case. A currently vacant brownfield site, with a live application and which is considered to be acceptable in principle for residential development should be a certain inclusion in any 'no stone left unturned approach'.

Our Client wishes to reiterate the merits of allocating Marlborough House for future residential development. Namely that the redevelopment of Marlborough House would make a significant contribution towards meeting housing need, while complying with the Council's own Spatial Strategy through the effective and efficient use of a highly sustainable previously developed land.

Our Client therefore requests that the Draft Local Plan is amended to include the allocation of Marlborough House as a site allocation for future residential development.

It is also suggested that the Draft Local Plan should be amended to include reference to the important role that windfall sites will also perform in meeting housing need, in the likelihood that numerous other suitable brownfield sites have not been identified under a site allocation.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

**Conclusions**

Our Client welcomes the preparation of the St Albans' new Local Plan, noting that those policies contained in the current adopted Local Plan (1994) are extremely outdated and do not accurately reflect current circumstances.

Our Client broadly supports the aspirations of the Plan, particularly that of prioritising residential development on previously developed sites, and ensuring the efficient use of such land in order to meet the significant housing need within the district. Our Client agrees this represents a sensible and effective way of providing much needed new homes in highly sustainable locations across the district which is otherwise constrained by Green Belt.

Nevertheless, our Client has significant concerns regarding specific policies of the Draft Local Plan. Most notably, our Client raises key concerns with the failure of the Draft Local Plan to identify Marlborough House as a site for future residential development. As discussed throughout this representation, Marlborough House represents an underutilised, highly accessible previously developed site, the comprehensive redevelopment of which to provide residential units would make a significant contribution towards meeting housing need within SACDC.

Furthermore, our Client contends that the Draft Local Plan are not legally sound and do not comply with the NPPF. Our Client has therefore made a number of recommendations, which if adopted would ensure consistency across the Draft Local Plan. Notably, our Client strongly contends that those policies within the Draft Local Plan must be sufficiently flexible in order to maximise the chances of meeting the significant housing need within the district. Failure to do so risks the Draft Local Plan stifling opportunities to meet housing need through the effective and efficient use of the highly sustainable brownfield sites.

Overall, it is concluded that in its current form the Draft Local Plan has areas of inconsistency, is not justified with appropriate evidence and is therefore at risk of not be legally compliant, and it is suggested that the Council take further review. We look forward to engaging further in the preparation of the St Albans Local Plan 2041.

* Yes

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate

Chapter 3 of the Draft Plan sets out the policy context for the overall approach to the efficient use of land, the case for strategic Green Belt release and the principle of selective Green Belt boundary adjustments to deliver the housing requirement through a series of site allocations, including the HGC Growth Area. We regard the Plan's approach to be appropriate to the objective of delivering a sustainable pattern of development across the District through the planned expansion of an existing settlement. We also support the Council and key stakeholders' ambition for the generation of new jobs and employment floorspace to support the local economy and wider South West Herts area.

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Housing trajectory (Table 3.2)
Policy SP1 explains that the Council has utilised the Government's Standard Method for calculating Local Housing Need ('LHN'), which results in a LHN of 14,603 dwellings over the plan period. The Housing Trajectory shows how the Council will identify and allocate land for the delivery of at least 14,603 net additional new houses, or 885 per annum in the period 1 October 2024- 31 March 2041. Policy SP3 states that "the housing need figure is the same as the housing requirement figure".
Several issues are identified with the Housing Trajectory, which are detailed below. These should be rectified to make the Plan sound.
• Aligning the housing requirement to the LHN conflicts with guidance set out in the NPPG which explains the following in relation to applying the standard method to plan making: "The standard method uses a formula to identify the minimum number of homes expected to be planned for, in

a way which addresses projected household growth and historic under-supply. The standard method set out below identifies a minimum annual housing need figure. It does not produce a housing requirement figure."
As shown in the 2023 Housing Delivery Test results, SACDC has consistently under-performed in delivering housing and is an automatic "presumption" authority. After years of underdelivery the Council should seek to provide more than the minimum number of homes identified through the standard methodology to address the unmet need and affordability and supply issues caused through years of failure.
• The housing trajectory proposes a stepped delivery, with no allocated homes being delivered in the first three years of the plan, stepping up to 482 and 778 homes in years 4 and 5 postadoption. No evidence is provided to justify the stepped trajectory, and given the historic under-delivery and acute, immediate housing need there is clearly a need to bring forward housing delivery sooner. Paragraph 021 of the NPPG states "Strategic policy-makers will need
to identify the stepped requirement in strategic housing policy, and to set out evidence to support this approach, and not seek to unnecessarily delay meeting identified development needs." Robust evidence is therefore required to justify the approach to the housing trajectory.
• The housing trajectory identifies 2,103 dwellings being delivered over the plan period through windfall sites (145 dpa from the second year following adoption). This figure is not evidenced and reliance on these dwellings (which comprise over 14% of the plan's overall requirement) is unfounded. Any figure attributed to estimated windfall delivery must be fully evidenced and justified.
• An overall buffer of just 2.6% has been applied to the housing supply to account for potential future lack of delivery. Given the historic failures to meet housing needs HG consider that this figure is not nearly high enough to account for potential risks associated with large sites and wider delivery issues.

Infrastructure
There is not a reasonable basis for confidence that necessary infrastructure will be provided within the relevant timeframe to implement the spatial strategy. The Stage 3 Infrastructure Delivery Plan (September 2024) ('IDP') which sets out the infrastructure requirements of the preferred growth scenario states in relation to the identified housing sites that "Each intervention has a set out delivery period on when the intervention will likely be delivered…Where the delivery period for an intervention was not known by the provider but was directly associated with a Broad Location the delivery period of the site as listed in the housing trajectory was used and where the intervention was off-site and not linked to a Major Site the plan period was used" (paragraph 4.3.5). The aspirational linking of infrastructure delivery to the estimated site delivery programmes is unfounded and not based in any realistic delivery timeframe provided by the stakeholders or providers. This is unjustified and clear timeframes for critical infrastructure must be identified to ensure that the significant quantum of new housing to be delivered is appropriately supported.
Similarly, the Transport Impact Assessment which supports the Draft Local Plan sets out (page 5) that further work on detailed transport requirements and mitigation will be undertaken in the future at the later stages of the plan making process and through the masterplanning of the strategic sites and Broad Locations. Further evidence is required at this stage to demonstrate that the infrastructure required to support the housing trajectory will be deliverable and in place in the stated timescales.
In relation to the HGC sites in particular, Policy LG2 (Support for Transformation of Hemel Hempstead) states "Developers and promoters in the HGC Growth Areas must work together and closely with the Councils to secure a collaboration agreement which ensures an integrated and seamless approach across site boundaries. Critical infrastructure necessary to support development must be delivered ahead of occupation."
This policy requires a significant degree of collaboration between multiple actors which will be time consuming and complex, and the need for critical infrastructure to be delivered ahead of occupation raises concerns over deliverability. This effectively places a Grampian-style restriction on the occupation of 4,300 new homes identified through this allocation to be delivered in the plan period.

The SADC Infrastructure Schedule identifies significant items of infrastructure at the highest level of priority ("Critical – Delivery") but which will not be delivered until the later years of the plan period or in some instances beyond 2041.
Further certainty is required to ensure any necessary mitigation is deliverable within the relevant timeframes and able to be funded.

### 349 - Lisa Peters

Submission Number: 349 Submission Date: 08/11/24 09:00
Respondent: Company/Organisation: Colney Heath Parish Council Name: Lisa Peters

Comment Number: 4

**Type:**

* Paragraph

**Number:**

3.55

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Large, Medium & Small Sites**

CHPC notes that the focus of medium (10-99 homes) and small (5-9 homes) sites within urban areas and higher tiers of the Settlement Hierarchy generally aligns with the Local Plan's goals for sustainable development. Concentrating such sites in areas with better infrastructure and public transport options supports accessibility, reduces the need for car travel, and can more readily accommodate new residents without placing undue pressure on existing services.

For smaller rural communities, however, this approach could lead to uneven development impacts, as these areas may lack the infrastructure to support even small-scale developments without careful planning. In villages like Colney Heath, the introduction of new homes must be balanced with infrastructure improvements, including transport links, utilities, and amenities, to ensure these sites enhance rather than strain the community.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

CHPC recommends that SADC consider the distinct characteristics and limited resources of small rural areas in its planning for medium and small sites. Adapting development density and infrastructure investment to fit each area's capacity will better support sustainable growth that preserves the identity and functionality of small communities.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

### 351 - Lichfields on behalf of Legal & General

Submission Number: 351 Submission Date: 08/11/24 09:00

Respondent: Company/Organisation: Name: Adam Donovan

On Behalf Of Company/Organisation: Legal and General (Strategic Land Harpenden) Ltd Name: Lichfields on behalf of Legal & General

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

[Please see attachment for full submission]

**2.0 Housing Need and Requirement**

**Housing Need**

2.1 As noted in our previous representations to the Regulation 18 consultation, the National Planning Policy Framework (2023) ("NPPF") para 61 requires that, to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance ("PPG").

2.2 Strategy Policy SP1 of the Regulation 19 plan states that the Council will deliver a minimum of 14,603 dwellings, equivalent to 885 dwellings per year over the plan period, in line with its standard method figure based on the methodology set out in the PPG. This is a marginal reduction from the figure in the Regulation 18 consultation (888 dwellings per year) but reflects amendments to the underlying data and does not have a material impact on our comments regarding housing need for the purposes of the Regulation 19 plan.

**Meeting uncapped housing needs**

2.3 St Albans' current standard method figure, 885 dwellings per annum, is subject to the cap set out in Step 3 of the methodology set out in the PPG. This is shown in Table 2.1. The difference between the capped and the uncapped figure is 285 dwellings per year, or nearly 5,000 homes in total over the plan period (2024-41).

Table 2.1 Standard Method figure calculation for St Albans

[Please see attachment for Table]

2.4 When explaining why the cap is applied, the PPG states:

*"The standard method may identify a minimum local housing need figure that is significantly higher than the number of homes currently being planned for. The cap is applied to help ensure that the minimum local housing need figure calculated using the standard method is as deliverable as possible." (ID 2a-007)*

2.5 However, the PPG goes on to state that:

"

*The cap reduces the minimum number generated by the standard method, but does not reduce housing need itself. Therefore strategic policies adopted with a cap applied may require an early review and updating to ensure that any housing need above the capped level is planned for as soon as is reasonably possible. Where the minimum annual local housing need figure is subject to a cap, consideration can still be given to whether a higher level of need could realistically be delivered. This may help prevent authorities from having to undertake an early review of the relevant policies." (ID 2a-007) (emphasis added)*

2.6 On this basis, the Council should strongly consider whether its 'uncapped' standard method figure can be met through this plan, given its current need figure is subject to a cap. This was a point raised within our representations to the Reg 18 consultation (see para 2.2 of Lichfields' reps). St Albans' true housing need is well in excess of that being planned for through the emerging plan, and these are real needs (associated with real people) that will continue to go unmet. In the absence of this, the plan will require an early review to address needs, particularly given the scale of difference between the capped and uncapped figure.

2.7 Of note, since the standard method was introduced, a significant amount of under-delivery against the LHN figure has already been accruing in St Albans, and each year the plan's base date moves forward there is significant need going unmet[2]. Since the standard method was introduced in the 2018 version of the NPPF, St Albans has accrued a shortfall of over 2,000 against its capped figure and nearly 6,000 against its uncapped figure. These are real housing needs, including affordable housing needs, that are not being addressed as a result of continuous delays to plan-making, and further illustrate the importance of St Albans recognising and planning for its true level of housing need now (or, as a bare minimum, incorporating an early review mechanism).

[Footnote 2: It is acknowledged that the current PPG does not explicitly require backlog to be take into account when assessing housing needs because the standard method applies an affordability uplift; in theory each year there is under-delivery against need, this is reflected in a higher affordability ratio and therefore a higher uplift. However, with such severe under-delivery against

need even with worsening affordability this does not yield a sufficient adjustment (equivalent to several hundred homes per year more) to 'make good' this shortfall. The analysis is for illustrative purposes.]

**Other factors affecting housing needs**

2.8 The NPPF is clear that the Government's objective is to significantly boost the supply of homes and that local authorities should utilise the standard method to determine the minimum number of homes needed. However, the PPG states:

*"When might it be appropriate to plan for a higher housing need figure than the standard method indicates? The government is committed to ensuring that more homes are built and supports ambitious authorities who want to plan for growth. The standard method for assessing local housing need provides a minimum starting point in determining the number of homes needed in an area. It does not attempt to predict the impact that future government policies, changing economic circumstances or other factors might have on demographic behaviour. Therefore, there will be circumstances where it is appropriate to consider whether actual housing need is higher than the standard method indicates." (PPG ID 2a-010). (emphasis added)*

2.9 Circumstances that are given as examples of where this may be the case includes where growth strategies are in place, strategic infrastructure improvements, unmet needs, recent delivery levels and previous assessments of need (e.g. SHMAs) are significantly greater than the standard method. The list of circumstances in the PPG is non-exhaustive, however there are some clear circumstances which are applicable to St Albans.

**Affordable Housing Needs**

2.10 The PPG states, with regard to affordable housing needs and how they relate to overall housing need:

*"The total affordable housing need can then be considered in the context of its likely delivery as a proportion of mixed market and affordable housing developments, taking into account the probable percentage of affordable housing to be delivered by eligible market housing led developments. An increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes." (PPG ID 2a-024) (emphasis added)*

2.11 The Council's latest evidence of affordable housing need is within the South West Herts Local Housing Needs Assessment Update (LHN Update) 2024. Of relevance to affordable housing need context, the Council's LHN Update shows that:

- Households in St Albans require an estimated £84,600 income to be able to buy in St Albans – the highest in the HMA. Households require an income of £40,000 to rent privately (LHN Update Table 7.1);
- As of 2022, there were 559 households on St Albans' waiting list (LHN Update para 7.18), a number which appears to have been fairly steady over the last 5-8 years (LHN Update Figure 7.1);
- There are (as of 2023) 98 households in St Albans living in temporary accommodation, and this has averaged c.100 per year over the last four years (LHN Update Figure 7.2);
- Across the Housing Market Area (South West Herts) there are 4,269 households who are concealed or homeless, and 10,752 who are in overcrowded housing (LHN Update Table 7.3); and
- In the future, an estimated 39.7% of households forming in St Albans (469 per year) will be unable to afford housing (LHN Update Table 7.6), with a further 123 per year from existing households falling into need (LHN Update Table 7.7).

2.12 It concludes that **net affordable (rented) housing need in St Albans is 449 per year**; up slightly from 443 assessed in the 2020 version of the study (as shown in LHN Update Table 7.11). It also identifies a **further need for 353 affordable ownership homes per year** in

St Albans (comprising First Homes, shared ownership and other intermediate tenures, see LHN Update Table 1.2). This brings the total affordable housing need to 802 per year, which equates to **91% of the overall housing need** indicated by the standard method.

2.13 This significant need for affordable housing reflects the prevailing housing market

circumstances in St Albans. As shown in Figure 2.1, the affordability ratio in St Albans has steadily worsened since the 2008/09 financial crisis. Prior to 2008/09, house prices in St Albans were around 10-11 times local earnings, and St Albans ranked around 15-20 (out of around 300 authorities in England) in terms of affordability. This was clearly substantially above the national or regional averages at the time, yet affordability has continued to worsen, placing severe pressure on affordable housing demands and limiting the ability of households to get onto the housing ladder. Affordability in 2023 now stands at around 18, with St Albans ranking 4th nationally (with only the London Boroughs of Westminster, Kensington & Chelsea and Richmond being less affordable). This compares with an affordability ratio of c.8 for England, 10 for the East region and 12 for Hertfordshire as a whole.

Figure 2.1 Affordability Ratio – St Albans and wider comparators – 2003-23

[Please see attachment for Figure]

2.14 St Albans' latest Annual Monitoring Report shows that on average over the last c.20 years the Council has seen 18% of all housing completions as affordable housing. If this rate of delivery were to continue, the Council would need to deliver nearly 4,500 homes per year to meet its affordable housing need in full. If delivery increased, in line with the emerging plan requirement for 40% affordable housing (as per Policy HOU2), this would still require just over 2,000 homes per year to meet affordable housing needs in full. Based on the current plan requirement (885 per year), delivery at 40% would indicate 354 affordable homes delivered each year; a shortfall against need of 448 affordable homes each year (in other words, less than half of affordable housing need being met). Over a 17-year plan period, this could create an affordable housing shortfall of nearly 8,000 homes.

2.15 The severity of affordable housing needs is clear cause for consideration of increasing overall housing need in the plan to help address this, in line with the PPG. Without such increases, the backlog and unmet need for affordable housing will only increase substantially over the plan period, resulting in greater pressures on the Council, growing waiting list and growing numbers in temporary accommodation (and associated costs to the Council). Lower paid workers in particular could also struggle to find housing close to their place of work, which could undermine local businesses and services.

**Recent Delivery Levels**

2.16 Historic delivery levels are important context for considering housing need in St Albans – not only delivery in St Albans itself, but delivery in similar areas as evidence for what could realistically be achieved. The Council has not adopted a plan since the 'District Local Plan Review' in 1994, and the housing requirement therein time-expired in 2001. Therefore historic delivery levels over the last 20 years in St Albans are essentially the result of solely windfall development (rather than planned growth). Furthermore, as an authority which is almost entirely Green Belt constrained, development to date in St Albans has not been fuelled by any significant scale Green Belt release and has been driven by development on brownfield sites; the Council's latest AMR shows that over the last 20 years 86% of housing development in St Albans has come from previously developed land (PDL).

2.17 Despite these apparently severe limitations on housing delivery, St Albans has achieved an average of 400 net dwelling completions per year since the mid-1990s, and in recent years (particularly prior to the pandemic) housing growth has reached a rolling five-year average of around 450 dwellings per year.

Figure 2.2 Historic net completions in St Albans and five-year rolling average

[Please see attachment for Figure]

2.18 Based on data produced by MHCLG[6], the overall rate of housing stock growth in St Albans over the last 20 years has been 0.8% per year (15% overall). This is only marginally lower than the national average, of 0.9% per year (18% overall). In other words, St Albans has been able to almost keep pace with national growth, despite being a highly constrained local authority with no plan in place.

[Footnote 6: MHCLG Live Table 125 Dwelling Stock by Local Authority]

2.19 Evidence of recent growth elsewhere demonstrates that significantly higher growth is wholly achievable for St Albans:

1 **Watford** – this is similar in geographic (insofar as its location relative to London), planning (insofar as its constraints, including Green Belt) and housing market terms to St Albans (in terms of poor affordability). However, Watford has had a plan in place for [at least] the last decade and has seen housing growth of 28%, or 1.4% per year over the last 20 years. If St Albans saw similar rates of growth, this would equate to c.900 dwellings per year. Watford's recently adopted local plan housing requirement is even more ambitious than past growth and equates to 1.8% housing growth per year[7]; if St Albans saw this rate it would equate to c.1.1,50 dwellings per year;

[Footnote 7: Available here– see Policy HO3.1 which plans for at least 784 dwellings per year, relative to stock of 42,946 in 2023 according to MHCLG.]

2 **Cambridge** – similarly this is a highly constrained (including Green Belt) authority with severe housing market pressures (being amongst the least affordable cities in England), yet it has seen housing growth of 32% (1.6% per year) over the last 20 years. This rate of growth in St Albans would equate to just under 1,000 dwellings per year. Like Watford, it is likely that Cambridge will further increase its rate of delivery through its emerging plan, although the precise quantum is to be confirmed;

3 **Dartford** – similarly, a highly constrained (including Green Belt) authority within London's wider housing market area, Dartford has adopted plans in both 2011 and in 2024. Over the last two decades it has seen housing growth of 33% (1.7% per year) making it one of the fastest growing authorities in England; and

4 **London Boroughs** – a number of London Boroughs have seen growth well in excess of the national average, at around 25-30% (or more) over the last 20 years, including Hackney, Islington, Newham, Southwark, Wandsworth, Westminster, Brent and Hounslow.

2.20 These authorities demonstrate that high rates of housing growth are entirely achievable in highly constrained areas which are similar in geographic, socio-economic and housing market terms to St Albans. They are evidence of the ability of areas to deliver housing well in excess of the national average where it is planned for. As St Albans is one of the areas of highest housing demand in England, there is no reason to believe that St Albans could not achieve – or exceed – these levels of delivery if it planned for it.

2.21 Recent delivery levels – both of St Albans itself (without a plan in place) – and similar areas in the wider south-east which are equally constrained and have similar housing market pressure, but which have had plans in place – are therefore evidence that St Alban's should be planned for more housing than indicated by the standard method.

**Unmet Needs**

2.22 The standard method figure does not represent the final housing requirement figure that should be planned for in an authority's area. Paragraph 35(a) of the NPPF identifies that for Plans to be considered 'sound' they should, as a minimum, seek to meet the area's

objectively assessed need, and be informed by agreements with other authorities so that unmet need from neighbouring areas is accommodated where it is practical to do so and consistent with achieving sustainable development.

2.23 In St Albans, the issue of unmet need from neighbouring authorities is also a relevant factor influencing how many additional homes the Council should plan for particularly as the NPPF specifically stipulates that such issues should not be deferred to a later date. The NPPF tests of soundness require that plans are:

*"deliverable over the plan period, and based on effective joint working on cross-boundary*

*strategic matters that have been dealt with rather than deferred" (NPPF 35c)*

2.24 St Albans is part of the established South West Hertfordshire Housing Market Area (SWH HMA) alongside Dacorum Borough Council, Hertsmere Borough Council, Three Rivers District Council and Watford Borough Council. St Albans is working with these authorities to deliver a Joint Strategic Plan (JSP) for South West Hertfordshire. Consultation on a 'Vision Statement' was held in 2022 and this has subsequently been adopted, although this document itself does not comprise the Strategic Plan[e] (and therefore it does not, for example, establish the distribution of housing or unmet needs across the area).

[Footnote e: The Foreword of the Vision Document, here, states "Publication of this vision marks an exciting step in preparing a Joint Strategic Plan, which will set out our approach to the long term planning of our area to 2050"]

2.25 Notwithstanding, the issue of distributing housing needs is one the area will need to be grappled with. The most significant pressures of unmet need will likely arise from:

1 **Three Rivers** – In October 2018 Three Rivers Council undertook its fourth Regulation 18 consultation on what it termed its 'Preferred Lower Housing Growth Option' local plan[9]. This plan set out that over the period 2023-41 the Council would plan for 270 homes per year – less than half its current standard method figure of 640 per year. Over the plan period, the shortfall would equate to nearly 7,000 homes; and

2 **Hertsmere** – Hertsmere Council undertook additional public consultation on its plan in April 2024 which proposed to amend the housing supply from a number of its strategic sites (this was not a re-consultation on the plan overall). This consultation[10] set out that the Council is now planning to meet approximately 75% of its standard method need, delivering c.590 homes per year (or 9,400 homes in total from 2025-41). With Hertsmere's current standard method figure standing at 731 per year, the total shortfall over Hertsmere's plan period would equate to c.2,250 homes

2.26 These are summarised in Table 2.3 below, and collectively would yield nearly 9,000 homes of unmet need in the SWS HMA by 2041. These are unmet needs that are known now (and have already been accruing historically) however by not addressing these needs now, the authorities are effectively deferring the issue of unmet need contrary to the NPPF para 35(c).

Table 2.3 Summary of unmet need arising from Three Rivers and Hertsmere

[Please see attachment for Table]

2.27 The issue of unmet need in the HMA will only worsen, as set out below. **Future Changes to the NPPF**

2.28 In July 2024, the Government published its proposed changes to the NPPF, including proposed changes to the standard method. Its proposed transitional arrangements state that where plans have been submitted for examination (Reg 22) by [publication date + one month] that the policies in the previous – December 2023 – Framework apply.

2.29 We note St Albans' intention to submit the plan for examination in December 2024, and thus the current standard method applies. However, if for any reason there is a delay, St Albans will likely be required to commence plan-making under the new Framework, in which case the proposed standard method figure – 1,544 dwellings per year – would apply. This figure would also apply if, for any reason, the St Albans plan were found to be unsound (or otherwise withdrawn) and the Council had to commence preparation of a new plan.

2.30 However, even if the Council submits its plan under the current framework, the proposed NPPF transitional arrangements also state that:

*"Where paragraph 226 c) applies, local plans that reach adoption with an annual housing requirement that is more than 200 dwellings lower than the relevant published Local Housing Need figure will be expected to commence plan-making in the new plan-making system at the earliest opportunity to address the shortfall in housing need." (proposed NPPF, July 2024, para 227)*

2.31 St Albans' proposed standard method figure is clearly well over 200 homes per year more than its current figure (1,544 per year would equate to 660 dwellings per year more than the current figure of 885). Therefore, if it successfully submits and adopts its current draft plan, the Council would still be expected to commence plan-making under the new framework at the earliest opportunity, likely in the form of an immediate review. The emphasis in para 227 is clear that the Government would like to see plans reviewed as early as possible, in order to support the Government's objective of delivering 1.5 million homes over the course of this Parliament.

2.32 The scale of difference between St Albans' current housing need and that under the proposed standard method, coupled with the urgency placed by Government on areas commencing an early review, is yet further evidence that the Council should be exploring meeting its current uncapped figure so that the plan meets current needs (the testing of which is required by the PPG) and is sufficiently 'future-proofed' against the rise in housing needs in the future.

2.33 The proposed changes to the framework are therefore the second clear indication that the Council needs to commit to an early review of the plan. Not only should it commit to an early review under the current system (reflecting the current PPG which states an early review may be required where housing need is capped – which is the case in St Albans) but the transition to a new framework also would require St Albans to undertake an early review in order to deliver its additional housing needs (as indicated by the proposed standard method).

**Implications for unmet need**

2.34 Furthermore, the increase in housing needs across the wider area under the proposed standard method has potentially significant implications for the quantum of unmet needs that exist in the neighbouring areas. This is particularly important given that upcoming reforms are likely to introduce strategic planning (formalised in legislation), and the proposed Framework includes additional emphasis on cross-boundary working, including new and emphasised policies related to plan-making and unmet need as part of 'maintaining effective co-operation'. The increase in housing needs across the HMA could amount to:

1 In Three Rivers, the standard method figure would increase by c.100 dwellings per year, from 640 to 739. Over the 18-year plan period, this equates to a further c.1,800 dwellings of unmet need (on top of the c.6,700 that already exists), totalling around **8,500** homes of unmet need;

2 In Hertsmere, the standard method figure would increase by c.230 dwellings per year, from 731 to 959. Over the 16-year plan period this equates to a further c.3,700 dwellings of unmet need (on top of the c.2,250 that already exists), totalling around **6,000** homes of unmet need; and

3 In Dacorum, the standard method figure would increase by c.300 per year, from 1,016 to 1,313. Over a 15 year period this would yield around **4,500** homes of unmet need.

2.35 Collectively, these would yield around **19,000** homes of unmet need in the HMA. This further highlights the urgency of ensuring the St Albans plan meets as much housing need now as is sustainably possibly and commits to an early review to address housing needs.

**Housing Requirement**

**Options Tested in the SA**

2.36 The Sustainability Appraisal (SA) sets out the options explored for the purposes of the plan, based on different levels of housing delivery. It tests options for the delivery of up to c.16,400 homes (equivalent to 1,025 per year, as it applies over 16 years) which is 16% above the standard method figure (these are scenarios 6 and 8 in the SA). The Council's preferred option is scenario 3, which is 15,000 dwellings, or 3% above the standard method.

2.37 Figure 2.3 shows the summary of scenarios within the SA from the Non-Technical Summary[11]. It shows that in terms of:

1 **Accessibility**, scenario 8 (12% above standard method) performs equally as positively as the preferred option (scenario 3 – 3% above the standard method), with significant positive effects. Whilst scenario 6 (also 12% above the standard method) carries slightly lesser positive weight, it is nonetheless positive;

2 **Air quality**, similarly, scenario 8 performs equally as well as the preferred option, with scenario 6 performing neutrally;

3 Both **biodiversity** and **climate adaptation**, scenarios 6 and 8 perform the same as the preferred option – all being neutral;

4 **Climate mitigation**, all three have limited/uncertain negative effects, but scenarios 6 and 8 perform better than the preferred option;

5 **Communities and health**, all three have limited/uncertain positive effects;

6 **Economy and employment,** all three have significant positive effects;

7 **Historic environment**, whilst there is a limited/unknown negative effect in scenario 6, both scenario 8 and the preferred option are neutral;

8 **Homes**, scenario 8 carries significant positive effect, whilst scenario 6 and the preferred option have limited/uncertain positive effects;

9 **Land, soil and resources**, all scenarios perform equally/neutral;

10 **Landscape**, the preferred option is the only scenario which carries a neutral effect. All other scenarios, including 6 and 8, carry limited/unknown negative effects;

11 **Transport**, the preferred option and scenarios 6 and 8 carry the same effects – limited/uncertain positive; and

12 **Water,** the preferred option has a neutral effect, whereas scenarios 6 and 8 have limited/unknown negative effects.

2.38 Taken as a whole, and when considered against the backdrop of the severe housing need pressures that exist in St Albans, this assessment would suggest that the Council can sustainably plan for housing need of at least up to 12% more than the standard method, if not more. The current SA does not identify any significant negative effects of the highest housing scenario it tested, and even where it identified limited or unknown negative effects, in the case of climate mitigation this is also the case for the preferred scenario. The areas for which the SA has identified unknown or limited negative effects for the higher scenarios (which are neutral in the preferred scenario) are landscape and water. In relation to these two topics, we note that:

1 In relation to **landscape**, the SA notes that "*the primary concern is recorded as allocating both sites [on the edge of St Albans], as it can be envisaged that there would be in combination effect resulting from strategic expansion of St Albans to the north, east and southeast (albeit the most sensitive landscape, to the west, would be protected*" (SA NTS). Therefore, the potentially negative (albeit limited/unknown at this stage) arises due to the specific sites included in the scenario, as opposed to being a general impact from the overall quantum of development. It is possible that the plan could achieve a neutral landscape impact from a higher housing growth scenario through careful site selection. In any event, the Council will need to consider the degree to which some limited landscape harm may be necessary to address the urgent need for housing, or balance other factors (for example, scenario 6 ranks better in terms of climate mitigation effect than the preferred scenario) taking into account NPPF Para 11 b); and

2 In relation to **water**, the SA states that "*there is limited available evidence, but it is appropriate to flag a concern with higher growth in light of the Environment Agency's 2023 consultation response*." Therefore, it would not be proportionate or consistent with NPPF Para 11 b) to rule out higher growth scenarios now, on the basis of potential water impacts, based on this limited evidence.

2.39 Given the SA does not identify any significant negative effects associated with higher levels of development, and any areas where it has identified limited or unknown negative effects do not warrant ruling out higher scenarios, the SA should test scenarios of higher housing growth to understand whether higher growth can be sustainably accommodated. These higher scenarios would represent reasonable alternatives, in light of the housing pressures faced in St Albans, and therefore at present the plan is not sound because it is not justified (an appropriate strategy, taking into account the reasonable alternatives) as required by NPPF para 35b.

Figure 2.3 Summary appraisal of the reasonable growth scenarios

[Please see attachment for Figure]

**Summary**

2.40 The Council has correctly identified its minimum local housing need figure based on the standard method, which underpins Policy SP1. However, this minimum figure does not represent the final housing need or requirement that should be planned for, because:

1 The **current minimum need standard method figure for St Albans is capped**, and the 'uncapped' figure is 285 dwellings per year more than the capped figure. PPG is clear that the cap does not reduce need, and that Councils should consider whether 'true' uncapped need can be accommodated (if not, an early review may be required), but the Council has not done so;

2 The Council's own evidence shows an **acute affordable housing need**, amounting to over 90% of overall need. At the current level of overall delivery, the plan would meet (at most) less than half its affordable needs. PPG is clear that an increase in housing numbers in the plan should be considered where it can help deliver more affordable housing, but the Council has not done so;

3 **Recent delivery levels**, from both St Albans and elsewhere, show that it is wholly achievable for the district to see housing growth well above its current standard method figure. Market signals show that St Albans is the area of highest housing demand outside London (as indicated by the affordability ratio), and this has become even more acute in recent years;

4 There is an existing amount of known **unmet need** in the HMA, primarily arising in Three Rivers and Hertsmere, amounting to nearly 9,000 homes. Despite being known, these needs are being deferred, contrary to NPPF para 35(c); and

5 The Sustainability Appraisal has not explored **reasonable alternatives**, insofar as it is entirely reasonable (and indeed necessary) for the Council to explore higher housing growth options. Notwithstanding, the highest housing growth scenarios currently in the SA have been ruled out despite having very limited negative effects. The plan is therefore contrary to NPPF para 35(b).

2.41 Notwithstanding the above, it is imperative that the Council commits to an early review of the plan, because:

- This is required under the current framework (current PPG) which sets out that an early review may be required if an authority progresses a plan with a capped standard method figure. In St Albans, the uncapped need is significantly higher, warranting an early review; and
- In any event, this will be required under the proposed transitional arrangements for the revised framework, which will require authorities to review their plan as quickly as possible if the proposed standard method figure is more than 200 dwellings per year higher than their current figure.

2.42 As currently drafted, the plan is therefore not 'sound' because it fails to address paras 35(b) and 35(c) of the framework. In broader terms, it is also unsound in regard to para 35(d) insofar as is it not consistent with national policy, because it does not enable the delivery of sustainable development (as it does not "*aim to meet as much of an area's identified housing need as possible*", as required by NPPF para 60).

## 3.0 Housing Supply and Spatial Strategy

### Overview of Housing Supply

3.1 The NPPF (2023) makes clear that to support the objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed, and that the overall aim should be to meet **as much of an area's identified housing need as possible** (Para 60). Strategic policies should therefore identify a sufficient supply and mix of sites, taking into account their availability, suitability and likely economic viability (Para 69); this includes a supply of:

a specific, deliverable sites for five years following the intended date of adoption (in this case, the intended date of adoption is March 2026[12]); and

[Footnote 12: SACDC Local Development Scheme (September 2024) available here]

b specific, developable sites or 'broad locations for growth' for the following years 610 and where possible, for years 11-15 of the remaining plan period.

3.2 As set out earlier, to meet the standard method figure of 885 dpa, the Spatial Strategy Regulation 19 Plan seeks to deliver at least 14,603 net additional new homes over the **16.5-year period from 1 October 2024 to 31 March 2041.** This is based on the Settlement Hierarchy in Table 1.3 of the draft Plan, which provides the basis for allocation and location of growth, directing most growth within or adjacent to the larger and most sustainable urban centres of St Albans and Hemel Hempstead, Harpenden, and London Colney. Broad locations (large urban extensions comprising 250 or more homes) are also identified in Table 3.1 of the draft Plan, with a minimum residential capacity of 8,731 new dwellings within the plan period – representing 60% of growth. The Hemel Garden Communities represent 29.5% of growth.

3.3 This is shown in Table 3.1 below and includes the NWH site for 293 new dwellings. To accommodate the allocation of these Broad Locations (among other sites), the release of Green Belt land is proposed in a number of locations across the district.

Table 3.1 Broad Locations allocated in the Regulation 19 Local Plan

[Please see attachment for Table]

### Housing Trajectory

3.4 Table 3.2 of the Draft Plan sets out a trajectory illustrating the expected rate of housing delivery over the plan period (copied below in Table 3.2). NPPF Paragraph 75 states that all plans should consider whether it is appropriate to set out the anticipated rate of development for specific sites; Table 3.2 splits the trajectory out into different sources of supply, including the Hemel Garden Communities and all other Broad Locations.

3.5 Overall, the housing trajectory identifies a total supply of 14,989 dwellings over the plan period, which represents a marginal overall 2.6% buffer over the total housing requirement of 14,603 new homes. The plan explains that the housing trajectory has been stepped to allow sufficient time for the significant uplift in housing delivery to be realistically delivered. The stepped housing requirement is as follows:

a 389 dpa in the first 1.5 years (October 2024 to March 2026), with supply from permitted sites and estimated future completions (applying an 8% lapse rate);

b 485 dpa in the first five years of post-adoption (March 2026 to 2031), with supply including permissions, windfalls allowance, and delivery from Local Plan site allocations from year 2029/30;

c 1,255 dpa in years 6-10 of the plan post-adoption (March 2031 to 2036), with ongoing supply from permissions, windfalls, and allocations; and

d 1,025 dpa in the final years 11-15 of the plan (March 2036 to 2041), with supply from windfalls and the remaining capacity at the Hemel Garden Communities and other Broad Locations.

3.6 Having regard to recent delivery levels (see Figure 2.2 above), whereby the district has achieved an average of around 400-450 net dwelling completions per year, this conservative stepped approach – only reaching a significant uplift in housing delivery from 2031, five years after adoption of the plan – may be justified.

Table 3.2 St Albans City and District Council Regulation 19 Local Plan Housing Trajectory

[Please see attachment for Table]

3.7 However, the trajectory must be as realistic as possible, and as currently drafted there are concerns in relation to the buffer, timing of delivery and build out rates contained therein. This is discussed below.

**Broad Locations and Hemel Garden Communities**

3.8 As set out above (see Table 3.1) the Draft Plan seeks to allocate 12 Broad Locations, of which four comprise the 'Hemel Garden Communities' ('HGC'). These are expected to deliver 4,300 homes in the plan period (with a further 1,200 homes delivered beyond the plan period by 2050). This represents a reduction in supply from the Regulation 18 consultation, which allocated 4,750 new homes from HGC in the plan period (-450 homes).

3.9 As noted in our previous representations to the Regulation 18 consultation, despite HGC being split into four sites within the Draft Plan, it is understood that HGC is being brought forward by the landowners and partners for the site as part of a cohesive development. Draft Policy LG1 (Broad Locations) also requires a coordinated, masterplanned approach to proposals within Broad Locations, and Draft Policy LG2 (Support for Transformation of Hemel Hempstead) requires: all development at HGC to be in accordance with HGC Concept Plan and Design Codes; developers to secure a collaboration agreement with each other and the Council to ensure an integrated and seamless approach across site application boundaries; and critical infrastructure to be delivered ahead of occupation.

3.10 While the updated trajectory in the Regulation 19 Plan delays delivery to commence a year later, in 2029/30, this remains overly ambitious, and the expected rates of delivery are unchanged and therefore still very high: starting at 100 dpa in 2029/30 and increasing to a peak of 500 dpa in 2038/39. While the Council's Housing Land Supply, Windfall and Housing Capacity Evidence Paper (September 2024) explains that SACDC's approach to build out rates

is generally informed by the methodology in the Lichfields Start to Finish ('StF') (third edition) 2024 report, it confirms that an alternative approach is used for build out rates for the HGC housing site allocations because of 'the unique scale and nature of the HGC programme' which includes 11,000 homes across both the SACDC and Dacorum Borough Council (DBC) areas – with Start to Finish including 'limited examples beyond 5,000 homes in size'. The Evidence Paper states that the HGC trajectory has instead been informed by case studies (e.g. Milton Keynes, Ebbsfleet Garden City, and Northstowe in Cambridgeshire), and input from stakeholders including Homes England, Hertfordshire County Council, the Crown Estate and others. It also points to other factors influencing higher build out rates on very large-scale sites in St Albans, such as diversified housing types and tenures, higher demand and increased outlets.

3.11 There may be some merit in this approach, but the lead-in times and trajectory for HGC are still not considered to be justified or effective as the Housing Land Supply, Windfall and Housing Capacity Evidence Paper is not based on proportionate evidence and does not demonstrate that the assumptions will be deliverable over the plan period.

3.12 Lichfields StF research published in September 2024 acknowledges that its conclusions may not be applicable in all areas or on all sites. Notwithstanding, it provides a good understanding of real-world examples and evidence on absorption rates, and there are three key relevant considerations applicable to HGC, as follows:

1 In reality, the HGC site allocation(s) – totalling 5,500 homes – will be brought forward separately, across multiple major planning applications and delivery vehicles, under different landowners/promoters and developers. Even if each of the three HGC Broad Locations for residential development were treated separately, the analysis set out in StF (see Figure 4.1) demonstrates that East Hemel Hempstead (South) could be expected to deliver c. 100-188 dpa, and East Hemel Hempstead (North) and North Hemel Hempstead could be expected to deliver c. 74-130 dpa, based on average annual build-out rates by respective site size. This indicates a maximum build rate of 448 dpa across the SACDC HGC sites. If the HGC allocations were treated as one in the trajectory, as they are, a realistic maximum average delivery figure would be c.325 dpa based on StF findings.

2 Some schemes can – and do – achieve very high rates of build-out in particular 'peak' years. For example, StF shows that five large sites (including Cambourne new settlement and Ebbsfleet Garden City) achieved a peak high annual build out rate of between 520 to 620 dpa in one given year. The analysis clearly found that this rate of delivery is anomalous and not sustained, with average annual build out rates for these sites significantly lower, between 162 to 255 dpa.

3 While average annual completions clearly increase with additional outlets, average completions per outlet decrease at the same time. For instance, StF finds that a site with five outlets (i.e. five phases being built out in parallel by different housebuilders) can be expected to deliver 286 dpa in total, with average completions per outlet at 57 dpa.

3.13 On this basis, the build out rates in the trajectory for the Hemel Garden Communities Broad Locations are considered overly ambitious, particularly those presented in years 2036/37 onwards. The Housing Land Supply, Windfall and Housing Capacity Evidence Paper does not provide sufficient evidence to demonstrate why delivery at this location would be significantly higher than precedents elsewhere. There is no evidence that the site allocations will be able to achieve the high build out rates set out in the trajectory, and there is no evidence of such sustained high build out rates, even on greenfield sites with multiple outlets in strong housing markets.

3.14 In addition, Lichfields StF research (2024) finds that sites of 1,500-2,000 dwellings have a planning approval period of five years on average, with a further planning to delivery period of 1.6 years. For sites over 2,000 units, this changes to 5.1 years and 1.5 years respectively, but amounts to a total average period of 6.6 years between validation of the first planning application to completion of the first dwelling. Even assuming that planning applications

at the proposed HGC site allocations were submitted upon adoption of the plan (which in itself is challenging considering the intended date of adoption is March 2026 and the site requirements and masterplanned approach that needs to be agreed), this evidence indicates that first completions could realistically be expected in 2032/33.

3.15 On the basis of the above, we set out below in Table 3.3 an amended, updated trajectory for HGC which takes into account realistic lead-in times and build-out rates. This demonstrates that by applying realistic assumptions to the trajectory based on Lichfields' Start to Finish research, the total delivery during the plan period can be expected to be c. 2,475 units within the plan period. This is a reduction of 1,925 units in the trajectory which has significant implications for SACDC's ability to meet its housing requirement over the plan period.

3.16 It is also noted that the other Broad Locations are included in the trajectory, with delivery commencing in 2031/32 and increasing to a peak of 500 dpa. However, individual sites in this category are not identifiable and the trajectory does not therefore adequately identify the expected rate of housing delivery from individual sites as would be expected at this stage in plan development. It follows that it is not possible to draw up to date conclusions regarding whether identified delivery/build out rates are justified or achievable for the other Broad Locations included in the supply.

Table 3.3 Suggested amended trajectory for Hemel Garden Communities (**2026/27-2040/41**)

[Please see attachment for Table]

3.17 As noted above, in the Draft Plan, SACDC is reliant on Broad Locations to deliver 60% of the total housing requirement – half of which comprises the HGC. The NPPF (para 74) states that '*the supply of large numbers of new homes can often be best achieved through planning for larger scale development, such as new settlements or significant extensions to existing villages and towns*.' However, the same paragraph also emphasises that authorities must make a realistic assessment of likely rates of delivery, given the lead-in times for large scale sites. Overall, it is considered that the trajectory, and the evidence supporting it, is not realistic or sufficiently robust. It is overly ambitious when compared against evidence of housing delivery on a national scale, and no clear evidence has been provided to justify the significantly quicker lead-in times and higher rates of delivery expected at this location.

3.18 For the plan to be considered sound, SACDC should reconsider this trajectory. Absent adequate proportionate evidence to justify its current approach this will, as set out in Table 3.3 above, likely to result in a deficit in housing delivery over the plan period, and SACDC will need to consider how this can be resolved. This should include a review of other allocation sites including the remaining Broad Locations (such as land at NWH), which may have additional capacity and are relatively smaller sites that could come forward more quickly. This is particularly important given the marginal buffer currently included within the overall housing trajectory (2.6%); additional supply should be available to provide at least a greater headroom (oversupply) or to realise a higher annual target. At present in either scenario the headroom/oversupply is not considered adequate to provide sufficient flexibility; it would only take one or two components of the proposed supply not coming forward as envisaged for the overall housing requirement to be missed by a significant margin.

**Establishing Exceptional Circumstances**

3.19 Paragraph 145 of the NPPF states that authorities may alter Green Belt boundaries where exceptional circumstances are fully evidenced and justified, through the preparation or updating of plans. Paragraph 146 goes on to set out that before concluding that exceptional circumstances exist to justify changes to Green Belt boundaries, the authority should demonstrate that it has examined fully all other reasonable options for meeting its identified need for development. The Regulation 19 plan – at para 3.19 – confirms that the Council's strategy has followed the NPPF requirements, including:

a Making as much use as possible of suitable brownfield sites and underutilised land;

b Optimising the density of development; and

c Being informed by discussions with neighbouring authorities about whether they could accommodate some of the identified need for development (as demonstrated through the statement of common ground).

3.20 The supporting Green Belt and Exceptional Circumstances - Evidence Paper (September

2024) explains that the draft Plan has undertaken an extensive and rigorous search for PDL opportunities both within existing built-up areas and in the Green Belt, applying a 'no stone unturned' approach in its search. As such, Officers have concluded that exceptional circumstances exist which justify amending Green Belt boundaries to meet housing need. This has also been informed by an acute affordable housing need (see para 2.11 above), a lack of five-year housing land supply (1.7-year 4YHLS as of April 2023)[13], a failure of the Housing Delivery Test (55%, 2022 result), and difficulties in delivering sustainable development without impinging on the Green Belt (with an identified total urban capacity of just 2,174 dwellings[14]).

[Footnote 13: SACDC Authority Monitoring Report 2023 available here]

[Footnote 14: SACDC Housing and Economic Land Availability Assessment 2021 available here]

3.21 The Regulation 19 Plan is therefore sound in concluding that exceptional circumstances

exist to justify the release of Green Belt land in the district. It is clear that the Council has met the tests set out in paragraph 146 of the NPPF by making as much use as possible of land in urban areas and optimising the density of development. As set out above (para 2.34), SACDC is not able to rely on neighbouring authorities to assist with any unmet need, and the district is highly constrained with over 81% of its land classified as Green Belt. Therefore, it is entirely appropriate for the Council to release land from the Green Belt to meet housing need and exceptional circumstances exist to justify this.

3.22 Having established that exceptional circumstances exist for altering the Green Belt

boundaries and in view of the significant need, it is therefore necessary for the Council to establish a suitable 'tipping point' where (in line with NPPF para 11b), there is a strong reason for restricting development, or any adverse impacts of development would significantly and demonstrably outweigh the benefits. In practical terms, this requires SACDC to establish the point at which the adverse impacts of releasing Green Belt land outweighs the benefits, and/or a strong reason for restricting development emerges. The Council has sought to justify through the SA the specific choices it has made over whether or not exceptional circumstances exist – or not - for each of the Green Belt releases proposed. As discussed above, it is considered that the SA has not explored **reasonable alternatives**, insofar as it is entirely reasonable (and indeed necessary) for the Council to explore even higher housing growth options. This applies at both a macro level (across the District) but also at a site allocation level, including at NWH, where the site as a whole was proposed for release for development in previous draft local plans, but is now proposed for release only in part.

3.23 In this context, and having considered the evidence, it is considered that SACDC has not established an appropriate tipping point (i.e. the maximum amount of Green Belt release on potential site allocations). It is widely acknowledged that there are a number of benefits associated with Green Belt release, including:

1 Delivering a greater mix of homes including the provision of family housing;

2 Delivering a higher proportion of affordable housing due to less complex viability considerations;

3 Ability to deliver significant areas of public open space for existing and future residents' use;

4 Typically able to commence on site quickly to assist with housing supply in the early years of the plan period, whereas complex brownfield sites may have more issues to resolve; and

5 Overall, boosting housing supply to assist with meeting the significant housing need within the area.

3.24 In order to be consistent with the NPPF, the Spatial Strategy should maximise development in the district (including the release of Green Belt land) up to the point that its benefits are outweighed by its adverse impacts, specifically harm to the Green Belt. For land at NWH, SACDC recognise it is a sustainable location for development but infer (by allocating only part of the site) that beyond the extent of the draft allocation, significant harm to the Green Belt purposes would provide a strong reason for not meeting need. This was a point raised within our representations to the Reg 18 consultation in relation to concerns regarding the scale of draft allocations based on the Green Belt assessment and is discussed further in the remaining section of these representations.

**Summary**

3.25 The Spatial Strategy seeks to meet the housing requirement of 14,603 new homes over the plan period. In order to meet this target, Green Belt release is proposed in a number of strategic locations, including at NWH, the most significant of these being the proposed HGC development. SACDC has correctly identified that exceptional circumstances exist for releasing land from the Green Belt within the District, to meet the acute housing need.

3.26 However, it is considered that SACDC is overly reliant on HGC to deliver almost a third of the total housing requirement over the plan period. In order to justify the quick lead-in times and high delivery rates proposed, very robust evidence must be provided to demonstrate that these are achievable. Comparing the proposed trajectory to Lichfields' widely cited Start to Finish research identifies that a more realistic trajectory would deliver c. 2,475 new homes at HGC. This is 1,925 homes fewer than the draft trajectory. It is important that the trajectory is robust, supported by the best available evidence and realistic, to give SACDC and in due course, the Inspector, confidence in its conclusions.

3.27 On this basis the trajectory is considered to be unsound in its current form and needs to be reconsidered. Reviewing the extent and capacity of the Broad Locations such as NWH could assist with meeting this identified shortfall. There is a compelling case that Broad Locations and other site allocations (or increases in proposed site allocations) should be released from the Green Belt to optimise housing delivery from these sites and assist in closing the gap between the 'true housing need' and the proposed housing requirement, and thereby reduce the scale of unmet need that is not currently being addressed elsewhere.

## 4.0 Green Belt Review

4.1 The supporting evidence base for the Regulation 18 Local Plan included a 'Stage 2 Green Belt Review (June 2023) ('GBR') prepared by Arup. This review was the latest in a number of Green Belt assessments which have been undertaken to inform a subsequent Local Plan review.

4.2 L&G's representations to the Regulation 18 Local Plan included a review of the GBR undertaken by LDA Design who are responsible for master planning the current planning application and the associated documents including the parameter plans, Design Code, Green Belt Assessment and the Landscape and Visual ES Chapter.

4.3 LDA's review identifies a number of concerns about the GBR in relation to its assessment of the Site at NWH which can be summarised as follows:

1 The way the sub-areas have been defined, ignoring the ridgeline separating the Luton Road valley from the River Lee valley, which is the key topographical feature which has driven the identification of the extent of land within the planning application proposals.

2 The GBR's failure, having defined the sub-areas, to assess how the southern part of SA-20 performs differently from the remainder of the sub-area, and to consider the release of the southernmost part of SA-20 separately from the remainder of the sub-area, notwithstanding that the GBR does consider the release of parts of other sub-areas.

4.4 The consequence of these failings is that, despite the GBR acknowledging the importance of assessing sites promoted in the Call for Sites and the subsequent emerging Local Plan, it has failed to provide a proper assessment of the land at NWH. Therefore, L&G's previous representations concluded that the GBR cannot be solely relied on as robust evidence to inform the merits of the site.

4.5 It is noted that the current consultation on the Regulation 19 Draft Local Plan includes the GBR as part of the evidence base, alongside the previous Green Belt Review which was undertaken in 2013. However, following the Regulation 18 Local Plan consultation and the comments received, no further Green Belt review or additional assessments have been undertaken to address or response to the deficiencies within the GBR.

4.6 The current consultation does not seek to provide further evidence or explanation as to how the failures within the latest GBR in relation to the definition of sub-areas and recognition of the key topographical features have been translated into the draft site allocations.

4.7 It is not therefore clear or appropriately explained how the extent of the Draft Site Allocations are justified in relation to the evidence in relation to the Green Belt Review. This is particularly relevant considering that SACDC's own previous reviews of the Green Belt came to a different conclusion regarding the site at NWH enabling the whole of the site to be proposed for allocation in the previous draft local plans.

4.8 Two related studies were undertaken by SKM: Green Belt Review Purposes Assessment, 2013 and Green Belt Review: Sites and Boundaries Study, 2014. Section 6 of the 2014 review concluded that the only Green Belt purpose which the Site at NWH contributes towards is the safeguarding of the countryside from encroachment. Partial contribution is made towards checking sprawl. The site was considered to make limited or no contribution toward preventing merging and preserving setting and maintaining the existing settlement pattern. The fifth purpose (Purpose e) is excluded from the assessment for reasons set out within the report.

4.9 The 2014 review concluded that the site is less sensitive in Green Belt terms and comprises a 'Tier 2' site and is therefore identified as most suitable for potential Green Belt release and future development. This assessment took account of the entire site's contribution towards Green Belt purpose and also environmental, historic constraints, landscape sensitivity and capability of integration into existing settlements.

4.10 The public law principle of consistency requires plan-makers to treat situations alike and grapple properly with the reason for any disagreement with an earlier inconsistent approach. The June 2023 GBR does not provide robust or sufficient justification for reaching a different conclusion regarding the site at NWH from those in previous studies. Therefore, it is considered that that the Draft Local Plan is not sound and is not justified as it is not based on proportionate evidence or take account of reasonable alternatives.

...

...

## 6.0 Summary and Conclusions

6.1 Whilst L&G support elements of the Draft Local Plan, our review of the plan and the supporting evidence leads our client to conclude that the draft Local Plan does not meet the tests of soundness required for a Local Plan. In particular:

- The plan has not been *positively prepared* as it does not meet the area's objectively assessed need, including unmet need from neighbouring areas.
- The plan is not *effective* in delivering over the plan period by providing the appropriate number of homes.
- The assumptions around housing trajectory are not *justified* and are not based on proportionate evidence.
- The Green Belt assessment is deficient and as such the plan is not *justified* in terms of how the evidence has informed the production of the plan.
- The plan is not *consistent with national policy* as it does not deliver sustainable development in accordance with the policies in the framework.

6.2 L&G believes the proposed North West Harpenden allocation should be increased in scale, so that it reverts back to that which was proposed in previous emerging Local Plans, consistent with previous Green Belt reviews and the current application boundary. This approach is justified by the following:

1 The current standard method figure for St Albans is capped and has been calculated as 885dpa. The 'uncapped' figure is 285 dwellings per year more than the capped figure. PPG is clear that the cap does not reduce need, and that Councils should consider whether uncapped need can be accommodated (if not, an early review may be required). The Council's own evidence shows an acute affordable housing need, amounting to over 90% of overall need. At the current level of overall delivery, the plan would meet (at most) less than half its affordable needs. PPG is clear that an increase in housing numbers in the plan should be considered where it can help deliver more affordable housing.

2 Recent delivery levels, from both St Albans and elsewhere, show that it is wholly achievable for the district to see housing growth well above its current standard method figure. Market signals show that St Albans is the area of highest housing demand outside London (as indicated by the affordability ratio), and this has become even more acute in recent years; There is an existing amount of known unmet need in the HMA, primarily arising in Three Rivers and Hertsmere, amounting to nearly 9,000 homes. Despite being known, these needs are being deferred, contrary to NPPF para 35(c).

3 The Sustainability Appraisal has not explored reasonable alternatives, insofar as it is entirely reasonable (and indeed necessary) for the Council to explore even higher housing growth options. Notwithstanding, the highest housing growth scenarios currently in the SA have been ruled out despite having very limited negative effects. The plan is therefore contrary to NPPF para 35(b).

4 A review of the housing trajectory within the draft Local Plan concludes that some of the assumptions are not realistic or robust, particularly on the Garden Community proposals. On these, the assumed rates of lead-in and build out rates are overly ambitious when compared against evidence of housing delivery on a national scale. When applying more realistic assumptions to the trajectory the total delivery during the plan period reduces by 1,925 which clearly has significant implications for SACDC's ability to meet the housing requirement over the plan period and leaves a shortfall.

5 We agree with the Council's conclusion that exceptional circumstances exist to justify the release of Green Belt land to meet the acute housing need. However, it is considered that SACDC is overly reliant on HGC to deliver almost a third of the total housing requirement over the plan period. In order to justify the quick lead-in times and high delivery rates proposed, very robust evidence must be provided to demonstrate that these are achievable. It is important that the

trajectory is robust, supported by the best available evidence and realistic, to give SACDC and in due course, the Inspector, confidence in its conclusions. On this basis the trajectory is considered to be unsound in its current form and needs to be reconsidered.

6 It is considered that SACDC has not established an appropriate tipping point (i.e. the maximum amount of Green Belt release on potential site allocations. In the case of NWH, the draft plan recognises that it is a sustainable location for development but, by proposing to allocate only part of the site that was promoted (and which had been a proposed allocation in previous draft plans), it infers that the Council has identified a 'strong reason' related to the unallocated part of the site that justifies why it should not be released to help address those needs (either now, or in the future, based on permanent Green Belt boundaries). L&G does not believe the evidence supports the Council's tipping point.

7 In the case of NWH, L&G's view – supported by evidence it has submitted with its current planning application – is that the site boundary in the planning application is the most suitable boundary for the emerging allocation; it has been determined with regard to a detailed assessment of the landscape and Green Belt considerations. It is a boundary consistent with, and supported by, previous Council assessments undertaken to inform previous drafts of the Local Plan. To not allocate the whole of the site for development does not make optimal use of the potential of the site, as required by para 129 of the NPPF.

8 L&G is committed to the delivery of NWH and the creation of a high quality residential scheme which will meet the need of Harpenden and St Albans. NWH is a self-contained development without major upfront infrastructure costs, and L&G is able to deliver the scheme quickly and make a contribution to SACDC's housing supply in the short term. This is demonstrated through the submission of the planning application which has been informed by analysis of the existing site, its context, landscape and Green Belt impact. The benefits to be gained – both locally and strategically - by allocating the wider site for development are significant and outweigh any additional harm to the Green Belt that might arise.

6.3 Therefore, taking in the above into account it is therefore requested that draft site allocation for NWH (B7) is extended so that it aligns with the current planning application and previous draft allocations. The allocation of the whole of the site for residential development is appropriate and consistent with national policy and an assessment of the Green Belt. The benefits which will be delivered by the larger site are considerably greater than the current draft allocation.

6.4 Finally, it is noted that it is SACDC's intention to Submit the Plan for Examination on 29 November 2024. The consultation on the plan closes on 8 November 2024. This therefore only allows 15 working days between the receipt of consultation responses and the submission of the final plan for examination. Firstly, it is not clear how SACDC could feasibly review all of the consultation comments which would be expected in response to the draft Local Plan within this time period. The Regulation 18 consultation attracted 955 individual responses from residents, resident organisations, groups and organisations, landowners and Councillors. It is considered that 15 days is a wholly inadequate amount of time to allow for the review of this level of consultation responses alongside a consideration of potential changes to the plan. Secondly, based on the inadequate amount of time being allocated for this review of consultation responses, it is questioned whether SACDC intend to make any further changes to the local plan and whether this consultation is meaningful.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will**

**make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

## 6.0 Summary and Conclusions

6.1 Whilst L&G support elements of the Draft Local Plan, our review of the plan and the supporting evidence leads our client to conclude that the draft Local Plan does not meet the tests of soundness required for a Local Plan. In particular:

- The plan has not been *positively prepared* as it does not meet the area's objectively assessed need, including unmet need from neighbouring areas.
- The plan is not *effective* in delivering over the plan period by providing the appropriate number of homes.
- The assumptions around housing trajectory are not *justified* and are not based on proportionate evidence.
- The Green Belt assessment is deficient and as such the plan is not *justified* in terms of how the evidence has informed the production of the plan.
- The plan is not *consistent with national policy* as it does not deliver sustainable development in accordance with the policies in the framework.

6.2 L&G believes the proposed North West Harpenden allocation should be increased in scale, so that it reverts back to that which was proposed in previous emerging Local Plans, consistent with previous Green Belt reviews and the current application boundary. This approach is justified by the following:

1 The current standard method figure for St Albans is capped and has been calculated as 885dpa. The 'uncapped' figure is 285 dwellings per year more than the capped figure. PPG is clear that the cap does not reduce need, and that Councils should consider whether uncapped need can be accommodated (if not, an early review may be required). The Council's own evidence shows an acute affordable housing need, amounting to over 90% of overall need. At the current level of overall delivery, the plan would meet (at most) less than half its affordable needs. PPG is clear that an increase in housing numbers in the plan should be considered where it can help deliver more affordable housing.

2 Recent delivery levels, from both St Albans and elsewhere, show that it is wholly achievable for the district to see housing growth well above its current standard method figure. Market signals show that St Albans is the area of highest housing demand outside London (as indicated by the affordability ratio), and this has become even more acute in recent years; There is an existing amount of known unmet need in the HMA, primarily arising in Three Rivers and Hertsmere, amounting to nearly 9,000 homes. Despite being known, these needs are being deferred, contrary to NPPF para 35(c).

3 The Sustainability Appraisal has not explored reasonable alternatives, insofar as it is entirely reasonable (and indeed necessary) for the Council to explore even higher housing growth options. Notwithstanding, the highest housing growth scenarios currently in the SA have been ruled out despite having very limited negative effects. The plan is therefore contrary to NPPF para 35(b).

4 A review of the housing trajectory within the draft Local Plan concludes that some of the assumptions are not realistic or robust, particularly on the Garden Community proposals. On these, the assumed rates of lead-in and build out rates are overly ambitious when compared against evidence of housing delivery on a national scale. When applying more realistic assumptions to the trajectory the total delivery during the plan period reduces by 1,925 which clearly has significant implications for SACDC's ability to meet the housing requirement over the plan period and leaves a shortfall.

5 We agree with the Council's conclusion that exceptional circumstances exist to justify the release of Green Belt land to meet the acute housing need. However, it is considered that SACDC is overly reliant on HGC to deliver almost a third of the total housing requirement over the plan period. In order to justify the quick lead-in times and high delivery rates proposed, very robust evidence must be provided to demonstrate that these are achievable. It is important that the trajectory is robust, supported by the best available evidence and realistic, to give SACDC and in due course, the Inspector, confidence in its conclusions. On this basis the trajectory is considered to be unsound in its current form and needs to be reconsidered.

6 It is considered that SACDC has not established an appropriate tipping point (i.e. the maximum amount of Green Belt release on potential site allocations. In the case of NWH, the draft plan recognises that it is a sustainable location for development but, by proposing to allocate only part of the site that was promoted (and which had been a proposed allocation in previous draft plans), it infers that the Council has identified a 'strong reason' related to the unallocated part of the site that justifies why it should not be released to help address those needs (either now, or in the future, based on permanent Green Belt boundaries). L&G does not believe the evidence supports the Council's tipping point.

7 In the case of NWH, L&G's view – supported by evidence it has submitted with its current planning application – is that the site boundary in the planning application is the most suitable boundary for the emerging allocation; it has been determined with regard to a detailed assessment of the landscape and Green Belt considerations. It is a boundary consistent with, and supported by, previous Council assessments undertaken to inform previous drafts of the Local Plan. To not allocate the whole of the site for development does not make optimal use of the potential of the site, as required by para 129 of the NPPF.

8 L&G is committed to the delivery of NWH and the creation of a high quality residential scheme which will meet the need of Harpenden and St Albans. NWH is a self-contained development without major upfront infrastructure costs, and L&G is able to deliver the scheme quickly and make a contribution to SACDC's housing supply in the short term. This is demonstrated through the submission of the planning application which has been informed by analysis of the existing site, its context, landscape and Green Belt impact. The benefits to be gained – both locally and strategically - by allocating the wider site for development are significant and outweigh any additional harm to the Green Belt that might arise.

6.3 Therefore, taking in the above into account it is therefore requested that draft site allocation for NWH (B7) is extended so that it aligns with the current planning application and previous draft allocations. The allocation of the whole of the site for residential development is appropriate and consistent with national policy and an assessment of the Green Belt. The benefits which will be delivered by the larger site are considerably greater than the current draft allocation.

6.4 Finally, it is noted that it is SACDC's intention to Submit the Plan for Examination on 29 November 2024. The consultation on the plan closes on 8 November 2024. This therefore only allows 15 working days between the receipt of consultation responses and the submission of the final plan for examination. Firstly, it is not clear how SACDC could feasibly review all of the consultation comments which would be expected in response to the draft Local Plan within this time period. ## 356 - Rachael Donovan

Submission Number: 356 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Hertfordshire and West Essex ICB Name: Rachael Donovan

Comment Number: 4

**Type:**

* Table

**Number:**

3.1

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

*Table 3.1 –Broad Locations*

North Hemel Hempstead and East Hemel Hempstead (North) - As per the HWE ICB's response to the Regulation 18 Local Plan, heath infrastructure provision, in the form of new on-site medical centre was identified in either North Hemel Hempstead or East Hemel Hempstead (North), whichever comes forward the sooner. Therefore, please also add '***medical centre'*** to the list of infrastructure requirements for North Hemel Hempstead.

North St Albans– As per the HWE ICB's response to the Regulation 18 Local Plan, new heath infrastructure provision, in the form of a new on-site medical centre was identified in either North St Albans or East St Albans. Further assessment has shown the need for a new onsite medical centre in North St Albans. Therefore, please add ***'medical centre'*** to the list of infrastructure requirements for North St Albans.

## 357 - Mrs Julia Warren

Submission Number: 357 Submission Date: 11/11/24 09:00

Respondent: Company/Organisation: Wheathampstead Parish Council Name: Mrs Julia Warren

Comment Number: 2

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

**Chapter 3 - Sustainable Use of Land and Green Belt**

Preventing coalescence is a critical element of the Green Belt policies so it is essential that the Local Plan prevents Wheathampstead coalescing with Harpenden along the Lower Luton Road and Harpenden Rd/Wheathampstead Rd.

Equally important is the protection of distinct communities in discrete areas within the Parish of Wheathampstead, such as The Folly, Lea Valley Estate and Amwell. These must continue to be protected by current Green Belt policies and by their special status as defined in Wheathampstead's Neighbourhood Plan.

We support the Green Network Vision and the creation of Green Corridors that are shown as part of the Hemel Garden Communities initiative. We would, therefore, like to see similar Green Corridors allocated around Wheathampstead to provide safe links to neighbouring settlements. Wheathampstead Parish Council recently formed an "Inclusive Wheathampstead Working Group" with an initial focus on Accessibility. Green Corridors incorporating Safe Cycle Routes would also provide a safe route for Mobility Scooter users to reach nearby settlements which is important for both mental and physical health.

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Please refer to Section 4 of the enclosed representation.

4 STRATEGIC POLICY SP3 AND THE HOUSING TRAJECTORY
4.1 The PPG advises that stepping the housing requirement may be appropriate when there is a significant shift between current and future policies, but it must be included in strategic policy and supported by evidence, emphasizing that plans should not “unnecessarily delay meeting identified development needs.”
4.2 The DLP proposes a stepped trajectory to allow time for increased housing delivery, yet this is not set out in a strategic policy, nor is there evidence justifying a delay in meeting housing needs. Stepping should occur only if deliverable sites are insufficient in the early plan years, and even then, only after all sustainable, deliverable sites have been allocated and needs are still unmet.
4.3 While a stepped trajectory might be acceptable, it should be used only after exhausting all options for early housing delivery. The Council is encouraged to reassess rejected sites for early deliverability. Although prioritizing urban development aligns with sustainability, questions remain about the deliverability of certain sites, suggesting a need for flexibility in the housing strategy to account for potential shortfalls in site delivery.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Please refer to Section 4 of the enclosed representation.

4 STRATEGIC POLICY SP3 AND THE HOUSING TRAJECTORY

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

Please refer to Section 4 of the enclosed representation.

4 HOUSING DISTRIBUTION, SUPPLY & TRAJECTORY

Housing Distribution and Supply

4.1 The spatial strategy positively organizes site allocations according to the Settlement Hierarchy,
detailed in Table 3.1. The Green Belt allocation is carefully divided between Hemel Garden Communities, Broad Locations, and Other Green Belt Site Allocations (large, medium, and small sites), reflecting a balanced approach to growth. Table 3.2 in the PDLP presents the Housing Trajectory, and sets out allocations for each Green Belt category:

· Hemel Garden Communities: 4,750 homes (44.8% of total Green Belt allocation supply, excluding Previously Developed Land)
· Broad Locations: 4,281 homes (40.3% of total Green Belt allocation supply, excluding Previously Developed Land)
· Other Green Belt Site Allocations: 1,581 homes (14.9% of total Green Belt allocation supply, excluding Previously Developed Land)
· Total Green Belt Allocation Supply (excluding Previously Developed Land): 10,612 homes

4.2 The spatial strategy effectively aligns housing allocations with the District's Settlement Hierarchy,
focusing growth in highly sustainable areas. St Albans and Hemel Hempstead, as primary Tier 1 settlements, are prioritized, with significant allocations supporting their role as key urban centres. Given the anticipated rise in St Albans' housing need, this approach could be enhanced further by exploring additional allocation potential around St Albans City, which benefits from well-developed infrastructure, transport links, and community facilities. This would enable the City to play an even stronger role in meeting future housing requirements sustainably.

4.3 The PDLP distributes 12 Broad Locations across five settlements plus Hemel Garden Communities,
as follows:

· St Albans (Tier 1): 2,124 homes
· Harpenden (Tier 2): 1,055 homes
· London Colney (Tier 3): 405 homes
· Redbourn (Tier 4): 593 homes
· Radlett (not classified): 274 homes

4.4 This allocation pattern thoughtfully distributes growth across the hierarchy. To further reinforce the
sustainability principles, a stronger emphasis on Tier 1 and 2 settlements, particularly St Albans, would align with the City's role as the District's most sustainable location. This approach would also respond proactively to the expected increase in housing demand and offer more choice and accessibility for residents.

4.5 The use of the Settlement Hierarchy to guide growth distribution is well-supported by evidence,
including the Council's Settlement Hierarchy Study and Green Belt Review. The strategy's allocations to higher-tier settlements align with the principles of sustainable development. However, some adjustments may strengthen the approach—for instance, directing more growth to St Albans City could allow the City to make the most of its infrastructure and transit connectivity, while achieving a balanced, proportionate distribution of homes across other areas.

4.6 St Albans, the principal Tier 1 settlement, receives approximately half of the Broad Location allocation

relative to Hemel Hempstead. Since St Albans benefits from well-established infrastructure, there is an opportunity to allocate additional growth around its urban edge, where sustainable extensions can be well-integrated with existing infrastructure. This would further reinforce the sustainable growth objectives and ensure that the City can help meet the District's evolving housing needs. In addition, it will help ensure that St Albans further benefits from housing growth in terms of economic impacts associated with new housing development (e.g. as a result of increased expenditure in the local area) as well as the positive social impacts of ensuring sufficient, modern housing to meet community's needs.

4.7 An effective Local Plan is one that is deliverable and flexible over its lifespan. The Draft Plan allocates
two Large Sites (100-249 homes), with one on brownfield land at Burston Nurseries, North Orbital Road, St Albans (180 homes) and another south of the North Orbital Road in Park Street (104 homes). St Albans, as a key Tier 1 location, could effectively support additional large sites. Expanding the range of sites within St Albans will help maintain flexibility, allowing for a more varied housing supply that meets future demand and accommodates diverse housing types.

4.8 Hemel Hempstead's Hemel Garden Communities allocation is robust, with a focus on transformative
growth. In comparison, St Albans has been allocated 2,484 homes across Broad Locations, Large Sites, and medium/small sites, which might underutilize its existing infrastructure capacity. Directing additional growth to St Albans could enhance the effectiveness of the Plan, helping the City to play a larger role in supporting sustainable, well-serviced development.

4.9 The NPPF requires housing need to be treated as a minimum and encourages Plans to include
flexibility in anticipation of changing demand. With the housing target set at 14,603 homes, the Draft Plan could offer further flexibility by considering an additional buffer, particularly in St Albans where the infrastructure can support additional growth. This would provide greater resilience to meet future demands, in line with the NPPF's goals for sustainable, adaptable planning.

4.10 The Plan's support for transformational growth in Hemel Hempstead is well-placed, but opportunities to redirect some of the growth from Tier 2, 3, and 4 settlements toward St Albans would capitalize on the City's high sustainability and resource availability. Increasing St Albans City's allocation of Large and Medium Sites would further diversify the housing supply and improve housing options for the community within a well-connected, service-rich area.

4.11 At present, St Albans' housing growth is largely based on a small selection of large urban extensions (250+ homes) and a few smaller sites, with seven Green Belt allocations overall. In contrast, Harpenden, a smaller Tier 2 settlement, is supported by 12 allocations. Expanding the variety of St Albans City's housing allocations would benefit both new and existing residents by offering housing choices within well-established neighborhoods, close to employment, education, and community facilities.

4.12 To fully align with the NPPF, the Council might consider additional site allocations around St Albans City, taking a careful approach to Green Belt release. For instance, Land at Sandpit Lane is in a well-connected, accessible location within walking and cycling distance of essential services and employment opportunities. This Site wsupport sustainable growth while encouraging active travel options that align with both local and national sustainability goals. Developing this site with quality landscaping and active travel options would serve existing and future residents, supporting St Albans City's role as a primary settlement.

Housing Trajectory

4.13 The PDLP's housing trajectory for 2026–2028 anticipates that existing planning permissions and windfall sites will deliver 749 homes, falling short of the 888-home annual target by 513 units. While future site allocations and windfall allowances are expected to cover this shortfall from 2028 onwards, the approach could be strengthened by enhancing delivery reliability and ensuring early-period targets are met. This assessment addresses the trajectory's alignment with the NPPF soundness tests:

4.14 The current approach could be more positively prepared by introducing additional Large Sites, which would secure steady early housing delivery and help meet the annual target. Allocating sites capable of swift planning and early-phase delivery would reduce dependence on windfall sites and strengthen the supply of affordable housing.
4.15 The reliance on existing permissions and windfall sites in the early years is reasonable but could be made more robust by incorporating more strategically allocated Large Sites, like Land at Sandpit Lane. There is a risk of double counting if sites have planning permission already. This Site's early delivery potential (c.200 homes) would provide greater certainty, complementing the evidence for a balanced supply throughout the plan period.
4.16 Adding readily deliverable Large Sites would improve effectiveness, providing flexibility if the 8% lapse rate is exceeded. The inclusion of such sites would help achieve a consistent delivery pipeline, ensuring the Local Plan meets housing needs from adoption.
4.17 The NPPF promotes flexibility and resilience in housing delivery. Allocating more Large Sites, like Land at Sandpit Lane, would align with these principles, allowing the plan to respond effectively to early demand fluctuations and maintaining progress toward meeting housing targets.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Please refer to Section 4 of the enclosed representation.

4 HOUSING DISTRIBUTION, SUPPLY & TRAJECTORY
Housing Distribution and Supply
4.1 The spatial strategy positively organizes site allocations according to the Settlement Hierarchy,
detailed in Table 3.1. The Green Belt allocation is carefully divided between Hemel Garden Communities, Broad Locations, and Other Green Belt Site Allocations (large, medium, and small sites), reflecting a balanced approach to growth. Table 3.2 in the PDLP presents the Housing Trajectory, and sets out allocations for each Green Belt category:
· Hemel Garden Communities: 4,750 homes (44.8% of total Green Belt allocation supply, excluding Previously Developed Land)

**4 HOUSING DISTRIBUTION, SUPPLY & TRAJECTORY**

**Housing Distribution and Supply**

4.1 The spatial strategy positively organizes site allocations according to the Settlement Hierarchy, detailed in Table 3.1. The Green Belt allocation is carefully divided between Hemel Garden Communities, Broad Locations, and Other Green Belt Site Allocations (large, medium, and small sites), reflecting a balanced approach to growth. Table 3.2 in the PDLP presents the Housing Trajectory, and sets out allocations for each Green Belt category:

- **Hemel Garden Communities**: 4,750 homes (44.8% of total Green Belt allocation supply, excluding Previously Developed Land)

- **Broad Locations**: 4,281 homes (40.3% of total Green Belt allocation supply, excluding Previously Developed Land)
- **Other Green Belt Site Allocations**: 1,581 homes (14.9% of total Green Belt allocation supply, excluding Previously Developed Land)
- **Total Green Belt Allocation Supply (excluding Previously Developed Land)**: 10,612 homes

4.2 The spatial strategy effectively aligns housing allocations with the District's Settlement Hierarchy,

focusing growth in highly sustainable areas. St Albans and Hemel Hempstead, as primary Tier 1 settlements, are prioritized, with significant allocations supporting their role as key urban centres. Given the anticipated rise in St Albans' housing need, this approach could be enhanced further by exploring additional allocation potential around St Albans City, which benefits from well-developed infrastructure, transport links, and community facilities. This would enable the City to play an even stronger role in meeting future housing requirements sustainably.

4.3 The PDLP distributes 12 Broad Locations across five settlements plus Hemel Garden Communities,

as follows:

- St Albans (Tier 1): 2,124 homes
- Harpenden (Tier 2): 1,055 homes
- London Colney (Tier 3): 405 homes
- Redbourn (Tier 4): 593 homes
- Radlett (not classified): 274 homes

4.4 This allocation pattern thoughtfully distributes growth across the hierarchy. To further reinforce the

sustainability principles, a stronger emphasis on Tier 1 and 2 settlements, particularly St Albans, would align with the City's role as the District's most sustainable location. This approach would also respond proactively to the expected increase in housing demand and offer more choice and accessibility for residents.

4.5 The use of the Settlement Hierarchy to guide growth distribution is well-supported by evidence,

including the Council's Settlement Hierarchy Study and Green Belt Review. The strategy's allocations to higher-tier settlements align with the principles of sustainable development. However, some adjustments may strengthen the approach—for instance, directing more growth to St Albans City could allow the City to make the most of its infrastructure and transit connectivity, while achieving a balanced, proportionate distribution of homes across other areas.

4.6 St Albans, the principal Tier 1 settlement, receives approximately half of the Broad Location allocation

relative to Hemel Hempstead. Since St Albans benefits from well-established infrastructure, there is an opportunity to allocate additional growth around its urban edge, where sustainable extensions can be well-integrated with existing infrastructure. This would further reinforce the sustainable growth objectives and ensure that the City can help meet the District's evolving housing needs. In addition, it will help ensure that St Albans further benefits from housing growth in terms of economic impacts associated with new housing development (e.g. as a result of increased expenditure in the local area) as well as the positive social impacts of ensuring sufficient, modern housing to meet community's needs.

4.7 An effective Local Plan is one that is deliverable and flexible over its lifespan. The Draft Plan allocates

two Large Sites (100-249 homes), with one on brownfield land at Burston Nurseries, North Orbital Road, St Albans (180 homes) and another south of the North Orbital Road in Park Street (104 homes). St Albans, as a key Tier 1 location, could effectively support additional large sites. Expanding the range of sites within St Albans will help maintain flexibility, allowing for a more varied housing supply that meets future demand and accommodates diverse housing types.

4.8 Hemel Hempstead's Hemel Garden Communities allocation is robust, with a focus on transformative

growth. In comparison, St Albans has been allocated 2,484 homes across Broad Locations, Large Sites, and medium/small sites, which might underutilize its existing infrastructure capacity. Directing additional growth to St Albans could enhance the effectiveness of the Plan, helping the City to play a larger role in supporting sustainable, well-serviced development.

4.9 The NPPF requires housing need to be treated as a minimum and encourages Plans to include

flexibility in anticipation of changing demand. With the housing target set at 14,603 homes, the Draft Plan could offer further flexibility by considering an additional buffer, particularly in St Albans City where the infrastructure can support additional growth. This would provide greater resilience to meet future demands, in line with the NPPF's goals for sustainable, adaptable planning.

4.10 The Plan's support for transformational growth in Hemel Hempstead is well-placed, but opportunities to redirect some of the growth from Tier 2, 3, and 4 settlements toward St Albans City would capitalize on the City's high sustainability and resource availability. Increasing St Albans City's allocation of Large and Medium Sites would further diversify the housing supply and improve housing options for the community within a well-connected, service-rich area.

4.11 At present, St Albans' housing growth is largely based on a small selection of large urban extensions (250+ homes) and a few smaller sites, with seven Green Belt allocations overall. In contrast, Harpenden, a smaller Tier 2 settlement, is supported by 12 allocations. Expanding the variety of St Albans City's housing allocations would benefit both new and existing residents by offering housing choices within well-established neighbourhoods, close to employment, education, and community facilities.

4.12 To fully align with the NPPF, the Council might consider additional site allocations around St Albans City, taking a careful approach to Green Belt release. For instance, Land north west of Batchwood Drive is in a well-connected, accessible location within walking and cycling distance of essential services and employment opportunities. This Site supports sustainable growth while encouraging active travel options that align with both local and national sustainability goals. Developing this site with quality landscaping and active travel options would serve existing and future residents, supporting St Albans City's role as a primary settlement.

**Housing Trajectory**

4.13 The PDLP's housing trajectory for 2026–2028 anticipates that existing planning permissions and windfall sites will deliver 749 homes, falling short of the 888-home annual target by 513 units. While future site allocations and windfall allowances are expected to cover this shortfall from 2028 onwards, the approach could be strengthened by enhancing delivery reliability and ensuring early-period targets are met. This assessment addresses the trajectory's alignment with the NPPF soundness tests:

4.14 The current approach could be more positively prepared by introducing additional Large Sites, which would secure steady early housing delivery and help meet the annual target. Allocating sites capable of swift planning and early-phase delivery would reduce dependence on windfall sites and strengthen the supply of affordable housing.

4.15 The reliance on existing permissions and windfall sites in the early years is reasonable but could be made more robust by incorporating more strategically allocated Large Sites, like Land north west of Batchwood Drive. ## 4 HOUSING DISTRIBUTION, SUPPLY & TRAJECTORY

### Housing Distribution and Supply

4.1 The spatial strategy positively organizes site allocations according to the Settlement Hierarchy,

detailed in Table 3.1. The Green Belt allocation is carefully divided between Hemel Garden Communities, Broad Locations, and Other Green Belt Site Allocations (large, medium, and small sites), reflecting a balanced approach to growth. Table 3.2 in the PDLP presents the Housing Trajectory, and sets out allocations for each Green Belt category:

- **Hemel Garden Communities**: 4,750 homes (44.8% of total Green Belt allocation supply, excluding Previously Developed Land)
- **Broad Locations**: 4,281 homes (40.3% of total Green Belt allocation supply, excluding Previously Developed Land)
- **Other Green Belt Site Allocations**: 1,581 homes (14.9% of total Green Belt allocation supply, excluding Previously Developed Land)
- **Total Green Belt Allocation Supply (excluding Previously Developed Land)**: 10,612 homes

4.2 The spatial strategy effectively aligns housing allocations with the District's Settlement Hierarchy,

focusing growth in highly sustainable areas. St Albans and Hemel Hempstead, as primary Tier 1 settlements, are prioritized, with significant allocations supporting their role as key urban centres. Given the anticipated rise in St Albans' housing need, this approach could be enhanced further by exploring additional allocation potential around St Albans City, which benefits from well-developed infrastructure, transport links, and community facilities. This would enable the City to play an even stronger role in meeting future housing requirements sustainably.

4.3 The PDLP distributes 12 Broad Locations across five settlements plus Hemel Garden Communities,

as follows:

- St Albans (Tier 1): 2,124 homes
- Harpenden (Tier 2): 1,055 homes
- London Colney (Tier 3): 405 homes
- Redbourn (Tier 4): 593 homes
- Radlett (not classified): 274 homes

4.4 This allocation pattern thoughtfully distributes growth across the hierarchy. To further reinforce the

sustainability principles, a stronger emphasis on Tier 1 and 2 settlements, particularly St Albans, would align with the City's role as the District's most sustainable location. This approach would also respond proactively to the expected increase in housing demand and offer more choice and accessibility for residents.

4.5 The use of the Settlement Hierarchy to guide growth distribution is well-supported by evidence,

including the Council's Settlement Hierarchy Study and Green Belt Review. The strategy's allocations to higher-tier settlements align with the principles of sustainable development. However, some adjustments may strengthen the approach—for instance, directing more growth to St Albans City could allow the City to make the most of its infrastructure and transit connectivity, while achieving a balanced, proportionate distribution of homes across other areas.

4.6 St Albans, the principal Tier 1 settlement, receives approximately half of the Broad Location allocation

relative to Hemel Hempstead. Since St Albans benefits from well-established infrastructure, there is an opportunity to allocate additional growth around its urban edge, where sustainable extensions can be well-integrated with existing infrastructure. This would further reinforce the sustainable growth objectives and ensure that the City can help meet the District's evolving housing needs. In addition, it will help ensure that St Albans further benefits from housing growth in terms of economic impacts associated with new housing development (e.g. as a result of increased expenditure in the local area) as well as the positive social impacts of ensuring sufficient, modern housing to meet community's needs.

4.7 An effective Local Plan is one that is deliverable and flexible over its lifespan. The Draft Plan allocates

two Large Sites (100-249 homes), with one on brownfield land at Burston Nurseries, North Orbital Road, St Albans (180 homes) and another south of the North Orbital Road in Park Street (104 homes). St Albans, as a key Tier 1 location, could effectively support additional large sites. Expanding the range of sites within St Albans will help maintain flexibility, allowing for a more varied housing supply that meets future demand and accommodates diverse housing types.

4.8 Hemel Hempstead's Hemel Garden Communities allocation is robust, with a focus on transformative

growth. In comparison, St Albans has been allocated 2,484 homes across Broad Locations, Large Sites, and medium/small sites, which might underutilize its existing infrastructure capacity. Directing additional growth to St Albans could enhance the effectiveness of the Plan, helping the City to play a larger role in supporting sustainable, well-serviced development.

4.9 The NPPF requires housing need to be treated as a minimum and encourages Plans to include

flexibility in anticipation of changing demand. With the housing target set at 14,603 homes, the Draft Plan could offer further flexibility by considering an additional buffer, particularly in St Albans City where the infrastructure can support additional growth. This would provide greater resilience to meet future demands, in line with the NPPF's goals for sustainable, adaptable planning.

4.10 The Plan's support for transformational growth in Hemel Hempstead is well-placed, but opportunities to redirect some of the growth from Tier 2, 3, and 4 settlements toward St Albans City would capitalize on the City's high sustainability and resource availability. Increasing St Albans City's allocation of Large and Medium Sites would further diversify the housing supply and improve housing options for the community within a well-connected, service-rich area.

4.11 At present, St Albans' housing growth is largely based on a small selection of large urban extensions (250+ homes) and a few smaller sites, with seven Green Belt allocations overall. In contrast, Harpenden, a smaller Tier 2 settlement, is supported by 12 allocations. Expanding the variety of St Albans City's housing allocations would benefit both new and existing residents by offering housing choices within well-established neighbourhoods, close to employment, education, and community facilities.

4.12 To fully align with the NPPF, the Council might consider additional site allocations around St Albans City, taking a careful approach to Green Belt release. For instance, Land north west of Batchwood Drive is in a well-connected, accessible location within walking and cycling distance of essential services and employment opportunities. This Site supports sustainable growth while encouraging active travel options that align with both local and national sustainability goals. Developing this site with quality landscaping and active travel options would serve existing and future residents, supporting St Albans City's role as a primary settlement.

**Housing Trajectory**

4.13 The PDLP's housing trajectory for 2026–2028 anticipates that existing planning permissions and windfall sites will deliver 749 homes, falling short of the 888-home annual target by 513 units. While future site allocations and windfall allowances are expected to cover this shortfall from 2028 onwards, the approach could be strengthened by enhancing delivery reliability and ensuring early-period targets are met. This assessment addresses the trajectory's alignment with the NPPF soundness tests:

4.14 The current approach could be more positively prepared by introducing additional Large Sites, which would secure steady early housing delivery and help meet the annual target. Allocating sites capable of swift planning and early-phase delivery would reduce dependence on windfall sites and strengthen the supply of affordable housing.

4.15 The reliance on existing permissions and windfall sites in the early years is reasonable but could be made more robust by incorporating more strategically allocated Large Sites, like Land north west of Batchwood Drive. There is a risk of double counting if sites have planning permission already. This Site's early delivery potential (c.200 homes) would provide greater certainty, complementing the evidence for a balanced supply throughout the plan period.

4.16 Adding readily deliverable Large Sites would improve effectiveness, providing flexibility if the 8% lapse rate is exceeded. The inclusion of such sites would help achieve a consistent delivery pipeline, ensuring the Local Plan meets housing needs from adoption.

4.17 The NPPF promotes flexibility and resilience in housing delivery. Allocating more Large Sites, like Land at north west of Batchwood Drive, would align with these principles, allowing the plan to respond effectively to early demand fluctuations and maintaining progress toward meeting housing targets.

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Co-operate**

The Council have inconsistently applied the findings of the ARUP Stage 2 Green Belt Review, this is another major flaw. The process and document do not include a single reference to Heartwood Forest as a whole and is a deep failure on the part of both ARUP and SADC.

ARUP Stage 2 Green Belt Review does not recommend land in North St Albans for development. We have seen no rational on why this should be ignored. We also see misleading assessments of evidence in the process.

- A number of sites have been recommended contrary to the view formed by ARUP, including B1 North St Albans

- ARUP Green Belt Review 2023: Page 71 see B1 North St Albans (Not Recommended for release) Area codes SA-60, SA-62,SA-63a, SA-63b, SA-63c, SA-64, SA-65a, SA-65b, SA-66, SA-69.

One of the principal issues of our objection is the use of the 2014 household growth projections for England rather than the more up to date projections compiled for 2018, 2021 or more recently (as SADC sought to establish early on in the Local Plan process but failed to deliver). There is clear guidance and broad universal understanding is that the use of the 2014 projections is not mandatory and by pushing ahead and using them, St Albans will lose valuable green belt protected countryside forever.

The former Chair of the Planning Policy and Climate Committee and Council Leader, Councillor Chris White, in September 2022, wrote the Secretary of State for the DLUHC requesting clarification of the application of the Standard Method. That was given. The housing need calculation is advisory, always has been. See Appendix 5a and 5b, for the letters to and response from the Secretary of State.

The Council have ignored the December 2022 statement by the Secretary of State which included the following clear paragraphs “we will be clear that local planning authorities are not expected to review the Green Belt to deliver housing”.

Just like other Councils, SADC could deliver a strategy to protect Green Belt, as it forms a major constraint and is a major decision-making issue carrying substantial weight. As was applied by the PINS in the Local Plan of Worthing Borough CouncilWorthing Local Plan - Final Report (adur-worthing.gov.uk), note Para 78 and 84 of the decision notice:

NPPF Para 11, Footnote 7, also includes Green Belt in the list of constraints limiting the scale of development. Why has SADC not taken this into account?

The Government’s National Planning Policy Guidance (NPPG) sets out a standard methodology to ensure that the number calculated is objective: the Objectively Assessed Housing Need (OAHN). However, a calculation can only be objective, in any true sense, if it is based on parameters that are relevant; to be relevant, a parameter must be timely, and representative. A calculation is that is derived using parameters that have been superseded by more representative estimates, cannot be objective. And we are not referring here to a small rounding error, but to a multiple of 3 times, from circa 15,000 down to circa 5,000 new homes. To meet the criteria of objectivity, we believe that SACD would be justified in submitting a Local Plan based on the most up to date projections.

The NPPG is explicit that the use of the standard method for strategic policy making is not mandatory. In fact, **RACHEL MACLEAN MP, Minister of State for Housing and Planning**, in writing to Gareth Bacon MP, President of London Green Belt Council, stated that: “that the housing need figure has always been a starting point, not a mandatory target”. Our assessment is that SACD is treating the housing need figure derived from 2014 projections as mandatory for delivery when it is not. See Appendix 2, for the full letter.

If a Local Plan based on 2014 projections is adopted, more Green Belt will be built on than is necessary: we do not believe that any Green Belt need be built on to meet a truly objective assessment of need. SACD should at least be having the argument with Government and taking them to task on their avowed criteria of objectivity. If SACD does not do this, we fear that far from protecting St Albans and its surrounding Green Belt from speculative development, the Local Plan will be doing developers’ work for them. This will be a failure of leadership for which St Albans will be paying the price for generations and decades to come.

## Strategic Policy SP3 - Land and the Green Belt

### 6 - Liam Beere

Submission Number: 6 Submission Date: 04/10/24 14:57

Respondent: Company/Organisation: Name: Liam Beere

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I am fully supportive of building more houses and believe Redbourn would benefit from more housing. What I do not believe to be sound about the current local plan is the location of the proposed development to the West of Redbourn for two reasons:

- the new development would be adjacent to the M1 motorway which is very loud and near vehicle emissions, which will make the new housing less appealing to people living there

- the proposed development location would involve a very substantial increase in traffic flowing through the village. The existing village road layout is not suited to a substantial increase in vehicle volumes

I believe that an alternative location should be used for new housing as set out in the next section

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

I believe that any new housing development should be on the large area of land to the east of Dunstable Road. This land is adjacent to the Redbourn bypass, which will mean that the incremental traffic from the additional houses can be better accommodated. It will also mean that the new housing is located further away from the M1 motorway.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

I would like to be able to challenge why the current location has been selected. Having discussed the matter when the plans were on display in Redbourn, it did not sound as though the views of the people in Redbourn had been taken into account

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Strategic Policy SP3 sets out the Council's strategy for delivering a total need of 14,603 dwellings to 2041, and that growth must be supported by suitable supporting infrastructure. The Strategic Policy also highlights the overall aim is to protect Green Belt from inappropriate development, but to ensure that there is most effective use of land and where necessary and in the right areas to adjust Green Belt boundaries.

It is noted that the Regulation 19 draft Local Plan proposes an adjustment of the Green Belt to the south of Napsbury Park Estate (titled west of London Colney) and the provision of housing and new Secondary school. This proposal south of Napsbury Park Estate within the new Local Plan will therefore be a significant provision of educational infrastructure in this location. Taking this factor into account, further consideration should be given to providing more housing in this location to the west of London Colney and on the edge of Napsbury Park Estate to promote a sustainable form of development and make most effective use of land. Such an increase in housing in this location would maximise the benefits of providing family housing within walking distance of the new secondary school.

The current proposal to the south of Napsbury Park Estate only proposes 324 dwellings, which is itself significantly below what would normally be required to provide for a new secondary school. Whilst the new school will also cater for the existing residents of London Colney and Napsbury Park Estate, it is considered that there is an opportunity to deliver more housing in this location that would contribute to the sustainability credentials of identifying land for the new schools within the Local Plan and thus reducing the reliance on cars and motorised vehicles.

With such a sustainable approach in mind, land to the north of Napsbury Park Estate could add an additional 180 to 200 No. dwellings to this total west of London Colney, within walking distance of the proposed new schools.

There is also an opportunity to provide a rail station to the north of Napsbury Park Estate in the location of the original sidings, which is classed as previously developed land (brownfield). Not only should this brownfield land be considered for development because of its PDL status, but there is an opportunity to create a sustainable rail station link along the Midland Main Line between St Albans and London that would serve Napsbury Park Estate, the new development proposed west of London Colney including the new secondary school, and, the whole of London Colney.

This land north of Napsbury Park Estate has been promoted through previous reviews of the Local Plan and put forward in the various Call for Sites by the Council, including the most recent request in 2021. A copy of the location plan of Parcel 515, Heritage and High Level Landscape appraisals are attached (these have been previously submitted, but submitted again to be taken into account through this consultation process). Various other supporting documents for this site have been previously submitted through the Call for Sites and Local Plan process, and should be taken again into account in considering this parcel of land.

It is also noted that in the Council's 2018 Strategic Site Selection Review, the land north of Napsbury Estate (formally part of the hospital grounds and included Napsbury railway station and railway sidings) was included in larger Strategic site review No. 621, which included land to the west and also south of the Napsbury Estate. In relation to the land to the north of the estate, the 2018 Review commented:

*The parcel contains Napsbury Park HPG and adjoins London Colney Conservation Area. The Green Belt provides a historic setting and views to and from the countryside. Though much of Napsbury Park has been redeveloped the Parkland is still an important aspect of the historic setting.*

*The parcel contributes with GB30 to the secondary local gap between London Colney (2nd) and Park Street / Frogmore (2nd) and Radlett Road (3rd). Gaps are 1.9km and 1.8km respectively. The redevelopment of Napsbury Park reduces the gap which is also contains the concealed railway*

*line which provides limited views on to the Green Belt. Any reduction in these gaps would be unlikely to compromise the separation of settlements in physical or visual terms, or overall visual openness.*

The conclusion of this 2018 review was therefore that the parcel of land to the north of the Estate would unlikely compromise openness, which is primarily due to its physical containment by the existing row of houses to the north, the existing Napsbury Park Estate to the south and the railway line to the west.

Through the more recent 2023 Green Belt Review undertaken for the Council, the land north of Napsbury Park Estate (identified as Parcel 515) does not appear to have been included in the Green Belt parcel review. As such, it is considered that a full review of this land (ie. Parcel 515, to the north of Napsbury Estate) and its relationship to Napsbury Park Estate and wider strategic parcel was not undertaken and should be given further consideration through the Local Plan process.

Parcel 515 includes both the historic sidings for the hospital and has historic links to the rest of the Napsbury Park Estate, so this creates the PDL (brownfield) status of the land.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Council is therefore requested to give further consideration to the land north of Napsbury Park Estate (Parcel 515) as a location for a new rail station along the Midland Mainline between St Albans and London, and additional housing allocation site, that would be within walking distance of the new Secondary school site proposed to the south of the Estate (west of London Colney). This revised strategic approach would promote both a sustainable form of development and effective use of land, as promoted by the objectives of the new Local Plan.

## 23 - Mr Martin Holderness

Submission Number: 23 Submission Date: 24/10/24 06:08

Respondent: Company/Organisation: Hammond Land and Consulting Limited Name: mr James Hammond

On Behalf Of Company/Organisation: Name: Mr Martin Holderness

Comment Number: 2

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

I note that the legal challenge made by 'Keep Chiswell Green' to a secretary of state consent for up to 721 homes on two green belt sites in Hertfordshire was dismissed, following the judgement dated 29 October 2024. I enclose a copy of the judgement. I write on behalf of Mr Martin Holderness, who owns land immediately to the east of the Chiswell Green North site. The indicative site layout for the Chiswell Green North site is attached, and this document was referenced as document 'CD4.20.2 Indicative Proposed Site Layout' as a supporting document into the Inquiry relating to the site in question. The purpose of this representation is to seek that the Regulation 19 Proposals Map for Chiswell Green accurately reflects and incorporates the boundaries of strategic sites that have been granted planning permission in 2024.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The digitisation of the corresponding site boundaries subsequently requires a revision to the settlement limits to the settlement of Chiswell Green, and this process should also include logical "rounding off" of settlement based on defensible boundaries.

Respondent: Company/Organisation: Name: Mr Daniel Ward

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

In 2022, the council commissioned Arup to undertake a review of the green belt in St Albans district. Arup submitted its final report to the council in June 2023.

One of the primary purposes of the report was to identify sub-areas which might potentially be released from or added to the Green Belt. It examined, among others, two Broad Locations that had previously been identified as possible housing development sites, North East Harpenden and North West Harpenden.

In both cases, Arup considered the Broad Locations in their entirety and as smaller sub-areas. They found that while some sub-areas could be released from the Green Belt without damaging its overall function, other sub-areas "perform strongly against the NPPF purposes and makes an important contribution to the wider Green Belt." These sub-areas were "not recommended for further consideration".

The report was thorough in is methodology and its use of all available evidence in justifying at its conclusions.

Despite this, the council rejected Arup's findings and decided to take both Harpenden Broad Locations forward in their original form. Planning officers submitted the site allocations to the Planning Policy & Climate Committee on 23 September 2024, which agreed that the Broad Locations should be taken forward in their entirety.

This was not an evidence-based decision. Instead, it relied on the assertion of planning officers that only when the sites were accepted as a whole would they "deliver a wide range of significant Economic, Environmental and Social benefits including housing, affordable housing, schools, and a significant scale of sustainable transport improvements and jobs". Evidence to support this statement was not provided, and the viability of taking forward smaller sub-areas was not explored.

This lack of evidence in reaching this decision undermines the credibility of the Local Plan. The council should revisit its Broad Location site allocations and properly consider whether it would be viable to take forward smaller sub-areas for housing development.

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* No, I do not wish to participate in hearing session(s)

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report for details**

**Strategic Policy SP3 – Land and the Green Belt**

- The draft Local Plan is based on an overall housing target of 885 dwellings per year, based on the standard methodology. This is supported and should be seen as a minimum level of supply.
- Policy SP3 and the preceding text sets out the strategic case for changes to the Green Belt to facilitate the homes, employment space and infrastructure needed in the local area. The consequences of not amending Green Belt boundaries have been obvious in the district over the past 30 years, with sustained house price growth, increased commuting as workers can no longer afford to live locally and a declining supply of commercial space. The exceptional circumstances needed to amend Green Belt boundaries are evident and the Council's position is supported.
- The age of the current Local Plan means that the priority should be to secure a new Local Plan in order to boost housing delivery above the current rate. The Council's decision to accelerate the Local Plan timescale to enable examination under the current NPPF is supported, given the almost unique circumstances of the district. However, this Local Plan can only be considered an interim Plan. The likely substantial increase in housing requirement brought in with the new NPPF means that the Council will need to commit to an immediate review of the Local Plan.
- There is no current commitment in the draft Local Plan to an immediate review. This is a policy omission. A commitment and a timescale should be included so that progress can be made as quickly as possible.
- In summary, we consider Policy SP3 to be **legally compliant** and **sound**. **No modifications** are therefore necessary.

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

Submission Number: 112 Submission Date: 06/11/24 19:34

Respondent: Company/Organisation: Name: Mr Richard Bullen

Comment Number: 3

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Housing numbers: section 1.21 states that population has increased by 6% since 2011. The Dwelling Stock Estimates ((www.gov.uk/government/collections/dwelling-stock-including -vacants) (Table 125)) shows that the housing stock for St Albans District in 2011 was 58000. This had increased to 63000 by mid-2023. This increase in the housing stock is 8.26%, suggesting that there has been a diminution of housing need in the District since 2011. There is no mention of this in Regulation 19. This makes the plan unsound.

“The Local Plan sets out the planning policies and proposals for the future development of the City and District of St Albans” (Reg 19 para 1.2). Table 1.3 Settlement Hierarchy – Settlement “St Albans, Hemel Hempstead (currently in Dacorum Borough but expansion into District planned)” There are no published proposals to change the boundary between Dacorum Borough and St Albans City and District to give effect to this “expansion”. NPPF (December 2023) section 61 states “ In addition to the local housing need figure, any needs that cannot be met within neighbouring areas should also be taken into account in establishing the amount of housing to be planned for”. The housing numbers applied to the sites included in Hemel Garden Communities within the District are solely to meet the housing need of the residents of St Albans C&DC. Under the heading Duty to Co-operate, (Reg 19) Section 1.11 states that “St Albans is also working jointly with Dacorum on proposed cross boundary development at Hemel Garden Communities”. Under the heading “Hemel Garden Communities” Section 3.34 states “The Hemel Garden Communities (HGC) Programme is an ambitious proposal to transform Hemel Hempstead through the regeneration of the existing town…”. Thus, the allocation of housing numbers to HGC is for the benefit of Dacorum Borough and, as such, fails to meet the opening declaration in section 1.1. This make the plan unsound

The “St Albans Green Belt Review Final Report June” 2023, Ove Arup and Partners, Table 5.8 Recommendations, sets out those sites that are not recommended released from the Green Belt because of the “Strong” overall performance and “Important” as making a contribution to the wider Green Belt”. Sites SA-168, SA-170, SA-171 and SA-172 are all included in the HGC proposal. The NPPF December 2023 states (para 145) “Authorities may choose to review and alter Green Belt boundaries where exceptional circumstances are fully evidenced and justified”…. There is no such fully evidenced and justified exceptional circumstances. As such, the plan is unsound

In the event was HGC is allowed to proceed, the location would act as a furtherance of the sprawl of Hemel Hempstead. Thus this is breach of the first purpose of the Green Belt. In addition, the distance between the eastern edge of the proposed development (housing) and the western edge of Redbourn (village) would be less than that between the land between Redbourn (village) and Harpenden which SADC stated was inappropriate for development as it would breach the second purpose, to prevent neighbouring towns merging into one another. Accordingly, any proposal to include a site for development west of Redbourn would not be in accordance with section 143 of the NPPF and so is unsound.

Also, in the event that HGC is allowed to proceed, it must meet the requirement of the NPPF December 2023, section 7. This states “The purpose of the planning system is to contribute to the achievement of sustainable development…” The Reg 19 section 1.24 states that the average house price within the District is £619567. There is nothing in the Reg 19 that suggests that this average will not apply to the proposed housing at HGC. Reg 19 Section 1.23 states” The rail options to London underpin the popularity of commuting out of the District.” The location of HGC is as distant as possible from the railway stations at Hemel Hempstead, St Albans City and Harpenden. Unless and until there is local employment that pays London salaries, or public transport to and from the railway stations mentioned is transformed, the HGC proposal is not sustainable and so unsound.

The consultation on the “Proposed reforms to the National Planning Policy Framework and other changes to the planning system” sets out (section 9) “Grey Belt: for the purposes of Plan-making grey belt is defined as land in the Green Belt comprising Previously Developed Land and any other parcels and/or areas of Green Belt land that make a limited contribution to the five Green Belt purposes…” Whilst the Reg 19 has been prepared in accordance with the current NPPF, assuming the draft Plan goes forward to implantation, it will be reviewed five years later. At that time, the review will take place in accordance with the NPPF then current. The sites west of Redbourn, SA-168, SA-170, SA-171 and SA-172 could not be regarded making a “limited contribution” as they have been declared by Ove Arup as making a “strong” contribution. For this reason, this plan is unsound.

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report for details**

**Strategic Policy SP3 – Housing target**

- The draft Local Plan is based on an overall housing target of 885 dwellings per year, based on the standard methodology. While this is supported, it should be seen as a minimum level of supply and any opportunity to increase the level of provision within the context of the overall strategy should be explored.
- The Council has chosen to accelerate the Local Plan timescale to enable examination under the current NPPF, rather than address the potential 75% increase in housing target likely to be brought about by the new NPPF expected to be published early in 2025. While this decision is understandable, given the age of the current Local Plan and the need for a strategic framework of some sort, the wider context suggests that if additional sites are available now that could sit within the overall framework set by the draft Local Plan, then those opportunities should be taken.

**Strategic Policy SP3 – Approach to the Green Belt**

- We set out concerns at Regulation 18 stage about the approach taken in the Council's Green Belt Review to the definition of parcels and what that meant for the level of granularity and precision in the findings. Section 6.0 of this report outline those concerns. These issues have not been addressed; indeed no changes have been made to the 2023 Green Belt Review.
- The weaknesses in the Green Belt Review should be addressed and this is likely to lead to a small number of additional sites being identified for potential release from the Green Belt, one of which is the land at the Dak. The addition of this site will help ensure the overall housing target is met.

**Strategic Policy SP3 – Immediate plan review**

- This Local Plan is not perfect. There are parts of it that are not sound. Some of these issues are relatively minor and can be addressed through modest changes that sit comfortably within the framework published by the Council.
- However, other changes would require a more fundamental change in approach – issues such as the plan period being inadequate and concerns over compliance with the Duty to Cooperate. These issues cannot be addressed at this stage and would require the Plan to be withdrawn and resubmitted. In our view, the need to secure an updated Plan is more important and outweighs any concerns about the strategy as a whole.
- We therefore propose a two-pronged approach – any minor soundness aspects that can be addressed quickly should be addressed now. Any wider concerns that would delay the Plan should be considered through an immediate review of the Plan.
- For the Inspector to have confidence that a Plan Review is an appropriate response to concerns with the strategy, there needs to be a firm commitment within the Plan itself to the Review. There needs to be a specific policy that commits the Council to the principle of a Review and a timetable set out that provides clarity for all parties on how that review will be undertaken.

**Strategic Policy SP3 – Housing delivery**

- We consider that there is a clear case for additional housing sites to be included within the draft Plan. The reasons for this include:
- Strategic cooperation over wider housing needs
- Overoptimistic site capacity and density assumptions
- Deliverability of proposed urban sites
- Overoptimistic windfall allowance

- In addition to these concerns about the overall scale of housing, there is a clear issue with the timing of delivery – a five-year supply is only possible through the use of a stepped trajectory.
- However, addressing these issues in a systematic and comprehensive way would require extensive updates to the evidence base and cannot be done within the context of a Local Plan Examination. We therefore do not advocate that these issues are fully addressed now but are instead picked up through the immediate Plan Review.
- Nevertheless, the need for more homes – particularly delivered early in the Plan period – is such that where opportunities exist to include new sites that are consistent with the overall strategy and can be included based on existing evidence, these opportunities should be taken.
- The land being promoted at The Dak is the type of site that can be included in the Local Plan to boost supply in the early years of the Plan period and that would not require the evidence base to be reformulated.
- The report site is a brownfield site on the edge of the urban area and therefore should be prioritised in a Local Plan context, in line with NPPF paragraph 147:

*"Where it has been concluded that it is necessary to release Green Belt land for development, plans should give first consideration to land which has been previously-developed and/or is well-served by public transport."*

- We set out at Regulation 18 stage our concerns with the Green Belt Review and these comments are repeated in Section 6.0 of our report. In essence, the Green Belt Review inappropriately combined the report site with a far larger area of land and this distorted the findings of the Review in respect of the report site.
- As is plain from Figure 5 below, development of the report site (outlined in green) would have vastly different consequences to development of the whole of SA-91. Many of the concerns about the larger site simply do not apply to the report site, or apply but to a far lesser extent.
- When the specific Green Belt consequences of developing the report site are assessed, as we have done at Appendix 1, the result is very limited harm to the Green Belt.
- On the basis of the analysis at Appendix 1, the report site should be considered suitable for release from the Green Belt and should be allocated.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The site at the Dak should be allocated for housing and removed from the Green Belt.

**Strategic Policy SP3 – Land and the Green Belt**

4.8 The draft Local Plan is based on an overall housing target of 885 dwellings per year, based on the standard methodology. This is **supported** and should be seen as a minimum level of supply.

4.9 Policy SP3 and the preceding text sets out the strategic case for changes to the Green Belt to facilitate the homes, employment space and infrastructure needed in the local area. The consequences of not amending Green Belt boundaries have been obvious in the district over the past 30 years, with sustained house price growth, increased commuting as workers can no longer afford to live locally and a declining supply of commercial space. The exceptional circumstances needed to amend Green Belt boundaries are evident and the Council's position is supported.

4.10 The age of the current Local Plan means that the priority should be to secure a new Local Plan in order to boost housing delivery above the current rate. The Council's decision to accelerate the Local Plan timescale to enable examination under the current NPPF is supported, given the almost unique circumstances of the district. However, this Local Plan can only be considered an interim Plan. The likely substantial increase in housing requirement brought in with the new NPPF means that the Council will need to commit to an immediate review of the Local Plan.

4.11 There is no current commitment in the draft Local Plan to an immediate review. This is a policy omission. A commitment and a timescale should be included so that progress can be made as quickly as possible.

4.12 In summary, we consider Policy SP3 to be **legally compliant** and **sound**. **No modifications** are therefore necessary.

Comment Number: 1

### Do you consider the St Albans Local Plan to be legally compliant?

* Yes

### Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?

* No

### Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate

**SP3 – Land and the Green Belt**

These comments are submitted on behalf of the owner and promoter of land at Copsewood in Bricket Wood. The Regulation 19 Pre-Submission draft Local Plan proposes to allocate land to the immediate east of the Copsewood site at Burston Nurseries (site L1) and also to the west at Miriam Lane (site L3). These substantial housing allocations (for approximately 180 units and 101 units respectively) are both proposed to be removed from the Green Belt. However, the Copsewood site is not proposed to be allocated. This results in a strange, Z-shaped Green Belt boundary that makes little sense and does not meet the NPPF requirements for new Green Belt boundaries (see Appendix 1 to these comments).

We set out at Regulation 18 our detailed concerns with the Arup Green Belt Review and the way in which combination of parcels had been assessed. These representations are attached as Appendix 2 as they are still relevant.

However, and more significantly, since the Regulation 18 consultation the Copsewood site has received a resolution to grant planning permission for a residential development of up to 190 homes. This committee resolution (dated 13 May 2024) was agreed unanimously by the Planning Committee, who agreed with the officer recommendation that Very Special Circumstances exist to clearly outweigh the Green Belt harm. These benefits were primarily around the substantial highway improvements that the proposal can deliver. The section 106 agreement is in the final stages of production and we expect the planning permission to be formally issued by early December 2024.

This imminent planning permission, combined with the previously expressed concerns about the Council's Green Belt Review, means that the currently proposed Green Belt boundary needs to be altered. In order for the draft Local Plan to be "consistent with national policy", specifically advice in paragraph 148 about how Green Belt boundaries should be defined and not need to be altered at the end of the plan period, the Copsewood site should be identified as a committed housing site in the Local Plan. It should be removed from the Green Belt on the accompanying Policies Map, alongside the Council's proposed sites either side of it (sites L1 and L3). Appendix 1 shows how a more robust and permanent Green Belt boundary would run along Lye Lane using "physical features that are readily recognisable", in line with NPPF para 148.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

The Copsewood site should be allocated for housing in the Local Plan and removed from the Green Belt on the Policies Map

## 152 - The owners of land at Noke Side

Submission Number: 152 Submission Date: 07/11/24 12:03

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: The owners of land at Noke Side Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report for details**

**Strategic Policy SP3 – summary**

- In summary, additional housing sites are needed, both to ensure the overall housing target is achieved and to boost delivery in the early part of the Plan period. The urgent need for a new Local Plan means that it is not appropriate at this stage to completely rework the Local Plan strategy and its evidence. Nevertheless, where additional sites can come forward within the context of the submitted strategy, these opportunities should be taken.
- The Noke Side site has been inappropriately excluded from the Local Plan on the basis of a Green Belt Review that did not consider the specific site-specific consequences of development on this site but rather combined the site with a much larger area, making the findings for the whole largely irrelevant to the Noke Side site.
- In addition, the Noke Side represents an important linkage between the proposed Local Plan allocation L3 to the south and the planning permission granted by the Secretary of State to the north. The site should be allocated for development alongside these two proposals.

**Strategic Policy SP3 – Housing target**

- The draft Local Plan is based on an overall housing target of 885 dwellings per year, based on the standard methodology. While this is supported, it should be seen as a minimum level of supply and any opportunity to increase the level of provision within the context of the overall strategy should be explored.
- The Council has chosen to accelerate the Local Plan timescale to enable examination under the current NPPF, rather than address the potential 75% increase in housing target likely to be brought about by the new NPPF expected to be published early in 2025. While this decision is understandable, given the age of the current Local Plan and the need for a strategic framework of some sort, the wider context suggests that if additional sites are available now that could sit within the overall framework set by the draft Local Plan, then those opportunities should be taken.

**Strategic Policy SP3 – Immediate plan review**

- This Local Plan is not perfect. There are parts of it that are not sound. Some of these issues are relatively minor and can be addressed through modest changes that sit comfortably within the framework published by the Council.
- However, other changes would require a more fundamental change in approach – issues such as the plan period being inadequate and concerns over compliance with the Duty to Cooperate. These issues cannot be addressed at this stage and would require the Plan to be withdrawn and resubmitted. In our view, the need to secure an updated Plan is more important and outweighs any concerns about the strategy as a whole.
- We therefore propose a two-pronged approach – any minor soundness aspects that can be addressed quickly should be addressed now. Any wider concerns that would delay the Plan should be considered through an immediate review of the Plan.
- For the Inspector to have confidence that a Plan Review is an appropriate response to concerns with the strategy, there needs to be a firm commitment within the Plan itself to the Review. There needs to be a specific policy that commits the Council to the principle of a Review and a timetable set out that provides clarity for all parties on how that review will be undertaken.

**Strategic Policy SP3 – Housing delivery**

- We consider that there is a clear case for additional housing sites to be included within the draft Plan. The reasons for this include:
- Strategic cooperation over wider housing needs
- Overoptimistic site capacity and density assumptions
- Deliverability of proposed urban sites
- Overoptimistic windfall allowance

- In addition to these concerns about the overall scale of housing, there is a clear issue with the timing of delivery – a five-year supply is only possible through the use of a stepped trajectory.
- However, addressing these issues in a systematic and comprehensive way would require extensive updates to the evidence base and cannot be done within the context of a Local Plan Examination. We therefore do not advocate that these issues are fully addressed now but are instead picked up through the immediate Plan Review.
- Nevertheless, the need for more homes – particularly delivered early in the Plan period – is such that where opportunities exist to include new sites that are consistent with the overall strategy and can be included based on existing evidence, these opportunities should be taken.

**Strategic Policy SP3 – Land at Noke Side**

- There are two key soundness issues for the Local Plan in relation to the Noke Side site.
- The first soundness issue is the Local Plan's exclusion of this site on the basis of a Green Belt Review that did not consider the site-specific consequences of development on this site but rather combined the site with a much larger area. The findings for this larger area are largely irrelevant to the Noke Side site, or at least apply to a much lesser extent. Our concerns around the Green Belt are set out in detail in section 5.0 below.
- The second soundness issue is the lack of acknowledgement of the CALA Homes site immediately north of the Noke Side site. A planning application at this site was refused by the Council (contrary to officer recommendation) but that decision was overturned at appeal in a decision that was recovered by the Secretary of State. The decision was dated 22 March 2024 so predates the Regulation 19 Plan by some way. The decision also granted planning permission for a site on the north side of Chiswell Green Lane. In total, 721 homes were allowed across a large area of land to the west of Chiswell Green.
- The relationship between the Noke Side site and the two allowed appeals is shown at Figure 6 below. The report site is "sandwiched" between the proposed Local Plan allocation immediately south (ref L3) and the CALA site immediately north.
- Given both its scale and significance and the consequences for Chiswell Green, the draft Local Plan needs to acknowledge the Secretary of State's decision. A policy should be included relating to this site and some form of policy notation applied to the Policies Map. The site should also be removed from the Green Belt.
- Such a policy will not only provide clarity but it will also provide a mechanism for a joined-up approach across the area in terms of infrastructure.
- The consequence of this policy addition is that the land rear of Noke Side should also be identified. As currently set out, the site will form residual stub of Green Belt between two residential developments. Identifying the land for development will enable linkages to be made between site L3 and the CALA Homes site, facilitating permeability and continuity in urban design terms.

The Local Plan should avoid leaving a remnant stub of Green Belt in this location, not only for common sense reasons but also to ensure that Green Belt boundaries remain robust for the long term and do not need to be further amended at the end of the Plan Period (NPPF paragraph 148 f).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Both the land at Noke Side and the CALA Homes site granted planning permission by the Secretary of State should be allocated for development in the Local Plan

**Please upload any supporting documents here. Do not include any signatures or other personal data.**

1. Local Plan representations - Noke Side - November 2024 FINAL_[R].pdf

**If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?**

* Yes, I wish to participate in hearing session(s)

**If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:**

DLA Town Planning represents the owner and promoter of the site at Noke Side and our participation in the hearing sessions would assist the Inspector and help to respond to any queries raised.

**I would like to be notified about the submission of the St Albans Local Plan for Independent Examination:**

* Yes

**I would like to be notified about the publication of the report of the Inspector appointed to carry out the examination:**

* Yes

**I would like to be notified about the adoption of the Local Plan:**

* Yes

**162 - Notcutts Ltd**

Submission Number: 162 Submission Date: 07/11/24 13:17

Respondent: Company/Organisation: Bidwells Name: Mr Mark Harris

On Behalf Of Company/Organisation: Notcutts Ltd Name:

Comment Number: 4

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Notcutts Ltd acknowledge that SADC need to and are proposing to release land from the Green Belt to meet its housing need. However, there are a number of issues with the approach taken which must be remedied before the Local Plan can be found sound.

The first of these is a fundamental issue with the Green Belt assessment, which was raised on page 9 of the Local Plan Inspector's letter of April 2020. that the Assessment fails to properly search for land opportunities in accordance with the requirements of the NPPF which sets out

'*Where it has been concluded that it is necessary to release Green Belt land for development, plans should give first consideration to land which has been previously-developed and/or is well-served by public transport*' (paragraph 147).

In searching for sites, the approach of the Council has been to simply look at sites within a buffer around settlements. This is clarified in section 4.2.1 of the Green Belt Assessment (2023) where it is stated '*the GBR Stage 2 feeds directly into SACDC's site selection process. It was therefore appropriate to undertake a more spatially focussed piece of work. The initial area of search was defined by applying a buffer around each settlement inset from the green belt, which would assist in encouraging sustainable pattern of development accessible to existing settlements and maintain the integrity of the Green Belt. This approach ensured a proportionate and focused study.'*

Section 4.2.1 (page 20) of the Green Belt Assessment goes on to state that*'Sites that were not adjacent to existing urban areas (or the buffers) were thus excluded for the assessment on the basis that their release would (a) not contribute to a sustainable pattern of development; and (b) undermine the integrity of the Green Belt by creating hole(s) within its fabric.*

Further it states that*'The identification of a buffer should not be taken as an indication that this land is necessarily the most sustainable, suitable or deliverable option for any future development.'*

On page 21, it is set out that '*it was agreed that the character of the urban settlements and the approach for a finer grain assessment leant itself to a 400m buffer for the main settlements while a 250m buffer was considered reasonable buffer for lower order settlements (Table 4.1, Figure 4.2). These buffers indicate the likely maximum extent of sustainable development and vary accordingly to the position of the built-up area in the settlement hierarchy'.*

This approach fundamentally fails to address the key requirements of paragraph 147 of the NPPF that the first area of search should be brownfield sites and/or those well served by public transport. Although it provides a step towards prioritising sustainably located sites, it simply assumes that proximity to a settlement is an indication of sustainability, which is not always the case.

Whilst there is merit in reviewing the edge of settlements to see if there are appropriate small sites that do not meet the purposes of the Green Belt and could be utilised to meet local development needs, this is not the same as identifying sites in accordance with the priorities of the NPPF. Before the Local Plan can be considered sound, this conflict with national policy needs to be addressed by an adjusted approach to Green Belt assessment that looks at sites along bus routes and close to railway stations, including land outside the arbitrary 250/400m buffers utilised in the Green Belt assessment.

Taking this more robust approach would have meant sites such as that promoted by Stonebond to the rear of the Garden Centre owned by Notcutts Ltd, would have fallen within the parameters of the assessment and likely been allocated for development given the lack of contribution made to the purposes of the Green Belt and location on a main bus route into the City Centre.

Further to this point, Notcutts Ltd would also point out that the NPPF sets out that before concluding that exceptional circumstances exist to justify changes to Green Belt boundaries, the LPA should first make sure as much use as possible is made of suitable brownfield sites and underutilised land.

Part of the site to the rear of Notcutts Garden Centre is brownfield with areas of hard standing and surplus buildings. The remainder of the promoted site forms a now unused and surplus ancillary area of land previously associated with the adjacent retail garden centre. Although within the Green Belt, national policy is clear that even before SADC took the correct decision to review Green Belt boundaries (an inevitable consequence of the level of housing need and the extent of Green Belt constraint) this site should have been identified for development. This would be the case even if the settlement of Smallford was to remain washed over by the Green Belt – an option open to the Council.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. **Policy SP3, Soundness Issue 1: Safeguarded Land**

*Headline*

Given that Local Plans do not come around very often in St Albans, the justification for safeguarded land is particularly acute. Where changes to the Green Belt are being proposed, neighbouring land that is deemed suitable should also be removed from the Green Belt. There has been no consideration of whether it is 'necessary' to safeguard land from the Green Belt, in locations where amendments to the Green Belt are already being proposed.

*Discussion*

NPPF:148 concerns the definition of Green Belt boundaries. Clause (c) requires that 'where necessary' land should be safeguarded to meet longer term needs, well beyond the plan period. Clause (d) explains the status of safeguarded land and clause (e) focuses on ensuring that changes have a degree of permanence, i.e. that a boundary that is redrawn will not need to be further redrawn at the end of the plan period (or 2041 in StAlbans).

Under clause (c) it must sometimes be 'necessary' to safeguard land. It is therefore not entirely a free planningjudgement point and an issue that can be seen to be considered and then rejected. The key questions are: 'why would it be necessary?, what are the circumstances that 'compel' safeguarding?, and are these circumstances present generally and anywhere specifically?

We see no evidence that the Council has looked at all its proposed changes to the Green Belt to determine whether additional safeguarding is necessary. Under comments on Policy SP1 we have established that an early review is necessary to address uncapped need. The SA identifies two primary strategic omission sites. No Green Belt change is currently proposed next to SE Albans omission site, but a significant change is proposed next to 'expanded' North St Alban strategic omission site. This site also benefits from one of the firmest long term Green Belt boundaries that could exist in the form of Heartwood Forest. This, unlike a railway line, is not something that development can just hop over.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

If the true spirt of national Green Belt policy was applied to this Local Plan, the land between StAlbans and Heartwood Forest would also be removed from the Green Belt and safeguarded pending an update of the Plan. Even though Plans can be found sound, subject to early review, this cannot be the answer to everything. The history of plan-making in St Albans is poor,and there is uncapped need to plan for. Safeguarding land 'safeguards' against slow progress during an

early review. Plan preparation performance provisions in the proposed review criterion under SP1 could direct the safeguarded land to be regarded as being 'allocated' for development if deadlines were missed, with the general provisions of LG1 applying.

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report for details**

**Strategic Policy SP3 – summary**

- In summary, additional housing sites are needed, both to ensure the overall housing target is achieved and to boost delivery in the early part of the Plan period. The urgent need for a new Local Plan means that it is not appropriate at this stage to completely rework the Local Plan strategy and its evidence. Nevertheless, where additional sites can come forward within the context of the submitted strategy, these opportunities should be taken.

**Strategic Policy SP3 – Housing target**

- The draft Local Plan is based on an overall housing target of 885 dwellings per year, based on the standard methodology. While this is supported, it should be seen as a minimum level of supply and any opportunity to increase the level of provision within the context of the overall strategy should be explored.
- The Council has chosen to accelerate the Local Plan timescale to enable examination under the current NPPF, rather than address the potential 75% increase in housing target likely to be brought about by the new NPPF expected to be published early in 2025. While this decision is understandable, given the age of the current Local Plan and the need for a strategic framework of some sort, the wider context suggests that if additional sites are available now that could sit within the overall framework set by the draft Local Plan, then those opportunities should be taken.

**Strategic Policy SP3 – Approach to the Green Belt**

- We set out concerns at Regulation 18 stage about the approach taken in the Council's Green Belt Review to the definition of parcels and what that meant for the level of granularity and precision in the findings. Section 6.0 of this report outline those concerns. These issues have not been addressed; indeed no changes have been made to the 2023 Green Belt Review.
- The weaknesses in the Green Belt Review should be addressed and this is likely to lead to a small number of additional sites being identified for potential release from the Green Belt; the addition of this site will help ensure the overall housing target is met.

**Strategic Policy SP3 – Immediate plan review**

- This Local Plan is not perfect. There are parts of it that are not sound. Some of these issues are relatively minor and can be addressed through modest changes that sit comfortably within the framework published by the Council.
- However, other changes would require a more fundamental change in approach – issues such as the plan period being inadequate and concerns over compliance with the Duty to Cooperate. These issues cannot be addressed at this stage and would require the Plan to be withdrawn and resubmitted. In our view, the need to secure an updated Plan is more important and outweighs any concerns about the strategy as a whole.
- We therefore propose a two-pronged approach – any minor soundness aspects that can be addressed quickly should be addressed now. Any wider concerns that would delay the Plan should be considered through an immediate review of the Plan.

- For the Inspector to have confidence that a Plan Review is an appropriate response to concerns with the strategy, there needs to be a firm commitment within the Plan itself to the Review. There needs to be a specific policy that commits the Council to the principle of a Review and a timetable set out that provides clarity for all parties on how that review will be undertaken.

**Strategic Policy SP3 – Housing delivery**

- We consider that there is a clear case for additional housing sites to be included within the draft Plan. The reasons for this include:
- Strategic cooperation over wider housing needs
- Overoptimistic site capacity and density assumptions
- Deliverability of proposed urban sites
- Overoptimistic windfall allowance

- In addition to these concerns about the overall scale of housing, there is a clear issue with the timing of delivery – a five-year supply is only possible through the use of a stepped trajectory.
- However, addressing these issues in a systematic and comprehensive way would require extensive updates to the evidence base and cannot be done within the context of a Local Plan Examination. We therefore do not advocate that these issues are fully addressed now but are instead picked up through the immediate Plan Review.
- Nevertheless, the need for more homes – particularly delivered early in the Plan period – is such that where opportunities exist to include new sites that are consistent with the overall strategy and can be included based on existing evidence, these opportunities should be taken.
- The land being promoted north of Tippendell Lane is the type of site that can be included in the Local Plan to boost supply in the early years of the Plan period and that would not require the evidence base to be reformulated.
- We set out at Regulation 18 stage our concerns with the Green Belt Review and these comments are repeated in Section 5.0 of our report. In essence, the Green Belt Review inappropriately combined the report site with a far larger area of land and this distorted the findings of the Review in respect of the report site.

*Figure 4: Report site in relation to the wider sub-area SA-107*

(see attached report for details)

- As is plain from Figure 4 above, development of the report site (shaded red) would have vastly different consequences to development of the whole of SA-107. Many of the concerns about the larger site simply do not apply to the report site, or apply but to a far lesser extent.
- When the specific Green Belt consequences of developing the report site are assessed, as we have done at Appendix 1, the result is very limited harm to the Green Belt.
- On the basis of the analysis at Appendix 1, the report site should be considered suitable for release from the Green Belt and should be allocated.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report**

**Strategic Policy SP3 – Land and the Green Belt**

- The draft Local Plan is based on an overall housing target of 885 dwellings per year, based on the standard methodology. This is supported and should be seen as a minimum level of supply.
- Policy SP3 and the preceding text sets out the strategic case for changes to the Green Belt to facilitate the homes, employment space and infrastructure needed in the local area. The consequences of not amending Green Belt boundaries have been obvious in the district over the past 30 years, with sustained house price growth, increased commuting as workers can no longer afford to live locally and a declining supply of commercial space. The exceptional circumstances needed to amend Green Belt boundaries are evident and the Council's position is supported.
- The age of the current Local Plan means that the priority should be to secure a new Local Plan in order to boost housing delivery above the current rate. The Council's decision to accelerate the Local Plan timescale to enable examination under the current NPPF is supported, given the almost unique circumstances of the district. However, this Local Plan can only be considered an interim Plan. The likely substantial increase in housing requirement brought in with the new NPPF means that the Council will need to commit to an immediate review of the Local Plan.
- There is no current commitment in the draft Local Plan to an immediate review. This is a policy omission. A commitment and a timescale should be included so that progress can be made as quickly as possible.
- In summary, we consider Policy SP3 to be **legally compliant** and **sound**. **No modifications** are therefore necessary.

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

These representations have been submitted on behalf of our client, Ms Bennett, who previously responded at the Regulation 18 consultation stage.

Strategic Policy SP3 incorporates the local housing need target of 14,603 dwellings to 2041 (885 per annum) in policy, confirming that this is the minimum number of new homes needed in the District.

As noted in the response to Policy SP1: Spatial Strategy for St Albans, given the clear direction of travel indicated in the Government consultation on changes to national policy, particularly the amendments to the standard methodology ("SM") for calculating housing need, which will have a significant impact in St Albans due to the pressing affordability issues that beset this District, it increasing to 1,544 dwellings per annum, our Client objects to the housing requirement in the Plan. This is on the basis progression of the current emerging Local Plan (eLP) now will result in a situation whereby the development plan will remain "out-of-step" with national policy and it would delay considerably meeting housing need in full, leaving this to an immediate review of the eLP.

Accordingly, for the similar reasons set out in the response to Policy SP1, our Client considers the approach in Policy SP3 to be unsound. The annual requirement of the emerging Plan needs to revised to accord with the forthcoming changes to the standard methodology otherwise it cannot

be positively prepared or consistent with national policy in this context, nor is it the most appropriate strategy. This is on the basis that Policy SP3, as drafted, would conflict with the following objectives of the Framework:

Paragraph 7 sets out that the purpose of the planning system is to contribute to the achievement of sustainable development, including through the provision of new homes.

Paragraph 8b) add that part of the social objective of sustainable development is *"…. ensuring that a sufficient number and range of homes can be provided to meet the needs of present and future generations…."*

Paragraph 11a) of the presumption in favour of sustainable development requires all plans to promote a sustainable pattern of development that seeks to meet the development needs of the area.

Paragraph 16 requires local plans to a) be prepared with the objective of contributing to the achievement of sustainable development and b) be prepared positively.

Paragraph 22 requires strategic polices, of which SP3 is one, to look ahead over a minimum of 15 years period from adoption, to anticipate and respond to long-terms requirements.

Paragraph 35a) on examining plans, requires plans to be positively prepared, providing a strategy which as a minimum, seeks to meet the area's objectively assessed needs. Footnote 19 sets out that needs for housing should be assessed using a clear and justified method, as set out in paragraph 61 of the Framework. Paragraph 61 requires strategic polices, such as Policy SP3, to be informed by a local housing needs assessment, conducted using the current standard method in national planning guidance. It adds that outcome of the standard method is an advisory starting-point for establishing a housing requirement for the area. It refers to paragraph 67, which confirms that housing requirement can be higher than the standard method figure.

Paragraph 35b) requires Local Plans to be justified, meaning they are an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence.

Paragraph 35d) requires plans to be consistent with national policy.

It is therefore imperative that the local housing need is met in full now, and that delivery takes place early to address the sizeable shortfalls in housing of different types and tenures that have been created over the decades the Council has not had an up-to-date local plan. To do so would require a suspension of the eLP in its current form and it a new Regulation 19 Plan being prepared that meets the need in the Government's new proposed methodology once adopted later this year.

Further, a new Green Belt Review will need to be undertaken that assesses the supply that of housing that could be delivered from land that meets the definition of Grey Belt.

Notwithstanding the above, our Client supports the Council's position that there is insufficient supply of brownfield sites to meet even the lower housing need identified within the eLP and accordingly exceptional circumstances required for release of land from Green Belt exist in the District – this primarily will be the mechanism through which the vast majority of housing need is delivered in the District in the coming years. This fact applies in the context of both the currently identified housing need, and that which may come to be the new housing need figure as per the revised SM; certainly, the revised SM would only emphasize the shortcomings in the spatial strategy but, more importantly, highlights that Policy SP3 in its current form is not fit for purpose.

Our client objects, however, to the failure to include their land between Alban Way and Colney Heath Lane. We are submitting separate objections to the eLP evidence base, including site selection methodology and the Green Belt Review, on the basis there application has been flawed

leading to sites, including our client's at Land Between The Alban Way And Colney Heath Lane, St Albans that would be suitable for potential allocation and thus make a genuine effort in addressing the affordability crisis of this District, that have been overlooked.

**Strategic Policy SP3 – Land and the Green Belt**

- The draft Local Plan is based on an overall housing target of 885 dwellings per year, based on the standard methodology. This is supported and should be seen as a minimum level of supply.
- Policy SP3 and the preceding text sets out the strategic case for changes to the Green Belt to facilitate the homes, employment space and infrastructure needed in the local area. The consequences of not amending Green Belt boundaries have been obvious in the district over the past 30 years, with sustained house price growth, increased commuting as workers can no longer afford to live locally and a declining supply of commercial space. The exceptional circumstances needed to amend Green Belt boundaries are evident and the Council's position is supported.
- The age of the current Local Plan means that the priority should be to secure a new Local Plan in order to boost housing delivery above the current rate. The Council's decision to accelerate the Local Plan timescale to enable examination under the current NPPF is supported, given the almost unique circumstances of the district. However, this Local Plan can only be considered an interim Plan. The likely substantial increase in housing requirement brought in with the new NPPF means that the Council will need to commit to an immediate review of the Local Plan.
- There is no current commitment in the draft Local Plan to an immediate review. This is a policy omission. A commitment and a timescale should be included so that progress can be made as quickly as possible.
- In summary, we consider Policy SP3 to be **legally compliant** and **sound**. **No modifications** are therefore necessary.

**Do you consider the St Albans Local Plan to be legally compliant?**

* No

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

We note the previous iteration of the draft local plan allocated part of the Rothamsted Campus site for the delivery of circa 55 residential units (Allocation M11). It was highlighted that release of the land from the Green Belt should be for inclusion within the Rothamsted Campus for the development of scientific buildings.

We offer further comments on the Allocation separately but would like to express our support for the omission of Allocation M11. This decision by the Council acknowledges that the site will not be brought forward for residential development, which would have contributed to the Housing Trajectory for "other green belt site allocations."

Instead, the site is now allocated under ‘other sites’ OS3 and OS4—specifically, the “Extension to Rothamsted Research, Harpenden Campus, AL5 2JQ.” These new allocations ensure that the proposals will provide the anticipated increase in employment floorspace outlined in Policy SP3 without negatively impacting the Green Belt.

This change is supported and considered sound as it ensures that other policies of the plan (i.e. those relating to Rothamsted Research) will be effective in their application.

With regard to the Council’s housing approach, however, we do believe that the Plan does not go far enough to ensuring the delivery of a suitable supply of homes across the District.

Policy SP3 identifies the minimum residential need be delivered over the life of the plan, targeting 14,603 homes to 31 March 2041. This is 3,795 homes above the total number of residential sites identified in Part B – Local Plan Sites, with 2,103 (55%) of this shortfall to be delivered via the windfall allowance (Table 3.2 – Housing Trajectory).

We are of the opinion that the Council is in a position to be reducing this reliance on the windfall allowance by allocating additional sites for development. This approach is especially pertinent to the soundness of the plan given the track record on housing delivery (scoring only 69% in the 2022 Housing Delivery Test), and the reduction in capacity of the allocated sites by 971 homes that has already taken place between the Regulation 18 and 19 stages of the Plan. Allocating additional sites as an alternative strategy will help to provide surety of delivery and the effective delivery of the plan.

It is also noted that under the emerging NPPF, housing need could increase to 1,544 homes per annum. Whilst the transitional arrangements for the NPPF are noted, this significant increase in housing need identifies that the Council should be doing all it can to maximise housing delivery at this point to assist with future supply and plan making which would have to respond to further undersupply.

For the plan to be sound, therefore, every effort should be taken to maximise housing delivery through a proactive plan-led approach. LG1 – Broad Locations also makes reference to "unallocated windfall development at this scale" (being over 250 homes), indicating that the Council are expecting larger development opportunities to come forward. This is not a sound approach as it indicates that the Council are aware of such sites and, in which case, should be releasing land from the green belt / allocating them for development. This is especially pertinent given the new "grey belt" definition coming forward in the new NPPF, thus identifying these sites now would assist with housing delivery by reducing complexity in the planning process.

There are also exceptional circumstances to the release of land at Redbourn as it will directly support the long-term investment into the Rothamsted Campus. The scenario where this land is allocated not only supports housing delivery, but also the Council's objectives around the continuing work of Rothamsted Research as per Policies EMP1 and EMP4.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

At present the plan is unsound as it is not based upon the most appropriate strategy for housing delivery to meet the minimum (and anticipated) housing needs. Additional sites should be allocated, including the land at Redbourn to reduce the reliance on windfall sites and to ensure policies for Rothamsted Research and housing delivery remain effective.

## 203 - Hertfordshire Constabulary

Submission Number: 203 Submission Date: 07/11/24 17:06

Respondent: Company/Organisation: Hertfordshire Constabulary Name: Mrs Kerry Macdonald

On Behalf Of Company/Organisation: Hertfordshire Constabulary Name:

Comment Number: 5

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Do you consider the St Albans Local Plan to have complied with the Duty to Cooperate?**

* Yes

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

This applies to SP3 but could not make 2 comments under the same green belt heading so have put comment here.

**Strategic Policy SP3 – Land at the Green Belt**

**Object**

**Plan is not positively prepared**

Hertfordshire Constabulary have reviewed the Local Plan and are of the view not enough consideration has been given to the impact growth could have on emergency services.

In accordance with the PPG (009 Reference ID:53-009-20190722):

*Planning provides an important opportunity to consider the security of the built environment, those that live and work in it and the services it provides.*

In this regard, Policy SP3 should be amended to make reference to the vital role police and fire services make as follows:

*Growth must be supported by suitable supporting infrastructure, including:*

- *Schools*
- *Healthcare and ambulance facilities*
- ***Police and fire services***
- *Transport - facilities for walking, cycling and public transport in particular*
- *Parks, play areas, allotments and other green spaces*
- *Extensive tree planting*
- *Sports and leisure facilities*
- *Renewable and low carbon energy generation.*

Unless the above amendment is made, Hertfordshire Constabulary are of the view that the plan cannot be found sound as it has not been positively prepared in accordance with paragraph 35 of the NPPF (2023).

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Modification requested to **Strategic Policy SP3 – Land at the Green Belt**

Policy SP3 should be amended to make reference to the vital role police and fire services make as follows:

*Growth must be supported by suitable supporting infrastructure, including:*

- *Schools*
- *Healthcare and ambulance facilities*
- ***Police and fire services***
- *Transport - facilities for walking, cycling and public transport in particular*
- *Parks, play areas, allotments and other green spaces*
- *Extensive tree planting*
- *Sports and leisure facilities*
- *Renewable and low carbon energy generation.*

Reason for modification:

Hertfordshire Constabulary have reviewed the Local Plan and are of the view not enough consideration has been given to the impact growth could have on emergency services.

In accordance with the PPG (009 Reference ID:53-009-20190722):

*Planning provides an important opportunity to consider the security of the built environment, those that live and work in it and the services it provides.*

**204 - Stonebond Properties Ltd (Smallford)**

Submission Number: 204 Submission Date: 07/11/24 17:07

Respondent: Company/Organisation: Bidwells Name: Mr Mark Harris

On Behalf Of Company/Organisation: Stonebond Properties Ltd (Smallford) Name:

Comment Number: 5

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

Whilst SADC have proposed releasing some land from the Green Belt to meet its housing need, there are a number of issues with the approach taken which need to be remedied before the Local Plan can be found sound.

As noted in relation to Spatial Strategy, Stonebond have an issue with the way that the settlement of Smallford has been categorised in the settlement hierarchy. This has led to the process of identifying all sustainably located brownfield sites not being identified for allocation in the draft Local Plan, such as Stonebond's site at Notcutts Garden Centre.

Setting this point aside, the fundamental issue with the Green Belt assessment, which Stonebond raised at Regulation 18 stage, and which was raised on page 9 of the Inspector's letter of April 2020, is that it fails to properly search for land opportunities in accordance with the requirements of the NPPF which sets out '*Where it has been concluded that it is necessary to release Green Belt land for development, plans should give first consideration to land which has been previously-developed and/or is well-served by public transport'* (paragraph 147).

In searching for sites, the approach of the Council has been to simply look at sites within a buffer around settlements. This is clarified in section 4.2.1 of the Green Belt Assessment (2023) where it is stated '*the GBR Stage 2 feeds directly into SACDC's site selection process. It was therefore appropriate to undertake a more spatially focussed piece of work. The initial area of search was defined by applying a buffer around each settlement inset from the green belt, which would assist in encouraging sustainable pattern of development accessible to existing settlements and maintain the integrity of the Green Belt. This approach ensured a proportionate and focused study.'*

Section 4.2.1 (page 20) of the Green Belt Assessment goes on to state that*'Sites that were not adjacent to existing urban areas (or the buffers) were thus excluded for the assessment on the basis that their release would (a) not contribute to a sustainable pattern of development; and (b) undermine the integrity of the Green Belt by creating hole(s) within its fabric.*

Further it states that*'The identification of a buffer should not be taken as an indication that this land is necessarily the most sustainable, suitable or deliverable option for any future development.'*

On page 21, it is set out that '*it was agreed that the character of the urban settlements and the approach for a finer grain assessment leant itself to a 400m buffer for the main settlements while a 250m buffer was considered reasonable buffer for lower order settlements (Table 4.1, Figure 4.2). These buffers indicate the likely maximum extent of sustainable development and vary accordingly to the position of the built-up area in the settlement hierarchy'.*

This approach fundamentally fails to address the key requirements of paragraph 147 of the NPPF that the first area of search should be brownfield sites and/or those well served by public transport. Although it provides a step towards prioritising sustainably located sites, it simply assumes that proximity to a settlement is an indication of sustainability which is not always the case.

Whilst there is merit in reviewing the edge of settlements to see if there are appropriate small sites that do not meet the purposes of the Green Belt and could be utilised to meet local development needs, this is not the same as identifying sites in accordance with the priorities of the NPPF.

If a robust approach had been taken to assessing opportunities in a way which was compliant with the NPPF, and which responded to the comments of the Inspector of the previous Local Plan, it would have looked first at sites along bus routes and close to railway stations and this would have included land outside the 250/400m buffers utilised in the Green Belt assessment, such as within Smallford. Taking this more robust approach would have meant sites such as that promoted by Stonebond to the rear of Notcutts Garden Centre, would have fallen within the parameters of the assessment and likely been allocated for development given the lack of contribution made to the purposes of the Green Belt. This point is covered off in more detail in the accompanying report prepared by Ramboll which considers the role the Garden Centre site in meeting the purposes of the Green Belt and wider landscape implications.

Stonebond therefore do not believe that the approach to assessing the suitability of land in the Green Belt for possible development accords with National Policy and the overall strategy for the release of sites form the Green Belt is not justified.

This could be addressed by carrying out a proper review of sites in the vicinity of public transport routes and identifying further appropriate sites for Green Belt release to meet housing need – which as set out in response to the housing trajectory below, and in relation to the site allocations, Stonebond believe is necessary.

Further to this point, Stonebond would also point out that the NPPF sets out that before concluding that exceptional circumstances exist to justify changes to Green Belt boundaries, the LPA should first make sure as much use as possible is made of suitable brownfield sites and underutilised land.

Part of Stonebond's site at Notcutts Garden Centre is brownfield with the remainder forming a surplus part of the garden centre site. Although within the Green Belt, national policy is clear that even before SADC took the correct decision to review Green Belt boundaries (an inevitable consequence of the level of housing need and the extent of Green Belt constraint) their site should have been identified for development. This would be the case even if the settlement of Smallford was to remain washed over by the Green Belt – an option open to the Council.

This furthers Stonebond's position that the approach taken to reviewing the Green Belt and assessing sites does not accord with national policy and needs to be reviewed before the Local Plan can be considered sound.

Finally, Stonebond note that paragraph 145 of the NPPF sets out that when Green Belt boundaries are to be redrawn, the boundary should be able to be '*endure beyond the plan period'.* Paragraph 148 goes on to state that *'plans should be able to demonstrate that Green Belt boundaries will not need to be altered at the end of the Plan period'.*

In the St Albans case, it is known that there will need to be an early review of the Local Plan to meet the transitional arrangements for plan making set out in the recent consultation on the NPPF. Although weight cannot be given to the proposed revisions to the NPPF, the consultation document and Written Ministerial Statement, which are a material planning consideration, clarify the position meaning SADC are going ahead with the Local Plan in the knowledge that they will have to carry out an early review to meet a significantly higher housing number which will inevitably lead to further Green Belt release.

Given this context and the requirement in the current NPPF for Green Belt boundaries to have longevity, Stonebond do not believe that the approach of SADC meets the soundness test of compliance with national policy. This can be addressed through a more thorough review of Green Belt sites in accordance with national policy requirements, as addressed above.

**Please set out the modification(s) you consider necessary to make the St Albans Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the St Albans Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.**

Review the role of Smallford in the Settlement Hierarchy, as discussed in relation to the Spatial Strategy.

Carry out a full review of the Green Belt Assessment to ensure that it complies with paragraph 147 of the NPPF and the need to fist look at brownfield sites and sites well related to public transport, with consequential amendments/additions to housing allocations and the Green Belt boundary, specifically around Smallford.

Review the Green Belt Assessment and amendments to the Green Belt to ensure all justifiable changes and allocations are picked up to reflect the need for the the Green Belt boundary to endure beyond the plan period - which will require a early review given the updated LHN figure that is generated by the revised standard method.

## 205 - Jarvis Homes

Submission Number: 205 Submission Date: 07/11/24 17:08

Respondent: Company/Organisation: DLA Town Planning Name: Mr Simon Andrews

On Behalf Of Company/Organisation: Jarvis Homes Name:

Comment Number: 1

**Do you consider the St Albans Local Plan to be legally compliant?**

* Yes

**Do you consider the St Albans Local Plan to be sound (positively prepared, justified, effective and consistent with national policy)?**

* No

**Please give details of why you consider the Local Plan is, or is not, legally compliant, sound, or compliant with the Duty to Cooperate**

**See attached report**

**Strategic Policy SP3 – summary**

- In summary, additional housing sites are needed, both to ensure the overall housing target is achieved and to boost delivery in the early part of the Plan period. The urgent need for a new Local Plan means that it is not appropriate at this stage to completely rework the Local Plan strategy and its evidence. Nevertheless, where additional sites can come forward within the context of the submitted strategy, these opportunities should be taken.
- The land adjacent to the Jarvis Homes site has been inappropriately excluded from the Local Plan on the basis of a possible extension of the National Landscape for which there is no evidence in the public domain and very little confidence on the possible timescales. This site should be reinstated.
- The Jarvis Homes site has been inappropriately excluded from the Local Plan on the basis of a Green Belt Review that did not consider the specific site-specific consequences of development on this site but rather combined the site with a much larger area, making the findings for the whole largely irrelevant to the Jarvis Homes site.

**Strategic Policy SP3 – Housing target**

- The draft Local Plan is based on an overall housing target of 885 dwellings per year, based on the standard methodology. While this is supported, it should be seen as a minimum level of supply and any opportunity to increase the level of provision within the context of the overall strategy should be explored.
- The Council has chosen to accelerate the Local Plan timescale to enable examination under the current NPPF, rather than address the potential 75% increase in housing target likely to be brought about by the new NPPF expected to be published early in 2025. While this decision is understandable, given the age of the current Local Plan and the need for a strategic framework of some sort, the wider context suggests that if additional sites are available now that could sit within the overall framework set by the draft Local Plan, then those opportunities should be taken.

**Strategic Policy SP3 – Approach to the Green Belt**

- We set out concerns at Regulation 18 stage about the approach taken in the Council's Green Belt Review to the definition of parcels and what that meant for the level of granularity and precision in the findings. Section 6.0 of this report outline those concerns. These issues have not been addressed; indeed no changes have been made to the 2023 Green Belt Review.
- The weaknesses in the Green Belt Review should be addressed and this is likely to lead to a small number of additional sites being identified for potential release from the Green Belt, one of which is the land at Beesonend Lane. The addition of this site will help ensure the overall housing target is met and specifically help boost the supply of accommodation suitable for older people (see comments on Policy HOU3).

**Strategic Policy SP3 – Immediate plan review**

- This Local Plan is not perfect. There are parts of it that are not sound. Some of these issues are relatively minor and can be addressed through modest changes that sit comfortably within the framework published by the Council.
- However, other changes would require a more fundamental change in approach – issues such as the plan period being inadequate and concerns over compliance with the Duty to Cooperate. These issues cannot be addressed at this stage and would require the Plan to be withdrawn and resubmitted. In our view, the need to secure an updated Plan is more important and outweighs any concerns about the strategy as a whole.
- We therefore propose a two-pronged approach – any minor soundness aspects that can be addressed quickly should be addressed now. Any wider concerns that would delay the Plan should be considered through an immediate review of the Plan.
- For the Inspector to have confidence that a Plan Review is an appropriate response to concerns with the strategy, there needs to be a firm commitment within the Plan itself to the Review. There needs to be a specific policy that commits the Council to the principle of a Review and a timetable set out that provides clarity for all parties on how that review will be undertaken.

**Strategic Policy SP3 – Housing delivery**

- We consider that there is a clear case for additional housing sites to be included within the draft Plan. The reasons for this include:
- Strategic cooperation over wider housing needs
- Overoptimistic site capacity and density assumptions
- Deliverability of proposed urban sites
- Overoptimistic windfall allowance

- In addition to these concerns about the overall scale of housing, there is a clear issue with the timing of delivery – a five-year supply is only possible through the use of a stepped trajectory.
- However, addressing these issues in a systematic and comprehensive way would require extensive updates to the evidence base and cannot be done within the context of a Local Plan Examination. We therefore do not advocate that these issues are fully addressed now but are instead picked up through the immediate Plan Review.
- Nevertheless, the need for more homes – particularly delivered early in the Plan period – is such that where opportunities exist to include new sites that are consistent with the overall strategy and can be included based on existing evidence, these opportunities should be taken.

**Strategic Policy SP3 – Land at Beesonend Lane, Harpenden**

- The land being promoted by Jarvis Homes at Beesonend Lane is the type of site that can be included in the Local Plan to boost supply in the early years of the Plan period and that would not require the evidence base to be reformulated.
- At Regulation 18 stage, land adjacent to the Jarvis Homes site was proposed as housing allocation M14. This allocation was based on the Green Belt Review recommendations. This site does not feature in the Regulation 19 Local Plan and the reason provided in the Council's Site Selection Proforma is as follows:

*"Technical work undertaken by Natural England, regarding the characteristics of land that meets their criteria for an extension to the Chilterns National Landscape into St Albans City & District, includes this site."*

- This is the only reason provided. There is no technical evidence published alongside the Regulation 19 Local Plan to explain the background. There is currently no information whatsoever in the public domain to indicate the areas involved in any potential extension of the National Landscape.
- The potential extension of the National Landscape has been a possibility for some time, it last being discussed in 2013. However, the areas of land involved and the timings for any potential extension are very much unknown at this stage. The latest available minutes of the Chilterns Conservation Board meeting (from 20 June 2024) record an update from the Chair that stated:
