Section	Paragraph	Commentary
Housing and Economic Needs Assessment	006 Reference ID: 2a-006-20190220	<p>This section sets out that assessments of housing need should include considerations of and be adjusted to address affordability.</p> <p>This paragraph sets out that <i>“an affordability adjustment is applied as household growth on its own is insufficient as an indicators or future housing need.”</i></p> <p>This is because:</p> <ul style="list-style-type: none"> • <i>“Household formation is constrained to the supply of available properties – new households cannot form if there is nowhere for them to live; and</i> • <i>people may want to live in an area in which they do not reside currently, for example to be near to work, but be unable to find appropriate accommodation that they can afford.”</i> <p><i>“The affordability adjustment is applied in order to ensure that the standard method for assessing local housing need responds to price signals and is consistent with the policy objective of significantly boosting the supply of homes. The specific adjustment in this guidance is set at a level to ensure that minimum annual housing need starts to address the affordability of homes.”</i></p>
Housing and Economic Needs Assessment	018 Reference ID 2a-01820190220	<p>Sets out that <i>“all households whose needs are not met by the market can be considered in affordable housing need. The definition of affordable housing is set out in Annex 2 of the National Planning Policy Framework”</i>.</p>
Housing and Economic Needs Assessment	019 Reference ID 2a-01920190220	<p>States that <i>“strategic policy making authorities will need to estimate the current number of households and projected number of households who lack their own housing or who cannot afford to meet their housing needs in the market. This should involve working with colleagues in their relevant authority (e.g. housing, health and social care departments).</i></p>
Housing and Economic Needs Assessment	020 Reference ID 2a-02020190220	<p>The paragraph sets out that in order to calculate gross need for affordable housing, <i>“strategic policy-making authorities can establish the unmet (gross) need for affordable housing by assessing past trends and current estimates of:</i></p> <ul style="list-style-type: none"> • <i>the number of homeless households;</i>

		<ul style="list-style-type: none"> • <i>the number of those in priority need who are currently housed in temporary accommodation;</i> • <i>the number of households in over-crowded housing;</i> • <i>the number of concealed households;</i> • <i>the number of existing affordable housing tenants in need (i.e. householders currently housed in unsuitable dwellings); and</i> • <i>the number of households from other tenures in need and those that cannot afford their own homes, either to rent, or to own, where that is their aspiration.”</i>
Housing and Economic Needs Assessment	024 Reference ID 2a-02420190220	<p>The paragraph states that <i>“the total need for affordable housing will need to be converted into annual flows by calculating the total net need (subtract total available stock from total gross need) and converting total net need into an annual flow based on the plan period”</i>.</p> <p>It also details that:</p> <p><i>“An increase in the total housing figures included in the plan may need to be considered where it could help deliver the required number of affordable homes.”</i></p>
Housing Supply and Delivery	031 Reference ID: 68-031-20190722	<p>With regard to how past shortfalls in housing completions against planned requirements should be addressed, the paragraph states:</p> <p><i>“The level of deficit or shortfall will need to be calculated from the base date of the adopted plan and should be added to the plan requirements for the next 5 year period (the Sedgefield approach).”</i></p>
