Chapter Summaries

1. Introduction

Explains what the SLP is and its place within the wider development plan for the district.

2. The St Albans City and District Context

Introduces the reader to St Albans City and District as a place, setting out data and the issues and challenges which the SLP sets out to address.

3. Local Plan Vision and Objectives

Sets out the vision for the district in 2028. From this the objectives are drawn, which will help to deliver this vision. Policies later in the SLP will be used to deliver the vision and objectives.

4. The Spatial Strategy

Sets out the reasoning behind and the policy for the roles the City, towns and villages will fulfil over the plan period.

5. Our Special Character

Sets the plans policies on retaining and enhancing the special character of the District.

6. Mixed and Balanced Communities

Sets out the polices to ensure the needs of communities are met.

7. A Thriving Economy

Sets out the how district's economy will grow over the plan period.

8. Celebration of our Culture

How the plan supports culture and the visitor economy across the district.

9. A Connected District with Ease of Movement

How the plan deals with transport issues across the district.

10. A Healthy and Strong Environment

Sets out the plan's polices relating to the environment, energy and sustainable construction.

11. Infrastructure

Explains how infrastructure will be delivered alongside development.

12. Delivery

Explains how the plan's delivery and effectiveness will be monitored.

Please note that a Glossary is contained in Appendix 3 which explains terms and abbreviations used in the document.

1. Introduction

- 1.1 The Local Plan (LP) will consist of a suite of local development documents. These documents will set out the planning policies and proposals for the future development of the City and District of St Albans. The Strategic Local Plan (SLP) is the principal Development Plan Document (DPD) and establishes the Council's long term spatial planning strategy for delivering development and infrastructure from 2011 to 2028.
- 1.2 The LP is based on its community's vision contained in the Sustainable Community Strategies for St Albans and Hertfordshire. It must also comply with other legal requirements, including the need to have regard to the Government's national planning policy, including the National Planning Policy Framework and to be based on proportionate and justifiable evidence.
- 1.3 Within the LP, the most important documents are called Development Plan Documents (DPDs). Together with the Hertfordshire Minerals and Waste Framework, the DPDs will form the new statutory planning documents for the district.
- 1.4 A timetable for the LP is contained in the Local Development Scheme (LDS). Currently it is proposed to produce the following DPDs:
 - Strategic Local Plan DPD (SLP)
 - Detailed Local Plan DPD (DLP)
 - East Hemel Hempstead Area action Plan DPD (jointly with Dacorum Borough Council)
- 1.5 The Council has made significant progress on the Strategic Local Plan (formerly known as the Core Strategy) and is seeking to adopt it at the earliest opportunity. Work on the Detailed Local Plan (formerly known as Site Allocations and Development Management Policies) is at a relatively early stage, but will also be taken forward as soon as possible. This approach will make sure that new policies are in place as soon as reasonably possible, which is important given the current Plan dates from 1994. This approach accords with the NPPF which highlights that "It is highly desirable that local planning authorities should have an up-to-date plan in place"
- 1.6 The various components of the LP are highlighted by the yellow triangle shown in Figure 1.
- 1.7 The SLP has been prepared following consultations on Issues and Options documents in 2006 and 2007, the Emerging Plan in 2009 and on the Strategy for Locating Future Development in the District in 2010/2011.

- 1.9 Once the SLP is adopted, it will supersede some of the policies in the

Deleted: 4.9

saved St Albans Local Plan Review 1994, as shown in Appendix 1. Once the subsequent DLP is adopted, the St Albans Local Plan Review 1994 will be wholly superseded.

Evidence Base

- 1.10 The Council has built a wide-ranging evidence base for the SLP. This is listed on the Council website and is updated on an ongoing basis.

Key Influences on the Strategic Local Plan

National Planning Policy Framework (NPPF)

- 1.11 The NPPF specifies that Local Plans are the key to delivering sustainable development that reflects the vision and aspirations of local communities. All plans should be based upon and reflect the “presumption in favour of sustainable development”, with clear policies that will guide how the presumption should be applied locally.
- 1.12 The NPPF (<http://www.communities.gov.uk>) has been considered as a whole and the SLP is consistent with it. Of particular significance is paragraph 14:

At the heart of the NPPF is a presumption in favour of sustainable development, which should be seen as a golden thread running through both plan-making and decision-taking. For plan-making this means that:

- *Local planning authorities should positively seek opportunities to meet the development needs of their area;*
- *Local Plans should meet objectively assessed needs, with sufficient flexibility to adapt to rapid change, unless:*
 - *any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or*
 - *specific policies in this Framework indicate development should be restricted⁹.*

⁹ *For example... land designated as Green Belt,*

Deleted: does not apply in the

- 1.13 The NPPF advises that the purpose of the planning system is to contribute to the achievement of sustainable development. The policies in paragraphs 18 to 219 of the NPPF, taken as a whole, constitute the Government’s view of what sustainable development in England means in practice for the planning system.

- 1.14 The NPPF follows the longstanding approach to planning in setting out that there are three dimensions to sustainable development: economic, social

Deleted: 4.9

and environmental. These roles should not be undertaken in isolation, because they are mutually dependent.

1.15 The NPPF at Paragraph 17 identifies 12 core planning principles which should underpin plan-making. These have been considered throughout the SLP. The plan positively seeks to meet the development needs of the area, within the context of the district and the interaction between the economic, social and environmental roles. This is set out in this SLP and forthcoming DLP as a whole, with key strategic choices set out in chapter 4.

Deleted: D

The Presumption in Favour of Sustainable Development

1.16 When considering development proposals the Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the National Planning Policy Framework. It will always work proactively with applicants jointly to find solutions which mean that proposals can be approved wherever possible, and to secure development that improves the economic, social and environmental conditions in the area.

Presumption in Favour of Sustainable Development

Planning applications that accord with the policies in this Strategic Local Plan (and, where relevant, with policies in neighbourhood plans) will be approved without delay, unless material considerations indicate otherwise.

Where there are no policies relevant to the application or relevant policies are out of date at the time of making the decision then the Council will grant permission unless material considerations indicate otherwise – taking into account whether:

- Any adverse impacts of granting permission would significantly and demonstrably outweigh the benefits, when assessed against the policies in the National Planning Policy Framework taken as a whole; or
- Specific policies in that Framework indicate that development should be restricted¹.

Sustainable Community Strategy for St Albans City and District

1.17 All local authorities have to prepare a Sustainable Community Strategy (SCS) with local partners as required by Section 4 Local Government Act 2000. The SCS sets the overall strategic direction and long term vision for the economic, social and environmental wellbeing of a local area, in a way

¹ For example, those policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest; land designated as Green Belt, Local Green Space or within designated heritage assets; and locations at risk of flooding.

Deleted: a

Deleted: 4.9

that contributes to sustainable development. It seeks to improve the quality of life and services in the local area. Its vision and objectives need to be backed by clear evidence and analysis and supported by targeted and co-ordinated action. The SCS can be modified and updated by the LPA as it chooses.

1.18 A refresh of the SCS for the district was approved in June 2009 and covers the period to 2021. The SCS contains the following vision for the district:

“A progressive, unique and vibrant district, which values its environment, heritage and culture, and cares for the future: an outstanding place to live where everyone can flourish.”

1.19 The SCS identifies four key priorities for the district:

- Ensuring the district is a great place to be.
- Creating a diverse and sustainable economy for the 21st century.
- Keeping the district healthy.
- Supporting an active community that has pride in itself and cares for its future.

Deleted: C

1.20 The SCS also highlights specific areas of work that need to be addressed to achieve the key priorities. The LP is the spatial expression of the SCS (see paragraph 2.18).

Hertfordshire Sustainable Community Strategy

1.21 Hertfordshire 2021: A Brighter Future is the county-wide SCS, prepared jointly by Hertfordshire County Council and Hertfordshire Forward, a partnership which brings together all the key agencies in the county. The Hertfordshire SCS has identified 9 key areas of concern and sets out long term objectives and short term improvements to address them:

Deleted: C

- Jobs, prosperity and skills.
- Safer and stronger communities.
- Children and young people.
- An ageing population.
- Health and wellbeing.
- Housing, affordable housing and quality neighbourhoods.
- Transport and access.
- Sustaining Hertfordshire’s unique character and quality of life.
- Promoting sustainable development.

Responses to Previous Community and Stakeholder Consultations

Deleted: 4.9

1.22 Views expressed by the community and stakeholders in response to the SLP (then termed Core Strategy) consultation documents in 2006, 2007, 2009, and 2010/2011 form part of the evidence base for the LP. Representations made during these public consultations from residents, businesses, organisations, elected representatives and other stakeholders have been key in shaping this document.

Sustainability Appraisal

1.23 The SLP must be subject to a Sustainability Appraisal/ Strategic Environmental Assessment. The Council's Sustainability Appraisal consultants have assessed this document against the Sustainability Appraisal framework for the district and have produced a Sustainability Appraisal Report. This assessment and previous Sustainability Appraisal working notes have been important influences on the SLP policies and proposals.

Collaborative Planning

1.24 The Government expects joint working on areas of common interest to be diligently undertaken for the mutual benefit of neighbouring authorities. Public bodies have a duty to cooperate on planning issues that cross administrative boundaries, particularly those which relate to the strategic priorities. Local planning authorities will be expected to demonstrate evidence of having effectively cooperated to plan for issues with cross-boundary impacts when their Local Plans are submitted for examination.

1.25 Co-operation is a longstanding approach taken extremely seriously by this Council since well before the NPPF requirement. The Council has longstanding bilateral and multilateral working arrangements with Hertfordshire authorities and others in the sub regional area. A very brief summary of joint working includes:

- Quarterly officer meetings of Hertfordshire Planning Group (HPG) – including all Herts authorities and HCC
- Quarterly officer meetings of HPG Development Plans - including all Herts authorities and HCC
- Regular meetings of Hertfordshire Infrastructure Planning Partnership (HIPP) – Portfolio Holders of all Herts authorities and HCC
- Meetings at officer, Councillor and joint meetings with adjoining and nearby authorities
- Very considerable joint work on Evidence Bases, including in areas such as Employment, Housing, Green Infrastructure, Sustainable Building and Community Infrastructure Levy (CIL)
- Joint work with Dacorum on the East Hemel Hempstead Area Action Plan

Neighbourhood Planning

1.26 Neighbourhood plans have been introduced by The Localism Act 2011 and enable local communities to shape and direct sustainable development in their area. These are plans produced by a parish council or a neighbourhood forum. Neighbourhood plans need to be considered at an independent examination in public before a referendum can take place. Where there is a conflict between the non-strategic policies in the Local Plan and the Neighbourhood Plan, the policies the Neighbourhood Plan contains will take precedence for that neighbourhood.

1.27 The Council is committed to neighbourhood planning as a process, in order to deliver the neighbourhood level aspirations of communities. There are a number of mechanisms to deliver these aspirations, including ongoing engagement with Parish and Town councils, planning applications and the forthcoming DLP, as well as Neighbourhood Plans. As community-led initiatives, the role of the Council is not to create Neighbourhood Plans, but to assist communities in developing them themselves.

Regional Strategy (RS)

1.28 On 6 July 2010 the Communities Minister announced the revocation of regional strategies (RS). However, revocation of the East of England Plan has not yet occurred and the timescale is uncertain. Until revocation takes place, the 2004 Act shall apply, which means that policies or proposals should be in general conformity with the RSS.

2. The St Albans City and District Context

Introduction

2.1 The City and District of St Albans has a very special character, with a blend of City, towns, villages and Green Belt countryside. It has a population of about 140,000 (the second highest in Hertfordshire) and covers an area of 63 square miles (161 sq km). The district is located in central Hertfordshire, within the Metropolitan Green Belt, 20 miles (30 km) north of London. Hertfordshire's towns are strongly influenced by London. These towns are close to each other with complex spatial relationships between them for shopping, leisure, employment, education and other purposes.

2.2 The historic cathedral City of St Albans (69,000 population) is the largest settlement in the district. It is Hertfordshire's oldest town. In Roman times, when it was called Verulamium, it was the third largest town in Roman

Formatted: Indent: Hanging: 0.93 cm

Deleted: 6

Deleted: 7

Deleted: unless there is local justification.

Formatted: Font color: Red

Deleted:

Deleted: 4.9

Britain, after London and Colchester. A strong medieval heritage is still evident within the City core and with each successive historic period further architectural richness and variety has been added to create a City of superb townscape quality and character.

- 2.3 The residential commuter town of Harpenden is the second largest settlement in the district with a population of almost 30,000. Harpenden grew slowly as a settlement from the early 13th century, only experiencing major growth from 1860 with the arrival of the railway. Harpenden is located in the north of the district on a dip-slope of the Chiltern Hills. The town has an impressive range of historic buildings and open spaces, including the Green Flag award winning Harpenden Common. It is home to the world renowned agricultural research centre of Rothamsted Research.
- 2.4 St Albans and Harpenden are prosperous and popular towns, primarily due to their high quality environment, excellent schools and transport links to London and the rest of the country. They are the main focus for commercial and leisure activity. Each has a thriving centre providing a variety of retail, leisure, community and cultural facilities and also employment opportunities. Deleted: C
- 2.5 London Colney is the next largest settlement in the district and has the most urban character. It contains employment areas and the large Colney Fields retail park, but lacks some of the facilities of a traditional town centre. The River Colne flows through the south of the town providing an attractive setting rich in biodiversity.
- 2.6 Other settlements in the district excluded from the Green Belt are Bricket Wood, Chiswell Green, How Wood, Park Street/Frogmore, Redbourn and Wheathampstead. All provide some job opportunities, together with essential health, education and community facilities. Redbourn and Wheathampstead have village centres and each settlement has its own local identity. Deleted: and
- 2.7 There are a number of smaller settlements within the Green Belt, including Kinsbourne Green, Colney Heath, Folly Fields, Gustard Wood, Sandridge, Sleafshyde and Smallford.
- 2.8 Throughout the district, development pressure is intense, house prices have greatly increased in recent times but are now flattening out and the need for affordable housing is high. There is a strong trend towards urban intensification, loss of employment use to residential and a high level of house extensions. The Green Belt is under particular pressure from major development proposals attracted by the strong transport links, especially in the south of the district.

The Sub Regional Context

2.9 The district has a primary spatial relationship with London, a city which strongly influences local patterns of employment, travel, retail and leisure. It also has strong spatial relationships with neighbouring towns, particularly Hemel Hempstead, Welwyn Garden City, Hatfield, Watford and Luton. These towns offer alternative and sometimes competing employment, retail and leisure opportunities. The district benefits from close links with the University of Hertfordshire in Hatfield. Oaklands Community College in St Albans is the district's sole further and higher education provider and plays a key role in skills development, training and lifetime learning opportunities at a sub-regional level. Key sub-regional employers include the world renowned institutes of the Building Research Establishment (BRE) at Bricket Wood and Rothamsted Research in Harpenden.

Deleted: C

2.10 Nationally and regionally important transport routes pass through or close to the district, which is exceptionally well located in regard to strategic transport networks. These include the M1, A1 (M) and M25 motorways, the A414, the Midlands Mainline railway to the East Midlands, the Thameslink railway into St Pancras International and through Eurostar to Europe. The East Coast mainline through Hatfield and the West Coast mainline through Hemel Hempstead reinforce the strong London focus in public transport. The rail links provide direct and easy access to Gatwick and Luton Airports. East-west travel is catered for by the M25 and the A414, although at the district and county level, traffic movement east-west is poor and congestion is a major problem, with high levels of car use, limited bus routes and frequencies and a large rural hinterland. International links are provided for through London Luton Airport which lies 6 miles north of Harpenden. Heathrow, Gatwick and Stansted are also readily accessible via the M25.

Deleted: s

Deleted: ownership

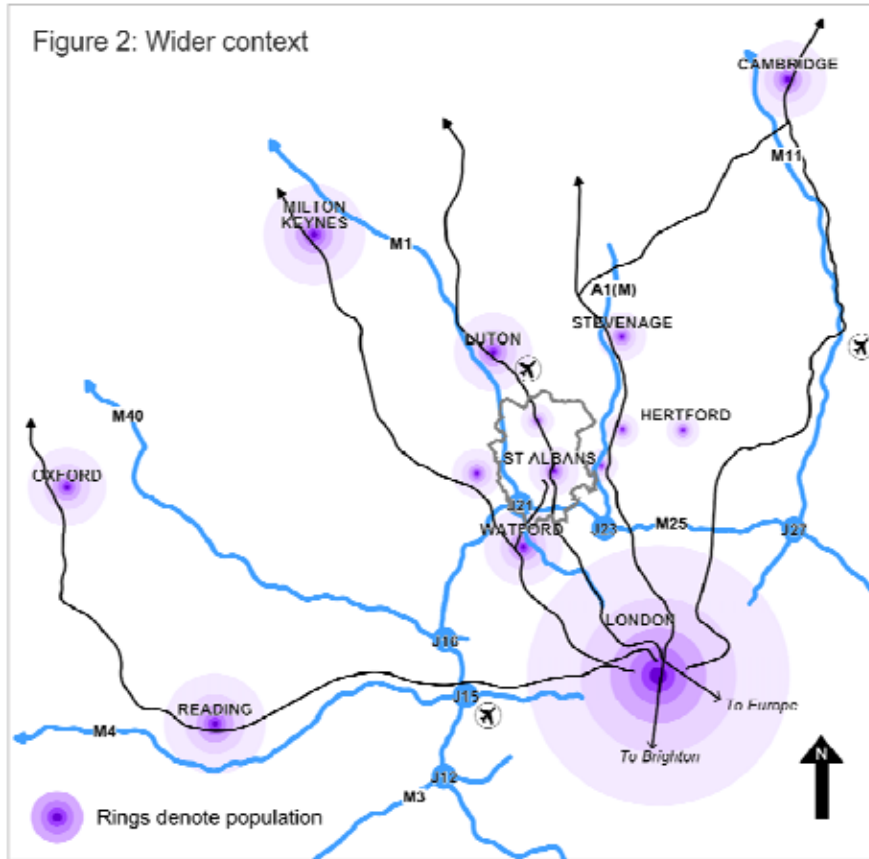

2.11 The district has two distinct countryside character areas - the Northern Thames Basin and the Chilterns. Generally, the natural environment is of good quality and includes some very attractive countryside. There are two designated Sites of Special Scientific Interest (SSSIs) and many other sites of nature conservation importance. However, there are areas which need enhancement, including some areas to the south of the district in the Watling Chase Community Forest.

Local Population

2.12 The district has a slightly younger population than the national average and residents generally have high educational attainment. St Albans City and District is one of the least deprived parts of the country, with very high average income levels and relatively low unemployment. There is good quality housing and very high house prices. However, there are pockets of relative deprivation, for example in Batchwood, Sopwell, Cunningham and Park Street wards, where the level of deprivation is above the national average.

Deleted: 4.9

2.13 The ethnic diversity of the district is about the same as the UK average and around 10% of the local population come from minority ethnic communities.

Employment Characteristics

2.14 The local economy is largely made up of employment in financial and business services, research and development, retail and educational sectors. The visitor economy is an increasingly important local economic driver.

2.15 Nearly half of local residents of working age have a degree qualification or above and within the working population the majority of residents are employed in professional and managerial occupations, a considerably higher rate than at the county or national level. The local economy is driven by a large number of small businesses, including freelance and consultancy and has a vibrant entrepreneurial culture.

Deleted: 4.9

2.16 The district experiences considerable flows of both in and out commuting. Overall there is significant net out commuting to high paying jobs outside the district, primarily in London but also in other nearby towns. Most of the district's young and mature students achieve very high educational attainment, but not all of them. Key areas for intervention include training for young people, developing social enterprise and self reliance, working with local employers on skills development and the development of new economic clusters.

Deleted: Overall

Key Issues and Challenges Facing the District

2.17 Over 90% of residents are very or fairly satisfied with the district as a place to live and only 4% are dissatisfied, but the district still faces some considerable key issues and challenges, as well as wishing to meet the highest of aspirations.

2.18 The SCS has identified the key issues and challenges for the district as:

- Affordable housing.
- Providing accessible facilities and activities for young people.
- Encouraging a diverse and sustainable economy and increasing participation in education and skills development at all ages.
- Tackling traffic congestion.
- Reducing health inequalities.
- Supporting older people.
- Reducing pockets of social and economic inequality within the district where individuals and groups are not enjoying the same high quality of life.
- Protecting the environment for the future.
- Encouraging community engagement and participation - especially groups who have been less involved in the past.

2.19 Related key issues have also been identified through the Hertfordshire Compact. This is an agreement between the Statutory, Voluntary & Community Sectors in Hertfordshire, working together in partnership.

Deleted: agreement on relationships between the Statutory Sector

Deleted: and the

2.20 In preparing the following Vision and Strategic Objectives, a thorough analysis of the district's context, assets, resources, aspirations, issues and challenges has been undertaken. This has created a unique strategy which responds to a unique place with the key aim of ensuring it remains special now and in the future, whilst addressing issues of concern.

2.21 The Council has objectively assessed and reviewed development need and demand; and balanced these against other factors and material considerations as set out in the NPPF. The district's communities and the NPPF greatly value the fundamental aim of the retention of the openness of

Deleted: and

Deleted: 4.9

the Green Belt. This openness plays many important roles; including preserving the setting, special character and historic nature of the district's settlements as well as providing accessible high quality open areas for London. This overriding value of openness is clearly recognised by the NPPF as development in Green Belt is specifically excluded from the presumption in favour of sustainable development.

2.22 In order to develop an appropriate evidence base and inform decision making SADC commissioned some innovative work looking at the Environmental Capacity of the district. This work was commissioned and started before the final NPPF, but finalised immediately post the NPPF publication. This district is believed to be the first in the UK to have commissioned such work, including utilising 'Ecosystems Services' information and approaches. This approach has now been supported by the NPPF (at paragraph 109). Key highlights include:

- The ecological footprint of the district reveals an unsustainable pattern of consumption: An area of biologically productive land fifty times the size of the district is required to sustain its current population (approximately equivalent to Hertfordshire, Bedfordshire, Buckinghamshire and Essex combined).
- An area of land eleven times the size of the district is required to sustain the district's current food consumption and to produce sufficient domestic energy to support the local population would require an area of short-rotation coppice 1.7 times the area of the district.
- The district's non-urban areas will become even more important in terms of the district's ability to respond to energy and resource scarcity and climate change. Water resources are under immense pressure and over abstraction has resulted in biodiversity damage, including to local chalk streams.
- The retention and enhancement of the district's non-urban areas should be a key part of the local economic development strategy, due to its array of economic benefits (see Policy SLP15).
- The Green Belt has worked successfully for more than 60 years in controlling the growth of Greater London. This has proven to be valuable for all Londoners in the sense that they all continue to live within a relatively short distance of the countryside. In St Albans City and District the Green Belt has also served local people well, ensuring that the majority of residents live and work within close proximity to accessible and attractive countryside. The Green Belt has also helped the district's settlements to maintain their own individual special character.

Deleted: D

Deleted: 4.9

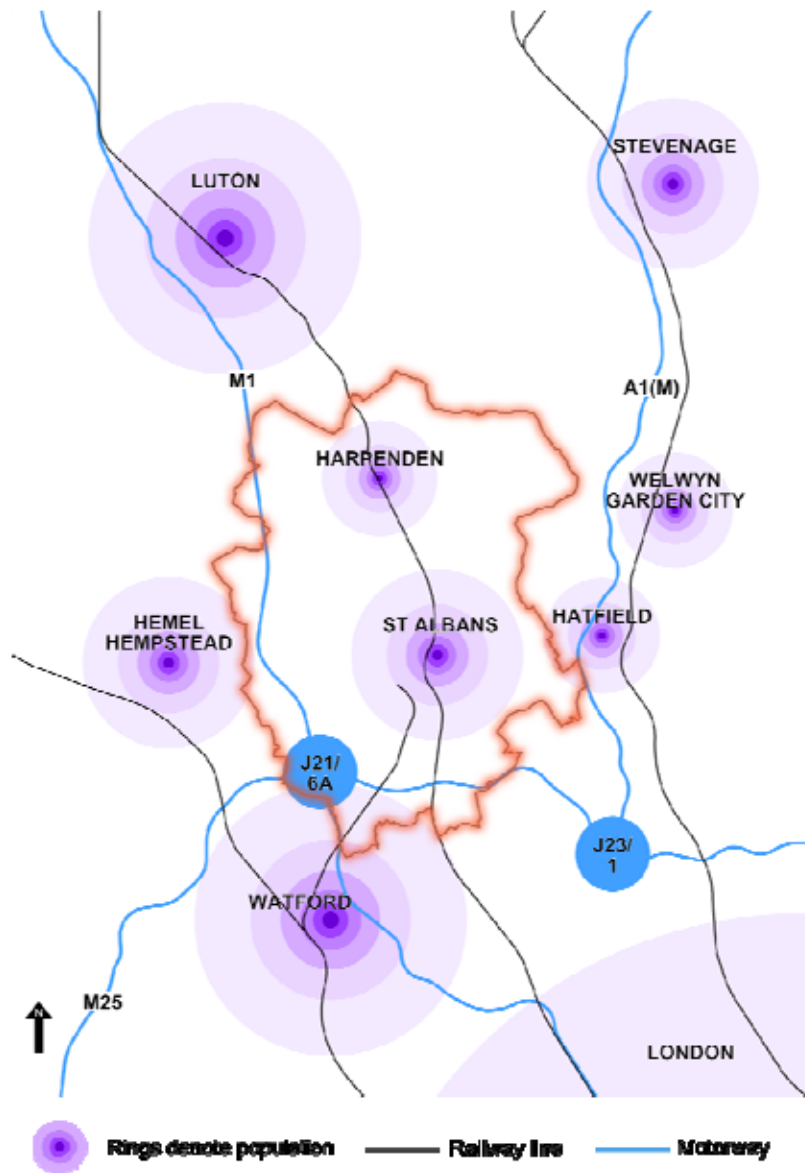

2.23 In view of these factors and trends, the observations made regarding the various global and local ecosystems and the services they provide and the fact that we are already exceeding the capacity of the environment to support us, the study concludes that it would be unwise to permit further urban development in the district on undeveloped land. Where development is permitted a Compact City² approach is recommended.

Deleted: D

² Compact City is urban development which involves mixed-use settlements within urban areas, which make effective use of public transport and encourage walking and cycling.

Deleted: 4.9

Figure 3: St Albans City & District Context

3. Vision and Objectives

The Local Plan Vision for 2028

3.1 This chapter sets out a vision for how the district will be in 2028, explaining how the policies in the Local Plan have shaped places in the district. It also

Deleted: 4.9

includes a list of objectives which will help to achieve this vision. Through the Local Plan we will have successfully shaped delivery so that in 2028:

3.2 St Albans City and District's outstanding built and natural environment has been retained and enhanced. This includes the historic Cathedral City of St Albans; the vibrant and charming town of Harpenden; London Colney with its diverse and exciting character; and the range of villages and hamlets, all with their individual character. The natural and man-made landscapes and woodlands within the extensive Green Belt have been proactively managed, to conserve the district's heritage, maintain its existing high quality of life and retain the sense of rurality.

Deleted: C

3.3 In maintaining this high quality of life, truly sustainable development and the diminution of the district's environmental footprint have been the principles underpinning all growth and development proposals. The aim is to ensure a better balance is achieved between built form and the natural environment, with natural processes and assets properly valued and preserved. This will ensure that the district has halted further increases in its environmental footprint and is reducing its impact within the wider sub region.

3.4 The district's prosperous economy, based primarily on high levels of knowledge and skills has provided a robust and flexible base from which to respond to future challenges. Existing key employers, Rothamsted Research and the BRE have redeveloped and expanded, creating new highly skilled jobs and fulfilled their potential as Green Technology business incubators. New business start ups and entrepreneurial activity have increased throughout the district, supported by the provision of affordable and flexible business space, high speed broadband and next generation telecommunications. The visitor economy has become increasingly important to the local economy. The unique and exceptional quality of the built and natural environment continues to be very important in supporting the prosperous local economy and providing a range of jobs for all.

Deleted: is

Deleted: an

Deleted: ic driver

3.5 St Albans City centre has retained and expanded its diverse range of independent shops and services and these have been complemented by a broad mix of High Street multiples which satisfy the majority of residents' weekly shopping needs. Redevelopment of City centre sites has helped to attract visitors from surrounding areas seeking both a comprehensive shopping offer as well as a unique and attractive environment. St Albans street market has continued to add considerable value through its diverse mix of stalls with a strong emphasis on quality goods and local produce. Harpenden has remained a diverse and appealing place to shop with a thriving mix of independent retailers, as local shopping expenditure is anchored by expanded central supermarkets. London Colney's retail offer has improved through public realm enhancements in its High Street and development at Colney Fields. In villages, the great value that local shops, services and open spaces add to the community and quality of life has

Deleted: 4.9

been recognised with support and protection given.

3.6 A mixture of quality new homes including affordable houses and housing for families, the elderly, disabled, key workers and young people have been built. A Compact City approach combined with Green Belt green field preservation has enabled the delivery of an appropriate level of housing whilst respecting the ability of the district's environment to enable future generations to meet their own needs. Development exceptions at Oaklands College and Kingsley Green support the overall approach. Residential and other new buildings are flexible and adaptable, with many being designed to 'Building for Life' standards/Lifetime Homes. This has helped to build more mixed and balanced communities, increased the vitality of urban and village living and helped with the retention and viability of local services. The gaps between settlements have been preserved in order to ensure that their individual character is maintained, including in the congested south of the district.

Deleted: delivered

Deleted: D

3.7 New schools, health facilities and other community infrastructure have been provided alongside development. Oaklands College has modern, fit-for-purpose buildings that enable high quality further and higher education; excellence in work with the learning disabled and support extensive community use of shared facilities and open space. A partnership approach between education providers, local businesses and organisations has helped to deliver a highly skilled and flexible workforce. This has helped to tackle small pockets of skill deficit, low employment and through the University of Hertfordshire in Hatfield has enabled lifetime learning.

3.8 The delivery of the highest quality of architectural and urban design has seen a step change in the built form of the district; St Albans is now known as an example of contemporary design in a historic setting. All settlements have also benefited from a comprehensive range of streetscape and public realm improvements, with St Albans specifically improved by the creation of new and improved public spaces; a variety of City centre interlinked pedestrian-friendly routes; public art and a vibrant mix of cafes, restaurants and street entertainment. Harpenden's unique and tranquil atmosphere has been retained and its excellent array of green spaces and character buildings conserved. The public realm in London Colney, particularly along the High Street, has been significantly improved.

Deleted: e

Deleted: l

Deleted: ar

Deleted: ,

Deleted:

Deleted: ,

3.9 A network of green and blue corridors has been created which link key open spaces and wildlife habitats. The improved Verulamium Park and new 'green rings' around the periphery of St Albans city centre and other settlements have been integrated into the broader surrounding footpaths and cyclepaths, and routes linking out to the countryside. The district has seen a substantial increase in woodland with the establishment of Heartwood Forest and a renewed emphasis upon the delivery of Watling Chase Community Forest. The district's superb commons and open spaces

Deleted: 4.9

have continued to be valued and the important role that agriculture plays in shaping the character of the district has been recognised and the production of local food and products is encouraged.

3.10 The challenge of balancing the conservation of its historic environment with the integration of green and renewable technologies has been embraced, including responding to the challenges of climate change. Many homes and buildings are highly energy efficient and use low levels of water, including in challenging places such as conservation areas and listed buildings.

3.11 The district's Green Belt and non-urban areas have been protected and proactively managed helping to ensure the long-term sustainability of the district and allow future generations to meet their own needs. In general, the location of new development helps to reduce the needs to travel. The district's carbon footprint and congestion levels have been managed by creating new and improving existing cycling and walking routes and via traffic management improvements, including pedestrian enhancements in St Peter's Street, St Albans and increased use of low emission buses. Accessibility in rural areas has been improved through a significant increase in bus and cycle travel. The Thameslink Programme has increased the frequency and length of trains to London, easing overcrowding, whilst access and facilities at Harpenden train station have been considerably improved. The Abbey Flyer has created a frequent and reliable link to Watford, which coupled with the public realm improvements to St Albans City centre, has greatly increased sustainable transport options.

3.12 St Albans' role as an important cultural hub has been underpinned by improved theatre accommodation, a range of internal and external flexible performance spaces and improved museum and more use of the Cathedral's facilities. These new facilities have greatly helped in the communication, publicity and interpretation of the City's previously underexploited but exceptional roman and medieval heritage, as well as meeting broader educational, training and leisure needs. The City's important ecclesiastical past, present and future has been highlighted in the new Cathedral Quarter. (See policy SLP 22)

3.13 Harpenden's exceptionally vibrant cultural and community life has benefited from improved cultural and leisure provision such as enhanced museum facilities; leisure centre improvements and other initiatives developed in liaison with the Town Council and other community stakeholders. London Colney and the villages and hamlets in the district have been supported in their ambitions for improved cultural and community facilities.

Deleted: D

Core Strategic Objectives

3.14 The Core Strategic Objectives distil the Vision into the key structuring

Deleted: 4.9

elements of the SLP.

Strategic Objective 1: Our Special Character

- 3.15 Safeguarding and enhancing the district's special character arising from its rural heritage and its resulting legacy of extensive Green Belt, with the network of Cathedral City, towns and villages. The district's striking and attractive historic built environment will be conserved and enhanced with new high quality development, designed to the highest standards, which positively contributes to existing identity and character and incorporates opportunities for contemporary design.

Strategic Objective 2: Mixed and balanced / sustainable communities

- 3.16 Promoting balanced, mixed and sustainable communities through the provision of new housing and in particular addressing the need for affordable housing, all with appropriate community infrastructure. New development must seek to ensure a safe, secure and inclusive environment which addresses the needs of all, particularly the young, people with special needs and the ageing population.

Strategic Objective 3: A thriving economy

- 3.17 Ensuring that the district becomes even more economically vibrant, reinforcing existing economic strengths in the higher order knowledge and skills sectors. The district will offer employers a highly skilled and flexible workforce and individuals the very best opportunities to learn, train, start businesses and improve their employability.

Strategic Objective 4: Celebration of our Culture

- 3.18 Recognising and promoting the Visitor Economy, culture and leisure, as an economic driver throughout the district. The key cultural assets of museums, Cathedral and theatres will be managed and promoted as a coherent visitor offer and for the benefits they bring to the quality of life, supplemented by new diverse proposals which add value to the district's existing character and identity.

Deleted: e
Deleted: will be recognised and promoted

Strategic Objective 5: A connected district with ease of movement

- 3.19 Providing a sustainable movement network which encourages the use of public transport, walking and cycling and which improves access to services, jobs and facilities, particularly for rural settlements and those without the use of private vehicles. Traffic congestion will be managed to an acceptable level while parking will be appropriately priced and located. Improvements will be made to air quality and reductions made in carbon emissions.

Deleted: The p
Deleted: sion of

Strategic Objective 6: A healthy and strong environment for a healthy and strong population

- 3.20 Identifying, protecting and managing an integrated and cohesive network of green and blue open spaces and routes, to increase biodiversity, help

Deleted: An integrated and cohesive network of green and blue open spaces and routes will be i
Deleted: ied
Deleted: ed
Deleted: ed
Deleted: 4.9

mitigate and adapt to climate change and encourage active and healthy lifestyles. The district's non-urban areas will be protected and enhanced in order to help bring built development and natural land into greater environmental balance.

Strategic Objective 7: Delivering Infrastructure

- 3.21 The Council will take appropriate measures throughout the Plan period to ensure that an historic infrastructure deficit is redressed and that new development fully addresses current and future physical, social and green infrastructure needs.

4. The Spatial Strategy

Introduction

- 4.1 The Sustainable Community Strategy vision is for the district to be progressive, unique and vibrant, valuing its environment, heritage and culture. The Local Plan Vision and Strategic Objectives take forward this vision spatially i.e. geographically on the ground. The Spatial Strategy defines what role the City, towns, villages and small settlements will play in maintaining and improving quality of life and building a more sustainable district for all residents, businesses and stakeholders, now and in the future.
- 4.2 The general distribution of new development and the provision of major green infrastructure are outlined here.

The General Distribution of Development

- 4.3 Clear evidence including the NPPF, the Sustainability Appraisal, the Environmental Capacity investigations of the district and public consultation responses supports the twin thrusts of the general distribution of development within this strategy. These are;
- Maintaining the fundamental aim of the Green Belt in keeping land permanently open, by not developing on green field Green Belt land.
 - Prioritising opportunities to maximise the economic, environmental and social benefits of sustainable development.
- 4.4 The urban areas of St Albans, Harpenden and London Colney are the main focus for new development, as they provide access to the widest range of services, facilities, employment opportunities and transport options and are therefore the most sustainable locations for development. This will be supported by lower levels of development in the villages excluded from the Green Belt and lower still in the Green Belt settlements, as they provide

Deleted: 4.9

sequentially lower levels of services, facilities, employment opportunities and transport options.

4.5 The implementation of the spatial strategy will assist the district to positively evolve over time. Each settlement will retain its essential identity and character and benefit from some growth to deliver wider community benefits. High quality design will play a key role in ensuring that the highly valued individual character of all settlements is preserved and enhanced.

4.6 All proposals for development will be considered in the context of the district-wide Spatial Strategy, including as shown on the Key Diagram. The Key Diagram sets out the Council's vision for sustainable development in the district in the period up to 2028 and integrates the necessary infrastructure for delivering development, whilst safeguarding and enhancing key existing environmental, social and economic assets and resources.

Deleted:

Deleted: (see fold out page at end of document)

4.7 Housing, employment, retail, leisure and all other built development will be prioritised within urban areas, particularly on Previously Developed Land (PDL) in urban areas, to make efficient use of land and to minimise development in the Green Belt. All types of development will make the best use of previously developed land (PDL) and buildings. New housing will be built in sustainable locations and aid in securing appropriate infrastructure provision and overall community benefits for the district as a whole.

4.8 This SLP is specifically limited to the fundamental principles or key proposals that are necessary to deliver the overall Vision. The subsequent DLP will provide guidance on policy detail and proposals at a more local scale. Where communities wish to have them, Neighbourhood Plans will be supported by the Council, which may also provide further fine grained detailed planning guidance at a more localised level.

St Albans City

4.9 The historic City of St Albans functions very well in general as a major town. However, whilst the City centre is healthy and vibrant it does not cater for everyone's full shopping needs and its retail market share in the County has been declining over recent years. Often residents commute out of the district for their shopping needs, particularly for bulky goods. The St Albans urban area has the district's widest range of services, facilities and employment opportunities available, with a good range of transport options to access them, making it the most sustainable location for development.

4.10 The surrounding Green Belt maintains the separation of St Albans from nearby settlements, including Chiswell Green, How Wood and Park Street & Frogmore, retaining the separate identity of individual communities.

Deleted: 4.9

Harpenden

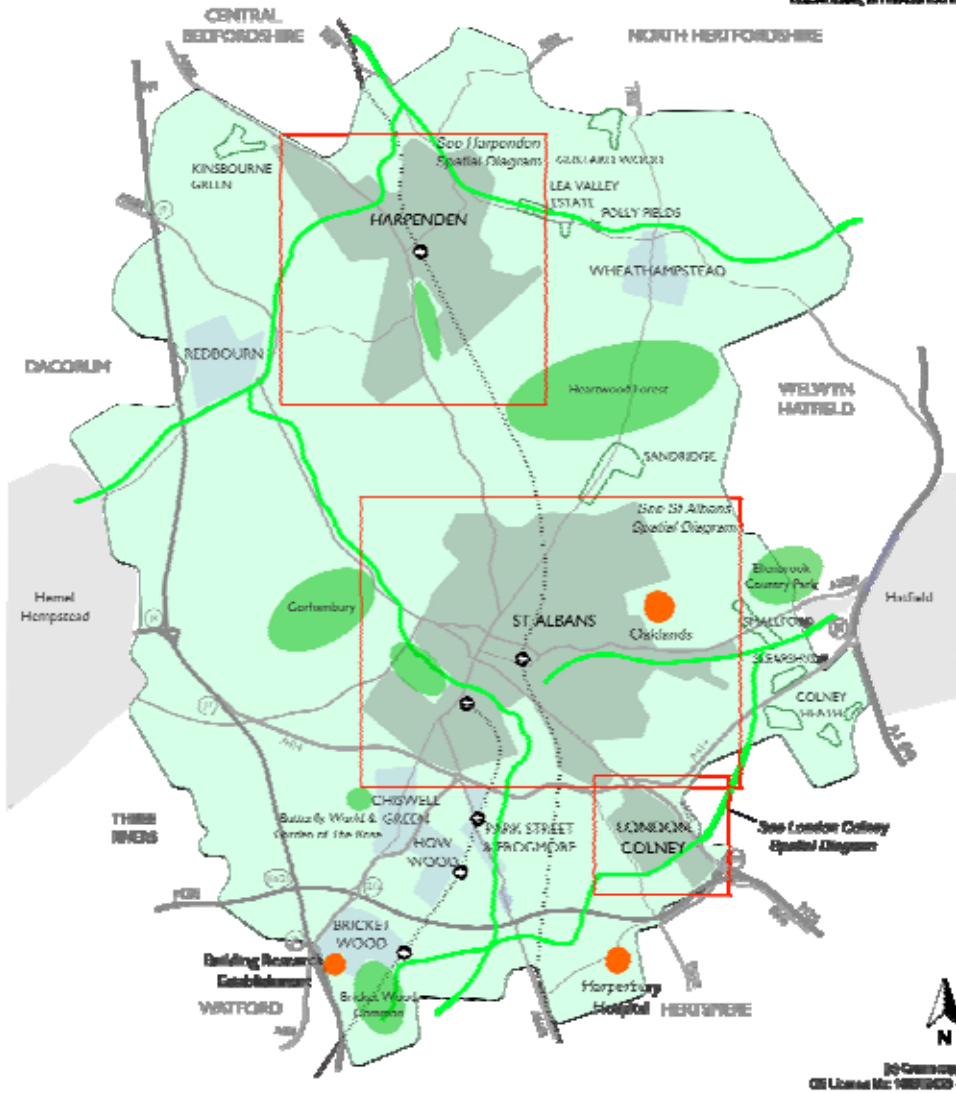

- 4.11 Harpenden functions very well as a small town and has a thriving vibrant high street for a town of its size. However there is need for some small scale employment, cultural, retail related development and redevelopment and improvements to the railway station to ensure that the settlement continues to prosper. It has a good range of services, facilities and employment opportunities available, with a good range of transport options to access them, making it the second most sustainable location for development.

London Colney

- 4.12 London Colney is the third largest settlement in the district and has grown substantially in recent years. The former hospital site at Napsbury has been redeveloped into a substantial new residential community, although there is a poor interface between this development and the rest of London Colney. There has been redevelopment of several employment sites for housing and the London Colney Retail Park has grown significantly. Parts of London Colney suffer from relatively high levels of deprivation and some areas of poor environment. It does not have as wide a range of services, facilities, employment opportunities or as good a range of transport options as Harpenden or St Albans. It is the third most sustainable location for development and in order to provide the best opportunity to generate the new services and opportunities that the settlement needs, London Colney is re-classified as a town.

Other settlements excluded from the Green Belt - Bricket Wood, Chiswell Green, How Wood, Park Street and Frogmore, Redbourn, Wheathampstead

Deleted: 4.9

- 4.13 The district contains a diverse range of villages and settlements excluded from the Green Belt that have a more limited range of services than the towns, but still offer a range of facilities to meet the day-to-day needs of their communities. The overall amount of development that will be acceptable in these settlements will generally be less than in the towns, due to their more limited range of services and reduced accessibility, which renders them less sustainable locations for meeting the development needs of the district as a whole. In addition, the smaller size of the settlements means that the physical scope for larger scale development consistent with maintaining their character and identity is less.
- 4.14 The continued sustainability of these settlements as places to live and work is dependent on the retention and expansion of local services that meet community needs, coupled with improved transport services enabling access to larger centres for those services that are not available locally. The Council will work with service providers to support the retention and where possible improvement of transport services that provide an essential link between smaller settlements and the towns, both in the district and in adjoining districts.

Green Belt Settlements - Colney Heath, Folly Fields, Gustard Wood, Kinsbourne Green, Lea Valley Estate, Sandridge, Sleafshyde, Smallford

- 4.15 There are a range of smaller settlements in the district that have a more limited range of services than the villages excluded from the Green Belt. The overall amount of development that will be acceptable in these settlements will generally be less than in the villages excluded from the Green Belt, due to their more limited range of services and reduced accessibility, which renders them less sustainable locations for meeting the development needs of the district as a whole. The small size of the settlements means that the physical scope for larger scale development consistent with maintaining their character and identity is very limited.
- 4.16 In a similar way to the settlements excluded from the Green Belt, the continued sustainability of these places to live and work is dependent on the retention and expansion of local services that meet community needs, coupled with adequate transport services enabling access to larger centres, which will be supported by the Council.

Wider Spatial Planning

- 4.17 The Council continues to fully engage and co-operate with all adjoining and nearby Local Authorities; particularly Dacorum, Welwyn and Hatfield, Luton, Central Bedfordshire, Watford, Hertsmere, Three Rivers and Hertfordshire County Council, in order to appropriately address sub-regional and regional strategic spatial planning issues. The Council is also very aware of the

Deleted: 4.9

strategic importance of its Green Belt to the wider social and environmental sustainability of London. It is because of the good transport connections between St Albans and London that many of the district's residents commute to London for employment and this is particularly true for higher paid jobs.

- 4.18 Joint working with Dacorum Borough Council on the East Hemel Hempstead Area Action Plan (AAP) has been initiated and is fully supported by this Council. Both Councils will continue to discuss the most appropriate AAP boundary and the range and scale of uses to be provided within the AAP.

Policy SLP1 – The Spatial Strategy		
All development will make efficient use of land and take a sequential approach that gives priority to urban locations. Development will be concentrated in existing settlements, in the following priority:		
Category	Settlements	Broad policy approach
City, Towns - Main urban settlements excluded from the Green Belt	<i>St Albans Harpenden London Colney</i>	These are the most sustainable locations for development, as the widest range of services and facilities are accessible. To preserve the Green Belt, higher density developments will be encouraged, but will need to respect local character.
Villages - Other settlements excluded from the Green Belt	<i>Bricket Wood Chiswell Green How Wood Park Street and Frogmore Redbourn Wheathampstead</i>	The scale and density of development will generally be lower than in the main urban settlements, in order to retain their particular character.
Green Belt Settlements	<i>Annables, Kinsbourne Green Colney Heath Folly Fields Gustard Wood Kinsbourne Green Lea Valley Estate Radlett Road, Frogmore Sandridge Sleepshyde Smallford</i>	Development will be limited to small scale infilling and redevelopment of previously developed land that reflects the character of the settlement.

Deleted: 4.9

Rest of Green Belt		Standard Green Belt policy will apply (NPPF, SLP2 and policies to be set out in DLP).
Further detail will be provided in the DLP, including defining the approach to “small scale infilling and redevelopment of previously developed land that reflects the character of the settlement” in Green Belt settlements. Any proposals in advance of the definition will not be acceptable.		

5. Our Special Character

Strategic Objective 1 - Our Special Character

Safeguarding and enhancing the district’s special character arising from its rich heritage and its legacy of extensive Green Belt, with its network of Cathedral City, towns and villages dating back to Roman and pre-Roman times. The district’s striking and attractive historic built environment will be conserved and enhanced with new high quality development which complements local character and distinctiveness.

Introduction

- 5.1 The City and District of St Albans has a unique character. It is close to and has significant interactions with London, but is also very clearly separate from and different to London. This character has been shaped by a long and eventful history with many of the settlements having been of importance since Roman, Saxon and Mediaeval times. Today, the district’s rich heritage is preserved by 18 Conservation Areas; nearly 900 statutorily listed buildings; 3 Registered Historic Parks and Gardens; and 18 Scheduled Ancient Monuments, including St Albans Abbey and Verulamium Roman Town.
- 5.2 St Albans City functions as a thriving market town and retail centre with a magnificent history. Harpenden is a charming town with a thriving town centre and range of historic buildings and high quality open spaces, with the extensive Common a particular feature and the River Lea flowing to the east. London Colney has a varied character with historic elements at Napsbury and adjacent to the River Colne, intertwined with more modern elements including the Colney Fields retail centre. The villages in the district all have a rich history and a unique character including both the larger villages excluded from the Green Belt and the smaller ones washed over by it.
- 5.3 The character of the district has also been shaped by the Green Belt, which

Deleted: 4.9

is particularly valued by residents, businesses and visitors. Historically the Green Belt has helped preserve the individual identity of the district's settlements and has provided residents with important access to the countryside and high quality agricultural land. These functions are still of vital importance, however the future role of land within the Green Belt needs to be recognised as being far more complex and multi faceted. It is an environmental, economic and social asset which is integral to the delivery of a wide range of natural ecosystem services.

Deleted: locally

- 5.4 The Council is keen to ensure that new development acknowledges the rich cultural and natural heritage present in the district, whilst delivering high quality contemporary architecture, where appropriate, which contributes to local distinctiveness and maximises sustainable development principles and technology. The unique and exceptional quality of the built and natural environment is very important in supporting the prosperous local economy and providing a range of jobs for all. Key local employers and entrepreneurs agree that St Albans is a good place to locate business and to do business and have expressed the vital role that quality of life factors play in supporting the local intellectual capital economy. The district is economically thriving precisely because of these factors, an absolutely key element of which is the retention of the Green Belt.

Proactive Management of the Green Belt

- 5.5 The Green Belt covers over 81% of the district and is of critical importance in preventing urban sprawl and the coalescence of settlements. The Green Belt also plays an important role in safeguarding the countryside from encroachment; preserving the setting and special character of the district's historic settlements; and assisting in urban regeneration, by encouraging the recycling of derelict and other urban land. Inappropriate development in the Green Belt would harm the district's high quality environment and further erode areas within the south of the district already fragmented by infrastructure and development.

- 5.6 Ecosystem services are particularly important in the district's Green Belt. This includes provisioning services (crops, livestock, fish, trees, standing vegetation, and water supply), cultural services (local, landscapes) and regulating services (climate, hazard, disease and pests, pollination, noise, water quality, soil quality and air quality). When combined with the significant social and economic benefits the Green Belt provides it is vital that the Council protects it over the long term.

Deleted: its

Deleted: long term

Deleted: ion

Deleted: i

Deleted: s ensured.

Deleted: 4.9

- 5.7 The limited gaps between settlements both within the district and with those outside of it highlight the vital role that the Green Belt plays in preserving character and individual identity. The gaps between settlements in the south of the district are particularly small and development pressure is

particularly high here for a number of reasons, including the close proximity to the M25. Therefore, it is of even greater strategic significance that the openness of the Green Belt in these areas is maintained.

- 5.8 The Council does not view the Green Belt as simply a constraint or defensive barrier, but rather as an asset that should be protected and proactively managed. This management seeks to optimize the Green Belt's potential to contribute to creating a sustainable district for existing and future generations. The district's Green Belt is more formally referred to as Metropolitan Green Belt, due to its role in containing the urban sprawl of London and protecting the merging together of smaller satellite settlements. This well founded and long established strategic planning policy has helped to preserve the individual character and identity of settlements and drive urban regeneration, whilst providing an extremely valuable environmental and recreational resource of regional, sub-regional, district and local importance.

Deleted: should

Policy SLP2 - Metropolitan Green Belt

The Council attaches great importance to the Metropolitan Green Belt, which will be protected from inappropriate development. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of the Green Belt are its openness and permanence.

Green Belt land will be proactively managed to create attractive landscapes and countryside; promote healthy ecosystem services; support productive and sustainable farming and forestry; provide space for local and wider recreational needs; and meet important challenges including mitigation and adaptation to climate change.

The Green Belt boundary is defined on the Proposals Map. Some minor amendments to the Green Belt boundary will be made through the DLP and updated Proposals Map.

A Rich Historic Environment

- 5.9 The intrinsic value of the district's unique, high quality historic environment is one of its greatest assets. To continue to successfully attract people and investment, this environment must be respected and, where appropriate, developed sensitively. Any change should not detract from the existing qualities of the environment, which makes the district such an attractive and valued location for residents, businesses and visitors.
- 5.10 The historic environment comprises designated and undesignated historic assets and their settings. It includes both known and potential historic assets, below and above ground archaeology and historic landscapes.

Deleted: 4.9

- 5.11 Conservation Area Character Statements provide further detail, describing what is important in terms of the character and appearance of each conservation area, and identifying assets which contribute to the special architectural or historic interest of the area. These will be kept under regular review. Further detail may be provided through Neighbourhood Plans.
- 5.12 The district has an excellent array of historic landmark buildings. It is important that new development integrates well and enhances the existing high-quality townscapes present in the district. Landmark buildings of particular note include St Albans Cathedral, St Albans Clock Tower and St Peter's Church. In a number of locations important views create distinctive approaches to settlements.

Policy SLP3 - Historic Environment and Townscape Character

The unique character of the district's historic environment, which greatly contributes to a distinctive local 'sense of place' and a high quality of life for residents, businesses and stakeholders, will be conserved, enhanced and enjoyed. This includes both designated and undesignated heritage assets which all contribute to this unique character.

Heritage assets will be conserved in a manner appropriate to their significance. Great weight will be given to the conservation of the district's designated heritage assets, which include Scheduled Monuments, Listed Buildings, Registered Parks and Gardens and Conservation Areas. Heritage assets also include the district's exceptional above and below ground archaeology; buildings which are deemed to contribute to the special character or interest of Conservation Areas (locally listed buildings); and locally listed historic parks and gardens.

Intelligently managed change may sometimes be necessary if heritage assets are to be maintained for the long term. Wherever possible, heritage assets will be put to an appropriate and viable use that is consistent with their conservation as long as this would not be in direct conflict with other policies in the LP and/or national guidance/legislation.

New development must respect important views of the district's built heritage and landscapes and enhance townscape character.

Design for the 21st Century

- 5.13 Historic buildings are central to defining a sense of place, establishing local distinctiveness and playing a positive role in place shaping. New development needs to preserve or enhance this historic character.

Deleted: 4.9

However, where appropriate, innovation and artistic expression will be encouraged. Modern architecture can help to provide new interest and character in the townscape.

- 5.14 The quality of the built environment in the district is generally high. The Council wants to secure high quality contemporary architecture and urban design to further enhance the attractiveness of the district and respond to modern day commercial and consumer needs. St Albans City and District requires a special approach to architecture and urban design in order to deliver the Council's spatial vision which seeks to value the past and embrace the future.
- 5.15 New development can help enhance the built environment by redeveloping unattractive buildings, introducing appropriate sustainable design elements and supporting improvements to the local public realm, including public art.
- 5.16 Thoughtful and flexible design can help to increase the lifetime of buildings by enabling future adaptation and reuse, thereby reducing the need for redevelopment. Buildings should seek to be adaptable as the wants and needs of residents, businesses and stakeholders change.
- 5.17 New development must take opportunities for improving the character, distinctiveness and quality of an area to create areas that are safe, well connected and legible and that are coherent with the surrounding built form.
- 5.18 The quality and success of new places are ultimately judged by how enjoyable they are to use or visit, how safe and secure they feel, how the buildings and adjacent spaces relate to each other and how attractive they look as a whole.
- 5.19 Development proposals should be informed by 'Hertfordshire Guide to Growth—2021', CABE's 'Building for Life' scheme and "By Design" principles and the sustainability requirements referred to in the Governments 'Code for Sustainable Homes' and Building Research Establishment Environmental Assessment Method (BREEAM) ratings.
- 5.20 To assist developers on how to make new development more sustainable and of a higher quality in design terms, Hertfordshire local authorities have produced Building Futures. This is an evolving web-based guide covering topics such as waste, water, energy, air, noise and design and the efficient use of land, building and materials.
- 5.21 Where appropriate, proposals will be sent to the local design review panel for the provision of assessment and support to ensure high standards. Early engagement is encouraged to help ensure high quality design and successful outcomes.

Deleted: the provision of

Deleted: 4.9

- 5.22 The Building Research Establishment (BRE) is one of the district's key employers. The BRE are the leading organisation on innovation in sustainable building design. The Council will seek to work more closely with the BRE in order to share knowledge and experience and use the district as a showcase for innovative design.
- 5.23 Preserving and enhancing the historic environment whilst encouraging and guiding modern sustainable and expressive urban design and architecture will ensure that the district retains its unique sense of place in the years to come.

Policy SLP4 - Urban Design

All new development must be based on a thorough site appraisal of opportunities and constraints, respond positively to its context, and be efficient in its use of land.

The Council will require the layout and design of all new development to create attractive and successful places, where people enjoy living and working. Particular consideration will be given to:

- Creating a clear distinction between private and public realm and the creation of active frontages and safe, vibrant environments.
- Ensuring new development integrates with existing development, including by responding to the existing urban grain and linking with existing routes and creating legible / easily navigated layouts.
- Creating safe and accessible environments which address community safety and crime prevention issues.
- Ensuring that where possible new development is adaptable to changes in use and occupier need.
- Ensuring that new development maximises opportunities for sustainability, in terms of layout, orientation and the application of technologies (also see Policy SLP28 and SLP29).
- The delivery of high quality architecture and landscaping. Innovative and outstanding design will be encouraged, including contemporary architecture.

Public realm enhancements will be encouraged, including the creation of public art in appropriate locations.

Detailed design policies will be set out in the DLP.

6. Mixed and Balanced Communities

Deleted: 4.9

Strategic Objective 2 - Mixed and sustainable communities

Promoting balanced, mixed and sustainable communities through the provision of new housing and in particular addressing the need for affordable housing, all with appropriate community infrastructure. New development must seek to ensure a safe, secure and inclusive environment which addresses the needs of all, particularly the young, people with special needs and the ageing population.

Balanced Communities

- 6.1 The district is a relatively affluent area; however, the Government's Index of Multiple Deprivation (IMD) has identified neighbourhoods where deprivation is above the national average. The IMD includes information on deprivation in terms of income, employment, health and disability, education, skills and training, barriers to housing services and crime.
- 6.2 The neighbourhoods where deprivation is above the national average are in the wards of Batchwood, Sopwell, Cunningham and Park Street. Parts of other wards in the district including parts of London Colney, Park Street, St Peter's and Harpenden East wards are also close to this level. This pattern of deprivation, within a larger prosperous whole, means the district is usually excluded from central regeneration funding.
- 6.3 The Inclusion and Inequalities Partnership, which is a sub group of the St Albans Strategic Partnership, works to address deprivation, inequalities, diversity and social inclusion across the district. This work involves public, private, voluntary and community sector organisations working together to ensure that all neighbourhoods have access to the same high quality services and facilities.

Mixed Communities

- 6.4 The district's proportion of ethnic minority residents is similar to the national average of 10% and is slowly growing. This adds to the diversity of the area and highlights the need to maintain and build community cohesion.

Cohesive Communities

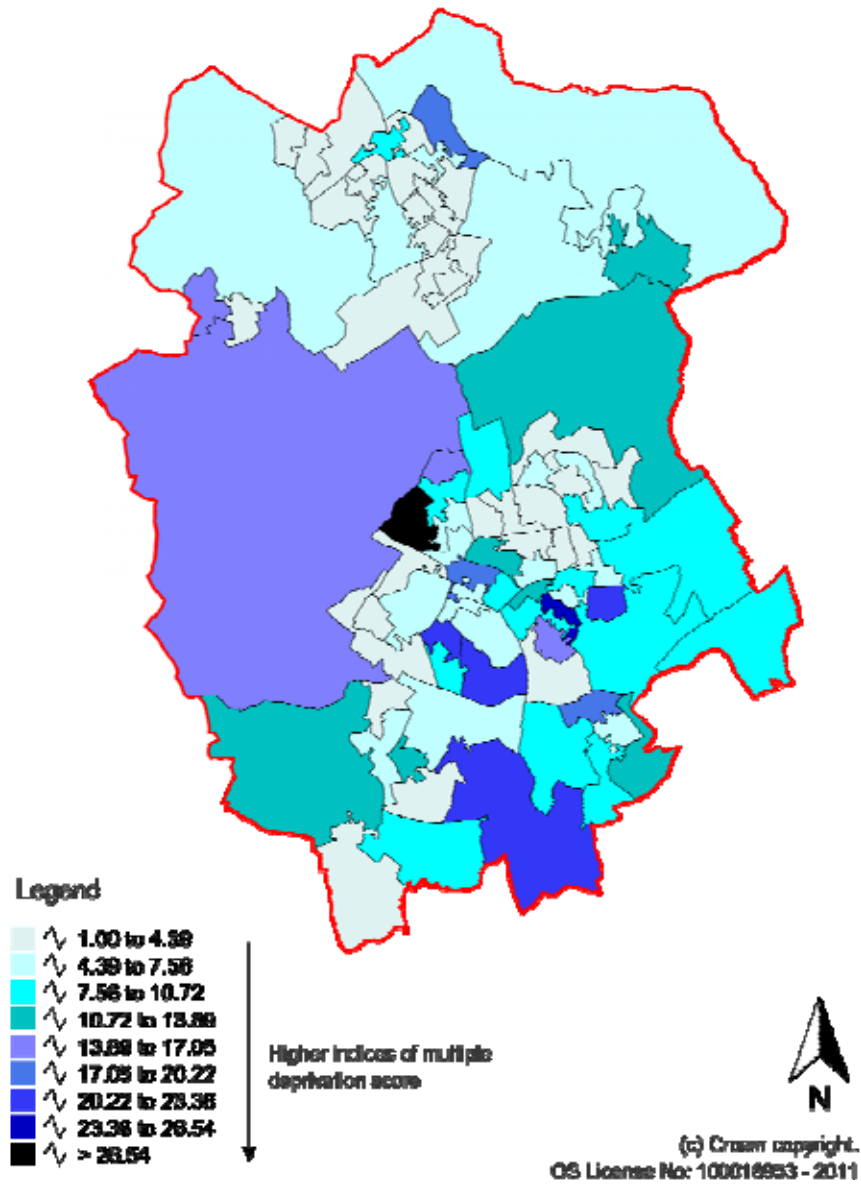

- 6.5 Safe, inclusive and cohesive communities, with a tolerance and understanding for different cultures and lifestyles are important in maintaining and enhancing the quality of life for all. The provision of community facilities and places for communities to meet, interact and identify with, can encourage the development of such communities. Key to this is the continued establishment of a vibrant voluntary and community sector, which promotes a sense of belonging and pride in our places, underpinned by diverse cultural activity. The [Council supports the](#) vital role

Deleted: 4.9

of carers in supporting individuals and groups and facilitating their full engagement in communities.

Deleted: is acknowledged

**Figure 7: Indices of Multiple Deprivation Score 2010
Lower Super Output Areas**

Deleted: 4.9

Policy SLP5 - Mixed and Sustainable Communities

The Council is seeking to promote communities which are inclusive, healthy, safe and crime free, whilst respecting the diverse needs of communities and the special needs of particular sectors of the community and their carers.

Proposals which improve equality of opportunity and equality of access for all to homes, jobs, key services and community facilities such as education and healthcare, recreation and green spaces, and cultural facilities, will be supported, subject to meeting the criteria set out in other relevant policies.

Measures which help create a socially inclusive and adaptable environment will be supported. Particular account will be taken to address the requirements of:

- Young people.
- An ageing population.
- People with special needs.

The Council, in partnership with other stakeholders, will seek to reduce levels of social and economic deprivation and inequalities within the district by coordinating planning and other strategies to ensure that improved services, community facilities and infrastructure are provided, particularly in those areas where indices of deprivation require targeted improvements.

Educational Facilities

- 6.6 Education is generally of a very high standard within the district, but there are some pockets of deprivation and other areas where educational attainment is lower than average. The provision of high quality educational facilities can help reduce inequalities and promote social inclusion.
- 6.7 The most pressing educational planning issue in the district is the need for additional school places. The attraction of high quality schooling in the district to parents of school aged children, the high birth rate and changes in living patterns have led to a shortage of school places. HCC, as the Local Education Authority with a duty to plan for school places, have identified the key requirements for education. These are set out below:
- Provisional requirements for new or expanded primary schools: 16 Forms of Education (FE) plus additional reserve site capacity in the district to 2026.
 - Requirements for new or expanded secondary schools: 12-14 FE in the district to 2021. Secondary school place planning beyond 2021 has not

Deleted: 4.9

yet been undertaken since forecasts beyond this period are based on births which have not yet taken place.

6.8 The Council supports the expansion of existing schools in principle due to the following benefits:

- They can be provided relatively quickly.
- It is cost effective.
- They can serve existing communities.
- They can reduce need for new schools in Green Belt locations.

6.9 The Council also supports the provision of new school buildings at existing schools in Green Belt locations and the provision of detached playing fields, where appropriate.

Deleted: It

6.10 Given the potential planning and highway constraints and the requirement for agreement with schools, delivery of expansion cannot be guaranteed on existing sites. Therefore, reserve education locations for new HCC schools will also be needed and such sites are likely to be located on Green Belt sites. Such locations are likely to be supported by this Council if all other expansion possibilities have been exhausted.

Deleted:

Deleted: the provision of

6.11 Oaklands College at Smallford is the main provider of Further Education and lifelong learning in the district and at a sub regional level. The need to modernise and expand the facilities of the College has been identified. Phase 1 proposals have permission and works are underway. The key requirement is now for Oaklands College proposals to deliver further high quality flexible learning facilities and recreational facilities, accessible to the community as well as to learners.

Policy SLP6 - Educational Facilities

The Council will support new or expanded educational facilities in appropriate and sustainable locations, including in the Green Belt if all other expansion possibilities have been exhausted, to meet the needs of residents of the district, subject to meeting other planning policies.

Deleted: the provision of

Primary Schools

To meet the forecast requirements for primary schools places of 16 FE in the district to 2026 and to provide a framework beyond that time, the following shall apply:

The expansion of existing primary schools shall be supported to provide additional school places subject to meeting planning, infrastructure and sustainability policies and requirements. Expansion of some existing schools is likely to be required in:

- St Albans City.
- Chiswell Green or Park Street.

Deleted: 4.9

- Bricket Wood.
- Wheathampstead.
- Harpenden.
- Redbourn.

A more detailed policy approach shall be adopted in the DLP to provide an element of flexibility to assist expansion of existing primary schools located in the Green Belt.

Reserve sites for possible new primary schools are required in the settlements listed below and sites shall be identified in the DLP:

- St Albans City (two schools, one east of the City and one west).
- Harpenden.
- London Colney.
- East Hemel Hempstead: new school associated with the Spencer's Park development. This will most likely be in Dacorum Borough, but possibly in St Albans District.

Secondary Schools

To meet the additional requirements for secondary schools places of 12 - 14 FE in the district to 2021 and to provide a framework beyond that time the following shall apply:

The expansion of existing secondary schools shall be supported in principle, subject to meeting planning, infrastructure and sustainability policies and requirements.

A suitable more detailed policy approach shall be adopted in the DLP to provide an element of flexibility to assist the expansion of existing secondary schools located in the Green Belt.

Reserve education locations to provide detached playing fields will be identified in the DLP if required to enable expansion of existing schools.

Reserve education locations, including in the Green Belt, will be identified in the DLP to provide new secondary schools if required in the following settlements:

- St Albans.
- Harpenden.

Oaklands College

Redevelopment at Oaklands College, Smallford Campus to provide new or expanded facilities is supported in principle.

Community, Sport and Recreational Facilities

- 6.12 It is important to retain sites currently or last used for community uses. Local community facilities can make a significant contribution to:
- Improving quality of life and social cohesion.
 - Tackling deprivation.
 - Reducing the need to travel.
- 6.13 Many voluntary sector organisations rely on community accommodation to provide their services in local areas. A range of uses provide community functions and the importance of a specific facility depends partly on the availability of alternative choices for a particular community. The preferred format for provision is multi functional community spaces that can be used by a wide cross section of the community. For the purposes of this policy the most common examples of community uses include:
- Dental practices / doctors' surgeries / medical centres.
 - Public halls (including community / youth centres, village halls, church halls).
 - Places of worship.
 - Libraries.
 - Day nurseries/crèches.
 - Indoor and outdoor sports and recreation facilities (including children's play areas).
 - Public Houses.
 - Town halls, parish offices and parish centres.
 - Children's centres and family centres.
 - Public Open Spaces.
 - Post Offices
 - Hospitals
- 6.14 The policy also relates to the need for new cemeteries if evidence suggests there is inadequate provision to meet the need of the community.
- 6.15 Health provision is an important contributory element of social sustainability, ensuring that a district can meet the needs of residents throughout their lifetimes. The Council has a key role in delivering and facilitating the infrastructure which allows residents to live healthy lifestyles, such as programmes to get children engaged in sports activities and provision of high quality places for people of all ages to take exercise, and or experience the natural environment, tied in with strategies to encourage sustainable transport.
- 6.16 Well utilised youth groups and youth organisations are one of the district's strengths, but there is a significant need to improve the buildings that they use. Excellent youth spaces and facilities, including re-provision of the Pioneer Youth Centre and Indoor Skate Board facility in St Albans and the Harpenden Youth Centre, are a priority. The Council supports

Deleted: '

Deleted: 4.9

community/parish initiatives for the provision of youth cafes and clubs within villages to improve community cohesion.

6.17 The Council's Sport and Recreation Facilities Strategy reflects significant deficiencies in existing provision and in particular the need to replace London Colney Recreation Centre. New modern sport and recreational facilities, catering for a wide range of activities and users, will therefore be supported in principle by this Council, together with improvements to existing indoor leisure centres. Any proposals that emerge for new community swimming pool facilities in suitable locations in the south of the district will be supported in principle. More details may be given in the DLP.

6.18 The Batchwood leisure facility, was opened in 1988 and offered a range of indoor and outdoor activities in St Albans. The sports buildings were destroyed by fire in August 2011 and the council is looking to redevelop it under 2 projects: Project 1 – Redevelopment of the bowls and golf clubhouses and; Project 2 – Redevelopment of the Tennis Centre.

Deleted: Hall

Policy SLP7 - Community, Sport and Recreational Facilities

The provision of new community facilities will be concentrated mainly in the following locations:

- Major developments.
- Sites allocated for such purposes, or as part of a mixed use allocation.
- In town centres, district centres or local centres, subject to the detailed policies in other development plan documents.
- In identified areas of deprivation where the facility would contribute towards addressing that deprivation.

Provision shall include:

- Improved healthcare facilities at St Albans City Hospital, Harperbury Hospital, Harpenden Memorial Hospital and GP surgeries.
- Replacement of the existing police station in St Albans by new facilities in a central location.
- Harpenden Library relocation and the replacement of Redbourn Library on the existing site.
- Re-provision of the Pioneer Youth Centre and Indoor Skate Board facility in St Albans; and the re-provision of Harpenden Youth Centre.
- Local Services Hub in central St Albans
- Local Community Hub in Sopwell

Formatted: Bullets and Numbering

The Council will support new and enhanced sport and recreational facilities in appropriate and sustainable locations. The main priority is to

Deleted: 4.9

secure a new leisure development for London Colney and redevelopment at Batchwood.

The Council will support the retention of community facilities and development will not be permitted which would lead to the loss of premises used, or last used, for community purposes, unless suitably re-provided elsewhere or unless it can be clearly demonstrated that it is no longer required.

Housing

- 6.19 New housing should be built in sustainable locations and aid in securing appropriate infrastructure provision and overall community benefits for the district as a whole. There is a need to increase the supply of affordable homes and to support a diverse housing market, which provides access to high quality housing for the district's residents, now and in the future.
- 6.20 In accordance with the spatial strategy, the majority of housing will be located on previously developed land (PDL) within urban areas, in order to provide most housing in locations readily accessible to a wide range of services, to protect the countryside, the Green Belt and to stimulate regeneration.
- 6.21 The publication of the NPPF and the Government's intended abolition of the East of England Plan has allowed the Council to review housing growth needs locally, from the bottom up, rather than having housing targets imposed. The Government's 'localism' approach not only gives the Council the freedom, but also the significant responsibility, of deciding what level of new housing should be planned for.
- 6.22 In brief, the following key factors have therefore been taken into account in determining the most appropriate level of housing growth in the district:

- A. Our strategic objectives for the district, as expressed in the Sustainable Community Strategy,
- B. The Sustainability Appraisal process,
- C. The authority's contribution to the overall vision for the East of England as a sub-region,
- D. The views of our communities determined through extensive public consultation,
- E. Local Economy
- F. Infrastructure Deficit
- G. Evidence of Past Completions,
- H. Detailed technical evidence about how much growth the area could accommodate,
- I. Technical assessment of population growth and housing need,

Deleted: 4.9

J. Evaluations of the impacts of alternative future housing targets, tenures and sizes,

Deleted: ;

K. Recent changes in national policy – the localism agenda,

Deleted: .

6.23 The approach taken also acknowledges and balances the benefits and costs of relatively higher or lower housing targets. In relation to higher theoretical alternative housing targets, relative benefits could briefly include:

Costs	Benefits
Relatively Higher Housing Targets	
More development on green field Green Belt land and subsequent permanent loss of openness	More homes for existing residents, workers and incomers
Urban sprawl and possibly coalescence of settlements	More affordable homes provided
Greater impact on existing infrastructure, including transport, healthcare and education	More New Homes Bonus
Potentially worsen quality of life and therefore affect local intellectual capital economy	More Community Infrastructure Levy receipts
Misalignment against majority of local public opinion	Possibly more economic growth
Worsen in-commuting/out-commuting number balance	Possibly higher local retail expenditure growth
Loss of biodiversity and natural environment	
Higher increase in greenhouse gas emissions	
Worsen reliance on external food and energy resources	
Relatively Lower Housing Targets	
Fewer homes for existing residents, workers and incomers	Minimal development of green field Green Belt land preserving its openness for future generations
Fewer affordable homes provided	Protection against urban sprawl and enabling individual settlements to retain their own unique character and identity
Less New Homes Bonus	Lesser impact on existing infrastructure, including transport, healthcare and education
Less Community Infrastructure Levy Receipts	Supporting the local intellectual capital economy, linked to quality of life factors
Possibly less economic growth	Localism in action – a clear alignment with locally expressed objectives
Possibly lower local retail expenditure growth	Improved in-commuting/out-commuting number balance
	Preserving the built and natural environment for current and future generations
	Lower increase in greenhouse gas emissions
	More land available for local food and energy

Deleted: 4.9

- 6.25 It is considered that the most appropriate way to determine the starting point for calculating the sustainable level of housing provision for the plan period is the level of housing need; balanced against the space for appropriate and truly sustainable development.
- 6.26 As supported by the NPPF overall, especially at Para 14 and in Greg Clarke's speech introducing the NPPF to Parliament, the Sustainability Appraisal, the community and the factors briefly outlined above, the twin thrusts of the general distribution of development within this development strategy are;
- Maintaining the fundamental aim of the Green Belt in keeping land permanently open, by not developing on green field Green Belt land.
 - Prioritising opportunities to maximise the economic, environmental and social benefits of sustainable development.
- 6.27 The development strategy for the district is based on a compact city approach through meeting future requirements by developing within existing settlements, particularly the City and towns, rather than extending into the Green Belt. This approach depends on using available sites within urban areas to their full potential, consistent with high quality design and balancing economic, social and environmental factors. Using land efficiently means that for each site development is optimised and less land in total is needed as a consequence to meet the district's development requirements, with beneficial effects for protection of the countryside.
- 6.28 It is clear that housing should not be considered in isolation. It should take into account other land uses needed to achieve sustainable communities, such as employment, retail, transport & community uses. The SLP therefore considers sustainable development in the round. It ensures that the approach to maximizing opportunities for residential development on urban land or previously developed land in the Green Belt does not compromise the spatial strategy as a whole, including alternative desirable land uses in these areas. For example, the retention of appropriate existing employment sites to provide local jobs and opportunities for businesses to deliver growth is also of great importance and has been appropriately considered. Another example is the BRE Broad Location. Here the SLP policy takes a holistic approach to the redevelopment of some redundant PDL for residential use, to support and retain a key employer in a key sector and provide significant community benefits.

Deleted: 4.9

6.29 Whilst the overall approach is set out above, there are some specific exceptions where building on green field Green Belt land is considered appropriate as part of the comprehensive spatial approach. These exceptions have been made in order to deliver truly exceptional levels of community benefits and at the same time to go some way to meeting the higher range of housing needs figures and gaining overall benefits from more housing developments.

6.30 They are of two main types.

Deleted: 2

1. Large Community Infrastructure sites comprising large scale previously developed land in the Green Belt with unique community facilities. The SLP sets out some Green Belt green field housing development to support delivery of new and improved community facilities at:

Oaklands College
Harperbury Hospital/Kingsley Green

2. Some limited small scale Green Belt green field residential developments where directly supported by local communities to deliver significant community benefits; delivered through the DLP. Also, where there is an established local need, some land adjoining or within villages may be developed to provide affordable housing where it is supported by the local community. Such small-scale 'rural exception' sites will help address the needs of lower-income households with a close family or employment connection to that settlement. These sites will be identified through the Neighbourhood Planning process.

Local Housing Target/Requirement

6.31 Taking the approach set out above, the most up to date and historical information has been analysed to give confidence of delivery in the following categories. The table below indicates sources & approximate proportion of supply from different land types for housing development.

Deleted: 0

Urban/Non-Green Belt Capacity	45 – 50%
Green Belt PDL	5 – 10%
Broad Locations, Including Oaklands, Harperbury and BRE	15 – 20%
Windfall	20 – 30%
Small scale Green Belt greenfield supported	5%

Deleted: 4.9

by local communities through DLP or Neighbourhood Plan process	
---	--

- 6.32 National planning policy requires the SLP and DLP to ensure that the housing target can be delivered with confidence and to provide for contingency. An up-to-date Housing Trajectory outlining the provision for the locally derived housing target is set out annually in the Authority's Monitoring Reports³.
- 6.33 Housing delivery is expected to be relatively higher in the earlier parts of the plan period and to be lower towards the end of the plan period, largely due to the expected build schedules for sites with existing planning permissions.
- 6.34 Taking account of all relevant aspects, including market factors and allowing for contingency, the approach supports:

Deleted: 6.31 Taking account of all relevant aspects, including market factors and allowing for flexibility and contingency, the approach supports:¶
 ¶ Local Housing Target/Requirement = 250 dwellings per annum¶
 ¶ This target/requirement is an average figure and amounts to 4,250 dwellings across the plan period.¶

Formatted: Font color: Red

Policy SLP8 – Local Housing Target/Requirement and Provision

Additional Homes 2011 - 2028 = 250 per annum

The target/requirement is an average figure and amounts to 4,250 homes across the plan

This Strategic Local Plan and the Detailed Local Plan, together with the SHLAA, SHLAA Updates and Housing Trajectory identify sufficient sites, broad locations and policies to continuously deliver the Local Housing Target, in general accordance with the Spatial Strategy as set out in policy SLP1.

Further policies and allocations to deliver the Locally Derived Housing Target will be set out in the DLP.

6.35 Based upon the spatial strategy as set out at SLP1 and including data such as the location of existing permissions, sites likely to come forward during the plan period and windfall calculations, the proposed range of housing distribution is broadly:

Settlement	% Range
St Albans	55-65
Harpenden	10-20
London Colney	5

³ Authority Monitoring Reports published annually in December.

Deleted: 4.9

Specified Settlements	5-10
Green Belt Settlements	5
Rest of Green Belt*	10-20

*Rest of Green Belt includes Kingsley Green Mixed Use Broad Location and some other large sites comprising previously developed land.

Affordable housing

- 6.36 The district's house prices are amongst the highest in Hertfordshire and the whole country and as a result local people on lower level incomes, especially younger people and key workers, often find themselves priced out of the market. This is also reflected by the number of people on the Council Housing register which suggests that there is a high need for affordable housing in the district.
- 6.37 The Council has long had a Corporate Priority to provide an appropriate amount of affordable homes. This priority has been considered as one of many factors in deciding the right amount of overall housing in the district.
- 6.38 The planning system has an important part to play in providing affordable housing for those unable to access the housing market. The need to provide affordable housing is important for two main reasons; firstly to enable people who cannot afford to rent or buy on the open market to live in a home that is suitable for their needs and that they can afford, and secondly to provide housing for people working in different aspects of the local economy, thus underpinning economic activity.
- 6.39 Viability work has been undertaken to establish the realistic level at which affordable housing can be delivered as a percentage of private housing in the district and provides strong evidence to increase the affordable housing target and reduce the threshold. In view of these studies, including the SHMA 2010 and the Development Economics Study 2010, the Council will be seeking 40% affordable housing on all housing development sites to assist in addressing the shortfall in affordable housing.
- 6.40 Affordable housing includes social rented, [the new government model of 'affordable rent' and intermediate housing](#), [This includes key worker](#) housing for teachers, nurses, care workers etc, and shared ownership homes. The balance between affordable and market housing and the size mix of affordable units is a key component of achieving a well balanced community.

Deleted: key worke
 Deleted: r (
 Deleted: i.e.
 Deleted:)

Deleted: 4.9

6.41 The district requires more smaller market units and a range of small to medium sized affordable units. The Locally Derived Housing Target (Policy SLP 8) achieves a balance between providing market and affordable housing and provides enough cross subsidy to fund new affordable housing.

6.42 Affordable homes are mostly delivered by developers as a percentage of private housing developments. It is important to make clear that Affordable Housing relates to specific definitions (please see Glossary) primarily relating to tenure and ownership, which is distinct from common understanding of what may constitute relatively affordably priced market housing.

6.43 The tenure mix of affordable housing should reflect what people in housing need require in the district. Based on the Council's Housing Register and other housing evidence, affordable housing provision with a tenure mix different from 60% social rented (or 'affordable rent') and 40% intermediate will only be acceptable where robust justification is provided. This must demonstrate that provision at the standard requirement would make the development economically unviable; or that the resultant tenure mix would be detrimental to delivering sustainable mixed communities; or due to specific circumstances, the explicit agreement of the Council's Housing Department.

Deleted: c

Deleted: h

Deleted: r

6.44 The St Albans Affordable Housing Viability Study 2010 considered that in relation to the size of sites coming forward based on planning application and SHLAA data, that there is a strong case to reduce the site size threshold to allow affordable housing to be sought from all new residential development.

6.45 Past and predicted future patterns of house building show that the district as a whole is reliant on smaller sites, below the national and regional threshold of 15. The high level of housing need and reliance on smaller sites justifies lowering the threshold for securing affordable provision, without inhibiting development or prejudicing the overall supply of new housing.

6.46 Because of these circumstances, the Council's view is that it is appropriate and necessary for smaller housing schemes to make a reasonable contribution towards the provision of affordable housing and play their role in delivering sustainable mixed communities.

6.47 The Council will seek on-site provision for schemes of 5 or more dwellings. On smaller sites there may be occasions where on-site delivery is impractical. Therefore on small sites providing 4 or fewer dwellings the Council will accept commuted sums or off-site provision elsewhere in the

Deleted: may

Deleted: 4.9

district (providing that the provision elsewhere contributes to creating mixed and sustainable communities) in lieu of on-site provision.

- 6.48 There will on occasion be circumstances where financial contributions from small sites may affect viability. In these cases the applicant will be required to provide the Council with an open book assessment of viability to justify a lower commuted payment. Further guidance on affordable housing and commuted sums will be included in the DLP.
- 6.49 As a strict exception to normal Green Belt policy, and where there is an established local need, some land adjoining or within villages may be developed to provide affordable housing for the community. These small-scale 'rural exception' sites will help address the needs of lower-income households with a close family or employment connection to that settlement. Such sites will remain in the Green Belt and the housing must remain affordable in perpetuity. The Council has an active programme of developing redundant garage land to assist delivery of affordable housing, including some schemes of this type in Green Belt settlements.

Policy SLP9 – Affordable Housing	
The Council will seek affordable housing contributions from new residential development.	
District-wide target	At least 100 affordable homes per annum.
Percentage target	40% affordable homes as a proportion of the overall development unless it is clearly demonstrated that this is not economically viable. In these circumstances affordable housing provision at a level which allows the scheme to be viable may be negotiated by the Council.
Targets for social rented/affordable rent and intermediate housing	Of the affordable housing percentage target approximately 60% should be social rented/affordable rent and 40% intermediate housing to meet needs of residents in the district and the most vulnerable.
Threshold for provision of affordable housing	The Council will seek affordable housing provision from schemes for 1 (gross) or more dwellings.
Developer contributions on small sites	Affordable housing should be provided on-site. However, for schemes of 4 homes or fewer where there is sound planning or other reasons, and the developer and Council agree, a financial contribution (or off-site provision) in lieu of on-site provision may be acceptable. The affordable housing contribution will be calculated

Deleted: 4.9

	using the Council's affordable housing toolkit and will be based on the equivalent of delivering affordable housing on-site. The sum may vary depending on site circumstances and viability.
Affordable housing in Green Belt Settlements (Rural Exception sites)	<p>Small scale 100% affordable housing schemes within rural parishes will be supported in principle for people with strong local connections, where there is demonstrable local need for such dwellings and local community support.</p> <p>Such sites will remain in the Green Belt and the housing must remain affordable in perpetuity. Detailed criteria for rural exception sites will be included in the DLP.</p>
The exact amount of affordable housing, or financial contribution, to be delivered from any specific scheme will be determined by economic viability, having regard to individual site circumstances and market conditions. Further guidance will be provided in the DLP and/or within Supplementary Planning Documents or guidance.	

Housing Type/ Mix

- 6.50 There is a need to provide for the full range of housing types for a diverse population, including all demographic groups.
- 6.51 The proportion of older people in the population is forecast to continue to rise. While health improvements mean that older people are remaining active for longer, an increase in the number of frail elderly is expected. This means providing new homes that enable people to continue to live independently even though their mobility may be reduced.
- 6.52 While most older people prefer to remain in their own homes, some increased provision will be needed of housing specifically designed for older people, including those with special needs.
- 6.53 People with learning and physical disabilities also need homes that can be adapted to meet their needs. The Council will seek an increased proportion of housing designed to the Lifetime Homes standard that can be readily adapted to meet the needs of older people and people with disabilities.

Deleted: form a proportion of the population and

Deleted: the provision of

Deleted: l

Deleted: h

Housing Size

Deleted: 4.9

6.54 The SHMA and other evidence show that the district has a high proportion of large dwellings in its housing stock. Longstanding trends and population forecasts show smaller average household size, including an increasing proportion of single person households. While the size profile of new dwellings will only lead to gradual change in the make up of the overall housing stock, increasing the proportion of small and small-medium sized units in new development will over time lead to a better balance between the housing stock and the size of dwellings needed.

6.55 The low proportion of smaller units in the housing stock also contributes to the very high average price of housing in the district. More small and small-medium sized units would lead to an increase in the proportion of relatively low cost market housing available to buy, assisting those who are just able to afford to buy on the open market. As well as single person households, this is particularly the case for small-medium sized family housing. This includes one and two bedroom flats and particularly 2 bedroom houses.

Deleted: ,

Deleted: ing

Deleted: -2.5

6.56 For individual development schemes, the Council will take into account the range of dwelling sizes of market and social housing in the local area and of site specific factors, in considering the appropriate mix of dwelling sizes.

Policy SLP10 - Housing Size, Type and Mix

All new housing development will contribute to a mix of different housing types in residential areas, taking into account the existing pattern of housing in the area, evidence of local need and site specific factors. It will in particular require the inclusion of more small and small to medium-sized housing, including one and two bedroom flats and 2 bedroom houses, in new development schemes in suitable locations, to increase the proportion of such sized units in the district housing stock, to widen choice and to provide more relatively low cost market housing available to buy. Floorspace, as well as room numbers and bedroom numbers, will be considered in judgments of relatively low cost market housing.

Deleted: seek

Deleted: -2.5

The Council requires the affordable housing size, type, and mix to broadly reflect that being provided for the market element of all development.

The Council seeks the provision of a reasonable proportion of housing designed to the lifetime homes standard that can be readily adapted to meet the needs of older people and people with disabilities.

Sheltered housing and extra care housing for older people and those with special needs will be encouraged on suitable sites in areas close to a range of services.

Further detail on requirements for appropriate housing size, type, mix and proportion of lifetime homes will be given in the DLP.

Deleted: 4.9

Housing Density

- 6.57 The proposed development strategy for the district is based on a compact city approach through meeting future requirements by developing within existing settlements, particularly the City and towns, rather than extending into the Green Belt. This approach depends on using available sites within urban areas to their full potential, consistent with high quality design and environmental factors. Using land efficiently means that for each site development is optimised and less land in total is needed as a consequence to meet the district's development requirements, with beneficial effects for protection of the countryside.
- 6.58 Higher density development will only be appropriate in relatively accessible locations where residents will have good access to services.
- 6.59 In all cases, development will only be acceptable where schemes are well-designed and do not compromise the overall character of the area. The appropriate density for individual schemes will also be informed by taking account of the strengths, opportunities and constraints of the development site, including the characteristics of the surrounding area.

Policy SLP11 - Density of Housing Development

All new housing will be developed at a density that is consistent with achieving high quality, sustainable design and which does not compromise the distinctive character of the area in which it is situated. Higher density development in accessible urban locations with good access to services will be supported.

Development proposals that fail to make efficient use of land for housing, having appropriate regard to local character and site specific factors, will be refused permission.

Gypsies and Travellers

- 6.60 Policy SLP12 seeks to establish a positive framework for how provision for Gypsies and Travellers will be made in the district. This will help to prevent unauthorised sites, help guide development to more sustainable parts of the district, provide enhanced quality of life benefits for the Gypsy and Traveller community and ensure that environmental concerns, impact on the Green Belt and community cohesion are proactively addressed.
- 6.61 A local evidence base will be produced using the principles of [the new Government guidance on Planning Policy for Traveller Sites, including consideration of existing locations](#). This will establish the local level of need

Deleted: 4.9

for traveller accommodation, in the context of local historic provision, provision by neighboring authorities and inform policy in the DLP.

Policy SLP12 - Gypsies, Travellers and Travelling Show People

Sites will be identified, allocated and safeguarded by means of allocations in the Detailed Local Plan to meet a locally derived target. In identifying sites and considering proposals for accommodation, the Council will have regard to the following:

1. The provisions of SLP Policies 1-4 and 26-29.
2. The potential and suitability of extending existing sites.
3. The suitability of sites with temporary permissions.
4. The suitability and potential of new sites as part of larger housing sites.
5. That development should be in general accordance with the Spatial Strategy for the district, as set out in Chapter 4 of this SLP and criteria contained in Government guidance on Planning Policy for Traveller Sites.

Further detail on the level of provision and locally specific locational criteria may also be included in the DLP.

Harperbury Hospital/Kingsley Green Mixed Use Broad Location

Background

- 6.62 Harperbury Hospital/Kingsley Green was originally built as one of several Middlesex County Mental Health facilities that were developed in the district from 1870-1930. It is the last of these hospitals locally that retains a role in mental health and learning disability healthcare and is of great value at a district, county and sub-regional level. Having undergone many years of declining use and deteriorating buildings (including large scale redundant buildings in the Green Belt), it has more recently entered an era of resurgence and recent redevelopments have delivered exceptional quality both in the built environment and patient care, winning national and international awards.
- 6.63 The overall aim is to provide a truly mixed and sustainable community at Harperbury, which enables the hospital to deliver its vision of an exemplar offer of mental healthcare and learning disability support, fully integrated into the wider community. Shared use facilities will perform a vital role in providing points of interaction, including a gym, allotments and recreational space. This will complete the transition from a closed Victorian institution to an open and inclusive community, fully integrated into the wider population.

Deleted: 4.9

Policy SLP13 - Harperbury Hospital/Kingsley Green Mixed Use Broad Location

Objective

To provide an exemplar mixed use development that integrates the mental health and learning disabled communities with the wider population and at the same time bring into beneficial use large scale redundant buildings in the Green Belt.

Site Constraints

Capacity and design of existing Harper Lane junction with Watling Street.
Retention of important tree belts, including extensive TPO.
Retention of sports pitches and substantial open space.

Proposals

1st phase 60-80 bed healthcare facility.
Further smaller scale healthcare developments and redevelopments.
300-400 new homes.
Joint community facilities, including gym, allotments and recreational space.
Substantial Green Infrastructure provision, including improved public footpaths, bridleways, cycleways, new woodland planting and opportunities for improved biodiversity.

Infrastructure

Provision of a new bus route that enters the Harperbury site and links it to London Colney, Radlett and beyond.
Provision of improvements to the Harper Lane junction with Watling Street.

A Planning Brief/Masterplan will be detailed in the DLP or separately.

Deleted: .

Oaklands Mixed Use Broad Location

Background

- 6.64 Oaklands College has long been the main provider of Further Education in the district, with an historic specialism in land based provision, including Horticulture, Greenkeeping, Equine studies, Animal management and Floristry. The College is now one of the country's largest Further Education Colleges, with over 800 staff and 3,000 full time and 8,000 part time learners, the majority of which are based at the Smallford Campus. The curriculum also offers adult and community learning, art, business,

Deleted: 4.9

construction, engineering, health and social care, hospitality and catering, public services, IT, media and performing arts, science and maths, sport and specialist programmes for learners with learning difficulties and disabilities. The College also has 14-19 and 16-19 year old consortium arrangements with local secondary schools.

6.65 The College has a vital role to play in meeting the vocational and academic training and education needs of the district and sub-regional area. The future success of the College and the local economy are closely linked and the education and training provided offers the greatest opportunity to tackle the pockets of deprivation that exist. Provision of low cost startup and incubator facilities, linked to vocational courses, will provide a new transitional opportunity for entrepreneurs.

Deleted: units

Deleted: some

6.66 Many of the current facilities are clearly not fit for purpose and many of the buildings are dilapidated. The Council gave planning permission for a new bespoke College Hub which was intended to be in place by 2012. The College Hub was unable to be delivered following the loss of substantial grant funding from the Learning and Skills Council in 2009. Housing development on College owned land as enabling development formed a crucial part of the Hub scheme and as the grant funding has been removed the scale of enabling development is now significantly greater.

Deleted: there is substantial dilapidation of b

6.67 The overall aim is to provide a genuinely mixed and sustainable community at Oaklands Smallford, which enables the College to deliver a step change in its quality of facilities and an outstanding offer of education and training for all, which will also help to tackle deprivation and provide a significant boost to the local economy. New community use and sports facilities, with significantly improved public access to the countryside, will perform a vital role in further integrating the College with the wider community.

Policy SLP14 - Oaklands Mixed Use Broad Location

Objective

To provide an exemplar mixed use development that enables the College to deliver a step change in its quality of facilities and an outstanding offer of education and training for all; and at the same time provides community use and sports facilities, with significantly improved public access to the countryside, to further integrate the College with the wider community.

Site Constraints

Capacity and design of Hatfield Road and Sandpit Lane.
Retention of important trees, including extensive TPOs and Ancient Woodland.
Retention of sports pitches and open space.

Deleted: 4.9

Retention of historic walled garden and Mansion House.

Proposals

Overall to deliver a step change in the quality of the facilities, including but not exclusively:
New and improved facilities for general teaching, science, plumbing, plastering and tiling workshops, a student centre, student accommodation, a sports pavilion, nursery, equestrian centre and land based studies.
 Retain, repair and make fit for purpose the Mansion House building
 250-350 new homes; including supported disability living and key worker housing for educational staff.
 Substantial Green Infrastructure provision, including shared use of refurbished historic walled garden, new landscaping and woodland planting, extensively improved and new public footpaths, cycleways and bridleways.
 Community access to sports facilities and parkland area.

Infrastructure

Provision of improvements to the accesses to Hatfield Road and Sandpit Lane.

A Planning Brief/Masterplan will be detailed in the DLP or separately.

Formatted: Font: 12 pt, Not Highlight

Formatted: Font: 12 pt

Formatted: Font: 12 pt, Not Highlight

Deleted: Bespoke facilities for construction studies, to replace the leased Alban Park warehouse facilities.

Deleted: and Stable Block. Replace or repair and make fit for purpose the current agricultural / animal husbandry / horticultural facilities along the northern edge of the site.

7. A Thriving Economy

Strategic Objective 3 - A thriving economy

Ensuring that the district becomes even more economically vibrant, reinforcing existing economic strengths in the higher order knowledge and skills sectors. The district will offer employers a highly skilled and flexible workforce and individuals the very best opportunities to learn, train, start businesses and improve their employability.

Economic Prosperity and Employment

7.1 The unique and exceptional quality of the built and natural environment is very important in supporting the prosperous local economy and providing a range of jobs for all. The district has a strong economy, a highly skilled workforce, is in an excellent location for rail, road and airports and is seen by many employers and employees as a desirable place to be. The Council considers a thriving local economy to be essential in supporting all its economic, social and environmental aspirations. Economic development is driven by active engagement with key partners, including the Council, St Albans and District Strategic Partnership (SP), Economic Sustainability Partnership, Hertfordshire's Local Enterprise Partnership

Deleted: 4.9

(LEP), key local employers, St Albans Chamber of Commerce and small business representatives.

7.2 There are two main economic aims:

- To foster a healthy, diverse and strong local economy, with a focus on knowledge industries, financial and businesses services, the rural economy, the green technology sector, creative industries and visitor economy.
- To offer employers a highly skilled and flexible workforce and individuals the very best opportunities to learn, train, start businesses, develop entrepreneurial opportunities and improve their employability.

7.3 Most local employment is in the financial and business services, research and development, retail and educational sectors. However, St Albans is also a significant regional/sub-regional legal centre, with its Crown and Magistrates Courts. Visitor economy is also an increasingly important job sector. The Building Research Establishment (BRE) and Rothamsted are important employers in the district which are the subject of Broad Location policies. Nearly half of local residents [of working age](#) have a degree qualification or above and the majority of residents are employed in professional and managerial occupations, a considerably higher rate than at the county or national level.

7.4 The local economy is driven by a large number of small businesses, including freelance and consultancy and has a vibrant entrepreneurial culture. There are only a small number of employers who employ over 100 staff, but many of these larger employers are well known nationally and globally, especially within the management consultancy, business and financial sectors. The district also benefits from the proximity of the University of Hertfordshire, based at Hatfield, which is one of the country's leading business orientated universities.

7.5 The district experiences considerable flows of both in and out commuting. Overall there is significant net out commuting to high paying jobs outside the district, primarily in London but also in other nearby towns. In net terms, the district is dependent on other places for its residents' jobs and incomes, especially for the better paid jobs and higher incomes, as people who work in the district earn significantly less on average than people who live here, but work elsewhere.

7.6 As set out by Herts LEP, compared to most areas of the UK, Hertfordshire is more prosperous and our residents have a better quality of life. The LEP believe that the Hertfordshire economy can make a bigger contribution to UK plc. Focused effort is required to ensure we remain an attractive proposition for private sector investment. Herts LEP has produced a plan

Deleted: 4.9

for growth titled 'Open for Business' which is seeking to build on our assets within Hertfordshire.

- 7.7 In St Albans the unique and exceptional quality of the built and natural environment continues to be very important in supporting the prosperous local economy and providing a range of jobs for all. Key local employers and entrepreneurs agree that St Albans is a good place to locate business and to do business and the vital role that quality of life factors play in supporting the local intellectual capital economy. The district is economically thriving precisely because of these factors, an absolutely key element of which is the retention of the Green Belt.
- 7.8 Opportunities exist to encourage the development and growth of new and developing economic clusters e.g. at Rothamsted, at the BRE, and more widely in Green Technologies and in IT.
- 7.9 The district's job growth should therefore be concentrated primarily in offices, professional, managerial occupations and ancillary staff and knowledge based activities, to match this skills base, provide high paying jobs locally and to help mitigate out commuting.
- 7.10 The strategy for the district also seeks to recognise the need for a mix of employment accommodation and the need to safeguard and enhance existing employment sites to provide a variety and range of buildings and uses. The diversity of employment and entrepreneurial opportunities that such small and medium-sized employment sites, including those in rural areas, provide are a crucial element of a genuinely flexible local economy.
- 7.11 Primarily because of very high alternative land values and Green Belt constraints, the district has had for some time little new employment development land. In addition, there is a considerable ongoing pressure for change of use of existing employment land and buildings to, primarily residential use, and also for other non employment generating uses. Considerable losses of employment land and buildings have been ongoing for several years and a critical juncture has been reached whereby substantial further losses may significantly undermine the local economic base and opportunities for entrepreneurs. Existing employment sites should therefore be retained in employment use, unless genuinely unsuitable and unviable for employment use, or if they are directly replaced by new sites. It is also recognised that there are levels of vacancy in some office sites and employment areas in some adjoining authorities. However, these provide a substantially different type of accommodation overall and are also clearly not as local or accessible.
- 7.12 In order to encourage the provision of modern and appropriate employment facilities, suitable for high quality and higher numbers of local jobs, the Council will support and encourage the redevelopment of existing

Deleted: 4.9

employment generating sites, including for more intensive employment uses, taking into account the need to be compatible with local context, including design policies and impacts on residential amenity and highways.

- 7.13 Considerable job growth will be supported on sites and in areas not directly classed as traditional employment (B Class) uses. These are likely to provide more than 50% of the new jobs up to 2028. Economic sectors where such growth is expected include education, retailing, healthcare, the leisure/visitor/hospitality industries and working from home. In particular, it is anticipated that many high quality jobs will be provided by the significantly expanded and new educational facilities that will be provided. The additional educational facilities will be provided by HCC, Academies, Free Schools and fee-paying schools.
- 7.14 The already high local levels and increasing use of remote working and home working is an established and ever developing trend, both providing more jobs within the district and reducing the impacts on the local highway and rail network of the high levels of in and out commuting.
- 7.15 In order to support the thriving entrepreneurial, small business, self-employed and consultancy base, high speed broadband and next generation telecommunications will be supported, taking into account the need to be compatible with local context, including design policies.

Policy SLP15 - Economic Prosperity and Employment

Existing employment sites should be retained in employment use, unless genuinely unsuitable and unviable for employment generating use, or if they are directly replaced by new sites. This includes all allocated employment sites and both allocated and unallocated offices, research and development facilities, light industry, general industry, warehousing and other B Class uses. Any exceptions to this rule will be detailed in the DLP.

The Council will support and encourage the redevelopment of existing employment generating sites for evolving employment uses, including for more intensive employment uses or for the provision of flexible business space and incubator units, taking into account the need to be compatible with local context, including design policies and impacts on residential amenity and highways.

Overall, in all settlements across the district, the Council will seek provision of sufficient land and floorspace to cater for full employment and to provide for different kinds of employment use. The scale and nature of provision will be appropriate to the size, character and function of the settlement.

The district's strong rural economy will be supported including in relation to agricultural diversification and visitor economy, where consistent with NPPF

Deleted: 4.9

and other Local Plan policies, including Metropolitan Green Belt (SLP2 and DLP policies). Local commercial uses, such as local shops and public houses will be protected in villages, due to their community value.

High speed broadband and next generation telecommunications will be supported, taking into account the need to be compatible with local context, including design policies and impacts on residential amenity and highways.

Strategic Employment Locations

- 7.16 The district benefits substantially from two major world class centres of excellence specialising in research and development in the Green Technology sector.
- 7.17 The Building Research Establishment (BRE) in Bricket Wood is world-renowned for its expertise in sustainable construction, the built environment and associated industries and is pioneering some of the latest developments in areas such as energy efficiency.
- 7.18 As well as the BRE itself, the site hosts other sector-related companies and an Innovation Park, which acts as a demonstrator for green building technologies. Currently around thirty other companies are located at the site. These firms have a relationship with the built environment and benefit from being part of a green technologies cluster.
- 7.19 Rothamsted Research in Harpenden is the largest agricultural research centre in the UK and the oldest in the world. Over its 160 year history, it has built an enviable international reputation as a centre of excellence for science in support of sustainable crop management and its environmental impact. Its scientific research ranges from studies of genetics, biochemistry, cell biology and soil processes to investigations at the ecosystem and landscape scale.
- 7.20 Both institutions have significant links to the Centre for Sustainable Communities at the University of Hertfordshire in Hatfield. Together they make a Green Technology Triangle, which this [Council](#) sees as a key driver of its economic development strategy and therefore will encourage and capitalise on opportunities to encourage the clustering and multiplier effect that these centres could create.

Deleted: district

BRE, Bricket Wood Mixed Use Broad Location

Background

- 7.21 The BRE at Bricket Wood has been a focus for building technology and related research and development since 1925. The BRE and associated

Deleted: 4.9

companies employ about 800 staff at Bricket Wood, which is substantially less than at its peak of employment use in the 1970s. The BRE has a vital role to play in meeting the need for high quality and high skill employment in the district and represents one of very few opportunities to encourage green businesses supporting sustainable technologies in the district. Many of the buildings on site have not received significant investment since their construction, are substantially dilapidated and are not fit for purpose.

- 7.22 The BRE wishes to consolidate its expertise into fewer but more modern buildings whilst providing better facilities for associated industries within the Innovation Park. The overall aim would be to provide a mixed and sustainable community, planned through an inclusive “Inquiry By Design” process, at which the BRE have particular expertise. This is a unique opportunity for the BRE to capitalise on its world leading status and demonstrate, both in built form and process, an exemplar sustainable neighbourhood, which would have national and international significance and consist of exemplar types of sustainable residential and employment buildings.

Deleted: E

Policy SLP16 - BRE, Bricket Wood Mixed Use Broad Location

Objective

To provide an exemplar mixed use development that enables the BRE to provide high quality, high skill local employment for world leading sustainability and green technology companies at the BRE, as well as exemplar housing development, showcasing the latest building technologies and design, planned through an inclusive “Inquiry By Design” process. The final overall built development will be equivalent to the existing built footprint only, with an increase in public open space and the strategic Green Belt gap between Bricket Wood and Watford/Garston being retained and strengthened.

Site Constraints

Extensive TPO.
Close to ancient woodlands and SSSI.
Capacity and design of existing accesses via Bucknalls Lane and Bucknalls Drive.
Scheduled Ancient Monument - scale model of the Mohne Dam.
Strategic Green Belt gap between Bricket Wood and Watford/Garston.

Proposals

Refurbish or replace unfit for purpose office, laboratory and associated buildings.
100-150 new homes of exemplar sustainability and design quality.

Rothamsted Research Redevelopment

7.23 Rothamsted was founded in 1843 by John Bennet Lawes who set up fields to study the chemical composition and manurial treatment of soils. Today, nearly 500 staff are based at Rothamsted, with the institution operating as a centre of excellence for science in support of sustainable crop management and its environmental impact. Rothamsted hosts major projects right across the 'Green Agenda' including in bio-fuels and bio-energy. The Rothamsted campus already hosts small companies developing related scientific products and services and is keen to develop its role much further as an effective environment to encourage effective synergies, stimulate further innovations and provide a platform for entrepreneurial science.

Deleted: on-going

Deleted: co-located

Policy SLP17 – Rothamsted Research Redevelopment

Redevelopment and possible extension of the Rothamsted Research site to meet Rothamsted's long term needs and to accommodate firms carrying out complementary knowledge-based research and development activities is supported in principle. The Green Belt boundary may be adjusted to reflect the current development on the ground and to facilitate appropriate redevelopment and expansion, according to guidelines to be provided in the DLP or separately.

Deleted:

Retail

7.24 The key retail factors relating to the district can be summarised as follows:

Deleted: 4.9

- While St Albans has a healthy retail economy with a distinctive offer of shops and street market and services, the City's position within the regional retail hierarchy is challenged by competing centres. Market share has been declining in the City centre and there are significant net levels of leakage of expenditure to surrounding centres for shopping and leisure activities. The centre lacks a department store and a major foodstore and has a limited supply of larger shop units.
- Harpenden has a vital and viable town centre and foodstore provision is strong, but non-food shopping is limited.
- District centres generally have a good mix of shops and other facilities; local parades have an important retail and service role.
- London Colney's retail vitality and viability has the potential to improve with significant enhancements to the public realm along the High Street. This will be complemented by the very different retail offer at Colney Fields, which will be enhanced by expansion at Ridgeview.
- There is need for village high streets to have and maintain a good mix of shops for local needs.
- There is good provision of out-of-centre foodstores and retail warehouses, particularly in the south of the district and in neighbouring districts.
- There is a need for additional food and non-food retailing in the district.
- There is a need for additional retail warehouse provision for bulky goods.

Deleted: nl

Deleted: v

7.25 In addition to the above factors, the City Vision and Rural vision form important parts of the Retail evidence base. The City Vision developed a Master Plan which covered retail and all other land use needs in St Albans City centre, to be implemented during the plan period. The Rural Vision showed the need to protect community and village amenities such as small shops, services and facilities.

Deleted: s

Deleted: s

Retail Hierarchy of Centres

7.26 The Council has defined a retail hierarchy as follows:

- Major town centre (St Albans)
- Town centre (Harpenden)
- District centres (Fleetville, Marshalswick, Southdown)
- Local centres (to be defined in the DLP)

7.27 Policy SLP18 sets out the hierarchy of centres in the district and identifies the role of each centre and what level of development is appropriate. Unless they are identified as centres in DPDs, planning authorities should not regard existing out-of-centre development as centres, as defined in the

Deleted: 4.9

National Planning Policy Framework. There are three retail warehouse parks in the district which are not identified as centres:

- Alban Park, Hatfield Road, St Albans – primarily bulky household goods and car showrooms.
- Colney Fields, London Colney – mixed convenience and comparison retail.
- Griffiths Way, St Albans – mixed convenience, comparison retail and bulky goods.

Policy SLP18 – Retail Hierarchy of Centres

The hierarchy of centres is set out below. The vitality and viability of town, district and local centres will be enhanced and protected. Proposals for town centre uses will be directed to the appropriate level in the hierarchy according to the scale and function of the use:

1) Major Town Centre – St Albans City centre should:

Serve the district as a whole, being the main comparison shopping destination, and the main focus for leisure, cultural and civic activities. The main location for major retail developments, large scale leisure, cultural and civic uses, and other uses that attract large numbers of people.

2) Town Centre – Harpenden Town Centre should be:

An important centre serving the northern part of the district. It provides food and grocery shopping and a diverse mix of independent retailers, supported by good provision of cafes and restaurants, leisure, cultural and other uses. These serve the town and more widely people from the northern part of the district.

3) District Centres – Fleetville, Marshalswick and Southdown centres should:

Provide food and grocery shopping facilities, supported by a limited range of other shops and non-retail services situated within and serving their local communities.

4) Local Centres – Local centres should:

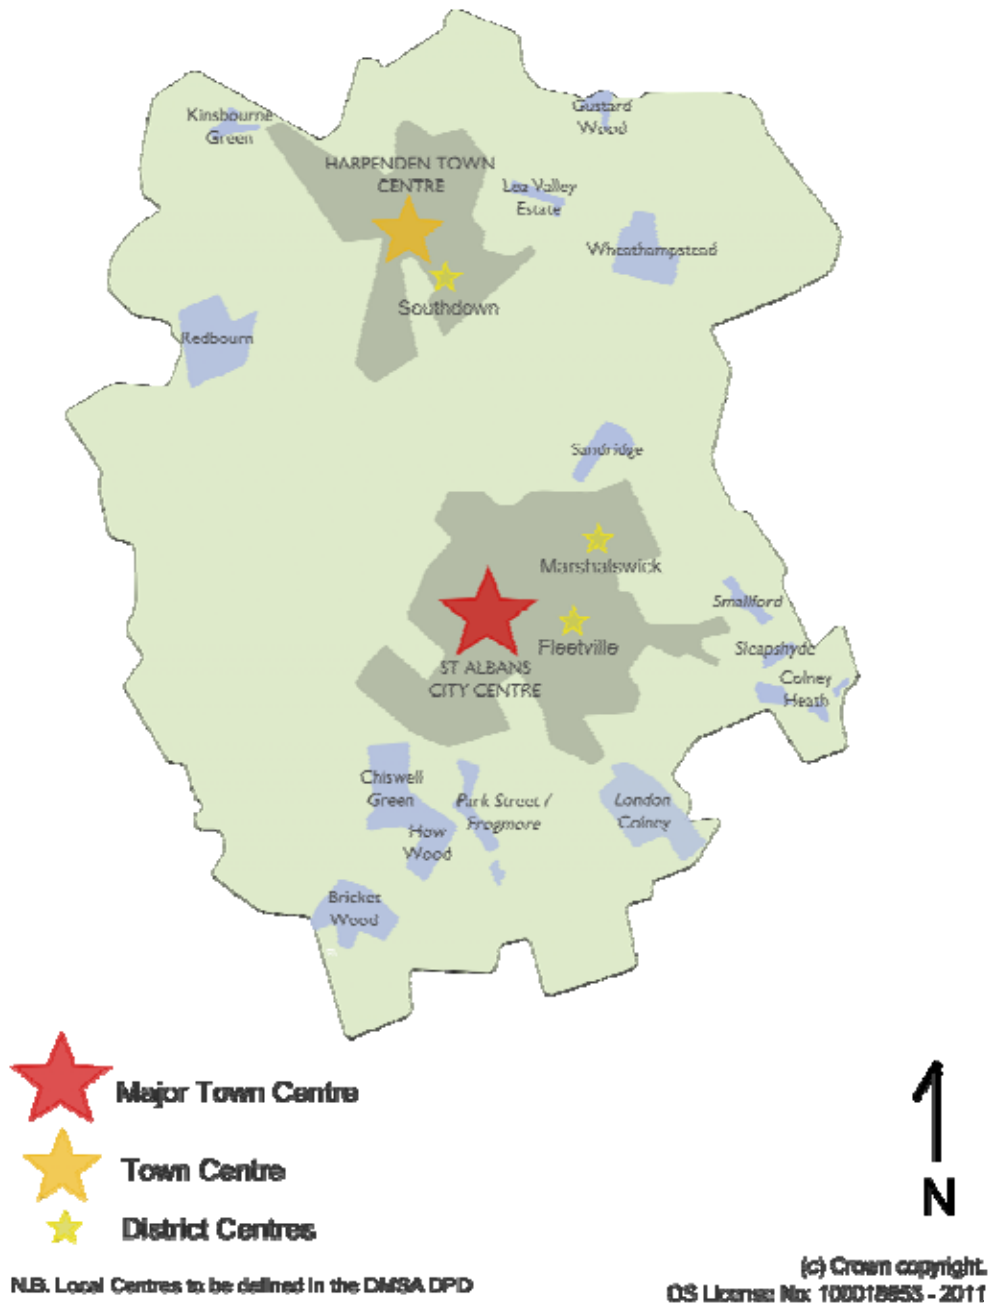

Provide a basic range of small shops and services of a local nature and serve their predominantly local catchment within walking distance of the centre. Some Local Centres are in villages, where they serve a somewhat wider catchment area. (Local centres to be defined in the DLP)

Planning applications involving the loss of retail units that perform an important community role will be permitted only if they do not conflict with other policies in the DPDs and it can be clearly demonstrated that they are no longer required.

Deleted: 4.9

Primary and secondary frontages shall be identified in the DLP.

Figure 8: Retail Hierarchy of Centres

Deleted: 4.9

Major Retail and Town Centre Development

- 7.28 Evidence including the City Vision has highlighted that St Albans has great potential for a stronger City centre environment to draw greater numbers of visitors and shoppers, given its excellent historic setting, and variety of independent retailers. The market is an important asset within this draw, which animates the centre and strengthens its appeal. Supported by public realm improvements and selective redevelopment, it could offer an exceptional City centre shopping and cultural experience.
- 7.29 In recent years the retail market share has been declining in St Albans City centre. However, proven demand for greater retail provision along with the emergence of centrally located opportunity sites in the City provides an opportunity to turn this situation around. With a strengthened and expanded cluster of independent and specialist shops, alongside a greater number of national retailers, including a possible department store, St Albans is a major town centre within the region and should stabilise and strengthen its place within the retail hierarchy. However, in the immediate term there is limited City centre capacity for major new retail development, although in the longer term, there are opportunities to make St Albans City centre significantly more economically self-contained for retailing.
- 730 Through providing a greater range and quality of town centre uses in the centre of the City, including at the Civic Centre and Drovers Way sites, St Albans could become a more vibrant place with a greatly enhanced townscape which better meets the needs and aspirations of St Albans' residents and visitors from the surrounding area.
- 7.31 The Civic Centre location is anticipated to come forward in the short term and may accommodate mixed uses including a small supermarket and A1/A3 uses, but a major retail scheme is unlikely to be viable in this location. The Council have produced a Development Brief for the Civic Centre area of the City. The Development Brief was adopted as a Supplementary Planning Document (SPD) in July 2012.
- 7.32 The Drovers Way location is considered to have potential for a major retail scheme but it is not available in the short/medium term.
- 7.33 There is a leakage from the district of shoppers and expenditure on specific types of bulky goods. This demonstrates a qualitative gap in the district's bulky goods offer in particular categories. By increasing retention of certain shopping trips and clawing back a proportion of shoppers who currently travel out of the district for their bulky goods purchases, the provision of additional bulky goods retailing will have a positive impact on shopping patterns and expenditure flows across the district.

Deleted: A

Deleted: 4.9

7.34 Sequentially, any new retail floorspace should be directed to the City/town centre first. However, St Albans does not have any substantial appropriate sites in central or edge of centre locations for bulky goods retail warehouses (BGRW). The next sequentially preferable location for BGRW would be in Griffiths Way South, an existing retail destination south of the City centre. It is considered that BGRW at this location could complement the City Centre offer. Some BGRW floorspace may be accommodated in Griffiths Way on the existing Abbey View retail park. BGRW could also be accommodated on the gas holders site, in Griffiths Way, as part of a mixed use scheme. In any scheme at these sites, significant public realm and sustainable transport improvements would be required to increase linked trips to the City centre.

Figure 11: City centre redevelopment opportunities

Deleted: 4.9

S2 Griffiths Way South

Figure 12: Griffiths Way

S3 Colney Fields/ Ridgeview

7.35 As indicated above, there is a lack of city centre or edge of centre sites in St Albans which are suitable, viable and available for major retail development to meet retail need in the early part of the plan period. Therefore there is likely to be a shortfall in supply of new retail floorspace over this period. In this context, a retail study has been carried out to appraise the potential impact of retail development at Ridgeview, which is located next to an existing retail park at Colney Fields. It was concluded that a relatively small quantum of additional retail floorspace at Ridgeview would be acceptable, forming a logical extension to Colney Fields. It could help to meet, in part, some of the 'need'/demand in accordance with the development plan and the NPPF. A summary of key points is set out below.

Deleted: 4.9

- Although the City Centre has experienced a fall in its market share of comparison goods shopping since 2005, it is apparent from the regular health checks carried out in the centre over a number of years that it remains vital and viable, with limited vacancies and a good choice of multiple and independent shops. The evidence also shows that Colney Fields Shopping Park provides a different and complementary retail offer to the City Centre, serving a much wider catchment and shoppers who do not visit the City Centre.
- A significant proportion of the identified market demand for St Albans City Centre is from specialist and niche operators. The scale and type of retail floorspace identified for the Ridgeview site would not match their requirements.
- The impact from the limited amount of additional floorspace on the City Centre's turnover and that of other centres both within and outside of the district would only be modest. However, this modest impact is outweighed by the need to meet retail need in the early part of the plan period. The relatively modest retail floorspace proposed would not jeopardise the emerging development/investment proposals identified for the City Centre.
- The provision of limited new retail floorspace at Ridgeview to help meet the identified need for new comparison goods retailing in the district over the short term will have a more limited impact on the City Centre than if it was allocated on other out-of-centre sites. This is because Ridgeview would form a natural extension to Colney Fields Shopping Park and the evidence shows that this existing retail facility has very different trading characteristics to the City Centre (and other shopping parks in the district) due to its close proximity and easy access to the M25 (Junction 22), as well as its good links with the M1.
- As a result of the above matters, the limited extension of Colney Fields is part of the Council's strategy to meet retail demand in the early part of the plan period. In line with local and national retail policy, these special and site specific circumstances would not justify other out of centre proposals.

Figure 10: Ridgeview

|

Deleted: 4.9

Policy SLP19 – Major Retail Development and Retail Development Considerations

Major retail development is proposed at the following locations:

- S1 St Peter's Street west (Drovers Way) and east (Civic Centre) - Additional retail floorspace within St Albans City centre to be focused mainly at site S1 and should include a supermarket, space for larger chain stores, smaller specialist retailers and possibly a department store.
- S2 Griffiths Way South (St Albans) – retail warehouses for bulky goods.
- S3 Colney Fields (London Colney) – extension onto the Ridgeview site to provide retail floorspace.

The Council will enable the enhancement of consumer choice and strengthening of the vitality, viability and accessibility of the City, town, district and local centres by supporting new retail development which:

- Supports the delivery of the spatial planning vision and strategy as set out in this Strategic Local Plan.
- Is appropriate in scale and function to its location.
- Is fully integrated with the existing shopping area.
- Complies with the sequential approach to site selection, which prioritises development in existing centres, then edge-of-centre sites, and only then out-of-centre sites which are accessible by a choice of means of transport.
- Meets a proven need in relation to development at edge of district centres or local centres, or out-of-centre locations.
- Will not have an unacceptable adverse impact, including cumulative impact, on the vitality and viability of the City Centre and surrounding town, district and local centres.
- Will not have an unacceptable adverse impact on existing, committed or planned public and private investment in a centre in the catchment area.
- Helps maintain and develop the range of shops to meet the needs of the local community within the centre.
- Retains and enhances existing street markets.

Deleted: 4.9

8. Celebration of Our Culture

Strategic Objective 4 - Celebration of our culture

Recognising and promoting the Visitor Economy, culture and leisure as an economic driver throughout the district. The key cultural assets of museums, Cathedral and theatres will be managed and promoted as a coherent visitor offer and for the benefits they bring to the quality of life, supplemented by new diverse proposals which add value to the district's existing character and identity.

Deleted: e

Deleted: will be recognised and promoted

Creating Attractive and Vibrant Centres

- 8.1 The Council recognises and promotes the visitor economy and culture as increasingly important economic drivers throughout the district. The community's active cultural life will be enhanced and diversified to help meet the needs of residents and visitors as lifestyles shift and priorities change, establishing St Albans City and District as a cultural hub within the region.
- 8.2 The district has a strong base from which to provide an engaging and inclusive cultural and leisure offer for residents and visitors alike. The Council wishes to promote cultural activity in the district's centres by supporting their attractiveness and vibrancy. This will encourage cultural activities which are a focus of community activity and pride, and will in turn strengthen the district's role as a cultural hub.
- 8.3 The district's centres and their role in the retail hierarchy are identified in policy SLP18, except for local centres which shall be identified in the DLP.
- 8.4 The district has a recognised need for some new and improved facilities, including:
- A cultural hub providing a focused centre for the arts.
 - A new cinema to replace the one that closed in 1995.
 - Improvements to the museums and some other venues.
 - Improved tourist facilities.
 - Increased hotel and other overnight accommodation capacity.

Deleted: a

Deleted: provision

Deleted: 4.9

Policy SLP20 - Creating Attractive and Vibrant Centres

City, town and village centres within the district will be enhanced and managed to create attractive and vibrant centres to encourage cultural activities which are a focus of community activity and pride. The Council will seek to encourage activities which celebrate the district's culture, community and history.

Deleted: '

Enhancements may involve:

- Public realm improvements.
- Public art.
- Landscaping.
- Mixed use development.
- Lighting.

Provision and Retention of Cultural Facilities

8.5 There is great potential for the district to thrive as a regional cultural centre which can provide an engaging cultural life for residents and attract visitors from the local area, London and further afield. By providing focused investment in key areas, with ambitious physical proposals, and coordinated partnership working, this potential can be brought to fruition.

8.6 The district's rich heritage as a centre for governance, theatre and worship gives the district a unique identity and high profile within the region. The cultural services offered in the district include theatres, museums, live music performance, strong Roman and Medieval heritage, and libraries and arts organisations. The district's existing cultural offer will need to be retained, improved and promoted while the addition of new facilities will add diversity.

Deleted: throughout history

Deleted: s

8.7 St Albans City is the main focus for enhancing the district's visitor economy and cultural role in the future. The City's key character areas which give the City its unique identity were identified in the City Vision 2009. It is expected that these character areas be respected and enhanced to improve the legibility of the City at a City-wide scale and to improve its cultural role.

8.8 There are opportunities for visitor economy and cultural enhancement in other towns, villages and rural locations where proposals meet criteria including sustainability and accessibility. Examples include the Heartwood Forest project, although the Council largely views this project as providing for low key, quiet, countryside recreation. 'Future Gardens', the Gardens of the Rose and 'Butterfly World' are key attractions which also raise the district's profile.

Deleted: 4.9

8.9 Museum proposals include expansion of Verulamium Museum, linked to developing the heritage of Verulamium Park as set out in the park's Masterplan. Within St Albans City Centre this would be supported by the creation of the cultural cluster, which may include improved facilities for cinema, museum and theatre. The existing Museum of St Albans building may be improved on its present site or its functions may be relocated. The Council is undertaking a project which is considering relocating MOSTA to the old Town Hall. This may involve the creation of a new basement area and galleries so that the City's post-Roman history can be fully displayed. The development of smaller scale museums and development of individual heritage projects, such as the Wheathampstead railway station platform and the St Albans signal box shall be supported. Improved facilities for theatre and cinema are encouraged, including delivery of a new cinema at the former Odeon building on London Road.

Deleted: i

8.10 The importance of the street markets is recognised in enhancing the attractiveness and unique character of the district as a retail and cultural destination. The district has a rich market heritage with regular Wednesday and Saturday street markets in St Albans and the farmers' markets in St Albans, Harpenden and Wheathampstead, together with the occasional French, Italian and German markets. St Albans street market is one of the most visited and valued attractions in the district and the Council wishes to retain and support it.

Policy SLP21 - Provision and Retention of Cultural Facilities

The Council will support the creation and improvement of a diverse range of cultural and entertainment facilities in accessible and sustainable locations within the district. Existing cultural and entertainment facilities will be retained unless alternative provision of an equivalent or greater community value and accessibility is provided and it can be clearly demonstrated that they are no longer required.

In particular the Council will support the delivery of:

- A cultural cluster in St Albans City centre, which may include improved facilities for cinema, museum and theatre.
- St Albans street market improvements.
- Redevelopment of Harpenden Public Halls and/or other appropriate sites for improved cultural facilities, including a museum, as well as improved leisure provision and other initiatives developed by the Town Council in partnership with community stakeholders.
- Butterfly World, Chiswell Green.

Deleted: C

Cathedral Quarter

8.11 St Albans Abbey Cathedral is integral to the identity of the City, placing it in a select number of 'cathedral cities' in the country which enjoy a strong

Deleted: 4.9

national profile. The Abbey is a popular pilgrimage destination, attracting more than 200,000 visitors and pilgrims a year and remains a proud reminder of St Albans' rich religious and community heritage, having been a site of Christian worship for over 1,700 years.

8.12 The national profile of the Cathedral is matched by active engagement with the local community, with the largest active congregation of any cathedral in Britain and an award winning heritage education programme, which benefits over 16,000 school children a year.

8.13 The Abbey and its grounds provide a unique environment which is considered to be one of St Albans' key assets. Attractive public green spaces are provided through the Orchard and Vintry Gardens. They are extremely popular in the summer and courtyard areas provide further potential as key public spaces for events.

Deleted: ,

Deleted: both open and secluded

Deleted: , which

Deleted: ,

8.14 However, despite the Abbey's national and local profile and physical size, it remains relatively hidden within the City, due to topography and nearby buildings. Opportunity exists, therefore to integrate the cathedral with the City centre more effectively – both physically and psychologically. The Council has been working closely with the Dean and Chapter and a number of suggested proposals were identified in the City Vision 2009 which would enhance the Abbey's national and local profile, expand and improve its education and outreach work, and enhance its facilities to fulfil its role as a centre of community activity. These include:

- An enhanced education programme at the Abbey, including in principle the re-establishment of a cloisters space and the development of a second chapter house to accommodate a new educational facility.

Deleted: Support for the delivery of a

- More effective integration of the Cathedral with the City centre, including using signage to the Cathedral Quarter as an important wayfinding tool from other parts of the city.

Policy SLP22 - Cathedral Quarter

St Albans Cathedral is a key asset in the district and integral to the identity of the district. The Cathedral Quarter has been identified to emphasise the unique character of the Abbey and its setting. Within the Cathedral Quarter the Council will support proposals which:

- Raise the profile of the Cathedral both locally and nationally
- Integrate the Cathedral with the City centre more effectively
- Enhance the visitor interpretation experience of the Cathedral Quarter and develop heritage trails
- Develop and improve the educational facilities

Deleted: 4.9

- Enhance facilities for community activity
- Enhance the public realm, green spaces and Abbey setting

Figure 12: Cathedral Quarter

The Visitor Economy

- 8.15 The Visitor Economy will be a significant economic driver for the district, with the exceptional Roman remains, medieval Cathedral and historic built environment of St Albans as key components of the offer. This historic environment provides a unique setting for a lively mix of markets, independent and specialist retailers and diverse cafe and restaurant offer. The district's attractive countryside and rural settlements also offer opportunities to greatly expand and diversify the experience, bringing employment, health and recreation opportunities for residents and visitors alike. Key aims are:

Deleted: e

Deleted: 4.9

- To enhance the current reasons for visiting St Albans district, improve the quality of the visit for the tourist and increase the number of attractions for potential visitors to the district.
- Growing visitor economy businesses – through various measures such as developing and improving visitor attractions, and developing high quality accommodation and value for money facilities of all types.
- Maximising the visitor economy market – partly by developing proactive and effective marketing of the district as a premier tourist destination including the development of the recently launched dedicated visitor website.
- Improving the visit – by improving transport infrastructure to allow visitors better access throughout the district, including developing coach management initiatives.

The Council has set up a Project Team to achieve a 5 year strategy (2013 – 2018) to improve the management and promotion of the visitor offer by the council and key partners. Work will include consideration of initiatives to link St Albans with visitor locations outside the district, such as the Harry Potter Studio Tour at Leavesden.

- 8.16 The Council fully supports and is actively engaged in developing and managing a vibrant tourist economy and enticing visitor offer throughout the district. The term ‘visitor economy’ covers a range of activities including day trips, weekend visits and longer stays for business and domestic purposes as well as for holidays and leisure pursuits. Overnight hotel/bed and breakfast accommodation in the district provides over 900 bedrooms but there are still deficiencies in certain sectors and locations to address. Visitor economy has the potential to be an even stronger economic driver for the district but needs to balance the sometimes competing needs, demands and aspirations of visitors and local residents.
- 8.17 Within a sensitive historic location such as St Albans, visitor management and the provision of tourist facilities and services is important; an over stimulation of demand can, if not carefully controlled, lead to adverse impacts on local communities and the natural and historic environment leading to a negative effect on the very attractions that visitors come to see. Nevertheless, there is scope to boost the local visitor economy by the provision of high quality overnight accommodation in accessible locations.

Deleted: 4.9

Policy SLP23 – Visitor Economy

The Council will support initiatives which:

- balance the needs of the visitor economy, the community and visitors;
- increase the visitor economy;
- promote St Albans City and District as a quality visitor destination;

The Council supports the retention and enhancement of existing visitor economy facilities and encourages the growth of a sustainable local visitor economy sector. The Council will ensure that for any proposal there is no significant adverse impact on local communities, heritage assets or the natural or built environment.

Hotels and Overnight Accommodation

- 8.18 There has been little recent investment in hotel development throughout the district, but current and short term future requirements are supported by existing venues around the district. The number of hotel rooms in St Albans City centre is relatively low. St Albans has no modern budget hotel; there is insufficient provision of budget/hostel accommodation and no modern boutique hotel. Over the medium to long term there is a need for more four star hotel bed provision, especially one with conference facilities, as the economy improves and vacancy levels fall. Existing and potential B&B/budget accommodation and modern boutique hotels in existing built up areas in village locations are particularly supported, as they add to village vibrancy and their important localised tourist economies.
- 8.19 Hotel occupancy rates in the district have fallen in the recent recession, but over the medium and long term have been above the regional average. St Albans has long been one of the most sought after locations in the East of England region for hotel development.
- 8.20 The preferred location for budget and boutique hotels is within existing built up areas, with priority being in or near the City centre. The preferred location for a four star hotel with conference facilities is also within existing built up areas, with priority being in or near the City centre, but such a development requires a substantial area of land and it may not be possible for a suitable urban site to be found. As there is no short term need, the DLP process will examine need, suitability and deliverability, with the key locational consideration being proximity to and positive interaction with the City centre of St Albans.

Deleted: 4.9

Policy SLP24 - Visitors, Hotels and Overnight Accommodation

The Council will support the provision of a range of quality overnight accommodation including:

- Budget and boutique hotels in the existing built up areas across the district, with priority being in or near the City centre.
- Four star hotel with conference facilities. The DLP process will examine need, suitability and deliverability, with the key locational consideration being close proximity to and positive interaction with the City centre of St Albans.

9. A Connected District with Ease of Movement for All

Strategic Objective 5 - A connected district with ease of movement

Providing a sustainable movement network which encourages the use of public transport, walking and cycling and which improves access to services, jobs and facilities, particularly for rural settlements and those without the use of private vehicles. Traffic congestion will be managed to an acceptable level while parking will be appropriately priced and located. Improvements will be made to air quality and reductions made in carbon emissions.

Deleted: 4

Deleted: The p

Deleted: sion of

Introduction

- 9.1 Hertfordshire County Council (HCC), as the Transport Authority, is a key partner in the provision of a sustainable movement network across the district and therefore most schemes are reliant on HCC funding.
- 9.2 The third Hertfordshire Local Transport Plan (LTP3) is a statutory document which sets the County-wide framework for achieving the vision of a better transport system for all. It provides the framework for transport's support of the economic, environmental and social development of Hertfordshire over the period to 2031. LTP3 contains the following vision statement:

“To provide a safe, efficient and resilient transport system that serves the needs of business and residents across Hertfordshire and minimises its impact on the environment.”

Deleted: 4.9

9.3 The County Council aims to achieve this vision by:

- Making best use of the existing network and introducing targeted schemes where improvements are required so as to deliver a reliable and readily usable transport network to benefit local business, encourage further economic growth and allow access for all to everyday facilities.
- Promoting and supporting sustainable travel to reduce growth in car traffic and contribute to improved health and quality of life for residents with a positive impact on the environment and on the wider challenge of reducing transport's contribution to climate change.

9.4 LTP3 includes the following commitment statement by the District Council:

“The City and District is committed to the development and implementation of sustainable transport and development policies and strategies to promote the economic, social, historic and general environment of the district. St Albans is an historic city and the policies and strategies have to be sympathetic to the conservation of the historic environment as well as promoting the economic, social and general wellbeing of the district.”

9.5 As well as LPT3, the main documents addressing transport planning issues in the district include:

- Urban transport plan (UTP) for St Albans.
- UTP for Southern St Albans (covering the villages south of the City).
- UTP for Harpenden.
- St Albans City Vision.
- St Albans Rural Vision.
- St Albans Park and Ride Initial Scoping Study.
- City and District of St Albans Walking Strategy.
- City and District of St Albans Cycling Strategy.
- St Albans Traffic Modelling Study.

9.6 Further UTPs and area plans are being considered for other parts of the district, covering more of the village areas.

Key issues

9.7 In the light of the evidence in the documents mentioned above and the results of public consultation on the SLP, a number of key issues are identified below.

Deleted: 4.9

- Location of new development
- Trains
- Buses and community transport
- Walking and Cycling
- Roads
- Traffic Congestion
- Park and Ride
- Car Parking
- Travel Plans
- Air Quality
- Luton Airport

Location of new development

- 9.8 New development should be concentrated in accessible locations, which reduce the need to travel, encourage walking and cycling and where good public transport services exist or can be provided to St Albans city centre, Harpenden or London Colney town centres, the railway stations and the main employment areas.

Trains

- 9.9 First Capital Connect carried out improvements to St Albans City Station and introduced the first 12-coach services to run on the Thameslink route in December 2011. The 'Thameslink Programme' will greatly improve train travel to and from London, and beyond with direct links to Gatwick, Brighton and Eurostar at St Pancras International. The programme will improve train capacity as follows:

- 3,200 extra seats in the peak (Bedford to Brighton and Sutton Loop combined)
- 1,200 off-peak weekday seats (between London St Pancras International and Bedford)
- almost 3,900 more Saturday seats (between London St Pancras International and Bedford)

- 9.10 The Government and Hertfordshire County Council have announced plans to convert the Abbey railway line between Watford Junction and St Albans Abbey stations into a light rail operation. This will involve more frequent services, with services at least half hourly and possibly more frequently than this. This is strongly supported by this Council. The potential to extend the line to Watford town centre and St Albans city centre and to add additional stops will be examined during the plan period. Public realm improvements will be sought between the town centre and the Abbey station to encourage the use of this enhanced service and provide sustainable alternatives. The Abbey Flyer together with the Croxley Rail

Deleted: ;

Deleted: 4.9

Link project will improve rail infrastructure to the south west of the district and deliver economic benefits to the area.

Buses and Community Transport

- 9.11 A 'Quality Network Partnership' branded as 'Network St Albans' has been set up by St Albans Council, Hertfordshire County Council and local bus and train operators. This unique and innovative partnership is an exemplar of multi-agency / stakeholder working. It aims to improve transport usage and quality and to reduce congestion in and around St Albans and forms a major strand of the District and County's sustainable transport strategy. Successes of the QNP include securing Department for Transport funding for many projects, including providing new hybrid, low emission buses and significant improvements in bus service frequency and reliability. The Memorandum of Understanding states:

"The QNP aims to provide residents of and visitors to St Albans with a real and attractive alternative for many of the journeys currently made by private car. This will help St Albans City and District Council to cut traffic related road congestion, air and noise pollution, help businesses in the city recruit and retain staff, and maintain the city's position as an attractive visitor destination".

- 9.12 There is a need for improved bus links from the rural areas to the towns and City. Existing bus services are sometimes expensive, unreliable, infrequent and do not sufficiently provide an effective alternative to the car. Diversity of bus service provision, including minibuses, community transport and shuttle buses, is encouraged. Work undertaken through the QNP and the taxi operators will be broadened to investigate and address district wide issues following the success within the City.
- 9.13 The delivery of the proposals and opportunities identified in all current and future UTPs will be supported. At present, the most significant proposal is the Harpenden Urban Transport Plan proposal for accessibility improvements to and at Harpenden railway station. This includes improved road access, additional car parking and improved facilities for pedestrians, cyclists and buses.

Walking and Cycling

- 9.14 The Plans referred to at 9.2 and 9.5 above contain various measures to encourage walking and cycling. Key actions in the Council's Walking Strategy include encouraging walking to school and work, promoting walking as a leisure activity, improving rights of way, addressing the needs of disabled people and designing new development to encourage walking.

Deleted: 4.9

Policy SLP27 on Green Infrastructure also includes proposals which will help to facilitate increased levels of walking and cycling.

- 9.15 Key priorities in the Council's Cycling Strategy include new cycle routes, secure cycle parking (e.g. at stations) and other facilities, such as shared use of paths in public parks. One stretch of the National Cycleway Network is still to be constructed; part of Route 57 between Harpenden and Wheathampstead. A new link is intended between Route 6 and Route 57 in Harpenden, where there is currently no direct link.
- 9.16 Policy SLP27 on Green Infrastructure also includes proposals which will help to facilitate increased levels of walking and cycling. A key project is the Green Ring around St Albans. This is an orbital route around the City, connected by spokes to the centre. Further connections will be sought to assist in the comprehensive coverage of the district.

Roads

- 9.17 The district has very high levels of car ownership, but most of the road network has a relatively low capacity. Due to the narrow and complicated layout of the historic streets of the City centre, towns and villages, bottlenecks occur at peak hours causing serious traffic congestion with accompanying air quality problems.
- 9.18 The development proposed in the SLP, plus anticipated growth in background traffic levels (including the impact from growth in adjoining local authority areas and impact from the possible increased operations at Luton Airport) is expected to result in increased pressure on the local highway network. However, the evidence including in the Urban Transport Plans and the St Albans Traffic Modelling Study indicates that traffic levels will not necessitate the provision of major new transport infrastructure, when considered at a national scale. The rising trend towards more home-working, both full and part time, the rising trend in fuel prices and the significant extra capacity on the rail network to be delivered through the Thameslink Programme may additionally ameliorate impacts on the road network. Deleted: p
- 9.19 Nevertheless, there is expected to be increased stress on the highway network, particularly in St Albans City centre, at key junctions on the main roads into St Albans and in Harpenden town centre. Therefore some road improvement measures, such as junction improvements, will be required. Deleted: and t
These will be complemented by a range of sustainable movement and public realm enhancements and traffic management measures. Deleted: .
- 9.20 HCC has engaged consultants to prepare a county-wide Inter Urban Route Strategy. This will cover all modes of travel, not just travel by road. The Deleted: 4.9

Inter Urban Route Strategy will include advice on whether major improvements should be made to the inter-urban road network.

9.21 Over the medium to long term, there is a need to complete the Hemel Hempstead North-East Relief Road, to relieve congestion in and around the Maylands Business Park and facilitate development in east Hemel Hempstead (in Dacorum Borough and St Albans District) and on the Spencers Park site, both within this district and in Dacorum. Whilst most of the relief road is within Dacorum Borough, the final section of this road is likely to involve land in St Albans District, north of the Buncefield Oil Depot. This will be addressed as part of joint working with Dacorum, including joint working on the East Hemel Hempstead AAP.

9.22 In addition LTP3 includes policies to develop and maintain strategies for roads within the urban and inter urban network which relate to the different hierarchy levels so that a road's character is developed to best suit the function which it has to fulfil. In this way the large volume of through traffic, particularly heavy goods vehicles, are concentrated on the main roads and are kept away from local roads. The local roads can then be developed to give greater priority and safety to pedestrians, cyclists, shoppers and residents. It also aims to ensure that freight is able to move quickly and efficiently through the county without compromising the natural environment, the economy, or affecting the quality of life for residents.

9.23 Two policy areas have been highlighted which: seek to prevent direct access on the primary routes from new development and; in relation to heavy goods movements, seek to reduce impact on the environment and congestion in both town centres and rural areas. These reflect local priorities and have been included in Policy 25 below.

Deleted: s

Deleted: s

Traffic Congestion

9.24 Traffic congestion and its consequent impact on the amenity of residents is a serious issue across the district and will be addressed in all settlements. One of the Council's main transport aims is to improve conditions in the City centre, in order to upgrade the environment for shopping, working, living, leisure and cultural activities. Within the City centre, there is a need to manage traffic, ease congestion, enhance the public realm and improve conditions for buses, cyclists and pedestrians. Coach management initiatives will be explored.

Park and Ride

9.25 The St Albans Park and Ride Initial Scoping Study has concluded that large scale park and ride would be unlikely to be successful in St Albans. Mini park and ride car parks on sites close to the edge of the City could be considered. There would however be no dedicated bus services. Instead

Deleted: 4.9

car parks would have to be served by existing bus routes, which may run more frequently.

Car Parking

- 9.26 The Council's forthcoming new parking strategy will include proposals to manage parking across the district. The DLP will contain a policy setting out levels of parking for broad classes of development. This policy will be based on a zonal approach which reflects the character and accessibility of different parts of the district. The parking strategy referred to above will also be taken into account.

Travel Plans

- 9.27 Travel plans attached to approved development schemes can have an important part to play in encouraging the use of sustainable forms of transport, particularly for journeys to work and school. The council will expect travel plans to be submitted with all major residential and non-residential developments and other developments, where appropriate.

Air Quality

- 9.28 Congestion and heavy traffic flows are responsible for poor air quality in parts of the district. Three Air Quality Management Areas (AQMAs) have been declared at the Peahen Junction, St Albans; at Hemel Hempstead Road, St Albans, and adjacent to M1 junction 7 and at M25 near Radlett Road and Frogmore. The Council is investigating measures to improve the air quality at these locations with other key stakeholders, including the Highways Agency, to enable the AQMA designations to be removed or mitigated. Such measures include provision of low emission buses, traffic management, provision of cycling and walking infrastructure and urban greening being delivered through Policy SLP27 on Green Infrastructure, including measures such as tree planting, green roofs and green walls.

Deleted: ,

Deleted: ,

Luton Airport

- 9.29 Luton airport is located approximately 5 miles to the north of Harpenden. Its current operations impacts on the wider district, but more intensively on the northern part of the district. The impacts include noise disturbance under the flight paths especially at night and traffic congestion along the A1081, A5183 and B653. Of key importance in regard to Luton Airport operations and proposals are the potential to bring economic benefits to the area and to widen consumer choice; whilst also appropriately addressing any potential detrimental impacts on this district such as on noise levels, road traffic, rail capacity and the environment.

Deleted: i

Deleted: ,

Deleted: 4.9

Policy SLP25 – Transport Strategy

The Council supports measures which ensure the free flow of traffic, reduce traffic congestion and encourage more sustainable travel, by public transport, walking and cycling, including:

Deleted: ;

New Development

- New development should be concentrated in accessible locations which will reduce the need to travel, encourage walking and cycling and where good public transport services can be provided or connect into, maintain and improve the existing transport infrastructure and hierarchy.

Public Transport

- Conversion of the Abbey Line to light rail operation, with increased frequency of services and possible extension of services to St Albans City centre
- Accessibility improvements to and at Harpenden railway station
- Improved bus services, particularly in St Albans and from the villages to St Albans, Harpenden, London Colney and adjoining districts
- Additional bus routes / services to ensure connectivity with development at Broad Locations
- The introduction of hybrid and other low emission buses

Walking and Cycling

Proposals to increase walking and cycling, including completion of National Cycleway Route 57 between Harpenden and Wheathampstead, and the Green Ring around St Albans.

Deleted: ,

Roads

- Road improvements, such as junction improvements, to secure environmental and transportation benefits, particularly in St Albans City centre, at key junctions on the main roads into St Albans and in Harpenden town centre
- Completion of the Hemel Hempstead North-East Relief Road, partly through St Albans District
- On primary routes, direct access for new or existing development shall not be permitted except where special circumstances can be demonstrated. This should include consideration of alternative options and viability assessment.
- To reduce impact on the environment and congestion in both town centres and rural area, Heavy Goods Vehicles shall be encouraged to use the primary route network by means of signing and traffic management measures shall be introduced, where appropriate, to restrict inappropriate heavy goods movements on certain other routes, where problems persist.

Deleted: 4.9

Car parking

Car parking standards will be based on a zonal approach and set out in the DLP

Travel plans

Travel plans are required for all major residential and non-residential developments and other developments, where appropriate. Such plans will set out measures to encourage people to use alternative modes of travel to the single occupancy car. Detailed guidance will be included in the DLP.

Air quality

Measures to improve air quality along major roads, including enabling the removal or mitigation of the Air Quality Management Area (AQMA) designations.

10. A healthy and strong environment

Strategic Objective 6 – A healthy and strong environment for a healthy and strong population

~~Identifying, protecting and managing an integrated and cohesive network of green and blue open spaces and routes, to increase biodiversity, help mitigate and adapt to climate change and encourage active and healthy lifestyles. The district's non-urban areas will be protected and enhanced in order to help bring built development and natural land into greater environmental balance.~~

Deleted: An integrated and cohesive network of green and blue open spaces and routes will be i
Deleted: ied
Deleted: ed
Deleted: ed

10.1 As noted in Chapter 2, paragraph 2.21, detailed work on the environmental capacity of the district has been undertaken. This has reached a number of conclusions, including that the ecological footprint of the district reveals an unsustainable pattern of consumption and that ecosystem services are under increased pressure. It is vital that policies on the natural environment and green infrastructure set out a strong framework which helps conserve and promote enhancements to the local environment over the plan period.

Natural Environment

10.2 The district has a rich natural environment, with attractive landscapes and many environmental assets, including habitats of high biodiversity value. It is important that these habitats and the species which inhabit them are conserved and where possible enhanced.

Deleted: 4.9

- 10.3 At a broad scale the district's landscape can be divided between that of a Chilterns character to the north-west and that of a Northern Thames Basin character to the south-east. It is a diverse landscape with a series of broad valleys containing the Rivers Ver, Colne and Lea with ridges and plateau between including areas of broadleaved woodlands, commons and arable farmland.
- 10.4 At the district scale, Landscape Character Assessment (LCA) has led to the definition of 26 Landscape Character Areas wholly or partly in the district. For each character area, the LCA includes a strategy and specific guidelines for managing change. Landscapes to the north of the district are generally of a better condition and strength of character than those to the south, some of which have been harmed by minerals extraction and disrupted by major transport corridors.
- 10.5 Areas of landscape importance within the district are defined as 'Landscape Conservation Areas'. Much of the Upper Lea Valley north east of Harpenden together with land around Wheathampstead and a tract between St Albans and Harpenden is currently defined as a Landscape Conservation Area. Further work will be undertaken to review the boundaries to respect the Landscape Character Areas and clearly define areas of intrinsic character and beauty for the DLP.
- 10.6 Biodiversity is the variety of life on earth or in a specified region or area. The district contains two Sites of Special Scientific Interest (SSSI), 6 Local Nature Reserves and 197 County Wildlife Sites (including over 40 areas of Ancient Woodland). In addition, the district also has a number of veteran trees and many ancient hedgerows as well as chalk streams, wetlands, woodlands, heathlands and grassland habitats. Waterways are particularly important in terms of their biodiversity value in the district. The district also contains some areas of geological importance, including a Site of Special Scientific Interest (SSSI) at Moor Mill Quarry West which is designated for its Earth Heritage importance.
- 10.7 The district contains large areas of grades 2 and 3 agricultural land (grades 1, 2 and 3a are classified as the best and most versatile). Agricultural land in the district is of great importance in ensuring a sustainable place to live for current and future generations. The Council is keen to encourage local food production schemes and initiatives, which help to reduce the district's carbon footprint and maximize its self-sufficiency.
- 10.8 The Hertfordshire Biodiversity Action Plan (BAP) and the Habitat Survey for St Albans City and District form the main local sources of information and guidance on biodiversity and nature conservation sites. The BAP includes a series of action plans to protect and enhance key habitats and species across the county. Four Key Biodiversity Areas or 'Living Landscapes' are

Deleted: 4.9

identified in the district: the Upper Lea Valley and River Ver/Gorhambury in the north and the Upper Colne Valley and Bricket Wood/Moor Mill in the south.

10.9 Many species have statutory protection and the Hertfordshire Biological Records Centre maintains an important database which includes records of such species.

10.10 Residential gardens are often a rich source of biodiversity, the value of which has been highlighted through the Environmental Capacity work. Residential gardens also play an important role in slowing down the flow of water, reducing flood risk and reducing the urban heat island effect. Close proximity to green space also has many social benefits including physical and psychological health benefits, social inclusion, education and sense of place. However, residential gardens have formed a large part of the Council's housing land supply for a long period of time and will continue to form some part in the future (the proportion of gardens lost by development can be an important factor when considering harm to the local area). When considered against policies in the Development Plan as a whole, where development of residential garden land would cause harm to the local area it will be refused.

10.11 A Strategic Flood Risk Assessment (SFRA) covering St Albans and three neighbouring districts has been produced. Large scale flood risk is not a significant constraint (when considered at a national scale); however, some parts of the district are susceptible to small scale flooding from various sources. The risk of flooding is also expected to increase with climate change. Therefore, it is important that appropriate planning control and management is achieved in the wider river basins in order to help reduce this risk.

Deleted: ¶
¶

10.12 Sustainable Urban Drainage Systems (SUDS) is an approach which can help to reduce the risk of flooding by slowing the speed at which water reaches the river channel or other discharge point. SUDS also have the potential to be integral to landscape proposals and to help enhance amenity space and biodiversity. Techniques to achieve this can range in scale from the creation of balancing ponds and swales to the use of permeable paving and green roofs. Hertfordshire County Council are the SUDS Advisory Body (SAB) for the district and will be producing guidance on the national requirements SUDS scheme need to meet for approval and adoption.

Deleted: D

Policy SLP26 - Natural Environment

The condition and strength of character of the district's landscapes will be conserved, managed, and where appropriate enhanced, with reference to

Deleted: 4.9

Landscape Character Assessment (LCA), Historic Landscape Characterisation (HLC) and Heritage Partnership Agreements.

The Council will seek across the district a net gain in biodiversity to be achieved or the replacement with a habitat of a higher quality than that lost through development. Designated sites of importance for biodiversity and sites of local importance will be conserved, enhanced and managed with opportunities to link or reconnect wildlife habitats taken. The objectives of the Hertfordshire Biodiversity Action Plan and the Habitat Survey for St Albans City and District will be implemented. Areas of importance for geodiversity in the district will be conserved and managed.

When considered against policies in the Development Plan as a whole, where development of residential garden land would cause harm to the character and environment of the local area it will be refused.

Where development on agricultural land is proposed a detailed survey (approved by DEFRA or an independent expert) should be submitted which includes an assessment of grading. Development resulting in the loss of the most versatile agricultural land (grades 1, 2 or 3a) will normally be refused. An exception may be made where it can be evidenced that there is an overriding need for the development and there is no alternative land of lower quality which could be reasonably used.

Watercourses and their settings will be conserved for their biodiversity value and to improve water quality to meet the standards set out in River Basin Management Plans. The Council will seek to avoid development in areas at risk from flooding in accordance with national policy and ensure that water and flood risk are fully addressed by new development. Sustainable Urban Drainage Systems (SUDS) should be incorporated in new development schemes, including flood storage areas if and when necessary. River restoration, including naturalisation and the removal of culverts, is encouraged.

Deleted: are

Green Infrastructure

- 10.13 Green Infrastructure is “a network of multi-functional green space, urban and rural, which is capable of delivering a wide range of environmental and quality of life benefits for local communities” (NPPF). The population of the district is set to increase over the next 15 years and it is vital that existing and new communities are healthy, with sufficient accessible green infrastructure.
- 10.14 There are many benefits of green infrastructure, including social, environmental and economic ones and it is central to ensuring that communities are sustainable. Social benefits include physical and psychological health benefits, social inclusion, education and sense of

Deleted: 4.9

place. Environmental benefits can include enhancing biodiversity, ecosystem services and adaptation and mitigation of climate change. Economic benefits include encouraging investment and creating an attractive place to live, work and shop.

10.15 The strong economic benefits of the exceptional overall quality of the environment in the district are particularly recognised in the role played by Green Infrastructure in supporting the highly entrepreneurial culture and very well educated workforce.

10.16 St Albans district has a number of existing high quality areas of green infrastructure. These include:

- The substantial and very well used Commons namely Bernards Heath, Bricket Wood, Colney Heath, Gustard Wood, Harpenden, Kinsbourne Green, Nomansland and Redbourn. These are attractive and popular green spaces and are important for recreation and wildlife. Many of the Commons provide important green links from the centre of settlements to the open countryside. The Council actively works with the Town and Parish Councils and other stakeholders to maintain and facilitate public access to these Commons.
- Local green spaces, playing pitches and parks including Rothamsted Park, Verulamium Park and Clarence Park.
- The Council's Tree Strategy is an important document in the protection, enhancement and maintenance of the district's tree stock. There are over 600 TPOs, some with woodland designation within the district, as well as trees protected within conservation areas. Deleted: will be
- The many valued heaths and grasslands, in Wheathampstead, Sandridge, Park Street and Chiswell Green.
- The watercourses and green corridors, of the Rivers Ver, Lea and Colne, the Nickey Line, Upper Lea Valley Walk and Alban Way. These are important corridors for both recreation and biodiversity and have potential for further enhancement.
- Areas of woodland (including over 40 areas of ancient woodland). These are important areas for wildlife and in some cases recreation.
- Registered and Locally Listed Historic Parks and Gardens, such as Gorhambury and Napsbury.
- Private garden land in both urban and rural areas.

10.17 There are also a number of ongoing green infrastructure projects which

Deleted: 4.9

will significantly improve the district's green infrastructure network:

- Watling Chase Community Forest is one of 12 national community forests. It covers an area of over 70 square miles (181 sq. km) to the north of London, including the southern part of St Albans District. The vision in the Watling Chase Plan aims to achieve widespread landscape improvement with woodland planting and increased opportunities for nature conservation, leisure and recreational access.
- In 2008 the Woodland Trust announced plans to create Heartwood Forest, a 340 hectare wood on land between Sandridge and Wheathampstead. Planting began in 2009 and when fully planted, will be the largest new native forest in England. This is an exciting opportunity for the district, which will become an important area for wildlife, low intensity recreation and quiet enjoyment of the countryside.
- Ellenbrook is a new country park being created on part of the former de Havilland aerodrome site east of Smallford, near Hatfield. The country park was devised and is being delivered through cross-boundary co-operation between this Council and Welwyn & Hatfield Council, primarily through a Section 106 agreement. The plans for the country park include hay meadows, woodland, cattle grazing, footpaths and a bridleway.
- The St Albans 'Green Ring' will connect inwards to make the City centre more accessible, encourage park and walk schemes, cycling and connect around to link spaces, such as the Alban Way, creating more opportunities for recreation. Connecting outwards, the Green Ring will use routes such as the River Ver and Hertfordshire Way to make better connections with the countryside.
- Improvements to Verulamium Park in accordance with the approved Masterplan.

10.18 A key feature of the district is its rich heritage and archaeology. The sensitive incorporation of heritage and archaeological features into green infrastructure projects such as the St Albans Green Ring will be positive in strengthening local identity and facilitating interpretation of the past.

10.19 A green urban environment is of vital importance to ensuring an attractive and pleasant place to live, work and shop. Trees and vegetation in an urban setting can help improve the local microclimate; help wildlife to thrive in urban habitats; and provide health and wellbeing benefits.

10.20 The proposed Green Infrastructure Network for the district is shown in Figure 13. This has been taken from the St Albans District Green

Deleted: 4.9

Infrastructure Plan, which is an important document in guiding green infrastructure improvements over the plan period. It incorporates existing green infrastructure assets, ongoing projects and proposed new projects and opportunity zones. There are some areas with a deficiency in Green Space in the district and areas where upgrading or improved management of existing green spaces is needed. The Council's evolving Green Spaces Strategy is also important in guiding improvements in this regard.

- 10.21 Sport is integral to the health and quality of life of sustainable communities. The ongoing maintenance of existing and the provision of new high quality facilities for outdoor sport and recreation across the district, ranging from playing pitches and pavilions to outdoor pools, parks and open spaces, is essential.

Deleted: and improved availability of

Policy SLP27 - Green Infrastructure

The Council will actively support the creation, enhancement and conservation of and access to the district's green infrastructure network.

The Council will refuse proposals for development on existing green space or recreational land unless it can be clearly demonstrated that it is no longer required or that the proposal provides at least equal or better replacement facilities that are convenient for users. The Green Spaces Strategy and Playing Pitch Strategy will help inform the Council's decision on availability, quality, need and utility.

Opportunities to deliver the creation and enhancement of green infrastructure should be taken with reference to the Strategic and District Green Infrastructure Plans. New development should refer to these documents when preparing proposals and plan positively for provision across boundaries (particularly in terms of green infrastructure connections and need).

Identified green infrastructure deficiencies in the south of the district will be particularly addressed with the delivery of policies SLP13, SLP14 and SLP16.

The Council encourages:

- Implementation of the Watling Chase Community Forest Plan.
- Establishment of Heartwood Forest in accordance with the Environmental Statement as approved by the Forestry Commission.
- The creation and promotion of the St Albans 'Green Ring' route as set out in the City Vision.
- The creation and promotion of other 'Green Ring' routes in other settlements.

Deleted:

Deleted: 4.9

- Improvements to the green spaces throughout the district in line with the Green Spaces Strategy.
- The enhancement of Verulamium Park in accordance with the approved Conservation Management Plan and Park Development Plan.
- The creation of new green recreation and/or wildlife routes at all scales.
- Greening of the urban environment, including tree planting, green roofs and green walls.

Renewable and Low Carbon Energy

10.22 One of the key priorities is to reduce the district's impact on the environment, encourage green sustainable travel and work towards carbon neutral status. In providing new homes, jobs and infrastructure there is a need to reduce the district's carbon footprint. A target of 3% reduction in carbon dioxide emissions year on year from 2006 to achieve a 60% reduction by 2025 is set out in the Nottingham Declaration on Climate Change. The Council is seeking energy efficient buildings with low running costs across all types of development, including homes, businesses, leisure, retail and infrastructure.

Deleted: d

Deleted: c

Deleted: c

Deleted: Ultimately, t

10.23 The overall approach to renewable energy and to sustainable construction will be to support renewable energy infrastructure and to ensure that development is designed and built as energy efficiently as possible, before considering renewable energy use (Figure 15 The Energy Hierarchy).

10.24 There are a number of energy opportunities which exist in the district (see energy opportunities plan below). The technologies with the greatest potential in the district are wind, district heating and micro generation. There is also significant potential for the district to utilise its parks and woodlands, including Heartwood Forest, as a fuel source for district heating (DH)/Combined Heat and Power (CHP).

10.25 Areas with high energy demand and carbon dioxide emissions from existing buildings are concentrated in the higher density urban areas. These are considered as feasible locations for decentralised low carbon energy infrastructure. Energy opportunities, particularly district heating to serve existing and new development, will need to be considered by developers when bringing forward development sites. Given the comprehensive redevelopment opportunities that exist in the City centre, there is potential opportunity to deliver CHP in this location

10.26 There are significant opportunities to deliver DH or CHP through large scale development. Therefore, any such developments, including those proposed in the SLP and DLP, will have to maximise realistic opportunities for delivering decentralised energy technology.

10.27 Opportunities for wind energy have also been identified on the Energy Opportunities Plan. As these are all in the Green Belt, any proposals would require clear justification to be taken forward by demonstrating very special circumstances. This may include the wider environmental benefits associated with increased production of energy from renewable sources.

10.28 The potential benefits of proposals for new renewable energy facilities, whether small scale, large scale, standalone or as part of a development

Deleted: 4.9

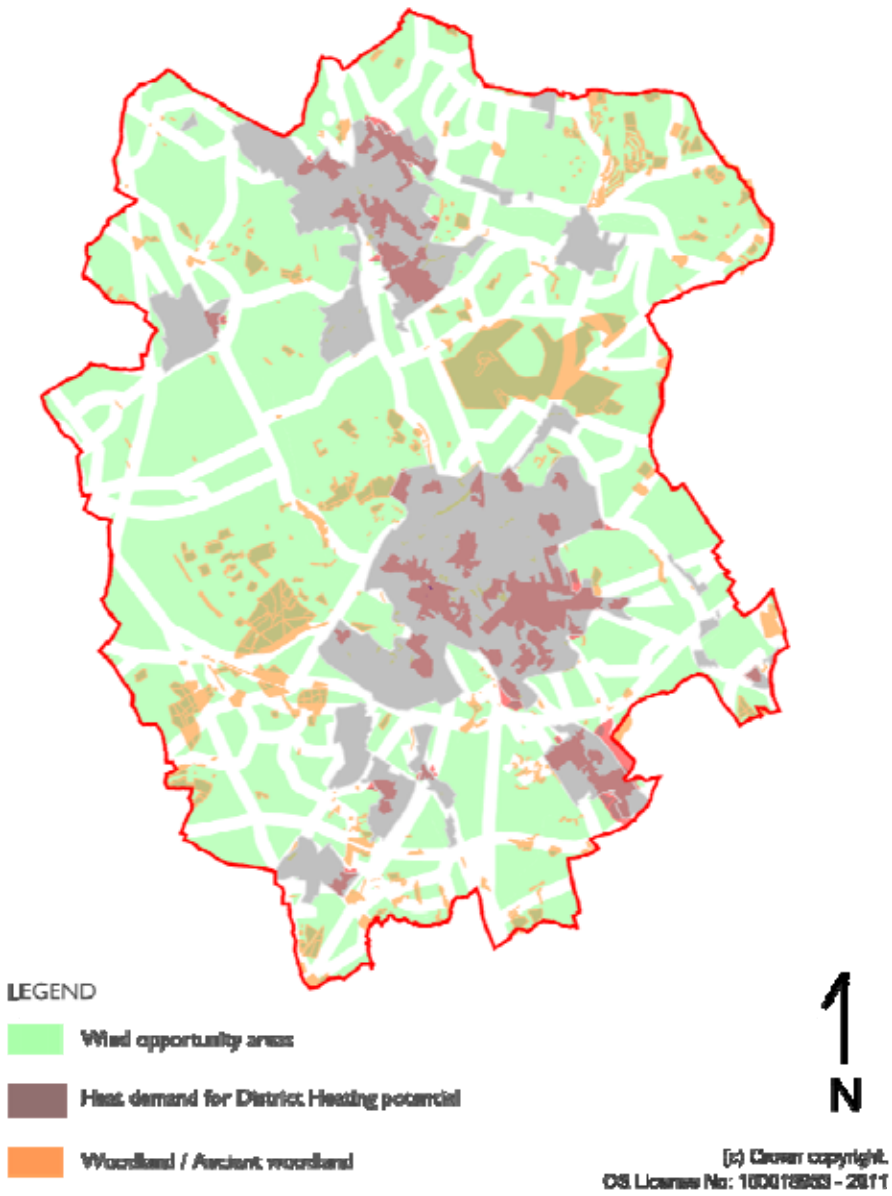

package, will be assessed against all potential environmental and other disbenefits, including noise, vibration and impact on landscape and historic character.

10.29 Standalone energy schemes are normally considered suitable where there is already an existing mix of land uses, or where a mix of land uses will be created through future development, which will benefit from energy from a renewable or low carbon energy source. Existing heat and electricity demand maps can be viewed in the Hertfordshire Renewable and Low Carbon Energy Study.

Deleted: d

Deleted: 4.9

Figure 14: Energy Opportunities Plan

Deleted: 4.9

Policy SLP28 - Renewable and Low Carbon Energy

Development related renewable energy proposals

All new development of 10 homes or more (gross) and 1000sqm for non residential development (gross) will provide opportunities to deliver renewable and low carbon energy supply to nearby existing development and planned new development. All development proposals must demonstrate how they have considered and maximised opportunities identified on the energy opportunities plan (figure 14) and that they have made best use of the most appropriate design and technology.

Standalone renewable energy proposals

Such proposals will be supported in or close to locations where there is sufficient demand arising from a mixture of land uses (existing and planned). If such proposals would have substantial disbenefits, the Council will consider whether any environmental or other harm is clearly outweighed by the benefits, including those arising from increasing renewable energy supply and reducing carbon dioxide and other emissions.

10.30 There are a number of other associated benefits of reducing carbon emissions and mitigating and adapting development for climate change. These include: reducing the use of natural resources, including finite fossil fuels; supporting the local economy through promoting the use of locally sourced materials; reducing susceptibility to rises in energy prices; and ensuring that buildings have a prolonged, adaptable and flexible life span.

Deleted: n

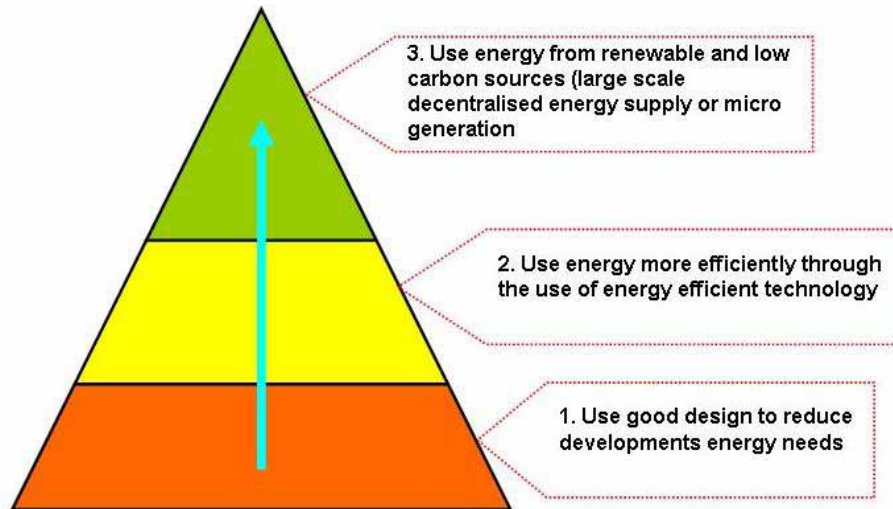

10.31 The Government's target is for all new homes to be zero carbon by 2016 and all new non residential development to be zero carbon by 2019. The zero carbon targets will be achieved through the Code for Sustainable Homes and progressive changes to Building Regulations.

10.32 In achieving the targets the first priority is to work through the energy hierarchy and improve the efficiency of the buildings, prior to the use of renewables. This will ensure the most efficient use of renewable technology to meet a development's energy needs. Following the Energy Hierarchy will ensure that through design and build there will be less energy demand and less demand for the amount of renewable energy infrastructure required to meet the energy needs of a development. This will assist in cost effective solutions to be used in achieving requirements of Policy SLP28.

Deleted: '

Deleted: 4.9

Figure 15: The Energy Hierarchy

10.33 The Hertfordshire Low and Zero Carbon study assessed the application of different code level targets. Given the energy and heat demands and the energy opportunities available in the district, requiring one code level in advance of the changes to the building regulations is considered feasible. Furthermore, the St Albans Development Economics Study found that requiring Code level 4 would not hinder site viability. For non residential development applicants will be required to achieve the equivalent Building Research Establishment Environmental Assessment Method (BREEAM) rating.

10.34 Whilst changes to the building regulations are planned, changes only reflect the energy and water aspects of the Code. There a number of other ways in which development can contribute to sustainability. These include increasing the amount of insulation, reducing water consumption, implementing green roofs to reduce water run off and increase carbon recycling, retaining and enhancing biodiversity delivering ecological benefits. The Council will therefore seek all design categories of the Code to be fulfilled.

Deleted: 4.9

10.35 The Hertfordshire local authorities have produced the 'Building Futures' guide. This provides practical guidance for developers in preparing development proposals and for planning officers in assessing proposals on how to make new development more sustainable. Topics include water, waste, energy, air, noise, design and the efficient use of land, climate change adaptation and materials. The guide is updated on an ongoing basis with additional modules continually added.

Policy SLP29 – Sustainable Design and Construction

All new developments will meet the levels of the Code for Sustainable Homes and non residential equivalent as set out below. To demonstrate how sustainable design and construction has been fully considered in the location, design, construction and future use of their proposal, a sustainability checklist or statement will need to be completed and submitted with all such applications.

Step changes in the Code for Sustainable homes and non residential equivalent (BREEAM)		
	Residential development	Non residential development
2010	Code Level 3 (25% reductions*)	25% reductions* (BREEAM Very good**)
2013	Code Level 4 (44% reductions*)	44% reductions* (BREEAM Excellent**)
2016	Code Level 6 (Zero Carbon)	44% reductions* (BREEAM Excellent**)
2019		Zero Carbon (BREEAM Outstanding**)

* Reductions in building emissions rate compared to the target emission rate, defined by Building Regulations 2006.

** Equivalent to BREEAM rating.

All new development should take into account the potential to incorporate renewable energy technologies and have the ability to be connected to a decentralised renewable or low carbon energy supply in the future.

11. Infrastructure

Deleted: 4.9

Strategic Objective 7 – Delivering Infrastructure

The Council will take appropriate measures throughout the plan period to ensure that an historic infrastructure deficit is redressed and that new development fully addresses current and future physical, social and green infrastructure needs.

- 11.1 The prosperous and sustainable future for the district outlined in previous chapters depends on the delivery of new infrastructure and the enhancement of existing infrastructure to support communities. This infrastructure provision encompasses green, physical, social and community networks, facilities and services which are delivered by public, private and third sector suppliers.
- 11.2 An infrastructure deficit has grown in the district through a variety of factors including the lack of infrastructure funding secured alongside development in the past. A result of this is that some key infrastructure and services within the district are stretched through the cumulative impact of development.

Infrastructure Delivery Plan and Schedule

- 11.3 In order to ensure that appropriate infrastructure is provided and that this deficit does not worsen, the Council is producing an Infrastructure Delivery Plan (IDP). The IDP sits alongside the SLP and analyses the spatial strategy and what the impacts on networks, facilities and service needs will be. A key output of this plan is the Infrastructure Delivery Schedule (IDS), included at Appendix 5, which comprises of a list of infrastructure projects essential to the delivery of the SLP policies over the plan period. In order to implement SLP policies, the IDP has identified that there are no “showstopper” items of infrastructure essential to deliver any one specific element of the strategy. Instead it is the cumulative and interconnected impacts of the strategy that will require maintained, enhanced and new infrastructure. The Hertfordshire Infrastructure Investment Strategy (HIIS) identified that Hertfordshire has a measurable infrastructure deficit totaling over £2.4bn. This is the financial shortage against standards required for infrastructure and what is currently provided. The majority of this comes from highways and education infrastructure need.
- 11.4 The IDS reflects both current priorities and planned delivery over time. The schedule is based upon up to date information and is not intended to be exhaustive. Delivery in the earlier years of the strategy is more detailed and is based on capital programmes. As the process of implementation will constantly be responding to local circumstances and utilising new avenues and drivers to prioritise spend over the life of the SLP, the IDS will be updated on a regular basis and will be web based. Where the delivery of infrastructure requires the provision of sites this will be set out in the

Deleted: 4.9

forthcoming Detailed Local Plan. The IDS includes the following details of each of the principle infrastructure projects:

- Infrastructure Type/Project
- Description, Purpose and Location of Project
- Lead Delivery Body/Delivery Mechanism in LDF
- Phasing and Timing
- Estimated Costs and Funding arrangements
- Risk and Contingencies

Planning Obligations and the Community Infrastructure Levy (CIL)

- 11.5 On site works and developer obligations, either in kind works or financial contributions, are required. They will provide and enhance infrastructure, services and facilities that support sustainable development, mitigate the impact of development and make development acceptable in planning terms. Currently these obligations are secured through section 106 (S106) agreements.
- 11.6 As a two tier authority area, obligations essential to support development are sought from developments by both Hertfordshire County Council (strategic infrastructure) and St Albans District Council (local level). These are set out below.

Hertfordshire County Council:

- Highways
- Passenger Transport
- Education (nursery, primary and secondary)
- Fire and Rescue
- Libraries
- Youth Facilities
- Child and Adult care including Special Needs
- Waste and Utilities
- Green Infrastructure
- Health Facilities

St Albans District Council:

- Affordable Housing
- Child Play Areas
- Open Space Improvements
- Sports, Leisure and Recreation Facilities
- Community Safety
- Site Specifics including some Utilities.

Deleted: 4.9

11.7 The Council already has in place comprehensive measures to ensure that S106 contributions are fully accounted for as part of a transparent process. It is necessary to ensure that agreements include a sum to cover the cost of negotiation, delivery and monitoring. This will be essential as contributions are extended to include lower thresholds for intervention on affordable housing. It is important to consider that for some developments there may be viability constraints such that there may be a degree of trade-off between different priorities, such as between maximising levels of Affordable Housing and maximising levels of provision of social or community infrastructure.

11.8 In relation to housing and commercial growth-related infrastructure, utility providers will be required to demonstrate that adequate provision is available and/or additional capacity will be met through the development at no cost or detriment to existing local occupiers.

11.9 The Hertfordshire Infrastructure and Investment Strategy (HIIS) investigated the Community Infrastructure Levy (CIL) model at some length. CIL became law under Section 206 of the 2008 Planning Act. The only authorities that may charge under the Act are local planning authorities. The Council supports and is involved with a Partnership Model approach. This approach looks at the delivery of Strategic Infrastructure elements across the county. This Partnership Model is between all the district / borough authorities in Hertfordshire and the County Council.

Deleted: C

Deleted: .

11.10 A greater proportion of development will be required to make CIL contributions than under the existing planning obligations system. The aim is that the cumulative impacts of large and small developments are mitigated. When setting a CIL level and charging schedule the Council will balance: the requirements of infrastructure need arising from development; affordable housing; securing site specific obligations; and development viability.

Deleted: '

11.11 The use of planning obligations and S106 agreements is likely to continue to be an important element in infrastructure provision in the short term until a CIL is adopted (likely late 2013/2014). After this planning obligations will still be used for site specific mitigations and for non-infrastructure requirements.

11.12 The Council may continue to utilise its own capital funds to meet identified local infrastructure needs and will actively explore opportunities to forward fund important new developments through appropriate mechanisms. Such mechanisms could include Local Enterprise Partnerships (LEP), Business Improvement Districts (BIDs), Local Asset Backed Vehicles (LABVs) and the use of the New Homes Bonus.

Deleted: 4.9

Policy SLP30 - Delivery of Infrastructure

The Council supports the programmed delivery of a wide range of infrastructure and related facilities within the district to meet identified needs arising from new development and to address the infrastructure deficit. This will be set out in the Infrastructure Delivery Plan and Schedule which will be updated through the plan period.

Where new development or redevelopment creates a need for new or improved physical, social or green infrastructure, the Council will require financial or in kind contributions to enable the provision of the additional and improved infrastructure. Obligations and contributions will be sought through S106 agreements and, in future, through a combination of S106 agreements and CIL.

Developers with the Council and partners will explore reasonable opportunities to address any historical infrastructure deficit.

Where piecemeal development forms part of larger development areas they will be treated as part of the wider area and expected to make infrastructure contributions as part of the wider development.

Deleted: ¶

12. Plan Delivery

12.1 The Council will not deliver all the elements of the Strategic Local Plan itself. It will work with partners and investors and require interventions to ensure that the plan is delivered over the plan period. One of the strengths of the Local Plan lies in the additional benefits gained from the inter-relationships with other plans, policies and programmes created and delivered by and with partners. For minerals and waste planning, Hertfordshire County Council is the planning authority. The District Council will work with HCC on such issues that affect the district, including waste developments and minerals extraction. Key delivery partners include the following:

- St Albans Strategic Partnership
- Hertfordshire County Council and other Hertfordshire District Councils
- Town and Parish Councils
- The Hertfordshire Local Enterprise Partnership
- Local and Regional Infrastructure Providers
- Developers, Landowners and Consultants
- Businesses and retailers
- Charities and Community Groups
- Hertfordshire Local Nature Partnership

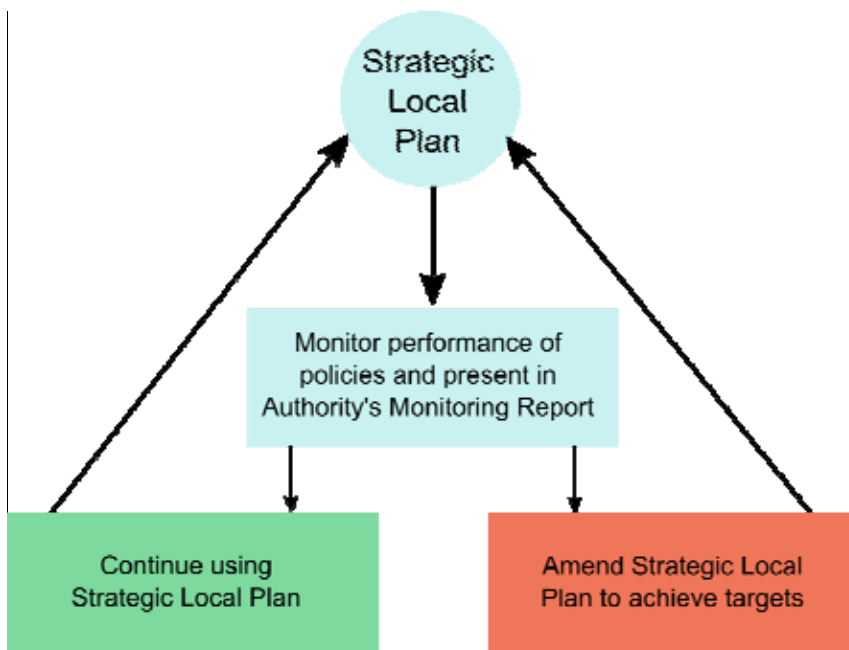

Formatted: Bullets and Numbering

Deleted: A future

Deleted: 4.9

DRAFT 10.10.12

- 12.2 It is very important that the objectives, milestones and policies contained in the Local Plan are able to be monitored. Monitoring allows the effectiveness of the Local Plan to be measured and allows the Council to react to changing circumstances.
- 12.3 Appendix 4 sets out the monitoring framework for measuring the effectiveness of the SLP policies and whether the plan objectives are being met. This progress will be set out in the annually produced Authority's Monitoring Report (AMR). It will present an analysis of the effectiveness of the policies in the SLP and identify relevant actions to be taken where policies and targets are not being met. The AMR will also report on infrastructure delivery as set out in the Infrastructure Schedule.
- 12.4 The monitoring arrangements will allow the Council to react to changing circumstances. The SLP is a flexible document and following a Plan-Monitor-Manage approach the AMR will help identify any areas for review or where further work is required, as indicated in the diagram below.

- 12.5 A full review or amendment of the SLP is only one of the potential actions that can be taken if the Plan is not being implemented as intended. Other actions that can be taken include the preparation of Supplementary Planning Documents and re-prioritising infrastructure and plans to deliver development.

Deleted: 4.9

- 12.6 As well as monitoring targets, it is important to set out key milestones to be achieved by the delivery of the plan, across the plan period. They have been developed to help monitor the delivery progress of the SLP along its critical path up to 2028. The plan period and milestones have been broken down into three 5 year phases, as set out in Appendix 5.
- 12.7 The housing trajectory will be a key item in the AMR which will be used to monitor progress against the Local Plan housing requirement of 250 dwellings per annum and will demonstrate a land supply to meet this going forward. The most recent AMR contains the up-to-date housing trajectory.

Appendix 1: Schedule of 1994 Local Plan Review Policies Superseded by Strategic Local Plan Policies

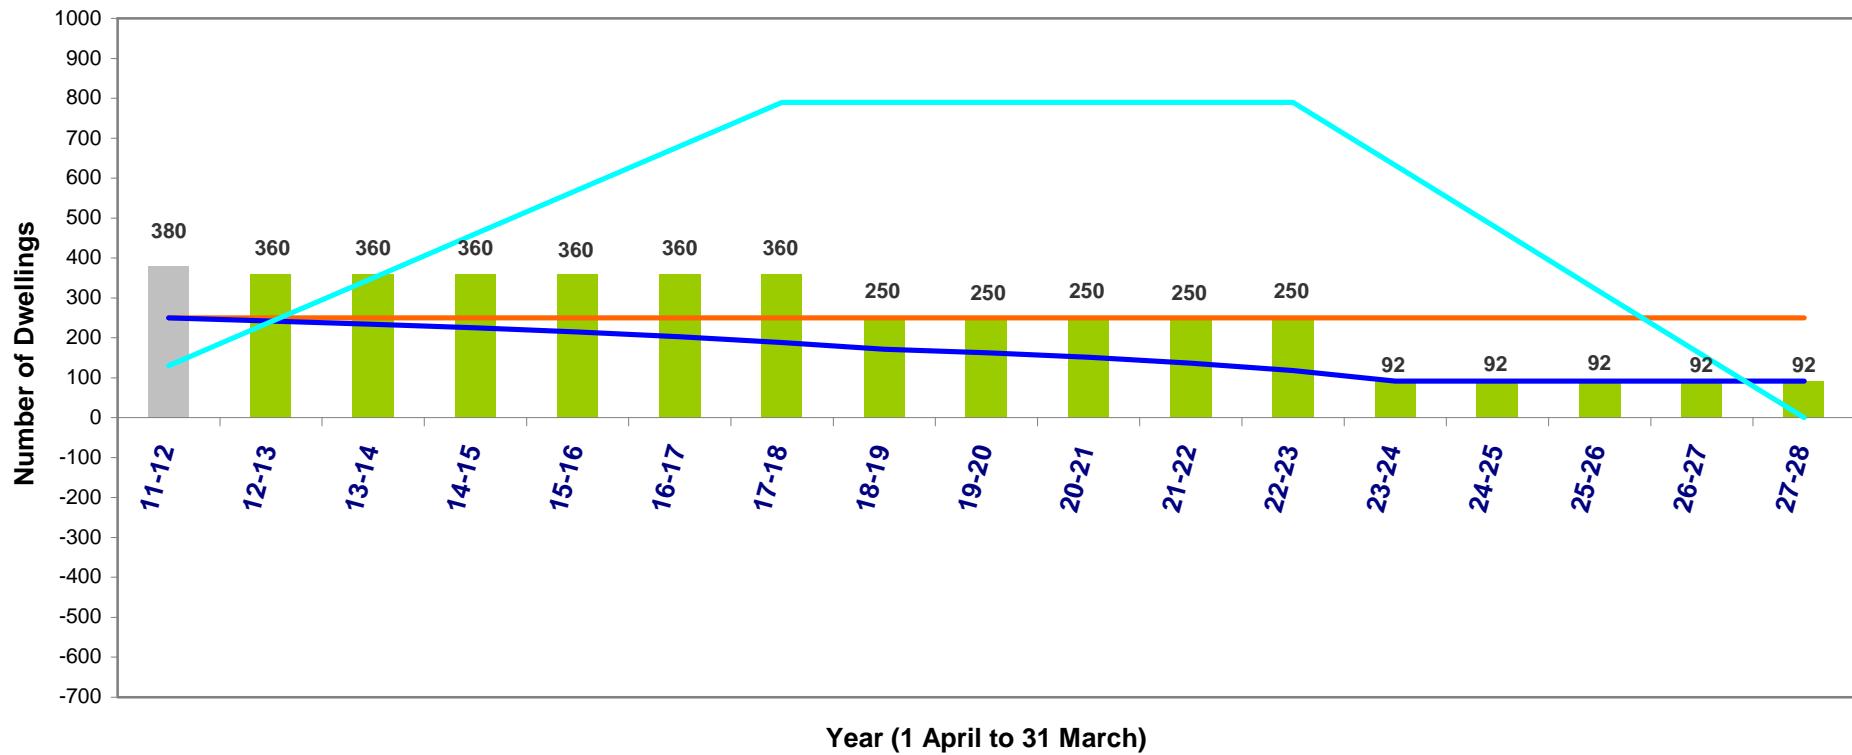

The District Local Plan Review policies listed here are being replaced by the corresponding Strategic Local Plan (SLP) policy. The saved 1994 District Local Plan review policies not listed here will remain part of the statutory development plan for St Albans. Their replacement or saved status will be examined in the preparation of site allocations and development management policies to be contained in the forthcoming Detailed Local Plan. When the SLP is adopted an updated list of saved 1994 District Local Plan policies will be published.

District Local Plan Review Policies	Replacement Strategic Local Plan Policy
2 Settlement Strategy	SLP1 The Spatial Strategy
7A Affordable Housing in Towns and Specified Settlements	SLP9 Affordable Housing
19 Overall Employment Strategy	SLP15 Economic Prosperity and Employment
33 Hemel Hempstead North East Relief Road	SLP25 Transport Strategy
51 Shopping and Service Uses, Overall Strategy parts (i) a) and b) only	SLP18 Retail Hierarchy of Centres
60A Hospital Services	SLP7 Community, Sport & Recreational Facilities
65 Education Facilities	SLP6 Educational Facilities
67 Public Meeting Rooms and Facilities	SLP7 Community, Sport & Recreational Facilities

Appendix 3: Glossary of Terms

Formatted: Font: 18 pt

The Glossary has status only as a guide to planning terminology used in the Strategic Local Plan and should not be used as a source for statutory definitions.

Affordable Housing

Social rented, affordable rented and intermediate housing, provided to eligible households whose needs are not met by the market. Eligibility is determined with regard to local incomes and local house prices. Affordable housing should include provisions to remain at an affordable price for future eligible households or for the subsidy to be recycled for alternative affordable housing provision.

Affordable Rented Housing

Affordable rented housing is let by local authorities or private registered providers of social housing to households who are eligible for social rented housing. Affordable Rent is subject to rent controls that require a rent of no more than 80% of the local market rent (including service charges, where applicable).

Air Quality Management Area (AQMA)

Since 1997 local planning authorities have been carrying out a review and assessment of air quality on their area. The aim of the review is to assist authorities in carrying out their statutory duty to work towards meeting the national air quality objectives. If a local authority finds any places where the objectives are not likely to be achieved, it must declare an Air Quality Management Area there.

Authorities Monitoring Report (AMR)

An annually produced document which assesses the implementation of planning documents. It also measures the extent to which policies in the local plan are being successfully implemented.

Biodiversity

A measure of the variety of, and number of individuals, within different species of plants, animals and other life forms that are present in a defined area.

Building Research Establishment Environmental Assessment Method (BREEAM)

BREEAM is the world's most widely used environmental assessment method for buildings. BREEAM assesses buildings against a set criteria and provides an overall score which will fall within a band providing either a PASS, GOOD, VERY GOOD, EXCELLENT or OUTSTANDING rating. See <http://www.breeam.org/>

Deleted: ;

Code for Sustainable Homes

The Code measures the sustainability of a new home against nine categories of sustainable design, rating the 'whole home' as a complete package. The Code uses a 1 to 6 star rating system to communicate the overall sustainability

Deleted: Draft 14.9.12

performance of a new home. The Code sets minimum standards for energy and water use at each level.

Combined Heat & Power:

Combined heat and power (CHP) integrates the production of usable heat and power (electricity), in one single, highly efficient process. CHP generates electricity whilst also capturing usable heat that is produced in this process. This contrasts with conventional ways of generating electricity where vast amounts of heat are simply wasted.

Deleted: is

Community Infrastructure Levy

The Community Infrastructure Levy (CIL) will be a new charge which local authorities in England and Wales will be empowered, but not required, to charge on most types of new development in their area. CIL charges will be based on simple formulae which relate the size of the charge to the size and character of the development paying it. The proceeds of the levy will be spent on local and sub-regional infrastructure to support the development of the area.

Deleted: n

Conservation Areas

Areas of special architectural or historical interest, where development is more tightly restricted than elsewhere in order to preserve and enhance their special character and qualities. These areas are designated by the Local Planning Authority under Section 69 of the Planning (Listed Buildings and Conservation Areas) Act 1990, which gives them statutory recognition and protection.

Development Plan

This includes adopted Local Plans, neighbourhood plans and the London Plan, and is defined in section 38 of the Planning and Compulsory Purchase Act 2004. (Regional strategies remain part of the development plan until they are abolished by Order using powers taken in the Localism Act. It is the government's clear policy intention to revoke the regional strategies outside of London, subject to the outcome of the environmental assessments that are currently being undertaken.)

Density

A measure of the intensity of development of a plot of land.

Development Management

The process whereby a local planning authority receives and considers the merits of a planning application and whether it should be given permission, having regard to the development plan and all other material considerations.

District Heating:

A district heating scheme comprises a network of insulated pipes used to deliver heat, in the form of hot water or steam, from the point of generation to an end user.

Deleted: Draft 14.9.12

District Local Plan Review 1994

~~The~~ previous development plan for the Council. It still contains policies saved under the 2004 Planning & Compulsory Purchase Act that are used to guide and assess development proposals. These will be partially replaced by the policies in this Strategic Local Plan (see Appendix 1)

Deleted: is

Deleted: the

Economic Development

Development, including those within the B Use Classes, public and community uses and main town centre uses (but excluding housing development).

Equality Impact Assessment

An Equality Impact Assessment examines a proposed or existing policy, plan, strategy or project to identify what effect its implementation may have on different groups in the community. It can anticipate and recommend ways to avoid any discriminatory or negative consequences for a particular group, and it also enables demonstration of the potential benefits for equality target groups arising from the proposed policy or project.

Evidence Base

The information and data gathered by a local authority to demonstrate the soundness of the policy approach set out in local development documents, and including assessment of the physical, economic, and social characteristics of an area.

Green Belt

Areas of land where there is a strong presumption against development except that which falls into certain limited categories. The purposes of Green Belts are to check the unrestricted sprawl of urban areas, stop the joining of neighbouring towns, safeguard the surrounding countryside, preserve the special character of the area, assist in urban regeneration and to serve as a recreational resource.

Green and Blue Corridors

Green corridors are linear routes that can encourage sustainable transport modes such as walking and cycling and provide important links for nature helping to increase biodiversity. Blue corridors include rivers, streams, canals and other waterways and can provide similar benefits to green corridors, such as providing sustainable transport routes and benefits to biodiversity. With careful management they can both also help to reduce flood risk.

Greenfield

Land which has not been developed before, other than for agriculture or forestry buildings or buildings associated with parks, recreation grounds and allotments.

Deleted: Draft 14.9.12

Green Infrastructure

A network of multi-functional green space, urban and rural, which is capable of delivering a wide range of environmental and quality of life benefits for local communities.

Gypsies and Travellers

Persons of nomadic habit of life whatever their race or origin, including such persons who on grounds only of their own or their family's or dependants' educational or health needs or old age have ceased to travel temporarily or permanently, but excluding members of an organised group of travelling show people or circus people travelling together as such.

Historic Parks and Gardens

A park or garden of special historic interest. Graded I (highest quality), II* or II. Designated by English Heritage.

Housing Association

A not-for-profit body offering for rent independent homes owned by registered social landlords.

Housing Trajectory

This provides a position statement comparing past performance on housing supply with anticipated future rates of housing development. The trajectory is updated each year as part of the Annual Monitoring Report.

Infrastructure

A collective term which relates to all forms of essential services like electricity, water, and road and rail provision. It also includes social and green infrastructure.

Intermediate Housing

Homes for sale and rent provided at a cost above social rent, but below market levels subject to the criteria in the Affordable Housing definition above. These can include shared equity (shared ownership and equity loans), other low cost homes for sale and intermediate rent, but not affordable rented housing.

Key Diagram

A diagram (not on an Ordnance Survey base map) to show the general location of key elements of the Strategic Local Plan; this would include, for example, the broad locations for key development in the area.

Lifetime Homes

Homes which are built to an agreed set of national standards that make housing more functional for everyone including families, disabled people and older people. They also include future-proofing features that enable cheaper, simpler adaptations to be made when needed.

Listed Building

A building of special architectural or historic interest. Listed buildings are graded I, II* or II with grade I being the highest. Listing includes the interior as well as the exterior of the building, and any buildings or permanent structures (e.g. wells within its curtilage). Designated by English Heritage.

Local Enterprise Partnership:

A body, designated by the Secretary of State for Communities and Local Government, established for the purpose of creating or improving the conditions for economic growth in an area.

Local Planning Authority

The public authority whose duty it is to carry out specific planning functions for a particular area. All references to local planning authority apply to the district council, London borough council, county council, Broads Authority, National Park Authority and the Greater London Authority, to the extent appropriate to their responsibilities.

Local Plan

The plan for the future development of the local area, drawn up by the local planning authority in consultation with the community. In law, this is described as the development plan documents adopted under the Planning and Compulsory Purchase Act 2004. Current core strategies or other planning policies, which under the regulations would be considered to be development plan documents, form part of the Local Plan. The term includes old policies which have been saved under the 2004 Act. In St Albans District, a new Local Plan will be made up of the Strategic Local Plan and the forthcoming Detailed Local Plan.

Major Developed Site (MDS)

Green Belts contain some major developed sites such as factories, collieries, power stations, water and sewage treatment works, military establishments, civil airfields, hospitals, and research and education establishments. These substantial sites may be in continuing use or be redundant. They often pre-date the town and country planning system and the Green Belt designation. These sites remain subject to development control policies for Green Belts.

Open Space and Recreational Land

All open space of public value, including not just land, but also areas of water (such as rivers, canals, lakes and reservoirs) which offer important opportunities for sport and recreation and can act as a visual amenity. Includes village greens, allotments, children's playgrounds, sports pitches and municipal parks.

Planning Obligation

A legally enforceable obligation entered into under section 106 of the Town and Country Planning Act 1990 to mitigate the impacts of a development proposal.

Deleted: Draft 14.9.12

Previously Developed Land (PDL)

Land which is or was occupied by a permanent structure, including the curtilage of the developed land (although it should not be assumed that the whole of the curtilage should be developed) and any associated fixed surface infrastructure. This excludes: land that is or has been occupied by agricultural or forestry buildings; land that has been developed for minerals extraction or waste disposal by landfill purposes where provision for restoration has been made through development control procedures; land in built-up areas such as private residential gardens, parks, recreation grounds and allotments; and land that was previously-developed but where the remains of the permanent structure or fixed surface structure have blended into the landscape in the process of time.

Proposals Map

A map of an Ordnance Survey base map which shows where policies in DPDs apply. For an interim period it will also show where saved policies from Local Plans apply. It needs to be revised (if necessary) as each different DPD is adopted.

Registered Social Landlord (RSL)

Not-for-profit bodies that provide low-cost housing for people in housing need and are registered with the Housing Corporation under the 1996 Housing Act.

Renewable Energy

Renewable energy covers those energy flows that occur naturally and repeatedly in the environment e.g. solar and wind.

Settlement Hierarchy

Settlements are categorised into a hierarchy based on the range of facilities, services and employment opportunities available, plus the ability to access other higher ranking settlements by public transport.

Site of Special Scientific Interest

A site identified under the Wildlife and Countryside Act 1981 (as amended by the Countryside and Rights of Way Act 2000) as an area of special interest by reason of any of its flora, fauna, geological or physiographical features (e.g. plants, animals, and natural features relating to the Earth's structure).

Social Rented Housing

Rented housing owned by local authorities and private registered providers for which guideline target rents are determined through the national rent regime. It may also be owned by other persons and provided under equivalent rental arrangements to the above, as agreed with the local authority or with the Homes and Communities Agency

Statement of Community Involvement (SCI)

The Statement of Community Involvement sets out the processes to be used by the local authority in involving the community in the preparation, alteration and continuing review of all local development documents and development control decisions. It is an essential part of the Local Development Framework.

Strategic Flood Risk Assessment (SFRA)

This report provides an overview of the methodology, assumptions, uncertainties, tasks undertaken and the links to the wider sustainability appraisal process. It provides policy recommendations and guidance for the application of the Sequential Test, the preparation of flood risk assessments and the use of sustainable drainage systems, within the Council's administrative boundary.

Strategic Housing Land Availability Assessment (SHLAA)

A Strategic Housing Land Availability Assessment should:

- Assess the likely level of housing that could be provided if unimplemented planning permissions were brought into development.
- Assess land availability by identifying buildings or areas of land (including previously developed land and Greenfield) that have development potential for housing, including within mixed use developments.
- Assess the potential level of housing that can be provided on identified land.
- Where appropriate, evaluate past trends in windfall land coming forward for development and estimate the likely future implementation rate.
- Identify constraints that might make a particular site unavailable and/or unviable for development.
- Identify sustainability issues and physical constraints that might make a site unsuitable for development.
- Identify what action could be taken to overcome constraints on particular sites.

Strategic Housing Market Assessment (SHMA)

A Strategic Housing Market Assessment should:

- Estimate housing need and demand in terms of affordable and market housing.
- Determine how the distribution of need and demand varies across the plan area, for example, as between the urban and rural areas.
- Consider future demographic trends and identify the accommodation requirements of specific groups such as, homeless households, Black and Minority Ethnic groups, first time buyers, disabled people, older people, Gypsies and Travellers and occupational groups such as key workers, students and operational defence personnel.

Supplementary Planning Document (SPD)

Documents which add further detail to the policies in the Local Plan. They can be used to provide further guidance for development on specific sites, or on particular issues, such as design. Supplementary planning documents are capable of being a material consideration in planning decisions but are not part of the development plan.

Deleted: Draft 14.9.12

Sustainability Appraisal (SA)

Assessment of the social, economic, and environmental impacts of the policies and proposals contained within the Local Development Framework.

Sustainable Community Strategy

A strategy document required by the Local Government Act 2000 to be prepared and implemented by a local planning authority with the aim of improving the social, environmental and economic well being of its area by co-ordinating the actions of local public, private, voluntary and community sectors. Responsibility for producing a community strategy may be passed to a strategic partnership, which includes local authority representatives. Also known as a Sustainable Community Strategy.

Sustainable Urban Drainage System (SUDS)

An alternative approach to the traditional ways of managing runoff from buildings and hardstanding. They can reduce the total amount, flow and rate of surface water that runs directly to rivers through stormwater systems.

Deleted: from

Travel Plan

A long-term management strategy for an organisation or site. It seeks to deliver sustainable transport objectives through identified actions and is set out in a document that is regularly reviewed.

Deleted: that

Deleted: articulated

Windfall Site

Sites which have not been specifically identified as available in the Local Plan process. They normally comprise previously-developed sites that have unexpectedly become available.

Deleted: Draft 14.9.12

Appendix 4: Monitoring Framework

Policy	Associated Strategic Objective	Measurable action / indicators to measure performance	Target
SLP1 The Spatial Strategy	1	Proportion of housing development delivered in Towns, Villages, Green Belt Settlements and the Rest of the Green Belt	Monitor trend
		Proportion of employment development delivered in Towns, Villages, Green Belt Settlements and the Rest of the Green Belt	Monitor trend
SLP2 Metropolitan Green Belt	1	Area of Green Belt land	No net loss of Green Belt other than proposed changes to the detailed boundary at local level (DLP)
		New dwellings in the Green Belt	Monitor trend
		New employment floorspace in the Green Belt	Monitor trend
SLP3 Historic Environment and Townscape Character	1	Number of buildings considered "at risk"	No "at risk" grade I or II* listed buildings
		Completion of Conservation Area Statements	Increase number of completed statements <u>over plan period</u>
SLP4 Urban Design	1	Building for Life score for new dwellings	Requirement to be set in a new DLP policy
SLP5 Mixed and Sustainable Communities	2	Index of Multiple Deprivation	Monitor number of <u>St Albans District</u> lower super output areas in the bottom 30% <u>nationally and</u> within Hertfordshire
		District crime statistics	Report crime statistics in AMR
		New community facilities & infrastructure in more deprived wards	Monitor trend
SLP6 Educational Facilities	2	Net gain of primary and secondary forms of entry	Monitor <u>delivery of additional places against need</u>
SLP7 Community, Sport and	2, 6	Delivery of new community and leisure facilities as set out in infrastructure delivery schedule	Monitor <u>delivery of new facilities against planned timescales</u>

Deleted: trend against need

Deleted: against planned timescales

Policy	Associated Strategic Objective	Measurable action / indicators to measure performance	Target
Recreational Facilities		Loss of community facilities through new development	No loss of facilities unless re-provision elsewhere
SLP8 Local Housing Target/Requirement and Provision	2	Net additional dwellings	4,250 net additional dwellings built between 2011 and 2028 (250 per annum)
		Five year land supply	Maintain a five year supply of deliverable sites
		New dwellings on previously developed land	<u>Target to be developed alongside site allocations in the DLP. Monitor trend in interim period.</u>
SLP9 Affordable Housing	2	Percentage of gross annual completions that are affordable	40% of new dwellings to be affordable
		Tenure mix of affordable housing completions	60% affordable/social rent and 40% intermediate (except where agreed)
		Percentage of residential applications contributing to affordable housing	100%
SLP10 Housing Size, Type and Mix	2	Dwelling size (no. of beds) for market / social rented housing	Analyse trends against need <u>and requirements of DLP policies</u>
		Housing meeting Lifetimes Homes standards	Specific target to be set out in DLP policy
		Proportion of new dwellings that are apartments or houses	Monitor trend
SLP11 Density of Housing Development	2	Housing density of sites given planning permission	<u>Target to be based on DLP policies. Monitor trend in interim.</u>
SLP12 Gypsies, Travellers and Travelling Show People	2	Net additional pitches for gypsies, travellers and travelling show people	To be delivered through the DLP and informed by assessment of needs.

Deleted: At least 80% on previously developed land

Policy	Associated Strategic Objective	Measurable action / indicators to measure performance	Target
SLP13 Harperbury Hospital/Kingsley Green Mixed Use Broad Location	2	Adoption of Detailed Local Plan and/or Planning Brief	2014/15
SLP14 Oaklands Mixed Use Broad Location	2	Adoption of Detailed Local Plan and/or Planning Brief	2014/15
SLP15 Economic Prosperity and Employment	3	Total amount of completed employment floorspace	Monitor trend
		Total amount of new employment floorspace on PDL	Target to be developed alongside site allocations in the DLP. Monitor trend in interim period
		Loss of employment floorspace on allocated employment sites to non-employment uses	No allocated employment floorspace lost to non-employment uses
		Employment land available – by type	Monitor trend
		Unemployment levels	Monitor trend
		Average weekly wage of St Albans workers	Monitor trend against St Albans residents
SLP16 BRE, Bricket Wood Mixed Use Broad Location	3	Adoption of Detailed Local Plan and/or Planning Brief	2014/15
		Adoption of Detailed Local Plan	2014/15
SLP17 Rothamsted Research Redevelopment	3	Adoption of Detailed Local Plan	2014/15
SLP18 Retail Hierarchy of Centres	3, 4	Town centres use floorspace completed in town centres	Monitor trend & list by centre
SLP19 Major Retail Development &	3, 4	Adoption of Civic Centre Opportunity Site Development Brief	2012

Deleted: At least 80% on PDL

Deleted: No floorspace or net jobs lost to non-employment uses

Deleted: s

Policy	Associated Strategic Objective	Measurable action / indicators to measure performance	Target
Town Centre Development		Amount of retail floorspace on major sites	Monitor trend
SLP20 Creating Attractive and Vibrant Centres	4	Delivery of new and enhanced public realm and public art projects as set out in infrastructure delivery schedule	Monitor against planned timescales
SLP21 Provision and Retention of Cultural Facilities	4	Delivery of new and enhanced cultural facilities as set out in infrastructure delivery schedule	Monitor against planned timescales
SLP22 Cathedral Quarter	4	Delivery of new and enhanced Cathedral Quarter related facilities	Monitor delivery
SLP23 Visitor Economy	4	<u>Delivery of Visitor Economy related programmes, events and developments</u>	<u>Targets to be identified in forthcoming Visitor Economy Strategy</u>
SLP24 Visitors, Hotels and Overnight Accommodation	4	New hotel developments and proposals in the District	No specific target
SLP25 Transport Strategy	5	Breakdown of journeys to work by modal choice	Reduce proportion of journeys by car
		Delivery and implementation of travel plans and transport assessments	Monitor delivery of travel plans
		Delivery of transport infrastructure set out in the infrastructure delivery schedule	Monitor against planned timescales
		Air Quality Management Areas (AQMA) within the district	Reduction in number and size of AQMAs
		Average NO2 and PM10 levels (mg/M3)	Reducing trend
		Hertfordshire CC Local Transport Plan 3 targets and indicators	Monitor trends
		Adoption of the East Hemel AAP	By 2016
		District transport CO2 emissions per capita	Monitor per capita emissions

Deleted: No specific target

Policy	Associated Strategic Objective	Measurable action / indicators to measure performance	Target
SLP26 Natural Environment	6	Number of planning permissions granted contrary to the advice of the Environment Agency on flood and water quality grounds	None
		Sustainable drainage measures incorporated into new developments	Monitor delivery where they are required
		Chemical and biological quality of the district's rivers	Increasing quality. No worsening as a minimum
		Change in areas of biodiversity importance	Increase in area. No net loss as a minimum
		Condition of Sites of Special Scientific Interest	Improve condition. No worsening as a minimum
SLP27 Green Infrastructure	6	Quantity of open space (by type)	No net loss of protected open space due to new development.
		Delivery of green infrastructure projects as set out in infrastructure delivery schedule	Monitor delivery against planned timescales
SLP28 Renewable and Low Carbon Energy	6	Installation of new renewable energy capacity	Monitor installations
		District per capita reduction in carbon dioxide emissions	3% year on year reduction
SLP29 Sustainable Design and Construction	6	Percentage of renewable energy generation in new dwellings	10% from renewable sources
		Code for Sustainable Homes rating for new dwellings	All new dwellings to meet Code Level 3. Required standards will rise over the plan period to Code Level 6 by 2016.
SLP30 Infrastructure Delivery	7	Delivery of infrastructure against timescales as set out in the schedule	No overall target. Monitor against planned timescales.
		Financial contributions received through development	No specific target as dependant on site specific circumstances.
		Adoption of a Community Infrastructure Levy Charging Schedule	Adopt by April 2014

~~Deleted: Monitor trend~~

~~Deleted: The level required will increase with national standards~~

Appendix 5: St Albans City & District Council Infrastructure Delivery Schedule

Planning for the delivery of infrastructure to support the Strategic Local Plan

Good infrastructure planning considers the infrastructure required to support new development alongside the associated costs, funding arrangements and timescales for. This allows for the identified infrastructure to be prioritised in discussions with key local partners. This schedule supports the Infrastructure Delivery Plan by setting out both the currently identified and predicted infrastructure requirements required to support the sustainable delivery of the Strategic Local Plan. Its content has been drawn from responses and negotiations with service providers, public bodies, potential funding sources and by other studies contributing to the evidence base for the Strategic Local Plan (SLP).

Deleted: communities and

The schedule is based upon the best information available at August 2012 and is not intended to be exhaustive. The process of implementation will constantly be responding to local circumstances and utilising new avenues and drivers to prioritise spending over the life of the Strategic Local Plan. Therefore, the Schedule will be updated on a regular basis alongside the Infrastructure Delivery Plan. Strategic Local Plan policies which support and will help deliver the infrastructure projects have been indicated.

The information contained in this schedule will partner the Infrastructure Delivery Plan to support the preparation of a Charging Schedule to collect contributions under the Community Infrastructure Levy (CIL). Further work will involve on the consideration of priorities, a study of development viability and developing a detailed understanding of cost estimates and funding sources.

Infrastructure Type/Project	Project Description, Purpose and Location	Lead Delivery Body and Strategic Local Plan Delivery Policies	Indicative Phasing	Costs and Financing	Land Requirement, Risk and Contingencies
Social & Community Infrastructure					
Health Infrastructure					
GP Facilities	<u>Housing growth over the plan period is</u> roughly estimated to require the need for 5 additional full time GPs and 425m2 of additional GP surgery floorspace. The need for new or expanded GP facilities across the <u>district</u> will be kept under review and will depend on the location of development.	NHS Hertfordshire <u>Herts Valley CCG</u> Policy SLP7 – Community, Sport and Recreational Facilities	Over the plan period	Developer contributions/CIL The estimated cost for 425m2 of GP floorspace is £850,000	New surgery floorspace could be delivered as part of larger new developments.
Health & Community Services	Health and Community Services are focused on providing levels of care for people in their own homes rather than moving people into care homes. However, there still will need to be a level of new places over the plan period. The growth requirement estimates for the types of Health and Community Services	Health & Community Services Hertfordshire County Council (HCC) Policy SLP13 – Harperbury	Over the plan period	Hertfordshire County Council budgets Funding/delivered by development at broad locations identified in the SLP	Facilities could be incorporated as part of mixed use broad locations.

Alban Arena and Maltings Theatre	<p>There are aspirations to redevelop or refurbish the Alban Arena into a larger theatre as part of the Civic Centre redevelopment. Further detail is available in the Civic Centre Opportunity Site SPD.</p> <p>The Maltings Theatre currently is located within the Maltings retail complex. <u>The future use has recently been reviewed and the existing operators lease will continue up to 2014/15. The annual revenue cost of the theatre is currently subsidised.</u></p>	<p>SADC</p> <p>Policy SLP5 - Mixed and Sustainable Communities</p> <p>Policy SLP21 – Provision and Retention of Cultural Facilities</p>	Medium to Long Term 2017 onwards	Costs and funding are currently being investigated. It is likely to involve enabling development on Civic Centre land.	<p>Risk of insufficient funding to carry out works</p> <p>Redevelopment costs of the Alban Arena will be significant.</p>
Harpenden Public Halls	<p>Harpenden Public Halls has a theatre and smaller performance space. They are used for a variety of live performances, film, workshops and local youth theatre. Leisure Connections currently operate the facility on the Council's behalf.</p> <p>In the medium to long terms there is the potential for refurbishing or redevelopment of the public halls. Feasibility studies will be undertaken.</p>	<p>SADC</p> <p>The Harpenden Public Hall</p> <p>Third sector and private enterprise partners Bodies</p> <p>Policy SLP21 – Provision and Retention of Cultural Facilities</p>	Medium to long term 2017 onwards	<p>Current costs and funding sources are unknown.</p> <p>Development contributions and CIL could provide some funding.</p>	<p>Risk of insufficient funding to carry out works.</p>

Deleted: The future use of the theatre is currently the subject of a Council review.
